AVALON HOLDINGS CORPORATION AND SUBSIDIARIES

Notes to Unaudited Condensed Consolidated Financial Statements

June 30, 2016

Note 1. Description of Business

Avalon Holdings Corporation (“Avalon” or the “Company”) was formed on April 30, 1998 as a subsidiary of American Waste Services, Inc. (“AWS”). On June 17, 1998, AWS distributed, as a special dividend, all of the outstanding shares of capital stock of Avalon to the holders of AWS common stock on a pro rata and corresponding basis.

Avalon provides waste management services to industrial, commercial, municipal and governmental customers in selected northeastern and midwestern U.S. markets, captive landfill management services and salt water injection well operations. In addition, Avalon owns the Avalon Golf and Country Club, which includes the operation and management of three golf courses and associated clubhouses, fitness centers, tennis courts, spa services, dining and banquet facilities and a travel agency. Avalon also owns The Avalon Inn which operates a hotel and related amenities including dining, banquet and conference facilities, fitness center, indoor junior Olympic size swimming pool and tennis courts.

In July 2016, the Company formed Avalon Clubs and Resorts, Inc. (“ACRI”), a wholly owned subsidiary of Avalon, the purpose of which is to hold the corporate activity of Avalon Clubs, Inc. and Avalon Resorts, Inc., both formed concurrently with ACRI. Avalon Clubs, Inc. was formed to hold the wholly owned subsidiaries of the Avalon Golf and Country Club, and Avalon Resorts, Inc. holds the operations of The Avalon Inn.

Note 2. Basis of Presentation

The unaudited condensed consolidated financial statements of Avalon and related notes included herein have been prepared in accordance with the rules and regulations of the Securities and Exchange Commission. Accordingly, certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been omitted consistent with such rules and regulations. The accompanying unaudited condensed consolidated financial statements and related notes should be read in conjunction with the consolidated financial statements and related notes included in Avalon’s 2015 Annual Report to Shareholders.

The unaudited condensed consolidated financial statements include the accounts of Avalon, its wholly owned subsidiaries and those companies in which Avalon has managerial control. All significant intercompany accounts and transactions have been eliminated in consolidation.

In the opinion of management, these unaudited condensed consolidated financial statements include all adjustments, consisting of normal recurring adjustments, necessary for a fair presentation of the financial position of Avalon as of June 30, 2016, and the results of its operations and cash flows for the interim periods presented.

The operating results for the interim periods are not necessarily indicative of the results to be expected for the full year.

Note 3. Recent Accounting Pronouncements

In May 2014, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) 2014-09, *Revenue from Contracts with Customers* (“ASU 2014-09”), to clarify the principles used to recognize revenue for all entities. Under ASU 2014-09, a company will recognize revenue when it transfers promised goods or services to customers in an amount that reflects the consideration to which the company expects to be entitled in exchange for those goods or services. The new guidance establishes a five-step approach for the recognition of revenue. ASU 2014-09 is effective for annual periods beginning after December 15, 2017. Avalon is currently evaluating the impact the adoption of this guidance will have on its financial position, results of operations, cash flows and related disclosures and does not anticipate that the new guidance will fundamentally change our revenue recognition policies, practices or systems.

In August 2014, the FASB issued ASU 2014-15, *Disclosure of Uncertainties About an Entity’s Ability to Continue as a Going Concern* (“ASU 2014-15”). The new standard provides guidance on determining when and how to disclose going-concern uncertainties in the financial statements. Under ASU 2014-15, management will be required to perform interim and annual assessments of the Company’s ability to continue as a going concern within one year of the date the financial statements are issued. ASU 2014-15 is effective for annual periods ending after December 15, 2016, and interim periods thereafter, with early adoption permitted. The adoption of this standard is not expected to have an impact on Avalon’s financial statement disclosures.

In February 2015, the FASB issued ASU 2015-02, *Amendments to the Consolidation Analysis* (“ASU 2015-02”). The new standard makes changes to the variable interest model. ASU 2015-02 requires all reporting entities involved with limited partnerships to re-evaluate whether these entities qualify for consolidation and revise documentation accordingly. During the first quarter of 2016, the Company adopted ASU 2015-02. The adoption of this standard did not have an impact on Avalon’s financial position, results of operations or financial statement disclosures.

In November 2015, the FASB issued ASU 2015-17, *Balance Sheet Classification of Deferred Taxes* (“ASU 2015-17”), which simplifies the presentation of deferred income taxes by eliminating the need for entities to separate deferred income tax liabilities and assets into current and noncurrent amounts in a classified statement of financial position. This amendment is effective for annual periods beginning after December 15, 2016. The Company is currently evaluating the potential impact that ASU 2015-17 may have on its financial position and results of operations. The adoption of this standard is not expected to have an impact on Avalon’s financial position, results of operations or financial statement disclosures.

In February 2016, the FASB issued ASU No. 2016-02, *Leases*. The new standard establishes a right-of-use (“ROU”) model that requires a lessee to record a ROU asset and a lease liability on the balance sheet for all leases with terms longer than 12 months. Leases will be classified as either finance or operating, with classification affecting the pattern of expense recognition in the income statement. The new standard is effective for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years. A modified retrospective transition approach is required for lessees for capital and operating leases existing at, or entered into after, the beginning of the earliest comparative period presented in the financial statements, with certain practical expedients available. Avalon is currently evaluating the impact the adoption of this guidance will have on its financial position, results of operations, cash flows and related disclosures.

In March 2016, the FASB issued ASU No. 2016-08, *Revenue from Contracts with Customers (Topic 606): Principal versus Agent Considerations (Reporting Revenue Gross versus Net)* (“ASU 2016-08”), which clarifies how to apply revenue recognition guidance related to whether an entity is a principal or an agent. ASU 2016-08 is effective for annual periods beginning after December 15, 2017. Avalon is currently evaluating the impact the adoption of this guidance will have on its financial position, results of operations, cash flows and related disclosures.

In March 2016, the FASB issued ASU 2016-09, *Improvements to Employee Share-Based Payment Accounting*, which simplifies several aspects of the accounting for employee share-based payment transactions including the accounting for income taxes, forfeitures, and statutory tax withholding requirements, as well as classification of related amounts within the statement of cash flows. The new standard will become effective beginning with the first quarter of 2017, with early adoption permitted. Avalon is currently evaluating the impact the adoption of this guidance will have on its financial position, results of operations, cash flows and related disclosures.

The Company reviews new accounting standards as issued. The Company has considered all other recently issued accounting pronouncements and does not believe that adoption of such pronouncement will have a material impact on its financial statements.

Note 4. Acquisition

On August 1, 2014, Avalon, through a newly created subsidiary, The Avalon Resort and Spa LLC, completed the acquisition of The Magnuson Grand Hotel in Howland, Ohio for approximately \$3.1 million in cash and the assumption of certain operating leases and some rental payment relief. The acquisition was primarily funded from borrowings under our line of credit facility of \$2.9 million and cash on hand of approximately \$0.2 million. Subsequent to the acquisition, The Magnuson Grand Hotel was renamed and now operates as The Avalon Inn (formerly renamed The Avalon Resort and Spa in August 2014). The primary assets of The Avalon Inn include the hotel, indoor swimming pool and adjoining tennis center. The Avalon Inn is located adjacent to Avalon's corporate headquarters and the Avalon Lakes Golf Course.

The acquisition is consistent with the Company's business strategy in that The Avalon Inn provides guests with a self-contained vacation experience, offering hotel guests golf packages to all of the golf courses of the Avalon Golf and Country Club and allows its guests to utilize the facilities at each of the clubhouses. Members of the Avalon Golf and Country Club also have access to all of the amenities offered by The Avalon Inn. The Avalon Inn earns revenues through room rentals, food and beverage sales, merchandise sales, tennis and fitness activities. The operating results of The Avalon Inn have been included within the Company's Condensed Consolidated Statements of Operations and within Avalon's golf and related operations segment.

The Company accounted for the acquisition of The Avalon Inn using the acquisition method of accounting, which requires among other things, the recognition of the assets acquired and the liabilities assumed at their respective fair values as of the acquisition date. The total purchase price was allocated to the acquired property, buildings, furniture and fixtures and liabilities assumed based upon management's estimated fair values. During the measurement period in 2015, the Company reclassified approximately \$0.8 million of other intangible assets to property and equipment to reflect the finalized valuation of the acquired property, building, furniture and fixtures of The Avalon Inn.

In 2015 and during the six months ended June 30, 2016, The Avalon Inn was in operation and in the process of being renovated and expanded. The renovations and expansion include a complete renovation of the existing facility and indoor junior Olympic sized swimming pool, new restaurants, bars, extensive conference facilities and complete fitness center.

The following table summarizes the purchase price allocation of the estimated fair values of the assets acquired and liabilities assumed at the transaction date (in thousands):

Assets acquired:

Property and equipment \$3,388

Liabilities assumed:

Deferred rental income 266

Total consideration \$3,122

Note 5. Basic and Diluted Net Income (Loss) per Share

Basic net income (loss) per share attributable to Avalon Holdings Corporation common shareholders is computed by dividing the net income (loss) by the weighted average number of common shares outstanding, which were 3,803,331 for each period.

Diluted net income (loss) per share attributable to Avalon Holdings Corporation common shareholders is computed by dividing net income (loss) by the weighted average number of common shares outstanding plus any weighted common equivalent shares determined to be outstanding during the period using the treasury method. The weighted common equivalent shares included in the calculation are related to stock options granted by Avalon where the weighted average market price of Avalon's common stock for the period presented is greater than the option exercise price of the stock option.

For the three months ended June 30, 2016, the diluted weighted average number of shares outstanding was 3,811,391. For the three months ended June 30, 2015, the diluted per share amounts reported are equal to basic per share amounts because Avalon was in a net loss position and as a result, such dilution would be considered anti-dilutive. Assuming dilution, the weighted average number of common shares outstanding for the three months ended June 30, 2015 was 3,890,065.

For the six months ended June 30, 2016 and 2015, the diluted per share amounts reported are equal to basic per share amounts because Avalon was in a net loss position and as a result, such dilution would be considered anti-dilutive. Assuming dilution, the weighted average number of common shares outstanding for the six months ended June 30, 2016 and 2015 was 3,807,362 and 3,893,413, respectively.

Note 6. Credit Facility

On May 21, 2015, Avalon and certain wholly owned subsidiaries entered into a line of credit agreement (the “Agreement”) with The Home Savings and Loan Company of Youngstown, Ohio providing for a line of credit of up to \$9 million. On December 30, 2015, the Agreement was modified (the “Modification”) to extend the original maturity date of June 30, 2016 to March 31, 2017. The Modification also has the option to extend the maturity date one 90 day period upon written notice to the Lender at least 30 days before the maturity date subject to certain terms and conditions.

Borrowings under the line of credit agreement are secured by all business assets of the Company including accounts receivable, inventory, equipment and certain real property as defined in the Agreement. Interest on outstanding borrowings accrue at Prime Rate plus .25%. The line of credit agreement contains certain financial and other covenants, customary representations, warranties and events of defaults. Avalon was in compliance with the debt covenants at June 30, 2016.

Initial borrowings of \$5.0 million under the Agreement were utilized to repay the total amount outstanding under the previous line of credit agreement with Huntington National Bank. The line of credit agreement with Huntington National Bank was terminated in conjunction with the repayment. Borrowings under the line of credit agreement with Huntington National Bank were utilized to fund the acquisition and renovation of The Avalon Inn.

At June 30, 2016, the outstanding borrowings under the Agreement were \$9.0 million. As of June 30, 2016, the line of credit was fully utilized. During the three months ended June 30, 2016 and 2015, the weighted average interest rate on outstanding borrowings was 3.75% and 3.11%, respectively. During the six months ended June 30, 2016 and 2015, the weighted average interest rate on outstanding borrowings was 3.75% and 2.99%, respectively. At June 30, 2016, the interest rate was 3.75%. Total unamortized debt issuance costs incurred in connection with the Agreement were \$10,000 at June 30, 2016 and \$11,000 at December 31, 2015.

Amounts outstanding under the line of credit agreement with The Home Savings and Loan Company of Youngstown, Ohio are classified as a current liability in the Condensed Consolidated Balance Sheet at June 30, 2016 due to the Agreement expiring on March 31, 2017. The Company is currently discussing refinancing options with various financial institutions. The Company anticipates refinancing the Agreement before the expiration date. Although the Company is in discussions to refinance the line of credit, there can be no assurance that a refinancing would occur and the Company cannot guarantee success in doing so.

In accordance with FASB Accounting Standards Codification (“ASC”) 835-20, *Capitalization of Interest*, during the three and six month periods ended June 30, 2015, Avalon capitalized approximately \$44,000 and \$77,000,

respectively, of interest costs on borrowings incurred related to construction on The Avalon Inn. No amounts were capitalized during the three and six month periods ended June 30, 2016.

Note 7. Income Taxes

During the three month period ended June 30, 2016 net income attributable to Avalon Holdings Corporation shareholders was \$421,000 compared to a net loss attributable to Avalon Corporation shareholders of \$5,000 during the three month period ended June 30, 2015. During the six month periods ended June 30, 2016 and 2015, net loss attributable to Avalon Holdings Corporation shareholders was \$487,000 and \$1,045,000, respectively. Avalon recorded a state income tax provision in both the three and six month periods ended June 30, 2016 and 2015, which was related entirely to the waste management and brokerage operations. Excluding the effect of this state tax provision, Avalon's overall effective tax rate was 0% in both the three and six month periods ended June 30, 2016 and 2015. The overall effective tax rate is different than statutory rates primarily due to a change in the valuation allowance. Avalon's income tax on the income (loss) before taxes was offset by a change in the valuation allowance. A valuation allowance is provided when it is more likely than not that deferred tax assets relating to certain federal and state loss carryforwards will not be realized. Avalon continues to maintain a valuation allowance against the majority of its deferred tax amounts until it is evident that the deferred tax asset will be utilized in the future.

Note 8. Long-Term Incentive Plan

The purpose of the Avalon Holdings Corporation 2009 Long-term Incentive Plan (the “Plan”) is (a) to improve individual employee performance by providing long-term incentives and rewards to employees of Avalon, (b) to assist Avalon in attracting, retaining and motivating employees and non-employee directors with experience and ability, and (c) to associate the interests of such employees and directors with those of the Avalon shareholders. Under the Plan, 1,300,000 shares have been reserved for the issuance of stock options of which 760,000 options were outstanding at June 30, 2016. In January 2016, 90,000 options granted under the Plan were forfeited and in March 2016, 90,000 options were granted. The stock options, vest ratably over a five year period and have a contractual term of ten years from the date of grant. At the end of each contractual vesting period, the share price of the Avalon common stock, traded on a public stock exchange (NYSE Amex), must reach a predetermined price within three years following such contractual vesting period before the stock options are exercisable (See table below). If the Avalon common stock price does not reach the predetermined price, the stock options will either be cancelled or the period will be extended at the discretion of the Board of Directors.

The 90,000 options to purchase common stock that were granted in March 2016 have a weighted average grant date fair value of \$0.43 per option. The grant-date fair values of these stock option awards were estimated using the Monte Carlo Simulation. The Monte Carlo Simulation was selected to determine the fair value because it incorporates six minimum considerations; 1) the exercise price of the option, 2) the expected term of the option, taking into account both the contractual term of the option, the effects of employees’ expected exercise and post-vesting employment termination behavior, as well as the possibility of change in control events during the contractual term of the option agreements, 3) the current fair value of the underlying equity, 4) the expected volatility of the value of the underlying share for the expected term of the option, 5) the expected dividends on the underlying share for the expected term of the option and 6) the risk-free interest rate(s) for the expected term of the option.

The grant-date fair values of the stock option awards granted in March 2016 using the Monte Carlo Simulation model were determined with the assumptions set forth in the following table:

Exercise price	\$1.83
Expected volatility	52.40 %
Expected dividend yield	0.00 %
Risk-free rate over the estimated expected life	1.74 %
Expected term (in years)	7.25

The expected term, or time until the option is exercised, is typically based on historical exercising behavior of previous option holders of a company’s stock. Due to the fact that the Company has had no historical exercising activity, the simplified method was applied for each option block to adjust the holding period for which the optionee would hold the options to 6.2, 6.7, 7.2, 7.7 and 8.2 years, respectively for option blocks 1 through 5, respectively.

The grant date fair value of the underlying equity was determined to be equal to Avalon's publicly traded stock price as of the grant dates times the sum of the Class A and Class B common shares outstanding.

The expected volatility of 52.40% was based on the observed historical volatility of Avalon common stock for a 7.25 year period prior to the grant date. There were no expected dividends and the risk-free interest rate of 1.74% was based on yield data for U. S. Treasury securities over a period consistent with the expected term.

The following information is a summary of the stock option activity:

	Number of Options Granted	Weighted Average Exercise Price	Weighted Average Fair Value at Grant Date
Outstanding at January 1, 2016	760,000	2.63	1.09
Options granted	90,000	1.83	0.43
Options exercised	-	-	-
Options cancelled or forfeited	(90,000)	-	-
Outstanding at June 30, 2016	760,000	\$ 2.51	\$ 1.00
Options Vested	632,000		
Exercisable at June 30, 2016	268,000		

The stock options vest and become exercisable based upon achieving two critical metrics as follows:

- 1) Contract Vesting Term: The stock options vest ratably over a five year period.
- 2) The Avalon common stock price traded on a public stock exchange (NYSE Amex) must reach the predetermined vesting price within three years after the options become vested under the contractual vesting term.

The table below represents the period and predetermined stock price needed for vesting.

	Begins Vesting	Ends Vesting	Predetermined Vesting Price
Block 1	12 months after Grant Dates	48 months after Grant Dates	\$ 3.43
Block 2	24 months after Grant Dates	60 months after Grant Dates	\$ 4.69
Block 3	36 months after Grant Dates	72 months after Grant Dates	\$ 6.43
Block 4	48 months after Grant Dates	84 months after Grant Dates	\$ 8.81
Block 5	60 months after Grant Dates	96 months after Grant Dates	\$ 12.07

Compensation costs were approximately \$6,000 and \$13,000 for the three months ended June 30, 2016 and 2015, respectively, and \$16,000 and \$31,000 for the six months ended June 30, 2016 and 2015, respectively, based upon the estimated grant date fair value calculations. As of June 30, 2016, there was approximately \$54,000 of total unrecognized compensation costs related to non-vested share-based compensation arrangements granted under the

Plan. That cost is expected to be recognized over a weighted-average period of 2.82 years.

Note 9. Legal Matters

In the ordinary course of conducting its business, Avalon becomes involved in lawsuits, administrative proceedings and governmental investigations, including those related to environmental matters. Some of these proceedings may result in fines, penalties or judgments being assessed against Avalon which, from time to time, may have an impact on its business and financial condition. Although the outcome of such lawsuits or other proceedings cannot be predicted with certainty, Avalon does not believe that any uninsured ultimate liabilities, fines or penalties resulting from such pending proceedings, individually or in the aggregate, will have a material adverse effect on its liquidity, financial position or results of operations.

Note 10. Business Segment Information

Avalon's reportable segments include waste management services and golf and related operations. In determining the segment information, Avalon considered its operating and management structure and the types of information subject to regular review by its "chief operating decision maker." Using the criteria of ASC 280 *Segment Reporting*, Avalon's reportable segments include waste management services and golf and related operations. Avalon accounts for intersegment net operating revenues as if the transactions were to third parties. The segment disclosures are presented on this basis for all periods presented.

Avalon's primary business segment, the waste management services segment, provides hazardous and nonhazardous brokerage and management services to industrial, commercial, municipal and governmental customers, captive landfill management for an industrial customer, construction mats and salt water injection well operations.

The golf and related operations segment includes the operations of golf courses, country clubs and related facilities, a hotel and travel agency. Revenue for the golf and related operations segment consists primarily of membership dues, greens fees, cart rentals, room rentals, merchandise sales, tennis and fitness activities, spa services and food and beverage sales. Revenue related to annual membership dues are recognized proportionately over twelve months. The unrecognized or deferred revenues relating to membership dues at June 30, 2016 and December 31, 2015 were \$3.7 million and \$2.4 million, respectively.

Avalon does not have significant operations located outside the United States and, accordingly, geographical segment information is not presented.

For the six months ended June 30, 2016 and 2015, no one customer accounted for 10% of Avalon's consolidated or reportable segment net operating revenues.

The accounting policies of the segments are consistent with those described for the consolidated financial statements in the summary of significant accounting policies included in Avalon's 2015 Annual Report to Shareholders. Avalon measures segment profit for internal reporting purposes as income (loss) before taxes.

Business segment information including the reconciliation of segment income before taxes to income (loss) before taxes is as follows (in thousands):

	Three Months Ended June 30, 2016		Six Months Ended June 30, 2016	
	2015		2015	
Net operating revenues from:				
Waste management services:				
External customer revenues	\$10,756	\$9,772	\$19,032	\$18,142
Intersegment revenues	-	-	-	-
Total waste management services	10,756	9,772	19,032	18,142
Golf and related operations:				
External customer revenues	4,886	4,183	7,609	6,513

Edgar Filing: AVALON HOLDINGS CORP - Form 10-Q

Intersegment revenues	11	11	27	37
Total golf and related operations	4,897	4,194	7,636	6,550
Segment operating revenues	15,653	13,966	26,668	24,692
Intersegment eliminations	(11)	(11)	(27)	(37)
Total net operating revenues	\$15,642	\$13,955	\$26,641	\$24,655

	Three Months Ended June 30, 2016		Six Months Ended June 30, 2015	
	2016	2015	2016	2015
Income (loss) before income taxes:				
Waste management services	\$712	\$432	\$1,085	\$611
Golf and related operations	376	147	(140)	(454)
Segment income before income taxes	1,088	579	945	157
Corporate interest expense	(89)	(2)	(171)	(3)
Corporate other income, net	1	8	5	17
General corporate expenses	(633)	(705)	(1,403)	(1,503)
Income (loss) before income taxes	\$367	\$(120)	\$(624)	\$(1,332)

	June 30, 2016	December 31, 2015
Identifiable assets:		
Waste management services	\$23,049	\$22,575
Golf and related operations	45,570	43,390
Corporate	48,544	47,800
Subtotal	117,163	113,765
Elimination of intersegment receivables	(52,402)	(51,463)
Total	\$64,761	\$62,302

In comparing the total assets at June 30, 2016 with those at December 31, 2015, the increase in total assets of the waste management services segment of \$0.5 million is primarily due to an increase in accounts receivable and to a lesser extent an increase in intersegment transactions, which are eliminated in consolidation, partially offset by a lower net book value of property and equipment as a result of current year depreciation on the salt water injection wells. The increase in total assets of the golf and related operations segment of \$2.2 million is primarily due to capital expenditures related to the renovation and expansion of The Avalon Inn and an increase in accounts receivable partially offset by current year depreciation on property and equipment. The increase in corporate total assets is primarily due to an increase in intersegment transactions.

Note 11. Certain Relationships and Related Transactions

In August 2013, Avalon created a new Ohio limited liability company, AWMS Holdings, LLC, to act as a holding company to form and own a series of wholly owned subsidiaries that will own and operate Class II salt water injection wells and facilities (together the “facilities”). AWMS Holdings, LLC, offers investment opportunities to accredited investors by selling membership units of AWMS Holdings, LLC through private placement offerings. The monies received from these offerings, along with internally contributed capital, are used to construct the facilities necessary for the operation of salt water injection wells. AWMS Water Solutions, LLC (formerly American Water Management

Services, LLC), a wholly owned subsidiary of Avalon, manages all the salt water injection well operations, including the marketing and sales function and all decisions regarding the well operations for a percentage of the gross revenues.

In 2014 and 2013, Avalon, through a wholly owned subsidiary made capital contributions totaling approximately \$3.4 million, which included cash and certain well assets, including the permits, in exchange for membership units of AWMS Holdings, LLC. Through a private placement offering for the purchase of membership units, AWMS Holdings, LLC raised approximately \$3.8 million from accredited investors in 2014 and 2013. Management and outside directors of Avalon, who qualified as accredited investors, invested approximately \$1.0 million in AWMS Holdings, LLC.

As a result of a private placement offering, Avalon is not the majority owner of AWMS Holdings, LLC. At June 30, 2016 and December 31, 2015, respectively, Avalon owns approximately 47% of AWMS Holdings, LLC. In accordance with ASC 810-10, *Consolidations-Overall* (“ASC 810-10”) due to the managerial control of AWMS Water Solutions, LLC, AWMS Holdings, LLC is a variable interest entity, and the financial statements of AWMS Holdings, LLC and subsidiaries are included in Avalon’s condensed consolidated financial statements. ASC 810-10 requires noncontrolling interests to be reported as a separate component of equity. The amount of net loss attributable to the noncontrolling interest is recorded in “net loss attributable to noncontrolling interest” in our Condensed Consolidated Statements of Operations.

Note 12. Injection Wells Suspension

As a result of a seismic event with a magnitude of 2.1 occurring on August 31, 2014, the Chief of the Division of Oil and Gas Resources Management (“Chief” or “Division”) issued Orders on September 3, 2014, to immediately suspend all operations of both of Avalon’s saltwater injection wells. The Orders were based on the findings that the two saltwater injection wells were located in close proximity to the area of known seismic activity and also that the saltwater injection wells pose a risk of increasing or creating seismic activity. The two saltwater injection wells are located approximately 112 feet apart. Based on these findings, the Chief ordered the immediate suspension of all operations of the two saltwater injection wells, until the Division could further evaluate the wells.

On September 5, 2014, Avalon submitted the information required by the Chief’s Order in regards to its AWMS #1 injection well. The Division reviewed all the information submitted by Avalon and additional data. Based upon this review, the Division concluded that with reasonable scientific certainty, the injection operations of AWMS #1 were not related to the deep seismic event that occurred on August 31, 2014. As a result, the Order suspending all operations of AWMS #1 was terminated effective September 18, 2014. As such, Avalon resumed injection operations of AWMS #1 consistent with all terms and conditions of the permit issued on July 18, 2013.

On September 19, 2014, Avalon submitted the information and a written plan required by the Chief’s Order proposing the establishment of certain operations and management controls on injections at the AWMS #2 injection well. The plan called for injection to resume at AWMS #2 at lower levels and monitored for seismicity. Under the plan, Avalon would gradually increase injection volumes over time based upon data obtained through monitoring.

On October 2, 2014, Avalon filed an appeal with the Ohio Oil and Gas Commission disputing the basis for suspending operations of AWMS #2 and also the authority of the Chief to immediately suspend such operations. On November 19, 2014, Avalon filed a Motion to Stay the execution of the suspension order.

On March 11, 2015, an appeal hearing was held and post hearing briefs were filed. The Chief stated during the hearing that the suspension is only temporary, and that he expects that AWMS #2 will be allowed to inject once the state’s final policymaking is complete.

On August 12, 2015, the Oil and Gas Commission upheld the temporary suspension of injection operations of AWMS #2 stating that the temporary suspension will allow the Chief to more fully evaluate the facts in anticipation of the Division’s implementation of a comprehensive regulatory plan that will specifically address injection-induced seismicity. In October 2015, the Division informed the Company that they were currently drafting the hydraulic fracturing induced seismicity policy and will start the Class II injection well policy once complete. In conjunction with the August 12, 2015 decision, Avalon temporarily suspended operations of AWMS #1 and will resume

operations when a favorable ruling on AWMS #2 is received.

On September 8, 2015, Avalon filed an appeal with the Franklin County Court of Common Pleas. Avalon also filed a notice of appeal addressed to the Division. On October 16, 2015, the Division filed a motion to dismiss stating that although Avalon filed its notice of appeal with the Franklin County Court of Common Pleas, it did not file the notice of appeal with the Oil and Gas Commission as mandated by the Ohio Revised Code. On October 20, 2015, Avalon filed its notice of appeal with the Oil and Gas Commission. On December 18, 2015, the Franklin County Court of Common Pleas concluded that Avalon untimely filed its notice of appeal with the Oil and Gas Commission and thus did not comply with the Ohio Revised Code and that the Division's motion to dismiss was granted. On January 4, 2016, Avalon filed an appeal with the Franklin County, Ohio 10th District Court of Appeals regarding the motion to dismiss ruling on the September 8, 2015 appeal. On April 6, 2016, an appeal hearing was held and post hearing briefs were filed. During the hearing it was noted that Commission did not comply with the proper procedural requirements for providing Avalon with its motion to dismiss. On May 5, 2016, Avalon's assignment of error was rendered moot by the Franklin County, Ohio 10th District Court of Appeals and the judgment of the Franklin County Court of Common Pleas was reversed. Operations of Avalon's AWMS #2 injection well is still suspended under the Chief's order but Avalon will continue to appeal the suspension until a favorable ruling lifting the temporary suspension is received.

Avalon was not in violation of any law, Ohio Regulation governing its operations or any of the terms and conditions of its injection permit, as acknowledged by the Division. The observed seismic events the Division used to justify the suspension order were of such magnitudes that occur every day in the State of Ohio. There were no documented complaints from the public concerning the observed seismic events. Avalon does not believe that there is substantial risk that the operations of AWMS #2 present an imminent danger to public health, safety or damage to the environment. The argument is further evidenced by the publication “Potential Injection-Induced Seismicity Associated with Oil & Gas Development: The Primer on Technical and Regulatory Considerations Informing Risk Management and Mitigation” released in 2015 stating that seismic events below 3.0 (approximately 22 times stronger than the August 31, 2014 event) are generally not felt by humans. This report was developed by the StatesFirst Induced Seismicity by Injection Work Group (“ISWG”) members (the State agencies) with input from the ISWG technical advisors (subject matter experts from academia, industry, federal agencies, and environmental organizations) to help better inform the public on technical and regulatory considerations associated with evaluation and response, seismic monitoring systems, information sharing, and the use of ground motion metrics. In addition, the Company also contends that other Class II injection wells within the geographical area have produced seismic events with similar and/or higher magnitudes and have been allowed to continue operations.

At December 31, 2015, in accordance with FASB ASC 360-10-35, *Property, Plant and Equipment – Overall – Subsequent Measurement* (“ASC 360-10-35”), Avalon assessed the recoverability of the carrying values of the salt water injection wells based on the Chief of the Division of Oil and Gas Resources Management’s decision to temporarily suspend operations of the wells. Avalon estimated future cash flows directly associated with and which are expected to arise as a direct result of the wells once the temporary suspension is lifted. The assumptions used by management in developing the estimates of future cash flows were based on current market conditions and comparable prior periods while in operation. Based on the estimated undiscounted sum of the future cash flows, the net book value of the property, plant and equipment relating to the wells of approximately \$4.8 million at December 31, 2015 was recoverable in less than the estimated remaining useful life of those assets. There were no changes to this assessment at June 30, 2016.

Management continues to consider whether indicators of impairment are present and tests for recoverability, as necessary, in accordance with ASC 360-10-15. There can be no guarantee that the salt water injection wells will resume operations. If management concludes that the suspension is other than temporary and the carrying amount of the salt water injection wells are not recoverable, Avalon may record an impairment charge up to \$4.5 million, the carrying value of the salt water injection wells.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion provides information which management believes is relevant to an assessment and understanding of the operations and financial condition of Avalon Holdings Corporation and its subsidiaries. As used in this report, the term "Avalon" or the "Company" means Avalon Holdings Corporation, its wholly owned subsidiaries and variable interest entities when it has been determined that Avalon is the primary beneficiary of those company's operations, taken as a whole, unless the context indicates otherwise.

Statements included in Management's Discussion and Analysis of Financial Condition and Results of Operations which are not historical in nature are intended to be, and are hereby identified as, "forward looking statements". Avalon cautions readers that forward looking statements, including, without limitation, those relating to Avalon's future business prospects, revenues, working capital, liquidity, capital needs, interest costs, and income, are subject to certain risks and uncertainties that could cause actual results to differ materially from those indicated in the forward looking statements, due to risks and factors identified herein and from time to time in Avalon's reports filed with the Securities and Exchange Commission.

Liquidity and Capital Resources

For the six months ended June 30, 2016, Avalon utilized existing cash, cash provided by operations and borrowings under the line of credit facility to meet operating needs, fund capital expenditures and fund the renovation and expansion of The Avalon Inn as described below.

On August 1, 2014, Avalon, through a newly created subsidiary, The Avalon Resort and Spa LLC, completed the acquisition of The Magnuson Grand Hotel in Howland, Ohio for approximately \$3.1 million in cash and the assumption of certain operating leases and some rental payment relief. The acquisition was primarily funded from borrowings under our line of credit facility of \$2.9 million and cash on hand of approximately \$0.2 million. Subsequent to the acquisition, The Magnuson Grand Hotel was renamed and now operates as The Avalon Inn (formerly renamed The Avalon Resort and Spa in August 2014). The primary assets of The Avalon Inn include the hotel, indoor swimming pool and adjoining tennis center. The Avalon Inn is located adjacent to Avalon's corporate headquarters and the Avalon Lakes Golf Course.

The acquisition is consistent with the Company's business strategy in that The Avalon Inn provides guests with a self-contained vacation experience, offering hotel guests golf packages to all of the golf courses of the Avalon Golf and Country Club and allows its guests to utilize the facilities at each of the clubhouses. Members of the Avalon Golf and Country Club also have access to all of the amenities offered by The Avalon Inn. The Avalon Inn earns revenues

through room rentals, food and beverage sales, merchandise sales, tennis and fitness activities.

The Company accounted for the acquisition of The Avalon Inn using the acquisition method of accounting, which requires among other things, the recognition of the assets acquired and the liabilities assumed at their respective fair values as of the acquisition date. The total purchase price was allocated to the acquired property, buildings, furniture and fixtures and liabilities assumed based upon management's estimated fair values.

In 2015 and during the six months ended June 30, 2016, The Avalon Inn was in operation and in the process of being renovated and expanded. The renovations and expansion include a complete renovation of the existing facility and indoor junior Olympic sized swimming pool, new restaurants, bars, extensive conference facilities and complete fitness center.

In July 2016, the Company formed Avalon Clubs and Resorts, Inc. ("ACRI"), a wholly owned subsidiary of Avalon, the purpose of which is to hold the corporate activity of Avalon Clubs, Inc. and Avalon Resorts, Inc., both formed concurrently with ACRI. Avalon Clubs, Inc. was formed to hold the wholly owned subsidiaries of the Avalon Golf and Country Club, and Avalon Resorts, Inc. holds the operations of The Avalon Inn.

During the six months ended June 30, 2016, Avalon incurred capital expenditures of \$2.0 million and paid vendors \$1.9 million for such expenditures. During the six months ended June 30, 2015, Avalon incurred capital expenditures of \$5.6 million and paid vendors \$5.1 million for such expenditures. Such expenditures related principally to the renovation and expansion of The Avalon Inn. Avalon's aggregate capital expenditures in 2016 are expected to be in the range of \$2.5 million to \$3.0 million, which will principally relate to the continued renovation and expansion of The Avalon Inn, building improvements and equipment purchases.

On May 21, 2015, Avalon and certain wholly owned subsidiaries entered into a line of credit agreement (the "Agreement") with The Home Savings and Loan Company of Youngstown, Ohio providing for a line of credit of up to \$9 million. On December 30, 2015, the Agreement was modified (the "Modification") to extend the original maturity date of June 30, 2016 to March 31, 2017. The Modification also has the option to extend the maturity date one 90 day period upon written notice to the Lender at least 30 days before the maturity date subject to certain terms and conditions.

Borrowings under the line of credit agreement are secured by all business assets of the Company including accounts receivable, inventory, equipment and certain real property as defined in the Agreement. Interest on outstanding borrowings accrue at Prime Rate plus .25%. The line of credit agreement contains certain financial and other covenants, customary representations, warranties and events of defaults. Avalon was in compliance with the debt covenants at June 30, 2016.

Initial borrowings of \$5.0 million under the Agreement were utilized to repay the total amount outstanding under the previous line of credit agreement with Huntington National Bank. The line of credit agreement with Huntington National Bank was terminated in conjunction with the repayment. Borrowings under the line of credit agreement with Huntington National Bank were utilized to fund the acquisition and renovation of The Avalon Inn.

At June 30, 2016, the outstanding borrowings under the Agreement were \$9.0 million. As of June 30, 2016, the line of credit was fully utilized. During the three months ended June 30, 2016 and 2015, the weighted average interest rate on outstanding borrowings was 3.75% and 3.11%, respectively. During the six months ended June 30, 2016 and 2015, the weighted average interest rate on outstanding borrowings was 3.75% and 2.99%, respectively. At June 30, 2016, the interest rate was 3.75%.

Amounts outstanding under the line of credit agreement with The Home Savings and Loan Company of Youngstown, Ohio are classified as a current liability in the Condensed Consolidated Balance Sheet at June 30, 2016 due to the Agreement expiring on March 31, 2017. The Company is currently discussing refinancing options with various financial institutions. The Company anticipates refinancing the Agreement before the expiration date. Although the Company is in discussions to refinance the line of credit, there can be no assurance that a refinancing would occur and the Company cannot guarantee success in doing so.

In November 2003, Avalon entered into a long-term agreement with Squaw Creek Country Club to lease and operate its golf course and related facilities. The lease has an initial term of ten (10) years with four (4) consecutive ten (10) year renewal term options unilaterally exercisable by Avalon. Under the lease, Avalon is obligated to pay \$15,000 in annual rent and make leasehold improvements of \$150,000 per year. Amounts expended by Avalon for leasehold improvements during a given year in excess of \$150,000 will be carried forward and applied to future leasehold improvement obligations. Based upon the amount of leasehold improvements already made, Avalon expects to exercise all of its remaining renewal options.

Management believes that anticipated cash provided from future operating activities, will be, for the foreseeable future, sufficient to meet operating requirements. When business conditions warrant, Avalon will take actions such as incurring additional indebtedness, issuance of common stock or issuance of a security with characteristics of both debt and equity. In the event Avalon is unable to refinance its line of credit facility, the Company will take the actions noted above, including seeking alternative financing options, although the Company cannot guarantee success in doing so.

At June 30, 2016, there was a working capital deficit of approximately \$8.7 million compared to working capital of \$0.6 million at December 31, 2015. Working capital was negatively impacted by the current liability classification of the total amount outstanding under our line of credit facility of \$9.0 million and to a lesser extent an increase in accounts payable and deferred revenues relating to membership dues. This decrease in working capital was partially offset by a higher accounts receivable balance. During the six months ended June 30, 2016, additional borrowings under our line of credit facility and cash on hand were utilized to fund the renovation and expansion of The Avalon Inn. As previously described above, Avalon anticipates refinancing the line of credit facility before the expiration date.

Accounts receivable increased to \$11.3 million at June 30, 2016 compared with \$9.6 million at December 31, 2015. Accounts receivable increased primarily due to higher membership dues receivable between periods attributable to the increase in the average number of members during the period and an increase in operating revenues related to the golf and related operations segment. Net operating revenues of the golf and related operations segment were \$4.9 million in the second quarter of 2016 compared with \$3.4 million in the fourth quarter of 2015. Accounts receivable also increased due to increased sales related to the waste management services segment in the second quarter of 2016 when compared to the fourth quarter of 2015.

Accounts payable increased to \$8.5 million at June 30, 2016 compared with \$8.0 million at December 31, 2015 as a result of the increased net operating revenues of the golf and related operations segment in the second quarter of 2016 compared to the fourth quarter of 2015 and the associated amounts due to vendors during the golf season. Accounts payable also increased as a result of higher net operating revenues of the waste brokerage and management services business in the second quarter of 2016 compared with the fourth quarter of 2015 and the associated increase in amounts due to disposal facilities and transportation carriers and the timing of payments to vendors in the ordinary course of business.

The increase in deferred revenues at June 30, 2016 compared with December 31, 2015 is a result of an increase in the average number of members of the Avalon Golf and Country Club. Revenues related to annual membership dues are recognized proportionately over twelve months based upon the anniversary date of each membership. The average number of members during the first six months of 2016 was 4,511 compared with 3,876 in the same period in the prior year. Deferred revenues related to membership dues increased to \$3.7 million at June 30, 2016 compared with \$2.4 million at December 31, 2015.

Growth Strategy

Waste Management Segment

Our growth strategy for the waste management services segment focuses on increasing revenue, gaining market share and enhancing shareholder value through internal growth. Although we are a waste management services company, we do not own any landfills or provide waste collection services. However, because of our many relationships with various disposal facilities and transporters, we are able to be more flexible and provide alternative solutions to a customer's waste disposal or recycling needs. We intend to capitalize on our management and sales staff which has extensive experience in all aspects of the waste business. As such, we intend to manage our internal growth as follows:

- ***Sales and Marketing Activities.*** We will focus on retaining existing customers and obtaining new business through our well-managed sales and marketing activities. We seek to manage our sales and marketing activities to enable us to capitalize on our position in many of the markets in which we operate. We provide a tailored program to all of our customers in response to their particular needs. We accomplish this by centralizing services to effectively manage their needs, such as minimizing their procurement costs.

We currently have a number of professional sales and marketing employees in the field who are compensated using a commission structure that is focused on generating high levels of quality revenue. For the most part, these employees directly solicit business from existing and prospective customers. We emphasize our rate and cost structures when we

train new and existing sales personnel. We intend to hire additional qualified professional sales personnel to expand into different geographical areas.

- ***Development Activities.*** We will seek to identify opportunities to further position us as an integrated service provider in markets where we provide services. In addition, we will continue to utilize the extensive experience of our management and sales staff to bid on significant one-time projects and those that require special expertise. Where appropriate, we may seek to obtain permits that would provide vertically integrated waste services or expand the service offerings or leverage our existing volumes with current vendors to provide for long term, cost competitive strategic positioning within our existing markets.

Golf and Related Operations Segment

On August 1, 2014, the Company acquired The Avalon Inn which was subsequently integrated into the golf and related operations segment. The acquisition is consistent with the Company's business strategy in that The Avalon Inn provides guests with a self-contained vacation experience, offering hotel guests golf packages to all of the golf courses of the Avalon Golf and Country Club and allows its guests to utilize the facilities at each of the clubhouses. Members of the Avalon Golf and Country Club also have access to all of the amenities offered by The Avalon Inn. The Avalon Inn earns revenues through room rentals, food and beverage sales, merchandise sales, tennis and fitness activities. The Avalon Inn is open year-round and provides a consistent, comfortable environment where our guests can enjoy our various amenities and activities. Avalon believes that the combination of its three golf facilities and the addition of The Avalon Inn will result in additional memberships in the Avalon Golf and Country Club.

In addition, several private country clubs in the northeast Ohio area are experiencing economic difficulties. Avalon believes some of these clubs may represent an attractive investment opportunity. While Avalon has not entered into any pending agreements for acquisitions, it may do so at any time and will continue to consider acquisitions that make economic sense.

Results of Operations

Avalon's primary business segment, the waste management services segment, provides hazardous and nonhazardous waste brokerage and management services, captive landfill management services and salt water injection well operations. The golf and related operations segment includes the operation of golf courses, country clubs and related facilities, a hotel and travel agency.

Performance in the second quarter of 2016 compared with the second quarter of 2015

Overall Performance

Net operating revenues increased to \$15.6 million in the second quarter of 2016 compared with \$14.0 million in the second quarter of 2015. This increase was due to an increase of approximately \$0.9 million, or a 10% increase, in net operating revenues of the waste management services segment and an increase of \$0.7 million, or a 17% increase, in net operating revenues of the golf and related operations segment when compared to the same period in the prior year. Costs of operations increased to \$12.7 million in the second quarter of 2016 compared with \$11.7 million in the second quarter of 2015. The increase in the cost of operations between periods is due to the increased net operating revenues between periods as these costs vary directly with the associated net operating revenues. Depreciation and amortization expense was approximately \$0.7 million in the second quarter of 2016 compared to \$0.6 million in the second quarter of 2015. The increase is primarily the result of depreciation expense associated with The Avalon Inn. Consolidated selling, general and administrative expenses were \$1.9 million in both the second quarter of 2016 and 2015. Net income attributable to Avalon Holdings Corporation common shareholders was \$421,000, or \$0.11 per share in the second quarter of 2016 compared with a net loss attributable to Avalon Holdings Corporation common shareholders of \$5,000, or \$0.00 per share in the second quarter of 2015.

Segment Performance

Segment performance should be read in conjunction with Note 10 to the Condensed Consolidated Financial Statements.

Waste Management Services Segment

The net operating revenues of the waste management services segment increased approximately 10% to \$10.7 million in the second quarter of 2016 compared with \$9.8 million in the second quarter of 2015. The waste management services segment includes waste disposal brokerage and management services, captive landfill management operations and salt water injection well operations.

The net operating revenues of the waste brokerage and management services business increased to \$10.2 million in the second quarter of 2016 from \$9.1 million in the second quarter of 2015. This increase was due to an increase of \$2.3 million, or a 78% increase, in net operating revenues relating to event work. Event work is defined as bid projects under contract that occurs on a one-time basis over a short period of time. Such work can fluctuate significantly from year to year. Net operating revenues related to event work were \$5.3 million in the second quarter of 2016 compared with \$3.0 million in the second quarter of 2015. Net operating revenues relating to continuous work of the waste disposal brokerage business decreased \$0.7 million, or a 14% decrease between periods. Net operating revenues related to continuous work were \$4.4 million in the second quarter of 2016 compared to \$5.1 million in the second quarter of 2015. Net operating revenues relating to managerial, consulting and clerical services decreased to \$0.5 million in the second quarter of 2016 compared to \$1.0 million in the second quarter of 2015. Net operating revenue relating to managerial, consulting and clerical services, which is performed for one customer, is entirely dependent on that customer's needs.

The net operating revenues of the captive landfill management operations decreased to approximately \$0.5 million in the second quarter of 2016 from \$0.6 million in the second quarter of 2015. The net operating revenues of the captive landfill operations are almost entirely dependent upon the volume of waste generated by the owner of the landfill for whom Avalon manages the facility.

Due to the temporary suspension of the salt water injections wells there were no operating revenues during the second quarter of 2016. The net operating revenues of the salt water injection wells were approximately \$0.1 million in the second quarter of 2015. As a result of a seismic event with a magnitude of 2.1 occurring on August 31, 2014, the Chief of the Division of Oil and Gas Resources Management ("Chief" or "Division") issued Orders on September 3, 2014, to immediately suspend all operations of both of Avalon's saltwater injection wells. The Orders were based on the findings that the two saltwater injection wells were located in close proximity to the area of known seismic activity and also that the saltwater injection wells pose a risk of increasing or creating seismic activity. The two saltwater injection wells are located approximately 112 feet apart. Based on these findings, the Chief ordered the immediate suspension of all operations of the two saltwater injection wells, until the Division could further evaluate the wells.

On September 5, 2014, Avalon submitted the information required by the Chief's Order in regards to its AWMS #1 injection well. The Division reviewed all the information submitted by Avalon and additional data. Based upon this review, the Division concluded that with reasonable scientific certainty, the injection operations of AWMS #1 were not related to the deep seismic event that occurred on August 31, 2014. As a result, the Order suspending all operations of AWMS #1 was terminated effective September 18, 2014. As such, Avalon resumed injection operations of AWMS #1 consistent with all terms and conditions of the permit issued on July 18, 2013.

On September 19, 2014, Avalon submitted the information and a written plan required by the Chief's Order proposing the establishment of certain operations and management controls on injections at the AWMS #2 injection well. The plan called for injection to resume at AWMS #2 at lower levels and monitored for seismicity. Under the plan, Avalon would gradually increase injection volumes over time based upon data obtained through monitoring.

On October 2, 2014, Avalon filed an appeal with the Ohio Oil and Gas Commission disputing the basis for suspending operations of AWMS #2 and also the authority of the Chief to immediately suspend such operations. On November 19, 2014, Avalon filed a Motion to Stay the execution of the suspension order.

On March 11, 2015, an appeal hearing was held and post hearing briefs were filed. The Chief stated during the hearing that the suspension is only temporary, and that he expects that AWMS #2 will be allowed to inject once the state's final policymaking is complete.

On August 12, 2015, the Oil and Gas Commission upheld the temporary suspension of injection operations of AWMS #2 stating that the temporary suspension will allow the Chief to more fully evaluate the facts in anticipation of the Division's implementation of a comprehensive regulatory plan that will specifically address injection-induced seismicity. In October 2015, the Division informed the Company that they were currently drafting the hydraulic fracturing induced seismicity policy and will start the Class II injection well policy once complete. In conjunction with the August 12, 2015 decision, Avalon temporarily suspended operations of AWMS #1 and will resume operations when a favorable ruling on AWMS #2 is received.

On September 8, 2015, Avalon filed an appeal with the Franklin County Court of Common Pleas. Avalon also filed a notice of appeal addressed to the Division. On October 16, 2015, the Division filed a motion to dismiss stating that although Avalon filed its notice of appeal with the Franklin County Court of Common Pleas, it did not file the notice of appeal with the Oil and Gas Commission as mandated by the Ohio Revised Code. On October 20, 2015, Avalon filed its notice of appeal with the Oil and Gas Commission. On December 18, 2015, the Franklin County Court of Common Pleas concluded that Avalon untimely filed its notice of appeal with the Oil and Gas Commission and thus did not comply with the Ohio Revised Code and that the Division's motion to dismiss was granted. On January 4, 2016, Avalon filed an appeal with the Franklin County, Ohio 10th District Court of Appeals regarding the motion to dismiss ruling on the September 8, 2015 appeal. On April 6, 2016, an appeal hearing was held and post hearing briefs were filed. During the hearing it was noted that Commission did not comply with the proper procedural requirements

for providing Avalon with its motion to dismiss. On May 5, 2016, Avalon's assignment of error was rendered moot by the Franklin County, Ohio 10th District Court of Appeals and the judgment of the Franklin County Court of Common Pleas was reversed. Operations of Avalon's AWMS #2 injection well is still suspended under the Chief's order but Avalon will continue to appeal the suspension until a favorable ruling lifting the temporary suspension is received.

Avalon was not in violation of any law, Ohio Regulation governing its operations or any of the terms and conditions of its injection permit, as acknowledged by the Division. The observed seismic events the Division used to justify the suspension order were of such magnitudes that occur every day in the State of Ohio. There were no documented complaints from the public concerning the observed seismic events. Avalon does not believe that there is substantial risk that the operations of AWMS #2 present an imminent danger to public health, safety or damage to the environment. The argument is further evidenced by the publication "Potential Injection-Induced Seismicity Associated with Oil & Gas Development: The Primer on Technical and Regulatory Considerations Informing Risk Management and Mitigation" released in 2015 stating that seismic events below 3.0 (approximately 22 times stronger than the August 31, 2014 event) are generally not felt by humans. This report was developed by the StatesFirst Induced Seismicity by Injection Work Group ("ISWG") members (the State agencies) with input from the ISWG technical advisors (subject matter experts from academia, industry, federal agencies, and environmental organizations) to help better inform the public on technical and regulatory considerations associated with evaluation and response, seismic monitoring systems, information sharing, and the use of ground motion metrics. In addition, the Company also contends that other Class II injection wells within the geographical area have produced seismic events with similar and/or higher magnitudes and have been allowed to continue operations.

Income before income taxes for the waste management services segment increased to approximately \$0.7 million in the second quarter of 2016 compared with \$0.4 million in the second quarter of 2015. Income before income taxes of the waste brokerage and management services business was approximately \$0.8 million in the second quarter of 2016 compared to \$0.6 million in the second quarter of 2015. The increase was primarily attributable to the increased sales between periods. The overall gross margins of the waste brokerage and management services business were approximately 17% during the second quarter of 2016 and 2015. Income before income taxes of the captive landfill operations was approximately \$0.1 million in both the second quarter of 2016 and 2015. During the second quarter of 2016, the salt water injection wells incurred a loss before income taxes of approximately \$0.2 million due to depreciation expense recorded on the facility and legal costs incurred relating to Avalon's appeal process. During the second quarter of 2015, the salt water injection wells incurred a loss before income taxes of \$0.3 million due to the limited amount of water accepted for disposal as a result of a seismic event described above, depreciation expense recorded on the facility and legal costs incurred relating to Avalon's appeal.

Golf and Related Operations Segment

Net operating revenues of the golf and related operations segment increased approximately 17% to \$4.9 million in the second quarter of 2016 compared with \$4.2 million in the second quarter of 2015. Avalon's golf and related operations segment consists primarily of golf courses and associated clubhouses which provide dining and banquet facilities, a hotel which provides lodging, dining, banquet and conference facilities and a travel agency.

Net operating revenues increased primarily as a result of \$1.1 million of net operating revenues related to The Avalon Inn during the second quarter of 2016 compared with \$0.5 million during the second quarter of 2015. The increased net operating revenue related to The Avalon Inn was due to increased room rental revenue and food and beverage sales.

The average number of members during the second quarter of 2016 was 4,648 compared with 3,923 in the same period in the prior year. Although the net operating revenues from membership dues was \$1.1 million during the three month periods ended June 30, 2016 and 2015, the average net operating revenues per member from membership dues decreased due to a change in the mix between social and golf members and from promotional membership programs. Social membership annual dues are lower than the rates charged for the golf membership packages offered by Avalon.

Income before income taxes for the golf and related operations segment increased to \$0.4 million in the second quarter of 2016 compared with \$0.1 million in the second quarter of 2015. The change between periods was primarily due to lower employee related costs and increased food and beverage margins relating to the golf courses and associated clubhouses and higher occupancy and associated room rates attributable to The Avalon Inn. This improvement was partially offset by increased employee related costs and depreciation expense attributable to The Avalon Inn when compared to the prior period.

General Corporate Expenses

General corporate expenses were \$0.6 million in the second quarter of 2016 compared to \$0.7 million in the second quarter of 2015. The decrease is primarily the result of lower employee related costs.

Net Income (Loss)

Net income attributable to Avalon Holdings Corporation common shareholders was \$421,000 in the second quarter of 2016 compared with a net loss attributable to Avalon Holdings Corporation common shareholders of \$5,000 in the second quarter of 2015. Avalon recorded a state income tax provision in both the second quarter of 2016 and 2015, which was related entirely to the waste management and brokerage operations. Excluding the effect of this state tax provision and some minor tax credits, Avalon's overall effective tax rate was 0% for both the second quarter of 2016 and 2015. The overall effective tax rate is different than statutory rates primarily due to a change in the valuation allowance. Avalon's income tax on the income (loss) before taxes was offset by a change in the valuation allowance. A valuation allowance is provided when it is more likely than not that deferred tax assets relating to certain federal and state loss carryforwards will not be realized. Avalon continues to maintain a valuation allowance against the majority of its deferred tax amounts until it is evident that the deferred tax asset will be utilized in the future.

Performance in the first six months of 2016 compared with the first six months of 2015

Overall Performance

Net operating revenues increased 8% to \$26.6 million for the first six months of 2016 compared with \$24.7 million for the first six months of 2015. This increase was due to an increase of \$0.9 million, or a 5% increase, in net operating revenues of the waste management services segment and an increase of \$1.1 million, or a 17% increase, in net operating revenues of the golf and related operations segment when compared to the same period in the prior year. Costs of operations increased to \$22.1 million for the first six months of 2016 compared with \$21.0 million for the first six months of 2015. The increase in the cost of operations between periods is due to the increased net operating revenues between periods as these costs vary directly with the associated net operating revenues. Depreciation and amortization expense was approximately \$1.4 million for the first six months of 2016 compared to \$1.2 million for the first six months of 2015. The increase is primarily the result of depreciation expense associated with The Avalon Inn. Consolidated selling, general and administrative expenses were \$3.8 million for the first six months of 2016 compared to \$3.9 million for the first six months of 2015. Net loss attributable to Avalon Holdings Corporation common shareholders was \$0.5 million, or \$0.13 per share for the first six months of 2016 compared with a net loss attributable to Avalon Holdings Corporation common shareholders of \$1.0 million, or \$0.27 per share for the first six months of 2015.

Segment Performance

Segment performance should be read in conjunction with Note 10 to the Condensed Consolidated Financial Statements.

Waste Management Services Segment

The net operating revenues of the waste management services segment increased approximately 5% to \$19.0 million in the first six months of 2016 compared with \$18.1 million in the first six months of 2015.

The net operating revenues of the waste brokerage and management services business increased to \$17.9 million in the first six months of 2016 from \$16.9 million in the first six months of 2015. This increase was due to a 27% increase in net operating revenues relating to event work and to a lesser extent an increase of 1% in net operating revenues relating to continuous work. Event work is defined as bid projects under contract that occurs on a one-time basis over a short period of time. Such work can fluctuate significantly from year to year. Net operating revenues

related to event work were \$7.8 million during the first six months of 2016 compared with \$6.2 million during the first six months of 2015. Net operating revenues related to continuous work increased to \$9.1 million during the first six months of 2016 compared to \$9.0 million during the first six months of 2015. These increases were partially offset by a decrease in net operating revenues related to managerial, consulting and clerical services during the first six months of 2016 compared to the same period in the prior year. Net operating revenues relating to managerial, consulting and clerical services decreased to \$1.0 million during the first six months of 2016 compared to \$1.7 million during the first six months of 2015. Net operating revenue relating to managerial, consulting and clerical services, which is performed for one customer, is entirely dependent on that customer's needs.

The net operating revenues of the captive landfill management operations were approximately \$1.1 million during the first six months of 2016 and 2015. The net operating revenues of the captive landfill operations are almost entirely dependent upon the volume of waste generated by the owner of the landfill for whom Avalon manages the facility.

Due to the temporary suspension of the salt water injections wells described above, there were no operating revenues during the first six months of 2016. The net operating revenues of the salt water injection wells were approximately \$0.2 million during the first six months of 2015.

Income before income taxes for the waste management services segment increased to approximately \$1.1 million during the first six months of 2016 compared with \$0.6 million during the first six months of 2015. Income before income taxes of the waste brokerage and management services business was approximately \$1.2 million during the first six months of 2016 compared to \$1.0 million during the first six months of 2015. The increase was primarily attributable to the increased sales between periods. The overall gross margins of the waste brokerage and management services business increased from 18% during the first six months of 2016 compared to 17% during the first six months of 2015. Income before income taxes of the captive landfill operations was approximately \$0.2 million for the first six months of 2016 and 2015. During the first six months of 2016, the salt water injection wells incurred a loss before income taxes of \$0.3 million due to depreciation expense recorded on the facility and legal costs incurred relating to Avalon's appeal process. During the first six months of 2015, the salt water injection wells incurred a loss before income taxes of \$0.6 million due to the limited amount of water accepted for disposal as a result of a seismic event described above, depreciation expense recorded on the facility and legal costs incurred relating to Avalon's appeal.

Golf and Related Operations Segment

Net operating revenues of the golf and related operations segment increased approximately 17% to \$7.6 million during the first six months of 2016 compared with \$6.5 million during the first six months of 2015. Net operating revenues increased primarily as a result of \$1.8 million of net operating revenues related to The Avalon Inn during the first six months of 2016 compared with \$0.7 million during the first six months of 2015 and to a lesser extent an increase in membership dues revenue between periods. The increased net operating revenue related to The Avalon Inn was due to increased room rental revenue and food and beverage sales.

Due to adverse weather conditions, net operating revenues relating to the golf courses, which are located in northeast Ohio and western Pennsylvania, were minimal during the first three months of 2016 and 2015. The average number of members during the first six months of 2016 was 4,511 compared with 3,876 in the same period in the prior year. Although the net operating revenues from membership dues increased \$0.2 million to \$2.3 million in the first six months of 2016 compared to \$2.1 million in the first six months of 2015, the average net operating revenues per member from membership dues decreased due to a change in the mix between social and golf members and from promotional membership programs. Social membership annual dues are lower than the rates charged for the golf membership packages offered by Avalon.

The golf and related operations segment incurred a loss before income taxes of \$0.1 million during the first six months of 2016 compared with a loss before income taxes of \$0.5 million in the first six months of 2015. The change between periods was primarily due to lower employee related costs and increased food and beverage margins relating to the golf courses and associated clubhouses and higher occupancy and associated room rates attributable to The Avalon Inn. This improvement was partially offset by increased employee related costs and depreciation expense attributable to The Avalon Inn when compared to the prior period.

The ability to attract new members and retain members is very important to the success of the golf and related operations segment. Avalon is continually using different marketing strategies to attract and retain members, such as local television advertising and/or various membership promotions. A significant decline in members could adversely impact the financial results of the golf and related operations segment.

General Corporate Expenses

General corporate expenses were \$1.4 million in the first six months of 2016 compared to \$1.5 million in first six months of 2015. The decrease is primarily the result of lower employee related costs.

Net Loss

Net loss attributable to Avalon Holdings Corporation common shareholders was \$0.5 million in the first six months of 2016 compared with a net loss attributable to Avalon Holdings Corporation common shareholders of \$1.0 million in the first six months of 2015. Avalon recorded a state income tax provision in both the first six months of 2016 and 2015, which was related entirely to the waste management and brokerage operations. Excluding the effect of this state tax provision and some minor tax credits, Avalon's overall effective tax rate was 0% for both the first six months of 2016 and 2015. The overall effective tax rate is different than statutory rates primarily due to a change in the valuation allowance. As such, Avalon's income tax benefit in the first six months of 2016 and 2015 were offset by a change in the valuation allowance. A valuation allowance has been provided when it is more likely than not that the deferred tax assets relating to certain federal and state loss carryforwards will not be realized. Avalon continues to maintain a valuation allowance against the majority of its deferred tax amounts until it is evident that the deferred tax asset will be utilized in the future.

Trends and Uncertainties

In the ordinary course of conducting its business, Avalon becomes involved in lawsuits, administrative proceedings and governmental investigations, including those relating to environmental matters. Some of these proceedings may result in fines, penalties or judgments being assessed against Avalon which, from time to time, may have an impact on its business and financial condition. Although the outcome of such lawsuits or other proceedings cannot be predicted with certainty, management assesses the probability of loss and accrues a liability as appropriate. Avalon does not believe that any uninsured ultimate liabilities, fines or penalties resulting from such pending proceedings, individually or in the aggregate, will have a material adverse effect on its liquidity, financial position or results of operations.

The federal government and numerous state and local governmental bodies are continuing to consider legislation or regulations to either restrict or impede the disposal and/or transportation of waste. A portion of Avalon's waste brokerage and management services revenues is derived from the disposal and/or transportation of out-of-state waste. Any law or regulation restricting or impeding the transportation of waste or the acceptance of out-of-state waste for disposal could have a negative effect on Avalon.

Avalon's waste brokerage and management services business obtains and retains customers by providing services and identifying cost-efficient disposal options unique to a customer's needs. Consolidation within the solid waste industry has resulted in reducing the number of disposal options available to waste generators and may cause disposal pricing to increase. Avalon's waste brokerage and management services business may not be able to pass these price increases onto some of its customers, which, in turn, may adversely impact Avalon's future financial performance.

A significant portion of Avalon's business is generated from waste brokerage and management services provided to customers that are not subject to long-term contracts. In light of current economic, regulatory and competitive conditions, there can be no assurance that Avalon's current customers will continue to transact business with Avalon at historical levels. Failure by Avalon to retain its current customers or to replace lost business could adversely impact the future financial performance of Avalon.

Avalon's captive landfill management business is dependent upon a single customer as its sole source of revenue. If the captive landfill management business is unable to retain this customer, Avalon's future financial performance could be adversely impacted.

Saltwater disposal wells are regulated by the Ohio Department of Natural Resources ("ODNR"), with portions of the disposal facilities regulated by the Ohio EPA. As exploitation of the Marcellus and Utica shale formations by the hydrofracturing process develops, regulatory and public awareness of the environmental risks of saltwater brine and its disposal in saltwater disposal wells is growing and consequently, it is expected that regulation governing the construction and operation of saltwater disposal wells will increase in scope and complexity. Increased regulation may result in increased construction and/or operating costs, which could adversely affect the financial results of Avalon.

There is a continuing risk during the saltwater disposal well's operation of an environmental event causing contamination to the water tables in the surrounding area, or seismic events. The occurrence of a spill or contamination at a disposal well site could result in remedial expenses and/or result in the operations at the well site being suspended and/or terminated by the Ohio EPA or the ODNR. Incurring remedial expenses and/or a suspension or termination of Avalon's right to operate one or more saltwater disposal wells at the well site could have an adverse effect on Avalon's financial results.

As a result of a seismic event with a magnitude of 2.1 occurring on August 31, 2014, the Chief of the Division of Oil and Gas Resources Management (“Chief” or “Division”) issued Orders on September 3, 2014, to immediately suspend all operations of both of Avalon’s saltwater injection wells. The Orders were based on the findings that the two saltwater injection wells were located in close proximity to the area of known seismic activity and also that the saltwater injection wells pose a risk of increasing or creating seismic activity. The two saltwater injection wells are located approximately 112 feet apart. Based on these findings, the Chief ordered the immediate suspension of all operations of the two saltwater injection wells, until the Division could further evaluate the wells.

On September 5, 2014, Avalon submitted the information required by the Chief’s Order in regards to its AWMS #1 injection well. The Division reviewed all the information submitted by Avalon and additional data. Based upon this review, the Division concluded that with reasonable scientific certainty, the injection operations of AWMS #1 were not related to the deep seismic event that occurred on August 31, 2014. As a result, the Order suspending all operations of AWMS #1 was terminated effective September 18, 2014. As such, Avalon resumed injection operations of AWMS #1 consistent with all terms and conditions of the permit issued on July 18, 2013.

On September 19, 2014, Avalon submitted the information and a written plan required by the Chief’s Order proposing the establishment of certain operations and management controls on injections at the AWMS #2 injection well. The plan called for injection to resume at AWMS #2 at lower levels and monitored for seismicity. Under the plan, Avalon would gradually increase injection volumes over time based upon data obtained through monitoring.

On October 2, 2014, Avalon filed an appeal with the Ohio Oil and Gas Commission disputing the basis for suspending operations of AWMS #2 and also the authority of the Chief to immediately suspend such operations. On November 19, 2014, Avalon filed a Motion to Stay the execution of the suspension order.

On March 11, 2015, an appeal hearing was held and post hearing briefs were filed. The Chief stated during the hearing that the suspension is only temporary, and that he expects that AWMS #2 will be allowed to inject once the state's final policymaking is complete.

On August 12, 2015, the Oil and Gas Commission upheld the temporary suspension of injection operations of AWMS #2 stating that the temporary suspension will allow the Chief to more fully evaluate the facts in anticipation of the Division's implementation of a comprehensive regulatory plan that will specifically address injection-induced seismicity. In October 2015, the Division informed the Company that they were currently drafting the hydraulic fracturing induced seismicity policy and will start the Class II injection well policy once complete. In conjunction with the August 12, 2015 decision, Avalon temporarily suspended operations of AWMS #1 and will resume operations when a favorable ruling on AWMS #2 is received.

On September 8, 2015, Avalon filed an appeal with the Franklin County Court of Common Pleas. Avalon also filed a notice of appeal addressed to the Division. On October 16, 2015, the Division filed a motion to dismiss stating that although Avalon filed its notice of appeal with the Franklin County Court of Common Pleas, it did not file the notice of appeal with the Oil and Gas Commission as mandated by the Ohio Revised Code. On October 20, 2015, Avalon filed its notice of appeal with the Oil and Gas Commission. On December 18, 2015, the Franklin County Court of Common Pleas concluded that Avalon untimely filed its notice of appeal with the Oil and Gas Commission and thus did not comply with the Ohio Revised Code and that the Division's motion to dismiss was granted. On January 4, 2016, Avalon filed an appeal with the Franklin County, Ohio 10th District Court of Appeals regarding the motion to dismiss ruling on the September 8, 2015 appeal. On April 6, 2016, an appeal hearing was held and post hearing briefs were filed. During the hearing it was noted that Commission did not comply with the proper procedural requirements for providing Avalon with its motion to dismiss. On May 5, 2016, Avalon's assignment of error was rendered moot by the Franklin County, Ohio 10th District Court of Appeals and the judgment of the Franklin County Court of Common Pleas was reversed. Operations of Avalon's AWMS #2 injection well is still suspended under the Chief's order but Avalon will continue to appeal the suspension until a favorable ruling lifting the temporary suspension is received.

Avalon was not in violation of any law, Ohio Regulation governing its operations or any of the terms and conditions of its injection permit, as acknowledged by the Division. The observed seismic events the Division used to justify the suspension order were of such magnitudes that occur every day in the State of Ohio. There were no documented complaints from the public concerning the observed seismic events. Avalon does not believe that there is substantial risk that the operations of AWMS #2 present an imminent danger to public health, safety or damage to the environment. The argument is further evidenced by the publication "Potential Injection-Induced Seismicity Associated with Oil & Gas Development: The Primer on Technical and Regulatory Considerations Informing Risk Management and Mitigation" released in 2015 stating that seismic events below 3.0 (approximately 22 times stronger than the August 31, 2014 event) are generally not felt by humans. This report was developed by the StatesFirst Induced Seismicity by Injection Work Group ("ISWG") members (the State agencies) with input from the ISWG technical advisors (subject matter experts from academia, industry, federal agencies, and environmental organizations) to help better inform the public on technical and regulatory considerations associated with evaluation and response, seismic monitoring systems, information sharing, and the use of ground motion metrics. In addition, the Company also contends that other Class II injection wells within the geographical area have produced seismic events with similar and/or higher magnitudes and have been allowed to continue operations.

At December 31, 2015, in accordance with the Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“ASC”) 360-10-35, *Property, Plant and Equipment – Overall – Subsequent Measurement* (“ASC 360-10-35”), Avalon assessed the recoverability of the carrying values of the salt water injection wells based on the Chief of the Division of Oil and Gas Resources Management’s decision to temporarily suspend operations of the wells. Avalon estimated future cash flows directly associated with and which are expected to arise as a direct result of the wells once the temporary suspension is lifted. The assumptions used by management in developing the estimates of future cash flows were based on current market conditions and comparable prior periods while in operation. Based on the estimated undiscounted sum of the future cash flows, the net book value of the property, plant and equipment relating to the wells of approximately \$4.8 million at December 31, 2015 was recoverable in less than the estimated remaining useful life of those assets. There were no changes to this assessment at June 30, 2016.

Management continues to consider whether indicators of impairment are present and tests for recoverability, as necessary, in accordance with ASC 360-10-15. There can be no guarantee that the salt water injection wells will resume operations. If management concludes that the suspension is other than temporary and the carrying amount of the salt water injection wells are not recoverable, Avalon may record an impairment charge up to \$4.5 million, the carrying value of the salt water injection wells.

Economic challenges throughout the industries served by Avalon may result in payment defaults by customers. While Avalon continuously endeavors to limit customer credit risks, customer-specific financial downturns are not controllable by management. Significant customer payment defaults would have a material adverse impact upon Avalon's future financial performance.

The Avalon Golf and Country Club operates golf courses and related clubhouses at each of its three facilities. The Avalon Golf and Country Club facilities also offer swimming pools, fitness centers, tennis courts, dining and banquet facilities and spa services. In addition, The Avalon Inn provides guests with a self-contained vacation experience, offering hotel guests golf packages to all of the golf courses of the Avalon Golf and Country Club and allows its guests to utilize the facilities at each of the clubhouses. Members of the Avalon Golf and Country Club also have access to all of the amenities offered by The Avalon Inn. The Avalon Golf and Country Club competes with many public courses and country clubs in the area. Although the golf courses continue to be available to the general public, the primary source of revenues is derived from the members of the Avalon Golf and Country Club. Avalon believes that the combination of its three facilities and the addition of The Avalon Inn will result in additional memberships in the Avalon Golf and Country Club. The ability to retain current members and attract new members has been an ongoing challenge. Although Avalon was able to increase the number of members of the Avalon Golf and Country Club, as of June 30, 2016, Avalon has not attained its membership goals. There can be no assurance as to when such goals will be attained and when the golf and related operations will ultimately become profitable. Avalon is continually using different marketing strategies to attract new members, such as local television advertising and various membership promotions. A significant decline in members could adversely affect the future financial performance of Avalon.

All three of Avalon's golf course operations and The Avalon Inn currently hold liquor licenses for their respective facilities. If, for some reason, any one of these facilities were to lose their liquor license, the financial performance of the golf and related operations would be adversely affected.

Avalon's operations are somewhat seasonal in nature since a significant portion of those operations are primarily conducted in selected northeastern and midwestern states. Additionally, Avalon's golf courses are located in northeast Ohio and western Pennsylvania and are significantly dependent upon weather conditions during the golf season. As a result, Avalon's financial performance is adversely affected by adverse weather conditions.

Recent Accounting Pronouncements

In May 2014, the FASB issued Accounting Standards Update ("ASU") 2014-09, *Revenue from Contracts with Customers* ("ASU 2014-09"), to clarify the principles used to recognize revenue for all entities. Under ASU 2014-09, a company will recognize revenue when it transfers promised goods or services to customers in an amount that reflects the consideration to which the company expects to be entitled in exchange for those goods or services. The new guidance establishes a five-step approach for the recognition of revenue. ASU 2014-09 is effective for annual periods

beginning after December 15, 2017. Avalon is currently evaluating the impact the adoption of this guidance will have on its financial position, results of operations, cash flows and related disclosures and does not anticipate that the new guidance will fundamentally change our revenue recognition policies, practices or systems.

In August 2014, the FASB issued ASU 2014-15, *Disclosure of Uncertainties About an Entity's Ability to Continue as a Going Concern* ("ASU 2014-15"). The new standard provides guidance on determining when and how to disclose going-concern uncertainties in the financial statements. Under ASU 2014-15, management will be required to perform interim and annual assessments of the Company's ability to continue as a going concern within one year of the date the financial statements are issued. ASU 2014-15 is effective for annual periods ending after December 15, 2016, and interim periods thereafter, with early adoption permitted. The adoption of this standard is not expected to have an impact on Avalon's financial statement disclosures.

In February 2015, the FASB issued ASU 2015-02, *Amendments to the Consolidation Analysis* ("ASU 2015-02"). The new standard makes changes to the variable interest model. ASU 2015-02 requires all reporting entities involved with limited partnerships to re-evaluate whether these entities qualify for consolidation and revise documentation accordingly. During the first quarter of 2016, the Company adopted ASU 2015-02. The adoption of this standard did not have an impact on Avalon's financial position, results of operations or financial statement disclosures.

In November 2015, the FASB issued ASU 2015-17, *Balance Sheet Classification of Deferred Taxes* ("ASU 2015-17"), which simplifies the presentation of deferred income taxes by eliminating the need for entities to separate deferred income tax liabilities and assets into current and noncurrent amounts in a classified statement of financial position. This amendment is effective for annual periods beginning after December 15, 2016. The Company is currently evaluating the potential impact that ASU 2015-17 may have on its financial position and results of operations. The adoption of this standard is not expected to have an impact on Avalon's financial position, results of operations or financial statement disclosures.

In February 2016, the FASB issued ASU No. 2016-02, *Leases*. The new standard establishes a right-of-use (“ROU”) model that requires a lessee to record a ROU asset and a lease liability on the balance sheet for all leases with terms longer than 12 months. Leases will be classified as either finance or operating, with classification affecting the pattern of expense recognition in the income statement. The new standard is effective for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years. A modified retrospective transition approach is required for lessees for capital and operating leases existing at, or entered into after, the beginning of the earliest comparative period presented in the financial statements, with certain practical expedients available. Avalon is currently evaluating the impact the adoption of this guidance will have on its financial position, results of operations, cash flows and related disclosures.

In March 2016, the FASB issued ASU No. 2016-08, *Revenue from Contracts with Customers (Topic 606): Principal versus Agent Considerations (Reporting Revenue Gross versus Net)* (“ASU 2016-08”), which clarifies how to apply revenue recognition guidance related to whether an entity is a principal or an agent. ASU 2016-08 is effective for annual periods beginning after December 15, 2017. Avalon is currently evaluating the impact the adoption of this guidance will have on its financial position, results of operations, cash flows and related disclosures.

In March 2016, the FASB issued ASU 2016-09, *Improvements to Employee Share-Based Payment Accounting*, which simplifies several aspects of the accounting for employee share-based payment transactions including the accounting for income taxes, forfeitures, and statutory tax withholding requirements, as well as classification of related amounts within the statement of cash flows. The new standard will become effective beginning with the first quarter of 2017, with early adoption permitted. Avalon is currently evaluating the impact the adoption of this guidance will have on its financial position, results of operations, cash flows and related disclosures.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

Avalon does not have significant exposure to changing interest rates. Based on the current debt level at June 30, 2016, if market interest rates increased one percent, Avalon’s interest expense would increase approximately \$0.1 million annually. Avalon invests primarily in Certificates of Deposit, U.S. Treasury notes, short-term money market funds and other short-term obligations. Avalon does not undertake any specific actions to cover its exposure to interest rate risk and Avalon is not a party to any interest rate risk management transactions. Avalon does not purchase or hold any derivative financial instruments.

Item 4. Controls and Procedures

As required by Rule 13a-15 under the Securities Exchange Act of 1934 (the “Exchange Act”), Avalon’s management conducted an evaluation, under the supervision and with the participation of the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures as of June 30, 2016. For purposes of the foregoing, the term disclosure controls and procedures means controls and other procedures of an issuer that are designed to ensure that information required to be disclosed by the issuer in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the Securities and Exchange Commission’s (“SEC”) rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by an issuer in the reports that it files or submits under the Exchange Act is accumulated and communicated to the issuer’s management, including its principal executive and principal financial officers, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure. Avalon’s disclosure controls and procedures are designed to provide reasonable assurance of achieving their objectives as outlined above. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that they believe that, as of June 30, 2016, our disclosure controls and procedures were effective at a reasonable assurance level.

Changes in Internal Controls over Financial Reporting.

There were no changes in our internal controls over financial reporting during the fiscal quarter ended June 30, 2016 that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

Reference is made to “Item 3. Legal Proceedings” in Avalon’s Annual Report on Form 10-K for the year ended December 31, 2015 for a description of legal proceedings.

Item 2. Changes in Securities and Use of Proceeds

None

Item 3. Defaults upon Senior Securities

None

Item 4. Mine Safety Disclosures

None

Item 5. Other Information

None

Item 6. Exhibits and Reports on Form 8-K

(a) Exhibits

Exhibit 31.1 Certification pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.

Exhibit 31.2 Certification pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.

Exhibit 32.1 Certification pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.

Exhibit 32.2 Certification pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.

Exhibit 101.INS* XBRL Instance

Exhibit 101.SCH* XBRL Taxonomy Extension Schema

Exhibit 101.CAL* XBRL Taxonomy Extension Calculation

Exhibit 101.DEF* XBRL Taxonomy Extension Definition

Exhibit 101.LAB* XBRL Taxonomy Extension Labels

Exhibit 101.PRE* XBRL Taxonomy Extension Presentation

XBRL information is furnished and not filed or a part of a registration statement or prospectus for purposes of sections 11 or 12 of the Securities Act of 1933, as amended, is deemed not filed for purposes of section 18 of the Securities Exchange Act of 1934, as amended, and otherwise is not subject to liability under these sections.

(b) Reports on Form 8-K

On April 28, 2016, Avalon reported the voting results from the Annual Meeting held on April 28, 2016.
