Mr. Morris and Board Members:

I am writing on behalf of Karpus Investment Management (KIM), a registered investment adviser and shareholder of Tri-Continental Corporation (TY, the Fund) since March 6, 1997. As of March 14, 2008, we own 2,672,094 shares of TY, which represents 2.59 percent of the Fund. First, I would like to commend the Board's actions aimed at narrowing the Fund's discount to net asset value (NAV). Last year, the Board of Directors implemented an 11 percent annual level distribution policy and recommenced a stock repurchase program. We support both of these policies as effective means of narrowing a fund's discount to NAV, and we are pleased that the Board has shown a willingness to address TY's persistently wide discount. However, we have become increasingly concerned over the drastic NAV underperformance and portfolio deviation from the Fund's stated investment strategy. Regarding performance, the Fund's NAV performance for the fourth quarter of 2007 was -9.60% while the S&P 500 was -3.33%. During this time, the fund declined by nearly three times the amount of its benchmark index. A large portion of this underperformance can be attributed to the Fund's positions in small or mid-capitalization stocks, as four of the Fund's top ten holdings as of December 31, 2007 were small or mid-cap companies. These companies, weighting rank as of December 31, 2007 and fourth quarter performance are listed below:

<u>Weighting</u>	<u>Company</u>	<u>Performance</u>
3	Comverse Technology Inc	-12.88%
4	Smurfit-Stone Container Corp	-9.59%
5	Gemstar-TV Guide International Inc	-31.61%
10	NII Holdings Inc	-41.18%

In the 2007 annual report, the portfolio manager identified the largest performance detractors during the past year as OfficeMax, Rite Aid, NII Holdings and Gemstar-TV Guide International, and all of these companies would be classified as either small or mid-capitalization. Furthermore, NII Holdings was listed as one of the largest purchases of the Fund between October 1, 2007 and December 31, 2007. Between December 31, 2007 and March 17, 2008, this stock has returned -35.37% and is another example of a very poor performing mid-cap selection. While the Fund's prospectus permits investment in a wide array of securities, it has historically marketed and positioned itself as a diversified large-capitalization stock fund. In fact, the Fund's proxy statement filed on May 10, 2007, in which the Board recommended the above referenced level distribution policy, the Fund's investment strategy was explicitly defined: "[s]eeks to achieve its objective by investing in a diversified portfolio of large-capitalization stocks and fixed-income securities." Moreover, when the Fund states its performance within quarterly reports, it does so with comparison benchmarks of the Lipper Closed-End Core Funds Average, Lipper Large-Cap Core Funds Average and S&P 500 Index. Clearly, this inaccurately leads investors to believe that the Fund is investing in comparable large-cap stocks, which tend to have more stable prices than stocks of lower market capitalization companies. We applaud the implementation of the level distribution policy and stock repurchase program, but we believe that the benefit of these policies has been diminished by the Fund's investment in poor performing smaller capitalization stocks. Poor NAV performance will act to decrease demand for the Fund's shares, and thus result in a greater discount to NAV and loss of value for current shareholders. As long-term shareholders of TY, we urge the Fund not to diverge as greatly as they have from their stated investment strategy. If the Fund continues to mislead shareholders and produce sub-par performance results, we believe the Board must provide disenchanted shareholders with a means to exit the Fund at or near NAV. I appreciate the Board's time and consideration and would welcome any communication to further discuss our concerns. Please feel free to contact me at 585-586-4680 (ext. 257) or william@karpus.com.
