DELAWARE INVESTMENTS DIVIDEND AND INCOME FUND, INC. ANNOUNCES FINAL RESULTS OF TENDER OFFER

Philadelphia, July 9, 2007 - Delaware Investments Dividend and Income Fund, Inc. (NYSE: DDF) (the "Fund"), a closed-end management investment company, today announced the final results of its tender offer for up to 550,462 shares of its common stock representing up to 5 percent of its issued and outstanding shares of common stock. The offer expired at 11:59 p.m., New York City time, on Friday, June 29, 2007.

Based on a count by Mellon Investor Services, LLC, the depository for the tender offer, approximately 1,040,362.6736 shares of common stock, or approximately 9.4499 percent of the Fund's common stock outstanding, were tendered, and 550,462 have been accepted for cash payment at a price equal to \$14.43, the Fund's net asset value ("NAV") as of the close of regular trading on the New York Stock Exchange on July 2, 2007. Since the tender offer was oversubscribed, all tenders of shares are subject to proration (at a ratio of approximately 0.529105872) in accordance with terms of the tender offer. Following the purchase of the tendered shares, the Fund will have approximately 10,458,774 shares of common stock outstanding.

The Fund is a diversified, closed-end fund. The Fund's primary investment objective is to seek high current income; capital appreciation is a secondary objective. The Fund seeks to achieve its objectives by investing, under normal circumstances, at least 65 percent of its total assets in income-generating equity securities, including dividend-paying common stocks, convertible securities, preferred stocks and other equity-related securities. Up to 35 percent of the Fund's total assets may be invested in non-convertible debt securities consisting primarily of high-yield, high-risk corporate bonds. In addition, the Fund utilizes leveraging techniques in an attempt to obtain a higher return for the Fund. There is no assurance that the Fund will achieve its investment objectives.

In 1995, the Fund implemented a managed distribution policy. Under the policy, the Fund is managed with a goal of generating as much of the dividend as possible from ordinary income (net investment income and short-term capital gains). The balance of the dividend then comes from long-term capital gains and, if necessary, a return of capital.
