Total Investments as of 09/30/2016	159.2%*		138,539,104	142,867,820	137,470,834

* Value as a percentage of net assets.

(1) Debt investments, the revenue linked security and the CLO subordinated notes are income producing investments unless an investment is on non accrual. Equity investments (other than Flight Lease VII, LLC), residual values and warrants are non-income producing. All investments other than Atrium Innovations, Inc., Shinnecock CLO 2006-1, Ltd., WBL SPE I, LLC, WBL SPE II, LLC and World Business Lenders, LLC are qualifying assets for purposes of Section 55(a) of the Investment Company Act of 1940, as amended. The Company's non-qualifying assets, on a fair value basis, comprise 8.1% of the Company's total assets.

(2) For each loan, the Company has provided the interest rate in effect on the date presented, as well as the contractual components of that interest rate. In the case of the Company's variable or floating rate loans, the interest rate in effect takes into account the applicable LIBOR rate in effect on the date presented or, if higher, the applicable LIBOR floor.

(3) Gross unrealized appreciation, gross unrealized depreciation, and net unrealized depreciation for federal income tax purposes totaled \$2.3 million, \$7.0 million, and \$4.7 million, respectively. The tax cost of investments is \$142.2 million.

(4) "Residual value" represents the value of the Company's share in the collateral securing the loan.

(5) On May 27, 2015, the Company's investment in CRS Reprocessing, LLC ("CRS") was restructured in a manner that was intended to strengthen the credit profile of the borrower. The restructured investment carried a fixed interest rate of 5.00% and has a principal amount of \$7.0 million, which includes all previously unpaid interest amounts. The maturity date of the restructured investment remained unchanged at September 30, 2016. CRS was taken off non-accrual and began accruing interest during the three months ended June 30, 2015. On April 29, 2016, the loan agreement was amended to extend the maturity date from September 30, 2016 to March 30, 2017. In conjunction with the extension, the interest rate increased from 5.0% cash to 10.0% (5.0% cash / 5.0% PIK). The loan was placed on non-accrual status during the three months ended September 30, 2016. No income was accrued during the three months ended September 30, 2016. However, cash interest of \$90,055, which represents the total amount of interest due to the Company as of September 30, 2016, was collected and recognized as income during this period.

(6) Credit facility has an unfunded commitment in addition to the amounts shown in the Schedule of Investments. See Note 8 for further discussion on portion of commitment unfunded at September 30, 2016.

(7) The debt investment in Peekay Acquisition, LLC ("Peekay") was not paid off by its February 15, 2016 maturity date. Effective February 1, 2016 the debt investment was placed on non-accrual status. The loan is in default and lenders are working with the company on restructuring its debt.

(8) The Company's common equity investment in Peekay Boutiques, Inc. has been classified as an affiliated investment because the Company owns more than 5% of the outstanding voting securities of Peekay Boutiques, Inc. The Company's last out senior secured term loan in Peekay Acquisition, LLC has also been classified as an affiliated investment because Peekay Acquisition, LLC is a wholly owned subsidiary of Peekay Boutiques, Inc. The revenue linked security entitles the Company to participate in the proceeds of inventory sales pursuant to a consignment agreement between IAG Engine Center, LLC ("IAG") and an affiliated entity of IAG, AMS Flight Funding, LLC.

(10) The Company owns 49,209 of Class B Preferred membership units representing 0.31% of the fully diluted common equity in World Business Lenders, LLC. However, due to the liquidation preference of the Class B units we would receive 0.52% of the proceeds in a liquidation of the company at the September 30, 2016 fair value.

(11) The coupon on the loan is subject to a pricing grid based on the ratio of Debt to EBITDA of the portfolio company.

(12) The subordinated notes of the CLO are the most junior tranche of securities in the securitization and have the attributes of equity. Our investment in Shinnecock CLO 2006-1 Ltd. is referred to as CLO Equity in other parts of this document. The CLO has begun its redemption process and as of October 15, 2016 had paid down all of its secured liabilities. The fair value of the investment as of September 30, 2016 is based on our expected liquidation proceeds and not on an effective yield basis.

(13) The loan was placed on non-accrual status during the three months ended June 30, 2016, after the Company received notice from the senior secured lender to Fox Rent a Car, Inc. ("Fox") that, due to Fox's violation of certain covenants under its senior secured credit facility, it was blocking the junior secured term loan lenders from

receiving interest payments until the covenant breaches were cured, waived by the senior secured lenders or the blockage period expires. During the three months ended September 30, 2016, Fox refinanced its senior credit facility and our loan was brought current and returned to accrual status. The Company recognized \$0.8 million in interest income from this investment in the three months ended September 30, 2016. Of that amount, \$0.4 million is related to the three months ended June 30, 2016, when the investment was on non-accrual. On October 26, 2016, the Fox Rent-A-Car credit agreement was amended and restated to convert the loan from a junior secured term loan to a senior secured term loan secured by all assets of the Company other than the vehicle fleet. In September 2016, the borrower refinanced its first lien corporate credit facility with new financing from various fleet lenders. The Company earned a \$0.8 million amendment fee which is due at the earlier of i) maturity or ii) loan repayment. The maturity date was changed from October 31, 2019 to September 29, 2017 and amortization of \$0.2 million a month on the total loan amount will commence on March 31, 2017. The interest rate reverted back to the original level of LIBOR plus 12.00%. Also as part of the new agreement, the Company is entitled to receive additional fees and equity warrants in the borrower if our investment is not paid off at certain future dates. The investment was taken off of non-accrual status during the three months ended September 30, 2016 following the receipt of all past due interest.

- (14) This loan was in violation of financial covenants pursuant to its loan agreement. As a result, the Company implemented a 3% PIK default rate on August 9, 2016. The default rate was in effect as of September 30, 2016.
 - (15) The loan is convertible any time, at the Company's discretion, into 5.8% of the fully diluted common equity of the borrower.
 - (16) The investment is held by HCAP Equity Holdings, LLC, the Company's taxable blocker subsidiary.
- See accompanying notes to unaudited consolidated financial statements.

* Value as a percentage of net assets

- Debt investments and the CLO subordinated notes are income producing investments unless an investment is on non accrual. Common equity options, residual values and warrants are non-income producing. All investments other than Atrium Innovations, Inc., Shinnecock CLO 2006-1, Ltd., WBL SPE I, LLC, WBL SPE II, LLC and
- (1) World Business Lenders, LLC are qualifying assets for purposes of Section 55(a) of the Investment Company Act of 1940, as amended. The Company's non-qualifying assets, on a fair value basis, comprise 12.2% of the Company's total assets.
For each loan, the Company has provided the interest rate in effect on the date presented, as well as the
 - (2) contractual components of that interest rate. In the case of the Company's variable or floating rate loans, the interest rate in effect takes into account the applicable LIBOR rate in effect on the date presented or, if higher, the applicable LIBOR floor.
Gross unrealized appreciation, gross unrealized depreciation, and net unrealized depreciation for federal income
 - (3) tax purposes totaled \$1.9 million, \$2.5 million, and \$0.6 million, respectively. The tax cost of investments is \$143.4 million.
 - (4) "Residual value" represents the value of the Company's share in the collateral securing the loan.
On May 27, 2015, the Company's investment in CRS Reprocessing, LLC ("CRS") was restructured in a manner that was intended to strengthen the credit profile of the borrower. The restructured investment carries a fixed
 - (5) interest rate of 5.00% and has a principal amount of \$7.0 million, which includes all previously unpaid interest amounts. The maturity date of the restructured investment remains unchanged at September 30, 2016. CRS was taken off non-accrual during the three months ended June 30, 2015 and interest income on the restructured loan is currently being accrued.
 - (6) Credit facility has an unfunded commitment in addition to the amounts shown in the Schedule of Investments. See Note 9 for further discussion on portion of commitment unfunded at December 31, 2015.
As of December 31, 2015, Infinite Aegis Group, LLC ("IA") was four months behind in interest payments and owed the Company \$593,993 in interest, fees and expenses. The Company's investment in Infinite Aegis Group, LLC remained on accrual status, as of December 31, 2015, due to the substantive evidence of a refinancing agreement that was expected to close during the three months ended March 31, 2016. On February 29, 2016, a
 - (7) refinancing occurred, and our \$9.1 million debt investment in IA was paid off at par as a result of the purchase of the majority of IA's assets by Infinite Care, LLC ("IC"). We also received \$1.4 million in accrued and unpaid interest and fees. In conjunction with the payoff of our investment in IA, we invested \$3.0 million into the common equity of IC and provided a \$6.0 million senior secured term loan and a \$1.0 million senior secured revolver (unfunded at close).
 - (8) The "Fee Letter" represents an agreement with the borrower that will pay us an amount at maturity or when the loan is paid off that makes our effective cash coupon over the life of the investment equal to LIBOR +15.00%.
The Peekay Acquisition, LLC (Christals) "Accommodation Fee" is a fee that one of the other lenders to Peekay Acquisition, LLC agreed to pay to the Company during the term of the Company's senior secured term loan
 - (9) investment in Peekay Acquisition, LLC. The amount of the fee is equal to the aggregate principal amount of the outstanding term loan held by the Company multiplied by a per annum rate of 3%. This fee is calculated and treated as if it is interest on the outstanding principal amount of the loan.
The Company's common equity investment in Peekay Boutiques, Inc. has been classified as an affiliated
 - (10) investment because the Company owns more than 5% of the outstanding voting securities of Peekay Boutiques, Inc. The Company's senior secured term loan in Peekay Acquisition, LLC has also been classified as an affiliated investment because Peekay Acquisition, LLC is a wholly owned subsidiary of Peekay Boutiques, Inc.
Solex Fine Foods, LLC ("Solex") is on non-accrual status at December 31, 2015. The amortized cost balance of \$1,626,670 as of December 31, 2015 has not changed since the investment was put on non-accrual status effective
 - (11) November 1, 2014. The outstanding balance of \$1,847,856 as of December 31, 2015 includes \$164,377 of PIK interest capitalized to the principal balance. The investment was exited in February 2016 for cash consideration of \$926,204.
 - (12) Supplemental PIK accrues on Solex each quarter and is determined based on the Senior Debt to EBITDA calculation as of the last day of the immediately preceding quarterly payment period. Since the investment was put on non-accrual status effective November 1, 2014, the PIK has not been accrued and the cost balance remains

Edgar Filing: Harvest Capital Credit Corp - Form 10-Q

\$1,626,670; however, the outstanding principal balance reflects the accrued PIK.

(13) On July 7, 2015, Douglas Machines Corp. refinanced the Company's \$1.5 million revolver commitment with another lender; the Company reduced the \$4.3 million term loan interest rate from 13.5% to 12.5%, extended the maturity date from April 6, 2017 to December 31, 2018 and it became a junior secured term loan.

(14) The Company owns 0.31% of the equity Class B units in WBL. However, due to the liquidation preference of the Class B units we would receive 0.50% of the proceeds in a liquidation of the company at the December 31, 2015 fair value.

(15) The coupon on the loan is subject to a pricing grid based on the ratio of Debt to EBITDA of the portfolio company.

(16) The subordinated notes of the CLO are the most junior tranche of securities in the securitization and have the attributes of equity. Our investment in Shinnecock CLO 2006-1 Ltd. is referred to as CLO Equity in other parts of this document.

(17) The debt investment in Peekay Acquisition, LLC ("Peekay") was not paid off by its February 15, 2016 maturity date. Lenders entered into an amendment with Peekay agreeing to forbear until July 31, 2016, subject to certain financial restructuring steps taken by the company during the forbearance period.

Harvest Capital Credit Corporation
Notes to Unaudited Consolidated Financial Statements

Note 1. Organization

Harvest Capital Credit Corporation ("HCAP" or the "Company") was incorporated as a Delaware corporation on November 14, 2012, for the purpose of, among other things, acquiring Harvest Capital Credit LLC ("HCC LLC"). HCAP acquired HCC LLC on May 2, 2013, in connection with HCAP's initial public offering. HCAP is an externally managed, closed-end, non-diversified management investment company that has filed an election to be treated as a business development company ("BDC") under the Investment Company Act of 1940, as amended (the "1940 Act"). In addition, for tax purposes, HCAP has elected to be treated as a regulated investment company ("RIC") under Subchapter M of the Internal Revenue Code of 1986, as amended (the "Code"). As an investment company, we follow accounting and reporting guidance as set forth in Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") 946, Financial Services- Investment Companies.

On July 1, 2016, the Company formed HCAP Equity Holdings, LLC, a Delaware limited liability company, as a wholly owned subsidiary of the Company to hold certain equity investments made by the Company in limited liability companies or other forms of pass-through entities. By investing through HCAP Equity Holdings, LLC, the Company is able to benefit from the tax treatment of this entity and create a tax structure that is advantageous with respect to the Company's status as a RIC. This taxable subsidiary is consolidated for U.S. GAAP financial reporting purposes, and the portfolio investments held by the taxable subsidiary are included in the Company's consolidated financial statements and recorded at fair value in conjunction with the Company's valuation policy.

Unless otherwise noted or the context otherwise indicates, the terms "we", "us", "our", and the "Company" refer to Harvest Capital Credit Corporation and its consolidated subsidiaries.

Note 2. Summary of Significant Accounting Policies

Basis of Financial Statement Presentation

The accompanying consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP") and in accordance with the rules and regulations of the SEC and Regulation S-X. In the opinion of management, all adjustments of a normal recurring nature considered necessary for the fair statement of the Company's consolidated financial statements have been made.

In preparing the consolidated financial statements in accordance with GAAP, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities, and disclosures of contingent assets and liabilities, as of the date of the Consolidated Statement of Assets and Liabilities and the Consolidated Statements of Operations for the period. Actual results could differ from those estimates.

Principles of Consolidation

The financial statements of the Company include the accounts of Harvest Capital Credit Corporation and its wholly-owned subsidiary, HCAP Equity Holdings, LLC. The effects of all intercompany transactions between the Company and its subsidiary have been eliminated in consolidation. Under the investment company rules and regulations pursuant to Article 6 of Regulation S-X and ASC 946, Financial Services - Investment Companies, the Company is precluded from consolidating portfolio company investments, including those in which it has a controlling interest, unless the portfolio company is another investment company.

Cash

Cash and cash equivalents as presented in the Consolidated Statement of Assets and Liabilities and the Consolidated Statement of Cash Flows include bank checking accounts and short term securities with an original maturity of less than 90 days.

Restricted Cash

18

Restricted cash of \$3.0 million and \$2.5 million as of September 30, 2016 and December 31, 2015, respectively, was held at U.S. Bank, National Association in conjunction with the Company's Credit Facility (see Note 3. Borrowings). The Company is restricted from accessing this cash until the monthly settlement date when, after delivering a covenant compliance certificate, the net restricted cash is released to us after paying interest, fees and expenses owed under our Credit Facility.

Investments and Related Investment Revenue and Expense

All revenue and expenses attributable to investments are reflected on the Consolidated Statement of Operations commencing on the settlement date unless otherwise specified by the transaction documents.

The Company accrues interest income if it expects that ultimately it will be able to collect it. Generally, when an interest payment default occurs on a loan in the portfolio, in which interest has not been paid for greater than 90 days, or if management otherwise believes that the issuer of the loan will not be able to service the loan and other obligations, the Company will place the loan on non-accrual status and will cease accruing interest income on that loan until all principal and interest is current through payment or until a restructuring occurs, such that the interest income is deemed collectible. However, the Company remains contractually entitled to this interest, and any collections actually received on these non-accrual loans may be recognized as interest income on a cash basis or applied to the principal depending upon management's judgment regarding collectability. The Company may make exceptions to this accrual policy if the loan has sufficient collateral value and is in the process of collection and the amount of collectible interest is expected to be paid.

For loans with contractual PIK (payment-in-kind) interest income, which represents contractual interest accrued and added to the loan balance that generally becomes due at maturity, we will not accrue PIK interest if we believe that the PIK interest is no longer collectible, including if the portfolio company valuation indicates that such PIK interest is not collectible. Loan origination fees - net of direct loan origination costs, original issue discounts that initially represent the value of detachable equity warrants obtained in conjunction with the acquisition of debt securities and market discounts or premiums - are accreted or amortized using the effective interest method as interest income over the contractual life of the loan. Upon the prepayment of a loan or debt security, any unamortized net loan origination fee will be recorded as interest income. Loan exit fees that are contractually required to be paid at the termination or maturity of the loan will be accreted to interest income over the contractual term of the loan. We suspend the accretion of interest income for any loans or debt securities placed on non-accrual status. We may also collect other prepayment premiums on loans. These prepayment premiums are recorded as other income as earned. Dividend income, if any, will be recognized on the ex-dividend date.

Certain expenses related to legal and tax consultation, due diligence, valuation expenses and independent collateral appraisals may arise when the Company makes certain investments. To the extent that such costs are not classified as direct loan origination costs, these expenses are recognized in the Consolidated Statement of Operations as they are incurred.

Investment Date

The Company records investment purchases and sales based on the trade date. For instances when the trade date and funding date differ, the Company captures the open trades in the receivable for securities sold or payable for securities purchased on the Consolidated Statements of Assets and Liabilities.

Net Realized Gains or Losses and Net Change in Unrealized Appreciation or Depreciation

Realized gains and losses on investments are calculated using the specific identification method. We measure realized gains or losses on equity investments as the difference between the net proceeds from the sale and the amortized cost

basis of the investment, without regard to unrealized appreciation or depreciation previously recognized. We measure realized gains or losses on debt investments as the difference between the net proceeds from the repayment or sale and the contractual amount owed to us on the investment, without regard to unrealized appreciation or depreciation previously recognized or unamortized deferred fees. The acceleration of unamortized deferred fees is recognized as interest income and the collection of prepayment and other fees is recognized as other income. We recognized \$0.7 million in net realized gains during the three months ended September 30, 2016 and \$0.3 million in net realized losses during the three months ended September 30, 2015. We recognized \$0.5 million in net realized losses during the nine months ended September 30, 2016 and \$1.0 million in net realized losses during the nine months ended September 30, 2015

Net changes in unrealized appreciation or depreciation measure changes in the fair value of our investments relative to changes in their amortized cost. We recognized \$(1.3) million in net change in unrealized depreciation during the three months

ended September 30, 2016 and \$(1.1) million in net change in unrealized depreciation during the three months ended September 30, 2015. We recognized \$(3.9) million in net change in unrealized depreciation during the nine months ended September 30, 2016 and \$(1.0) million in net change in unrealized depreciation during the nine months ended September 30, 2015.

Classification of Investments

We classify our investments by level of control. As defined in the 1940 Act, control investments are those where there is the ability or power to exercise a controlling influence over the management or policies of a company. Control is generally deemed to exist when a company or individual owns beneficially more than 25% of the voting securities of an investee company. Affiliated investments and affiliated companies are defined by a lesser degree of influence and are deemed to exist through beneficial ownership of 5% or more, but generally 25% or less, of the outstanding voting securities of another person. The Company had 27 investments that were classified as Non-Control/Non-Affiliate investments as of September 30, 2016 and 30 classified as Non-Control/Non-Affiliate as of December 31, 2015. The Company had 3 investments classified as Affiliated as of September 30, 2016 and December 31, 2015. The Company had 1 investment classified as Control as of September 30, 2016 and none classified as Control as of December 31, 2015.

Valuation of Investments

Valuation analyses of the Company's investments are performed on a quarterly basis pursuant to ASC 820, Fair Value Measurement. ASC 820 defines fair value, establishes a framework for measuring fair value in accordance with applicable accounting guidance and expands disclosure of fair value measurements.

Pursuant to ASC 820, the valuation standard used to measure the value of each investment is fair value defined as, "the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date." Investments are recorded at their fair value at each quarter end (the measurement date).

Fair Value Investment Hierarchy

Accounting standards establish a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value:

- Level 1 Quoted prices (unadjusted) for identical assets or liabilities in active public markets that the entity has the ability to access as of the measurement date.
- Level 2 Significant other observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data.
- Level 3 Significant unobservable inputs that reflect a reporting entity's own assumptions about what market participants would use in pricing an asset or liability.

Valuation Process

Investments are measured at fair value as determined in good faith by our management team, reviewed by the audit committee of the board of directors (independent directors), and ultimately approved by our board of directors, based on, among other factors, consistently applied valuation procedures on each measurement date.

In the case of investments that are Level 3 assets and have an investment rating of 1, we engage an independent external valuation firm to review all material investments, at least annually. In quarters where an external valuation is not prepared for such investments, our management or the investment professionals of our investment adviser prepare an internal valuation analysis (in the form of a portfolio monitoring report or “PMR”) for such investments.

In the case of investments that are Level 3 assets and have an investment rating of 2 through 5 (with performance ranging from within expectations to substantially below expectations), we engage an independent external valuation firm to review all such material investments quarterly. However, in certain cases for Level 3 assets that are internally rated 2, we may determine that it is more appropriate for the Company to prepare a PMR instead of engaging an independent valuation firm on a quarterly basis, because a third-party valuation is not cost effective or the nature of the investment does not warrant a quarterly third-party valuation. In the case of investments that are Level 3 assets and have an investment rating of 3 through 5,

our management or the investment professionals of our investment adviser prepare a PMR, which is considered in addition to the review of the independent external valuation firm.

Level 3 debt investments which have closed within six months of the measurement date are valued at cost unless unique circumstances dictate otherwise.

In the case of investments that are Level 1 or 2 assets, a PMR is generally not prepared and no independent external valuation firm is engaged due to the availability of quotes in markets (which may or may not be active) for such investments or similar assets.

The board of directors undertakes a multi-step valuation process at each measurement date.

Our valuation process begins with (i) an internally prepared PMR, (ii) an external valuation report prepared by an independent valuation firm, or (iii) both (i) and (ii), for all Level 3 investments.

Preliminary valuation conclusions are documented and discussed with our senior management.

The audit committee of our board of directors reviews and discusses the preliminary valuations.

The board of directors discusses valuations and determines the fair value of each investment in our portfolio in good faith, based upon the input of our senior management, the independent valuation firm report (if reviewed in such quarter), and the audit committee.

Valuation Methodology

The following section describes the valuation methods and techniques used to measure the fair value of the investments.

Fair value for each investment may be derived using a combination of valuation methodologies that, in the judgment of our management, are most relevant to such investment, including, without limitation, being based on one or more of the following: (i) market prices obtained from market makers for which our management has deemed there to be enough breadth (number of quotes) and depth to be indicative of fair value, (ii) the price paid or realized in a completed transaction or binding offer received in an arms-length transaction, (iii) the market approach (enterprise value), (iv) the income approach (discounted cash flow analysis) or (v) the bond yield approach.

The valuation methods selected for a particular investment are based on the circumstances and on the level of sufficient data available to measure fair value. If more than one valuation method is used to measure fair value, the results are evaluated and weighted, as appropriate, considering the reasonableness of the range indicated by those results. A fair value measurement is the point within that range that is most representative of fair value in the circumstances.

The determination of fair value using the selected methodologies takes into consideration a range of factors including, but not limited to, the price at which the investment was acquired, the nature of the investment, local market conditions, trading values on public and private exchanges for comparable securities, current and projected operating performance and financing transactions subsequent to the acquisition of the investment, compliance with agreed upon terms and covenants, and assessment of credit ratings of an underlying borrower.

In most cases we use the bond yield approach for valuing our Level 3 debt investments, as long as we deem this method appropriate. This approach entails analyzing the interest rate spreads for recently completed financing

transactions which are similar in nature to ours, in order to assess what the range of effective market interest rates would be for our investment if it were being made on or near the valuation date. Then all of the remaining expected cash flows of the investment are discounted using this range of interest rates to determine a range of fair values for the debt investment. If, in our judgment, the bond yield approach is not appropriate, we may use the market approach, or, in certain cases, an alternative methodology potentially including an asset liquidation or expected recovery model.

The fair value of equity securities, including warrants, in portfolio companies oftentimes considers the market approach, which applies market valuation multiples of publicly-traded firms or recently acquired private firms engaged in businesses similar to those of the portfolio companies. This approach to determining the fair value of a portfolio company's equity security will

typically involve: (1) applying to the portfolio company's trailing twelve month EBITDA (earnings before interest, taxes, depreciation and amortization) a range of enterprise value to EBITDA multiples that are derived from an analysis of comparable companies, in order to arrive at a range of enterprise values for the portfolio company; then (2) subtracting from the range of enterprise values balances of any debt or equity securities that rank senior to our equity securities; and (3) multiplying the range of equity values by the Company's ownership share of such equity to determine a range of fair values for the Company's equity investment.

We also use the income approach, which discounts a portfolio company's expected future cash flows to determine its net present enterprise value. The discount rate used is based upon the company's weighted average cost of capital, which is determined by blending the cost of the company's various debt instruments and its estimated cost of equity capital. The cost of equity capital is estimated based upon our market knowledge and discussions with private equity sponsors.

These valuation methodologies involve a significant degree of judgment. As it relates to investments that do not have an active public market, there is no single standard for determining the estimated fair value. Valuations of privately held investments are inherently uncertain, and they may fluctuate over short periods of time and may be based on estimates. The determination of fair value may differ materially from the values that would have been used if a ready market for these investments existed. In some cases, fair value of such investments is best expressed as a range of values derived utilizing different methodologies from which a single estimate may then be determined.

Consequently, fair value for each investment may be derived using a combination of valuation methodologies that, in the judgment of our management, are most relevant to such investment. The selected valuation methodologies for a particular investment are consistently applied on each measurement date. However, a change in a valuation methodology or its application from one measurement date to another is possible if the change results in a measurement that is equally or more representative of fair value in the circumstances.

Capital Gains Incentive Fee

Under GAAP, the Company calculates the capital gains incentive fee as if the Company had realized all investments at their fair values as of the reporting date. Accordingly, the Company accrues a provisional capital gains incentive fee taking into account any unrealized gains or losses. As the provisional incentive fee is subject to the performance of investments until there is a realization event, the amount of provisional capital gains incentive fee accrued at a reporting date may vary from the capital gains incentive fee that is ultimately paid and the differences could be material.

Deferred Offering Costs

Deferred offering costs are made up of offering costs related to the preparation and filing of the Company's shelf registration statement on Form N-2 and the expenses related to the Company's unsecured notes issued in January 2015. The deferred offering costs consist of underwriting fees, legal fees and other direct costs incurred by the Company in conjunction with preparation and filing of the Company's shelf registration statement on Form N-2 and are recognized as assets and are amortized as deferred offering expense over the term of the applicable offering. The balance of deferred offering costs as of September 30, 2016 and December 31, 2015 was \$936,195 and \$1,023,246, respectively. The amortization expense relating to deferred debt offering costs during the three months ended September 30, 2016 and September 30, 2015 was \$49,696 and \$45,908, respectively. The amortization expense relating to deferred debt offering costs during the nine months ended September 30, 2016 and September 30, 2015 was \$146,181 and \$120,428, respectively.

Deferred Financing Costs

Deferred financing costs are made up of debt issuance costs associated with the Company's revolving line of credit. The deferred debt issuance costs consist of fees and other direct costs incurred by the Company in obtaining debt financing from its lenders and are recognized as assets and are amortized as interest expense over the term of the applicable credit facility. The balance of deferred financing costs as of September 30, 2016 and December 31, 2015 was \$616,297 and \$748,637, respectively. The amortization expense relating to deferred debt financing costs during the three months ended September 30, 2016 and September 30, 2015 was \$71,785 and \$66,057, respectively. The amortization expense relating to deferred debt financing costs during the nine months ended September 30, 2016 and September 30, 2015 was \$204,777 and \$198,171, respectively.

Dividends and Distributions

22

Dividends and distributions to common stockholders are recorded on the ex-dividend date. Distributions to shareholders which exceed tax distributable income (tax net investment income and realized gains, if any) are reported as distributions of paid-in capital (i.e., return of capital). The determination of the tax attributes of our distributions is made at the end of the year based upon our taxable income for the full year and the distributions paid during the full year. Therefore, a determination of tax attributes made on a quarterly basis may not be representative of the actual tax attributes of distributions for a full year. Net realized capital gains, if any, are distributed at least annually, although the Company may decide to retain such capital gains for investment. The Company adopted a dividend reinvestment plan that provides for reinvestment of our dividends and other distributions on behalf of our stockholders, unless a stockholder elects to receive cash. As a result, if the board of directors authorizes, and we declare, a cash dividend or other distribution, then our stockholders who have not “opted out” of our dividend reinvestment plan will have their cash distribution automatically reinvested in additional shares of our common stock, rather than receiving the cash distribution.

During both the three months ended September 30, 2016 and the three months ended September 30, 2015, the Company declared dividends totaling \$0.34 per share. During both the nine months ended September 30, 2016 and the nine months ended September 30, 2015, the Company declared dividends totaling \$1.02 per share.

Income Taxes

Beginning with its first taxable year ending December 31, 2013, the Company elected to be treated, and intends to receive RIC tax treatment annually thereafter, as a RIC under Subchapter M of the Code. To receive RIC tax treatment, the Company is required to meet certain income and asset diversification tests in addition to distributing at least 90% of ordinary income and realized net short-term capital gains in excess of realized net long-term capital losses, if any, out of the assets legally available for distribution. As a RIC, the Company will be subject to a 4% nondeductible federal excise tax on certain undistributed income unless the Company distributes in a timely manner an amount at least equal to the sum of (1) 98% of its ordinary income for each calendar year, (2) 98.2% of its capital gain net income for the 1-year period ending October 31 in that calendar year and (3) any ordinary income and net capital gains for preceding years that were not distributed during such years and on which the Company paid no U.S. federal income tax.

The Company’s tax returns are subject to examination by federal, state and local taxing authorities. Because many types of transactions are susceptible to varying interpretations under federal and state income tax laws and regulations, the amounts reported in the accompanying financial statements may be subject to change at a later date by the respective taxing authorities. For tax positions meeting the more-likely-than-not threshold, the amount recognized in the financial statements is the largest benefit that has a greater than 50% likelihood of being realized upon ultimate settlement with the relevant tax authority. Penalties or interest that may be assessed related to any income taxes would be classified as other operating expenses in the financial statements. Based on an analysis of our tax position, there are no uncertain tax positions that met the recognition or measurement criteria and the Company has no amounts accrued for interest or penalties as of September 30, 2016. Neither HCC LLC nor the Company is currently undergoing any tax examinations. The Company does not anticipate any significant increase or decrease in unrecognized tax benefits for the next twelve months.

Recent Accounting Pronouncements

In April 2015, the FASB issued ASU 2015-03, Simplifying the Presentation of Debt Issuance Cost, which requires debt issuance costs to be presented on the balance sheet as a direct deduction from the associated debt liability, and in August 2015, the FASB issued ASU 2015-15, Presentation and Subsequent Measurement of Debt Issuance Costs Associated with Line-of-Credit Arrangements, which clarifies the application of ASU 2015-03 to debt issuance costs associated with the line-of-credit arrangements and allows presentation of debt issuance costs on these instruments as

assets that are amortized over the term of the instrument. Adoption of these standards will result in the presentation of our Notes (defined below) net of the associated debt issuance costs in the liabilities section on the Consolidated Statement of Assets and Liabilities. There will be no changes to the accounting or presentation of our Credit Facility. ASU 2015-03 and ASU 2015-15 are effective for fiscal years beginning after December 15, 2015. As an emerging growth company, we have the option to adopt these pronouncements for interim periods beginning after December 15, 2016 and have elected to do so.

In August 2015, the FASB issued ASU 2015-14, Revenue from Contracts with Customers, which defers the effective date of ASU 2014-09, Revenue from Contracts with Customers. ASU 2014-09 outlines a single comprehensive model for entities to use in accounting for revenue arising from contracts with customers and supersedes most current revenue recognition guidance, including industry-specific guidance. ASU 2014-09 has been deferred by one year via ASU 2015-14 and will now be effective for fiscal years beginning after December 15, 2018, and interim periods beginning after December 15, 2019, and requires either a

retrospective or a modified retrospective approach to adoption. Early adoption is not permitted but you can adopt as of the original effective date of December 15, 2016. We have concluded that adoption of this pronouncement will not have a material impact to our consolidated financial statements.

In January 2016, the FASB issued ASU 2016-01, Recognition and Measurement of Financial Assets and Financial Liabilities. ASU 2016-01 amends certain aspects of recognition, measurement, presentation and disclosure of financial instruments, including the requirement to measure certain equity investments at fair value with changes in fair value recognized in net income. ASU 2016-01 is effective for interim and annual reporting periods in fiscal years beginning after December 15, 2017. We are currently evaluating the impact of the adoption of ASU 2016-01 on our consolidated financial statements.

In August 2016, the FASB issued ASU 2016-15, Classification of Certain Cash Receipts and Cash Payments (a Consensus of the Emerging Issues Task Force) (“ASU 2016-15”), which is intended to reduce diversity in practice in how certain transactions are classified in the statement of cash flows. We are currently assessing the impact of ASU 2016-15 and do not anticipate a material impact on our financial position, results of operations or cash flows. ASU 2016-15 is effective for annual reporting periods beginning after December 15, 2017, including interim periods within those fiscal years, with early adoption permitted.

Note 3. Borrowings

On October 29, 2013, the Company entered into a Loan and Security Agreement with CapitalSource Bank (now Pacific Western Bank), as agent and a lender, and each of the lenders from time to time party thereto, including City National Bank, to provide the Company with a \$55.0 million senior secured revolving credit facility (the “Credit Facility”). The Credit Facility is secured by all of the Company’s assets and has an accordion feature that allows the size of the facility to increase up to \$85.0 million. The final maturity date under the Credit Facility is October 29, 2018.

The Credit Facility was amended on September 22, 2015 to extend the revolving period and lower the interest rate. The original Credit Facility had a revolving period that expired on October 29, 2015. Advances under the original Credit Facility bore interest at a rate per annum equal to the lesser of (i) LIBOR plus 4.50% and (ii) the maximum rate permitted under applicable law. The amended Credit Facility has a revolving period that expires on April 30, 2017. Advances under the amended Credit Facility bear interest at a rate per annum equal to the lesser of (i) the applicable LIBOR rate plus 3.25% (with a 0.50% LIBOR floor) and (ii) the maximum rate permitted under applicable law. In addition, the Credit Facility requires payment of a fee for unused amounts during the revolving period, which fee varies depending on the obligations outstanding as follows: (i) 0.75% per annum, if the average daily principal balance of the obligations outstanding for the prior month are less than fifty percent of the maximum loan amount; and (ii) 0.50% per annum, if such obligations outstanding are equal to or greater than fifty percent of the maximum loan amount. In each case, the fee is calculated based on the difference between (i) the maximum loan amount under the Credit Facility and (ii) the average daily principal balance of the obligations outstanding during the prior calendar month.

The Credit Facility also contains customary terms and conditions, including, without limitation, affirmative and negative covenants, including, without limitation, information reporting requirements, a minimum tangible net worth, a minimum debt service coverage ratio, a minimum liquidity of 4% of the maximum loan amount, a maximum leverage ratio of 1.00 to 1.00, and maintenance of RIC and business development company status. In addition, the Credit Facility contains a covenant that limits the amount of our unsecured longer-term indebtedness (as defined in the Credit Facility), which includes our Notes, to 50% of the maximum borrowing amount under the Credit Facility. The Credit Facility also contains customary events of default, including, without limitation, nonpayment, misrepresentation of representations and warranties in a material respect, breach of covenant, cross-default to other indebtedness, bankruptcy, change of control, and the occurrence of a material adverse effect. In addition, the Credit Facility provides that, upon the occurrence and during the continuation of such an event of default, the Company’s

administration agreement could be terminated and a backup administrator could be substituted by the agent. On August 4, 2016, the Company entered into an amendment to its Credit Facility. The agreement was amended to, among other things, (i) provide for the formation and operation of HCAP Equity Holdings, LLC as a wholly owned subsidiary of the Company to hold equity investments and to become an additional borrower under the credit facility; and (ii) establish certain liquidity thresholds that must be satisfied in connection with any repurchase by the Company of its securities, including at the time of any such repurchase and over any given quarter. In connection with the amendment, the Company also entered into a pledge agreement in favor of the agent under the Credit Facility, pursuant to which, among other things, the Company

agreed to pledge and grant a first priority security interest to the agent in the Company's right, title, and interest in its membership interests in HCAP Equity Holdings, LLC.

All of the Company's assets are pledged as collateral under the Credit Facility. Availability under the Credit Facility is determined by advance rates against eligible loans in the borrowing base up to a maximum aggregate availability of \$55.0 million. Advance rates against individual investments range from 40% to 65% depending on the seniority of the investment in the borrowing base.

As of September 30, 2016, the outstanding balance on the Credit Facility was \$27.1 million. As of December 31, 2015, the outstanding balance on the Credit Facility was \$29.7 million. As of September 30, 2016 and December 31, 2015, the Company was in compliance with its debt covenants.

On January 27, 2015, the Company closed the public offering of \$25.0 million in aggregate principal amount of its 7.00% Notes due 2020 (the "Notes"). On February 4, 2015, the Company closed on an additional \$2.5 million in aggregate principal amount of Notes to cover the over-allotment option exercised by the underwriters. In total, the Company issued 1,100,000 Notes at a price of \$25.00 per Note. The total net proceeds to the Company from the Notes, after deducting underwriting discounts of \$0.8 million and offering expenses of \$0.2 million, were \$26.5 million.

The Notes mature on January 16, 2020 and bear interest at a rate of 7.00%. They are redeemable in whole or in part at anytime at the Company's option after January 16, 2017 at a price equal to 100% of the outstanding principal amount of the Notes plus accrued and unpaid interest. The Notes are unsecured obligations of the Company and rank pari passu with any future unsecured indebtedness; senior to any of the Company's future indebtedness that expressly provides it is subordinated to the Notes; effectively subordinated to all of the existing and future secured indebtedness of the Company, to the extent of the value of the assets securing such indebtedness, including borrowings under the Credit Facility; and structurally subordinated to all existing and future indebtedness and other obligations of any subsidiaries, financing vehicles, or similar facilities the Company may form in the future, with respect to claims on the assets of any such subsidiaries, financing vehicles, or similar facilities. Interest on the Notes is payable quarterly on January 16, April 16, July 16, and October 16 of each year. The Notes are listed on the NASDAQ Global Market under the trading symbol "HCAPL." The Company may from time to time repurchase Notes in accordance with the 1940 Act and the rules promulgated thereunder. As of September 30, 2016, the outstanding principal balance of the Notes was \$27.5 million and the debt issuance costs balance was \$936,195.

The indenture governing the Notes (the "Notes Indenture") contains certain covenants, including covenants (i) requiring the Company's compliance with the asset coverage requirements set forth in Section 18(a)(1)(A) as modified by Section 61(a)(1) of the 1940 Act, whether or not the Company continues to be subject to such provisions of the 1940 Act; (ii) requiring the Company's compliance, under certain circumstances, with a modified version of the requirements set forth in Section 18(a)(1)(B) as modified by Section 61(a)(1) of the 1940 Act, whether or not the Company continues to be subject to such provisions of the 1940 Act, prohibiting the declaration of any cash dividend or distribution upon any class of the Company's capital stock (except to the extent necessary for the Company to maintain its treatment as a RIC under Subchapter M of the Code), or purchasing any such capital stock, if the Company's asset coverage, as defined in the 1940 Act, were below 200% at the time of the declaration of the dividend or distribution or the purchase and after deducting the amount of such dividend, distribution, or purchase; and (iii) requiring the Company to provide financial information to the holders of the Notes and the trustee if the Company ceases to be subject to the reporting requirements of the Securities Exchange Act of 1934. These covenants are subject to limitations and exceptions that are described in the Notes Indenture. As of September 30, 2016 and December 31, 2015, the Company was in compliance with its debt covenants.

Note 4. Concentrations of Credit Risk

The Company's investment portfolio consists primarily of loans to privately-held small to mid-size companies. Many of these companies may experience volatility in operating results. Many of these companies do business in regulated industries and could be affected by changes in government regulations.

The largest debt investments may vary from year to year as new debt investments are recorded and repaid. The Company's five largest debt investments represented approximately 35.0% and 33.0% of total debt investments outstanding as of September 30, 2016 and December 31, 2015, respectively. Investment income, consisting of interest and fees, can fluctuate significantly upon repayment of large loans. Interest income from the five largest debt investments accounted for approximately 34.3% and 29.0% of total loan interest and fee income for the three months ended September 30, 2016 and September 30, 2015, respectively. Interest

Edgar Filing: Harvest Capital Credit Corp - Form 10-Q

income from the five largest debt investments accounted for approximately 33.6% and 27.7% of total loan interest and fee income for the nine months ended September 30, 2016 and September 30, 2015, respectively.

Note 5. Shareholders' Equity

The following tables summarize the total shares issued and proceeds received under the Company's DRIP plan for shares of the Company's common stock and shares repurchased in the open market by the Company for the three months and nine months ended September 30, 2016 and September 30, 2015.

	2016		2015	
	Shares Issued	Net Proceeds	Shares Issued	Net Proceeds
Total dividends reinvested for the three months ended September 30	10,613	\$126,859	6,877	\$82,669
Total shares repurchased during the three months ended September 30	(20,176)	\$(252,023)	—	—
Net shares (repurchased) issued during the three months ended September 30	(9,563)	\$(125,164)	6,877	\$82,669
Total dividends reinvested for the nine months ended September 30	34,242	\$391,625	37,414	\$459,448
Total shares repurchased during the nine months ended September 30	(25,676)	\$(320,934)	—	—
Net shares issued during the nine months ended September 30	8,566	\$70,691	37,414	\$459,448

As of September 30, 2016 and 2015, the Company had no warrants outstanding.

On March 8, 2016, our board of directors authorized a \$3.0 million open market stock repurchase program. Pursuant to our program, we are authorized to repurchase up to \$3.0 million in the aggregate of our outstanding stock in the open market. The timing, manner, price and amount of any share repurchases will be determined by our management at its discretion, and no assurances can be given that any common stock, or any particular amount, will be purchased. Unless amended by our board of directors, the repurchase program will expire on the earlier of December 31, 2016 or the repurchase of \$3.0 million of our outstanding shares of common stock. The program may be suspended, extended, modified, or discontinued at any time. During the three months ended September 30, 2016, the Company repurchased 20,176 shares of its common stock at an average price of \$12.49 per share, and a total cost of \$252,023. During the nine months ended September 30, 2016, the Company repurchased 25,676 shares of its common stock at an average price of \$12.50 per share, and a total cost of \$320,934. As of September 30, 2016, approximately \$2.7 million of common stock remains eligible for repurchase under the repurchase plan. See "Item 2. Unregistered Sales of Equity Securities and Use of Proceeds" for further information on the repurchases made during this period.

Note 6. Fair Value Measurements

As described in Note 2, the Company uses fair value measurements to record fair value adjustments to certain assets and liabilities and to determine fair value disclosures. A description of the valuation methodologies used for assets and liabilities recorded at fair value, and for estimating fair value for financial and non-financial instruments not recorded at fair value, is set forth below.

Unsecured notes: The Notes are a Level 2 financial instrument with readily observable market inputs. The Notes trade under the ticker HCAPL and as of September 30, 2016 the fair value of \$28.0 million was based on the closing price of the Notes on that day.

Off-balance sheet financial instruments: The fair value of unfunded commitments is estimated based on the fair value of the funded portion of the corresponding debt investment.

Edgar Filing: Harvest Capital Credit Corp - Form 10-Q

As of September 30, 2016 and December 31, 2015, unfunded commitments totaled \$4.6 million and \$1.5 million, respectively, and if funded, their estimated fair values on such dates were \$4.5 million and \$1.5 million, respectively. There were

26

no assets or liabilities measured at fair value on a nonrecurring basis as of September 30, 2016 or December 31, 2015. The following table details the financial instruments that are carried at fair value and measured at fair value on a recurring basis as of September 30, 2016 and December 31, 2015, respectively:

Fair Values as of September 30, 2016

	Level 1	Level 2	Level 3	Total
Financial assets:				
Senior Secured (1)	\$-\$967,688		\$67,268,971	\$68,236,659
Junior Secured	—	\$8,451,025	54,602,333	63,053,358
CLO Equity	—		1,527,027	1,527,027
Equity and Equity Related	—		3,723,650	3,723,650
Revenue Linked Security	\$-\$—		\$930,140	\$930,140
	\$-\$9,418,713		\$128,052,121	\$137,470,834

Fair Values as of December 31, 2015

	Level 1	Level 2	Level 3	Total
Financial assets:				
Senior Secured (1)	\$-\$911,269		\$80,220,519	\$81,131,788
Junior Secured	—	\$14,642,630	43,593,371	58,236,001
CLO Equity	—		1,567,860	1,567,860
Equity	—		1,824,777	1,824,777
	\$-\$15,553,899		\$127,206,527	\$142,760,426

(1) Senior secured category includes both first out and last out term loans. The Company's last out senior secured loans are identified on the Consolidated Schedule of Investments.

The following table provides quantitative information related to the significant unobservable inputs used to fair value the Company's Level 3 investments as of September 30, 2016 and December 31, 2015, respectively, and indicates the valuation techniques utilized by the Company to determine the fair value:

Edgar Filing: Harvest Capital Credit Corp - Form 10-Q

Type of Investment	Fair Value at September 30, 2016	Valuation Technique (1)	Significant Unobservable Input	Range	Weighted Average
Senior Secured (2)	\$67,268,971	Bond Yield	Risk adjusted discount factor	8.4% - 30.0%	13.4%
		Market	EBITDA multiple	0.8x - 9.7x	5.5x
		Income	Weighted average cost of capital	10.0% - 23.0%	17.9%
Junior Secured	\$54,602,333	Bond Yield	Risk adjusted discount factor	4.7% - 20.0%	13.2%
		Market	EBITDA multiple	5.9x - 8.0x	7.0x
		Income	Weighted average cost of capital	10.5% - 25.0%	15.4%
Equity and Equity Related	\$3,723,650	Market	EBITDA multiple	3.7x - 9.7x	6.7x
		Income	Weighted average cost of capital	10.0% - 23.0%	18.8%
CLO equity	\$1,527,027	Bond Yield	Risk adjusted discount factor	14.5%	14.5%
Revenue Linked Security	\$930,140	Income	Weighted average cost of capital	45.8%	45.8%

Type of Investment	Fair Value at December 31, 2015	Valuation Technique (1)	Significant Unobservable Input	Range	Weighted Average
Senior Secured (2)	\$80,220,519	Bond Yield	Risk adjusted discount factor	9.1% - 30.0%	13.7%
		Market	EBITDA multiple	2.2x - 9.2x	4.7x
		Income	Weighted average cost of capital	2.2% - 20.6%	10.2%

Edgar Filing: Harvest Capital Credit Corp - Form 10-Q

Junior Secured	\$43,593,371	Bond Yield	Risk adjusted discount factor	4.9% - 21.8%	12.8%
		Market	EBITDA multiple	1.8x - 8.3x	5.7x
		Income	Weighted average cost of capital	4.0% - 19.5%	8.3%
Equity	\$1,824,777	Market	EBITDA multiple	2.6x - 16.6x	8.8x
		Income	Weighted average cost of capital	10.0% - 20.6%	14.1%
CLO equity	\$1,567,860	Bond Yield	Risk adjusted discount factor	13.2%	13.2%

28

When estimating the fair value of its debt investments, the Company typically utilizes the bond yield technique. The significant unobservable inputs used in the fair value measurement under this technique are risk adjusted discount factors. However, the Company also takes into consideration the market technique and income technique in order to determine whether the fair value of the debt investment is within the estimated enterprise value of the portfolio company. The significant unobservable inputs used under these techniques are EBITDA multiples, weighted average cost of capital and expected principal recovery. Under the bond yield technique, significant increases (decreases) in the risk adjusted discount factors would result in a significantly lower (higher) fair value measurement.

When estimating the fair value of its equity investments, the Company utilizes the (i) market technique and (ii) income technique. The significant unobservable inputs used in the fair value measurement of the Company's equity (1) investments are EBITDA multiples and weighted average cost of capital ("WACC"). Significant increases (decreases) in EBITDA multiple inputs in isolation would result in a significantly higher (lower) fair value measurement. Significant increases (decreases) in WACC inputs in isolation would result in a significantly lower (higher) fair value measurement.

When estimating the value of its CLO equity investment, the Company typically utilizes the bond yield technique. The significant unobservable inputs used in the fair value measurement under this technique are risk adjusted discount factors. The Company also utilizes the performance and covenant compliance information as provided by the independent trustee along with other risk factors including default risk, prepayment rates, interest rate risk and credit spread risk when valuing this investment.

(2) Senior secured category includes both first out and last out loans. The Company's last out senior secured loans are identified on the Consolidated Schedule of Investments.

The following table shows a reconciliation of the beginning and ending balances for Level 3 assets. Transfers between investment type and level, if any, are recognized at fair value at the end of the quarter in which the transfers occur :

29

Edgar Filing: Harvest Capital Credit Corp - Form 10-Q

	Nine Months Ended September 30, 2016					
	Senior Secured (1)	Junior Secured	CLO Equity	Equity and Equity Related	Revenue Linked Security	Total Level 3 Assets
Fair value of portfolio, beginning of period	\$80,220,519	\$43,593,371	\$1,567,860	\$1,824,777	\$—	\$127,206,527
New investments	12,136,667	10,800,000	—	3,900,000	895,962	27,732,629
Principal payments received	(23,197,018)	(100,000)	(63,408)	(810,578)	—	(24,171,004)
Loan origination fees received	(1,041,024)	(251,000)	—	—	—	(1,292,024)
Payment in kind interest earned	342,738	587,221	—	18,099	34,178	982,236
Accretion of deferred loan origination fees/discounts	498,309	583,505	—	—	—	1,081,814
Net realized losses on investments	(700,465)	—	—	182,559	—	(517,906)
Change in unrealized appreciation (depreciation) on investments (2)	(990,755)	(610,764)	22,575	(1,391,207)	—	(2,970,151)
Fair value of portfolio, end of period	\$67,268,971	\$54,602,333	\$1,527,027	\$3,723,650	\$930,140	\$128,052,121

(1) Senior secured category includes both first out and last out loans. The Company's last out senior secured loans are identified on the Consolidated Schedule of Investments.

The net change in unrealized appreciation (depreciation) of Level 3 investments held at September 30, 2016, was (2)(\$1,572,067). Net realized gains/losses and net change in unrealized appreciation/depreciation are reflected on the Consolidated Statement of Operations.

	Year Ended December 31, 2015					
	Senior Secured (1)	Junior Secured	CLO Equity	Equity	Revenue-Linked Security	Total Level 3 Assets
Fair value of portfolio, beginning of period	\$56,053,970	\$43,744,802	\$2,299,854	\$1,375,670	\$1,111,001	\$104,585,297
New investments	36,866,906	11,440,000	—	448,077	—	48,754,983
Principal payments received	(8,083,579)	(16,108,274)	(315,133)	(89,225)	(1,060,166)	(25,656,377)
Loan origination fees received	(937,190)	(122,500)	—	—	—	(1,059,690)
Payment in kind interest earned	603,852	304,697	—	—	183,243	1,091,792
Accretion of deferred loan origination fees/discounts	812,213	1,628,575	—	—	—	2,440,788
Transfer (to) from investment type	(4,315,133)	4,315,133	—	—	—	—
Net realized losses on investments	—	(674,880)	(351,217)	(104,525)	—	(1,130,622)
Change in unrealized appreciation (depreciation) on investments (2)	(780,520)	(934,182)	(65,644)	194,780	(234,078)	(1,819,644)
Fair value of portfolio, end of period	\$80,220,519	\$43,593,371	\$1,567,860	\$1,824,777	\$—	\$127,206,527

(1) Senior secured category includes both first out and last out loans. The Company's last out senior secured loans are identified on the Schedule of Investments.

(2)

Edgar Filing: Harvest Capital Credit Corp - Form 10-Q

The net change in unrealized appreciation/(depreciation) of Level 3 investments held at December 31, 2015, was \$(690,397). Net realized gains/(losses) and net change in unrealized appreciation/(depreciation) are reflected on the Statement of Operations.

The information presented should not be interpreted as an estimate of the fair value of the entire Company since a fair value calculation is only required for a portion of the Company's assets and liabilities.

Due to the wide range of valuation techniques and the degree of subjectivity used in making the estimates, comparisons between the Company's disclosures and those of other companies may not be meaningful.

Note 7. Related Party Transactions

We were founded in September 2011 by certain members of our investment adviser and JMP Group Inc. (now JMP Group LLC) ("JMP Group"), a full-service investment banking and asset management firm. JMP Group currently holds an equity interest in us and our investment adviser. JMP Group conducts its primary business activities through three wholly-owned subsidiaries: (i) Harvest Capital Strategies, LLC ("HCS"), an SEC registered investment adviser that focuses on long-short equity hedge funds, middle-market lending and private equity, (ii) JMP Securities LLC, a full-service investment bank that provides equity research, institutional brokerage and investment banking services to growth companies and their investors, and (iii) JMP Credit Advisors LLC ("JMP Credit Advisors"), which manages approximately \$1.1 billion in credit assets of collateralized loan obligation funds and a total return swap.

In conjunction with our initial public offering in May 2013, HCAP entered into an investment advisory and management agreement with HCAP Advisors LLC ("HCAP Advisors"), which is a majority owned subsidiary of JMP Group. Under the investment advisory and management agreement, the base management fee is calculated based on our gross assets (which includes assets acquired with the use of leverage and excludes cash and cash equivalents) at an annual rate of 2.0% on gross assets up to and including \$350 million, 1.75% on gross assets above \$350 million and up to and including \$1 billion, and 1.5% on gross assets above \$1 billion. The incentive fee consists of two parts. The first part is calculated and payable quarterly in arrears and equals 20% of our pre-incentive fee net investment income that exceeds a 2% quarterly (8% annualized) hurdle rate, subject to a catch-up provision measured at the end of each fiscal quarter. The second part is calculated and payable in arrears as of the end of each calendar year (or upon termination of the investment advisory and management agreement, as of the termination date) and equals 20% of our realized capital gains on a cumulative basis from inception through the end of each calendar year, computed net of all realized capital losses and unrealized capital depreciation on a cumulative basis, less the aggregate amount of any previously paid capital gain incentive fees.

The incentive fee is subject to a total return requirement, which provides that no incentive fee in respect of our pre-incentive fee net investment income is payable except to the extent 20% of the cumulative net increase in net assets resulting from operations over the then current and 11 preceding calendar quarters exceeds the cumulative income and capital gains incentive fees accrued and/or paid for the 11 preceding quarters. As a result, even in the event that our pre-incentive fee net investment income exceeds the hurdle rate, no incentive fee will be payable to the extent that we have generated cumulative net decreases in assets resulting from operations over the trailing 12 quarters due to unrealized or realized net losses on our investments.

Incentive fee expense for the three months and nine months ended September 30, 2016 totaled \$0.2 million and 1.2 million, respectively, after giving effect to the total return requirement discussed above. Incentive fee expense for the three and nine months ended September 30, 2016 would have been \$0.6 million and \$1.8 million, respectively, had the total return requirement not applied. Incentive fee expense for the three months and nine months ended September 30, 2015 totaled \$0.5 million and \$1.4 million, respectively.

The capital gains incentive fee is determined and paid annually with respect to cumulative realized capital gains (but not unrealized capital gains) to the extent such cumulative realized capital gains exceed cumulative realized and unrealized capital losses through the end of such fiscal year (less the aggregate amount of any previously paid capital gain incentive fee). The Company also records an expense accrual relating to the capital gains incentive fee payable by the Company to its investment adviser when (i) the cumulative realized and unrealized gains on its investments

exceed all cumulative realized and unrealized capital losses on its investments and (ii) the capital gains incentive fee that would be payable exceeds the aggregate amount of any previously paid capital gain incentive fee given the fact that a capital gains incentive fee would be owed to the investment adviser if the Company were to liquidate its investment portfolio at such time. Any decrease in unrealized appreciation in subsequent periods will result in the reversal of some or all of such previously recorded expense accrual. The actual incentive fee payable to the Company's investment adviser related to capital gains is determined and payable in arrears at the end of each fiscal year and is only based on cumulative realized capital gains, including realized capital gains for such period, but not unrealized capital gains. The Company recorded net change in unrealized depreciation of \$(1.3) million and \$(3.9) million and net realized gains (losses) of \$0.7 million and \$(0.5) million for the three months and nine months ended September 30, 2016, respectively.

Total base management fees and incentive management fees expense was \$1.0 million and \$1.2 million for the three months ended September 30, 2016 and September 30, 2015, respectively. Total base management fees and incentive management fees expense was \$3.4 million and \$3.4 million for the nine months ended September 30, 2016 and September 30, 2015, respectively. Accrued base management fees and incentive management fees were \$1.0 million and \$1.6 million as of September 30, 2016 and December 31, 2015, respectively.

In conjunction with our initial public offering in May 2013, HCAP entered into an administration agreement with JMP Credit Advisors pursuant to which JMP Credit Advisors provides administrative services to HCAP and furnishes us with office facilities, equipment, and clerical, bookkeeping, and record keeping services. Payments under the administration agreement are equal to an amount based upon our allocable portion of the administrator's overhead in performing its obligations under the administration agreement, including rent and our allocable portion of the cost of our chief financial officer and chief compliance officer and their respective staffs, except that payments required to be made by HCAP to JMP Credit Advisors under the agreement were capped such that amounts payable to JMP Credit Advisors would not exceed \$275,000 during the first year of the term of the administration agreement. In connection with the expiration of the \$275,000 cap on April 29, 2014, the Company negotiated a cap with JMP Credit Advisors of \$150,000 for each of the quarters ending June 30, September 30, and December 31, 2014. On March 5, 2015, the Company negotiated a cap with JMP Credit Advisors on amounts payable by the Company under the administration agreement during 2015. The 2015 cap set the maximum amount that was payable by the Company on both a quarterly and annual basis. The cap for each quarter was as follows: (i) for the quarter ended March 31, 2015, the cap was \$150,000; (ii) for the quarter ended June 30, 2015, the cap was equal to the sum of (a) \$150,000 plus (b) 0.25% of the increase in the Company's portfolio assets from December 31, 2014, to March 31, 2015; (iii) for the quarter ended September 30, 2015, the cap was equal to the sum of (a) \$150,000 plus (b) 0.25% of the increase in the Company's portfolio assets from December 31, 2014, to June 30, 2015; and (iv) for the quarter ended December 31, 2015, the cap was equal to the sum of (a) \$150,000 plus (b) 0.25% of the increase in the Company's portfolio assets from December 31, 2014, to September 30, 2015. The overall cap for the year was \$800,000, so notwithstanding any given quarterly cap, the amounts payable for all four quarters would not exceed \$800,000. In connection with the expiration of the 2015 cap, the Company negotiated an annual cap with JMP Credit Advisors for 2016 such that the maximum amount that would be payable by the Company for 2016 is the lesser of 0.60% of the average of the Company's total investments over the year ended December 31, 2016 or \$917,000. Total administrative services expense was \$0.2 million and \$0.6 million for the three months and the nine months ended September 30, 2016, respectively. Total administrative services expense was \$0.2 million and \$0.5 million for the three months and nine months ended September 30, 2015, respectively. Accrued administrative services fees were \$0.2 million and \$0.2 million as of September 30, 2016 and December 31, 2015, respectively.

In connection with the Company's offering of its Notes in January 2015, JMP Securities LLC was one of the co-managing underwriters and received approximately \$20,000 of compensation for its services. In the future, JMP Securities LLC or its affiliates may provide the Company with various financial advisory and investment banking services, for which they would receive customary compensation. We engaged JMP Securities LLC to facilitate the share repurchase program approved by our board of directors in March 2016. The total fees paid to JMP in connection with the share repurchase program have been less than \$1,000.

Note 8. Commitments and Contingencies

At September 30, 2016, the Company had a total of \$4.6 million in unfunded commitments comprised entirely of unfunded revolving line of credit commitments or delayed draw term loans on six of the Company's debt investments. At December 31, 2015, the Company had a total of \$1.5 million in unfunded commitments comprised entirely of unfunded revolving line of credit commitments on five of the Company's debt investments. The following table summarizes the Company's unfunded commitments and extended fair value as of September 30, 2016 and December 31, 2015:

Edgar Filing: Harvest Capital Credit Corp - Form 10-Q

	As of September 30, 2016		As of December 31, 2015	
	Unfunded Commitment	Extended Fair Value of unfunded commitment	Unfunded Commitment	Extended Fair Value of unfunded commitment
Brite Media LLC	\$—	\$—	\$266,667	\$266,667
Chemical Information Services, LLC	285,000	284,907	285,000	282,185
Infinite Care, LLC	1,000,000	985,895	—	—
Lanco Acquisition, LLC	450,000	450,000	350,000	350,000
Northeast Metal Works LLC	319,810	319,810	325,000	325,000
WorkWell, LLC	300,000	297,587	300,000	300,000
WBL SPE I, LLC	2,210,723	2,210,723	—	—
Total Unfunded Commitments	\$4,565,533	\$4,548,922	\$1,526,667	\$1,523,852

Legal Proceedings

We are not currently subject to any material legal proceedings, nor, to our knowledge, is any material legal proceeding threatened against us. From time to time, we may be a party to certain legal proceedings in the ordinary course of business, including proceedings relating to the enforcement of our rights under contracts with our portfolio companies.

Note 9. Net Increase in Net Assets Resulting from Operations per Common Share

In accordance with the provisions of ASC 260, "Earnings per Share," basic earnings per share is computed by dividing earnings available to common shareholders by the weighted average number of shares outstanding during the period. Other potentially dilutive common shares, and the related impact to earnings, are considered when calculating earnings per share on a diluted basis. There were no potentially dilutive common shares issued as of September 30, 2016 or September 30, 2015 because there were no outstanding warrants. The following information sets forth the computation of the weighted average basic and diluted net increase in net assets per share from operations for each period:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2016	2015	2016	2015
Net increase in net assets resulting from operations	\$2,370,050	\$841,413	\$3,229,716	\$4,316,252
Weighted average shares outstanding (basic and diluted)	6,286,216	6,255,746	6,282,371	6,244,540
Net increase in net assets resulting from operations per share (basic and diluted)	\$0.38	\$0.14	\$0.51	\$0.69

Note 10. Taxable/Distributable Income and Dividend Distributions

To receive RIC tax treatment, we must, among other things, distribute annually at least 90% of our net ordinary income and realized net short-term capital gains in excess of realized net long-term capital losses, if any. Depending on the level of taxable income earned in a tax year, we may choose to carry forward taxable income in excess of current year distributions into the next tax year and pay a 4% excise tax on such income. Any such carryover taxable income must be distributed through a dividend declared prior to filing the final tax return related to the year which generated such taxable income. We may, in the future, make actual distributions to our stockholders of our net capital gains. We can offer no assurance that we will achieve results that will permit the payment of any cash distributions and, if we issue senior securities, we may be prohibited from making distributions if doing so causes us to fail to

maintain the asset coverage ratios stipulated by the 1940 Act or if distributions are limited by the terms of any of our borrowings. The Company incurred a U.S. federal excise tax of \$1,393 for calendar year 2015 and has recorded excise tax of \$11,040 during the nine months ended September 30, 2016.

We have adopted an “opt out” dividend reinvestment plan, or “DRIP,” for our common stockholders. As a result, if we make cash distributions, then stockholders’ cash distributions will be automatically reinvested in additional shares of our common stock, unless they specifically “opt out” of the dividend reinvestment plan so as to receive cash distributions.

Note 11. Financial Highlights

The following is a schedule of financial highlights for the three months and nine months ended September 30, 2016, and September 30, 2015, respectively:

	Three Months Ended		Nine Months Ended	
	September 30, 2016	2015	September 30, 2016	2015
Per share data:				
Net asset value at beginning of period	\$13.71	\$14.47	\$14.26	\$14.60
Net investment income (1)	0.47	0.35	1.21	1.00
Realized gains (losses) on investments (1)	0.11	(0.04)	(0.07)	(0.15)
Net change in unrealized appreciation (depreciation) on investments	(0.20)	(0.17)	(0.63)	(0.16)
Net increase in net assets from operations	0.38	0.14	0.51	0.69
Distributions to stockholders (2)	(0.34)	(0.34)	(1.02)	(1.02)
Net asset value at end of period	\$13.75	\$14.27	\$13.75	\$14.27
Net assets at end of period	86,353,362	89,326,077	86,353,362	89,326,077
Shares outstanding at end of period	6,278,235	6,260,087	6,278,235	6,260,087
Weighted average shares outstanding (basic and diluted)	6,286,216	6,255,746	6,282,371	6,244,540
Per share closing price at end of period	\$12.17	\$11.91	\$12.17	\$11.91
Ratios and Supplemental data:				
Total return based on change in NAV (not annualized) (3)	3.15 %	1.41 %	5.34 %	6.05 %
Total investment return (not annualized) (4)	(3.64)%	(12.77)%	13.35 %	11.98 %
Average Net Assets	\$86,292,203	\$90,232,390	\$87,321,388	\$90,148,659
Ratio of expenses to average net assets (annualized)	11.66 %	12.32 %	12.33 %	11.09 %
Ratio of net investment income to average net assets (annualized)	13.81 %	9.72 %	11.63 %	9.25 %

(1) Based on weighted average number of common shares outstanding for the period.

Distributions for the three months and nine months ended September 30, 2016 were less than net investment income in the amount of \$856,097 and \$1,258,241, respectively. Distributions for the three months and nine months ended September 30, 2015 were less than net investment income in the amount of \$81,091 and in excess of net investment income in the amount of \$66,332, respectively. See Dividends and Distributions Policy in Note 2.

Total return based on change in net asset value measures the changes in net asset value over the period indicated, taking into account dividends as reinvested. The return is calculated by taking the difference between the net asset value per share at the end of the period (plus assumed reinvestment of dividends and distributions at prices obtained under the Company's dividend reinvestment plan) and the net asset value per share at the beginning of the period, and dividing that difference by the net asset value per share at the beginning of the period. This return primarily differs from the total investment return in that it does not take into account changes in the market price of the Company's stock.

Total investment return measures the changes in market value over the period indicated, taking into account dividends as reinvested. The return is calculated based on an assumed purchase of stock at the market price on the first day of the period (and assumed reinvestment of dividends and distributions at prices obtained under the Company's dividend reinvestment plan) and an assumed sale at the market price on the last day of the period. The difference between the sale and purchases is then divided by the purchase prices. The return does not reflect any sales load that may be paid by investors.

Note 12: Subsequent Events

On November 3, 2016, the Company declared monthly distributions of \$0.1125 per share payable on each of November 24, 2016, December 22, 2016 and January 19, 2017.

On October 26, 2016 the Company made an additional \$25,000 investment in the equity of Brite Media LLC.

On October 26, 2016, the Fox Rent-A-Car credit agreement was amended and restated to convert the loan from a junior secured term loan to a senior secured term loan secured by all assets of the Company other than the vehicle fleet. In September 2016, the borrower refinanced its first lien corporate credit facility with new financing from various fleet lenders. The Company earned a \$0.8 million amendment fee which is due at the earlier of i) maturity or ii) loan repayment. The maturity date was changed from October 31, 2019 to September 29, 2017 and amortization of \$0.2 million a month on the total loan amount will commence on March 31, 2017. The interest rate reverted back to the original level of LIBOR plus 12.00%. Also as part of the new agreement, the Company is entitled to receive additional fees and equity warrants in the borrower if our investment is not paid off at certain future dates. The investment was taken off of non-accrual status during the three months ended September 30, 2016 following the receipt of all past due interest.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations
Forward-Looking Statements

Some of the statements in this quarterly report on Form 10-Q constitute forward-looking statements, which relate to future events or our future performance or financial condition. The forward-looking statements contained in this quarterly report on Form 10-Q involve risks and uncertainties, including statements as to:

- our future operating results, including the performance of our existing investments;
- the introduction, withdrawal, success and timing of business initiatives and strategies;
- changes in political, economic or industry conditions, the interest rate environment or financial and capital markets, which could result in changes in the value of our assets;
- the relative and absolute investment performance and operations of our investment adviser;
- the impact of increased competition;
- the impact of investments we intend to make and future acquisitions and divestitures;
- our ability to turn potential investment opportunities into transactions and thereafter into completed and successful investments;
- the unfavorable resolution of any future legal proceedings;
- our business prospects and the prospects of our portfolio companies;
- our regulatory structure and tax status;
- the adequacy of our cash resources and working capital;
- the timing of cash flows, if any, from the operations of our portfolio companies;
- the impact of interest rate volatility on our results, particularly because we use leverage as part of our investment strategy;
- the ability of our portfolio companies to achieve their objective;
 - the impact of legislative and regulatory actions and reforms and regulatory, supervisory or enforcement actions of government agencies relating to us or our investment adviser;
- our contractual arrangements and relationships with third parties;
- our ability to access capital and any future financings by us;
- the ability of our investment adviser to attract and retain highly talented professionals; and
- the impact of changes to tax legislation and, generally, our tax position.

Such forward-looking statements may include statements preceded by, followed by or that otherwise include the words "may," "might," "will," "intend," "should," "could," "can," "would," "expect," "believe," "estimate," "anticipate," "predict" or similar words.

We have based the forward-looking statements included in this quarterly report on Form 10-Q on information available to us on the date of this quarterly report on Form 10-Q, and we assume no obligation to update any such forward-looking statements. Actual results could differ materially from those anticipated in our forward-looking statements, and future results could differ materially from historical performance. We undertake no obligation to revise or update any forward-looking statements, whether as a result of new information, future events or otherwise, unless required by law or SEC rule or regulation. You are advised to consult any additional disclosures that we may make directly to you or through reports that we in the future may file with the SEC, including annual reports on Form 10-K, quarterly reports on Form 10-Q and current reports on Form 8-K.

The following analysis of our financial condition and results of operations should be read in conjunction with our consolidated financial statements and the related notes thereto contained elsewhere in this quarterly report on Form 10-Q.

Overview

We were formed as a Delaware corporation on November 14, 2012. We completed our initial public offering on May 7, 2013, raising \$51.0 million in gross proceeds. On May 17, 2013, we raised another \$6.5 million in gross proceeds from the closing of the initial public offering underwriters' overallotment option. Immediately prior to the initial public offering, we acquired Harvest Capital Credit LLC in a merger whereby the outstanding limited liability company membership interests of Harvest Capital Credit LLC were converted into shares of our common stock and we assumed and succeeded to all of Harvest Capital Credit LLC's assets and liabilities, including its entire portfolio of investments. We issued 2,246,699 shares of our common stock for all of Harvest Capital Credit LLC's 2,266,974 outstanding membership interests in connection with the merger. Harvest Capital Credit LLC is considered to be our predecessor for accounting purposes and, as such, its financial statements are our historical consolidated financial statements.

Our investment objective is to generate both current income and capital appreciation primarily by making direct investments in the form of subordinated debt, senior debt, and to a lesser extent, minority equity investments. We plan to accomplish our investment objective by targeting investments in small and mid-sized U.S. private companies with annual revenues of less than \$100 million and EBITDA (earnings before interest, taxes, depreciation and amortization) of less than \$15 million. We believe that transactions involving companies of this size offer higher yielding investment opportunities, lower leverage levels and other terms more favorable than transactions involving larger companies.

We are an externally managed, closed-end, non-diversified management investment company that has elected to be regulated as a business development company ("BDC") under the Investment Company 1940 Act, as amended (the "1940 Act"). As a BDC, we are required to comply with certain regulatory requirements. For instance, as a BDC, we must not acquire any assets other than "qualifying assets" specified in the 1940 Act unless, at the time the acquisition is made, at least 70% of our total assets are qualifying assets (with certain limited exceptions). Qualifying assets include investments in "eligible portfolio companies." Under the relevant SEC rules, the term "eligible portfolio company" includes all private operating companies, companies whose securities are not listed on a national securities exchange, and certain public companies that have listed their securities on a national securities exchange and have a market capitalization of less than \$250 million, in each case organized in the United States.

We have also elected to be treated for U.S. federal income tax purposes as a regulated investment company ("RIC") under Subchapter M of the Internal Revenue Code (the "Code"), and we intend to receive RIC tax treatment annually. To receive RIC tax treatment, we must, among other things, meet certain source-of-income and asset diversification requirements. As a RIC, we generally will not have to pay corporate-level U.S. federal income taxes on any income we distribute to our stockholders, provided we distribute at least 90% of our ordinary income and short term capital gains.

Portfolio

Portfolio Composition

As of September 30, 2016, we had \$137.5 million (at fair value) invested in 33 companies. As of September 30, 2016, our portfolio was comprised of approximately 49.6% senior secured term loans (including last-out senior secured loans), 45.9% junior secured term loans, 2.7% equity investments and 1.8% CLO equity and revenue linked security investments.

As of December 31, 2015, we had \$142.8 million (at fair value) invested in 33 companies. As of December 31, 2015, our portfolio was comprised of approximately 56.8% senior secured term loans, 40.8% junior secured term loans, 1.3% equity investments and 1.1% CLO equity investments.

Edgar Filing: Harvest Capital Credit Corp - Form 10-Q

We originate and invest primarily in privately-held middle-market companies (typically those with less than \$15.0 million of EBITDA) through first lien and second lien debt, oftentimes with a corresponding equity investment component. The composition of our investments as of September 30, 2016 and December 31, 2015 was as follows:

40

Edgar Filing: Harvest Capital Credit Corp - Form 10-Q

	As of September 30, 2016		As of December 31, 2015	
	Cost	Fair Value	Cost	Fair Value
Senior Secured (1)	\$69,911,009	\$68,236,659	\$81,879,369	\$81,131,788
Junior Secured	65,605,241	63,053,358	59,156,136	58,236,001
Equity and Equity Related	4,916,977	3,723,650	1,626,897	1,824,777
CLO Equity and Revenue Linked Security	2,434,593	2,457,167	1,567,860	1,567,860
Total Investments	\$142,867,820	\$137,470,834	\$144,230,262	\$142,760,426

(1) Senior secured category includes both first out and last out loans. The Company's last out senior secured loans are identified on the Schedule of Investments.

At September 30, 2016, our average portfolio company debt investment at amortized cost and fair value was approximately \$4.5 million and \$4.4 million, respectively, and our largest portfolio company debt investment by amortized cost and fair value was approximately \$12.7 million and \$12.9 million, respectively. At December 31, 2015, our average portfolio company debt investment at amortized cost and fair value was approximately \$4.4 million and \$4.3 million, respectively, and our largest portfolio company debt investment by amortized cost and fair value was approximately \$12.9 million and \$13.1 million, respectively.

At September 30, 2016, 66.2% of our debt investments bore interest based on floating rates (some of which were subject to interest rate floors), such as LIBOR, and 33.8% of the debt investments bore interest at fixed rates. At December 31, 2015, 70.9% of our debt investments bore interest based on floating rates (some of which were subject to interest rate floors), such as LIBOR, and 29.1% bore interest at fixed rates.

The weighted average effective yield on all of our debt investments and other income producing investments, excluding Shinnecock CLO 2006-1 Ltd. and equity components of the investment portfolio, as of September 30, 2016 and December 31, 2015, was approximately 14.4% and 13.9%, respectively. The weighted average effective yield is computed using the effective interest rates for such investments, including cash and PIK interest as well as the accretion of deferred fees. The individual investment yields are then weighted by the respective fair values of the investments (as of the date presented) in calculating the weighted average effective yield of the portfolio.

For investments that have a PIK interest component, PIK interest is accrued each period but generally not collected until the debt investment is sold or paid off. A roll forward of PIK interest accruals and collections for the three months and nine months ended September 30, 2016 and September 30, 2015 is summarized in the table below.

	Three Months Ended		Nine Months Ended	
	September 30, 2016	September 30, 2015	September 30, 2016	September 30, 2015
PIK, beginning of period	\$1,870,747	\$2,075,394	\$1,756,332	\$1,524,126
Accrual	431,047	267,681	982,236	888,799
Payments	—	(352,531)	(436,775)	(422,381)
PIK, end of period	\$2,301,794	\$1,990,544	\$2,301,793	\$1,990,544

Investment Activity

During the three months ended September 30, 2016, we closed \$2.1 million of debt investment commitments in one new portfolio company and \$3.5 million in two existing portfolio companies. During the three months ended September 30, 2015, we closed \$19.5 million of debt investment commitments in four new portfolio companies and two of our existing portfolio companies.

Edgar Filing: Harvest Capital Credit Corp - Form 10-Q

During the three months ended September 30, 2016, we exited a \$4.0 million debt investment commitment in one portfolio company and a \$0.1 million equity investment in one portfolio company. We also received \$7.4 million in principal repayments due to scheduled amortization and prepayments. During the three months ended September 30, 2015, we exited \$4.5 million of debt investment commitments in two portfolio companies. We also received \$1.9 million in principal repayments due to scheduled amortization and prepayments.

41

During the nine months ended September 30, 2016, we closed \$25.9 million of debt investment commitments in three new portfolio companies and two existing portfolio companies. We also closed two equity investments for \$3.9 million in two portfolio companies. During the nine months ended September 30, 2015, we closed \$40.1 million of debt investment commitments in seven new portfolio companies and four of our existing portfolio companies. We also closed one equity investment for \$0.1 million in one portfolio company.

During the nine months ended September 30, 2016, we exited debt investment commitments in three portfolio companies totaling \$14.4 million, two equity investments totaling \$0.4 million, and received \$14.5 million in principal repayments due to scheduled amortization or prepayments. During the nine months ended September 30, 2015, we exited \$5.5 million of debt investment commitments. Additionally, we received \$5.9 million in principal repayments due to scheduled amortization and prepayments.

Our level of investment activity can vary substantially from period to period depending on many factors, including the level of merger and acquisition activity in our target market, the general economic environment and the competitive environment for the types of investments we make.

Asset Quality

In addition to various risk management and monitoring tools, we use an investment rating system to characterize and monitor the credit profile and expected level of returns on each investment in our portfolio. This investment rating system uses a five-level numeric scale. The following is a description of the conditions associated with each investment rating:

Investment Rating 1 is used for investments that are performing above expectations, and whose risks remain favorable compared to the expected risk at the time of the original investment.

Investment Rating 2 is used for investments that are performing within expectations and whose risks remain neutral compared to the expected risk at the time of the original investment. All new loans are initially rated 2.

Investment Rating 3 is used for investments that are performing below expectations and that require closer monitoring, but where no loss of return or principal is expected. Portfolio companies with a rating of 3 may be out of compliance with financial covenants.

Investment Rating 4 is used for investments that are performing substantially below expectations and whose risks have increased substantially since the original investment. These investments are often in work out.

Investments with a rating of 4 are those for which there is an increased possibility of some loss of return but no loss of principal is expected.

Investment Rating 5 is used for investments that are performing substantially below expectations and whose risks have increased substantially since the original investment. These investments are almost always in work out.

Investments with a rating of 5 are those for which some loss of return and principal is expected.

The following table shows the investment rankings of our debt investments at fair value (in millions):

Investment Rating	As of September 30, 2016			As of December 31, 2015		
	Fair Value	% of Total Portfolio	Number of Debt Investments	Fair Value	% of Total Portfolio	Number of Debt Investments
1	\$38.6	29.4 %	11	\$31.5	22.6 %	5
2	68.0	51.7 %	13	87.7	62.9 %	19
3	14.3	10.9 %	3	12.1	8.7 %	3
4	10.3	7.9 %	2	7.2	5.2 %	2
5	0.1	0.1 %	1	0.9	0.6 %	1

Edgar Filing: Harvest Capital Credit Corp - Form 10-Q

\$131.3 100.0 % 30

\$139.4 100.0 % 30

Loans and Debt Securities on Non-Accrual Status

We do not accrue interest income on loans and debt securities if we doubt our ability to collect such interest. Generally, we will place the loan on non-accrual for such investments in which interest has not been paid for greater than 90 days. However, collections actually received on non-accrual loans may be recognized as interest income on a cash basis or applied to principal depending on management's judgment regarding collectability. As of September 30, 2016, we had two loans on non-accrual status which comprised 6.1% of our debt investments at cost. One of the non-accrual loans (our junior secured debt investment in Peekay Acquisition, LLC) represented 1.5% of our debt investments at cost. The other non-accrual loan (our subordinated debt investment in CRS Reprocessing LLC), represented 4.6% of our debt investments at cost. In the case of CRS, we recognized the cash interest collected during the three months ended September 30, 2016, as interest income. As of December 31, 2015, we had one loan on non-accrual status, which comprised approximately 1.1% of our debt investments at cost. The failure by a borrower or borrowers to pay interest and repay principal could have a material adverse effect on our financial condition and results of operation.

Results of Operations

An important measure of our financial performance is the net increase (decrease) in net assets resulting from operations, which includes net investment income (loss), net realized gain (loss) and net change in unrealized appreciation (depreciation). Net investment income (loss) is the difference between our income from interest, dividends, fees and other investment income and our operating expenses, including interest on borrowed funds. Net realized gain (loss) on investments is the difference between the proceeds received from dispositions of portfolio investments and their amortized cost. Net change in unrealized appreciation (depreciation) on investments is the net unrealized change in the fair value of our investment portfolio.

Comparison of the Three Months and Nine Months Ended September 30, 2016 and September 30, 2015

Revenues

We generate revenue primarily in the form of interest income on debt investments and, to a lesser extent, capital gains on equity investments we make in portfolio companies. Our debt investments typically have terms of five to seven years and bear interest at a fixed or floating rate. Interest on our debt investments is payable at least quarterly. Payments of principal on our debt investments may be amortized over the stated term of the investment, deferred for several years or due entirely at maturity. In some cases, our debt investments may pay interest in-kind, or PIK. Any outstanding principal amount of our debt investments and any accrued but unpaid interest will generally become due at the maturity date. The level of interest income we receive is directly related to the balance of interest-bearing investments multiplied by the weighted average yield of our investments. We expect that the dollar amount of interest and any dividend income that we earn to increase as the size of our investment portfolio increases. In addition, we may generate revenue in the form of prepayment, commitment, loan origination, structuring or due diligence fees and consulting fees, which may be non-recurring in nature.

Investment income for the three months ended September 30, 2016 totaled \$5.5 million, compared to investment income of \$5.0 million for the three months ended September 30, 2015. Investment income for the three months ended September 30, 2016 was comprised of \$4.7 million in cash interest, \$0.4 million in PIK interest, \$0.3 million in fees earned on the investment portfolio, and \$0.1 million in other income. Investment income for the three months ended September 30, 2015 was comprised of \$4.1 million in cash interest, \$0.3 million in PIK interest and \$0.6 million in fees earned on the investment portfolio. The increase in investment income for the three months ended September 30, 2016 is primarily attributable to the Fox Rent-a-Car investment returning to accrual status during the period. We recognized \$0.4 million in interest income in the three months ended September 30, 2016 related to this investment

that would have been recognized in the three months ended June 30, 2016, had the investment not been on non-accrual during that time.

Investment income for the nine months ended September 30, 2016 totaled \$15.7 million, compared to investment income of \$13.8 million for the nine months ended September 30, 2015. Investment income for the nine months ended September 30, 2016 was comprised of \$13.4 million in cash interest, \$1.0 million in PIK interest, \$1.2 million in fees earned on the investment portfolio, and \$0.1 million in other income. Investment income for the nine months ended September 30, 2015 was comprised of \$11.4 million in cash interest, \$0.9 million in PIK interest and \$1.4 million in fees earned on the investment portfolio. The

increase in investment income in the nine months ended September 30, 2016 is primarily attributable to a larger investment portfolio during the period .

Expenses

Our primary operating expenses include the payment of fees to HCAP Advisors LLC ("HCAP Advisors") under the investment advisory and management agreement, our allocable portion of overhead expenses under the administration agreement with JMP Credit Advisors, and other operating costs described below. We bear all other out-of-pocket costs and expenses of our operations and transactions, which include:

- interest expense and unused line fees;
- professional fees and expenses associated with independent audits and outside legal costs;
- the cost of calculating our net asset value, including the cost of third-party valuation services;
- the cost of effecting sales and repurchases of shares of our common stock and other securities;
- fees payable to third parties relating to making investments, including out-of-pocket fees and expenses associated with performing due diligence and reviews of prospective investments;
- transfer agent and custodial fees;
- out-of-pocket fees and expenses associated with marketing efforts;
- federal and state registration fees and any stock exchange listing fees;
- U.S. federal, state and local taxes;
- independent directors' fees and expenses;
- brokerage commissions;
- fidelity bond, directors' and officers' liability insurance and other insurance premiums;
- direct costs, such as printing, mailing and telephone;
 - costs associated with our reporting and compliance obligations under the 1940 Act and other applicable U.S. federal and state securities laws; and
- other expenses incurred in connection with administering our business.

Operating expenses totaled \$2.6 million for the three months ended September 30, 2016, compared to \$2.8 million for the three months ended September 30, 2015. Operating expenses in both periods consisted of interest expense, base and incentive management fees, administrator expenses, interest and related fees, professional fees, valuation fees, insurance expenses, directors' fees, and other general and administrative expenses. The decrease in operating expenses was primarily a result of lower incentive fees (discussed in greater detail below) in the three months ended September 30, 2016.

Operating expenses totaled \$8.1 million for the nine months ended September 30, 2016, compared to \$7.5 million for the nine months ended September 30, 2015. The increase in operating expenses was due to higher interest expense and management fees (discussed in greater detail below) for the nine months ended September 30, 2016, compared to the nine months ended September 30, 2015.

Interest expense totaled \$1.0 million and \$2.8 million for the three months and nine months ended September 30, 2016, respectively, compared to \$0.9 million and \$2.4 million for the three months and nine months ended September 30, 2015. The increase in interest expense was due to a higher average outstanding indebtedness during the three months and nine months ended September 30, 2016, compared to September 30, 2015 .

The base management fee for the three months ended September 30, 2016 was \$724,396, compared to \$707,238 for the three months ended September 30, 2015. The increase in the base management fee is attributable to increased gross investments during the three months ended September 30, 2016, as compared to the three months ended September 30, 2015.

Edgar Filing: Harvest Capital Credit Corp - Form 10-Q

The base management fee for the nine months ended September 30, 2016 was \$2.2 million, compared to \$2.0 million for the nine months ended September 30, 2015. The increase in the base management fee is attributable to increased gross investments during the nine months ended September 30, 2016, as compared to the nine months ended September 30, 2015.

Incentive management fees for the three months ended September 30, 2016 were \$230,760, compared to \$516,999 for the three months ended September 30, 2015. Incentive management fees for the nine months ended September 30, 2016 were \$1.2 million, compared to \$1.4 million for the nine months ended September 30, 2015. The decrease in incentive management fees for the three months and nine months ended September 30, 2016, compared to the three months and nine months ended September 30, 2015 is a result of the total return provision in the investment advisory and management agreement. The incentive fees paid or owed to HCAP Advisors are subject to a three year total return requirement, such that no incentive fee, in respect of pre-incentive fee net investment income, will be payable except to the extent 20.0% of the cumulative net increase in net assets resulting from operations over the calendar quarter for which such fees are being calculated and the 11 preceding quarters exceeds the cumulative incentive fees paid or accrued over the 11 preceding quarters. Due to this total return requirement, incentive fees of \$0.3 million and \$0.5 million were not paid or accrued for the three months and nine months ended September 30, 2016, respectively.

Net Investment Income

For the three months and nine months ended September 30, 2016, net investment income was \$3.0 million and \$7.6 million, compared to \$2.2 million and \$6.3 million for the three months and nine months ended September 30, 2015. For the three months and nine months ended September 30, 2016, net investment income per share was \$0.47 and \$1.21 compared to \$0.35 and \$1.00 for the three months and nine months ended September 30, 2015.

Net Realized Gains and Losses

Realized gains and losses on investments are calculated using the specific identification method. We measure realized gains or losses on equity investments as the difference between the net proceeds from the sale and the amortized cost basis of the investment, without regard to unrealized appreciation or depreciation previously recognized. We measure realized gains or losses on debt investments as the difference between the net proceeds from the repayment or sale and the contractual amount owed to us on the investment, without regard to unrealized appreciation or depreciation previously recognized or unamortized deferred fees. The acceleration of unamortized deferred fees is recognized as interest income and the collection of prepayment and other fees is recognized as other income.

We recognized \$0.7 million in net realized gains on our investments for the three months ended September 30, 2016, compared to \$0.3 million in net realized losses on our investments in the three months ended September 30, 2015. We recognized \$0.5 million in net realized losses on our investments for the nine months ended September 30, 2016, compared to \$1.0 million in net realized losses on our investments in the nine months ended September 30, 2015.

A summary of realized gains and losses for the three and nine months ended September 30, 2016 and 2015 is as follows:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2016	2015	2016	2015
Bridgewater Engine Ownership III, LLC (Residual Value)	18,301	—	18,301	—

Net Change in Unrealized (Depreciation) Appreciation of Investments

Net change in unrealized appreciation (depreciation) primarily reflects the change in portfolio investment values during the reporting period, including the reversal of previously recorded appreciation or depreciation when gains or losses are realized. Net change in unrealized appreciation (depreciation) on investments totaled \$(1.3) million and \$(3.9) million for the three months and nine months ended September 30, 2016, compared to \$(1.1) million and \$(1.0) million for the three months and nine months ended September 30, 2015.

The net change in unrealized appreciation and depreciation of our investments is based on the fair value of each investment determined in good faith by our board of directors. The following table summarizes the change in net unrealized appreciation (depreciation) for the three and nine months ended September 30, 2016 and 2015:

	Three Months Ended		Nine Months Ended	
	September 30, 2016	September 30, 2015	September 30, 2016	September 30, 2015
Gross unrealized appreciation	1,626,083	463,445	2,957,945	3,043,543
Gross unrealized depreciation	(2,190,567)	(1,611,944)	(7,384,739)	(4,122,119)
Reversal of prior period appreciation upon a realization	(746,017)	(9,584)	(746,017)	(9,590)
Reversal of prior period depreciation upon a realization	—	104,525	1,245,661	105,149
Net unrealized depreciation	(1,310,501)	(1,053,558)	(3,927,150)	(983,017)

Net Increase in Net Assets Resulting from Operations

The net increase in net assets resulting from operations was \$2.4 million for the three months ended September 30, 2016, compared to \$0.8 million for the three months ended September 30, 2015. The \$1.6 million increase for the three months ended September 30, 2016, compared to the three months ended September 30, 2015, was primarily attributable to a \$0.8 million increase in net investment income and a \$0.7 million positive change in the net unrealized and realized (losses) gains on investments for the three months ended September 30, 2016, as compared to the the three months ended September 30, 2015.

The net increase in net assets resulting from operations was \$3.2 million for the nine months ended September 30, 2016, compared to \$4.3 million for the nine months ended September 30, 2015. The \$1.1 million decrease for the nine months ended September 30, 2016, compared to the nine months ended September 30, 2015, was primarily attributable to a \$2.5 million increase in the total net change in unrealized and realized losses on investments, partially offset by a \$1.4 million increase in net investment income for the nine months ended September 30, 2016, as compared to the the nine months ended September 30, 2015.

Financial Condition, Liquidity and Capital Resources

Cash Flows from Operating and Financing Activities

Our operating activities provided cash of \$9.2 million for the nine months ended September 30, 2016, and used cash of \$23.3 million for the nine months ended September 30, 2015, primarily due to an increase in principal payments received and a decrease in investments made in the nine months ended September 30, 2016, as compared to the corresponding period in 2015. Our financing activities used cash of \$9.0 million for the nine months ended September 30, 2016 and provided cash of \$23.6 million for the nine months ended September 30, 2015, primarily due to a decrease in proceeds received from debt issuances and borrowings in the nine months ended September 30, 2016, as compared to the corresponding period in 2015.

Our liquidity and capital resources are derived from our Credit Facility (defined below) and proceeds received from cash flows from operations, including investment sales and repayments. Our primary use of funds from operations includes investments in portfolio companies and other operating expenses we incur, as well as the payment of dividends to the holders of our common stock. We used, and expect to continue to use, these capital resources as well as proceeds from public and private offerings of securities to finance our investment activities.

Although we expect to fund the growth of our investment portfolio through the net proceeds from future equity offerings and issuances of senior securities or future borrowings to the extent permitted by the 1940 Act, our plans to raise capital may not be successful. In this regard, if our common stock trades at a price below our then-current net asset value per share, we may be limited in our ability to raise equity capital given that we cannot sell our common stock at a price below net asset value per share unless our stockholders approve such a sale and our board of directors makes certain determinations in connection therewith. For

portions of 2016 and 2015, including during the three months and nine months ended September 30, 2016, our common stock traded at a discount to our then-current net asset value. If our common stock continues to trade at a discount to net asset value, we may be limited in our ability to raise equity capital unless we obtain the approval described above, which we have not obtained.

In addition, we intend to distribute between 90% and 100% of our taxable income to our stockholders in order to satisfy the requirements applicable to RICs under Subchapter M of the Code. Consequently, we may not have the funds or the ability to fund new investments, to make additional investments in our portfolio companies, to fund our unfunded commitments to portfolio companies or to repay borrowings. In addition, the illiquidity of our portfolio investments may make it difficult for us to sell these investments when desired, and if we are required to sell these investments, we may realize significantly less than their recorded value.

Also, as a BDC, we are generally required to meet a coverage ratio of total assets, less liabilities and indebtedness not represented by senior securities, to total senior securities, which include all of our borrowings and any outstanding preferred stock, of at least 200%. This requirement limits the amount that we may borrow. As of September 30, 2016 and December 31, 2015, we were in compliance with this requirement. The amount of leverage that we employ as a BDC will depend on our assessment of market conditions and other factors at the time of any proposed borrowing, such as the maturity, covenant package and rate structure of the proposed borrowings, our ability to raise funds through the issuance of shares of our common stock and the risks of such borrowings within the context of our investment outlook. Ultimately, we only intend to use leverage if the expected returns from borrowing to make investments will exceed the cost of such borrowing.

As of September 30, 2016 and December 31, 2015, we had cash and restricted cash of \$3.2 million and \$3.1 million, respectively.

Credit Facility

On October 29, 2013, the Company entered into a Loan and Security Agreement with CapitalSource Bank (now Pacific Western Bank), as agent and a lender, and each of the lenders from time to time party thereto, including City National Bank, to provide the Company with a \$55 million senior secured revolving credit facility (the "Credit Facility"). The Credit Facility is secured by all of the Company's assets and has an accordion feature that allows the size of the facility to increase up to \$85.0 million. The final maturity date under the Credit Facility is October 29, 2018.

The Credit Facility was amended on September 22, 2015 to extend the revolving period and lower the interest rate. The original Credit Facility had a revolving period that expired on October 29, 2015. Advances under the original Credit Facility bore interest at a rate per annum equal to the lesser of (i) LIBOR plus 4.50% and (ii) the maximum rate permitted under applicable law. The amended Credit Facility has a revolving period that expires on April 30, 2017. Advances under the amended Credit Facility bear interest at a rate per annum equal to the lesser of (i) the applicable LIBOR rate plus 3.25% (with a 0.50% LIBOR floor) and (ii) the maximum rate permitted under applicable law. In addition, the Credit Facility requires payment of a fee for unused amounts during the revolving period, which fee varies depending on the obligations outstanding as follows: (i) 0.75% per annum, if the average daily principal balance of the obligations outstanding for the prior month are less than fifty percent of the maximum loan amount; and (ii) 0.50% per annum, if such obligations outstanding are equal to or greater than fifty percent of the maximum loan amount. In each case, the fee is calculated based on the difference between (i) the maximum loan amount under the Credit Facility and (ii) the average daily principal balance of the obligations outstanding during the prior calendar month.

The Credit Facility also contains customary terms and conditions, including, without limitation, affirmative and negative covenants, including, without limitation, information reporting requirements, a minimum tangible net worth, a minimum debt service coverage ratio, a minimum liquidity of 4% of the maximum loan amount, a maximum leverage ratio of 1.00 to 1.00, and maintenance of RIC and business development company status. In addition, the

Credit Facility contains a covenant that limits the amount of our unsecured longer-term indebtedness (as defined in the Credit Facility), which includes our Notes, to 50% of the maximum borrowing amount under the Credit Facility. The Credit Facility also contains customary events of default, including, without limitation, nonpayment, misrepresentation of representations and warranties in a material respect, breach of covenant, cross-default to other indebtedness, bankruptcy, change of control, and the occurrence of a material adverse effect. In addition, the Credit Facility provides that, upon the occurrence and during the continuation of such an event of default, the Company's administration agreement could be terminated and a backup administrator could be substituted by the agent.

On August 4, 2016, the Company entered into an amendment to its Credit Facility. The agreement was amended to, among other things, (i) provide for the formation and operation of HCAP Equity Holdings, LLC as a wholly owned subsidiary of the Company to hold equity investments and to become an additional borrower under the credit facility; and (ii) establish certain liquidity thresholds that must be satisfied in connection with any repurchase by the Company of its securities, including at the time of any such repurchase and over any given quarter. In connection with the amendment, the Company also entered into a pledge agreement in favor of the agent under the Credit Facility, pursuant to which, among other things, the Company agreed to pledge and grant a first priority security interest to the agent in the Company's right, title, and interest in its membership interests in HCAP Equity Holdings, LLC.

As of September 30, 2016 and December 31, 2015, the outstanding balance on the \$55.0 million Credit Facility was \$27.1 million and \$29.7 million, respectively.

Notes Offering

On January 27, 2015, the Company closed the public offering of \$25.0 million in aggregate principal amount of its 7.00% Notes due 2020 (the "Notes"). On February 4, 2015, the Company closed on an additional \$2.5 million in aggregate principal amount of Notes to cover the over-allotment option exercised by the underwriters. The total net proceeds to the Company from the Notes, after deducting underwriting discounts of \$825,000 and offering expenses of \$224,384, were \$26.5 million.

The Notes will mature on January 16, 2020 and bear interest at a rate of 7.00%. The Notes are unsecured obligations of the Company and rank pari passu with the Company's future unsecured indebtedness; effectively subordinated to all of the existing and future secured indebtedness of the Company; and structurally subordinated to all existing and future indebtedness and other obligations of any subsidiaries, financing vehicles, or similar facilities the Company may form in the future, with respect to claims on the assets of any such subsidiaries, financing vehicles, or similar facilities. The Notes may be redeemed in whole or in part at any time or from time to time at the Company's option on or after January 16, 2017. Interest on the Notes is payable quarterly on January 16, April 16, July 16, and October 16 of each year. The Notes are listed on the NASDAQ Global Market under the trading symbol "HCAPL." The Company may from time to time repurchase Notes in accordance with the 1940 Act and the rules promulgated thereunder. As of September 30, 2016, the outstanding balance of the Notes was \$27.5 million.

The indenture governing the Notes (the "Notes Indenture") contains certain covenants, including covenants (i) requiring the Company's compliance with the asset coverage requirements set forth in Section 18(a)(1)(A) as modified by Section 61(a)(1) of the 1940 Act, whether or not the Company continues to be subject to such provisions of the 1940 Act; (ii) requiring the Company's compliance, under certain circumstances, with a modified version of the requirements set forth in Section 18(a)(1)(B) as modified by Section 61(a)(1) of the 1940 Act, whether or not the Company continues to be subject to such provisions of the 1940 Act, prohibiting the declaration of any cash dividend or distribution upon any class of the Company's capital stock (except to the extent necessary for the Company to maintain its treatment as a RIC under Subchapter M of the Code), or purchasing any such capital stock, if the Company's asset coverage, as defined in the 1940 Act, were below 200% at the time of the declaration of the dividend or distribution or the purchase and after deducting the amount of such dividend, distribution, or purchase; and (iii) requiring the Company to provide financial information to the holders of the Notes and the Trustee if the Company ceases to be subject to the reporting requirements of the Securities Exchange Act of 1934. These covenants are subject to limitations and exceptions that are described in the Notes Indenture.

Stock Repurchase Program

On March 8, 2016, our board of directors authorized a \$3.0 million open market stock repurchase program. Pursuant to our program, we are authorized to repurchase up to \$3.0 million in the aggregate of our outstanding stock in the open market. The timing, manner, price and amount of any share repurchases will be determined by our management

in its discretion, and no assurances can be given that any common stock, or any particular amount, will be purchased. Unless amended by our board of directors, the repurchase program will expire on the earlier of December 31, 2016 and the repurchase of \$3.0 million of our outstanding shares of common stock. The program may be suspended, extended, modified, or discontinued at any time. During the three months and nine months ended September 30, 2016, the Company repurchased 20,176 and 25,676 shares of its common stock, respectively.

Off-Balance Sheet Arrangements

We may be a party to financial instruments with off-balance sheet risk in the normal course of business to meet the financial needs of our portfolio companies. As of September 30, 2016, our only off-balance sheet arrangements consisted of \$4.6 million

of unfunded revolving line of credit and delayed draw term loan commitments to six of our portfolio companies. As of December 31, 2015, our only off-balance sheet arrangements consisted of \$1.5 million of unfunded revolving line of credit commitments to five of our portfolio companies.

Regulated Investment Company Status and Dividends

We have elected to be treated as a RIC under Subchapter M of the Code. If we receive RIC tax treatment, we will not be taxed on our investment company taxable income or realized net capital gains, to the extent that such taxable income or gains are distributed, or deemed to be distributed, to stockholders on a timely basis.

Taxable income generally differs from net income for financial reporting purposes due to temporary and permanent differences in the recognition of income and expenses, and generally excludes net unrealized appreciation or depreciation until realized. Dividends declared and paid by us in a year may differ from taxable income for that year as such dividends may include the distribution of current year taxable income or the distribution of prior year taxable income carried forward into and distributed in the current year. Distributions also may include returns of capital.

To receive RIC tax treatment, the Company is required to meet certain income and asset diversification tests in addition to distributing at least 90% of ordinary income and realized net short-term capital gains in excess of realized net long-term capital losses, if any, out of the assets legally available for distribution. As a RIC, the Company will be subject to a 4% nondeductible U.S. federal excise tax on certain undistributed income unless the Company distributes in a timely manner an amount at least equal to the sum of (1) 98% of its ordinary income for each calendar year, (2) 98.2% of its capital gain net income for the 1-year period ending October 31 in that calendar year and (3) any ordinary income and net capital gains for preceding years that were not distributed during such years and on which the Company paid no U.S. federal income tax.

We intend to distribute to our stockholders between 90% and 100% of our annual taxable income (which includes our taxable interest and fee income). However, the covenants contained in the Credit Facility may prohibit us from making distributions to our stockholders, and, as a result, could hinder our ability to satisfy the distribution requirement. In addition, we may retain for investment some or all of our net taxable capital gains (i.e., realized net long-term capital gains in excess of realized net short-term capital losses) and treat such amounts as deemed distributions to our stockholders. If we do this, our stockholders will be treated as if they received actual distributions of the capital gains we retained and then reinvested the net after-tax proceeds in our common stock. Our stockholders also may be eligible to claim tax credits (or, in certain circumstances, tax refunds) equal to their allocable share of the tax we paid on the capital gains deemed distributed to them. To the extent our taxable earnings for a fiscal taxable year fall below the total amount of our dividends for that fiscal year, a portion of those dividend distributions may be deemed a return of capital to our stockholders.

We may not be able to achieve operating results that will allow us to make distributions at a specific level or to increase the amount of these distributions from time to time. In addition, we may be limited in our ability to make distributions due to the asset coverage test for borrowings applicable to us as a BDC under the 1940 Act and due to provisions in the Credit Facility. We cannot assure stockholders that they will receive any distributions or distributions at a particular level.

In accordance with certain applicable Treasury regulations and private letter rulings issued by the Internal Revenue Service, a RIC may treat a distribution of its own stock as fulfilling its RIC distribution requirements if each stockholder may elect to receive his or her entire distribution in either cash or stock of the RIC, subject to a limitation that the aggregate amount of cash to be distributed to all stockholders must be at least 20% of the aggregate declared distribution. If too many stockholders elect to receive cash, each stockholder electing to receive cash must receive a pro rata amount of cash (with the balance of the distribution paid in stock). In no event will any stockholder, electing to receive cash, receive less than 20% of his or her entire distribution in cash. If these and certain other requirements

are met, for U.S. federal income tax purposes, the amount of the dividend paid in stock will be equal to the amount of cash that could have been received instead of stock. We have no current intention of paying dividends in shares of our stock in accordance with these Treasury regulations or private letter rulings.

Recent Developments

49

On November 3, 2016, the Company declared monthly distributions of \$0.1125 per share payable on each of November 24, 2016, December 22, 2016 and January 19, 2017.

On October 26, 2016 the Company made an additional \$25,000 investment in the equity of Brite Media LLC.

On October 26, 2016, the Fox Rent-A-Car credit agreement was amended and restated to convert the loan from a junior secured term loan to a senior secured term loan secured by all assets of the Company other than the vehicle fleet. In September 2016, the borrower refinanced its first lien corporate credit facility with new financing from various fleet lenders. The Company earned a \$0.8 million amendment fee which is due at the earlier of i) maturity or ii) loan repayment. The maturity date was changed from October 31, 2019 to September 29, 2017 and amortization of \$0.2 million a month on the total loan amount will commence on March 31, 2017. The interest rate reverted back to the original level of LIBOR plus 12.00%. Also as part of the new agreement, the Company is entitled to receive additional fees and equity warrants in the borrower if our investment is not paid off at certain future dates. The investment was taken off of non-accrual status during the three months ended September 30, 2016 following the receipt of all past due interest.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

We are subject to financial market risks, including changes in interest rates. As of September 30, 2016, twenty-one of our debt investments, or 66.2%, of the fair value of our debt investments bore interest at floating rates. Seventeen of these floating rate loans have interest rate floors, with the weighted average LIBOR floor at 0.59%, which effectively converts the loans to fixed rate loans in the current interest rate environment. Two of these floating rate loans have interest rates that are the greater of a fixed rate or LIBOR plus a set rate. In the current interest rate environment, the fixed rate component of the interest rate exceeds the floating rate component, which effectively converts these loans to fixed rate loans. As of December 31, 2015, twenty three of our loans, or 70.9%, of the fair value of the portfolio bore interest at floating rates. Seventeen of these investments had interest rate floors, with the weighted average LIBOR floor at 0.58%. In the future, we expect other loans in our portfolio will have floating rates.

Assuming that the Consolidated Statement of Assets and Liabilities as of September 30, 2016 were to remain constant and no actions were taken to alter the existing interest rate sensitivity, a hypothetical one hundred basis point increase in LIBOR would increase our net investment income by approximately \$0.4 million. Alternatively, a hypothetical 100 basis point decrease in LIBOR would decrease our net investment income by approximately \$0.2 million. The calculation of these sensitivities does not assume any change in incentive management fees as a result of changes in LIBOR. Although we believe that this measure is indicative of our sensitivity to interest rate changes, it does not adjust for potential changes in credit quality, size and composition of the assets on the balance sheet and other business developments that could affect net increase in net assets resulting from operations, or net income. Accordingly, no assurances can be given that actual results would not differ materially from the potential outcome simulated by this estimate.

We may hedge against interest rate fluctuations by using standard hedging instruments such as futures, options and forward contracts subject to the requirements of the 1940 Act. While hedging activities may insulate us against adverse changes in interest rates, they may also limit our ability to participate in the benefits of lower interest rates with respect to our portfolio of investments. We have not engaged in any hedging activities to date.

Changes in interest rates will affect our cost of funding. Our interest expense will be affected by changes in the published LIBOR rate in connection with our Credit Facility; however, the interest rate on our outstanding Notes is fixed for the life of such debt.

Item 4. Controls and Procedures.

(a) Evaluation of Disclosure Controls and Procedures

As of September 30, 2016 (the end of the period covered by this report), we, including our Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rule 13a-15(e) of the 1934 Act). Based on that evaluation, our management, including our Chief Executive Officer and Chief Financial Officer, concluded that our disclosure controls and procedures were effective and provided reasonable assurance that information required to be disclosed in our periodic SEC filings is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure. However, in evaluating the disclosure controls and procedures, management recognized that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and management necessarily was required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures.

(b) Changes in Internal Control Over Financial Reporting

Management did not identify any change in the Company's internal control over financial reporting that occurred during the three months ended September 30, 2016 that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II - OTHER INFORMATION

Item 1. Legal Proceedings

We are not currently subject to any material legal proceedings, nor, to our knowledge, is any material legal proceeding threatened against us. From time to time, we may be a party to certain legal proceedings in the ordinary course of business, including proceedings relating to the enforcement of our rights under contracts with our portfolio companies.

Item 1A. Risk Factors

There has been no material change in the information provided under the heading "Risk Factors" in our annual report on Form 10-K for the fiscal year ended December 31, 2015. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial may materially affect our business, financial condition and/or operating results.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Dividend Reinvestment Plan

During the three months ended September 30, 2016, we issued a total of 10,613 shares of our common stock under our dividend reinvestment plan ("DRIP"). This issuance was not subject to the registration requirements of the Securities Act of 1933. The aggregate value of the shares of our common stock issued under the DRIP was approximately \$126,859 for the three months ended September 30, 2016.

Stock Repurchase Plan

On March 8, 2016, our board of directors authorized a \$3.0 million open market stock repurchase program. Pursuant to our program, we are authorized to repurchase up to \$3.0 million in the aggregate of our outstanding stock in the open market. The timing, manner, price and amount of any share repurchases will be determined by our management in its discretion, and no assurances can be given that any common stock, or any particular amount, will be purchased. Unless amended by our board of directors, the repurchase program will expire on the earlier of December 31, 2016 or the repurchase of \$3.0 million of our outstanding shares of common stock. The program may be suspended, extended, modified, or discontinued at any time. During the three months and nine months ended September 30, 2016, the Company made the following repurchases pursuant to the repurchase plan:

	Total Number of Shares Purchased	Average Purchase Price	Total Number of Shares Purchased as Part of Publicly Announced Plan	Maximum Remaining Dollar Value that May Yet Be Purchased Under Plan
August 1, 2016 - August 31, 2016	6,800	\$12.46	12,300	\$2,846,341
September 1, 2016 - September 30, 2016	13,376	\$12.51	20,176	\$2,679,066
Total repurchases during three months ended September 30, 2016 (1)	20,176	\$12.49	32,476	\$2,679,066

(1) There was no repurchase activity during the month of July 2016.

Item 3. Defaults Upon Senior Securities

Not applicable.

Item 4. Mine Safety Disclosures

Not applicable.

Item 5. Other Information

Not applicable

Item 6. Exhibits
