**BARCLAYS PLC AND BARCLAYS BANK PLC**

This document includes portions from the previously published results announcement of Barclays PLC as of, and for the period ended, June 30, 2008, as amended to comply with the requirements of Regulation G and Item 10(e) of Regulation S-K promulgated by the U.S. Securities and Exchange Commission (the "SEC"), and also includes the reconciliation to certain financial information prepared in accordance with international financial reporting standards (IFRS). In addition, this document includes data relating to Barclays Bank PLC, the wholly owned subsidiary of Barclays PLC. The purpose of this document is to provide such additional disclosure as required by Regulation G and Regulation S-K Item 10 (e), to delete certain information not in compliance with SEC regulations and to include reconciliations of certain non-IFRS figures to the most directly equivalent IFRS figures, as of, and for the period ended, June 30, 2008, and does not update or otherwise supplement the information contained in the previously published results announcement.

In this document certain non-IFRS measures are reported. Barclays management believes that these non-IFRS measures provide valuable information to readers of its financial statements because they enable the reader to focus more directly on the underlying day-to-day performance of its businesses and provide more detail concerning the elements of performance which the managers of these businesses are most directly able to influence. They also reflect an important aspect of the way in which operating targets are defined and performance is monitored by Barclays management. However, any non-IFRS measures in this document are not a substitute for IFRS measures and readers should consider the IFRS measures as well.

An audit opinion has not been rendered in respect of this announcement.

## **Table of Contents**

Unless otherwise stated, the income statement analyses compare the six months to 30th June 2008 to the corresponding six months of 2007 (as restated on 22nd July 2008). Balance sheet comparisons, unless otherwise stated, relate to the corresponding position at 31st December 2007.

### **Forward-looking Statements**

This document contains certain forward-looking statements within the meaning of Section 21E of the US Securities Exchange Act of 1934, as amended, and Section 27A of the US Securities Act of 1933, as amended with respect to certain of the Group's plans and its current goals and expectations relating to its future financial condition and performance. These forward-looking statements can be identified by the fact that they do not relate only to historical or current facts. Forward-looking statements sometimes use words such as aim, anticipate, target, expect, estimate, intend, plan, goal, believe, or other words of similar meaning. Examples of forward-looking statements include, among others, statements regarding the Group's future financial position, income growth, impairment charges, business strategy, projected levels of growth in the banking and financial markets, projected costs, estimates of capital expenditures, and plans and objectives for future operations. By their nature, forward-looking statements involve risk and uncertainty because they relate to future events and circumstances, including, but not limited to, UK domestic and global economic and business conditions, the effects of continued volatility in credit markets and of further writedowns and credit exposures, market related risks such as changes in interest rates and exchange rates, the policies and actions of governmental and regulatory authorities including classification of financial instruments for regulatory capital purposes, changes in legislation, the further development of standards and interpretations under International Financial Reporting Standards (IFRS) applicable to past, current and future periods, evolving practices with regard to the interpretation and application of standards under IFRS, the outcome of pending and future litigation, the success of future acquisitions and other strategic transactions and the impact of competition – a number of which factors are beyond the Group's control. As a result, the Group's actual future results may differ materially from the plans, goals, and expectations set forth in the Group's forward-looking statements. Additional risks and factors are identified in this document in principal risks and uncertainties and in our filings with the US Securities and Exchange Commission (the SEC) including in our annual report on form 20-F for the fiscal year ended 31st December 2007 which is available on the SEC website at <http://www.sec.gov>.

Any forward-looking statements made by or on behalf of Barclays speak only as of the date they are made. Barclays does not undertake to update forward-looking statements to reflect any changes in Barclays expectations with regard thereto or any changes in events, conditions or circumstances on which any such statement is based. The reader should, however, consult any additional disclosures that Barclays has made or may make in documents it has filed or may file with the SEC.

## **Table of Contents**

### **Results by Business**

#### **UK Retail Banking**

UK Retail Banking profit before tax increased 7% (£44m) to £690m (2007: £646m) due to solid income growth and well controlled costs and impairment.

Income grew 3% (£55m) to £2,176m (2007: £2,121m), reflecting good growth in Personal Customer Savings Accounts and Local Business.

Net interest income increased 3% (£46m) to £1,453m (2007: £1,407m). Growth was driven by a higher contribution from deposits, through good balance sheet growth. Total average customer deposit balances increased 7% to £85.7bn (2007: £80.2bn), supported by the launch of new products.

Mortgage balances showed strong growth, driven by increased gross advances and higher levels of balance retention. Mortgage balances were £76.9bn at the end of the period (31st December 2007: £69.8bn), an approximate market share of 7% (2007: 6%). Gross advances were £12.7bn (2007: £10.5bn). Net new lending represented a market share of 26% (2007: 6%). The average loan to value ratio of the residential mortgage book on a current valuation basis was 35%. The average loan to value ratio of new residential mortgage lending was 51%.

Net fee and commission income increased 7% (£39m) to £639m (2007: £600m), reflecting good growth within Local Business. 2007 net fee and commission income included £87m settlements on overdraft fees.

Impairment charges increased 4% (£11m) to £288m (2007: £277m), reflecting growth in the book and current economic conditions. In UK Home Finance, whilst mortgage delinquencies as a percentage of outstanding balances increased from 0.91% to 0.97%, impairment charges and amounts charged off remained low.

Operating expenses were held flat at £1,202m (2007: £1,199m), reflecting strong and active management of expense lines, including continued back office consolidation. Gains from the sale of property were £65m (2007: £113m).

The cost:income ratio improved two percentage points to 55% (2007: 57%).

## **Table of Contents**

### **Results by Business**

#### **Barclays Commercial Bank**

Barclays Commercial Bank profit before tax decreased 1% (£4m) to £702m (2007: £706m), with good income growth in challenging market conditions offset by increased impairment charges and operating expenses.

Income increased 7% (£92m) to £1,349m (2007: £1,257m).

Net interest income improved 1% (£7m) to £874m (2007: £867m). There was very strong growth in customer assets, predominantly term loans, which increased 12% to £59.0bn (2007: £52.7bn). Average customer accounts grew 2% to £47.3bn (2007: £46.5bn).

Non-interest income increased to 35% of total income (2007: 31%), partly reflecting continued focus on cross sales and efficient balance sheet utilisation. There was strong growth in net fee and commission income, which increased 13% (£45m) to £397m (2007: £352m) due to increased income from foreign exchange and derivative sales, particularly interest rate derivatives.

Income from principal transactions fell to £12m (2007: £32m) due to fewer equity realisations.

Other income of £66m (2007: £6m) included a £42m gain arising from the restructuring of Barclays interest in a third party finance operation. This gain was offset by a broadly similar tax charge. Other income also included £11m (2007: £1m) rental income from operating leases.

Impairment charges increased 19% (£24m) to £148m (2007: £124m) reflecting higher impairment losses in Larger Business partially offset by a reduction in incurred but not individually identified impairment. There was a small increase in impairment as a percentage of period-end loans and advances to customers to 0.44% (2007: 0.41%).

Operating expenses increased 17% (£71m) to £498m (2007: £427m) reflecting increased investment in payments, risk and operations infrastructure, product specialists and sales capability. Growth in operating lease business and lower gains on the sale of property of £10m (2007: £25m) contributed 7% of the increase in operating expenses.

#### **Barclaycard**

Barclaycard profit before tax increased 30% (£89m) to £388m (2007: £299m), driven by strong international income growth and a significant improvement in UK impairment charges. 2008 profit included £41m from Goldfish.

Income increased 13% (£163m) to £1,418m (2007: £1,255m) reflecting strong growth in Barclaycard International and £56m from the inclusion of Goldfish, partially offset by a decline in UK Cards and FirstPlus.

Net interest income increased 15% (£101m) to £787m (2007: £686m) driven by strong growth in international average extended credit card balances, up 40% to £4.2bn.

Net fee and commission income increased 1% (£8m) to £584m (2007: £576m) with growth in Barclaycard International partially offset by lower volumes in FirstPlus.

Principal transactions increased £15m to £17m (2007: £2m) reflecting a £16m gain from the sale of shares in MasterCard.

Other income increased £41m to £18m (2007: £23m loss) reflecting a gain from a portfolio sale in the US in 2008 and £27m loss on disposal of part of the Monument card portfolio in 2007.

Impairment charges increased 10% (£42m) to £477m (2007: £435m), reflecting £77m growth in charges in the international businesses and £27m from the inclusion of Goldfish. These factors were partially offset by £62m lower impairment in the UK businesses with reduced flows into delinquency and lower levels of arrears.

Operating expenses increased 6% (£33m) to £552m (2007: £519m) reflecting continued international growth, development of the UK partnerships business and increased marketing investment. Operating expenses include £89m negative goodwill from the acquisition of Goldfish offset by restructuring charges of £54m and other Goldfish expenses of £23m.

Barclaycard International continued to gain momentum, delivering a 64% (£39m) increase in profit before tax to £100m (2007: £61m). Barclaycard US recorded strong average balance growth, despite difficult market conditions and continued to deliver the financial plan set out at the time of acquisition. The Entercard joint venture continued to build presence across its markets in Norway, Sweden and Denmark.

#### **Global Retail and Commercial Banking - Western Europe**

Global Retail and Commercial Banking - Western Europe profit before tax grew 10% (£10m) to £115m (2007: £105m), despite challenging market conditions in Spain and accelerated investment in the expansion of the franchise. Distribution points increased 191 to 989 (31st December 2007: 798), reflecting growth in all countries. Very strong income growth and the effects of the strengthening of the Euro were partially offset by higher operating expenses and impairment charges.

Income increased 46% (£201m) to £641m (2007: £440m) reflecting strong growth in net interest income and net fee and commission income.

Net interest income increased 56% (£135m) to £378m (2007: £243m) driven by very strong volume growth in unsecured lending, credit cards, commercial lending and mortgages with average customer assets up 36% to £38.7bn (2007: £28.5bn). Average customer liabilities grew 32% to £9.6bn (2007: £7.3bn) at lower margins reflecting competition for customer deposit balances.

Net fee and commission income increased 22% (£34m) to £190m (2007: £156m) due to an increase in investments, insurance and commercial lending.

Principal transactions grew 19% (£10m) to £63m (2007: £53m) including a £17m gain from the sale of shares in MasterCard.

Impairment charges increased £71m to £103m (2007: £32m). This increase was principally due to higher charges in the Spanish commercial portfolios as a consequence of a rapid slowdown in the property and construction sectors.

Operating expenses increased 38% (£116m) to £423m (2007: £307m) reflecting the expansion of the retail distribution network, growth of the SME business and the strengthening of the Premier segment. Operating expenses included £37m (2007: nil) gains from the sale of property assets.

**Global Retail and Commercial Banking - Emerging Markets**

Global Retail and Commercial Banking - Emerging Markets profit before tax decreased 13% (£8m) to £52m (2007: £60m), with very strong income growth more than offset by accelerated investment in existing markets and increased impairment charges. The number of distribution points increased 321 to 871 (31st December 2007: 550).

Income increased 86% (£189m) to £410m (2007: £221m), driven by net interest income, principal transactions and net fees and commissions.

Net interest income increased 82% (£113m) to £251m (2007: £138m), driven by very strong retail and commercial balance sheet growth with average customer assets up 87% to £5.6bn (2007: £3.0bn). Average customer liabilities increased 47% to £6.6bn (2007: £4.5bn) primarily driven by deposit growth in India and Egypt.

Net fee and commission income increased 39% (£27m) to £96m (2007: £69m) primarily driven by very strong growth in retail and treasury fee income.

Principal transactions increased £42m to £59m (2007: £17m) reflecting higher foreign exchange income and a gain of £14m from the sale of shares in MasterCard.

Impairment charges increased £54m to £66m (2007: £12m) reflecting asset growth, particularly in India, and increased wholesale impairment in Africa.

Operating expenses increased 96% (£143m) to £292m (2007: £149m) reflecting continued investment in expansion of the business, with investment in infrastructure and the rollout of global platforms.

### **Results by Business**

#### **Global Retail and Commercial Banking - Absa**

Global Retail and Commercial Banking - Absa profit before tax increased 10% (£27m) to £298m (2007: £271m) despite challenging market conditions and investment in the expansion of the franchise by 160 distribution points to 1,161 (31st December 2007: 1,001). Very strong Rand income and profit growth was partially offset by the 7% depreciation in the average value of the Rand against Sterling. Profit before tax included a gain of £46m relating to the Visa IPO.

Income increased 9% (£95m) to £1,107m (2007: £1,012m) primarily driven by principal transactions and net interest income.

Net interest income improved 5% (£26m) to £499m (2007: £473m) reflecting strong balance sheet growth. Average customer assets increased 9% to £26.3bn (2007: £24.1bn) primarily driven by retail mortgages, commercial asset based finance and retail current accounts. Average customer liabilities increased 13% to £12.5bn (2007: £11.1bn), primarily driven by retail savings, with increased margins reflecting the impact of successive interest rate rises.

Net fee and commission income increased 2% (£8m) to £348m (2007:£340m), underpinned by retail transaction volume growth.

Principal transactions increased £81m to £126m (2007: £45m) reflecting £46m from the Visa IPO and higher treasury transaction income.

Impairment charges increased £69m to £125m (2007: £56m) as a result of rising delinquency levels in the retail portfolios, which have been impacted by the effect on consumers of rising interest and inflation rates and increasing consumer indebtedness.

Operating expenses decreased 1% (£5m) to £627m (2007: £632m). As a result the cost:income ratio improved from 66% to 60%.

**Results by Business**

**Barclays Capital**

Barclays Capital profit before tax decreased 68% (£1,136m) to £524m (2007: £1,660m). Absa Capital delivered strong growth in profit before tax of 31% to £88m (2007: £67m), despite a 7% depreciation in the Rand against Sterling.

Credit market exposures were actively managed and declined over the period. Barclays Capital's results reflected net losses related to the credit market dislocation of £1,979m, of which £871m was included in income and £1,108m in impairment. These were net of gains of £852m arising from the widening of credit spreads on the fair valuation of notes issued by Barclays Capital. Further detail is provided on pages 30 to 40.

Net income was down 47% at £2,185m (2007: £4,143m). Excluding net losses related to credit market dislocation, net income was in line with the record result in 2007. There was very strong growth in Continental Europe, Asia and Africa, and modest growth in the UK, demonstrating the breadth of the client franchise. In the US, income declined due to the continued credit market dislocation, although there was significant growth in commodities, prime services and foreign exchange. Globally there was record income in interest rates, commodities, prime services and emerging markets and strong growth in private equity and currency products.

Net trading income decreased 34% (£925m) to £1,836m (2007: £2,761m) reflecting losses from the credit market dislocation. There was growth of 45% (£880m) to £2,832m in Rates businesses including significant growth in interest rates, prime services, foreign exchange, emerging markets and commodities. Average DVaR increased 48% to £58.0m (2007: £39.3m) driven by an increase in interest rate and credit spread risk.

Net investment income increased 48% (£98m) to £304m (2007: £206m) as a result of a number of private equity gains and structured capital markets transactions. Net interest income increased 24% (£135m) to £702m (2007: £567m), driven by higher contributions from money markets. Net fee and commission income from advisory and origination activities decreased 8% (£48m) to £566m, compared to the record 2007 result of £614m. The corporate lending portfolio, including leveraged finance, increased 19% to £62.1bn (31st December 2007: £52.3bn) primarily as a result of new loan facilities extended at current terms to financial and manufacturing institutions.

Impairment charges and other credit provisions of £1,226m included £1,108m as described above. Other impairment charges of £118m (2007: £10m) principally related to charges in the prime services and global loans businesses.

Operating expenses decreased 32% (£804m) to £1,679m (2007: £2,483m). Performance related pay, discretionary investment spend and short term contractor resources reduced to 24% (2007: 54%) of the cost base. Amortisation of intangible assets of £15m (2007: £30m) principally related to mortgage service rights.

Total headcount increased 100 to 16,300 (31st December 2007: 16,200) as Barclays Capital continued to invest selectively in key growth areas.

#### **Barclays Global Investors**

Barclays Global Investors profit before tax decreased 32% (£123m) to £265m (2007: £388m). Profit was impacted by selective support of liquidity products of £196m (2007: nil).

Income grew 5% (£44m) to £987m (2007: £943m).

Net fee and commission income grew 5% (£47m) to £987m (2007: £940m). This was primarily attributable to increased securities lending and management fees, partially offset by reduced incentive fees of £39m (2007: £109m).

Operating expenses increased 30% (£167m) to £722m (2007: £555m). Operating expenses included charges of £196m (2007: nil) related to selective support of liquidity products. The cost:income ratio increased to 73% (2007: 59%).

Headcount increased 300 to 3,700 (31st December 2007: 3,400). Headcount increased primarily in the support functions and iShares business, reflecting continued investment to support future growth.

Total assets under management decreased 5% (£56bn) to £988bn (31st December 2007: £1,044bn) comprising £12bn of net new assets, £6bn of favourable exchange movements and £74bn of adverse market movements. In US\$ terms assets under management decreased 5% (US\$112bn) to US\$1,967bn (31st December 2007: US\$2,079bn), comprising US\$25bn of net new assets, US\$10bn of positive exchange rate movements and US\$147bn of negative market movements.

### **Results by Business**

#### **Barclays Wealth**

Barclays Wealth profit before tax grew 5% (£9m) to £182m (2007: £173m). Performance was driven by broadly based income growth and tight cost control as the business continued to invest in client-facing staff and infrastructure to facilitate future growth.

Income increased 5% (£33m) to £668m (2007: £635m).

Net interest income increased 10% (£20m) to £225m (2007: £205m) reflecting strong growth in both customer deposits and lending. Average deposits grew 24% to £36.0bn (2007: £29.1bn). Average lending grew 43% to £9.3bn (2007: £6.5bn) driven by increased lending to high net worth, affluent and intermediary clients.

Net fee and commission income decreased 3% (£10m) to £349m (2007: £359m) driven by falling equity markets offset by increased client assets.

Principal transactions decreased £235m to a charge of £169m (2007: £66m gain) reflecting a decrease in the value of assets backing unit linked insurance contracts. Net premiums from insurance contracts decreased £18m to £82m (2007: £100m). The decreases in principal transactions and net premiums from insurance contracts were more than offset by an associated reduction of £277m in net claims and benefits incurred under insurance contracts to a credit of £173m (2007: charge of £104m), driven by the decrease in the value of unit linked liabilities and the impact of favourable experience on non-linked insurance contract liabilities.

Impairment charges increased £10m to £12m (2007: £2m) from a very low base.

Operating expenses increased 3% to £474m (2007: £460m) as a result of the ongoing progress in upgrading the technology and operating platforms and continued hiring of client facing staff, partially offset by cost savings.

Total client assets, comprising customer deposits and client investments, remained at £132.5bn with net new asset inflows of £3.5bn offsetting the impact of market and foreign exchange movements.

### **Results by Business**

#### **Head Office Functions and Other Operations**

Head Office Functions and Other Operations loss before tax increased £255m to £462m (2007: £207m).

Group segmental reporting is performed in accordance with Group accounting policies. This means that inter-segment transactions are recorded in each segment as if undertaken on an arm's length basis. Adjustments necessary to eliminate inter-segment transactions are included in Head Office Functions and Other Operations. The impact of such inter-segment adjustments increased £31m to £140m (2007: £109m). These adjustments included internal fees for structured capital market activities of £98m (2007: £79m) and fees paid to Barclays Capital for debt and equity raising and risk management advice of £67m (2007: £18m). In addition a consolidation adjustment between net interest income and principal transactions is required to match the booking of certain derivative hedging transactions between different segments in the Group. This resulted in a £101m increase in net interest income with an equal and opposite decrease in principal transactions.

Net interest income increased £16m to £21m (2007: £5m) reflecting the £101m increase in the consolidation adjustment on hedging derivatives partially offset by lower interest earned due to the reduction of the centrally held capital surplus.

Principal transactions decreased £159m to a loss of £138m (2007: income of £21m) reflecting the £101m decrease in the consolidation adjustment on hedging derivatives as well as other fair value and hedging adjustments.

Operating expenses increased £79m to £195m (2007: £116m) driven by costs related to an internal review of Barclays compliance with US economic sanctions, and lower rental income and lower proceeds on property sales.

## **Table of Contents**

### **Risk Management**

There have been no material changes to the risk management processes as described in the Risk Management section of our Annual Report and Accounts for the year ended 31st December 2007.

### **Principal Risks and Uncertainties**

The overall risk environment remains challenging for broad areas of the financial services industry. The continued dislocation in the wholesale credit markets, with wider credit spreads and constrained market liquidity, is exacerbated by slower economic growth in many parts of the world.

#### **Wholesale Credit Risk**

As we entered 2008, the wholesale credit environment reflected concerns about weakening economic conditions in our major markets. That environment led to a more cautious approach to credit assessment, pricing and ongoing control in the financial services industry, which we expect to continue in the second half of the year. At the half-year stage, our assessment of our wholesale credit risk is broadly unchanged. Wholesale credit market conditions remain difficult, with reduced liquidity in cash and securitised products.

Overall, our wholesale credit impairment for 2008 is at a level broadly commensurate with our wholesale models' prediction for a stress level that might occur once in twenty years. The key driver of impairment continues to be losses seen in US RMBS and related exposures, where the value of the underlying collateral has continued to deteriorate through 2008. This reflects the high levels of default seen in the US mortgage market, particularly in the sub-prime and Alt-A segments. There have also been some industry losses from exposure to a number of hedge fund counterparties where extreme market turbulence led to sudden loss of value of collateral, which ultimately proved insufficient to cover exposure in full.

Our corporate banking portfolios are generally performing in line with expectations. However, our portfolio in Spain is affected by the rapid cooling of the housing market and the impact on a range of counterparties in the residential development and construction sectors. Some signs of strain are being seen in Barclays Commercial Bank in the UK with an increased flow of cases into our Business Support turnaround and recovery team. Our Risk Tendency in this area has increased since the year-end, partly reflecting more difficult credit conditions.

In Absa, the wholesale portfolios have continued to perform well, reflecting the focus on the property, agriculture and sovereign sectors. This is in line with other banks in the region and contrasts with the declining performance of retail portfolios.

In response to the weakening environment in some of our core markets, we have reduced our risk profile in a number of areas. Examples of steps taken include reducing portfolio concentration limits in key sectors such as leveraged finance and property, as well as tightening underwriting criteria. We have taken actions across major business areas with the intention to reduce losses if the environment continues to weaken.

As we enter the second half of 2008, the principal uncertainties relating to the performance of the wholesale portfolios are:

Performance of the underlying collateral supporting US RMBS and related positions, which may deteriorate further

The impact of a deeper or more prolonged economic downturn on our businesses in the UK, US, Spain and South Africa

The potential for idiosyncratic losses in different sectors and geographies where credit positions are sensitive to economic downturn

Edgar Filing: BARCLAYS PLC - Form 6-K

The potential for losses in respect of other market related exposures to counterparties in the financial services industry

## **Table of Contents**

### **Risk Management**

Further information regarding the credit risk profile of our wholesale and corporate portfolios may be found in the business reviews on pages 9 to 10 and 13 and 24, the summaries of credit market exposures on pages 30 to 40, the impairment review on pages 47 to 48 and the review of Risk Tendency on pages 53 to 54.

### **Retail Credit Risk**

Retail credit risk conditions in a number of Barclays major markets have deteriorated since the start of 2008 as a rise in consumer prices and weaker housing markets have accompanied the effects of dislocation in the wholesale credit markets and slower economic growth.

In the UK, impairment charges in our credit card portfolio reduced. Average credit scores and vintage analysis indicate continued improvement in the quality of business written in during 2007. Overall delinquencies and charge-offs are lower than a year ago, although there is some evidence of deterioration in the second quarter. In the UK unsecured loan portfolios, overall delinquencies have been stable and charge-offs have declined slightly as a result of tighter underwriting criteria.

Home Finance delinquency and possession rates remain well below the Council of Mortgage Lenders industry average and losses remain contained by conservative loan to value (LTV) ratios. The average LTV on business written in the first half of the year was 51% and the average current valuation LTV on our stock of mortgages was 35%. For our residential Home Finance portfolio, 4% of our loans are above 85% LTV on an indexed basis. While there has been some increase in Home Finance delinquency following deterioration in the UK housing market, it remains low relative to historical levels at 0.97%. Our other secured lending portfolios are operating as expected, and are being managed to reduce exposure.

In response to the worsening economic environment in Spain, we have tightened lending criteria and increased collections activities. In the Home Finance portfolio, which comprises the large majority of retail balances, the average LTV on new business written in the first half of the year was 64% and we estimate the average current LTV on our mortgage stock to be 45%.

While delinquency in US credit cards has been affected by the weakening economy, credit actions taken towards the end of 2007 have raised new customer quality and improved recent vintage performance.

In Absa, credit conditions remain challenging, given the prolonged series of interest rate rises and inflationary pressures. The arrears rates for recent vintages of the cards portfolio have improved after the introduction of tighter controls during the past year. Delinquency in the secured portfolios has risen as the economy continues to weaken. In order to stabilise delinquency rates, underwriting criteria have been significantly tightened and collections investment increased. The average mark to market LTV on our mortgage stock stood at 44%.

As we enter the second half of the year, the principal uncertainties relating to the performance of the retail portfolios are:

The impact of global inflationary pressure on household disposable income and the ability of consumers to service debt

The possibility of rises in unemployment and a marked slowdown in the UK, US, Spanish and South African economies

The impact of further, sustained falls in house prices in the UK, Spain and South Africa

The reduced availability of credit in mortgage markets, leading to further declines in property values

## **Table of Contents**

### **Risk Management**

The second half outlook for the South African and Spanish retail credit environments is expected to be challenging with macroeconomic indicators suggesting further weakening. The US portfolio will also be affected by a more difficult environment. While we expect the less favourable economic environment in the UK to continue in the second half of the year, the credit market dislocation has constrained the competitive position of some other financial institutions and Barclays is well-positioned to continue to provide financing to customers.

Further information regarding credit risk profile of our retail portfolios may be found in the business reviews on pages 7 to 8, 11 to 12, 13 to 18 and 23 to 24, the impairment review on pages 47 to 48 and the review of Risk Tendency on pages 53 to 54.

### **Market Risk**

Volatility across financial markets increased due to the continuation of the credit market dislocation, high global inflation brought on by higher commodity prices, especially oil, and recessionary concerns for the western economies.

Against this background, Barclays Capital's market risk exposure, as measured by average total Daily Value at Risk (DVaR), increased 30% to £58m compared with the second half of 2007 and increased 48% compared with the first half. This was mainly due to increases in interest rate positions and higher market volatility within the credit spread and interest rate DVaR. Average daily trading revenue of £26m was 29% higher than the second half of 2007, in line with the increase in DVaR. Further discussion of traded market risk is set out on page 55.

As we enter the second half of the year, the principal uncertainties which may impact our market risk relate to volatility in interest rates, commodities, credit spreads, equity prices and foreign exchange rates. Some of these markets are also experiencing periods of reduced liquidity, creating the potential for significant price adjustments and instability in the historical correlation across risk factors.

### **Liquidity Risk**

Despite a continued lack of term liquidity relative to overall demand, and constrained securitisation and covered bond markets, the Group's liquidity position has remained strong and stable and we have improved the overall term of our wholesale liabilities due to the diverse range of funding sources in terms of geography, currency and counterparty. Retail and commercial deposits continue to grow. In the UK and Europe, the Group continues to be able to fund its retail and commercial assets without recourse to wholesale markets. Given our limited reliance on securitisation as a source of funding, we do not regard uncertainty over the securitisation markets as likely to impact our liquidity risk profile in the second half of the year.

### **Legal Risk and Regulatory Compliance Risk**

These risks affect the Group through the extensive range of legal obligations, regulations and codes in force in the territories in which the Group operates. The principal uncertainties regarding these risks are further discussed on pages 89 to 91.

**Table of Contents****Risk Management****Barclays Capital Credit Market Exposures**

Barclays Capital's credit market exposures resulted in net losses of £1,979m in the first half of 2008, due to continuing dislocation in the credit markets. The net losses, which included £1,108m in impairment charges, comprised: £875m against ABS CDO Super Senior exposures; and £1,956m against other credit market exposures; partially offset by gains of £852m from the general widening of credit spreads on issued notes measured at fair value through the profit and loss account.

The credit market dislocation resulted in losses in the following categories:

	Notes	Pro-forma <sup>1</sup>	Net Exposures	
		As at 30.06.08 £m	As at 31.12.07 £m	As at 30.06.07 £m

<sup>1</sup> The above table includes net exposures as at 30th June 2008 less reductions to US sub-prime and leveraged finance totalling £3,134m that are expected to complete in the second half of 2008.

**Table of Contents****Risk Management****A. ABS CDO Super Senior**

Net ABS CDO Super Senior exposures were £3,229m (31st December 2007: £4,671m). Net exposures are stated after writedowns and charges of £875m incurred in 2008 (2007: £1,412m) and hedges of £204m (31st December 2007: £1,347m).

ABS CDO Super Senior high grade exposure of £3,055m comprised liquidity facilities which were fully drawn and classified within loans and receivables. ABS CDO Super Senior mezzanine exposure of £378m (£174m net of hedges) comprised undrawn commitments. The marks applied to the notional collateral are set out in the table below:

	High Grade £m	As at 30.06.08 Mezzanine £m	Total £m	Marks <sup>1</sup> %

**Table of Contents****Risk Management****A. ABS CDO Super Senior (continued)**

ABS CDO Super Senior high grade and mezzanine exposure as at 31st December 2007 included exposures which contained or comprised a derivative at inception. These derivative exposures, which were measured at fair value through profit and loss, were liquidated or consolidated in 2008. The notional collateral of ABS CDOs liquidated or consolidated in 2008 was £4.3bn.

Collateral and hedges related to liquidated and consolidated exposures remaining at 30th June 2008 is stated at fair value net of hedges within Other US sub-prime exposures below. The valuation for such collateral at 30th June 2008 is approximately 17%. The collateral valuation for all ABS CDO Super Senior deals, including those liquidated and consolidated in 2008, is approximately 44%.

Hedges of £204m (31st December 2007: £1,347m) comprise trades in the liquid index swap market with market counterparties. The counterparty exposure is managed through a standard derivative collateralisation process. None of the hedge counterparties are monoline insurers.

The collateral for the outstanding ABS CDO Super Senior exposures primarily comprises residential mortgage backed securities (RMBS). Within this the majority of the sub-prime and Alt-A collateral was originated in 2005 or earlier with minimal exposure to 2007 or later. The vintages of the sub-prime, Alt-A and US RMBS collateral are set out in the table below.

	As at 30.06.08	As at 31.12.07
<b>Sub-prime Collateral by Vintage</b>		
2005 and earlier	66%	54%
2006	31%	40%
2007 and 2008	3%	6%
<b>Alt-A Collateral by Vintage</b>		
2005 and earlier	57%	49%
2006	39%	40%
2007 and 2008	4%	11%
<b>US RMBS Collateral by Vintage</b>		
2005 and earlier	58%	52%
2006	39%	41%
2007 and 2008	3%	7%

RMBS collateral for the ABS CDO Super Senior exposures is subject to public ratings. The ratings of sub-prime, Alt-A and total RMBS CDO collateral as at 30th June 2008 are set out in the table below.

	High Grade	Mezzanine	Total
<b>Sub-prime RMBS Ratings</b>			
AAA/AA	51%	4%	40%
A/BBB	21%	66%	31%

Other exposures with underlying sub-prime collateral:				
Derivatives	290	333	93%	100%
Loans/other	432	657	73%	100%
<b>Total other direct and indirect exposure</b>	<b>841</b>	<b>1,860</b>		
<b>Total other US sub-prime</b>	<b>2,430</b>	<b>5,037</b>		

The majority of other US sub-prime exposures are measured at fair value through profit and loss.

Whole loans included £2,279m (31st December 2007: £2,843m) acquired on or originated since the acquisition of EquiFirst in March 2007. Of this balance £253m of new loans were originated in 2008. At 30th June 2008 the average loan to value at origination of all of the sub-prime whole loans was 80%.

After the period end, sales have been contractually agreed that will reduce whole loan exposure by £828m. These sales have been made in line with period end marks. In the six months to 30th June 2008 there were net sales, paydowns of collateral and movements in hedges and in US sub-prime collateral of liquidated and consolidated ABS CDO Super Senior structures of approximately £880m.

Included above are senior AAA securities of £44m (31st December 2007: £57m) held by consolidated conduits on which a mark to market loss of £10m has been recognised in equity in the six months to 30th June 2008 (2007: £nil). This is expected to reverse over time. The securities have protection provided by subordination of 32%.

Exposure is stated net of hedges traded in the liquid index swap market with market counterparties. The counterparty exposure is managed through a standard derivative collateralisation process and none of the hedge counterparties are monoline insurers.

Other exposures with underlying sub-prime collateral include counterparty derivative exposures to vehicles which hold sub-prime collateral. The majority of this exposure is the most senior obligation of the vehicles.

- 1 *Pro-forma exposure represents net exposures as at 30th June 2008 less material sales agreed in July*
- 2 *Marks based on gross collateral*

**Table of Contents****Risk Management****C. Alt-A**

Net exposure to the Alt-A market was £3,510m (31st December 2007: £4,916m), through a combination of whole loans, securities and residuals held on the balance sheet, including those held in consolidated conduits.

	As at 30.06.08 £m	As at 31.12.07 £m	Marks at 30.06.08	Marks at 31.12.07
AAA securities	2,322	3,442	69%	87%
Other Alt-A securities	149	208	30%	75%
Whole Loans	716	909	80%	97%
Residuals	13	25	40%	66%
Other exposures with underlying Alt-A collateral:				
Derivatives	184	221	100%	100%
Loans/other	126	111	76%	97%
<b>Total</b>	<b>3,510</b>	<b>4,916</b>		

Alt-A securities, whole loans and residuals are measured at fair value through profit and loss. Alt-A securities held in conduits are categorised as available for sale.

Included above are senior AAA securities of £598m (31st December 2007: £823m) held by consolidated conduits on which a mark to market loss of £132m has been recognised in equity in the six months to 30th June 2008 (2007: £nil). This is expected to reverse over time. The securities have protection provided by subordination of 22%.

At 30th June 2008, 94% of the Alt-A whole loan exposure was performing, and the average loan to value ratio at origination was 81%.

In the six months to 30th June 2008 there were net sales, paydowns of collateral and movements in Alt-A collateral of liquidated and consolidated ABS CDO Super Senior structures of approximately £530m.

Other exposures with underlying Alt-A collateral include counterparty derivative exposures to vehicles which hold Alt-A collateral. The majority of this exposure is the most senior obligation of the vehicle.

**Table of Contents****Risk Management****D. Monoline Insurers**

Assets are held with insurance protection or other credit enhancements from monoline insurers. Declines in fair value of the underlying assets are reflected in increases in the value of potential claims on monoline insurers. These are measured at fair value through profit and loss.

The net exposure to monoline insurers under these contracts increased to £2,584m by 30th June 2008 (31st December 2007: £1,335m) reflecting declines in fair value of the underlying asset on existing contracts. There have been no claims due under these contracts as none of the underlying assets were in default at 30th June 2008.

At 30th June 2008, 67% of the underlying assets comprised collateralised loan obligations (CLOs), 9% US RMBS and 24% other collateral, primarily US CMBS.

	As at 30.06.2008				
	Notional £m	Fair Value of Underlying Asset £m	Gross Exposure £m	Total Write-downs £m	Net Exposure £m

Loans and advances to customers included £176m (31st December 2007: £466m) of drawn and undrawn liquidity facilities in respect of SIV-lites and other structured investment vehicles. In the six months to June 30th 2008, £240m undrawn SIV liquidity facilities were cancelled.

Drawn liquidity facilities are classified as loans and receivables and are stated at cost less impairment. Undrawn liquidity facilities are included in commitments. The remainder of the exposure is fair valued through profit and loss.

*1 Marks above reflect the exposure after impairment*

*2 Marks above relate to bond inventory only*

**Table of Contents****Risk Management****F. Commercial Mortgages**

Exposures in Barclays Capital's commercial mortgages portfolio, all of which are measured at fair value, comprised commercial real estate exposure of £10,354m (31st December 2007: £11,103m) and commercial mortgage-backed securities (CMBS) of £634m (31st December 2007: £1,296m).

The commercial real estate loan exposure comprises 54% US, 43% Continental Europe and UK and 3% Asia. Of the total exposure 92% is tenanted; 4% relates to land or property under construction.

The US exposure includes two large facilities which comprise 45% of the total US exposure. These facilities have paid down approximately £390m in the first half of 2008. The remaining 55% of the US exposure comprises 86 facilities.

The UK and Continental European portfolio is well diversified with 76 facilities in place at 30th June 2008. In Europe protection is provided by loan covenants and annual LTV retests, which cover 90% of the portfolio. Of the Continental European exposure 61% relates to Germany. Exposure to the Spanish market represents less than 1% of total exposure at 30th June 2008.

At the start of the year exposure increased through additional drawdowns on facilities. Exposure subsequently declined following sales and paydowns of approximately £870m in the UK and Continental Europe and £880m in the US.

Exposure is stated net of hedges traded in the liquid index swap market with market counterparties. The counterparty exposure is managed through a standard derivative collateralisation process and none of the hedge counterparties are monoline insurers.

<sup>1</sup> Marks are based on gross collateral

**Table of Contents****Risk Management****G. Leveraged Finance**

At 30th June 2008, the exposure relating to leveraged finance loans was £9,217m (31st December 2007: £9,217m). This includes original targeted holds at commitment date of £1,722m (31st December 2007: £1,659m). Barclays Capital expects to hold these leveraged finance positions until redemption.

Leveraged loans are classified within loans and receivables and are stated at amortised cost less impairment. The credit performance of the assets remains satisfactory.

New leveraged finance commitments originated after 30th June 2007 comprised £1,275m (31st December 2007: £1,148m).

- 1 *Pro-forma represents exposures as at 30th June 2008 less leveraged finance loans of £2,306m that have become subject to an announced intention to be repaid at par. This transaction is contingent upon regulatory approvals and is likely to be completed in the fourth quarter of 2008.*

**Table of Contents**

**Risk Management**

**Own Credit**

The carrying amount of issued notes that are designated under the IAS 39 fair value option is adjusted to reflect the effect of changes in own credit spreads. The resulting gain or loss is recognised in the income statement.

At 30th June 2008, the own credit adjustment arose from the fair valuation of £48.1bn of Barclays Capital structured notes (31st December 2007: £40.7bn). The widening of Barclays credit spreads in the first half of 2008 affected the fair value of these notes and as a result revaluation gains of £852m were recognised in trading income. Of this, £703m was recognised in the first quarter of 2008.

## **Table of Contents**

### **Risk Management**

### **Valuation of Financial Instruments**

Some of the Group's financial instruments are carried at fair value through profit or loss such as those held for trading, designated by management under the fair value option and non-cash flow hedging derivatives. Other non-derivative financial assets may be designated as available for sale. Available for sale financial investments are initially recognised at fair value and are subsequently held at fair value. Gains and losses arising from changes in fair value of such assets are included as a separate component of equity.

The fair value of a financial instrument is the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale. Financial instruments entered into as trading transactions, together with any associated hedging, are measured at fair value and the resultant profits and losses are included in net trading income, along with interest and dividends arising from long and short positions and funding costs relating to trading activities. Assets and liabilities resulting from gains and losses on financial instruments held for trading are reported gross in trading portfolio assets and liabilities or derivative financial instruments, reduced by the effects of netting agreements where there is an intention to settle net with counterparties.

### **Valuation Methodology**

The method of determining the fair value of financial instruments can be analysed into the following categories:

- a) **Unadjusted quoted prices in active markets** where the quoted price is readily available and the price represents actual and regularly occurring market transactions on an arm's length basis.
  
- b) **Valuation techniques using market observable inputs.** Such techniques may include:
  - i) using recent arm's length market transactions;
  
  - ii) reference to the current fair value of similar instruments;
  
  - iii) discounted cash flow analysis, pricing models or other techniques commonly used by market participants.
  
- c) **Valuation techniques used above, but which include significant inputs that are not observable.** On initial recognition of financial instruments measured using such techniques the transaction price is deemed to provide the best evidence of fair value for accounting purposes.

The valuation techniques in (b) and (c) use inputs such as interest rate yield curves, equity prices, commodity and currency prices/yields, volatilities of underlyings and correlations between inputs. The models used in these valuation techniques are calibrated against industry standards, economic models and to observed transaction prices where available.

Various factors influence the availability of observable inputs and these may vary from product to product and change over time. Factors include for example, the depth of activity in the relevant market, the type of product, whether the product is new and not widely traded in the market place, the maturity of market modelling and the nature of the transaction (bespoke or generic).

## Edgar Filing: BARCLAYS PLC - Form 6-K

To the extent that valuation is based on models or inputs that are not observable in the market, the determination of fair value can be more subjective, dependent on the significance of the unobservable input to the overall valuation. Unobservable inputs are determined based on the best information available, for example by reference to similar assets, similar maturities, appropriate proxies, or other analytical techniques. The effect of changing the assumptions for those financial instruments for which the fair values were measured using valuation techniques that are determined in full or in part on assumptions that are not supported by observable inputs to a range of reasonably possible alternative assumptions, would be to provide a range of £1.6bn (31st December 2007: £1.2bn) lower to £1.9bn (31st December 2007: £1.5bn) higher than the fair values recognised in the financial statements.

The size of this range will vary over time in response to market volatility, market uncertainty and changes to benchmark proxy relationships of similar assets and liabilities. The calculation of this range is performed on a consistent basis each period.

## **Table of Contents**

### **Risk Management**

The following summary sets out those instruments which use inputs where it may be necessary to use valuation techniques as described above.

#### **Corporate Bonds**

Corporate bonds are generally valued using observable quoted prices or recently executed transactions. Where observable price quotations are not available, the fair value is determined based on cash flow models where significant inputs may include yield curves, bond or single name credit default swap spreads.

#### **Mortgage Whole Loans**

The fair values of mortgage whole loans are determined using observable quoted prices or recently executed transactions for comparable assets. Where observable price quotations or benchmark proxies are not available, fair value is determined using cash flow models where significant inputs include yield curves, collateral specific loss assumptions, asset specific prepayment assumptions, yield spreads and expected default rates.

#### **Commercial Mortgage Backed Securities and Asset Backed Securities**

Commercial mortgage backed securities and asset backed securities are generally valued using observable information. Wherever possible, the fair value is determined using quoted prices or recently executed transactions. Where observable price quotations are not available, fair value is determined based on cash flow models where the significant inputs may include yield curves, credit spreads, prepayment rates. Securities that are backed by the residual cash flows of an asset portfolio are generally valued using similar cash flow models.

The fair value of home equity loan bonds are determined using models which use scenario analysis with significant inputs including age, rating, internal grade, and index prices.

#### **Collateralised Debt Obligations**

The valuation of collateralised debt obligations notes is first based on an assessment of the probability of an event of default occurring due to a credit deterioration. This is determined by reference to the probability of event of default occurring and the probability of exercise of contractual rights related to event of default. The notes are then valued by determining appropriate valuation multiples to be applied to the contractual cash flows. These are based on inputs including the prospective cash flow performance of the underlying securities, the structural features of the transaction and the net asset value of the underlying portfolio.

#### **Private Equity**

The fair value of private equity is determined using appropriate valuation methodologies which, dependent on the nature of the investment, may include discounted cash flow analysis, enterprise value comparisons with similar companies, price:earnings comparisons and turnover multiples. For each investment the relevant methodology is applied consistently over time.

---

## **Table of Contents**

### **Risk Management**

#### **Derivatives**

Derivative contracts can be exchange traded or over the counter (OTC). OTC derivative contracts include forward, swap and option contracts related to interest rates, bonds, foreign currencies, credit standing of reference entities, equity prices, fund levels, commodity prices or indices on these assets.

The fair value of OTC derivative contracts are modelled using a series of techniques, including closed form analytical formulae (such as the Black-Scholes option pricing model) and simulation based models. The choice of model is dependent on factors such as; the complexity of the product, inherent risks and hedging strategy: statistical behaviour of the underlying, and ability of the model to price consistently with observed market transactions. For many pricing models there is no material subjectivity because the methodologies employed do not necessitate significant judgement and the pricing inputs are observed from actively quoted markets, as is the case for generic interest rate swaps and option markets. In the case of more established derivative products, the pricing models used are widely accepted and used by the other market participants.

Significant inputs used in these models may include yield curves, credit spreads, recovery rates, dividend rates, volatility of underlying interest rates, equity prices or foreign exchange rates and, in some cases, correlation between these inputs. These inputs are determined with reference to quoted prices, recently executed trades, independent market quotes and consensus data.

New, long dated or complex derivative products may require a greater degree of judgement in the implementation of appropriate valuation techniques, due to the complexity of the valuation assumptions and the reduced observability of inputs. The valuation of more complex products may use more generic derivatives as a component to calculating the overall value.

Derivatives where valuation involves a significant degree of judgement include:

#### **Fund Derivatives**

Fund derivatives are derivatives whose underlyings include mutual funds, hedge funds, indices and multi-asset portfolios. They are valued using underlying fund prices, yield curves and available market information on the level of the hedging risk. Some fund derivatives are valued using unobservable information, generally where the level of the hedging risk is not observable in the market. These are valued taking account of risk of the underlying fund or collection of funds, diversification of the fund by asset, concentration by geographic sector, strategy of the fund, size of the transaction and concentration of specific fund managers.

#### **Commodity Derivatives**

Commodity derivatives are valued using models where the significant inputs may include interest rate yield curves, commodity price curves, volatility of the underlying commodities and, in some cases, correlation between these inputs, which are generally observable. This approach is applied to base metal, precious metal, energy, power, gas, emissions, soft commodities and freight positions. Due to the significant time span in the various market closes, curves are constructed using differentials to a benchmark curve to ensure that all curves are valued using the dominant market base price.

#### **Structured Credit Derivatives**

Collateralised synthetic obligations (CSOs) are structured credit derivatives which reference the loss profile of a synthetic portfolio of loans, debts or other underlyings. The reference asset can be a corporate credit or an asset backed credit. For CSOs that reference corporate credits an analytical model is used. For CSOs on asset backed underlyings, due to the path dependent nature of a CSO on an amortising portfolio a Monte Carlo simulation is used rather than analytic approximation. The expected loss probability for each reference credit in the portfolio is derived from the single name credit default swap spread curve and in addition, for ABS references, a prepayment rate assumption. A simulation is then used to compute survival time which allows us to calculate the marginal loss over each payment period to be calculated by reference to estimated recovery rates. Significant inputs include prepayment rates, cumulative default rates, and recovery rates.

---

## **Table of Contents**

### **Risk Management**

#### **Off-Balance Sheet Arrangements**

In the ordinary course of business and primarily to facilitate client transactions, the Group enters into transactions which may involve the use of off-balance sheet arrangements and special purpose entities (SPEs). These arrangements include the provision of guarantees, loan commitments, retained interests in assets which have been transferred to an unconsolidated SPE or obligations arising from the Group's involvements with such SPEs.

#### **Guarantees**

The Group issues guarantees on behalf of its customers. In the majority of cases, the Group will hold collateral against the exposure, have a right of recourse to the customer or both. In addition, the Group issues guarantees on its own behalf. The main types of guarantees provided are: financial guarantees given to banks and financial institutions on behalf of customers to secure loans: overdrafts; and other banking facilities, including stock borrowing indemnities and standby letters of credit. Other guarantees provided include performance guarantees, advance payment guarantees, tender guarantees, guarantees to Her Majesty's Revenue and Customs and retention guarantees.

#### **Loan Commitments**

The Group enters into commitments to lend to its customers subject to certain conditions. Such loan commitments are made either for a fixed period, or are cancellable by the Group subject to notice conditions.

#### **Special Purpose Entities**

Transactions entered into by the Group may involve the use of SPEs. SPEs are entities that are created to accomplish a narrow and well defined objective. There are often specific restrictions or limits around their ongoing activities.

Transactions with SPEs take a number of forms, including:

The provision of financing to fund asset purchases, or commitments to provide finance for future purchases.

Derivative transactions to provide investors in the SPE with a specified exposure.

The provision of liquidity or backstop facilities which may be drawn upon if the SPE experiences future funding difficulties.  
Direct investment in the notes issued by SPEs.

Depending on the nature of the Group's resulting exposure, it may consolidate the SPE on to the Group's balance sheet. The consolidation of SPEs is considered at inception based on the arrangements in place and the assessed risk exposures at that time. In accordance with IFRS, SPEs are consolidated when the substance of the relationship between the Group and the entity indicates control. Potential indicators of control include, amongst others, an assessment of the Group's exposure to the risks and benefits of the SPE. The initial consolidation analysis is revisited at a later date if:

- i) the Group acquires additional interests in the entity; or if

ii) the contractual arrangements of the entity are amended such that the relative exposures to risks and rewards change; or if

iii) the Group acquires control over the main operating and financial decisions of the entity.

A number of the Group's transactions have recourse only to the assets of unconsolidated SPEs. Typically, the majority of the exposure to these assets is borne by third parties and the Group's risk is mitigated through over-collateralisation, unwind features and other protective measures. The Group's involvement with unconsolidated third party conduits, collateralised debt obligations and structured investment vehicles is described further below.

## **Table of Contents**

### **Risk Management**

#### **Collateralised Debt Obligations**

The Group has structured and underwritten CDOs. At inception, the Group's exposure principally takes the form of a liquidity facility provided to support future funding difficulties or cash shortfalls in the vehicles. If required by the vehicle, the facility is drawn with the amount advanced included within loans and advances in the balance sheet. Upon an event of default or other triggering event, the Group may acquire control of a CDO and, therefore, be required to fully consolidate the vehicle for accounting purposes. The potential for transactions to hit default triggers has been assessed and included in the determination of impairment charges and other credit provisions.

#### **Structured Investment Vehicles (SIVs)**

The Group has not structured or managed SIVs.

#### **SIV-Lites**

The Group structures and helps to underwrite SIV-Lite transactions. The Group is not involved in their ongoing management.

#### **Commercial Paper and Medium-term Note Conduits**

The Group provides undrawn backstop liquidity facilities to its own sponsored commercial paper conduits. The Group fully consolidates these entities such that the underlying assets are reflected on the Group balance sheet.

#### **Asset Securitisations**

The Group has assisted companies with the formation of asset securitisations, some of which are effected through the use of SPEs. These entities have minimal equity and rely on funding in the form of notes to purchase the assets for securitisation. As these SPEs are created for other companies, the Group does not usually control these entities and therefore does not consolidate them. The Group may provide financing in the form of senior notes or junior notes and may also provide derivatives to the SPE. These transactions are included on the balance sheet.

The Group has used SPEs to securitise part of its originated and purchased retail and commercial lending portfolios and credit card receivables. These SPEs are usually consolidated and derecognition only occurs when the Group transfers its contractual right to receive cash flows from the financial assets, or retains the contractual rights to receive the cash flows, but assumes a contractual obligation to pay the cash flows to another party without material delay or reinvestment, and also transfers substantially all the risks and rewards of ownership, including credit risk, prepayment risk and interest rate risk

Impairment charges on available for sale assets	70	13	
<b>Impairment charges and other credit provisions on ABS CDO Super Senior and other credit market exposures</b>	<b>1,108</b>	<b>782</b>	

Impairment charges and other credit provisions increased £1,489m to £2,448m (2007: £959m).

Impairment charges on loans and advances and other credit provisions increased £1,302m to £2,261m (2007: £959m) reflecting charges of £985m against ABS CDO Super Senior and other credit market exposures and increased impairment in the international portfolios within Global Retail and Commercial Banking. Total loans and advances grew 24% to £454,857m (30th June 2007: £367,711m). As a result impairment charges on loans and advances and other credit provisions as a percentage of period end Group total loans and advances increased to 0.99% (2007: 0.52%).

In the retail portfolios, impairment charges on loans and advances and other credit provisions rose 23% (£185m) to £985m (2007: £800m) principally as a consequence of increased impairment in the international portfolios, whilst total loans and advances increased 19% to £175,397m (30th June 2007: £147,730m). As a result impairment charges as a percentage of period end total loans and advances increased to 1.12% (2007: 1.08%).

In the wholesale and corporate portfolios, impairment charges on loans and advances and other credit provisions rose £1,117m to £1,276m (2007: £159m) whilst total loans and advances increased 27% to £279,460m (30th June 2007: £219,981m). As a result impairment charges as a percentage of period end total loans and advances increased to 0.91% (2007: 0.14%).

## **Table of Contents**

### **Risk Management**

#### **Impairment Charges and Other Credit Provisions (continued)**

##### **Global Retail and Commercial Banking**

Impairment charges in **UK Retail Banking** increased 4% (£11m) to £288m (2007: £277m), reflecting growth in the book and current economic conditions. In UK Home Finance, whilst mortgage delinquencies as a percentage of outstanding balances increased from 0.91% to 0.97%, impairment charges and amounts charged off remained low.

The impairment charge in **Barclays Commercial Bank** increased 19% (£24m) to £148m (2007: £124m) reflecting higher impairment losses in Larger Business partially offset by a reduction in incurred but not individually identified impairment. There was a small increase in impairment as a percentage of period-end loans and advances to customers to 0.44% (2007: 0.41%).

Impairment charges in **Barclaycard** increased 10% (£42m) to £477m (2007: £435m), reflecting £77m growth in charges in the international businesses and £27m from the inclusion of Goldfish. These factors were partially offset by £62m lower impairment in the UK businesses with reduced flows into delinquency and lower levels of arrears.

Impairment charges in **Global Retail and Commercial Banking - Western Europe** increased £71m to £103m (2007: £32m) principally due to higher charges in the Spanish commercial portfolios as a consequence of a rapid slowdown in the property and construction sectors.

Impairment charges in **Global Retail and Commercial Banking - Emerging Markets** increased £54m to £66m (2007: £12m) reflecting asset growth, particularly in India, and increased wholesale impairment in Africa.

Impairment charges in **Global Retail and Commercial Banking - Absa** increased £69m to £125m (2007: £56m) as a result of rising delinquency levels in the retail portfolios, which have been impacted by rising interest and inflation rates and increasing consumer indebtedness.

##### **Investment Banking and Investment Management**

**Barclays Capital** impairment charges and other credit provisions of £1,226m (2007: £10m) included a charge of £1,108m against ABS CDO Super Senior and other credit market positions. Other impairment charges increased £108m to £118m (2007: £10m) primarily related to charges in the prime services and global loans business.

The impairment charge in **Barclays Wealth** rose £10m to £12m (2007: £2m) from a very low base.

<b>Total Excluding ABS CDO Super Senior Exposure</b>	<b>43.9</b>	<b>49.0</b>	<b>53.8</b>

Allowance coverage of credit risk loans and of potential credit risk loans excluding the drawn ABS CDO Super Senior exposure decreased to 52.3% (31st December 2007: 55.6%) and 43.9% (31st December 2007: 49.0%), respectively. The decrease in these ratios reflected a change in the mix of credit risk loans and potential credit risk loans as secured retail and wholesale and corporate exposure, where the recovery outlook is relatively high, increased as a proportion of credit risk loans and potential credit risk loans.

Edgar Filing: BARCLAYS PLC - Form 6-K

Additional protection on ABS CDO Super Senior credit risk loans was provided by subordination and hedges.

**Table of Contents****Risk Management****Risk Tendency**

As part of its credit risk management system, the Group uses a model-based methodology to assess the point-in-time expected loss of credit portfolios across different customer categories. The approach is termed Risk Tendency and applies to credit exposures not reported as Credit Risk Loans. Risk Tendency models provide statistical estimates of average expected loss levels for a rolling 12-month period based on averages in the ranges of possible losses expected from each of the current portfolios. This contrasts with impairment charges as required under accounting standards, which derive from Credit Risk Loans where there is objective evidence of impairment as at the balance sheet date.

Since Risk Tendency and impairment allowances are calculated for different parts of the portfolio, for different purposes and on different bases, Risk Tendency does not predict loan impairment. Risk Tendency is provided to present a view of the evolution of the quality of the credit portfolios.

	Half Year Ended		
	30.06.08	31.12.07	30.06.07
	£m	£m	£m
UK Retail Banking	495	470	580
Barclays Commercial Bank	360	305	290
Barclaycard	1,115	955	975
GRCB - Western Europe	185	135	105
GRCB - Emerging Markets	240	140	50
GRCB - Absa	195	190	185
Barclays Capital	200	140	110
Barclays Wealth	15	10	10
Head Office Functions and Other Operations	5	10	5
	<b>2,810</b>	<b>2,355</b>	<b>2,310</b>

Risk Tendency increased 19% (£455m) to £2,810m (31st December 2007: £2,355m), broadly in line with the 17% growth in the Group's loans and advances balances.

**UK Retail Banking** Risk Tendency increased £25m to £495m (31st December 2007: £470m). This reflected a higher risk profile in the unsecured loans portfolios and asset growth.

Risk Tendency in **Barclays Commercial Bank** increased £55m to £360m (31st December 2007: £305m). This reflected asset growth and deterioration in credit conditions.

**Barclaycard** Risk Tendency increased £160m to £1,115m (31st December 2007: £955m) primarily reflecting the inclusion of the Goldfish portfolio, an increase in the international portfolio and a deterioration in credit conditions in Barclaycard US and secured loans portfolios.

Risk Tendency at **GRCB - Western Europe** increased £50m to £185m (31st December 2007: £135m) principally reflecting balance sheet growth and weaker credit conditions.

Risk Tendency at **GRCB - Emerging Markets** increased £100m to £240m (31st December 2007: £140m) reflecting asset growth and a change in the risk profile following a broadening of the product offering through new product launches and new market entry in India and UAE.

**Table of Contents**

**Risk Management**

**Risk Tendency (continued)**

Risk Tendency at **GRCB - Absa** increased £5m to £195m (31st December 2007: £190m) reflecting a continued weakening of retail credit conditions in South Africa and asset growth in Rand terms largely offset by a movement in the Rand/Sterling exchange rate.

Risk Tendency in **Barclays Capital** increased £60m to £200m (31st December 2007: £140m) reflecting asset growth and credit downgrades. The drawn liquidity facilities on ABS CDO Super Senior positions are classified as credit risk loans and therefore no Risk Tendency is calculated on them.

Risk Tendency at **Barclays Wealth** increased £5m to £15m (31st December 2007: £10m) reflecting the transfer of a number of assets from GRCB - Western Europe.

**Table of Contents****Risk Management****Market Risk**

Market Risk is the risk that Barclays earnings or capital, or its ability to meet business objectives, will be adversely affected by changes in the level or volatility of market rates or prices such as interest rates, credit spreads, commodity prices, equity prices and foreign exchange rates.

Barclays Capital's market risk exposure, as measured by average total Daily Value at Risk (DVaR), increased to £58.0m in the first half of 2008. This was mainly due to increases in interest rate positions and higher market volatility within the credit spread and interest rate DVaR.

Barclays Capital's DVaR as at 30th June 2008 was £61.2m (31st December 2007: £53.9m).

**Analysis of Barclays Capital's Market Risk Exposures**

The daily average, maximum and minimum values of DVaR were calculated as below:

	Half Year Ended 30.06.08		
	Average £m	High <sup>1</sup> £m	Low <sup>1</sup> £m
Interest rate risk	37.9	58.3	27.9
Credit spread risk	37.7	41.9	32.0
Commodity risk	23.7	29.6	18.7
Equity risk	9.7	12.9	6.7
Foreign exchange risk	5.3	9.0	2.9
Diversification effect	(56.3)	n/a	n/a
<b>Total DVaR</b>	<b>58.0</b>	<b>73.3</b>	<b>49.2</b>
	Half Year Ended 31.12.07		
	Average £m	High <sup>1</sup> £m	Low <sup>1</sup> £m
Interest rate risk	20.2	33.3	12.6
Credit spread risk	29.3	43.3	16.1
Commodity risk	20.9	24.8	17.4
Equity risk	12.3	17.6	9.8
Foreign exchange risk	5.4	9.6	3.2
Diversification effect	(43.4)	n/a	n/a
<b>Total DVaR</b>	<b>44.6</b>	<b>59.3</b>	<b>38.4</b>
	Half Year Ended 30.06.07		
	Average £m	High <sup>1</sup> £m	Low <sup>1</sup> £m
Interest rate risk	19.7	27.2	13.0
Credit spread risk	20.4	28.1	14.6
Commodity risk	19.5	27.2	14.8
Equity risk	10.1	15.3	7.3
Foreign exchange risk	4.3	6.7	2.9
Diversification effect	(34.7)	n/a	n/a

<b>Total DVaR</b>	<b>39.3</b>	<b>47.1</b>	<b>33.1</b>
-------------------	-------------	-------------	-------------

- 1 The high (and low) DVaR figures reported for each category did not necessarily occur on the same day as the high (and low) DVaR reported as a whole. Consequently a diversification effect number for the high (and low) DVaR figures would not be meaningful and it is therefore omitted from the above table.*

Barclays Wealth	17,749	18,188	16,663
Head Office Functions and Other Operations	4,528	5,683	5,356
	<b>1,365,654</b>	<b>1,227,361</b>	<b>1,158,262</b>

Total assets increased 11% to £1,365.7bn (31st December 2007: £1,227.4bn).

UK Retail Banking total assets increased 9% to £96.3bn (31st December 2007: £88.5bn). This was mainly attributable to growth in mortgage balances.

Barclays Commercial Bank total assets grew 9% to £81.0bn (31st December 2007: £74.6bn) driven by growth across lending products.

Barclaycard total assets increased 10% to £24.3bn (31st December 2007: £22.1bn) primarily driven by the acquisition of Goldfish and increases in international assets.

GRCB - Western Europe total assets grew 17% to £51.1bn (31st December 2007: £43.7bn). This growth was mainly driven by increases in retail mortgages and unsecured lending.

GRCB - Emerging Markets total assets grew 24% to £11.4bn (31st December 2007: £9.2bn) reflecting increases in retail and commercial lending.

GRCB - Absa total assets decreased 6% to £34.2bn (31st December 2007: £36.4bn) reflecting broad based asset growth, more than offset by the weakening of the Rand.

Barclays Capital total assets rose 15% to £966.1bn (31st December 2007: £839.9bn). This primarily reflected continuing volatility across various derivative indices, resulting in significant increases in grossed-up derivative positions. Excluding derivatives, assets decreased 4% to £566.8bn (31st December 2007: £592.3bn).

Barclays Global Investors total assets decreased 11% to £79.0bn (31st December 2007: £89.2bn), mainly attributable to adverse market movements in certain asset management products recognised as investment contracts.

Barclays Wealth total assets decreased 2% to £17.7bn (31st December 2007: £18.2bn) reflecting a fall in the value of unit linked insurance contracts partially offset by strong growth in lending to high net worth and intermediary clients.

## Edgar Filing: BARCLAYS PLC - Form 6-K

Head Office Functions and Other Operations total assets decreased 21% to £4.5bn (31st December 2007: £5.7bn).

**Table of Contents****Regulatory Capital****Risk Weighted Assets**

	As at 30.06.08 Basel II £m	As at 31.12.07 Basel II £m	As at 30.06.07 Basel I £m
UK Retail Banking	30,855	30,540	42,498
Barclays Commercial Bank	62,991	62,056	51,106
Barclaycard	24,955	22,457	16,898
GRCB - Western Europe	29,170	25,084	20,370
GRCB - Emerging Markets	11,744	10,176	4,049
GRCB - Absa	15,400	17,213	20,692
Barclays Capital	163,352	172,974	152,467
Barclays Global Investors	4,413	4,266	1,616
Barclays Wealth	8,808	8,011	6,871
Head Office Functions and Other Operations	1,051	1,101	1,476
	<b>352,739</b>	<b>353,878</b>	<b>318,043</b>

Risk weighted assets remained flat at £352.7bn (31st December 2007: £353.9bn).

UK Retail Banking risk weighted assets increased by 1% to £30.9bn (31st December 2007: £30.5bn) with growth in mortgages partially offset by a reduction in operational risk.

Barclays Commercial Bank risk weighted assets increased 2% to £63.0bn (31st December 2007: £62.1bn). The increase in risk weighted assets was lower than asset growth, reflecting a relative increase in lower risk weighted portfolios.

Barclaycard risk weighted assets increased 11% to £25.0bn (31st December 2007: £22.5bn), primarily reflecting the acquisition of the Goldfish cards portfolio and redemption of securitisation transactions.

GRCB - Western Europe risk weighted assets increased 16% to £29.2bn (31st December 2007: £25.1bn), primarily reflecting underlying lending growth of 8% and the strengthening of the Euro.

GRCB - Emerging Markets risk weighted assets increased 15% to £11.7bn (31st December 2007: £10.2bn), reflecting asset growth and a change in the product mix.

GRCB - Absa risk weighted assets decreased 11% to £15.4bn (31st December 2007: £17.2bn), mainly due to weakening of the Rand.

Barclays Capital risk weighted assets decreased 6% to £163.4bn (31st December 2007: £173.0bn) due to changes in the asset class mix and the roll-out of Basel II models.

Barclays Global Investors risk weighted assets increased 3% to £4.4bn (31st December 2007: £4.3bn) mainly attributed to overall business growth.

Barclays Wealth risk weighted assets increased 10% to £8.8bn (31st December 2007: £8.0bn) driven by strong organic business growth, partially offset by increased benefit from collateral taken.

Edgar Filing: BARCLAYS PLC - Form 6-K

Head office functions risk weighted assets remained broadly stable at £1.1bn (31st December 2007: £1.1bn).

**Table of Contents****Performance Management****Staff Numbers**

<b>Total Group permanent and fixed term contract staff worldwide</b>	<b>146,600</b>	<b>134,900</b>	<b>127,700</b>

Staff numbers are shown on a full-time equivalent basis. Total Group permanent and fixed term contract staff comprised 63,100 (31st December 2007: 61,900) in the UK and 83,500 (31st December 2007: 73,000) internationally.

UK Retail Banking headcount was stable at 30,700 (31st December 2007: 30,700).

Barclays Commercial Bank headcount increased 800 to 10,000 (31st December 2007: 9,200) reflecting increased investment in risk and operations infrastructure and new initiatives in product development and sales capability. Headcount at 31st December 2007 included 1,200 operations staff transferred from UK Retail Banking in the second half of 2007.

Barclaycard staff numbers increased 700 to 9,600 (31st December 2007: 8,900), primarily due to the acquisition of Goldfish.

GRCB - Western Europe staff numbers increased 1,400 to 10,200 (31st December 2007: 8,800), reflecting expansion of the retail distribution network.

GRCB - Emerging Markets staff numbers increased 5,300 to 19,200 (31st December 2007: 13,900) due to continued expansion of the business and investment in infrastructure.

GRCB - Absa staff numbers increased 2,900 to 38,700 (31st December 2007: 35,800), reflecting continued growth in the business and investment in collections capacity.

Barclays Capital staff numbers increased 100 to 16,300 (31st December 2007: 16,200) as Barclays Capital continues to invest selectively in key areas.

Barclays Global Investors staff numbers increased 300 to 3,700 (31st December 2007: 3,400). Headcount increased primarily in the support functions and iShares business, reflecting continued investment to support further growth.

Barclays Wealth staff numbers increased 400 to 7,300 (31st December 2007: 6,900) principally due to increased client facing professionals and a short-term increase in infrastructure staff to support transformation projects.

## **Table of Contents**

### **Accounting Policies**

#### **Basis of Preparation**

The condensed consolidated interim financial statements for the half year ended 30th June 2008 on pages 62 to 102 have been prepared in accordance with the Disclosure and Transparency Rules of the Financial Services Authority and with IAS 34, *Interim Financial Reporting* as published by the International Accounting Standards Board (IASB). They are also in accordance with IAS 34 as adopted by the European Union. The condensed consolidated interim financial statements should be read in conjunction with the annual financial statements for the year ended 31st December 2007, which have been prepared in accordance with International Financial Reporting Standards (IFRS) and interpretations issued by the International Financial Reporting Interpretations Committee (IFRIC) as published by the IASB. The annual financial statements are also prepared in accordance with IFRS as published by the IASB and IFRIC interpretations as adopted by the European Union.

The accounting policies adopted are consistent with those of the accounting policies described in the 2007 Annual report, except IFRS 8 *Operating Segments* has been adopted as at 1st January 2008. The standard was issued in November 2006 and excluding early adoption would first be required to be applied to the Group's accounting period beginning on 1st January 2009. The standard replaces IAS 14 *Segmental Reporting* and aligns operating segmental reporting with segments reported to senior management as well as requiring amendments and additions to the existing segmental reporting disclosures. The standard does not change the recognition, measurement or disclosure of specific transactions in the condensed consolidated interim financial statements but has impacted the segmental reporting as set out in note 34 on page 97.

**Table of Contents****Notes to the Condensed Consolidated Interim Financial Statements****1. Net Interest Income**

	Half Year Ended		
	30.06.08	31.12.07	30.06.07
	£m	£m	£m
Cash and balances with central banks	76	133	12
Available for sale investments	993	1,136	1,444
Loans and advances to banks	573	808	608
Loans and advances to customers	11,121	10,505	9,054
Other	593	689	919
<b>Interest income</b>	<b>13,356</b>	<b>13,271</b>	<b>12,037</b>
Deposits from banks	(1,069)	(1,249)	(1,471)
Customer accounts	(3,071)	(2,208)	(1,902)
Debt securities in issue	(3,086)	(3,657)	(2,994)
Subordinated liabilities	(573)	(480)	(398)
Other	(387)	(656)	(683)
<b>Interest expense</b>	<b>(8,186)</b>	<b>(8,250)</b>	<b>(7,448)</b>
<b>Net interest income</b>	<b>5,170</b>	<b>5,021</b>	<b>4,589</b>

Group net interest income increased 13% (£581m) to £5,170m (2007: £4,589m) reflecting balance sheet growth across a number of businesses.

Group net interest income reflects structural hedges which function to reduce the impact of the volatility of short-term interest rate movements on equity and customer balances that do not re-price with market rates. The cost of structural hedges relative to average base rates decreased to £73m (2007: £126m), largely due to the smoothing effect of the structural hedge on changes in interest rates.

**2. Net Fee and Commission Income**

	Half Year Ended		
	30.06.08	31.12.07	30.06.07
	£m	£m	£m
Brokerage fees	43	8	101
Investment management fees	850	925	862
Securities lending	180	129	112
Banking and credit related fees and commissions	3,271	3,242	3,121
Foreign exchange commission	117	82	96
<b>Fee and commission income</b>	<b>4,461</b>	<b>4,386</b>	<b>4,292</b>
<b>Fee and commission expense</b>	<b>(547)</b>	<b>(490)</b>	<b>(480)</b>

**Net fee and commission income**

**3,914      3,896      3,812**

Net fee and commission income increased 3% (£102m) to £3,914m (2007: £3,812m).

Fee and commission income increased 4% (£169m) to £4,461m (2007: £4,292m) reflecting increased securities lending fees in Barclays Global Investors and increased volumes in GRCB - Western Europe and GRCB - Emerging Markets.

Fee and commission expense largely comprises brokerage fees.

**Table of Contents****Notes to the Condensed Consolidated Interim Financial Statements****3. Principal Transactions**

	Half Year Ended		
	30.06.08	31.12.07	30.06.07
	£m	£m	£m
Rates related business	2,780	2,160	2,002
Credit related business	(996)	(1,212)	809
<b>Net trading income</b>	<b>1,784</b>	<b>948</b>	<b>2,811</b>
Net gain from disposal of available for sale assets	119	401	159
Dividend income	5	8	18
Net gain from financial instruments designated at fair value	125	191	102
Other investment income	96	220	117
<b>Net investment income</b>	<b>345</b>	<b>820</b>	<b>396</b>
<b>Principal transactions</b>	<b>2,129</b>	<b>1,768</b>	<b>3,207</b>

Principal transactions decreased 34% (£1,078m) to £2,129m (2007: £3,207m).

Net trading income decreased 37% (£1,027m) to £1,784m (2007: £2,811m). The majority of the Group's net trading income arises in Barclays Capital. Growth in the Rates related business reflected growth in fixed income, prime services, foreign exchange, commodities and emerging markets. The Credit related business included net losses from credit market dislocation partially offset by attributable income and the benefits of widening credit spreads on the fair value of issued notes.

Net investment income decreased 13% (£51m) to £345m (2007: £396m). The cumulative gain from disposal of available for sale assets decreased 25% (£40m) to £119m (2007: £159m) reflecting profits realised on the sale of investments.

**4. Net Premiums from Insurance Contracts**

	Half Year Ended		
	30.06.08	31.12.07	30.06.07
	£m	£m	£m
Gross premiums from insurance contracts	593	597	465
Premiums ceded to reinsurers	(25)	(28)	(23)
<b>Net premiums from insurance contracts</b>	<b>568</b>	<b>569</b>	<b>442</b>

Net premiums from insurance contracts increased 29% (£126m) to £568m (2007: £442m), primarily due to expansion in GRCB -Western Europe.

**Table of Contents****Notes to the Condensed Consolidated Interim Financial Statements****5. Other Income**

	Half Year Ended		
	30.06.08 £m	31.12.07 £m	30.06.07 £m
(Decrease)/increase in fair value of assets held in respect of linked liabilities to customers under investment contracts	(5,609)	2,782	2,810
Decrease/(increase) in liabilities to customers under investment contracts	5,609	(2,782)	(2,810)
Property rentals	37	26	27
Other income	126	62	73
	<b>163</b>	<b>88</b>	<b>100</b>

Certain asset management products offered to institutional clients by Barclays Global Investors are recognised as investment contracts. Accordingly the invested assets and the related liabilities to investors are held at fair value and changes in those fair values are reported within Other income. Other income in 2008 includes a £42m gain on the re-organisation of Barclays interest in a third party finance operation. This gain was offset by a broadly similar tax charge.

**6. Net Claims and Benefits Incurred under Insurance Contracts**

	Half Year Ended		
	30.06.08 £m	31.12.07 £m	30.06.07 £m
Gross claims and benefits incurred under insurance contracts	106	266	254
Reinsurers share of claims incurred	(5)	(22)	(6)
<b>Net claims and benefits incurred under insurance contracts</b>	<b>101</b>	<b>244</b>	<b>248</b>

Net claims and benefits incurred under insurance contracts decreased 59% (£147m) to £101m (2007: £248m) principally due to a decrease in the value of unit linked insurance contracts and reduced non-linked insurance contract liabilities due to falls in equity markets in Barclays Wealth.

**Table of Contents****Notes to the Condensed Consolidated Interim Financial Statements****7. Impairment Charges and Other Credit Provisions**

	Half Year Ended

<b>Impairment charges and other credit provisions on ABS CDO Super Senior and other credit market exposures</b>	<b>1,108</b>	<b>782</b>	

**Table of Contents****Notes to the Condensed Consolidated Interim Financial Statements****8. Operating Expenses**

	Half Year Ended		
	30.06.08	31.12.07	30.06.07
	£m	£m	£m
Staff costs	3,888	3,824	4,581
Administrative expenses	2,353	2,085	1,893
Depreciation	274	240	227
Impairment loss - property and equipment and intangible assets	30	14	2
Operating lease rentals	234	210	204
Gain on property disposals	(120)	(120)	(147)
Amortisation of intangible assets	94	99	87
Gain on acquisition	(89)		
<b>Operating expenses</b>	<b>6,664</b>	<b>6,352</b>	<b>6,847</b>

Operating expenses fell 3% (£183m) to £6,664m (2007: £6,847m). The decrease was driven by a 15% fall (£693m) in staff costs to £3,888m (2007: £4,581m). Administrative expenses grew 24% (£460m) to £2,353m (2007: £1,893) reflecting continued expansion and investment in the distribution network and infrastructure of the international businesses within Global Retail and Commercial Banking and the cost of selective support of liquidity products in Barclays Global Investors.

Operating expenses were reduced by gains from the sale of property of £120m (2007: £147m) as the Group continued the sale and leaseback of some of its freehold portfolio, principally in UK Retail Banking, Barclays Commercial Bank and GRCB - Western Europe.

Amortisation of intangible assets increased 8% (£7m) to £94m (2007: £87m).

Gain on acquisition represents the excess of fair value of net assets over cost in respect of the purchase of Discover's UK credit card business Goldfish.

**Staff Costs**

	Half Year Ended		
	30.06.08	31.12.07	30.06.07
	£m	£m	£m
Salaries and accrued incentive payments	3,193	3,137	3,856
Social security costs	247	207	301
Pension costs			
defined contribution plans	84	70	71
defined benefit plans	43	73	77
Other post retirement benefits	15	(2)	12
Other	306	339	264
<b>Staff costs</b>	<b>3,888</b>	<b>3,824</b>	<b>4,581</b>

Staff costs decreased 15% (£693m) to £3,888m (2007: £4,581m). Salaries and accrued incentive payments fell 17% (£663m) to £3,193m (2007: £3,856m), reflecting lower performance related costs in Barclays Capital.

## Edgar Filing: BARCLAYS PLC - Form 6-K

Defined benefit plan pension costs decreased 44% (£34m) to £43m (2007: £77m). This was due to recognition of actuarial gains, higher expected return on assets and reduction in past service costs; partially offset by higher interest costs.

**Table of Contents****Notes to the Condensed Consolidated Interim Financial Statements****9. Share of Post-Tax Results of Associates and Joint Ventures**

	Half Year Ended		
	30.06.08	31.12.07	30.06.07
	£m	£m	£m
Profit from associates	23	30	3
Profit/(loss) from joint ventures		12	(3)
<b>Share of post-tax results of associates and joint ventures</b>	<b>23</b>	<b>42</b>	

The overall share of post-tax results of associates and joint ventures increased £23m to £23m (2007: £nil). This mainly relates to an increase in profits generated by the private equity associates.

**10. Profit on Disposal of Subsidiaries, Associates and Joint Ventures**

	Half Year Ended		
	30.06.08	31.12.07	30.06.07
	£m	£m	£m
Profit on disposal of subsidiaries, associates and joint ventures		23	5

**11. Tax**

The tax charge for the period is based upon a UK corporation tax rate of 28.5% for the calendar year 2008 (2007: 30%). The effective rate of tax for the first half of 2008, based on profit before tax, was 23% (2007: 28%). The effective tax rate differs from 28.5% primarily due to the different tax rates which are applied to the profits earned outside the UK, disallowable expenditure, non-taxable gains and income, and the release of prior year tax provisions and a deferred tax liability no longer required. The effective tax rate for this interim period is lower than the 2007 full year and anticipated 2008 full year rate principally because of the release of prior year tax provisions and a deferred tax liability no longer required.

**Table of Contents****Notes to the Condensed Consolidated Interim Financial Statements****13. Earnings Per Share**

	Half Year Ended		
	30.06.08	31.12.07	30.06.07
	£m	£m	£m
Profit attributable to equity holders of the parent	1,718	1,783	2,634
Dilutive impact of convertible options	(2)	(12)	(£13)
<b>Profit attributable to equity holders of the parent including dilutive impact of convertible options</b>	<b>1,716</b>	<b>1,771</b>	<b>2,621</b>
Basic weighted average number of shares in issue	6,369m	6,481m	6,356m
Number of potential ordinary shares <sup>1</sup>	191m	165m	178m
<b>Diluted weighted average number of shares</b>	<b>6,560m</b>	<b>6,646m</b>	<b>6,534m</b>
Basic earnings per ordinary share	27.0p	27.5p	41.4p
Diluted earnings per ordinary share	26.2p	26.6p	40.1p
The calculation of basic earnings per share is based on the profit attributable to equity holders of the parent and the weighted average number of shares excluding own shares held in employee benefit trusts and shares held for trading.			

The basic and diluted weighted average number of shares in issue in the half year ended 31st December 2007 reflected 336.8 million shares issued on 14th August 2007 of which 299.5 million were repurchased by 31st December 2007. The buyback programme was subsequently completed on 31st January 2008. The weighted average number of shares in issue in the half year ended 31st December 2007 was increased by 54 million shares as a result of this temporary increase.

When calculating the diluted earnings per share, the profit attributable to equity holders of the parent is adjusted for the conversion of outstanding options into shares within Absa Group Limited and Barclays Global Investors UK Holdings Limited. The weighted average number of ordinary shares excluding own shares held in employee benefit trusts and shares held for trading, is adjusted for the effects of all dilutive potential ordinary shares, totalling 191 million (2007: 178 million).

Final dividend	22.5p		20.5p
Interim dividend		11.5p	
<b>Dividend Proposed</b>			

## Edgar Filing: BARCLAYS PLC - Form 6-K

The Directors have recommended an interim dividend for the year ended 31st December 2008 of 11.5p per ordinary share. Based on the number of shares outstanding at 30th June 2008 the amount payable in relation to this dividend would be £732m. This amount does not include the effects of the capital raising described in note 33 on page 96. This amount also excludes £23m payable on own shares held by employee benefit trusts.

*1 Potential ordinary shares reflect the dilutive impact of share options outstanding.*

<b>Total derivative assets/(liabilities) designated in hedge accounting relationships</b>	<b>80,533</b>	<b>1,730</b>	<b>(997)</b>
<b>Total recognised derivative assets/(liabilities)</b>	<b>26,241,907</b>	<b>174,225</b>	<b>(177,774)</b>

Total derivative notionals have grown primarily due to increases in the volume of fixed income derivatives, reflecting the continued growth in client based activity and increased use of electronic trading platforms in Europe and the US. Commodity derivative values have also increased significantly, largely due to growth in the markets for these products, along with price increases.

Derivative assets and liabilities subject to counterparty netting agreements amounted to £341bn (31st December 2007: £199bn; 30th June 2007: £134bn).

**16. Fair Value Measurement of Financial Instruments**

Where a financial instrument is stated at fair value, this is determined by reference to the quoted price in an active market wherever possible. Where no such active market exists for the particular asset or liability, the Group uses an appropriate valuation technique to arrive at the fair value.

Fair value amounts can be analysed into the following categories:

Unadjusted quoted prices in active markets where the quoted price is readily available and the price represents actual and regularly occurring market transactions on an arm's length basis.

Valuation techniques based on market observable inputs. Such techniques may include:

using recent arm's length market transactions;

reference to the current fair value of similar instruments;

discounted cash flow analysis, pricing models or other techniques commonly used by market participants.

Valuation techniques used above, but which include significant inputs that are not observable. On initial recognition of financial instruments measured using such techniques the transaction price is deemed to provide the best evidence of fair value for accounting purposes.

**Table of Contents****Notes to the Condensed Consolidated Interim Financial Statements****16. Fair Value Measurement of Financial Instruments (continued)**

The following tables set out the total financial instruments stated at fair value and those fair values are calculated with valuation techniques using unobservable inputs.

	As at 30.06.08	
	Unobservable Inputs £m	Total £m
<b>Assets Stated at Fair Value</b>

**Table of Contents****Notes to the Condensed Consolidated Interim Financial Statements****16. Fair Value Measurement of Financial Instruments (continued)****Unobservable Profit**

The amount that has yet to be recognised in income that relates to the difference between the transaction price (the fair value at initial recognition) and the amount that would have arisen had valuation models using unobservable inputs been used on initial recognition, less amounts subsequently recognised, was as follows:

	Half Year Ended 30.06.08 £m	Year Ended 31.12.07 £m
<b>Opening balance</b>	<b>154</b>	<b>534</b>
Additions	79	134
Amortisation and releases	(61)	(514)
<b>Closing balance</b>	<b>172</b>	<b>154</b>

**Table of Contents****Notes to the Condensed Consolidated Interim Financial Statements****17. Barclays Capital Credit Market Exposures**

Barclays Capital's credit market exposures resulted in net losses of £1,979m in the first half of 2008, due to continuing dislocation in the credit markets. The net losses, which included £1,108m in impairment charges, comprised: £875m against ABS CDO Super Senior exposures; and £1,956m against other credit market exposures; partially offset by gains of £852m from the general widening of credit spreads on issued notes measured at fair value through the profit and loss account.

For the purposes of this note, exposures represent the carrying value of assets and commitments (being either fair value or amortised cost less impairment), less hedging and subordination.

	Net Exposures		
	As at 30.06.08 £m	As at 31.12.07 £m	As at 30.06.07 £m

## Edgar Filing: BARCLAYS PLC - Form 6-K

The industry classifications have been prepared at the level of the borrowing entity. This means that a loan to the subsidiary of a major corporation is classified by the industry in which that subsidiary operates even though the parent's predominant business may be a different industry.

**24. Retirement Benefit Liabilities**

The Group's IAS 19 pension surplus across all schemes as at 30th June 2008 was £141m (31st December 2007: £393m; 30th June 2007: £540m). There are net recognised liabilities of £1,567m (31st December 2007: £1,501m; 30th June 2007: £1,804m) and unrecognised actuarial gains of £1,708m (31st December 2007: £1,894m; 30th June 2007: £2,344m). The net recognised liabilities comprised retirement benefit liabilities of £1,603m (31st December 2007: £1,537m; 30th June 2007: £1,840m) and assets of £36m (31st December 2007: £36m; 30th June 2007: £36m).

The Group's IAS 19 pension surplus in respect of the main UK scheme as at 30th June 2008 was £439m (31st December 2007: £668m; 30th June 2007: £867m). This change primarily reflects lower investment returns over the period, following general market movements, which led to a fall in the market value of the scheme assets. This was partially offset by an increase in the real discount rate used to value the scheme liabilities, reflecting an increase in AA corporate bond yields which resulted in a higher discount rate of 6.70% (31st December 2007: 5.82%; 30th June

2007: 5.82%).

The authorised share capital of Barclays PLC is £2,540m, \$77.5m, 40m and ¥4,000m. (31st December 2007: £2,500m) comprising 9,996 million (31st December 2007: 9,996 million) ordinary shares of 25p each, 0.4 million sterling preference shares of £100 each, 0.4 million US dollar preference shares of \$100 each, 150 million US dollar preference shares of \$0.25 each, 0.4 million euro preference shares of 100 each, 0.4 million yen preference shares of ¥10,000 each and 1 million (31st December 2007: 1 million) staff shares of £1 each.

**Table of Contents****Notes to the Condensed Consolidated Interim Financial Statements****26. Total Shareholders' Equity**

	As at 30.06.08 £m	As at 31.12.07 £m	As at 30.06.07 £m
Called up share capital	1,642	1,651	1,637
Share premium account	72	56	5,859
Available for sale reserve	(363)	154	238
Cash flow hedging reserve	(419)	26	(407)
Capital redemption reserve	394	384	309
Other capital reserve	617	617	617
Currency translation reserve	(427)	(307)	(486)
Other reserves	(198)	874	271
Retained earnings	20,965	20,970	13,461
Less: treasury shares	(192)	(260)	(255)
<b>Shareholders' equity excluding minority interests</b>	<b>22,289</b>	<b>23,291</b>	<b>20,973</b>
Preference shares	6,198	4,744	3,431
Reserve Capital instruments	1,923	1,906	1,921
Upper tier 2 instruments	586	586	586
Absa minority interests	1,519	1,676	1,541
Other minority interests	307	273	269
<b>Minority interests</b>	<b>10,533</b>	<b>9,185</b>	<b>7,748</b>
<b>Total shareholders' equity</b>	<b>32,822</b>	<b>32,476</b>	<b>28,721</b>

Total shareholders' equity increased £346m to £32,822m (31st December 2007: £32,476m).

Called up share capital comprises 6,568 million ordinary shares of 25p each (2007: 6,600 million ordinary shares of 25p each and 1 million staff shares of £1 each). Called up share capital decreased by £9m reflecting the net impact of share buy-backs over and above new issuances in relation to the exercise of employee share options. Share premium increased by £16m from the exercise of employee options. The capital redemption reserve increased by £10m representing the nominal value of the share buy-backs.

Retained earnings decreased £5m. Reductions primarily arose from external dividends paid of £1,438m, the total cost of share repurchases of £173m and a net share based payments impact of £119m. The reductions were largely offset by profit attributable to equity holders of the parent of £1,718m.

Movements in other reserves, except the capital redemption reserve, reflect the relevant amounts recorded in the consolidated statement of recognised income and expense on page 65.

Minority interests increased £1,348m to £10,533m (2007: £9,185m). The increase primarily reflects a preference share issuance by Barclays Bank PLC of £1,431m.

**Table of Contents****Notes to the Condensed Consolidated Interim Financial Statements****27. Analysis of Statement of Recognised Income and Expense**

	Half Year Ended		
	30.06.08 £m	31.12.07 £m	30.06.07 £m
<b>Available for Sale Reserve</b>			
- Net (losses)/gains from changes in fair value	(629)	284	200
- Losses transferred to net profit due to impairment	84	13	
- Net gains transferred to net profit on disposal	(120)	(402)	(161)
- Net losses transferred to net profit due to fair value hedging	5	12	56
<b>Net movements in available for sale reserve</b>	<b>(660)</b>	<b>(93)</b>	<b>95</b>
<b>Cash Flow Hedging Reserve</b>			
- Net (losses)/gains from changes in fair value	(638)	526	(420)
- Net losses transferred to net profit	65	113	140
<b>Net movements in cash flow hedging reserve</b>	<b>(573)</b>	<b>639</b>	<b>(280)</b>
Net movements in currency translation reserve	(500)	102	(48)
Tax	381	17	37
Other movements	22	(1)	23
<b>Amounts included directly in equity</b>	<b>(1,330)</b>	<b>664</b>	<b>(173)</b>
Profit after tax	2,134	2,152	2,943
<b>Total recognised income and expense</b>	<b>804</b>	<b>2,816</b>	<b>2,770</b>

The consolidated statement of recognised income and expense reflects all items of income and expense for the period, including items taken directly to equity. Movements in individual reserves are shown including amounts which relate to minority interests; the impact of such amounts is then reflected in the amount attributable to such interests. Movements in individual reserves are also shown on a pre-tax basis with any related tax recorded on the separate tax line.

The available for sale reserve reflects gains or losses arising from the change in fair value of available for sale financial assets until disposal. The exceptions to reflect fair value movements through the income statement are impairment losses, gains or losses transferred to the income statement due to fair value hedge accounting and foreign exchange gains or losses on monetary items such as debt securities. When an available for sale asset is impaired or derecognised, the cumulative gain or loss previously recognised in the available for sale reserve is transferred to the income statement. The loss of £629m (2007: gain of £200m) from changes in fair value reflects the downturn across the US sub-prime market and increases in European and Japanese interest rates. The decrease in net gains transferred to net profit is primarily due to the lower levels of disposals.

Cash flow hedging aims to minimise exposure to variability in cash flows that is attributable to a particular risk associated with a recognised asset or liability or a highly probable forecast transaction that could affect profit or loss. The fair value gain or loss associated with the effective portion of the hedge is initially recognised in shareholders' equity, and recycled to the income statement in the periods when the hedged item will affect profit or loss. Any ineffective portion of the gain or loss on the hedging instrument is recognised in the income statement immediately. The current period movement in the cash flow hedge reserve relates to a reduction in the fair value of interest rate swaps used in cash flow hedging due to increases in interest rates.

## Edgar Filing: BARCLAYS PLC - Form 6-K

Exchange differences arising on the net investments in foreign operations and effective hedges of net investments are recognised in the currency translation reserve and transferred to the income statement on the disposal of the net investment. The movement in the first half of 2008 primarily reflects the impact of changes in the value of the Rand, Yen, Euro and Swiss Franc against Sterling. These movements reflect both the Group and minority interests in Absa Group Limited, the value of other currency movements on net investments which are hedged on a post-tax basis and net investments which are economically hedged through preference share capital that is not revalued for accounting purposes.

**Table of Contents****Notes to the Condensed Consolidated Interim Financial Statements****28. Contingent Liabilities and Commitments**

	As at 30.06.08 £m	As at 31.12.07 £m	As at 30.06.07 £m
Acceptances and endorsements	473	365	295
Guarantees and letters of credit pledged as collateral security	51,439	35,692	33,445
Other contingent liabilities	9,804	9,717	7,757
<b>Contingent liabilities</b>	<b>61,716</b>	<b>45,774</b>	<b>41,497</b>
Documentary credits and other short-term trade related transactions	843	522	511
<b>Undrawn note issuance and revolving underwriting facilities:</b>			
Forward asset purchases and forward deposits placed	204	283	165
Standby facilities, credit lines and other	209,512	191,834	194,134
<b>Commitments</b>	<b>210,559</b>	<b>192,639</b>	<b>194,810</b>

Guarantees and letters of credit pledged as collateral security have increased due to the expansion of Barclays Global Investors business activity and the selected support of liquidity products.

Standby facilities, credit lines and other have increased primarily due to the acquisition of Discover's UK credit card business, Goldfish.

---

**Notes to the Condensed Consolidated Interim Financial Statements**

**29. Legal Proceedings**

Barclays has for some time been party to proceedings, including a class action, in the United States against a number of defendants following the collapse of Enron; the class action claim is commonly known as the Newby litigation. On 20th July 2006, Barclays received an Order from the United States District Court for the Southern District of Texas Houston Division which dismissed the claims against Barclays PLC, Barclays Bank PLC and Barclays Capital Inc. in the Newby litigation. On 4th December 2006, the Court stayed Barclays dismissal from the proceedings and allowed the plaintiffs to file a supplemental complaint. On 19th March 2007, the United States Court of Appeals for the Fifth Circuit issued its decision on an appeal by Barclays and two other financial institutions contesting a ruling by the District Court allowing the Newby litigation to proceed as a class action. The Court of Appeals held that because no proper claim against Barclays and the other financial institutions had been alleged by the plaintiffs, the case could not proceed against them. The plaintiffs applied to the United States Supreme Court for a review of this decision. On 22nd January 2008, the United States Supreme Court denied the plaintiffs' request for review. Following the Supreme Court's decision, the District Court ordered a further briefing concerning the status of the plaintiffs' claims. Barclays is seeking the dismissal of the plaintiffs' claims.

Barclays considers that the Enron related claims against it are without merit and is defending them vigorously. It is not possible to estimate Barclays possible loss in relation to these matters, nor the effect that they might have upon operating results in any particular financial period.

Barclays has been in negotiations with the staff of the US Securities and Exchange Commission with respect to a settlement of the Commission's investigations of transactions between Barclays and Enron. Barclays does not expect that the amount of any settlement with the Commission would have a significant adverse effect on its financial position or operating results.

Like other UK financial services institutions, Barclays faces numerous County Court claims and complaints by customers who allege that its unauthorised overdraft charges either contravene the Unfair Terms in Consumer Contracts Regulations 1999 ( UTCCR ) or are unenforceable penalties or both. In July 2007, by agreement with all parties, the OFT commenced proceedings against seven banks and one building society including Barclays, to resolve the matter by way of a test case process (the test case ). Preliminary issues hearings took place in January / February and July 2008. In relation to the January / February hearing the Judge found in favour of the banks on the issue of the penalty doctrine, and in favour of the OFT on the issue of the applicability of the UTCCR. The OFT is not pursuing an appeal in relation to the penalty doctrine. The banks have been granted permission to appeal the decision in relation to the applicability of the UTCCR. The Court of Appeal proceedings are likely to be heard in the Autumn of 2008 and this will dictate the further course of the action. There are likely to be further hearings and the proceedings may take a significant period of time to conclude. Pending resolution of the test case process, existing and new claims in the County Courts remain stayed, and there is an FSA waiver of the complaints handling process and a standstill of Financial Ombudsman Service decisions. Barclays is defending the test case vigorously. It is not practicable to estimate Barclays possible loss in relation to these matters, nor the effect that they may have upon operating results in any particular financial period.

Barclays is engaged in various other litigation proceedings both in the United Kingdom and a number of overseas jurisdictions, including the United States, involving claims by and against it which arise in the ordinary course of business. Barclays does not expect the ultimate resolution of any of the proceedings to which Barclays is party to have a significant adverse effect on the financial position of the Group and Barclays has not disclosed the contingent liabilities associated with these claims either because they cannot reasonably be estimated or because such disclosure could be prejudicial to the conduct of the claims.

---

**Table of Contents**

**Notes to the Condensed Consolidated Interim Financial Statements**

**30. Competition and Regulatory Matters**

The scale of regulatory change remains challenging, arising in part from the implementation of some key European Union ( EU ) directives. Many changes to financial services legislation and regulation have come into force in recent years and further changes will take place in the near future. Concurrently, there is continuing political and regulatory scrutiny of the operation of the retail banking and consumer credit industries in the UK and elsewhere. The nature and impact of future changes in policies and regulatory action are not predictable and beyond the Group s control but could have an impact on the Group s businesses and earnings. In June 2005, an inquiry into retail banking in all of the then 25 Member States was launched by the European Commission s Directorate General for Competition. The inquiry looked at retail banking in Europe generally. In January 2007, the European Commission announced that the inquiry had identified barriers to competition in certain areas of retail banking, payment cards and payment systems in the EU. The European Commission indicated it will use its powers to address these barriers, and will encourage national competition authorities to enforce European and national competition laws where appropriate. Any action taken by the European Commission and national competition authorities could have an impact on the payment cards and payment systems businesses of the Group and on its retail banking activities in the EU countries in which it operates.

In September 2005, the OFT received a super-complaint from the Citizens Advice Bureau relating to payment protection insurance ( PPI ). As a result, the OFT commenced a market study on PPI in April 2006. In October 2006 the OFT announced the outcome of the market study and the OFT referred the PPI market to the UK Competition Commission for an in-depth inquiry in February 2007. The Competition Commission published its provisional findings on 5th June 2008 in which it indicated that there was a lack of competition in the UK PPI market. The commission will now consult on the provisional findings and remedies and intends to publish its final report at the end of 2008. In October 2006, the FSA also published the outcome of its broad industry thematic review of PPI sales practices in which it concluded that some firms fail to treat customers fairly. The Group has cooperated fully with these investigations and will continue to do so.

The OFT has carried out investigations into Visa and MasterCard credit card interchange rates. The decision by the OFT in the MasterCard interchange case was set aside by the Competition Appeals Tribunal in June 2006. The OFT s investigation in the Visa interchange case is at an earlier stage and a second MasterCard interchange case is ongoing. The outcome is not known but these investigations may have an impact on the consumer credit industry in general and therefore on the Group s business in this sector. In February 2007, the OFT announced that it was expanding its investigation into interchange rates to include debit cards.

In April 2007, the UK consumer interest association known as Which? submitted a super-complaint to the OFT pursuant to the Enterprise Act 2000. The super-complaint criticises the various ways in which credit card companies calculate interest charges on credit card accounts. In June 2007, the OFT announced a new programme of work with the credit card industry and consumer bodies in order to make the costs of credit cards easier for consumers to understand. This OFT decision follows the receipt by the OFT of the super-complaint from Which?. This new work will explore the issues surrounding the costs of credit for credit cards including purchases, cash advances, introductory offers and payment allocation. On 11th February 2008, the OFT announced its recommendations, which include the introduction of an FSA price comparison website, improvements to customer information in summary boxes and the use of standard terminology.

**Table of Contents****Notes to the Condensed Consolidated Interim Financial Statements****30. Competition and Regulatory Matters (continued)**

In September 2006, the OFT announced that it had decided to undertake a fact find on the application of its statement on credit card fees to current account unauthorised overdraft fees. The fact find was completed in March 2007. On 29th March 2007, the OFT announced its decision to conduct a formal investigation into the fairness of bank current account charges. The OFT initiated a market study into personal current accounts ( PCAs ) in the UK on 26th April 2007. The study s focus was PCAs but it also included an examination of other retail banking products, in particular savings accounts, credit cards, personal loans and mortgages in order to take into account the competitive dynamics of UK retail banking. On 16th July 2008, the OFT published its market study report, in which it concluded that certain features of the UK PCA market were not working well for consumers. The OFT reached the provisional view that some form of regulatory intervention is necessary in the UK PCA market. On 16th July 2008, the OFT also announced a consultation to seek views on the findings and possible measures to address the issues raised in its report. Barclays has participated fully in the market study process and will continue to do so. The consultation period closes on 31st October 2008.

US laws and regulations require compliance with US economic sanctions, administered by the Office of Foreign Assets Control, against designated foreign countries, nationals and others. HM Treasury regulations similarly require compliance with sanctions adopted by the UK government. The Group has been conducting an internal review of its conduct with respect to US dollar payments involving countries, persons and entities subject to these sanctions and has been reporting to governmental authorities about the results of that review. The Group received inquiries relating to these sanctions and certain US dollar payments processed by its New York branch from the New York County District Attorney s Office and the US Department of Justice, which along with other authorities, has been reported to be conducting investigations of sanctions compliance by non-US financial institutions. The Group has responded to those inquiries and is cooperating with the regulators, the Department of Justice and the District Attorney s Office in connection with their investigations of Barclays conduct with respect to sanctions compliance. Barclays has also been keeping the FSA informed of the progress of these investigations and Barclays internal review. Barclays review is ongoing. It is currently not possible to predict the ultimate resolution of the issues covered by Barclays review and the investigations, including the timing and potential financial impact of any resolution, which could be substantial.

**31. Acquisitions and Disposals****Acquisitions**

On 31st March 2008, Barclays completed the acquisition of Discover s UK credit card business, Goldfish, for a cash consideration of £38m (including attributable costs of £3m), for fair value of net assets of £127m, which gave rise to a gain on acquisitions of £89m.

On 7th March 2008, Absa acquired, for a consideration of £5m a further 24% of Meeg Bank Limited, bringing Absa s shareholding up to 74%. Meeg Bank is based in South Africa.

**Disposals**

On 31st January 2008, Barclays completed the sale of Barclays Global Investors Japan Trust & Banking Co. Ltd, a Japanese trust administration and custody operation.

**Table of Contents**

**Notes to the Condensed Consolidated Interim Financial Statements**

**32. Related Party Transactions**

Parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial or operational decisions, or one other party controls both. The definition includes subsidiaries, associates, joint ventures and the Group's pension schemes, as well as other persons.

**Subsidiaries**

Transactions between Barclays PLC and subsidiaries also meet the definition of related party transactions. Where these are eliminated on consolidation, they are not disclosed in the Group financial statements.

**Associates, Joint Ventures and Other Entities**

The Group provides banking services to its associates, joint ventures and Group pension funds (principally the UK Retirement Fund), providing loans, overdrafts, interest and non-interest bearing deposits and current accounts to these entities as well as other services. Group companies, principally within Barclays Global Investors, also provides investment management and custodian services to the Group pension schemes. The Group also provides banking services for unit trusts and investment funds managed by Group companies and are not individually material.

**Key Management Personnel**

The Group provides banking services to Directors and other key management personnel and persons connected to them. No related parties transactions have taken place in the first six months of the current financial year that have materially affected the financial position or the performance of the Group during that period; and there were no material changes in the related parties transactions described in the last Annual Report that could have a material effect on the financial position or performance of the Group in the first six months of the current financial year.

**Table of Contents****Notes to the Condensed Consolidated Interim Financial Statements****32. Related Party Transactions (continued)**

All of these transactions are conducted on the same terms to third-party transactions and are not individually material.

Amounts included, in aggregate, by category of related party entity are as follows:

Six months ending 30th June 2008	Associates £m	Joint ventures £m	Entities under common directorship £m	Pension funds unit trusts and investment funds £m	Total £m

**Notes to the Condensed Consolidated Interim Financial Statements**

**33. Events Occurring after the Balance Sheet Date**

In July 2008 Barclays raised capital of approximately £4.5bn through the issue of 1,576 million new ordinary shares.

On 1st July 2008 Barclays acquired 100% of the shares of the Russian Bank, Expobank, for a consideration of approximately \$745m (£373m).

On 8th July 2008 Barclays announced it would close its FirstPlus unit to new business in August 2008.

On 5th August 2008 Barclays announced a sale of Barclays Life Assurance Company Limited to Swiss Reinsurance Company for a consideration of approximately £753m.

### **Notes to the Condensed Consolidated Interim Financial Statements**

#### **34. Segmental Reporting**

The following section analyses the Group's performance by business. For management and reporting purposes, Barclays is organised into the following business groupings:

##### **Global Retail and Commercial Banking**

UK Retail Banking

Barclays Commercial Bank

Barclaycard

Global Retail and Commercial Banking - Western Europe

Global Retail and Commercial Banking - Emerging Markets

Global Retail and Commercial Banking - Absa

##### **Investment Banking and Investment Management**

Barclays Capital

Barclays Global Investors

Barclays Wealth

##### **Head Office Functions and Other Operations**

##### **UK Retail Banking**

UK Retail Banking comprises Personal Customers, Home Finance, Local Business, Consumer Lending and Barclays Financial Planning. This cluster of businesses aims to build broader and deeper relationships with its Personal and Local Business customers through providing a wide range of products and financial services. Personal Customers and Home Finance provide access to current account and savings products, Woolwich branded mortgages and general insurance. Consumer Lending provides unsecured loan and protection products and Barclays Financial Planning provides investment advice and products. Local Business provides banking services, including money transmission, to small businesses.

**Barclays Commercial Bank**

Barclays Commercial Bank provides banking services to organisations with an annual turnover of more than £1m. Customers are served via a network of relationship and industry sector specialists, which provides solutions constructed from a comprehensive suite of banking products, support, expertise and services, including specialist asset financing and leasing facilities. Customers are also offered access to the products and expertise of other businesses in the Group, particularly Barclays Capital, Barclaycard and Barclays Wealth.

**Barclaycard**

Barclaycard is a multi-brand credit card and consumer lending business which also processes card payments for retailers and merchants and issues credit and charge cards to corporate customers and the UK Government. It is one of Europe's leading credit card businesses and has an increasing presence in the United States.

**Table of Contents**

**Notes to the Condensed Consolidated Interim Financial Statements**

**34. Segmental Reporting (continued)**

In the UK, Barclaycard comprises Barclaycard UK Cards, Barclaycard Partnerships (SkyCard, Thomas Cook, Argos and Solution Personal Finance), Barclays Partner Finance and FirstPlus.

Outside the UK, Barclaycard provides credit cards in the United States, Germany, South Africa (through management of the Absa credit card portfolio) and in the Nordic region, where Barclaycard operates through Entercard, a joint venture with Swedbank.

Barclaycard works closely with other parts of the Group, including UK Retail Banking, Barclays Commercial Bank and Global Retail and Commercial Banking - Western Europe and Global Retail and Commercial Banking - Emerging Markets, to leverage their distribution capabilities.

**Global Retail and Commercial Banking - Western Europe**

GRCB - Western Europe encompasses Barclays Global Retail and Commercial Banking as well as Barclaycard operations in Spain, Italy, Portugal, France and Greece. GRCB - Western Europe serves customers through a variety of distribution channels including more than 980 distribution points and over 880 ATMs. GRCB - Western Europe provides a variety of products including retail mortgages, current and deposit accounts, commercial lending, unsecured lending, credit cards, investments, and insurance serving the needs of Barclays retail, mass affluent, and corporate customers.

**Global Retail and Commercial Banking - Emerging Markets**

GRCB - Emerging Markets encompasses Barclays Global Retail and Commercial Banking, as well as Barclaycard operations, in 14 countries organised in 6 geographic areas: India and Indian Ocean (India, Mauritius and Seychelles); Middle East and North Africa (UAE and Egypt); East and West Africa (Ghana, Tanzania, Uganda and Kenya); Southern Africa (Botswana, Zambia and Zimbabwe); Russia; and Pakistan (from 23rd July 2008). GRCB - Emerging Markets serves its customers through a network of over 870 branches and sales centres, and more than 890 ATMs. GRCB - Emerging Markets provides a variety of traditional retail and commercial products including retail mortgages, current and deposit accounts, commercial lending, unsecured lending, credit cards, treasury and investments. In addition to this, it provides specialist services such as Sharia compliant products and mobile banking.

**Global Retail and Commercial Banking - Absa**

GRCB - Absa represents Barclays consolidation of Absa, excluding Absa Capital which is included as part of Barclays Capital and Absa Card which is included as part of Barclaycard. Absa Group Limited is one of South Africa's largest financial services organisations serving personal, commercial and corporate customers predominantly in South Africa. GRCB - Absa serves retail customers through a variety of distribution channels and offers a full range of banking services, including current and deposit accounts, mortgages, instalment finance, credit cards, bancassurance products and wealth management services. It also offers customised business solutions for commercial and large corporate customers.

### **Notes to the Condensed Consolidated Interim Financial Statements**

#### **34. Segmental Reporting (continued)**

##### **Barclays Capital**

Barclays Capital is a leading global investment bank which provides large corporate, institutional and government clients with solutions to their financing and risk management needs.

Barclays Capital services a wide variety of client needs, from capital raising and managing foreign exchange, interest rate, equity and commodity risks, through to providing technical advice and expertise. Activities are organised into three principal areas: Rates, which includes fixed income, foreign exchange, commodities, emerging markets, money markets, prime services and equity products; Credit, which includes primary and secondary activities for loans and bonds for investment grade, high yield and emerging market credit, as well as hybrid capital products, asset based finance, mortgage backed securities, credit derivatives, structured capital markets and large asset leasing; and Private Equity. Barclays Capital includes Absa Capital, the investment banking business of Absa. Barclays Capital works closely with all other parts of the Group to leverage synergies from client relationships and product capabilities.

##### **Barclays Global Investors**

Barclays Global Investors (BGI) is one of the world's largest asset managers and a leading global provider of investment management products and services.

BGI offers structured investment strategies such as indexing, global asset allocation and risk controlled active products including hedge funds and provides related investment services such as securities lending, cash management and portfolio transition services. In addition, BGI is the global leader in assets and products in the exchange traded funds business, with over 335 funds for institutions and individuals trading globally. BGI's investment philosophy is founded on managing all dimensions of performance: a consistent focus on controlling risk, return and cost. BGI collaborates with the other Barclays businesses, particularly Barclays Capital and Barclays Wealth, to develop and market products and leverage capabilities to better serve the client base.

##### **Barclays Wealth**

Barclays Wealth serves high net worth, affluent and intermediary clients worldwide, providing private banking, asset management, stockbroking, offshore banking, wealth structuring and financial planning services and manages the closed life assurance activities of Barclays and Woolwich in the UK.

Barclays Wealth works closely with all other parts of the Group to leverage synergies from client relationships and product capabilities.

##### **Head Office Functions and Other Operations**

Head Office Functions and Other Operations comprises head office and central support functions, businesses in transition and consolidation adjustments.

Head office and central support functions comprises the following areas: Executive Management, Finance, Treasury, Corporate Affairs, Human Resources, Strategy and Planning, Internal Audit, Legal, Corporate Secretariat, Property, Tax, Compliance and Risk. Costs incurred wholly on behalf of the businesses are recharged to them.

Businesses in transition principally relate to certain lending portfolios that are centrally managed with the objective of maximising recovery from the assets. Consolidation adjustments largely reflect the elimination of inter-segment transactions.

##### **Group Reporting Changes In 2008**

Barclays announced on 22nd July 2008 the impact of certain changes in Group structure and reporting on the 2007 results. There was no impact on the Group income statement or balance sheet.

The businesses previously managed and reported as International Retail and Commercial Banking - excluding Absa are now reported and managed separately as Global Retail and Commercial Banking - Western Europe and Global Retail and Commercial Banking - Emerging Markets going forward.

Barclays Commercial Bank. The Marine Finance business, previously part of Barclaycard, is now managed and reported within Barclays Commercial Bank.

Barclaycard. The Absa credit card portfolio, previously part of International Retail and Commercial Banking - Absa is now managed and reported within Barclaycard. Certain credit card portfolios previously part of Barclaycard are now managed and reported as part of Global Retail and Commercial Banking - Western Europe. The Marine Finance business, previously part of Barclaycard is now managed and reported within Barclays Commercial Bank.

Global Retail and Commercial Banking - Western Europe. Certain credit card portfolios previously part of Barclaycard are now managed and reported as part of Global Retail and Commercial Banking - Western Europe.

International Retail and Commercial Banking - Absa. This business will be known going forward as Global Retail and Commercial Banking - Absa. The Absa credit card portfolio previously part of Global Retail and Commercial Banking - Absa is now managed and reported within Barclaycard.

Certain expenses, assets and staff previously reported within International Retail and Commercial Banking - excluding Absa have been allocated across UK Retail Banking, Barclays Commercial Bank, Barclaycard, Global Retail and Commercial Banking - Western Europe, Global Retail and Commercial Banking - Emerging Markets and Global Retail and Commercial Banking - Absa.

Certain pension assets and liabilities have been reclassified from Head Office and Other Operations to the other businesses in the Group.

UK Banking which previously reflected UK Retail Banking and Barclays Commercial Bank combined is no longer reported as a separate segment.

The structure remains unchanged for Barclays Capital, Barclays Global Investors, Barclays Wealth and Head Office and Other Operations.

### **Other Information**

#### **Share Capital**

The Group manages its debt and equity capital actively. The Group's authority to buy back ordinary shares (up to 984.9 million ordinary shares) was renewed at the 2008 Annual General Meeting. The Group will seek to renew its authority to buy back ordinary shares at the 2009 Annual General Meeting to provide additional flexibility in the management of the Group's capital resources.

At the 2008 Annual General Meeting, shareholders approved the creation of sterling, dollar, euro and yen preference shares ( Preference Shares ) in order to provide the Group with more flexibility in managing its capital resources. No preference shares have been issued.

During the first half of 2008 Barclays repurchased in the market 36,150,000 of its ordinary shares of 25p each at a total cost of £171,923,243. This was the completion of the repurchase programme in order to minimise the dilutive effect on its existing shareholders of the issuance of a total of 336,805,556 Barclays ordinary shares to Temasek Holdings and China Development Bank in 2007.

Barclays purchased all of its staff shares in issue following approval for such purchase being given at the 2008 Annual General Meeting at a total cost of £1,023,054.

#### **Group Share Schemes**

The independent trustees of the Group's share schemes may make purchases of Barclays PLC ordinary shares in the market at any time or times following this announcement of the Group's results for the purposes of those schemes' current and future requirements. The total number of ordinary shares purchased would not be material in relation to the issued share capital of Barclays PLC.

#### **Dividend Information**

For qualifying US and Canadian resident ADR holders, the interim dividend of 11.5p per ordinary share becomes 46.0p per ADS (representing four shares). The ADR depositary will mail the interim dividend on 1st October 2008 to ADR holders on the record on 22nd August 2008.

Shareholders may have their dividends reinvested in Barclays PLC shares by participating in the Barclays Dividend Reinvestment Plan. The plan is available to all shareholders, including members of Barclays Sharestore, provided that they neither live in nor are subject to the jurisdiction of any country where their participation in the plan would require Barclays or The Plan Administrator to take action to comply with local government or regulatory procedures or any similar formalities. Any shareholder wishing to obtain details and a form to join the plan should contact The Plan Administrator by writing to: The Plan Administrator to Barclays, Aspect House, Spencer Road, Lancing, West Sussex, BN99 6DA, United Kingdom, or, by telephoning 0871 384 2055 (calls to this number are charged at 8p per minute if using a BT landline. Other telephony provider costs may vary). The completed form should be returned to The Plan Administrator on or before 10th September 2008 for it to be effective in time for the payment of the dividend on 1st October 2008. Shareholders who are already in the plan need take no action unless they wish to change their instructions in which case they should write to The Plan Administrator.

### **Other Information**

### **Glossary of Terms**

Income refers to total income net of insurance claims, unless otherwise specified.

Cost:income ratio is defined as operating expenses compared to total income net of insurance claims.

Risk tendency is a statistical estimate of the average loss for each loan portfolio for a 12-month period, taking into account the size of the portfolio and its risk characteristics under current economic conditions, and is used to track the change in risk as the portfolio of loans changes over time.

Daily Value at Risk (DVaR) is an estimate of the potential loss which might arise from unfavourable market movements, if the current positions were to be held unchanged for one business day, measured to a confidence level of 98%.

### **Absa Definitions**

Absa Group Limited refers to the consolidated results of the South African group of which the parent company is listed on the Johannesburg Stock Exchange (JSE Limited) in which Barclays owns a controlling stake.

Absa refers to the results for Absa Group Limited as consolidated into the results of Barclays PLC; translated into Sterling with adjustments for amortisation of intangible assets, certain head office adjustments, transfer pricing and minority interests.

Absa Capital is the portion of Absa's results that is reported by Barclays within Barclays Capital.

Absa Card is the portion of Absa's results that is reported by Barclays within Barclaycard.

**BARCLAYS BANK PLC**

**INTERIM RESULTS ANNOUNCEMENT FOR 2008**

Extracts from the Results Announcement of Barclays Bank PLC, published on August 7<sup>th</sup> 2008, are provided on pages 109 to 144.

---

**Table of Contents**

This interim report does not contain detailed disclosures reflecting the impact of recent market turmoil as recommended by the Financial Stability Forum in its report on *Enhancing Market and Institutional Resilience* published in April 2008 and the Committee of European Banking Supervisors in its report on *Banks' Transparency on Activities and Products affected by the Recent Market Turmoil* published in June 2008. This report contains disclosure on credit market exposures held by Barclays Capital on page 113 and more extensive disclosures are contained in the Barclays PLC Interim Results Announcement for the half year ended 30th June 2008. The data presented in the Barclays PLC Interim Results Announcement relating to credit market exposures is identical to that reportable for the Barclays Bank PLC Group.

Unless otherwise stated, the income statement analyses compare the six months to 30th June 2008 to the corresponding six months of 2007 (as restated on 22nd July 2008). Balance sheet comparisons, unless otherwise stated, relate to the corresponding position at 31st December 2007.

**Forward-looking Statements**

This document contains certain forward-looking statements within the meaning of Section 21E of the US Securities Exchange Act of 1934, as amended, and Section 27A of the US Securities Act of 1933, as amended with respect to certain of the Group's plans and its current goals and expectations relating to its future financial condition and performance. These forward-looking statements can be identified by the fact that they do not relate only to historical or current facts. Forward-looking statements sometimes use words such as *aim*, *anticipate*, *target*, *expect*, *estimate*, *intend*, *plan*, *goal*, *believe*, or other words of similar meaning. Examples of forward-looking statements include, among others, statements regarding the Group's future financial position, income growth, impairment charges, business strategy, projected levels of growth in the banking and financial markets, projected costs, estimates of capital expenditures, and plans and objectives for future operations. By their nature, forward-looking statements involve risk and uncertainty because they relate to future events and circumstances, including, but not limited to, UK domestic and global economic and business conditions, the effects of continued volatility in credit markets and of further writedowns and credit exposures, market related risks such as changes in interest rates and exchange rates, the policies and actions of governmental and regulatory authorities including classification of financial instruments for regulatory capital purposes, changes in legislation, the further development of standards and interpretations under International Financial Reporting Standards (IFRS) applicable to past, current and future periods, evolving practices with regard to the interpretation and application of standards under IFRS, the outcome of pending and future litigation, the success of future acquisitions and other strategic transactions and the impact of competition – a number of which factors are beyond the Group's control. As a result, the Group's actual future results may differ materially from the plans, goals, and expectations set forth in the Group's forward-looking statements. Additional risks and factors are identified in this document in *principal risks and uncertainties* and in our filings with the US Securities and Exchange Commission (the SEC) including in our annual report on form 20-F for the fiscal year ended 31st December 2007 which is available on the SEC website at <http://www.sec.gov>.

Any forward-looking statements made by or on behalf of Barclays speak only as of the date they are made. Barclays does not undertake to update forward-looking statements to reflect any changes in Barclays expectations with regard thereto or any changes in events, conditions or circumstances on which any such statement is based. The reader should, however, consult any additional disclosures that Barclays has made or may make in documents it has filed or may file with the SEC.

---

## **Table of Contents**

### **Risk Management**

There have been no material changes to the risk management processes as described in the Annual Report and Accounts for the year ended 31st December 2007.

### **Principal risks and uncertainties**

The overall risk environment remains challenging for broad areas of the financial services industry. The continued dislocation in the wholesale credit markets, with wider credit spreads and constrained market liquidity, is exacerbated by slower economic growth in many parts of the world.

### **Wholesale Credit Risk**

As we entered 2008, the wholesale credit environment reflected concerns about weakening economic conditions in our major markets. That environment led to a more cautious approach to credit assessment, pricing and ongoing control in the financial services industry, which we expect to continue in the second half of the year. At the half-year stage, our assessment of our wholesale credit risk is broadly unchanged. Wholesale credit market conditions remain difficult, with reduced liquidity in cash and securitised products.

Overall, our wholesale credit impairment for 2008 is at a level broadly commensurate with our wholesale models' prediction for a stress level that might occur once in twenty years. The key driver of impairment continues to be losses seen in US RMBS and related exposures, where the value of the underlying collateral has continued to deteriorate through 2008. This reflects the high levels of default seen in the US mortgage market, particularly in the sub-prime and Alt-A segments. There have also been some industry losses from exposure to a number of hedge fund counterparties where extreme market turbulence led to sudden loss of value of collateral, which ultimately proved insufficient to cover exposure in full.

Our corporate banking portfolios are generally performing in line with expectations. However, our portfolio in Spain is affected by the rapid cooling of the housing market and the impact on a range of counterparties in the residential development and construction sectors. Some signs of strain are being seen in Barclays Commercial Bank in the UK with an increased flow of cases into our Business Support turnaround and recovery team. Our Risk Tendency in this area has increased since the year-end, partly reflecting more difficult credit conditions.

In Absa, the wholesale portfolios have continued to perform well, reflecting the focus on the property, agriculture and sovereign sectors. This is in line with other banks in the region and contrasts with the declining performance of retail portfolios.

In response to the weakening environment in some of our core markets, we have reduced our risk profile in a number of areas. Examples of steps taken include reducing portfolio concentration limits in key sectors such as leveraged finance and property, as well as tightening underwriting criteria. We have taken actions across major business areas with the intention to reduce losses if the environment continues to weaken.

As we enter the second half of 2008, the principal uncertainties relating to the performance of the wholesale portfolios are:

Performance of the underlying collateral supporting US RMBS and related positions, which may deteriorate further

The impact of a deeper or more prolonged downturn on our businesses in the UK, US, Spain and South Africa

The potential for idiosyncratic losses in different sectors and geographies where credit positions are sensitive to economic downturn

Edgar Filing: BARCLAYS PLC - Form 6-K

The potential for losses in respect of other market related exposures to counterparties in the financial services industry

---

## **Table of Contents**

### **Risk Management**

#### **Retail Credit Risk**

Retail credit risk conditions in a number of Barclays major markets have deteriorated since the start of 2008 as a rise in consumer prices and weaker housing markets have accompanied the effects of dislocation in the wholesale credit markets and slower economic growth.

In the UK, impairment charges in our credit card portfolio reduced. Average credit scores and vintage analysis indicate continued improvement in the quality of business written in during 2007. Overall delinquencies and charge-offs are lower than a year ago, although there is some evidence of deterioration in the second quarter. In the UK unsecured loan portfolios, overall delinquencies have been stable and charge-offs have declined slightly as a result of tighter underwriting criteria.

Home Finance delinquency and possession rates remain well below the Council of Mortgage Lenders industry average and losses remain contained by conservative loan to value (LTV) ratios. The average LTV on business written in the first half of the year was 51% and the average current valuation LTV on our stock of mortgages was 35%. For our residential Home Finance portfolio, 4% of our loans are above 85% LTV on an indexed basis. While there has been some increase in Home Finance delinquency following deterioration in the UK housing market, it remains low relative to historical levels at 0.97%. Our other secured lending portfolios are operating as expected, and are being managed to reduce exposure.

In response to the worsening economic environment in Spain, we have tightened lending criteria and increased collections activities. In the Home Finance portfolio, which comprises the large majority of retail balances, the average LTV on new business written in the first half of the year was 64% and we estimate the average current LTV on our mortgage stock to be 45%.

While delinquency in US credit cards has been affected by the weakening economy, credit actions taken towards the end of 2007 have raised new customer quality and improved recent vintage performance.

In Absa, credit conditions remain challenging, given the prolonged series of interest rate rises and inflationary pressures. The arrears rates for recent vintages of the cards portfolio have improved after the introduction of tighter controls during the past year. Delinquency in the secured portfolios has risen as the economy continues to weaken. In order to stabilise delinquency rates, underwriting criteria have been significantly tightened and collections investment increased. The average mark to market LTV on our mortgage stock stood at 44%.

As we enter the second half of the year, the principal uncertainties relating to the performance of the retail portfolios are:

The impact of global inflationary pressure on household disposable income and the ability of consumers to service debt

The possibility of rises in unemployment and a marked slowdown in the UK, US, Spanish and South African economies

The impact of further, sustained falls in house prices in the UK, Spain and South Africa

The reduced availability of credit in mortgage markets, leading to further declines in property values

## **Table of Contents**

### **Risk Management**

The second half outlook for the South African and Spanish retail credit environments is expected to be challenging with macroeconomic indicators suggesting further weakening. The US portfolio will also be affected by a more difficult environment. While we expect the less favourable economic environment in the UK to continue in the second half of the year, the credit market dislocation has constrained the competitive position of some other financial institutions and Barclays is well-positioned to continue to provide financing to customers.

### **Market Risk**

Volatility across financial markets increased due to the continuation of the credit market dislocation, high global inflation brought on by higher commodity prices, especially oil, and recessionary concerns for the western economies.

Against this background, Barclays Capital's market risk exposure, as measured by average total Daily Value at Risk (DVaR), increased 30% to £58m compared with the second half of 2007 and increased 48% compared with the first half. This was mainly due to increases in interest rate positions and higher market volatility within the credit spread and interest rate DVaR. Average daily trading revenue of £26m was 29% higher than the second half of 2007, in line with the increase in DVaR.

As we enter the second half of the year, the principal uncertainties which may impact our market risk relate to volatility in interest rates, commodities, credit spreads, equity prices and foreign exchange rates. Some of these markets are also experiencing periods of reduced liquidity, creating the potential for significant price adjustments and instability in the historical correlation across risk factors.

### **Liquidity Risk**

Despite a continued lack of term liquidity relative to overall demand, and constrained securitisation and covered bond markets, the Group's liquidity position has remained strong and stable and we have improved the overall term of our wholesale liabilities due to the diverse range of funding sources in terms of geography, currency and counterparty. Retail and commercial deposits continue to grow. In the UK and Europe, the Group continues to be able to fund its retail and commercial assets without recourse to wholesale markets. Given our limited reliance on securitisation as a source of funding, we do not regard uncertainty over the securitisation markets as likely to impact our liquidity risk profile in the second half of the year.

### **Legal Risk and Regulatory Compliance Risk**

These risks affect the Group through the extensive range of legal obligations, regulations and codes in force in the territories in which the Group operates. The principal uncertainties regarding these risks are further discussed on pages 129 to 131.

**Table of Contents****Risk Management****Barclays Capital Credit Market Exposures**

Barclays Capital's credit market exposures resulted in net losses of £1,979m in the first half of 2008, due to continuing dislocation in the credit markets. The net losses, which included £1,108m in impairment charges, comprised; £875m against ABS CDO Super Senior exposures; and £1,956m against other credit market exposures; partially offset by gains of £852m from the general widening of credit spreads on issued notes measured at fair value through the profit and loss account.

The credit market dislocation resulted in losses in the following categories:

	Pro-forma <sup>1</sup> As at 30.06.08 £m	Net Exposures As at 31.12.07 £m	As at 30.06.07 £m
<b>ABS CDO Super Senior</b>	<b>3,229</b>	4,671	7,432
<b>Other US sub-prime</b>			
Other US sub-prime	3,258	5,037	6,046
Whole loan sales post period end	(828)		
<b>Net Other US sub-prime</b>	<b>2,430</b>	5,037	6,046
<b>Alt-A</b>	<b>3,510</b>	4,916	3,760
<b>Monoline insurers</b>	<b>2,584</b>	1,335	140
<b>SIVs and SIV-Lites</b>	<b>429</b>	784	1,617
<b>Commercial mortgages</b>	<b>10,988</b>	12,399	8,282
<b>Leveraged finance</b>			
Net loans and commitments	7,326	7,368	7,317
Contingent repayment	(2,306)		
<b>Net Leveraged finance</b>	<b>5,020</b>	7,368	7,317

*1 The above table includes net exposures as at 30th June 2008 less reductions to US sub-prime and leveraged finance totalling £3,134m that are expected to complete in the second half of 2008.*

## **Table of Contents**

### **Accounting Policies**

#### **Basis of Preparation**

The condensed consolidated interim financial statements for the half year ended 30th June 2008 on pages 115 to 142 have been prepared in accordance with the Disclosure and Transparency Rules of the Financial Services Authority and with IAS 34, Interim financial reporting as published by the International Accounting Standards Board (IASB). They are also in accordance with IAS 34 as adopted by the European Union. The condensed consolidated interim financial statements should be read in conjunction with the annual financial statements for the year ended 31st December 2007, which have been prepared in accordance with International Financial Reporting Standards (IFRS) and interpretations issued by the International Financial Reporting Interpretations Committee (IFRIC) as published by the IASB. The annual financial statements are also prepared in accordance with IFRS as published by the IASB and IFRIC interpretations as adopted by the European Union.

The accounting policies adopted are consistent with those of the accounting policies described in the 2007 Annual report, except IFRS 8 Operating Segments has been adopted as at 1st January 2008. The standard was issued in November 2006 and excluding early adoption would first be required to be applied to the Group's accounting period beginning on 1st January 2009. The standard replaces IAS 14 Segmental Reporting and aligns operating segmental reporting with segments reported to senior management as well as requiring amendments and additions to the existing segmental reporting disclosures. The standard does not change the recognition, measurement or disclosure of specific transactions in the condensed consolidated interim financial statements but has impacted the segmental reporting as set out in note 19 on page 137.

Amortisation of intangible assets	94	87
Gain on acquisition	(89)	
<b>Operating expenses</b>	<b>6,664</b>	<b>6,847</b>

**4. Tax**

The tax charge for the period is based upon a UK corporation tax rate of 28.5% for the calendar year 2008 (2007: 30%). The effective rate of tax for the first half of 2008, based on profit before tax, was 22% (2007: 28%). The effective tax rate differs from 28.5% primarily due to the different tax rates which are applied to the profits earned outside the UK, disallowable expenditure, non-taxable gains and income, and the release of prior year tax provisions and a deferred tax liability no longer required. The effective tax rate for this interim period is lower than the 2007 full year and anticipated 2008 full year rate principally because of the release of prior year tax provisions and a deferred tax liability no longer required.

9.875% Undated Subordinated Notes

(300)

**(300)**

**Table of Contents**

**Notes to the Condensed Consolidated Interim Financial Statements**

**9. Retirement benefit liabilities**

The Group's IAS 19 pension surplus across all schemes as at 30th June 2008 was £141m (31st December 2007: £393m; 30th June 2007: £540m). There are net recognised liabilities of £1,567m (31st December 2007: £1,501m; 30th June 2007: £1,804m) and unrecognised actuarial gains of £1,708m (31st December 2007: £1,894m; 30th June 2007: £2,344m). The net recognised liabilities comprised retirement benefit liabilities of £1,603m (31st December 2007: £1,537m; 30th June 2007: £1,840m) and assets of £36m (31st December 2007: £36m; 30th June 2007: £36m).

The Group's IAS 19 pension surplus in respect of the main UK scheme as at 30th June 2008 was £439m (31st December 2007: £668m; 30th June 2007: £867m). This change primarily reflects lower investment returns over the period, following general market movements, which led to a fall in the market value of the scheme assets. This was partially offset by an increase in the real discount rate used to value the scheme liabilities, reflecting an increase in AA corporate bond yields which resulted in a higher discount rate of 6.70% (31st December 2007: 5.82%; 30th June 2007: 5.82%).

The consolidated statement of recognised income and expense reflects all items of income and expense for the period, including items taken directly to equity. Movements in individual reserves are shown including amounts which relate to minority interests; the impact of such amounts is then reflected in the amount attributable to such interests. Movements in individual reserves are also shown on a pre-tax basis with any related tax recorded on the separate tax line.

The available for sale reserve reflects gains or losses arising from the change in fair value of available for sale financial assets until disposal. The exceptions to reflect fair value movements through the income statement are impairment losses, gains or losses transferred to the income statement due to fair value hedge accounting and foreign exchange gains or losses on monetary items such as debt securities. When an available for sale asset is impaired or derecognised, the cumulative gain or loss previously recognised in the available for sale reserve is transferred to the income statement. The loss of £685m (2007: gain of £168m) from changes in fair value reflects the downturn across the US sub-prime market and increases in European and Japanese interest rates. The decrease in net gains transferred to net profit is primarily due to the lower levels of disposals.

Cash flow hedging aims to minimise exposure to variability in cash flows that is attributable to a particular risk associated with a recognised asset or liability or a highly probable forecast transaction that could affect profit or loss. The fair value gain or loss associated with the effective portion of the hedge is initially recognised in shareholders' equity, and recycled to the income statement in the periods when the hedged item will affect profit or loss. Any ineffective portion of the gain or loss on the hedging instrument is recognised in the income statement immediately. The current period movement in the cash flow hedge reserve relates to a reduction in the fair value of interest rate swaps used in cash flow hedging due to increases in interest rates.

## Edgar Filing: BARCLAYS PLC - Form 6-K

Exchange differences arising on the net investments in foreign operations and effective hedges of net investments are recognised in the currency translation reserve and transferred to the income statement on the disposal of the net investment. The movement in the first half of 2008 primarily reflects the impact of changes in the value of the Rand, Yen, Euro and Swiss Franc against Sterling. These movements reflect both the Group and minority interests in Absa Group Limited, the value of other currency movements on net investments which are hedged on a post-tax basis and net investments which are economically hedged through preference share capital that is not revalued for accounting purposes.

**Notes to the Condensed Consolidated Interim Financial Statements**

**14. Legal Proceedings**

Barclays has for some time been party to proceedings, including a class action, in the United States against a number of defendants following the collapse of Enron; the class action claim is commonly known as the Newby litigation. On 20th July 2006 Barclays received an Order from the United States District Court for the Southern District of Texas Houston Division which dismissed the claims against Barclays PLC, Barclays Bank PLC and Barclays Capital Inc. in the Newby litigation. On 4th December 2006 the Court stayed Barclays dismissal from the proceedings and allowed the plaintiffs to file a supplemental complaint. On 19th March 2007 the United States Court of Appeals for the Fifth Circuit issued its decision on an appeal by Barclays and two other financial institutions contesting a ruling by the District Court allowing the Newby litigation to proceed as a class action. The Court of Appeals held that because no proper claim against Barclays and the other financial institutions had been alleged by the plaintiffs, the case could not proceed against them. The plaintiffs applied to the United States Supreme Court for a review of this decision. On 22nd January 2008, the United States Supreme Court denied the plaintiffs' request for review. Following the Supreme Court's decision, the District Court ordered a further briefing concerning the status of the plaintiffs' claims. Barclays is seeking the dismissal of the plaintiffs' claims.

Barclays considers that the Enron related claims against it are without merit and is defending them vigorously. It is not possible to estimate Barclays possible loss in relation to these matters, nor the effect that they might have upon operating results in any particular financial period.

Barclays has been in negotiations with the staff of the US Securities and Exchange Commission with respect to a settlement of the Commission's investigations of transactions between Barclays and Enron. Barclays does not expect that the amount of any settlement with the Commission would have a significant adverse effect on its financial position or operating results.

Like other UK financial services institutions, Barclays faces numerous County Court claims and complaints by customers who allege that its unauthorised overdraft charges either contravene the Unfair Terms in Consumer Contracts Regulations 1999 ( UTCCR ) or are unenforceable penalties or both. In July 2007, by agreement with all parties, the OFT commenced proceedings against seven banks and one building society including Barclays, to resolve the matter by way of a test case process (the test case ). Preliminary issues hearings took place in January / February and July 2008. In relation to the January / February hearing the Judge found in favour of the banks on the issue of the penalty doctrine, and in favour of the OFT on the issue of the applicability of the UTCCR. The OFT is not pursuing an appeal in relation to the penalty doctrine. The banks have been granted permission to appeal the decision in relation to the applicability of the UTCCR. The Court of Appeal proceedings are likely to be heard in the Autumn of 2008 and this will dictate the further course of the action. There are likely to be further hearings and the proceedings may take a significant period of time to conclude. Pending resolution of the test case process, existing and new claims in the County Courts remain stayed, and there is an FSA waiver of the complaints handling process and a standstill of Financial Ombudsman Service decisions. Barclays is defending the test case vigorously. It is not practicable to estimate Barclays possible loss in relation to these matters, nor the effect that they may have upon operating results in any particular financial period.

Barclays is engaged in various other litigation proceedings both in the United Kingdom and a number of overseas jurisdictions, including the United States, involving claims by and against it which arise in the ordinary course of business. Barclays does not expect the ultimate resolution of any of the proceedings to which Barclays is party to have a significant adverse effect on the financial position of the Group and Barclays has not disclosed the contingent liabilities associated with these claims either because they cannot reasonably be estimated or because such disclosure could be prejudicial to the conduct of the claims.

---

**Table of Contents****Notes to the Condensed Consolidated Interim Financial Statements****15. Competition and Regulatory Matters**

The scale of regulatory change remains challenging, arising in part from the implementation of some key European Union ( EU ) directives. Many changes to financial services legislation and regulation have come into force in recent years and further changes will take place in the near future. Concurrently, there is continuing political and regulatory scrutiny of the operation of the retail banking and consumer credit industries in the UK and elsewhere. The nature and impact of future changes in policies and regulatory action are not predictable and beyond the Group's control but could have an impact on the Group's businesses and earnings. In June 2005, an inquiry into retail banking in all of the then 25 Member States was launched by the European Commission's Directorate General for Competition. The inquiry looked at retail banking in Europe generally. In January 2007, the European Commission announced that the inquiry had identified barriers to competition in certain areas of retail banking, payment cards and payment systems in the EU. The European Commission indicated it will use its powers to address these barriers, and will encourage national competition authorities to enforce European and national competition laws where appropriate. Any action taken by the European Commission and national competition authorities could have an impact on the payment cards and payment systems businesses of the Group and on its retail banking activities in the EU countries in which it operates.

In September 2005, the OFT received a super-complaint from the Citizens Advice Bureau relating to payment protection insurance ( PPI ). As a result, the OFT commenced a market study on PPI in April 2006. In October 2006 the OFT announced the outcome of the market study and the OFT referred the PPI market to the UK Competition Commission for an in-depth inquiry in February 2007. The Competition Commission published its provisional findings on 5th June 2008 in which it indicated that there was a lack of competition in the UK PPI market. The commission will now consult on the provisional findings and remedies and intends to publish its final report at the end of 2008. In October 2006, the FSA also published the outcome of its broad industry thematic review of PPI sales practices in which it concluded that some firms fail to treat customers fairly. The Group has cooperated fully with these investigations and will continue to do so.

The OFT has carried out investigations into Visa and MasterCard credit card interchange rates. The decision by the OFT in the MasterCard interchange case was set aside by the Competition Appeals Tribunal in June 2006. The OFT's investigation in the Visa interchange case is at an earlier stage and a second MasterCard interchange case is ongoing. The outcome is not known but these investigations may have an impact on the consumer credit industry in general and therefore on the Group's business in this sector. In February 2007 the OFT announced that it was expanding its investigation into interchange rates to include debit cards.

In April 2007, the UK consumer interest association known as Which? submitted a super-complaint to the OFT pursuant to the Enterprise Act 2000. The super-complaint criticises the various ways in which credit card companies calculate interest charges on credit card accounts. In June 2007, the OFT announced a new programme of work with the credit card industry and consumer bodies in order to make the costs of credit cards easier for consumers to understand. This OFT decision follows the receipt by the OFT of the super-complaint from Which?. This new work will explore the issues surrounding the costs of credit for credit cards including purchases, cash advances, introductory offers and payment allocation. On 11th February 2008, the OFT announced its recommendations, which include the introduction of an FSA price comparison website, improvements to customer information in summary boxes and the use of standard terminology.

In September 2006, the OFT announced that it had decided to undertake a fact find on the application of its statement on credit card fees to current account unauthorised overdraft fees. The fact find was completed in March 2007. On 29th March 2007, the OFT announced its decision to conduct a formal investigation into the fairness of bank current account charges. The OFT initiated a market study into personal current accounts ( PCAs ) in the UK on 26th April 2007. The study's focus was PCAs but it also included an examination of other retail banking products, in particular savings accounts, credit cards, personal loans and mortgages in order to take into account the competitive dynamics of UK retail banking. On 16th July 2008, the OFT published its market study report, in which it concluded that certain features of the UK PCA market were not working well for consumers. The OFT reached the provisional view that some form of regulatory intervention is necessary in the UK PCA market. On 16th July 2008 the OFT also announced a consultation to seek views on the findings and possible measures to address the issues raised in its report. Barclays has participated fully in the market study process and will continue to do so. The consultation period closes on 31st October 2008.

## **Table of Contents**

### **Notes to the Condensed Consolidated Interim Financial Statements**

#### **15. Competition and Regulatory Matters (continued)**

US laws and regulations require compliance with US economic sanctions, administered by the Office of Foreign Assets Control, against designated foreign countries, nationals and others. HM Treasury regulations similarly require compliance with sanctions adopted by the UK government. The Group has been conducting an internal review of its conduct with respect to US dollar payments involving countries, persons and entities subject to these sanctions and has been reporting to governmental authorities about the results of that review. The Group received inquiries relating to these sanctions and certain US dollar payments processed by its New York branch from the New York County District Attorney's Office and the US Department of Justice, which along with other authorities, has been reported to be conducting investigations of sanctions compliance by non-US financial institutions. The Group has responded to those inquiries and is cooperating with the regulators, the Department of Justice and the District Attorney's Office in connection with their investigations of Barclays conduct with respect to sanctions compliance. Barclays has also been keeping the FSA informed of the progress of these investigations and Barclays internal review. Barclays review is ongoing. It is currently not possible to predict the ultimate resolution of the issues covered by Barclays review and the investigations, including the timing and potential financial impact of any resolution, which could be substantial.

#### **16. Acquisitions and Disposals**

##### **Acquisitions**

On 31st March 2008, Barclays completed the acquisition of Discover's UK credit card business, Goldfish, for a cash consideration of £38m (including attributable costs of £3m), for fair value of net assets of £127m, which gave rise to a gain on acquisition of £89m.

On 7th March 2008 Absa acquired, for a consideration of £5m a further 24% of Meeg Bank Limited, bringing Absa's shareholding up to 74%. Meeg Bank is based in South Africa.

##### **Disposals**

On 31st January 2008 Barclays completed the sale of Barclays Global Investors Japan Trust & Banking Co. Ltd, a Japanese trust administration and custody operation.

**Table of Contents**

**Notes to the Condensed Consolidated Interim Financial Statements**

**17. Related Party Transactions**

Parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial or operational decisions, or one other party controls both. The definition includes subsidiaries, associates, joint ventures and the Group's pension schemes, as well as other persons.

**Subsidiaries**

Transactions between Barclays Bank PLC and subsidiaries also meet the definition of related party transactions. Where these are eliminated on consolidation, they are not disclosed in the Group financial statements.

**Associates, Joint Ventures and Other Entities**

The Group provides banking services to its associates, joint ventures and Group pension funds (principally the UK Retirement Fund), providing loans, overdrafts, interest and non-interest bearing deposits and current accounts to these entities as well as other services. Group companies, principally within Barclays Global Investors, also provides investment management and custodian services to the Group pension schemes. The Group also provides banking services for unit trusts and investment funds managed by Group companies and are not individually material.

**Key Management Personnel**

The Group provides banking services to Directors and other key management personnel and persons connected to them. No related parties transactions have taken place in the first six months of the current financial year that have materially affected the financial position or the performance of the Group during that period; and there were no material changes in the related parties transactions described in the last Annual Report that could have a material effect on the financial position or performance of the Group in the first six months of the current financial year.

**Table of Contents****Notes to the Condensed Consolidated Interim Financial Statements****17. Related Party Transactions (continued)**

All of these transactions are conducted on the same terms to third-party transactions and are not individually material.

Amounts included, in aggregate, by category of related party entity are as follows:

Six months ending 30th June 2008	Associates £m	Joint ventures £m	Entities under common directorship £m	Pension funds, unit trusts and investment funds £m	Total £m

**18. Events Occurring after the Balance Sheet Date**

In July 2008 a capital injection of approximately £4.4bn was made by Barclays PLC into Barclays Bank PLC.

On 1st July 2008 Barclays acquired 100% of the shares of the Russian Bank, Expobank, for a consideration of approximately \$745m (£373m).

On 8th July 2008 Barclays announced it would close its FirstPlus unit to new business in August 2008.

On 5th August 2008 Barclays announced a sale of Barclays Life Assurance Company Limited to Swiss Reinsurance Company for a consideration of approximately £753m.

## **Table of Contents**

### **Notes to the Condensed Consolidated Interim Financial Statements**

#### **19. Segmental Reporting**

The following section analyses the Group's performance by business. For management and reporting purposes, Barclays is organised into the following business groupings:

##### **Global Retail and Commercial Banking**

UK Retail Banking

Barclays Commercial Bank

Barclaycard

Global Retail and Commercial Banking - Western Europe

Global Retail and Commercial Banking - Emerging Markets

Global Retail and Commercial Banking - Absa

##### **Investment Banking and Investment Management**

Barclays Capital

Barclays Global Investors

Barclays Wealth

##### **Head Office Functions and Other Operations**

##### **UK Retail Banking**

UK Retail Banking comprises Personal Customers, Home Finance, Local Business, Consumer Lending and Barclays Financial Planning. This cluster of businesses aims to build broader and deeper relationships with its Personal and Local Business customers through providing a wide range of products and financial services. Personal Customers and Home Finance provide access to current account and savings products, Woolwich branded mortgages and general insurance. Consumer Lending provides unsecured loan and protection products and Barclays Financial Planning provides investment advice and products. Local Business provides banking services, including money transmission, to small businesses.

**Barclays Commercial Bank**

Barclays Commercial Bank provides banking services to organisations with an annual turnover of more than £1m. Customers are served via a network of relationship and industry sector specialists, which provides solutions constructed from a comprehensive suite of banking products, support, expertise and services, including specialist asset financing and leasing facilities. Customers are also offered access to the products and expertise of other businesses in the Group, particularly Barclays Capital, Barclaycard and Barclays Wealth.

## **Table of Contents**

### **Notes to the Condensed Consolidated Interim Financial Statements**

#### **19. Segmental Reporting (continued)**

##### **Barclaycard**

Barclaycard is a multi-brand credit card and consumer lending business which also processes card payments for retailers and merchants and issues credit and charge cards to corporate customers and the UK Government. It is one of Europe's leading credit card businesses and has an increasing presence in the United States.

In the UK, Barclaycard comprises Barclaycard UK Cards, Barclaycard Partnerships (SkyCard, Thomas Cook, Argos and Solution Personal Finance), Barclays Partner Finance and FirstPlus.

Outside the UK, Barclaycard provides credit cards in the United States, Germany, South Africa (through management of the Absa credit card portfolio) and in the Nordic region, where Barclaycard operates through Entercard, a joint venture with Swedbank.

Barclaycard works closely with other parts of the Group, including UK Retail Banking, Barclays Commercial Bank and Global Retail and Commercial Banking - Western Europe and Global Retail and Commercial Banking - Emerging Markets, to leverage their distribution capabilities.

##### **Global Retail and Commercial Banking - Western Europe**

GRCB - Western Europe encompasses Barclays Global Retail and Commercial Banking as well as Barclaycard operations in Spain, Italy, Portugal, France and Greece. GRCB - Western Europe serves customers through a variety of distribution channels including more than 980 distribution points and over 880 ATMs. GRCB - Western Europe provides a variety of products including retail mortgages, current and deposit accounts, commercial lending, unsecured lending, credit cards, investments, and insurance serving the needs of Barclays retail, mass affluent, and corporate customers.

##### **Global Retail and Commercial Banking - Emerging Markets**

GRCB - Emerging Markets encompasses Barclays Global Retail and Commercial Banking, as well as Barclaycard operations, in 14 countries organised in 6 geographic areas: India and Indian Ocean (India, Mauritius and Seychelles); Middle East and North Africa (UAE and Egypt); East and West Africa (Ghana, Tanzania, Uganda and Kenya); Southern Africa (Botswana, Zambia and Zimbabwe); Russia; and Pakistan (from 23rd July 2008). GRCB - Emerging Markets serves its customers through a network of over 870 branches and sales centres, and more than 890 ATMs. GRCB - Emerging Markets provides a variety of traditional retail and commercial products including retail mortgages, current and deposit accounts, commercial lending, unsecured lending, credit cards, treasury and investments. In addition to this, it provides specialist services such as Sharia compliant products and mobile banking.

##### **Global Retail and Commercial Banking - Absa**

GRCB - Absa represents Barclays consolidation of Absa, excluding Absa Capital which is included as part of Barclays Capital and Absa Card which is included as part of Barclaycard. Absa Group Limited is one of South Africa's largest financial services organisations serving personal, commercial and corporate customers predominantly in South Africa. GRCB - Absa serves retail customers through a variety of distribution channels and offers a full range of banking services, including current and deposit accounts, mortgages, instalment finance, credit cards, bancassurance products and wealth management services. It also offers customised business solutions for commercial and large corporate customers.

## **Table of Contents**

### **Notes to the Condensed Consolidated Interim Financial Statements**

#### **19. Segmental Reporting (continued)**

##### **Barclays Capital**

Barclays Capital is a leading global investment bank which provides large corporate, institutional and government clients with solutions to their financing and risk management needs.

Barclays Capital services a wide variety of client needs, from capital raising and managing foreign exchange, interest rate, equity and commodity risks, through to providing technical advice and expertise. Activities are organised into three principal areas: Rates, which includes fixed income, foreign exchange, commodities, emerging markets, money markets, prime services and equity products; Credit, which includes primary and secondary activities for loans and bonds for investment grade, high yield and emerging market credit, as well as hybrid capital products, asset based finance, mortgage backed securities, credit derivatives, structured capital markets and large asset leasing; and Private Equity. Barclays Capital includes Absa Capital, the investment banking business of Absa. Barclays Capital works closely with all other parts of the Group to leverage synergies from client relationships and product capabilities.

##### **Barclays Global Investors**

Barclays Global Investors (BGI) is one of the world's largest asset managers and a leading global provider of investment management products and services.

BGI offers structured investment strategies such as indexing, global asset allocation and risk controlled active products including hedge funds and provides related investment services such as securities lending, cash management and portfolio transition services. In addition, BGI is the global leader in assets and products in the exchange traded funds business, with over 335 funds for institutions and individuals trading globally. BGI's investment philosophy is founded on managing all dimensions of performance: a consistent focus on controlling risk, return and cost. BGI collaborates with the other Barclays businesses, particularly Barclays Capital and Barclays Wealth, to develop and market products and leverage capabilities to better serve the client base.

##### **Barclays Wealth**

Barclays Wealth serves high net worth, affluent and intermediary clients worldwide, providing private banking, asset management, stockbroking, offshore banking, wealth structuring and financial planning services and manages the closed life assurance activities of Barclays and Woolwich in the UK.

Barclays Wealth works closely with all other parts of the Group to leverage synergies from client relationships and product capabilities.

##### **Head Office Functions and Other Operations**

Head Office Functions and Other Operations comprises head office and central support functions, businesses in transition and consolidation adjustments.

Head office and central support functions comprises the following areas: Executive Management, Finance, Treasury, Corporate Affairs, Human Resources, Strategy and Planning, Internal Audit, Legal, Corporate Secretariat, Property, Tax, Compliance and Risk. Costs incurred wholly on behalf of the businesses are recharged to them.

Businesses in transition principally relate to certain lending portfolios that are centrally managed with the objective of maximising recovery from the assets. Consolidation adjustments largely reflect the elimination of inter-segment transactions.

**Table of Contents**

**Notes to the Condensed Consolidated Interim Financial Statements**

**19. Segmental Reporting (continued)**

**Group Reporting Changes In 2008**

Barclays announced on 22nd July 2008 the impact of certain changes in Group structure and reporting on the 2007 results. There was no impact on the Group income statement or balance sheet.

The businesses previously managed and reported as International Retail and Commercial Banking - excluding Absa are now reported and managed separately as Global Retail and Commercial Banking - Western Europe and Global Retail and Commercial Banking - Emerging Markets going forward.

Barclays Commercial Bank. The Marine Finance business, previously part of Barclaycard, is now managed and reported within Barclays Commercial Bank.

Barclaycard. The Absa credit card portfolio, previously part of International Retail and Commercial Banking - Absa is now managed and reported within Barclaycard. Certain credit card portfolios previously part of Barclaycard are now managed and reported as part of Global Retail and Commercial Banking - Western Europe. The Marine Finance business, previously part of Barclaycard is now managed and reported within Barclays Commercial Bank.

Global Retail and Commercial Banking - Western Europe. Certain credit card portfolios previously part of Barclaycard are now managed and reported as part of Global Retail and Commercial Banking - Western Europe.

International Retail and Commercial Banking - Absa. This business will be known going forward as Global Retail and Commercial Banking - Absa. The Absa credit card portfolio previously part of Global Retail and Commercial Banking - Absa is now managed and reported within Barclaycard.

Certain expenses, assets and staff previously reported within International Retail and Commercial Banking - excluding Absa have been allocated across UK Retail Banking, Barclays Commercial Bank, Barclaycard, Global Retail and Commercial Banking - Western Europe, Global Retail and Commercial Banking - Emerging Markets and Global Retail and Commercial Banking - Absa.

Certain pension assets and liabilities have been reclassified from Head Office and Other Operations to the other businesses in the Group.

UK Banking which previously reflected UK Retail Banking and Barclays Commercial Bank combined is no longer reported as a separate segment.

The structure remains unchanged for Barclays Capital, Barclays Global Investors, Barclays Wealth and Head Office and Other Operations.

**Glossary**

Income refers to total income net of insurance claims, unless otherwise specified.

Risk Tendency is a statistical estimate of the average loss for each loan portfolio for a 12-month period, taking into account the size of the portfolio and its risk characteristics under current economic conditions, and is used to track the change in risk as the portfolio of loans changes over time.

Daily Value at Risk (DVaR) is an estimate of the potential loss which might arise from unfavourable market movements, if the current positions were to be held unchanged for one business day, measured to a confidence level of 98%.
