#### **5.1. Board of Directors & Committees under the Board**

The board of directors, currently consisting of executive directors and non-executive directors, holds regular meetings quarterly. Additional extraordinary meetings may also be convened at the request of any director or any committee that serves under the board of directors.

The board of directors resolves following matters:

- n Matters relating to general meeting of shareholders
- n Matters relating to general management
- n Matters relating to organization and directors of the company
- n Matters relating to funding and capital
- n Other related matters

We currently have six management committees that serve under the board:

- n The Board Steering Committee
- n The Management Strategy Committee
- n The Risk Management Committee
- n The Audit Committee
- n The Evaluation & Compensation Committee
- n The Non Executive Director Nominating Committee

For the list of our directors, see 6. Directors, Senior Management and Employees, 6.1. Executive Directors and 6.2. Non-Executive Directors.

#### **5.2. Audit Committee**

Audit Committee oversees our financial reporting and approves the appointment of and interaction with our independent auditors, compliance officers, management personnel and other committee advisors. The committee also reviews our financial information, auditor's examinations, key financial statement issues and the administration of our financial affairs by the board of directors. In connection with the general meeting of shareholders the committee examines the agenda for, and financial statements and other reports to be submitted by, the board of directors to each

**Independent Auditors Report**

English Translation of a Report Originally Issued in Korean

To the Shareholders and Board of Directors of Kookmin Bank:

We have audited the accompanying consolidated balance sheet of Kookmin Bank (the Bank) and its subsidiaries as of December 31, 2006 and 2005, and the related consolidated statements of income, changes in shareholders' equity and cash flows for the years ended, all expressed in Korean Won. These financial statements are the responsibility of the Bank's management. Our responsibility is to express an opinion on these financial statements based on our audits. We did not audit the financial statements of certain trust accounts whose principal or fixed rate of return is guaranteed by the Bank, KB Investment Co., Ltd., KB Data System Co., Ltd., KB Credit Information, and Kookmin Bank Int'l Ltd., which statements reflect total assets constituting 1.98 percent of consolidated total assets as of December 31, 2006 and total revenues constituting 1.67 percent of consolidated total revenues for the year then ended, and the financial statements of certain trust accounts whose principal or fixed rate of return is guaranteed by the Bank, KB Investment Co., Ltd., KB Data System Co., Ltd., KB Credit Information, NPC02-4 Kookmin Venture Fund and Kookmin Bank Int'l Ltd., which statements reflect total assets constituting 2.11 percent of consolidated total assets as of December 31, 2005 and total revenues constituting 1.63 percent of consolidated total revenues for the year then ended. Those statements were audited by other auditors whose reports have been furnished to us, and our opinion, insofar as it relates to the amounts included for those entities, is based solely on the reports of such other auditors.

We conducted our audits in accordance with auditing standards generally accepted in the Republic of Korea. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, based on our audits and the reports of other auditors, the financial statements referred to above present fairly, in all material respects, the financial position of the Bank and its subsidiaries as of December 31, 2006 and 2005, and the results of their operations, changes in shareholders' equity and their cash flows for the years then ended in conformity with accounting principles generally accepted in the Republic of Korea.

Accounting principles and audit standards and their application in practice vary among countries. The accompanying financial statements are not intended to present the financial position, results of operations and cash flows in accordance with accounting principles and practices generally accepted in countries other than the Republic of Korea. In addition, the procedures and practices utilized in the Republic of Korea to audit financial statements may differ from those generally accepted and applied in other countries. Accordingly, this report and the accompanying financial statements are for use by those knowledgeable about Korean accounting procedures and audit standards and their application in practice.

KOOKMIN BANK AND ITS SUBSIDIARIES  
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
 FOR THE YEARS ENDED DECEMBER 31, 2006 AND 2005

**1. GENERAL:**

Kookmin Bank (the "Bank") was established in 1963 under the Citizens National Bank Act to provide and administer funds for financing to the general public and small businesses. Pursuant to the repeal of the Citizens National Bank Act, effective January 5, 1995, the Bank has conducted its operations in accordance with the provisions of the General Banking Act.

The Bank merged with Korea Long Term Credit Bank on December 31, 1998 and with Daegu, Busan, Jeonnam Kookmin Mutual Savings & Finance Co., Ltd. on August 22, 1999. Also, under the decision of the Financial Supervisory Commission in accordance with the Structural Improvement of the Financial Industry Act, the Bank purchased certain assets, including loans classified as normal or precautionary, and assumed most of the liabilities of Daedong Bank on June 29, 1998. Also, the Bank completed the legal consolidation with Housing and Commercial Bank ("H&CB") on October 31, 2001 and merged with Kookmin Credit Card Co., Ltd., a majority-owned subsidiary, on September 30, 2003.

The Bank's shares have been listed on the Korea Stock Exchange since September 1994. As a result of the business combination with H&CB, the former shareholders of the Bank and H&CB received new common shares of the Bank on the basis of a pre-determined ratio. The new common shares of the Bank were listed on the Korea Stock Exchange on November 9, 2001. In addition, the Bank listed its American Depositary Shares ("ADS") on the New York Stock Exchange ("NYSE") as of November 1, 2001 following the consolidation with H&CB. H&CB listed its ADS on the NYSE as of October 3, 2000 prior to the business combination. As of December 31, 2006, the Bank's paid-in capital amounts to (Won)1,681,896 million.

The Bank is engaged in the banking, trust, credit card and other relevant businesses according to the provisions of the General Banking Act and the Trust Business Act, and Specialized Credit Financial Business Act, respectively. The Bank operates through 1,132 domestic branches and offices (excluding 216 automated teller machine stations) and three overseas branches (excluding two subsidiaries and one office) as of December 31, 2006.

**2. SCOPE OF CONSOLIDATION AND EQUITY METHOD ACCOUNTING:**

### 3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES:

#### Basis of Consolidated Financial Statement Presentation

The Bank and its subsidiaries maintain their official accounting records in Korean Won (only domestic subsidiaries) and prepare statutory consolidated financial statements in the Korean language (Hangul) in conformity with the accounting principles and banking accounting standards generally accepted in the Republic of Korea. Certain accounting principles and banking accounting standards applied by the Bank and its subsidiaries that conform with financial accounting standards and accounting principles in the Republic of Korea may not conform with generally accepted accounting principles and banking accounting practices in other countries. Accordingly, these consolidated financial statements are intended for use by those who are informed about Korean accounting principles and practices. The accompanying consolidated financial statements have been condensed, restructured and translated

## Table of Contents

into English (with certain expanded descriptions) from the Korean language consolidated financial statements. Certain information included in the Korean language consolidated financial statements, but not required for a fair presentation of the Bank and its subsidiaries' financial position, results of operations or cash flows, is not presented in the accompanying consolidated financial statements.

The significant accounting policies followed by the Bank and its subsidiaries in preparing the accompanying consolidated financial statements are summarized below:

### Basis of Consolidated Financial Statements Preparation

#### (1) Offset of Investments and Equity Accounts of Subsidiaries

Investments in subsidiaries and equity accounts of subsidiaries were eliminated at the date when the Bank obtained control over the subsidiaries. The differences between the amounts of investment and the equity accounts are recorded as goodwill or negative goodwill, which is amortized or reversed using the straight-line method over five years. If additional shares are purchased after acquiring control, the difference between the additional acquisition cost and the portion of net assets acquired is credited or charged to capital surplus. If the acquisition date does not agree with the year-end balance sheet date of the subsidiary, the closest closing date to the acquisition date is regarded as the acquisition date.

#### (2) Inter-company Transactions and Balances

All inter-company transactions are eliminated in the consolidated financial statements.

#### (3) Disposition of Subsidiaries' Shares

If a subsidiary of the Bank is still subject to the scope of consolidation even after certain portions of shares are disposed to minority interests, gain/loss on disposal of investment securities is recognized as capital surplus. If a subsidiary of the Bank is subject to the equity method due to the disposition of securities, the investment account is recorded at net assets of subsidiaries at the time of disposition, net of unamortized goodwill or negative goodwill in the consolidated financial statements.

#### (4) Equity Method

For investments in affiliates accounted for using the equity method, the difference between acquisition cost and net assets acquired at the acquisition date is added to or deducted from the carrying amount of investments and is amortized in equal annual amounts for five years from the year incurred. Changes in the Bank's portion of net assets of affiliates accounted for using the equity method are added to or deducted from the carrying amount of investments.

#### (5) Balance Sheet Date for the Consolidated Financial Statements

Balance sheet date for the consolidated financial statements is the closing date of the Bank, the parent company. The accounts of consolidated subsidiaries whose fiscal years are different from that of the Bank have been adjusted to reflect balances as of the closing date of the Bank.

#### (6) Special Reserve in Trust Accounts

A special reserve provided for possible future losses on certain trust accounts under the arrangement of guaranteed fixed rate of return and/or repayment of the principal each year is included in retained earnings in the consolidated financial statements.

## Edgar Filing: KOOKMIN BANK - Form 6-K

### (7) Minority Interests

Non-controlling, outside ownership interests in a subsidiary's shareholders' equity are presented as minority interests. Gain (loss) attributable to minority interests is presented as deduction from (addition to) consolidated net income.

**Interest Income Recognition**

The Bank and its subsidiaries apply the accrual basis in recognizing interest income related to deposits, loans and securities, except for non-secured uncollectible receivables. Interest on loans, whose principal or interest is past due at the balance sheet date, is generally not accrued, with the exception of interest on certain loans secured by guarantee of governments or government agencies, or collateralized by bank deposits. When a loan is placed on non-accrual status, previously accrued interest is generally reversed and deducted from current interest income; and future interest income is recognized on cash basis in accordance with the banking industry accounting standards. As of December 31, 2006 and 2005, the principal amount of loans and securities of which the accrued interest income was not recorded in the accompanying consolidated financial statements based on the above criteria amounted to (Won)6,118,071 million and (Won)7,940,980 million, respectively, and the related accrued interest income not recognized amounted to (Won)533,546 million and (Won)481,240 million, respectively.

**Classification of Securities**

At acquisition, the Bank and its subsidiaries classify securities into one of the following categories: trading, available-for-sale, held-to-maturity and securities accounted for using the equity method, depending on marketability, purpose of acquisition and ability to hold. Debt and equity securities that are bought and held for the purpose of selling them in the near term and actively traded are classified as trading securities. Debt securities with fixed and determinable payments and fixed maturity that the Bank and its subsidiaries have the positive intent and ability to hold to maturity are classified as held-to-maturity securities. Securities that should be accounted for under the equity method are classified as securities accounted for using the equity method. Debt and equity securities not classified as the above are categorized as available-for-sale securities.

If the objective and ability to hold securities of the Bank and its subsidiaries change, available-for-sale securities can be reclassified to held-to-maturity securities and held-to-maturity securities can be reclassified to available-for-sale securities. Whereas, if the Bank and its subsidiaries sell held-to-maturity securities or exercise early redemption right of securities to issuer in the current year or the preceding two years, and if it reclassifies held-to-maturity securities to available-for-sale securities, all debt securities that are owned or purchased cannot be classified as held-to-maturity securities. On the other hand, trading securities cannot be recategorized to available-for-sale securities or held-to-maturity securities and vice versa. Nevertheless, trading securities are reclassified to available-for-sale securities only when the trading securities lose their marketability.

**Valuation of Securities****(1) Valuation of Trading Securities**

Trading equity and debt securities are initially recognized at acquisition cost plus incidental expenses determined by the individual moving average method (the specified identification method for debt securities). When the face value of trading

## **Table of Contents**

debt securities differs from their acquisition cost, the effective interest method is applied to amortize the difference over the remaining term of the securities. After initial recognition, if the fair value of trading securities differs from the book value, trading securities are stated at fair value and the resulting valuation gain or loss is included in current operations.

### **(2) Valuation of Available-for-sale Securities**

Available-for-sale securities are initially recognized at acquisition cost plus incidental expenses, determined by the individual moving average method (the specified identification method for debt securities). The effective interest method is applied to amortize the difference between the face value and the acquisition cost over the remaining term of the debt security. After initial recognition, available-for-sale securities are stated at fair value, with the net unrealized gain or loss presented as gain or loss on valuation of available-for-sale securities in capital adjustments. Accumulated capital adjustments of securities are charged to current operations in a lump sum at the time of disposal or impairment recognition. Non-marketable equity securities are stated at acquisition cost on the financial statements if the fair value of the securities is not reliably determinable.

If the fair value of equity securities (net asset fair value in case of non-marketable equity securities stated at acquisition cost) is below the acquisition cost and the pervasive evidence of impairment exists, the carrying value is adjusted to fair value and the resulting valuation loss is charged to current operations. If the collectible value of debt securities is below the amortized cost and the pervasive evidence of impairment exists, the carrying value is adjusted to collectible value and the resulting valuation loss is charged to current operations. With respect to impaired securities, any unrealized valuation gain or loss of securities previously included in the capital adjustment account is reversed.

### **(3) Valuation of Held-to-maturity Securities**

Held-to-maturity securities are stated at acquisition cost plus incidental expenses, determined by the specific identification method. When the face value of held-to-maturity securities differs from its acquisition cost, the effective interest method is applied to amortize the difference over the remaining term of the securities. If collectible value is below the amortized cost and the pervasive evidence of impairment exists, the carrying value is adjusted to collectible value and the resulting valuation loss is charged to current operations.

### **(4) Valuation of Securities Accounted for Using the Equity Method**

Equity securities held for investment in companies in which the Bank and its subsidiaries are able to exercise significant influence over the investees (in accordance with the Banking Act, if the Bank holds more than 15 percent of the total issued shares, the Bank and its subsidiaries are considered being able to exercise significant influence) are accounted for using the equity method. The Bank and its subsidiaries share in net income or net loss of investees is included in current operations. Changes in the retained earnings of investee are reflected in the retained earnings. Changes in the capital surplus or other capital accounts of investee are reflected as gain or loss on valuation of securities accounted for using the equity method in capital adjustments.

When the book value of equity securities accounted for using the equity method is less than zero due to the cumulative losses of the investees, the Bank and its subsidiaries discontinue applying the equity method and do not provide for additional losses. If the investee subsequently reports net income, the Bank and its subsidiaries resume applying the equity method only after its share of that net income equals the share of net losses not recognized during the period that the equity method was suspended.

### **(5) Reversal of Loss on Impairment of Available-for-sale Securities and Held-to-maturity Securities**

If the reasons for impairment losses of available-for-sale securities no longer exist, the recovery is recorded in current operations under non-operating income up to the amount of the previously recognized impairment loss as reversal of loss on impairment of available-for-sale securities and any excess is included in capital adjustments as gain on valuation of available-for-sale securities. However, if the increases in the fair value of the impaired securities are not regarded as the recovery of the impairment, the increases in the fair value are recorded as gain on valuation of available-for-sale securities in capital adjustments. For non-marketable equity securities, which were impaired based on the net asset fair value, the recovery is recorded up to their acquisition cost.

---

## Table of Contents

For held-to-maturity securities, the recovery is recorded in current operations under non-operating income within the amount of amortized cost that would have been recorded according to the original schedule if the impairment losses had not been recognized as reversal of loss on impairment of held-to-maturity securities.

### (6) Reclassification of Securities

When held-to-maturity securities are reclassified to available-for-sale securities, those securities are accounted for at fair value on the reclassification date and the difference between the fair value and book value is reported in capital adjustment as gain or loss on valuation of available-for-sale securities. When available-for-sale securities are reclassified to held-to-maturity securities, gain or loss on valuation of available-for-sale securities, which had been recorded until the reclassification date, continue to be included in capital adjustments and be amortized using the effective interest rate method and the amortized amount is charged to interest income or expense until maturity. The difference between the fair value at the reclassification date and face value of the reclassified securities to held-to-maturity securities is amortized using effective interest rate method and the amortized amount is charged to interest income. In addition, when certain trading securities lose their marketability, such securities are reclassified as available-for-sale securities at fair market value as of reclassification date.

### Transfer of Securities

When the realization, expiration or sale of the right to obtain the economic benefits arises and the control of securities is lost from the sale of the securities, the unrealized valuation gain or loss of securities included in the capital adjustment account is added to or deducted from the gain or loss on disposal of securities. The gain or loss is the difference between the net proceeds receivable or received and its carrying value. When securities are transferred without losing the control of the securities, the transaction is recorded as a secured borrowing transaction.

### Allowance for Possible Losses on Credits

The Supervisory Regulation of Banking Business (the Supervisory Regulation ) legislated by the Financial Supervisory Commission (FSC) requires the Bank to classify all credits into five categories as normal, precautionary, substandard, doubtful, or estimated loss based on a borrower's repayment capability and historical financial transaction records. The Supervisory Regulation also requires the Bank to provide the minimum rate of loss provision for each category balance using the prescribed minimum percentages as described below.

As required by the Supervisory Regulation, the Bank classifies corporate credits (loans, confirmed acceptances and guarantees) based on a borrower's capability to repay in consideration of borrower's business operation, financial position and future cash flows (Forward Looking Criteria) as well as past due period and status of any bankruptcy proceedings (Historical Repayment Criteria). However, credits to small companies and to households are classified not by evaluating the debt repayment capability of a borrower or customer but by past due period and status of bankruptcy proceedings. The Bank generally classifies all credits to a single borrower in the same category of classification but credits guaranteed or credits collateralized by bank deposits, real estate and other assets may be classified differently based on the guarantor's capability to service such guarantee or based on the value of collateral securing such credits.

Based on the Bank's corporate credit evaluation model, credits to a borrower are classified into 12 grades from AAA to D (AAA, AA, A, A -, BBB, BB, B, B -, CCC, CC, C and D). Credits of grades of AAA to B are classified as normal, credits of grade B - to CCC as precautionary, credits of grade CC as substandard, credits of grade C as doubtful and credits of grade D as estimated loss. Credits are finally classified reflecting past due period and bankruptcy considerations. An allowance is then calculated on the category balances using the prescribed percentages of 0.7 ~ 6.9 percent for normal, 7.0 ~ 19.9 percent for precautionary, 20.0 ~ 49.9 percent for substandard, 50.0 ~ 99.9 percent for doubtful and 100 percent for estimated loss. However, the Bank does not provide allowances for call loans, bonds bought under resale agreements and inter-bank loans that are classified as normal, as it is not required by the Accounting Standards for the Banking Industry.

In addition, as required by the Supervisory Regulation, based on the classification of household loans and credit card receivables by past due period and status of bankruptcy proceedings, allowance for household loans and credit card receivables are calculated on the category balances using the prescribed percentages of 1.0 ~ 9.9 percent and 1.5 ~ 14.9 percent for normal, 10.0 ~ 19.9 percent

**Table of Contents**

and 15 ~ 19.9 percent for precautionary, 20.0 ~ 54.9 and 20.0 ~ 59.9 percent for substandard, 55.0 ~ 99.9 percent and 60.0 ~ 99.9 percent for doubtful, and 100 percent for estimated loss.

Pursuant to the Supervisory Regulation of Banking Business, the Bank provides allowance for possible losses on confirmed acceptances and guarantees, unconfirmed acceptances and guarantees, and notes endorsed based on the credit classification, minimum rate of loss provision prescribed by the Financial Supervisory Service and the cash conversion factor. In addition, the Bank provides other allowances for the unused credit limit of credit card and unused credit line of consumer and corporate loans based on the cash conversion factor and minimum rate of loss provision prescribed by the Financial Supervisory Service.

Pursuant to the amended Supervisory Regulation, the Bank increased the minimum rate of loss provision for loans, confirmed acceptances and guarantees, unconfirmed acceptances and guarantees, notes endorsed, and unused credit line classified as normal and precautionary in 2006. The Bank also extended the scope of other allowances for the unused credit limit of credit card to the extent of the unused credit line of card holders with no record of credit card transaction for the past 1 year. Due to these changes, allowance for possible loan losses, allowance for possible losses on acceptances and guarantees, and other allowances for unused credit limit increased by (Won)397.6 billion, (Won)4.3 billion and (Won)227.9 billion, respectively, as of December 31, 2006, and net income for the year then ended decreased by (Won)456.6 billion.

In addition, when an allowance for possible loan losses required by the Supervisory Regulation is less than the amount calculated based on the historical loss rate, which is estimated through objective and reasonable method in accordance with the accounting principle in the Republic of Korea, historical loss rate is reflected in the provision for possible loan losses.

The method and data used for determining the allowances for loan losses based on historical loss rate by the Bank's lending portfolios are determined as follows:

<b>Lending portfolios</b>	<b>Methodology</b>	<b>Period of historical loss rate</b>	<b>Period of Recovery ratio</b>
Impaired corporate loans	DCF & Migration	N/A	N/A
Non-impaired corporate loans	Migration analysis	1 year	5 years
Consumer loans	Migration analysis	1 year	5 years
Credit card loans	Roll-rate analysis	1 year	5 years

Based on the loan portfolios' nature, lending period, recovery period and other economic factors, the Bank determines the appropriate data period used in assessing its historical loss rate and recovery ratio.

**Restructuring of Loans**

The equity interest in the debtors, net of real estates and/or other assets received as full or partial satisfaction of the Bank's loans, collected through reorganization proceedings, court mediation or debt restructuring agreements of parties concerned, is recorded at fair value at the time of the restructuring. In cases where the fair value of the assets received are less than the book value of the loan (book value before allowances), the Bank offsets first the book value against allowances for loan losses and then recognizes provisions for loan losses. Impairment losses for loans that were restructured in a troubled debt restructuring involving a modification of terms are computed by the difference between the present value of future cash flows under debt restructuring agreements discounted at effective interest rates at the time when loans are originated and the book value before allowances for loan losses. If the amount of allowances already established is less than the impairment losses, the Bank establishes additional allowances for the difference. Otherwise, the Bank reverses the allowances for loan losses.

**Deferred Loan Origination Fees and Costs**

The Bank defers loan origination fees associated with originating loans and loan origination costs that have future economic benefits. Loan balances are reported net of these loan origination fees and costs. The deferred loan origination fees and costs are amortized using the effective interest method with the amortization recognized as adjustments to other interest income.

**Table of Contents**

**Valuation of Receivables and Payables at Present Value**

Receivables and payables incurred through long-term installment transactions, long-term borrowing and lending transactions, and other similar transactions are stated at the present value of expected future cash flows, and the gain or loss on valuation of related receivables and payables is reflected in current operations, unless the difference between nominal value and present value is immaterial. Present value discount or premium is amortized using the effective interest rate method and credited or charged to interest income or interest expense.

**Tangible Assets and Related Depreciation**

Tangible assets included in fixed assets are recorded at cost or production cost including the incidental expenses. Routine maintenance and repairs are expensed as incurred. Expenditures that result in the enhancement of the value or the extension of the useful lives of the facilities involved are capitalized as additions to tangible assets.

Depreciation is computed by using the declining-balance method (Straight-line method for building and structures) based on the estimated useful lives of the assets as follows:

<b>Tangible assets</b>	<b>Depreciation method</b>	<b>Estimated useful life</b>
Buildings and structures	Straight-line	40 years
Leasehold improvements	Declining balance	4-5 years
Equipment and vehicles	Declining balance	4-5 years

**Intangible Assets and Related Amortization**

Intangible assets included in fixed assets are recorded at the production costs or purchase costs plus incidental expenses less accumulated amortization. Intangible assets are amortized using the straight-line method over the estimated economic useful lives of the related assets or the activity method as follows:

<b>Intangible assets</b>	<b>Depreciation method</b>	<b>Estimated useful life</b>
Goodwill	Straight-line	9 years
Negative goodwill	Straight-line	5 years
Trademarks	Straight-line	5-20 years
Others	Straight-line	3-30 years

The Bank recorded goodwill as a result of the merger with H&CB, as the cost of the merger exceeded the fair value of the net assets acquired. Expenditures incurred in conjunction with the development of new products or technology and others, in which the elements of costs can be individually identified and future economic benefits are probably exerted, are capitalized as development costs. The Bank estimates the useful lives of endowment assets that are beneficial upon usage based on the term of the contract and are classified under other intangible assets.

**Valuation Allowance for Non-Business Use Property**

Non-business use property included in fixed assets is recorded when the Bank acquires collateral by foreclosure on the mortgage for loans. If the latest auction price is lower than book value, the difference is provided as a valuation allowance and the valuation loss is charged to current operations. In addition, the difference between the selling price and book value is recorded as a disposition gain or loss.

**Recognition of Impairment of Assets**

When the book value of assets (other than securities and assets valued at present value) exceeds the collective value of the assets due to obsolescence, physical damage or a sharp decrease in market value and the difference is material, the book value are adjusted to recoverable value in the balance sheet and the resulting impairment loss is charged to current operations. If the collective value of the assets increases in subsequent years, the increase in value is credited to operations as gain until the collective value equals the book value of assets that would have been determined had no impairment loss been recognized. The Bank and its subsidiaries assess the collective value based on expected selling price or appraisal value.

## Table of Contents

### Amortization of Discounts (Premiums) on Debentures

Discounts or premiums on debentures issued are amortized over the period from issuance to maturity using the effective interest rate method. Amortization of discounts or premiums is recognized as interest expense on the debentures.

### Bonds under Resale or Repurchase Agreements

Bonds purchased under resale agreements are recorded as loans and bonds sold under repurchase agreements are recorded as borrowings when the Bank purchases or sells securities under resale or repurchase agreements.

### Contingent Liabilities

A possible obligation that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Bank and its subsidiaries is recognized as contingent liabilities when it is probable that an outflow of resources embodying economic benefits required and the amount of the obligation can be measured with sufficient reliability. Where the effect of the time value of money is material, the amount of the liabilities is the present value of the expenditures expected to be required to settle the obligation. In addition, as some or all expenditures required to settle a provision are expected to be reimbursed by another party, the reimbursement is recognized as separate assets in the balance sheet and related income may be offset against expense in the income statement.

### Accrued Severance Benefits

Employees and directors and temporary employees with at least one year of service as of December 31, 2006 are entitled to receive a lump-sum payment upon termination of their employment with the Bank and its subsidiaries, based on their length of service and rate of pay at the time of termination. The accrued severance benefits that would be payable assuming all eligible employees and directors were to resign are included in other liabilities.

The Bank and its domestic subsidiaries have purchased severance benefits insurance, which meets the funding requirement for tax purposes, and made deposits with Kyobo Life Insurance Co., Ltd and others. Withdrawal of these deposits is restricted to the payment of severance benefits. These are presented as a deduction from the accrued severance benefits.

### Accounting for Derivative Instruments

The Bank and its subsidiaries account for derivative instruments pursuant to the Interpretations on Financial Accounting Standards 53-70 on accounting for derivative instruments. Derivative instruments are classified as used for trading activities or for hedging activities according to their transaction purpose. All derivative instruments are accounted for at fair value with the valuation gain or loss recorded as an asset or liability. If the derivative instrument is not part of a transaction qualifying as a hedge, the adjustment to fair value is reflected in current operations.

The accounting for derivative transactions that are part of a qualified hedge based both on the purpose of the transaction and on meeting the specified criteria for hedge accounting differs depending on whether the transaction is a fair value hedge or a cash flow hedge. Fair value hedge accounting is applied to a derivative instrument designated as hedging the exposure to changes in the fair value of an asset or a liability or a firm commitment (hedged item) that is attributable to a particular risk. The gain or loss both on the hedging derivative instruments and on the hedged item attributable to the hedged risk is reflected in current operations. Cash flow hedge accounting is applied to a derivative instrument designated as hedging the exposure to variability in expected future cash flows of an asset or a liability or a forecasted transaction that is attributable to a particular risk. The effective portion of gain or loss on a derivative instrument designated as a cash flow hedge is recorded as a capital adjustment and the ineffective portion is recorded in current operations. The effective portion of gain or loss recorded as a capital adjustment is reclassified to current earnings in the same period during which the hedged forecasted transaction affects earnings. If the hedged transaction results in the acquisition of an asset or the incurrence of a liability, the gain or loss in capital adjustment is added to or deducted from the asset or the liability.

**Table of Contents**

**Accounting for Stock Options**

In accordance with the Interpretations on Financial Accounting Standards 39-35 on the accounting for the stock option, the Bank records stock compensation costs as a capital adjustment in case where the Bank can choose to settle the vested stock option by issuing new shares or treasury stock, or payment of cash equivalent to the difference between the market price and the exercise price at the exercise date. However, the compensation cost of certain options that is certain to be settled by cash payment is recorded in other liabilities (accrued expenses).

**National Housing Fund**

The Bank, as designated by the Korean government under the Housing Law (former Housing Construction Promotion Law), manages the sources and uses of funds of the National Housing Fund (the NHF ) and records the related NHF account in other liabilities. In addition, the Bank pays interest to NHF, which is computed by multiplying the average balance of the NHF account by the passbook deposit interest rate.

**Income Tax Expense**

Income tax expense is the amount currently payable for the period added to or deducted from the changes in deferred income taxes. However, deferred income tax assets are recognized only if the future tax benefits from accumulated temporary differences and any tax loss carryforwards are realizable. The difference between the amount currently payable for the period and income tax expense is accounted for as deferred income tax assets or liabilities, which will be charged or credited to income tax expense in the period each temporary difference reverses in the future. Deferred income tax assets or liabilities are calculated based on the expected tax rate to be applied at the reversal period of the related assets or liabilities. Tax payable and deferred income tax assets or liabilities regarding to certain items are charged or credited directly to related components of shareholders' equity.

**Accounting for Foreign Currency Transactions and Translation**

The Bank and its domestic subsidiaries maintain their accounts in Korean Won. Transactions in foreign currencies are recorded in Korean Won based on the basic rate of exchange on the transaction date. The Korean Won equivalent of assets and liabilities denominated in foreign currencies are translated in these consolidated financial statements based on the basic rate ((Won)929.60 and (Won)1,013.00 to US\$ 1.00 at December 31, 2006 and 2005, respectively) announced by Seoul Money Brokerage Service, Ltd. or cross rates for other currencies other than U.S. Dollars at the balance sheet dates. Translation gains and losses are credited or charged to operations. Financial statements of overseas branches are translated based on the basic rate at balance sheet dates.

**Summary of Accounting Policies for the Bank's Trust Accounts**

(1) Valuation of Debt Securities

Debt securities included in performance-based trust accounts are generally recorded at acquisition costs, which include additional costs and deduct accrued interest income for the period before acquisition, and are classified into five categories to provide allowance for possible credit losses in accordance with the credit rates of bonds issued by each company. Debt securities included in base price-based trust accounts are estimated by applying the average of base prices per bond closing on recent trading day announced by Korea Bond Pricing Co., Ltd. and KIS Pricing, Inc.

(2) Allowance for Possible Credit Losses

An allowance for possible credit losses is provided for the assets, which were not marked to market, pursuant to the asset classification criteria promulgated by the FSC. Loans are classified as of the balance sheet date into normal, precautionary, substandard, doubtful or estimated loss. Allowance rate is as follows:

	Household loans (%)	Corporate loans (%)
Normal	1.00	0.70
Precautionary	10.00	7.00

Edgar Filing: KOOKMIN BANK - Form 6-K

Substandard	20.00	20.00
Doubtful	55.00	50.00
Loss	100.00	100.00

- 12 -

**Table of Contents**

(3) Special Reserve

Special reserve refers to the reserve accumulated upon acquisition of trust fee at 25 percent or more until the balance of special reserve reaches 5 percent of the trust accounts for the purpose of reserving unspecific trust accounts whose principle or income should be guaranteed. In cases where the principle of trust accounts needs to recover or the special reserve exceeds the limit, reversal of special reserve is recognized as income. When the purpose of special reserve no longer exists, it is recorded as trust fee.

**Insurance Reserve of KB Life Insurance**

KB Life Insurance provides various insurance reserves for payments, refunds, participating policyholders dividends and related cost in the future as follows:

- (1) Premium reserve is a net level premium reserve using interest and mortality assumptions used in computing cash surrender values.
- (2) Reserve for outstanding claims represents refunds, dividends and claims reported and unpaid as of the balance sheet date.
- (3) Unearned premium reserve represents the unearned portion of quarterly, semi-annual and annual premiums as of the balance sheet date.
- (4) Dividends held on deposit for policyholders represent amounts payable to policyholders due to interest rate difference guarantee, mortality gains, excess interest, expense gains and long-term contracts in accordance with the regulations or agreements.

**Application of the Statements of Korea Accounting Standards**

The Korea Accounting Standard Board (KASB) under the Korea Accounting Institute (KAI) issued the Statements of Korea Accounting Standards (SKAS) for achieving a set of Korean accounting standards that should be internationally acceptable and comparable based on SKAS Act 92. The Bank and its subsidiaries adopted SKAS No.1 (Accounting Changes and Error Corrections) through SKAS No. 17 (Provisions, Contingent Liabilities and Contingent Assets) (SKAS No. 11 and No. 14 excluded) as of or before December 31, 2005. SKAS No. 18 (Interests in Joint Ventures), No. 19 (Lease) and No. 20 (Related Party Disclosures) have been adopted since January 1, 2006.

**Reclassification**

Certain accounts of the prior period were reclassified to conform to the current year's presentation for comparative purposes; however, such reclassifications had no effect on the previously reported prior year's net income or shareholders' equity of the Bank and its subsidiaries.

The fair values of trading and available-for sale debt securities in Won were assessed by applying the average of base prices as of December 31, 2006, provided by the bond pricing service institutions.

The fair value of the available-for-sale non-marketable equity securities, such as Korea Housing Guarantee Co., Ltd. and 13 others, and the restricted available-for-sale marketable equity securities, such as Hyundai Engineering and Construction Co. and 5 others, were reliably measured by an independent appraisal institute using reasonable judgment. The fair value was determined based on more than one valuation models, such as Discounted Cash Flow (DCF) Model, Imputed Market Value (IMV) Model, Discounted Free Cash Flow to Equity (FCFE) Model, Dividend Discount Model (DDM) and Risk Adjusted Discounted Cash Flow Model depending on the equity securities.

If the loans are restructured by means of reduction of interest rates, cash flows of fixed rate loans are discounted by effective interest rates originally agreed upon and cash flows of floating rate loans are discounted by interest rates determined by adding a credit risk premium, which is calculated at the restructuring date, assuming that debtors' credit at the origination date is effective to the restructuring date, to a benchmark interest rate. The difference between the book value and the present value is presented as an allowance for possible loan losses.

19. **STOCK OPTIONS:**

The Bank granted stock options to executives including the president over the years. When the stock options are exercised, the Bank has the option to settle either through issuance of new shares or treasury stock, or through payment of cash equivalent to the difference between the market price and the exercise price. In accordance with the resolution of the Board of Directors on August 23, 2005, the Bank has changed the settlement method from granting the treasury stock to paying cash equivalent to the difference between the market price and the exercise price only after the remaining treasury stock is exhausted. Accordingly, stock options against 217,935 shares of treasury stock, which the Bank owned as of December 31, 2005, were recorded using the fair value method accounting, and the other stock options were recorded using intrinsic value method accounting. Stock options that are settled through the issuance of shares were entirely exercised in 2006, and the remaining stock options as of December 31, 2006 are entirely those that are settled through payment of cash equivalent to the difference between the market price and the exercise price.

The details of the stock options as of December 31, 2006 were as follows (Unit: In Won):

- (3) The statutory income tax rate applicable to the Bank and its subsidiaries, including resident tax surcharges, is 27.5 percent for the years ended December 31, 2006 and 2005, respectively. However, due to tax adjustments, the effective tax rates for the years ended December 31, 2006 and 2005 are 28.31 percent and 30.87 percent, respectively.

25. EARNINGS PER SHARE:

- (1) Ordinary income per share and net income per share

Ordinary income per share and net income per share were calculated for common stock by dividing ordinary income and net income available to common shareholders by the weighted average number of outstanding common stock. In case the stock options are exercised during the years ended December 31, 2006 and 2005, the outstanding common shares are calculated on the assumption that the treasury stock are disposed of on the exercised date.

Ordinary income per share and net income per share for common stock for the years ended December 31, 2006 and 2005 were computed as follows:

- 1) Outstanding capital stock for the year ended December 31, 2006 was as follows:

	Number of shares	Number of shares x number of days
Number of common shares outstanding-beginning balance	336,379,116	122,778,377,340
Number of treasury stock outstanding-beginning balance	(217,935)	(79,546,275)
Sale of treasury stock	217,935	77,348,731
	336,379,116	122,776,179,796

## Edgar Filing: KOOKMIN BANK - Form 6-K

Weighted average number of common shares outstanding:  $122,776,179,796 \div 365 \text{ days} = 336,373,095$  shares

Outstanding capital stock for the year ended December 31, 2005 was as follows:

	Number of shares	Number of shares x number of days
Number of common shares outstanding-beginning balance	336,379,116	122,778,377,340
Number of treasury stock outstanding-beginning balance	(29,881,209)	(10,906,641,285)
Sale of treasury stock	29,663,274	5,945,063,364
	336,161,181	117,816,799,419

- 50 -

**Table of Contents**

Weighted average number of common shares outstanding:  $117,816,799,419 \div 365 \text{ days} = 322,785,752 \text{ shares}$

2) The basic net income per share for the years December 31, 2006 and 2005 was as follows (Unit: In Won)

	2006		2005
Net income (ordinary income)	(Won) 2,458,259,483,392		(Won) 2,241,054,520,374
Weighted average number of common shares outstanding	336,373,095		322,785,752
<b>Net income per share</b>	<b>(Won) 7,308</b>		<b>(Won) 6,943</b>
Ordinary income per share	(Won) 7,308		(Won) 6,943

The ordinary income for the year ended December 31, 2006 and 2005 equals to net income because there is no extraordinary item.

(2) Diluted ordinary income per share and diluted net income per share

Diluted net income and diluted ordinary income per share for the years ended December 31, 2006 and 2005 represent diluted net income and diluted ordinary income divided by the number of common shares and diluted securities. Stock options were considered for the computation of diluted earning per share due to their dilutive effects.

Diluted net income (ordinary income) per share for the years ended December 31, 2006 and 2005 was computed as follows (Unit: In Won):

	2006		2005
Diluted net income (=ordinary income) (*1)	(Won) 2,458,259,483,392		(Won) 2,240,782,310,189
Weighted average number of common shares outstanding and diluted securities (*2)	336,375,518		322,956,583
<b>Diluted net income per share</b>	<b>(Won) 7,308</b>		<b>(Won) 6,938</b>
Diluted ordinary income per share	(Won) 7,308		(Won) 6,938

(\*1) For the year ended December 31, 2006, the stock options included in the diluted shares have no effect on net income because the contracted service period has expired. For the year ended December 31, 2005, the stock option right expired and the accumulated compensation cost was reversed; therefore, the related cost was deducted from net income.

(\*2) For the years ended December 31, 2006 and 2005, the 2,423 shares and 170,831 shares of treasury stock combined with stock options rendered, respectively, are included in diluted shares.
