SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

This Annual Report on Form 10-K ("Report") contains certain forward-looking statements that are subject to various risks and uncertainties. Forward-looking statements are generally identifiable by use of forward-looking terminology such as "may," "will," "should," "potential," "intend," "expect," "seek," "anticipate," "estimate," "approximately," "believe," "could," "project," "predict," "continue," "plan" or other similar words or expressions.

Forward-looking statements are based on certain assumptions, discuss future expectations, describe future plans and strategies, contain financial and operating projections or state other forward-looking information. Examples of forward-looking statements include the following:

projections of our revenues, income, earnings per share, capital structure or other financial items;

descriptions of our plans or objectives for future operations, products or services;

forecasts of our future economic performance, interest rates, profit margins and our share of future markets; and

descriptions of assumptions underlying or relating to any of the foregoing expectations regarding the timing of generating any revenues.

Our ability to predict results or the actual effect of future events, actions, plans or strategies is inherently uncertain. Although we believe that the expectations reflected in such forward-looking statements are based on reasonable assumptions, our actual results and performance could differ materially from those set forth in the forward-looking statements. There are a number of factors, many of which are beyond our control, that could cause actual results to differ significantly from management's expectations. Some of these factors are discussed below.

You should not place undue reliance on any forward-looking statement and should consider the following uncertainties and risk factors, as well as the risks, risk factors and uncertainties discussed elsewhere in this Report and any subsequent Quarterly Reports on Form 10-Q.

Factors that could cause actual results to differ materially from historical results or those anticipated include, but are not limited to:

changes in our investment objectives or investment or operational strategies, including any new lines of business or new products and services that may subject us to additional risks;

volatility in our industry, interest rates and spreads, the debt or equity markets, the general economy or the residential finance and real estate markets specifically, whether the result of market events or otherwise;

events or circumstances which undermine confidence in the financial markets or otherwise have a broad impact on financial markets, such as the sudden instability or collapse of large depository institutions or other significant corporations, terrorist attacks, natural or man-made disasters, or threatened or actual armed conflicts;

changes in general business, economic, market, employment and political conditions, or in consumer confidence and spending habits from those expected;

continued declines in residential real estate and significant changes in U.S. housing prices and/or activity in the U.S. housing market;

Edgar Filing: PennyMac Mortgage Investment Trust - Form 10-K

the availability of, and level of competition for, attractive risk-adjusted investment opportunities in residential mortgage loans and mortgage-related assets that satisfy our investment objectives;

our success in winning bids to acquire loans;

Edgar Filing: PennyMac Mortgage Investment Trust - Form 10-K

Table of Contents

the concentration of credit risks to which we are exposed;

the degree and nature of our competition;

changes in personnel and lack of availability of qualified personnel;

our dependence on our manager and servicer, potential conflicts of interest with such entities, and the performance of such entities;

the availability, terms and deployment of short-term and long-term capital;

the adequacy of our cash reserves and working capital;

our ability to match the interest rates and maturities of our assets with our financing;

the timing and amount of cash flows, if any, from our investments;

unanticipated increases in financing and other costs, including a rise in interest rates;

the performance, financial condition and liquidity of borrowers;

incomplete or inaccurate information or documentation provided by customers or counterparties, or adverse changes in the financial condition of our customers and counterparties;

the quality and enforceability of the collateral documentation evidencing our ownership and rights in the assets in which we invest;

increased rates of delinquency, default and/or decreased recovery rates on our investments;

our ability to foreclose on our investments in a timely manner or at all;

increased prepayments of the mortgages and other loans underlying our mortgage-backed securities and other investments;

the degree to which our hedging strategies may or may not protect us from interest rate volatility;

the effect of the accuracy of or changes in the estimates we make about uncertainties and contingencies when measuring and reporting upon our financial condition and results of operations;

Edgar Filing: PennyMac Mortgage Investment Trust - Form 10-K

our failure to maintain appropriate internal controls over financial reporting;

our ability to obtain and/or maintain licenses and other approvals in those jurisdictions where required to conduct our business;

our ability to comply with various federal, state and local laws and regulations that govern our business;

developments in the secondary markets for our mortgage loan products;

legislative and regulatory changes that impact the mortgage loan industry or housing market;

changes in regulations or the occurrence of other events that impact the business, operations or prospects of government agencies such as Ginnie Mae, the Federal Housing Administration (the "FHA") or the Veterans Administration (the "VA"), or government-sponsored entities such as Fannie Mae or Freddie Mac, or such changes that increase the cost of doing business with such entities;

the Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act") and its implementing regulations and regulatory agencies, and any other legislative and regulatory

Edgar Filing: PennyMac Mortgage Investment Trust - Form 10-K

Table of Contents

changes that impact the business, operations or governance of mortgage lenders and/or publicly-traded companies;

changes in government support of homeownership;

changes in government or government-sponsored home affordability programs;

changes in governmental regulations, accounting treatment, tax rates and similar matters (including changes to laws governing the taxation of real estate investment trusts ("REITs"), or the exclusions from registration as an investment company);

limitations imposed on our business and our ability to satisfy complex rules for us to qualify as a REIT for U.S. federal income tax purposes and qualify for an exclusion from the Investment Company Act of 1940 (the "Investment Company Act") and the ability of certain of our subsidiaries to qualify as REITs or as taxable REIT subsidiaries ("TRSs") for U.S. federal income tax purposes, as applicable, and our ability and the ability of our subsidiaries to operate effectively within the limitations imposed by these rules;

estimates relating to our ability to make distributions to our shareholders in the future;

the effect of public opinion on our reputation; and

the occurrence of natural disasters or other events or circumstances that could impact our operations.

Other factors that could also cause results to differ from our expectations may not be described in this Report or any other document. Each of these factors could by itself, or together with one or more other factors, adversely affect our business, results of operations and/or financial condition.

Forward-looking statements speak only as of the date they are made, and we undertake no obligation to update any forward-looking statement to reflect the impact of circumstances or events that arise after the date the forward-looking statement was made.

PART I

Item 1. Business

The following description of our business should be read in conjunction with the information included elsewhere in this Report. This description contains forward-looking statements that involve risks and uncertainties. Actual results could differ significantly from the projections and results discussed in the forward-looking statements due to the factors described under the caption "Risk Factors" and elsewhere in this Report. References in this Report to "we," "our," "us," "PMT," or the "Company" refer to PennyMac Mortgage Investment Trust and its consolidated subsidiaries, unless otherwise indicated.

Our Company

We are a specialty finance company that invests primarily in residential mortgage loans and mortgage-related assets. We were organized in Maryland on May 18, 2009, and began operations on August 4, 2009. We are managed by PNMAC Capital Management, LLC ("PCM" or our "Manager"), a wholly-owned subsidiary of Private National Mortgage Acceptance Company, LLC ("PNMAC" or "PennyMac") and an investment adviser registered with the Securities and Exchange Commission ("SEC") that specializes in, and focuses on, residential mortgage assets. Most of the loans we hold in our investment portfolio are serviced on our behalf by another wholly-owned PennyMac subsidiary, PennyMac Loan Services, LLC ("PLS" or our "Servicer"). The PennyMac organization was designed specifically to address the opportunities created in the markets for residential mortgage assets.

Edgar Filing: PennyMac Mortgage Investment Trust - Form 10-K

Table of Contents

We conduct substantially all of our operations, and make substantially all of our investments, through PennyMac Operating Partnership, L.P., which we refer to as our operating partnership, and its subsidiaries. A wholly-owned subsidiary of ours is the sole general partner, and we are the sole limited partner, of our operating partnership.

Our objective is to provide attractive risk-adjusted returns to our investors over the long-term, primarily through dividends and secondarily through capital appreciation. Our targeted investments are in the U.S. residential mortgage market. We are presently focused on investing in the historically large volume of distressed mortgage loans currently outstanding and engaging in correspondent lending, whereby we acquire, pool and sell or securitize newly originated mortgage loans.

As a result of our strategy to invest in distressed mortgage assets, many of the mortgage loans in our targeted asset class are purchased at discounts reflecting their distressed state or perceived higher risk of default, as well as a greater likelihood of collateral documentation deficiencies. Prior to the acquisition of loans or other assets, our Manager validates key information provided by the sellers that is necessary to determine the value of the asset. We then seek to maximize the value of the mortgage loans that we acquire. The objective for performing loans is value enhancement through effective "high touch" servicing, which is based on significant levels of borrower outreach and contact, and the ability to implement long-term, sustainable loan modification and restructuring programs that address borrowers' ability and willingness to pay their mortgage loans. Alternatively, for nonperforming loans and real estate assets, the ability to effect property resolution in a timely, orderly and economically efficient manner is essential to generating attractive returns.

Through our management agreement with PCM and our loan servicing agreements with our loan servicers (primarily our affiliate, PLS), we work with borrowers to perform loss mitigation activities. For both performing and nonperforming loans we use loan modification programs (such as the U.S. Departments of the Treasury and Housing and Urban Development's Home Affordable Modification Program ("HAMP")) and workout options that we believe have the highest probability of successful resolution for both borrowers and our Company. Loan modification or resolution may include our accepting a reduction of the principal balances of certain mortgage loans in our investment portfolio. We expect these methods to increase our portfolio of performing loans, reduce default rates and enhance the value of loans in our portfolio. We believe that by using these methods, we can provide borrowers with long-term solutions that address their willingness and ability to pay their mortgage loans. Once we have improved the credit quality of a loan, we intend to monetize the enhanced value through various disposition strategies. When loan modifications and other efforts are unable to cure distressed loans, our objective is to effect timely acquisition and liquidation of the property securing the mortgage loan.

Our Manager specializes in acquiring distressed residential mortgage assets that are sold by financial institutions including banks, thrifts, and non-bank mortgage lenders. Since late 2009, our Manager has seen substantial volumes of nonperforming residential mortgage loans available for purchase from certain U.S. banks at significant discounts to their unpaid principal balances. Our Manager believes that there are several reasons these banks are motivated to sell nonperforming loans, including the following: the ability to release capital tied to nonperforming assets; the ability to relieve strain on their operations resulting from managing nonperforming loans and real estate acquired in settlement of loans ("REO"); the ability to reduce the percentages of their assets that are nonperforming, a key measure monitored by the banks' regulators, investors, and other stakeholders; and the ability for these banks to manage perceptions of the continued drag on their overall performance from legacy distressed assets through controlled sales of nonperforming assets.

We believe that there is a need for mortgage originators to find outlets for government and government-sponsored entity ("GSE") eligible loans and jumbo loans. A jumbo loan is a loan in an amount that exceeds the maximum loan amount for eligible loans under GSE guidelines. These

Edgar Filing: PennyMac Mortgage Investment Trust - Form 10-K

Table of Contents

opportunities include the purchase from mortgage lenders of newly originated mortgage loans that are eligible for (a) sale to participating GSEs such as the Federal National Mortgage Association ("Fannie Mae") and the Federal Home Loan Mortgage Corporation ("Freddie Mac"), and (b) the securitization through Government National Mortgage Association ("Ginnie Mae") (Fannie Mae, Freddie Mac and Ginnie Mae are each referred to as an "Agency" and, collectively, as the "Agencies"). The opportunities also include the purchase and sale or securitization of jumbo conventional loans underwritten to GSE guidelines other than with respect to the maximum loan amount. Accordingly, our Manager, PCM, has built a correspondent lending operation whereby we purchase newly originated GSE eligible, government (insured by the FHA or guaranteed by the VA), and prime jumbo mortgage loans; sell or securitize the GSE eligible loans; sell the jumbo loans to third parties on a servicing-retained basis whereby we retain the related mortgage servicing rights; and/or sell the government loans to PLS, which is a Ginnie Mae approved issuer.

We have elected to be taxed as a REIT for U.S. federal income tax purposes and we intend to maintain our exclusion from regulation under the Investment Company Act. Therefore, we are required to invest a substantial majority of our assets in loans secured by real estate and in real estate-related assets. Subject to maintaining our REIT qualification and our Investment Company Act exclusion, we do not have any limitations on the amounts we may invest in any of our targeted asset classes.

As our Manager, PCM conducts activities including developing our investment strategies, sourcing and acquiring mortgage loans and mortgage-related assets for our investment portfolio, and developing the appropriate approach to be taken by PLS for each loan as it performs its specialty servicing. As our loan servicer, PLS services the mortgage loans we acquire, performs traditional servicing and workout activities, and executes the portfolio strategies developed by PCM. As part of its execution of PCM's portfolio strategy, PLS may modify or refinance loans in our investment portfolio and originate loans to finance the sale of real estate we acquire in settlement of our loans.

Our internet address is www.pennymac-reit.com. We make available free of charge, on or through the investor relations section of our web site, annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934, as amended, as well as proxy statements, as soon as reasonably practicable after we electronically file such material with, or furnish it to, the SEC.

Our Manager and Our Servicer

We are externally managed and advised by PCM pursuant to a management agreement. PCM was established in March 2008 and specializes in and focuses on residential mortgage loans. PCM also serves as the investment manager to two private fund vehicles, which we refer to as the PennyMac funds, with investment objectives and policies relating to distressed mortgage loans that are substantially similar to ours. The combined assets of the entities managed by PCM, including our assets, amounted to approximately \$2.1 billion.

PCM is responsible for administering our business activities and day-to-day operations. Pursuant to the terms of the management agreement, PCM provides us with our senior management team, including our officers, along with appropriate support personnel. PCM is subject to the supervision and oversight of our board of trustees and has the functions and authority specified in the management agreement.

We also have a loan servicing agreement with PLS, pursuant to which PLS provides primary servicing and special servicing for our portfolio of residential mortgage loans. PLS's loan servicing activities include collecting principal, interest and escrow account payments, if any, with respect to mortgage loans, as well as managing loss mitigation, which may include, among other things, collection activities, loan workouts, modifications and refinancings, foreclosures, short sales, sales of REO and

Edgar Filing: PennyMac Mortgage Investment Trust - Form 10-K

Table of Contents

financings to facilitate such sales. Servicing fee rates are based on the risk characteristics of the mortgage loans serviced and total servicing compensation is established at levels that management believes are competitive with those charged by other servicers and specialty servicers.

The workout-oriented servicing platform of PLS includes significant borrower contacts, which we refer to as "high touch," and is designed to enable us to effectively implement programs that address borrower needs and maximize the value of our portfolio. PLS was established in February 2008 and also provides primary servicing and special servicing to the PennyMac funds and entities in which they have invested as well as third parties. PLS acted as the servicer for loans with an aggregate unpaid principal balance of approximately \$7.7 billion as of December 31, 2011.

Our Manager's senior management team has extensive experience in the residential mortgage industry and expertise across each of the critical capabilities that we believe are required to successfully acquire and manage both performing and nonperforming mortgage loans, including sourcing, valuation, due diligence, portfolio strategy, servicing (including modification and refinance fulfillment of outstanding loans and acquisition and liquidation of properties securing settled mortgage loans) and secondary marketing of restructured and re-performing loans. Our senior management team is supported by a dedicated team of employees at PLS and PCM.

We have no employees, and we do not pay our officers any cash compensation. Rather, under the management agreement, we pay PCM management fees quarterly in arrears, which include a "base" component and an "incentive" component. We pay PLS fees for servicing our loans, and we reimburse PCM and its affiliates for certain direct costs incurred on our behalf and for certain overhead expenses.

Our management fees are calculated on a quarterly basis as follows:

The base management fee is calculated at the annual rate of 1.5% of shareholders' equity, which is defined as follows for purposes of calculating the base management fee:

the sum of the net proceeds from any issuances of our equity securities since inception (weighted for the time outstanding during the measurement period); plus

our retained earnings at the end of the quarter (without taking into account any non-cash equity compensation expense incurred in current or prior periods); less

any amount we pay for repurchases of our common shares (weighted for the time held during the measurement period); excluding

any unrealized gains, losses or other non-cash items that have impacted our shareholders' equity as reported in our financial statements, regardless of whether those items are included in other comprehensive income or loss or net income; and excluding

one-time events pursuant to changes in accounting principles generally accepted in the U.S. ("U.S. GAAP") and certain other non-cash charges after discussions between PCM and our independent trustees and approval by a majority of our independent trustees.

The performance incentive fee is calculated at the rate of 20% per year of the amount by which "core earnings," on a rolling four-quarter basis and before the incentive fee, exceeds an 8% "hurdle rate."

"Core earnings," for purposes of determining the amount of the performance incentive fee, is defined as U.S. GAAP net income (loss) adjusted to exclude non-cash equity compensation expense, unrealized gains and losses or other non-cash items recognized during the period, any conditional payment amounts relating to our initial public offering ("IPO") paid to PCM and the underwriters of our IPO, and any one-time events pursuant to changes in U.S. GAAP and certain other non-cash charges after discussions between PCM and our independent

trustees and approval by a majority of our independent trustees.

Table of Contents

The "hurdle rate" is calculated as the product of (1) the weighted average of the issue price per share of all of our public offerings multiplied by the weighted average number of common shares outstanding (including, for the avoidance of doubt, restricted share units) in the four-quarter period and (2) 8%.

Investment Strategy

Our objective is to provide attractive risk-adjusted returns to our investors over the long-term, primarily through dividends and secondarily through capital appreciation. We seek to achieve this objective primarily by investing in mortgage loans, a substantial portion of which may be distressed and acquired at discounts to their unpaid principal balances.

Distressed Assets

We seek to maximize the value of the mortgage loans that we acquire through proprietary loan modification programs, special servicing and other initiatives focused on keeping borrowers in their homes. Where this is not possible, such as in the case of many nonperforming mortgage loans, we seek to effect property resolution in a timely, orderly and economically efficient manner. We also invest in mortgage-related securities and other mortgage-related, real estate and financial assets. A substantial portion of our investments are not rated by any rating agency.

The pools of loans that we acquire consist primarily of U.S. residential mortgage loans. These loans may be performing or nonperforming and of varying credit quality, including subprime, Alt-A and prime. PCM, in its sole discretion, and in accordance with its policies and procedures, determines the composition of our portfolio of loans, including its size, loan types and credit quality.

We rely on PCM's expertise in identifying pools of distressed mortgage loans and other assets for acquisition. PCM's sourcing and evaluation processes for potential acquisitions of residential mortgage loans and for mortgage-related assets are substantially similar. PCM makes investment decisions based on various factors, including expected cash yield, relative value, risk-adjusted returns, current and projected credit fundamentals, current and projected macroeconomic considerations, current and projected supply and demand, market risk, portfolio diversification, liquidity and availability and terms of financing, as well as maintaining our REIT qualification and our exclusion from registration under the Investment Company Act. The evaluation process with respect to residential mortgage-backed securities ("RMBS") and other mortgage-backed securities ("MBS") also includes relative value analyses based on yield, credit rating, average life, effective duration, option-adjusted spreads, prepayment assumptions and credit expectations. Investment decisions with regard to the acquisition or disposition of any of our targeted assets are made by PCM's investment committee. Our assets are not subject to any geographic diversification or concentration limitations except that we are concentrated in residential mortgage-related investments. We have established no limitations on the maturity, duration or credit rating of our assets.

Correspondent Lending

We believe that the collapse of the independent mortgage company business model and the weakened condition of banks and other traditional mortgage lenders have created additional opportunities for our business. Under current market conditions, these opportunities include the purchase from mortgage lenders of newly originated mortgage loans that are eligible for sale to a GSE. These opportunities also include the purchase of newly originated mortgage loans that can be resold in the non-Agency whole loan market or securitized in the private label market as well as providing inventory financing to originators of such loans.

PCM and its affiliates evaluate new opportunities based on their relative expected returns compared to comparable assets held in our portfolio. We re-evaluate our investment strategy as market

Edgar Filing: PennyMac Mortgage Investment Trust - Form 10-K

Table of Contents

conditions change with a view toward maximizing the returns from our investment portfolio and identifying dislocations and opportunities in the mortgage market.

Targeted Asset Classes

We invest primarily in residential mortgage loans and mortgage-related assets. Our targeted asset classes and the principal investments we make and/or expect to make in each class are as follows:

Asset class	Principal investments
Residential Mortgage Loans	Newly originated mortgage loans
Residential Mortgage-Backed Securities	Seasoned performing and nonperforming residential mortgage loans
	Non-U.S. government Agency RMBS, including investment-grade, non-investment grade classes and non-rated classes
Other assets and other MBS	U.S. government Agency RMBS
	Real estate and real estate acquired in settlement of loans
	Mortgage servicing rights ("MSRs")
	Financing of mortgage loan inventory for mortgage lenders
	Mortgage-related derivatives, including, but not limited to, credit default swaps, options, futures and derivatives on MBS
	Commercial mortgage-backed securities ("CMBS")
	United States Treasury securities
	Policies, instruments and agreements related to reinsurance risk

Over time, our targeted asset classes may change as a result of changes in the opportunities that are available in the market, among other factors. We may not invest in certain of the investments described above if we believe those types of investments will not provide us with attractive opportunities or if we believe other types of our targeted assets provide us with better opportunities.

Edgar Filing: PennyMac Mortgage Investment Trust - Form 10-K

Table of Contents

Our Portfolio

Investment Activities

Following is a summary of our acquisitions of mortgage investments (excluding purchases for resale of newly originated mortgage loans) for the periods presented:

	Year ended December 31,		Period from August 4, 2009 (commencement of operations) to December 31, 2009
	2011	2010	
	(in thousands)		
Mortgage-backed securities	\$ 21,420	\$ 91,141	\$ 93,049
Distressed mortgage loans:(1)(2)			
Performing	52,256	33,745	26,046
Nonperforming	595,353	383,466	
	647,609	417,211	26,046
REO	2,475	1,238	
MSRs	6,079		
	\$ 677,583	\$ 509,590	\$ 119,095

(1) Performance status as of the date of acquisition.

(2) \$575.5 million of our distressed asset purchases during the year ended December 31, 2011 were acquired from or through one or more subsidiaries of Citigroup Inc.

Our portfolio of mortgage investments was as follows as of the dates presented:

	December 31,		
	2011	2010	2009
	(in thousands)		
Mortgage-backed securities	\$ 72,813	\$ 119,872	\$ 83,771
Distressed mortgage loans:			
Performing	209,599	86,242	26,046
Nonperforming	615,977	278,008	
	825,576	364,250	26,046
REO	103,549	29,685	
MSRs	6,031		
	\$ 1,007,969	\$ 513,807	\$ 109,817

Our acquisitions have been primarily comprised of nonperforming loans rather than distressed performing loans. During the period from August 4, 2009 (commencement of operations) through December 31, 2011, PCM has encountered a relatively higher volume of available nonperforming mortgage loan portfolios than distressed performing loans. In addition, the risk-adjusted returns for nonperforming loan portfolios have been more attractive than those for distressed performing loans.

Edgar Filing: PennyMac Mortgage Investment Trust - Form 10-K

PCM has worked to expand our sources of assets to position us to take advantage of market opportunities and market changes, such as when the mortgage market converges to more active origination and securitization levels and when delinquency and foreclosure levels reduce closer to historical levels. Examples of such investments include:

Acquisition of MSRs from liquidating and other institutions. We believe that MSR investments may allow us to earn attractive current returns and to leverage the loan servicing capabilities and

Edgar Filing: PennyMac Mortgage Investment Trust - Form 10-K

Table of Contents

efficiencies of PLS to improve the assets' value. We would also seek to leverage the loan origination capabilities of PLS provided we are able to structure an arrangement whereby we could recapture any new MSR's created upon PLS's refinance of mortgage loans relating to our existing MSR's. We also intend to continue to retain the MSR's that we receive as a portion of the proceeds from our sale or securitization of mortgage loans through our correspondent lending operation.

Acquisition of REIT-eligible MBS. We believe that the recent dislocations of the residential mortgage markets have disproportionately affected the pricing of certain classes of MBS, thereby providing attractive investment opportunities in certain residential and commercial mortgage-backed and asset-backed securities. Such securities include securities backed by Alt-A and subprime mortgage loans.

Providing inventory financing of mortgage loans for mortgage lenders. We believe this activity results in attractive investment assets and will supplement and make our correspondent lending business more attractive to lenders from which we acquire newly originated loans.

Correspondent Lending

During the year ended December 31, 2011, we significantly increased our participation in the secondary mortgage market through the purchase for resale of newly originated mortgage loans ("correspondent lending"). In our correspondent lending activities, we acquire newly originated loans from mortgage lenders, sell the loans to an Agency or other third party, transfer the loans to PLS in the case of government loans, or otherwise pool those loans into MBS, sell the resulting securities into the MBS markets and retain the mortgage servicing rights. During 2011, we purchased \$1.3 billion of newly originated mortgage loans, of which \$1.0 billion were purchased during the fourth quarter of the year.

Following is a summary of our correspondent lending activities:

	Year ended December 31,		Period from
	2011	2010	August 4, 2009
			(commencement of
			operations) to
			December 31, 2009
	(in thousands)		
Fair value of loans purchased:			
Agency eligible	\$ 660,862	\$ 9,249	\$
Government insured or guaranteed	623,540	20,810	
Jumbo	34,361		
	\$ 1,318,763	\$ 30,059	\$
Fair value of correspondent lending loans in inventory at period-end	\$ 232,016	\$ 3,966	\$
Gain on mortgage loans acquired for sale(1)	\$ 7,633	\$ 18	\$

- (1) Gain on mortgage loans acquired for sale includes changes in the value of commitments to purchase loans, changes in the value of mortgage loans purchased during the period from purchase through the date of sale and changes in the value of financial instruments purchased and sold to manage the risk of changes in value of our inventory of mortgage loans and commitments to purchase mortgage loans.

Our primary source of income during the years ended December 31, 2011 and 2010 was income from our investments in mortgage loans primarily resulting from payoffs of loans in our portfolio and appreciation in fair value of our nonperforming loans supplemented by interest income on our performing loans and, to a lesser extent, interest income from our portfolio of MBS. During the period

Edgar Filing: PennyMac Mortgage Investment Trust - Form 10-K

Table of Contents

from August 4, 2009 (commencement of operations) to December 31, 2009, our primary source of income was interest on MBS, supplemented by interest on our temporary investment in a money market mutual fund.

Our Financing Strategy

As we have fully invested the proceeds of our initial public and concurrent as well as secondary offerings, we have pursued growth of our investment portfolio by using additional forms of financing. We have made borrowings in the form of borrowings under forward purchase agreements, sales of securities and nonperforming assets under agreements to repurchase, and lines of credit to finance loans purchased through our correspondent lending activities. We use borrowings to finance our investments and not to speculate on changes in interest rates.

The transactions relating to securities sold under agreements to repurchase provide for sale to major financial institution counterparties of securities in our investment portfolios at advance rates based on the estimated fair value of the securities sold. The agreements provide for repurchase by us of the securities at a term of three weeks. All transactions relating to MBS sold under agreements to repurchase maturing before the date of this Report have been refinanced by renewing the agreements at maturity. The principal balance outstanding under these agreements was \$115.5 million as of December 31, 2011.

During 2011 and 2010, we entered into three master repurchase agreements with three money center banks totaling \$550 million. We also entered into a secured lending facility with a money center bank in an aggregate amount of \$40 million. These agreements are structured to finance investments in distressed mortgage assets, including nonperforming whole loans and real estate acquired in the settlement of loans. Our objective is to use these facilities to finance nonperforming mortgage loan investments pending liquidation, sale, securitization or other structured financing. The aggregate principal amount outstanding under these facilities was \$331.8 million as of December 31, 2011.

During 2011 and 2010, we also entered into two master repurchase agreements totaling \$350 million (of which \$250 million is committed) to fund newly originated prime mortgage loans purchased from correspondent lenders. The principal balance outstanding under these facilities was \$212.7 million as of December 31, 2011.

During 2011, we entered into forward purchase agreements pursuant to which we agreed to purchase certain nonperforming assets and residential real property acquired in settlement of loans from one money center bank which purchased these assets from unaffiliated money center banks. We assumed all of the money center bank's rights and obligations under its separate agreements with the unaffiliated money center banks. We recorded the transactions as a purchase of loans. As of December 31, 2011, outstanding borrowings under these forward purchase agreements amounted to \$152.4 million.

Our borrowings are made under agreements that include various covenants, including the maintenance of specified levels of cash, adjusted tangible net worth and overall leverage limits. Our ability to borrow under these facilities is limited by the amount of qualifying assets that we hold and that are eligible to be pledged to secure such borrowings. We are not otherwise required to maintain any specific debt-to-equity ratio, and we believe the appropriate leverage for the particular assets we finance depends on, among other things, the credit quality and risk of such assets. Our declaration of trust and bylaws do not limit the amount of indebtedness we can incur, and our board of trustees has discretion to deviate from or change our financing strategy at any time.

Subject to maintaining our qualification as a REIT and exclusion from registration under the Investment Company Act, we may hedge the interest rate risk associated with the financing of our portfolio.

Edgar Filing: PennyMac Mortgage Investment Trust - Form 10-K

Table of Contents

Investment Policies

Our board of trustees has adopted the policies set forth below for our investments and borrowings. PCM will review our compliance with the investment policies regularly and will report periodically to our board of trustees regarding such compliance.

No investment shall be made that would cause us to fail to qualify as a REIT for U.S. federal income tax purposes;

No investment shall be made that would cause us to be regulated as an investment company under the Investment Company Act; and

With the exception of real estate and housing, no single industry shall represent greater than 20% of the investments or aggregate risk exposure in our portfolio.

These investment policies may be changed by a majority of our board of trustees without the approval of, or prior notice to, our shareholders.

Investment Allocation Policy

Investment opportunities in pools of mortgage loans that are consistent with our investment objectives, on the one hand, and the investment objectives of the PennyMac funds and other future entities or accounts managed by PCM, on the other hand, are allocated among us and the PennyMac funds and the other entities or accounts generally *pro rata*. This is and has been based upon relative amounts of investment capital (including undrawn capital commitments) available for new investments by us, the PennyMac funds and any other relevant entities or accounts, or by assigning opportunities among the relevant entities such that investments assigned among us, such funds, entities or accounts are fair and equitable over time; *provided* that PCM, in its sole discretion, may allocate investment opportunities in any other manner that it deems to be fair and equitable. As of December 31, 2011, the commitment periods for the PennyMac funds have ended and the ability of the PennyMac funds to make new investments has therefore been reduced.

In the case of the allocation of investment opportunities, PCM considers a number of factors. These factors include:

investment objectives or strategies for particular entities or accounts;

tax considerations of an entity or account;

risk or investment concentration parameters for an entity or account;

supply or demand for an investment at a given price level;

size of available investment;

cash availability and liquidity requirements for an entity or account;

minimum investment size of an entity or account;

relative size or "buying power" of an entity or account;

Edgar Filing: PennyMac Mortgage Investment Trust - Form 10-K

regulatory considerations, including the potential impact on an entity's status under the Investment Company Act, and, in our case, our REIT status; and

such other factors as may be relevant to a particular transaction.

In the case of *pro rata* purchases of pools of loans where the pool is allocated among us and other entities or accounts, PCM, at the time of purchase, seeks to allocate the individual mortgage loans in the pools among us and the other entities or accounts such that the overall allocation of acquired

Table of Contents

mortgage loans in the pools will target reasonable symmetry with reference to, among other factors, the following:

unpaid principal balances;

delinquency status;

purchase price;

lien position;

expected cash flows;

geography; and

such other factors as may be relevant to a particular transaction.

As the investment programs of the various entities and accounts managed by PCM change and develop over time, additional issues and considerations may affect PCM's and our allocation policy and PCM's and our expectations with respect to the allocation of investment opportunities among the various entities and accounts managed by PCM. Notwithstanding PCM's intention to effect fair and equitable allocations of investment opportunities, we expect that our performance will differ from the performance of the PennyMac funds and any other PennyMac-managed entity or account for many reasons, including differences in the legal or regulatory characteristics, or tax classification, of the entities or accounts or due to differing fee structures or the idiosyncratic differences in the outcome of individual mortgage loans.

We have not adopted a policy that expressly prohibits our trustees, officers, shareholders or affiliates from having a direct or indirect financial interest in any investment to be acquired or disposed of by us or in any transaction to which we are a party or have an interest. We do not have a policy that expressly prohibits any such persons from engaging for their own account in business activities of the types conducted by us. However, our code of business conduct and ethics contains a conflicts of interest policy that prohibits our trustees, officers and employees, as well as employees of PCM who provide services to us, from engaging in any transaction that involves an actual or apparent conflict of interest with us without the appropriate approval. We also have written policies and procedures for the review and approval of related party transactions.

Operating and Regulatory Structure

REIT Qualification

We have elected to be treated as a REIT under Sections 856 through 859 of the Internal Revenue Code of 1986 (the "Internal Revenue Code") beginning with our taxable year ended December 31, 2009. Our qualification as a REIT depends upon our ability to meet on a continuing basis, through actual investment and operating results, various complex requirements under the Internal Revenue Code relating to, among other things, the sources of our gross income, the composition and values of our assets, our distribution levels and the diversity of ownership of our common shares. We believe that we are organized in conformity with the requirements for qualification and taxation as a REIT under the Internal Revenue Code, and that our manner of operation enables us to meet the requirements for qualification and taxation as a REIT.

As a REIT, we generally are not subject to U.S. federal income tax on our REIT taxable income we distribute to our shareholders. If we fail to qualify as a REIT in any taxable year and do not qualify for certain statutory relief provisions, we will be subject to U.S. federal income tax at regular corporate rates and may be precluded from qualifying as a REIT for the subsequent four taxable years following the year during which we lost our REIT qualification. Accordingly, our failure to qualify as a REIT could have a material adverse impact on our results of operations and amounts available for distribution to our shareholders.

Table of Contents

Even though we have elected to be taxed as a REIT, we are subject to some U.S. federal, state and local taxes on our income or property. A portion of our business is conducted through, and a portion of our income is earned in, our TRSs that are subject to corporate income taxation. In general, a TRS of ours may hold assets and engage in activities that we cannot hold or engage in directly and may engage in any real estate or non-real estate related business. A TRS is subject to U.S. federal, state and local corporate income taxes. To maintain our REIT election, at the end of each quarter no more than 25% of the value of a REIT's assets may consist of stock or securities of one or more TRSs.

If our TRS generates net income, our TRS can declare dividends to us, which will be included in our taxable income and necessitate a distribution to our shareholders. Conversely, if we retain earnings at the TRS level, no distribution is required and we can increase shareholders' equity of the consolidated entity. As discussed in Section 1A of this Report entitled *Risk Factors*, the combination of the requirement to maintain no more than 25% of our assets in the TRS coupled with the effect of TRS dividends on our income tests creates compliance complexities for us in the maintenance of our qualified REIT status.

The dividends paid deduction of a REIT for qualifying dividends to its shareholders is computed using our taxable income as opposed to net income reported on our financial statements. Taxable income generally differs from net income reported on our financial statements because the determination of taxable income is based on tax laws and regulations and not financial accounting principles.

Licensing

We and PLS are required to be licensed to conduct business in certain jurisdictions. PLS is, or is taking steps to become, licensed in those jurisdictions and for those activities where it believes it is cost effective and appropriate to become licensed. Through our wholly owned subsidiaries, we are also licensed, or are taking steps to become licensed, in those jurisdictions and for those activities where we believe it is cost effective and appropriate to become licensed. In jurisdictions in which neither we nor PLS is licensed, we do not conduct activity for which a license is required. Our failure or the failure by PLS to obtain any necessary licenses promptly, comply with applicable licensing laws or satisfy the various requirements or to maintain them over time could materially and adversely impact our business.

Competition

We intend to achieve our investment objective largely by investing in mortgage loans, a substantial portion of which may be distressed and acquired at discounts to their unpaid principal balances. In acquiring mortgage assets, we compete with specialty finance companies, private funds, other mortgage REITs, thrifts, banks, mortgage bankers, insurance companies, mutual funds, institutional investors, investment banking firms, governmental bodies and other entities. A number of these competitors may also be focused on acquiring distressed mortgage loans, and therefore may increase competition for the available supply of mortgage assets suitable for purchase. Many of our competitors are significantly larger than we are and have stronger balance sheets and greater access to capital and other resources than we have and may have other advantages over us. Such advantages include the ability to obtain lower-cost financing, such as deposits, and operational efficiencies arising from their larger size. Some of our competitors may have higher risk tolerances or different risk assessments and may not be subject to the operating restraints associated with REIT tax compliance or maintenance of an exclusion from the Investment Company Act, any of which could allow them to consider a wider variety of investments and funding strategies and to establish more relationships than we can.

Because the availability of pools of distressed mortgage assets may fluctuate, the competition for assets and sources of financing may increase. Increased competition for assets may result in our accepting lower returns for acquisitions of residential mortgage loans and other assets or adversely influence our ability to "win" our bids for such assets. An increase in the competition for sources of

Table of Contents

funding could adversely affect the availability and terms of financing, and thereby adversely affect the market price of our common shares.

In the face of this competition, we have access to PCM's professionals and their industry expertise, which we believe provides us with a competitive advantage and helps us assess investment risks and determine appropriate pricing for certain potential investments. We expect these relationships to enable us to compete more effectively for attractive investment opportunities. Furthermore, we believe that our access to PLS's special servicing expertise helps us to maximize the value of our residential mortgage loans and provides us with a competitive advantage over other companies with a similar focus. We believe that current market conditions may have adversely affected the financial condition and operations of certain owners of mortgage assets. Further, regulatory and capital issues have contributed to the decision by certain financial institutions to exit or curtail their correspondent lending business and to reduce their portfolios of mortgage servicing rights. Not having a legacy portfolio or the same regulatory or capital issues may enable us to compete more effectively for attractive business or investment opportunities. However, we cannot assure you that we will be able to achieve our business goals or expectations due to the competitive and other risks that we face.

Staffing

We are managed by PCM pursuant to a management agreement. PLS provides servicing and special servicing for our portfolio of residential mortgage loans pursuant to a loan servicing agreement. All of our officers are employees of PCM or its affiliates. We have no employees. As of December 31, 2011, PennyMac had 429 employees. See *Our Manager and Our Servicer* above.

Item 1A. Risk Factors

Risks Associated with Our Management and Relationship with Our Manager and Its Affiliates

We are dependent upon PCM, PLS and their resources and may not find suitable replacements if our management agreement with PCM is terminated and/or our loan servicing agreement with PLS is terminated.

In accordance with our management agreement, we are externally advised and managed by PCM. We have no employees, and all of our officers are also employees of PCM or its affiliates. Among other matters, PCM supplies us with our senior management team, makes all or substantially all of our investment, financing and risk management decisions, and has significant discretion as to the implementation of our operating policies and strategies. As a result, we are completely reliant upon, and our success depends exclusively on, PCM's investment decisions, the advice of PCM's employees, the use of PCM's vendors and other resources, and the manner and extent to which PCM selects its vendors and allocates those resources to manage our business. No assurance can be given that PCM's strategies will be successful, that it will conduct complete and accurate due diligence or provide sound advice, or that it will act in our best interests with respect to the allocation of its resources to our business. Its failure to do any of the above, conduct the business in accordance with applicable laws and regulations or hold all licenses or registrations necessary to conduct the business as currently operated would materially and adversely affect our ability to continue to execute our business plan. In addition, the initial term of our management agreement only extends until August 4, 2012 (subject to annual automatic renewals for one-year terms), and it may be terminated earlier under certain circumstances. If our management agreement is terminated and a suitable replacement is not secured in a timely manner, it would materially and adversely affect our ability to continue to execute our business plan.

Under our loan servicing agreement with PLS, PLS provides primary servicing and special servicing for our portfolio of residential mortgage loans. We rely on PLS to provide these services for our portfolio and have no in-house capability to handle these services independently of PLS. The costs of these services increase our operating costs and may adversely affect our net income. No assurance can be given that PLS's strategies will be successful, that PLS will provide sound advice, or that it will act

Table of Contents

in our best interests with respect to the allocation of its resources to our business. Its failure to do any of the above, conduct its business in accordance with applicable laws and regulations or hold all licenses or registrations necessary to conduct the business as currently operated would materially and adversely affect our ability to continue to execute our business plan. The term of our loan servicing agreement is identical to the term of our management agreement, and is subject to early termination in the event our management agreement is terminated for any reason. If our loan servicing agreement is terminated, we will have to obtain the loan servicing from another servicer. We may not be able to replace these services in a timely manner or on favorable terms, or at all.

PennyMac, the parent company of PCM and PLS, is undergoing significant growth and its development and integration of new operations may not be effective.

PennyMac's significant growth since it commenced operations has caused significant demands on its operational, accounting and legal infrastructure, and increased expenses. The ability of PCM and PLS to provide us with the services we require to be successful depends, among other things, on the ability of PennyMac, including PCM and PLS, to maintain an operating platform and management system sufficient to address its growth. This may require PennyMac to incur significant additional expenses and to commit additional senior management and operational resources. There can be no assurance that PennyMac will be able to effectively integrate its expanding operations or that PennyMac will continue to grow successfully. PennyMac's failure to do so could adversely affect the ability of PCM and PLS to manage us and service our mortgage loan portfolio, respectively, which would materially and adversely affect us.

Our management agreement and our loan servicing agreement were not negotiated on an arm's length basis.

Our management agreement and our loan servicing agreement were each negotiated between related parties, and we did not have the benefit of arm's length negotiations of the type normally conducted with an unaffiliated third party and the terms, including the fees payable to PCM and PLS, as the case may be, may not be as favorable to us as they would be if those agreements were negotiated with unaffiliated third parties. We may also choose not to enforce, or to enforce less vigorously, certain of our rights under our management agreement or our loan servicing agreement in an effort to maintain our ongoing relationship with PCM or PLS, as the case may be.

The management fee structure could cause disincentive and/or create greater investment risk.

Pursuant to our management agreement, PCM is entitled to receive a base management fee that is based on our shareholders' equity (as defined in our management agreement) at the end of each quarter. As a result, significant base management fees would be payable to PCM for a given quarter even if we experience a net loss during that quarter. PCM's right to non-performance-based compensation may not provide sufficient incentive to PCM to devote its time and effort to source and maximize risk-adjusted returns on our investment portfolio, which could, in turn, materially and adversely affect our ability to make distributions to our shareholders and the market price of our common shares.

Conversely, PCM is also entitled to receive incentive compensation under our management agreement based on our performance in each quarter. In evaluating investments and other management strategies, the opportunity to earn incentive compensation based on our core earnings (as defined in our management agreement) may lead PCM to place undue emphasis on the maximization of short-term cash-based income at the expense of other criteria, such as preservation of capital, maintaining sufficient liquidity and/or management of market risk, in order to achieve higher incentive compensation. Investments with higher yield potential are generally riskier and more speculative. PCM may also have a conflict of interest in deciding upon whether to sell any investment at a gain, thereby recognizing additional incentive compensation, or to hold such investment based on its long-term value. This could result in increased risk to the value and long-term performance of our portfolio.

Table of Contents

The servicing fee structure could create a conflict of interest.

For its services under our loan servicing agreement, PLS is entitled to base servicing fees that we believe are competitive with those charged by specialty servicers and are calculated as a percentage of the unpaid principal balance of the mortgage loans in our portfolio. Because the base servicing fees are calculated on this basis, PLS's interests may not be aligned with ours with regard to loan modifications that would reduce the unpaid principal balances of our mortgage loans. PLS is also entitled to certain customary market-based fees and charges, including boarding and deboarding fees, liquidation and disposition fees, assumption, modification and origination fees and late charges, as well as interest on funds on deposit in custodial or escrow accounts. In addition, to the extent we participate in HAMP (or other similar mortgage loan modification programs), PLS will be entitled to retain any incentive payments made to it in connection with our participation therein. Because certain of these fees are earned upon reaching a specific milestone, this fee structure may provide PLS with an incentive to foreclose more aggressively or liquidate assets for less than their fair market value.

On our behalf, PLS also refinances performing and nonperforming loans and originates new loans to facilitate the disposition of real estate that we acquire through foreclosure. In order to provide PLS with an incentive to produce such loans, we have agreed to pay PLS fees and other compensation based on market-based pricing and terms that are consistent with the pricing and terms offered by PLS to unaffiliated third parties on a retail basis. The amount of the origination fee is intended to reflect market rates and will be subject to review by our board of trustees from time to time. This may provide PLS with an incentive to refinance a greater proportion of our loans than it otherwise would and/or to refinance loans on our behalf instead of arranging the refinancings with a third party lender.

Termination of our management agreement is difficult and costly.

It is difficult and costly to terminate, without cause, our management agreement. Following the initial term ending August 4, 2012, our management agreement provides that it may be terminated annually by us without cause under limited circumstances and upon 180 days' prior written notice and the payment to PCM of a significant termination fee. The cost to us of terminating our management agreement may adversely affect our desire or ability to terminate our management agreement with PCM without cause.

PCM may terminate our management agreement if we become required to register as an investment company under the Investment Company Act, or decline to renew our management agreement by providing us with 180 days' prior written notice, in which case we would not be required to pay a termination fee to PCM. PCM may also terminate our management agreement upon at least 60 days' prior written notice if we default in the performance of any material term of our management agreement and the default continues for a period of 30 days after written notice to us, whereupon we would be required to pay to PCM a significant termination fee. If our management agreement is terminated, we will have to obtain investment and other management services from another investment manager. We may not be able to replace these services in a timely manner or on favorable terms, or at all.

PCM and PLS both have limited liability and indemnity rights.

Our management agreement and our loan servicing agreement provide that PCM (in the case of our management agreement) and PLS (in the case of our loan servicing agreement) will not assume any responsibility other than to provide the services specified in such agreements. Our management agreement further provides that PCM will not be responsible for any action of our board of trustees in following or declining to follow its advice or recommendations. In addition, each of PCM (in the case of our management agreement) and PLS (in the case of our loan servicing agreement) and their respective affiliates, managers, officers, trustees, directors, employees and members will be held harmless from, and indemnified by us against, certain liabilities on customary terms.

Table of Contents

Existing or future entities or accounts managed by PCM may compete with us for PCM's time and services, and they may compete with us for, or may participate in, investments, any of which could result in conflicts of interest. BlackRock and Highfields Capital, PennyMac's strategic investors, could compete with us or transact business with us.

Pursuant to our management agreement, PCM is obligated to supply us with our senior management team, and the members of that team are required to devote such time to us as is necessary and appropriate, commensurate with the level of our activity. The members of our senior management team may have conflicts in allocating their time and services between us and other entities or accounts managed by PCM now or in the future, including the PennyMac funds.

Although we and PCM have adopted an allocation policy to specifically address some of the conflicts relating to our investment opportunities, there is no assurance that this policy will be adequate to address all of the conflicts that may arise or will address such conflicts in a manner that is favorable to us. We are also limited in our ability to acquire assets that are not qualifying real estate assets and/or real estate related assets, whereas the PennyMac funds and other entities or accounts that PCM manages now or may manage in the future are not, or may not be, as applicable, so limited. In addition, PCM and/or the PennyMac funds and the other entities or accounts managed by PCM now or in the future may participate in some of our investments, which may not be the result of arm's length negotiations and may involve or later result in potential conflicts between our interests in the investments and those of PCM or such other entities. As of December 31, 2011, the commitment periods for the PennyMac funds have ended and the ability of the PennyMac funds to make new investments has therefore been reduced.

In addition, PNMAC's strategic investors, BlackRock and Highfields Capital, each own 34% of PNMAC. Affiliates of each of BlackRock and Highfields Capital currently manage investment vehicles and separate accounts that may compete directly or indirectly with us. BlackRock and Highfields Capital are under no obligation to provide us with any financial or operational assistance, or to present opportunities to us for matters in which they may become involved. We may enter into transactions with BlackRock or Highfields Capital or with market participants with which BlackRock or Highfields Capital has business relationships, and such transactions and/or relationships could influence the decisions made by PCM with respect to the purchase or sale of assets and the terms of such purchase or sale. Such activities could have an adverse effect on the value of the positions held by us, or may result in BlackRock and/or Highfields Capital having interests adverse to ours.

If ownership interests held by PennyMac's strategic investors were transferred to a third party, this could result in a change in our objectives and cause us material harm.

If either or both of BlackRock and Highfields Capital were to sell their ownership interests in PNMAC to a third party, that party might, subject to certain limitations, attempt to cause us to materially amend our investment policies, attempt to cause a sale or disposition of PCM and/or PLS or a change in the composition of PCM's professionals. A change in ownership could also cause a termination of our management agreement with PCM. If any of the foregoing were to occur, we could experience difficulty in making new investments and the value of our existing investments, our business, our results of operations and our financial condition could suffer materially. Additionally, we cannot predict the effect that any transfer in the ownership of PNMAC would have on the trading price of our common shares or our ability to raise capital or make investments in the future because such matters would depend to a large extent on the identity of the new owner and the new owner's intentions with regard to our business and affairs. As a result, the future of our company would be uncertain and the value of our investments, our results of operations and our financial condition could suffer.

Table of Contents

Negative publicity and media attention involving Countrywide Financial Corporation and certain of its former officers could have an adverse impact on PennyMac and us.

Certain of our and PennyMac's officers, including Stanford L. Kurland, our chairman and chief executive officer, are former employees of Countrywide Financial Corporation ("Countrywide"), which has been the subject of various investigations and lawsuits and ongoing negative publicity. We cannot assure you that any existing or future investigations, litigation or negative publicity involving Countrywide will not generate negative publicity or media attention for us or adversely impact us or PCM's and PLS's ability to conduct their respective businesses.

Risks Related to Our Business

We may not be able to successfully operate our business or generate sufficient operating cash flows to make or sustain distributions to our shareholders. The supply of distressed residential mortgage loans will likely recede as the economy improves.

There can be no assurance that we will be able to generate sufficient returns to pay our operating expenses and make distributions to our shareholders. The results of our operations and our ability to make or sustain distributions to our shareholders depends on many factors, including the availability of attractive risk-adjusted investment opportunities that satisfy our investment strategies and our success in identifying and consummating them on favorable terms, the level and expected movement of home prices, the level and volatility of interest rates, readily accessible short-term and long-term financing on favorable terms, and conditions in the financial markets, real estate market and the economy, as to which no assurance can be given. We cannot assure you that we will be able to make investments with attractive risk-adjusted returns or will not seek investments with greater risk to obtain the same level of returns or that the value of our investments in the future will not decline substantially. We also face substantial competition in acquiring attractive investments.

In addition, when the current conditions in the mortgage market, the financial markets and the economy stabilize and/or improve, the availability of distressed residential mortgage loans that meet our investment objectives and strategies will likely recede, which could reduce our ability to invest in distressed mortgage assets. In anticipation of this decline in the supply of potential investments, we are investing capital in our correspondent lending activities and continue to reevaluate our investment strategies with a view of maximizing the returns from our investment portfolio and identifying dislocations and opportunities in the mortgage market, but there can be no assurance that any of our strategies will be successful.

As a result of difficult conditions in the financial markets and the economy generally, the risks to our business strategies are high and there are no assurances that we will be successful in implementing those business strategies.

The success of our business strategies and our results of operations are materially affected by current conditions in the mortgage market, the financial markets and the economy generally. Continuing concerns over factors including inflation, deflation, unemployment, personal and business income taxes, energy costs, geopolitical issues, the availability and cost of credit, the mortgage market and a declining real estate market have contributed to increased volatility and unclear expectations for the economy and markets going forward. The residential mortgage market has been severely affected by changes in the lending landscape and has experienced defaults, credit losses and significant liquidity concerns. There is no assurance that these conditions have stabilized or that they will not worsen. A continuation or increase in the volatility and deterioration in the broader residential mortgage and RMBS markets may adversely affect the performance and market value of our investments. Although we intend to purchase distressed mortgage loans at discounts to their unpaid principal balances, further

Table of Contents

deterioration in home prices or the value of our investments could require us to take charges that may be material.

The actions of the U.S. government, the Federal Reserve and the U.S. Treasury may materially and adversely affect our business.

The U.S. government, the Federal Reserve, the U.S. Treasury and other governmental and regulatory bodies have taken and continue to take various actions to address the recent financial crisis. There can be no assurances that such actions will have a beneficial impact on the financial markets. In addition to the foregoing, the U.S. Congress and/or various states and local legislatures may enact additional legislation or regulatory action designed to address the current economic climate or for other purposes that could have a material adverse effect on our ability to continue to execute our business strategies.

To the extent the market does not respond favorably to these initiatives or they do not function as intended, they may not have a positive impact on our business. We can provide no assurance that we will be eligible to use any government programs or, if eligible, that we will be able to utilize them successfully. Further, the incentives provided by such programs may increase competition for, and the pricing of, our targeted assets.

Mortgage loan modification and refinance programs, future legislative action, and other actions and changes may materially and adversely affect the value of, and the returns on, the assets in which we intend to invest.

The U.S. government, through the FHA, the FDIC and the U.S. Treasury, has commenced or proposed implementation of programs designed to provide homeowners with assistance in avoiding residential mortgage loan foreclosures. These loan modification and refinance programs, future U.S. federal, state and/or local legislative or regulatory actions that result in the modification of outstanding mortgage loans, as well as changes in the requirements necessary to qualify for refinancing mortgage loans with Fannie Mae, Freddie Mac or Ginnie Mae, may adversely affect the value of, and the returns on, residential mortgage loans, RMBS, real estate-related securities and various other asset classes in which we invest. In addition to the foregoing, the U.S. Congress and/or various states and local legislators may enact additional legislation or regulatory action designed to address the current economic climate or for other purposes that could have a material adverse effect on our ability to continue to execute our business strategies.

The conservatorship of Fannie Mae and Freddie Mac, along with any changes in laws and regulations affecting the roles of Fannie Mae and Freddie Mac, may materially and adversely affect our business.

There is significant uncertainty regarding the future of Fannie Mae and Freddie Mac, including with respect to how long they will continue to be in existence, the extent of their roles in the market and what forms they will have. Although the U.S. Treasury has committed capital to Fannie Mae and Freddie Mac since they were placed into conservatorship, there can be no assurance that such funding will be provided within the required time periods or that the actions of the U.S. Treasury will be adequate for their needs. If such funding is not provided as required, the Federal Housing Finance Agency (the "FHFA") would be obligated to place Fannie Mae and/or Freddie Mac into receivership. Further, Fannie Mae or Freddie Mac could be placed into receivership at the discretion of the FHFA at any time under certain circumstances. If the actions of the U.S. Treasury are inadequate and/or pending repurchase requests by Fannie Mae and Freddie Mac to lenders prove unsuccessful, or if Fannie Mae and Freddie Mac are adversely affected by events such as ratings downgrades, foreclosure problems and delays and problems with mortgage insurers, Fannie Mae and Freddie Mac could continue to suffer losses and could fail to honor their guarantees and other obligations. In addition, the future roles of Fannie Mae and Freddie Mac remain uncertain. Their roles could be significantly reduced or eliminated and the nature of the guarantees could be considerably limited relative to

Table of Contents

historical measurements. The elimination of the traditional roles of Fannie Mae and Freddie Mac or any changes to the nature or extent of the guarantees provided by Fannie Mae and Freddie Mac could redefine what constitutes a U.S. government Agency RMBS and could have broad adverse market implications. Such market implications are uncertain but could materially and adversely affect our business and the performance, liquidity and market value of our investments.

We leverage our investments, which may materially and adversely affect our return on our investments and may reduce cash available for distribution to our shareholders.

We currently leverage and, to the extent available, we intend to continue to leverage our investments through borrowings, the level of which may vary based on the particular characteristics of our investment portfolio and on market conditions. We have leveraged certain of our investments through repurchase agreements. When we enter into repurchase agreements, we sell securities or mortgage loans to lenders (i.e., repurchase agreement counterparties) and receive cash from the lenders. The lenders are obligated to resell the same assets back to us at the end of the term of the transaction. Because the cash we receive from the lender when we initially sell the assets to the lender is less than the value of those assets (this difference is referred to as the haircut), if the lender defaults on its obligation to resell the same assets back to us we could incur a loss on the transaction equal to the amount of the haircut (assuming there was no change in the value of the assets). In addition, repurchase agreements generally allow the counterparties, to varying degrees, to determine a new market value of the collateral to reflect current market conditions. If such counterparties determine that the value of the collateral has decreased, it may initiate a margin call and require us to either post additional collateral to cover such decrease or repay a portion of the outstanding borrowing. Should this occur, in order to obtain cash to satisfy a margin call, we may be required to liquidate assets at a disadvantageous time, which could cause us to incur further losses. In the event we are unable to satisfy a margin call, our counterparty may sell the collateral, which may result in significant losses to us.

The lenders under our repurchase agreements require us and/or our subsidiaries to comply with various financial covenants, including those relating to tangible net worth, profitability and our ratio of total liabilities to tangible net worth. Certain of our lenders also require us to maintain minimum amounts of cash or cash equivalents sufficient to maintain a specified liquidity position. In the event that we are unable to maintain these liquidity levels, we could be forced to sell additional investments at a loss and our financial condition could deteriorate rapidly.

Our repurchase agreements to finance nonperforming loans and other distressed mortgage assets are complex and difficult to manage. This is due in part to the nature of the underlying assets securing the financing, which do not produce consistent cash flows and which require specific activities to be performed at specific points in time in order to preserve value. Our inability to comply with the terms and conditions of these facilities could materially and adversely impact us.

In addition, the repurchase agreements contain events of default (subject to certain materiality thresholds and grace periods), including payment defaults, breaches of financial and other covenants and/or certain representations and warranties, cross-defaults, servicer termination events, guarantor defaults, bankruptcy or insolvency proceedings and other events of default customary for these types of facilities. The remedies for such events of default are also customary for these types of facilities and include the acceleration of the principal amount outstanding and the liquidation by the lender of the assets then subject to the respective facilities. If we default on one of our obligations under a repurchase agreement, the lender may be able to terminate the transaction, accelerate any amounts outstanding and cease entering into any other repurchase transactions with us. Because our repurchase agreements typically contain cross-default provisions, a default that occurs under any one agreement could allow the lenders under our other agreements to also declare a default. Our other secured borrowings are subject to similar risks as those that apply to our repurchase agreements. Any losses we

Table of Contents

incur on our repurchase agreements and other secured borrowings could materially and adversely affect our earnings, financial condition and our cash available for distribution to our shareholders.

We may in the future utilize other sources of borrowings, including bank credit facilities and structured financing arrangements, among others. The percentage of leverage we employ varies depending on the asset class being financed, our available capital, our ability to obtain and access financing arrangements with lenders and the lenders' and rating agencies' estimate of the stability of our investment portfolio's cash flow. There can be no assurance that new sources of financing will be available to us in the future or that existing sources of financing will continue to be available to us. We also own REO, for which there is currently limited financing available and no assurance of available financing in the future.

Our governing documents contain no limitation on the amount of debt we may incur. There can be no assurance that new sources of financing will be available to us in the future or that existing sources of financing will continue to be available to us. Our return on our investments and cash available for distribution to our shareholders may be reduced to the extent that changes in market conditions increase the cost of our financing relative to the income that can be derived from the investments acquired. Our debt service payments will reduce cash flow available for distribution to shareholders. We may not be able to meet our debt service obligations and, to the extent that we cannot, we risk the loss of some or all of our assets to foreclosure or sale to satisfy the obligations.

As non-recourse long-term financing structures become available to us and are utilized, such structures expose us to risks which could result in losses to us.

We may use securitization and other non-recourse long-term financing for our investments to the extent available. In such structures, our lenders typically would have only a claim against the assets included in the securitizations rather than a general claim against us as an entity. Prior to any such financing, we would seek to finance our investments with relatively short-term facilities until a sufficient portfolio is accumulated. As a result, we would be subject to the risk that we would not be able to acquire, during the period that any short-term facilities are available, sufficient eligible assets or securities to maximize the efficiency of a securitization. We also bear the risk that we would not be able to obtain new short-term facilities or would not be able to renew any short-term facilities after they expire should we need more time to seek and acquire sufficient eligible assets or securities for a securitization. In addition, conditions in the capital markets may make the issuance of any such securitization less attractive to us even when we do have sufficient eligible assets or securities. While we would intend to retain the unrated equity component of securitizations and, therefore, still have exposure to any investments included in such securitizations, our inability to enter into such securitizations may increase our overall exposure to risks associated with direct ownership of such investments, including the risk of default. Our inability to refinance any short-term facilities would also increase our risk because borrowings thereunder would likely be recourse to us as an entity. If we are unable to obtain and renew short-term facilities or to consummate securitizations to finance our investments on a long-term basis, we may be required to seek other forms of potentially less attractive financing or to liquidate assets at an inopportune time or price.

Future issuances of debt securities, which would rank senior to our common shares, and future issuances of equity securities, which would dilute the holdings of our existing shareholders and may be senior to our common shares, may materially and adversely affect the market price of our common shares.

In order to grow our business, we may rely on additional equity issuances, which may rank senior and/or be dilutive to our shareholders, or on less efficient forms of debt financing that rank senior to our shareholders and require a larger portion of our cash flow from operations, thereby reducing funds available for our operations, future business opportunities, cash distributions to our shareholders and other purposes.

Table of Contents

Upon liquidation, holders of our debt securities and other loans and preferred shares would receive a distribution of our available assets before holders of our common shares. Subject to applicable law, our board of trustees has the authority, without further shareholder approval, to issue additional common shares and to issue preferred shares on the terms and for the consideration it deems appropriate. We have issued, and intend to issue, additional common shares and securities convertible into, or exchangeable or exercisable for, common shares under our equity incentive plan. We have also filed a shelf registration statement, from which we have issued and may in the future issue additional common shares, including, without limitation through our "at-the-market" equity program.

We also may issue from time to time additional common shares in connection with property, portfolio or business acquisitions and may grant demand or piggyback registration rights in connection with such issuances. Because our decision to issue securities in any future offering will depend on market conditions and other factors beyond our control, we cannot predict the effect, if any, of future issuances of our common shares, preferred shares or other equity-based securities or the prospect of such issuances on the market price of our common shares. Issuances of a substantial amount of such securities, or the perception that such issuances might occur, could depress the market price of our common shares. Our preferred shares, if issued, would likely have a preference on distribution payments, including liquidating distributions, which could limit our ability to make distributions, including liquidating distributions, to holders of our common shares.

We cannot assure you that we will have access to any equity or debt capital on favorable terms at the desired times, or at all, and we cannot predict or estimate the amount, timing or nature of our future offerings. Thus, holders of our common shares bear the risk that our future issuances of debt or equity securities or other borrowings will reduce the market price of our common shares and dilute their ownership in us.

Interest rate fluctuations could significantly decrease our results of operations and cash flows and the market value of our investments.

Interest rates are highly sensitive to many factors, including governmental monetary and tax policies, domestic and international economic and political considerations and other factors beyond our control. Interest rate fluctuations present a variety of risks to our operations. Our primary interest rate exposures relate to the yield on our investments, their market value and the financing cost of our debt, as well as any interest rate swaps that we utilize for hedging purposes. Changes in interest rates affect our net interest income, which is the difference between the interest income we earn on our interest-earning investments and the interest expense we incur in financing these investments. Interest rate fluctuations resulting in our interest expense exceeding interest income may result in operating losses for us. Changes in the level of interest rates also may affect our ability to make investments, the value of our investments (including our pipeline of mortgage loan commitments) and any related hedging instruments, and our ability to realize gains from the disposition of assets. Changes in interest rates may also affect borrower default rates and may impact our ability to refinance or modify loans and/or to sell REO. In addition, in the event we acquire MSRs, decreasing interest rates may cause a large number of borrowers whose loans are being serviced by PLS to refinance, which may result in the loss of any such mortgage servicing business and associated write-downs of such MSRs. Any such scenario could materially and adversely affect us.

Hedging against interest rate exposure may materially and adversely affect our results of operations and cash flows.

We pursue hedging strategies to reduce our exposure to changes in interest rates. Our hedging activity varies in scope based on the level of interest rates, the type of investments held, and other changing market conditions. However, while we enter into such transactions seeking to reduce interest

Table of Contents

rate risk, unanticipated changes in interest rates may result in poorer overall investment performance than if we had not engaged in any such hedging transactions. Interest rate hedging may fail to protect or could adversely affect us because, among other things, it may not fully eliminate interest rate risk, it could expose us to counterparty and default risk that may result in greater losses or the loss of unrealized profits, and it will create additional expense, while any income it generates to offset losses may be limited by federal tax provisions applicable to REITs. Thus hedging activity, while intended to limit losses, may materially and adversely affect our results of operations and cash flows.

We utilize derivative instruments, which could subject us to risk of loss.

We utilize derivative instruments for hedging purposes, which may include swaps, options and futures. However, the prices of derivative instruments, including futures and options, are highly volatile, as are payments made pursuant to swap agreements. As a result, the cost of utilizing derivatives may reduce our income that would otherwise be available for distribution to shareholders or for other purposes, and the derivative instruments that we utilize may fail to effectively hedge our positions. We are also subject to credit risk with regard to the counterparties involved in the derivative transactions.

Competition may limit the availability of desirable investments and result in reduced risk-adjusted returns.

Our profitability depends, in part, on our ability to continue to acquire our targeted investments at favorable prices. As described in greater detail elsewhere in this Report, we compete with other mortgage REITs, specialty finance companies, private funds, thrifts, banks, mortgage bankers, insurance companies, mutual funds, institutional investors, investment banking firms, depository institutions, governmental bodies and other entities, many of which focus on acquiring distressed mortgage loans. Many of our competitors also have competitive advantages over us, including size, financial strength and risk tolerance. Competition may result in fewer investments, higher prices, acceptance of greater risk, lower yields and a narrower spread of yields over our financing costs.

Our board of trustees has approved very broad investment policies for PCM and will not review or approve each investment decision. We may change our investment strategies and policies without shareholder consent, which may materially and adversely affect the market value of our common shares and our ability to make distributions to our shareholders.

PCM is authorized to follow very broad investment policies and, therefore, has great latitude in determining the types of assets that are proper investments for us, as well as the individual investment decisions. In the future, PCM may make investments with lower rates of return than those anticipated under current market conditions and/or may make investments with greater risks to achieve those anticipated returns. Our board of trustees will periodically review our investment policies and our investment portfolio but will not review or approve each proposed investment by PCM unless it falls outside our investment policies or constitutes a related party transaction. In addition, in conducting periodic reviews, our board of trustees will rely primarily on information provided to it by PCM. Furthermore, PCM may use complex strategies, and transactions entered into by PCM may be costly, difficult or impossible to unwind by the time they are reviewed by our board of trustees.

In addition, we may change our investment strategies and policies and targeted asset classes at any time without the consent of our shareholders, and this could result in our making investments that are different in type from, and possibly riskier than our current investments or the investments currently contemplated. Changes in our investment strategies and policies and targeted asset classes may increase our exposure to interest rate risk, counterparty risk, default risk and real estate market fluctuations, which could materially and adversely affect the market value of our common shares and our ability to make distributions to our shareholders.

Table of Contents

Our implementation of a correspondent lending operation could subject us to increased risk of loss.

PCM has developed a correspondent lending operation whereby we acquire newly originated loans, including jumbo loans, from mortgage lenders and sell or securitize those loans to or through the Agencies or other third party investors. We also sell the resulting securities into the MBS markets. However, there can be no assurance that PCM will be successful in operating this business or that we will be able to capitalize on these opportunities on favorable terms or at all. In particular, we have committed, and expect to continue to commit, capital and other resources to this operation; however, PCM may not be able to continue to source sufficient investment opportunities to justify the expenditure of such capital and other resources. In the event that PCM is unable to continue to source sufficient investment opportunities for this operation, there can be no assurance that we would be able to acquire such investments on favorable terms or at all, or that such investments, if acquired, would be profitable to us. In addition, we may be unable to finance the acquisition of these investments and/or may be unable to sell the resulting MBS in the securitization market on favorable terms or at all. We are also subject to the risk that the value of the acquired loans may decrease prior to their disposition. The occurrence of any one or more of these risks could adversely impact our business, financial condition, liquidity, results of operations and our ability to make distributions to our shareholders.

Our entry into the warehouse lending business could subject us to increased risk of loss.

We intend to enter into the warehouse lending business through one or more of our subsidiaries. In connection with such activity, we will generally finance a mortgage loan originated by a correspondent lender under a master repurchase agreement, pursuant to which we will purchase the loan at a discount to its unpaid principal balance. Upon its sale of the loan to us or a third party, the correspondent lender would then repurchase the loan from us in an amount equal to our purchase price plus accrued interest through the date of repurchase.

The ability of the correspondent lender to repurchase a loan from us may be contingent on its ability to sell such loan in an amount sufficient to pay us the full repurchase price. There can be no assurance that the correspondent lender will be able to sell the loan for an amount sufficient to repay our borrowings, or at all. As a result, we are subject to the credit risk of our correspondent lenders. If the correspondent lender is unable to sell the loan and unable to repay our borrowings, there can be no assurance that any value we are able to realize through a sale or liquidation of the underlying loan will be sufficient to avoid a loss of all or a portion of the amount of the borrowing. Such losses could harm our business, financial condition, liquidity, results of operations and our ability to make distributions to our shareholders.

If we fail to maintain an effective system of internal controls, we may not be able to accurately determine our financial results or prevent fraud.

Effective internal controls are necessary for us to provide reliable financial reports and effectively prevent fraud. We may in the future discover areas of our internal controls that need improvement. Section 404 of the Sarbanes-Oxley Act of 2002 requires us to evaluate and report on our internal controls over financial reporting and have our independent auditors annually attest to our evaluation, as well as issue their own opinion on our internal control over financial reporting. While we have undertaken substantial work to comply with Section 404, we cannot be certain that we will be successful in maintaining adequate control over our financial reporting and financial processes. Furthermore, as we grow our business, our internal controls will become more complex, and we will require significantly more resources to ensure our internal controls remain effective. If we or our independent auditors discover a material weakness, the disclosure of that fact, even if quickly remedied, could reduce the market value of our common shares. Additionally, the existence of any material weakness or significant deficiency would require management to devote significant time and incur significant expense to

Table of Contents

remediate any such material weakness or significant deficiency and management may not be able to remediate any such material weakness or significant deficiency in a timely manner, or at all.

We and/or PLS are required to have various Agency approvals and state licenses in order to conduct our business and there is no assurance we and/or PLS will be able to obtain or maintain those Agency approvals or state licenses.

We and PLS are required to be licensed to conduct business in certain jurisdictions. PLS is licensed, or is taking steps to become licensed, in those jurisdictions, and for those activities, where it believes it is cost effective and appropriate to become licensed. Through our wholly owned subsidiaries, we are licensed or are taking steps to become licensed, in those jurisdictions, and for those activities, where we believe it is cost effective and appropriate to become licensed. Our failure or the failure by PLS to obtain any necessary licenses, comply with applicable licensing laws or satisfy the various requirements to maintain them over time could restrict our direct business activities, result in civil and other monetary penalties, or cause us to default under certain of our lending arrangements, any of which could materially and adversely impact our business.

We and PLS are also required to hold Agency approvals in order to sell mortgage loans to the Agencies and service such mortgage loans on their behalf. Our failure, or the failure of PLS, to satisfy the various requirements necessary to maintain such Agency approvals over time would also restrict our direct business activities and could adversely impact our business.

We may be subject to liability for potential violations of various lending laws, which could adversely impact our results of operations, financial condition and business.

Residential mortgage loan originators and servicers are required to comply with various federal, state and local laws and regulations, including anti-predatory lending laws and laws and regulations imposing certain restrictions and requirements on "high cost" loans. To the extent these originators or servicers fail to comply with applicable law and any of their residential mortgage loans become part of our assets, it could subject us, as an assignee or purchaser of the related residential mortgage loans, to monetary penalties or other losses and could result in the borrowers rescinding the affected residential mortgage loans. Further, if any of our loans are found to have been originated, serviced or owned by us or a third party in violation of applicable law, we could be fined or incur losses, which could adversely impact our business, financial condition, liquidity, results of operations and our ability to make distributions to our shareholders.

Compliance with changing regulation of corporate governance and public disclosure has and will continue to result in increased compliance costs and pose challenges for our management team.

Changing laws, regulations and standards relating to corporate governance and public disclosure, including the Dodd-Frank Act and the rules, regulations and agencies promulgated thereunder, the Sarbanes-Oxley Act and SEC regulations, have created uncertainty for public companies and significantly increased the compliance requirements, costs and risks associated with accessing the U.S. public markets. Our management team has and will continue to devote significant time and financial resources to comply with both existing and evolving standards for public companies, which has and will continue to lead to increased general and administrative expenses and a diversion of management time and attention from revenue generating activities to compliance activities.

Many aspects of the Dodd-Frank Act are subject to rulemaking and will take effect over several years, making it difficult to anticipate the overall financial impact on us and, more generally, the financial services and mortgage industries. Additionally, we cannot predict whether there will be additional proposed laws or reforms that would affect us, whether or when such changes may be adopted, how such changes may be interpreted and enforced or how such changes may affect us.

Table of Contents

However, the costs of complying with any additional laws or regulations could have a material adverse effect on our financial condition and results of operations.

We are highly dependent on information systems and systems failures could significantly disrupt our business, which could have a material adverse effect on our results of operations and cash flows.

Our business is highly dependent on the communications and information systems of PCM and PLS. Any failure or interruption of these systems could cause delays or other problems in our trading, investment and financing activities, which could have a material adverse effect on our results of operations and cash flows and on the market price of our common shares and ability to make distributions to our shareholders.

Terrorist attacks and other acts of violence or war may materially and adversely affect the real estate industry generally and our business, financial condition, liquidity and results of operations.

The terrorist attacks on September 11, 2001 disrupted the U.S. financial markets, including the real estate capital markets, and negatively impacted the U.S. economy in general. Any future terrorist attacks, the anticipation of any such attacks, the consequences of any military or other response by the U.S. and its allies, and other armed conflicts could cause consumer confidence and spending to decrease or result in increased volatility in the U.S. and worldwide financial markets and economy. The economic impact of these events could also materially and adversely affect the collectability of some of our loans and the credit quality of our loans and investments and the properties underlying our interests. We may suffer losses as a result of the adverse impact of any future attacks and these losses may adversely impact our performance and may cause the market value of our common shares to decline or be more volatile. We cannot predict the severity of the effect that potential future armed conflicts and terrorist attacks would have on us. Losses resulting from these types of events may not be fully insurable.

Risks Related to Our Investments

The mortgage loans in which we invest and the mortgage loans underlying the MBS in which we invest subject us to delinquency, foreclosure and loss, as well as the risks associated with residential real estate and residential real estate-related investments, any of which could result in losses to us.

We invest in performing and nonperforming residential mortgage loans, and newly originated prime credit quality residential mortgage loans through our correspondent lending business. Residential mortgage loans are typically secured by single-family residential property and are subject to risks of delinquency and foreclosure and risks of loss. These risks are greater for nonperforming loans. In addition, we invest in RMBS that are not guaranteed by federally chartered entities such as Fannie Mae and Freddie Mac or, in the case of Ginnie Mae, the U.S. government. The ability of borrowers to repay residential mortgage loans that we own, or underlying RMBS that we own, is dependent upon the income or assets of these borrowers.

We are authorized to invest in CMBS and may also invest in commercial mortgage loans. Commercial mortgage loans are secured by multifamily or commercial property and are subject to risks of delinquency and foreclosure, and risks of loss that are greater than similar risks associated with loans made on the security of single-family residential property. The ability of a borrower to repay a loan secured by an income-producing property typically is dependent primarily upon the successful operation of such property rather than upon the existence of independent income or assets of the borrower. Net operating income of an income producing property can be affected by a variety of factors, and if the net operating income of the property is reduced, the borrower's ability to repay the loan may be impaired.

Table of Contents

In the event of any default under a mortgage loan held directly by us, we will bear a risk of loss of principal to the extent of any deficiency between the value of the collateral and the price we paid for the loan and any accrued interest of the mortgage loan plus advances made, which could have a material adverse effect on our cash flow from operations. In the event of the bankruptcy of a mortgage loan borrower, the mortgage loan to such borrower will be deemed to be secured only to the extent of the value of the underlying collateral at the time of bankruptcy (as determined by the bankruptcy court), and the lien securing the mortgage loan will be subject to the avoidance powers of the bankruptcy trustee or debtor-in-possession to the extent the lien is unenforceable under state law.

Our investment in mortgage loans and MBS also subjects us to the risks of residential real estate and residential real estate-related investments, including, among others: (i) continued declines in the value of residential real estate; (ii) risks related to general and local economic conditions; (iii) possible lack of availability of mortgage funds for borrowers to refinance or sell their homes; (iv) overbuilding; (v) the general deterioration of the borrower's ability to keep a rehabilitated nonperforming mortgage loan current; (vi) increases in property taxes and operating expenses; (vii) changes in zoning laws; (viii) costs resulting from the clean-up of, and liability to third parties for damages resulting from, environmental problems, such as indoor mold; (ix) casualty or condemnation losses; (x) uninsured damages from floods, earthquakes or other natural disasters; (xi) limitations on and variations in rents; (xii) fluctuations in interest rates; (xiii) fraud by borrowers, originators and/or sellers of mortgage loans; (xiv) undetected deficiencies and/or inaccuracies in underlying mortgage loan documentation and calculations; and (xv) failure of the borrower to adequately maintain the property, particularly during times of financial difficulty. To the extent that assets underlying our investments are concentrated geographically, by property type or in certain other respects, we may be subject to certain of the foregoing risks to a greater extent. Additionally, we may be required to foreclose on a mortgage loan and such actions would subject us to greater concentration of the risks of the residential real estate markets and risks related to the ownership and management of real property.

A significant portion of the residential mortgage loans that we acquire are or may become nonperforming loans, which increases our risk of loss of our investment.

We acquire distressed residential mortgage loans and mortgage-related assets where the borrower has failed to make timely payments of principal and/or interest. We also acquire performing loans that subsequently become nonperforming. Under current market conditions, it is likely that many of these loans will have current loan-to-value ratios in excess of 100%, meaning the amount owed on the loan exceeds the value of the underlying real estate. Further, the borrowers on such loans may be in economic distress and/or may have become unemployed, bankrupt or otherwise unable or unwilling to make payments when due. If PLS as our primary and special servicer is not able to address the issues concerning these loans, we may incur significant losses. There are no limits on the percentage of nonperforming assets we may hold. Any loss we incur may be significant and may reduce distributions to our shareholders and materially and adversely affect the market value of our common shares.

We invest in subprime residential mortgage loans or RMBS collateralized by subprime mortgage loans, which are subject to increased risks.

We invest in subprime residential mortgage loans or RMBS backed by collateral pools of subprime residential mortgage loans, which are mortgage loans originated using underwriting standards that are less restrictive than the underwriting standards for other first and junior lien mortgage loan purchase programs, such as the programs of Fannie Mae and Freddie Mac. Because of the higher delinquency rates and losses associated with subprime mortgage loans, the performance of subprime mortgage loans or RMBS backed by subprime mortgage loans in which we invest could be correspondingly adversely affected, which could materially and adversely impact our business, financial condition, liquidity, and results of operations.

Table of Contents

A significant portion of our investments is and will continue to be in the form of whole loan mortgages, which are subject to increased risks.

A significant portion of our investments is and will continue to be in the form of whole loan mortgages, which are directly exposed to losses resulting from default and foreclosure. In the event of a foreclosure, we may assume direct ownership of the underlying real estate. The liquidation proceeds upon sale of such real estate may not be sufficient to recover our investment in the loan, resulting in a loss to us. In addition, the foreclosure process may be lengthy and expensive, and any delays or costs involved in the effectuation of a foreclosure of the loan or a liquidation of the underlying property may further reduce the proceeds and thus increase the loss.

Our acquisition of mortgage servicing rights exposes us to significant risks.

MSRs arise from contractual agreements between us and the investors (or their agents) in mortgage securities and mortgage loans. We may acquire MSRs from the sale of mortgage loans where we assume the obligation to service the loan in connection with the sale transaction or we may purchase MSRs. Any MSRs we acquire are recorded at fair value on our balance sheet based upon significant estimates and assumptions. The determination of the fair value of MSRs requires our management to make numerous estimates and assumptions. Such estimates and assumptions include, without limitation, estimates of future cash flows associated with MSRs based upon assumptions involving interest rates as well as the prepayment rates, delinquencies and foreclosure rates of the underlying serviced mortgage loans.

The ultimate realization of the value of MSRs may be materially different than the fair values of such MSRs as may be reflected in our consolidated balance sheet as of any particular date. The use of different estimates or assumptions in connection with the valuation of these assets could produce materially different fair values for such assets, which could have a material adverse effect on our business, financial condition, results of operations and cash flows. Accordingly, there may be material uncertainty about the fair value of any MSRs we acquire.

Changes in interest rates are a key driver of the performance of MSRs since the values of MSRs are highly sensitive to changes in interest rates. Historically, the value of MSRs has increased when interest rates rise and decreased when interest rates decline due to the effect those changes in interest rates have on prepayment estimates. We may pursue various hedging strategies to seek to reduce our exposure to adverse changes in interest rates. Our hedging activity will vary in scope based on the level and volatility of interest rates, the type of assets held and other changing market conditions. Interest rate hedging may fail to protect or could adversely affect us. To the extent we do not utilize derivatives to hedge against changes in fair value of MSRs, our balance sheet, financial condition and results of operations would be susceptible to volatility due to changes in the fair value of, or cash flows from, MSRs as interest rates change.

Prepayment speeds significantly affect MSRs. Prepayment speed is the measurement of how quickly borrowers pay down the unpaid principal balance of their loans or how quickly loans are otherwise brought current, modified, liquidated or charged off. We base the price we pay for MSRs and the rate of amortization of those assets on, among other things, our projection of the cash flows from the related pool of mortgage loans. Our expectation of prepayment speeds is a significant assumption underlying those cash flow projections. If prepayment speeds are significantly greater than expected, the fair value of the MSRs could decline and we may be required to record a non-cash charge, which would have a negative impact on our financial results. Furthermore, a significant increase in prepayment speeds could materially reduce the ultimate cash flows we receive from MSRs, and we could ultimately receive substantially less than what we paid for such assets.

Moreover, delinquency rates have a significant impact on the valuation of any MSRs. An increase in delinquencies generally results in lower revenue because typically we only collect servicing fees from GSEs or mortgage owners for performing loans. We base the price we pay for MSRs on, among other

Table of Contents

things, our projections of the cash flows from related pools of mortgage loans. Our expectation of delinquencies is a significant assumption underlying those cash flow projections. If delinquencies are significantly greater than we expect, the estimated fair value of the MSR's could be diminished. When the estimated fair value of MSR's is reduced, we could suffer a loss, which could have a negative impact on our financial results.

Furthermore, MSR's and the related servicing activities are subject to numerous federal, state and local laws and regulations and may be subject to various judicial and administrative decisions imposing various requirements and restrictions on our business. Our failure to comply, or the failure of the servicer to comply, with the laws, rules or regulations to which we or they are subjected due by virtue of ownership of MSR's, whether actual or alleged, could expose us to fines, penalties or potential litigation liabilities, including costs, settlements and judgments, any of which could have a material adverse effect on our business, financial condition and results of operations.

RMBS and CMBS investments are subject to significant risks.

We invest in RMBS and may invest in CMBS. RMBS evidence interests in or are secured by pools of residential mortgage loans and CMBS evidence interests in or are secured by a single commercial mortgage loan or a pool of commercial mortgage loans. Accordingly, RMBS and CMBS are subject to all of the risks of the respective underlying mortgage loans. In addition, the market value of mortgage securities will generally vary inversely with changes in market interest rates, declining when interest rates rise and rising when interest rates decline. However, mortgage securities, while having comparable risk of decline during periods of rising rates, usually have less potential for capital appreciation than other investments of comparable maturities due to the likelihood of increased prepayments of mortgages as interest rates decline.

Investments in subordinated loans and subordinated MBS could subject us to increased risk of losses.

We invest in subordinated loans and may invest in subordinated MBS. In the event a borrower defaults on a subordinated loan and lacks sufficient assets to satisfy such loan, we may lose all or a significant part of our investment. In the event a borrower becomes subject to bankruptcy proceedings, we will not have any recourse to the assets, if any, of the borrower that are not pledged to secure our loan, and the unpledged assets of the borrower may not be sufficient to satisfy our loan. If a borrower defaults on our subordinated loan or on its senior debt (*i.e.*, a first-lien loan, in the case of a residential mortgage loan, or a contractually or structurally senior loan, in the case of a commercial mortgage loan), or in the event of a borrower bankruptcy, our subordinated loan will be satisfied only after all senior debt is paid in full. As a result, we may not recover all or even a significant part of our investment, which could result in losses. In addition, in the case of commercial mortgage loans where senior debt exists, the presence of intercreditor arrangements may limit our ability to amend our loan documents, assign our loan, accept prepayments, exercise our remedies and control decisions made in bankruptcy proceedings relating to borrowers.

In general, losses on an asset securing a mortgage loan included in a securitization will be borne first by the equity holder of the property, then by a cash reserve fund or letter of credit provided by the borrower, if any, and then by the "first loss" subordinated security holder and then by the "second loss" subordinated security holder. In the event of default and the exhaustion of any equity support, reserve fund, letter of credit and any classes of securities junior to those in which we invest, we may not recover all or even a significant part of our investment, which could result in losses. In addition, if the underlying mortgage portfolio has been serviced ineffectively by the loan servicer or overvalued by the originator, or if the values of the assets subsequently decline and, as a result, less collateral is available to satisfy interest and principal payments due on the related MBS, the securities in which we invest may suffer significant losses.

Table of Contents

The prices of these types of lower credit quality investments are generally more sensitive to adverse actual or perceived economic downturns or individual issuer developments than more highly rated investments. An economic downturn or a projection of an economic downturn, for example, could cause a decline in the price of lower credit quality investments because the ability of obligors to make principal and interest payments or to refinance may be impaired.

Our investments in loans to and debt securities of real estate companies will be subject to the specific risks relating to the particular borrower or issuer of the securities and to the general risks of investing in real estate-related loans and securities, which could result in significant losses.

We may invest in loans to and debt securities of real estate companies, including REITs. These investments involve special risks relating to the particular borrower or issuer of the securities, including the financial condition, liquidity, results of operations, business and prospects of the borrower or issuer. Investments in REIT debt securities may also be subject to risks relating to transfer restrictions, substantial market price volatility resulting from changes to prevailing interest rates, and, in the case of subordinated investments, the seniority of claims of banks and other senior lenders to the issuer. In addition, real estate companies often invest, and REITs generally are required to invest substantially, in real estate or real estate-related assets and are subject to some or all of the risks inherent with real estate and real estate-related investments referred to in this Report. These risks may adversely affect the value of our debt securities of real estate companies and the ability of the issuers thereof to make principal and interest payments in a timely manner, or at all, which could result in significant losses for us.

Our acquisition of distressed condominium development loans will be subject to the general risks applicable to development projects, which may subject us to losses.

We may seek opportunities to acquire mortgage assets that result from distressed condominium development projects, which may include real estate development loans, existing residential loans originated by the developer, and residential loans originated by PLS on our behalf. In addition to the risks inherent to the investment in mortgage loans, including distressed mortgage loans, as described throughout this Item 1A, our investment in mortgage assets that result from condominium development projects also subjects us to the general risks applicable to a development project. These risks include that the construction and leasing or sale of a property may not be completed on schedule or may cost more than anticipated due to, among other factors, events beyond the control of the developer (such as weather conditions, labor or material shortages or labor actions such as strikes). Development activities are also subject to risks relating to the inability to obtain, or delays in obtaining, all necessary zoning, land use, building, occupancy and other required government permits and authorizations. It is also possible that construction or permanent financing may not be available on favorable terms or at all. Any of these risks could result in substantial unanticipated delays or additional expenses and, under certain circumstances, could prevent completion of development activities once commenced. Properties under development or properties acquired for development may receive little or no cash flow from the date of acquisition through the date of completion of development or redevelopment and may experience operating deficits after the date of completion. In addition, market conditions may change during the course of development that make such development less attractive than at the time it was commenced. Any of these risks could have a material adverse effect on the value of our development loans.

The failure of PLS or any other servicer to effectively service our portfolio of mortgage loans would materially and adversely affect us.

Pursuant to our loan servicing agreement, PLS provides us with primary and special servicing. PLS's responsibilities include providing delinquency notices when necessary, loan workouts and modifications, foreclosure proceedings, short sales, liquidations of REOs acquired as a result of

Table of Contents

foreclosures of mortgage loans, and reporting on the performance of the loans. The ability of PLS or any other servicer or subservicer to effectively service our portfolio of mortgage loans is critical to our success, particularly given our strategy of maximizing the value of the mortgage loans that we acquire through proprietary loan modification programs, special servicing and other initiatives focused on keeping borrowers in their homes; or in the case of nonperforming loans, effecting property resolutions in a timely, orderly and economically efficient manner. The failure of PLS or any other servicer or subservicer to effectively service our portfolio of mortgage loans would adversely impact our business, financial condition, liquidity, results of operations and our ability to make distributions to our shareholders.

The increasing number of proposed U.S. federal, state and local laws may affect certain mortgage-related assets in which we intend to invest and could increase our cost of doing business.

Legislation has been proposed which, among other provisions, could hinder the ability of a servicer to foreclose promptly on defaulted mortgage loans or would permit limited assignee liability for certain violations in the mortgage loan origination process, which could result in us being held responsible for such violations. We cannot predict whether or in what form the U.S. Congress or the various state and local legislatures may enact legislation affecting our business. We will evaluate the potential impact of any initiatives which, if enacted, could materially and adversely affect our practices and results of operations. We are unable to predict whether U.S. federal, state or local authorities will enact laws, rules or regulations that will require changes in our practices in the future, and any such changes could materially and adversely affect our cost of doing business and profitability.

Our inability to promptly foreclose upon defaulted mortgage loans could increase our cost of doing business and/or diminish our expected return on investments.

Our ability to promptly foreclose upon defaulted mortgage loans and liquidate the underlying real property plays a critical role in our valuation of the assets in which we invest and our expected return on those investments. There are a variety of factors that may inhibit our ability, through PLS, to foreclose upon a mortgage loan and liquidate the real property within the time frames we model as part of our valuation process. These factors include, without limitation: federal, state or local legislative action or initiatives designed to provide homeowners with assistance in avoiding residential mortgage loan foreclosures and that serve to delay the foreclosure process; HAMP and similar programs that require specific procedures to be followed to explore the refinancing of a mortgage loan prior to the commencement of a foreclosure proceeding; and continued declines in real estate values and sustained high levels of unemployment that increase the number of foreclosures and place additional pressure on the already overburdened judicial and administrative systems.

In addition, certain issues, including "robo-signing," have been identified recently throughout the mortgage industry that relate to affidavits used in connection with the mortgage loan foreclosure process. A substantial portion of our investments are nonperforming mortgage loans, many of which are already subject to foreclosure proceedings at the time of purchase. While we have obtained assurances from PLS about its own practices relative to foreclosure proceedings and its proper use of affidavits, there can be no assurance that similar practices have been followed in connection with mortgage loans that are already subject to foreclosure proceedings at the time of purchase. To the extent we determine that any of these loans are impacted by these issues, we may be required to re-commence the foreclosure proceedings relating to such loans, thereby resulting in additional delay that could have the effect of increasing our cost of doing business and/or diminishing our expected return on our investments. The uncertainty surrounding these issues could also result in legal, regulatory or industry changes to the foreclosure process as a whole, any or all of which could lengthen the foreclosure process and negatively impact our business.

Table of Contents

Challenges to the MERS ® System could materially and adversely affect our business, results of operations and financial condition.

MERSCORP, Inc. is a privately held company that maintains an electronic registry, referred to as the MERS System, that tracks servicing rights and ownership of loans in the United States. Mortgage Electronic Registration Systems, Inc. ("MERS"), a wholly owned subsidiary of MERSCORP, Inc., can serve as a nominee for the owner of a mortgage loan and in that role initiate foreclosures and/or become the mortgagee of record for the loan in local land records. We, or PLS on our behalf, may choose to use MERS as a nominee. The MERS System is widely used by participants in the mortgage finance industry.

Several legal challenges have been made disputing MERS's legal standing to initiate foreclosures and/or act as nominee in local land records. These challenges have focused public attention on MERS and on how loans are recorded in local land records. As a result, these challenges could negatively affect MERS's ability to serve as the mortgagee of record in some jurisdictions. In addition, where MERS is the mortgagee of record, it must execute assignments of mortgages, affidavits and other legal documents in connection with foreclosure proceedings. As a result, investigations by governmental authorities and others into the servicer foreclosure process deficiencies referenced above may impact MERS. Failures by MERS to apply prudent and effective process controls and to comply with legal and other requirements in the foreclosure process could pose operational, reputational and legal risks that may materially and adversely affect us.

A decline in the value of the real estate underlying our mortgage loans may result in reduced risk-adjusted returns.

The value of the real estate that underlies mortgage loans is subject to market conditions. Changes in the real estate market may adversely affect the value of the collateral and thereby lower the value to be derived from its liquidation. In addition, adverse changes in the real estate market increase the probability of default, as the incentive of the borrower to retain and protect equity in the property declines. Distressed loans may require a substantial amount of workout negotiations and/or restructuring, which may entail, among other things, a substantial reduction in the interest rate, capitalization of interest payments, and a substantial write-down of the principal of the loan. However, even if such restructuring were successfully accomplished, a risk exists that the borrower will not be able or willing to maintain the restructured payments or refinance the restructured mortgage upon maturity.

Changes in prepayment rates could affect the value of our investment portfolio, which could result in losses or reduced earnings and materially and adversely affect the cash available for distribution to our shareholders.

The value of our investment portfolio may be materially and adversely affected by prepayment rates on mortgage loans. Prepayment rates on loans are influenced by changes in market interest rates and a variety of economic, geographic and other factors beyond our control. Consequently, we cannot predict with certainty such prepayment rates, and no strategy can completely insulate us from prepayment or other such risks. Changes in prepayment rates may materially and adversely affect our ability to maintain targeted amounts of leverage on our portfolio and may result in losses or reduced earnings for us and materially and adversely affect the cash available for distribution to our shareholders.

Many of our investments are illiquid and we may not be able to vary our portfolio in response to changes in economic and other conditions.

Our investments in mortgage loans are, and our investments in securities may be, illiquid. As a result, it may be difficult or impossible to obtain or validate third party pricing on the investments we

Table of Contents

purchase. Illiquid investments typically experience greater price volatility, as a ready market does not exist, and can be more difficult to value. The illiquidity of our investments may make it difficult for us to sell such investments if the need or desire arises. In addition, if we are required to liquidate all or a portion of our portfolio quickly, we may realize significantly less than the recorded value.

Many of our investments are unrated or, where any credit ratings are assigned to our investments, they will be subject to ongoing evaluations and revisions and we cannot assure you that those ratings will not be downgraded.

Many of our current investments are, and many of our future investments will not be, rated by any rating agency. Therefore, PCM's assessment of the value and pricing of our investments may be difficult and the accuracy of such assessment is inherently uncertain. However, certain of our investments may be rated. If rating agencies assign a lower-than-expected rating or reduce or withdraw, or indicate that they may reduce or withdraw, their ratings of our investments in the future, the value of these investments could significantly decline, which would materially and adversely affect the value of our investment portfolio and could result in losses upon disposition or the failure of borrowers to satisfy their debt service obligations to us.

We may not realize gains or income from our investments.

While we seek to generate both current income and capital appreciation from our investments, our investments may not appreciate and, in fact, may decline in value. In addition, the obligors on our investments may default on, or be delayed in making, interest and/or principal payments, especially given that our current investment strategies focus, in part, on distressed opportunities and that we acquire nonperforming residential mortgage loans. Accordingly, we are subject to an increased risk of loss and may not be able to realize gains or income from our investments. Any gains that we do realize may not be sufficient to offset our losses and expenses.

Insurance on real estate securing mortgage loans and real estate securities collateral may not cover all losses.

There are certain types of losses, generally of a catastrophic nature, such as earthquakes, floods, hurricanes, terrorism or acts of war, that may be uninsurable or not economically insurable. Inflation, changes in building codes and ordinances, environmental considerations and other factors, including terrorism or acts of war, also might make the insurance proceeds insufficient to repair or replace a property if it is damaged or destroyed. Under these circumstances, the insurance proceeds received might not be adequate to restore our economic position with respect to the affected real property. Any uninsured loss could result in the loss of cash flow from, and the asset value of, the affected property.

We may be materially and adversely affected by risks affecting borrowers or the asset or property types in which our investments may be concentrated at any given time, as well as from unfavorable changes in the related geographic regions.

Our assets are not subject to any geographic, diversification or concentration limitations except that we will be concentrated in residential mortgage-related investments. Accordingly, our investment portfolio may be concentrated by geography, asset, property type and/or borrower, increasing the risk of loss to us if the particular concentration in our portfolio is subject to greater risks or undergoing adverse developments. In addition, adverse conditions in the areas where the properties securing or otherwise underlying our investments are located (including business layoffs or downsizing, industry slowdowns, changing demographics and other factors) and local real estate conditions (such as oversupply or reduced demand) may have an adverse effect on the value of our investments. A material decline in the demand for real estate in these areas may materially and adversely affect us. Lack of diversification can increase the correlation of non-performance and foreclosure risks among our investments.

Table of Contents

A prolonged economic slowdown, recession or declining real estate values could materially and adversely affect us.

The risks associated with our investments are more acute during periods of economic slowdown or recession, especially if these periods are accompanied by high unemployment and declining real estate values. A weakening economy, high unemployment and declining real estate values significantly increase the likelihood that borrowers will default on their debt service obligations to us and that we will incur losses on our investments with them in the event of a default on a particular investment because the value of any collateral we foreclose upon may be insufficient to cover the full amount of such investment or may require a significant amount of time to realize. They may also increase the likelihood of re-default rates even after we have completed loan modifications. Any period of increased payment delinquencies, foreclosures or losses could adversely affect the net interest income generated from our portfolio and our ability to make and finance future investments, which would materially and adversely affect our business, financial condition, liquidity, results of operations and our ability to make distributions to our shareholders.

Fair values of our investments are imprecise and may materially and adversely affect periodic reported results and credit availability, which may reduce earnings and, in turn, cash available for distribution to our shareholders.

The values of some of our investments are not readily determinable. We measure the fair value of these investments monthly, but the fair value at which our assets are recorded may not be an indication of their realizable value. Ultimate realization of the value of an asset depends to a great extent on economic and other conditions that are beyond the control of PCM, our company or our board of trustees. Further, fair value is only an estimate based on good faith judgment of the price at which an investment can be sold since market prices of investments can only be determined by negotiation between a willing buyer and seller. In certain cases, PCM's estimation of the fair value of our investments includes inputs provided by third-party dealers and pricing services, and valuations of certain securities or other assets in which we invest are often difficult to obtain and are subject to judgments that may vary among market participants. Changes in the estimated fair values of those assets are directly charged or credited to earnings for the period. If we were to liquidate a particular asset, the realized value may be more than or less than the amount at which such asset was recorded. Accordingly, in either event, the value of our common shares could be materially and adversely affected by our determinations regarding the fair value of our investments, and such valuations may fluctuate over short periods of time.

PCM utilizes analytical models and data in connection with the valuation of our investments, and any incorrect, misleading or incomplete information used in connection therewith would subject us to potential risks.

Given the complexity of our investments and strategies, PCM must rely heavily on models and data, including analytical models (both proprietary models developed by PCM and those supplied by third parties) and information and data supplied by third parties. Models and data are used to value investments or potential investments and also in connection with hedging our investments. In the event models and data prove to be incorrect, misleading or incomplete, any decisions made in reliance thereon expose us to potential risks. For example, by relying on incorrect models and data, especially valuation models, PCM may be induced to buy certain investments at prices that are too high, to sell certain other investments at prices that are too low or to miss favorable opportunities altogether. Similarly, any hedging based on faulty models and data may prove to be unsuccessful.

Table of Contents

Liability relating to environmental matters may impact the value of properties that we may acquire or the properties underlying our investments.

Under various U.S. federal, state and local laws, an owner or operator of real property may become liable for the costs of removal of certain hazardous substances released on its property. These laws often impose liability without regard to whether the owner or operator was responsible for, or aware of, the release of such hazardous substances. The presence of hazardous substances may also adversely affect an owner's ability to sell real estate, borrow using real estate as collateral or make debt payments to us. In addition, if we take title to a property, the presence of hazardous substances may adversely affect our ability to sell the property, and we may become liable to a governmental entity or to third parties for various fines, damages or remediation costs. Any of these liabilities or events may materially and adversely affect the value of the relevant asset and/or our business, financial condition, liquidity, results of operations and our ability to make distributions to our shareholders.

We are subject to counterparty risk and may be unable to seek indemnity or require our counterparties to repurchase mortgage loans if they breach representations and warranties, which could cause us to suffer losses.

When we purchase nonperforming assets or newly originated loans through our correspondent lending operation, our counterparty typically makes customary representations and warranties to us about such assets or loans. Our residential mortgage loan purchase agreements may entitle us to seek indemnity or demand repurchase or substitution of the loans in the event our counterparty breaches a representation or warranty given to us. However, there can be no assurance that our mortgage loan purchase agreements will contain appropriate representations and warranties, that we will be able to enforce our contractual right to repurchase or substitution, or that our counterparty will remain solvent or otherwise be able to honor its obligations under our mortgage loan purchase agreements. Further, the majority of our nonperforming assets owned as of December 31, 2011 were purchased from or through one or more subsidiaries of Citigroup Inc., which is also one of our sources of financing. Our inability to obtain indemnity or require repurchase of a significant number of loans could materially and adversely affect our business, financial condition, liquidity, results of operations and our ability to make distributions to our shareholders.

We may be required to repurchase mortgage loans or indemnify investors if we breach representations and warranties, which could materially and adversely affect our earnings.

When we sell loans, we are required to make customary representations and warranties about such loans to the loan purchaser. Our residential mortgage loan sale agreements may require us to repurchase or substitute loans in the event we breach a representation or warranty given to the loan purchaser. In addition, we may be required to repurchase loans as a result of borrower fraud or in the event of early payment default on a mortgage loan. Likewise, we may be required to repurchase or substitute loans if we breach a representation or warranty in connection with our securitizations. The remedies available to a purchaser of mortgage loans are generally broader than those available to us against the originator or correspondent lender, and if a purchaser enforces its remedies against us, we may not be able to enforce the remedies we have against the sellers. The repurchased loans typically can only be financed at a steep discount to their repurchase price, if at all. They are also typically sold at a significant discount to the unpaid principal balance. Significant repurchase activity could materially and adversely affect our business, financial condition, liquidity, results of operations and our ability to make distributions to our shareholders.

Table of Contents

Risks Related to Our Organization and Structure

Certain provisions of Maryland law, our staggered board of trustees and certain provisions in our declaration of trust could each inhibit a change in our control.

Certain provisions of the Maryland General Corporation Law (the "MGCL"), applicable to a Maryland real estate investment trust may have the effect of inhibiting a third party from making a proposal to acquire us or of impeding a change in our control under circumstances that otherwise could provide the holders of our common shares with the opportunity to realize a premium over the then prevailing market price of such common shares.

In addition, our board of trustees is divided into three classes of trustees. Trustees of each class will be elected for three-year terms upon the expiration of their current terms, and each year one class of trustees will be elected by our shareholders. The staggered terms of our trustees may reduce the possibility of a tender offer or an attempt at a change in control, even though a tender offer or change in control might be in the best interests of our shareholders.

Further, our declaration of trust authorizes us to issue additional authorized but unissued common shares and preferred shares. Our board of trustees may, without shareholder approval, increase the aggregate number of our authorized common shares or the number of shares of any class or series that we have authority to issue and classify or reclassify any unissued common shares or preferred shares and may set the preferences, rights and other terms of the classified or reclassified shares. As a result, our board may establish a class or series of common shares or preferred shares or take other actions that could delay or prevent a transaction or a change in our control that might involve a premium price for our common shares or otherwise be in the best interests of our shareholders.

Compliance with our Investment Company Act exclusion imposes limits on our operations.

We intend to conduct our operations so that we are not required to register as an investment company under the Investment Company Act. However, our qualification for exclusion from registration under the Investment Company Act will limit our ability to make certain investments, as discussed below.

Failure to maintain our exclusion from registration under the Investment Company Act could materially and adversely affect us.

Because we are organized as a holding company that conducts its businesses primarily through our operating partnership and its wholly-owned subsidiaries, our status under the Investment Company Act is dependent upon the status of our operating partnership which, as a holding company, in turn, will have its status determined by the status of its subsidiaries. The securities issued to our operating partnership by subsidiaries excepted from the definition of "investment company" under Section 3(c)(1) or Section 3(c)(7) of the Investment Company Act, together with any other investment securities owned by our operating partnership, may not have a value in excess of 40% of the value of our operating partnership's total assets on an unconsolidated basis. While we will monitor our holdings to ensure continuing and ongoing compliance with this asset test, if the value of such securities exceeds such 40% threshold, or if one or more of such subsidiaries fail to maintain their exceptions or exclusions from the Investment Company Act and we do not have available to us another basis on which we may avoid registration, we may have to register under the Investment Company Act. This could subject us to substantial regulation with respect to our capital structure (including our ability to use leverage), management, operations, transactions with affiliated persons (as defined in the Investment Company Act), portfolio composition, including restrictions with respect to diversification and industry concentration, and other matters. It could also cause the breach of covenants we have made under certain of our financing arrangements, which could result in an event of default, acceleration of debt and/or termination.

Table of Contents

In August 2011, the SEC solicited public comment through a concept release on a wide range of issues relating to the Section 3(c)(5)(C) exemption from the Investment Company Act, including the nature of the assets that qualify for purposes of the exemption and whether mortgage-related REITs should be regulated in a manner similar to investment companies. There can be no assurance that the laws and regulations governing the Investment Company Act status of REITs, including guidance and interpretations from the Division of Investment Management of the SEC regarding the exceptions and exclusions therefrom, will not change in a manner that adversely affects our operations. If the SEC takes action that could result in our or our subsidiaries' failure to maintain an exception or exclusion from the Investment Company Act, we could, among other things, be required to (a) restructure our operations to avoid being required to register as an investment company, (b) effect sales of our assets in a manner that, or at a time when, we would not otherwise choose to do so or (c) register as an investment company (which, among other things, would require us to comply with the leverage constraints applicable to investment companies), any of which could negatively affect the value of our common shares, the sustainability of our business model, and our ability to make distributions to our shareholders, which could, in turn, materially and adversely affect our business and the market price of our common shares.

Further, a loss of our Investment Company Act exclusion would allow PCM to terminate our management agreement with us, and our loan servicing agreement with PLS is subject to early termination in the event our management agreement is terminated for any reason. If either of these agreements is terminated, we will have to obtain the services on our own, and we may not be able to replace these services in a timely manner or on favorable terms, or at all. This would have a material adverse effect on our ability to continue to execute our business strategy.

Rapid changes in the values of our investments may make it more difficult for us to maintain our REIT qualification or exclusion from the Investment Company Act.

If the market value or income potential of our residential mortgage loans and other real estate-related assets declines as a result of increased interest rates, prepayment rates or other factors, we may need to increase certain real estate investments and income and/or liquidate our non-qualifying assets in order to maintain our REIT qualification or exclusion from the Investment Company Act. If the decline in real estate asset values and/or income occurs quickly, this may be especially difficult to accomplish, particularly given the illiquid nature of our investments. We may have to make investment decisions that we otherwise would not make absent our REIT and Investment Company Act considerations.

Our rights and the rights of our shareholders to take action against our trustees and officers are limited, which could limit your recourse in the event of actions not in your best interest.

Our declaration of trust limits the liability of our present and former trustees and officers to us and our shareholders for money damages to the maximum extent permitted under Maryland law. Under current Maryland law, our present and former trustees and officers will not have any liability to us or our shareholders for money damages other than liability resulting from either (a) actual receipt of an improper benefit or profit in money, property or services or (b) active and deliberate dishonesty by the trustee or officer that was established by a final judgment and is material to the cause of action.

Our declaration of trust authorizes us to indemnify our present and former trustees and officers for actions taken by them in those capacities to the maximum extent permitted by Maryland law. Our bylaws require us to indemnify each present and former trustee or officer, to the maximum extent permitted by Maryland law, in the defense of any proceeding to which he or she is made, or threatened to be made, a party by reason of his or her service to us. In addition, we may be obligated to pay or reimburse the expenses incurred by our present and former trustees and officers without requiring a preliminary determination of their ultimate entitlement to indemnification. As a result, we and our

Table of Contents

shareholders may have more limited rights against our present and former trustees and officers than might otherwise exist absent the current provisions in our declaration of trust and bylaws or that might exist with other companies, which could limit your recourse in the event of actions not in your best interest.

Our declaration of trust contains provisions that make removal of our trustees difficult, which could make it difficult for our shareholders to effect changes to our management.

Our declaration of trust provides that, subject to the rights of holders of any series of preferred shares, a trustee may be removed only for "cause" (as defined in our declaration of trust), and then only by the affirmative vote of at least two-thirds of the votes entitled to be cast generally in the election of trustees. Vacancies generally may be filled only by a majority of the remaining trustees in office, even if less than a quorum, for the full term of the class of trustees in which the vacancy occurred. These requirements make it more difficult to change our management by removing and replacing trustees and may prevent a change in our control that is in the best interests of our shareholders.

Risks Related to Taxation

Our failure to qualify as a REIT would result in higher taxes and reduced cash available for distribution to our shareholders.

We are organized and operate in a manner so as to qualify as a REIT for U.S. federal income tax purposes. Our qualification as a REIT depends on our satisfaction of certain asset, income, organizational, distribution, shareholder ownership and other requirements on a continuing basis. If we were to fail to qualify as a REIT in any taxable year, we would be subject to U.S. federal income tax, including any applicable alternative minimum tax, on our taxable income at regular corporate rates, and distributions to our shareholders would not be deductible by us in computing our taxable income. Any such corporate tax liability could be substantial and would reduce the amount of cash available for distribution to our shareholders, which in turn would have an adverse impact on the value of our common shares. Unless we were entitled to relief under certain Internal Revenue Code provisions, we also would be disqualified from taxation as a REIT for the four taxable years following the year during which we ceased to qualify as a REIT.

Even if we qualify as a REIT, we face tax liabilities that reduce our cash flow, and a significant portion of our income may be earned through TRSs that are subject to U.S. federal income taxation.

Even if we qualify for taxation as a REIT, we may be subject to certain U.S. federal, state and local taxes on our income and assets, including taxes on any undistributed income, tax on income from some activities conducted as a result of a foreclosure, and state or local income, property and transfer taxes, such as mortgage recording taxes. Any of these taxes would decrease cash available for distribution to our shareholders.

We also engage in business activities that are required to be conducted in a TRS. In order to meet the REIT qualification requirements, or to avert the imposition of a 100% tax that applies to certain gains derived by a REIT from dealer property or inventory, we hold a significant portion of our assets through, and derive a significant portion of our taxable income and gains in, TRSs, subject to the limitation that securities in TRSs may not represent more than 25% of our assets in order for us to remain qualified as a REIT. All taxable income and gains derived from the assets held from time to time in our TRSs are subject to regular corporate income taxation.

Table of Contents

The percentage of our assets represented by TRSs and the amount of our income that we can receive in the form of TRS dividends are subject to statutory limitations that could jeopardize our REIT status.

No more than 25% of the value of a REIT's assets may consist of stock or securities of one or more TRSs (at the end of each quarter). While we intend to manage our affairs so as to satisfy this requirement, there can be no assurance that we will be able to do so in all market circumstances. Although a TRS is subject to U.S. federal, state and local income tax on its taxable income, we may from time to time need to make distributions of such after-tax income in order to keep the value of our TRSs below 25% of our total assets. However, for purposes of one of the tests we must satisfy to qualify as a REIT, at least 75% of our gross income must in each taxable year generally be from real estate assets. While we monitor our compliance with both this income test and the limitation on the percentage of our assets represented by TRS securities, the two may at times be in conflict with one another. That is, it is possible that we may wish to distribute a dividend from a TRS in order to reduce the value of our TRSs below 25% of our assets, but be unable to do so without violating the requirement that 75% of our gross income in the taxable year be derived from real estate assets. There can be no assurance that we will be able to comply with both of these tests in all market conditions.

Dividends payable by REITs do not generally qualify for the reduced tax rates applicable to certain corporate dividends.

Recently enacted legislation has extended, through taxable years beginning on or before December 31, 2012, the 15% maximum tax rate for dividends paid by certain corporations, as well as the 15% capital gains rate, applicable to eligible domestic shareholders that are individuals, trusts and estates. Dividends paid by REITs, however, are generally not eligible for the reduced rates. The more favorable rates applicable to regular corporate dividends could cause investors who are individuals, trusts and estates to perceive investments in REITs to be relatively less attractive than investments in the stocks of non-REIT corporations that pay dividends, which could materially and adversely affect the value of the stock of REITs, including our common shares.

We have not established a minimum distribution payment level and no assurance can be given that we will be able to make distributions to our shareholders in the future at current levels or at all.

We are generally required to distribute to our shareholders at least 90% of our taxable income each year for us to qualify as a REIT under the Internal Revenue Code, which requirement we currently intend to satisfy. To the extent we satisfy the 90% distribution requirement but distribute less than 100% of our taxable income, we will be subject to U.S. federal corporate income tax on our undistributed taxable income. We have not established a minimum distribution payment level, and our ability to make distributions to our shareholders may be materially and adversely affected by the risk factors discussed in this Report and any subsequent Quarterly Reports on Form 10-Q. Although we have made, and anticipate continuing to make, quarterly distributions to our shareholders, our board of trustees has the sole discretion to determine the timing, form and amount of any future distributions to our shareholders, and such determination will depend upon, among other factors, our historical and projected results of operations, financial condition, cash flows and liquidity, maintenance of our REIT qualification and other tax considerations, capital expenditure and other expense obligations, debt covenants, contractual prohibitions or other limitations and applicable law and such other matters as our board of trustees may deem relevant from time to time. Among the factors that could impair our ability to continue to make distributions to our shareholders are:

our inability to invest the net proceeds from our equity offerings;

our inability to make attractive risk-adjusted returns on our current and future investments;

non-cash earnings or unanticipated expenses that reduce our cash flow;

Table of Contents

defaults in our investment portfolio or decreases in its value; and

the fact that anticipated operating expense levels may not prove accurate, as actual results may vary from estimates.

As a result, no assurance can be given that we will be able to continue to make distributions to our shareholders in the future or that the level of any future distributions will achieve a market yield or increase or even be maintained over time, any of which could materially and adversely affect the market price of our common shares.

The REIT distribution requirements could materially and adversely affect our ability to execute our business strategies.

We intend to continue to make distributions to our shareholders to comply with the requirements of the Internal Revenue Code and to avoid paying corporate tax on undistributed income. However, differences in timing between the recognition of taxable income and the actual receipt of cash could require us to sell assets, borrow funds on a short-term or long-term basis, or issue equity to meet the distribution requirements of the Internal Revenue Code.

We may find it difficult or impossible to meet distribution requirements in certain circumstances. Due to the nature of the assets in which we invest and may invest, we may be required to recognize taxable income from those assets in advance of our receipt of cash flow on or proceeds from disposition of such assets. As a result, to the extent such income is not realized within a TRS, the requirement to distribute a substantial portion of our net taxable income could cause us to: (i) sell assets in adverse market conditions, (ii) borrow on unfavorable terms, (iii) distribute amounts that would otherwise be invested in future acquisitions, capital expenditures or repayment of debt or (iv) make a taxable distribution of our shares as part of a distribution in which shareholders may elect to receive shares or (subject to a limit measured as a percentage of the total distribution) cash, in order to comply with REIT requirements.

We may be required to report taxable income early in our holding period for certain investments in excess of the economic income we ultimately realize from them.

We acquire and/or expect to acquire in the secondary market debt instruments for less than their face amount, MBS issued with original issue discount, or debt instruments or MBS that are delinquent as to mandatory principal and interest payments. In each case, we may be required to report income regardless of whether corresponding cash payments are received or are ultimately collectible. If we eventually collect less than we had previously reported as income, there may be a bad debt deduction available to us at that time, but our ability to benefit from that bad debt deduction would depend on our having taxable income in that later taxable year. This possible "income early, losses later" phenomenon could materially and adversely affect us and our shareholders if it were persistent and in significant amounts.

The share ownership limits applicable to us that are imposed by the Internal Revenue Code for REITs and our declaration of trust may restrict our business combination opportunities.

In order for us to maintain our qualification as a REIT under the Internal Revenue Code, not more than 50% in value of our outstanding shares may be owned, directly or indirectly, by five or fewer individuals (as defined in the Internal Revenue Code to include certain entities) at any time during the last half of each taxable year following our first year. Our declaration of trust, with certain exceptions, authorizes our board of trustees to take the actions that are necessary and desirable to preserve our qualification as a REIT. Under our declaration of trust, no person may own more than 9.8% by vote or value, whichever is more restrictive, of our outstanding common shares or more than 9.8% by vote or value, whichever is more restrictive, of our outstanding shares of beneficial interest. Our board may

Table of Contents

grant an exemption to the share ownership limits in its sole discretion, subject to certain conditions and the receipt of certain representations and undertakings. These share ownership limits are based upon direct or indirect ownership by "individuals," which term includes certain entities.

Ownership limitations are common in the organizational documents of REITs and are intended, among other purposes, to provide added assurance of compliance with the tax law requirements and to minimize administrative burdens. However, our share ownership limits might also delay or prevent a transaction or a change in our control that might involve a premium price for our common shares or otherwise be in the best interests of our shareholders.

Complying with the REIT requirements can be difficult and may cause us to forego otherwise attractive opportunities or liquidate otherwise attractive investments.

To qualify as a REIT for U.S. federal income tax purposes, we must continually satisfy tests concerning, among other things, the sources of our income, the nature and diversification of our assets, the amounts we distribute to our shareholders and the ownership of our shares. We may be required to make distributions to our shareholders at disadvantageous times or when we do not have funds readily available for distribution. Thus, compliance with the REIT requirements may hinder our ability to make certain attractive investments or require us to liquidate from our portfolio otherwise attractive investments. If we are compelled to liquidate our investments, we may be unable to comply with these requirements, ultimately jeopardizing our qualification as a REIT, or we may be subject to a 100% tax on any resultant gain if we sell assets that are treated as dealer property or inventory. These actions could have the effect of reducing our income and amounts available for distribution to our shareholders.

Complying with the REIT requirements may limit our ability to hedge effectively.

The REIT provisions of the Internal Revenue Code may limit our ability to hedge our assets and operations. Under current law, any income that we generate from transactions intended to hedge our interest rate or currency risks will be excluded from gross income for purposes of the REIT gross income tests in certain instances. As a result of these rules, we may have to limit our use of hedging techniques that might otherwise be advantageous, which could result in greater risks associated with interest rate or other changes than we would otherwise be subject to.

If our operating partnership failed to qualify as a partnership for U.S. federal income tax purposes, we could fail to qualify as a REIT and suffer other adverse consequences.

We believe that our operating partnership is organized and operated in a manner so as to be treated as a partnership, and not an association or publicly traded partnership taxable as a corporation, for U.S. federal income tax purposes. As a partnership, it is not subject to U.S. federal income tax on its income. Instead, each of its partners, including us, is allocated its share of our operating partnership's income. No assurance can be provided, however, that the Internal Revenue Service (the "IRS") will not challenge its status as a partnership for U.S. federal income tax purposes, or that a court would not sustain such a challenge. If the IRS were successful in treating our operating partnership as an association or publicly traded partnership taxable as a corporation for U.S. federal income tax purposes, we could fail to meet the gross income tests and certain of the asset tests applicable to REITs and, accordingly, could cease to qualify as a REIT. Also, the failure of our operating partnership to qualify as a partnership would cause it to become subject to U.S. federal corporate income tax, which would reduce significantly the amount of its cash available for debt service and for distribution.

Table of Contents

The tax on prohibited transactions limits our ability to engage in transactions, including certain methods of securitizing mortgage loans, that would be treated as sales for U.S. federal income tax purposes.

A REIT's net income from prohibited transactions is subject to a 100% tax. In general, prohibited transactions are sales or other dispositions of property, other than foreclosure property, but including mortgage loans, held primarily for sale to customers in the ordinary course of business. We might be subject to this tax if we were to dispose of or securitize loans in a manner that was treated as a sale of the loans for U.S. federal income tax purposes. Therefore, in order to avoid the prohibited transactions tax, we may choose to engage in certain sales of loans through a TRS and not at the REIT level, and may limit the structures we utilize for our securitization transactions, even though the sales or structures might otherwise be beneficial to us. We may hold a substantial amount of assets in one or more TRSs that are subject to corporate income tax on its earnings, which may reduce the cash flow generated by us and our subsidiaries in the aggregate, and our ability to make distributions to our shareholders.

The taxable mortgage pool ("TMP") rules may increase the taxes that we or our shareholders may incur, and may limit the manner in which we effect future securitizations.

Certain of our securitizations may likely be considered to result in the creation of TMPs for U.S. federal income tax purposes. A TMP is always classified as a corporation for U.S. federal income tax purposes. However, as long as a REIT owns 100% of a TMP, such classification generally does not result in the imposition of corporate income tax, because the TMP is a "qualified REIT subsidiary." The requirement that a TMP be wholly owned by a REIT to be a qualified REIT subsidiary means that we would be precluded from holding equity interests in such a TMP through our operating partnership if the TMP were a U.S. entity that would be subject to taxation as a domestic corporation, unless our operating partnership itself formed another subsidiary REIT to own the TMP.

In the case of such wholly REIT owned TMPs, certain categories of our shareholders, such as foreign shareholders otherwise eligible for treaty benefits, shareholders with net operating losses, and tax exempt shareholders that are subject to unrelated business income tax, could be subject to increased taxes on a portion of their dividend income received from us that is attributable to the TMP or "excess inclusion income." In addition, to the extent that our shares are owned in record name by tax exempt "disqualified organizations," such as certain government-related entities that are not subject to tax on unrelated business income, we may incur a corporate level tax on our allocable portion of excess inclusion income from such a wholly REIT owned TMP. In that case and to the extent feasible, we may reduce the amount of our distributions to any disqualified organization whose share ownership gave rise to the tax, or we may bear such tax as a general corporate expense. To the extent that our shares owned by disqualified organizations are held in record name by a broker/dealer or other nominee, the broker/dealer or other nominee would be liable for the corporate level tax on the portion of our excess inclusion income allocable to the shares held by the broker/dealer or other nominee on behalf of disqualified organizations. While we intend to attempt to minimize the portion of our distributions that is subject to these rules, the law is unclear concerning computation of excess inclusion income, and its amount could be significant.

In the case of any TMP that would be taxable as a domestic corporation if it were not wholly REIT owned, we would be precluded from selling equity interests in these securitizations to outside investors, or selling any debt securities issued in connection with these securitizations that might be considered to be equity interests for tax purposes. This marketing limitation may prevent us from selling more junior or non investment grade debt securities in such securitizations and maximizing our proceeds realized in those offerings.

Table of Contents

New legislation or administrative or judicial action, in each instance potentially with retroactive effect, could make it more difficult or impossible for us to qualify as a REIT.

The present U.S. federal income tax treatment of REITs may be modified, possibly with retroactive effect, by legislative, judicial or administrative action at any time, which could affect the U.S. federal income tax treatment of an investment in our common shares. The U.S. federal tax rules that affect REITs constantly are under review by persons involved in the legislative process, the IRS and the U.S. Treasury, which results in statutory changes as well as frequent revisions to Treasury Regulations and interpretations. Revisions in U.S. federal tax laws and interpretations thereof could cause us to change our investments and commitments, which could also affect the tax considerations of an investment in our common shares.

An IRS administrative pronouncement with respect to investments by REITs in distressed debt secured by both real and personal property, if interpreted adversely to us, could cause us to pay penalty taxes or potentially to lose our REIT status.

Most of the mortgage loans that we acquire are acquired by us at a discount from their outstanding principal amount, because our pricing is generally based on the value of the underlying real estate that secures those mortgage loans.

Treasury Regulation Section 1.856-5(c) (the "interest apportionment regulation") provides rules for determining what portion of the interest income from mortgage loans that are secured by both real and personal property is treated as "interest on obligations secured by mortgages on real property or on interests in real property." Under the interest apportionment regulation, if a mortgage covers both real property and other property, a REIT is required to apportion its annual interest income to the real property security based on a fraction, the numerator of which is the value of the real property securing the loan, determined when the REIT commits to acquire the loan, and the denominator of which is the highest "principal amount" of the loan during the year. The IRS has recently issued a revenue procedure, Revenue Procedure 2011-16, that contains an example regarding the application of the interest apportionment regulation. The example interprets the "principal amount" of the loan to be the face amount of the loan, despite the Internal Revenue Code requiring taxpayers to treat any market discount, that is the difference between the purchase price of the loan and its face amount, for all purposes (other than certain withholding and information reporting purposes) as interest rather than principal.

The interest apportionment regulation applies only if the debt in question is secured both by real property and personal property. We believe that all of the mortgage loans that we acquire are secured only by real property and no other property value is taken into account in our underwriting and pricing. Accordingly, we believe that the interest apportionment regulation does not apply to our portfolio.

Nevertheless, if the IRS were to assert successfully that our mortgage loans were secured by property other than real estate, that the interest apportionment regulation applied for purposes of our REIT testing, and that the position taken in Revenue Procedure 2011-16 should be applied to our portfolio, then depending upon the value of the real property securing our loans and their face amount, and the sources of our gross income generally, we might not be able to meet the 75% REIT gross income test applicable to REITs. If we did not meet this test, we could potentially either lose our REIT status or be required to pay a tax penalty to the IRS.

With respect to the 75% REIT asset test, Revenue Procedure 2011-16 provides a safe harbor under which the IRS will not challenge a REIT's treatment of a loan as being a real estate asset in an amount equal to the lesser of (1) the fair market value of the real property securing the loan determined as of the date the REIT committed to acquire the loan or (2) the fair market value of the loan on the date of the relevant quarterly REIT asset testing date. This safe harbor, if it applied to us,

Table of Contents

would help us comply with the REIT asset tests following the acquisition of distressed debt if the value of the real property securing the loan were to subsequently decline. However, if the value of the real property securing the loan were to increase, the safe harbor rule of Revenue Procedure 2011-16, read literally, could have the peculiar effect of causing the corresponding increase in the value of the loan to not be treated as a real estate asset. We do not believe, however, that this was the intended result in situations in which the value of a loan has increased because the value of the real property securing the loan has increased, or that this safe harbor rule applies to debt that is secured solely by real property. Nevertheless, if the IRS took the position that the safe harbor rule applied in these scenarios, then we might not be able to meet the various quarterly REIT asset tests if the value of the real estate securing our loans increased, and thus the value of our loans increased by a corresponding amount. If we did not meet one or more of these tests, then we could potentially either lose our REIT status or be required to pay a tax penalty to the IRS.

Item 1B. *Unresolved Staff Comments*

None.

Item 2. *Properties*

We do not own or lease any property. Our operations are carried out on our behalf at the principal executive offices of PCM, at 6101 Condor Road, Moorpark, California, 93021.

Item 3. *Legal Proceedings*

From time to time, we may be involved in various claims and legal actions arising in the ordinary course of business. As of December 31, 2011, we were not involved in any material legal proceedings.

Item 4. *Mine Safety Disclosures*

Not applicable.

Table of Contents**PART II****Item 5. Market for the Company's Common Stock, Related Stockholder Matters and Issuer Purchase of Equity Securities**

Our common shares began trading publicly on July 30, 2009, and are listed on the New York Stock Exchange (Symbol: PMT). As of March 6, 2012, we had 30,061,961 common shares outstanding, which were held by 13,361 beneficial holders. The following table sets forth the high and low sales prices (as reported by the New York Stock Exchange) for our common shares and the amount of cash dividends declared during the last two years:

For the year ended December 31, 2011

Period Ended	Stock price		Cash dividends declared
	High	Low	
March 31, 2011	\$ 19.04	\$ 17.93	\$
June 30, 2011	\$ 18.62	\$ 16.14	\$ 0.42
September 30, 2011	\$ 17.26	\$ 15.82	\$ 0.50
December 31, 2011	\$ 17.50	\$ 15.14	\$ 0.50

For the year ended December 31, 2010

Period Ended	Stock price		Cash dividends declared
	High	Low	
March 31, 2010	\$ 17.34	\$ 15.94	\$
June 30, 2010	\$ 17.90	\$ 15.82	\$
September 30, 2010	\$ 18.02	\$ 15.68	\$ 0.35
December 31, 2010	\$ 18.25	\$ 17.12	\$ 0.84

We intend to pay quarterly dividends and to distribute to our shareholders at least 90% of our taxable income in each year (subject to certain adjustments). This will enable us to qualify for the tax benefits accorded to a REIT under the Internal Revenue Code. We have not established a minimum dividend payment level and our ability to pay dividends may be adversely affected for the reasons described in Item 1A of this Report in the section entitled *Risk Factors*. All distributions are made at the discretion of our board of trustees and depend on our earnings, our financial condition, maintenance of our REIT status and such other factors as our board of trustees may deem relevant from time to time.

Equity Compensation Plan Information

We have adopted an equity incentive plan which provides for the issuance of equity based awards, including share options, restricted shares, restricted share units, unrestricted common share awards, LTIP units (a special class of partnership interests in our operating partnership) and other awards based on our shares that may be made by us directly to our officers and trustees, and the members, officers, trustees, directors and employees of PCM, PLS, or their affiliates and to PCM, PLS and other entities that provide services to us and the employees of such other entities. The equity incentive plan is administered by our compensation committee, pursuant to authority delegated by our board of trustees, which has the authority to make awards to the eligible participants referenced above, and to determine what form the awards will take, and the terms and conditions of the awards. Our equity incentive plan allows for grants of equity-based awards up to an aggregate of 8% of our issued and outstanding common shares on a diluted basis at the time of the award. However, the total number of shares available for issuance under the plan cannot exceed 40 million.

Edgar Filing: PennyMac Mortgage Investment Trust - Form 10-K

Table of Contents

The following table provides information as of December 31, 2011 concerning our common shares authorized for issuance under our equity incentive plan:

Plan category	Number of securities to be issued upon exercise of outstanding options, warrants and rights	Weighted-average exercise price of outstanding options, warrants and rights	Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a))
Equity compensation plans approved by security holders(1)	491,809	\$	1,819,900
Equity compensation plans not approved by security holders(2)			
Total	491,809	\$	1,819,900

(1) Represents our 2009 equity incentive plan.

(2) We do not have any equity plans that have not been approved by our shareholders.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

This discussion includes forward-looking statements concerning future events and performance of the Company, which are subject to certain risks and uncertainties as discussed above in the section entitled *Special Note Regarding Forward-Looking Statements* and in Item 1A of this Report, entitled *Risk Factors*.

Overview

We are a specialty finance company that invests primarily in residential mortgage loans and mortgage-related assets. Our objective is to provide attractive risk-adjusted returns to our investors over the long-term, principally through dividends and secondarily through capital appreciation. We intend to achieve this objective largely by investing in distressed mortgage assets and acquiring, pooling, securitizing or selling newly originated prime credit quality residential mortgage loans ("correspondent lending").

We acquire distressed mortgage loans through direct acquisitions of mortgage loan portfolios from institutions such as banks, mortgage companies and insurance companies and direct acquisitions or participations in structured transactions. A substantial portion of the nonperforming loans we have purchased has been acquired from or through one or more subsidiaries of Citigroup Inc.

We seek to maximize the value of the distressed mortgage loans that we acquire using means that are appropriate for the particular loan, including both proprietary and nonproprietary loan modification programs (such as the U.S. Departments of the Treasury and Housing and Urban Development's Home Affordable Modification Program ("HAMP")), special servicing and other initiatives focused on avoiding foreclosure, when possible. When we are unable to effect a cure for a mortgage delinquency, our objective is to effect timely acquisition and/or liquidation of the property securing the loan. During the year ended December 31, 2011, we purchased \$647.6 million of distressed mortgage loans and received proceeds from liquidation, payoffs and sales from our portfolio of distressed mortgage loans totaling \$147.3 million.

Changes in the mortgage market have significantly reduced the outlets for sales of newly originated mortgage loans by mortgage lenders who have traditionally sold their loans to larger mortgage companies and banks who, in turn, sold those loans to Agencies and other investors or into securitizations. We believe these changes, along with recent reductions to government sponsored entity ("GSE") loan size limits and the reduced participation of large bank lenders due in part to anticipation of regulatory changes to securitization related capital requirements, provide us with the opportunity to act as a link between these loan originators and the Agency and securitization markets.

During the year ended December 31, 2011, we purchased loans with fair values totaling \$1.3 billion in furtherance of our correspondent lending strategy, of which \$1.0 billion was purchased during the fourth quarter of the year. To the extent that we purchase loans that conform to standards to be FHA insured or Veterans Administration guaranteed, we sell such loans to PLS, which is a licensed Ginnie Mae issuer and seller/servicer. The Company receives a sourcing fee from PLS of three basis points on the unpaid principal balance of each loan that it sells to PLS under such arrangement. We held an inventory of mortgage loans acquired for sale totaling \$232.0 million at December 31, 2011. To the extent that we transfer these loans into securitizations in the future, we intend to retain a portion of the securities created in the securitization transaction.

We supplement these activities through participation in other mortgage-related activities, which are in various states of analysis, planning or implementation including:

Acquisition of REIT-eligible MBS. We believe that the recent dislocations of the residential mortgage markets have disproportionately affected the pricing of certain classes of MBS, thereby providing attractive investment opportunities in certain residential and commercial

Edgar Filing: PennyMac Mortgage Investment Trust - Form 10-K

Table of Contents

mortgage-backed and asset-backed securities. Such securities include securities backed by Alt-A and subprime mortgage loans.

We purchased \$21.4 million of MBS during the year ended December 31, 2011. Our portfolio of MBS totaled \$72.8 million at December 31, 2011.

Providing inventory financing of mortgage loans for mortgage lenders. We believe this activity will supplement and make our correspondent lending business more attractive to lenders from which we acquire newly originated loans.

Acquisition of MSRs from liquidating and other institutions. We believe that current market conditions may have adversely affected the financial condition and operations of certain owners of mortgage assets. Further, regulatory and capital issues may have contributed to their decision to reduce their portfolio of MSRs. We believe that MSR investments may allow us to earn attractive current returns and to leverage the loan servicing capabilities and efficiencies of PLS to improve the assets' value. We would also seek to leverage the loan origination capabilities of PLS provided we are able to structure an arrangement whereby we could recapture any new MSRs created upon PLS's refinance of mortgage loans relating to our existing MSRs. We also intend to continue to retain the MSRs that we receive as a portion of the proceeds from our sale or securitization of mortgage loans through our correspondent lending operation.

We received MSRs as proceeds on sale of mortgage loans with fair values totaling \$6.1 million during the year ended December 31, 2011 and held MSRs with carrying values of \$6.0 million as of December 31, 2011.

We are externally managed by PCM, an investment adviser that specializes in, and focuses on, residential mortgage loans. Most of our mortgage loan portfolio is serviced by PLS, an affiliate of PCM.

We conduct substantially all of our operations, and make substantially all of our investments, through our operating partnership and its subsidiaries. One of our subsidiaries is the sole general partner, and we are the sole limited partner, of our operating partnership.

We believe that we qualify to be taxed as a REIT. We believe that we will not be subject to federal income tax on that portion of our income that is distributed to shareholders as long as we meet certain asset, income and share ownership tests. If we fail to qualify as a REIT, and do not qualify for certain statutory relief provisions, our profits will be subject to income taxes and we may be precluded from qualifying as a REIT for the four tax years following the year we lose our REIT qualification. A portion of our activities are conducted in two TRSs, which are subject to corporate federal and state income taxes. Accordingly, we have made a provision for income taxes with respect to the operations of our TRSs. We expect that the effective rate for the provision for income taxes will be volatile in future periods. Our goal is to manage the business to take full advantage of the tax benefits afforded to us as a REIT.

Observations on Current Market Opportunities

The U.S. economy continues its pattern of modest growth, with economic data providing mixed reports on the economic recovery. During 2011, real U.S. gross domestic product expanded at an annual rate of 1.7% compared to 2.8% during 2010. Slow economic growth and pressure on state and federal government spending continued to affect unemployment rates during 2011. The national unemployment rate was 8.5% at December 31, 2011 compared to 9.4% at December 31, 2010. Unemployment has persisted at a seasonally adjusted rate at or above 9% for all but four months during the period from May 2009 through December 2011. High unemployment levels are reflected in increasing personal and business bankruptcy filings as well as high delinquency and foreclosure rates on residential mortgage loans.

Edgar Filing: PennyMac Mortgage Investment Trust - Form 10-K

Table of Contents

Distress in the banking industry persists at historically high levels. However, the rate of growth in the number of problem banks as identified by the FDIC appears to be slowing. As of December 31, 2011, the FDIC identified 813 problem banks, a decrease from 884 at December 31, 2010. The number of banks that have been seized is leveling off with 92 depository institutions seized during 2011 compared to 157 depository institutions seized in 2010.

Residential real estate transactions continue to see historically low levels of activity as a result of continuing historically high levels of unemployment, restrictive loan underwriting standards and uncertainties about economic prospects. Foreclosure activity decreased by 34% during 2011 compared to 2010 as lenders address legal and documentation issues identified with their foreclosure processes.

Thirty-year mortgage fixed mortgage interest rates ranged from a high of 5.05% to a low of 3.91% during 2011 (Source: Freddie Mac's Weekly Primary Mortgage Market Survey). Interest rates generally trended downward throughout 2011.

Our Manager continues to see substantial volumes of nonperforming residential mortgage loan sales by a limited number of sellers, which remain primarily sales of nonperforming loan pools (with a small but increasing number of sales of troubled but performing loans). During 2011, our Manager reviewed 88 mortgage loan pools with unpaid principal balances totaling approximately \$13.6 billion. During 2011, we made acquisitions of distressed mortgage loans with unpaid principal balances totaling \$1.4 billion, of which \$1.2 billion were acquired from or through one or more subsidiaries of Citigroup Inc.

We believe that the collapse of the independent mortgage company business model and the weakened condition of banks and other traditional mortgage lenders have created additional opportunities for our business. Under current market conditions, these opportunities include the purchase from mortgage lenders of newly originated mortgage loans that are eligible for sale to a GSE. These opportunities also include the purchase of newly originated mortgage loans that can be resold in the non-Agency whole loan market or securitized in the private label market as well as providing inventory financing to originators of such loans. During the year ended December 31, 2011, we acquired \$1.3 billion in fair value of newly originated mortgage loans and received proceeds on sale of \$1.1 billion of such loans.

Reporting Metrics and Prospective Trends

We expect our results of operations to be affected by various factors, many of which are beyond our control. Generally, we expect that our mortgage loan portfolio may grow at an uneven pace, as opportunities to acquire distressed mortgage loans may be irregularly timed and may involve large portfolios of loans, and the timing and extent of our success in acquiring such loans cannot be predicted.

Following the acquisition of a mortgage loan portfolio, our income may be negatively affected by our loan modifications to the extent that the loan modifications reduce the principal amount or stated interest rates on loans and thereby reduce interest income; by our foreclosures on loans where PennyMac is unable to modify the loans on acceptable terms; and by other losses on defaulted loans. We expect that these activities will primarily commence in the first periods after we acquire a portfolio.

Our primary sources of income are from realized gain or loss on the sale of mortgage loans, real estate or securities, unrealized appreciation or depreciation on loans and MBS, and net interest income.

Realized Gain or Loss. When we sell our mortgage loans, real estate or securities, we record a gain or loss which is determined by the nature and terms of the disposition transaction. When a mortgage loan is satisfied through a full or partial payoff, the amount of gain or loss recorded represents the difference between the amount received and the fair value of the loan at the beginning

Edgar Filing: PennyMac Mortgage Investment Trust - Form 10-K

Table of Contents

of the month in which the payoff is received. Gain or loss on the sale of real estate acquired in settlement of loans is determined by the difference between the net proceeds and the carrying value of the property at the date the property is sold.

We are generally not in a position to dispose of our mortgage loans following modification until adequate time has passed to establish a satisfactory payment history. As a result, our ability to realize gain on our modified loans is correspondingly deferred and our initial periods of operations have not included material levels of disposition transactions with regard to modified loans. As a result of our fair value accounting, in the event of a significant loan modification, we record a realized gain (or loss) to the extent that the fair value of the modified loan exceeded (or was less than) the fair value of the loan before modification.

The gain or loss we realize on the sale or securitization of loans acquired through our correspondent lending activities is primarily determined by the price paid for the loans, the effectiveness of any hedging and other risk management activities we undertake, the sales price of the loan, changes in interest rates and the value of any MSRs received in the transaction. Certain of these factors are beyond our control. If all other factors hold constant, nonperforming loans generally increase in value as they are held by us, due to shorter time to, and increased certainty of, resolution. These changes in value represent unrealized gain or loss when recorded in our financial results. Therefore, when a loan is resolved, the amount of realized gain or loss recognized tends to be small compared to the differences between the cost of the loan and the proceeds received.

Unrealized Gain or Loss. Many of our assets, including our mortgage loans and securities, are carried at fair value. Accordingly, changes in the fair value affect the results of our operations for the period in which such change in value occurs, and these changes may be material. The expectation of changes in home prices is a major determinant of the value of residential mortgage loans. This factor is beyond our control.

Net Interest Income. Interest income represents interest earned on our residential mortgage loans and mortgage-related assets. We anticipate that the primary contributing elements of our interest income (some of which are beyond our control) will be the size of our mortgage loan and securities portfolio, the timing of purchases and prices paid for such assets, the level and changes of interest rates, prepayment speeds and the payment performance of borrowers.

We expect that interest expense will be driven by the size of our mortgage loan and securities portfolio, the leverage employed and borrowing rates. Borrowing rates in turn will be dependent on market conditions, which are beyond our control, as well as the specific debt vehicle employed and the terms we are able to negotiate.

Expenses. We incur management and incentive fees payable to PCM that are determined based upon our equity and profitability, among other factors. We also incur loan servicing, origination and other fees payable to PLS that are determined by the size of our mortgage loan portfolio, the characteristics of our loans and the volumes of property resolution events, loan modifications and refinancing and correspondent lending volumes, among other factors. We also incur ongoing operating and administrative expenses necessary to conduct our business. In connection with investigating portfolios for investment, we are obligated to reimburse PCM's upfront expenses related to due diligence, credit and collateral evaluation and the costs to board the loans onto PCM's and PLS's systems. In some cases, these costs may not be recoverable from the selling party if PCM's bidding efforts are not successful.

Other Factors Influencing Our Results

Prepayment Speeds. Prepayment speeds, as reflected by the constant prepayment rate, vary according to interest rates, the type of investment, conditions in the financial markets, competition and

Table of Contents

other factors, none of which can be predicted with any certainty. In general, when interest rates rise, it is relatively less attractive for borrowers to refinance their mortgage loans and, as a result, prepayment speeds tend to decrease. This can extend the period over which we earn interest income. When interest rates fall, prepayment speeds tend to increase, thereby decreasing the period over which we earn interest income.

Rising Interest Rate Environment. Rising interest rates increase our financing costs which may result in a net negative impact on our net interest income. With respect to our floating rate investments, such interest rate increases should result in increases in our net interest income because our floating rate assets will likely be greater in amount than the related floating rate liabilities. Similarly, such an increase in interest rates should generally result in an increase in our net interest income on future fixed-rate investments made by us because our fixed-rate assets would be greater in amount than our fixed-rate liabilities. We expect, however, that our fixed-rate assets would decline in value in a rising interest rate environment and that our net interest spreads on fixed rate assets could decline in a rising interest rate environment to the extent such assets are financed with floating rate debt.

Changing Home Prices. The state of the real estate market/home prices will determine proceeds from sale of real estate acquired in settlement of loans. While we make extensive efforts at anticipating real estate price trends and estimate those trends' effects on the valuations of our portfolios of mortgage loans and real estate acquired in settlement of loans, future real estate values are subject to influences beyond our control. Generally, rising home prices are expected to positively affect our results of real estate acquired in settlement of loans. Conversely, declining real estate prices are expected to negatively affect our results of real estate acquired in settlement of loans. Likewise, expectations of rising home prices generally positively influence our estimates of the fair value of our nonperforming mortgage loans and declining home prices generally negatively influence our estimates of the fair value of our nonperforming mortgage loans. We cannot predict future home prices with any certainty.

Risk Management Effectiveness Credit Risk. We are subject to the risk of potential credit losses on all of the residential mortgage loans we hold in our portfolio, particularly those that are nonperforming. Additionally, we may purchase all classes of certain RMBS securities for the purpose of maintaining our exclusion from the Investment Company Act, and thereby will have the credit exposure on all of the loans underlying these RMBS. Before the purchase of these securities, we intend to conduct due diligence that allows us to identify loans that do not meet our credit standards based on loan-to-value ratios, borrowers' credit scores, income and asset documentation and other criteria that we believe to be important indications of credit risk. In the event that we identify such loans, we intend to either price the securities to our expectation of value or decline to purchase the RMBS.

Risk Management Effectiveness Interest Rate Risk. Since changes in interest rates may significantly affect our activities, our operating results will depend, in large part, upon our ability to effectively manage interest rate risks and prepayment risks while maintaining our status as a REIT and our exclusion from the Investment Company Act.

Size of Investment Portfolio. The size of our investment portfolio, as measured by the aggregate unpaid principal balance of our mortgage loans and aggregate principal balance of our mortgage-related securities and the other assets we own will also be a key revenue driver. Generally, as the size of our investment portfolio grows, the amount of interest income we receive will increase. The larger investment portfolio, however, will drive increased expenses, including servicing and related fees payable to PLS. We may also incur additional interest expense to finance the purchase of our assets.

Table of Contents

Critical Accounting Policies

We have identified what we believe are our most critical accounting policies to be the following:

Valuation of Financial Instruments

We have elected to record our financial assets at fair value and group them in three levels, based on the markets in which the assets are traded and the reliability of the assumptions used to determine fair value. These levels are:

Level 1 Quoted prices in active markets for identical assets or liabilities.

Level 2 Prices determined using other significant observable inputs. Observable inputs are inputs that other market participants would use in pricing an asset or liability and are developed based on market data obtained from sources independent of us. These may include quoted prices for similar assets or liabilities, interest rates, prepayment speeds, credit risk and others.

Level 3 Prices determined using significant unobservable inputs. In situations where quoted prices or observable inputs are unavailable (for example, when there is little or no market activity for an investment at the end of the period), unobservable inputs may be used. Unobservable inputs reflect our own assumptions about the factors that market participants use in pricing an asset or liability, and are based on the best information available in the circumstances.

The valuation method used to estimate fair value may produce a fair value measurement that may not be indicative of ultimate realizable value. Furthermore, while we believe our valuation methods are appropriate and consistent with those used by other market participants, the use of different methods or assumptions to estimate the fair value of certain financial instruments could result in a different estimate of fair value at the reporting date. Those estimated values may differ significantly from the values that would have been used had a readily available market for such loans or investments existed, or had such loans or investments been liquidated, and those differences could be material to the financial statements.

Mortgage-Backed Securities

Non-Agency MBS are categorized as "Level 3" fair value financial statement items. We categorize our investments in non-Agency MBS as "Level 3" fair value financial statement items due to their illiquidity and the present lack of an active market for such securities.

Fair value of non-Agency MBS is estimated using broker indications of value. For indications of value received, PCM's Capital Markets and Valuation staff review the price indications provided by non-affiliate brokers for completeness, accuracy and consistency across all similar bonds managed by PCM. Bond-level analytics such as yield, weighted average life and projected prepayment and default speeds of the underlying collateral are computed. The reasonableness of the brokers' indications of value and of changes in value from period to period is evaluated in light of the analytical review performed and considering market conditions. The review of the Capital Markets and Valuation staff is reported to PCM's Valuation Committee as part of its review and approval of monthly valuation results. PCM has not adjusted, and does not intend to adjust its fair value estimates to amounts different than the brokers' indications of value.

Interest income on MBS is recognized over the life of the security using the interest method. Changes in fair value arising from amortization of purchase premiums and accrual of unearned discounts are recognized as a component of interest income. We estimate, at the time of purchase, the future expected cash flows and determine the effective interest rate based on these estimated cash flows and our purchase price. We update our estimates of future cash flows monthly. In estimating

Table of Contents

these cash flows, there are a number of assumptions that are subject to uncertainties. These include the rate and timing of principal payments (including prepayments, repurchases, defaults and liquidations), the pass-through or coupon rate, interest rate fluctuations, interest payment shortfalls due to delinquencies on the underlying mortgage loans, the likelihood of modification and the timing of the magnitude of credit losses on the mortgage loans underlying the securities. These estimates are difficult to predict and are subject to future events that will likely affect the realization of our estimates and interest income. Changes in fair value arising from other factors are recognized as a component of *Net gain (loss) on investments*.

Mortgage Loans

Mortgage loans are carried at their estimated fair values. Changes in the estimated fair value of mortgage loans are recognized in current period income. All changes in fair value, including changes arising from the passage of time, are recognized as a component of *Net gain on investments*. Fair value of mortgage loans is estimated based on whether the mortgage loans are saleable into active markets with established counterparties and transparent pricing.

Mortgage loans that are saleable into active markets are categorized as "Level 2" fair value financial statement items and their fair values are estimated using their quoted market price or market price equivalent.

Loans that are not saleable into active markets are categorized as "Level 3" fair value financial statement items, and their fair values are estimated using a discounted cash flow valuation model. Inputs to the model include current interest rates, loan amount, payment status and property type, and forecasts of future interest rates, home prices, prepayment speeds, defaults and loss severities. The estimates of value are evaluated by PCM's Capital Markets staff and are reviewed and approved by its senior management Valuation Committee.

Real Estate Acquired in Settlement of Loans

Real estate acquired in settlement of loans is measured based on its fair value on a nonrecurring basis and is categorized as a "Level 3" fair value financial statement item. Fair value of real estate acquired in settlement of loans is determined by using a current estimate of value from a broker's price opinion, a full appraisal or the price given in a current contract of sale of the property. Changes in fair value and gains and losses on sale of real estate acquired in settlement of loans is recognized in the consolidated statement of operations under the caption *Results of real estate acquired in settlement of loans*.

Mortgage Servicing Rights

We recognize MSR's initially at their estimated fair values, either as proceeds from sales of mortgage loans where we assume the obligation to service the loan in the sale transaction, or from the purchase of MSR's. MSR's arise from contractual agreements between us and the investors (or their agents) in mortgage securities and mortgage loans. Under these contracts, we are responsible for loan servicing functions in exchange for fees and other remuneration. The servicing functions typically performed include, among other responsibilities, collecting and remitting loan payments; responding to borrower inquiries; accounting for principal and interest, holding custodial (impound) funds for payment of property taxes and insurance premiums; counseling delinquent mortgagors; and supervising the acquisition of real estate in settlement of the loans and property dispositions.

The value of MSR's is derived from the net positive cash flows associated with the servicing contracts. We receive a servicing fee generally of 0.25% annually on the remaining outstanding principal balances of the loans. The servicing fees are collected from the monthly payments made by the mortgagors. We generally receive other remuneration including rights to various mortgagor-

Edgar Filing: PennyMac Mortgage Investment Trust - Form 10-K

Table of Contents

contracted fees such as late charges, collateral reconveyance charges and loan prepayment penalties and we are generally entitled to retain the interest earned on funds held pending remittance for mortgagor principal, interest, tax and insurance payments. We also generally have the right to solicit the mortgagors for other products and services, such as second mortgages and insurance, as well as for new mortgages for those considering refinancing or purchasing a new home.

The precise fair value of MSR's cannot be readily determined because MSR's are not actively traded in stand-alone markets. Considerable judgment is required to estimate the fair values of these assets and the exercise of such judgment can significantly affect our earnings. MSR values are estimated by PCM's Capital Markets and Valuation staff and are reviewed and approved by its senior management Valuation Committee. Therefore, we classify our MSR's as "Level 3" fair value financial statement items.

We use a discounted cash flow approach to estimate the fair value of MSR's. This approach consists of projecting servicing cash flows discounted at a rate that our Manager assumes market participants would use in their determinations of value. The cash flow and prepayment assumptions used in our discounted cash flow model are based on market factors which our Manager believes are consistent with assumptions and data used by market participants valuing similar MSR's.

The key assumptions used in the valuation of MSR's include mortgage prepayment speeds, cost to service the loans and discount rates. These variables can, and generally do, change from period to period as market conditions change.

Our subsequent accounting for MSR's is based on the class of MSR's. Our Manager has identified two classes of MSR's: MSR's backed by mortgage loans with initial interest rates of less than or equal to 4.5% and MSR's backed by mortgage loans with initial interest rates of more than 4.5%. MSR's backed by mortgage loans with initial interest rates of less than or equal to 4.5% are accounted for using the amortization method. MSR's backed by loans with initial interest rates of more than 4.5% are accounted for at fair value with changes in fair value recorded in current period income.

MSR's Accounted for Using the MSR Amortization Method

We amortize MSR's accounted for using the amortization method. MSR amortization is determined by applying the ratio of the net MSR cash flows projected for the current period to the estimated total remaining net MSR cash flows. The estimated total net MSR cash flows are determined at the beginning of each month using prepayment assumptions applicable at that time.

We periodically assess MSR's accounted for using the amortization method for impairment. Impairment occurs when the current fair value of the MSR falls below the asset's carrying value (carrying value is the amortized cost reduced by any related valuation allowance). If MSR's are impaired, we recognize the impairment in current-period earnings and adjust the carrying value of the MSR's through a valuation allowance. If the value of impaired MSR's subsequently increases, we recognize the increase in value in current-period earnings and we adjust the carrying value of the MSR's through a reduction in the valuation allowance. Value is not increased above amortized cost.

We stratify our MSR's by predominate risk characteristic when evaluating for impairment. For purposes of performing our MSR impairment evaluation, we stratify our servicing portfolio on the basis of certain risk characteristics including loan type (fixed-rate or adjustable-rate) and note rate. We stratify fixed-rate loans into note rate pools of 50 basis points for note rates between 3.0% and 4.5% and a single pool for note rates below 3%. If the fair value of MSR's in any of the note rate pools is below the carrying value of the MSR's for that pool, we recognize impairment to the extent of the difference between the estimated fair value and the existing valuation allowance for that pool.

Our Manager periodically reviews the various impairment strata to determine whether the value of the impaired MSR's in a given stratum is likely to recover. When our Manager deems recovery of the

Edgar Filing: PennyMac Mortgage Investment Trust - Form 10-K

Table of Contents

value to be unlikely in the foreseeable future, a write-down of the cost of the MSR for that stratum to its estimated recoverable value is charged to the valuation allowance to adjust the carrying value to a level not in excess of amortized cost.

Amortization and impairment of MSRs are included in current period results of operations as a component of *Net servicing income*.

MSRs Accounted for at Fair Value

Changes in fair value of MSRs accounted for at fair value are recognized in current period results of operations as a component of *Net servicing income*.

Investment Consolidation

We evaluate every investment with reference to the underlying entity that issued the loans or securities we acquire to determine whether to include the investment in our consolidated reporting group. We perform a similar analysis for each entity with which we make an agreement for management, servicing or similar services. Where voting rights do not effectively identify the investor with a controlling financial interest, the entity is classified as a variable interest entity ("VIE"). With certain exceptions, VIEs are subject to consolidation if the investors do not have sufficient equity at risk for the entity to finance its activities without additional subordinated financial support, or are unable to direct the entity's activities or are not exposed to the entity's losses or entitled to its residual returns. VIEs are consolidated by the entity that is deemed the primary beneficiary of the VIE as indicated by the entity that has both the power to direct the activities of the VIE that most significantly impacts its economic performance and the obligation to absorb losses or the right to receive benefits that could potentially be significant to the entity. We did not have variable interests in our affiliated service providers or our investments as of December 31, 2011.

Income Taxes

We have elected to be taxed as a REIT and management believes the Company complies with the provisions of the Internal Revenue Code applicable to REITs. Accordingly, management believes the Company will not be subject to federal income tax on that portion of its REIT taxable income that is distributed to shareholders as long as certain asset, income and share ownership tests are met. If PMT fails to qualify as a REIT, and does not qualify for certain statutory relief provisions, it will be subject to income taxes and may be precluded from qualifying as a REIT for the four tax years following the year of loss of the Company's REIT qualification.

Our TRSs are subject to federal and state income taxes. Income taxes are provided for using the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted rates expected to apply to taxable income in the years in which management expects those temporary differences to be recovered or settled. The effect on deferred taxes of a change in tax rates is recognized in income in the period in which the change occurs. Subject to management's judgment, a valuation allowance is established if realization of deferred tax assets is not more likely than not. Management recognizes tax benefits relating to tax positions it takes only if it is more likely than not that the position will be sustained upon examination by the appropriate taxing authority. A tax position that meets this standard is recognized as the largest amount that exceeds 50 percent likelihood of being realized upon settlement. We will classify any penalties and interest as a component of income tax expense.

Results of Operations Comparison Years Ended December 31, 2011 ("2011") and 2010 ("2010"), and the Period from August 4, 2009 (Commencement of Operations) to December 31, 2009 ("2009")

The following is a summary of our key performance measures for the periods presented:

	Year ended December 31,		Period from
	2011	2010	August 4, 2009 (commencement of operations) to December 31, 2009
	(in thousands, except per share amounts)		
Net investment income	\$ 128,614	\$ 44,054	\$ 2,301
Pre-tax income by segment:			
Investment	\$ 65,223	27,026	(1,883)
Correspondent lending(1)	\$ 7,272	\$	\$
Net income (loss)	\$ 64,439	\$ 24,483	\$ (1,883)
Earnings (loss) per share:			
Basic	\$ 2.41	\$ 1.46	\$ (0.11)
Diluted	\$ 2.41	\$ 1.44	\$ (0.11)
Dividends per share:			
Declared	\$ 1.42	\$ 1.19	\$
Paid	\$ 1.84	\$ 0.77	\$
Asset acquisitions:			
Correspondent lending	\$ 1,318,763	\$ 30,059	\$
Investment activities	677,583	509,590	119,095
Total asset acquisitions	\$ 1,996,346	\$ 539,649	\$ 119,095
Share price:			
High	\$ 19.04	\$ 18.25	\$ 20.00
Low	\$ 15.14	\$ 15.68	\$ 16.70
At period end	\$ 16.62	\$ 18.15	\$ 17.18
At period end:			
Mortgage loans acquired for sale at fair value	\$ 232,016	\$ 3,966	\$
Total investments(2)	\$ 1,007,969	\$ 513,807	\$ 109,817
Total assets	\$ 1,386,062	\$ 589,095	\$ 324,446
Book value per share	\$ 19.22	\$ 19.01	\$ 18.75

(1) Correspondent lending activity was negligible through 2010 and was not separately reported.

(2) Mortgage-backed securities, mortgage loans (excluding correspondent lending mortgage loans), REO and MSR's.

During 2011, we recorded net income of \$64.4 million, or \$2.41 per diluted share. Our net income for 2011 reflects net gains on our investments in financial instruments totaling \$90.3 million (comprised of net gain on investments and net gain on mortgage loans acquired for sale), including \$62.1 million of valuation gains on MBS and mortgage loans excluding mortgage loans acquired for sale, supplemented by \$36.1 million of interest income. Our results also reflect the growth in our correspondent lending segment. During 2011, we purchased \$1.3 billion in fair value of newly originated mortgage loans, \$1.0 billion of which were purchased during the fourth quarter. We recognized gains on such loans totaling approximately \$7.6 million. At December 31, 2011, we held mortgage loans acquired for sale with fair values totaling \$232.0 million.

Table of Contents

During 2010, we recorded net income of \$24.5 million, or \$1.44 per diluted share. Our net income reflects net gains on our investments in financial instruments totaling \$27.4 million, including \$11.1 million of valuation gains on MBS and mortgage loans excluding mortgage loans acquired for sale, supplemented by \$14.6 million of interest income. Our net income for 2010 does not include provision for approximately \$500,000 of common overhead costs relating to the quarter ended March 31, 2010 that were otherwise due to PCM because PCM waived recovery of such costs through the first quarter of 2010 as discussed below.

During 2009, our operations were limited to investment of proceeds of our IPO into our short-term investments and purchase of certain short-lived MBS pending reinvestment of the proceeds into our targeted asset classes. The net loss of \$1.9 million, or \$0.11 per diluted share, reflects the low yield on the temporary investments held pending investments in our targeted asset classes that did not offset the management fees and other expenses incurred during the period. The net loss does not include provision for reimbursement to PCM of \$771,000 of common overhead costs allowable under our management agreement with PCM because recovery of such costs was waived by PCM.

PCM management waived recovery of common overhead during our startup period through March 31, 2010. From March 31, 2010, PCM has not waived, and we believe that PCM does not intend to waive in the future, recovery of common overhead costs. Our results for the years ended December 31, 2011 and 2010 include provision for reimbursement of \$3.8 million and \$1.4 million, respectively, of common overhead expenses.

Net Investment Income

During 2011, we recorded net investment income of \$128.6 million, comprised primarily of net gains on investments in financial instruments of \$90.3 million supplemented by \$36.1 million of interest income and \$1.1 million from results of REO. This compares to net investment income of \$44.1 million recognized during 2010, comprised primarily of \$27.4 million of net gains on investments in financial instruments, supplemented by \$14.6 million of interest income and \$2.0 million of gains from results of REO. During 2009, we recorded net investment income of \$2.3 million, comprised primarily of \$2.1 million of interest income.

The growth and shift in net investment income reflects the incomplete deployment of the proceeds from our IPO and concurrent offering and the short time in which we held the assets during the first part of 2010, followed by complete deployment of our IPO and concurrent offering proceeds, growth through leveraging of our shareholders' equity and additional issuances of common shares beginning in late 2010 through December 31, 2011.

Edgar Filing: PennyMac Mortgage Investment Trust - Form 10-K

Table of Contents

Net investment income on financial instruments is summarized below for the periods presented:

	Year ended December 31, 2011							
	Net gain (loss) on investments	Interest income/expense			Total revenue/ expense	Average balance	Annualized %	
		Coupon	Discount/ fees(1)	Total			Interest yield/cost	Total return
(dollars in thousands)								
Assets:

Table of Contents

Net Gain (Loss) on Investments

During 2011, we recognized net gains on financial instruments totaling \$90.3 million compared to \$27.4 million and \$152,000 in 2010 and 2009, respectively. The increase in 2011 as compared to 2010 is due primarily to growth in our portfolio of investments in financial instruments, compounded by a change in the mix of our investments toward a higher concentration of mortgage loans at fair value. We recognized higher fair value returns on our investment in mortgage loans at fair value as compared to MBS and our average investment in mortgage loans at fair value increased from 51% of the average balance of our investments in 2010 to 78% of the average balance of our investments in 2011. Our average portfolio balance increased \$474.6 million or 138% during 2011 as compared to 2010.

During 2011, we recognized net valuation losses on our portfolios of MBS totaling \$2.8 million compared to net valuation gains of \$233,000 and \$152,000 in 2010 and 2009, respectively. The valuation losses reflect, in part, marketplace concerns regarding the potentially growing supply of MBS similar to those we hold as a result of sales by the Federal Reserve Bank and other entities, marketplace discounting of distressed MBS resulting from expectations that involuntary prepayments of mortgages underlying the securities may remain slow or slow further due to regulatory actions relating to servicers' foreclosure activities, and marketplace concern regarding servicers' behavior with respect to advancing and modification practices. Valuation of certain MBS has also decreased due to reduced credit support from subordinate tranches. The weighted average discount rate of the non-Agency subprime MBS, the most sizable component of our MBS portfolio, increased from 4.5% at December 31, 2010 to 8.0% at December 31, 2011, reflective of these market factors.

Net gains on mortgage loans at fair value and mortgage loans under forward purchase agreements under fair value are summarized below for the periods presented:

	Year ended December 31,		Period from August 4, 2009 (commencement of operations) to December 31, 2009
	2011	2010	
	(in thousands)		
Valuation changes(1):			
Performing loans	\$ 9,542		\$
Nonperforming loans	55,730		
	65,272	\$ 10,754	
Payoffs	19,950	12,036	
Sales	233	4,405	
	\$ 85,455	\$ 27,195	\$

(1) Comparative prior period information was not maintained.

The net gains on mortgage loans arising from valuation changes were due primarily to changes in home prices during 2011 that were more positive than had been projected and to changes in value of loans as the loans moved through the resolution process and as nonperforming loans were reinstated. Our valuation gains for the year ended December 31, 2011 also reflect an increase in the collectability of claims on government-insured loans as well as increasing demand for distressed mortgage loans as reflected in increased transaction prices. As a result of this market observation, the discount rates we use to estimate the fair value of certain of our mortgage loans were decreased.

The increase in valuation changes in 2011 as compared to 2010 is due to the growth and seasoning of our portfolio of mortgage loans at fair value (including mortgage loans under forward purchase agreements). Our average investment in mortgage loans at fair value increased \$459.0 million or 260% from 2010 to 2011. Furthermore, our initial acquisitions of mortgage loans at fair value occurred in December of 2009 and were only beginning to move through the resolution process during 2010.

Edgar Filing: PennyMac Mortgage Investment Trust - Form 10-K

Table of Contents

Following is a comparison of the valuation techniques and key inputs we use in the valuation of our financial assets:

Financial Statement Item	Valuation Technique	Key Inputs	Range (Weighted Average)	
			December 31, 2011	December 31, 2010
Mortgage-backed securities(1):	Broker indication of value(6)			
Non-Agency subprime		Discount rate	3.1% - 23.0% (8.0)%	2.9% - 17.3% (4.5)%
		Prepayment speed(2)	0.1% - 8.4% (4.4)%	0.1% - 5.3% (1.5)%
		Default speed(3)	3.6% - 19.8% (12.3)%	3.6% - 19.2% (10.5)%
		Collateral remaining loss percentage(4)	23.9% - 63.7% (47.0)%	12.1% - 56.6% (36.9)%
Non-Agency Alt-A		Discount rate	4.4% - 10.0% (6.2)%	5.0% - 11.4% (7.1)%
		Prepayment speed(2)	0.5% - 8.9% (5.4)%	0.9% - 10.1% (6.7)%
		Default speed(3)	3.0% - 11.5% (9.7)%	4.2% - 21.2% (12.3)%
		Collateral remaining loss percentage(4)	11.4% - 36.4% (26.0)%	10.5% - 41.1% (22.8)%
Non-Agency prime jumbo		Discount rate	6.5% - 6.5% (6.5)%	2.7% - 2.7% (2.7)%
		Prepayment speed(2)	14.3% - 14.3% (14.3)%	14.7% - 14.7% (14.7)%
		Default speed(3)	1.5% - 1.5% (1.5)%	1.5% - 1.5% (1.5)%
		Collateral remaining loss percentage(4)	0.4% - 0.4% (0.4)%	0.6% - 0.6% (0.6)%
Mortgage loans at fair value	Discounted cash flow	Discount rate	9.1% - 20.7% (14.4)%	9.1% - 18.7% (13.8)%
		Twelve-month projected housing price index change	-0.9% - 2.3% (-0.3)%	-3.4% - 6.4% (-2.6)%
		Prepayment speed(5)	0.2% - 6.2% (2.3)%	0.2% - 7.5% (2.8)%
		Total prepayment speed (Life total CPR)	1.0% - 33.8% (25.4)%	0.4% - 38.6% (31.9)%
Mortgage loans under forward purchase agreements at fair value	Discounted cash flow	Discount rate	16.3% - 20.8% (17.1)%	
		Twelve-month projected housing price index change	-0.5% - -0.4% (-0.5)%	
		Prepayment speed(5)	0.7% - 0.8% (0.8)%	
		Total prepayment speed (Life total CPR)	30.1% - 33.3% (32.7)%	

(1) With respect to mortgage-backed securities, key inputs are those used to evaluate broker indications of value.

(2)

Edgar Filing: PennyMac Mortgage Investment Trust - Form 10-K

Prepayment speed is measured using one year Voluntary Conditional Prepayment Rate ("CPR").

(3)

Default speed is measured using one year Constant Default Rate ("CDR").

Edgar Filing: PennyMac Mortgage Investment Trust - Form 10-K

Table of Contents

- (4) The projected future losses on the loans in the collateral groups paying to each bond as a percentage of the current balance of the loans.
- (5) Prepayment speed is measured using Life Voluntary Conditional Prepayment Rate ("CPR").
- (6) For indications of value received, PCM's Capital Markets and Valuation staff review the price indications provided by non-affiliate brokers for completeness, accuracy and consistency across all similar bonds managed by PCM. Bond-level analytics such as yield, weighted average life and projected prepayment and default speeds of the underlying collateral are computed. The reasonableness of the brokers' indications of value and of changes in value from period to period is evaluated in light of the analytical review performed and considering market conditions. The review of the Capital Markets and Valuation staff is reported to PCM's Valuation Committee as part of its review and approval of monthly valuation results. PCM has not adjusted, and does not intend to adjust, its fair value estimates to amounts different than the brokers' indications of value.

We monitor and value our investments in pools of distressed mortgage loans, with each acquisition being a unique pool. Most of the measures we use to value and monitor the loan portfolio, such as projected prepayment and default speeds and discount rates, are applied or output at the pool level. Since the predominant feature of most of the loan pools we purchase is that they are distressed, the characteristics of the individual loans, such as loan size, loan-to-value ratio and current delinquency status, can vary widely within a pool.

The weighted average discount rate used in the valuation of mortgage loans at fair value increased slightly from 13.8% at December 31, 2010 to 14.4% at December 31, 2011 due to higher yielding portfolio additions during 2011 offset by a decrease in certain pools' discount rates resulting from increasing market demand for distressed mortgage loans.

The weighted average twelve month projected housing price index ("HPI") change improved from -2.6% at December 31, 2010 to -0.3% at December 31, 2011. This improvement primarily reflects the movement of the portfolio toward the projected housing price bottom with the passage of time.

The total prepayment speed of our mortgage loans at fair value portfolio decreased from 31.9% at December 31, 2010 to 25.4% at December 31, 2011, primarily due to a greater than expected volume of reinstatements of nonperforming loans and lower than expected rates of defaults of distressed performing loans as well as lengthening of expected liquidation timelines.

While we believe that the Company's current fair value estimates are representative of fair value at the reporting date, the market for our mortgage assets is illiquid with very few market participants. Furthermore, our business strategy is to enhance value during the period in which the loans are held; any resulting appreciation or depreciation in the fair value of the loans is recorded during such holding period and ultimately realized at the end of the holding period.

During 2011 and 2010, we recognized gains on mortgage loan payoffs as summarized below:

	Year ended December 31,		Period from August 4, 2009 (commencement of operations) to December 31, 2009(1)
	2011	2010	
	(dollars in thousands)		
Number of loans	674	258	
Unpaid principal balance	\$ 226,338	\$ 63,090	\$
Gain recognized at payoff	\$ 19,950	\$ 12,036	\$

- (1) Our initial acquisitions of mortgage loans at fair value occurred on December 31, 2009.

The increase in gains recognized at payoff reflects the significant growth in the average balance of our mortgage loan portfolio of \$459.0 million, or 260+%, for the year ended December 31, 2011 compared to the year ended December 31, 2010, partly offset by certain of the acquisitions we made

Edgar Filing: PennyMac Mortgage Investment Trust - Form 10-K

Table of Contents

during 2010 that provided large gains on payoffs very early in the acquisition and holding period. Acquisitions made during 2011 did not result in similar gains.

During 2011 and 2010, we recognized gains on sales of distressed mortgage loans as summarized below:

	Year ended December 31,		Period from August 4, 2009 (commencement of operations) to December 31, 2009(1)
	2011	2010	
	(dollars in thousands)		
Number of loans	13	188	
Unpaid principal balance	\$ 5,524	\$ 62,549	\$
Gain recognized at sale	\$ 233	\$ 4,405	\$

(1) Our initial acquisitions of mortgage loans at fair value occurred on December 31, 2009.

The following table presents a summary of loan modifications completed for the periods presented:

Modification type(1)	Year ended December 31,				Period from August 4, 2009 (commencement of operations) to December 31, 2009(3)	
	2011		2010		Number of Loans	Balance of loans(2)
	Number of Loans	Balance of loans(2)	Number of Loans	Balance of loans(2)		
	(dollars in thousands)					
Rate reduction	276	\$ 66,812	34	\$ 9,313		\$
Term extension	114	30,848	16	4,925		\$
Capitalization of interest and fees	365	88,815	34	9,657		\$
Principal forbearance	34	11,089	6	2,165		\$
Principal reduction	193	46,375	2	907		\$
Total	365	88,815	35	9,891		\$

(1) Modification type categories are not mutually exclusive, and a modification of a single loan may be counted in multiple categories if applicable. The total number of modifications noted in the table is therefore lower than the sum of all of the categories.

(2) Before modification.

(3) Our initial acquisitions of mortgage loans at fair value occurred on December 31, 2009.

The following table summarizes the average impact of the modifications noted above to the terms of the loans modified for the periods presented:

	Year ended December 31,		Period from August 4, 2009 (commencement of operations) to December 31, 2009(1)
	2011	2010

(1)

Since we made our initial investment in mortgage loans on December 31, 2009, we recognized only \$12,000 of interest income relating to mortgage loans in 2009. Therefore, for purposes of this analysis, all of the change in interest income during 2010 vs 2009 is attributed to increase in volume.

In 2011 we earned interest income of \$36.1 million, compared to \$14.6 million and \$2.1 million in 2010 and 2009, respectively.

In 2010, we reinvested our short-term investments into our targeted asset classes, resulting in a substantial decrease in interest income from the former investment. During 2009, most of our investments were held in short-term investments, a money market fund, which is managed by a strategic investor in the parent company of PCM. This investment was made pending identification and acquisition of higher yielding investments in our targeted asset classes.

In 2011, we earned interest income of \$3.2 million and recognized net fair value losses totaling \$2.8 million on our portfolio of MBS. The decrease of \$2.0 million in interest income on our MBS during 2011 compared to 2010 is attributable to a decrease in the yield on our portfolio of MBS from 5.27% to 3.49%. This decrease was compounded by a \$5.8 million decrease in the average investment in MBS during 2011 as compared to 2010. These comparisons reflect the growth of our investment in MBS during 2010, followed by net repayments of the securities as investments in mortgage loans became our primary investment activity later in 2010 through December 31, 2011.

In 2010 we earned interest income of \$5.2 million and recognized net fair value gains totaling \$233,000 on our portfolio of MBS. During 2010, we purchased \$91.1 million of MBS, increasing our average investment in MBS by \$33.7 million. This increase contributed a \$1.7 million increase to interest income. This increase was partially offset by a decrease in yields of these securities from 7.33% to 5.27%. Both the decrease in yield on MBS and appreciation in the securities' fair values were

Edgar Filing: PennyMac Mortgage Investment Trust - Form 10-K

Table of Contents

primarily due to increased demand for non-Agency MBS in the marketplace that is not presently being matched by increased securitization volumes. Gains on MBS were the result of valuation changes as we did not sell any MBS during 2009 or 2010.

At December 31, 2011, our portfolio of primarily currently cash flowing, senior priority MBS had an average yield of 7.70% and an estimated remaining life of approximately 1.55 years. We invest in MBS as a complement to our investments in mortgage loans and as a means of ensuring our compliance with REIT tax regulations governing our asset composition. At December 31, 2010, our portfolio of MBS was primarily comprised of currently cash flowing securities with an average yield of 4.69% and an estimated remaining life of approximately 0.93 years.

In 2011 we recognized interest income on mortgage loans at fair value of \$32.8 million, which compares to \$9.3 million in 2010. During the year ended December 31, 2011, we recognized annualized interest of 4.77% on our portfolio of mortgage loans (excluding mortgage loans acquired for sale at fair value) as measured by the portfolio's average fair value. This compares to 5.18% for the year ended December 31, 2010.

The increase in interest income is due primarily to growth in the average balance of our mortgage loan portfolio of \$459.0 million or 260% for the year ended December 31, 2011 when compared to the year ended December 31, 2010. This growth in interest income for the year ended December 31, 2011 was partially offset by a decrease in the yield on the loans from 5.15% in 2010 to 4.74% in 2011. The decrease in yield in 2011 as compared to 2010 is due primarily to the addition of pools of loans with lower interest rates during the period from September 30, 2010 through December 31, 2011. At December 31, 2010, our investment in performing mortgage loans had a weighted-average coupon of 5.73%; at December 31, 2011, our investment in performing mortgage loans had a weighted-average coupon of 4.61%.

At December 31, 2011, approximately 75% of the fair value of our portfolio of mortgage loans was nonperforming, which compares to 76% at December 31, 2010. We do not accrue interest on nonperforming loans and generally do not recognize revenues during the period we hold REO. We calculate the yield on our mortgage loan portfolio based on the portfolio's average fair value, which most closely reflects our investment in the mortgage loans. Accordingly, the yield we realize is substantially higher than would be recorded based on the loans' unpaid balances as we purchase our mortgage loans at substantial discounts to their unpaid principal balances.

The revenue benefits of nonperforming loans and REO generally take longer to realize than those of performing loans due to the time required to work with borrowers to resolve payment issues through our modification programs and to acquire and liquidate the property securing the mortgage loans. The value and returns we realize from these assets are determined by our ability to cure the borrowers' defaults, or when curing of borrower defaults is not a viable solution, by our ability to effectively manage the liquidation process. As a participant in HAMP, we are required to comply with the process specified by the HAMP program before liquidating a loan, and this may extend the liquidation process. At December 31, 2011, we held \$616.0 million in fair value of nonperforming loans and \$103.5 million in carrying value of REO.

Net Gain on Mortgage Loans Acquired for Sale

During the year ended December 31, 2011, we recorded a net gain of \$7.6 million on mortgage loans acquired for sale which included approximately \$6.1 million in fair values of MSRs received as part of the proceeds from our correspondent lending loan sales. During the year ended December 31, 2010, we recorded a gain of \$18,000 on mortgage loans acquired for sale which arose from the sale of a portion of a pool of distressed loans that was contemplated in the acquisition of these loans.

Edgar Filing: PennyMac Mortgage Investment Trust - Form 10-K

Table of Contents

We recognized gains on mortgage loans acquired for sale as summarized below:

	Year ended December 31,		Period from August 4, 2009 (commencement of operations) to December 31, 2009
	2011	2010	
(in thousands)			
Cash gain (loss):

Hedging derivatives	(3,834)	(44)	
	2,358	(68)	
	\$ 7,633	\$ 18	\$
Fair value of loans sold during the period	\$ 1,096,378	\$ 26,071	\$
Fair value of mortgage loans acquired for sale at period-end:	\$ 232,016	\$ 3,966	\$

Our gain on mortgage loans acquired for sale includes both cash and non cash elements. We receive proceeds on sale that include both cash and our estimate of the value of MSR. MSR represents the value of a contract that obligates us to service the mortgage loans we sell on behalf of the purchaser of the loan in exchange for servicing fees and the right to collect certain ancillary income from the borrower. We recognize MSR at our estimate of the fair value of the contract to service the loans. We also provide for our estimate of the future losses that we may be required to incur as a result of our breach of representations and warranties we provide to the purchasers of the loans we sell.

Our hedging activities primarily involve forward sales of our inventory and commitments to purchase mortgage loans as well as purchases of options to sell and options to purchase MBS. Following is a summary of the notional activity in our hedging derivatives for the period presented:

Results of Real Estate Acquired in Settlement of Loans

Results from REO includes the gains or losses we record upon sale of the properties as well as valuation adjustments we record during the period we hold those properties. During the year ended December 31, 2011, we recorded net gains of \$1.1 million in results of real estate acquired in settlement of loans as compared to net gains totaling \$2.0 million for the year ended December 31, 2010. The decrease in gain between the year ended December 31, 2010 and the year ended December 31, 2011 is primarily due to valuation adjustments recorded during 2011 as compared to 2010 due to the longer period the properties were held during 2011 as compared to 2010.

Expenses

Our expenses for the years ended December 31, 2011 and 2010 and for the period from August 4, 2009 (commencement of operations) to December 31, 2009 are summarized below:

	2011	2010	2009
	(in thousands)		
Interest	\$ 16,946	\$ 826	\$
Loan servicing fees	14,186	2,987	
Management fees	6,740	4,878	1,981
Compensation	5,161	2,627	1,303
Professional services	4,434	2,581	471
Other	8,652	3,129	429
Total expenses	\$ 56,119	\$ 17,028	\$ 4,184

Increased expenses during the year ended December 31, 2011 compared to the same period in 2010 were a result of the growth in the Company's investment portfolio and the use of borrowings beginning in the fourth quarter of 2010 to finance that growth.

The effects of changes in the composition of our borrowings on our interest expense during the periods presented are summarized below:

	2011 vs. 2010 Increase (decrease) due to changes in			Length of period (in thousands)	2010 vs. 2009 Increase (decrease) due to changes in		
	Rate	Volume	Total change		Rate	Volume	Total change
Assets sold under agreements to repurchase:							
Securities	\$ (149)	\$ 402	\$ 253	\$	\$ 620	\$ 620	
Mortgage loans acquired for sale at fair value	1	2,425	2,426		206	206	
Mortgage loans at fair value	54	9,382	9,436				
Real estate acquired in settlement of loans		635	635				
Note payable secured by mortgage loans at fair value		254	254				
Borrowings under forward purchase agreement		3,116	3,116				
	\$ (94)	\$ 16,214	\$ 16,120	\$	\$ 826	\$ 826	

During the year ended December 31, 2011, we incurred interest expense totaling \$16.9 million as compared to \$826,000 during the year ended December 31, 2010. Our interest cost was 3.74% for 2011 as compared to 1.63% for 2010. The increase in interest cost reflects the changing nature of assets we are financing. During 2010, we financed MBS which provides for financing at lower rates as compared to nonperforming mortgage loans, which represented most of the assets we financed during 2011. Interest expense during 2011 reflects our strategy to employ leverage in our efforts to increase our investing capacity after fully deploying the proceeds of our initial equity offerings.

Table of Contents

Loan servicing fees also grew substantially from \$3.0 million in 2010 to \$14.2 million as our average investment in mortgage loans increased by 260% during the year ended December 31, 2011. Included in loan servicing fees in 2011 and 2010 were activity-based fees of \$3.2 million and \$1.2 million, respectively, relating to the liquidation of loans.

Compensation expense increased as the result of additional grants of restricted share units to our officers and trustees as well as certain employees of PCM and its affiliates during the quarter ended March 31, 2011. Professional services expense increased during the year ended December 31, 2011 as compared to the year ended December 31, 2010 due to our heightened level of mortgage investment acquisition activity and to costs related to obtaining financing for our acquisitions.

Growth in expenses for 2010 reflect the full-year effect of 2010 versus the partial-year initial period of expenses in 2009, and growth in the Company. Professional services expense increased disproportionately with the increase in the 2010 period due to our heightened efforts to identify mortgage investments and related efforts to identify and put in place financing for such investments during the year. The introduction of servicing fees expense during 2010 reflects the Company's lack of a portfolio of mortgage loans during 2009. \$1.4 million of reimbursement of common overhead expenses are also included in the total for 2010. PCM has not waived, and we believe that PCM does not intend to waive in the future, its claims to reimbursement of common overhead expenses incurred after March 31, 2010.

Income Taxes

The Company has elected to treat two of its subsidiaries as TRSs. Income from a TRS is only included as a component of REIT taxable income to the extent that the TRS makes dividend distributions of income to the REIT. No such dividend distributions were made in 2011, 2010 or 2009. A TRS is subject to corporate federal and state income tax. Accordingly, a provision for income taxes for the TRSs is included in the accompanying consolidated statements of income.

In general, cash dividends declared by the Company will be considered ordinary income to the shareholders for income tax purposes. Some portion of the dividends may be characterized as capital gain distributions or a return of capital. Most of the 2011 distributions and all of the 2010 distributions will be characterized as ordinary income. Approximately 5% of the 2011 distribution will be characterized as long term capital gain. There were no distributions for 2009 as there was a tax loss in 2009.

Edgar Filing: PennyMac Mortgage Investment Trust - Form 10-K

Table of Contents

The following table reflects the differences between consolidated income and taxable REIT income that is distributed for the periods presented:

	Year ended December 31,		Period from August 4, 2009 (commencement of operations) to December 31, 2009
	2011	2010

Total assets increased \$797.0 million, or 135%, during the period from December 31, 2010 to December 31, 2011. Growth in total assets reflects growth of investments totaling \$757.1 million or 134% during the period. We financed our asset growth through additional borrowings of \$563.7 million and through issuance of additional common shares for net proceeds of \$197.5 million. We made investments (excluding the purchase of correspondent lending loans) totaling \$751.8 million and received proceeds from sales and repayments of those assets totaling \$279.4 million. We also purchased newly-originated mortgage loans totaling approximately \$1.3 billion and received proceeds (including MSRs) from the sale of those loans totaling approximately \$1.1 billion in our correspondent lending operations. Our acquisitions are summarized below.

Table of Contents

Asset Acquisitions

Investment Portfolio

Following is a summary of our acquisitions of mortgage investments (excluding correspondent lending mortgage loans) for the periods presented:

	Year ended December 31,		Period from August 4, 2009 (commencement of operations) to December 31, 2009
	2011	2010	
	(in thousands)		
MBS	\$ 21,420	\$ 91,141	\$ 93,049
Distressed mortgage loans(1)(2)			
Performing	52,256	33,745	26,046
Nonperforming	595,353	383,466	
	647,609	417,211	26,046
REO	2,475	1,238	
MSRs	6,079		
	\$ 677,583	\$ 509,590	\$ 119,095

(1) Performance status as of the date of acquisition.

(2) \$575.5 million of our distressed asset purchases during the year ended December 31, 2011 were acquired from or through one or more subsidiaries of Citigroup Inc.

Our acquisitions during the year ended December 31, 2010 reflect continuing investment of the proceeds from our initial public offering which we completed during August of 2009. Our acquisitions during the year ended December 31, 2011 primarily reflect a subsequent underwritten public offering completed in the first quarter of 2011 and the use of borrowings to leverage our equity. We continue to identify additional means of increasing our investment portfolio through cash flow from existing investments, borrowings and transactions that minimize current cash outlays. However, we expect that, over time, our ability to continue our portfolio growth will depend on our ability to raise additional equity capital.

Investment Portfolio Composition

Mortgage Backed Securities

Our portfolio of senior priority MBS is primarily currently cash flowing, is backed by non-Agency subprime, Alt-A and prime jumbo loans and has an average remaining life of approximately 1.55 years. We acquired these securities to supplement our investments in mortgage loans and to help ensure compliance with the REIT tax regulations relating to our asset composition.

The following is a summary of our portfolio of MBS as of the dates presented:

	December 31, 2011			
	Fair value	Principal	Life (in years)	Average
				Coupon
Security collateral type:	(dollars in thousands)			

Edgar Filing: PennyMac Mortgage Investment Trust - Form 10-K

Non-Agency subprime	\$ 58,634	\$ 63,712	1.60	0.64%	8.01%
Non-Agency Alt-A	8,710	8,910	1.69	5.63%	6.23%
Non-Agency prime jumbo	5,469	5,624	0.72	2.72%	6.51%
	\$ 72,813	\$ 78,246	1.55	1.36%	7.70%

Edgar Filing: PennyMac Mortgage Investment Trust - Form 10-K

Table of Contents

	December 31, 2010					
	Fair value	Principal	Life (in years)	Average		
				Coupon	Yield	
(dollars in thousands)						
Security collateral type:						
Non-Agency subprime	\$ 93,783	\$ 96,653	0.82	0.51%	4.50%	
Non-Agency Alt-A	15,824	16,282	1.48	5.35%	7.10%	
Non-Agency prime jumbo	10,265	10,240	1.12	2.90%	2.70%	
	\$ 119,872	\$ 123,175	0.93	1.35%	4.69%	

The relationship of the fair value of our mortgage loans at fair value (excluding mortgage loans acquired for sale at fair value) to the fair value of the real estate collateral underlying the loans is summarized below:

	December 31, 2011		December 31, 2010	
	Fair values			
	Loan	Collateral	Loan	Collateral
(in thousands)				
Performing loans	\$ 209,599	\$ 306,978	\$ 86,242	\$ 139,393
Nonperforming loans	615,977	905,940	278,008	424,856
	\$ 825,576	\$ 1,212,918	\$ 364,250	\$ 564,249

The collateral values presented above do not represent our assessment of the amount of future cash flows to be realized from the mortgage loans and/or underlying collateral. Future cash flows will be influenced by, among other considerations, our asset disposition strategies with respect to individual loans, the costs and expenses we incur in the disposition process and changes in borrower performance and the underlying collateral values.

Collateral values summarized above are estimated and may change over time due to various factors including our level of access to the properties securing the loans, changes in the real estate market or the condition of individual properties. Collateral values noted do not include any costs that would typically be incurred in obtaining the property in settlement of the loan, readying the property for sale or in the sale of a property.

Following is a summary of the distribution of our mortgage loans at fair value (excluding mortgage loans acquired for sale at fair value) at December 31, 2011 and 2010:

Table of Contents*Correspondent Lending*

Following is a summary of our correspondent lending acquisitions for the periods presented:

	Year ended December 31,		Period from August 4, 2009 (commencement of operations) to December 31, 2009
	2011	2010	
	(in thousands)		
Fair value of loans purchased:			
Agency eligible	\$ 660,862	\$ 9,249	\$
Government insured or guaranteed	623,540	20,810	
Jumbo	34,361		
	\$ 1,318,763	\$ 30,059	\$

Of the \$1.3 billion of recently funded mortgage loans we purchased for sale, approximately \$1.0 billion were purchased during the fourth quarter of 2011. Our ability to continue the expansion of our correspondent lending business is subject to our ability to obtain additional inventory financing and our ability to fund the portion of the loans not financed, either through cash flows from business activities or the raising of additional equity capital. However, there can be no assurance that we will be successful in increasing our borrowing capacity or in obtaining the additional equity capital necessary or that we will be able to identify additional sources of mortgage loans.

Cash Flows

Our cash flows resulted in a net decrease in cash of \$30.9 million during the year ended December 31, 2011. The negative cash flows arose primarily due to growth in our operations. Cash used by operating activities totaled \$275.1 million during the year ended December 31, 2011. This use of cash was primarily due to the cash requirements related to the growth in our operating balance sheet, primarily mortgage loans acquired for sale, which tracked our overall growth. Cash used by operating activities during the year ended December 31, 2010 also reflects the effects of growth in our operating balance sheet accounts.

Net cash used by investing activities was \$277.8 million for the year ended December 31, 2011. This use of cash reflects the growth of our investment portfolio. We used cash to purchase a United States Treasury security, mortgage loans, MBS and REO with fair values of \$50.0 million, \$453.3 million, \$21.4 million and \$1.5 million, respectively, during the year ended December 31, 2011. This contrasts with cash used by investing activities totaling \$167.3 million during the year ended December 31, 2010. We accomplished the 2011 acquisitions primarily through the use of additional borrowings supported by a secondary equity offering during the year.

Approximately 71% of our investments, comprised of non-correspondent lending mortgage loans, MBS, REO and MSRs, were nonperforming assets as of December 31, 2011. Nonperforming assets include mortgage loans delinquent 90 or more days and REO. Accordingly, we expect that these assets will require a longer period to begin producing cash flow and the timing and amount of cash flows from these assets is less certain than for performing assets. During the year ended December 31, 2011, we transferred \$134.8 million of mortgage loans to REO and realized cash proceeds from the repayments and sale of mortgage-backed securities and mortgage loans at fair values and REO totaling \$67.7 million and \$147.3 million and \$64.5 million, respectively.

Edgar Filing: PennyMac Mortgage Investment Trust - Form 10-K

Table of Contents

Net cash provided by financing activities was \$522.1 million for the year ended December 31, 2011. These funds were procured primarily to finance the acquisition of additional mortgage loans. Cash provided by financing activities was primarily due to additional borrowings supported by a secondary equity offering. We also obtained non-cash financing through the use of forward purchase agreements to purchase pools of nonperforming loans amounting to \$194.3 million in fair value and REOs amounting to \$964,000. As discussed below in *Liquidity and Capital Resources*, our Manager continues to evaluate and pursue additional sources of financing to provide us with future investing capacity.

Our cash flows resulted in a net increase in cash of \$45.4 million during the year ended December 31, 2010. The positive cash flows arose primarily due to cash provided by financing activities exceeding cash used by investing and operating activities. Cash used by operating activities totaled \$22.8 million during 2010. This use of cash was primarily due to the cash requirements related to the growth in our balance sheet accounts relating to our operations.

Net cash used by investing activities was \$167.3 million for the year ended December 31, 2010. This use of cash reflects the conversion of our short-term investments to mortgage loans and MBS, with additional purchases financed by loans and securities sold under agreements to repurchase. We purchased MBS, mortgage loans and real estate acquired in settlement of loans with fair values of \$91.1 million, \$417.2 million and \$1.2 million, respectively, during 2010. Approximately 60% of our investments, comprised of non-correspondent lending mortgage loans, MBS and REO, were nonperforming assets as of December 31, 2010. During the period, we transferred \$46.0 million of mortgage loans to REO and realized cash proceeds from the sale of REO totaling \$19.4 million.

Net cash provided by financing activities was \$235.5 million for the year ended December 31, 2010. These funds were procured to finance the acquisition of additional loans and MBS.

Cash used by operating activities totaled \$1.3 million for 2009. This use of cash was primarily due to the net loss of \$1.9 million incurred during the year.

Net cash used by investing activities was \$322.2 million for 2009 and was attributable primarily to investment of the cash received from our common share offerings into interest earning money market assets and, to a lesser extent, mortgage loans and short-lived MBS.

Net cash provided by financing activities for 2009 totaled \$323.5 million, due to the initial offerings of common shares.

Liquidity and Capital Resources

Our liquidity reflects our ability to meet our current obligations (including our operating expenses and, when applicable, retirement of, and margin calls relating to, our debt), make investments as our Manager identifies them and make distributions to our shareholders. We generally need to distribute at least 90% of our taxable income each year (subject to certain adjustments) to our shareholders to qualify as a REIT under the Internal Revenue Code. This distribution requirement limits our ability to retain earnings and thereby replenish or increase capital to support our activities.

We expect our primary sources of liquidity to be proceeds from earnings on our investments, through cash flows from business activities, proceeds from borrowings and/or additional equity offerings. We believe our current liquidity is sufficient to meet our short-term liquidity needs.

Our current leverage strategy is to finance our assets where we believe such borrowing is prudent and appropriate. We have made borrowings in the form of borrowings under forward purchase agreements, sales of assets under agreements to repurchase, and a note payable secured by mortgage loans at fair value. To the extent available to us, we expect in the future to obtain long-term financing for assets with estimated future lives of more than one year; this may include term financing and securitization of nonperforming and/or re-performing mortgage loans.

Edgar Filing: PennyMac Mortgage Investment Trust - Form 10-K

Table of Contents

Until attractive long-term financing is procured, we will continue to finance our assets on a short-term basis through agreements to repurchase and other secured lending and structured finance facilities, pending the ultimate disposition of the assets, whether through sale, securitization or liquidation. Because our current debt facilities consist solely of short-term borrowings, we expect to renew these facilities in advance of maturity in order to ensure our ongoing liquidity and access to capital or otherwise allow ourselves sufficient time to replace any necessary financing.

During the year ended December 31, 2011, we received proceeds from the issuance of common shares as follows:

On February 16, 2011, we issued and sold 9,500,000 common shares in an underwritten public offering and received \$163.8 million of proceeds, after the underwriting discount and estimated offering expenses and the reimbursement of certain expenses.

On March 3, 2011, we issued and sold an additional 1,425,000 common shares pursuant to the exercise of an over-allotment option by the public offering's underwriters and received \$24.6 million of proceeds after the underwriting discount and reimbursement of certain expenses.

During the second quarter of 2011, we sold a total of 28,500 of our common shares under a Controlled Equity Offering sales agreement with Cantor Fitzgerald & Co. at a weighted average price of \$18.34 per share, providing net proceeds to us of approximately \$512,000 net of sales commissions. The sales agent received a total of approximately \$10,000, which represents an average commission of approximately 2.0% of the gross sales price per share. The Controlled Equity Offering sales agreement with Cantor Fitzgerald & Co. provides for the sale of common shares having an initial aggregate offering price of up to \$100 million.

During the fourth quarter of 2011, we sold a total of 530,000 of our common shares under a Controlled Equity Offering sales agreement with Cantor Fitzgerald & Co. at a weighted average price of \$16.78 per share, providing net proceeds to us of approximately \$8.7 million net of sales commissions. The sales agent received a total of approximately \$178,000, which represents an average commission of approximately 2.0% of the gross sales price per share.

During 2011, we increased our use of debt financing as a means of extending our balance sheet capacity through the use of repurchase agreements and forward purchase agreements. Our repurchase agreements represent the sales of assets together with agreements for us to buy back the assets at a later date. During the year ended December 31, 2011, the average balance outstanding under agreements to repurchase MBS and mortgage loans and REO financed under agreements to repurchase totaled \$363.7 million, and the maximum daily amount outstanding under such agreements totaled \$718.3 million. The difference between the maximum and average daily amounts outstanding was due to increasing utilization of our existing facilities and our entry into a new credit facility during the year ended December 31, 2011, all in support of growth in our investments and correspondent lending.

The forward purchase agreements represent agreements between us and Citigroup Global Markets Realty Corp. ("CGM"), pursuant to which we agreed to purchase from CGM certain nonperforming residential mortgage loans and residential real property acquired in settlement of loans (collectively, the "CGM Assets"). The CGM Assets were acquired by CGM from unaffiliated large money center banks (the "Initial Sellers"). As part of the agreements and in connection with our purchase of the CGM Assets, CGM assigned, and we assumed, all of CGM's rights and obligations under separate purchase agreements with the Initial Sellers. We recorded the transactions as a purchase of loans. The CGM Assets are serviced primarily by PLS. On the settlement date for any CGM Asset, in addition to the payment of the purchase price, we will reimburse CGM for certain out-of-pocket costs and other expenses, including servicing fees and servicing advances, and a cost of carry incurred by CGM for such CGM Asset.

Edgar Filing: PennyMac Mortgage Investment Trust - Form 10-K

Table of Contents

The total unpaid principal balance of the CGM Assets subject to the forward purchase agreements, was approximately \$386.8 million. At December 31, 2011, the unpaid principal balance of remaining commitments under the forward purchase agreements totaled \$304.1 million. The forward purchase agreements mature on June 11, 2012 and December 27, 2012.

These debt and equity sources of liquidity were used to partially finance acquisitions of approximately \$751.8 million (excluding mortgage loans acquired in our correspondent lending operations) during the year ended December 31, 2011.

Repurchase agreements and the forward purchase agreements represent significant sources of funding for our investment portfolio. As of December 31, 2011, we financed our investments in MBS, mortgage loans at fair value and REO, and our inventory of mortgage loans acquired for sale at fair value, under agreements to repurchase as follows:

	December 31,	
	2011	2010
	(in thousands)	
Assets financed	\$ 1,222,845	\$ 449,503
Total assets in classes of assets financed	\$ 1,283,954	\$ 517,773
Borrowings	\$ 812,357	\$ 248,624
Percentage of invested assets pledged	95%	87%
Advance rate against pledged assets	66%	55%

The increase in both percentage of invested assets pledged and the advance rate against pledged assets is primarily due to the growth in correspondent lending. Almost all of the correspondent lending assets are eligible for pledging and our lenders advance against such assets at a rate much higher than is advanced against the distressed assets underlying the remaining classes of our financeable assets.

As discussed above, all of our borrowings have short-term maturities:

The transactions relating to securities sold under agreements to repurchase provide for sale to major financial institution counterparties of securities in our investment portfolios at advance rates based on the estimated fair value of the securities sold. The agreements provide for repurchase by us of the securities at a term of three weeks. All transactions relating to MBS sold under agreements to repurchase maturing before the date of this Report have been refinanced by renewing the agreements at maturity.

The transactions relating to mortgage loans under agreements to repurchase mature between April 13, 2012 and December 28, 2012 and provide for sale to major financial institution counterparties based on the estimated fair value of the mortgage loans sold. The agreements provide for terms of approximately one year. All transactions maturing before the date of this Report have been refinanced by renewing or extending the agreements at maturity.

The transactions relating to REO are secured financings that mature on June 6, 2012 and December 28, 2012 and provide for sale to major financial institution counterparties at advance rates based on the estimated fair value of the REO.

The forward purchase agreements require that we settle the purchase of the CGM Assets on or before the applicable maturity dates of June 11, 2012 and December 27, 2012.

In the event that we fail to settle any CGM Assets on or before the applicable maturity date, the forward purchase agreements provide for a net settlement between us and CGM, in an amount based on the difference between the fair value of such CGM Assets on the date of determination and the sum of the purchase price and reimbursement amounts that would have applied to such CGM Assets had they been purchased on such date.

Edgar Filing: PennyMac Mortgage Investment Trust - Form 10-K

Table of Contents

Any CGM Asset that liquidates prior to its settlement by us will be settled between us and CGM in the month following liquidation, in an amount based on the difference between the liquidation proceeds and the sum of the purchase price and reimbursement amounts that would have applied to such CGM Asset had it been purchased on the liquidation date.

Our settlement of the purchases of the CGM Assets is subject to our obtaining additional capital adequate to fund the transactions. There can be no assurance that the purchase of the CGM Assets will ultimately be settled.

Our debt financing agreements require us and certain of our subsidiaries to comply with various financial covenants. These financial covenants currently include the following:

profitability at each of the Company and our subsidiary, PennyMac Mortgage Investment Trust Holdings I, LLC ("PMITH"), for at least one (1) of the previous two consecutive fiscal quarters, as of the end of each fiscal quarter, and at our subsidiary, PennyMac Corp. ("PMC"), for the prior three (3) calendar quarters;

a minimum of \$10 million in unrestricted cash and cash equivalents among the Company and/or its subsidiaries; a minimum of \$7.75 million in unrestricted cash and cash equivalents between PMC and PMITH; and a minimum of \$7.5 million in unrestricted cash and cash equivalents at PMC;

a minimum tangible net worth for the Company of \$400 million, plus 75% of the total net proceeds received by it in connection with equity issuances after August 18, 2011; a minimum tangible net worth for PMITH of \$195 million; and a minimum tangible net worth for PMC of the sum of (y) \$65 million and (z) 50% of its positive quarterly income after November 2, 2010;

a maximum ratio of total liabilities to tangible net worth of less than 3:1 for the Company, 10:1 for PMC and 5:1 for PMITH; and

at least two warehouse or repurchase facilities that finance amounts and assets similar to those being financed under our existing debt financing agreements.

Although these financial covenants limit the amount of indebtedness we may incur and impact our liquidity through minimum cash reserve requirements, we believe that these covenants currently provide us with sufficient flexibility to successfully operate our business and obtain the financing necessary to achieve that purpose.

The transactions relating to securities sold under agreements to repurchase contain margin call provisions that, upon notice from the applicable lender at its option, require us to transfer cash or additional securities in an amount sufficient to eliminate any margin deficit. A margin deficit will generally result from any decline in the market value (as determined by the applicable lender) of the assets subject to an agreement to repurchase, although in some instances we may agree with the lender upon certain thresholds (in dollar amounts or percentages based on the market value of the assets) that must be exceeded before a margin deficit will arise. Upon notice from the applicable lender, we will generally be required to satisfy the margin call on the day of such notice or within one business day thereafter, depending on the timing of the notice. At December 31, 2011, our securities sold under agreements to repurchase were sold to two lenders. With respect to one of these agreements, we have agreed with the lender to a threshold of \$250,000 in market value decline that must be exceeded before a margin deficit will arise.

Similarly, the transactions relating to mortgage loans and/or equity interests in special purpose entities holding real property under agreements to repurchase contain margin call provisions that, upon notice from the applicable lender at its option, require us to transfer cash or additional mortgage loans or real property, as applicable, in an amount sufficient to eliminate any margin deficit. A margin deficit will generally result from any decline in the market value (as determined by the applicable lender) of the assets subject to an agreement to repurchase. Upon notice from the applicable lender, we will

Table of Contents

generally be required to satisfy the margin call on the day of such notice or within one business day thereafter, depending on the timing of the notice.

Our Manager continues to explore a variety of additional means of financing our continued growth, including debt financing through bank warehouse lines of credit, additional repurchase agreements, term financing, securitization transactions and additional equity offerings. However, there can be no assurance as to how much additional financing capacity such efforts will produce, what form the financing will take or that such efforts will be successful. Further, counterparty credit sensitivity and collateral documentation requirements have made it difficult to obtain financing for REO, the result of which could place stress on our capital and liquidity positions at certain times during the foreclosure cycles of the related nonperforming loans.

Off-Balance Sheet Arrangements and Aggregate Contractual Obligations

Off-Balance Sheet Arrangements and Guarantees

As of December 31, 2011, we have not entered into any off-balance sheet arrangements or guarantees.

Contractual Obligations

As of December 31, 2011, all of our known contractual obligations mature within one year. As of December 31, 2011, we had on-balance sheet contractual obligations of \$631.3 million to finance assets under agreements to repurchase with maturities between March 27, 2012 and December 28, 2012, a contractual obligation of \$28.6 million relating to a note payable secured by mortgage loans at fair value maturing on September 26, 2012, and contractual obligations of \$152.4 million relating to forward purchase agreements with maturities between June 11, 2012 and December 27, 2012. All agreements to repurchase that matured between December 31, 2011 and the date of this Report have been renewed or extended and are described in Note 18 *Securities Sold Under Agreements to Repurchase at Fair Value*, Note 19 *Mortgage Loans Acquired for Sale Sold Under Agreements to Repurchase*, Note 20 *Mortgage Loans at Fair Value Under Agreements to Repurchase* and Note 21 *Real Estate Acquired in Settlement of Loans Financed Under Agreements to Repurchase* in the accompanying consolidated financial statements. The contractual obligation relating to the secured lending facility is described in Note 22 *Note Payable Secured by Mortgage Loans at Fair Value* in the accompanying consolidated financial statements. The contractual obligations relating to forward purchase agreements mature on June 11, 2012 and December 27, 2012 and are described in Note 23 *Borrowings under Forward Purchase Agreements* in the accompanying consolidated financial statements.

The amount at risk (the fair value of the assets pledged plus the related margin deposit, less the amount advanced by the counterparty and accrued interest) relating to the Company's assets sold under agreements to repurchase is summarized by counterparty below as of December 31, 2011:

Counterparty	Amount at risk
	(in thousands)
Citibank, N.A.	\$ 259,114
Wells Fargo Bank, N.A.	67,268
Credit Suisse First Boston Mortgage Capital LLC.	56,667
Bank of America, N.A.	14,650
	\$ 397,699

Management Agreement. Pursuant to the management agreement between PCM and us, we pay PCM a base management fee and a performance incentive fee, both payable quarterly and in arrears. The base management fee is calculated at the annual rate of 1.5% of shareholders' equity. "Shareholders' equity" is defined as the sum of the net proceeds from any issuances of our equity

Table of Contents

securities since inception (weighted for the time outstanding during the measurement period); plus our retained earnings at the end of the quarter (without taking into account any non-cash equity compensation expense incurred in current or prior periods); less any amount we pay for repurchases of our common shares (weighted for the time held during the measurement period); excluding any unrealized gains, losses or other non-cash items that have impacted our shareholders' equity as reported in our consolidated financial statements, regardless of whether those items are included in other comprehensive income or loss or net income; and excluding one-time events pursuant to changes in U.S. GAAP and certain other non-cash charges after discussions between PCM and our independent trustees and approval by a majority of our independent trustees.

The performance incentive fee is calculated at 20% per year of the amount by which "core earnings," on a rolling four-quarter basis and before the incentive fee, exceeds an 8% "hurdle rate." "Core earnings," for purposes of determining the amount of the performance incentive fee, is defined as U.S. GAAP net income (loss) adjusted to exclude non-cash equity compensation expense, unrealized gains and losses or other non-cash items recognized during the period, any conditional payment amounts relating to our IPO paid to PCM and the underwriters of our IPO, and certain other non-cash charges after discussions between PCM and our independent trustees and approval by a majority of our independent trustees. The "hurdle rate" is calculated as the product of (1) the weighted average of the issue price per share of all of our public offerings multiplied by the weighted average number of shares outstanding (including, for the avoidance of doubt, restricted share units) in the four-quarter period and (2) 8%. During our first four quarters, core earnings were calculated based on the annualized results of each of the preceding quarters. For purposes of calculating the incentive fee, to the extent we have a net loss in core earnings from a period prior to the rolling four-quarter period that has not been offset by core earnings in a subsequent period, such loss will continue to be included in the rolling four-quarter calculation until it has been fully offset. This term is not applicable for purposes of determining whether the conditional payment of the underwriting discount is payable.

Under the management agreement, PCM is entitled to reimbursement of organizational and operating expenses, including third party expenses, incurred on our behalf. Our reimbursement obligation is not subject to any dollar limitation. Expenses are reimbursed in cash on a quarterly basis.

Under the management agreement, PCM may be entitled to a termination fee under certain circumstances. Specifically, the termination fee is payable for (1) our termination of the management agreement without cause or (2) PCM's termination of the management agreement upon a default in the performance of any material term of the management agreement. The termination fee is equal to three times (a) the average annual base management fee and (b) the average annual (or, if the period is less than 24 months, annualized) incentive fee earned by PCM during the prior 24-month period before termination. Under circumstances where the termination fee is payable, we will agree to pay to PCM its portion of the conditional payment of the underwriting discount described below.

Loan Servicing Agreement. For its services under our loan servicing agreement, PLS is entitled to base servicing fees that are competitive with those charged by other servicers or specialty servicers, as applicable. Base servicing fees are calculated as a percentage of the unpaid principal balance of the mortgage loans, with the actual percentage being based on the risk characteristics of the loans in a particular pool. Such risk characteristics include market value of the underlying properties, creditworthiness of the borrowers, seasoning of the loans, degree of current and expected loan defaults, current loan-to-value ratios, borrowers' payment history and debt-to-income levels.

The base servicing fees for nonperforming loans range from 30 to 100 basis points per year of the unpaid principal balance of such loans. PLS is also entitled to certain customary market-based fees and charges, including boarding and deboarding fees, liquidation and disposition fees, assumption, modification and origination fees and late charges, as well as interest on funds on deposit in custodial or escrow accounts.

Edgar Filing: PennyMac Mortgage Investment Trust - Form 10-K

Table of Contents

When PLS effects a refinancing of a loan on our behalf and not through a third party lender and the resulting loan is readily saleable, PLS is entitled to receive from us market-based fees and compensation. Similarly, when PLS originates a loan to facilitate the disposition of real estate that we acquire in settlement of a loan, PLS is entitled to a fee in the same amount.

To the extent we participate in HAMP (or other similar mortgage loan modification programs), PLS is entitled to retain any incentive payments made to it and to which it is entitled under HAMP; provided, however, that with respect to any such incentive payments paid to PLS in connection with a mortgage loan modification for which we previously paid PLS a modification fee, PLS is required to reimburse us an amount equal to the lesser of such modification fee or such incentive payments.

Under the loan servicing agreement, PLS is also entitled to reimbursement for all customary, reasonable and necessary out of pocket expenses incurred by PLS in connection with the performance of its servicing obligations.

In connection with our correspondent lending business, PLS is entitled to base servicing fees, which range from 5 to 20 basis points per year of the unpaid principal balances of such loans, and other customary market-based fees and charges as described above. PLS also provides us with certain mortgage banking services, including fulfillment and disposition-related services, for a fulfillment fee based on a percentage of the unpaid principal balance of the mortgage loans. The fulfillment fee for such services is currently 50 basis points. Since November 1, 2010, we collect interest income and a sourcing fee of three basis points for each mortgage loan we buy from a correspondent and sell to PLS for ultimate disposition to a third party where we are not approved or licensed to sell to such third party. During the year ended December 31, 2011, the Company recorded fulfillment fees totaling \$1.7 million.

We paid servicing fees to PLS as described above and as provided in our loan servicing agreement, and recorded other expenses, including common overhead expenses incurred on our behalf by PCM and its affiliates in accordance with the terms of its management agreement.

Conditional Payment of Underwriting Discount. Certain of the underwriting costs incurred in our IPO were paid on our behalf by PCM and a portion of the underwriting discount was deferred by agreement with the underwriters of the offering. Reimbursement to PCM and payment to the underwriters of the deferred underwriting discount are both contingent on our performance as follows: we will reimburse PCM approximately \$2.9 million of underwriting costs paid by PCM on the offering date and pay the underwriters approximately \$5.9 million in deferred underwriting discount if, during any full four calendar quarter period during the 24 full calendar quarters after the date of the completion of our IPO, August 4, 2009, our "core earnings" for such four-quarter period and before the incentive portion of PCM's management fee equals or exceeds an 8% incentive fee "hurdle rate" (both defined above). If this requirement is not satisfied by the end of such 24 calendar quarter period, our obligation to reimburse PCM and make the conditional payment of the underwriting discount will terminate. We have concluded that this contingency is probable of being met during the 24-quarter period and have recognized a liability for reimbursement to PCM and payment of the contingent underwriting discount as a reduction of additional paid-in capital.

Quantitative and Qualitative Disclosures About Market Risk

Market risk is the exposure to loss resulting from changes in interest rates, foreign currency exchange rates, commodity prices, equity prices, real estate values and other market-based risks. The primary market risks that we are exposed to are real estate risk, credit risk, interest rate risk, prepayment risk, inflation risk and market value risk. A substantial portion of our investments are comprised of nonperforming loans. We believe that such assets' fair values respond primarily to changes in the fair value of the real estate securing such loans.

Real Estate Risk

Residential property values are subject to volatility and may be affected adversely by a number of factors, including, but not limited to, national, regional and local economic conditions (which may be adversely affected by industry slowdowns and other factors); local real estate conditions (such as an oversupply of housing); construction quality, age and design; demographic factors; and retroactive changes to building or similar codes. Decreases in property values reduce the value of the collateral and the potential proceeds available to a borrower to repay our loans, which could cause us to suffer losses.

Credit Risk

We are subject to credit risk in connection with our investments. A significant portion of our assets is comprised of nonperforming residential mortgage loans. The credit risk related to these investments pertains to the ability and willingness of the borrowers to pay, which is assessed before credit is granted. We believe that residual loan credit quality is primarily determined by the borrowers' credit profiles and loan characteristics.

Interest Rate Risk

Interest rate risk is highly sensitive to many factors, including governmental monetary and tax policies, domestic and international economic and political considerations and other factors beyond our control. Changes in interest rates affect both the fair value of and interest income we earn from our mortgage-related investments. This effect is most pronounced with fixed-rate investments. In general, rising interest rates negatively affect the fair value of our investments in MBS and mortgage loans.

Our operating results will depend, in part, on differences between the income from our investments and our financing costs. Presently our debt financing is based on a floating rate of interest calculated on a fixed spread over the relevant index, as determined by the particular financing arrangement.

In the event of a significant rising interest rate environment and/or economic downturn, defaults could increase and result in credit losses to us, which could materially and adversely affect our business, financial condition, liquidity, results of operations and prospects. Furthermore, such defaults could have an adverse effect on the spread between our interest earning assets and interest bearing liabilities.

The Company engages in interest rate risk management activities in an effort to reduce the variability of earnings caused by changes in interest rates. To manage this price risk resulting from interest rate risk, the Company uses derivative financial instruments acquired with the intention of moderating the risk that changes in market interest rates will result in unfavorable changes in the value of the Company's interest rate lock commitments and inventory of mortgage loans acquired for sale. The Company does not use derivative financial instruments for purposes other than in support of its risk management activities.

Table of Contents

Prepayment Risk

To the extent that the actual prepayment rate on our mortgage loans differs from what we projected when we purchased the loans and when we measured fair value as of the end of each reporting period, our unrealized gain or loss will be affected. As we receive prepayments of principal on our MBS investments, any premiums paid for such investments will be amortized against interest income using the interest method through the expected maturity dates of the investments. In general, an increase in prepayment rates will accelerate the amortization of purchase premiums, thereby reducing the interest income earned on the MBS investments. Conversely, as we receive prepayments of principal on our investments, any discounts realized on the purchase of such investments will be accrued into interest income using the interest method through the expected maturity dates of the investments. In general, an increase in prepayment rates will accelerate the accrual of purchase discounts, thereby increasing the interest income earned on the MBS investments.

Inflation Risk

Virtually all of our assets and liabilities are interest rate sensitive in nature. As a result, interest rates and other factors will influence our performance more so than inflation. Changes in interest rates do not necessarily correlate with inflation rates or changes in inflation rates. Furthermore, our consolidated financial statements are prepared in accordance with U.S. GAAP and any distributions we may make to our shareholders will be determined by our board of trustees based primarily on our taxable income and, in each case, our activities and balance sheet are measured with reference to historical cost and/or fair value without considering inflation.

Market Value Risk

Our mortgage loans and MBS are reported at their estimated fair values. The fair value of these assets fluctuates primarily due to changes in real estate values and other factors such as interest rates, the credit performance relating to the loans underlying our investments and the effectiveness and servicing practices of the servicers associated with each investment.

Generally, in a real estate market where values are rising or are expected to rise, the fair value of our mortgage loans would be expected to appreciate, whereas in a real estate market where values are generally dropping or are expected to drop, mortgage loan values would be expected to decrease.

The following table summarizes the estimated change in fair value of our portfolio of mortgage loans as of December 31, 2011, given several hypothetical (instantaneous) changes in home values from those used in the determination of fair value:

Property value shift	-15%	-10%	-5%	+5%	+10%	+15%
(dollar amounts in thousands)						
Fair value	\$ 727,376	\$ 760,735	\$ 793,528	\$ 856,818	\$ 887,005	\$ 916,061
Change in fair value:						
\$	\$ (98,200)	\$ (64,841)	\$ (32,048)	\$ 31,242	\$ 61,429	\$ 90,485
%	(11.89)%	(7.85)%	(3.88)%	3.78%	7.44%	10.96%

The following table summarizes the estimated change in fair value of our portfolio of MBS as of December 31, 2011, given several hypothetical (instantaneous) changes in interest rates and parallel shifts in the yield curve:

Interest rate shift in basis points	-200	-100	-50	+50	+100	+200
(dollar amounts in thousands)						
Fair value	\$ 73,234	\$ 73,238	\$ 73,214	\$ 72,441	\$ 72,339	\$ 71,947
Change in fair value:						
\$	\$ 421	\$ 425	\$ 401	\$ (372)	\$ (474)	\$ (866)
%	0.58%	0.58%	0.55%	(0.51)%	(0.65)%	(1.19)%

Table of Contents

These sensitivity analyses are limited in that they were performed at a particular point in time; only contemplate certain movements in real estate values as they relate to mortgage loans and interest rates as they relate to MBS; do not incorporate changes in interest rate volatility or changes in the relationship of one interest rate index to another; are subject to the accuracy of various models and assumptions used, including prepayment forecasts and discount rates; and do not incorporate other factors that would affect our overall financial performance in such scenarios, including operational adjustments made by management to account for changing circumstances. For these reasons, the preceding estimates should not be viewed as an earnings forecast.

We believe that our current investments in MBS remain generally sensitive to changes in interest rates due to our present portfolio of investments in MBS being comprised of presently cash flowing bonds with short expected lives. Generally, in a rising interest rate environment, the estimated fair value of these assets would be expected to decrease; conversely, in a decreasing interest rate environment, the estimated fair value of these assets would be expected to increase. However, since June 30, 2010, we have been evaluating the effect of interest rate shifts on bond valuations using a "constant yield" assumption rather than a "constant spread" assumption. These approaches differ in that, with a "constant spread" assumption, the spread to the discount curve in the base case is kept constant across interest rate scenarios, affecting both the projected cash flows and the implied return requirement of investors; with a "constant yield" assumption, the total yield of the bond is kept constant in the valuations across interest rate scenarios while projected cash flows change.

Although the "constant spread" assumption is typically used for scenario valuation of mortgage and other interest-rate-sensitive assets in non-distressed environments, a "constant yield" assumption is more appropriate for distressed assets given the nature of the return requirements of investors in those assets, and the recent observed sensitivities of non-Agency mortgage bonds to shifts in "risk-free" interest rates. This approach is also consistent with the approach used by our Manager to evaluate valuation sensitivity for similar instruments in other investment vehicles that it manages.

The following table summarizes the estimated change in fair value of our portfolio of mortgage loans as of December 31, 2010, given several hypothetical (instantaneous) changes in home values from those used in the determination of fair value:

Property value shift	-15%	-10%	-5%	+5%	+10%	+15%
	(dollar amounts in thousands)					
Fair value	\$ 320,237	\$ 335,196	\$ 349,879	\$ 378,269	\$ 391,824	\$ 404,838
Change in fair value:						
\$	\$ (44,013)	\$ (29,054)	\$ (14,371)	\$ 14,019	\$ 27,575	\$ 40,588
%	-12.08%	-7.98%	-3.95%	3.85%	7.57%	11.14%

The following table summarizes the estimated change in fair value of our portfolio of MBS as of December 31, 2010, given several hypothetical (instantaneous) shifts in interest rates and parallel shifts in the yield curve:

Interest rate shift in basis points	-200	-100	-50	+50	+100	+200
	(dollar amounts in thousands)

Accounting Developments

In May 2011, the Financial Accounting Standards Board issued Accounting Standards Update ("ASU") 2011-04 to the *Fair Value Measurements* topic of the Accounting Standards Codification ("ASC"). ASU 2011-04 eliminates unnecessary wording differences between U.S. GAAP and International Financial Reporting Standards, expands the disclosure requirements of the *Fair Value Measurements and Disclosure* topic of the ASC for fair value measurements and makes other amendments, including:

limiting the highest-and-best-use valuation premise concepts only to measuring the fair value of nonfinancial assets;

permitting an exception to fair value measurement principles for financial assets and financial liabilities (and derivatives) with offsetting positions in market risks or counterparty credit risk when several criteria are met. When the criteria are met, an entity can measure the fair value of the net risk position;

clarifying that premiums or discounts that reflect size as a characteristic of the reporting entity's holding rather than as a characteristic of the asset or liability (for example, a control premium when measuring the fair value of a controlling interest) are not permitted in a fair value measurement; and

prescribing a model for measuring the fair value of an instrument classified in shareholders' equity; this model is consistent with the guidance on measuring the fair value of liabilities.

ASU 2011-04 expands the *Fair Value Measurements* topic's disclosure requirements, particularly for fair value measurements categorized in Level 3 of the fair value hierarchy: (1) a quantitative disclosure of the unobservable inputs and assumptions used in the measurement, (2) a description of the valuation processes in place (e.g., how the entity decides its valuation policies and procedures, as well as changes in its analyses of fair value measurements, from period to period), and (3) a narrative description of the sensitivity of the fair value to changes in unobservable inputs and interrelationships between those inputs.

ASU 2011-04 is applicable to the Company for interim and annual periods beginning after December 15, 2011. The adoption of ASU 2011-04 is not expected to have a material effect on our financial statements.

In December, 2011, the FASB issued ASU 2011-11, Balance Sheet (Topic 210) *Disclosures About Offsetting Assets and Liabilities*. The amendments in this ASU affect all entities that have financial instruments and derivative instruments that are either (1) offset in accordance with the *Offsetting Presentation* section of the *Balance Sheet* topic or the *Presentation* section of the *Derivatives and Hedging* topic of the Codification or (2) subject an enforceable master netting arrangement or similar agreement.

The amendments in this ASU require an entity to disclose information about offsetting and related arrangement to enable users of financial statements to understand the effect of netting to an entity's financial position. The disclosure requirements in this update are effective for periods beginning on or after January 1, 2013, and must be shown for all periods shown on the balance sheet. The amendments in ASU 2011-11 are not expected to have a material effect on our financial condition or results of operations.

Item 9A. Controls and Procedures

Disclosure Controls and Procedures

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in our reports filed under the Securities Exchange Act of 1934 (the "Exchange Act") is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosures. However, no matter how well a control system is designed and operated, it can provide only reasonable, not absolute, assurance that it will detect or uncover failures within the Company to disclose material information otherwise required to be set forth in our periodic reports.

Our management has conducted an evaluation, with the participation of our Chief Executive Officer and Chief Financial Officer, of the effectiveness of our disclosure controls and procedures as of the end of the period covered by this Report as required by paragraph (b) of Rules 13a-15 and 15d-15 under the Exchange Act. Based on our evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures were effective, as of the end of the period covered by this Report, to provide reasonable assurance that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the applicable rules and forms, and that it is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

Internal Control over Financial Reporting

Management's Annual Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Exchange Act Rule 13a-15(f). Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate. Management assessed the effectiveness of its internal control over financial reporting based on the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in Internal Control Integrated Framework. Based on those criteria, management concluded that our internal control over financial reporting was effective as of December 31, 2011.

The effectiveness of our internal control over financial reporting as of December 31, 2011 has been audited by Deloitte & Touche LLP, an independent registered public accounting firm, as stated in their report which appears herein.

Table of Contents

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Trustees and Shareholders of
PennyMac Mortgage Investment Trust:

We have audited the internal control over financial reporting of PennyMac Mortgage Investment Trust and subsidiaries ("the Company") as of December 31, 2011, based on criteria established in *Internal Control Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed by, or under the supervision of, the company's principal executive and principal financial officers, or persons performing similar functions, and effected by the company's board of trustees, management, and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of the inherent limitations of internal control over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may not be prevented or detected on a timely basis. Also, projections of any evaluation of the effectiveness of the internal control over financial reporting to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2011, based on the criteria established in *Internal Control Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated financial statements as of and for the year ended December 31, 2011 of the Company and our report dated March 9, 2012 expressed an unqualified opinion on those financial statements.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Trustees and Shareholders of
PennyMac Mortgage Investment Trust:

We have audited the accompanying consolidated balance sheets of PennyMac Mortgage Investment Trust and subsidiaries (the "Company") as of December 31, 2011 and 2010, and the related consolidated statements of operations, stockholders' equity, and cash flows for the years ended December 31, 2011 and 2010 and for the period from August 4, 2009 (commencement of operations) to December 31, 2009. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of PennyMac Mortgage Investment Trust and subsidiaries at December 31, 2011 and 2010, and the results of their operations and their cash flows for each of the years ended December 31, 2011 and 2010 and for the period from August 4, 2009 (commencement of operations) to December 31, 2009, in conformity with accounting principles generally accepted in the United States of America.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company's internal control over financial reporting as of December 31, 2011, based on the criteria established in *Internal Control Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated March 9, 2012 expressed an unqualified opinion on the Company's internal control over financial reporting.

PENNYMAC MORTGAGE INVESTMENT TRUST AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 1 Organization and Basis of Presentation

PennyMac Mortgage Investment Trust ("PMT" or the "Company") was organized in Maryland on May 18, 2009, and commenced operations on August 4, 2009, when it completed its initial offerings of common shares of beneficial interest ("common shares"). The Company is a specialty finance company, which, through its subsidiaries (all of which are wholly-owned), invests primarily in residential mortgage loans and mortgage-related assets.

The Company's primary investment objective is to maximize the value of the mortgage loans that it acquires, a substantial portion of which may be distressed and acquired at discounts to their unpaid principal balances, either through loan modification programs, special servicing and other initiatives focused on keeping borrowers in their homes, or, when necessary, through timely acquisition and liquidation of the property securing the loan.

The Company operates two segments: investment activities and correspondent lending. The investment activities segment focuses on mortgage assets that are acquired and held for investment purposes and the correspondent lending segment focuses on the purchase for resale of newly originated mortgage loans.

The Company believes that it qualifies, and has elected to be taxed, as a real estate investment trust ("REIT") under the Internal Revenue Code of 1986, as amended (the "Internal Revenue Code"), beginning with its taxable period ended on December 31, 2009. To maintain its tax status as a REIT, the Company plans to distribute at least 90% of its taxable income in the form of qualifying distributions to shareholders.

The Company is externally managed by an affiliate, PNMAC Capital Management, LLC ("PCM" or the "Manager"), an investment adviser registered with the Securities and Exchange Commission (the "SEC") that specializes in and focuses on residential mortgage loans. Under the terms of a management agreement, PCM is paid a management fee with a base component and a performance incentive component. Determination of the amount of management fees is discussed in Note 4 *Transactions with Related Parties*.

The Company conducts substantially all of its operations and makes substantially all of its investments through its subsidiary, PennyMac Operating Partnership, L.P. (the "Operating Partnership"), and the Operating Partnership's subsidiaries. A subsidiary of the Company is the sole general partner, and the Company is the sole limited partner, of the Operating Partnership.

The accompanying consolidated financial statements have been prepared in compliance with accounting principles generally accepted in the United States ("U.S. GAAP") as codified in the Financial Accounting Standards Board's ("FASB") *Accounting Standards Codification* (the "Codification"). All significant intercompany accounts and transactions have been eliminated. Preparation of financial statements in compliance with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements, and revenues and expenses during the reporting period. Actual results will likely differ from those estimates.

Note 2 Concentration of Risks

As discussed in Note 1 *Organization and Basis of Presentation* above, PMT's operations and investing activities are centered in real estate-related assets, a substantial portion of which are distressed at acquisition. Because of the Company's investment strategy, many of the mortgage loans in

Table of Contents

PENNYMAC MORTGAGE INVESTMENT TRUST AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Note 2 Concentration of Risks (Continued)

its targeted asset class are purchased at discounts reflecting their distressed state or perceived higher risk of default, as well as a greater likelihood of collateral documentation deficiencies. Prior to the acquisition of loans or other assets, PCM validates key information provided by the sellers that is necessary to determine the value of the acquired asset. A substantial portion of the non-correspondent lending loans purchased by the Company has been acquired from or through one or more subsidiaries of Citigroup, Inc.

Through its management agreement with PCM and its loan servicing agreements with its loan servicers, primarily an affiliated company, PennyMac Loan Services, LLC ("PLS"), PMT works with borrowers to perform loss mitigation activities. Such activities include the use of loan modification programs (such as the U.S. Department of the Treasury and Housing and Urban Development's Home Affordable Modification Program ("HAMP")) and workout options that PCM believes have the highest probability of successful resolution for both borrowers and PMT. Loan modification or resolution may include PMT accepting a reduction of the principal balances of certain mortgage loans in its investment portfolio. When loan modifications and other efforts are unable to cure distressed loans, the Company's objective is to effect timely acquisition and liquidation of the property securing the mortgage loan.

Because of the Company's investment focus, PMT is exposed, to a greater extent than traditional mortgage investors, to the risks that borrowers may be in economic distress and/or may have become unemployed, bankrupt or otherwise unable or unwilling to make payments when due, and to the effects of fluctuations in the residential real estate market on the performance of its investments. Factors influencing these risks include, but are not limited to:

changes in the overall economy, unemployment and residential real estate values in the markets where the properties securing the Company's mortgage loans are located;

PCM's ability to identify, and the Company's loan servicers' ability to execute, optimal resolutions of problem mortgage loans;

the accuracy of valuation information obtained during the Company's due diligence activities;

PCM's ability to effectively model, and to develop appropriate model assumptions that properly anticipate, future outcomes;

the level of government support for problem loan resolution and the effect of current and future proposed and enacted legislative and regulatory changes on the Company's ability to effect cures or resolutions to distressed loans; and

regulatory, judicial and legislative support of the foreclosure process, and the resulting impact on the Company's ability to acquire and liquidate the real estate securing its portfolio of distressed mortgage loans in a timely manner or at all.

Due to these uncertainties, there can be no assurance that risk management activities identified and executed on PMT's behalf will prevent significant losses arising from the Company's investments in real estate-related assets.

On December 20, 2011 and July 12, 2011, the Company entered into forward purchase agreements with Citigroup Global Markets Realty Corp. ("CGM"), a subsidiary of Citigroup Inc., to purchase certain nonperforming residential mortgage loans and residential real property acquired in settlement of loans (collectively, the "CGM Assets"). The CGM Assets were or are expected to be acquired by

Table of Contents

PENNYMAC MORTGAGE INVESTMENT TRUST AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Note 2 Concentration of Risks (Continued)

CGM from unaffiliated money center banks. The initial purchase price under the forward commitment on December 20, 2011 was \$22.1 million. Remaining subsequent adjustments may increase the purchase price to \$22.6 million based on the date the purchase is settled. The initial purchase price under the forward commitment on July 12, 2011 was \$172.7 million. The remaining purchase price as of December 31, 2011, is \$123.7 million. Remaining subsequent adjustments may increase the purchase price to \$124.6 million based on the date the purchase is settled.

The Company also pays CGM a cost of carry on the CGM Assets pending purchase through the date such CGM Assets are ultimately acquired. The Company recognized the assets subject to the transactions and the related liability. The CGM Assets are serviced by PLS.

The CGM Assets are included on the Company's consolidated balance sheet as *Mortgage loans under forward purchase agreements at fair value* and the related liabilities are included as *Borrowings under forward purchase agreements*. The CGM Assets are being held by CGM within a separate trust entity deemed a variable interest entity. The Company's interest in the CGM Assets is deemed to be contractually segregated from all other interests in the trust as a silo. The silo consists of the CGM Assets and its related liability. The Company directs all of the activities that drive the economic results of the CGM Assets. All of the changes in the fair value and cash flows of the CGM Assets are attributable solely to the Company, and such cash flows can only be used to settle the related liability.

As a result of consolidating the silo, the Company's consolidated statement of income for the year ended December 31, 2011 include net gain on mortgage loans of \$14.4 million, interest income on mortgage loans of \$1.1 million, interest expense of \$3.1 million and loan servicing fees expense of \$1.2 million. The Company received repayments of mortgage loans totaling \$33.2 million and repaid borrowings under the forward purchase agreements totaling \$47.2 million during the year ended December 31, 2011. The Company has no other variable interests in the trust entity, or other exposure to the creditors of the trust entity which could expose the Company to loss.

Including the CGM Assets, the Company purchased \$647.6 million and \$2.5 million at fair value of mortgage loans and real estate acquired in settlement of loans ("REO") for its investment portfolio during the year ended December 31, 2011. Of those totals, \$575.5 million and \$2.2 million, respectively, were purchased from or through one or more subsidiaries of Citigroup Inc.

During 2010, the Company purchased \$417.2 million and \$1.2 million at fair value of mortgage loans and REO for its investment portfolio. Of that total, \$407.0 million at fair value of mortgage loans was purchased from or through one or more subsidiaries of Citigroup, Inc.

Note 3 Significant Accounting Policies

PMT's significant accounting policies are summarized below.

Valuation of Financial Instruments

PMT groups its assets and liabilities at fair value in three levels, based on the markets in which the assets and liabilities are traded and the reliability of the assumptions used to determine fair value. These levels are:

Level 1 Quoted prices in active markets for identical assets or liabilities.

Table of Contents

PENNYMAC MORTGAGE INVESTMENT TRUST AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Note 3 Significant Accounting Policies (Continued)

Level 2 Prices determined using other significant observable inputs. Observable inputs are inputs that other market participants would use in pricing an asset or liability and are developed based on market data obtained from sources independent of the Company. These may include quoted prices for similar assets and liabilities, interest rates, prepayment speeds, credit risk and others.

Level 3 Prices determined using significant unobservable inputs. In situations where quoted prices or observable inputs are unavailable (for example, when there is little or no market activity for an investment at the end of the period), unobservable inputs may be used. Unobservable inputs reflect the Company's own assumptions about the factors that market participants use in pricing an asset or liability, and are based on the best information available in the circumstances.

While management believes its valuation methods are appropriate and consistent with those used by other market participants, the use of different methods or assumptions to estimate the fair value of certain financial statement items could result in a different estimate of fair value at the reporting date. Those estimated values may differ significantly from the values that would have been used had a readily available market for such items existed, or had such items been liquidated, and those differences could be material to the financial statements.

Management incorporates lack of liquidity into its fair value estimates based on the type of asset or liability measured and the valuation method used. For example, for mortgage loans where the significant inputs have become unobservable due to illiquidity in the markets for distressed loans or non-Agency, non-conforming mortgage loans, PMT uses a discounted cash flow technique to estimate fair value. This technique incorporates forecasting of expected cash flows discounted at an appropriate market discount rate that is intended to reflect the lack of liquidity in the market.

Short-Term Investments

Short-term investments are carried at fair value with changes in fair value recognized in current period income. Short-term investments represent money market deposit accounts. The Company's short-term investments are classified as a "Level 1" fair value financial statement item.

United States Treasury Security

The purchases or sale of the United States Treasury Security is recorded as of the trade date. The Company's United States Treasury Security is carried at fair value with changes in fair value recognized in current period income. The fair value of the Company's investment in the United States Treasury Security is based on its quoted market price and is therefore classified as a "Level 1" fair value financial statement item.

Mortgage-Backed Securities

Purchases and sales of MBS are recorded as of the trade date. The Company's investments in MBS are carried at fair value with changes in fair value recognized in current period income. Changes in fair value arising from amortization of purchase premiums and accrual of unearned discounts are recognized as a component of *Interest income*. Changes in fair value arising from other factors are recognized as a component of *Net gain (loss) on investments*.

Table of Contents

PENNYMAC MORTGAGE INVESTMENT TRUST AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Note 3 Significant Accounting Policies (Continued)

The Company's investments in MBS are non-Agency MBS. Agency MBS refers to securities issued by the Federal Home Loan Mortgage Corporation, the Federal National Mortgage Association, and the Government National Mortgage Association. The Company categorizes its investments in non-Agency MBS as "Level 3" fair value financial statement items due to their illiquidity and the present lack of an active market for such securities.

Interest Income Recognition

Interest income on MBS is recognized over the life of the security using the interest method. Management estimates, at the time of purchase, the future expected cash flows and determines the effective interest rate based on the estimated cash flows and the MBS purchase price. Management updates its cash flow estimates monthly.

Estimating cash flows is subject to a number of assumptions that are subject to uncertainties, including the rate and timing of principal payments (including prepayments, repurchases, defaults and liquidations), the pass-through or coupon interest rate, interest rate fluctuations, interest payment shortfalls due to delinquencies on the underlying mortgage loans, the likelihood of modification and the timing of the magnitude of credit losses on the mortgage loans underlying the securities. Management applies its judgment in developing its estimates. However, these uncertainties are difficult to predict and are subject to future events whose outcomes will affect the Company's estimates and interest income.

Mortgage Loans

Mortgage loans are carried at their estimated fair values. Changes in the estimated fair value of mortgage loans are recognized in current period income. All changes in fair value, including changes arising from the passage of time, are recognized as a component of *Net gain (loss) on investments*.

Interest Income Recognition

Interest income on loans is recognized over the life of the loan using their contractual interest rates. Income recognition is suspended for loans when they become 90 days delinquent, or when, in management's opinion, a full recovery of income and principal becomes doubtful. Income recognition is resumed when the loan becomes contractually current.

Derivative Financial Instruments

In its loan origination activities, the Company makes contractual commitments to loan applicants to originate mortgages at specified interest rates ("interest rate lock commitments"). These commitments are accounted for as derivative financial instruments. The Company manages the risk created by interest rate lock commitments relating to mortgage loans acquired for sale by entering into forward sale agreements to sell the mortgage loans and by the purchase and sale of MBS options and futures. Such agreements are also accounted for as derivative instruments. The Company classifies its derivative financial instruments as "Level 2" fair value financial statement items.

The Company accounts for its derivative financial instruments as free-standing derivatives. The Company does not designate its forward sale agreements or options and futures for hedge accounting. All derivative financial instruments are recognized on the balance sheet at fair value with changes in

Table of Contents

PENNYMAC MORTGAGE INVESTMENT TRUST AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Note 3 Significant Accounting Policies (Continued)

the fair values being reported in current period income. The fair value of the Company's derivative financial instruments is included in *Other assets* and changes in fair value are included in *Net gain on mortgage loans acquired for sale* in the Company's consolidated statements of operations.

Mortgage Servicing Rights ("MSRs")

MSRs arise from contractual agreements between the Company and investors (or their agents) in mortgage securities and mortgage loans. Under these contracts, the Company is obligated to provide loan servicing functions in exchange for fees and other remuneration. The servicing functions typically performed include, among other responsibilities, collecting and remitting loan payments; responding to borrower inquiries; accounting for principal and interest, holding custodial (impound) funds for payment of property taxes and insurance premiums; counseling delinquent mortgagors; and supervising the acquisition of real estate in settlement of loans and property dispositions. The Company has engaged PLS to provide these services on its behalf.

The value of MSRs is derived from the net positive cash flows associated with the servicing contracts. The Company receives a servicing fee ranging generally from 0.25% to 0.38% annually on the remaining outstanding principal balances of the loans. The servicing fees are collected from the monthly payments made by the mortgagors. The Company generally receives other remuneration including rights to various mortgagor-contracted fees such as late charges, collateral reconveyance charges and loan prepayment penalties and the Company is generally entitled to retain the interest earned on funds held pending remittance of mortgagor principal, interest, tax and insurance payments. The Company also generally has the right to solicit the mortgagors for other products and services, such as second mortgages and insurance, as well as for new mortgages for those considering refinancing or purchasing a new home.

The Company recognizes MSRs initially at their estimated fair values, either as proceeds from sales of mortgage loans where the Company assumes the obligation to service the loan in the sale transaction, or from the purchase of MSRs. The precise fair value of MSRs cannot be readily determined because MSRs are not actively traded in stand-alone markets. Considerable judgment is required to estimate the fair values of these assets and the exercise of such judgment can significantly affect the Company's earnings. Therefore, the Company classifies its MSRs as "Level 3" fair value financial statement items.

The Company's subsequent accounting for MSRs is based on the class of MSRs. The Company has identified two classes of MSRs: MSRs backed by mortgage loans with initial interest rates of less than or equal to 4.5% and MSRs backed by mortgage loans with initial interest rates of more than 4.5%. The Company distinguishes between these classes of MSRs due to their differing sensitivities to change in value as the result of changes in market interest rates. MSRs backed by mortgage loans with initial interest rates of less than or equal to 4.5% are accounted for using the amortization method. MSRs backed by loans with initial interest rates of more than 4.5% are accounted for at fair value with changes in fair value recorded in current period income.

Table of Contents

PENNYMAC MORTGAGE INVESTMENT TRUST AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Note 3 Significant Accounting Policies (Continued)

MSRs Accounted for Using the MSR Amortization Method

The Company amortizes MSRs that are accounted for using the MSR amortization method. MSR amortization is determined by applying the ratio of the net MSR cash flows projected for the current period to the estimated total remaining net MSR cash flows. The estimated total net MSR cash flows are determined at the beginning of each month using prepayment assumptions applicable at that time.

The Company periodically assesses MSRs accounted for using the amortization method for impairment. Impairment occurs when the current fair value of the MSR falls below the asset's carrying value (carrying value is the amortized cost reduced by any related valuation allowance). If MSRs are impaired, the impairment is recognized in current-period earnings and the carrying value of the MSRs is adjusted through a valuation allowance. If the value of impaired MSRs subsequently increases, the Company recognizes the increase in value in current-period earnings and adjusts the carrying value of the MSRs through a reduction in the valuation allowance to adjust the carrying value to a level not in excess of amortized cost.

The Company stratifies its MSRs by predominate risk characteristic when evaluating for impairment. For purposes of performing its MSR impairment evaluation, the Company stratifies its servicing portfolio on the basis of certain risk characteristics including loan type (fixed-rate or adjustable-rate) and note rate. Fixed-rate loans are stratified into note rate pools of 50 basis points for note rates between 3.0% and 4.5% and a single pool for note rates below 3%. Adjustable rate mortgage loans with initial interest rates of 4.5% or less are evaluated in a single pool. If the fair value of MSRs in any of the note rate pools is below the carrying value of the MSRs for that pool, impairment is recognized to the extent of the difference between the estimated fair value and the existing valuation allowance for that pool.

Management periodically reviews the various impairment strata to determine whether the value of the impaired MSRs in a given stratum is likely to recover. When management deems recovery of the value to be unlikely in the foreseeable future, a write-down of the cost of the MSRs for that stratum to its estimated recoverable value is charged to the valuation allowance.

Amortization and impairment of MSRs are included in current period results of operations as a component of *Net servicing income*.

MSRs Accounted for at Fair Value

Changes in fair value of MSRs accounted for at fair value are recognized in current period results of operations as a component of *Net servicing income*.

Real Estate Acquired in Settlement of Loans

Real estate acquired in settlement of loans is measured at the lower of the acquisition cost of the property (as measured by the fair value of the loan before the property is acquired in settlement of the loan) or its purchase price or its fair value reduced by estimated costs to sell. Real estate acquired in settlement of loans is categorized as a "Level 3" fair value financial statement item. Changes in fair value and gains or losses on sale of real estate acquired in settlement of loans are recognized in the consolidated statement of operations under the caption *Results of real estate acquired in settlement of loans*.

Table of Contents

PENNYMAC MORTGAGE INVESTMENT TRUST AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Note 3 Significant Accounting Policies (Continued)

Loans and Securities Sold Under Agreements to Repurchase

Loans and securities sold under agreements to repurchase are measured based on whether management has designated the agreements to be accounted for under the fair value option or at historical cost. Under both options, the carrying value of loans and securities sold under agreements to repurchase is based on the accrued cost of the agreements, which approximates fair value, due to the agreements' short maturities. Loans and securities sold under agreements to repurchase are categorized as "Level 3" fair value financial statement items.

When loans and securities sold under agreements to repurchase are carried at their estimated fair values, the costs of creating the facilities underlying the agreements are expensed as incurred. When loans and securities sold under agreements to repurchase are carried at historical cost, the costs of creating the facilities underlying the agreements are recognized as deferred charges in *Other assets* and amortized to *Interest expense* over the term of the borrowing facility.

Investment Consolidation

The consolidated financial statements include the accounts of PMT and all wholly-owned subsidiaries. PMT has whole ownership of all of its subsidiaries, and therefore has no significant equity method or cost-basis investments. All significant intercompany accounts and transactions have been eliminated upon consolidation.

The Company evaluates every investment with reference to the underlying entity that issued the loans or securities it acquires to determine whether to include the investment in its consolidated reporting group. A similar analysis is performed for each entity with which the Company makes an agreement for management, servicing or similar services. Where voting rights do not effectively identify the investor with a controlling financial interest, the entity is classified as a variable interest entity ("VIE"). With certain exceptions, VIEs are subject to consolidation if the investors either do not have sufficient equity at risk for the entity to finance its activities without additional subordinated financial support, are unable to direct the entity's activities or are not exposed to the entity's losses or entitled to its residual returns. VIEs are consolidated by the entity that absorbs a majority of the entity's expected losses, its expected returns, or both. The Company did not have variable interests in its affiliated service providers or its investments as of December 31, 2011 and 2010.

Underwriting Commissions and Offering Costs

Underwriting commissions and offering costs incurred in connection with the Company's share offerings are reflected as a reduction of additional paid-in capital. Contingent offering costs that are deemed by management as probable of being paid are recorded as a reduction of additional paid-in capital.

Loan Servicing Fees

Loan servicing fees and other remuneration are received by the Company for servicing residential mortgage loans. Loan servicing fees are recorded net of Agency guarantee fees paid by the Company. Loan servicing fees are recognized as earned over the life of the loans in the servicing portfolio.

Table of Contents

PENNYMAC MORTGAGE INVESTMENT TRUST AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Note 3 Significant Accounting Policies (Continued)

Share-Based Compensation

The Company estimates the value of restricted share units awarded with reference to the value of its common shares on the date of the award. The Company amortizes the fair value of previously granted share-based awards to compensation expense over the vesting period using the graded vesting method. Expense relating to awards is included in *Compensation* in the consolidated statements of operations.

The Company estimates the value of restricted share units awarded with reference to the value of its common shares on the date of the award. How the value of Company common shares is used in determining restricted share unit awards' values depends on whether the restricted share units participate in Company dividends in the form of dividend equivalents.

Restricted share unit awards that participate in dividends in the form of dividend equivalents are valued at the Company's closing share price on the date of the award.

Restricted share unit awards that do not participate in dividends are valued by reducing the closing price of the Company's common shares on the date of the award by the value of expected shareholder distributions that the grantees will not receive during the vesting period, discounted at an appropriate risk-free rate of return. The amount of the reduction for anticipated distributions is based on amounts included in management's earnings forecast.

The Company determines the fair value of its share-based compensation awards depending on whether the awards are made to its trustees and officers or to non-employees such as officers and employees of affiliated entities:

Compensation cost is generally fixed at the estimated fair value of the award date for awards to officers and trustees of the Company.

Compensation cost for share-based compensation awarded to non-officers or trustees of the Company is adjusted to reflect changes in the estimated fair value of awards in each subsequent reporting period until the award has vested, the service being provided is subsequently completed, or, under certain circumstances, is likely to be completed, whichever occurs first.

Management's estimates of compensation costs reflect the expected portion of share-based compensation awards that management expects to vest.

Income Taxes

The Company has elected to be taxed as a REIT and management believes the Company complies with the provisions of the Internal Revenue Code applicable to REITs. Accordingly, management believes the Company will not be subject to federal income tax on that portion of its REIT taxable income that is distributed to shareholders as long as certain asset, income and share ownership tests are met. If PMT fails to qualify as a REIT, and does not qualify for certain statutory relief provisions, it will be subject to income taxes and may be precluded from qualifying as a REIT for the four tax years following the year of loss of the Company's REIT qualification.

The Company's taxable REIT subsidiaries ("TRSs") are subject to federal and state income taxes. Income taxes are provided for using the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial

Table of Contents

PENNYMAC MORTGAGE INVESTMENT TRUST AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Note 3 Significant Accounting Policies (Continued)

statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted rates expected to apply to taxable income in the years in which management expects those temporary differences to be recovered or settled. The effect on deferred taxes of a change in tax rates is recognized in income in the period in which the change occurs. Subject to management's judgment, a valuation allowance is established if realization of deferred tax assets is not more likely than not. Management recognizes tax benefits relating to tax positions it takes only if it is more likely than not that the position will be sustained upon examination by the appropriate taxing authority. A tax position that meets this standard is recognized as the largest amount that exceeds 50 percent likelihood of being realized upon settlement. The Company will classify any penalties and interest as a component of income tax expense.

As of December 31, 2011 and 2010, the Company was not subject to examination by any federal or state taxing authority.

Note 4 Transactions with Related Parties

The Company is managed externally by PCM under the terms of a management agreement that expires on August 4, 2012 and will be automatically renewed for a one-year term each anniversary date thereafter unless previously terminated. The management agreement provides for an annual review of PCM's performance under the management agreement by the Company's independent trustees. PMT's board of trustees reviews the Company's financial results, policy compliance and strategic direction.

PMT pays PCM a base management fee and may pay a performance incentive fee, both payable quarterly and in arrears. The base management fee is calculated at the annual rate of 1.5% of shareholders' equity (as defined in the management agreement). The performance incentive fee is calculated at 20% per year of the amount by which "core earnings," on a rolling four-quarter basis and before the incentive fee, exceeds an 8% "hurdle rate."

"Core earnings," for purposes of determining the amount of the performance incentive fee, is defined as U.S. GAAP net income (loss) adjusted to exclude non-cash equity compensation expense, unrealized gains and losses or other non-cash items recognized during the period, any conditional payment amounts relating to PMT's initial public offering ("IPO") paid to PCM and the underwriters of PMT's share offering, and any "one-time events" pursuant to changes in U.S. GAAP and certain other non-cash charges after discussions as agreed between PCM and our independent trustees and approval by a majority of PMT's independent trustees.

The "hurdle rate" is calculated as the product of (1) the weighted average of the issue price per share of all of the Company's public offerings multiplied by the weighted average number of common shares outstanding (including, for the avoidance of doubt, restricted share units) in the four-quarter period and (2) 8%.

For purposes of calculating the incentive fee, to the extent PMT has a net loss in core earnings from a period prior to the rolling four-quarter period that has not been offset by core earnings in a subsequent period, such loss will continue to be included in the rolling four-quarter calculation until it has been fully offset. This term is not applicable for purposes of determining whether the conditional payment of the underwriting discount, as discussed in Note 26 *Shareholders' Equity*, is payable.

Table of Contents**PENNYMAC MORTGAGE INVESTMENT TRUST AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 4 Transactions with Related Parties (Continued)**

Following is a summary of management fee expense and the related liability recorded by the Company for the periods presented:

	Year ended December 31,		Period from August 4, 2009 (commencement of operations) to December 31, 2009
	2011	2010	
	(in thousands)		
Base management fee	\$ 6,740	\$ 4,878	\$ 1,981
Performance incentive fee			
Total management fee incurred during the period	\$ 6,740	\$ 4,878	\$ 1,981
Fee paid during the period	(6,873)	(4,819)	(812)
Fee outstanding at beginning of period	1,228	1,169	
Fee outstanding at period end	\$ 1,095	\$ 1,228	\$ 1,169

If the Company terminates the management agreement without cause, or PCM terminates the management agreement upon a default in the Company's performance of any material term in the management agreement, PMT will pay a termination fee to PCM. The termination fee will be equal to three times (a) the average annual base management fee and (b) the average annual (or, if the period is less than 24 months, annualized) incentive fee earned by PCM during the prior 24-month period before termination. Under circumstances where the termination fee is payable, PMT will pay to PCM its portion of the conditional payment of the underwriting discount discussed in Note 26 *Shareholders' Equity*.

The Company, through its Operating Partnership, also has a loan servicing agreement with PLS. Servicing fee rates are based on the risk characteristics of the mortgage loans serviced and total servicing compensation is established at levels that management believes are competitive with those charged by other servicers or specialty servicers, as applicable.

Servicing fee rates for nonperforming loans are expected to range between 30 and 100 basis points per year on the unpaid principal balance of the mortgage loans serviced on the Company's behalf. PLS is also entitled to certain customary market-based fees and charges, including boarding and deboarding fees, liquidation and disposition fees, assumption, modification and origination fees and late charges, as well as interest on funds on deposit in custodial accounts. In the event PLS either effects a refinancing of a loan on the Company's behalf and not through a third party lender and the resulting loan is readily saleable, or originates a loan to facilitate the disposition of real estate that the Company has acquired in settlement of a loan, PLS is entitled to receive from the Company market-based fees and compensation.

PLS, on behalf of the Company, currently participates in HAMP (and other similar mortgage loan modification programs), which establishes standard loan modification guidelines for "at risk" homeowners and provides incentive payments to certain participants, including loan servicers, for achieving modifications and successfully remaining in the program. The loan servicing agreement entitles PLS to retain any incentive payments made to it and to which it is entitled under HAMP; provided, however, that with respect to any such incentive payments paid to PLS under HAMP in

Table of Contents**PENNYMAC MORTGAGE INVESTMENT TRUST AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 4 Transactions with Related Parties (Continued)**

connection with a mortgage loan modification for which the Company previously paid PLS a modification fee, PLS shall reimburse the Company an amount equal to the lesser of such modification fee or such incentive payments.

In connection with the Company's correspondent lending business, by which the Company acquires mortgage loans originated by correspondent lenders for resale to the Agencies (as defined in Note 7 *Fair Value*) and other investors, PLS is entitled to base servicing fees, which range from 5 to 20 basis points per year of the unpaid principal balance of such loans, and other customary market-based fees and charges as described above. PLS also provides certain mortgage banking services, including fulfillment and disposition-related services, to the Company for a fulfillment fee based on a percentage of the unpaid principal balance of the mortgage loans to be sold to non-affiliates where the Company is approved or licensed to sell to such non-affiliate. The fulfillment fee for such services is currently 50 basis points. Since November 1, 2010, the Company has collected interest income and a sourcing fee of three basis points for each mortgage loan it purchases from a correspondent and sells to PLS for ultimate disposition to a third party where the Company is not approved or licensed to sell to such third party. The sourcing fees collected by the Company during 2011 amounted to \$166,000. During the years ended December 31, 2011 and 2010, the Company recorded fulfillment fees totaling \$1.7 million and \$103,000, respectively.

The Company paid servicing fees to PLS as described above and as provided in its loan servicing agreement and recorded other expenses, including common overhead expenses incurred on its behalf by PCM and its affiliates, in accordance with the terms of its management agreement.

Following is a summary of those expenses for the periods presented:

	Year ended December 31,		Period from August 4, 2009 (commencement of operations) to December 31, 2009
	2011	2010	
	(in thousands)		
Loan servicing and fulfillment fees payable to PLS	\$ 13,054	\$ 2,833	\$
Reimbursement of expenses incurred on PMT's behalf:			
Compensation	714	402	60
Other	1,505	493	
	15,273	3,728	60
Reimbursement of common overhead incurred by PCM and its affiliates	4,086	1,418	
	\$ 19,359	\$ 5,146	\$ 60
Payments made during the period	\$ 12,656	\$ 3,852	\$

During the Company's startup period and through the quarter ended March 31, 2010, PCM and its affiliates did not charge the Company for its proportionate share of common overhead expenses. Such expenses totaled approximately \$500,000 and \$771,000 for the year ended December 31, 2010 and the period from August 4, 2009 (commencement of operations) to December 31, 2009, respectively. No

Table of Contents**PENNYMAC MORTGAGE INVESTMENT TRUST AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 4 Transactions with Related Parties (Continued)**

other charges were waived by PCM during the Company's startup period and through the quarter ended March 31, 2010. Management believes that PCM does not intend to waive recovery of common overhead costs in the future.

Amounts due to affiliates are summarized below as of the dates presented:

	December 31,	
	2011	2010
	(in thousands)	
Contingent offering costs	\$ 2,941	\$ 2,941
Management fee	1,096	1,228
Expenses	8,129	1,426
	\$ 12,166	\$ 5,595

Amounts due from affiliates at December 31, 2011 totaled \$347,000 and represent amounts receivable pursuant to loan sales to PLS and reimbursable expenses paid on the affiliates' behalf by the Company. Amounts due from affiliates at December 31, 2010 totaled \$2.1 million and represent reimbursements of common expenses paid on their behalf by the Company.

PCM's parent company, Private National Mortgage Acceptance Company, LLC, held 75,000 of the Company's common shares at both December 31, 2011 and 2010.

Note 5 Earnings (Loss) Per Share

Basic earnings per share is determined using net income divided by the weighted-average common shares outstanding during the period. Diluted earnings per share is computed by dividing net income attributable to common shareholders by the weighted-average common shares outstanding, assuming all potentially dilutive common shares were issued. In periods in which the Company records a loss, potentially dilutive common shares are excluded from the diluted loss per share calculation, as their effect on loss per share is anti-dilutive.

During the year ended December 31, 2011, the Company made grants of restricted share units which entitle the recipients to receive dividend equivalents during the vesting period on a basis equivalent to the dividends paid to holders of common shares. For purposes of calculating earnings per share, unvested share-based compensation awards containing non forfeitable rights to dividends or dividend equivalents (collectively, "dividends") are classified as "participating securities" and are included in the basic earnings per share calculation using the two-class method. Under the two-class method, all earnings (distributed and undistributed) are allocated to each class of common shares and participating securities, based on their respective rights to receive dividends.

Table of Contents**PENNYMAC MORTGAGE INVESTMENT TRUST AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 5 Earnings (Loss) Per Share (Continued)**

The following table summarizes the basic and diluted earnings (loss) per share calculations for the periods presented:

	Year ended December 31,		Period from August 4, 2009 (commencement of operations) to December 31, 2009
	2011	2010	
(in thousands except per share amounts)			
Basic earnings per share:			
Net income (loss)	\$ 64,439	\$ 24,483	\$ (1,883)
Effect of participating securities share-based compensation instruments	(699)		
Net income (loss) attributable to common shareholders	\$ 63,740	\$ 24,483	\$ (1,883)
Weighted-average common shares outstanding	26,396	16,775	16,735
Basic earnings per share	\$ 2.41	\$ 1.46	\$ (0.11)
Diluted earnings per share:			
Net income (loss)	\$ 64,439	\$ 24,483	\$ (1,883)
Weighted-average common shares outstanding	26,396	16,775	16,735
Dilutive potential common shares common shares issuable under share based compensation plan	283	273	
Diluted weighted-average number of common shares outstanding	26,679	17,048	16,735
Diluted earnings (loss) per share	\$ 2.41	\$ 1.44	\$ (0.11)

During the period from August 4, 2009 (commencement of operations) to December 31, 2009, 375,000 restricted share units were outstanding but not included in the computation of diluted loss per share because they were anti-dilutive.

Table of Contents**PENNYMAC MORTGAGE INVESTMENT TRUST AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 6 Loan Sales**

The Company purchases and sells mortgage loans into the secondary mortgage market without recourse for credit losses. However the Company maintains continuing involvement with the loans in the form of servicing arrangements and the potential liability under representations and warranties it makes to purchasers and insurers of the loans.

The following table summarizes cash flows between the Company and transferees upon sale of loans in transactions whereby the Company maintains continuing involvement with the mortgage loan:

	Year ended December 31,		Period from August 4, 2009 (commencement of operations) to December 31, 2009
	2011	2010	
	(in thousands)		
Cash Flows:			
Proceeds from sales	\$ 518,567	\$	\$
Service fees received	213		
Period-end information:			
Unpaid principal balance of loans outstanding at period-end	495,031		
Loans delinquent 30 - 89 days			
Loans delinquent 90 or more days or in foreclosure or bankruptcy			

Note 7 Fair Value

The Company's financial statements include assets and liabilities that are measured based on their estimated fair values. The application of fair value estimates may be on a recurring or nonrecurring basis depending on the accounting principles applicable to the specific asset or liability and whether management has elected to carry the item at its estimated fair value as discussed in the following paragraphs.

Fair Value Accounting Elections

Management identified all of its financial assets, including short-term investments, United States Treasury security, MBS and mortgage loans, as well as its securities sold under agreements to repurchase and its MSR's relating to loans with initial interest rates of more than 4.5% that were acquired as a result of its correspondent lending operations to be accounted for at estimated fair value so such changes in fair value will be reflected in income as they occur and more timely reflect the results of the Company's investment performance.

For MSR's relating to mortgage loans with initial interest rates of less than or equal to 4.5% that were acquired as a result of the Company's correspondent lending operations, management has concluded that such assets present different risks to the Company than MSR's relating to mortgage loans with initial interest rates of more than 4.5% and therefore require a different risk management approach. Management's risk management efforts relating to these assets are aimed at moderating the effects of non-interest rate risks on fair value, such as the effect of changes in home prices on the assets' values. Management has identified these assets for accounting at the lower of amortized cost or fair value. Management's risk management efforts in connection with MSR's relating to mortgage loans

Table of Contents**PENNYMAC MORTGAGE INVESTMENT TRUST AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 7 Fair Value (Continued)**

with initial interest rates of more than 4.5% are aimed at moderating the effects of changes in interest rates on the assets' values.

For loans sold under agreements to repurchase subject to agreements made beginning in December 2010, REO financed through agreements to repurchase beginning in June 2011 and borrowings under forward purchase agreements beginning in July 2011, management has determined that historical cost accounting is more appropriate because under this method debt issuance costs are amortized over the term of the debt, thereby matching the debt issuance expense to the periods benefiting from the usage of the debt.

Financial Statement Items Measured at Fair Value on a Recurring Basis

Following is a summary of financial statement items that are measured at estimated fair value on a recurring basis as of the dates presented:

	December 31, 2011			Total

Financial Statement Items Measured at Fair Value on a Nonrecurring Basis***Real Estate Acquired in Settlement of Loans***

The Company measures its investment in REO at the respective properties' estimated fair values less cost to sell on a nonrecurring basis. The value of the REO is initially established as the lesser of (a) either the fair value of the loan at the date of transfer, (b) the fair value of the real estate less estimated costs to sell as of the date of transfer or (c) the purchase price of the property. REO may be subsequently revalued due to the Company receiving greater access to the property, the property being held for an extended period or management receiving indications that the property's value may not be supported by developing market conditions. Any subsequent change in fair value to a level that is less than or equal to the value at which the property was initially recorded is recognized in *Results of real estate acquired in settlement of loans* in the consolidated statements of operations.

Table of Contents**PENNYMAC MORTGAGE INVESTMENT TRUST AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 7 Fair Value (Continued)**

REO (including REO under forward purchase agreements) is summarized below:

	Year ended December 31,		Period from August 4, 2009 (commencement of operations) to December 31, 2009
	2011	2010	
	(in thousands)		
Carrying value at period end	\$ 103,549	\$ 29,685	\$
Transfers from mortgage loans and advances during the period	\$ 134,771	\$ 45,951	\$
Remeasurements of REO at fair value during the period:			
Net remeasurement losses recognized in <i>Results of real estate acquired in settlement of loans</i>	\$ (3,423)	\$ (806)	\$
Fair value of remeasured assets after remeasurement	\$ 52,192	\$ 9,610	\$

Mortgage Servicing Rights at Lower of Amortized Cost or Fair Value

The Company evaluates its MSR at lower of amortized cost or fair value with reference to the assets' fair value. For purposes of performing its MSR impairment evaluation, the Company stratifies its MSR at lower of amortized cost or fair value based on the mortgage loans' underlying interest rates. Mortgage loans are grouped into note rate pools of 50 basis points for note rates between 3% and 4.5% and a single pool for note rates below 3%. Adjustable rate mortgage loans with initial interest rates of 4.5% or less are evaluated in a single pool. If the fair value of MSRs in any of the note rate pools is below the amortized cost of the MSRs for that pool reduced by any existing valuation allowance, those MSRs are impaired.

When MSRs are impaired, the impairment is recognized in current-period earnings and the carrying value of the MSRs is adjusted using a valuation allowance. If the value of the MSRs subsequently increases, the restoration of value is recognized in current period earnings only to the extent of the valuation allowance.

Management periodically reviews the various impairment strata to determine whether the value of the impaired MSRs in a given stratum is likely to recover. When management deems recovery of the value to be unlikely in the foreseeable future, a write-down of the cost of the MSRs for that stratum to its estimated recoverable value is charged to the valuation allowance.

Fair Value of Financial Instruments Carried at Amortized Cost

In November and December 2010 and in June, July, September and December 2011, the Company entered into new debt facilities to finance its investment in nonperforming loans and REO in the form of repurchase agreements and borrowings under forward purchase agreements. As discussed in *Fair Value Accounting Elections* above, management designated these agreements to be accounted for at amortized cost.

Table of Contents

PENNYMAC MORTGAGE INVESTMENT TRUST AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Note 7 Fair Value (Continued)

Management has concluded that the estimated fair values of *Mortgage loans acquired for sale at fair value sold under agreements to repurchase, Mortgage loans at fair value sold under agreements to repurchase, Real estate acquired in settlement of loans financed under agreements to repurchase, Note payable secured by mortgage loans at fair value and Borrowings under forward purchase agreements* approximate the agreements' carrying values due to the agreements' short terms and variable interest rates.

Valuation Techniques and Assumptions

The following describes the methods used to estimate the fair values of Level 2 and Level 3 financial statement items:

Mortgage-Backed Securities

Non-Agency MBS are categorized as "Level 3" financial statement items. Fair value of non-Agency MBS is estimated using broker indications of value. For indications of value received, PCM's Capital Markets and Valuation staff review the price indications provided by non-affiliate brokers for completeness, accuracy and consistency across all similar bonds managed by PCM. Bond-level analytics such as yield, weighted average life and projected prepayment and default speeds of the underlying collateral are computed. The reasonableness of the brokers' indications of value and of changes in value from period to period is evaluated in light of the analytical review performed and considering market conditions. The review of the Capital Markets and Valuation staff is reported to PCM's Valuation Committee as part of their review and approval of monthly valuation results. PCM has not adjusted, and does not intend to adjust, its fair value estimates to amounts different than the brokers' indications of value.

Table of Contents**PENNYMAC MORTGAGE INVESTMENT TRUST AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 7 Fair Value (Continued)**

Following is a quantitative summary of key inputs used by PCM's valuation staff to evaluate the reasonableness of the fair value of MBS:

Security Class	Key Inputs(1)	Range (Weighted Average)	
		December 31, 2011	December 31, 2010
Non-Agency subprime	Discount rate	3.1% - 23.0% (8.0)%	2.9% - 17.3% (4.5)%
	Prepayment speed(2)	0.1% - 8.4% (4.4)%	0.1% - 5.3% (1.5)%
	Default speed(3)	3.6% - 19.8% (12.3)%	3.6% - 19.2% (10.5)%
	Collateral remaining loss percentage(4)	23.9% - 63.7% (47.0)%	12.1% - 56.6% (36.9)%
Non-Agency Alt-A	Discount rate	4.4% - 10.0% (6.2)%	5.0% - 11.4% (7.1)%
	Prepayment speed(2)	0.5% - 8.9% (5.4)%	0.9% - 10.1% (6.7)%
	Default speed(3)	3.0% - 11.5% (9.7)%	4.2% - 21.2% (12.3)%
	Collateral remaining loss percentage(4)	11.4% - 36.4% (26.0)%	10.5% - 41.1% (22.8)%
Non-Agency prime jumbo	Discount rate	6.5% - 6.5% (6.5)%	2.7% - 2.7% (2.7)%
	Prepayment speed(2)	14.3% - 14.3% (14.3)%	14.7% - 14.7% (14.7)%
	Default speed(3)	1.5% - 1.5% (1.5)%	1.5% - 1.5% (1.5)%
	Collateral remaining loss percentage(4)	0.4% - 0.4% (0.4)%	0.6% - 0.6% (0.6)%

- (1) Key inputs are those used to evaluate broker indications of value.
- (2) Prepayment speed is measured using 1 year Voluntary Conditional Prepayment Rate ("CPR").
- (3) Default speed is measured using 1 year Constant Default Rate ("CDR").
- (4) The projected future losses on the loans in the collateral groups paying to each bond as a percentage of the current balance of the loans.

Mortgage Loans

Fair value of mortgage loans is estimated based on whether the mortgage loans are saleable into active markets with established counterparties and transparent pricing:

Edgar Filing: PennyMac Mortgage Investment Trust - Form 10-K

Mortgage loans that are saleable into active markets, comprised of the Company's mortgage loans acquired for sale at fair value, are categorized as "Level 2" financial statement items and

F-30

Table of Contents**PENNYMAC MORTGAGE INVESTMENT TRUST AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 7 Fair Value (Continued)**

their fair values are estimated using their quoted market or contracted price or market price equivalent.

Loans that are not saleable into active markets are categorized as "Level 3" financial statement items, and their fair values are estimated using a discounted cash flow valuation model. Inputs to the model include current interest rates, loan amount, payment status and property type, and forecasts of future interest rates, home prices, prepayment speeds, default and loss severities. The valuation process includes the computation by stratum of loan population and a review for reasonableness of various measures such as weighted average life, projected prepayment and default speeds, and projected default and loss percentages. The valuation staff computes the effect on the valuation of changes in input variables such as interest rates, home prices, and delinquency status to assess the reasonableness of changes in the loan valuation. The results of the estimates of fair value of "Level 3" mortgage loans are reported to PCM's Valuation Committee as part of their review and approval of monthly valuation results.

Changes in fair value attributable to changes in instrument-specific credit risk are measured by the change in the respective loan's delinquency status at period-end from the later of the beginning of the period or acquisition date.

Following is a quantitative summary of key inputs used in the valuation of mortgage loans at fair value:

Key Inputs	Range (Weighted Average)	
	December 31, 2011	December 31, 2010
Discount rate	9.1% - 20.8% (14.8)%	9.1% - 18.7% (13.8)%
Twelve-month projected housing price index change	-0.9% - 2.3% (-0.3)%	-3.4% - 6.4% (-2.6)%
Prepayment speed(1)	0.2% - 6.2% (2.1)%	0.2% - 7.5% (2.8)%
Total prepayment speed(2)	1.0% - 33.8% (26.5)%	0.4% - 38.6% (31.9)%

(1) Prepayment speed is measured using Life Voluntary Conditional Prepayment Rate.

(2) Total prepayment speed is measured using Life Total Conditional Prepayment Rate.

Derivative Financial Instruments

The Company estimates the fair value of an interest rate lock commitment based on quoted Agency MBS prices, its estimate of the fair value of the mortgage servicing rights it expects to receive in the sale of the loans and the probability that the mortgage loan will fund within the terms of the interest rate lock commitment. The Company estimates the fair value of commitments to sell loans based on quoted MBS prices. The Company estimates the fair value of the MBS options and futures it purchases and sells based on observed interest rate volatilities in the MBS market.

Table of Contents**PENNYMAC MORTGAGE INVESTMENT TRUST AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 7 Fair Value (Continued)***Real Estate Acquired in Settlement of Loans*

REO is measured based on its fair value on a nonrecurring basis and is categorized as a "Level 3" financial statement item. Fair value of REO is determined by using a current estimate of value from a broker's price opinion, a full appraisal or the price given in a current contract of sale.

REO values are reviewed by PCM's staff appraisers when the Company obtains multiple indications of value and there is a significant discrepancy between the values received. PCM's staff appraisers will attempt to resolve the discrepancy between the indications of value. In circumstances where the appraisers are not able to generate adequate data to support a value conclusion, the staff appraisers will order an additional appraisal to resolve the property's value.

Mortgage Servicing Rights

MSRs are categorized as "Level 3" financial statement items. The Company uses a discounted cash flow approach to estimate the fair value of MSRs. The key assumptions used in the estimation of the fair value of MSRs include prepayment and default rates of the underlying loans, the applicable discount rate, and cost to service loans. The key assumptions used in the Company's discounted cash flow model are based on market factors which management believes are consistent with assumptions and data used by market participants valuing similar MSRs. The results of the estimates of fair value of MSRs are reported to PCM's Valuation Committee as part of their review and approval of monthly valuation results.

Key economic assumptions used in determining the fair value of MSRs at the time of initial recognition are as follows:

	Year ended December 31,				Period from August 4, 2009 (commencement of operations) to December 31, 2009	
	2011		2010		Amortized cost	Fair value
	Amortized cost	Range (Weighted Average) Fair value	Amortized cost	Fair value		
Pricing spread	7.5% - 18.0% (7.7)%	7.5% - 15.3% (9.5)%				
Life (in years)	3.0 - 8.1 (6.9)	2.0 - 8.2 (6.0)				
Annual total prepayment speed(1)	5.8% - 24.4% (7.7)%	6.8% - 27.8% (13.7)%				
Annual per-loan cost of servicing	\$53 - \$140 \$(69)	\$53 - \$140 \$(85)				

(1) Prepayment speed is measured using CPR.

Table of Contents**PENNYMAC MORTGAGE INVESTMENT TRUST AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 7 Fair Value (Continued)**

Following is a quantitative summary of key inputs used in the valuation of MSR's, and the effect on the estimated fair value from adverse changes in those assumptions (weighted averages are based upon unpaid principal balance or fair value where applicable):

Key Inputs	December 31, 2011		December 31, 2010	
	Amortized cost	Range (Weighted Average)		Amortized cost
		Fair value	Fair value	
	(effect on value amounts in thousands)			
Pricing spread	7.5% - 16.5%	7.5% - 16.5%		
	(7.5)%	(8.6)%		
Effect on value of 5% adverse change	\$(89)	\$(10)		
Effect on value of 10% adverse change	\$(176)	\$(20)		
Effect on value of 20% adverse change	\$(341)	\$(39)		
Average life (in years)	3.0 - 6.9	1.7 - 6.9		
	(6.7)	(5.3)		
Prepayment speed(1)	6.9% - 30.8%	8.4% - 59.0%		
	(8.2)%	(16.3)%		
Effect on value of 5% adverse change	\$(90)	\$(16)		
Effect on value of 10% adverse change	\$(178)	\$(31)		
Effect on value of 20% adverse change	\$(343)	\$(60)		
Annual per-loan cost of servicing	\$68 - \$140	\$68 - \$140		
	\$69	\$89		
Effect on value of 5% adverse change	\$(30)	\$(4)		
Effect on value of 10% adverse change	\$(61)	\$(9)		
Effect on value of 20% adverse change	\$(122)	\$(17)		

(1)

Prepayment speed is measured using CPR.

The preceding sensitivity analyses are limited in that they were performed at a particular point in time; only contemplate the movements in the indicated variables; do not incorporate changes in the variables in relation to other variables; are subject to the accuracy of various models and assumptions used; and do not incorporate other factors that would affect the Company's overall financial performance in such scenarios, including operational adjustments made by management to account for changing circumstances. For these reasons, the preceding estimates should not be viewed as an earnings forecast.

Securities Sold Under Agreements to Repurchase

Fair value of securities sold under agreements to repurchase is based on the accrued cost of the agreements, which approximates the agreements' fair values, due to the agreements' short maturities.

Note 8 Short-Term Investments

The Company's short-term investments are comprised of money market accounts deposited with U.S. commercial banks.

All of the Company's MBS had remaining contractual maturities of more than ten years at December 31, 2011 and 2010. At December 31, 2011 and 2010, the Company had pledged all of its MBS to secure agreements to repurchase.

Table of Contents**PENNYMAC MORTGAGE INVESTMENT TRUST AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 11 Mortgage Loans Acquired for Sale at Fair Value**

Mortgage loans acquired for sale at fair value is comprised of recently originated mortgage loans purchased by the Company for resale. Following is a summary of the distribution of the Company's mortgage loans acquired for sale at fair value as of the dates presented:

Loan Type	December 31, 2011		December 31, 2010	
	Fair value	Unpaid principal balance	Fair value	Unpaid principal balance
	(in thousands)			
Government insured or guaranteed	\$ 46,266	\$ 44,229	\$ 3,212	\$ 3,115
Fixed-rate:				
Agency-eligible	173,457	166,174	754	750
Jumbo loans	12,293	11,996		
	\$ 232,016	\$ 222,399	\$ 3,966	\$ 3,865

Mortgage loans acquired for sale at fair value totaling \$231.7 million and \$2.7 million were pledged to secure sales of loans under agreements to repurchase at December 31, 2011 and 2010, respectively.

Note 12 Derivative Financial Instruments

Following is a summary of the distribution of the Company's derivative financial instruments, which are included in *Other assets*, as of the dates presented:

Derivative Financial Instrument	December 31,	
	2011	2010
	(in thousands)	
Commitments to purchase loans	\$ 5,772	
Hedging derivatives	(3,834)	
	\$ 1,938	\$

The Company is exposed to price risk relative to its mortgage loans acquired for sale as well as to the commitments it makes to acquire loans from correspondent lenders. The Company bears price risk from the time a commitment to purchase a loan is made to a correspondent lender to the time the purchased mortgage loan is sold. During this period, the Company is exposed to losses if mortgage interest rates rise, because the value of the purchase commitment or mortgage loan acquired for sale declines.

The Company engages in interest rate risk management activities in an effort to reduce the variability of earnings caused by changes in interest rates. To manage this price risk resulting from interest rate risk, the Company uses derivative financial instruments acquired with the intention of moderating the risk that changes in market interest rates will result in unfavorable changes in the value of the Company's interest rate lock commitments and inventory of mortgage loans acquired for sale. The Company does not use derivative financial instruments for purposes other than in support of its risk management activities.

Table of Contents**PENNYMAC MORTGAGE INVESTMENT TRUST AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 12 Derivative Financial Instruments (Continued)**

The Company records all derivative financial instruments at fair value. The Company had the following derivative financial instruments recorded within the *Other assets* on the balance sheet as of December 31, 2011:

Instrument	December 31, 2011	
	Notional amount	Fair value
	(in thousands)	
Interest rate lock commitments	\$ 563,487	\$ 5,772
Hedging derivatives:		
MBS Put Options	28,000	26
MBS Call Options	5,000	57
	33,000	83
Forward sales contracts	358,291	(3,917)
	\$ 954,778	\$ 1,938

As of December 31, 2011, the Company had \$1.5 million on deposit with its derivatives counterparties. Margin deposits are included in *Other assets* on the balance sheet as of December 31, 2011.

The Company did not have any hedging derivative contracts on or before December 31, 2010.

The following table summarizes the activity for derivative contracts used to hedge the Company's interest rate lock commitments and inventory of mortgage loans acquired for sale at notional value:

	Balance, beginning of year	Additions	Dispositions/ expirations	Balance, end of year
	(in thousands)			
Year ended December 31, 2011				
MBS Put Options	\$	\$ 66,000	\$ (38,000)	\$ 28,000
MBS Call Options	\$	\$ 13,000	\$ (8,000)	\$ 5,000
Forward sales contracts	\$	\$ 1,052,466	\$ (694,175)	\$ 358,291

The Company did not have any hedging derivative contracts on or before December 31, 2010.

Note 13 Mortgage Loans at Fair Value

Mortgage loans at fair value are comprised of mortgage loans not acquired for resale. Such loans may be sold at a later date pursuant to a management determination that such a sale represents the most advantageous liquidation strategy for the identified loan.

Table of Contents**PENNYMAC MORTGAGE INVESTMENT TRUST AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 13 Mortgage Loans at Fair Value (Continued)**

Following is a summary of the distribution of the Company's mortgage loans at fair value as of the dates presented:

Loan Type	December 31, 2011		December 31, 2010	
	Fair value	Unpaid principal balance	Fair value	Unpaid principal balance
	(in thousands)			
Nonperforming loans	\$ 494,711	\$ 952,473	\$ 278,008	\$ 521,326
Performing loans:				
Fixed	97,582	162,145	49,444	73,256
ARM/Hybrid	73,166	116,693	31,916	54,430
Interest rate step-up	30,621	52,507	4,813	7,831
Balloon	186	316	69	93
	201,555	331,661	86,242	135,610
	\$ 696,266	\$ 1,284,134	\$ 364,250	\$ 656,936

At December 31, 2011, approximately 72% of the mortgage loan portfolio consisted of mortgage loans that were originated between 2005 and 2007. Approximately 72% of the estimated fair value of the mortgage loans in this portfolio is comprised of loans with unpaid-principal-balance-to-current-property-value ratios in excess of 100% at December 31, 2011.

The mortgage loan portfolio consists of mortgage loans originated throughout the United States with loans secured by California real estate comprising approximately 24% of the loan portfolio's estimated fair value at December 31, 2011. The mortgage loan portfolio contains loans from New York, Florida and New Jersey that each represents 5% or more of the portfolio's estimated fair value at December 31, 2011.

At December 31, 2010, approximately 94% of the mortgage loan portfolio consisted of mortgage loans that were originated between 2005 and 2007. Over 67% of the estimated fair value of the mortgage loans in this portfolio was comprised of loans with unpaid-principal-balance-to-current-property-value ratios in excess of 100% at December 31, 2010. The mortgage loan portfolio consisted of mortgage loans originated throughout the United States with loans secured by California real estate comprising approximately 27% of the loan portfolio's estimated fair value at December 31, 2010. The mortgage loan portfolio contained loans from New York, Florida and New Jersey that each represented 5% or more of the portfolio's estimated fair value at December 31, 2010.

At December 31, 2011, mortgage loans in this portfolio with fair values totaling \$656.4 million were pledged to secure sales of loans under agreements to repurchase and mortgage loans with fair values totaling \$1.9 million were held in a consolidated subsidiary of the Company whose stock was pledged to secure financing of the mortgage loans held in that subsidiary. At December 31, 2010, mortgage loans at fair value totaling \$326.9 million were pledged to secure sales of loans under agreements to repurchase.

Table of Contents**PENNYMAC MORTGAGE INVESTMENT TRUST AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 14 Mortgage Loans Under Forward Purchase Agreements at Fair Value**

Mortgage loans under forward purchase agreements at fair value are comprised of mortgage loans not acquired for resale. Such loans may be sold at a later date pursuant to a management determination that such a sale represents the most advantageous liquidation strategy for the identified loan.

Following is a summary of the distribution of the Company's mortgage loans under forward purchase agreements at fair value as of December 31, 2011:

Loan Type	December 31, 2011	
	Fair value	Unpaid principal balance
Nonperforming loans	\$ 121,266	\$ 232,213
Performing loans:		
Fixed	3,316	6,084
ARM/Hybrid	3,965	6,002
Interest rate step-up	763	1,393
Balloon		
	8,044	13,479
	\$ 129,310	\$ 245,692

The Company did not have mortgage loans under forward purchase agreements at December 31, 2010.

At December 31, 2011, approximately 74% of the estimated fair value of the mortgage loans under forward purchase agreements consisted of mortgage loans that were originated between 2005 and 2007. Approximately 74% of the estimated fair value of the mortgage loans in this portfolio is comprised of loans with unpaid-principal-balance-to-current-property-value ratios in excess of 100% at December 31, 2011.

Mortgage loans under forward purchase agreements consists of mortgage loans originated throughout the United States with loans secured by California real estate comprising approximately 33% of the loan portfolio's estimated fair value at December 31, 2011. The mortgage loan portfolio contains loans from Florida, New York and New Jersey that each represents 5% or more of the portfolio's estimated fair value at December 31, 2011.

At December 31, 2011, the entire balance of mortgage loans under forward purchase agreements was subject to borrowings under forward purchase agreements.

Table of Contents**PENNYMAC MORTGAGE INVESTMENT TRUST AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 15 Real Estate Acquired in Settlement of Loans**

Following is a summary of the activity in REO for the periods presented:

	Year ended December 31,		Period from August 4, 2009 (commencement of operations) to December 31, 2009

Application of valuation allowance to write down MSR's with other-than temporary impairment			
Balance before valuation allowance at end of period	\$ 5,282		
Valuation Allowance for Impairment of Mortgage Servicing Rights			
Balance at beginning of period	\$	\$	\$
Additions (reductions)			
Application of valuation allowance to write down MSR's with other-than temporary impairment			
Balance at end of period			
Mortgage Servicing Rights, net	\$ 5,282		
Estimated Fair Value of MSR's at Period End	\$ 5,341	\$	\$

The following table summarizes the Company's estimate of amortization of its existing MSR's carried at amortized cost for the five-year period ending December 31, 2016. This projection was developed using the assumptions made by management in its December 31, 2011 valuation of MSR's. The assumptions underlying the following estimate will change as market conditions and portfolio composition and behavior change, causing both actual and projected amortization levels to change over time. Therefore, the following estimates will change in a manner and amount not presently determinable by management.

Year Ended December 31,	Estimated MSR Amortization (in thousands)
2012	\$ 550
2013	547
2014	503
2015	461
2016	421
Thereafter	2,800
Total	\$ 5,282

Table of Contents**PENNYMAC MORTGAGE INVESTMENT TRUST AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 18 Securities Sold Under Agreements to Repurchase at Fair Value**

Following is a summary of financial information relating to securities sold under agreements to repurchase at fair value as of and for the periods presented:

	Year ended December 31,		Period from August 4, 2009 (commencement of operations) to December 31, 2009
	2011	2010	
	(dollar amounts in thousands)		
Period-end balance	\$ 115,493	\$ 101,202	\$
Weighted-average interest rate at end of period	0.67%	1.34%	
Weighted-average interest rate during the period	1.10%	1.39%	
Average balance of securities sold under agreements to repurchase	\$ 78,021	\$ 44,590	\$
Maximum daily amount outstanding	\$ 115,493	\$ 121,047	\$
Total interest expense	\$ 873	\$ 620	\$
Fair value of securities securing agreements to repurchase at period-end	\$ 122,813	\$ 119,872	\$

The repurchase agreements collateralized by securities have an average term of 10 days. All repurchase agreements collateralized by securities mature within 30 days of December 31, 2011 and all repurchase agreements collateralized by MBS were subsequently replaced with new repurchase agreements. All securities underlying repurchase agreements are held by the buyer. All agreements collateralized by MBS are to repurchase the same or substantially identical securities.

The amount at risk (the fair value of the securities pledged plus the related margin deposit, less the amount advanced by the counterparty and accrued interest) relating to the Company's securities sold under agreements to repurchase is summarized by counterparty below as of December 31, 2011:

Counterparty	Amount at risk (in thousands)	Weighted average repurchase agreement maturity
Wells Fargo Bank, N.A.	\$ 10,390	January 3, 2012
Credit Suisse First Boston Mortgage Capital LLC.	\$ 738	January 19, 2012

The Company is subject to margin calls during the period the agreements are outstanding and therefore may be required to repay a portion of the borrowings before the respective agreements mature if the value (as determined by the applicable lender) of the MBS or mortgage loans securing those agreements decreases. As of December 31, 2011 and 2010, the Company had \$3.8 million and \$4.8 million, respectively, on deposit with its securities repurchase agreement counterparties. Margin deposits are included in *Other assets* in the consolidated balance sheets.

Table of Contents**PENNYMAC MORTGAGE INVESTMENT TRUST AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 19 Mortgage Loans Acquired for Sale Sold Under Agreements to Repurchase**

Following is a summary of financial information relating to loans acquired for sale sold under agreements to repurchase as of and for the periods presented:

	Year ended December 31,		Period from August 4, 2009 (commencement of operations) to December 31, 2009
	2011	2010	
(dollar amounts in thousands)			
Period end:			
Balance	\$ 212,677	\$ 2,494	\$
Unused amount(1)	\$ 137,323	\$ 72,506	\$
Weighted-average interest rate at end of period	2.06%	3.66%	
Weighted-average interest rate during the period(2)	2.63%	3.66%	
Average balance of loans sold under agreements to repurchase	\$ 43,713	\$ 20	\$
Maximum daily amount outstanding	\$ 288,972	\$ 2,494	\$
Total interest expense	\$ 2,426	\$	\$
Fair value of mortgage loans acquired for sale securing agreements to repurchase at period-end	\$ 231,704	\$ 2,684	\$

(1) The amount the Company is able to borrow under loan repurchase agreements is tied to the fair value of unencumbered mortgage loans eligible to secure those agreements and the Company's ability to fund the agreements' margin requirements relating to the collateral sold.

(2) Weighted-average interest rate during the period excludes the effect of amortization of debt issuance costs of \$1.3 million during the year ended December 31, 2011.

The repurchase agreements collateralized by loans have an average remaining term of approximately 10.3 months at December 31, 2011. All of the repurchase agreements have maturities of more than 90 days.

The amount at risk (the fair value of the assets pledged plus the related margin deposit, less the amount advanced by the counterparty and accrued interest) relating to the Company's mortgage loans acquired for sale sold under agreements to repurchase is summarized by counterparty below as of December 31, 2011:

Counterparty	Amount at risk (in thousands)	Weighted average repurchase agreement maturity
Bank of America, N.A.	\$ 14,650	November 5, 2012
Credit Suisse First Boston Mortgage Capital LLC	\$ 5,626	October 30, 2012

F-43

Table of Contents**PENNYMAC MORTGAGE INVESTMENT TRUST AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 19 Mortgage Loans Acquired for Sale Sold Under Agreements to Repurchase (Continued)**

The Company is subject to margin calls during the period the agreements are outstanding and therefore may be required to repay a portion of the borrowings before the respective agreements mature if the value (as determined by the applicable lender) of the mortgage loans securing those agreements decreases. As of December 31, 2011, the Company had \$1.6 million on deposit with its loan repurchase agreement counterparties. The Company had no margin deposits with its loan repurchase agreement counterparties at December 31, 2010. Margin deposits are included in *Other assets* in the consolidated balance sheets.

Note 20 Mortgage Loans at Fair Value Sold Under Agreements to Repurchase

Following is a summary of financial information relating to loans sold under agreements to repurchase as of and for the periods presented:

	Year ended December 31,		Period from August 4, 2009 (commencement of operations) to December 31, 2009
	2011	2010	
(dollar amounts in thousands)			
Period end:			
Balance	\$ 275,649	\$ 144,928	\$
Unused amount(1)	\$ 174,351	\$ 80,072	\$
Weighted-average interest rate at end of period	3.96%	3.32%	
Weighted-average interest rate during the period(2)	3.76%	3.35%	
Average balance of loans sold under agreements to repurchase	\$ 233,594	\$ 6,148	\$
Maximum daily amount outstanding	\$ 285,532	\$ 144,928	\$
Total interest expense	\$ 9,642	\$ 206	\$
Fair value of mortgage loans at fair value and REO securing agreements to repurchase at period-end	\$ 613,051	\$ 326,947	\$

(1) The amount the Company is able to borrow under loan repurchase agreements is tied to the fair value of unencumbered mortgage loans eligible to secure those agreements and the Company's ability to fund the agreements' margin requirements relating to the collateral sold.

(2) Weighted-average interest rate during the period excludes the effect of amortization of debt issuance costs of \$741,000 during the year ended December 31, 2011.

Table of Contents**PENNYMAC MORTGAGE INVESTMENT TRUST AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 20 Mortgage Loans at Fair Value Sold Under Agreements to Repurchase (Continued)**

The repurchase agreements collateralized by loans have an average remaining term of approximately 4.4 months at December 31, 2011.

Following is a summary of maturities of repurchase agreements by maturity date:

Remaining Maturity at December 31, 2011	Balance
	(in thousands)
30 to 90 days	\$ 203,936
Over 90 days	71,713
	\$ 275,649

The amount at risk (the fair value of the assets pledged plus the related margin deposit, less the amount advanced by the counterparty and accrued interest) relating to the Company's mortgage loans at fair value sold under agreements to repurchase is summarized by counterparty below as of December 31, 2011:

Counterparty	Amount at risk	Weighted average
	(in thousands)	repurchase agreement
		maturity
Citibank, N.A.	\$ 259,114	March 7, 2012
Wells Fargo Bank, N.A.	\$ 56,878	December 28, 2012
Credit Suisse First Boston Mortgage Capital LLC	\$ 21,738	June 6, 2012

The Company is subject to margin calls during the period the agreements are outstanding and therefore may be required to repay a portion of the borrowings before the respective agreements mature if the value (as determined by the applicable lender) of the loans securing those agreements decreases. The Company had \$471,000 on deposit with its loan repurchase agreement counterparties at December 31, 2011. The Company had no margin deposits with its loan repurchase agreement counterparties at December 31, 2010. Margin deposits are included in *Other assets* in the consolidated balance sheets.

Table of Contents**PENNYMAC MORTGAGE INVESTMENT TRUST AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 21 Real Estate Acquired in Settlement of Loans Financed Under Agreements to Repurchase**

Following is a summary of financial information relating to REO financed under agreements to repurchase as of and for the periods presented:

	Year ended December 31,		Period from August 4, 2009 (commencement of operations) to December 31, 2009
	2011	2010	
(dollar amounts in thousands)			
Period end:			
Balance	\$ 27,494	\$	\$
Unused amount(1)	\$ 72,506	\$	\$
Weighted-average interest rate at end of period	4.26%		
Weighted-average interest rate during the period(2)	4.26%		
Average balance of REO sold under agreements to repurchase	\$ 8,341	\$	\$
Maximum daily amount outstanding	\$ 28,260	\$	\$
Total interest expense	\$ 636	\$	\$
Fair value of REO held in a consolidated subsidiary whose stock is pledged to secure agreements to repurchase at period-end	\$ 54,212	\$	\$

(1) The amount the Company is able to borrow under repurchase agreements is tied to the fair value of unencumbered REO eligible for contribution to the subsidiary servicing those agreements and the Company's ability to fund the agreements' margin requirements relating to the collateral sold.

(2) Weighted-average interest rate during the period excludes the effect of amortization of debt issuance costs of \$276,000 during the year ended December 31, 2011.

The repurchase agreement collateralized by REO has a remaining term of approximately 5.4 months at December 31, 2011.

The amount at risk (the fair value of the assets pledged plus the related margin deposit, less the amount advanced by the counterparty and accrued interest) relating to the Company's REO held in a consolidated subsidiary whose stock is pledged to secure agreements to repurchase is summarized by counterparty below as of December 31, 2011:

Counterparty	Amount at risk (in thousands)	Weighted average repurchase agreement maturity
Credit Suisse First Boston Mortgage Capital LLC	\$ 28,565	June 6, 2012

The Company is subject to margin calls during the period the agreements are outstanding and therefore may be required to repay a portion of the borrowings before the respective agreements mature if the value (as determined by the applicable lender) of the REOs decreases.

Table of Contents**PENNYMAC MORTGAGE INVESTMENT TRUST AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 22 Note Payable Secured by Mortgage Loans at Fair Value**

Following is a summary of financial information relating to note payable secured by mortgage loans at fair value as of and for the periods presented:

	Year ended December 31,		Period from August 4, 2009 (commencement of operations) to December 31, 2009
	2011	2010	
(dollar amounts in thousands)			
Period end:			
Balance	\$ 28,617	\$	\$
Unused amount(1)	\$ 11,383	\$	\$
Weighted-average interest rate at end of period	3.30%		
Weighted-average interest rate during the period(2)	2.53%		
Average balance of note payable	\$ 8,265	\$	\$
Maximum daily amount outstanding	\$ 33,386	\$	\$
Total interest expense	\$ 254	\$	\$
Fair value of mortgage loans at fair value and REO securing the note payable at period-end	\$ 49,617	\$	\$

(1) The amount the Company is able to borrow under this lending facility is tied to the fair value of unencumbered mortgage loans eligible to secure the facility.

(2) Weighted-average interest rate during the period excludes the effect of amortization of debt issuance costs of \$42,000 during the year ended December 31, 2011.

The note payable is collateralized primarily by mortgage loans at fair value and matures on September 26, 2012.

The amount at risk (the fair value of the assets pledged plus the related margin deposit, less the amount advanced by the counterparty and accrued interest) relating to the Company's mortgage loans at fair value securing this facility is summarized by counterparty below as of December 31, 2011:

Counterparty	Amount at risk (in thousands)
Wells Fargo Bank, N.A.	\$ 21,211

The Company is subject to margin calls during the period the facility is outstanding and therefore may be required to repay a portion of the borrowings before the note payable matures if the value of the mortgage loans securing the facility decreases. The Company had \$237,000 on deposit with its counterparty at December 31, 2011.

Table of Contents**PENNYMAC MORTGAGE INVESTMENT TRUST AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 23 Borrowings under Forward Purchase Agreements**

Following is a summary of financial information relating to borrowings under forward purchase agreements as of and for the periods presented:

	Year ended December 31,		Period from August 4, 2009 (commencement of operations) to December 31, 2009
	2011	2010	
(dollar amounts in thousands)			
Period end:			
Balance	\$ 152,427	\$	\$
Weighted-average interest rate at end of period	3.97%		
Weighted-average interest rate during the period	4.11%		
Average balance of borrowings under forward purchase agreements	\$ 74,864	\$	\$
Maximum daily amount outstanding	\$ 173,398	\$	\$
Total interest expense	\$ 3,116	\$	\$
Fair value of underlying loans and REO at period-end	\$ 151,448	\$	\$

The forward purchase agreements have an average term of approximately 5.7 months at December 31, 2011. Both of the forward purchase agreements have maturities of more than 90 days.

At December 31, 2011, there was no amount at risk (the fair value of the mortgage loans pledged plus the related margin deposit, less the amount advanced by the counterparty and accrued interest) relating to the Company's borrowings under forward purchase agreements.

Note 24 Liability for Representations and Warranties

The Company has liability under the representations and warranties made to purchasers of the loans it sells. In the event of a breach of its representations and warranties, the Company may be required to either repurchase the mortgage loans with the identified defects or indemnify the investor or insurer. In such cases, the Company bears any subsequent credit loss on the mortgage loans. The Company's representations and warranties are generally not subject to stated limits.

Following is a summary of the Company's liability for representations and warranties included in accounts payable and accrued liabilities for the periods presented:

	Year ended December 31,		Period from August 4, 2009 (commencement of operations) to December 31, 2009
	2011	2010	
(in thousands)			
Balance, beginning of period	\$	\$	\$
Provisions for losses	205		
Incurred losses			
Balance, end of period	\$ 205	\$	\$

Table of Contents**PENNYMAC MORTGAGE INVESTMENT TRUST AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 25 Commitments and Contingencies**

From time to time, the Company may be involved in various proceedings, claims and legal actions arising in the ordinary course of business. As of December 31, 2011, the Company was not involved in any such proceedings, claims or legal actions that would have a material adverse effect on the Company.

Mortgage Loan Commitments

The following table summarizes the Company's outstanding contractual loan commitments as of the date presented:

	December 31, 2011	
	(in thousands)	
Commitments to purchase mortgage loans:		
Correspondent lending	\$	563,487
Other mortgage loans	\$	304,084

Note 26 Shareholders' Equity

On February 16, 2011, the Company issued and sold 9,500,000 common shares in an underwritten public offering at a price of \$18 per share, for net proceeds of approximately \$163.8 million after the underwriting discount and estimated offering expenses and the reimbursement of certain expenses. On March 3, 2011, the Company issued and sold an additional 1,425,000 common shares at a price of \$18 per share pursuant to the exercise of an over-allotment option by the public offering's underwriters and received \$24.6 million of proceeds after the underwriting discount and reimbursement of certain expenses.

On November 19, 2010, the Company entered into a Controlled Equity Offering Sales Agreement (the "2010 Sales Agreement") with Cantor Fitzgerald & Co. to sell common shares having an initial aggregate offering price of up to \$100 million from time to time through Cantor Fitzgerald & Co., acting as sales agent or principal. During the year ended December 31, 2011, the Company sold a total of 558,500 of its common shares under the 2010 Sales Agreement at a weighted average price of \$16.86 per share, providing net proceeds to the Company of approximately \$9.2 million, net of sales commissions. The sales agent received a total of approximately \$188,000, which represents an average commission of approximately 2.0% of the gross sales price.

Table of Contents**PENNYMAC MORTGAGE INVESTMENT TRUST AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 27 Net Gain on Mortgage Loans Acquired For Sale**

Net gain on mortgage loans acquired for sale is summarized below for the periods presented:

	Year ended December 31,		Period from August 4, 2009 (commencement of operations) to December 31, 2009
	2011	2010	
	(in thousands)		
Cash gain (loss):			
Sales proceeds	\$ (1,571)	\$ 78	\$
Hedging activities	(4,794)	20	
	(6,365)	98	
Non cash gain:			
Change in fair value of commitments to purchase loans	5,772		
Receipt of MSR in loan sale transactions	6,073		
Provision for losses relating to representations and warranties provided in loan sales	(205)	(12)	
Change in fair value relating to loans and hedging derivatives held at year-end:			
Mortgage loans	6,192	(24)	
Hedging derivatives	(3,834)	(44)	
	2,358	(68)	
	\$ 7,633	\$ 18	\$

Note 28 Share-Based Compensation Plans

The Company has adopted an equity incentive plan which provides for the issuance of equity based awards, including share options, restricted shares, restricted share units, unrestricted common share awards, LTIP units (a special class of partnership interests in the Operating Partnership) and other awards based on PMT's shares that may be made by the Company directly to its officers and trustees, and the members, officers, trustees, directors and employees of PCM, PLS, or their affiliates and to PCM, PLS and other entities that provide services to PMT and the employees of such other entities. The equity incentive plan is administered by the Company's compensation committee, pursuant to authority delegated by the board of trustees, which has the authority to make awards to the eligible participants referenced above, and to determine what form the awards will take, and the terms and conditions of the awards.

Table of Contents

PENNYMAC MORTGAGE INVESTMENT TRUST AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Note 28 Share-Based Compensation Plans (Continued)

The Company's equity incentive plan allows for grants of equity-based awards up to an aggregate of 8% of PMT's issued and outstanding shares on a diluted basis at the time of the award.

The shares underlying award grants will again be available for award under the equity incentive plan if:

any shares subject to an award granted under the equity incentive plan are forfeited, cancelled, exchanged or surrendered;

an award terminates or expires without a distribution of shares to the participant; or

shares are surrendered or withheld by PMT as payment of either the exercise price of an award and/or withholding taxes for an award.

Restricted share units have been awarded to trustees and officers of the Company and to employees of PCM and PLS at no cost to the grantees. Such awards generally vest over a one- to four-year period. Each share option awarded under the equity incentive plan will have a term of no longer than ten years, and will have an exercise price that is no less than 100% of the fair value of the Company's shares on the date of grant of the award.

The Company's estimate of value included assumed grantee forfeiture rates of 16% per year for employees of PCM and its affiliates and no turnover for PMT's officers and its board of trustees.

Table of Contents**PENNYMAC MORTGAGE INVESTMENT TRUST AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 28 Share-Based Compensation Plans (Continued)**

The table below summarizes restricted share unit activity and compensation expense for the periods presented:

	Year ended December 31,		Period from
	2011	2010	August 4, 2009 (commencement of operations) to December 31, 2009
Number of units:			
Outstanding at beginning of period	272,984	374,810	
Granted	340,500	23,600	375,330
Vested	(88,711)	(97,026)	
Canceled	(32,964)	(28,400)	(520)
Outstanding at end of period	491,809	272,984	374,810
Weighted Average Grant Date Fair Value:			
Outstanding at beginning of period	\$ 6.18	\$ 8.36	\$
Granted	\$ 16.52	\$ 7.74	\$ 8.36
Vested	\$ 9.82	\$ 14.73	\$
Expired or canceled	\$ 7.88	\$ 7.10	\$ 7.20
Outstanding at end of period	\$ 12.57	\$ 6.18	\$ 8.36
Units available for future awards(1)	1,820,000	1,095,000	994,000
Compensation expense recorded during the period	\$ 3,616,000	\$ 1,812,000	\$ 963,000

(1)

Based on common shares outstanding as of period end. Total units available for future awards may be adjusted in accordance with the equity incentive plan based on future issuances of PMT's shares as described above.

As of December 31, 2011, 443,905 of share units with a weighted average grant date fair value of \$12.57 per share unit are expected to vest over their average remaining vesting period of 2.2 years. For all unvested share units at both December 31, 2011 and 2010, the average remaining vesting period was 2.1 years. As of December 31, 2011, the total unrecognized compensation cost for all unvested share units was \$3.4 million. The grant date fair values of share unit awards are based on the market value of the Company's stock at the date of grant.

Note 29 Income Taxes

The Company has elected to be taxed as a REIT for U.S. federal income tax purposes under Sections 856 through 860 of the Internal Revenue Code. Therefore, PMT generally will not be subject to corporate federal or state income tax to the extent that qualifying distributions are made to shareholders and the Company meets REIT requirements including certain asset, income, distribution and share ownership tests. The Company believes that it has met the distribution requirements, as it has declared dividends sufficient to distribute substantially all of its taxable income. Taxable income will generally differ from net income. The primary difference between net income and the REIT taxable income (before deduction for qualifying distributions) is the income of the TRSs and the method of

Table of Contents

PENNYMAC MORTGAGE INVESTMENT TRUST AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Note 29 Income Taxes (Continued)

determining the income or loss related to valuation of the mortgage loans owned by the qualified REIT subsidiary ("QRS"). Other differences between REIT book income and REIT taxable income are not material.

In general, cash dividends declared by the Company will be considered ordinary income to the shareholders for income tax purposes. Some portion of the dividends may be characterized as capital gain distributions or a return of capital. Most of the 2011 distributions and all of the 2010 distributions will be characterized as ordinary income. Approximately 5% of the 2011 distributions will be characterized as long term capital gain. There were no distributions for 2009 as there was a tax loss in 2009.

The Company has elected to treat two of its subsidiaries as TRSs. Income from a TRS is only included as a component of REIT taxable income to the extent that the TRS makes dividend distributions of income to the REIT. No such dividend distributions were made in 2011, 2010 or 2009. A TRS is subject to corporate federal and state income tax. Accordingly, a provision for income taxes for the TRSs is included in the consolidated statements of income.

At December 31, 2009, the Company's TRSs had tax net operating loss carryforwards of approximately \$106,000, expiring in 2029. For the year 2009, the Company ascribed a full valuation allowance to its net deferred tax assets due to the uncertainty in forecasting future TRS taxable income. As the income for 2010 was projected to be sufficient to utilize the federal loss carryover and projected future years' income was projected to be sufficient to utilize the state loss carryover (current utilization of loss carryovers has been suspended by the state of California), the valuation allowance was reversed in the first quarter of 2010.

The Company files U.S. federal and state income tax returns for both the REIT and TRSs. These returns for 2009 and forward are subject to examination by the respective tax authorities. No returns are currently under examination.

Table of Contents**PENNYMAC MORTGAGE INVESTMENT TRUST AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 29 Income Taxes (Continued)**

The following table details the Company's income tax expense (benefit) which relates primarily to the TRSs, for the periods presented:

	Year ended December 31,		Period from August 4, 2009 (commencement of operations) to December 31, 2009
	2011	2010	
	(in thousands)		
Current expense (benefit):			
Federal	\$ 6,250	\$ 1,998	\$ (33)
State	2,139	694	(12)
Total current	8,389	2,692	(45)
Deferred expense (benefit):			
Federal	(247)	(77)	
State	(86)	(27)	
Total deferred expense	(333)	(104)	
Valuation allowance		(45)	45
Total provision for income taxes	\$ 8,056	\$ 2,543	\$

The provision for deferred income taxes for the years ended December 31, 2011 and December 31, 2010 primarily relates to a net unrealized valuation loss on REO and to mortgage servicing rights the Company received pursuant to sales of mortgage loans with servicing rights retained as detailed below. There was no provision for deferred income taxes for the period from August 4, 2009 (commencement of operations) to December 31, 2009.

The following table is a reconciliation of the Company's provision for income taxes at statutory rates to the provision for income taxes at the Company's effective rate:

	Year ended December 31,				Period from August 4, 2009 (commencement of operations) to December 31, 2009	
	2011		2010		Amount	Rate
	Amount	Rate	Amount	Rate		
	(dollars in thousands)					
Federal income tax expense (benefit) at statutory tax rate	\$ 25,373	35.0%	\$ 9,459	35.0%	\$ (659)	35.0%
Effect of non-taxable REIT income	(18,749)	(25.8)%	(7,272)	(26.9)%	747	(39.7)%
State income taxes, net of federal benefit	1,335	1.8%	434	1.6%	(133)	7.0%
Other	97	0.1%	(33)	(0.1)%		
Valuation allowance			(45)	(0.2)%	45	(2.3)%
Provision for income taxes	\$ 8,056	11.1%	\$ 2,543	9.4%	\$	0.0%

Table of Contents**PENNYMAC MORTGAGE INVESTMENT TRUST AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 29 Income Taxes (Continued)**

The Company's components of the provision for deferred income taxes are as follows:

	Year ended December 31,		Period from August 4, 2009 (commencement of operations) to December 31, 2009
	2011	2010	
	(in thousands)		
Real estate valuation loss	\$ (2,783)	\$ (104)	
Mortgage servicing rights	2,536		
Other	(86)		
Valuation allowance		(45)	45
Total provision (benefit) for deferred income taxes	\$ (333)	\$ (149)	\$ 45

The tax effects of temporary differences that gave rise to deferred income tax assets and liabilities are presented below:

	December 31,	
	2011	2010
	(in thousands)	
Deferred income tax assets:		
Real estate valuation loss	\$ 2,886	\$ 104
Other	87	
Gross deferred tax assets	2,973	104
Deferred income tax liabilities:		
Mortgage servicing rights	2,536	
Net deferred income tax asset	\$ 437	\$ 104

The net deferred income tax asset is recorded in *Other Assets* in the consolidated balance sheets as of December 31, 2011 and 2010.

At December 31, 2011, December 31, 2010 and December 31, 2009, the Company had no unrecognized tax benefits and does not anticipate any increase in unrecognized tax benefits. Should the accrual of any interest or penalties relative to unrecognized tax benefits be necessary, it is the Company's policy to record such accruals in the Company's income tax accounts. No such accruals existed at December 31, 2011, December 31, 2010 or at December 31, 2009.

Note 30 Segments and Related Information

The Company has two business segments: investment activities and correspondent lending.

The investment activities segment represents the Company's investments in distressed mortgage loans, REO, MBS and MSRs. Management seeks to maximize the value of the mortgage loans acquired by the Company through proprietary loan modification programs, special servicing and other initiatives focused on keeping borrowers in their homes. Where this is not possible, such as in the case of many nonperforming mortgage loans, the Company seeks to effect property resolution in a timely,

Table of Contents**PENNYMAC MORTGAGE INVESTMENT TRUST AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 30 Segments and Related Information (Continued)**

orderly and economically efficient manner. The Company also invests in mortgage related securities and other mortgage related real estate and financial assets.

The correspondent lending segment represents the Company's operations aimed at serving as an intermediary between mortgage originators, particularly mortgage lenders, and the capital markets by purchasing, pooling and reselling the loans either directly or in the form of MBS, using the operations of our Manager.

Before 2011, the Company's activities were almost exclusively within the investment activities segment. Accordingly, segment information is presented beginning with the 2011 fiscal year. Financial highlights by operating segment for 2011 are as follows:

	Investment activities	Correspondent lending (in thousands)	Total
Revenues:			
External			
Net gain on investments	\$ 82,643	\$	\$ 82,643
Interest income	34,063	2,085	36,148
Net gain on mortgage loans acquired for sale		7,633	7,633
Other income	1,173	1,017	2,190
Intersegment			
	117,879	10,735	128,614
Expenses:			
Interest	15,779	1,167	16,946
Other	36,877	2,296	39,173
	52,656	3,463	56,119
Pre-tax net income	\$ 65,223	\$ 7,272	\$ 72,495

The accounting policies of the reportable segments are the same as those described in Note 3 *Significant Accounting Policies* except that intersegment transactions are not eliminated.

Declaration of cash dividends to common shareholders	\$	\$ 7,070	\$

Note 33 Regulatory Net Worth Requirement

PennyMac Corp. ("PMC"), an indirect subsidiary of the Company, is a seller-servicer for Fannie Mae. To retain its status as an approved seller-servicer, PMC is required to meet Fannie Mae's capital standards, which require PMC to maintain a minimum net worth of \$2.5 million. Management believes PMC complies with Fannie Mae's net worth requirement as of December 31, 2011.

Note 34 Recently Issued Accounting Pronouncements

In May 2011, the Financial Accounting Standards Board issued an Accounting Standards Update ("ASU"), ASU 2011-04 to the *Fair Value Measurements* topic of the Accounting Standards Codification ("ASC"). ASU 2011-04 eliminates unnecessary wording differences between U.S. GAAP and International Financial Reporting Standards, expands the disclosure requirements of the *Fair Value*

Table of Contents

PENNYMAC MORTGAGE INVESTMENT TRUST AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Note 34 Recently Issued Accounting Pronouncements (Continued)

Measurements and Disclosure topic of the ASC for fair value measurements and makes other amendments, including:

limiting the highest-and-best-use valuation premise concepts only to measuring the fair value of nonfinancial assets;

permitting an exception to fair value measurement principles for financial assets and financial liabilities (and derivatives) with offsetting positions in market risks or counterparty credit risk when several criteria are met. When the criteria are met, an entity can measure the fair value of the net risk position;

clarifying that premiums or discounts that reflect size as a characteristic of the reporting entity's holding rather than as a characteristic of the asset or liability (for example, a control premium when measuring the fair value of a controlling interest) are not permitted in a fair value measurement; and

prescribing a model for measuring the fair value of an instrument classified in shareholders' equity; this model is consistent with the guidance on measuring the fair value of liabilities.

ASU 2011-04 expands the *Fair Value Measurements* topic's disclosure requirements, particularly for fair value measurements categorized in Level 3 of the fair value hierarchy: (1) a quantitative disclosure of the unobservable inputs and assumptions used in the measurement, (2) a description of the valuation processes in place (e.g., how the entity decides its valuation policies and procedures, as well as changes in its analyses of fair value measurements, from period to period), and (3) a narrative description of the sensitivity of the fair value to changes in unobservable inputs and interrelationships between those inputs.

ASU 2011-04 is applicable to the Company for interim and annual periods beginning after December 15, 2011. The adoption of ASU 2011-04 is not expected to have a material effect on the Company's financial statements.

In December, 2011, the FASB issued ASU 2011-11, Balance Sheet (Topic 210) *Disclosures About Offsetting Assets and Liabilities*. The amendments in this ASU affect all entities that have financial instruments and derivative instruments that are either (1) offset in accordance with the *Offsetting Presentation* section of the *Balance Sheet* topic or the *Presentation* section of the *Derivatives and Hedging* topic of the Codification or (2) subject an enforceable master netting arrangement or similar agreement.

The amendments in this ASU require an entity to disclose information about offsetting and related arrangement to enable users of financial statements to understand the effect of netting to an entity's financial position. The disclosure requirements in this update are effective for periods beginning on or after January 1, 2013, and must be shown for all periods shown on the balance sheet. The amendments in ASU 2011-11 are not expected to have a material effect on the Company's financial condition or results of operations.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Note 35 Subsequent Events

Management has evaluated all events and transactions through the date the Company issued these consolidated financial statements. During this period:

On February 8, 2012, the Company's Board of Trustees declared a cash dividend of \$0.55 per share payable on February 29, 2012 to holders of record of the Company's common shares as of February 17, 2012.

During the months of February and March 2012, the Company sold a total of 1,652,580 of its common shares under a Controlled Equity Offering sales agreement with Cantor Fitzgerald & Co. at a weighted average price of \$18.31 per share, providing net proceeds of approximately \$29.7 million net of sales commissions. The sales agent received a total of approximately \$605,000, which represents an average commission of approximately 2.0% of the gross sales prices per share.

All agreements to repurchase assets and forward purchase agreements that matured before the date of this Report were extended or renewed.
