BANK OF NOVA SCOTIA Form 424B5 May 04, 2016

Filed Pursuant to Rule 424(b)(5)
Registration Statement No. 333-200089
Amendment No. 1 to the
Pricing Supplement dated April 28, 2016
(To Prospectus dated December 1, 2014,
Prospectus Supplement dated December 1, 2014 and
Product Prospectus Supplement EQUITY INDICES
SUN-1 dated December 7, 2015)

The notes are being issued by The Bank of Nova Scotia (BNS). There are important differences between the notes and a conventional debt security, including different investment risks and certain additional costs. See <u>Risk Factors</u> beginning on page TS-7 of this term sheet and beginning on page PS-7 of product prospectus supplement EQUITY INDICES SUN-1.

The initial estimated value of the notes as of the pricing date is \$9.675 per unit, which is less than the public offering price listed below.

See <u>Summary</u> on the following page. <u>Risk Fac</u>tors beginning on page TS-7 of this term sheet and <u>Structuring the Notes</u> on page TS-11 of this term

sheet for additional information. The actual value of your notes at any time will reflect many factors and cannot be predicted with accuracy.

None of the U.S. Securities and Exchange Commission (the SEC), any state securities commission, or any other regulatory body has approved or disapproved of these securities or determined if this Note Prospectus (as defined below) is truthful or complete. Any representation to the contrary is a criminal offense.

	Per Unit	<u>Total</u>
Public offering price	\$ 10.00	\$14,905,900.00
Underwriting discount	\$ 0.20	\$298,118.00
Proceeds, before expenses, to BNS	\$ 9.80	\$14,607,782.00

This amended pricing supplement is being filed solely to assign a new CUSIP and ISIN to the Notes and supersedes in its entirety the related pricing supplement dated April 28, 2016 for the Notes. We refer to this amended pricing supplement as the pricing supplement.

Amended Pricing Supplement dated May 4, 2016

Linked to the EURO STOXX 50® Index, due April 25, 2019

Summary

The Autocallable Market-Linked Step Up Notes Linked to the EURO STOXX 50® Index, due April 25, 2019 (the notes) are our senior unsecured debt securities. The notes are not guaranteed or insured by the Canada Deposit Insurance Corporation or the FDIC, and are not, either directly or indirectly, an obligation of any third party. The notes will rank equally with all of our other unsecured senior debt. Any payments due on the notes, including any repayment of principal, will be subject to the credit risk of BNS. The notes will be automatically called at the applicable Call Amount if the Observation Level of the Market Measure, which is the EURO STOXX 50® Index (the Index), is equal to or greater than the Call Level on the relevant Observation Date. If not called, at maturity, the notes provide you with a Step Up Payment if the Ending Value of the Index is equal to or greater than the Starting Value, but is not greater than the Step Up Value. If the Ending Value is greater than the Step Up Value, you will participate on a 1-for-1 basis in the increase in the level of the Index above the Starting Value. If the Ending Value is less than the Starting Value, you will lose all or a portion of the principal amount of your notes. Payments on the notes, including the amount you receive at maturity or upon an automatic call, will be calculated based on the \$10 principal amount per unit and will depend on the performance of the Index, subject to our credit risk. See Terms of the Notes below.

The economic terms of the notes (including the Call Premiums and Call Amounts) are based on our internal funding rate, which is the rate we would pay to borrow funds through the issuance of market-linked notes, and the economic terms of certain related hedging arrangements. Our internal funding rate is typically lower than the rate we would pay when we issue conventional fixed rate debt securities. This difference in funding rate, as well as the underwriting discount and the hedging related charge described below, reduced the economic terms of the notes to you and the initial estimated value of the notes on the pricing date. Due to these factors, the public offering price you pay to purchase the notes will be greater than the initial estimated value of the notes.

On the cover page of this term sheet, we have provided the initial estimated value for the notes. This estimated value was determined by reference to our internal pricing models, which take into consideration certain factors, such as our internal funding rate on the pricing date and our assumptions about market parameters. For more information about the initial estimated value and the structuring of the notes, see Structuring the Notes on page TS-11.

Terms of the Notes

Issuer: Principal Amount:	The Bank of Nova Scotia (BNS) \$10.00 per unit	Call Premiums:	\$1.35 per unit if called on May 4, 2017 (which represents a return of 13.50% over the principal amount), and \$2.70 per unit if called on April 19, 2018 (which represents a return of 27.00% over the principal amount).
Term: Market Measure:	Approximately three years, if not called. The EURO STOXX 50® Index (Bloomberg symbol: SX5E), a price return index	Ending Value:	The closing level of the Market Measure on the scheduled calculation day. The calculation day is subject to postponement in the event of Market Disruption Events, as described beginning on page PS-21 of product prospectus supplement EQUITY INDICES SUN-1.

Starting Value:	3,125.43	Step Up Value:	4,063.06 (130% of the Starting Value, rounded to two decimal places).
Observation Level:	The closing level of the Market Measure on the applicable Observation Date.	Step Up Payment:	\$3.00 per unit, which represents a return of 30% over the principal amount.
Observation Dates:	May 4, 2017 and April 19, 2018, subject to postponement in the event of Market Disruption Events, as described beginning on page PS-21 of product prospectus supplement EQUITY INDICES SUN-1.	Threshold Value:	3,125.43 (100% of the Starting Value).
Call Level:	100% of the Starting Value	Calculation Day:	April 18, 2019
Call Amounts (per Unit):	\$11.35 if called on May 4, 2017 and \$12.70 if called on April 19, 2018.	Fees and Charges:	The underwriting discount of \$0.20 per unit listed on the cover page and the hedging related charge of \$0.075 per unit described in Structuring the Notes on page TS-11.
Call Settlement Dates:	Approximately the fifth business day following the applicable Observation Date, subject to postponement if the related Observation Date is postponed, as described beginning on page PS-21 of product prospectus supplement EQUITY INDICES SUN-1.	Calculation Agent:	Merrill Lynch, Pierce, Fenner & Smith Incorporated (MLPF&S).

These documents (together, the Note Prospectus) have been filed as part of a registration statement with the SEC, which may, without cost, be accessed on the SEC website as indicated above or obtained from MLPF&S by calling 1-800-294-1322. Before you invest, you should read the Note Prospectus, including this term sheet, for information about us and this offering. Any prior or contemporaneous oral statements and any other written materials you may have received are superseded by the Note Prospectus. Capitalized terms used but not defined in this term sheet have the meanings set forth in product prospectus supplement EQUITY INDICES SUN-1. Unless otherwise indicated or unless the context requires otherwise, all references in this document to we, us, our, or similar references are to BNS.

This amended and restated pricing supplement is being filed solely to assign a new CUSIP and ISIN to the Notes and supersedes the pricing supplement related hereto dated April 28, 2016 in its entirety.

Investor Considerations

You may wish to consider an investment in the notes if:

- § You are willing to receive a return on your investment capped at the applicable Call Premium if the relevant Observation Level is equal to or greater than the Call Level.
- § You anticipate that the notes will be automatically called or the Index will increase from the Starting Value to the Ending Value.

The notes may not be an appropriate investment for you if:

- You want to hold your notes for the full term.
- § You believe that the notes will not be automatically called and the Index will decrease from the Starting Value to the Ending Value.

-	to risk a substantial loss of principal and tomatically called and the Index decreases e Ending Value.	§	You seek principal	I repayment or preservation of capita	al.
§ You are willing on conventional interest bear	to forgo the interest payments that are paid iring debt securities.	§ your invest		payments or other current income o	n

Hypothetical Payout Profile and Examples of Payments at Maturity

These hypothetical values show a payout profile at maturity, which would only apply if the notes are not called on any Observation Date.

Autocallable Market-Linked Step Up Notes

This graph reflects the returns on the notes based on the Threshold Value of 100% of the Starting Value, the Step Up Payment of \$3.00 per unit, and the Step Up Value of 130% of the Starting Value. The green line reflects the returns on the notes, while the dotted gray line reflects the returns of a direct investment in the stocks included in the Index, excluding dividends.

This graph has been prepared for purposes of illustration only.

The following table and examples are for purposes of illustration only. They are based on hypothetical values and show hypothetical returns on the notes, assuming the notes are not called on any Observation Date. They illustrate the calculation of the Redemption Amount and total rate of return based on a hypothetical Starting Value of 100, a Threshold Value of 100, a Step Up Value of 130, the Step Up Payment of \$3.00 per unit and a range of hypothetical Ending Values. The actual amount you receive and the resulting total rate of return will depend on the actual Starting Value, Threshold Value, Ending Value, Step Up Value, whether the notes are called on an Observation Date, and whether you hold the notes to maturity. The following examples do not take into account any tax consequences from investing in the notes.

For recent actual levels of the Market Measure, see The Index section below. The Index is a price return index and as such the Ending Value will not include any income generated by dividends paid on the stocks included in the Index, which you would otherwise be entitled to receive if you invested in those stocks directly. In addition, all payments on the notes are subject to issuer credit risk.

Ending Value

Percentage Change from the Starting Value to the Ending Value

Redemption Amount per Unit

Total Rate of Return on the Notes

0.00			
0.00	-100.00%	\$0.00	-100.00%
50.00	-50.00%	\$5.00	-50.00%
80.00	-20.00%	\$8.00	-20.00%
90.00	-10.00%	\$9.00	-10.00%
94.00	-6.00%	\$9.40	-6.00%
97.00	-3.00%	\$9.70	-3.00%
100.00(1)(2)	0.00%	\$13.00(3)	30.00%
102.00	2.00%	\$13.00	30.00%
105.00	5.00%	\$13.00	30.00%
110.00	10.00%	\$13.00	30.00%
120.00	20.00%	\$13.00	30.00%
130.00(4)	30.00%	\$13.00	30.00%
140.00	40.00%	\$14.00	40.00%
143.00	43.00%	\$14.30	43.00%
150.00	50.00%	\$15.00	50.00%
160.00	60.00%	\$16.00	60.00%

- (1) The **hypothetical** Starting Value of 100 used in these examples has been chosen for illustrative purposes only. The actual Starting Value is 3,125.43, which was the closing level of the Market Measure on the pricing date.
- (2) This is the **hypothetical** Threshold Value.
- (3) This amount represents the sum of the principal amount and the Step Up Payment of \$3.00.
- (4) This is the **hypothetical** Step Up Value.

TS-5

Redemption Amount Calculation Examples

Example 1

The Ending Value is 90.00, or 90.00% of the Starting Value:

Starting Value: 100.00 Threshold Value: 100.00 Ending Value: 90.00

Redemption Amount per unit

Example 2

The Ending Value is 110.00, or 110.00% of the Starting Value:

Starting Value: 100.00 Step Up Value: 130.00 Ending Value: 110.00

Redemption Amount per unit, the principal amount plus the Step Up Payment, since the Ending Value is equal to or greater than the Starting Value, but less than the Step Up Value.

Example 3

The Ending Value is 143.00, or 143.00% of the Starting Value:

Starting Value: 100.00 Step Up Value: 130.00 Ending Value: 143.00

Redemption Amount per unit

Risk Factors

those listed on page PS	nportant differences between the notes and a conventional debt security. An investment in the notes involves significant risks, including below. You should carefully review the more detailed explanation of risks relating to the notes in the Risk Factors sections beginning -7 of product prospectus supplement EQUITY INDICES SUN-1, page S-2 of the prospectus supplement, and page 6 of the prospectus ove. We also urge you to consult your investment, legal, tax, accounting, and other advisors before you invest in the notes.
§ investment ı	If the notes are not automatically called, depending on the performance of the Index as measured shortly before the maturity date, you may result in a loss; there is no guaranteed return of principal.
§ comparable	Your return on the notes may be less than the yield you could earn by owning a conventional fixed or floating rate debt security of maturity.
§	If the notes are called, your investment return is limited to the return represented by the applicable Call Premium.
§	Your investment return may be less than a comparable investment directly in the stocks included in the Index.
§ value of the	Payments on the notes are subject to our credit risk, and actual or perceived changes in our creditworthiness are expected to affect the notes. If we become insolvent or are unable to pay our obligations, you may lose your entire investment.
§	The notes may be subject to write-off, write-down or conversion under current and proposed Canadian resolution powers.

§ Our initial estimated value of the notes does not represent future values of the notes and may differ from others estimates. Our initial estimated value of the notes is determined by reference to our internal pricing models when the terms of the notes are set. These pricing models

an estimate. The public offering price of the notes exceeds our initial estimated value because it includes costs associated with selling and structuring the notes, as well as hedging our obligations under the notes with a third party, which may include MLPF&S or one of its affiliates. These costs include the underwriting discount and an expected hedging related charge, as further described in Structuring the Notes on page TS-11.

Our initial estimated value of the notes is lower than the public offering price of the notes. Our initial estimated value of the notes is only

consider certain factors, such as our internal funding rate on the pricing date, the expected term of the notes, market conditions and other relevant factors existing at that time, and our assumptions about market parameters, which can include volatility, dividend rates, interest rates and other factors. Different pricing models and assumptions could provide valuations for the notes that are different from our initial estimated value. In addition, market conditions and other relevant factors in the future may change, and any of our assumptions may prove to be incorrect. On future dates, the market value of the notes could change significantly based on, among other things, the performance of the Index, changes in market conditions, our creditworthiness, interest rate movements and other relevant factors. These factors, together with various credit, market and economic factors over the term of the notes, are expected to reduce the price at which you may be able
