ATRION CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

(1) Basis of Presentation

In the opinion of management, all adjustments necessary for a fair presentation of results of operations for the periods presented have been included in the accompanying unaudited consolidated financial statements of Atrion Corporation and its subsidiaries (the "Company"). Such adjustments consist of normal recurring items. The accompanying financial statements have been prepared in accordance with the instructions to Form 10-Q and include the information and notes required by such instructions. Accordingly, the consolidated financial statements and notes thereto should be read in conjunction with the financial statements and notes included in the Company's 2007 Annual Report on Form 10-K.

(2) Inventories

Inventories are stated at the lower of cost or market. Cost is determined by using the first-in, first-out method. The following table details the major components of inventories (in thousands):

	June 30, 2008	December 31, 2007
Raw materials	\$ 8,384	\$ 7,452
Work in process	5,378	4,513
Finished goods	6,469	5,422
Total inventories	\$ 20,231	\$ 17,387

(3) Income per share

The following is the computation for basic and diluted income per share:

	Three months ended June 30,		Six months ended June 30,	
	2008	2007	2008	2007
	(in thousands, except per share amounts)			
Net income	\$ 4,135	\$ 3,618	\$ 7,791	\$ 6,755
Weighted average basic shares outstanding	1,956	1,883	1,946	1,878
Add: Effect of dilutive securities	49	95	58	99
Weighted average diluted shares outstanding	2,005	1,978	2,004	1,977
Earnings per share:				
Basic	\$ 2.11	\$ 1.92	\$ 4.00	\$ 3.60
Diluted	\$ 2.06	\$ 1.83	\$ 3.89	\$ 3.42

Outstanding options, restricted stock, and deferred stock units that were not included in the diluted income per share calculation because their effect would be anti-dilutive totaled 20,336 for the three-month and the six-month periods ended June 30, 2008, respectively, and none for the same periods in 2007.

Table of Contents

ATRION CORPORATION AND SUBSIDIARIES
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
 (Unaudited)

(4) Pension Benefits

The components of net periodic pension cost for the Atrion Corporation Cash Balance Plan (the “Plan”) are as follows (in thousands):

	Three Months ended June 30,		Six Months ended June 30,	
	2008	2007	2008	2007
Service cost	\$ --	\$ 65	\$ --	\$ 130
Interest cost	56	80	112	160
Expected return on assets	(55)	(123)	(110)	(246)
Prior service cost amortization	--	(9)	--	(18)
Actuarial loss	8	15	16	30
Net periodic pension cost	\$ 9	\$ 28	\$ 18	\$ 56

In September 2007, the Company terminated the Plan. Participants accrued pension benefits through December 31, 2007, but will not accrue any additional benefits under the Plan after that date. However, participants will continue to earn interest credits on their account balances until the Plan has settled all its obligations with respect to termination. The Company believes that the Plan is adequately funded to cover its settlement obligations. The final payout for the Plan termination will likely occur in early 2009 after all regulatory approvals are received.

(5) Recent Accounting Pronouncements

In May 2008, the FASB issued Statement of Financial Accounting Standards (SFAS) No. 162, “The Hierarchy of Generally Accepted Accounting Principles (GAAP)” (SFAS 162). The purpose of the new standard is to provide a consistent framework for determining what accounting principles should be used when preparing U.S. GAAP financial statements. Previous guidance did not properly rank the accounting literature. The new standard is effective 60 days following the Securities and Exchange Commission’s approval of the Public Company Accounting Oversight Board amendments to AU Section 411, “The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles.” The Company expects that the adoption of SFAS 162 will not have a material effect on the Company’s financial statements.

From time to time, new accounting pronouncements applicable to the Company are issued by the FASB or other standards setting bodies, which the Company will adopt as of the specified effective date. Unless otherwise discussed, the Company believes the impact of recently issued standards that are not yet effective will not have a material impact on its consolidated financial statements upon adoption.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Overview

The Company designs, develops, manufactures, sells and distributes products and components, primarily for the medical and healthcare industry. The Company markets components to other equipment manufacturers for incorporation in their products and sells finished devices to physicians, hospitals, clinics and other treatment centers. The Company's medical products primarily serve the fluid delivery, cardiovascular, and ophthalmology markets. The Company's other medical and non-medical products include instrumentation and disposables used in dialysis, contract manufacturing and valves and inflation devices used in marine and aviation safety products.

The Company's products are used in a wide variety of applications by numerous customers. The Company encounters competition in all of its markets and competes primarily on the basis of product quality, price, engineering, customer service and delivery time.

The Company's strategy is to provide a broad selection of products in the areas of its expertise. Research and development efforts are focused on improving current products and developing highly-engineered products that meet customer needs and have the potential for broad market applications and significant sales. Proposed new products may be subject to regulatory clearance or approval prior to commercialization and the time period for introducing a new product to the marketplace can be unpredictable. The Company also focuses on controlling costs by investing in modern manufacturing technologies and controlling purchasing processes. The Company has been successful in consistently generating cash from operations and has used that cash to reduce indebtedness, to fund capital expenditures, to repurchase stock and to pay dividends.

The Company's strategic objective is to further enhance its position in its served markets by:

- Focusing on customer needs;
- Expanding existing product lines and developing new products;
- Maintaining a culture of controlling cost; and
- Preserving and fostering a collaborative, entrepreneurial management structure.

For the three months ended June 30, 2008, the Company reported revenues of \$24.2 million, operating income of \$6.1 million and net income of \$4.1 million, up 4 percent, 13 percent and 14 percent, respectively, from the three months ended June 30, 2007. For the six months ended June 30, 2008, the Company reported revenues of \$48.8 million, operating income of \$11.6 million and net income of \$7.8 million, up 6 percent, 14 percent and 15 percent, respectively, from the six months ended June 30, 2007.

Results for the three months ended June 30, 2008

Consolidated net income totaled \$4.1 million, or \$2.11 per basic and \$2.06 per diluted share, in the second quarter of 2008. This is compared with consolidated net income of \$3.6 million, or \$1.92 per basic and \$1.83 per diluted share, in the second quarter of 2007. The income per basic share computations are based on weighted average basic shares outstanding of 1,955,749 in the 2008 period and 1,883,120 in the 2007 period. The income per diluted share computations are based on weighted average diluted shares outstanding of 2,004,924 in the 2008 period and 1,977,871 in the 2007 period.

Table of Contents

Consolidated revenues of \$24.2 million for the second quarter of 2008 were 4 percent higher than revenues of \$23.2 million for the second quarter of 2007. These increases were generally attributable to higher sales volumes.

Revenues by product line were as follows (in thousands):

	Three Months ended June 30,	
	2008	2007
Fluid Delivery	\$ 8,648	\$ 7,533
Cardiovascular	7,116	6,009
Ophthalmology	3,588	4,863
Other	4,890	4,794
Total	\$ 24,242	\$ 23,199

Cost of goods sold of \$13.1 million for the second quarter of 2008 was 2 percent higher than in the comparable 2007 period. Increased sales volume and increased manufacturing overhead costs were the primary contributors to the increase in cost of goods sold for the second quarter of 2008.

Gross profit of \$11.1 million in the second quarter of 2008 was \$786,000, or 8 percent, higher than in the comparable 2007 period. The Company's gross profit percentage in the second quarter of 2008 was 45.8 percent of revenues compared with 44.5 percent of revenues in the second quarter of 2007. The increase in gross profit percentage in the 2008 period compared to the 2007 period was primarily related to improved product mix and improved manufacturing efficiencies.

The Company's second quarter 2008 operating expenses of \$5.0 million were \$81,000 higher than the operating expenses for the second quarter of 2007. This increase was comprised of a \$34,000 increase in General and Administrative (G&A) expenses and a \$73,000 increase in Research and Development (R&D) expenses partially offset by a \$26,000 decrease in selling (Selling) expenses. The increase in G&A expenses for the second quarter of 2008 was principally attributable to increased compensation and benefit costs, and outside services. The increase in R&D costs was primarily related to prototype expenses, new product testing costs and increased compensation partially offset by decreased outside services. The decrease in Selling expenses for the second quarter of 2008 was primarily related to decreased promotion and advertising expenses. Operating income in the second quarter of 2008 increased \$705,000, to \$6.1 million, a 13 percent increase over operating income in the quarter ended June 30, 2007. Operating income was 25.3 percent of revenues in the second quarter of 2008 compared to 23.4 percent of revenues in the second quarter of 2007. The previously mentioned increase in gross profit partially offset by the increase in operating expenses were the major contributors to the operating income improvement in the second quarter of 2008.

Table of Contents

The Company had no interest expense for the second quarter of 2008 due to the retirement of outstanding debt in the third quarter of 2007. Interest expense was \$77,000 for the 2007 period and was attributable to borrowings related to a new Company facility. Income tax expense for the second quarter of 2008 was \$2.0 million compared to income tax expense of \$1.7 million for the same period in the prior year. The effective tax rate for the second quarter of 2008 was 33.1 percent compared with 32.5 percent for the second quarter of 2007. The higher effective income tax rate for the second quarter of 2008 is primarily a result of benefits from tax incentives for R&D expenditures being a smaller percentage of taxable income in 2008 than in 2007.

Results for the six months ended June 30, 2008

Consolidated net income totaled \$7.8 million, or \$4.00 per basic and \$3.89 per diluted share, in the first six months of 2008. This is compared with consolidated net income of \$6.8 million, or \$3.60 per basic and \$3.42 per diluted share, in the first six months of 2007. The income per basic share computations are based on weighted average basic shares outstanding of 1,946,258 in the 2008 period and 1,877,763 in the 2007 period. The income per diluted share computations are based on weighted average diluted shares outstanding of 2,004,006 in the 2008 period and 1,976,502 in the 2007 period.

Consolidated revenues of \$48.8 million for the first six months of 2008 were 6 percent higher than revenues of \$46.2 million for the first six months of 2007. These increases were generally attributable to higher sales volumes.

Revenues by product line were as follows (in thousands):

	Six Months ended June 30,	
	2008	2007
Fluid Delivery	\$ 16,896	\$ 14,747
Cardiovascular	14,584	12,061
Ophthalmology	7,368	9,517
Other	9,996	9,912
Total	\$ 48,844	\$ 46,237

Cost of goods sold of \$27.1 million for the first six months of 2008 was 3 percent higher than in the comparable 2007 period. Increased sales volume and increased manufacturing overhead costs were the primary contributors to the increase in cost of goods sold for the first six months of 2008.

Gross profit of \$21.8 million in the first six months of 2008 was \$1.8 million, or 9 percent, higher than in the comparable 2007 period. The Company's gross profit percentage in the first six months of 2008 was 44.6 percent of revenues compared with 43.2 percent of revenues in the first six months of 2007. The increase in gross profit percentage in the 2008 period compared to the 2007 period was primarily related to improved product mix and improved manufacturing efficiencies.

Table of Contents

The Company's first six months 2008 operating expenses of \$10.2 million were \$384,000 higher than the operating expenses for the first six months of 2007. This increase was comprised of a \$22,000 increase in Selling expenses, a \$157,000 increase in G&A expenses and a \$205,000 increase in R&D expenses. The increase in Selling expenses for the first six months of 2008 was primarily related to travel-related expenses. The increase in G&A expenses for the first six months of 2008 was principally attributable to increased compensation and benefits costs. The increase in R&D costs was primarily related to prototype expenses, new product testing costs and increased compensation and outside services. Operating income in the first six months of 2008 increased \$1.4 million to \$11.6 million, a 14 percent increase over operating income in the six months ended June 30, 2007. Operating income was 23.7 percent of revenues in the first six months of 2008 compared to 22.0 percent of revenues in the first six months of 2007. The previously mentioned increase in gross profit partially offset by the increase in operating expenses were the major contributors to the operating income improvement in the first six months of 2008.

The Company had no interest expense for the first six months of 2008 due to the retirement of outstanding debt in the third quarter of 2007. Interest expense was \$218,000 for the 2007 period and was attributable to borrowings related to a new Company facility. Income tax expense for the first six months of 2008 was \$3.9 million compared to income tax expense of \$3.2 million for the same period in the prior year. The effective tax rate for the first six months of 2008 was 33.2 percent compared with 32.2 percent for the first six months of 2007. The higher effective income tax rate for the first six months of 2008 is primarily a result of benefits from tax incentives for R&D expenditures being a smaller percentage of taxable income in 2008 than in 2007.

Liquidity and Capital Resources

At June 30, 2008, the Company had cash and cash equivalents of \$7.8 million compared with \$3.5 million at December 31, 2007. The Company had no outstanding borrowings under its \$25.0 million revolving credit facility ("Credit Facility") at June 30, 2008 and December 31, 2007. The Credit Facility, which expires November 12, 2009, and may be extended under certain circumstances, contains various restrictive covenants, none of which is expected to impact the Company's liquidity or capital resources. At June 30, 2008, the Company was in compliance with all financial covenants.

As of June 30, 2008, the Company had working capital of \$33.6 million, including \$7.8 million in cash and cash equivalents. The \$7.8 million increase in working capital during the first six months of 2008 was primarily related to increases in cash, accounts receivable, and inventories partially offset by increases in accrued income and other taxes. The increase in accounts receivable during the first six months of 2008 was primarily related to the increase in revenues for the second quarter of 2008 as compared to the fourth quarter of 2007. The change in inventories is related to increased stocking levels necessary to support current operations. In addition, the Company began a program to purchase critical raw material in large volumes to hedge against future price increases and take advantage of volume discounts. The increase in accrued income and other taxes is primarily related to federal income taxes and local property taxes. Cash flows from operating activities generated \$7.6 million for the six months ended June 30, 2008 as compared to \$10.3 million for the six months ended June 30, 2007. The 2008 decrease was primarily attributable to increased inventory and accounts receivable as compared to the 2007 period. During the first six months of 2008, the Company expended \$3.5 million for the addition of property and equipment. During the first six months of 2008, stock option activities generated \$1.1 million of cash and the Company paid dividends of \$942,000.

Table of Contents

The Company believes that its existing cash and cash equivalents, cash flows from operations, borrowings available under the Company's credit facility, supplemented, if necessary, with equity or debt financing, which the Company believes would be available, will be sufficient to fund the Company's cash requirements for the foreseeable future.

Forward-Looking Statements

The statements in this Management's Discussion and Analysis that are forward-looking are based upon current expectations, and actual results may differ materially. Therefore, the inclusion of such forward-looking information should not be regarded as a representation by the Company that the objectives or plans of the Company would be achieved. Such statements include, but are not limited to, the Company's expectations regarding future liquidity and capital resources. Words such as "anticipates," "believes," "expects," "estimated" and variations of such words and similar expressions are intended to identify such forward-looking statements. Forward-looking statements contained herein involve numerous risks and uncertainties, and there are a number of factors that could cause actual results or future events to differ materially, including, but not limited to, the following: changing economic, market and business conditions; acts of war or terrorism; the effects of governmental regulation; the impact of competition and new technologies; slower-than-anticipated introduction of new products or implementation of marketing strategies; implementation of new manufacturing processes or implementation of new information systems; the Company's ability to protect its intellectual property; changes in the prices of raw materials; changes in product mix; intellectual property and product liability claims and product recalls; the ability to attract and retain qualified personnel; and the loss of, or any material reduction in sales to, any significant customers. In addition, assumptions relating to budgeting, marketing, product development and other management decisions are subjective in many respects and thus susceptible to interpretations and periodic review which may cause the Company to alter its marketing, capital expenditures or other budgets, which in turn may affect the Company's results of operations and financial condition.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

For the quarter ended June 30, 2008, the Company did not experience any material changes in market risk exposures that affect the quantitative and qualitative disclosures presented in the Company's 2007 Annual Report on Form 10-K.

Table of Contents

Item 4.

Controls and Procedures

The Company's management, with the participation of the Company's Chief Executive Officer and its Chief Financial Officer, evaluated the Company's disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) as of June 30, 2008. Based upon this evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that the Company's disclosure controls and procedures are effective. There were no changes in the Company's internal control over financial reporting for the quarter ended June 30, 2008 that have materially affected or are reasonably likely to materially affect the Company's internal control over financial reporting.

PART II

OTHER INFORMATION

Item 1. Legal Proceedings

From time to time, the Company may be involved in claims or litigation that arise in the normal course of business. The Company is not currently a party to any legal proceedings, which, if decided adversely, would have a material adverse effect on the Company's business, financial condition, or results of operations.

Item 1A. Risk Factors

There were no material changes to Risk Factors disclosed in our annual report on Form 10-K for the year ended December 31, 2007.

Item 4. Submission of Matters to a Vote of Security Holders

The Company held its 2008 Annual Meeting of Stockholders on May 9, 2008 at its offices in Allen, Texas. At such meeting, the Company's stockholders ratified the appointment of Grant Thornton LLP as independent accountants with 1,753,436 shares voted for ratification, 6,790 voted against, 15,197 abstentions and zero broker non-votes. The voting with respect to the nominees for election as directors was as follows:

Nominee	Votes For	Votes Withheld
Emile A. Battat	1,716,449	58,975
Ronald N. Spaulding	1,366,343	409,081

The terms of the following directors continued after the meeting: Roger F. Stebbing, John P. Stupp, Jr., and Hugh J. Morgan, Jr.

Item 6. Exhibits and Reports on Form 8-K
