Company Press Release

**NOVA MEASURING INSTRUMENTS ANNOUNCES
2005 SECOND QUARTER RESULTS**

Rehovoth, Israel August 4, 2005 Nova Measuring Instruments, Ltd. (Nasdaq: NVMI), the market leader in integrated measurement and process control for the semiconductor industry, today reported its results for the second quarter of 2005.

Total revenues for the second quarter of 2005 were \$7.7 million, a 65% increase over revenues of \$4.6 million as reported for the first quarter of 2005, and a 25% decrease compared with revenues of \$10.2 million as reported for the second quarter of 2004.

The Company reported a gross profit of \$2.5 million for the second quarter of 2005 compared with gross profit of \$1.0 million for the first quarter of 2005, and gross profit of \$4.7 million for the second quarter of 2004. Gross margin for the second quarter of 2005 was 32% compared with 22% for the first quarter of 2005 and 46% for the second quarter of 2004.

Net loss in the second quarter of 2005 was \$1.9 million or \$0.12 per share, compared with a net loss of \$4.1 million or \$0.27 per share for the first quarter of 2005. In the second quarter of 2004, the company reported a net income of \$0.5 million or \$0.03 per share. At the end of the second quarter of 2005, cash and cash equivalents, bank deposits and held to maturity securities, short and long term, stood at \$23.9 million, a decrease of \$4.3 million compared with that of the previous quarter.

Dr. Giora Dishon, President & CEO of Nova commented, "We are pleased with the improvement in our results this quarter. We recently launched the new line of our advanced NovaScan 3090 systems. The new line includes systems for CMP, CD and Copper. The market reception has been very good, and these new systems contributed more than 20% of the system revenue this quarter. This, together with wins of large purchase orders with strategic customers during the quarter, contributed to our revenue growth. Furthermore, in the industry as a whole we are seeing signs of recovery, even though with still limited visibility. We therefore remain cautious, but optimistic."

Dr. Dishon continued, "As our systems continue to penetrate the process segments of Copper CMP and Etch for high volume manufacturing, we expect to gain market share in subsequent quarters. Looking to the future, towards more advanced technology nodes such as 45nm, we are continuing our investment in developing the leading edge next-generation metrology systems, which we believe will support our long-term growth."

The Company will host a conference call on the same day, August 4th, 2005, at 09:00am EST. To participate please dial in the U.S: U.S Dial-in Numbers: 1-866-276-1002 *or internationally: +972-3-925-5910 at least 5 minutes before the start of the call. A conference call presentation will be available for download on the company's website www.nova.co.il, before and during the call.*

About Nova

Nova Measuring Instruments Ltd. develops, designs and produces integrated process control systems in the semiconductor manufacturing industry. Nova provides a broad range of integrated process control solutions that link between different semiconductor processes and process equipment. The Company's website is www.nova.co.il.

This press release may contain forward-looking statements, including statements related to anticipated growth rates, manufacturing capacity and tax rate. Actual results may differ materially from those projected due to a number of risks, including changes in customer demands for our
