Press release dated November 29, 2004

GEOGLOBAL COMMENCES DRILLING OF KG#11

Calgary, Alberta, Canada, November 29, 2004 - GeoGlobal Resources Inc. (Amex: GGR) announced today that drilling operations commenced on November 23, 2004 on the KG#11 well located within the Krishna Godavari Basin on the Exploration Block KG-OSN-2001/3 ("KG Block") off the east coast of India.

The KG#11 well is to be drilled to a depth of 2,200 meters and is situated 10 kilometers north of the KG#1 well in shallow waters of approximately 46 meters deep. The KG#11 well site has been chosen to test a second play type and will evaluate stratigraphy in the northern portion of the KG Block. The well is targeting a syn-rift sedimentary section ranging in age from Permo-Triassic to Lower Cretaceous with structural closure based on 3-D seismic.

The KG#11 well is the second well of a 14 well drilling program to be completed over the next 10 months under the terms of the Production Sharing Contract relating to the KG Block. GeoGlobal has a 5% net carried interest in the wells drilled on the KG Block.

The KG#1 well was abandoned because of drilling problems before the primary objective was fully evaluated. A follow-up well to test lateral objectives of KG#1 is being scheduled for the first half of 2005.

As previously announced, Gujarat State Petroleum Corporation ("GSPC"), the operator of the KG Block contracted with Saipem SPA, part of ENI, Italy for the Saipem Perro Negro 3 drilling rig to drill an initial 4 well exploratory drilling program on the KG Block. GSPC has the option of extending the contract for 6 additional exploratory wells.

In addition, GSPC is seeking bids from several drilling contractors to bring a second rig to the KG Block with final bids expected to be received by the end of the year.

GeoGlobal Resources Inc., headquartered in Alberta, Canada, is a US publicly traded oil and gas company, which through its subsidiaries is engaged primarily in the pursuit of petroleum and natural gas through exploration and development in India. Since inception, the Company's efforts have been devoted to the pursuit of Production Sharing Contracts with the Government of India. Currently, the Company is focused on the development of high potential exploration targets in the Krishna Godavari basin and the Cambay basin areas.

Cautionary Statement to Investors

This document contain statements which constitute forward-looking statements within the meaning of the US Private Securities Litigation Reform Act of 1995, including statements regarding the plans, intentions, beliefs and current

expectations of GeoGlobal Resources Inc., its directors, or its officers with respect to the oil and gas exploration, development and drilling activities intended to be conducted and the outcome of those activities on the exploration block in which the Company owns an interest in located offshore on the east coast of India in the Krishna Godavari Basin and the two additional exploration blocks located onshore in western India in the Cambay Basin, and including the estimated cost and timing of those exploration activities and the extent of activities to be conducted. Investors are cautioned that any such forward-looking statements are not guarantees of the success of the Company's oil and gas exploration, development and drilling activities and involve risks and uncertainties. The Company's actual results may differ materially from those projected in the forward looking statements. There can be no assurance that the drilling and completion of any of the Company's exploratory wells, and the related testing and evaluation, will result in the Company having commercially recoverable reserves of hydrocarbons. There are numerous risks and uncertainties involved in the Company's acquisition of unproved minority interests in the exploration areas, including the possibilities that no discoveries of hydrocarbons are made on the exploration blocks or, if discovered, that such discoveries are not determined to be commercially productive. There can be no assurance that the Company's drilling program will be successful or that the entire program will be drilled. There can be no assurance that the Company's estimates as to the time to complete drilling operations will be accurate. The blocks are a highly speculative exploration opportunities and pursuing the development of the exploration blocks will involve material risks to the Company. The Company will be required to fund its share of the costs incurred during the work commitment phase under the Production Sharing Contracts relating to the exploration blocks in the Cambay Basin and there can be no assurance that such funds will be available to the Company in the amounts and when required. Additional risks and uncertainties arise out of seeking to do business overseas in India where political and other world events may disrupt the Company's plans and intentions. There can be no assurance that the Company's oil and gas exploration and production activities will be commercially successful or result in material revenues to the Company. The presence of hydrocarbon reserves on adjacent or contiguous properties is no assurance or necessary or probable indication that hydrocarbons will be found in commercially marketable quantities on the exploration blocks in which the Company holds an interest. Additional important risk factors are described in the Company's periodic filings with the Securities and Exchange Commission, including the Company's annual report on Form 10-KSB and quarterly reports on Form 10-QSB. The filings may be viewed at <http://www.sec.gov>. and www.sedar.com.
