COMMITTEE AND EXECUTIVE OFFICERS COMMITTEE

Members of the Fiscal Council:

1. WAGNER BRAZ

Born December 17, 1955, Mr. Braz has been a full member of the Fiscal Council of Aracruz Celulose S.A. since April 2000. He is also an elected and ratified officer of the Brazilian Central Bank (BACEN), as well as Banco J. Safra S.A. (since April 9, 1999). Furthermore, he is Executive Superintendent of the Safra Conglomerate, in charge of the Control, Corporate Law and Fiscal areas of Banco Safra S/A, Safra Leasing S.A. Arrendamento Mercantil, Agropecuária Potrillo S.A., Pastoral Agropecuária Couto Magalhães S.A., Safra Distribuidora de Títulos e Valores Mobiliários Ltda., Safra Corretora de Valores e Câmbio Ltda., Safra Seguradora S.A. and other companies that are part of the Safra Conglomerate. He has a degree in Accounting.

2. FERNANDO OCTÁVIO MARTINS ALVES

Born November 7, 1944, Mr. Martins Alves is a full member of the Fiscal Council of Aracruz Celulose S.A. For 16 years now he has been a Financial Officer for the Lorentzen Group, at the following companies: Arapar S.A., Lorempar S.A., Lorentzen Empreendimentos S.A. and Norbrasa Empreendimentos S.A. He has also served as a Director of the Rio de Janeiro Stock Exchange and as a lecturer at the Pontifical Catholic University of Rio de Janeiro (IAG-RJ) and the Getúlio Vargas Foundation (CADEMP-RJ). He has a degree in Civil Engineering from the Fluminense Federal University (UFF) School of Engineering.

3. SHEILA PERIARD HENRIQUE SILVA

Born August 22, 1963, Ms. Silva has been an alternate member of the Fiscal Council of Aracruz Celulose S.A. since April 29, 2004. She has a master's degree in Industrial Economics from Rio de Janeiro Federal University (UFRJ) and has worked at the Holding Company of the Safra

9

Edgar Filing: ARACRUZ CELLULOSE S A - Form 6-K

Group since 1997. Previous experience includes work at the following companies: Brasilpar Serviços Financeiros, Alcatel Telecomunicações, Pepsi-Cola International and Banco Brascan.

4. JORGE JULIANO DE OLIVEIRA

Born November 11, 1963, Mr. de Oliveira is an alternate member of the Fiscal Council of both Aracruz Celulose S.A. and Aracruz. He also serves as Corporate Manager for Internal Audit at Votorantim Participações S.A. He has a bachelor's degree in Accounting from São Judas Tadeu University and is registered with the São Paulo Chapter of the Regional Accounting Council (CRC/SP) under No. 1SP-154.766/O -3.

5. UBALDO EVANGELISTA NETO

Born May 16, 1945, Mr. Evangelista Neto has been a full member of the Fiscal Council of Aracruz Celulose S.A. since April 30, 2008. He is a retired employee of Banco do Brasil (1994) where he was general service manager. He has a law degree from the Osasco College Institute of Instruction (1979) and held the post of President of the Banco do Brasil Athletic Association in São Paulo (BB/SP) since 1997 as well as President of the Fiscal Council of the Banco do Brasil's pension fund PREVI. He was a member of the Fiscal Council of CPFL Energia S.A. in 2003 and of PREVI in 2004.

6. TADEU JOSÉ CONTRIN RIBEIRO

Born March 10, 1954, Mr. Contrin Ribeiro has been an alternate member of the Fiscal Council of Aracruz Celulose S.A. since April 30, 2008. He has been a career employee of Banco do Brasil (BB) for 30 years and served that bank as Account Manager, Business Manager and Administrator at various BB agencies in São Paulo. He also served in various associations and cooperatives, having been chairman of the board of directors of the Educational Cooperative of the City of São Paulo and member of the fiscal council of the Consumer Cooperative and FECOB (Federation of Consumer Cooperatives) of BB employees. He has a law degree from Mackenzie Presbyterian University in São Paulo and a Graduate Degree in Financial Business from the Getúlio Vargas Foundation in Rio de Janeiro (FGV/RJ).

09.01 - HISTORICAL OVERVIEW OF THE COMPANY

THE COMPANY

Our predecessor company Aracruz Florestal S.A. (AFSA) was set up in 1967 for the purpose of planting eucalyptus forests. AFSA became a subsidiary of Aracruz in 1972 when Aracruz was organized and established. On July 20, 1993, AFSA was merged upstream into Aracruz. We began our first pulp production operations in September 1978, using a single production unit (Mill A), with rated production capacity of approximately 400,000 tons of pulp per year. At the beginning of 1991, we completed our expansion plan, known as the 1991 Expansion Plan, that added a second production unit (Mill B), raising the rated production capacity of the Barra do Riacho Unit to approximately 1,025,000 tons per year. In 1994, our effective production capacity was increased further to 1,070,000 tons per year, through a system of enhancements and productivity gains. From October 1995 through December of 1998 we implemented a Modernization Project, increasing the rated capacity of the

Edgar Filing: ARACRUZ CELLULOSE S A - Form 6-K

Barra do Riacho Unit to 1,240,000 tons per year and boosting our production efficiency.

In June 2000 our Board of Directors approved a new expansion of the rated production capacity of the Barra do Riacho Unit to the tune of an additional 700,000 tons per year, known as the Mill C Expansion Project. The Mill C Expansion Project involved adding a new pulp production line and making other modifications to the Unit's existing equipment in order to even further bolster our cost-benefit ratio. Construction of Mill C began in the second half of 2000 and the mill began its operations at the end of May 2002, reaching full capacity in 2003.

The production volume resulting from the Mill C Expansion Project required an increase in the Company's forest areas, involving an additional planted area of approximately 65,200 hectares of eucalyptus trees. To meeting the rising demand, in June 2000 the Company acquired Terra Plana Agropecuária Ltda., whose assets consisted of 19,000 hectares of land appropriate for planting eucalyptus trees. Between July of 2000 and December 31, 2001, the Company acquired roughly another 44,000 hectares of land through a series of separate operations. Moreover, in September 2002, Bahia Sul (the present name of which is Suzano Papel e Celulose) and the Company signed a contract -- together with Companhia Vale do Rio Doce (now named simply Vale) and its wholly owned subsidiary, Florestas Rio Doce S/A -- for the acquisition by Bahia Sul and the Company of equally divided forest assets comprised of about 40,000 hectares of lands and eucalyptus forests. The Company also signed a three-year wood supply contract with Veracel, the aim of which was to supply a total quantity of up to 3.85 million cubic meters of wood for the Mill C Expansion Project. In 2004 we managed to reach a total of around 62% of our demand for wood fiber from our own eucalyptus forests. In 2005, 2006 and 2007, we achieved percentages of approximately 90%, 91% and 86%, respectively, of our demand for wood from our own eucalyptus forests. In 2008 we expect to obtain around 77% of our demand for wood from our own eucalyptus forests, due to the rise in wood supplied under the Forest Producer Program, in accordance with Aracruz's long-term planning for the supply of wood.

In December 2005 our Board of Directors approved another investment in the Barra do Riacho Unit, known as the Barra do Riacho Unit Optimization Project. This project will enhance the technology and performance of the pulp production process, introducing flexibility to adapt the pulp to different market requirements. These improvements will be carried out through modification and/or replacement of the equipment at Mills A, B and C, leading to a sustainable rise in rated capacity, an additional 200,000 tons per year. Investments in this project have been estimated at US\$ 239 million, of which US\$ 199 million has already been spent through the end of 2007 and a further US\$ 40 million is slated for 2008, with 80% of the purchases being made in Brazil and 20% imported. The additional capacity of 200,000 tons per year should be reached by 2009.

Portocel

Aracruz Celulose owns a 51% stake in Portocel Terminal Especializado de Barra do Riacho S.A., a company that has operated the Barra do Riacho port terminal since January 1985. The remaining share of the capital stock, equivalent to 49% of Portocel, is owned by Celulose Nipo Brasileira S.A - CENIBRA, another pulp producer and one of our competitors. Since the terminal was privatized in 1985 through 2007, Portocel has increased its storage capacity from 45,000 to 217,000 tons.

At Portocel, two new mooring berths for barges capable of hauling finished products (wood and pulp) have been installed and increase in the port's draft to 12.5 meters has been confirmed. With this increased depth, the terminal has been able to maximize the shipping capacity of all types of vessels specialized in transporting forest products, which will permit significant improvements and flexibility in the process of contracting freight services.

Aracruz Produtos de Madeira

In 1998 we acquired the entire equity stake previously held by Gutches International Inc. in Tecflor Industrial S.A. [presently known as Aracruz Produtos de Madeira S.A. (APM)], a joint venture between Gutches International Inc. and Aracruz that was created in 1997 for the purpose of

Edgar Filing: ARACRUZ CELLULOSE S A - Form 6-K

manufacturing solid wood products. In October 2004, we sold two thirds of our shares in APM to Weyerhaeuser do Brasil Participações Ltda., a subsidiary of the Weyerhaeuser Corporation. The domestic sales policy of APM has remained unaltered and its international sales continue to be handled by Weyerhaeuser. At present, we own one third of the shares issued by APM.

Veracel

On October 10, 2000 we acquired a 45% stake in Veracel, a joint venture created for the purpose of planting eucalyptus trees and building a pulp mill. On January 31, 2003 the Company purchased an additional share in Veracel, corresponding to 5% of the latter's capital stock, thus increasing our total stake to 50%. The other half of Veracel's capital stock is held by Stora Enso OYJ ("Stora Enso"). Veracel is growing tracts of eucalyptus forests in the State of Bahia, thus diversifying our sources of wood supply for the Barra do Riacho Unit. In May 2003, the Company and its joint venture partner decided to invest a further US\$ 940 million in Veracel, in order to build a mill with capacity to turn out 900,000 tons each year (Veracel Mill) for manufacture of BEKP in the State of Bahia. Construction of the Veracel Mill began in the second half of 2003 and operations started up in May 2005. Total budget outlays of US\$ 1.30 billion have been slated for this project.

It took a period of 22 months from the time the keystone of the mill was set until operations began in May 2005.

The Veracel Mill has one of the lowest production costs in the world for bleached eucalyptus pulp, due to its modern equipment, nearby forest operations (within an average radius of 50 km) and high forest productivity. It is one of the largest single line pulp production lines of this type on the globe. The project uses leading-edge equipment, control systems and procedures that preserve the ecological quality of the local environment.

Owing to its location far from major urban centers, the Veracel Mill has contributed to job creation in a region (Southern Bahia) that features few employment opportunities for the local populace.

By the end of 2008, around 70% of the forest base required for duplication of Veracel should be acquired. The new line will have a rated capacity to turn out 1.4 million tons of pulp each year, which will boost the unit's production capacity to 2.3 million tons per year (50% for each one of the partners, Aracruz and Stora Enso).

Guaíba Unit

On May 30, 2003 the Company acquired from the Southern Brazilian pulp and paper concern Klabin S.A. the entirety of the capital stock of Riocell S.A. ("Riocell"), a major BEKP producer, for a purchase price of US\$ 567 million. Riocell was the owner and operator of a mill (Riocell Mill) with rated capacity of 400,000 tons per year and also owned around 40,000 hectares of eucalyptus forest tracts in the State of Rio Grande do Sul. On January 7, 2004 Riocell was merged upstream by the Company and, at present, the Riocell Mill and the respective forest assets are operated as the Company's Guaíba Unit. On September 15, 2004 the Company announced its modernization plan entitled the Guaíba Unit Optimization project. The systems involved in modernizing the Guaíba Unit began operating in November 2005 just as planned, and achieved their performance targets. The Optimization project permitted additional output of 30,000 tons already in 2006, thus increasing the Guaíba Unit's rated capacity to 430,000 tons per year. In June 2006, the Company disclosed that preliminary studies had been concluded with respect to the viability of future expansion of the production capacity of the Guaíba Unit by approximately 1.3 million tons, which would increase the mill's total capacity by roughly 1.8 million tons per year between 2010 and 2015. Environmental impact studies were concluded in June 2007 and in March 2008 the preliminary environmental license was issued relating to expansion of the Guaíba Unit's rated capacity to 1.8 million tons per year.

Wood logistics

29

Edgar Filing: ARACRUZ CELLULOSE S A - Form 6-K

The maritime route for hauling wood accounted for the transportation of 1.3 million cubic meters of wood, which has meant a reduction of no less than 52 thousand truck trips, contributing mightily to the reduction of traffic on the main interstate highway in eastern Brazil (BR-101), along the section where Aracruz undertakes its forest operations.

In July 2007 a record was set for the amount of wood transported in a single month - 749 thousand cubic meters.

The commitment to sustainable development has oriented practices for handling the planting of eucalyptus trees and preservation of the ecosystems of the Atlantic Rainforest. The environmental practices adopted at the mills are likewise enhanced on an ongoing basis. The level of the Company's social responsibility is also reflected, among other aspects, in the significant program for social action undertaken in the areas where the Company operates.

Shareholding control at Aracruz is exercised by the Safra, Lorentzen and Votorantim groups (28% of the voting capital for each) and by the Brazilian Development Bank (BNDES - Banco Nacional de Desenvolvimento Econômico e Social, which holds a 12.5% stake. The preferred shares of the Company's capital stock, accounting for 56% of the total, are traded on the São Paulo, New York and Madrid stock exchanges.

Aracruz was the only forest products company in the entire world to boast being a part of the DJSI World (Dow Jones Sustainability Index - World) in 2007, an important recognition on the international horizon for the seriousness of the Company's sustainability practices. It is also listed on the São Paulo Stock Exchange (BOVESPA) Business Sustainability Index - ISE.

The world economy continued to expand at a steady pace in 2007, providing a positive environment for the paper and pulp industry, despite the uncertainties surrounding the performance of the U.S. economy.

Worldwide demand for paper and cardboard rose 2.7% over the previous year, exceeding the mark of 390 million tons. In the main consumer markets, North America, Europe and Asia, there was growth in all types of paper produced with pulp on the market - printing and writing paper, tissue and special papers.

Demand for eucalyptus pulp rose by more than 17% last year - equivalent to 1.4 million tons - which leveraged the entire pulp market segment, which grew 5% in relation to 2006.

Pulp shortages throughout the entire distribution chain affected supply, contributing to the reduction in inventories held by the major world pulp market producers. A series of factors, such as lack of wood, maintenance shutdowns and technical problems at certain production units, besides exchange issues, contributed to this decreased supply.

Despite expected capacity expansions in Latin America, the pulp market should remain steady in the next few years, with a rise in the demand for eucalyptus fiber, which should generate continuity of a favorable environment for Aracruz to achieve its growth strategy.

11.01 - PRODUCTION PROCESS

The Company produced bleached eucalyptus pulp using the ECF (Elementary Chlorine Free) process, which is employed internationally for the manufacture of high quality papers of several different types and uses, such as sanitary tissue, printing and writing paper, photographic paper, digital and decorative paper, etc. The Company's mills incorporate modern technology and in 2007 they turned out a total of 2,132,488 tons of pulp, in order to completely satisfy the quality requirements of the domestic and international markets.

WOOD HANDLING

The preparation of the wood is carried out in nine principal lines using the following equipment:

- Overhead traveling cranes for receiving and feeding the wood (03),
- Tree trunk receiving tables (09),
- Wood bark shavers (02),
- Pickers which transform the trunks into chips for boiling (09),
- Vibrating sifters that sort and classify the wood chips (09),
- Bark pickers for the Auxiliary Boilers (04).

The portions accepted from the sifters are hauled by conveyer belts to the chip storage area: two piles of open air chips and three silos that feed three Continuous Digesters. The rejects join the picked barks and are transported to the biomass piles that feed the Auxiliary Boilers as fuel.

32

PULP LINES

The chips from the piles feed three Continuous Digesters [Kvaerner (2) and Andritz (1) technologies], where they are boiled under determined conditions of retention time, temperature, pressure and concentration of alkalis. At the end of the boiling process, at the bottom of the Digester vat, the pulp undergoes the first washing stage. After this step, each Digester unloads the pulp produced for washing in the Diffusers.

Thereupon, purification of the unbleached mass takes place through atmospheric purifiers (Mills A and B) and pressurization (Mill C) for separation of the rejects and uncooked wood chips. The portion accepted by the purifiers undergoes a third washing stage consisting of a washing filter and a press for each line of Mill A, through two washing filters in series in each line of Mill B and two DDW type pressurized washing filters at Mill C. Part of the rejects returns to the entry of the boiling process. After going through the washing filters the mass is sent to the de-lignifying reactors with O₂, after which the pulp passes through a set of washers in series per line, prior to being stored in the storage towers for the bleaching process.

The bleachers feature five parallel lines, with the following stages:

Stage	Mill A	Mill B	Mill C
1	D0		A/D0
2	EO	EOP	EOP
3	D1		D or P
4	PO		D or P
5	D2		-

Legend:

- D (Chlorine Dioxide)
- E (Sodium Hydroxide)
- O (Oxygen)
- P (Hydrogen Peroxide)
- A (Chloride Acid)

11.01 - PRODUCTION PROCESS

After the bleaching process, the mass stored in five storage towers continues to the bleached mass purification system. The sheet of pulp is formed in five dewatering machines made up of one inlet Box each, a flat table and a printing section consisting of three presses. After pressing, the sheet passes through Flakt type driers, exiting with a dry weight of 90%. The sheets which measure 6.0 meters in length at Mills A and B and 8 m in length at Mill C are cut into finer sheets and bundled, forming bales weighing 250 Kg and measuring 45 x 67 x 92 cm. The bales are piled by forklifts and bound into units weighing 2,000 Kg.

ENERGY RECOVERY SYSTEM

The iron acetate (or black) liquor resulting from the boiling and washing progress, containing organic (wood) solids and inorganic solids besides (chemical products from the boiling process) is sent to the recovery system, which is comprised of:

Edgar Filing: ARACRUZ CELLULOSE S A - Form 6-K

- Four lines for Evaporation and Concentration of black liquor, one the concentration of solids in the liquor is increased by 15.5% to 80%, becoming a fuel;
- Three Recovery Boilers, which burn the concentrated black liquor, recovering the inorganic chemical products contained in it, burning the treated gases of the odor system and producing a high pressure vapor that will be used in the turbo-generators.
- Three Caulterization lines, where the solution containing the inorganic chemicals from the Recovery Boilers (green liquor) is transformed once again into a white liquor by means of a reaction with the calcium oxide produced in the limestone kilns. The white liquor is used in the process for boiling the wood in the Digesters. A limestone mud (calcium carbonate) is formed in this process as a byproduct of the cauterizing reaction.
- Three Limestone Kilns oxidize the limestone mud produced, transforming it into calcium oxide, which is re-used in the Caulterizing lines. Natural Petroleum Gas (NPG) is used as a fuel for the kilns.

The generation of steam takes place in the three Recovery Boilers by means of buying the concentrated black liquor and in the two Auxiliary Boilers by means of buying biomass (wood bark and residues). Fuel oil (BPF) is only used during unit stoppages and start-ups.

The high-pressure steam generated from the boilers goes through the turbo-generators thus producing electric power. In the turbo-generators, the high-pressure steam is converted into medium- and low-pressure steam that is used in the pulp manufacturing process.

ELECTROCHEMICAL PLANT

As part of its strategy of concentrating on its principal activity, in December 1999 the Company sold its electrochemical plant to a Canadian group, Canadianoxy Chemicals Holdings Ltd., presently operating as Canexus. A long-term contract with the new owner was signed in order to guarantee the supply of chemical products required at extremely competitive prices for the next 24 years. This sale achieve three of our objectives: (1) capitalization, freeing funds up for strategic investments; (2) transfer of plant operating risks to a specialized producer with in-depth knowledge of the industrial processes; and (3) reductions in costs to be obtained with sharing of the economies of scale foreseen by the new owner as it expands this business line in Brazil.

INSURANCE

The various units of the Aracruz industrial complex began production in 1978 (Mill A), 1991 (Mill B) and 2002 (Mill C). The Company has taken out an insurance policy against fire, covering the installations, machinery, equipment, tanks, forests and inventories. There is also an insurance policy for business interruption (loss of income), machinery breakage and engineering risks.

The production process does not entail major risks that would cause a shutdown of the Company's activities due to the effective computerized controls existing at the Industrial Plant.

Each year the Company carries out a Programmed Shutdown for preventive maintenance at each Mill, lasting from eight to 10 days at each one.

11.02 - COMMERCIALIZATION PROCESS, DISTRIBUTION, MARKETS AND EXPORT

Aracruz's pulp sales are carried out through its own offices in Switzerland (sales to Europe and the Middle East), the United States (sales to North America), Hong-Kong (sales to Asia) and São Paulo (sales to Brazil and the rest of Latin America). In relation to certain customers, sales to the Asian market are also carried out through agents defined by the Company.

34

Edgar Filing: ARACRUZ CELLULOSE S A - Form 6-K

Distribution is carried out through shipping companies contracted to haul the merchandise from the Company's own port (Portocel) in the State of Espírito Santo (ES) and Rio Grande, in the State of Rio Grande do Sul (RS) up to the terminals agreed to in advance with the customers. In the case of Brazil highway transportation is used to delivery pulp to the customers' mills. The exportation process also features the sale of products by Aracruz Celulose to Aracruz Trading Hungary and Aracruz Trading S.A., which the Company controls. Aracruz Trading Hungary and Aracruz Trading S.A. are the firms that effectively Bill the customers overseas for almost all our sales.

In 2007, 98% of sales were made overseas. Sales distribution was as follows: 40% to Europe, 34% to North America, 24% to Asia and 2% to Latin America. The Company's chief customers are non-integrated producers of high-quality papers, such as sanitary tissue, printing and writing paper and special papers.

14.05 - INVESTMENT PROJECTS

Capital Investments

In 2007 Aracruz's capital investments reached a total of R\$ 1.194 million, fully 65% higher than 2006. Highlights for this past year were the following:

Barra do Riacho Unit Work was concluded on the optimization project, which increased the unit's rated pulp production capacity by 200 thousand tons per year, making it now capable of turning out 2.33 million tons per year. As a result, we are expecting a reduction in the overall production cost to the tune of around US\$ 5/t, on account of gains in scale and reduction in the consumption of raw materials.

Guaíba Unit The initial phase of buying lands and forming forests to meet the needs of the project for increasing capacity has already been given the green light by the Board of Directors, and more than 70% of the lands have either already been purchased or deals have been clinched

Edgar Filing: ARACRUZ CELLULOSE S A - Form 6-K

for such purchases. Final approval of the project, including the decision on the total investment in expansion, was made at a Board meeting in March 2008. The expansion project should be concluded in 2010 will increase the unit's total capacity to 1.8 million tons per year.

The expansion project calls for construction of a new pulp production line alongside the present one with capacity to turn out 1.3 million tons per year being able to attain 1.4 million tons on a medium-term horizon without the need for additional expenditures which will demand investments on the order of US\$ 1.8 billion. The preliminary forest and industrial environmental licenses have already been granted by the State Environmental Protection Foundation (Fepam-RS).

Low Cost of Production The Mill project will be developed according to the concept of an EPC (Engineering, Procurement and Construction) agreement, with the equipment and services required for the projects contracted mainly from local suppliers. The highlight of this new Mill will be the low operating cost, even more competitive than the present Veracel Mill in which Aracruz has a 50% stake. New technologies and synergies will ensure operational excellence and low cost of production at the same time.

The new line will begin operating in August 2010, with adoption of modern environmental technologies that ensure less consumption of water and reduction in the volume of emissions and effluents, as well as better standards in terms of thermal and energy efficiency.

The Forest base will also receive an increment, rising to 160 thousand hectares of tracts planted with eucalyptus trees and 90 thousand hectares of native reserves intended for permanent conservation and legal reserve. This total includes leased areas, forest contracts and partnerships with producers. Total forest investments are slated at US\$ 600 million, including the acquisition of lands, infrastructure and tree growing, with 40% of the total amount already realized.

Integrated Logistics This project further encompasses the enhancement of logistics operations, with adoption of waterway routes for hauling raw materials and pulp. Around 50% of the raw material will reach the plant by water routes. To such end, three waterway terminals will be built in Guaíba, Rio Pardo and Cachoeira do Sul.

14.05 - INVESTEMENT PROJECTS

Portocel The first phase of the expansion project, which should be concluded in 2009, includes the construction of a new berth for ships, a new terminal for pulp barges, a sixth warehouse for storing pulp, dredging down to a depth of 12.5 meters, operational improvements and technical adaptations. Investments are estimated at US\$ 80 million and will boost total handling capacity of the terminal to 7.5 million tons of pulp shipments per year in 2009.

A second stage of the expansion project is set to occur between 2010 and 2026. With investments on the order of US\$ 244 million to be made by the port shareholders, Aracruz and Cenibra, the project calls for construction of four more mooring berths, two warehouses and a new railroad branch line, boosting annual handling capacity of the terminal to 17 million tons.

Veracel By the end of 2008, roughly 70% of the forest base required to double Veracel's output should be acquired. The new production line will have capacity for turning out 1.4 million tons of pulp per year, which will increase rated production capacity of the unit to 2.3 million tons per year (50% for each one of the partners, Aracruz and Stora Enso).

Capital investments in 2007 were allocated to the following projects:

	<i>R\$ million</i>
Tree growing	285
Purchase of lands and forests	267

Edgar Filing: ARACRUZ CELLULOSE S A - Form 6-K

15.01 - ENVIRONMENTAL MATTERS

Environmental monitoring

The Company's Environmental and Social Management System is fully implemented and consists of Environmental and Social Action Committees, as well as the Internal On-the-Job Accident Prevention Committees (CIPA's).

The Aracruz project in these areas incorporates technologies that are compatible with both Brazilian environmental legislation and international standards.

Treatment of liquid effluents

The effluent treatment system at Aracruz is made up of a primary system and a secondary system. The primary system is the first stage in the treatment process whereby the effluents are neutralized and fibers and thick materials removed.

The secondary system is comprised of six ponds, four of them aerated ponds and two stabilization ponds. This system also features an emergency backup pond capable of retaining effluents for up to 12 hours of operation.

The volume of each pond is 200,000 m³ and the retention time for treatment is six days, that is, one day in each pond.

Quality of the final effluent is broken down as follows:

- Suspended Solids (SS) = 1.66 kg/t of dry pulp produced
- Organically Absorbed Halogen (AOX) = 0.11 kg/t
- Chemical Demand for Oxygen (DQO) = 16.5 kg/t of dry pulp produced
- Biochemical Demand for Oxygen (DBO) = 1.70 kg/t of dry pulp produced
- Color = 31.4 kg/t of dry pulp produced

The discard of the treated effluents is carried out by means of an underground and underwater sewer interceptor made of polypropylene pipes, the length, diameter and thickness of which are approximately 2,500 m [1,000 mm in the underground portion (three pipes) and 1,100 mm, 1,000 mm and 40 mm in the underwater portion (2 pipes)]. In the final part of the interceptor, submerged approximately 17 m, there are 70 100-mm diffusers in each one of the pipelines, spaced 4 m apart. The design of this system presumes minimum dilution of 1/140 (dilution factor of 140) in the launching zone. The conception of the design for the system of treating the effluent and discarding it at sea is highly secure, guaranteeing

the quality of the marine ecosystem, as proven by studies and annual follow-ups conducted with respect to the regional marine flora and fauna.

15.01 - ENVIRONMENTAL MATTERS

Treatment of gaseous effluents

Based on the same approach as in the treatment of liquid effluents, Aracruz has always sought to certify that all factors are taken into consideration to the utmost degree in its design project, chiefly environmental concerns. Some of the stages and equipment involved in the gaseous effluent treatment system are described as follows:

- **Continuous Digesters:** these devices are responsible for cooking the chips, the compost of which forms odors that occur in this stage of the production process; the chips are gathered together and burned in the limestone kilns and boilers.
- **Condensed Particle Purifiers:** the contaminated condensed particles coming from the evaporation stage and the continuous digesters are purified through a steam-based condensed particle purifier, with the gases creating the odor resulting from this purifying process being gathered together and burned in the limestone kilns and boilers.
- **Recovery Boilers:** Aracruz was one of the first mills in Brazil to adopt the low-odor-emission recovery boiler in its operations. The gases resulting from the burning of black liquor in the boiler are sent through electrostatic precipitators that remove the particle material in suspension and release them through chimney stacks that are 85 m high. This height is necessary to ensure thorough dispersal of the gases, thus protecting the local environment.
The efficiency of the precipitators reaches as high as 99.9%.
- **Auxiliary Boilers:** the purpose of these additional boilers is to burn the eucalyptus bark. The gases resulting from this combustion are sent through electrostatic precipitators that retain the material in particles, with the gases being cast out into the atmosphere through chimneystacks that are 85 m high. The auxiliary boilers are also where the compost which forms low-concentration odor collected in the vents of the black liquor tanks and in the pressurized chip silo of the digester is burned.
- **Limestone Kilns:** these are part of the closed cycle of liquors. Their purpose is to cauterize the calcium carbonate. The gases coming from the limestone ovens are cleaned in highly efficient electrostatic precipitators. The gases that contain the odor-forming compost are burned in the limestone kilns.
- **Emergency Incinerator:** this is intended to burn the odor-forming gases when there is any impediment of the limestone kilns, hence preventing these gases from being released into the atmosphere. This piece of equipment is only used when the limestone kilns are shut down.
- **Bleaching:** the gases resulting from this operation are gathered together and washed in a system of alkaline absorption gas cleansers, being subsequently released into the atmosphere completely free of any undesirable compost.

In short, we can state that at Aracruz: 99% of the particle material is removed and sent back into the process for re-utilization and 98% of the odor-forming compost is eliminated through direct burning in the limestone kilns and boilers, thereby ensuring that emissions into the atmosphere are minimized and meet the standards of applicable environmental legislation.

Environmental Performance - Biodiversity and Forest plants

Reconciling economic development with preservation of the environment is a global challenge that tends to increase in complexity with the continuous growth of the world's population and consumption of goods requiring the use of natural resources.

As a result of this challenge, a major debate has ensued around the world between the total protection of biodiversity and the sustainable use of our natural resources, since the production of medicines and food for our future originates in our forests.

This issue is of the utmost importance to Aracruz, inasmuch as its business is intrinsically dependent upon such natural resources as water, soil and biodiversity.

There is a current of thinking which defends the position that the remaining areas of tropical rainforests in the world should be fully preserved intact, without any human activity whatsoever. For some, not even eco-tourism should be permitted, such that the forests are kept entirely isolated from society so that, through their own environmental balancing mechanisms, they can assure the preservation of all existing species.

The advance of economic activities, mainly those related to agriculture and livestock raising, in areas of native forests is pointed to as the element chiefly responsible for deforestation in Brazil. Aracruz planted its first eucalyptus seedlings in the 1960's. This was done in the municipality (township) of Aracruz, in the Southeastern Brazilian State of Espírito Santo, in areas that for the most part had already been cleared of the native Forest. By way of example, one of the areas we originally purchased - measuring 8 thousand hectares - belonged to the Vitória Iron and Steel Company (Companhia Ferro e Aço de Vitória - Cofavi), which used the wood cut down in the area to produce the charcoal that fed its blast furnaces.

Today, Aracruz has 400 thousand hectares of lands that largely belong to the Atlantic Rainforest biome, of which 139.2 thousand hectares are native reserve areas kept entirely preserved and protected, without any economic use at all. Biodiversity studies have demonstrated that the interspersing of preserved areas and eucalyptus forest tracts can maintain and develop various animal species that are endemic to the Atlantic Rainforest.

By the same token, we are fully aware of the perception of a portion of our community that eucalyptus trees feature little diversity. Nonetheless, we consider that the biodiversity of eucalyptus tracts cannot be compared with native tropical forests that they do not aim to replace but rather should be compared instead with other crops that society needs for its comfort and well being. Eucalyptus provides an alternative source of wood for a plethora of final uses, decreasing the pressure on native forests and contributing to keeping people on the land.

Aracruz condemns the use of wood illegally extracted for any purpose and takes the position that the remaining portions of the Atlantic Rainforest should be preserved and, whenever possible, recovered, so as to create or expand the connectivity between the remaining forest fragments.

In order to learn more about the interaction between its eucalyptus tracts, the native reserves of the Atlantic Rainforest and the environment in general, in 1993 Aracruz started the Micro-watershed Project (Projeto Microbacia). This project involves continuous environmental monitoring of the complete cycle of planting eucalyptus trees, the study of the relationship between these plants and the native forests and local fauna. Data regarding biodiversity, the hydrological cycle of eucalyptus plants and soil conditions are gathered, monitored and classified on an ongoing basis.

15.01 - ENVIRONMENTAL MATTERS

Environmental Fines

Fines

Barra do Riacho Unit

Our main production unit was not slapped with any environmental assessment notice or fine during the course of 2007.

Guaíba Unit

In 2005 this unit, located in the Southern Brazilian State of Rio Grande do Sul, was environmentally assessed in the amount of R\$ 15,000.00 (fifteen thousand Reais). This fine was levied by the State Environmental Protection Foundation (Fepam) with respect to the emission of reduced sulfur compounds (TRS) above the established levels. Aracruz filed an appeal, reporting precise problems that occurred in the sources of TRS emissions that did not result in exceeding the established standards in the sum total of the sources, as well as problems in the electrostatic precipitators installed in 2005 that did not live up to the performance guaranteed by the supplier. A plan for putting the sources into line was proposed and agreed to with Fepam.

Caravelas Terminal

A notification and assessment notice were received from the sanitary authorities in relation to the Caravelas Terminal in 2006. The parameter for drinking water (quantity of fecal coliforms) at the Terminal was higher than the level legally permitted in the monitoring sample taken. Aracruz identified the cause and took the measures required to resolve the problem, by replacing the chlorine dosing mechanism.

47

CHAPTER I

LEGAL NAME, OBJECT, REGISTERED OFFICES AND DURATION

Article 1: ARACRUZ CELULOSE S.A. (a joint stock corporation under Brazilian law) is governed by these Bylaws and applicable Brazilian legislation.

Article 2: The Company's corporate object is forestry, reforestation, processing and sale of forest products, exploration of renewable sources of energy and the performance of industrial, commercial, agricultural and livestock raising activities, to such end being empowered to:

I - hold stakes in any form in other companies, by decision of the Board of Directors, at the proposal of the Executive Officers Committee.

II - engage in any activities and perform any services directly and indirectly related to its principal activities, including importation and exportation.

Article 3: The Company's registered offices and tax domicile are in the Municipality of Aracruz, State of Espírito Santo, Federal Republic of Brazil, and it may, by decision of the Executive Officers Committee, create offices and other establishments in Brazil and, by decision of the Board of Directors, through a Proposal of the Executive Officers Committee, offices and other establishments outside of Brazil.

Article 4: The Company's duration is perpetuity.

CHAPTER II

CAPITAL STOCK AND SHARES

Article 5: The Company's subscribed capital stock is R\$ 2,871,781,288.11 (two billion, eight hundred and seventy-one million, seven hundred and eight-one thousand, two hundred and eighty-eight Reais and eleven centavos), divided into 1,032,554,120 (one billion, thirty-two million, five hundred and fifty-four thousand, one hundred and twenty) registered shares, without par value, of which 455,390,699 (four hundred and fifty-five million, three hundred and ninety thousand, six hundred and ninety-nine) are common shares and 577,163,421 (five hundred and seventy-seven million, one hundred and sixty-three thousand, four hundred and twenty-one) are class A and B preferred shares.

Paragraph 1 - The subscribed capital stock may be increased up to the limit of R\$ 5,000,000,000.00 (five billion Reais), irrespective of any amendment to these Bylaws, by decision of the Board of Directors, at the Proposal of the Executive Officers Committee, unless such increase involves subscribing to shares for realization of assets, in which cases it depend upon approval of the General Meeting of Stockholders.

18.01 - COMPANY BYLAWS

Paragraph 2 - Capital increases may occur without respecting the previously existing ratio between the various types and classes of shares.

Paragraph 3 - It will be up to the General Meeting of Stockholders to make the decision dealt with in the previous paragraph of this Article.

Paragraph 4 - The number of preferred shares without voting rights or subject to restrictions in the exercise of such right may not exceed 2/3 (two thirds) of the total shares issued, except in cases covered by special provisions of applicable Brazilian legislation regarding tax incentives.

Edgar Filing: ARACRUZ CELLULOSE S A - Form 6-K

Paragraph 5 - Stock splits shall always be carried out with the same type and class of shares split; capital increases arising from capitalization of the reserve resulting from the monetary restatement of paid-in capital shall be carried out without modification of the number of shares issued; the distribution of new shares resulting from capital increase by means of capitalization of earnings and reserves other than those referred to above shall be carried out in relation to the common shares through distribution of shares of the same type and in relation to the preferred shares through distribution of class B preferred shares.

Article 6: Each common share of capital stock vests the right to 1 (one) vote in the decisions of the General Meeting of Stockholders.

Article 7: The preferred shares do not vest voting rights, though they are assured the receipt of a dividend that is 10% (ten per cent) higher than that attributed to each common share and priority in reimbursement of capita in the event of dissolution of the Company.

Paragraph 1 - Without prejudice to the provisions contained in the heading of this Article, class A preferred shares will have priority in receiving a minimum dividend of 6% (six per cent) per year, calculated on the amount of capital stock represented by this class of share and divided among them in equal parts.

Paragraph 2 - The class B preferred shares, although being entitled to receiving the dividend calculated in conformity with the provision in the heading of this Article, do not have priority in receiving dividends.

Paragraph 3 - The class A preferred shares may be converted into class B preferred shares, with the cost of conversion being covered by the interested stockholder.

Article 8: The shares of the Company's capital stock may be maintained in a deposit account, in the name of their respective owners, without issue of stock certificates, at a reputable financial institution bearing the credentials of the Brazilian Securities Commission (CVM), as chosen by the Executive Officers Committee after hearing the advisory opinion of the Board of Directors.

Sole paragraph: The interested stockholders will be responsible for covering the cost of the services of transfer of ownership of the register shares, with due heed being paid to the maximum limits set by the CVM.

Article 9: Each class of shares will have its own numbering.

Article 10: The stock certificates shall always be signed by 2 (two) Executive Officers, with the Company being empowered to issue multiple securities and certificates.

Article 11: In the increases in the subscribed capital stock, the stockholders will be ensured the right of preference to subscribe to the shares, in the manner provided by law, for a period of not less than 30 (thirty) days.

Paragraph 1 - The period of 30 (thirty) days covered by this Article shall be counted as from the publication of the call to subscription in the Official State Gazette (DOE).

Paragraph 2 - A stockholder that does not make payment of the installments corresponding to the shares as prescribed in the subscription bulletin or upon call to do so, shall be considered in default, in the manner provided by law, hence being subject to the payment of interest of

49

12% (twelve per cent) per year, as well as monetary restatement and a fine of 10% (ten per cent) of the amount of the installment.

CHAPTER III

GENERAL MEETING OF STOCKHOLDERS

Article 12: The General Meeting of Stockholders shall be held annually (AGM), on or before the 30th day of April each year, and extraordinarily (EGM), whenever Company interest so requires.

Sole paragraph - The General Meeting of Stockholders shall be presided over by the Chairman of the Board of Directors, who will choose one or more Secretaries from among the stockholders present at the meeting.

Article 13: The General Meeting of Stockholders shall set the total amount for remuneration of the members of the Board of Directors and Executive Officers Committee.

Sole paragraph - The apportionment of the remuneration among the administrators shall be set by the Board of Directors.

CHAPTER IV

COMPANY MANAGEMENT

Article 14: The Company is to be administered by a Board of Directors and an Executive Officers Committee.

Sole paragraph - Up to a maximum of 1/3 (one third) of the members of the Board of Directors may also be appointed to positions as Executive Officers.

SECTION I

BOARD OF DIRECTORS

Article 15: The Board of Directors shall be made up of at least 9 (nine) and no more than 12 (twelve) members, one of whom will serve as Chairman and all of whom shall be stockholders resident in Brazil, elected by the General Meeting of Stockholders for terms of office lasting 3 (three) years, with re-election being permitted, and they shall remain in office until such time as their successors take office.

Paragraph 1 - Any Board Member may submit to the approval of the General Meeting of Stockholders the nomination of an alternate for the purpose of replacing him or her in the sessions of the Board of Directors.

Paragraph 2 - The Board Members shall take office by signing the appropriate entry in the Minutes of the Meetings of the Board of Directors.

Paragraph 3 - Once they take office, the Board of Directors shall elect from among their members the 1st and 2nd Vice-Presidents, who in such order shall replace the Chairman in the event of the latter's occasional absence or impediment.

Paragraph 4 - Whenever it deems necessary, the Board of Directors may create Committees with the functions of serving as advisory and instruction panels for matters in which they are specialized.

Paragraph 5 - The Committees mentioned in Paragraph 4 above may operate on a part- or full-time basis and, in addition to the members of the Board, may also be comprised of any members of the Executive Officers Committee and such other persons as are invited to participate for this purpose.

18.01 - COMPANY BYLAWS

Article 16: The Board of Directors is responsible for:

- I** - setting the general guidelines for the Company's business operations and formulating the respective economic-financial policies;
- II** - appointing and dismissing the Executive Officers and, at the proposal of the President and Chief Executive Officer (CEO), setting their respective powers and duties;
- III** - inspecting the managerial activities of the Executive Officers, examining the Company's books and papers at any time, requesting information regarding contracts and agreements signed or in the process of being signed, as well as any other acts;
- IV** - calling the General Meeting of Stockholders;
- V** - expressing their opinion on the Report of Management and the accounts prepared by the Executive Officers Committee;
- VI** - deciding on increases in the Company's capital stock and resulting issue of shares, setting the issue price, provided that the limit of the authorized capital stock is observed, except in the case of the provision regarding the decision-making process contained in Article 5, Paragraph 3 of these Bylaws;
- VII** - authorizing the sale, mortgage or any other form of encumbrance of the Company's permanent assets (fixed assets and investments) and posting of guarantees for third party obligations, except in the case of personal guarantees in favor of the Company's own subsidiaries, which shall not depend upon prior authorization;
- VIII** - choosing and dismissing independent auditors;
- IX** - orienting and advising the Executive Officers Committee in all matters of interest to the Company;
- X** - following up on the carrying out of the Company's transactions, for the purpose of seeing whether the decisions of the General Meeting of Stockholders and the Board of Directors itself are being respected;
- XI** - approving the Company's plans, programs and financial and investment budgets;
- XII** - approving the guidelines to be observed by the Company's representatives in the General Meetings of Shareholders of the subsidiary and associated companies or others in which it holds stakes;

XIII - approving in advance and contracts or agreements to be signed between the Company and its stockholders;

XIV - authorizing the acquisition of shares issued by the Company itself, for purposes of cancellation or maintenance as treasury stock, as well as subsequent disposal thereof;

XV - deciding on the issuance of promissory notes and/or other such commercial paper;

XVI - approving the guidelines to be observed by the members appointed by the Company to the boards of directors or other management bodies at companies in which the Company has a share in control without holding it separately, associated companies or others in which it holds stakes, with respect to relevant issues such as, but not limited to, the appointment of administrators, participation in other companies, negotiation of equity stakes, increase in the capital stock or authorized capital, approval of business plans and alterations thereto, amendments to bylaws, issuance of securities, sale or encumbrance of fixed assets, contracts or agreements with related parties and investments in new production capacities.

XVII - With respect to a company in which the Company shares control without holding it separately, the provision contained in the final part of item VII of this Article shall not apply, and prior authorization of the Board of Directors will be required to provide any guarantees, either personal or in the form of a mortgage.

Article 17: The Board of Directors shall meet whenever the Company's corporate interests so require, upon call of the Chairman, Vice-Chairman exercising the Board Chairmanship or at least 3 (three) Board Members. Board resolutions shall be approved by majority of votes, with the presence of more than half of the Board Members.

Paragraph 1 - Meetings of the Board of Directors shall be called by either letter or telegram with at least (five) days' advance notice.

Paragraph 2 - Whenever called upon, the Executive Officers shall assist meetings of the Board of Directors.

Paragraph 3 - The Chairman may invite another Board Member to serve as Secretary for the meeting.

Article 18: In case a Board Member's position becomes vacant, their respective alternate shall be called upon to replace them and, in the absence of such an alternate, another alternate shall be chosen by the other Board Members and exercise the respective functions of the person replaced until such time as the first General Meeting of Stockholders is held after such a situation occurs.

Sole paragraph - The successor Board Members shall fill out the term of Office of the respective persons they replaced.

Article 19: The Board Chairman or Vice-Chairman exercising the Chairmanship shall be responsible for:

1. presiding over General Meetings of Stockholders;
2. calling and chairing meetings of the Board of Directors;
3. supervising the Board's administrative services; and
4. organizing and supervising distribution of the order of business for each meeting, as well as such information as is required to appropriately inform the Board Members, at least 5 (five) business days prior to the date of each meeting.

SECTION II

EXECUTIVE OFFICERS COMMITTEE

Article 20: The Executive Officers Committee shall be made up of at least 2 (two) and no more than 8 (eight) members who may or may not be stockholders, though they must be Brazilian residents, one being the President & CEO and the others Executive Officers, one of whom, if thus designated in advanced by the Board of Directors, may hold the title of Vice-President and, without prejudice to his permanent powers and duties, will also have the function of replacing the President & CEO in case of the latter's temporary impediments and succeed same in case of vacancy, until such time as the Board of Directors appoints a replacement to fill out the remaining term of office of the replaced President.

Paragraph 1 - The members of the Executive Officers Committee shall be appointed by the Board of Directors for terms of office lasting 3 (three) years and shall remain in office until such time as their successors take office, with re-appointment being permitted.

Paragraph 2 - The Executive Officers shall take office by signing their respective oaths in the book of Minutes of the Meetings of the Executive Officers Committee.

Article 21: Provided that the directives and decisions of the Board of Directors and the General Meeting of Stockholders are complied with, the Executive Officers Committee shall have broad powers of administration and management over the Company's business affairs, being empowered to engage in any and all acts and carry out all operations that are related to achievement of the Company objectives.

Sole paragraph - Without prejudice to the provisions contained in item VII of Article 16 of these Bylaws, the Executive Officers Committee by collective decision may authorize the sale of chattel goods and equipment that have become unusable, unnecessary or obsolete.

Article 22: The President & CEO is responsible for executive direction of the Company, thus being empowered to organize, coordinate and supervise the activities of the other Executive Officers to ensure that the decisions and directives set by the General Meeting of Stockholders and Board of Directors are faithfully observed and carried out.

Paragraph 1 - Further, the President & CEO is specifically responsible for:

- I** - calling and presiding over meetings of the Executive Officers Committee;
- II** - keeping the Board of Directors informed about the Company's activities.

Paragraph 2 - The other members of the Executive Officers Committee shall have the powers and duties established for them by the Board of Directors at the proposal of the President & CEO.

Article 23: Provided that the provisions contained in item I of Article 2 and items VII and XIII to XV of Article 16 of these Bylaws are adhered to, the members of the Executive Officers Committee, always acting in pairs, are empowered to actively and passively represent the Company in and out of court, including as regards the sale or encumbrance of permanent assets and discharge of the obligations of third parties with respect to the Company.

Paragraph 1 - In order to engage in legal acts in general the Company may also be represented by 1 (one) Officer and 1 (one) attorney or 2 (two) attorneys with special powers.

Paragraph 2 - The power of attorney instruments are to bear the signatures of 2 (two) Executive Officers, specify the powers granted, except in the case of those containing an ad judicium clause, and be valid for no more than 1 (one) year.

Paragraph 3 - The Company may be represented by 1 (one) single Officer or 1 (one) single attorney with specific powers for acts involving representation before federal, state and municipal public agencies, quasi-autonomous bodies (autarchies), state-owned enterprises, mixed economy companies (part state-owned, part publicly traded), utility companies holding concessions and permits to provide public services; acts that do not entail creation of an obligation for the Company or discharge of third party obligations with respect to the Company; acts required to comply with tax and Social Security obligation; those for preservation of its rights in administrative or any other kind of case; endorsement of checks for credit in Company bank accounts; acts required to run current bank accounts for making purchases involving small amounts, up to the limit equivalent to 3 (three) minimum salaries; and acts relating to relations with employees.

Paragraph 4 - In order to carry out acts outside of the jurisdiction of its registered offices and tax venue, as authorized in the manner provided in these Bylaws, the Company may be represented by 1 (one) single Officer or by 1 (one) single attorney with express powers to carry out the specific act in question, with such representative being appointed by collective decision of the Executive Officers Committee.

54

Edgar Filing: ARACRUZ CELLULOSE S A - Form 6-K

Article 24: In the case of vacancy of the position of a member of the Executive Officers Committee, the Board of Directors shall appoint a replacement to full out the term of the office of the substituted officer.

Sole paragraph - Except for the provisions contained in Article 20, in the absences and temporary impediments of any Officer, he is to be replaced by the President & CEO or by such other Officer as he appoints. The replacements appointed in the manner prescribed by this sole paragraph shall exercise their functions on a cumulative basis together with those of the substituted Officer until such time as the latter takes over the position once again.

Article 25: The Executive Officers Committee shall meet whenever required by the interests of the Company, either at the registered offices or at a place indicated in the call to meeting, with the presence of the President & CEO or Vice-President being mandatory. The decisions, as recorded in the minutes of the meeting, shall be made by absolute majority of the votes of the members present, with the President & CEO or Vice-President having the tie breaking vote beside their individual vote.

CHAPTER V

FISCAL COUNCIL

Article 26: The Company shall have a permanently operating Fiscal Council made up of from 3 (three) to 5 (five) full members and an equal number of alternates, and its functioning shall be governed by the applicable legal provisions.

CHAPTER VI

CORPORATE YEAR

Article 27: The Company's corporate year shall coincide with the calendar year. The annual balance sheet shall be drawn up on December 31 of each year, with adherence to applicable legal provisions, and the following amounts shall be deducted from the net income accrued, after the provisions, amortization and depreciation determined or permitted by law:

I - five per cent (5%) for setting up the legal reserve fund, until such time as it reaches 20% (twenty per cent) of the capital stock;

II - twenty-five per cent (25%), at least, for payment of the mandatory minimum dividend to the stockholders, as calculated based on the net income for the year, adjusted in the manner provided by law and with due heed being paid to the priority assured to the preferred shares.

Paragraph 1 - The remaining balance is to be appropriated in the manner decided by the General Meeting of Stockholders, as proposed by the Board of Directors, with the advice of the Fiscal Council also being heard if it is functioning.

Paragraph 2 - The Board of Directors may determine the drawing up of interim balance sheet on a semi-annual basis or for shorter periods, as well as distribution of intermediary dividends to the charged to the accrued income, retained earnings or revenue reserve accounts already set up.

CHAPTER VII

55

GENERAL PROVISIONS

Article 28: In order to qualify for being observed by the Company, shareholders agreements are to be kept on file at the registered offices and may, at the initiative of the interested parties, be annotated in the respective record books and on the share certificates.

Article 29: The Company shall maintain a permanent Technological Research and Development body, funded by specific budgetary resources according to annual or multi-year programs.

Article 30: The Company shall maintain a social assistance service for its employees, funded by specific budgetary resources according to annual or multi-year programs.

Article 31: The Company shall be liquidated in the cases provided by law or by decision of the General Meeting of Stockholders.

Sole paragraph - It shall be the responsibility of the General Meeting of Stockholders to establish the manner of liquidation and that of the Board of Directors, which shall be maintained, to appoint a liquidator. The functioning of the Fiscal Council shall depend on the request of the stockholders, in the manner provided by law.

CHAPTER VIII

TRANSITORY PROVISIONS

Article 32: In the manner prescribed by Article 172 of the Brazilian Corporation Law (No. 6.404/76 of December 15, 1976, the preference rights assured to the stockholders under Article 11 of these Bylaws shall not apply to the capital increase to be carried out in 1992 through public subscription in Brazil and simultaneous issuance of American Depository Receipts (ADR) overseas, nor to the subsequent additional increase that was carried out to cover the exercise of the option to be granted to the underwriters of such increase, according to normal international market practices, in the amount of not more 15% (fifteen per cent) of the respective amount.

Article 33: The power to make the decision dealt with in the above article, as well as to carry out the other acts required to make the capital increases mentioned therein effective, shall be that of Board of Directors, in the manner provided by Article 16, item VI, of these Bylaws, and such capital increases may be made irrespective of the previously existing ratios between the different types and classes of shares, with the provisions contained in Article 5, Paragraph 3, not applying to such capital increases.

Checks with the original; extracted from the appropriate document.

José Luiz Braga

Secretary
