ITEM 1. REPORT TO SHAREHOLDERS.

John Hancock

Investors Trust

Ticker: JHI Semiannual report 4/30/15

A message to shareholders

Dear fellow shareholder,

U.S. economic growth continued, despite recent weakness caused largely by the harsh winter weather. The market expansion that began in 2009 so far remains intact. Positive economic and business news has translated into good news for U.S. investors, with continued solid results for a range of U.S. equity indexes in recent months. Many fixed-income indexes have also seen positive returns in this environment.

Outside of the United States, economies are struggling to replicate the kind of success we have enjoyed at home. Central banks across Europe and Asia have announced dramatic monetary policy measures to promote economic activity similar to the monetary policy activity of the U.S. Federal Reserve in recent years. As was the case in the United States beginning in 2009, many international markets have rallied in advance of sustained economic progress. China's stock market in particular has delivered extraordinary gains. In fact, our network of asset managers and research firms believes that government and central bank stimulus may prove to be the biggest driver of international market returns in 2015.

While maintaining adequate portfolio diversification is vital in any market environment, we believe it is especially important today given the unprecedented central bank interventions of the past few years and the very real geopolitical risk around the world. The uncertainty of today's global financial markets is one of the reasons we at John Hancock Investments believe it is important for long-term portfolios to have exposure to a diverse range of investments. Now may be a good time to discuss the resilience of your portfolio with your financial advisor.

On behalf of everyone at John Hancock Investments, I'd like to take this opportunity to welcome new shareholders and to thank existing shareholders for the continued trust you've placed in us.

Sincerely,

Andrew G. Arnott President and Chief Executive Officer John Hancock Investments

Your fund at a glance

INVESTMENT OBJECTIVE

The fund seeks to generate income for distribution to its shareholders, with capital appreciation as a secondary objective.

AVERAGE ANNUAL TOTAL RETURNS AS OF 4/30/15 (%)

The Barclays U.S. Government/Credit Bond Index is an unmanaged index of U.S. government bonds, U.S. corporate bonds, and Yankee bonds.

It is not possible to invest directly in an index.

The fund's most recent performance and current annualized distribution rate can be found at www.jhinvestments.com.

The performance data contained within this material represents past performance, which does not guarantee future results.

PERFORMANCE HIGHLIGHTS OVER THE LAST SIX MONTHS

High-yield and emerging-market bonds underperformed investment-grade bonds

The sharp downturn in oil prices disrupted the financial markets in late 2014, pressuring the performance of high-yield bonds and emerging-market debt.

Emphasis on higher-yielding securities detracted

The fund held substantial weightings in the credit-sensitive asset classes, which detracted from performance during the six-month period.

Positioning in investment-grade bonds helped

The fund's positioning in the investment-grade segment added value but was not enough to offset the weaker performance in high yield and the emerging markets.

PORTFOLIO COMPOSITION AS OF 4/30/15 (%)

A note about risks

As is the case with all closed-end funds, shares of this fund may trade at a discount or a premium to the fund's net asset value (NAV). An investment in the fund is subject to investment and market risks, including the possible loss of the entire principal invested. There is no guarantee prior distribution levels will be maintained, and distributions may include a substantial return of capital, which may increase the potential tax gain or reduce the potential tax loss of a subsequent sale of shares of the fund. Fixed-income investments are subject to interest-rate and credit risk; their value will normally decline as interest rates rise or if a creditor, grantor, or counterparty is unable or unwilling to make principal, interest, or settlement payments. Investments in higher-yielding, lower-rated securities include a higher risk of default. An issuer of securities held by the fund may default, have its credit rating downgraded, or otherwise perform poorly, which may affect fund performance. Certain market conditions, including reduced trading volume, heightened volatility, and rising interest rates, may impair liquidity, the ability of the fund to sell securities or close derivative positions at advantageous prices. The fund's use of leverage creates additional risks, including greater volatility of the fund's NAV, market price, and returns. There is no assurance that the fund's leverage strategy will be successful.

Discussion of fund performance

An interview with Portfolio Manager Jeffrey N. Given, CFA, John Hancock Asset Management a division of Manulife Asset Management (US) LLC

Jeffrey N. Given, CFA
Portfolio Manager
John Hancock Asset Management

Can you describe the market environment of the past six months?

Investment-grade bonds performed well during the fund's semiannual reporting period, but the more credit-sensitive areas of the market including high-yield bonds and emerging-market debt lagged. The primary reason for the shortfall in these areas was the extreme downturn that occurred in November and December. During this time, a sharp decline in the price of oil led to a sell-off in the bonds of companies with energy sector exposure. Coming at a time of low year-end trading volumes, this selling pressure spilled over to the entire high-yield market and led to substantial weakness across the asset class. The emerging markets were also hurt by the downturn in oil, as it muddied the credit outlook for oil-exporting nations.

Market performance stabilized with the onset of the new year, as liquidity conditions returned to normal and the price of oil began a gradual recovery. Investors became more comfortable with the outlook for U.S. Federal Reserve (Fed) policy, as slowing economic growth reduced the likelihood that the Fed would raise rates before autumn. The resulting recovery in the credit-sensitive asset classes enabled them to finish the six-month period with a positive return. Still, high-yield and emerging-market bonds lagged government bonds and investment-grade corporate debt, both of which were supported by the environment of slow growth, low inflation, and expectations of "lower for longer" Fed policy.

What aspects of the fund's positioning helped and hurt relative performance?

The fund delivered a positive return at net asset value but underperformed its comparative index, the Barclays U.S. Government/Credit Bond Index, during the semiannual period.

In managing the portfolio, we emphasize higher-yielding market segments such as high-yield bonds and emerging-market debt, neither of which is represented in the index. The reasoning behind this positioning is twofold. First, we believe the yield advantage of these asset classes can provide a meaningful boost to total return in the current, low-rate environment. At a time in which low bond yields mean that there is lower potential for price appreciation, yield can make a meaningful

contribution to total returns. Second, we think these areas of the market rather than those most sensitive to interest-rate movements are in the best position to benefit from the backdrop of modest economic expansion.

This strategy worked well during the first half of 2014, as well as in the trailing three- and five-year periods. However, the sell-off in the energy sector in late 2014 weighed on the prices of the fund's investments in bonds issued by companies such as Samson Investment Company, Key Energy Services, Inc., and Permian Holdings, Inc. We sold the position in Key Energy Services during the period. The fund's emerging-market allocation also lagged during this time, pressuring overall performance. Still, our credit analysis showed that the individual issuers to which the fund had exposure remained fundamentally sound. We therefore maintained the fund's substantial allocations to these asset classes, and in some cases we used the sell-off as an opportunity to add modestly to positions where we thought prices had overshot to the downside.

The fund's performance subsequently improved during the January-April period, as the restoration of normal liquidity conditions and the concurrent recovery in investors' risk appetites fueled a rebound in many oversold issues. We believe this validates our long-held view that focusing on the

creditworthiness and fundamentals of individual securities, rather than reacting to short-term market trends, is the optimal way to achieve long-term outperformance. Still, both high-yield and emerging-market bonds finished the period behind the index, so this aspect of our positioning was a net negative for performance over the full period.

The investment-grade portion of the portfolio performed reasonably well, but not to a large enough extent to offset the relative weakness in the higher-yielding asset classes. Still, the fund generated strong performance through our investments in mortgage-backed securities, corporate bonds issued by companies in the healthcare and utilities sectors, and several individual securities that performed particularly well due to company-specific developments. Among these were the bonds of Israel Electric Corp., Ltd. and Continental Resources, Inc.

What are some of the reasons behind the fund's current positioning?

We maintained a steady approach during the period, with the most notable shift being our decision to increase credit quality in the fund's high-yield portfolio. We accomplished this by reducing the fund's weighting in bonds rated CCC and adding to those rated BB and B. While this shift led to a modest reduction in the fund's yield, we believe it was prudent given our view that higher credit quality is called for at this stage of the business cycle. In addition, many companies are issuing debt to finance equity buybacks and acquisitions or to increase their dividends, all of which favor equity investors over bondholders. Believing this was a sign of rising risk in the market, we shifted the fund's positioning accordingly.

At the same time, we made a modest addition to the fund's weighting in emerging-market debt. Believing many investment-grade emerging-market corporate bonds offered attractive yields

6	

relative to similarly rated bonds in the United States, we rotated a portion of the fund's position in U.S. corporates into countries such as Mexico, Brazil, and Turkey, among others. We also believe that investments in emerging-market corporate debt can help improve overall portfolio diversification. We have been less enthusiastic on domestic investment-grade corporate bonds, which we have seen as being more fully valued. As a result, we used this segment of the portfolio as a source of funds to finance purchases in the emerging markets.

We maintained a duration below that of the comparative index throughout the period. As of April 30, 2015, the fund's duration stood at 4.1 years, which compared with 6.2 years for the index. The fund typically has a shorter duration due to its emphasis on higher-yielding securities, which tend to have shorter durations than lower-yield issues.

We continued to focus on using credit research to identify opportunities among individual securities in the higher-yielding segments of the market. Specifically, we strived to purchase the bonds of companies that demonstrated operational improvement and were effectively executing their business plans, but whose debt was also trading at attractive valuations. We believe this research-based approach is appropriate for the current environment.

Six months ended 4-30-15. Unaudited. Based on average 2daily shares outstanding.

³ Less than \$0.005 per share.

⁴ Total returns would have been lower had certain expenses not

been reduced during the applicable periods. Total return based on net asset value reflects changes in the fund's net asset value during each period. Total return based on market value reflects changes in market value. Each figure assumes that 5 dividend and capital gain distributions, if any, were reinvested. These figures will differ depending upon the level of any discount from or premium to net asset value at which the fund's shares traded during the period. 6Not annualized. 7 Annualized. Expenses including reductions excluding interest expense were 1.02%, 1.05%, 1.07%, 1.07%,1.04% and 81.12% for the periods ended 4-31-15, 10-31-14, 10-31-13, 10-31-12, 10-31-11 and 10-31-10, respectively. Asset coverage equals the total net assets plus borrowings divided by the borrowings of the fund outstanding at period 9 end (Note 7). As debt outstanding changes, level of invested assets may change accordingly. Asset coverage ratio provides a measure of leverage.

24SEE NOTES TO FINANCIAL STATEMENTS

Notes to financial statements (unaudited)

Note 1 Organization

John Hancock Investors Trust (the fund) is a closed-end management investment company organized as a Massachusetts business trust and registered under the Investment Company Act of 1940, as amended (the 1940 Act).

In 2012 and 2015, the fund filed registration statements with the Securities and Exchange Commission, registering an additional 1,000,000 and 1,000,000 common shares, respectively, through equity shelf offering programs. Under these programs, the fund, subject to market conditions, may raise additional equity capital from time to time by offering new common shares at a price equal to or above the fund's net asset value per common share.

Note 2 Significant accounting policies

The financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America (US GAAP), which require management to make certain estimates and assumptions as of the date of the financial statements. Actual results could differ from those estimates and those differences could be significant. The fund qualifies as an investment company under Topic 946 of Accounting Standards Codification of US GAAP.

Events or transactions occurring after the end of the fiscal period through the date that the financial statements were issued have been evaluated in the preparation of the financial statements. The following summarizes the significant accounting policies of the fund:

Security valuation. Investments are stated at value as of the close of regular trading on the New York Stock Exchange (NYSE), normally at 4:00 p.m., Eastern Time. In order to value the securities, the fund uses the following valuation techniques: Equity securities held by the fund are valued at the last sale price or official closing price on the exchange where the security was acquired or most likely will be sold. In the event there were no sales during the day or closing prices are not available, the securities are valued using the last available bid price. Debt obligations are valued based on the evaluated prices provided by an independent pricing vendor or from broker-dealers. Independent pricing vendors utilize matrix pricing which takes into account factors such as institutional-size trading in similar groups of securities, yield, quality, coupon rate, maturity, type of issue, trading characteristics and other market data, as well as broker supplied prices. Swaps are valued using evaluated prices obtained from an independent pricing vendor. Foreign securities are valued in U.S. dollars, based on foreign currency exchange rates supplied by an independent pricing vendor. Securities that trade only in the over-the-counter (OTC) market are valued using bid prices. Other portfolio securities and assets, for which reliable market quotations are not readily available, are valued at fair value as determined in good faith by the fund's Pricing Committee following procedures established by the Board of Trustees. The frequency with which these fair valuation procedures are used cannot be predicted and fair value of securities may differ significantly from the value that would have been used had a ready market for such securities existed.

The fund uses a three-tier hierarchy to prioritize the pricing assumptions, referred to as inputs, used in valuation techniques to measure fair value. Level 1 includes securities valued using quoted prices in active markets for identical securities. Level 2 includes securities valued using other significant observable inputs. Observable inputs may include quoted prices for similar securities, interest rates, prepayment speeds and credit risk. Prices for securities valued using these inputs are received from independent pricing vendors and brokers and are based on an evaluation of the inputs described. Level 3 includes securities valued using significant unobservable inputs when market prices are not readily available or reliable, including the fund's own assumptions in determining the fair value of investments. Factors used in determining value may include market or issuer specific events or trends, changes in interest rates and credit quality. The inputs or methodology used for valuing securities are not necessarily an indication of the risks associated

with investing in those securities. Changes in valuation techniques may result in transfers into or out of an assigned level within the disclosure hierarchy.

The following is a summary of the values by input classification of the fund's investments as of April 30, 2015, by major security category or type:

	Total market value at 4-30-15	Level 1 quoted price	Level 2 significant observable inputs	Level 3 significant unobservable inputs

Repurchase agreements. The fund may enter into repurchase agreements. When the fund enters into a repurchase agreement, it receives collateral that is held in a segregated account by the fund's custodian. The collateral amount is marked-to-market and monitored on a daily basis to ensure that the collateral held is in an amount not less than the principal amount of the repurchase agreement plus any accrued interest. Collateral received by the fund for repurchase agreements is disclosed in the Fund's investments as part of the caption related to the repurchase agreement.

Repurchase agreements are typically governed by the terms and conditions of the Master Repurchase Agreement and/or Global Master Repurchase Agreement (collectively, MRA). Upon an event of default, the non-defaulting party may close out all transactions traded under the MRA and net amounts owed. Absent an event of default, assets and liabilities resulting from repurchase agreements are not offset in the Statement of assets and liabilities. In the event of a default by the counterparty, realization of the collateral proceeds could be delayed, during which time the collateral value may decline or the counterparty may have insufficient assets to pay back claims resulting from close-out of the transactions.

Security transactions and related investment income. Investment security transactions are accounted for on a trade date plus one basis for daily net asset value calculations. However, for financial reporting purposes, investment transactions are reported on trade date. Interest income is accrued as earned. Interest income includes coupon interest and amortization/accretion of premiums/discounts on debt securities. Debt obligations may be placed in a non-accrual status and related interest income may be reduced by stopping current accruals and writing off interest receivable when the collection of all or a portion of interest has become doubtful. Dividend income is recorded on the ex-date, except for dividends of foreign securities where the dividend may not be known until after the ex-date. In those cases, dividend income, net of withholding taxes, is recorded when the fund becomes aware of the dividends. Distributions received on securities that represent a return of capital or capital gain are recorded as a reduction of cost of investments and/or as a realized gain if amounts are estimable. Foreign taxes are provided for based on the fund's understanding of the tax rules and rates that exist in the foreign markets in which it invests. Gains and losses on securities sold are determined on the basis of identified cost and may include proceeds from litigation.

Foreign currency translation. Assets, including investments and liabilities denominated in foreign currencies, are translated into U.S. dollar values each day at the prevailing exchange rate. Purchases and sales of securities, income and expenses are translated into U.S. dollars at the prevailing exchange rate on the date of the transaction. The effect of changes in foreign currency exchange rates on the value of securities is reflected as a component of the realized and

unrealized gains (losses) on investments.

Funds that invest internationally generally carry more risk than funds that invest strictly in U.S. securities. These risks are heightened for investments in emerging markets. Risks can result from differences in economic and political conditions, regulations, market practices (including higher transaction costs), accounting standards and other factors. Foreign investments are also subject to a decline in the value of a foreign currency versus the U.S. dollar, which reduces the dollar value of securities denominated in that currency.

Stripped securities. Stripped securities are financial instruments structured to separate principal and interest cash flows so that one class receives principal payments from the underlying assets (PO or principal only), while the other class receives the interest cash flows (IO or interest only). Both PO and IO investments represent an interest in the cash flows of an underlying stripped security. If the underlying assets experience greater than anticipated prepayments of principal, the fund may fail to fully recover its initial investment in an IO security. The market value of these securities can be extremely volatile in response to changes in interest rates or prepayments on the underlying securities. In addition, these securities present additional credit risk such that the fund may not receive all or part of its principal or interest payments because the borrower or issuer has defaulted on its obligation.

Overdrafts. Pursuant to the custodian agreement, the fund's custodian may, in its discretion, advance funds to the fund to make properly authorized payments. When such payments result in an overdraft, the fund is obligated to repay the custodian for any overdraft, including any costs or expenses associated with the overdraft. The custodian may have a lien, security interest or security entitlement in any fund property that is not otherwise segregated or pledged, to the maximum extent permitted by law, to the extent of any overdraft.

Expenses. Within the John Hancock group of funds complex, expenses that are directly attributable to an individual fund are allocated to such fund. Expenses that are not readily attributable to a specific fund are allocated among all funds in an equitable manner, taking into consideration, among other things, the nature and type of expense and the fund's relative net assets. Expense estimates are accrued in the period to which they relate and adjustments are made when actual amounts are known.

Federal income taxes. The fund intends to continue to qualify as a regulated investment company by complying with the applicable provisions of the Internal Revenue Code and will not be subject to federal income tax on taxable income that is distributed to shareholders. Therefore, no federal income tax provision is required.

Under the Regulated Investment Company Modernization Act of 2010, the fund is permitted to carry forward capital losses incurred in taxable years beginning after December 22, 2010 for an unlimited period. Any losses incurred during those taxable years will be required to be utilized prior to the losses incurred in pre-enactment taxable years. As a result of this ordering rule, pre-enactment capital loss carryforwards may be more likely to expire unused. Additionally, post-enactment capital losses that are carried forward will retain their character as either short-term or long-term capital losses rather than being considered all short-term as under previous law.

For federal income tax purposes, as of October 31, 2014, the fund had a capital loss carryforward of \$6,936,994 available to offset future net realized capital gains. The following table details the capital loss carryforward available:

Capital loss carryforward expiring at

October 31

2015 2016 2017 2019

\$1,304,634\$912,660\$2,675,603\$2,044,097

As of October 31, 2014, the fund had no uncertain tax positions that would require financial statement recognition, derecognition or disclosure. The fund's federal tax returns are subject to examination by the Internal Revenue Service for a period of three years.

Distribution of income and gains. Distributions to shareholders from net investment income and net realized gains, if any, are recorded on the ex-date. The fund generally declares and pays dividends quarterly and capital gain distributions, if any, annually.

Such distributions, on a tax basis, are determined in conformity with income tax regulations, which may differ from US GAAP. The final determination of tax characteristics of the fund's distribution will occur at the end of the fiscal year and will subsequently be reported to shareholders.

Capital accounts within the financial statements are adjusted for permanent book-tax differences. These adjustments have no impact on net assets or the results of operations. Temporary book-tax differences, if any, will reverse in a subsequent period. Book-tax differences are primarily attributable to derivative transactions and amortization and accretion on debt securities.

Statement of cash flows. Information on financial transactions that have been settled through the receipt and disbursement of cash is presented in the Statement of cash flows. The cash amount shown in the Statement of cash flows is the amount included in the fund's Statement of assets and liabilities and represents the cash on hand at the fund's custodian and does not include any short-term investments or cash segregated at the custodian for swap contracts.

Note 3 Derivative instruments

The fund may invest in derivatives in order to meet its investment objectives. Derivatives include a variety of different instruments that may be traded in the OTC market, on a regulated exchange or through a clearing facility. The risks in using derivatives vary depending upon the structure of the instruments, including the use of leverage, optionality, the liquidity or lack of liquidity of the contract, the creditworthiness of the counterparty or clearing organization and the volatility of the position. Some derivatives involve risks that are potentially greater than the risks associated with investing directly in the referenced securities or other referenced underlying instrument. Specifically, the fund is exposed to the risk that the counterparty to an OTC derivatives contract will be unable or unwilling to make timely settlement payments or otherwise honor its obligations. OTC derivatives transactions typically can only be closed out with the other party to the transaction.

Forward foreign currency contracts and certain swaps are typically traded through the OTC market and may be regulated by the Commodity Futures Trading Commission. Derivative counterparty risk is managed through an ongoing evaluation of the creditworthiness of all potential counterparties and, if applicable, designated clearing organizations. The fund attempts to reduce its exposure to counterparty risk for derivatives traded in the OTC market, whenever possible, by entering into an International Swaps and Derivatives Association (ISDA) Master Agreement with each of its OTC counterparties. The ISDA gives each party to the agreement the right to terminate all transactions traded under the agreement if there is certain deterioration in the credit quality or contractual default of the other party, as defined in the ISDA. Upon an event of default or a termination of the ISDA, the non-defaulting party has the right to close out all transactions and to net amounts owed.

As defined by the ISDA, the fund may have collateral agreements with certain counterparties to mitigate counterparty risk on OTC derivatives. Subject to established minimum levels, collateral for OTC transactions is generally determined based on the net aggregate unrealized gain or loss on contracts with a particular counterparty. Collateral pledged to the fund is held in a segregated account by a third-party agent or held by the custodian bank for the benefit of the fund and can be in the form of cash or debt securities issued by the U.S. government or related agencies; collateral posted by the fund for OTC transactions is held in a segregated account at the fund's custodian and is noted in the accompanying Fund's investments, or if cash is posted, on the Statement of assets and liabilities. The fund's maximum risk of loss due to counterparty risk is equal to the asset value of outstanding contracts offset by collateral received.

Forward foreign currency contracts. A forward foreign currency contract is an agreement between two parties to buy and sell specific currencies at a price that is set on the date of the contract. The forward contract calls for delivery of the currencies on a future date that is specified in the contract. Risks related to the use of forwards include the possible failure of counterparties to meet the terms of the forward agreement, the failure of the counterparties to

timely post collateral if applicable, the risk that currency movements will not favor the fund thereby reducing the fund's total return, and the potential for losses in excess of the amounts recognized on the Statement of assets and liabilities.

The market value of a forward foreign currency contract fluctuates with changes in foreign currency exchange rates. Forward foreign currency contracts are marked-to-market daily and the change in value is recorded by the fund as an unrealized gain

or loss. Realized gains or losses, equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed, are recorded upon delivery or receipt of the currency or settlement with the counterparty.

During the six months ended April 30, 2015, the fund used forward foreign currency contracts to manage against anticipated changes in currency exchange rates. During the six months ended April 30, 2015, the fund held forward foreign currency contracts with U.S. dollar notional values ranging up to \$679,100 as measured at each quarter end. There were no open forward foreign currency contracts at April 30, 2015.

Interest rate swaps. Interest rate swaps represent an agreement between the fund and counterparty to exchange cash flows based on the difference between two interest rates applied to a notional amount. The payment flows are usually netted against each other, with the difference being paid by one party to the other. The fund settles accrued net interest receivable or payable under the swap contracts at specified, future intervals. Swap agreements are privately negotiated in the OTC market or may be executed on a registered commodities exchange (centrally cleared swaps). Swaps are marked-to-market daily and the change in value is recorded as unrealized appreciation/depreciation of swap contracts. A termination payment by the counterparty or the fund is recorded as realized gain or loss, as well as the net periodic payments received or paid by the fund. The value of the swap will typically impose collateral posting obligations on the party that is considered out-of-the-money on the swap.

Entering into swap agreements involves, to varying degrees, elements of credit, market and documentation risk that may amount to values that are in excess of the amounts recognized on the Statement of assets and liabilities. Such risks involve the possibility that there will be no liquid market for the swap, or that counterparty may default on its obligation or delay payment under the swap terms. The counterparty may disagree or contest the terms of the swap. Market risks may also accompany the swap, including interest rate risk. The fund may also suffer losses if it is unable to terminate or assign outstanding swaps or reduce its exposure through offsetting transactions.

During the six months ended April 30, 2015, the fund used interest rate swaps in anticipation of rising interest rates. The following table summarizes the interest rate swap contracts held as of April 30, 2015.

USD notional amount	Payments made by fund	Payments received by fund	Maturity date	Market value	
522,000,000	Fixed 1.442500%	3 Month LIBOR (a)	Aug 2016	(\$305,505)
22,000,000	Fixed 1.093750%	3 Month LIBOR (a)	May 2017	(209,638)
844,000,000				(\$515,143)
2	mount 22,000,000 2,000,000 44,000,000	22,000,000 Fixed 1.442500% Fixed 1.093750%	Payments made received by fund	Payments made received by fund	Payments made Payments mad

(a) At 4-30-15, the 3-month LIBOR rate was 0.27875%

No interest rate swap positions were entered into or closed during the six months ended April 30, 2015.

Fair value of derivative instruments by risk category

The table below summarizes the fair value of derivatives held by the fund at April 30, 2015 by risk category:

Risk	Statement of assets and liabilities location	Financial instruments location	Asset derivatives fair value	Liabilities derivative fair value	
Interest rate contracts	Swap contracts, at value	Interest rate swaps		(515,143)

Total 29 (\$515,143)

Effect of derivative instruments on the Statement of operations

The table below summarizes the net realized gain (loss) included in the net increase (decrease) in net assets from operations, classified by derivative instrument and risk category, for the six months ended April 30, 2015:

Risk	Statement of operations location	Swap contracts	Investments and foreign currency transactions*	Total
Interest rate contracts	Net realized gain (loss)	(\$226,273	•	(\$226,273)
Foreign currency contracts	Net realized gain (loss)		\$4,970	4,970
Total		(\$226,273	\$4,970	(\$221,303)

^{*} Realized gain/loss associated with forward foreign currency contracts is included in the caption on the Statement of operations.

The table below summarizes the net change in unrealized appreciation (depreciation) included in the net increase (decrease) in net assets from operations, classified by derivative instrument and risk category, for the six months ended April 30, 2015:

Risk	Statement of operations location	Swap contracts	Investments and transactions of assets and liabilities in foreign currencies*	Total
Interest rate contracts	Change in unrealized appreciation (depreciation)	\$50,020		\$50,020
Foreign currency contracts	Change in unrealized appreciation (depreciation)		(\$4,970) (\$4,970)
Total	(*********************************	\$50,020	(\$4,970) \$45,050

^{*} Change in unrealized appreciation/depreciation associated with forward foreign currency contracts is included in this caption on the Statements of operations.

Note 4 Guarantees and indemnifications

Under the fund's organizational documents, its Officers and Trustees are indemnified against certain liabilities arising out of the performance of their duties to the fund. Additionally, in the normal course of business, the fund enters into contracts with service providers that contain general indemnification clauses. The fund's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the fund that have not yet occurred. The risk of material loss from such claims is considered remote.

Note 5 Fees and transactions with affiliates

John Hancock Advisers, LLC (the Advisor) serves as investment advisor for the fund. John Hancock Funds, LLC (the Distributor), an affiliate of the Advisor, serves as distributor for the common shares offered through the equity shelf offering. The Advisor is an indirect, wholly owned subsidiary of Manulife Financial Corporation (MFC).

Management fee. The fund has an investment advisory agreement with the Advisor under which the fund pays a daily management fee to the Advisor, on an annual basis, equal to the sum of (a) 0.650% of the first \$150 million of the fund's average daily managed assets (net assets plus borrowings under the Credit Facility Agreement) (see Note 7); (b) 0.375% of the next \$50 million of the fund's average daily managed assets; (c) 0.350% of the next \$100 million of the fund's average daily managed assets; and (d) 0.300% of the fund's average daily managed assets in excess of \$300 million. The Advisor has a subadvisory agreement with John Hancock Asset Management a division of Manulife

Asset Management (US) LLC, an indirectly owned subsidiary of MFC and an affiliate of the Advisor. The fund is not responsible for payment of the subadvisory fees.

The Advisor has contractually agreed to waive a portion of its management fee and/or reimburse expenses for certain funds of the John Hancock complex, including the fund (the participating portfolios). This waiver is based upon aggregate net assets of all the participating portfolios. The amount of the reimbursement is calculated daily and allocated among all the participating portfolios in proportion to the daily net assets of each fund. During the six months ended April 30, 2015, this waiver amounted to 0.01% of the fund's average net assets on an annualized basis. This arrangement may be amended or terminated at any time by the Advisor upon notice to the fund and with the approval of the Board of Trustees.

The expense reductions described above amounted to \$9,473 for the six months ended April 30, 2015.

The investment management fees, including the impact of the waivers and reimbursements as described above, incurred for the six months ended April 30, 2015 were equivalent to a net annual effective rate of 0.53% of the fund's average daily managed assets.

Accounting and legal services. Pursuant to a service agreement, the fund reimburses the Advisor for all expenses associated with providing the administrative, financial, legal, accounting and recordkeeping services to the fund, including the preparation of all tax returns, periodic reports to shareholders and regulatory reports, among other services. These accounting and legal services fees incurred for the six months ended April 30, 2015 amounted to an annual rate of 0.01% of the fund's average daily managed assets.

Distributor. The fund will compensate the Distributor with respect to sales of the common shares offered through the equity shelf offering at a commission rate of 1% of the gross proceeds of the sale of common shares, a portion of which is allocated to the selling dealers. During the six months ended April 30, 2015, compensation to the Distributor amounted to \$0. The Distributor has an agreement with a sub-placement agent in the sale of common shares. The fund is not responsible for payment of commissions to the sub-placement agent.

Trustee expenses. The fund compensates each Trustee who is not an employee of the Advisor or its affiliates. Each independent Trustee receives from the fund and the other John Hancock closed-end funds an annual retainer. In addition, Trustee out-of-pocket expenses are allocated to each fund based on its net assets relative to other funds within the John Hancock group of funds complex.

Note 6 Leverage risk

The fund utilizes a Credit Facility Agreement (CFA) to increase its assets available for investment. When the fund leverages its assets, common shareholders bear the fees associated with the CFA and have the potential to benefit or be disadvantaged from the use of leverage. The Advisor's fee is also increased in dollar terms from the use of leverage. Consequently, the fund and the Advisor may have differing interests in determining whether to leverage the fund's assets. Leverage creates risks that may adversely affect the return for the holders of common shares, including:

the likelihood of greater volatility of net asset value and market price of common shares;

fluctuations in the interest rate paid for the use of the credit facility;

increased operating costs, which may reduce the fund's total return;

the potential for a decline in the value of an investment acquired through leverage, while the fund's obligations under such leverage remains fixed; and

the fund is more likely to have to sell securities in a volatile market in order to meet asset coverage or other debt compliance requirements.

To the extent the income or capital appreciation derived from securities purchased with funds received from leverage exceeds the cost of leverage, the fund's return will be greater than if leverage had not been used, conversely, returns would be lower if the cost of the leverage exceeds the income or capital appreciation derived.

In addition to the risks created by the fund's use of leverage, the fund is subject to the risk that it would be unable to timely, or at all, obtain replacement financing if the CFA is terminated. Were this to happen, the fund would be required to de-leverage, selling securities at a potentially inopportune time and incurring tax consequences. Further, the fund's ability to generate income from the use of leverage would be adversely affected.

Note 7 Credit Facility Agreement

The fund has entered into a CFA with Credit Suisse Securities (USA) LLC (CSSU), pursuant to which the fund borrows money to increase its assets available for investment. In accordance with the 1940 Act, the fund's borrowings under the CFA will not exceed 33 1/3% of the fund's managed assets (net assets plus borrowings) at the time of any borrowing.

The fund pledges a portion of its assets as collateral to secure borrowings under the CFA. Such pledged assets are held in a special custody account with the fund's custodian. The amount of assets required to be pledged by the fund is determined in accordance with the CFA. The fund retains the benefits of ownership of assets pledged to secure borrowings under the CFA. Interest charged is at the rate of one month LIBOR (London Interbank Offered Rate) plus 0.70% and is payable monthly. Prior to January 1, 2015, the interest rate charged under the CFA was three month LIBOR plus 0.41% (paid monthly). As of April 30, 2015, the fund had borrowings of \$86,900,000, at an interest rate of 0.88%, which is reflected in the Credit facility agreement payable on the Statement of assets and liabilities. During the six months ended April 30, 2015, the average borrowings under the CFA and the effective average interest rate were \$86,900,000 and 0.81%, respectively.

The fund may terminate the CFA with CSSU at any time. If certain asset coverage and collateral requirements or other covenants are not met, the CFA could be deemed in default and result in termination. Absent a default or facility termination event, CSSU generally is required to provide the fund with 270 calendar days' notice prior to terminating or amending the CFA.

Note 8 Fund share transactions

Transactions in common shares for the six months ended April 30, 2015 and the year ended October 31, 2014 are presented on the Statement of changes in net assets. Proceeds received in connection with the shelf offering are net of commissions and offering costs. Total offering costs of \$266,941 have been prepaid by the fund. These costs are deducted from proceeds as shares are issued. To date, \$21,863 has been deducted from proceeds of shares issued and the remaining \$245,078 is included in Other receivables and prepaid expenses on the Statement of assets and liabilities.

Note 9 Purchase and sale of securities

Purchases and sales of securities, other than short-term investments and U.S. Treasury obligations, amounted to \$90,853,877 and \$83,559,234, respectively, for the six months ended April 30, 2015. Purchases and sales of U.S. Treasury obligations aggregated \$1,242,350 and \$7,179,191, respectively, for the six months ended April 30, 2015.

ADDITIONAL INFORMATION

Unaudited

Investment objective and policy

The fund is a diversified, closed-end, management investment company, common shares of which were initially offered to the public in January 1971. The fund's primary investment objective is to generate income for distribution to its shareholders, with capital appreciation as a secondary objective. The preponderance of the fund's assets are invested in a diversified portfolio of debt securities issued by U.S. and non-U.S. corporations and governments, some of which may carry equity features. Up to 50% of the value of the fund's assets may be invested in restricted securities acquired through private placements. The fund may also invest in repurchase agreements. The fund utilizes a credit facility agreement to increase its assets available for investments.

Effective March 20, 2013, the Board of Trustees approved a revision to the fund's investment policy regarding the amount of the fund's securities that is rated investment grade to provide that the fund will invest at least 30% of its net assets (plus borrowings for investment purposes) in debt securities that are rated, at the time of acquisition, investment grade (i.e., at least "Baa" by Moody's Investors Service, Inc. (Moody's) or "BBB" by Standard & Poor's Ratings Services (S&P)), or in unrated securities determined by the fund's investment advisor or subadvisor to be of comparable credit quality, securities issued or guaranteed by the U.S. government, or its agencies and instrumentalities and cash and cash equivalents. Under the prior investment policy, the fund was required to invest at least 30% of its total assets in such securities. The new investment policy also provides that the fund may invest up to 70% of its net assets (plus borrowings for investment purposes) in debt securities that are rated, at the time of acquisition, below investment grade (junk bonds) (i.e., rated "Ba" or lower by Moody's or "BB" or lower by S&P), or in unrated securities determined by the fund's advisor or subadvisor to be of comparable quality.

Dividends and distributions

During the six months ended April 30, 2015, distributions from net investment income totaling \$0.7762 per share were paid to shareholders. The dates of payments and the amounts per share were as follows:

Payment date Income distributions

December 31, 2014 \$0.4097 March 31, 2015 \$0.3665 **Total \$0.7762**

Shareholder meeting

The fund held its Annual Meeting of Shareholders on January 26, 2015. The following proposal was considered by the shareholders:

Proposal: Election of twelve (12) Trustees to serve for a three-year term ending at the 2018 Annual Meeting of Shareholders. Each Trustee was re-elected by the fund's shareholders and the votes cast with respect to each Trustee are set forth below.

	Total votes for the nominee	Total votes withheld from the nominee		
Independent Trustees				
Charles L. Bardelis	6,291,924.251	217,889.178		
Peter S. Burgess	6,289,885.082	219,928.347		
William H. Cunningham	6,274,887.055	234,926.374		
Grace K. Fey	6,276,472.215	223,341.214		
Theron S. Hoffman	6,286,547.055	223,266.374		
Deborah C. Jackson	6,257,275.215	252,538.214		
Hassell H. McClennan	6,293,677.224	216,136.205		
James M. Oates	6,274,936.055	234,877.374		
Steven R. Pruchansky	6,277,784.885	232,028.544		
Gregory A. Russo	6,294,763.055	215,050.374		
Non-Independent Trustee				
Craig Bromley	6,290,451.224	219,362.205		
Warren A. Thomson	6,279,621.224	230,192.205		

Mr. James R. Boyle was not up for election; the Board appointed Mr. Boyle to serve as a Non-Independent Trustee on March 10, 2015.

The fund's investment objectives, risks, charges, and expenses are included in the prospectus and should be considered carefully before investing. For a prospectus, contact your financial professional, call John Hancock Investments at 800-852-0218, or visit the fund's website at jhinvestments.com. Please read the prospectus carefully before investing or sending money.

John Hancock Investments

A trusted brand

John Hancock has helped individuals and institutions build and protect wealth since 1862. Today, we are one of America's strongest and most-recognized brands.

A better way to invest

As a manager of managers, we search the world to find proven portfolio teams with specialized expertise for every fund we offer, then apply vigorous investment oversight to ensure they continue to meet our uncompromising standards.

Results for investors

Our unique approach to asset management has led to a diverse set of investments deeply rooted in investor needs, along with strong risk-adjusted returns across asset classes.

ITEM 10. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS.

The registrant has adopted procedures by which shareholders may recommend nominees to the registrant s Board of Trustees. A copy of the procedures is filed as an exhibit to this Form N-CSR. See attached John Hancock Funds Nominating, Governance and Administration Committee Charter.

ITEM 11. CONTROLS AND PROCEDURES.

- (a) Based upon their evaluation of the registrant's disclosure controls and procedures as conducted within 90 days of the filing date of this Form N-CSR, the registrant's principal executive officer and principal financial officer have concluded that those disclosure controls and procedures provide reasonable assurance that the material information required to be disclosed by the registrant on this report is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms.
- (b) There were no changes in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal half-year (the registrant's second fiscal half-year in the case of an annual report) that have materially affected, or are reasonably likely to materially affect, the registrant's internal control over financial reporting.

ITEM 12. EXHIBITS.

- (a) Separate certifications for the registrant's principal executive officer and principal financial officer, as required by Section 302 of the Sarbanes-Oxley Act of 2002 and Rule 30a-2(a) under the Investment Company Act of 1940, are attached.
- (b) Separate certifications for the registrant's principal executive officer and principal financial officer, as required by 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, and Rule 30a-2(b) under the Investment Company Act of 1940, are attached. The certifications furnished pursuant to this paragraph are not deemed to be "filed" for purposes of Section 18 of the Securities Exchange Act of 1934, or otherwise subject to the liability of that section. Such certifications are not deemed to be incorporated by reference into any filing under the Securities Act of 1933 or the Securities Exchange Act of 1934, except to the extent that the Registrant specifically incorporates them by reference.
- (c)(1) Submission of Matters to a Vote of Security Holders is attached. See attached John Hancock Funds Nominating, Governance and Administration Committee Charter.
- (c)(2) Contact person at the registrant.
