Group results**Second quarter and half year 2008(a)****London 29 July 2008****FOR IMMEDIATE RELEASE**

Second quarter	First quarter	Second quarter		First half		
2007	2008	2008	\$ million	2008	2007	%
7,376	7,451	9,465	Profit for the period(b)	16,916	12,040	
(888)	(863)	(2,612)	Inventory holding (gains) losses, net of tax(c)	(3,475)	(1,108)	
6,488	6,588	6,853	Replacement cost profit(c)	13,441	10,932	23
17.01	17.63	18.56	per ordinary share (pence)	36.19	28.77	
33.75	34.90	36.40	per ordinary share (cents)	71.30	56.68	26
2.03	2.09	2.18	per ADS (dollars)	4.28	3.40	

- BP's second-quarter replacement cost profit was \$6,853 million, compared with \$6,488 million a year ago, an increase of 6%. For the half year, replacement cost profit was \$13,441 million compared with \$10,932 million a year ago, up 23%.
- Non-operating items and fair value accounting effects for the second quarter had a net \$1,775 million unfavourable impact compared to a net \$973 million favourable impact in the second quarter of 2007. For the half year, the respective amounts were \$1,779 million unfavourable and \$1,009 million favourable - see further details on page 3. The largest non-operating item for the second quarter and year-to-date was fair value losses on embedded derivatives which amounted to \$2,081 million and \$2,771 million respectively on a pre-tax basis.
- Net cash provided by operating activities for the quarter and half year was \$6.7 billion and \$17.6 billion compared with \$6.1 billion and \$14.1 billion respectively a year ago.
- The effective tax rate on replacement cost profit for the second quarter was 35% and for the half year was 36%; a year ago, the rates were 31% and 32% respectively.

Net debt at the end of the quarter was \$25.7 billion compared to \$20.7 billion a year ago. The ratio of net debt to net debt plus equity was 19%, the same as a year ago.

- Capital expenditure, excluding acquisitions and asset exchanges, was \$5.5 billion for the quarter and for the half year was \$12.6 billion. Total capital expenditure and acquisitions was \$5.8 billion for the quarter and \$14.8 billion for the half year. Capital expenditure, excluding acquisitions and asset exchanges and excluding the accounting for our transaction with Husky (see pages 26 and 27), is expected to be around \$21-22 billion for the year. Disposal proceeds were \$59 million for the quarter and \$335 million for the half year.
 - The quarterly dividend, to be paid in September, is 14 cents per share (\$0.84 per ADS) compared with 10.825 cents per share a year ago. For the half year, the dividend showed an increase of 30%. In sterling terms, the quarterly dividend is 7.039 pence per share, compared with 5.278 pence per share a year ago; for the half year, the increase was 33%. During the quarter, the company repurchased 85.9 million of its own shares for cancellation at a cost of \$1 billion. For the first half, share repurchases were 176.9 million at a cost of \$2 billion.
- (a) This results announcement also represents BP's half-yearly financial report for the purposes of the Disclosure and Transparency Rules (DTR) made by the UK Financial Services Authority (DTR 4.2 - Half-yearly financial reports). In this context: (i) the condensed set of financial statements can be found on pages 13 - 19 and 22 - 30; (ii) pages 1 - 11, 20 and 21 comprise the interim management report; (iii) information on material related party transactions that have taken place in the first six months of the year can be found in the condensed set of financial statements on pages 13 - 19 and 22 - 30; and (iv) the directors' responsibility statement and auditors' independent review report can be found on page 12.
- (b) Profit attributable to BP shareholders.
- (c) With effect from 1 January 2008, replacement cost profit excludes inventory holding gains and losses net of tax. Comparative amounts have been amended to the new basis. See page 2 for further details.

The commentaries above and following are based on replacement cost profit and should be read in conjunction with the cautionary statement on page 11.

			Profit for the period attributable to BP shareholders		
7,376	7,451	9,465		16,916	12,040

- (a) Replacement cost profit reflects the current cost of supplies. The replacement cost profit for the period is arrived at by excluding from profit inventory holding gains and losses. BP uses this measure to assist investors to assess BP's performance from period to period. Replacement cost profit is not a recognized GAAP measure.
- (b) Effective 1 January 2008, replacement cost profit excludes inventory holding gains and losses and their associated tax effect. Previously, replacement cost profit excluded inventory gains and losses while the tax charge remained unadjusted and included the tax effect on inventory holding gains and losses. Comparative amounts have been amended to the new basis and the impact of the change is shown in the table below. There is no impact on profit for the period.

\$ million	First half 2007	Second quarter 2007

Dividends

Dividends payable

BP today announced a dividend of 14 cents per ordinary share to be paid in September. Holders of ordinary shares will receive 7.039 pence per share and holders of American Depository Receipts (ADRs) \$0.84 per ADS. The dividend is payable on 8 September to shareholders on the register on 15 August. Participants in the Dividend Reinvestment Plan (DRIP) or the DRIP facility in the US Direct Access Plan will receive the dividend in the form of shares, also on 8 September.

19%	19%	19%	Net debt ratio	19%	19%

Net debt and net debt ratio are non-GAAP measures. We believe that these measures provide useful information to investors. Net debt enables investors to see the economic effect of gross debt, related hedges and cash and cash equivalents in total. The net debt ratio enables investors to see how significant net debt is relative to equity from shareholders. Net debt has been redefined to include the fair value of associated derivative financial instruments that are used to hedge foreign exchange and interest rate risks relating to finance debt, for which hedge accounting is claimed. The derivatives are reported on the balance sheet within the headings 'Derivative financial instruments'. Amounts for comparative periods are presented on a consistent basis. See note 2(c) on page 25 for further information.

			By region:		
1,105	923	(124)	UK	799	2,227
182	276	350	Rest of Europe	626	909
2,183	3,085	3,601	US	6,686	3,914
3,649	5,788	6,944	Rest of World	12,732	6,375
7,119	10,072	10,771		20,843	13,425

(a) Includes profit after interest and tax of equity-accounted entities.

The replacement cost profit before interest and tax for the second quarter and half year was \$10,771 million and \$20,843 million respectively, increases of 51% and 55% over the same periods of 2007. The increases in both periods were primarily due to higher oil and gas realizations. Partly offsetting these were higher charges for non-operating items (see below) and higher costs, primarily reflecting the impacts of sector-specific inflation, higher depreciation and higher production taxes. The results also included higher earnings from equity-accounted entities, primarily from TNK-BP due to higher prices and the effect of lagged tax reference prices.

The non-operating charge of \$1,976 million in the second quarter primarily comprised fair value losses on embedded derivatives partly offset by the reversal of a previous impairment charge. In the first half, the net non-operating charge

was \$2,352 million with the most significant item being fair value losses on embedded derivatives partly offset by the reversal of certain provisions and the reversal of a previous impairment charge. The corresponding periods in 2007 contained net non-operating gains of \$378 million and \$1,135 million respectively. Additionally, in the second quarter, fair value accounting effects had an unfavourable impact of \$373 million compared with an unfavourable impact of \$74 million a year ago. For the first half, the unfavourable effect was \$632 million compared with an unfavourable effect of \$43 million a year ago.

Reported production for the quarter was 3,830mboe/d, broadly flat with the second quarter of 2007. After adjusting for the impact of lower entitlement in our production-sharing agreements (PSAs), production was around 6% higher than the second quarter of 2007 reflecting the continued ramp-up of production following the start-up of major projects in late 2007 and the first half of 2008. We expect the quarterly phasing of underlying production during the year to reflect the normal seasonal effects associated with turnaround activity.

Reported production for the half year was 3,871mboe/d, broadly flat with the same period of the previous year. After adjusting for the effect of entitlement changes in our PSAs, production for the half year was around 6% higher than the same period of 2007.

During the second quarter, we had first production from the Taurt (BP 50% and operator) and Saqqara fields in Egypt. Saqqara is operated by the Gulf of Suez Petroleum Company, an equal joint venture between Egyptian General Petroleum Corporation and BP. In the Gulf of Mexico, we progressed the commissioning of Thunder Horse (BP 75% and operator) with production from the first well and on 3 July, first injection of water occurred at the Ursa waterflood project (BP 22.69%).

Also during the quarter, we had exploration success in the North Sea with the Kinnoull discovery (BP 77% and operator) and we acquired three exploration licences in the Canadian Beaufort Sea. On 28 July, we announced that BP and its co-venturers have received authorization to develop a series of deepwater oil discoveries in offshore Angola's Block 31 (BP 26.67% and operator) where we have made 15 discoveries to date.

On 17 July, we announced that we have agreed to acquire Chesapeake Energy Corporation's interests in approximately 90,000 net acres of leasehold and producing natural gas properties in the Arkoma Basin Woodford Shale play for \$1.75 billion in cash.

In order to comply with the requirements of the Disclosure and Transparency Rules (DTR) made by the UK Financial Services Authority, we include here a summary of the principal disclosures made in our first-quarter results announcement. At the start of the second quarter, production commenced at Deep Water Gunashli (BP 34.1% and operator), we announced the Kodiak discovery in the deepwater Gulf of Mexico and, jointly with ConocoPhillips, announced that we have combined resources to start Denali - The Alaska Gas Pipeline. During the first quarter, we had first production from the Mondo field within the Kizomba C development in Angola. We also had exploration success in Angola, Egypt and the North Sea. We completed the deal with Husky Energy Inc. to create an integrated North American oil sands business by means of two separate joint ventures.

966	154	(401)	US	(247)	1,095
255	359	393	Rest of World	752	674
2,742	1,249	539		1,788	3,546

- (a) Includes profit after interest and tax of equity-accounted entities.

The replacement cost profit before interest and tax for the second quarter and half year was \$539 million and \$1,788 million respectively. The results in the equivalent periods of 2007 were \$2,742 million and \$3,546 million respectively. The current-year results included a net non-operating charge primarily relating to restructuring of \$99 million in the second quarter and a net non-operating gain of \$510 million in the half year. A year ago, the results included net non-operating gains of \$767 million and \$538 million respectively. Fair value accounting effects had unfavourable impacts of \$161 million for the current quarter and \$60 million for the half year. A year ago, the impact was \$337 million favourable for the quarter and \$202 million unfavourable for the half year.

Compared with 2007, both the second quarter and half-year results reflected the adverse impacts of significantly lower refining margins, particularly in the US. This more than offset the benefits of the underlying performance improvement of our US refining operations.

The Fuels Value Chains (FVCs) were impacted by lower refining margins and continued to experience lower sales volumes and generally flat or reduced retail margins as a result of high fuel prices and lower demand. The average refining Global Indicator Margin (GIM) and BP's actual refining margin for the second quarter and half year both remained significantly lower than in 2007.

Refining throughputs for the quarter and half year were 2,239mb/d and 2,202mb/d respectively, compared with 2,128mb/d and 2,180mb/d for the same periods last year. The higher throughputs were mainly from the recoveries at the Texas City and Whiting refineries, partially offset by the loss of throughput from the disposal of the Coryton refinery and a reduced interest in the Toledo refinery due to the Husky joint venture deal. Excluding portfolio impacts, the underlying improvement in throughputs in the second quarter was 13% year-on-year. Solomon refining availability continued to improve, reaching 88.3% in the second quarter.

Following the restoration of Whiting to its full clean fuel capacity of 360mb/d on 21 March, the Texas City refinery has successfully restored its full crude capacity and the majority of its economic capability. The residue hydrotreater at Texas City is being commissioned with the first train having started up in mid-July. We have also taken the final investment decision on the significant upgrading of the Whiting refinery, repositioning it to run more than 80% Canadian heavy crude oil.

We are making good progress with our focus on simplification and cost efficiency. The lubricants and aviation businesses are on track to reduce their geographical footprint, and the franchise model for our retail sites in the US is also progressing well. Through these changes, together with the implementation of the FVCs and the simplification of internal interfaces and processes, we are on track to deliver the anticipated reduction in headcount.

The International Businesses, in particular lubricants, continue to perform strongly in a challenging environment.

Refining margins in the third quarter to date remain lower than the second quarter and substantially below the 2007 level. Higher energy costs continue to impact refining earnings, more so in the US, offsetting the benefits from the continuing recovery of our US refining operations and availability. Refinery turnaround activities will be higher in the third quarter than in the second. Our marketing businesses continue to be impacted by the slowing of the OECD economies and the effects of high and rising wholesale prices. The current volatile pricing environment is also proving challenging for our supply optimization activities.

In order to comply with the DTR requirements, we include here a summary of the principal disclosures made in our first-quarter results announcement. Our new 900ktepa Zhuhai purified terephthalic acid (PTA) plant was successfully commissioned in early 2008. On 17 March 2008, BP and Irving Oil entered into a memorandum of understanding to work together on the next phase of the proposed Eider Rock refinery in Saint John, New Brunswick, Canada.

Other businesses and corporate comprises the Alternative Energy business, Shipping, the group's aluminium asset, Treasury (which includes interest income on the group's cash and cash equivalents) and corporate activities worldwide.

The replacement cost profit before interest and tax for the second quarter was a loss of \$314 million, compared with a loss of \$173 million a year ago. For the half year, the replacement cost profit before interest and tax was a loss of \$527 million, compared with a loss of \$271 million a year ago.

The net non-operating charge for the second quarter and half year was \$123 million and \$204 million, respectively. The second-quarter loss included a \$75 million restructuring charge and a net charge of \$48 million for impairment and other provisions. The prior year included a net non-operating charge of \$8 million in the second quarter and a net gain of \$26 million in the half year.

Following the first-quarter announcement that Alternative Energy and Dominion had entered into a joint venture to develop a wind farm in Indiana, construction of the Fowler Ridge installation commenced in May. As previously announced, we formed a joint venture with NRG Energy, Inc. for the development and operation of the Sherbino Mesa wind farm in Texas.

In June, we initiated a further wind project, Flat Ridge in Kansas, a partnership with Westar Energy, Inc. and on 30 June, we acquired the Whiting Clean Energy facility, a 525MW natural-gas fired combined-cycle cogeneration power plant, from NiSource, Inc.

In order to comply with the DTR requirements, we include here a summary of the principal additional disclosures made in our first-quarter results announcement. During the first quarter, Alternative Energy announced its intention to pursue development options for a hydrogen power plant in Abu Dhabi with Abu Dhabi Future Energy Company (Masdar). In the first quarter, Alternative Energy announced its intention to take a 50% stake in Tropical BioEnergia SA, an ethanol refining joint venture in Brazil established by Brazilian companies Santelisa Vale and Maeda Group and, on 10 June, we completed this acquisition.

	Second quarter 2008	First Quarter 2008	Second quarter 2007
Wind - net rated capacity as at period end (megawatts)(a)	172	172	32
Solar - cell production capacity as at period end (megawatts) (b)	255	228	201

(a) Net wind capacity is the sum of the rated capacities of the assets/turbines that have entered into commercial operation, including BP's share of equity-accounted entities. The equivalent capacities on a gross-JV basis (which includes 100% of the capacity of equity-accounted entities where BP has partial ownership) are 373MW as at the second quarter of 2008, 373MW as at the first quarter of 2008 and 32MW as at the second quarter last year.

(b) Solar capacity is the theoretical cell production capacity per annum of in-house manufacturing facilities.

Information on fair value accounting effects

BP uses derivative instruments to manage the economic exposure relating to inventories above normal operating requirements of crude oil, natural gas and petroleum products as well as certain contracts to supply physical volumes at future dates. Under IFRS, these inventories and contracts are recorded at historic cost and on an accruals basis, respectively. The related derivative instruments, however, are required to be recorded at fair value with gains and losses recognized in income because hedge accounting is either not permitted or not followed, principally due to the impracticality of effectiveness testing requirements. Therefore, measurement differences in relation to recognition of gains and losses occur. Gains and losses on these inventories and contracts are not recognized until the commodity is sold in a subsequent accounting period. Gains and losses on the related derivative commodity contracts are recognized in the income statement from the time the derivative commodity contract is entered into on a fair value basis using forward prices consistent with the contract maturity.

IFRS requires that inventory held for trading be recorded at its fair value using period end spot prices whereas any related derivative commodity instruments are required to be recorded at values based on forward prices consistent with the contract maturity. Depending on market conditions, these forward prices can be either higher or lower than spot prices resulting in measurement differences.

BP enters into contracts for pipelines and storage capacity which, under IFRS, are recorded on an accruals basis. These contracts are risk managed using a variety of derivative instruments which are fair valued under IFRS. This results in measurement differences in relation to recognition of gains and losses.

The way that BP manages the economic exposures described above, and measures performance internally, differs from the way these activities are measured under IFRS. BP calculates this difference by comparing the IFRS result with management's internal measure of performance, under which the inventory and the supply and capacity contracts in question are valued based on fair value using relevant forward prices prevailing at the end of the period. We believe that disclosing management's estimate of this difference provides useful information for investors because it enables investors to see the economic effect of these activities as a whole. The impacts of fair value accounting effects, relative to management's internal measure of performance, are shown in the table on page 3. Information for all quarters of 2006 and 2007 can be found at www.bp.com/EVAE.

Principal risks and uncertainties

The principal risks and uncertainties for the remaining six months of the year are described in the Risk Factors section on pages 9 and 10 of *BP Annual Report and Accounts 2007*. Information in relation to our investment in TNK-BP is included in Note 9 on page 30 of this second quarter and half year results announcement.

Cautionary Statement: The foregoing discussion contains forward-looking statements particularly those regarding capital expenditure, expected phasing of underlying production, results of simplification and cost efficiency measures, refinery turnaround activities, the continuing impact of higher energy costs on refining earnings, of slowing OECD economies and high and rising wholesale prices on the marketing businesses as well as the impact of a volatile pricing environment on supply optimization activities. By their nature, forward-looking statements involve risk and uncertainty and actual results may differ from those expressed in such statements depending on a variety of factors including the following: the timing of bringing new fields onstream; industry product supply; demand and pricing; operational problems; general economic conditions (including inflation); political stability and economic growth in relevant areas of the world; changes in laws and governmental regulations and quotas; exchange rate fluctuations; development and use of new technology; the success or otherwise of partnering; the actions of competitors; natural disasters and adverse weather conditions; changes in public expectations and other changes to business conditions; wars and acts of terrorism or sabotage; and other factors discussed in this announcement. For more information you should refer to our Annual Report and Accounts 2007 and our 2007 Annual Report on Form 20-F filed with the US Securities and Exchange Commission.

Statement of directors' responsibilities

The directors confirm that, to the best of their knowledge, the condensed set of financial statements on pages 13 - 19 and 22 - 30 has been prepared in accordance with IAS 34 'Interim Financial Reporting', and that the interim management report on pages 1 - 11, 20 - 21 includes a fair review of the information required by DTR 4.2.7 and DTR 4.2.8.

The directors of BP p.l.c. are listed in *BP Annual Report and Accounts 2007*, with the exception of Dr D C Allen who retired from the board on 31 March 2008 and Dr W E Massey who retired from the board on 17 April 2008.

By order of the board

Tony Hayward
Group Chief Executive

Byron Grote
Chief Financial Officer

28 July 2008

28 July 2008

Independent review report to BP p.l.c.

We have been engaged by the company to review the condensed set of financial statements in the half-yearly financial report for the six months ended 30 June 2008 which comprises the group income statement, group balance sheet, group statement of recognized income and expense, movement in shareholders' equity, group cash flow statement, the related tables on pages 18, 19 and 22, and notes 1 to 11. We have read the other information contained in the half-yearly financial report and considered whether it contains any apparent misstatements or material inconsistencies with the information in the condensed set of financial statements.

This report is made solely to the company in accordance with guidance contained in International Standard on Review Engagements (UK and Ireland) 2410, 'Review of Interim Financial Information Performed by the Independent Auditor of the Entity' issued by the Auditing Practices Board for use in the United Kingdom

(ISRE 2410). To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company, for our work, for this report, or for the conclusions we have formed.

Directors' responsibilities

The half-yearly financial report is the responsibility of, and has been approved by, the directors. The directors are responsible for preparing the half-yearly financial report in accordance with the Disclosure and Transparency Rules of the United Kingdom's Financial Services Authority.

As disclosed in Note 1, the annual financial statements of the group are prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB) and IFRS as adopted by the European Union (EU). The condensed set of financial statements included in this half-yearly financial report has been prepared in accordance with International Accounting Standard 34, 'Interim Financial Reporting', as issued by the IASB and as adopted by the EU.

Our responsibility

Our responsibility is to express to the company a conclusion on the condensed set of financial statements in the half-yearly financial report based on our review.

Scope of review

We conducted our review in accordance with ISRE 2410. A review of interim financial information consists of making enquiries primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing (UK and Ireland) and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the condensed set of financial statements in the half-yearly financial report for the six months ended 30 June 2008 is not prepared, in all material respects, in accordance with International Accounting Standard 34 as issued by the IASB and as adopted by the EU and the Disclosure and Transparency Rules of the United Kingdom's Financial Services Authority.

Notes

1. Basis of preparation

The interim financial information included in this report has been prepared in accordance with IAS 34 'Interim Financial Reporting'.

The results for the interim periods are unaudited and in the opinion of management include all adjustments necessary for a fair presentation of the results for the periods presented. All such adjustments are of a normal recurring nature. The interim financial statements and notes included in this report should be read in conjunction with the consolidated financial statements and related notes for the year ended 31 December 2007 included in *BP Annual Report and Accounts 2007*.

BP prepares its consolidated financial statements included within its Annual Report and Accounts in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB), IFRS as adopted by the European Union (EU) and in accordance with the provisions of the Companies Act 1985. IFRS as adopted by the EU differs in certain respects from IFRS as issued by the IASB, however, the differences have no impact on the group's consolidated financial statements for the periods presented. The financial information presented herein has been prepared in accordance with the accounting policies expected to be used in preparing the Annual Report and Accounts 2008, which do not differ significantly from those used in *BP Annual Report and Accounts 2007*.

2. Resegmentation and other changes to comparatives

(a) Resegmentation

On 11 October 2007, we announced our intention to simplify the organizational structure of BP. From

1 January 2008, there are only two business segments - Exploration and Production and Refining and Marketing. A separate business, Alternative Energy, handles BP's low-carbon businesses and future growth options outside oil and gas. This includes solar, wind, gas-fired power, hydrogen, biofuels and coal conversion.

As a result, and with effect from 1 January 2008:

- The Gas, Power and Renewables segment ceased to report separately.
- The natural gas liquids (NGLs), liquefied natural gas and gas and power marketing and trading businesses were transferred from the Gas, Power and Renewables segment to the Exploration and Production segment.

- The Alternative Energy business was transferred from the Gas, Power and Renewables segment to Other businesses and corporate.
- The Emerging Consumers Marketing Unit was transferred from Refining and Marketing to Alternative Energy.
- The Biofuels business was transferred from Refining and Marketing to Alternative Energy.
- The Shipping business was transferred from Refining and Marketing to Other businesses and corporate.

As a result of the transfers identified above, Other businesses and corporate has been redefined. It now consists of the Alternative Energy business, Shipping, the group's aluminium asset, Treasury (which includes interest income on the group's cash and cash equivalents) and corporate activities worldwide.

Financial information for 2003 to 2007 has been restated to reflect the resegmentation and is available in *BP Financial and Operating Information 2003-2007* and to download from www.bp.com/investors. Quarterly data is provided for 2004-2007 and annual data for 2003.

Profit before interest and tax	18,236	10,879	18,236	10,879

(b) Revised income statement presentation

We have implemented a minor change in the presentation of the group income statement whereby the unwinding of the discount on provisions and on other payables is now included within finance costs. Previously, this was included within other finance income or expense. This line item has now been renamed net finance income or expense relating to pensions and other post-retirement benefits. This change does not affect profit before interest and taxation, profit before taxation or profit for the period. The financial information for comparative periods shows the revised presentation, as set out below.

	First half 2007	Second quarter 2007
<u>As reported</u>		
\$ million		
Profit before interest and taxation	18,236	10,879

Finance costs	648	317
Net finance income relating to pensions and other post-retirement benefits	(322)	(162)
Profit before taxation	17,910	10,724

Top of page 25

Notes**2. Resegmentation and other changes to comparatives (continued)****(c) Revised definition of net debt**

Net debt has been redefined to include the fair value of associated derivative financial instruments that are used to hedge foreign exchange and interest rate risks relating to finance debt, for which hedge accounting is claimed. The

derivatives are reported on the balance sheet within the headings 'Derivative financial instruments'. Amounts for comparative periods are presented on a consistent basis.

	First half and second quarter 2007
<u>As reported</u>	
\$ million	
Net debt	21,111
Equity	89,423
Ratio of net debt to net debt plus equity	19%
<u>As amended</u>	
\$ million	
Net debt	20,732
Equity	89,423
Ratio of net debt to net debt plus equity	19%

(d) Minor amendment to first quarter 2008 results

On 13 May 2008, BP p.l.c. made a minor amendment to its first quarter 2008 results announcement.

Subsequent to making the first quarter results announcement on 29 April 2008, it was discovered that a refining stock valuation error had led to the value of group-wide inventories being reported as \$26,855 million instead of the correct figure of \$26,588 million.

The impact was not significant to the replacement cost profit attributable to BP shareholders of \$6,588 million for the first quarter of 2008, and this figure was therefore not amended.

The profit (including inventory gains and losses) before interest and tax for the Refining and Marketing segment was, however, stated to be \$2,840 million instead of \$2,573 million, a difference of \$267 million. The group's reported profit for the period attributable to BP shareholders, after tax, was stated to be \$7,619 million instead of \$7,451 million, a difference of \$168 million.

The comparative figures for the first quarter 2008 in this second quarter and half year results announcement have been corrected.

BP shareholders' equity	98,474	98,642

3. Significant transaction in the first half

In December 2007, BP signed a memorandum of understanding with Husky Energy Inc. to form an integrated North American oil sands business. The transaction was completed on 31 March 2008, with BP contributing its Toledo refinery to a US jointly controlled entity to which Husky contributed \$250 million cash and a payable of \$2,590 million. In Canada, Husky contributed its Sunrise field to a second jointly controlled entity, with BP contributing \$250 million in cash and a payable of \$2,290 million. The Toledo refinery assets and associated liabilities were classified as a disposal group held for sale at 31 December 2007.

Both jointly controlled entities are owned 50:50 by BP and Husky and are accounted for using the equity method.

The amounts set out below reflect the initial recording of the transaction at 31 March 2008 and subsequent closing adjustments.

Top of page 27

Exploration and Production	2,848
Refining and Marketing	1,904
	4,752
Including acquisitions and asset exchanges:	1,904

During the second quarter, equity-accounted earnings from these jointly controlled entities amounted to \$145 million.

BP purchased refined products from the Toledo jointly controlled entity during the second quarter amounting to \$1,551 million. In addition, BP purchased crude oil from third parties which it sold to the Toledo jointly controlled entity under an agency agreement. The fees earned by BP for this service, and the total amounts receivable and payable at 30 June 2008 under these arrangements, were not significant. BP will also purchase refinery feedstocks from the Sunrise jointly controlled entity once production commences, which is expected in 2012.

Balance Sheet

	30 June	31 December
	2008	2007
Investments in jointly controlled entities	9,712	8,817

(a) Natural gas is converted to oil equivalent at 5.8 billion cubic feet = 1 million barrels

A number of differences have arisen between BP and Alfa, Access/Renova group (AAR), the shareholders of TNK-BP Limited. These differences include disputes with regard to the provision of services by BP specialists to the TNK-BP group, the employment of non-Russian nationals by the TNK-BP group, the board of director nomination process for certain subsidiaries of the TNK-BP group, including TNK-BP Holding, and the tenure of TNK-BP's chief executive officer, Robert (Bob) Dudley. AAR has been reported as stating that it intends to initiate legal proceedings with regard to certain of these matters. In addition, a minority shareholder in TNK-BP Holding has filed a suit in Russia against certain subsidiaries of TNK-BP and BP Exploration Services Limited alleging that an agreement for BP specialists to provide services to the TNK-BP group is invalid and demanding repayment of sums paid to BP for such services. On 23 July, the court ruled in favour of the minority shareholder on the validity issue. BP expects to appeal this decision. A ruling on the claim for repayment has been postponed pending the outcome of such appeal. On 24 July, Mr Dudley announced his decision to leave Russia temporarily. He will continue as TNK-BP's chief executive officer. TNK-BP and certain executives, including Mr Dudley, as well as certain BP group companies, are also the subject of a number of tax, labour and other regulatory investigations in Russia.

BP continues to work to resolve these matters. However, currently, it is not possible to predict the ultimate outcome if these matters remain unresolved.

10. Third quarter results

BP's third quarter results will be announced on 28 October 2008.

11. Statutory accounts

The financial information shown in this publication is unaudited and does not constitute statutory financial statements. BP Annual Report and Accounts 2007 has been filed with the Registrar of Companies; the report of the auditors on those accounts was unqualified and did not contain a statement under section 237(2) or section 237(3) of the Companies Act 1985.
