**UNITED STATES
SECURITIES AND EXCHANGE COMMISSION**

Washington, D.C. 20549

FORM 10-K

(Mark One)

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15 (d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended **September 30, 2006**

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15 (d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Number **000-27427**

ALTIGEN COMMUNICATIONS, INC.

(Exact name of Registrant as specified in its charter)

DELAWARE
(State or other jurisdiction of
incorporation or organization)
4555 Cushing Parkway
Fremont, CA

(Address of principal executive offices)

94-3204299
(I.R.S. Employer
Identification Number)
94538
(Zip Code)

Registrant's telephone number, including area code: **(510) 252-9712**

Securities registered pursuant to Section 12(b) of the Act: **None**

Securities registered pursuant to Section 12(g) of the Act: **Common Stock, \$0.001 par value**
(Title of Class)

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is an accelerated filer (as defined in Rule 12b-2 of the Act). Yes No

Indicate by check whether the registrant is a shell company as defined in Rule 12b-2 of the Exchange Act. Yes No

Edgar Filing: ALTIGEN COMMUNICATIONS INC - Form 10-K

The aggregate market value of the common stock held by non-affiliates of the registrant was approximately \$25,115,815 as of March 31, 2006, based on the closing price of our common stock as reported on The Nasdaq Global Market on such date. Shares of common stock held by each officer and director and by each person known to own 5% or more of our outstanding common stock have been excluded in that such persons may be deemed to be affiliates. This determination of affiliate status is not necessarily a conclusive determination for other purposes. As of March 31, 2006, there were 14,954,954 shares of our common stock issued and outstanding.

As of December 31, 2006, there were 15,149,669 shares of our common stock issued and outstanding.

DOCUMENTS INCORPORATED BY REFERENCE

Certain sections of AltiGen Communications, Inc.'s definitive Proxy Statement for the 2006 Annual Meeting of Stockholders to be held on March 5, 2007 are incorporated by reference in Part III of this Form 10-K to the extent stated herein.

Item 1. Business

INTRODUCTION

AltiGen Communications, Inc. (NASDAQ: ATGN) is a pioneer and market leader in Voice over Internet Protocol (VoIP) telephone systems. We design and manufacture advanced phone systems and call center products that use both the Internet and the public telephone network.

AltiGen Communications, or AltiGen, was founded by current CEO and President Gilbert Hu in 1994, and the first products began shipping in 1996. Our telephony products are primarily sold to small-to-medium sized businesses, multi-site businesses, corporate branch offices, call centers, credit unions and community banks.

AltiGen's products enable an array of applications like VoIP phones and servers, voicemail, call recording, call activity reporting, and mobility solutions that take advantage of the convergence of voice and data communications to achieve cost reduction. Our systems are designed with an open architecture and are built on an industry standard platform. This adherence to widely-used standards allows our products to integrate with and leverage a company's existing technology investment.

AltiGen Communications products are available from independent authorized resellers and strategic partners. AltiGen's family of telephony solutions has been recognized for excellence with more than 40 industry awards since 1996. Most recently, AltiGen's IP710 VoIP phone was awarded a 2005 Product of the Year award from TMC's Internet Telephony magazine.

We generated net revenue of \$17.9 million with a net loss of \$12,000 during fiscal year 2006. As of September 30, 2006, we had an accumulated deficit of \$51.2 million. Net cash provided in operating activities was \$570,000 for fiscal year 2006.

Our principal executive offices are located at 4555 Cushing Parkway, Fremont, California 94538. Our telephone number is (510) 252-9712. We were incorporated in California in May 1994, and we reincorporated into Delaware in June 1999.

We maintain an Internet website at <http://www.altigen.com>. Our most recent annual report on Form 10-K and certain of our other filings with the Securities and Exchange Commission (SEC) are available through the Investor Relations section of our website. Our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and other required filings and amendments to these filings are available on the SEC website at <http://www.sec.gov>, which can be reached from our Investor Relations website. In addition, you may read and copy any material we file with the SEC at the SEC's Public Reference Room at 450 Fifth Street, NW, Washington, DC 20549. You may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330.

INDUSTRY BACKGROUND

We focus on the small-to-medium sized business and mid-sized enterprise business market, which represents approximately 14 million businesses in the United States. Our telephony products primarily are sold to small-to-medium sized businesses, multi-site businesses, corporate branch offices, call centers, credit unions and community banks.

Convergence of Voice and Data

Traditionally, businesses have supported two separate, incompatible networks to handle their communications needs. The first network has been the traditional telephone network, which relies on a technology called circuit-switching. A circuit-switched network establishes and maintains a dedicated

(i.e. not shared) line between calling parties for the duration of a call. The second type of network on which businesses have traditionally relied is a packet-switched network, such as an internal local area network or an external network, like the Internet, where voice, video, images or data is divided into small Internet protocol packets of information for transmission that are simultaneously combined with other unrelated packets of information and routed to a final destination where this process is reversed. Packet-switched networks are more efficient than the traditional circuit-switched telephone network, because network paths are not dedicated to a single user, but instead are available to be shared by all users. As a result, network capacity is allocated more efficiently. It is commonplace for networks installed today to be able to support both voice and data usage with Internet protocol packet-switching.

Most telecommunications systems do not address the needs of businesses that need to transmit voice communications over both traditional telephone networks and packet-switching networks. For example, businesses may wish to route internal calls over their existing voice network and route calls between offices over packet-switched networks, all using the same telecommunications system. We believe a significant opportunity exists to provide small-to-medium sized and mid-enterprise businesses with an integrated phone system that delivers the benefits of integrated, multi-function telecommunications systems using Internet protocol packet switching networks as well as traditional circuit-switched telephone networks.

THE ALTIGEN PRODUCT OFFERING

AltiServ Office systems are complete business telephone systems that are installed on custom designed and manufactured industrial server platforms. The systems include a comprehensive bundle of AltiGen software applications to provide a high value, all-in-one solution. The systems include software and licensing necessary to support analog and Voice over Internet Protocol (VoIP) telephones, operator software, and desktop call control software for each extension on the system. By providing a bundled approach, we are able to maintain quality and reliability while providing for easy deployment of our products.

The AltiGen phone systems work with digital, analog and internet protocol trunks, and internet protocol and analog telephone extensions. The systems can be configured with digital, analog or voice over internet protocol, or a combination of the three. By allowing the customer to choose what best fits their current and future requirement, we provide a practical and cost effective solution to future growth.

Each system includes as standard PBX functionality, a comprehensive voicemail system with over 2,000 hours of storage, 255 auto attendant menus with unlimited levels, automatic call distribution and call detail reporting. The system also provides intuitive and easy to use system administration software to allow for customer self-administration or remote administration by our authorized reseller partners.

The AltiServ Office family of telephone systems can be implemented for businesses requiring as few as eight extensions and supporting up to 400 users per individual system. Individual systems can be affordably scaled to customer needs, and multiple systems may be networked together for greater expansion. These networked systems can be at a single site, a campus environment or multiple locations throughout the world using Internet protocol technology to link them. The AltiServ Office product allows an affordable entry point while maintaining logical system growth.

For customers with more advanced requirements, we provide AltiContact Manager. The product is available as a software upgrade to an existing AltiServ Office system. This product is capable of skills-based routing, priority queuing, centralized call recording and advanced monitoring and reporting. This capability may be added on a per agent/supervisor basis as the customer grows. This allows a smaller business or branch office to enjoy the same capability as a large professional call center organization. If a customer has more than one location, call center calls can automatically be routed to other locations based on conditions the customer chooses.

As a follow up to the release of the IP710 IP Phone in 2005, we released the IP705 IP Phone in June of 2006. The IP705 is AltiGen's entry level IP Phone with a subset of the IP710 features at a lower price point. It is also a standard based VoIP telephone that is feature rich while maintaining our tradition of intuitive, easy to use technology. The phone was designed and developed based on several years of input from our customers and partners.

We have continued to refine our innovative and cost effective product family. We provide a comprehensive, manageable and cost effective option for each of our customers.

Key features of our phone systems include:

- **Measurable Information to Ensure Best Business Practices.** We provide a complete view into individual and group performance. The amount, type and duration of calls can be tracked and analyzed. An individual can record a call for later review, or a company can centrally record all or a percentage of calls for quality control.
- **Reduced Administration Costs.** Our easy to use self administration software allows customers to manage their own telephone system. This reduces or eliminates ongoing operating cost of any business telephone system typically referred to as adds, moves and changes. Our AltiServ systems allow system administrators to perform many of these tasks on site or remotely without assistance from third parties.
- **Lower Toll Costs.** By routing voice over data networks, our systems reduce toll charges associated with long-distance calls between locations. Using our products, businesses can send and receive voice communications over the Internet or a private data network.
- **Unified Company Locations.** For companies with AltiGen systems in multiple locations, we provide a seamless dialing plan. Customers calling into one location can automatically be routed to the correct group or individual. This allows a multi-site business to operate under a unified dialing plan and allows users in different sites to operate as if they were supported by a single system rather than an individual system for each location.
- **Survivability Options.** Our systems allow practical and cost efficient options for disaster recovery planning. Redundant system hard drives allow all voicemail and configuration information to be copied to a spare hard drive. The system allows nightly backup to another network drive. If weather or other problems prevent employees from reaching the office, ExtensionAnywhere, One Number Access and VoIP telephones can be utilized to keep operations running. We provide multiple options based upon what best fits the customer environment.
- **Innovative Desktop Productivity Software.** Our systems provide desktop software applications to increase user productivity. Call control, changes in extension configuration and the ability to view and manage voicemail messages improve an employee's ability to process calls. In addition, we provide software for group supervisors, agents, system administrators and operators. Applications are centrally upgraded from the phone system to allow for quick and efficient deployment.
- **Integration with Customer Relationship Management Software.** The AltiView and AltiAgent desktop interface provides automatic contact record retrieval and screen pops of contact records to a user's desktop. Microsoft Outlook users can type in a name to automatically retrieve telephone numbers and click and dial from an integrated contact record directory. Certified integration to Microsoft customer relationship management software is provided as standard with the system. We provide built-in integration with other Microsoft software applications like Microsoft customer relationship management, Microsoft Outlook and Microsoft Exchange.

- **Ease of Installation, Use and Maintenance.** The AltiServ Office phone systems allow easy installation and system maintenance. Administrators can manage call routing, extension management, voice messaging, email and Internet features of our products through a single AltiWare administrator interface. By using industry standards we believe that AltiServ systems make it easier for resellers and end-user customers to implement and maintain systems.
- **Improved Customer Service Capabilities.** The AltiServ Office systems provide integrated call center functionality. For more advanced call center or centralized call recording requirements, we offer the AltiContact Manager software application. Both contact center applications are designed to enhance our customers communications with their customers by employing comprehensive contact center and call center routing, reporting and recording technologies.
- **Integrated Centralized Call Recording.** Voice calls can be recorded on demand by employees, agents and supervisors or automatically centrally recorded by the phone system. Traditional phone systems require a separate system to be tied to a PBX to centrally record calls. Modular feature licensing allows businesses to add capabilities on a per-feature or per-user basis offering a reduced up-front investment.
- **True Employee Mobility.** We provide flexible and useable mobility options while retaining accountability. We provide several powerful options. ExtensionAnywhere allows any phone with a direct telephone number to be enabled as a live extension on the system. Call handling, call transfer, conferencing and voicemail capability are retained. Our One Number Access feature allows the system to search and then transfer a call at up to four numbers. For remote employees, we offer a VoIP telephone to connect to an employee's high speed Internet access. Our mobility options are flexible and simple to use.

PRODUCTS

The following is a list of our products that are material to our current operations from a financial standpoint:

Product	Description
AltiServ Office	AltiServ Office systems are complete business telephone systems that are installed on custom designed and manufactured industrial server platforms. The systems include a comprehensive bundle of AltiGen software applications to provide a high value, all-in-one solution. The systems include software and licensing necessary to support analog and VoIP telephones, operator software, and desktop call control software for each extension on the system. By providing a bundled approach, we maintain quality and reliability while providing for easy deployment. The platforms are scaleable, and are packaged according to the size of the customer.
AltiContact Manager	AltiContact Manager is available as a software upgrade to an existing AltiServ Office system. This product is capable of skills-based routing, priority queuing, centralized call recording and advanced monitoring and reporting. This capability may be added on a per agent/supervisor basis as a company's needs grow. This allows a smaller business or branch office to enjoy the same capability as a large professional call center organization. If a company has more than one location, call center calls can automatically be routed to other locations based on conditions the customer chooses.

AltiTouch 510 Analog Telephone	The AltiTouch 510 telephone is an executive level analog phone with a high quality speaker, a large (7.4 square inch) backlit LCD display with adjustable viewing angle, and LED voicemail waiting indicator. One-touch buttons provide access to features and call control including: volume, mute, voicemail, voice mail greeting management, do not disturb, intercom, headset answering, conference, hold, transfer, redial, call release, speed dial, call directory, extension management, line pickup, account codes and much more.
IP710 Voice over IP Telephone	The IP710 is a fully featured IP telephone designed to empower the user. Bringing stylish form and functionality to the desktop, the IP710 makes sophisticated features simple and intuitive to use. Users have single button access to voicemail, activity/presence selection, voicemail greeting selections, call recording, call conferencing, call transferring, and even placing calls to employees in other countries. Our IP710 Telephone was recognized in Internet Telephony Magazine as Product of Year for 2005.
IP705 Voice over IP Telephone AltiView	The IP705 provides a subset of the flagship IP710 VoIP telephone's features while offering the same level of voice quality at a reduced price. AltiView is a Windows-based desktop application that provides call control and visual voice mail management to the desktop. It allows users to receive and place calls, listen to voicemail messages, identify the caller phone number and manage extension configuration. AltiView is standard with the system.
AltiAgent	AltiAgent is a Windows-based desktop application to bring call control and workgroup information to call center agents. Users can view a call queue, monitor work group status, check caller identification, measure performance, review log-on history, receive and place calls and listen to and manage voicemail messages.
AltiSupervisor	AltiSupervisor is a Windows-based desktop application for call center supervisors. The application allows a call center or workgroup supervisor to effectively manage a workgroup. AltiSupervisor provides four major real time module views for workgroup management: agent status, agent statistics, group statistics, and queue status with a quality of services capability. AltiSupervisor allows silent monitoring of agents with barge-in call participation and call recording functionality.
Triton IP Board	The Triton IP Board is a microprocessor-controlled board supporting VoIP communications. This allows voice conversations to be carried over public and private data networks that support Internet protocol. The Triton IP Board is a 12-port board that can be software configured to 30 ports. The Triton IP Board can be used for Internet protocol trunks connecting multiple networked AltiServ systems or to support voice over Internet protocol telephones extensions and VoIP agent extensions.
Triton T1, E1, T1/PRI Board	The Triton T1, E1, T1/PRI Board is a microprocessor-controlled board that allows AltiServ systems to connect to T1, E1 or T1/PRI digital high-capacity central office telephone lines. This board can be configured with software to support provisioning for T1, E1 or T1/PRI communication protocols.

Triton Trunk Board	The Triton Trunk Board is an 8 or 12 port, microprocessor-controlled board that allows AltiServ systems to connect to analog central office telephone lines. This allows outbound and inbound calls to be carried over traditional analog central office telephone lines.
Triton Extension Board	The Triton Extension Board is a 12 port, microprocessor-controlled board that allows AltiServ systems to support 12 analog telephone extensions with each Triton Extension Board.

AltiGen Hardware and Firmware

We have developed a single base circuit board with high performance digital signal processing technology, which means that the circuit board has an integrated computer built on it that can run special, high-speed software programs, called firmware. Firmware can receive, send and modify digital information for communications with network services. Our Triton families of digital signal processing boards are designed to allow us to create different circuit boards to meet many communication requirements by simply adding a few hardware and/or software components to the basic board. For example, the Triton digital signal processing board can become a T1, E1 or Integrated Services Digital Network communication circuit board or a circuit board supporting VoIP with simple changes in on-board software and, in some cases, new circuits.

This modular design not only enables us to provide new capabilities, but we also believe that it enables our products to achieve a high degree of reliability and cost reduction since the underlying technology is consistent across our products.

AltiGen Modular Software

Our software products are based on modular software components similar to the concept described above for our hardware and firmware. The service provider layer of software is composed of separate software components, each of which communicates with a hardware circuit board within the AltiServ system. The middleware layer interacts with all the service providers in the system and manages their resources. This middleware layer communicates with the hardware and allows application programs to provide specific features. The application program layer consists of components that implement the application logic, such as voicemail and auto attendant menus. These applications do not depend on any particular hardware integration.

We believe that the layered architectural structure of our AltiServ products provides important benefits:

- New features can be developed without changing hardware.
- Development time is generally shorter.
- New hardware and software features can be added to installed systems.
- Changing one component in the system does not require other components to be changed.

Net Revenue by Products:

	Fiscal Year Ended September 30,								
	2006			2005			2004		
Hardware		92	%		86	%		84	%
Software		8	%		14	%		16	%
		100	%		100	%		100	%

MARKETING, SALES AND CUSTOMER SUPPORT

Marketing

Our marketing efforts currently focus on increasing demand for our products in the Americas, Europe and Asia Pacific. We are working to increase market awareness of our technology and demand for our products in the small-to-medium sized business and call center markets through public relations, print, email and web campaigns.

To assist our distributors, dealers and strategic partners, we provide market development funds, marketing tools and technical and sales training developed specifically for our products. We expect that these programs will allow us to leverage the expertise and contacts of the local and regional reseller channels to create strong lead generation.

Sales

Our banking vertical market strategy, initiated in January 2005, continues to grow. In fiscal 2006, AltiGen systems were installed in 76 new bank and credit union locations throughout the United States. As of September 30, 2006, AltiGen systems have been installed in 231 bank and credit union offices. We believe our focus and expertise in this vertical market will allow us to show continued growth in 2007. In China, we continue to see increased government spending and expect revenue from the region to increase again in fiscal 2007.

Our business is organized into two operating segments, Americas and Asia. Our revenue is primarily generated from one geographic area, the Americas.

Net Revenue by Geographic Area:

	Fiscal Year Ended September 30,								
	2006			2005			2004		
Americas		90	%		90	%		90	%
International		10	%		10	%		10	%
		100	%		100	%		100	%

We currently have sales and support staff in New York, Illinois, Nevada, Florida, Virginia, China and in our headquarters in Fremont, California. Our inside sales force answers incoming calls from end users and refers new leads to a qualified dealer near each end user's location. The inside sales force also is responsible for account management of our smaller resellers. Our outside sales force, which is primarily based in the Americas, includes regional sales managers and technology solutions managers who work with our larger resellers and recruit new reseller partners. In fiscal 2006, we continued our expansion to a more scalable reseller community by signing on an increasing number of resellers that currently sell traditional and Internet protocol telephone systems manufactured by companies such as Avaya Communications (Avaya), 3Com Corporation (3Com), Nortel Networks Inc., (Nortel) and NEC Corporation (NEC).

Customers

Our direct customers primarily are distributors and resellers who sell our products to end-users. We have distribution agreements with AltiSys, Graybar and Synnex in the Americas. Our agreements with AltiSys, Graybar and Synnex have initial terms of one year and are renewed automatically for additional one-year terms, provided that each party shall have the right to terminate the agreement for convenience upon 90 days written notice prior to the end of the initial term or any subsequent term of the agreement. In addition, our agreements with AltiSys, Graybar and Synnex also provide for termination, with or without cause, by either party upon 30 days written notice to the other party without penalty, or upon insolvency or bankruptcy. For a period of 60 days following termination of the agreement, AltiSys, Graybar and Synnex may distribute any products in their possession at the time of termination or, at their option, return any products to us that are in their inventories. Upon termination of the distribution agreement, all outstanding invoices for the products will become due and payable within 30 days of the termination.

Net Revenue by Customers:

	Fiscal Year Ended September 30,					
	2006		2005		2004	
AltiSys		15 %		16 %		14 %
Ingram Micro*				2 %		14 %
Synnex		55 %		53 %		46 %
Graybar		14 %		11 %		8 %

* On July 20, 2005, we terminated our distribution agreement with Ingram Micro. The termination of our relationship with Ingram Micro did not have a material impact on our business.

We also have over 200 authorized resellers who sell our products directly to end-users. We review our resellers performance quarterly and discontinue distribution for those who do not meet our revenue or technical standards.

Customer Support

We believe that consistent, high-quality service and support are key factors in attracting and retaining customers. Our customer support groups, located in California, Texas, Colorado, and Shanghai, China coordinate service and technical support of our products and provide service twenty-four hours a day, seven days a week. Our support personnel assist our distributors and resellers in resolving installation and support issues that arise from their sales to end users and also provide limited support to end-users to supplement dealer support. Resellers and end-user customers also can access technical information and receive technical support through our web site.

RESEARCH AND DEVELOPMENT

The market for our products is characterized by rapidly changing technology, evolving industry standards and frequent product introductions. We believe that our future success depends in large part upon our ability to continue to enhance the functionality and uses of our core technology. We intend to extend the functionality and uses of our hardware and software technology and develop new products by continuing to invest in research and development.

We are currently developing enhancements to our products to provide greater functionality and increased capabilities that we expect will enable us to enhance our position in the Internet protocol phone system market space, enter new geographical markets, and allow us to continue to penetrate the call center market for small-to-medium sized businesses.

We currently conduct the majority of our product development in-house. We also use a small number of independent contractors to assist with certain product development and testing activities. We intend to continue working with our strategic partners to enhance our products. As of September 30, 2006, we employed 46 individuals in engineering, research and development and support.

During fiscal years 2006, 2005, and 2004, our research and development expense was approximately \$3.7 million, \$3.5 million, and \$3.3 million, respectively.

COMPETITION

The markets for our products are intensely competitive, continually evolving and subject to changing technologies. We currently compete with companies providing traditional telephone systems and attempting to launch competitive Internet protocol enabled solutions, principally Avaya, NEC and Nortel. We also compete against companies providing only Internet protocol and Internet protocol-enabled telecommunications systems, such as 3Com, ShoreTel, and Cisco Systems, Inc. Many of our competitors are substantially larger than us and have significantly greater name recognition, financial, sales and marketing, technical, customer support, manufacturing and other resources. These competitors also may have more established distribution channels and stronger relationships with local, long distance and Internet service providers. These competitors may be able to respond more rapidly to new or emerging technologies and changes in customer requirements or to devote greater resources to the development, promotion and sale of their products.

These competitors may enter our existing or future markets with products that may be less expensive, that may provide higher performance or additional features or that may be introduced more quickly than our products. In fiscal 2006, we believe that we continued to be both feature and price competitive. Additionally, we believe we provide a low ongoing cost of ownership. We believe that our principal competitive advantages include:

- System designed for small-to-medium sized business budgets;
- Ability to reduce communications costs;
- Ease of system manageability;
- Ease of use;
- Simple deployment in single and multi-site implementations;
- Strong product development;
- Experience in service and technical support of Internet protocol telephony;
- Complete call center application now standard with all AltiServ systems;
- Complete call processing and voice processing resources in every telephony board
- Decentralized voice processing support for advanced and integrated telephony application;
- Innovative mobility capabilities supporting mobile telephone devices as telephone system extensions; and
- Highly reliable redundant configurations supported.

INTELLECTUAL PROPERTY

We generally rely upon patent, copyright, trademark and trade secret laws to protect and maintain our proprietary rights for our technology and products. As of September 30, 2006, we have been issued three registered trademarks, AltiGen , AltiServ and Zoomerang . In addition, the AltiGen logo is a trademark of ours in the United States and other jurisdictions. All other trademarks and trade names used in this Form 10-K are the property of their respective owners.

We have filed several U.S. patent applications relating to various aspects of our client and server software, mixed-media communications and computer telephony. As of September 30, 2006, we have been issued fourteen U.S. patents and have one U.S. patent application pending. We expect to continue to file patent applications to protect our technology and products. We cannot be sure that our patent applications will result in the issuance of patents, or that any issued patents will provide commercially significant protection for our technology.

MANUFACTURING AND ASSEMBLY

Our manufacturing operations consist of two phases. In the first phase, we send out components of our products to a third party assembler. The third party assembler auto-inserts the components into the printed circuit boards instead of manually inserting the components and returns the assembled circuit board back to us. In the second phase, we insert the assembled circuit boards into the burn-in process for a minimum of two weeks and after that we perform the final test of the circuit boards. In fiscal year 2006, we engaged All Quality Services and Bestronics in San Jose as our third party assemblers. During fiscal 2006, four suppliers, Advantech Corporation, BCM Communications, Inc., Fanstel Corporation, and Avnet Electronics, provided us with approximately 91% of our hardware product components. We purchase fully-assembled chassis from Advantech Corporation, Analog phones from Fanstel Corporation and Internet protocol phones from BCM Communications, Inc. As of September 30, 2006, our in-house manufacturing operations occupied approximately 7,000 square feet of our corporate headquarters in Fremont, California.

We test our products after the assembly process using internally developed product assurance testing procedures, which include visual inspection, functional testing and final systems testing. Although we generally use standard components for our products and try to maintain alternative sources of supply, we purchase some key components from sole source suppliers for which alternative sources are not currently available. We incorporate the following sole-sourced components in our products:

- Zarlink Corporation chips are included in all of our boards and are the means by which our boards communicate with each other to enable our products to function correctly.
- Texas Instruments digital signal processor (DSP) chips are included in our Triton family of boards. The DSP chip is designed to perform the mathematics, data compression and other tasks required to manipulate voice communications that are routed through our products.
- Xilinx, Inc provides chips for our Triton family of boards which allow our boards to work with digital communications lines.
- Infineon Technologies provides chips for our Triton Analog product line which allow our board to work with analog communications lines.
- PMC Sierra, Inc. provides chips for our Triton Digital product line which allow our board to work with digital communications lines.
- Advantech Corporation provides the chassis for our AltiServ Office products based on our specifications.

- BCM Communications, Inc. manufactures our Internet protocol phone loaded with customized firmware to work with our system.
- Fanstel Corporation manufactures our analog phone loaded with customized firmware to work with our system.

Loss of any key component supplier would adversely impact our business.

EMPLOYEES

As of September 30, 2006, we had 88 full-time employees, including 46 in research and development and support, 24 in marketing and sales, 7 in operations, and 11 in finance and administration. Of these full-time employees, 49 were located in the United States and 39 in China. Our future success will depend, in part, on our ability to continue to attract, retain and motivate highly qualified technical, marketing, engineering and management personnel.

Item 1A. Risk Factors

CERTAIN FACTORS AFFECTING BUSINESS, OPERATING RESULTS, AND FINANCIAL CONDITION

You should carefully consider the risks described below and all of the information contained in this Form 10-K. If any of the following risks occur, our business, financial condition and result of operations could be harmed, the trading price of our common stock could decline and you may lose all or part of your investment in our common stock.

Risks Related to Our Business

We have had a history of losses and may incur future losses, which may prevent us from maintaining profitability.

We have had a history of operating losses since our inception and, as of September 30, 2006, we had an accumulated deficit of \$51.2 million. We may incur operating losses in the future, and these losses could be substantial and impact our ability to maintain profitability. We do not expect to increase expenditures for product development, general and administrative expenses, and sales and marketing expenses; however, if we cannot maintain current revenue or revenue growth, we will not achieve or sustain profitability or positive operating cash flows. Even if we achieve profitability and positive operating cash flows, we may not be able to sustain or increase profitability or positive operating cash flows on a quarterly or annual basis.

Our operating results vary, making future operating results difficult to predict.

Our quarterly and annual operating results have varied significantly in the past and likely will vary significantly in the future. A number of factors, many of which are beyond our control, have caused and may cause our operating results to vary, including:

- our ability to respond effectively to competitive pricing pressures;
- our ability to establish or increase market acceptance of our technology, products and systems;
- our success in expanding our network of distributors, dealers and companies that buy our products in bulk, customize them for particular applications or customers, and resell them under their own names;
- market acceptance of products and systems incorporating our technology and enhancements to our product applications on a timely basis;

- our success in supporting our products and systems;
- our sales cycle, which may vary substantially from customer to customer;
- unfavorable changes in the prices and delivery of the components we purchase;
- the size and timing of orders for our products, which may vary depending on the season, and the contractual terms of the orders;
- the size and timing of our expenses, including operating expenses and expenses of developing new products and product enhancements;
- deferrals of customer orders in anticipation of new products, services or product enhancements introduced by us or by our competitors; and
- our ability to attain and maintain production volumes and quality levels for our products.

Our future projected budgets and commitments are based in part on our expectations of future sales. If our sales do not meet expectations, it will be difficult for us to reduce our expenses quickly and, consequently, our operating results may suffer.

Our dealers often require immediate shipment and installation of our products. As a result, we have historically operated with limited backlog, and our sales and operating results in any quarter primarily depend on orders booked and shipped during that quarter.

Any of the above factors could harm our business, financial condition and results of operations. We believe that period-to-period comparisons of our results of operations are not meaningful, and you should not rely upon them as indicators of our future performance.

Our market is highly competitive and we may not have the resources to adequately compete.

The market for our integrated, multifunction telecommunications systems is new, rapidly evolving and highly competitive. We expect competition to intensify in the future as existing competitors develop new products and new competitors enter the market. We believe that a critical component to success in this market is the ability to establish and maintain strong partner and customer relationships with a wide variety of domestic and international providers. If we fail to establish or maintain these relationships, we will be at a serious competitive disadvantage.

We face competition from companies providing traditional private telephone systems. Our principal competitors that produce these telephone systems are Avaya Communications, NEC and Nortel Networks. We also compete against providers of multi-function telecommunications systems, including 3Com Corporation, and Cisco Systems, Inc., as well as any number of future competitors. Many of our competitors are substantially larger than we are and have significantly greater name recognition, financial resources, sales and marketing teams, technical and customer support, manufacturing capabilities and other resources. These competitors also may have more established distribution channels and stronger relationships with service providers. These competitors may be able to respond more rapidly to new or emerging technologies and changes in customer requirements or to devote greater resources to the development, promotion and sale of their products. These competitors may enter our existing or future markets with products that may be less expensive, provide higher performance or additional features or be introduced earlier than our phone systems. We also expect that other companies may enter our market with better products and technologies. If any technology that is competing with ours is more reliable, faster, less expensive or has other advantages over our technology, then the demand for our products and services could decrease and harm our business.

We expect our competitors to continue to improve the performance of their current products and introduce new products or new technologies. If our competitors successfully introduce new products or enhance their existing products, our sales or market acceptance of our products and services could be

reduced, price competition could be increased or our products could become obsolete. To remain competitive, therefore, we must continue to invest significant resources in research and development, sales and marketing and customer support. We may not have sufficient resources to make these investments or to make the technological advances necessary to be competitive, which in turn will cause our business to suffer.

We sell our products through dealers and distributors, which limits our ability to control the timing of our sales, and which makes it more difficult to predict our revenue.

We do not recognize revenue from the sale of our products to our distributors until these products are sold to either resellers or end-users. We have little control over the timing of product sales to dealers and end users. Our lack of control over the revenue that we recognize from our distributors' sales to resellers and end-users limits our ability to predict revenue for any given period. Our future projected budgets and commitments are based in part on our expectations of future sales. If our sales do not meet expectations, it will be difficult for us to reduce our expenses quickly, and consequently our operating results may suffer.

We rely on resellers to promote, sell, install and support our products, and their failure to do so or our inability to recruit or retain resellers may substantially reduce our sales and thus seriously harm our business.

We rely on resellers who can provide high quality sales and support services. As with our distributors, we compete with other telecommunications systems providers for our resellers' business as our resellers generally market competing products. If a reseller promotes a competitor's products to the detriment of our products or otherwise fails to market our products and services effectively, we could lose market share. In addition, the loss of a key reseller or the failure of resellers to provide adequate customer service could cause our business to suffer. If we do not properly train our resellers to sell, install and service our products, our business will suffer.

Software or hardware errors may seriously harm our business and damage our reputation, causing loss of customers and revenue.

Users expect telephone systems to provide a high level of reliability. Our products are inherently complex and may have undetected software or hardware errors. We have detected and may continue to detect errors and product defects in our installed base of products, new product releases and product upgrades. End users may install, maintain and use our products improperly or for purposes for which they were not designed. These problems may degrade or terminate the operation of our products, which could cause end users to lose telephone service, cause us to incur significant warranty and repair costs, damage our reputation and cause significant customer relations problems. Any significant delay in the commercial introduction of our products due to errors or defects, any design modifications required to correct these errors or defects or any negative effect on customer satisfaction as a result of errors or defects could seriously harm our business, financial condition and results of operations.

Any claims brought because of problems with our products or services could seriously harm our business, financial condition and results of operations. We currently offer a one-year hardware guarantee to end-users. If our products fail within the first year, we face replacement costs. Our insurance policies may not provide sufficient or any coverage should a claim be asserted. In addition, our introduction of products and systems with reliability, quality or compatibility problems could result in reduced revenue, uncollectible accounts receivable, delays in collecting accounts receivable, warranties and additional costs. Our customers, end users or employees could find errors in our products and systems after we have begun to sell them, resulting in product redevelopment costs and loss of, or delay in, their acceptance by the markets in which we compete. Further, we may experience significant product returns in the future. Any of these events could have a material adverse effect on our business, financial condition and results of operations.

Our market is subject to changing preferences; failure to keep up with these changes would result in our losing market share, thus seriously harming our business, financial condition and results of operations.

Our customers and end users expect frequent product introductions and have changing requirements for new products and features. In order to be competitive, therefore, we need to develop and market new products and product enhancements that respond to these changing requirements on a timely and cost-effective basis. Our failure to do so promptly and cost effectively would seriously harm our business, financial condition and results of operations. Also, introducing new products could require us to write-off existing inventory as obsolete, which could harm our results of operations.

We depend on attracting and retaining qualified personnel to maintain and expand our business; our failure to promptly attract and retain qualified personnel may seriously harm our business, financial condition and results of operations.

We depend, in large part, on our ability to attract and retain highly skilled personnel, particularly engineers and sales and marketing personnel. We need highly trained technical personnel to design and support our server-based telecommunications systems. In addition, we need highly trained sales and marketing personnel to expand our marketing and sales operations in order to increase market awareness of our products and generate increased revenue. Competition for highly trained personnel is intense, especially in the San Francisco Bay Area where most of our operations are located. We cannot be certain that we will be successful in our recruitment and retention efforts. If we fail to attract or retain qualified personnel or suffer from delays in hiring required personnel, our business, financial condition and results of operations may be seriously harmed.

FASB's adoption of SFAS No. 123(R) has caused, and changes to existing accounting pronouncements or taxation rules or practices may cause, adverse fluctuation on operating income, affect our reported results of operations or how we conduct our business.

In December 2004, the FASB issued SFAS No. 123(R), Stock-Based Compensation, which establishes standards for transactions in which an entity exchanges its equity instruments for goods or services. In March 2005, the SEC issued Staff Accounting Bulletin No. 107 Stock-Based Compensation, which provides interpretive guidance related to SFAS No. 123(R). SFAS No. 123(R) requires a public entity to measure the cost of employee services received in exchange for an award of equity instruments based on the grant-date fair value of the award. This eliminates the exception to account for such awards using the intrinsic method previously allowable under APB Opinion No. 25. SFAS No. 123(R). This standard was adopted on October 1, 2005. This standard had material impact on our reported results of operations.

Also, a change in accounting pronouncements or taxation rules or practices can have a significant effect on our reported results and may even affect our reporting of transactions completed before the change is effective. Other new accounting pronouncements or taxation rules and varying interpretations of accounting pronouncements or taxation practice have occurred and may occur in the future. This change to existing rules, future changes, if any, or the questioning of current practices may adversely affect our reported financial results or the way we conduct our business.

If, as of the end of our 2008 fiscal year, we are unable to assert that our internal control over financial reporting is effective, investors could lose confidence in our reported financial information, and the trading price of our stock price and our business could be adversely affected.

We are in the process of documenting, and plan to test our internal control procedures in order to satisfy the requirements of Section 404 of the Sarbanes-Oxley Act. Commencing on September 30, 2008, the end of our 2008 fiscal year, the Sarbanes-Oxley Act requires annual management assessments of the effectiveness of our internal controls over financial reporting. During the course of our testing we may

identify deficiencies which we may not be able to remediate in time to meet the deadline imposed by the Sarbanes-Oxley Act for compliance with the requirements of Section 404. In addition, if we fail to achieve and maintain the adequacy of our internal controls, as such standards are modified, supplemented, or amended from time to time, we may not be able to ensure that we can conclude on an ongoing basis that we have effective internal controls over financial reporting in accordance with Section 404 of the Sarbanes-Oxley Act. Effective internal controls are important to help produce reliable financial reports and to prevent financial fraud. If we are unable to assert that our internal control over financial reporting is effective as of the end of our 2008 fiscal year, we could lose investor confidence in the accuracy and completeness of our financial reports, investors could lose confidence in our reported financial information, and the trading price of our stock and our business could be adversely affected.

If we do not manage our growth effectively, our business will suffer.

We may not be successful in managing our future growth. We have expanded our operations rapidly since our inception. In order to manage this expansion and grow in the future, we will need to expand or enhance our management, manufacturing, research and development and sales and marketing capabilities. We may not be able to hire the management, staff or other personnel required to do so.

We may not be able to install adequate control systems in an efficient and timely manner, and our current or planned operational systems, procedures and controls may not be adequate to support our future operations. Difficulties in installing and implementing new systems, procedures and controls may significantly burden our management and our internal resources. Delays in the implementation of new systems or operational disruptions when we transition to new systems would impair our ability to accurately forecast sales demand, manage our product inventory and record and report financial and management information on a timely and accurate basis.

Lead times for materials and components used in the assembly of our products vary significantly, and depend on factors such as the supplier, contract terms and demand for a component at a given time. If orders do not match forecasts, we may have excess or inadequate inventory of certain materials and components, which may seriously harm our business, financial condition and results of operations.

Losing any of our key distributors would harm our business. We also need to establish and maintain relationships with additional distributors and original equipment manufacturers.

Sales through our three key distributors, Altisys, Graybar and Synnex, accounted for 84% of our net revenue in the fiscal year ended September 30, 2006. Our business and operating results will suffer if any one of these distributors does not continue distributing our products, fails to distribute the volume of our products that it currently distributes or fails to expand our customer base. We also need to establish and maintain relationships with additional distributors and original equipment manufacturers. We may not be able to establish, or successfully manage, relationships with additional distribution partners. In addition, our agreements with distributors typically provide for termination by either party upon written notice to the other party. For example, our agreement with Synnex provides for termination, with or without cause, by either party upon 30 days written notice to the other party, or upon insolvency or bankruptcy. Generally, these agreements are non-exclusive and distributors sell products that compete with ours. If we fail to establish or maintain relationships with distributors and original equipment manufacturers, our ability to increase or maintain our sales and our customer base will be substantially harmed.

We rely on sole-sourced components and third party technology and products; if these components are not available, our business may suffer.

We purchase technology from third parties that is incorporated into many of our products, including virtually all of our hardware products. We order sole-sourced components using purchase orders and do

not have supply contracts for them. One sole-sourced component, a TI DSP chip, is particularly important to our business because it is included in virtually all of our hardware products. If we were unable to purchase an adequate supply of these sole-sourced components on a timely basis, we would be required to develop alternative products, which could entail qualifying an alternative source or redesigning our products based on different components. Our inability to obtain these sole-sourced components, especially the TI DSP chip, could significantly delay shipment of our products, which could have a negative effect on our business, financial condition and results of operations

Compliance with changing regulations of corporate governance and public disclosure may result in additional expenses.

Changing laws, regulations and standards relating to corporate governance and public disclosure, including the Sarbanes-Oxley Act of 2002, new SEC regulations and Nasdaq National Market rules, are creating uncertainty for companies such as ours. These new or changed laws, regulations and standards are subject to varying interpretations in many cases due to their lack of specificity, and as a result, their application in practice may evolve over time as new guidance is provided by regulatory and governing bodies, which could result in continuing uncertainty regarding compliance matters and higher costs necessitated by ongoing revisions to disclosure and governance practices. As a result, our efforts to comply with evolving laws, regulations and standards have resulted in, and are likely to continue to result in, increased general and administrative expenses and a diversion of management time and attention from revenue-generating activities to compliance activities. In particular, our efforts to comply with Section 404 of the Sarbanes-Oxley Act of 2002 and the related regulations regarding our required assessment of our internal controls over financial reporting and our external auditors' audit of that assessment has required the commitment of significant financial and managerial resources. We expect these efforts to require the continued commitment of significant resources. Further, our board members, chief executive officer, and chief financial officer could face an increased risk of personal liability in connection with the performance of their duties. As a result, we may have difficulty attracting and retaining qualified board members and executive officers, which could harm our business. If our efforts to comply with new or changed laws, regulations and standards differ from the activities intended by regulatory or governing bodies due to ambiguities related to practice, our reputation may be harmed.

Our facility is vulnerable to damage from earthquakes and other natural disasters and other business interruptions; any such damage could seriously or completely impair our business.

We perform final assembly, software installation and testing of our products at our facility in Fremont, California. Our facility is located on or near known earthquake fault zones and may be subject to rolling electrical blackouts and is vulnerable to damage or interruption from fire, floods, earthquakes, power loss, telecommunications failures and similar events. If such a disaster or interruption occurs, our ability to perform final assembly, software installation and testing of our products at our facility would be seriously, if not completely, impaired. If we were unable to obtain an alternative place or way to perform these functions, our business, financial condition and results of operations would suffer. The insurance we maintain may not be adequate to cover our losses against fires, floods, earthquakes and general business interruptions.

Our strategy to outsource assembly and test functions in the future could delay delivery of products, decrease quality or increase costs.

We may begin outsource a substantial amount of our product assembly and test functions. This outsourcing strategy involves certain risks, including the potential lack of adequate capacity and reduced control over delivery schedules, manufacturing yield, quality and costs. In the event that any significant subcontractors were to become unable or unwilling to continue to manufacture or test our products in the

required volumes, we would have to identify and qualify acceptable replacements. Finding replacements could take time and we cannot be sure that additional sources would be available to us on a timely basis. Any delay or increase in costs in the assembly and testing of products by third-party subcontractors could seriously harm our business, financial condition and results of operations.

Our expansion in international markets has been slow and steady. However, our plan is to accelerate this growth rate and will involve new risks that our previous domestic operations have not prepared us to address; our failure to address these risks could harm our business, financial condition and results of operations.

For fiscal year 2006, approximately 10% of our net revenue came from customers outside of the Americas. We intend to expand our international sales and marketing efforts. Our efforts are subject to a variety of risks associated with conducting business internationally, any of which could seriously harm our business, financial condition and results of operations. These risks include:

- tariffs, duties, price controls or other restrictions on foreign currencies or trade barriers, such as import or export licensing imposed by foreign countries, especially on technology;
- potential adverse tax consequences, including restrictions on repatriation of earnings;
- fluctuations in foreign currency exchange rates, which could make our products relatively more expensive in foreign markets; and
- conflicting regulatory requirements in different countries that may require us to invest significant resources customizing our products for each country.

Any failure by us to protect our intellectual property could harm our business and competitive position.

Our success depends, to a certain extent, upon our proprietary technology. We currently rely on a combination of patent, trade secret, copyright and trademark law, together with non-disclosure and invention assignment agreements, to establish and protect the proprietary rights in the technology used in our products.

Although we have filed patent applications, we are not certain that our patent applications will result in the issuance of patents, or that any patents issued will provide commercially significant protection of our technology. In addition, other individuals or companies may independently develop substantially equivalent proprietary information not covered by patents to which we own rights, may obtain access to our know-how or may claim to have issued patents that prevent the sale of one or more of our products. Also, it may be possible for third parties to obtain and use our proprietary information without our authorization. Further, the laws of some countries, such as those in Japan, one of our target markets, may not adequately protect our intellectual property or such protection may be uncertain. Our success also depends on trade secrets that cannot be patented and are difficult to protect. If we fail to protect our proprietary information effectively, or if third parties use our proprietary technology without authorization, our competitive position and business will suffer.

If we are unable to raise additional capital when needed, we may be unable to develop or enhance our products and services.

We may seek additional funding in the future. If we cannot raise funds on acceptable terms, we may be unable to develop or enhance our products and services, take advantage of future opportunities or respond to competitive pressures or unanticipated requirements. We also may be required to reduce operating costs through lay-offs or reduce our sales and marketing or research and development efforts. If we issue equity securities, stockholders may experience additional dilution or the new equity securities may have rights, preferences or privileges senior to those of our common stock.

We may face infringement issues that could harm our business by requiring us to license technology on unfavorable terms or temporarily or permanently cease sales of key products.

We may become parties to litigation in the normal course of our business. Litigation in general, and intellectual property and securities litigation in particular, can be expensive and disruptive to normal business operations. Moreover, the results of complex litigation are difficult to predict.

On September 6, 2002, Vertical Networks, Inc. filed suit against us in the United States District Court for the Northern District of California, alleging infringement of Vertical Networks' U.S. Patents Nos. 6,266,341; 6,289,025; 6,292,482; 6,389,009; and 6,396,849. On October 28, 2002, Vertical Networks amended its complaint to add allegations of infringement of U.S. Patents Nos. 5,617,418 and 5,687,174. Vertical Networks filed a second amended complaint on November 20, 2002 to identify our products and/or activities that allegedly infringe the seven patents-in-suit. Vertical Networks seeks a judgment of patent infringement and an award of damages, including treble damages for alleged willful infringement, and attorneys' fees and costs. We filed an answer and counterclaims for declaratory relief on December 9, 2002. On December 26, 2002, Vertical Networks filed its answer to our counterclaims. Vertical Networks served its preliminary infringement contentions on us on April 9, 2003 and we served Vertical Networks our preliminary invalidity contentions on June 3, 2003 and July 14, 2003. To date, the parties have exchanged some discovery, but no depositions have been taken, and no motions are currently pending. We believe we have strong defenses and arguments in this dispute and intend to vigorously defend our position. Management's view is that any loss from this litigation is currently not probable or estimable. Therefore, we have not established a reserve on our balance sheets as to any liability related to the outcome of this action.

More generally, litigation related to these types of claims may require us to acquire licenses under third party patents that may not be available on acceptable terms, if at all. We believe that an increasing portion of our revenue in the future will come from sales of software applications for our hardware products. The software market traditionally has experienced widespread unauthorized reproduction of products in violation of developers' intellectual property rights. This activity is difficult to detect, and legal proceedings to enforce developers' intellectual property rights are often burdensome and involve a high degree of uncertainty and substantial costs.

Our products may not meet the legal standards required for their sale in some countries; if we cannot sell our products in these countries, our results of operations may be seriously harmed.

The United States and other countries in which we intend to sell our products have standards for safety and other certifications that must be met for our products to be legally sold in those countries. We have tried to design our products to meet the requirements of the countries where we sell or plan to sell them. We also have obtained or are trying to obtain the certifications that we believe are required to sell our products in these countries. We cannot, however, guarantee that our products meet all of these standards or that we will be able to obtain any certifications required. In addition, there is, and will likely continue to be, an increasing number of laws and regulations pertaining to the products we offer and may offer in the future. These laws or regulations may include, for example, more stringent safety standards, requirements for additional or more burdensome certifications or more stringent consumer protection laws.

If our products do not meet a country's standards or we do not receive the certifications required by a country's laws or regulations, then we may not be able to sell our products in that country. This inability to sell our products may seriously harm our results of operation by reducing our sales or requiring us to invest significant resources to conform our products to these standards.

Risks Related to the Industry

Integrated, multifunction telecommunications systems may not achieve widespread acceptance.

The market for integrated, multifunction telecommunications systems is relatively new and rapidly evolving. Businesses have invested substantial resources in the existing telecommunications infrastructure, including traditional private telephone systems, and may be unwilling to replace these systems in the near term or at all. Businesses also may be reluctant to adopt integrated, multifunction telecommunications systems because of their concern about the current limitations of data networks, including the Internet. For example, end users sometimes experience delays in receiving calls and reduced voice quality during calls when routing calls over data networks. Moreover, businesses that begin to route calls over the same networks that currently carry only their data also may experience these problems if the networks do not have sufficient capacity to carry all of these communications at the same time.

Evolving standards may delay our product introductions, increase our product development costs or cause end users to defer or cancel plans to purchase our products, any of which could adversely affect our business.

The standards in our market are still evolving. These standards are designed to ensure that integrated, multifunction telecommunications products from different manufacturers can operate together. Some of these standards are proposed by other participants in our market, including some of our competitors, and include proprietary technology. In recent years, these standards have changed, and new standards have been proposed, in response to developments in our market. Our failure to conform our products to existing or future standards may limit their acceptance by market participants. We may not anticipate which standards will achieve the broadest acceptance in our market in the future, and we may take a significant amount of time and expense to adapt our products to these standards. We also may have to pay additional royalties to developers of proprietary technologies that become standards in our market. These delays and expenses may seriously harm our results of operations. In addition, customers and users may defer or cancel plans to purchase our products due to concerns about the ability of our products to conform to existing standards or to adapt to new or changed standards, and this could seriously harm our results of operations.

Future regulation or legislation could harm our business or increase our cost of doing business.

The Federal Communications Commission (FCC) has submitted a report to Congress stating that it may regulate certain Internet services if it determines that such Internet services are functionally equivalent to conventional telecommunications services. The increasing growth of the voice over data network market and the popularity of supporting products and services, heighten the risk that national governments will seek to regulate the transmission of voice communications over networks such as the Internet. In addition, large telecommunications companies may devote substantial lobbying efforts to influence the regulation of this market so as to benefit their interests, which may be contrary to our interests. These regulations may include, for example, assessing access or settlement charges, imposing tariffs or imposing regulations based on encryption concerns or the characteristics and quality of products and services. In February 2004, the FCC found that an entirely Internet based voice over Internet protocol service was an unregulated information service. At the same time, the FCC began a broader proceeding to examine what its role should be in this new environment of increased consumer choice and what can be done to meet its role of safeguarding the public interest. Future laws, legal decisions or regulations, as well as changes in interpretations of existing laws and regulations, could require us to expend significant resources to comply with them. In addition, these future events or changes may create uncertainty in our market that could reduce demand for our products.

Item 1B. Unresolved Staff Comments

Not applicable.

Item 2. Properties

As of September 30, 2006, our headquarters for corporate administration, research and development, manufacturing and sales and marketing occupied 32,000 square feet of space in Fremont, California. The lease expires on February 21, 2009. Outside the United States, we lease approximately 9,400 square feet of a facility in Shanghai, China, where we conduct administration, research and development, sales and marketing, and another 1,600 square feet of a facility in Beijing, China to serve sales and marketing functions. We believe that our existing facilities are adequate for our needs through at least the end of year 2007.

Item 3. Legal Proceedings

On September 6, 2002, Vertical Networks, Inc. filed suit against us in the United States District Court for the Northern District of California, alleging infringement of Vertical Networks' U.S. Patents Nos. 6,266,341; 6,289,025; 6,292,482; 6,389,009; and 6,396,849. On October 28, 2002, Vertical Networks amended its complaint to add allegations of infringement of U.S. Patents Nos. 5,617,418 and 5,687,174. Vertical Networks filed a second amended complaint on November 20, 2002 to identify our products and/or activities that allegedly infringe the seven patents-in-suit. Vertical Networks seeks a judgment of patent infringement and an award of damages, including treble damages for alleged willful infringement, and attorneys' fees and costs. We filed an answer and counterclaims for declaratory relief on December 9, 2002. On December 26, 2002, Vertical Networks filed its answer to our counterclaims. Vertical Networks served its preliminary infringement contentions on us on April 9, 2003 and we served Vertical Networks our preliminary invalidity contentions on June 3, 2003 and July 14, 2003. To date, the parties have exchanged some discovery, but no depositions have been taken, and no motions are currently pending. We believe we have strong defenses and arguments in this dispute and intend to vigorously defend our position. Management's view is that any loss from this litigation is currently not probable or estimable; therefore, the Company has not established a reserve on its balance sheets as to any liability related to the outcome of this action.

From time to time, we may become party to litigation and subject to claims arising in the ordinary course of our business. To date, these actions have not had a material adverse effect on our financial position, result of operations or cash flows. Although the results of litigation and claims cannot be predicted with certainty, we believe that the final outcome of such matters would not have a material adverse effect on our business, financial position, results of operation and cash flows.

Item 4. Submission of Matters to a Vote of Security Holders

None.

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.

From October 4, 1999, the date of our initial public offering, to June 11, 2002, our common stock was traded on the Nasdaq National Market under the symbol ATGN. Since June 12, 2002, our common stock has traded on the Nasdaq Capital Market under the symbol ATGN. The following table sets forth the range of high and low sales prices for our common stock for the periods indicated:

	Fiscal 2006		Fiscal 2005	
	High	Low	High	Low
1st Quarter	\$ 2.05	\$ 1.45	\$ 4.00	\$ 2.40
2nd Quarter	\$ 1.90	\$ 1.53	\$ 4.05	\$ 2.51
3rd Quarter	\$ 1.98	\$ 1.35	\$ 2.75	\$ 1.59
4th Quarter	\$ 1.57	\$ 1.37	\$ 2.10	\$ 1.54

As of September 30, 2006, we had approximately 93 stockholders of record of our Common Stock. We have never declared or paid any cash dividends on our capital stock. We currently expect to retain future earnings, if any, to support operations and to finance the growth and development of our business. We do not expect to pay cash dividends in the foreseeable future.

We received aggregate net proceeds of approximately \$33.3 million from the initial public offering of shares of our common stock in October 1999. As of September 30, 2006, proceeds from our initial public offering have been used for working capital and general corporate purposes, including research and development of new products, sales and marketing efforts, general and administrative expenses and international expansion. The remaining net proceeds have been invested in cash, cash equivalents and short-term investments.

Plan category	Number of securities to be issued upon exercise of outstanding options, warrants and rights (a)	Weighted-average exercise price of outstanding options, warrants and rights (b)	Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a)) ¹ (c)
Equity compensation plans approved by security holders	3,559,170	\$ 3.76	2,821,795
Equity compensation plans not approved by security holders			
Total	3,559,170	\$ 3.76	2,821,795

(1) The number of shares reserved for issuance under the Company's 1999 Stock Option Plan will be increased on the first day of the Company's fiscal year by an amount equal to the lesser of: (i) 1,796,783 shares; (ii) 5% of the Company's outstanding shares on that date; or (iii) such lesser amount as determined by the Board of Directors. The number of shares reserved for issuance under the Company's 1999 Employee Stock Purchase Plan will be increased on the first day of each fiscal year by an amount equal to the lesser of: (i) 598,928 shares; (ii) 2% of the outstanding shares on that date; or (iii) such lesser amount as determined by the Board of Directors.

Item 6. Selected Financial Data

This section presents selected historical financial data of AltiGen Communications, Inc. This section should be read carefully in conjunction with Management's Discussion and Analysis of Financial Conditions and Results of Operations and the consolidated financial statements included in this Form 10-K, including the notes to the consolidated financial statements. The selected data in this section is not intended to replace our consolidated financial statements.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

FORWARD-LOOKING INFORMATION

This report contains certain forward-looking statements (within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended) and information relating to us that are based on the beliefs of our management as well as assumptions made by and information currently available to our management. Additional forward-looking statements may be identified by the words anticipate, believe, expect, intend, plan, or the negative of such terms, or similar expressions, as they relate to us or our management.

The forward-looking statements contained herein reflect our judgment as of the date of this report with respect to future events, the outcome of which is subject to certain risks, that may have a significant impact on our business, operating results or financial condition. You are cautioned that these forward-looking statements are inherently uncertain. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results or outcomes may vary materially from those described herein. Although we believe that the expectations reflected in these forward-looking statements are reasonable, we cannot guarantee future results, levels of activity, performance or achievements. You should carefully review the cautionary statements contained in this Form 10-K, including the Certain Factors Affecting Business, Operating Results and Financial Condition below.

OVERVIEW

We are a market leader in Internet protocol telephony systems for small-to-medium sized businesses. We design, manufacture and market next generation, Internet protocol phone systems and contact centers that use both the Internet and the public telephone network to take advantage of the convergence of voice and data communications. Unlike traditional proprietary phone systems, our systems are designed with open architecture and are built on an industry standard platform. This adherence to industry standards allows our products to play an important role in the small-to-medium sized business market by delivering phone systems that can integrate with other technologies and provide integrated voice and data solutions. We believe this enables our customers to implement communication systems that have an increased return on investment versus past technology investments. We generated net revenue of \$17.9 million, for a net loss of \$12,000, during fiscal year 2006. As of September 30, 2006, we had an accumulated deficit of \$51.2 million. Net cash provided by operating activities was \$570,000 for fiscal year 2006.

We derive our revenue from sales of our Altiserv telephone systems. Product revenue consist of sales to end-users (including dealers) and to distributors. Revenue from product sales to end users and resellers are recognized upon shipment. We defer recognition of revenue for sales to distributors until they resell our products to their customers. Upon shipment, we also provide a reserve for the estimated cost that may be incurred for product warranty. Under our distribution contracts, a distributor has the right, in certain circumstances, to return products it determines are overstocked, so long as it provides an offsetting purchase order for products in an amount equal to or greater than the dollar value of the returned products. In addition, we provide distributors protection from subsequent price reductions.

Our cost of revenue consists of component and material costs, direct labor costs, provisions for excess and obsolete inventory, warranty costs and overhead related to the manufacturing of our products. Several factors that have affected and will continue to affect our revenue growth are the state of economy, the market acceptance of our products, our ability to add new resellers and our ability to design, develop, and release new products. We engage third-party assemblers, which in fiscal year 2006 were All Quality Services and Bestronics in San Jose, to insert the hardware components into the printed circuit board. We selected our manufacturing partners with the goals of ensuring a reliable supply of high-quality finished products and lowering per unit product costs as a result of manufacturing economies of scale. We cannot

assure you that we will maintain the volumes required to realize these economies of scale or when or if such cost reductions will occur. The failure to obtain such cost reductions could materially adversely affect our gross margins and operating results.

As of September 30, 2006, we had net operating loss carryforwards for federal income tax purposes of approximately \$40.7 million that expire at various dates through 2025, and federal research and development tax credits of approximately \$520,000 that expire at various dates through 2025. We also had net operating loss carryforwards for state income tax purposes of approximately \$13.8 million that expire at various dates through 2015, and state research and development tax credits of approximately \$565,000 which do not have an expiration date and may be carried forward indefinitely. Under current tax law, net operating loss carry forwards available for use in any given year may be limited upon the occurrence of certain events, including changes of ownership interest. We have not recognized any future tax benefits of our cumulative net operating losses due to uncertainty as to future realization.

We continue to focus on creating and developing new product offerings and enhancements to our current products to provide greater functionality and increased capabilities, based on our market research, customer feedback and our competitors' product offerings. In particular, we focus on (i) developing products that allow us to enhance our position in our target market segment and (ii) entering new geographical markets. Additionally, we intend to continue to focus on selling our products to small-to-medium sized businesses, multi-site businesses, corporate branch offices, call centers, credit unions and community banks. Also, we plan to continue to recruit additional resellers and distributors that focus on selling phone systems to our target customers. We believe that the adoption rate for this Internet telephony is much faster with small-to-medium sized businesses because they have no significant investment on their books for traditional phone systems. Also we believe that small-to-medium sized businesses are looking for call center-type administration to increase the productivity and efficiency of their contacts with customers. Assuming that current market trends, including the continuing acceptance of the call center products, continuing growth in the marketplaces of Asia, Latin America, Caribbean, and the status quo of the North American economy continues and that we are successful in enhancing our products, we expect to see continued revenue growth for fiscal year 2007.

CRITICAL ACCOUNTING POLICIES

Revenue recognition. Revenue consist of sales to end users, including resellers, and to distributors. Revenue from sales to end users are recognized upon shipment, when risk of loss has passed to the customer, collection of the receivable is reasonably assured, persuasive evidence of an arrangement exists, and the price is fixed and determinable. Sales to distributors are made under terms allowing certain rights of return and protection against subsequent price declines on our products held by its distributors. Upon termination, any unsold products may be returned by the distributor for a full refund. These agreements may be canceled by either party based on a specified notice. As a result of the above provisions, we defer recognition of distributor revenue until such distributors resell our products to their customers. The amounts deferred as a result of this policy are reflected as deferred revenue in the accompanying consolidated balance sheets. The related cost of revenue is also deferred and reported in the consolidated balance sheets as inventory. Our total deferred revenue was \$531,000 and \$507,000 as of September 30, 2006 and September 30, 2005, respectively.

Allowance for Doubtful Accounts. The allowance for doubtful accounts is based on our assessment of the collectibility of specific customer accounts and the aging of the accounts receivable. If there were a deterioration of a major customer's creditworthiness, or actual defaults were higher than our historical experience, we could be required to increase our allowance and our earnings could be adversely affected. Our allowance for doubtful accounts was \$38,000 and \$40,000 as of September 30, 2006 and September 30, 2005, respectively.

Inventory. Inventory is stated at the lower of cost (first-in, first-out method) or market. Our inventory balance was \$1.4 million and \$965,000 as of September 30, 2006 and September 30, 2005, respectively. We regularly review the value of our inventory in detail, with consideration given to future customer demand for our products, obsolescence from rapidly changing technology, and other factors. If actual market conditions are less favorable than those projected by management, and our estimates prove to be inaccurate, we could be required to increase our inventory provision and our gross margins could be adversely affected. As of December 2001, AltiGen had established a reserve to write off \$3.5 million of excess inventory which management believed would not be sold. During 2002 through 2006, AltiGen reversed a portion of the reserve related to inventory which was sold. The amount of such reversals were \$301,000, \$167,000 and \$293,000 in fiscal years ending 2006, 2005 and 2004, respectively.

Warranty. We accrue for warranty costs based on estimated product return rates and the expected material and labor costs to provide warranty services. If actual return rates and repair and replacement costs differ significantly from our estimates, our gross margin could be adversely affected. The liability for product warranties was \$263,000 and \$264,000 as of September 30, 2006 and September 30, 2005, respectively.

Results of Operations

The following table sets forth consolidated statements of operations data for the periods indicated as a percentage of net revenue.

	Fiscal Year Ended September 30,					
	2006		2005		2004	
Consolidated Statements of Operations Data:						
Net revenue:						
Hardware	92.1	%	86.5	%	84.0	%
Software	7.9		13.5		16.0	
Total net revenue	100.0		100.0		100.0	
Cost of revenue:						
Hardware	44.6		41.7		36.5	
Software	0.6		1.0		1.3	
Total cost of revenue	45.2		42.7		37.8	
Gross profit	54.8		57.3		62.2	
Operating expenses:						
Research and development	20.9		22.6		22.2	
Sales and marketing	24.3		25.5		27.8	
General and administrative	11.5		12.6		12.8	
Total operating expenses	56.7		60.7		62.8	
Income (loss) from operations	(1.9)	(3.4)	(0.6)
Equity in net loss of investee	(0.2)	(0.1)		
Interest and other income, net	2.1		1.5		0.7	
Net income (loss) before taxes			(2.0)	0.01	
Provision for income taxes	0.1					
Net income (loss)	(0.1)%	(2.0)%	0.1	%

Fiscal Year Ended September 30, 2006 Compared to Fiscal Year Ended September 30, 2005

Revenue, net. Revenue consist of sales to end users (including resellers) and distributors.

International is comprised of revenue primarily from China, the United Kingdom and Norway. Most significant long-lived assets are located in the United States. Our hardware tooling used to develop the IP710 and the IP705 phones is located in Taiwan.

	Fiscal Year Ended September 30,			
	2006		2005	
Americas	90	%	90	%
International	10	%	10	%
	100	%	100	%

Net revenue by customers that individually accounted for more than 10% of our revenue for the twelve months ended September 30, 2006 and 2005, respectively, were as follows:

	Fiscal Year Ended September 30,			
	2006		2005	
AltiSys	15	%	16	%
Ingram Micro*			2	%
Synnex	55	%	53	%
Graybar	14	%	11	%

* On July 20, 2005, we terminated our distribution agreement with Ingram Micro. The termination of our relationship with Ingram Micro did not have a material impact on our business.

For fiscal year ended September 30, 2006, we incurred a net loss of \$12,000 as compared to a net loss of \$311,000 for fiscal year ended September 30, 2005. During the current fiscal year ended September 30, 2006, we recognized \$801,000 of non-cash stock based-compensation due to the adoption of SFAS No. 123(R). This standard was adopted on October 1, 2005.

Net revenue increased 16% from \$15.4 million in fiscal year 2005 to \$17.9 million in fiscal year 2006 primarily due to higher sales of telephone systems in the Americas. Revenue generated in the Americas accounted for \$16.1 million or 90% of revenue in fiscal year 2006 and \$13.9 million or 90% of revenue in fiscal year 2005. The number of system shipped in fiscal year 2006 grew 22% over fiscal year 2005 as a result of increased customer acceptance of our new pricing and packaging strategy of bundling the AltiView software, which offers more features than other products on the market, the penetration of our AltiContact Manager (ACM) in the call center market and the introduction of our internet protocol phones, the IP710 and IP705 to the market.

Cost of revenue. Cost of revenue in fiscal year 2006 increased \$1.5 million or 23% to \$8.1 million from approximately \$6.6 million in fiscal year 2005 primarily due to an increase in overall sales of products and the requisite increase in product costs. Cost of revenue as a percentage of net revenue increased from 43% in fiscal year 2005 to 45% in fiscal year 2006. This increase was primarily caused by a lower profit margin as a result of a price deduction on our smaller telephone system bundles in the second quarter of fiscal year 2005.

Research and development expenses. Research and development expenses consist principally of salaries and related personnel expenses, consultant fees and prototype expenses related to the design, development and testing of our products and enhancement of our converged telephone system software. Research and development expenses increased by approximately \$244,000 or 7% from \$3.5 million in fiscal

year 2005 to \$3.7 million in fiscal year 2006. Research and development expenses as a percentage of revenue decreased from 23% in fiscal year 2005 to 21% in fiscal year 2006. The increase in research and development expenses in absolute dollars was primarily attributable to a \$279,000 increase of non-cash stock based compensation recorded due to the adoption of SFAS No. 123(R) and a decrease of approximately \$36,000 in legal expenses. We believe that research and development expenses will increase in the future periods over the long term due to development of new products and continued efforts in the improvement of the current products. In the short term, we expect research and development expenses to remain consistent as management continues to monitor expenses and plans to keep them in line with expected revenue opportunities.

Sales and marketing expenses. Sales and marketing expenses consist primarily of salaries, commissions and related expenses for personnel engaged in marketing, sales and customer support functions, as well as trade shows, advertising, and promotional expenses. Sales and marketing expenses increased by approximately \$410,000 or 10% from \$3.9 million in fiscal year 2005 to \$4.3 million in fiscal year 2006. Sales and marketing expenses as a percentage of revenue decreased from 26% in fiscal year 2005 to 24% in fiscal year 2006. This increase in absolute dollars was due to a \$216,000 increase of non-cash stock-based compensation recorded due to the adoption of SFAS No. 123(R); an increase of approximately \$42,000 in advertising; headcount-related costs also increased by approximately \$48,000 as well as market development funds of approximately \$108,000. We anticipate sales and marketing expenses to remain consistent; however, some expenses vary with revenue, such as commissions. If we are successful in enhancing our products, we expect to see continued revenue growth for fiscal year 2007 and, consequently, expect an increase in sales and marketing expenses.

General and administrative expenses. General and administrative expenses consist of salaries and related expenses for (i) executive, finance, human resources and administrative personnel, (ii) facilities, (iii) allowance for doubtful accounts, (iv) legal, and (v) other general corporate expenses. General and administrative expenses increased by approximately \$112,000 or 6% from \$1.9 million in fiscal year 2005 to \$2.0 million in fiscal year 2006. General and administrative expenses as a percentage of revenue decreased from 13% in fiscal year 2005 to 12% in fiscal year 2006. The increase in absolute dollars was mainly the result of a \$270,000 non-cash stock-based compensation expense required by SFAS No. 123(R), and a reduction in insurance expenses of approximately \$168,000. We expect general and administrative to increase due to the cost associated with compliance with Section 404 of Sarbanes Oxley Act during fiscal year 2007.

Equity investment in common stock of private company. In July 2004, we purchased common stock of a private Korean telecommunications company for \$79,000. As a result of this investment, we acquired approximately 23% of the voting power of the company and have the right to nominate and have elected one of the three members of the company's current board of directors. We are accounting for this investment using the equity method. We had revenue from product sales to this company of \$14,000 and \$37,000 during fiscal years 2006 and 2005, respectively. Our accounts receivable from this company decreased to \$30,000 in fiscal year 2006 from \$40,000 in fiscal year 2005. The company has a 23% vested interest in AliGen Korea. The total equity in net losses of Korea investee was approximately \$160,000 of which 23%, or \$36,000 was recognized in fiscal 2006. In fiscal year 2005 equity in net losses of Korea investee was approximately \$52,000 of which 23% or \$12,000 was recognized in the fourth quarter of fiscal year 2005.

Interest and other income, net. Net interest and other income increased to \$380,000 in fiscal year 2006 from \$237,000 in fiscal year 2005. The increase in net interest and other income was primarily a result of higher interest rates on investments. We expect net interest and other income to remain relatively flat as we have limited cash reserves to invest.

Fiscal Year Ended September 30, 2005 Compared to Fiscal Year Ended September 30, 2004

Revenue, net. Revenue consist of sales to end users (including resellers) and distributors.

Net Revenue by Products:

	Fiscal Year Ended September 30,			
	2005		2004	
Hardware	86	%	84	%
Software	14	%	16	%
	100	%	100	%

Net Revenue by Geographic Area:

	Fiscal Year Ended September 30,			
	2005		2004	
Americas	90	%	90	%
International	10	%	10	%
	100	%	100	%

Net Revenue by Customers:

	Fiscal Year Ended September 30,			
	2005		2004	
AltiSys	16	%	14	%
Ingram Micro	2	%	14	%
Synnex	53	%	46	%
Graybar	11	%	8	%

Revenue generated in the Americas accounted for \$13.9 million or 90% of revenue in fiscal year 2005 and \$13.3 million or 90% of revenue in fiscal year 2004. The number of system shipped in fiscal year 2005 grew 20% over fiscal year 2004 as a result of increased customer acceptance of our new pricing and packaging strategy for our product bundling by including AltiView software, which offers more features than other products on the market, the penetration of our AltiContact Manager (ACM) in the call center market and the introduction of our internet protocol phone IP710 to the market. However, net revenue only increased 4% from \$14.8 million in fiscal year 2004 to \$15.4 million in fiscal year 2005 primarily due to price reduction on our low-end product bundles in the second quarter of fiscal year 2005.

Cost of revenue. Cost of revenue in fiscal year 2005 increased \$985,000 or 18% to \$6.6 million from approximately \$5.6 million in fiscal year 2004 primarily due to an increase in overall sales of products and the requisite increase in product costs. Cost of revenue as a percentage of net revenue increased from 38% in fiscal year 2004 to 43% in fiscal year 2005. This increase primarily was caused by a lower profit margin as a result of a price deduction on our low-end product bundles in the second quarter of fiscal year 2005. No additional provision for excess or obsolete inventory was necessary in either fiscal year 2005 and 2004.

Research and development expenses. Research and development expenses consist principally of salaries and related personnel expenses, consultant fees and prototype expenses related to the design, development and testing of our products and enhancement of our converged telephone system software. Research and development expenses increased by approximately \$208,000 or 6% from \$3.3 million in fiscal year 2004 to \$3.5 million in fiscal year 2005. Research and development expenses as a percentage of revenue increased from 22% in fiscal year 2004 to 23% in

fiscal year 2005. The increase in research and

30

development expenses in absolute dollars was primarily a result of increases in headcount-related costs of \$108,000 resulting from an increase in salary and compensation of our engineers; an increase in equipment expenses of \$30,000; and an increase in research and development expenses related to the design of our internet protocol phone (IP710) of \$67,000.

Sales and marketing expenses. Sales and marketing expenses consist primarily of salaries, commissions and related expenses for personnel engaged in marketing, sales and customer support functions, as well as trade shows, advertising, and promotional expenses. Sales and marketing expenses decreased by approximately \$187,000 or 5% from \$4.1 million in fiscal year 2004 to \$3.9 million in fiscal year 2005. Sales and marketing expenses as a percentage of revenue decreased from 28% in fiscal year 2004 to 26% in fiscal year 2005. The decrease in absolute dollars was primarily a result of a decrease in service fee and consulting expenses of \$39,000, a decrease in trade show expense of \$45,000, a decrease in relocation expense of \$40,000 and a decrease in depreciation and amortization costs of \$55,000.

General and administrative expenses. General and administrative expenses consist of salaries and related expenses for executive, finance and administrative personnel, facilities, bad debt, legal, and other general corporate expenses. General and administrative expenses remained unchanged at \$1.9 million for fiscal years 2004 and 2005. General and administrative expenses as a percentage of revenue remained unchanged at 13% for fiscal years 2004 and 2005.

Equity investment in common stock of private company. In July 2004, we purchased common stock of a private Korean telecommunications company for \$79,000. As a result of this investment, we acquired approximately 23% of the voting power of the company and have the right to nominate and have elected one of the three members of the company's current board of directors. We are accounting for this investment using the equity method. We had revenue from product sales to this company of \$37,000 in fiscal 2005. Our accounts receivable from this company was \$40,000 at September 30, 2005. The company has a 23% vested interest in AliGen Korea. The total equity in net losses of Korea investee was approximately \$52,000 of which 23%, or \$12,000, was recognized in the fourth quarter of fiscal year 2005.

Interest and other income, net. Net interest and other income increased to \$237,000 in fiscal year 2005 from \$105,000 in fiscal year 2004. The increase was primarily due to an increase in interest rates.

Liquidity and Capital Resources

Since inception, we have financed our operations primarily through the sale of equity securities. As of September 30, 2006, we had cash and short-term investments totaling \$9.9 million consisting of cash and cash equivalents of \$5.0 million with a maturity of less than 90 days and \$4.8 million of short-term investment with a maturity of greater than 90 days.

	2006	2005	2004
	(dollars in thousands)		
Cash and cash equivalents	\$ 5,053	\$ 3,963	\$ 2,898
Short-term investments	4,869	5,459	7,136
Total cash, cash equivalents and short-term investments	\$ 9,922	\$ 9,422	\$ 10,034
Cash provided by (used in) operating activities	\$ 570	\$ (509)	\$ (185)
Cash provided by (used in) investing activities	\$ 191	\$ 1,215	\$ (5,818)
Cash provided by financing activities	\$ 329	\$ 359	\$ 353
Net increase (decrease) in cash and cash equivalents	\$ 1,090	\$ 1,065	\$ (5,650)

Changes in Cash Flows

During fiscal year 2006, net cash provided by operating activities was \$570,000, a \$1.1 million increase over our reported results for fiscal year 2005. This was primarily due to a lower net loss of \$12,000, an

increase in non-cash stock based compensation expense of \$801,000, \$219,000 increase in depreciation and amortization as well as an increase in accounts payables of \$184,000. These factors were partially offset by an increase in accounts receivable of approximately \$273,000, and increase in net inventories of \$417,000. The increase in non-cash based compensation expense is the result of our adoption of SFAS No. 123(R) starting on October 1, 2005. The net cash used in operating activities of \$509,000 for the fiscal year 2005 was primarily due to a net loss of \$311,000. In fiscal year 2005, our use of cash for non-operating activities was primarily attributable to the \$207,000 of capital spending for internet protocol phone (IP710) tooling development and \$271,000 of capital spending on equipment additions to support our operations.

Net accounts receivable increased to \$2.3 million at September 30, 2006 from \$1.9 million for the fiscal year ended September 30, 2005. The increase in accounts receivable was primarily due to increases in sales of our products. As we continue to focus on developing products that allow us to enhance our position in our target market segment and enter new markets, we expect to see continued revenue growth for fiscal year 2007, and that growth will be reflected in our accounts receivable.

We ended the fourth quarter of fiscal year 2006 with a cash conversion cycle of 69 days as compared to 58 days for the fourth quarter of fiscal 2005. The cash conversion cycle is the duration between purchase of inventories and services and the collection of the cash from the sale of our products and services and is a metric on which we have focused as we continue to try to efficiently manage our assets. The cash conversion cycle results from the calculation of days of sales outstanding (DSO) added to days of supply in inventories (DOS), reduced by days of payable outstanding (DPO).

Inventories increased to \$1.4 million at September 30, 2006 from \$965,000 at September 30, 2005 and our annualized inventory turn rate decreased to 5.9 as of September 30, 2006 as compared to 6.8 times as of September 30, 2005. Our annualized inventory turn rate represents the number of times inventory is replenished during the year. The increase in inventory is the result of higher finished goods and raw material. Inventory management will continue to be an area of focus as we balance the need to maintain strategic inventory levels to help ensure competitive lead times with the risk of inventory obsolescence due to rapidly changing technology and customer requirements.

Accounts payable increased to \$837,000 at September 30, 2006 from \$653,000 at September 30, 2005. This increase was primarily attributable to an increase in the number of components purchased at the end of fiscal year 2006 as compared to fiscal year 2005. Our accrued payroll-related liabilities increased to \$328,000 at September 30, 2006 from \$317,000 at September 30, 2005, primarily as a result of an increase of \$24,000 in accrued commission, a decrease of \$10,000 in accrued vacation and a decrease in the employee stock purchase plan contribution.

In fiscal year 2006, our net cash provided by financing activities was primarily attributable to the \$329,000 of proceeds from the exercise of employee stock options and employee stock purchase plan.

Liquidity and Capital Resources

We intend to invest our cash in excess of current operating requirements in short-term, interest bearing investment-grade securities.

Our cash needs depend on numerous factors, including market acceptance of and demand for our products, our ability to develop and introduce new products and enhancements to existing products, the prices at which we can sell our products, the resources we devote to developing, marketing, selling and supporting our products, the timing and expense associated with expanding our distribution channels, increases in manufacturing costs and the prices of the components we purchase, as well as other factors. If we are unable to raise additional capital or if sales from our new products or enhancements are lower than expected, we will be required to make additional reductions in operating expenses and capital expenditures to ensure that we will have adequate cash reserves to fund operations.

Additional financing, if required, may not be available on acceptable terms, or at all. We also may require additional capital to acquire or invest in complementary businesses or products, or obtain the right to use complementary technologies. If we cannot raise needed funds in the future if needed, on acceptable terms, we may not be able to further develop or enhance our products, take advantage of opportunities, or respond to competitive pressures or unanticipated requirements, which could seriously harm our business. Even if additional financing is available, we may be required to obtain the consent of our stockholders, which we may or may not be able to obtain. In addition, the issuance of equity or equity-related securities will dilute the ownership interest of our stockholders and the issuance of debt securities could increase the risk or perceived risk of investing in our securities.

We do not have any material commitments for capital expenditures as of September 30, 2006. We have a commitment under our noncancellable capital and operating lease in the amount of \$1.0 million as of September 30, 2006. We believe, we have sufficient cash reserves to allow us to continue operations for more than a year. Our cash and short-term investments totaled \$9.9 million as of September 30, 2006. The following table represents our future commitments as of September 30, 2006 (in thousands):

Contractual Obligations	Payments Due by Period				
	Total	Less than 1 Year	1-3 Years	3-5 Years	More than 5 Years
Operating leases obligation	\$ 824	\$ 446	\$ 378	\$	\$
Capital leases obligation	177	53	91	33	
Total	\$ 1,001	\$ 499	\$ 469	\$ 33	\$

Recent Accounting Pronouncements

In May 2005, the FASB issued SFAS No. 154, *Accounting Changes and Error Corrections* (SFAS 154) which replaces Accounting Principles Board Opinions No. 20 *Accounting Changes* and SFAS No. 3, *Reporting Accounting Changes in Interim Financial Statements* An Amendment of APB Opinion No. 28. SFAS 154 provides guidance on the accounting for and reporting of accounting changes and error corrections. It establishes retrospective application, or the latest practicable date, as the required method for reporting a change in accounting principle and the reporting of a correction of an error. SFAS 154 is effective for accounting changes and corrections of errors made in fiscal years beginning after December 15, 2005 is required to be adopted by us in the first quarter of fiscal year 2007. We are currently evaluating the effect that the adoption of SFAS 154 will have on our consolidated results of operations and financial condition but do not expect it to have a material impact.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk.

At September 30, 2006, our investment portfolio consisted primarily of fixed income securities. These securities are subject to interest rate risk and will decline in value if market interest rates increase. Due to the short duration and conservative nature of these instruments, we do not believe that we have a material exposure to interest rate risk. For example, if market interest rates were to increase immediately and uniformly by 10% from levels as of September 30, 2006, the decline in the fair value of the portfolio would not have a material effect on our results of operations over the next fiscal year.

Interest Rate Risk. Our interest income is sensitive to changes in the general level of U.S. interest rates, particularly since the majority of our investments are in cash equivalents and short-term instruments. Due to the short-term nature of our cash equivalents and investments, we have concluded that a change in interest rates does not pose a material market risk to us.

Foreign Currency Exchange Risk. We face foreign exchange currency fluctuations with our subsidiary in China, however, due to the strength in China's economy, we do not foresee foreign exchange currency fluctuations to pose a material market risk to us.

Item 8. Financial Statements and Supplementary Data.

The financial statements required by this item are incorporated by reference from Part IV Item 15(a) 1 and 2 hereof. The selected quarterly supplementary data is included as part of Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations.

Item 9. Changes in and Disagreements With Accountants on Accounting and Financial Disclosure

None

Item 9A. Controls and Procedures

(a) *Evaluation of disclosure controls and procedures.* Our management evaluated, with the participation of our Chief Executive Officer and our Chief Financial Officer, the effectiveness of our disclosure controls and procedures as of the end of the period covered by this Quarterly Report on Form 10-Q. Based on this evaluation, our Chief Executive Officer and our Chief Financial Officer have concluded that our disclosure controls and procedures are effective to ensure that information we are required to disclose in reports that we file or submit under the Securities Exchange Act of 1934 is accumulated and communicated to our management including our principal executive and principal financial officers, as appropriate, to allow timely decisions regarding disclosure and that such information is recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms.

(b) *Changes in internal control over financial reporting.* There was no change in our internal control over financial reporting that occurred during the period covered by this Quarterly Report on Form 10-Q that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Item 9B. Other Information

None.

PART III**Item 10. Directors and Executive Officers of the Registrant**

The information required by this section with respect to our directors is incorporated by reference from the information in the section entitled: Election of Directors in the Company's definitive Proxy Statement for the Annual Meeting of Stockholders to be held on March 5, 2007 (the Proxy Statement). The information required by this section with respect to our executive officers is included in Part I of this Form 10-K under the section titled Executive Officers of the Registrant.

The information required by this section with respect to any known late filing or failure by an insider to file a report required by Section 16 of the Exchange Act is incorporated by reference from the information in the section titled Section 16(a) Beneficial Ownership Reporting Compliance in our Proxy Statement.

Our board of directors adopted a Code of Conduct for all of directors, officers and employees on July 26, 2004. Our Code of Conduct is posted on our website at http://www.altigen.com/company_investors-conduct.html. We intend to disclose any amendment to, or waivers of, the provisions of our Code of Conduct that apply specifically to our Chief Executive Officer, Chief Financial Officer, Controller or persons performing similar functions by posting such information on our website.

A copy of our Code of Conduct is also available upon written request and without charge to any stockholder by writing to: Secretary, AltiGen Communications, Inc., 4555 Cushing Parkway, Fremont, CA 94538.

The following table sets forth certain information with regard to our executive officers and their ages as of September 30, 2006:

Name	Age	Position
Gilbert Hu	49	President, Chief Executive Officer, Director
Philip M. McDermott	60	Chief Financial Officer
Michael Plumer	42	Vice President of Sales
Simon Chouldjian	53	Vice President of Hardware Engineering
Tsyr-Yi (Shirley) Sun	46	Vice President of Research and Development

Gilbert Hu founded AltiGen and has served as our President, Chief Executive Officer and a director since May 1994. Before founding AltiGen, Mr. Hu was a founder, President and Chief Executive Officer of Centrum Communications, Inc., a networking company acquired by 3Com Corporation in early 1994. Mr. Hu has also served in technical and managerial roles at Vitalink Communication Corporation, an internet working equipment manufacturer. He received a Bachelor of Science degree in Electrical Engineering from National Chiao-Tung University in Taiwan and a Master of Science degree in Electrical Engineering from Arizona State University.

Philip M. McDermott has served as our Chief Financial Officer since June 1999. From October 1995 to May 1999, Mr. McDermott served as Director of Finance for Americas Sales for 3Com Corporation. From October 1994 to October 1995, Mr. McDermott served as Vice President of Finance, Operations and Administration for DAVID Systems, a division of Chipcom Corporation, a public networking company. Chipcom was subsequently acquired by 3Com Corporation. Mr. McDermott received Certified Management Accountant accreditation from The Society of Management Accounting in Montreal, Canada.

Michael Plumer has served as our Vice President of Sales since July 2004. Mr. Plumer joined AltiGen in November 1996 to begin building the AltiGen sales channel. In the past eight years he has held various positions including Senior Director of Sales and National Sales Director. From January 1994 until October 1996, Mr. Plumer worked for NetManage, Inc. Mr. Plumer received a Bachelor of Arts degree in Journalism and Public Relations from Iowa State University.

Simon Chouldjian has served as our Vice President of Hardware Engineering since November 2001. He served as our Vice President of Manufacturing from June 1997 to November 2001. From July 1984 to June 1997, Mr. Chouldjian was the founder and Vice President of Engineering of Luxcom, Inc., a manufacturer of communication hub equipment. Mr. Chouldjian has held supervisory and project manager positions in engineering at the Hewlett Packard Company and TRW, Inc. He received a Bachelor of Science degree in Electrical Engineering from the University of California, Berkeley and a Master of Science degree in Electrical Engineering from Stanford University.

Tsyr-Yi (Shirley) Sun has served as our Vice President of Research and Development since October 1999. Prior to that role, she served as our Director of Internet Protocol Telephony from April 1998 to October 1999. From February 1994 to March 1998, Ms. Sun worked for 3Com Corporation as an engineering manager. From August 1991 to February 1994, Ms. Sun was a founder and an engineering manager with Centrum Communications, Inc., a networking company acquired by 3Com Corporation in early 1994. Ms. Sun received a Bachelor of Science degree in Mechanical Engineering from National Central University in Taiwan and a Master of Science degree in Computer Science from Utah State University.

Item 11. Executive Compensation

The information required by this section is incorporated by reference from the information in the section titled "Executive Compensation and Other Matters" in our Proxy Statement.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

The information required by this section is incorporated by reference from the information in the section titled: "Security Ownership of Certain Beneficial Owners and Management" in our Proxy Statement.

Item 13. Certain Relationships and Related Transactions

The information required by this item regarding certain relationships and related transactions is incorporated by reference to the information set forth in the section titled "Certain Relationships and Related Transactions" in our Proxy Statement.

Item 14. Principal Accountant Fees and Services

Audit Fees

Moss Adams LLP's fees for professional services rendered in connection with the audit of our annual financial statements and the review of our financial statements included in our third quarterly report on Form 10-Q were approximately \$160,000 for the fiscal year ended September 30, 2006. Moss Adams LLP did not render services in connection with the review of our financial statements for our first and second quarterly reports on Form 10-Q for the fiscal year ended September 30, 2006. We did not engage Moss Adams LLP to provide advice regarding financial information systems design and implementation during the fiscal years ended September 30, 2006 and 2005.

Deloitte & Touche LLP's fees for professional services rendered in connection with the review of our financial statements included in our first and second quarterly reports on Form 10-Q were approximately \$88,000 for fiscal year ended September 30, 2006. Deloitte & Touche LLP's fees for professional services rendered in connection with the audit of our annual financial statements and the review of our financial statements included in our quarterly reports on Form 10-Q were approximately \$255,000 for the fiscal year ended September 30, 2005. We did not engage Deloitte & Touche LLP to provide advice regarding financial information systems design and implementation during the fiscal years ended September 30, 2006 and 2005.

Audit-Related Fees

We did not incur any additional fees from our independent registered public accounting firm, Moss Adams LLP during fiscal year 2006. During fiscal year 2005, we did not incur any additional fees from our independent registered public accounting firm, Deloitte & Touche LLP.

Tax Fees

Deloitte & Touche LLP's fees for all other services rendered to us, including tax related services, totaled approximately \$30,000 in each of the fiscal years ended September 30, 2006 and 2005, respectively.

All Other Fees

During fiscal year 2006, Deloitte & Touche LLP billed the company approximately \$20,000 for services rendered in connection with the SEC filing Form 8-K. During fiscal year 2005, Deloitte & Touche LLP did not bill the company for any other services.

The Audit Committee pre-approves all audit and permissible non-audit services provided by the independent registered public accounting firm. These services may include audit services, audit-related services, tax services and other services. The Audit Committee has adopted a policy for the pre-approval of services provided by the independent auditors. Under the policy, pre-approval generally is provided for up to one year and any pre-approval is detailed as to the particular service or category of services and is subject to a specific budget. In addition, the Audit Committee may also pre-approve particular services on a case-by-case basis. For each proposed service, the independent registered public accounting firm is required to provide detailed back-up documentation at the time of approval. The Audit Committee may delegate pre-approval authority to one or more of its members. Such member must report any decisions to the Audit Committee at the next scheduled meeting.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of
AltiGen Communications, Inc.
Fremont, CA

We have audited the accompanying consolidated balance sheets of AltiGen Communications, Inc. and subsidiaries (the Company) as of September 30, 2006, and the related consolidated statements of operations, stockholders' equity, and cash flows for the period ended September 30, 2006. Our audit also included the financial statement schedule listed in the Index at Item 15(a)(2). These financial statements and financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on the financial statements and financial statement schedule based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of AltiGen Communications, Inc. and subsidiaries as of September 30, 2006, and the results of their operations and their cash flows for the period ended September 30, 2006, in conformity with accounting principles generally accepted in the United States of America. Also, in our opinion, such financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly in all material respects the information set forth therein.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of
AltiGen Communications, Inc.
Fremont, CA

We have audited the accompanying consolidated balance sheets of AltiGen Communications, Inc. and subsidiaries (the Company) as of September 30, 2005, and the related consolidated statements of operations, stockholders' equity, and cash flows for each of the two years in the period ended September 30, 2005. Our audits also included the financial statement schedule for the years ended September 30, 2005 and 2004 listed in the Index at Item 15(a)(2). These financial statements and financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on the financial statements and financial statement schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of AltiGen Communications, Inc. and subsidiaries as of September 30, 2005, and the results of their operations and their cash flows for each of the two years in the period ended September 30, 2005, in conformity with accounting principles generally accepted in the United States of America. Also, in our opinion, such financial statement schedule for the years ended September 30, 2005 and 2004, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly in all material respects the information set forth therein.

**ALTIGEN COMMUNICATIONS, INC. AND SUBSIDIARY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

1. ORGANIZATION OF THE COMPANY:

We are a pioneer and market leader in Internet protocol telephony systems for small-to-medium sized businesses. We design, manufacture and market next generation, Internet protocol phone systems and contact centers that use both the Internet and the public telephone network to take advantage of the convergence of voice and data communications. Unlike traditional proprietary phone systems, our systems are designed with open architecture and are built on an industry standard platform. This adherence to industry standards allows our products to play an important role in the small-to-medium sized business market by delivering phone systems that can integrate with other technologies and provide integrated voice and data solutions. We believe this enables our customers to implement communication systems that have an increased return on investment versus past technology investments. We generated net revenue of \$17.9 million, for a net loss of \$12,000, during fiscal year 2006. As of September 30, 2006, we had an accumulated deficit of \$51.2 million. Net cash provided by operating activities was \$570,000 for fiscal year 2006. We were incorporated in California in May 1994 and we reincorporated into Delaware in June 1999.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES:

Principles of Presentation

Our consolidated financial statements reflect the operations of AltiGen Communications, Inc. and our wholly-owned subsidiary. The subsidiary is located in Shanghai, China and was incorporated in November 1998. As of September 30, 2006, we had approximately \$44,000 in long lived assets located in China. All significant intercompany transactions and balances have been eliminated. Our fiscal year end is September 30. Unless otherwise stated, all references to fiscal years 2006, 2005, and 2004 refer to the twelve months ended September 30 of that year. Certain reclassifications have been made to conform prior period amounts to the current presentation. The reclassifications did not impact previously reported revenue, total operating expense, operating income (loss), net income (loss), total assets, total liabilities or stockholders' equity.

In March 2005, the Company determined that investments in Auction Rate Securities (ARS) should not be considered cash equivalents in prior periods. ARS generally have long-term stated maturities; however, these investments have characteristics similar to short-term investments because at pre-determined intervals, generally between 7 to 49 days after the purchase, there is a new auction process. As of March 31, 2005, the Company held \$2.5 million of investments in ARS that were classified as short-term investments, available for sale. The Company reclassified \$2.5 million of investments in ARS that were previously included in cash and cash equivalents as of September 30, 2004 to short-term investments, available for sale. The Company has included purchases and sales of ARS in its consolidated statements of cash flows as a component of its investing activities.

Additionally, in March 2005, the Company revised the presentation of its consolidated statements of operations to separate net revenue and cost of revenue by source (hardware and software).

Use of Estimates in Preparation of Financial Statements

The preparation of the financial statements in conformity with generally accepted accounting principles in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reported periods. Key estimates include provisions for excess and obsolete inventories, warranty, doubtful account reserve, valuation on tax assets and long-term investments. Actual results could differ from those estimates.

Concentration of Risk

Financial instruments that potentially subject us to a concentration of credit risk consist principally of trade receivables. We perform ongoing credit evaluations of our customers' financial condition and require letters of credit whenever deemed necessary to help reduce our credit risk. Additionally, we establish an allowance for doubtful accounts based upon factors surrounding the credit risk of specific customers, historical trends related to past losses and other information. As of September 30, 2006 approximately 81% of our account receivable was concentrated with three distributors, compared to approximately 84% concentrated with three distributors as of September 30, 2005.

Our purchases are concentrated with four suppliers and certain key chip components of our products are sole sourced. For fiscal years 2006 and 2005 these four suppliers provided 91% and 93%, respectively, of all raw materials purchased. Loss of one of these suppliers could adversely impact our operations.

Cash and Cash Equivalents and Short-Term Investments

We consider all highly liquid investments with an original maturity of three months or less from the date of purchase to be cash equivalents. Short-term investments are in highly liquid financial instruments with original maturities greater than three months but less than one year and are classified as available-for-sale investments. Investments are reported at their fair value, with unrealized gains and losses excluded from earnings and reported as a separate component of stockholders' equity. As of September 30, 2006, our cash and cash equivalents consisted of commercial paper and cash deposited in checking and money market accounts. For fiscal years 2006, 2005, and 2004, we did not make any cash payments for interest or income taxes.

As of September 30, 2006, short-term investments consisted of the following (in thousands):

Available for Sale Securities:

	Amortized Cost	Gross Unrealized Gain	Gross Unrealized Losses	Market Value	Accrued Interest Income	Total Value
U.S. government agency obligation	\$ 1,001	\$	\$ 1	\$ 1,002	\$ 2	\$ 1,004
Auction-rate preferred stock						
Corporate bonds and notes	3,835		(1)	3,834	31	3,865
Commercial paper						
	\$ 4,836	\$	\$	\$ 4,836	\$ 33	\$ 4,869

As of September 30, 2005, short-term investments consisted of the following (in thousands):

Available for Sale Securities:

	Amortized Cost	Gross Unrealized Gain	Gross Unrealized Losses	Market Value	Accrued Interest Income	Total Value
U.S. government agency obligation	\$ 3,018	\$	\$	\$ 3,018	\$ 10	\$ 3,028
Auction-rate preferred stock	850			850		850
Corporate bonds and notes	1,271		(1)	1,270	11	1,281
Commercial paper	300			300		300
	\$ 5,439	\$	\$ (1)	\$ 5,438	\$ 21	\$ 5,459

The U.S. government agency obligation includes bonds and discount notes with a maturity date of one to 30 years at issuance for bonds and discount notes have maturities from one day to one year at issuance.

The securities are issued by such agencies as Fannie Mae (FNMA), Freddie Mac (FHLMC) and Government Sponsored Enterprises (GSEs).

Accrued interest is calculated on a 30-day month/360-day year for corporate bonds and municipal bonds, and on actual-calendar-days for Government bonds. Income bonds and bonds in default trade without accrued interest. When calculating accrued interest on a bond that is being sold, it is conventional to consider the time period from the most recent payment up to, but not including, the date on which the bond sale is settled.

For fiscal period ending September 30, 2006, we did not have unrealized loss from short-term investment, however, at fiscal period ending September 30, 2005, unrealized loss from short-term investment was \$1,000.

Inventories

Inventories (which include costs associated with components assembled by third-party assembly manufacturers, as well as internal labor and allocable overhead) are stated at the lower of standard cost (which approximates actual cost on a first-in, first-out method) or market value. Provisions, when required, are made to reduce excess and obsolete inventories to their estimated net realizable values. We regularly monitor inventory quantities on hand and record a provision for excess and obsolete inventories based primarily on our estimated forecast of product demand and production requirements for the next six months. As of September 30, 2006, we recognized \$122,000 of provision for excess and obsolete inventories offset by a \$301,000 reversal of inventories from prior year. We did not record any provision for excess and absolute inventories for fiscal years 2005 and 2004. The components of inventories include (in thousands):

	September 30,	
	2006	2005
Raw materials	\$ 497	\$ 144
Work-in-progress	75	84
Finished goods	\$10	737
	\$ 1,382	\$ 965

Property and Equipment

Property and equipment are carried at cost less accumulated depreciation. Depreciation is provided using the straight-line method over the estimated useful lives of the assets, which is three years except for tooling which we depreciate using the greater value between the five year straight-line method or the number of phones shipped in the period. Depreciation expense for fiscal years 2006, 2005, and 2004, was approximately \$218,000, \$109,000, and \$218,000, respectively. All repairs and maintenance costs are expensed as incurred.

Net book value of equipment leased under capital leases was \$118,000, \$184,000 and \$9,000 for fiscal years 2006, 2005 and 2004, respectively. Net of accumulated depreciation for such equipment was \$81,000, \$15,000 and \$15,000 for fiscal years 2006, 2005 and 2004, respectively.

Long-Term Investments

As of September 30, 2006, we held an investment of common stock of private Taiwanese telecommunication company valued at approximately \$195,000 accounted for using the cost method. Our interest in the company is approximately 2%, which interest does not allow us to exercise significant influence.

In July 2004, we purchased common stock of a private Korean telecommunications company for \$79,000. As a result of this investment, we acquired approximately 23% of the voting power of the company and have the right to nominate and have elected one of the three members of the company's current board of directors. We are accounting for this investment using the equity method and record our minority interest of their results in our results of operations. As of September 30, 2006, our investment in the Korean company had a remaining book value of approximately \$16,000 compared to \$63,000 at fiscal year end September 30, 2005.

We perform periodic reviews of our investments for impairment. Our investments are considered impaired when a review of the issuer's operations and other indicators of impairment indicate that the carrying value of the investment is not likely to be recoverable. Such indicators include, but are not limited to, limited capital resources, limited prospects of receiving additional financing, and limited prospects for liquidity of the related securities. No write-downs were recorded during fiscal years 2006, 2005 or 2004.

Software Development Costs

In accordance with Statement of Financial Accounting Standards (SFAS) No. 86, Accounting for the Costs of Computer Software to be Sold, Leased, or Otherwise Marketed, the Company capitalizes eligible computer software development costs upon the establishment of technological feasibility, which it has defined as completion of a working model. The amount of costs eligible for capitalization, after consideration of factors such as realizable value, were not material and, accordingly, all software development costs have been charged to research and development expense in the accompanying consolidated statements of operations.

Stock-Based Compensation

Commencing October 1, 2005 we adopted the provisions of Statement of Financial Accounting Standard (SFAS) No. 123(R), Share Based Compensation (SFAS No. 123(R)), which requires all share-based compensation, including grants of stock options, to be recognized in the income statement as an operating expense, based on their fair market values. During fiscal year 2006, stock compensation was accounted under SFAS No. 123(R) while during fiscal year 2005, stock-based compensation was accounted under Accounting Principles Board (APB), Opinion No. 25 APB (25).

Prior to adopting SFAS No. 123(R), we accounted for stock-based employee compensation under Accounting Principles Board (APB) Opinion No. 25, Accounting for Stock Issued to Employees, as amended by SFAS No. 148, Accounting for Stock-Based Compensation-Transition and Disclosures. We have applied the modified prospective method in adopting SFAS No. 123(R) and, accordingly, we recorded compensation costs as the requisite service was rendered for the unvested portion of previously issued awards that remain outstanding at the initial date of adoption. Periods prior to the adoption of SFAS No. 123(R) have not been restated.

Edgar Filing: ALTIGEN COMMUNICATIONS INC - Form 10-K

The following table summarizes the total stock-based compensation expense for the twelve months ended September 30, 2006 and is included in the Audited Condensed Consolidated Statements of Operations (in thousands):

	Fiscal Year Ended September 30,	
	2006	
Cost of goods sold	\$	36
Research and development		279
Selling, general and administrative		486
Pre-tax stock-based compensation expense		801
Income tax		
Net stock-based compensation expense	\$	801

The following table illustrates the effects on net income and earnings per share if the fair value based method had been applied to the prior periods as required under SFAS No. 123(R). The reported net income and earnings per share for fiscal year ended September 30, 2005 and September 30, 2004 have been presented below to reflect the impact had the Company been required to include the amortization of the Black-Scholes option value as an expense (in thousands, except for per share data):

	Fiscal Year Ended September 30,			
	2005		2004	
Net income (loss)	\$	(311)	\$	28
Add: stock-based employee compensation expense included in reported net loss under APB No. 25				
Deduct: Total stock-based compensation determined under fair value based method prior to adoption of SFAS No. 123R, net of related tax effects		(1,680)		(1,161)
Net loss pro forma	\$	(1,991)	\$	(1,133)
Basic and diluted net income (loss) per share:				
As reported	\$	(0.02)	\$	0.00
Pro forma	\$	(0.14)	\$	(0.08)

The fair value of each option grant is estimated on the date of grant using the Black-Scholes option pricing model, and is not subject to revaluation as a result of subsequent stock price fluctuations. The following weighted-average assumptions are used:

	Employee Stock Option Plans Fiscal Year Ended September 30,			Employee Stock Purchase Plan Fiscal Year Ended September 30,		
	2006	2005	2004	2006	2005	2004
Expected Life (in years)	5	5	5	0.5	0.5	0.5
Risk-free interest rate	4.35-5.4 %	3.5-4.0 %	3.3-3.7 %	5.15 %	4.3 %	1.3 %
Volatility	95 %	100 %	105 %	94 %	99 %	103 %
Expected dividend	0.0 %	0.0 %	0.0 %	0.0 %	0.0 %	0.0 %

The Black-Scholes option pricing model was developed for use in estimating the fair value of traded options that have no vesting restrictions and are fully transferable. In addition, option pricing models require the input of highly subjective assumptions, including the expected stock price volatility. We use projected volatility rates, which are based upon historical volatility rates since our initial public offering, trended into future years. Because our employee stock options have characteristics significantly different from those of traded options and because changes in the subjective input assumptions can materially affect

the fair value estimate, in management's opinion, the existing models do not necessarily provide a reliable single measure of the fair value of our options.

Revenue Recognition

We account for the recognition of revenue in accordance with Statement of Position (SOP) 97-2, Software Revenue Recognition. Revenue consist of sales to end-users, including resellers, and to distributors. Revenue from sales to end-users including resellers are recognized upon shipment, when risk of loss has passed to the customer, collection of the receivable is reasonably assured, persuasive evidence of an arrangement exists, and the price is fixed and determinable. Sales to distributors are made under terms allowing certain rights of return and protection against subsequent price declines on the Company's products held by its distributors. Upon termination, any unsold products may be returned by the distributor for a full refund. These agreements may be canceled by either party based on a specified notice. As a result of the above provisions, we defer recognition of distributor revenue until such distributors resell our products to their customers. The amounts deferred as a result of this policy are reflected as deferred revenue in the accompanying consolidated balance sheets. The related cost of revenue is also deferred and reported in the consolidated balance sheets as inventory.

Software components are generally not sold separately from our hardware components. Software revenue consist of license revenue that are recognized upon the delivery of application products. We provide limited post-contract customer support (PCS), consisting primarily of technical support and bug fixes. In accordance with SOP 97-2, revenue earned on software arrangements involving multiple elements is allocated to each element based upon the relative fair values of the elements. Although we provide PCS, the revenue allocated to this element is recognized together with the initial licensing fee on delivery of the software because: (1) the PCS fee is included with the initial licensing fee; (2) the PCS included with the initial license fee is for one year or less; (3) the estimated cost of providing PCS during the arrangement is insignificant; and (4) unspecified upgrades/enhancements offered for minimal or no cost during PCS arrangements historically have been and are expected to continue to be minimal and infrequent. All estimated costs of providing the services, including upgrades and enhancements are accrued for at the time of delivery.

For fiscal years 2006, 2005, and 2004, the following customers accounted for approximately 84%, 82%, and 82% of net revenue, respectively:

	Fiscal Year Ended September 30,					
	2006		2005		2004	
AltiSys		15 %		16 %		14 %
Ingram Micro*				2 %		14 %
Synnex		55 %		53 %		46 %
Graybar		14 %		11 %		8 %

* On July 20, 2005, we terminated our distribution agreement with Ingram Micro. The termination of our relationship with Ingram Micro did not have a material impact on our business.

Revenue derived from sales to customers outside of the Americas, primarily in China, Norway and the United Kingdom accounted for approximately 10%, 10%, and 10% of our net revenue for fiscal years 2006, 2005 and 2004, respectively.

Computation of Basic and Diluted Net Income (Loss) Per Share

Historical net income (loss) per share has been calculated under SFAS No. 128, Earnings per Share. SFAS No. 128 requires companies to compute earnings per share under two methods (basic and diluted).

Edgar Filing: ALTIGEN COMMUNICATIONS INC - Form 10-K

Basic net income (loss) per share is calculated by dividing net income (loss) by the weighted average shares of common stock outstanding during the period. Diluted earnings per share reflects the potential dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock.

Basic and diluted income (loss) per share for each of the three years in the period ended September 30, 2006 are as follows (in thousands):

	Fiscal Year Ended September 30,		
	2006	2005	2004
Net income (loss)	\$ (12)	\$ (311)	\$ 28
Weighted average shares outstanding basic income (loss) per share	14,964	14,605	14,242
Weighted average dilutive potential shares			1,484
Weighted average shares outstanding diluted income (loss) per share	14,964	14,605	15,726
Basic net income (loss) per share	\$ (0.00)	\$ (0.02)	\$ 0.00
Diluted net income (loss) per share	\$ (0.00)	\$ (0.02)	\$ 0.00

The following common stock options and employee stock options were excluded from the computation of diluted net income (loss) per share for fiscal years 2006, 2005 and 2004:

	Fiscal Year Ended September 30,		
	2006	2005	2004
Common Stock Options			1,412
Employee stock options			72

Comprehensive Income (Loss)

Comprehensive income (loss) consists of net income (loss) and net unrealized gains (losses) on available-for-sale investment. Comprehensive loss for fiscal years 2006, 2005 and 2004, respectively, were as follows (in thousands):

	Fiscal Year Ended September 30,		
	2006	2005	2004
Net income (loss)	\$ (12)	\$ (311)	\$ 28
Unrealized gain (loss)	1	1	
	\$ (11)	\$ (310)	\$ 28

Segment Reporting

We are organized and operate as two operating segments. We operate primarily in two geographic areas, the Americas and Asia. The Americas is comprised of the United States, Canada, Mexico, Central America and the Caribbean.

Net revenue by geographic region based on customer location for fiscal years ending 2006, 2005 and 2004, respectively, were as follows:

	Fiscal Year Ended September 30,		
	2006	2005	2004
Americas	90 %	90 %	90 %
International	10 %	10 %	10 %
	100 %	100 %	100 %

Edgar Filing: ALTIGEN COMMUNICATIONS INC - Form 10-K

International is comprised of revenue primarily from China, the United Kingdom and Norway. Most significant long-lived assets are located in the United States. Our hardware tooling used to develop the IP710 and the IP705 phones is located in Taiwan.

Net revenue by customers that individually accounted for more than 10% of our revenue for fiscal years ending 2006, 2005 and 2004, respectively, were as follows:

	Fiscal Year Ended					
	September 30,					
	2006		2005		2004	
AltiSys		15 %		16 %		14 %
Ingram Micro*				2 %		14 %
Synnex		55 %		53 %		46 %
Graybar		14 %		11 %		8 %

* On July 20, 2005, we terminated our distribution agreement with Ingram Micro. The termination of our relationship with Ingram Micro did not have a material impact on our business.

Recent Accounting Pronouncements

In May 2005, the FASB issued SFAS No. 154, Accounting Changes and Error Corrections (SFAS 154) which replaces Accounting Principles Board Opinions No. 20 Accounting Changes and SFAS No. 3, Reporting Accounting Changes in Interim Financial Statements An Amendment of APB Opinion No. 28. SFAS 154 provides guidance on the accounting for and reporting of accounting changes and error corrections. It establishes retrospective application, or the latest practicable date, as the required method for reporting a change in accounting principle and the reporting of a correction of an error. SFAS 154 is effective for accounting changes and corrections of errors made in fiscal years beginning after December 15, 2005 is required to be adopted by us in the first quarter of fiscal year 2007. We are currently evaluating the effect that the adoption of SFAS 154 will have on our consolidated results of operations and financial condition but do not expect it to have a material impact.

3. WARRANTY

The Company provides a one year warranty for hardware products starting upon shipment to end users. We historically have experienced minimal warranty costs. Factors that affect our warranty liability include the number of installed units, historical experience and management's judgment regarding anticipated rates of warranty claims and cost per claim. We assess the adequacy of our recorded warranty liability every quarter and make adjustments to the liability if necessary.

Changes in our warranty liability for the fiscal years ended September 30, 2006 and 2005, respectively, are as follows (in thousands):

	September 30,	
	2006	2005
Beginning balance	\$ 264	\$ 424
Provisions for warranty liability	146	103
Other adjustments		(102)
Warranty cost including labor, components and scrap	(147)	(161)
Ending balance	\$ 263	\$ 264

Other adjustments were the result of a significant decline in the product return rate caused by changes in the Company's management of the return programs.

4. COMMITMENTS AND CONTINGENCIES:*Commitments*

We lease our facilities under various operating lease agreements expiring on various dates through February 2009. In December 2003, we leased approximately 32,000 square feet to serve as our headquarters for corporate administration, research and development, manufacturing, and sales and marketing facility in Fremont, California. The lease for our headquarters expires on February 21, 2009. Rent expense for all operating leases totaled approximately \$539,000, \$486,000, and \$510,000, for fiscal years 2006, 2005, and 2004, respectively. In addition, we lease certain equipment under capital lease arrangements. Minimum future lease payments under all noncancellable capital and operating leases as of September 30, 2006 are as follows (in thousands):

Fiscal Year Ending September 30,	Capital Leases	Operating Leases
2007	53	446
2008	47	286
2009	44	92
2010	33	
Total minimum lease payment	\$ 177	\$ 824
Amount representing interest	\$ 27	
Present value of minimum lease payment	150	
Total minimum lease payment	\$ 177	
Current portion plus current portion of interest	\$ 53	
Long-term portion plus long-term portion of interest	124	
Total capital lease commitments	\$ 177	

Contingencies

We may become party to litigation in the normal course of our business. Litigation in general, and intellectual property and securities litigation in particular, can be expensive and disruptive to normal business operations. Moreover, the results of complex litigation are difficult to predict.

On September 6, 2002, Vertical Networks, Inc. filed suit against us in the United States District Court for the Northern District of California, alleging infringement of Vertical Networks' U.S. Patents Nos. 6,266,341; 6,289,025; 6,292,482; 6,389,009; and 6,396,849. On October 28, 2002, Vertical Networks amended its complaint to add allegations of infringement of U.S. Patents Nos. 5,617,418 and 5,687,174. Vertical Networks filed a second amended complaint on November 20, 2002 to identify our products and/or activities that allegedly infringe the seven patents-in-suit. Vertical Networks seeks a judgment of patent infringement and an award of damages, including treble damages for alleged willful infringement, and attorneys' fees and costs. We filed an answer and counterclaims for declaratory relief on December 9, 2002. On December 26, 2002, Vertical Networks filed its answer to our counterclaims. Vertical Networks served its preliminary infringement contentions on us on April 9, 2003 and we served Vertical Networks our preliminary invalidity contentions on June 3, 2003 and July 14, 2003. To date, the parties have exchanged some discovery, but no depositions have been taken, and no motions are currently pending. We believe we have strong defenses and arguments in this dispute and intend to vigorously defend our position. Management's view is that any loss from this litigation is currently not probable or estimable. Therefore, we have not established a reserve on our balance sheets as to any liability related to the outcome of this action.

5. CAPITAL STOCK:*Common Stock*

We are authorized to issue 50,000,000 shares of common stock. At September 30, 2006, we had reserved the following shares of common stock for future issuance:

1994 Stock Option Plan	972,235
1999 Employee Stock Purchase Plan	765,640
1999 Stock Option Plan	4,643,090
	6,380,965

Stock Option Plans

In October 1994, we adopted the 1994 Stock Option Plan (the "1994 Plan") and authorized the issuance of 2,096,246 shares to employees, directors, and consultants. As of September 30, 2006, there were 180,525 vested shares outstanding from the 1994 Stock Option Plan (the "1994 Plan"). In 1996, all shares under this plan vested and continue to remain outstanding. During fiscal year 1999, we adopted the 1999 Stock Option Plan (the "1999 Plan") and authorized the issuance of 2,096,247 shares to employees, directors and consultants. The number of shares will be increased on the first day of our Company's fiscal year equal to the lesser of (i) 1,796,783 shares, (ii) 5% of the outstanding shares on that date or (iii) a lesser amount as determined by the Board of Directors. Under the Plans, the Board of Directors may grant incentive and nonqualified stock options to employees, directors and consultants of the Company. The exercise price per share for an incentive stock option cannot be less than 100% of the fair market value, as determined by the Board of Directors, on the date of grant. The exercise price per share for a nonqualified stock option cannot be less than 85% of the fair market value, as determined by the Board of Directors, on the date of grant. Also, the exercise price of options granted to a greater than 10% stockholder may not be less than 110% of the fair market value on the date of grant. The value of common stock subject to incentive stock options that become exercisable by any one employee in any calendar year may not exceed \$100,000. Options under these Plans generally vest over a four-year period and generally expire ten years after the date of grant.

Edgar Filing: ALTIGEN COMMUNICATIONS INC - Form 10-K

Option activity under the 1994 and 1999 Plans (the Plans) was as follows:

	Options available for grant	Options outstanding	Weighted Average Exercise Price
Balance as of September 30, 2003	2,616,961	3,602,285	\$ 3.88
Authorized for grant	699,527		
Granted (weighted average of fair value of \$3.75)	(808,000)	808,000	3.75
Exercised		(229,075)	1.05
Canceled	429,411	(429,396)	5.90
Balance as of September 30, 2004	2,937,899	3,751,814	\$ 3.79
Authorized for grant	719,931		
Granted (weighted average of fair value of \$2.99)	(831,000)	831,000	2.99
Exercised		(210,107)	0.95
Canceled	288,217	(288,217)	4.11
Balance as of September 30, 2005	3,115,047	4,084,490	\$ 3.75
Authorized for grant			
Granted (weighted average of fair value of \$1.76)	(58,000)	58,000	1.76
Exercised		(265,895)	0.69
Canceled	317,425	(317,425)	5.86
Balance as of September 30, 2006	3,374,472	3,559,170	\$ 3.76
Exercisable at September 30, 2004		2,494,920	\$ 4.42
Exercisable at September 30, 2005		2,829,037	\$ 4.12
Exercisable at September 30, 2006		2,992,428	\$ 3.91

The following table summarizes information concerning outstanding and exercisable options at September 30, 2006:

Exercise Prices	Options Outstanding			Options Exercisable		
	Number Outstanding	Weighted Average Remaining Life	Weighted Average Exercise Price	Number Exercisable	Weighted Average Exercise Price	
\$0.17-\$0.59	21,240	3.21	\$ 0.42	21,240	\$ 0.42	
0.60-0.60	422,720	6.12	0.60	402,825	0.60	
0.61-0.78	362,335	4.86	0.78	362,335	0.78	
0.79-1.83	359,301	5.12	1.08	307,218	0.97	
1.84-2.13	363,000	4.49	2.11	343,647	2.12	
2.14-2.89	70,946	5.58	2.68	52,300	2.73

3.82-3.82	564,333	7.27	3.82	402,314	3.82	
3.83-12.69	759,493	3.23	9.80	750,743	9.87	
	3,559,170	5.62	\$ 3.76	2,992,428	\$ 3.91	

1999 Employee Stock Purchase Plan

Under the 1999 Employee Stock Purchase Plan (the 1999 Purchase Plan), 765,640 shares of common stock are reserved for issuance at September 30, 2006 to eligible employees at a price of 85% of the lower of the fair market value of the common stock on the first day of the offering period or a specified exercise date (last trading day in April or October). The number of reserved shares will be increased on the first day of each fiscal year by the lesser of (i) 598,928 shares, (ii) 2% of the outstanding shares on that date or (iii) a lesser amount determined by the Board of Directors. Participants under the 1999 Purchase Plan

generally may not purchase shares on any exercise date to the extent that, immediately after the grant, the participant would own stock totaling 5% or more of the total combined voting power of all stock of the Company, or greater than \$25,000 worth of stock in any calendar year. In addition, no more than 5,989 shares may be purchased by any participant during any offering period. In the event of a sale or merger of us, the Board may accelerate the exercise date of the current purchase period to a date prior to the change of control, or the acquiring company may assume or replace the outstanding purchase rights under the 1999 Purchase Plan. In fiscal year 2006, 109,398 shares were purchased by and distributed to employees at a price of \$1.31 per share.

6. DEFERRED STOCK COMPENSATION

Amortization of deferred stock compensation relates to the following items in the accompanying consolidated statements of operations (in thousands):

	Fiscal Year Ended September 30,		
	2006	2005	2004
Cost of goods sold	\$ 36	\$	\$
Research and development	279		
Selling, general and administrative	486		
Pre-tax stock-based compensation expense	801		
Income tax			
Net stock-based compensation expense	\$ 801	\$	\$

7. INCOME TAXES:

Worldwide income (loss) from continuing operations before provision for income taxes consists of the following (in thousands):

	Fiscal Year Ended September 30,		
	2006	2005	2004
United States	\$ 114	\$ (131)	\$ 284
Foreign	(107)	(180)	(256)
Income (loss) from continuing operations	\$ 7	\$ (311)	\$ 28

The provision for income taxes consisted of the following (in thousands) and is attributable to federal and state minimum taxes:

	Fiscal Year Ended September 30,		
	2006	2005	2004
Federal	\$ 14	\$	\$
State	5		
Foreign			
Income tax provision	\$ 19	\$	\$

Edgar Filing: ALTIGEN COMMUNICATIONS INC - Form 10-K

We account for income taxes pursuant to SFAS No. 109, Accounting for Income Taxes. SFAS No. 109 requires recognition of deferred tax liabilities and assets for the expected future tax consequences of events that have been included in the financial statements or tax returns. The following is a summary of the significant components of the deferred tax asset (in thousands):

	September 30,	
	2006	2005
Net operating loss carryforwards	\$ 15,056	\$ 16,422
Reserve and other cumulative temporary differences	1,860	1,790
Research and development credit carryforward	1,085	1,090
Net capitalized research and development expenses	490	402
	18,491	19,704
Valuation allowance	(18,491)	(19,704)
Net deferred tax asset	\$	\$

As of September 30, 2006, we had net operating loss carryforwards for federal income tax purposes of approximately \$40.7 million that expire at various dates through 2025, and federal research and development tax credits of approximately \$520,000 that expire at various dates through 2025. We also had net operating loss carryforwards for state income tax purposes of approximately \$13.8 million that expire at various dates through 2015, and state research and development tax credits of approximately \$565,000 which do not have an expiration date and may be carried forward indefinitely. Utilization of the Company's net operating loss and tax credit carryforwards may be subject to substantial annual limitation due to the ownership change limitations provided by the Internal Revenue Code and similar state provisions. Such an annual limitation could result in the expiration of the net operating loss carryforwards before utilization.

A valuation allowance has been recorded for the entire deferred tax asset as a result of uncertainties regarding realization of the asset, including limited operating history of the Company, lack of profitability to date and uncertainty over future operating profitability and taxable income. As of September 30, 2006 and 2005 we had no significant deferred tax liabilities.

We did not incur any income tax expenses from our foreign subsidiaries, AltiGen Korea and AltiGen China as of September 30, 2006.

Reconciliation between the Company's effective tax rate and the U.S. statutory rate is as follows:

	Fiscal Year Ended September 30,					
	2006		2005		2004	
Tax at federal statutory rate	35.0	%	35.0	%	35.0	%
Change in valuation allowance	(4,098.5)	(31.0)	(94.0)
State taxes	543.7					
Meals & entertainment	179.5					
Unbenefitted foreign loss	535.0					
Stock based compensation	3,067.8					
Other	8.3		(4.0)	59.0	
Provision for income taxes	270.8	%	0.0	%	0.0	%

8. EQUITY INVESTMENT IN COMMON STOCK OF PRIVATE COMPANY

The Company has a 23% vested interest in AltiGen Korea. The total equity in net losses of Korea investee was approximately \$160,000 of which 23%, or \$36,000 was recognized in fiscal 2006. In fiscal year 2005 equity in net losses of Korea investee was approximately \$52,000 of which 23% or \$12,000 was recognized in the fourth quarter of fiscal year.

9. RELATED PARTY TRANSACTION

In July 2004, we purchased common stock of a private Korean telecommunications company for \$79,000. As a result of this investment, we acquired approximately 23% of the voting power of the company and have the right to nominate and have elected one of the three members of the company's current board of directors. We are accounting for this investment using the equity method. We had revenue from product sales to this company of \$14,000 and \$37,000 during fiscal years 2006 and 2005, respectively. Our accounts receivable from this company decreased to \$30,000 in fiscal year 2006 from \$40,000 in fiscal year 2005.

10. SELECTED QUARTERLY FINANCIAL DATA (UNAUDITED)

The following is a summary of our unaudited quarterly financial results:

	First Quarter	Second Quarter	Third Quarter	Fourth Quarter
	(in thousands, except per share data)			
Fiscal Year Ended September 30,				
2006:				
Revenue, net	\$ 4,403	\$ 4,174	\$ 4,806	\$ 4,513
Gross profit	2,385	2,239	2,711	2,479
Net income (loss)	(218)	(120)	190	136
Basic and diluted net income (loss) per share	(0.01)	(0.01)	0.01	0.01
2005:				
Revenue, net	\$ 4,275	\$ 2,801	\$ 4,117	\$ 4,248
Gross profit	2,608	1,541	2,221	2,479
Net income (loss)	342	(858)	(96)	302
Basic and diluted net income (loss) per share	0.02	(0.06)	(0.01)	0.02

**ALTIGEN COMMUNICATIONS, INC. AND SUBSIDIARY
SCHEDULE II VALUATION AND QUALIFYING ACCOUNTS**

Classification	Balance at Beginning of Fiscal Year	Charged to Costs and Expenses	Deductions	Balance at End of Fiscal Year
	(in thousands)			
Allowance for doubtful accounts:				
2006	\$ 40	\$ 1	\$ (3)	\$ 38
2005	\$ 35	\$ 34	\$ (29)	\$ 40
2004	\$ 60	\$ 35	\$ (60)	\$ 35
Inventory reserve:				
2006	\$ 2,458	\$ 122	\$ (301)	\$ 2,279
2005	\$ 2,625	\$	\$ (167)	\$ 2,458
2004	\$ 2,918	\$	\$ (293)	\$ 2,625

The deductions are a result of sales of product that were recovered and we are currently using up this reserve as we sell our product.

SIGNATURES

Pursuant to the requirements of Section 13 or 15(d) of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.
