CARPENTER TECHNOLOGY CORPORATION

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

1. Basis of Presentation

The accompanying unaudited consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles for interim financial information and the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by U.S. generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments, consisting of normal and recurring adjustments, considered necessary for a fair statement of the results are reflected in the interim periods presented. The June 30, 2013 consolidated balance sheet data was derived from audited financial statements, but does not include all the disclosures required by U.S. generally accepted accounting principles. These unaudited consolidated financial statements should be read in conjunction with the consolidated financial statements and footnotes thereto included in Carpenter's annual report on Form 10-K for the year ended June 30, 2013 (the 2013 Form 10-K). Operating results for the three months ended September 30, 2013 are not necessarily indicative of the operating results for any future period.

As used throughout this report, unless the context requires otherwise, the terms Carpenter, the Company, Registrant, Issuer, we and our refer to Carpenter Technology Corporation.

2. Earnings Per Common Share

The Company calculates basic earnings per share using the two class method. Under the two class method, earnings are allocated to common stock and participating securities (nonvested restricted shares and units that receive non-forfeitable dividends) according to their participation rights in dividends and undistributed earnings. The earnings available to each class of stock is divided by the weighted average number of shares for the period in each class. Because the participating securities have no obligation to share in net losses, losses are not allocated to the participating securities in this calculation.

Table of Contents**CARPENTER TECHNOLOGY CORPORATION****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS****(Unaudited)**

The calculations of basic and diluted earnings per common share for the three months ended September 30, 2013 and 2012 were as follows:

(in millions, except per share data)		Three Months Ended September 30,	
	2013		2012
Net income attributable to Carpenter	\$	34.6	\$ 39.2
Less: earnings and dividends allocated to participating securities		(0.1)	(0.2)
Earnings available to Carpenter common stockholders	\$	34.5	\$ 39.0
Weighted average number of common shares outstanding, basic		53.1	52.8
Basic earnings per common share	\$	0.65	\$ 0.74
Net income attributable to Carpenter	\$	34.6	\$ 39.2
Weighted average number of common shares outstanding, basic		53.1	52.8
Effect of shares issuable under share based compensation plans		0.4	0.6
Weighted average number of common shares outstanding, diluted		53.5	53.4
Diluted earnings per common share	\$	0.65	\$ 0.74

The following awards issued under share-based compensation plans were excluded from the above calculations of diluted earnings per share because their effects were anti-dilutive:

(in millions)		Three Months Ended September 30,	
	2013		2012
Stock options	0.2		0.1

Table of Contents**CARPENTER TECHNOLOGY CORPORATION****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS****(Unaudited)****3. Marketable Securities**

The fair value of the Company's marketable securities was based on quoted market prices or estimates of fair value as of September 30, 2013 and June 30, 2013. The following is a summary of marketable securities, all of which were classified as available-for-sale as of September 30, 2013 and June 30, 2013:

September 30, 2013 (\$ in millions)	Cost	Unrealized Losses	Estimated Fair Value
Non-current Municipal auction rate securities	\$ 5.9	\$ (0.6)	\$ 5.3
June 30, 2013 (\$ in millions)	Cost	Unrealized Losses	Estimated Fair Value
Non-current Municipal auction rate securities	\$ 5.9	\$ (0.5)	\$ 5.4

For the three months ended September 30, 2013 and 2012, proceeds from sales and maturities of marketable securities were \$0.0 million.

4. Inventories

Inventories consisted of the following components as of September 30, 2013 and June 30, 2013:

(\$ in millions)	September 30, 2013	June 30, 2013
Raw materials and supplies	\$ 127.0	\$ 111.6
Work in process	358.8	325.9
Finished and purchased products	221.3	221.7
Total inventory	\$ 707.1	\$ 659.2

Inventories are valued at the lower of cost or market. Cost for inventories is principally determined using the last-in, first-out (LIFO) method.

[Table of Contents](#)
CARPENTER TECHNOLOGY CORPORATION
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)
5. Accrued Liabilities

Accrued liabilities consisted of the following as of September 30, 2013 and June 30, 2013:

(\$ in millions)	September 30, 2013	June 30, 2013
Accrued compensation	\$ 34.4	\$ 49.4
Derivative financial instruments	28.6	29.1
Accrued postretirement benefits	15.5	15.4
Accrued pension liabilities	10.8	9.7
Other	74.4	64.9
Total accrued liabilities	\$ 163.7	\$ 168.5

6. Pension and Other Postretirement Benefits

The components of the net periodic benefit cost related to the Company's pension and other postretirement benefits for the three months ended September 30, 2013 and 2012 were as follows:

Three months ended September 30, (\$ in millions)	Pension Plans		Other Postretirement Plans	
	2013	2012	2013	2012
Service cost	\$ 8.0	\$ 8.1	\$ 1.0	\$ 1.1
Interest cost	14.3	13.3	3.1	3.0
Expected return on plan assets	(15.7)	(13.7)	(1.6)	(1.6)
Amortization of net loss	5.5	7.0	0.3	0.8
Amortization of prior service cost (benefit)	0.1	0.2	-	(1.0)
Net pension expense	\$ 12.2	\$ 14.9	\$ 2.8	\$ 2.3

During the three months ended September 30, 2013 and 2012, the Company made \$1.5 million and \$48.1 million, respectively of contributions to its defined benefit pension plans. The Company currently expects to make approximately \$4.8 million of contributions to its defined benefit pension plans during the remainder of fiscal year 2014.

Table of Contents

CARPENTER TECHNOLOGY CORPORATION

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

7. Debt

The Company has a \$500 million syndicated credit agreement (Credit Agreement) that extends to June 2018. Interest on the borrowings under the Credit Agreement accrue at variable rates, based upon LIBOR or a defined Base Rate, both determined based upon the rating of the Company's senior unsecured long-term debt (the Debt Rating). The applicable margin to be added to LIBOR ranges from 0.75% to 1.90% (1.25% as of September 30, 2013), and for Base Rate-determined loans, from 0.00% to 0.90% (0.25% as of September 30, 2013). The Company also pays a quarterly commitment fee ranging from 0.075% to 0.375% (0.15% as of September 30, 2013), determined based upon the Debt Rating, of the unused portion of the \$500 million commitment under the Credit Agreement. In addition, the Company must pay certain letter of credit fees, ranging from 0.75% to 1.90% (1.25% as of September 30, 2013), with respect to letters-of-credit issued under the Credit Agreement. The Company has the right to voluntarily prepay and reborrow loans and to terminate or reduce the commitments under the facility. As of September 30, 2013, the Company had \$8.2 million of issued letters of credit under the Credit Agreement, with the balance of \$491.8 million available for future borrowings.

The Company is subject to certain financial and restrictive covenants under the Credit Agreement, which, among other things, require the maintenance of a minimum interest coverage ratio of 3.50 to 1.00. The interest coverage ratio is defined in the Credit Agreement as, for any period, the ratio of consolidated earnings before interest, taxes, depreciation and amortization, and non-cash net pension expense (EBITDA) to consolidated interest expense for such period. The Credit Agreement also requires the Company to maintain a debt to capital ratio of less than 55%. The debt to capital ratio is defined in the Credit Agreement as the ratio of consolidated indebtedness, as defined therein, to consolidated capitalization, as defined therein. As of September 30, 2013 and June 30, 2013, the Company was in compliance with all of the covenants of the Credit Agreement.

8. Contingencies and Commitments

Environmental

The Company is subject to various federal, state, local and international environmental laws and regulations relating to pollution, protection of public health and the environment, natural resource damages and occupational safety and health. Although compliance with these laws and regulations may affect the costs of the Company's operations, compliance costs to date have not been material. The Company has environmental remediation liabilities at some of its owned operating facilities and has been designated as a potentially responsible party (PRP) with respect to certain third-party Superfund waste-disposal sites and other third party-owned sites. Additionally, the Company has been notified that it may be a PRP with respect to other Superfund sites as to which no proceedings have been instituted against the Company. Neither the exact amount of remediation costs nor the final method of their allocation among all designated PRP's at these Superfund sites has been determined. The liability for future environmental remediation costs is evaluated by management on a quarterly basis. The Company accrues amounts for environmental remediation costs that represent management's best estimate of the probable and reasonably estimable undiscounted future costs related to environmental remediation. During the three months ended September 30, 2013, we increased the liability for a company-owned former

Edgar Filing: CARPENTER TECHNOLOGY CORP - Form 10-Q

operating site by \$0.1 million. The liabilities recorded for environmental remediation costs at Superfund sites, at other third party-owned sites and at Carpenter-owned current or former operating facilities remaining at September 30, 2013 and June 30, 2013 were \$14.9 million and \$14.8 million, respectively.

Table of Contents

CARPENTER TECHNOLOGY CORPORATION

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

Estimates of the amount and timing of future costs of environmental remediation requirements are inherently imprecise because of the continuing evolution of environmental laws and regulatory requirements, the availability and application of technology, the identification of currently unknown remediation sites and the allocation of costs among the PRP s. Based upon information currently available, such future costs are not expected to have a material effect on Carpenter s financial position, results of operations or cash flows over the long-term. However, such costs could be material to Carpenter s financial position, results of operations or cash flows in a particular future quarter or year.

Other

The Company is defending various routine claims and legal actions that are incidental to its business, and that are common to its operations, including those pertaining to product claims, commercial disputes, patent infringement, employment actions, employee benefits, compliance with domestic and foreign laws, personal injury claims and tax issues. Like many other manufacturing companies in recent years the Company, from time to time, has been named as a defendant in lawsuits alleging personal injury as a result of exposure to chemicals and substances in the workplace. The Company provides for costs relating to these matters when a loss is probable and the amount of the loss is reasonably estimable. The effect of the outcome of these matters on the Company s future results of operations and liquidity cannot be predicted because any such effect depends on future results of operations and the amount and timing (both as to recording future charges to operations and cash expenditures) of the resolution of such matters. While it is not feasible to determine the outcome of these matters, management believes that the total liability from these matters will not have a material effect on the Company s financial position, results of operations or cash flows over the long-term. However, there can be no assurance that an increase in the scope of pending matters or that any future lawsuits, claims, proceedings or investigations will not be material to the Company s financial position, results of operations or cash flows in a particular future quarter or year.

9. Fair Value Measurements

The fair value hierarchy has three levels based on the inputs used to determine fair value. Level 1 refers to quoted prices in active markets for identical assets or liabilities. Level 2 refers to observable inputs other than quoted prices included in Level 1 such as quoted prices for similar assets and liabilities in active markets; quoted prices for identical or similar assets and liabilities in markets that are not active; or other inputs that are observable or can be corroborated by observable market data. Level 3 refers to unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets and liabilities. This includes certain pricing models, discounted cash flow methodologies and similar techniques that use significant unobservable inputs. Currently, the Company does not use Level 3 inputs. The following tables present the Company s assets and liabilities that are measured at fair value on a recurring basis and are categorized using the fair value hierarchy.

Table of Contents**CARPENTER TECHNOLOGY CORPORATION****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS****(Unaudited)**

September 30, 2013 (\$ in millions)	Fair Value Measurements Using Input Type		
	Level 1	Level 2	Total
Assets:			
Marketable securities			
Municipal auction rate securities	\$ -	\$ 5.3	\$ 5.3
Derivative financial instruments	-	0.4	0.4
Total assets	\$ -	\$ 5.7	\$ 5.7
Liabilities:			
Derivative financial instruments	\$ -	\$ 67.4	\$ 67.4
June 30, 2013 (\$ in millions)	Fair Value Measurements Using Input Type		
	Level 1	Level 2	Total
Assets:			
Marketable securities			
Municipal auction rate securities	\$ -	\$ 5.4	\$ 5.4
Derivative financial instruments	-	0.9	0.9
Total assets	\$ -	\$ 6.3	\$ 6.3
Liabilities:			
Derivative financial instruments	\$ -	\$ 73.1	\$ 73.1

The Company's derivative financial instruments consist of commodity forward contracts, foreign exchange forward contracts and interest rate swaps. These instruments are measured at fair value using the market method valuation technique. The inputs to this technique utilize information related to foreign exchange rates, commodity prices and interest rates published by third-party leading financial news and data providers. Though based on observable data, the valuation of these instruments is not based on actual transactions for the same instruments and, as such, these instruments are classified as Level 2. The Company's use of derivatives and hedging policies are more fully discussed in Note 11.

The Company has currently chosen not to elect the fair value option for any items that are not already required to be measured at fair value in accordance with accounting principles generally accepted in the United States.

The carrying amounts of other financial instruments not listed in the table below approximate fair value due to the short-term nature of these items.

Edgar Filing: CARPENTER TECHNOLOGY CORP - Form 10-Q

The carrying amounts and estimated fair values of Carpenter's financial instruments not recorded at fair value in the financial statements were as follows:

	Carrying Value	Fair Value	Carrying Value	Fair Value
Long-term debt, including current portion	\$ 604.2	\$ 613.5	\$ 604.2	\$ 602.8
Company-owned life insurance	\$ 13.5	\$ 13.5	\$ 13.6	\$ 13.6

The carrying amount for Company-owned life insurance reflects cash surrender values based upon the market values of underlying securities, net of any outstanding policy loans. The carrying value associated with the cash surrender value of these policies is recorded in other assets in the accompanying consolidated balance sheets.

The fair values of long-term debt as of September 30, 2013 and June 30, 2013 were determined by using current interest rates for debt with terms and maturities similar to the Company's existing debt arrangements and accordingly would be classified as Level 2 inputs in the fair value hierarchy.

10. Other Income, Net

Other income, net consisted of the following:

(\$ in millions)	Three Months Ended September 30,	
	2013	2012
Unrealized gains on company owned life insurance contracts and investments held in rabbi trusts	\$ 0.4	\$ 2.6
Equity in earnings (losses) of unconsolidated subsidiaries	0.2	(0.6)
Other (expense) income	(0.5)	0.7
Total other income, net	\$ 0.1	\$ 2.7

11. Derivatives and Hedging Activities

The Company uses commodity swaps and forwards, interest rate swaps, forward interest rate swaps and foreign currency forwards to manage risks generally associated with commodity price, interest rate and foreign currency rate fluctuations. The following explains the various types of

Edgar Filing: CARPENTER TECHNOLOGY CORP - Form 10-Q

derivatives and includes a recap about the impact the derivative instruments had on the Company's financial position, results of operations, and cash flows.

Cash Flow Hedging *Commodity forward contracts:* The Company enters into commodity forward contracts to fix the price of a portion of anticipated future purchases of certain critical raw materials and energy to manage the risk of cash flow variability associated with volatile commodity prices. The commodity forward contracts have been designated as cash flow hedges. The qualifying hedge contracts are marked-to-market at each reporting date and any unrealized gains or losses are included in accumulated other comprehensive income to the extent effective, and reclassified to cost of sales in the period during which the hedged transaction affects earnings or it becomes probable that the forecasted transaction will not occur. As of September 30, 2013, that Company had forward contracts to purchase 34.7 million pounds of certain raw materials with settlement dates through December 2018.

Table of Contents

CARPENTER TECHNOLOGY CORPORATION

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

Cash Flow Hedging - Forward interest rate swaps: From time to time, the Company has entered into forward interest rate swap contracts to manage the risk of cash flow variability associated with fixed interest debt expected to be issued. The forward interest rate swaps have been designated as cash flow hedges. The qualifying hedge contracts are marked-to-market at each reporting date and any unrealized gains or losses are included in accumulated other comprehensive income to the extent effective, and reclassified to interest expense in the period during which the hedged transaction affects earnings or it becomes probable that the forecasted transaction will not occur. In connection with the issuance of the \$300.0 million of fixed rate notes during the third quarter of fiscal year 2013, all outstanding forward interest rate swaps were settled resulting in a gain of \$2.7 million that has been recognized in AOCI. This gain will be amortized as a reduction to interest expense over the term of the notes.

Cash Flow Hedging - Foreign currency forward contracts: The Company uses foreign currency forward contracts to hedge a portion of anticipated future sales denominated in foreign currencies, principally the Euro and Pound Sterling, in order to offset the effect of changes in exchange rates. The qualifying hedge contracts are marked-to-market at each reporting date and any unrealized gains or losses are included in accumulated other comprehensive income to the extent effective, and reclassified to net sales in the period during which the transaction affects earnings or it becomes probable that the forecasted transaction will not occur.

The Company also uses foreign currency forward contracts to protect certain short-term asset positions denominated in foreign currency against the effect of changes in exchange rates. These positions do not qualify for hedge accounting and accordingly, are marked-to-market at each reporting date through charges to other income and expense. As of September 30, 2013 and June 30, 2013, the fair value of the outstanding foreign currency forwards not designated as hedging instruments and the charges to income for changes in fair value for these contracts were not material.

Fair Value Hedging - Interest rate swaps: The Company uses interest rate swaps to achieve a level of floating rate debt relative to fixed rate debt where appropriate. The Company has designated fixed to floating interest rate swaps as fair value hedges. Accordingly, the changes in the fair value of these instruments are immediately recorded in earnings. The mark-to-market values of both the fair value hedging instruments and the underlying debt obligations are recorded as equal and offsetting gains and losses in interest expense in the Consolidated Statements of Income. For the three months ended September 30, 2013 and 2012, net gains of \$0.1 million and \$0.3 million, respectively, were recorded as a reduction to interest expense. These amounts include the impact of previously terminated swaps which are being amortized over the remaining term of the underlying debt.

Total liability derivatives	\$ 0.4	\$ 72.7	\$ 73.1

Table of Contents**CARPENTER TECHNOLOGY CORPORATION****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS****(Unaudited)*****Cash Flow Hedges***

For derivative instruments that are designated and qualify as cash flow hedges, the effective portion of the gain or loss on the derivative is reported as a component of accumulated other comprehensive income (AOCI) and reclassified into earnings in the same period or periods during which the hedged transactions affect earnings. The following is a summary of the gains (losses) related to cash flow hedges recognized during the three months ended September 30, 2013 and 2012:

(\$ in millions)		Amount of Gain (Loss) Recognized in AOCI on Derivatives (Effective Portion) Three Months Ended September 30,	
		2013	2012
Derivatives in Cash Flow Hedging Relationship:			
Commodity contracts		\$ 1.4	\$ 24.0
Foreign exchange contracts		0.5	(0.1)
Forward interest rate swaps		-	(1.7)
Total		\$ 1.9	\$ 22.2

(\$ in millions)		Amount of (Loss) Gain Reclassified from AOCI into Income (Effective Portion) Three Months Ended September 30,	
		2013	2012
Derivatives in Cash Flow Hedging Relationship	Location of (Loss) Gain Reclassified from AOCI into Income (Effective Portion)		
Commodity contracts	Cost of sales	\$ (7.7)	\$ (9.2)
Foreign exchange contracts	Net sales	(0.1)	0.1
Forward interest rate swaps	Interest expense	0.1	-
Total		\$ (7.7)	\$ (9.1)

The Company estimates that \$15.9 million of net derivative losses included in AOCI as of September 30, 2013 will be reclassified into earnings within the next 12 months. No significant cash flow hedges were discontinued during the quarter ended September 30, 2013. There was no ineffectiveness during the three months ended September 30, 2013 and 2012.

Table of Contents

CARPENTER TECHNOLOGY CORPORATION

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

The changes in AOCI associated with derivative hedging activities during the three months ended September 30, 2013 and 2012 were as follows:

(\$ in millions)	September 30,	
	2013	2012
Balance at July 1	\$ (41.5)	\$ (32.8)
Current period changes in fair value, net of tax	(1.2)	14.0
Reclassification to earnings, net of tax	4.8	5.7
Balance at September 30	\$ (37.9)	\$ (13.1)

According to the provisions of the Company's derivative arrangements, in the event that the fair value of outstanding derivative positions with certain counterparties exceeds certain thresholds, the Company may be required to issue cash collateral to the counterparties. The Company's contracts with these counterparties allow for netting of derivative instrument positions executed under each contract. As of September 30, 2013 and June 30, 2013, the Company had no cash collateral held by counterparties.

The Company is exposed to credit loss in the event of nonperformance by counterparties on its derivative instruments as well as credit or performance risk with respect to its customer commitments to perform. Although nonperformance is possible, the Company does not anticipate nonperformance by any of the parties. In addition, various master netting arrangements are in place with counterparties to facilitate settlement of gains and losses on these contracts.

12. Income Taxes

The effective tax rate used for interim periods is the estimated annual effective consolidated tax rate, based on the current estimate of full year results, except that taxes related to specific events, if any, are recorded in the interim period in which they occur.

Income tax expense for the three months ended September 30, 2013 was \$16.9 million, or 32.8 percent of pre-tax income as compared with \$19.6 million, or 33.2 percent of pre-tax income for the three months ended September 30, 2012.

13. Superalloy Powders Technical Assistance and Powder Supply Agreements

Edgar Filing: CARPENTER TECHNOLOGY CORP - Form 10-Q

On September 30, 2013, the Company entered in to a multi-level agreement with United Technologies Corporation (UTC), through its Pratt & Whitney Division, which includes a technical assistance agreement and a long-term powder supply agreement. The technical assistance agreement provides for the licensing of technology associated with the production of superalloy powders. As a result of the agreements, the Company plans to build a superalloy powder facility which is expected to take approximately 18 months to construct at an estimated cost of \$20 million. Once the facility is qualified by UTC, the Company will supply UTC with superalloy powder for up to 20 years. The powder supply agreement provides for minimum guaranteed purchase quantities of specified materials for a period of 12 years.

According to the terms of the technology licensing agreement, the Company agreed to pay a \$13.0 million up-front license fee, which is payable in equal quarterly installments beginning on December 15, 2013. As of September 30, 2013, the \$13.0 million up-front license fee is included in other assets and accrued liabilities.

CARPENTER TECHNOLOGY CORPORATION

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

14. Business Segments

The Company changed its reportable segments beginning with fiscal year 2014 first quarter results. The change reflects the completion of the integration of the Latrobe Specialty Metals, Inc. (Latrobe) businesses acquired by the Company in February 2012. Prior to this change, the Latrobe businesses were reported as a separate segment to provide management with the focus and visibility into the business of the acquired operations. The previously reported Latrobe segment also included the results of the Company's distribution business in Mexico. Since the Latrobe businesses are now fully integrated, the previously reported Latrobe segment has been merged into the Company's operating model, in which the Company's integrated steel mill operations are managed distinctly from the collection of other differentiated operations. Beginning the first quarter of fiscal year 2014, the Company has two reportable segments, Specialty Alloys Operations (SAO) and Performance Engineered Products (PEP).

The SAO segment is comprised of the Company's major premium alloy and stainless steel manufacturing operations. This includes operations performed at mills primarily in Reading and Latrobe and surrounding areas in Pennsylvania, South Carolina, and the new premium products manufacturing facility being built in Limestone County, Alabama. The combined assets of the SAO operations are being managed in an integrated manner to optimize efficiency and profitability across the total system.

The PEP segment is comprised of the Company's differentiated operations. This segment includes the Dynamet titanium business, the Carpenter Powder Products business, the Amega West business, the Specialty Steel Supply business and the Latrobe and Mexico distribution businesses. The businesses in the PEP segment are managed with an entrepreneurial structure to promote speed and flexibility, and drive overall revenue and profit growth.

The Company's executive management evaluates the performance of these operating segments based on sales, operating income and cash flow generation. Segment operating profit excludes general corporate costs, which include executive and director compensation, and other corporate facilities and administrative expenses not allocated to the segments. Also excluded are items that management considers not representative of ongoing operations, such as restructuring related charges, transaction costs associated with acquisitions, and other specifically-identified income or expense items.

The service cost component of the Company's net pension expense, which represents the estimated cost of future pension liabilities earned associated with active employees, is included in the operating income of the business segments. The residual net pension expense, which is comprised of the expected return on plan assets, interest costs on the projected benefit obligations of the plans, and amortization of actuarial gains and losses and prior service costs, is included under the heading Pension earnings, interest & deferrals.

Edgar Filing: CARPENTER TECHNOLOGY CORP - Form 10-Q

On a consolidated basis, there were no significant individual customers that accounted for more than 10 percent of the total net sales during the three months ended September 30, 2013 and 2012, respectively.

Table of Contents**CARPENTER TECHNOLOGY CORPORATION****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS****(Unaudited)**

The historical segment information for the three months ended September 30, 2012, which is set forth below, was recast to conform to the fiscal year 2014 presentation.

Segment Data (\$ in millions)	Three Months Ended September 30,	
	2013	2012

Table of Contents**CARPENTER TECHNOLOGY CORPORATION****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS****(Unaudited)****15. Recent Accounting Standards**

In December 2011, the FASB issued Accounting Standards Update No. 2011-11, *Disclosures about Offsetting Assets and Liabilities* (ASU 2011-11). ASU 2011-11 requires disclosures to provide information to help reconcile differences in offsetting requirements under U.S. GAAP and International Financial Reporting Standards (IFRS). The new disclosure requirements in ASU 2011-11 mandate that entities disclose both gross and net information about instruments and transactions eligible for offset in the statement of financial position as well as instruments and transactions subject to an agreement similar to a master netting arrangement. The guidance in ASU 2011-11 is required to be applied for annual reporting periods beginning on or after January 1, 2013, and interim periods within those annual periods. The adoption of ASU 2011-11 did not have a significant impact on the Company's Consolidated Financial Statements.

In February 2013, the FASB issued Accounting Standards Update No. 2013-02, *Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income* (ASU 2013-02). The guidance in ASU 2013-02 requires entities to present separately, among other items, the amount of the change that is due to reclassifications, and the amount that is due to current period other comprehensive income. ASU 2013-02 was effective for the Company beginning in the first quarter of fiscal year 2014. The Company adopted ASU 2013-02 effective July 1, 2013 and provided the additional disclosure required by the guidance in Note 16, below.

16. Reclassifications from Accumulated Other Comprehensive Income (AOCI)

The changes in AOCI by component, net of tax, for the three months ended September 30, 2013 were as follows:

(in millions) (a)	Cash flow hedging items	Pension and other postretirement benefit plan items	Unrealized gains and losses on available-for- sale securities	Foreign currency items	Total
Balance at June 30, 2013	\$ (41.5)	\$ (273.6)	\$ (0.4)	\$ (20.2)	\$ (335.7)
Other comprehensive (loss) income before reclassifications	(1.2)	-	(0.1)	3.5	2.2
Amounts reclassified from AOCI (b)	4.8	3.6	-	-	8.4
Net current-period other comprehensive income (loss)	3.6	3.6	(0.1)	3.5	10.6

Edgar Filing: CARPENTER TECHNOLOGY CORP - Form 10-Q

Balance at September 30, 2013	\$ (37.9)	\$ (270.0)	\$ (0.5)	\$ (16.7)	\$ (325.1)
-------------------------------	-----------	------------	----------	-----------	------------

(a) All amounts are net of tax. Amounts in parentheses indicate debits.

(b) See separate table below for further details.

(Unaudited)

The following is a summary of amounts reclassified from AOCI for the three months ended September 30, 2013:

(in millions) (a)

Details about AOCI Components	Amount Reclassified from AOCI	Location of (loss) gain
Cash flow hedging items		
Commodity contracts	\$ (7.7)	Cost of sales
Foreign exchange contracts	(0.1)	Net sales
Forward interest rate swaps	0.1	Interest expense
	(7.7)	Total before tax
	2.9	Tax benefit
	\$ (4.8)	Net of tax
Amortization of pension and other postretirement benefit plan items		
Net actuarial loss	\$ (5.8)	(b)
Prior service cost	(0.1)	(b)
	(5.9)	Total before tax
	2.3	Tax benefit
	\$ (3.6)	Net of tax

(a) Amounts in parentheses indicate debits to income/loss.

(b) These AOCI components are included in the computation of net periodic benefit cost (See Note 6 for additional details).

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Background and General

We are engaged in the manufacturing, fabrication, and distribution of specialty metals. We primarily process basic raw materials such as nickel, cobalt, titanium, manganese, chromium, molybdenum, iron scrap and other metal alloying elements through various melting, hot forming and cold working facilities to produce finished products in the form of billet, bar, rod, wire and narrow strip in many sizes and finishes. We also produce certain metal powders. Our sales are distributed directly from our production plants and distribution network as well as through independent distributors. Unlike many other specialty steel producers, we operate our own worldwide network of service/distribution centers. These service centers, located in the United States, Canada, Mexico, Europe and Asia allow us to work more closely with customers and to offer various just-in-time stocking programs. We also manufacture and rent down-hole drilling tools and components used in the oil and gas industry.

As part of our overall business strategy, we have sought out and considered opportunities related to strategic acquisitions and joint collaborations aimed at broadening our offering to the marketplace. We have participated with other companies to explore potential terms of and structure of such opportunities and we expect that we will continue to evaluate these opportunities.

Our discussions below in this Item 2 are based upon the more detailed discussions about our business, operations and financial condition included in Item 8 of our 2013 Form 10-K. Our discussions here focus on our results during or as of the three-month period ended September 30, 2013 and the comparable periods of fiscal year 2013, and, to the extent applicable, on material changes from information discussed in the 2013 Form 10-K or other important intervening developments or information that we have reported on Form 8-K. These discussions should be read in conjunction with the 2013 Form 10-K for detailed background information and with any such intervening Form 8-K.

Changes to Segment Reporting

We changed our reportable segments beginning with fiscal year 2014 first quarter results. The change reflects the completion of the integration of the Latrobe Specialty Metals, Inc. ("Latrobe") businesses acquired by the Company in February 2012. Prior to this change, the Latrobe businesses were reported as a separate segment to provide management with the focus and visibility into the business of the acquired operations. The previously reported Latrobe segment also included the results of the Company's distribution business in Mexico. Since the Latrobe businesses are now fully integrated, the previously reported Latrobe segment has been merged into the Company's operating model, in which the Company's integrated steel mill operations are managed distinctly from the collection of other differentiated operations. Beginning the first quarter of fiscal year 2014, the Company has two reportable segments, Specialty Alloys Operations ("SAO") and Performance Engineered Products ("PEP").

Impact of Raw Material Prices and Product Mix

Edgar Filing: CARPENTER TECHNOLOGY CORP - Form 10-Q

We value most of our inventory utilizing the last-in, first-out (LIFO) inventory costing methodology. Under the LIFO inventory costing method, changes in the cost of raw materials and production activities are recognized in cost of sales in the current period even though these materials may have been acquired at potentially significantly different values due to the length of time from the acquisition of the raw materials to the sale of the processed finished goods to the customers. In a period of rising raw material costs, the LIFO inventory valuation normally results in higher costs of sales. Conversely, in a period of decreasing raw material costs, the LIFO inventory valuation normally results in lower costs of sales.

Table of Contents

The volatility of the costs of raw materials has impacted our operations over the past several years. We, and others in our industry, generally have been able to pass cost increases on major raw materials through to our customers using surcharges that are structured to recover increases in raw material costs. Generally, the formula used to calculate a surcharge is based on published prices of the respective raw materials for the previous month which correlates to the prices we pay for our raw material purchases. However, a portion of our surcharges to customers may be calculated using a different surcharge formula or may be based on the raw material prices at the time of order, which creates a lag between surcharge revenue and corresponding raw material costs recognized in costs of sales. The surcharge mechanism protects our net income on such sales except for the lag effect discussed above. However, surcharges have had a dilutive effect on our gross margin and operating margin percentages as described later in this report.

Approximately 25 percent of our net sales are sales to customers under firm price sales arrangements. Firm price sales arrangements involve a risk of profit margin fluctuations, particularly when raw material prices are volatile. In order to reduce the risk of fluctuating profit margins on these sales, we enter into commodity forward contracts to purchase certain critical raw materials necessary to produce the related products sold. Firm price sales arrangements generally include certain annual purchasing commitments and consumption schedules agreed to by the customers at selling prices based on raw material prices at the time the arrangements are established. If a customer fails to meet the volume commitments (or the consumption schedule deviates from the agreed-upon terms of the firm price sales arrangements), the Company may need to absorb the gains or losses associated with the commodity forward contracts on a temporary basis. Gains or losses associated with commodity forward contracts are reclassified to earnings/loss when earnings are impacted by the hedged transaction. Because we value most of our inventory under the LIFO costing methodology, changes in the cost of raw materials and production activities are recognized in cost of sales in the current period attempting to match the most recently incurred costs with revenues. Gains or losses on the commodity forward contracts are reclassified from other comprehensive income together with the actual purchase price of the underlying commodities when the underlying commodities are purchased and recorded in inventory. To the extent that the total purchase price of the commodities, inclusive of the gains or losses on the commodity forward contracts, are higher or lower relative to the beginning of year costs, our costs of goods sold reflect such amounts. Accordingly, the gains and/or losses associated with commodity forward contracts may not impact the same period that the firm price sales arrangements revenue is recognized, and comparisons of gross profit from period to period may be impacted. These firm price sales arrangements are expected to continue as we look to strengthen our long-term customer relationships by expanding, renewing and in certain cases extending to a longer term, our customer long-term arrangements.

We produce hundreds of grades of materials with a wide range of pricing and profit levels depending on the grade. In addition, our product mix within a period is subject to the fluctuating order patterns of our customers as well as decisions we may make on participation in certain products based on available capacity, including the impacts of capacity commitments we may have under existing customer agreements. While we expect to see positive contribution from a more favorable product mix in our margin performance over time, the impact by period may fluctuate and period-to-period comparisons may vary.

Net Pension Expense

Net pension expense, as we define it below, includes the net periodic benefit costs related to both our pension and other postretirement plans. The current quarter's results include non-cash net pension expense of \$15.0 million, or \$0.18 per diluted share, versus \$17.2 million, or \$0.21 per diluted share, in the same quarter last year. See the section "Non-GAAP Financial Measures" below for further discussions of these financial measures.

Table of Contents

Net pension expense is determined annually based on beginning of year balances and is recorded ratably throughout the fiscal year, unless a significant re-measurement event occurs. We currently expect that the total net pension expense for fiscal year 2014 will be \$59.7 million as compared with \$68.8 million recorded in fiscal year 2013.

Net pension expense is recorded in accounts that are included in both the cost of sales and selling, general and administrative expenses lines of our Consolidated Statements of Income. The following is a summary of the classification of net pension expense for the three months ended September 30, 2013 and 2012:

	Three Months Ended September 30,	
(\$ in millions)	2013	2012
Cost of sales	\$ 11.2	\$ 12.8
Selling, general and administrative expenses	3.8	4.4
Net pension expense	\$ 15.0	\$ 17.2

The service cost component of net pension expense represents the estimated cost of future pension liabilities earned associated with active employees. The pension earnings, interest and deferrals expense is comprised of the expected return on plan assets, interest costs on the projected benefit obligations of the plans, and amortization of actuarial gains and losses and prior service costs. The following is a summary of the components of net pension expense during the three months ended September, 2013 and 2012:

	Three Months Ended September 30,	
(\$ in millions)	2013	2012
Service cost	\$ 9.0	\$ 9.2
Pension earnings, interest and deferrals	6.0	8.0
Net pension expense	\$ 15.0	\$ 17.2

Operating Performance Overview

For the quarter ended September 30, 2013, we reported net income attributable to Carpenter of \$34.6 million, or \$0.65 per diluted share, compared with income attributable to Carpenter for the same period a year earlier of \$39.2 million, or \$0.74 per diluted share. Our first quarter of fiscal year 2014 earnings were in line with our expectations. The results reflect solid execution in a challenging environment. As we had anticipated market demand remained soft as raw material and scrap prices remained low, lead times remained short, and economic uncertainty remained high.

Table of Contents

Results of Operations Three Months Ended September 30, 2013 vs. Three Months Ended September 30, 2012

Net Sales

Net sales for the three months ended September 30, 2013 were \$498.6 million, which was an 8 percent decrease over the same period a year ago. Excluding surcharge revenue, sales decreased 7 percent. Overall, pounds shipped were 1 percent higher than the first fiscal quarter a year ago. Net sales excluding surcharge revenues in our SAO segment decreased 6 percent on 1 percent higher volume, and net sales excluding surcharge revenues in our PEP segment decreased 12 percent on 19 percent lower shipment volume. Our core markets remained weak as continued supply chain destocking in the aerospace and energy markets reduced demand for our premium and ultra-premium products. The weakness in demand in our aerospace and energy markets was offset by increased lower value sales to meet growing demand from the transportation and industrial & consumer markets.

Geographically, sales outside the United States decreased 15 percent from the same period a year ago to \$138.6 million for the three months ended September 30, 2013. The decrease reflects continued softness in sales to Europe. Total international sales in the quarter represented 28 percent of total net sales, compared with 30 percent in the prior year.

Sales by End-Use Markets

We sell to customers across diversified end-use markets. The table below includes comparative information for net sales by end-use markets:

(\$ in millions)	Three Months Ended September 30,		\$ (Decrease)	% (Decrease)
	2013	2012		
Aerospace and defense	\$ 229.5	\$ 252.6	\$ (23.1)	(9)%
Industrial and consumer	109.2	113.9	(4.7)	(4)
Energy	66.3	77.4	(11.1)	(14)
Transportation	32.4	34.5	(2.1)	(6)
Medical	27.1	30.4	(3.3)	(11)
Distribution	34.1	36.1	(2.0)	(6)
Total net sales	\$ 498.6	\$ 544.9	\$ (46.3)	(8)%

The following table includes comparative information for our net sales by the same principal end-use markets, but excluding surcharge revenue:

(\$ in millions)	Three Months Ended September 30,		\$ (Decrease)	% (Decrease)
	2013	2012		
Aerospace and defense	\$ 182.9	\$ 195.3	\$ (12.4)	(6)%
Industrial and consumer	85.8	86.6	(0.8)	(1)

Edgar Filing: CARPENTER TECHNOLOGY CORP - Form 10-Q

Energy	59.1	69.4	(10.3)	(15)
Transportation	25.5	26.1	(0.6)	(2)
Medical	25.0	27.8	(2.8)	(10)
Distribution	33.8	35.6	(1.8)	(5)
Total net sales	\$ 412.1	\$ 440.8	\$ (28.7)	(7)%

Table of Contents

Sales to the aerospace and defense market decreased 9 percent from the first quarter a year ago to \$229.5 million. Excluding surcharge revenue, sales decreased 6 percent from the first quarter a year ago on 1 percent lower shipment volume. The results principally reflect the impact of customer destocking in the supply chain partially offset by solid year over year demand for titanium fasteners. Inventory supply chain adjustments continue to have a destabilizing effect on current demand, with higher levels of deferrals and cancellation activities as compared with the same period a year ago.

Industrial and consumer market sales decreased 4 percent from the first quarter a year ago to \$109.2 million. Excluding surcharge revenue, sales decreased 1 percent on a 6 percent increase in shipment volume. The results reflect strong demand for lower value materials used in sporting goods, industrial valve and infrastructure materials offset by softer demand within the electronics and distribution sectors.

Sales to the energy market of \$66.3 million reflected a 14 percent decrease from the first quarter a year ago. Excluding surcharge revenue, sales decreased 15 percent from a year ago on lower shipment volume of 19 percent. The results reflect lower activity levels in the oil and gas sector resulting in demand softness as well as weakness in demand for materials used in industrial gas turbines as major OEM s have cut back production levels.

Transportation market sales decreased 6 percent from the first quarter a year ago to \$32.4 million. Excluding surcharge revenue, sales decreased 2 percent on 13 percent higher shipment volume from the first quarter a year ago. The growth in volume is attributable to increased sales of automobiles in North America offset by declines in European vehicle sales. The European decline impacted our demand as we produce materials that have significant content on European vehicles due to the advanced fuel delivery systems and extensive use of turbochargers.

Sales to the medical market decreased 11 percent from a year ago to \$27.1 million. Excluding surcharge revenue, sales decreased 10 percent on flat shipment volume. The results reflect stable demand levels combined with the effects of industry-related cost reduction efforts by customers in the supply chain. The market continues to be impacted by competitive titanium pricing and short lead times.

Distribution sales decreased 6 percent from the first quarter a year ago to \$34.1 million. Excluding surcharge revenue, sales decreased 5 percent from the first quarter a year ago.

Sales by Product Class

The following table includes comparative information for our net sales by major product class:

	Three Months Ended September 30,		\$	%
(\$ in millions)	2013	2012	Increase (Decrease)	Increase (Decrease)
Special alloys	\$ 204.3	\$ 235.9	\$ (31.6)	(13)%
Stainless steels	146.3	143.5	2.8	2
Alloy and Tool steel	59.2	66.8	(7.6)	(11)

Edgar Filing: CARPENTER TECHNOLOGY CORP - Form 10-Q

Titanium products	36.9	39.7	(2.8)	(7)
Powder metals	10.4	15.9	(5.5)	(35)
Distribution and other	41.5	43.1	(1.6)	(4)
Total net sales	\$ 498.6	\$ 544.9	\$ (46.3)	(9)%

Table of Contents

The following table includes comparative information for our net sales by the same major product class, but excluding surcharge revenue:

(\$ in millions)	Three Months Ended September 30,		\$	%
	2013	2012	Increase (Decrease)	Increase (Decrease)
Special alloys	\$ 149.8	\$ 168.9	\$ (19.1)	(11)%
Stainless steels	125.2	120.9	4.3	4
Alloy and Tool steel	49.1	54.0	(4.9)	(9)
Titanium products	36.9	39.7	(2.8)	(7)
Powder metals	10.4	14.8	(4.4)	(30)
Distribution and other	40.7	42.5	(1.8)	(4)
Total net sales excluding surcharge revenues	\$ 412.1	\$ 440.8	\$ (28.7)	(7)%

Sales of special alloys products decreased 13 percent from a year ago at \$204.3 million. Excluding surcharge revenues, sales decreased 11 percent on a 4 percent decrease in shipment volume. The results reflect the impacts of lower demand in higher value material used in our aerospace and energy markets.

Sales of stainless steels increased 2 percent from a year ago to \$146.3 million. Excluding surcharge revenues, sales increased 4 percent on 10 percent higher shipment volume. The results reflect increased volumes in transportation and industrial and consumer markets combined with a shift in product mix to lower value material during the three months ended September 30, 2013.

Sales of alloy and tool steels decreased 11 percent from a year ago to \$59.2 million. Excluding surcharge revenues, sales decreased 9 percent on a 8 percent lower shipment volumes.

Sales of titanium products decreased 7 percent from a year ago to \$36.9 million on 2 percent higher volume.

Sales of powder metals decreased 35 percent from a year ago to \$10.4 million on a 44 percent decrease in shipment volume. The results reflect continued softness in powder sales, particularly in Europe.

Gross Profit

Our gross profit in the first quarter decreased 6 percent to \$103.3 million, or 20.7 percent of net sales (25.1 percent of net sales excluding surcharges), as compared with \$109.3 million, or 20.1 percent of net sales (24.8 percent of net sales excluding surcharges), in the same quarter a year ago. Our strong manufacturing performance contributed significantly to our earnings. In addition, decreased demand for our premium and ultra-premium products was offset by an increase in shipments of lower value materials helped drive higher levels of manufacturing efficiencies, which helped maintain our operating margins in the current period as compared with the same period a year ago.

Table of Contents

Our surcharge mechanism is structured to recover increases in raw material costs, although in certain cases with a lag effect as discussed above. While the surcharge generally protects the absolute gross profit dollars, it does have a dilutive effect on gross margin as a percent of sales. The following represents a summary of the dilutive impact of the surcharges on gross margin for the comparative three-month periods. See the section **Non-GAAP Financial Measures** below for further discussion of these financial measures.

(\$ in millions)	Three Months Ended September 30,	
	2013	2012
Net sales	\$ 498.6	\$ 544.9
Less: surcharge revenue	86.5	104.1
Net sales excluding surcharge revenues	\$ 412.1	\$ 440.8
Gross profit	\$ 103.3	\$ 109.3
Gross margin	20.7 %	20.1 %
Gross margin excluding dilutive effect of surcharge revenues	25.1 %	24.8 %

Selling, General and Administrative Expenses

Selling, general and administrative expenses of \$47.5 million were 9.5 percent of net sales (11.5 percent of net sales excluding surcharges) as compared with \$47.7 million or 8.8 percent of net sales (10.8 percent of net sales excluding surcharges) in the same quarter a year ago.

Operating Income

Our operating income in the recent first quarter was \$55.8 million as compared with \$61.6 million in the same period a year ago. Excluding surcharge revenue and pension earnings, interest and deferrals, operating margin was 15.0 percent for the current quarter as compared with 15.8 percent a year ago.

Operating income has been significantly impacted by our pension earnings, interest and deferrals (pension EID) expense, which may be volatile based on conditions in the financial markets. The following presents our operating income and operating margin, in each case excluding the impact of surcharges on net sales and excluding the impacts of pension EID expense. We present and discuss these financial measures because management believes removing the impact of volatile and non-recurring charges provides a more consistent and meaningful basis for comparing results of operations from period to period. See the section **Non-GAAP Financial Measures** below for further discussion of these financial measures.

Edgar Filing: CARPENTER TECHNOLOGY CORP - Form 10-Q

Table of Contents

(\$ in millions)	Three Months Ended September 30,	
	2013	2012
Net sales	\$ 498.6	\$ 544.9
Less: surcharge revenue	86.5	104.1
Net sales excluding surcharges	\$ 412.1	\$ 440.8
Operating income	\$ 55.8	\$ 61.6
Add back: pension EID expense	6.0	8.0
Operating income excluding pension EID expense	\$ 61.8	\$ 69.6
Operating margin	11.2 %	11.3 %
Operating margin excluding surcharges and pension EID expense	15.0 %	15.8 %

In addition to the impacts of the surcharge mechanism and pension EID expense, fluctuations in raw material prices (combined with fluctuations in inventory levels) and the lag effect of the surcharge mechanism have impacted our operating income from quarter to quarter. We estimate that the effect of such combined fluctuations positively impacted operating margin, excluding surcharges, by 80 basis points during the recent first quarter and positively impacted our operating margin, excluding surcharges, by 10 basis points during the prior year's first quarter.

Interest Expense

Interest expense for the quarter was \$4.4 million compared with \$5.2 million in the year-ago period. The results reflect higher debt levels in the current period as compared to a year ago which was more than offset by the impact of higher capitalized interest in the current period in connection with increased spending attributable to the ongoing construction project at our Alabama manufacturing plant. Interest expense in the three months ended September 30, 2013 excluded \$3.5 million of capitalized interest, as compared with \$0.8 million of capitalized interest in the same period a year ago.

Other Income, Net

Other income was \$0.1 million for the recent quarter compared to \$2.7 million in the first quarter a year ago due almost entirely to positive impacts in the funding mechanisms for certain non-qualified retirement plans in prior first quarter.

Income Taxes

Income taxes in the recent first quarter were \$16.9 million, or 32.8 percent of pre-tax income versus \$19.6 million, or 33.2 percent of pre-tax income in the same quarter a year ago.

[Table of Contents](#)

Business Segment Results

We have two reportable business segments: Specialty Alloys Operations (SAO) and Performance Engineered Products (PEP).

The following table includes comparative information for volumes by business segment:

	Three Months Ended September 30,			%
(Pounds sold, in thousands)	2013	2012	Increase (Decrease)	Increase (Decrease)
Specialty Alloys Operations	63,414	62,657	757	1%
Performance Engineered Products	2,726	3,384	(658)	(19)
Intersegment	(1,248)	(2,027)	779	38
Consolidated pounds sold	64,892	64,014	878	1%

The following table includes comparative information for net sales by business segment:

	Three Months Ended September 30,		\$	%
(\$ in millions)	2013	2012	Increase (Decrease)	Increase (Decrease)
Specialty Alloys Operations	\$ 394.9	\$ 431.0	\$ (36.1)	(8)%
Performance Engineered Products	118.5	134.9	(16.4)	(12)
Intersegment	(14.8)	(21.0)	6.2	30
Total net sales	\$ 498.6	\$ 544.9	\$ (46.3)	(9)%

The following table includes comparative information for our net sales by business segment, but excluding surcharge revenues:

	Three Months Ended September 30,		\$	%
(\$ in millions)	2013	2012	Increase (Decrease)	Increase (Decrease)
Specialty Alloys Operations	\$ 307.6	\$ 326.2	\$ (18.6)	(6)%
Performance Engineered Products	117.5	133.3	(15.8)	(12)
Intersegment	(13.0)	(18.7)	5.7	30
Total net sales excluding surcharge revenues	\$ 412.1	\$ 440.8	\$ (28.7)	(7)%

Specialty Alloys Operations Segment

Net sales for the quarter ended September 30, 2013 for the SAO segment decreased 8 percent to \$394.9 million, as compared with \$431.0 million in the same quarter a year ago. Excluding surcharge revenue, net sales decreased 6 percent on 1 percent higher shipment volume from a

Edgar Filing: CARPENTER TECHNOLOGY CORP - Form 10-Q

year ago. The decrease in sales combined with higher shipment volumes reflects an unfavorable shift in product mix.

Operating income for the SAO segment was \$63.7 million or 16.1 percent of net sales (20.7 percent of net sales excluding surcharge revenue) in the recent first quarter, as compared with \$67.2 million or 15.6 percent of net sales (20.6 percent of net sales excluding surcharge revenue) in the same quarter a year ago. The decrease in operating income reflects the impacts of a weaker product mix offset by strong manufacturing performance and focused cost control in the current first quarter as compared to the same period a year ago.

Table of Contents

Performance Engineered Products Segment

Net sales for the quarter ended September 30, 2013 for the PEP segment decreased 12 percent at \$118.5 million, as compared with \$134.9 million in the same quarter a year ago. Excluding surcharge revenue, net sales of \$117.5 million decreased 12 percent from a year ago. The results reflect continued softness in demand, particularly in the powder business.

Operating income for the PEP segment was \$11.6 million or 9.8 percent of net sales (9.9 percent of net sales excluding surcharge revenue) in the recent first quarter, compared with \$14.5 million or 10.7 percent of net sales (10.9 percent of net sales excluding surcharge revenue) in the same quarter a year ago. The results reflect the impact of lower sales levels in the current quarter as compared with a year ago.

Liquidity and Financial Condition

During the three months ended September 30, 2013, we generated cash flows from operations of \$64.0 million, as compared with cash flows used in operations of \$36.7 million in the same period a year ago. Our free cash flow, which we define under Non-GAAP Financial Measures below, was negative \$60.5 million as compared to negative \$102.7 million for the same period a year ago. In the first half of our fiscal year, we generally see an increase in working capital. In the first quarter of fiscal year 2014, we managed our net working capital more aggressively and as a result, we generated higher cash flows from operations as compared to the same period a year ago. In addition, pension contributions were \$1.5 million for the three months ended September 30, 2013 as compared to \$48.1 million in the same period a year ago as a result of a substantial discretionary contribution during fiscal year 2013. These positive impacts were offset by significantly higher capital spending largely related to the Limestone County, Alabama facility construction in the three months ended September 30, 2013. Capital expenditures for plant, equipment and software were \$114.9 million for the three months ended September 30, 2013, as compared with \$56.4 million for the same period a year ago.

Dividends during the three months ended September 30, 2013 and 2012 were \$9.6 million and were paid at the same quarterly rate of \$0.18 per share of common stock in both periods.

We have demonstrated the ability to generate cash to meet our needs through cash flow from operations, management of working capital and the availability of outside sources of financing to supplement internally generated funds. We believe that our cash and cash equivalents of approximately \$201.0 million as of September 30, 2013, together with cash generated from operations and available borrowing capacity of approximately \$491.8 million under our credit facilities will be sufficient to fund our cash needs over the foreseeable future.

During the three months ended September 30, 2013, we made \$1.5 million in cash contributions to our pension plans, and expect to make approximately \$4.8 million of cash contributions to the pension plans for the remainder of fiscal year 2014.

We generally target minimum liquidity, consisting of cash and cash equivalents added to available borrowing capacity under our credit agreement, of \$150.0 million. Our syndicated revolving credit agreement (Credit Agreement) contains a revolving credit commitment of \$500.0 million and expires in June 2018. As of September 30, 2013, we had \$8.2 million of issued letters of credit under the Credit Agreement. The

Edgar Filing: CARPENTER TECHNOLOGY CORP - Form 10-Q

balance of the Credit Agreement (\$491.8 million) remains available to us. As of September 30, 2013, we had total liquidity of approximately \$692.8 million. We also evaluate liquidity needs for alternative uses including funding external growth opportunities and pension plan contributions as well as funding consistent dividend payments to stockholders.

Table of Contents

As of September 30, 2013, we had cash and cash equivalents of approximately \$89 million held at various foreign subsidiaries. Our global cash deployment considers, among other things, the geographic location of our subsidiaries' cash balances, the locations of our anticipated liquidity needs, and the cost to access international cash balances, as necessary. The repatriation of cash from certain foreign subsidiaries could have adverse tax consequences as we may be required to pay and record U.S. income taxes and foreign withholding taxes in various tax jurisdictions on these funds to the extent they were previously considered permanently reinvested. We are currently evaluating additional opportunities to repatriate cash from foreign jurisdictions. Our current plans consider repatriating cash only at levels that would result in minimal or no net adverse tax consequences in the near term. From time to time, we may make short-term intercompany borrowings against our cash held outside the United States in order to reduce or eliminate any required borrowing under our Credit Agreement.

We are subject to certain financial and restrictive covenants under the Credit Agreement, which, among other things, require the maintenance of a minimum interest coverage ratio (3.50 to 1.00 as of September 30, 2013). The interest coverage ratio is defined in the Credit Agreement as, for any period, the ratio of consolidated earnings before interest, taxes, depreciation and amortization (EBITDA) to consolidated interest expense for such period. The Credit Agreement also requires the Company to maintain a debt to capital ratio of less than 55%. The debt to capital ratio is defined in the Credit Agreement as the ratio of consolidated indebtedness, defined as total long-term debt added to outstanding capital lease obligations and outstanding letters of credit, to consolidated capitalization, defined as consolidated indebtedness added to total equity. As of September 30, 2013, the Company was in compliance with all of the covenants of the Credit Agreement.

The following table shows our actual ratio performance with respect to the financial covenants, as of September 30, 2013:

	Covenant Requirement	Actual Ratio
Consolidated interest coverage	3.50 to 1.00 (minimum)	20.48 to 1.00
Consolidated debt to capital	55% (maximum)	31%

We continue to believe that we will maintain compliance with the financial and restrictive covenants in future periods. To the extent that we do not comply with the covenants under the Credit Agreement, this could reduce our liquidity and flexibility due to potential restrictions on borrowings available to us unless we are able to obtain waivers or modification of the covenants.

Table of Contents**Non-GAAP Financial Measures**

The following provides additional information regarding certain non-GAAP financial measures that we use in this report. Our definitions and calculations of these items may not necessarily be the same as those used by other companies.

Net Pension Expense per Diluted Share

(\$ in millions, except per share data)	Three Months Ended September 30,	
	2013	2012
Pension plans expense	\$ 12.2	\$ 14.9
Other postretirement benefit plans expense	2.8	2.3
	15.0	17.2
Income tax benefit	(5.3)	(6.0)
Net pension expense	\$ 9.7	\$ 11.2
Weighted average diluted common shares	53.5	53.4
Net pension expense per diluted share	\$ 0.18	\$ 0.21

Management believes that net pension expense per diluted share is helpful in analyzing the operational performance of the Company from period to period.

Net Sales and Gross Margin Excluding Surcharge Revenues

This report includes discussions of net sales and gross margin as adjusted to exclude the impact of raw material surcharges, which represent financial measures that have not been determined in accordance with U.S. GAAP. We present and discuss these financial measures because management believes removing the impact of raw material surcharges from net sales and gross margin provides a more consistent basis for comparing results of operations from period to period for the reasons discussed earlier in this report. See our earlier discussion of Gross Profit for a reconciliation of net sales and gross margin, excluding surcharges, to net sales as determined in accordance with U.S. GAAP.

Operating Income and Operating Margin Excluding Surcharges and Pension EID Expense

This report includes discussions of operating income and operating margin as adjusted to exclude the impact of raw material surcharges and pension EID expense, which represent financial measures that have not been determined in accordance with U.S. GAAP. We present and discuss these financial measures because management believes removing the impact of raw material surcharges from net sales provides a more consistent and meaningful basis for comparing results of operations from period to period for the reasons discussed earlier in this report. In addition, management believes that excluding pension earnings, interest and deferrals expense from operating income and operating margin is

Edgar Filing: CARPENTER TECHNOLOGY CORP - Form 10-Q

helpful in analyzing our operating performance particularly as pension EID expense may be volatile due to changes in the financial markets. See our earlier discussion of operating income for a reconciliation of operating income and operating margin excluding pension EID expense to operating income and operating margin determined in accordance with U.S. GAAP.

Table of Contents

Free Cash Flow

The following provides a reconciliation of free cash flow, as used in this report, to its most directly comparable U.S. GAAP financial measures:

(\$ in millions)	Three Months Ended September 30,	
	2013	2012
Net cash provided from (used for) operating activities	\$ 64.0	\$ (36.7)
Purchases of property, equipment, and software	(114.9)	(56.4)
Dividends paid	(9.6)	(9.6)
Free cash flow	\$ (60.5)	\$ (102.7)

Management believes that the presentation of free cash flow provides useful information to investors regarding our financial condition because it is a measure of cash generated which management evaluates for alternative uses. It is management's current intention to use excess cash to fund investments in capital equipment, acquisition opportunities and consistent dividend payments. Free cash flow is not a U.S. GAAP financial measure and should not be considered in isolation of, or as a substitute for, cash flows calculated in accordance with U.S. GAAP.

Contingencies

Environmental

We are subject to various federal, state, local and international environmental laws and regulations relating to pollution, protection of public health and the environment, natural resource damages and occupational safety and health. Although compliance with these laws and regulations may affect the costs of our operations, compliance costs to date have not been material. We have environmental remediation liabilities at some of our owned operating facilities and have been designated as a potentially responsible party (PRP) with respect to certain third-party Superfund waste-disposal sites and other third party owned sites. Additionally, we have been notified that we may be a PRP with respect to other Superfund sites as to which no proceedings have been instituted against us. Neither the exact amount of remediation costs nor the final method of their allocation among all designated PRPs at these Superfund sites has been determined. The liability for future environmental remediation costs is evaluated on a quarterly basis. We accrue amounts for environmental remediation costs that represent our best estimate of the probable and reasonably estimable costs related to environmental remediation. During the three months ended September 30, 2013, we increased the liability for a company-owned former operating site by \$0.1 million. The liabilities recorded for environmental remediation costs at Superfund sites, at other third party-owned sites and at Carpenter-owned current or former operating facilities remaining at September 30, 2013 and June 30, 2013 were \$14.9 million and \$14.8 million, respectively.

Estimates of the amount and timing of future costs of environmental remediation requirements are inherently imprecise because of the continuing evolution of environmental laws and regulatory requirements, the availability and application of technology, the identification of currently unknown remediation sites and the allocation of costs among the PRPs. Based upon information currently available, such future costs are not expected to have a material effect on our financial position, results of operations or cash flows over the long-term.

Table of Contents

Other

We are defending various routine claims and legal actions that are incidental to our business, and that are common to our operations, including those pertaining to product claims, commercial disputes, patent infringement, employment actions, employee benefits, compliance with domestic and foreign laws, personal injury claims and tax issues. Like many other manufacturing companies in recent years, we from time to time, have been named as a defendant in lawsuits alleging personal injury as a result of exposure to chemicals and substances in the workplace. We provide for costs relating to these matters when a loss is probable and the amount of the loss is reasonably estimable. The effect of the outcome of these matters on our future results of operations and liquidity cannot be predicted because any such effect depends on future results of operations and the amount and timing (both as to recording future charges to operations and cash expenditures) of the resolution of such matters. While it is not feasible to determine the outcome of these matters, we believe that the total liability from these matters will not have a material effect on our financial position, results of operations or cash flows over the long-term. However, there can be no assurance that an increase in the scope of pending matters or that any future lawsuits, claims, proceedings or investigations will not be material to our financial position, results of operations or cash flows in a particular future quarter or year.

Critical Accounting Policies and Estimates

Inventories

Inventories are stated at the lower of cost or market. The cost of inventories is primarily determined using the last in, first out (LIFO) method. Costs include direct materials, direct labor and applicable manufacturing overhead, and other direct costs. Under the LIFO inventory valuation method, changes in the cost of raw materials and production activities are recognized in cost of sales in the current period even though these materials and other costs may have been incurred at significantly different values due to the length of time of our production cycle. The prices for many of the raw materials we use have been volatile. Because we value most of our inventory utilizing the LIFO inventory costing methodology, rapid changes in raw material costs have an impact on our operating results. In a period of rising prices, cost of sales expense recognized under LIFO is generally higher than the cash costs incurred to acquire the inventory sold. Conversely, in a period of declining raw material prices, cost of sales recognized under LIFO is generally lower than cash costs incurred to acquire the inventory sold.

Other Critical Accounting Policies and Estimates

A summary of other significant accounting policies is discussed in our 2013 Form 10-K Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations, and in Note 1, Summary of Significant Accounting Policies, of the Notes to our Consolidated Financial Statements included in Part II, Item 8 thereto.

Table of Contents

Forward-Looking Statements

This Quarterly Report on Form 10-Q contains various Forward-looking Statements pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. These statements, which represent our expectations or beliefs concerning various future events, include statements concerning future revenues, earnings and liquidity associated with continued growth in various market segments and cost reductions expected from various initiatives. These forward-looking statements are subject to risks and uncertainties that could cause actual results to differ from those projected, anticipated or implied. The most significant of these uncertainties are described in our 2013 Form 10-K. They include but are not limited to: (1) the cyclical nature of the specialty materials business and certain end-use markets, including aerospace and defense, industrial and consumer, medical, transportation and energy, or other influences on our business such as new competitors, the consolidation of competitors, customers, and suppliers or the transfer of manufacturing capacity from the United States to foreign countries; (2) our ability to achieve cost savings, productivity improvements or process changes; (3) the ability to recoup increases in the cost of energy, raw materials, freight or other factors; (4) domestic and foreign excess manufacturing capacity for certain metals; (5) fluctuations in currency exchange rates; (6) the degree of success of government trade actions; (7) the valuation of the assets and liabilities in our pension trusts and the accounting for pension plans; (8) possible labor disputes or work stoppages; (9) the potential that our customers may substitute alternate materials or adopt different manufacturing practices that replace or limit the suitability of our products; (10) the ability to successfully acquire and integrate acquisitions, including the Latrobe Acquisition; (11) the availability of credit facilities and other financing sources to us, our customers or other members of the supply chain; (12) the ability to obtain energy or raw materials, especially from suppliers located in countries that may be subject to unstable political or economic conditions; (13) the fact that our manufacturing processes are dependent upon highly specialized equipment located primarily in one facility in Reading, Pennsylvania for which there may be limited alternatives if there are significant equipment failures or catastrophic event; and (14) the fact that our future success depends on the continued service and availability of key personnel, including members of our executive management team, management, metallurgists and other skilled personnel and the loss of these key personnel could affect our ability to perform until suitable replacements are found. Any of these factors could have an adverse and/or fluctuating effect on our results of operations. The forward-looking statements in this document are intended to be subject to the safe harbor protection provided by Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. We undertake no obligation to update or revise any forward-looking statements.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

We use derivative financial instruments to reduce certain types of financial risk. Firm price sales arrangements involve a risk of profit margin fluctuations particularly as raw material prices have been volatile. As discussed in Note 11 to the consolidated financial statements included in Part I, Item 1 of this Quarterly Report on Form 10-Q, Financial Statements, in order to reduce the risk of fluctuating profit margins on these sales, we enter into commodity forward contracts to purchase certain critical raw materials necessary to produce the products sold under the firm price sales arrangements. If a customer fails to perform its obligations under the firm price sales arrangements, we may realize losses as a result of the related commodity forward contracts. As of September 30, 2013, we had approximately \$63.3 million of deferred losses related to commodity forward contracts to purchase certain raw materials. A large portion of this balance is related to commodity forward contracts to support firm price sales arrangements associated with many customers. However, approximately 72 percent of these deferred losses relate to commodity forward contracts entered into to support sales under firm price sales arrangements with one customer in addition to the credit already extended to this customer in connection with outstanding trade receivables. Our customers have historically performed under these arrangements, and we believe that they will honor such obligations in the future.

Table of Contents

We are actively involved in managing risks associated with energy resources. Risk containment strategies include interaction with primary and secondary energy suppliers as well as obtaining adequate insurance coverage to compensate us for potential business interruption related to lack of availability of energy resources. In addition, we have used forwards and options to fix the price of a portion of our anticipated future purchases of certain energy requirements to protect against the impact of significant increases in energy costs. We also use surcharge mechanisms to offset a portion of these charges where appropriate.

Fluctuations in foreign currency exchange rates could subject us to risk of losses on anticipated future cash flows from our international operations or customers. Foreign currency forward contracts are used to hedge certain foreign exchange risk.

We have historically used interest rate swaps to achieve a level of floating rate debt relative to fixed rate debt where appropriate.

All hedging strategies are reviewed and approved by senior financial management before being implemented. Senior financial management has established policies regarding the use of derivative instruments that prohibit the use of speculative or leveraged derivatives. Market valuations are performed at least quarterly to monitor the effectiveness of our risk management programs.

Our pension plan assets are invested in different asset classes including large-, mid- and small-cap growth and value funds, index and international equity funds, short-term and medium-term duration fixed-income funds and high yield funds. Our current allocation policy is to invest approximately 60 percent of plan assets in U.S. and international equities and 40 percent of plan assets in fixed income securities.

The status of our financial instruments as of September 30, 2013 is provided in Note 9 to the consolidated financial statements included in Part I, Item 1, Financial Statements of this Quarterly Report on Form 10-Q. Assuming either of the following occurred on September 30, 2013, (a) an instantaneous 10 percent decrease in the price of raw materials and energy for which we have commodity forward contracts, or (b) a 10 percent strengthening of the U.S. dollar versus foreign currencies for which foreign exchange forward contracts existed, our results of operations would not have been materially affected in either scenario.

Item 4. Controls and Procedures

(a) Evaluation of Effectiveness of Disclosure Controls and Procedures

The Company's management, with the participation of the Company's Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of the Company's disclosure controls and procedures as defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), as of September 30, 2013. Based on that evaluation, our management, including the Chief Executive Officer and Chief Financial Officer, concluded that the Company's disclosure controls and procedures as of September 30, 2013 were effective in providing a reasonable level of assurance that information we are required to disclose in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods required under the Securities and Exchange Commission's rules and forms, including a reasonable level of assurance that information required to be disclosed by us in such reports is accumulated and communicated to the Company's management, including the Company's Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

(b) Changes in Internal Control over Financial Reporting

There have been no changes in the Company's internal control over financial reporting that occurred during the quarter ended September 30, 2013 that have materially affected, or are likely to materially affect, the Company's internal control over financial reporting.

PART II OTHER INFORMATION

Item 1. Legal Proceedings

Pending legal proceedings involve ordinary routine litigation incidental to our business, which we do not believe would have a material adverse effect on our business regardless of their outcome.

Item 1A. Risk Factors

We have evaluated the risks associated with our business and operations and determined that those risk factors included in Part 1, Item 1A of our 2013 Annual Report on Form 10-K adequately disclose the material risks that we face.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

There were no reportable purchases during the quarter ended September 30, 2013, provided however that 55,363 shares, at an average purchase price of \$50.59, were surrendered by employees to the Company during such quarter for the payment of the minimum tax liability withholding obligations upon the vesting of shares of restricted stock and the exercise of options. We do not consider this a share buyback program.
