Economic Scenario

The outlook for global economic activity is one of moderate growth. In June, the global manufacturing Purchasing Managers Index (PMI) moved up for the sixth consecutive month, reaching 50.6 points.

Despite the strengthening of private consumption in the United States and Japan, other factors, such as soaring unemployment, especially in Europe, the fiscal restrictions in certain of the mature economies and the Chinese slowdown are pointing to exceptionally modest economic growth in 2013. As a result, the central banks in the developed countries have kept interest rates at historically minimum levels, while expansionist monetary policies are prevailing in some of the developing nations.

The IMF expects global GDP growth of 3.1% in 2013, very close to the 2012 figure.

USA

U.S. GDP grew by an annualized 1.7% in 2Q13 versus 1.8% recorded in 1Q13, chiefly due to household consumption. The FED is predicting growth of between 2.3% and 2.8% for the year as a whole. According to the institution, industrial production grew by 0.3% in June, with capacity utilization of 77.8%. Manufacturing PMI stood at 50.9 points, versus 49.0 points in May.

Europe

Eurozone GDP recorded its sixth consecutive quarterly decline in 1Q13, falling by 0.2% over 4Q12. Germany, the region's biggest economy, posted growth of only 0.1% in the quarter,

while France dipped by 0.2%. The European Central Bank expects shrinkage of 0.6% in 2013.

Eurozone unemployment averaged 12.2% in May, equivalent to 19.3 million people out of work, in line with the previous month figure. Greece and Spain continued to record the highest rates, around 27%, versus only 5.3% in Germany.

On the other hand, manufacturing PMI reached 48.8 points in June, the highest figure for 16 months.

UK GDP edged up by 0.6% over 1Q13, while annualized inflation increased from 2.7% in May to 2.9% in June. The Bank of England is predicting annual inflation of more than 3%, which should jeopardize consumer spending, with consequent negative pressure on economic growth.

Asia

In China, certain indicators are pointing to a slowdown in economic activity. According to the National Bureau of Statistics of China, 2Q13 GDP grew by 7.5%, versus 7.7% in 1Q13 and 7.9% in 4Q12.

Manufacturing PMI actually recorded a decline in 2Q13, falling from 51.6 points in March to 48.2 points in June.

On the other hand, Japan posted annualized growth of 4.1% in the first quarter, fueled by private consumption and exports, benefiting from the yen devaluation policy. In April, industrial production moved up by 0.9%, while retail sales increased by 0.6%. Manufacturing PMI stood at 52.3 points in June, above the 51.5 points recorded in May, the fourth consecutive monthly upturn and the best result in 28 months.

Brazil

First-quarter GDP grew by 0.6%, reflecting agricultural growth of 9.7%, the 4.6% upturn in gross fixed capital formation and the 0.1% increase in household consumption. In the 12 months through March 2013, GDP grew by 1.2% over the same period last year. The Central Bank's FOCUS report expects annual GDP growth of 2.24%.

Industrial output in May fell by 2.0% over April, but still moved up 1.7% year-on-year in the first five months.

Inflation measured by the IPCA consumer price index recorded 0.26% in June 2013, giving 6.70% in the last 12 months, above the target ceiling defined by the Monetary Policy Committee (COPOM). As a result, the COPOM raised the Selic base rate for the third consecutive time at its last meeting in July, this time to 8.50% p.a.

On the foreign exchange front, the real depreciated by 10% against the U.S. dollar in 2Q13, closing June at R\$2.22/US\$, while foreign reserves totaled US\$371 billion.

Adoption of IFRS 10/11

As of January 1, 2013, the Company adopted IFRS 10 – Consolidated Financial Statements, corresponding to CPC 36 (R3) – *Demonstrações Financeiras Consolidadas*, approved by the CVM in December 2012, and IFRS 11 – Joint Arrangements, corresponding to CPC 19 (R2) - *Negócios em Conjunto*, approved by the CVM in November 2012. As a result, given that the proportional consolidation method is no longer permitted, the Company has ceased to consolidate its jointly-owned subsidiaries Namisa, MRS Logística and CBSI, and now accounts for them under the equity method. The main impacts are on net revenue, cost of goods sold, gross profit, financial result, equity result and net income. For comparability purposes, the consolidated financial statements for the first half of 2012 were reclassified to reflect this alteration.

CSN recorded consolidated net revenue of R\$4,060 million in 2Q13, 11% up on the R\$3,642 million recorded in 1Q13, mainly due to increased revenue from the mining and steel segments.

In 2Q13, consolidated COGS came to R\$3,020 million, 6% more than the R\$2,852 million posted in the previous quarter, chiefly due to higher sales in the mining and steel segments.

Selling, General, Administrative and Other Operating Expenses

Consolidated SG&A expenses totaled R\$380 million in 2Q13, 22% up on the R\$311 million registered in 1Q13, essentially due to higher expenses from freight, third-party services and personnel.

CSN recorded a net expense of R\$145 million in the "Other Operating Expenses" line in 2Q13, R\$50 million up on 1Q13, basically due to the completion of provisions for contingencies.

The Company uses Adjusted EBITDA to measure the performance of its various segments and their operating cash flow generation capacity. It comprises net income before the net financial result, income and social contribution taxes, depreciation and amortization, equity income and other operating revenue (expenses). However, although it is used to measure segment results, EBITDA is not a measure recognized by Brazilian accounting practices or International Financial Reporting Standards (IFRS), has no standard definition and therefore should not be compared to similar indicators adopted by other companies.

Adjusted EBITDA and the adjusted EBITDA margin consider the Company's proportional interest in Namisa, MRS Logística and CBSI and is on a comparable basis with the amounts published in 2012.

Consolidated adjusted EBITDA totaled R\$1,095 million in 2Q13, 21% up on the R\$902 million recorded in 1Q13, primarily due to the contributions of the steel, mining and logistics segments.

The consolidated adjusted EBITDA margin stood at 24% in the second quarter, 2 p.p. more than in 1Q13.

Financial Result and Net Debt

The 2Q13 net financial result was negative by R\$458 million, chiefly due to the following factors:

- ü Interest on loans and financing totaling R\$546 million;
- ü Expenses of R\$17 million with the monetary restatement of tax payment installments;

- ü Other financial expenses totaling R\$18 million.

These negative effects were partially offset by consolidated financial revenue of R\$60 million and monetary and foreign exchange variations of R\$63 million, including the result of derivative operations.

Gross debt, net debt and the net debt/EBITDA ratio presented below reflect the Company's proportional interest in Namisa, MRS Logística and CBSI and are on a comparable basis with the amounts published in 2012.

On June 30, 2013, consolidated net debt stood at R\$16.9 billion, R\$0.7 billion more than the R\$16.2 billion recorded on March 31, 2013, essentially due to the following factors:

- ü Interest on equity payments totaling R\$0.4 billion;
- ü Investments of R\$0.6 billion in fixed assets;
- ü A R\$0.5 billion effect related to the cost of debt;
- ü A R\$0.3 billion increase in working capital.

These effects were partially offset by adjusted EBITDA of R\$1.1 billion.

The net debt/EBITDA ratio closed the second quarter at 3.92x, based on LTM adjusted EBITDA.

Equity Result

Consolidated equity result totaled R\$283 million, R\$266 million more than in 1Q13, basically due to the improved result of the jointly-owned subsidiary Namisa.

CSN posted consolidated net income of R\$502 million in 2Q13, R\$486 million up on 1Q13, mainly due to the increase in gross profit, fueled by period equity result and the financial result.

Investments reflect the Company's proportional interest in Namisa, MRS Logística and CBSI and are on a comparable basis with the amounts published in 2012.

CSN invested R\$606 million in 2Q13, R\$344 million of which in the parent company, mostly in the following projects:

- ü Casa de Pedra mine and Itaguaí Port: R\$135 million;
- ü Construction of the long steel plant: R\$109 million.

The remaining R\$262 million went to subsidiaries and joint subsidiaries, as follows:

- ü Transnordestina Logística: R\$125 million;
- ü MRS: R\$73 million;

ü Tecon: R\$29 million.

Working capital closed 2Q13 at R\$1,942 million, R\$276 million up on the R\$1,666 million recorded at the end of 1Q13, chiefly due to the increase in accounts receivable and the reduction in the suppliers line, partially offset by lower inventories.

In comparison with the end of 1H12, working capital fell by R\$372 million, due to improved payment management and the reduction in inventories, partially offset by the upturn in accounts receivable. The average inventory turnover period fell by 19 days, while the average supplier payment period increased by four days, reducing the cash conversion cycle by 23 days.

Scenario

According to the World Steel Association (WSA), global crude steel production totaled 790 million tonnes in 1H13, 2% higher than in 1H12, with China being responsible for 389 million tonnes, 8% up in the same period.

Global capacity use reached 79% in June 2013, remaining flat over the previous month. In this scenario, the WSA expects global apparent steel consumption of 1.45 billion tonnes in 2013, 2.9% more than the year before, with China accounting for 669 million tonnes, 3.5% more than in 2012.

According to the Brazilian Steel Institute (IABr), domestic crude steel production came to 17.0 million tonnes in 1H13, 2% down year-on-year, while rolled flat output totaled 7.4 million tonnes, remaining stable.

Apparent domestic flat steel consumption amounted to 6.8 million tonnes in the first half, with no change over 1H12. In the same period, domestic sales of 6.0 million tonnes moved up by 5%, while imports of 0.8 million tonnes fell by a substantial 28%. On the other hand, exports climbed by 17% to 1.0 million tonnes.

The IABr expects Brazilian crude steel production to increase by 5.8% in 2013 to 36.5 million tonnes, accompanied by domestic sales growth of 7.6% to 23.3 million tonnes and a 4.2% upturn in apparent consumption to 26.2 million tonnes.

Home Appliances

According to the IBGE (Brazilian Institute of Geography and Statistics), white goods production fell by 9.7% in May and 1.65% in the first five months over the same periods last year.

The government recently announced an alteration in the schedule and recomposition of the IPI tax on home appliances and furniture. The reduction, in place since the end of 2011, should be gradually removed by September, but not entirely.

Eletros (the Home Appliance and Consumer Electronics Manufacturers' Association) expects home appliance sales to move up by 9% in 2013. According to the association, the *Minha Casa Melhor* (My Better Home) program, which permits furniture and home appliance financing for beneficiaries of the *Minha Casa, Minha Vida* (My Home, My Life) program, could leverage appliance sales by up to eight million units.

Scenario

In 2Q13, the seaborne iron ore market was negatively impacted by the slowdown in Chinese construction and industrial activity. The level of steel output and high inventories pressured steel product prices, in turn affecting iron ore prices. In addition, tighter credit jeopardized the

iron ore purchasing power of the Chinese steel mills at the end of the quarter. As a result, the Platts Fe62% CFR China index averaged US\$125.95/dmt in the second quarter, 15% down on the previous three months.

The iron-ore quality premium hovered between US\$1.77 and US\$2.29/dmt per 1% of Fe content, while freight costs on the Tubarão/Qingdao route averaged US\$17.84/wmt.

1. DESCRIPTION OF BUSINESS

Companhia Siderúrgica Nacional “CSN”, also referred to as the Company or Parent Company, is a publicly-held company incorporated on April 9, 1941, under the laws of the Federative Republic of Brazil (Companhia Siderúrgica Nacional, its subsidiaries, associates and jointly controlled entities collectively referred to herein as the “Group”). The Company’s registered office is located in São Paulo, SP, Brazil.

CSN has shares listed on the São Paulo Stock Exchange (BM&F BOVESPA) and the New York Stock Exchange (NYSE). Accordingly, it reports its information to the Brazilian Securities Commission (CVM) and the U.S. Securities and Exchange Commission (SEC).

The Group's main operating activities are divided into five (5) operating segments as follows:

- **Steel:**

The Company’s main industrial facility is the Presidente Vargas Steel Mill (“UPV”), located in the city of Volta Redonda, State of Rio de Janeiro. This segment consolidates the operations related to the production, distribution and sale of flat steel, long steel, metallic containers and galvanized steel. In addition to the facilities in Brazil, CSN has operations in the United States, Portugal and Germany aimed at gaining markets and performing excellent services for final consumers. Its steels are used in the home appliances, civil construction and automobile industries.

- **Mining:**

The production of iron ore is developed in the city of Congonhas, in the State of Minas Gerais. It further mines tin in the State of Rondônia to supply the needs of UPV, with the excess of these raw materials being sold to subsidiaries and third parties. CSN holds the concession to operate TECAR, a solid bulk terminal, one of the 4 (four) terminals that comprise the Itaguaí Port, in Rio de Janeiro. Importations of coal and coke are carried out through this terminal.

- **Cement:**

CSN entered the cement market boosted by the synergy between this new activity and its already existing businesses. Next to the Presidente Vargas Steel Mill in Volta Redonda (RJ), it installed a new business unit: CSN Cimentos, which produces CP-III type cement by using slag produced by the UPV blast furnaces in Volta Redonda. It also explores limestone and dolomite at the Arches drive in the State of Minas Gerais, to supply the needs of UPV and of the cement plant.

- **Logistics**

Railroads:

CSN has equity interests in two railroad companies: MRS Logística, which manages the former Southeast Network of Rede Ferroviária Federal S.A. (RFFSA), and Transnordestina Logística, which operates the former Northeast Network of the RFFSA in the states of Maranhão, Piauí, Ceará, Rio Grande do Norte, Paraíba, Pernambuco and Alagoas.

Ports:

In the State of Rio de Janeiro, by means of its subsidiary Sepetiba Tecon, the Company operates the Container Terminal (Tecon) at the Itaguaí Port. Located in the Bay of Sepetiba, this port has privileged highway, railroad and maritime access.

3. CHANGES IN ACCOUNTING POLICIES

The Company applied, beginning January 1, 2013, IFRS 10 *Consolidated Financial Statements*, equivalent to CPC 36 (R3) - "Demonstrações Consolidadas" approved by the CVM in December 2012, which establishes principles for the presentation and preparation of consolidated financial statements when an entity controls one or more entities, and IFRS 11 *Joint Arrangements*, equivalent to CPC 19(R2) - "Negócios em Conjunto" approved by the CVM in November 2012, which requires a new valuation of joint arrangements, focusing on the rights and obligations of the arrangement, instead of its form. IFRS 10 supersedes the consolidation requirements of SIC-12 *Consolidation of Special Purpose Entities* and IAS 27 *Separate and Consolidated Financial Statements*. IFRS 11 supersedes IAS 31 *Interests in Joint Ventures* and SIC-13 *Joint Ventures - Non-Monetary Contributions by Venturers*.

Accordingly, as the proportionate consolidation method for entities qualified as joint ventures is no longer allowed, the Company no longer consolidates its jointly controlled entities Nacional Minérios S.A., MRS

Logística S.A., and CBSI - Companhia Brasileira de Serviços de Infraestrutura, and started to account for these entities by the equity method of accounting. In addition to the application of IFRS 10 and 11, management decided to adopt as accounting policy the elimination of the effect on profit or loss of transactions carried out with jointly controlled entities. As a result, part of the share of profits (losses) of jointly controlled entities was reclassified to finance costs, cost of sales and income tax and social contribution.

The Company also applied, beginning January 1, 2013, IFRS 12 – Disclosure of Interest in Other entities, equivalent to CPC 45 – “Disclosure of Interests in Other Entities” approved by the CVM in December 2012, which requires disclosures of the nature of, and risks associated with, the Company's interests in other entities and the effects of those interests on its financial position, financial performance and cash flows.

For purposes of comparison, the balances as of December 31, 2012 and June 30, 2012 have been adjusted taking into account said changes in accounting policy, and are being presented for comparative purposes in the notes to the financial statements, as shown below:

In order to meet the needs of some customers in the domestic market, related to the extension of the payment term for billing of steel, in common agreement with CSN's internal commercial policy and maintenance of its very short-term receipts (up to 7 days), at the request of the customer, transactions are carried out for assignment of receivables without co-obligation negotiated between the customer and banks with common relationship, where CSN assigns the trade notes/bills that it issues to the banks with common relationship.

Due to the characteristics of the transactions for assignment of receivables without co-obligation, after assignment of the customer's trade notes/bills and receipt of the funds from the closing of each transaction, CSN settles the trade receivables and becomes entirely free of the credit risk on the transaction. This transaction totals R\$396,960 as of June 30, 2013 (R\$224,718 as of December 31, 2012), less the trade receivables.

The changes in the Company's allowance for doubtful debts are as follows:

Some Group companies recognized tax credits on income tax and social contribution loss carryforwards not subject to statute of limitations and based on the history of profitability and expected future taxable profits determined in technical studies approved by Management.

Since they are subject to significant factors that may change the projections for realization, the carrying amounts of deferred tax assets and projections are reviewed annually. These studies indicate the

realization of these tax assets within the term stipulated by the mentioned instruction and the limit of 30% of the taxable profit.

Certain group companies have tax assets amounting to R\$808,540 and R\$261,488, related to income tax and social contribution loss carryforwards, for which no deferred taxes were set up, of which R\$11,518 expire in 2013, R\$825 in 2014, R\$33,131 in 2015, and R\$54,455 in 2025. The remaining tax assets refer to domestic companies and, therefore, are not subject to statute of limitations.

The undistributed profits of the Company's foreign subsidiaries have been invested and will continue to be indefinitely invested in their operations. These undistributed profits of the Company's foreign subsidiaries amounted to R\$6,777,821 as of June 30, 2013 (R\$6,307,956 as of December 31, 2012).

II – investments in financial instruments classified as available for sale and measured at fair value through OCI

Potential impairment of financial assets classified as available for sale

The Company has investments in common (USIM3) and preferred (USIM5) shares (“Usiminas Shares”), designated as available-for-sale financial assets as they do not meet the criteria to be classified within any of the other categories of financial instruments (loans and receivables, held-to-maturity investments or financial assets at fair value through profit or loss). The asset is classified as a non-current asset under line item “investments” and is carried at fair value based on the quoted price on the stock exchange (BM&FBOVESPA).

Considering the volatility of the quotations of Usiminas shares, the Company evaluated whether, at the end of the reporting period, there was objective evidence of impairment of these financial assets, i.e., the Company’s management evaluated if the decline in the market value of Usiminas shares should be considered either significant or prolonged. In turn, this valuation requires judgment based on CSN’s policy, prepared according to practices used in the domestic and international markets, and consists of an

instrument by instrument analysis based on quantitative and qualitative information available in the market, from the time an instrument shows a drop of 20% or more in its market value or from the time there is a significant drop in its market value as compared to its acquisition price during more than twelve months.

ITR — Quarterly Financial Information - June 30, 2013 – CIA SIDERURGICA NACIONAL

**Version:
1**

Based on the qualitative and quantitative elements, management concluded, in its best judgment, that there was evidence of a significant impairment of the investment in Usiminas shares as of June 30, 2012, and, consequently, reclassified the accumulated losses recorded in other comprehensive income amounting to R\$1,599,485, net of income tax and social contribution, to profit for the year, by recognizing R\$2,022,793 in other operating expenses and R\$423,308 in deferred taxes.

In December 2012 there was an additional recognition of R\$264,441 related to deferred taxes on accumulated losses due to the annual analysis of the effective income tax and social contribution rate that took into consideration the temporary differences generated by this investment in CSN subsidiaries resulting from the reclassification of accumulated losses.

Beginning this date, pursuant to a Company's policy, gains and losses arising from the variation of the quotation of shares were recognized in other comprehensive income. However, as of June 30, 2013, there was an additional decline in the quotation of the common shares (USIM3) as compared with the quotation as of June 30, 2012 which, according to the Company's accounting policy, generated a loss of R\$5,002, recorded directly in other operating expenses.

The Company continues to evaluate strategic alternatives with respect to its investment in Usiminas. These initiatives can, for example, affect the way an investment is recorded in the Company's financial statements.

III – Fair values of assets and liabilities as compared to their carrying amounts

The estimated fair values of consolidated long-term borrowings and financing were calculated at prevailing market rates, taking into consideration the nature, terms and risks similar to those of the recorded contracts, as compared below:

		6/30/2013		12/31/2012	
	Carrying amount	Fair value	Carrying amount	Fair value	
Perpetual bonds	2,218,616	2,034,260	2,046,281	2,102,366	
Fixed rate notes	6,578,554	6,591,733	6,067,555	6,811,081	

IV Financial risk management policy

As of June 30, 2013, there were no changes in the financial risk management policies in relation to those disclosed in the Company's financial statements for the year ended December 31, 2012.

The provision for tax, social security, labor, civil and environmental liabilities was estimated by management and is mainly based on the legal counsel's assessment. Only proceedings for which the risk is classified as probable loss are accrued. Moreover, this provision includes tax liabilities resulting from

contingencies filed by the Company, subject to SELIC (Central Bank's policy rate).

The Group is a defendant in other administrative and judicial proceedings (tax, social security, labor, civil, and environmental), in the approximate amount of R\$13,593,331, of which R\$1,118,089 related to labor and social security lawsuits, R\$546,410 to civil lawsuits, and R\$76,295 to environmental lawsuits. The assessments made by legal counsel define these administrative and judicial proceedings as entailing risk of possible loss and, therefore, no provision was recorded in conformity with Management's judgment and accounting practices adopted in Brazil.

As for the tax lawsuits these represent R\$11,852,537, broken down as follows:

- a) R\$1,857,899 refers to the assessment notice issued against the Company for an alleged nonpayment of income tax (IRPJ) and social contribution on net income (CSLL) on profits recognized in the balance sheets of its foreign subsidiaries.

- b) R\$6,317,563 refers to the tax assessment notice issued against the Company for an alleged sale of 40% of the shares of its subsidiary NAMISA to a Japanese-Korean consortium, thus failing to determine and pay taxes on the capital gain resulting from this transaction. In May 2013, as per judgment by the Regional Judgment Office of São Paulo – SP (1st administrative level), a favorable decision to the Company was issued, canceling the assessment notice. By this decision, a mandatory appeal was filed, which will be judged by the Administrative Board of Tax Appeals – CARF.

Adjusted EBITDA is the tool based on which the chief operating decision maker measures segment performance and the capacity to generate recurring operating cash, and consists of profit for the year less net finance income (costs), income tax and social contribution, depreciation and amortization, share of profits of investments, and other operating income (expenses). Even though it is an indicator used in segment performance measurements, EBITDA is not a measurement recognized by accounting practices adopted in Brazil or IFRS, does not have a standard definition, and may not be comparable with measurements using similar names provided by other entities. As required by IFRS 8, the table below shows the reconciliation of the measurement used by the chief operating decision maker with the results determined using the accounting practices.

The Company’s Management is responsible for the preparation of the individual interim financial information in accordance with technical pronouncement CPC 21 (R1) – Interim Financial Information and of the consolidated interim financial information in accordance with pronouncement CPC 21 (R1) and with international standard IAS 34 - Interim Financial Reporting, issued by the International Accounting Standards Board - IASB, as well as for the presentation of such information in accordance with the standards issued by the Brazilian Securities and Exchange Commission (CVM), applicable to the preparation of Interim Financial Information (ITR). Our responsibility is to express a conclusion on this interim financial information based on our review.

Scope of review

We conducted our review in accordance with Brazilian and international standards on review of interim financial information (NBC TR 2410 and ISRE 2410 – Review of Interim Financial Information Performed by the Independent Auditor of the Entity, respectively). A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with standards on auditing and, consequently, does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion on the individual interim financial information

Based on our review, nothing has come to our attention that causes us to believe that the accompanying individual interim financial information included in the ITR referred to above was not prepared, in all material respects, in accordance with technical pronouncement CPC 21 (R1), applicable to the preparation of the Interim Financial Information (ITR) and presented in accordance with the standards issued by the Brazilian Securities Commission.

We have also reviewed the individual and consolidated interim statements of value added (DVA), for the six-month period ended June 30, 2013, prepared under the responsibility of the Company's Management, the presentation of which is required by the standards issued by the CVM applicable to the preparation of Interim Financial Information (ITR), and considered as supplemental information for International Financial Reporting Standards – IFRS, which do not require the presentation of DVA. These statements were subject to the same review procedures described above and, based on our review, nothing has come to our attention that causes us to believe that they were not prepared, in all material respects, consistently with the individual and consolidated interim financial information taken as a whole.
