TRADING UPDATE

"Barclays has had a strong start to the year. We continued to deliver double-digit profit growth on top of the outstanding performance in 2006 and made further significant investments across our businesses."

John Varley, Group Chief Executive

Barclays profit before tax for the first quarter of 2007 was 15 per cent ahead of the first quarter of 2006. Excluding gains from the sale and leaseback of property, profit before tax grew 10 per cent. Performance was particularly strong at Barclays Capital, which had its best quarter ever.

Business Commentary

Global Retail and Commercial Banking

UK Retail Banking delivered good growth in profit before tax. Growth in net interest income, reflecting a strong deposit performance, was moderated by lower net fees and commissions and other income. Market share of net new mortgages continued to improve. In UK Business Banking strong growth in profit before tax was driven by continued good income growth. We are on track to report a further two percentage point cost:income ratio improvement in UK Banking in 2007.

Profit before tax at Barclaycard improved on the run rate of the second half of

Edgar Filing: BARCLAYS BANK PLC /ENG/ - Form 6-K

2006: income and expenses were broadly stable and the impairment charge was lower. Barclaycard US is on track to be profitable in 2007. Barclaycard completed the Monument credit card portfolio sale on 4th April 2007.

International Retail and Commercial Banking - excluding Absa profit grew strongly, excluding the contribution of FirstCaribbean International Bank, which was sold at the end of 2006. Income growth was strong and we continued to invest in the distribution network and infrastructure. International Retail and Commercial Banking - Absa delivered a very strong increase in profit before tax in Rand terms, driven by very strong growth in loans and good growth in deposits. Profit before tax in Sterling declined slightly owing to Rand depreciation.

Investment Banking and Investment Management

At Barclays Capital very strong profit growth was driven by broadly based income contributions across asset classes and regions, with excellent results in commodities, equities and mortgage products. The rate of profit growth was higher than the rate of growth in average DVaR. The acquisition of EquiFirst completed on 30th March 2007.

Barclays Global Investors delivered good growth in US Dollar income and profit. Profit before tax in Sterling saw a slight decline due to the depreciation of the US Dollar. The acquisition of Indexchange Investment AG completed on 8th February 2007.

Barclays Wealth delivered strong profit growth, driven by increased client funds and greater transaction volumes. Investment continued in client facing staff and infrastructure to drive future performance.

Capital

At 31st March 2007 Barclays Tier 1 Capital ratio was broadly in line with its targeted ratio of 7.25%.

Barclays completed its second parallel run under Basel II and reaffirms its expectation of a modest reduction in capital requirements.
