FIDELITY & GUARANTY LIFE AND SUBSIDIARIES NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

(1) Basis of Presentation

Fidelity & Guaranty Life ("FGL" and, collectively with its subsidiaries, the "Company") is a subsidiary of HRG Group, Inc. (formerly, Harbinger Group Inc. ("HRG")). The accompanying unaudited consolidated financial statements are prepared in accordance with U.S. generally accepted accounting principles ("GAAP") for interim financial information and with the instructions for the Securities and Exchange Commission ("SEC") Quarterly Report on Form 10-Q, including Article 10 of Regulation S-X. Accordingly, they do not include all of the information and notes required by GAAP for complete financial statements. Therefore, the information contained in the Notes to Consolidated Financial Statements included in Fidelity & Guaranty Life and Subsidiaries' Annual Report on Form 10-K, for the year ended September 30, 2015 ("2015 Form 10-K"), should be read in connection with the reading of these interim unaudited condensed consolidated financial statements. Dollar amounts in the accompanying sections are presented in millions, unless otherwise noted. Premiums and benefits of certain reinsurance contracts, including the reinsurance contract with Front Street Re (Cayman) Ltd. ("FSRCI"), are presented on a net basis in the accompanying unaudited Condensed Consolidated Statements of Operations and related footnotes.

FGL markets products through its wholly-owned insurance subsidiaries, Fidelity & Guaranty Life Insurance Company ("FGL Insurance") and Fidelity & Guaranty Life Insurance Company of New York ("FGL NY Insurance"), which together are licensed in all fifty states and the District of Columbia.

On November 8, 2015, FGL entered into an Agreement and Plan of Merger (the "Merger Agreement"), by and among FGL, Anbang Insurance Group Co., Ltd., a joint-stock insurance company established in the People's Republic of China ("Anbang"), AB Infinity Holding, Inc., a Delaware corporation and a wholly-owned subsidiary of Anbang ("AB Infinity"), and AB Merger Sub, Inc., a Delaware corporation and a newly formed, wholly-owned subsidiary of AB Infinity ("Merger Sub"). Pursuant to the Merger Agreement, FGL will become an indirect wholly-owned subsidiary of Anbang.

Pursuant to the Merger Agreement, at the effective time of the Merger, each issued and outstanding share of FGL common stock will be canceled and converted automatically into the right to receive \$26.80 in cash, without interest, other than any shares of common stock owned by FGL as treasury stock or otherwise or owned by Anbang, AB Infinity or Merger Sub (which will be canceled and no payment will be made with respect thereto), shares of common stock granted pursuant to FGL's employee equity award plan and those shares of common stock with respect to which appraisal rights under Delaware law are properly exercised and not withdrawn.

At the effective time of the Merger, each, vested and unvested, FGL option to purchase shares of common stock, restricted shares of common stock, and performance-based restricted stock will become fully vested and automatically converted into the right to receive a cash payment in an amount pursuant to the Merger Agreement. In addition, at such time, each, vested and unvested, stock option and restricted stock unit relating to shares of Fidelity & Guaranty Life Holdings, Inc., a subsidiary of FGL ("FGLH") will become fully vested and automatically converted into the right to receive a cash payment in an amount pursuant to the Merger Agreement, and each dividend equivalent held in respect of a share of FGLH stock (a "DER"), whether vested or unvested, will become fully vested and automatically converted into the right to receive a cash payment equal to the amount accrued with respect to such DER. The Merger is subject to closing conditions, including the receipt of regulatory approvals from the Iowa Insurance Division, New York Department of Financial Services, Vermont Department of Financial Regulation, China Insurance Regulatory Commission, and the Committee on Foreign Investment in the United States ("CFIUS"). On November 25, 2015, FGL obtained the requisite approval for the Merger from the Vermont Department of Financial Regulation. On March 14, 2016, FGL received notification from CFIUS that it had concluded all action under Section 721 of the Defense Production Act of 1950, as amended, and determined that there are no unresolved national security concerns with respect to the merger. Upon termination of the Merger Agreement, under specified circumstances, FGL may be required to pay a termination fee to Anbang and its subsidiaries of \$51.

Certain GAAP policies, which significantly affect the determination of financial position, results of operations and cash flows, are summarized in our 2015 Form 10-K.

In the opinion of management, these statements include all normal recurring adjustments necessary for a fair presentation of the Company's results. Operating results for the three and six months ended March 31, 2016, are not necessarily indicative of the results that may be expected for the full year ending September 30, 2016. All material inter-company accounts and transactions have been eliminated in consolidation. Amounts reclassified out of other comprehensive income are reflected in net investment gains in the unaudited Condensed Consolidated Statements of Operations.

(2) Significant Accounting Policies and Practices

Principles of Consolidation

The accompanying unaudited condensed consolidated financial statements include the accounts of the Company and all other entities in which FGL has a controlling financial interest. All intercompany accounts and transactions have been eliminated in consolidation.

We are involved in certain entities that are considered variable interest entities ("VIEs") as defined under U.S. GAAP. Our involvement with VIEs is primarily to invest in assets that allow us to gain exposure to a broadly diversified portfolio of asset classes. A VIE is an entity that does not have sufficient equity to finance its own activities without additional financial support or where investors lack certain characteristics of a controlling financial interest. We assess our relationships to determine if we have the ability to direct the activities, or otherwise exert control to evaluate if we are the primary beneficiary of the VIE. See "Note 4. Investments" to the Company's unaudited Condensed Consolidated Financial Statements for additional information on the Company's investments in unconsolidated VIEs. Recent Accounting Pronouncements

Amendments to Recognition and Measurement of Financial Assets and Financial Liabilities

In January 2016, the Financial Accounting Standards Board ("FASB") issued amended guidance (Accounting Standards Update ("ASU") 2016-01, Financial Instruments- Overall (Subtopic 825-10), Recognition and Measurement of Financial Assets and Financial Liabilities), effective for fiscal years beginning after December 15, 2017, including interim periods within those fiscal years. Notable amendments in this update will:

require all equity securities (other than equity investments accounted for under the equity method of accounting or requiring the consolidation of the investee) to be measured at fair value with changes in fair value recognized through net income

allow equity investments that do not have readily determinable fair values to be measured at cost minus impairment (if any) plus or minus changes resulting from observable price changes in orderly transactions for the identical or a similar investment of the same issuer

require qualitative assessment for impairment of equity investments without readily determinable fair values at each reporting period and, if the qualitative assessment indicates that impairment exists, to measure the investment at fair value

eliminate the requirement to disclose the methods and significant assumptions used to estimate fair value (which is currently required to be disclosed for financial instruments measured at amortized cost on the balance sheet)

The amendments in this ASU should be applied by means of a cumulative-effect adjustment to the balance sheet as of the beginning of the fiscal year of adoption, and the amendments related to equity securities without readily determinable fair values should be applied prospectively to equity investments that exist as of the date of adoption. The Company will not early adopt this standard and is currently evaluating the impact of this new accounting guidance on its consolidated financial statements.

Amendments to Lease Accounting

In February 2016, the FASB issued amended guidance (ASU 2016-02, Leases (Topic 842)), effective for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years. Notable amendments in this update will:

require entities to recognize the rights and obligations resulting from all leases or lease components of contracts, including operating leases, as lease assets and lease liabilities, with an exception allowed for leases with a term of 12 months or less

Table of Contents

create a distinction between finance leases and operating leases, with classification criteria substantially similar to that for distinguishing between capital leases and operating leases under previous guidance

not retain the accounting model for leveraged leases under previous guidance for leases that commence after the effective date of ASU 2016-02

provide additional guidance on separating the lease components from the nonlease components of a contract require qualitative disclosures along with specific quantitative disclosures to provide information regarding the amount, timing, and uncertainty of cash flows arising from leases

include modifications to align lessor accounting with the changes to lessee accounting, as well as changes to the requirements of recognizing a transaction as a sale and leaseback transaction, however, these changes will have no impact on the Company's current lease arrangements

The amendments in this ASU may be early adopted. The amendments are required to be applied at the beginning of the earliest period presented using a modified retrospective approach (including several optional practical expedients related to leases commenced before the effective date). The Company will not early adopt this standard and is currently evaluating the impact of this new accounting guidance on its consolidated financial statements. Improvements to Employee Share-Based Payment Accounting

In March 2016, the FASB issued amended guidance (ASU 2016-09, Compensation - Stock Compensation (Topic 718), Improvements to Employee Share-Based Payment Accounting), effective for fiscal years beginning after December 15, 2016 and interim periods within those fiscal years. Notable amendments in this update will simplify accounting for employee share-based payments in the following ways:

all excess tax benefits and tax deficiencies will be recognized as income tax expense (benefit) on the income statement, as opposed to current GAAP which recognizes excess tax benefits in additional paid-in capital (only recognized when the deduction reduces taxes payable) and tax deficiencies as an offset to accumulated excess tax benefits or on the income statement

excess tax benefits will be classified along with other income tax cash flows as an operating activity on the cash flow statement (under current GAAP excess tax benefits are classified as a financing activity)

an entity can elect to account for forfeitures as they occur or, as under current GAAP, accrue compensation cost based on an estimate of the number of awards that are expected to vest

the threshold for an award to qualify for equity classification when shares are withheld to meet the employer's statutory withholding requirements now permits withholding up to the maximum statutory tax rates in applicable jurisdictions, as opposed to current GAAP which does not allow equity classification for an award if shares withheld are in excess of the employer's minimum statutory withholding requirements

cash paid by an employer when directly withholding shares for tax withholding purposes should be classified as a financing activity

The amendments in this ASU may be early adopted during any interim or annual period. All amendments must be adopted in the same period. If adopted during an interim period, the amendments are required to be reflected as of the beginning of the fiscal year that includes the interim period. Amendments related to timing of when excess tax benefits are recognized, minimum statutory withholding requirements, and forfeitures should be applied using a modified retrospective transition method by means of a cumulative-effect adjustment to equity as of the beginning of the period in which the guidance is adopted. Amendments related to the presentation of employee taxes paid on the statement of cash flows when an employer withholds shares to meet the minimum statutory withholding requirement should be applied retrospectively. Amendments requiring recognition of excess tax benefits and tax deficiencies in the income statement should be applied prospectively. The amendments related to the presentation of excess tax benefits on the statement of cash flows may be applied using either a prospective transition method or a retrospective transition method. The Company will not early adopt this standard and is currently evaluating the impact of this new accounting guidance on its consolidated financial statements.

(3) Significant Risks and Uncertainties

Regulatory Changes

Federal Regulation

In April 2016, the Department of Labor ("DOL") released its final "fiduciary" rule which could have a material impact on the Company, its products, distribution, and business model. The final rule treats persons who provide investment advice or recommendations for a fee or other compensation with respect to assets of an employer plan or individual retirement account ("IRA") as fiduciaries of that plan or IRA. Significantly, the rule expands the definition of fiduciary under Employee Retirement Income Security Act of 1974 ("ERISA") to apply to persons, including insurance agents, who advise and sell products to IRA owners. As a practical matter, this means insurance agents selling the Company's IRA products must qualify for a prohibited transaction exemption which requires the agent and financial institution meet various restrictions including a requirement that an annuity sale be in the best interest of the client without regard for the agent's, financial institution's or other party's financial or other interests, and that any compensation paid to the agent and financial institution be reasonable. The final rule is effective June 2016 and generally applicable in April 2017. The rule has generated considerable controversy and it is anticipated there will be industry efforts to block implementation of the rule both in Congress and possibly through court actions. The success or failure of these efforts cannot be predicted. Assuming the rule is not blocked, the precise impact of the rule on the financial services industry more generally, and the impact on the Company and its business in particular, is difficult to assess because the rule is new and still being studied. At this time, while the rule is still under review, the ultimate effect of the rule may be adverse for companies that offer IRA products, could impact compensation paid to agents in connection with IRA sales, and could expose the Company to litigation risk.

Use of Estimates and Assumptions

The preparation of the Company's unaudited Condensed Consolidated Financial Statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates and assumptions used.

Concentrations of Financial Instruments

As of March 31, 2016 and September 30, 2015, the Company's most significant investment in one industry, excluding United States ("U.S.") Government securities, was its investment securities in the banking industry with a fair value of \$2,152 or 11% and \$1,979 or 10%, respectively, of the invested assets portfolio. The Company's holdings in this industry include investments in 88 different issuers with the top ten investments accounting for 36% of the total holdings in this industry. As of March 31, 2016 and September 30, 2015, the Company had investments in 1 issuer, Wells Fargo & Company (the Company's largest concentration in any single issuer as of March 31, 2016 and September 30, 2015), that exceeded 10% of shareholders' equity with a total fair value of \$171 or 1% and \$170 or 1%, respectively, of the invested assets portfolio.

The Company has exposure to the commodities sector via holdings in both energy-related and metal-related issuers. The energy-related exposure is diversified across sub-sectors and 115 issuers as of March 31, 2016. The metal-related exposure is diversified across sub-sectors and 37 issuers as of March 31, 2016. Individual energy-related and metal-related holdings vary in their sensitivity to commodity price movements. At March 31, 2016, the Company held energy-related investments with an amortized cost and fair value of \$1,605 and \$1,424, respectively; and held-metal related investments with an amortized cost and fair value of \$631 and \$552, respectively. At September 30, 2015, the Company held energy-related investments with an amortized cost and fair value of \$1,538 and \$1,414, respectively; and held metal-related investments with an amortized cost and fair value of \$613 and \$513, respectively. At both March 31, 2016 and September 30, 2015, the Company's holdings in energy-related and metal-related investments were 7% and 3% of the investment portfolio, respectively. The Company has recognized \$0 and \$6 other-than-temporary-impairment losses on metal-related investments for the three and six months ended March 31, 2016 and none for energy-related holding and recognized no other-than-temporary-impairment losses for both metal and energy related investments in the three and six months ended March 31, 2015. Concentrations of Financial and Capital Markets Risk

The Company is exposed to financial and capital markets risk, including changes in interest rates and credit spreads which can have an adverse effect on the Company's results of operations, financial condition and liquidity.

The Company expects to continue to face challenges and uncertainties that could adversely affect its results of operations and financial condition.

The Company's exposure to interest rate risk relates primarily to the market price and cash flow variability associated with changes in interest rates. A rise in interest rates, in the absence of other countervailing changes, will decrease the net unrealized gain position of the Company's investment portfolio and, if long-term interest rates rise dramatically within a six to twelve month time period, certain of the Company's products may be exposed to disintermediation risk. Disintermediation risk refers to the risk that policyholders may surrender their contracts in a rising interest rate environment, requiring the Company to liquidate assets in an unrealized loss position. This risk is mitigated to some extent by the high level of surrender charge protection provided by the Company's products. Concentration of Reinsurance Risk

The Company has a significant concentration of reinsurance with Wilton Reassurance Company ("Wilton Re") and Front Street Re (Cayman) Ltd. ("FSRCI") an affiliate, that could have a material impact on the Company's financial position in the event that Wilton Re or FSRCI fail to perform their obligations under the various reinsurance treaties. Wilton Re is a wholly owned subsidiary of Canada Pension Plan Investment Board ("CPPIB"). CPPIB has an AAA issuer credit rating from Standard & Poor's Ratings Services ("S&P") as of March 31, 2016. As of March 31, 2016, the net amount recoverable from Wilton Re was \$1,512 and the net amount recoverable from FSRCI was \$1,171. The coinsurance agreement with FSRCI is on a funds withheld basis. The Company monitors both the financial condition of individual reinsurers and risk concentration arising from similar geographic regions, activities and economic characteristics of reinsurers to reduce the risk of default by such reinsurers.

(4) Investments

The Company's debt and equity securities investments have been designated as available-for-sale and are carried at fair value with unrealized gains and losses included in accumulated other comprehensive income (loss) ("AOCI") net of associated adjustments for deferred acquisition costs ("DAC"), value of business acquired ("VOBA"), and deferred income taxes. The Company's consolidated investments at March 31, 2016 and September 30, 2015 are summarized as follows:

	March 3	1, 2016			
	Amortiz Cost	Gross ed Unrealized Gains	Gross Unrealized Losses	Fair Value	Carrying Value

Included in AOCI were cumulative gross unrealized gains of \$1 and gross unrealized losses of \$2 related to the non-credit portion of other-than-temporary impairments ("OTTI") on non-agency residential mortgage-backed securities ("RMBS") at March 31, 2016 and September 30, 2015, respectively. The non-agency RMBS unrealized gains and losses represent the difference between amortized cost and fair value on securities that were previously impaired.

Securities held on deposit with various state regulatory authorities had a fair value of \$16,457 and \$16,012 at March 31, 2016 and September 30, 2015, respectively. Under Iowa regulations, insurance companies are required to hold securities on deposit in an amount no less than the Company's legal reserve as prescribed by Iowa regulations. At March 31, 2016 and September 30, 2015, the company held investments that were non-income producing for a period greater than twelve months with fair values of \$15 and \$0, respectively.

In accordance with the Company's Federal Home Loan Bank of Atlanta ("FHLB") agreements, the investments supporting the funding agreement liabilities are pledged as collateral to secure the FHLB funding agreement liabilities. The collateral investments had a fair value of \$493 and \$524 at March 31, 2016 and September 30, 2015, respectively.

The amortized cost and fair value of fixed maturity available-for-sale securities by contractual maturities, as applicable, are shown below. Actual maturities may differ from contractual maturities because issuers may have the right to call or pre-pay obligations.

	March 3	1, 2016
	Amortize	edFair
	Cost	Value
Corporates, Non-structured Hybrids, Municipal and U.S. Government securities:		
Due in one year or less	\$229	\$229

Structured hybrids	723	689
Residential mortgage-backed securities	1,481	1,482
Subtotal	5,403	5,195
Total fixed maturity available-for-sale securities	\$18,069	\$18,057

The Company's available-for-sale securities with unrealized losses are reviewed for potential OTTI. In evaluating whether a decline in value is other-than-temporary, the Company considers several factors including, but not limited to the following: (1) the extent and the duration of the decline; (2) the reasons for the decline in value (credit event, currency or interest-rate related, including general credit spread widening); and (3) the financial condition of and near-term prospects of the issuer. The Company also considers the ability and intent to hold the investment for a period of time to allow for a recovery of value.

The Company analyzes its ability to recover the amortized cost by comparing the net present value of cash flows expected to be collected with the amortized cost of the security. For mortgage-backed and asset-backed securities, cash flow estimates consider the payment terms of the underlying assets backing a particular security, including interest rate and prepayment assumptions, based on data from widely accepted third-party data sources or internal estimates. In addition to interest rate and prepayment assumptions, cash flow estimates also include other assumptions regarding the underlying collateral including default rates and recoveries, which vary based on the asset type and geographic location, as well as the vintage year of the security. For structured securities, the payment priority within the tranche structure is also considered. For all other debt securities, cash flow estimates are driven by assumptions regarding probability of default and estimates regarding timing and amount of recoveries associated with a default. If the net present value is less than the amortized cost of the investment, an OTTI is recognized.

Based on the results of our process for evaluating available-for-sales securities in unrealized loss positions for OTTI discussed above, the Company determined that the unrealized losses as of March 31, 2016 were primarily due to credit spread widening. Additionally, pressure in the commodity and energy markets affected the prices of securities held in these sectors, as did weakness in the high yield market which affected prices of leveraged loans typically used to collateralize CLO debt obligations; however the overall average rating of the Company's holdings in these sectors remains investment grade. Based on this and other factors considered, the Company determined that the unrealized losses on the securities presented in the table below were not OTTI as of March 31, 2016.

Table of Contents

The fair value and gross unrealized losses of available-for-sale securities, aggregated by investment category and duration of fair value below amortized cost, were as follows:

	March 31, 2016

September 30, 2015

At March 31, 2016 and September 30, 2015, securities in an unrealized loss position were primarily concentrated in investment grade, asset-backed, hybrid and corporate debt instruments.

At March 31, 2016 and September 30, 2015, securities with a fair value of \$521 and \$302, respectively, had an unrealized loss greater than 20% of amortized cost (excluding U.S. Government and U.S. Government sponsored

agency securities), which represented less than 3% and 2% of the carrying value of all investments at March 31, 2016 and September 30, 2015, respectively.

The following table provides a reconciliation of the beginning and ending balances of the credit loss portion of OTTI on fixed maturity available-for-sale securities held by the Company for the three and six months ended March 31, 2016 and 2015, for which a portion of the OTTI was recognized in AOCI:

	Three months			Six months			
	ende	d		ende			
	Marc	chMatr	ch 31,	Mar	r,ch 31,		
	2016	5	2016	.5			
Beginning balance	\$ 3	\$	3	\$ 3	\$	3	
Increases attributable to credit losses on securities:							
OTTI was previously recognized	_	_		_	_		
OTTI was not previously recognized	_	_		_	_		
Ending balance	\$ 3	\$	3	\$ 3	\$	3	

The Company recognized \$1 and \$11 of credit impairment losses in operations during the three and six months ended March 31, 2016, respectively, related to fixed maturity securities with an amortized cost of \$89 and a fair value of \$78 at March 31, 2016. During the three and six months ended March 31, 2015, the Company recognized \$61 of credit impairment losses in operations related to asset-backed, corporate securities and other invested assets with an amortized cost of \$116 and a fair value of \$55 at March 31, 2015.

Details underlying write-downs taken as a result of OTTI that were recognized in "Net income" and included in net realized gains on securities were as follows:

	Three months ended			Six months ended			
	Mar	dM a	8rlc,h 31,	Marc	ellM8	ırch 31,	
	201	620	15	2016	20	15

Corporates	_	2		6	2		
Other invested assets		35			35		
Total	\$ 1	\$	61	\$11	\$	61	

The portion of OTTI recognized in AOCI is disclosed in the unaudited Condensed Consolidated Statements of Comprehensive Income.

In the second quarter of Fiscal 2015, the Company recognized credit-related impairment losses of \$59, net of reinsurance, on available-for-sale debt securities, available-for-sale equity securities and other invested assets related to direct and indirect investments in RadioShack Corporation ("RSH") and other loans because the Company concluded the decline in the fair value of these investments was other-than-temporary. A summary of the RSH-related impairments by investment is as follows:

		Tillee	
		Month	ıs
		Ended	
		March	1
		31,	
		2015	
Type	Balance Sheet Classification	OTTI	
Type	Dalance Sheet Classification	Losses	3
Collateralized loan obligations ("CLOs") (a)	Fixed maturities, available-for-sale	\$ 25	
Preferred equity (a)	Equity securities, available-for-sale	21	
Participations	Other invested assets	35	
OTTI, gross of reinsurance		\$ 81	
CLOs (a)	Fixed maturities, available-for-sale	(1)
Preferred equity (a)	Equity securities, available-for-sale	(21)

OTTI, net of reinsurance

\$ 59

(a) Preferred equity and a portion of the CLOs are included in the FSRCI funds withheld portfolio, accordingly all income and losses on these assets are ceded to FSRCI.

The fair values of the impairments summarized above were determined using the following inputs as follows: CLOs - The Company utilized a price from a third party valuation firm which considered the sufficiency of underlying loan collateral for the RSH loan and other loans.

Preferred equity - The Company utilized a price from a third party valuation firm which considered the updated fair value estimates of the Salus Capital Partners. LLC ("Salus") CLO and the Salus participation in RSH, both of which Salus owns investment interests in.

Participations - The Company considered the recovery of the underlying loan collateral for RSH based on the evidence obtained.

The total gross impact of the impairment losses above, excluding reinsurance with FSRCI was \$81 for the second fiscal quarter ended March 31, 2015. RSH filed for bankruptcy on February 5, 2015. In late March 2015, the Court awarded a sale of assets at auction to another bidder, causing our collateral claim to become more junior to other claimants and resulting in our conclusion that the Company had realized an OTTI. As of March 31, 2016, substantially all of RSH assets in the estate have been converted to cash through liquidation and the fair value of the Company's RSH-related holdings reflects these cash balances, net of expenses. While substantially all assets represent cash, the wind-down process continues; therefore, some variability still exists in the fair value related to these costs. Please refer to "Note 14. Related Party Transactions" to the Company's unaudited Condensed Consolidated Financial Statements for more detail on the investments impacted by this impairment.

Commercial Mortgage Loans

Commercial mortgage loans ("CMLs") represented approximately 3% of the Company's total investments as of March 31, 2016 and September 30, 2015. The Company primarily makes mortgage loans on income producing properties including hotels, industrial properties, retail buildings, multifamily properties and office buildings. The Company diversifies its CML portfolio by geographic region and property type to reduce concentration risk. Subsequent to origination, the Company continuously evaluates CMLs based on relevant current information to ensure properties are performing at a consistent and acceptable level to secure the related debt. The distribution of CMLs, gross of valuation allowances, by property type and geographic region is reflected in the following tables:

gross of variation and wantees, by property type and geograpme	March 2016

Total commercial mortgage loans, gross of valuation allowance	\$614	100)%	\$492	100) %
Valuation allowance	(1)			(1)		
Total commercial mortgage loans	\$613			\$491		

The Company had a CML portfolio with 100% of all CMLs having a loan-to-value ("LTV") ratio of less than 75% at March 31, 2016 and September 30, 2015. As of March 31, 2016, all CMLs are current and have not experienced credit or other events which would require the recording of an impairment loss.

LTV and debt service coverage ("DSC") ratios are measures commonly used to assess the risk and quality of mortgage loans. The LTV ratio, calculated at time of origination, is expressed as a percentage of the amount of the loan relative to the value of the underlying property. A LTV ratio in excess of 100% indicates the unpaid loan amount exceeds the underlying collateral. The DSC ratio, based upon the most recently received financial statements, is expressed as a percentage of the amount of a property's net income to its debt service payments. A DSC ratio of less than 1.00 indicates that a property's operations do not generate sufficient income to cover debt payments.

The following table presents the recorded investment in CMLs by LTV and DSC ratio categories and estimated fair value by the indicated loan-to-value ratios at March 31, 2016 and September 30, 2015:

2				,		1	,		
	1 ()()		Total	% of	Hair	% (% of		
	>1.25	-	N/A(a)	Amount	Tota	Value	100	Total

60% to 75%	185		_	185	38	% 185	38	%	
Commercial mortgage loans	\$461	\$ 20	\$ 11	\$ 492	100 9	% \$ 490	100)%	
(a) N/A - Current DSC ratio	not av	ailable	e.						

We establish a general mortgage loan allowance based upon the underlying risk and quality of the mortgage loan portfolio using DSC ratio and LTV ratio. A higher LTV ratio will result in a higher allowance. A higher DSC ratio will result in a lower allowance. We believe that the DSC ratio is an indicator of default risk on loans. We believe that the LTV ratio is an indicator of the principal recovery risk for loans that do default.

March 31, September 30, 2016 2015

Gross balance commercial mortgage loans \$ 614 \$ 492

Allowance for loan loss (1) (1)

Net balance commercial mortgage loans \$ 613 \$ 491

The Company recognizes a mortgage loan as delinquent when payments on the loan are greater than 30 days past due. At March 31, 2016 and September 30, 2015, we had no CMLs that were delinquent in principal or interest payments. The following provides the current and past due composition of our CMLs:

A Troubled Debt Restructuring ("TDR") is a situation where we have granted a concession to a borrower for economic or legal reasons related to the borrower's financial difficulties that we would not otherwise consider. A mortgage loan that has been granted new terms, including workout terms as described previously, would be considered a TDR if it meets conditions that would indicate a borrower is experiencing financial difficulty and the new terms constitute a concession on our part. We analyze all loans where we have agreed to workout terms and all

loans that we have refinanced to determine if they meet the definition of a TDR. We consider the following factors in determining whether or not a borrower is experiencing financial difficulty:

- •borrower is in default,
- •borrower has declared bankruptcy,

- •there is growing concern about the borrower's ability to continue as a going concern,
- •borrower has insufficient cash flows to service debt,
- •borrower's inability to obtain funds from other sources, and
- •there is a breach of financial covenants by the borrower.

If the borrower is determined to be in financial difficulty, we consider the following conditions to determine if the borrower was granted a concession:

- •assets used to satisfy debt are less than our recorded investment,
- •interest rate is modified,
- •maturity date extension at an interest rate less than market rate,
- •capitalization of interest,
- •delaying principal and/or interest for a period of three months or more, and
- •partial forgiveness of the balance or charge-off.

Mortgage loan workouts, refinances or restructures that are classified as TDRs are individually evaluated and measured for impairment. As of March 31, 2016, our CML portfolio had no impairments, modifications or troubled debt restructuring.

Net investment income

The major sources of "Net investment income" on the accompanying unaudited Condensed Consolidated Statements of Operations were as follows:

	Three ended	months	Six months ended		
	March March 31,		March	March 31,	
	2016	2015	2016	2015	
Fixed maturity available-for-sale securities	\$211	\$ 194	\$421	\$ 390	
Equity available-for-sale securities	8	9	16	18	
Commercial mortgage loans	6	3	12	4	
Related party loans	1	1	2	3	
Invested cash and short-term investments	2	_	2	_	
Other investments	4	5	5	11	
Gross investment income	232	212	458	426	
Investment expense	(5)	(4)	(9)	(10)	
Net investment income	\$227	\$ 208	\$449	\$ 416	

During the fiscal quarter ended June 30, 2015, we received notice that we are entitled to receive a settlement as a result of our ownership of certain RMBS that were issued by Countrywide, an entity which was later acquired by Bank of America. We have estimated our expected recovery from this settlement to be between \$15 and \$20, with a best estimate of \$18. In compliance with our accounting policy described in "Note 2. Significant Accounting Policies and Practices" of the 2015 Form 10-K, we updated our cash flow projections for our best estimate of the recovery as of March 31, 2016 and will accrete it prospectively over the remaining life of the related securities through our effective yield and recognize the impact within "Net investment income". This change to our cash flow projections had an immaterial impact on our "Net investment income" during the first fiscal quarter of 2016. The weighted average remaining life on the affected securities is approximately 6 years.
