FOR IMMEDIATE RELEASE
London 1 August 2017

BP p.l.c. Group results
Second quarter and half year 2017(a)

For a printer friendly copy of this announcement, please click on the link below to open a PDF version:http://www.rns-pdf.londonstockexchange.com/rns/6610M_-2017-7-31.pdf

Highlights Solid first half; strong operations, strong cash flow.

Underlying replacement cost (RC) profit* for the second quarter was \$0.7 billion.

Second-quarter operating cash flow, excluding Gulf of Mexico oil spill payments*, was \$6.9 billion. Including these payments, operating cash flow* for the quarter was \$4.9 billion.

Dividend unchanged at 10 cents per share.

Second-quarter Upstream production was 10% higher than in the same period in 2016; first-half production was 6% higher.

Upstream major projects on track; two new projects sanctioned in quarter; significant gas discoveries in Senegal and Trinidad announced; \$753 million exploration write-off, predominantly in Angola.

In Downstream, first-half fuels marketing earnings around 20% higher than in the first half of 2016.

Financial summary
Second quarter 2017

Underlying RC profit per ADS (dollars)	0.21	0.46	0.23	0.67	0.40

(a) This results announcement also represents BP's half-yearly financial report (see page 12).

(b) Profit attributable to BP shareholders.

Bob Dudley – Group chief executive:

“We continue to position BP for the new oil price environment, with a continued tight focus on costs, efficiency and discipline in capital spending. We delivered strong operational performance in the first half of 2017 and have

considerable strategic momentum coming into the rest of the year and 2018, with rising production from our new Upstream projects and marketing growth in the Downstream.”

Brian Gilvary – Chief financial officer:

“Cash flow was strong in the first half – organic cash flow* exceeded organic capital expenditure* and dividends paid. While net debt* rose primarily due to Gulf of Mexico payments, we expect this will improve over the second half as these payments decline and divestment proceeds come in towards the end of the year.”

* See definitions in the Glossary on page 32. RC profit (loss), underlying RC profit, cash flow excluding Gulf of Mexico oil spill payments, organic capital expenditure and net debt are non-GAAP measures.

The commentary above and following should be read in conjunction with the cautionary statement on page 35.

BP p.l.c. Group results

Second quarter and half year 2017

Group headlines

Earnings

BP’s profit for the second quarter and half year was \$144 million and \$1,593 million respectively, compared with a loss of \$1,419 million and a loss of \$2,002 million for the same periods in 2016.

The second-quarter replacement cost (RC) profit was \$553 million, compared with a loss of \$2,247 million for the same period in 2016. After adjusting for a net charge for non-operating items of \$215 million and net favourable fair value accounting effects of \$84 million (both on a post-tax basis), underlying RC profit for the second quarter was \$684 million, compared with \$720 million for the same period in 2016.

For the half year, RC profit was \$1,965 million, compared with a loss of \$2,732 million a year ago. After adjusting for a net charge for non-operating items of \$520 million and net favourable fair value accounting effects of \$291 million (both on a post-tax basis), underlying RC profit for the half year was \$2,194 million, compared with \$1,252 million for the same period in 2016.

See further information on page 3.

Non-operating items

Non-operating items amounted to a charge of \$359 million pre-tax and \$215 million post-tax for the quarter and a charge of \$912 million pre-tax and

Dividend

BP today announced a quarterly dividend of 10.00 cents per ordinary share (\$0.600 per ADS), which is expected to be paid on 22 September 2017. The corresponding amount in sterling will be announced on 12 September 2017. See page 24 for further information.

Operating cash flow*

Excluding post-tax amounts related to the Gulf of Mexico oil spill, operating cash flow* for the second quarter and half year was \$6.9 billion and \$11.3 billion respectively, compared with \$5.3 billion and \$8.3 billion for the same periods in 2016. Including amounts relating to the Gulf of Mexico oil spill, operating cash flow for the second quarter and half year was \$4.9 billion and \$7.0 billion respectively, compared with \$3.9 billion and \$5.8 billion for the same

Capital expenditure*

Organic capital expenditure* for the second quarter and half year was \$4.3 billion and \$7.9 billion respectively, compared with \$4.2 billion and \$8.7 billion for the same periods in 2016.

Inorganic capital expenditure* for the second quarter and half year was \$0.1 billion and \$0.7 billion respectively, compared with \$0.3 billion for both periods in 2016.

Organic and inorganic capital expenditure are non-GAAP measures. See page 26 for further information.

\$520 million post-tax for the half year.

The Gulf of Mexico oil spill charge before interest and tax for the second quarter was \$347 million to reflect the latest estimate for claims, including business economic loss claims, and associated administration costs. In addition, the half year also reflects an impairment charge in the first quarter due to the divestment of certain Upstream assets.

Effective tax rate

The effective tax rate (ETR) on RC profit or loss* for the second quarter and half year was 63% and 43% respectively, compared with 51% and 49% for the same periods in 2016. Adjusting for non-operating items and fair value accounting effects, the adjusted ETR* for the second quarter and half year was 60% and 45% respectively, compared with 21% and 20% for the same periods in 2016.

The adjusted ETR for the second quarter and half year is higher than a year ago mainly due to the exploration write-offs and changes in the mix of profits, notably the impact of the renewal of our interest in the Abu Dhabi onshore oil concession. We now expect the full year adjusted ETR to be above 40%.

Divestment proceeds*

Divestment proceeds were \$0.5 billion for the second quarter and \$0.7 billion for the half year, compared with \$0.4 billion and \$1.6 billion for the same periods in 2016.

Net debt*

Net debt at 30 June 2017 was \$39.8 billion, compared with \$30.9 billion a year ago. The net debt ratio* at 30 June 2017 was 28.8%, compared with 24.7% a year ago. Net debt and the net debt ratio are non-GAAP measures. See page 25 for more information.

PALATIN TECHNOLOGIES, INC.

and Subsidiary
Notes to Consolidated Financial Statements
(unaudited)

(1) ORGANIZATION:

Nature of Business – Palatin Technologies, Inc. (Palatin or the Company) is a biopharmaceutical company developing targeted, receptor-specific peptide therapeutics for the treatment of diseases with significant unmet medical need and commercial potential. Palatin's programs are based on molecules that modulate the activity of the melanocortin and natriuretic peptide receptor systems. The melanocortin system is involved in a large and diverse number of physiologic functions, and therapeutic agents modulating this system may have the potential to treat a variety of conditions and diseases, including sexual dysfunction, obesity and related disorders, cachexia (wasting syndrome) and inflammation-related diseases. The natriuretic peptide receptor system has numerous cardiovascular functions, and therapeutic agents modulating this system may be useful in treatment of acute asthma, heart failure, hypertension and other cardiovascular diseases.

The Company's primary product in development is bremelanotide for the treatment of female sexual dysfunction (FSD). The Company also has drug candidates or development programs for obesity, erectile dysfunction, pulmonary diseases, cardiovascular diseases, dermatologic diseases and inflammatory diseases. The Company has an exclusive global research collaboration and license agreement with AstraZeneca AB (AstraZeneca) to commercialize compounds that target melanocortin receptors for the treatment of obesity, diabetes and related metabolic syndrome.

Key elements of the Company's business strategy include using its technology and expertise to develop and commercialize therapeutic products; entering into alliances and partnerships with pharmaceutical companies to facilitate the development, manufacture, marketing, sale and distribution of product candidates that the Company is developing; and partially funding its product candidate development programs with the cash flow generated from the Company's license agreements with AstraZeneca and any other companies.

Business Risk and Liquidity – The Company has incurred negative cash flows from operations since its inception, and has expended, and expects to continue to expend in the future, substantial funds to complete its planned product development efforts. As shown in the accompanying consolidated financial statements, the Company has an accumulated deficit as of September 30, 2013 of \$264.6 million and incurred a net loss for the three months ended September 30, 2013 of \$4.5 million. The Company anticipates incurring additional losses in the future as a result of spending on its development programs. To achieve profitability, the Company, alone or with others, must successfully develop and commercialize its technologies and proposed products, conduct successful preclinical studies and clinical trials, obtain required regulatory approvals and successfully manufacture and market such technologies and proposed products. The time required to reach profitability is highly uncertain, and there can be no assurance that the Company will be able to achieve profitability on a sustained basis, if at all.

As of September 30, 2013, the Company's cash, cash equivalents and short-term investments were \$22.3 million. The Company intends to utilize existing capital resources for general corporate purposes and working capital, including preparing for the Phase 3 clinical trial program with bremelanotide for female sexual dysfunction (FSD), preclinical development of its peptide melanocortin receptor-1 program, preclinical and clinical development of its PL-3994 program and preclinical development of other portfolio products. Management believes that the Phase 3 clinical trial program with bremelanotide will cost at least \$78.0 million. The Company does not intend to initiate patient enrollment in the Phase 3 program unless the Company has adequate funds, or commitments for adequate funds, to complete the Phase 3 program. The Company intends to seek additional capital to support the Phase 3 program through collaborative arrangements on bremelanotide, public or private equity or debt financings, or other sources.

Management believes that the Company's existing capital resources will be adequate to fund its currently planned operations, including submitting complete protocols for pivotal Phase 3 studies to the U.S. Food and Drug Administration (FDA) but not initiating patient enrollment, through at least calendar year 2014.

Concentrations – Concentrations in the Company's assets and operations subject it to certain related risks. Financial instruments that subject the Company to concentrations of credit risk primarily consist of cash, cash equivalents and short-term investments. The Company's cash and cash equivalents are primarily in one money market fund sponsored by a large financial institution and the Company's short-term investments are invested in U.S. government securities. For the three months ended September 30, 2012, 100% of revenues were from AstraZeneca.

[Back to Table of Contents](#)

PALATIN TECHNOLOGIES, INC.

and Subsidiary
Notes to Consolidated Financial Statements
(unaudited)

(2) BASIS OF PRESENTATION:

The accompanying unaudited consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q. Accordingly, they do not include all of the information and footnote disclosures required to be presented for complete financial statements. In the opinion of management, these consolidated financial statements contain all adjustments (consisting of normal recurring adjustments) considered necessary to present fairly the Company's financial position as of September 30, 2013, and its results of operations and its cash flows for the three months ended September 30, 2013 and 2012. The results of operations for the three months ended September 30, 2013 may not necessarily be indicative of the results of operations expected for the full year, except that the Company expects to incur a significant loss for the fiscal year ending June 30, 2014.

The accompanying consolidated financial statements should be read in conjunction with the audited consolidated financial statements and notes thereto included in the Company's annual report on Form 10-K for the year ended June 30, 2013, filed with the Securities and Exchange Commission (SEC), which includes consolidated financial statements as of June 30, 2013 and 2012 and for each of the fiscal years in the three-year period ended June 30, 2013.

(3) SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES:

Principles of Consolidation – The consolidated financial statements include the accounts of Palatin and its wholly-owned inactive subsidiary. All intercompany accounts and transactions have been eliminated in consolidation.

Use of Estimates – The preparation of consolidated financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amount of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Cash and Cash Equivalents – Cash and cash equivalents include cash on hand, cash in banks and all highly liquid investments with a purchased maturity of less than three months. Cash equivalents consist of \$15,679,545 in a money market fund at September 30, 2013 and \$16,284,184 in a money market fund at June 30, 2013.

Investments – The Company determines the appropriate classification of its investments in debt and equity securities at the time of purchase and reevaluates such determinations at each balance sheet date. Debt securities are classified as held-to-maturity when the Company has the intent and ability to hold the securities to maturity. Debt securities for which the Company does not have the intent or ability to hold to maturity are classified as available-for-sale. Held-to-maturity securities are recorded as either short-term or long-term on the balance sheet, based on the contractual maturity date and are stated at amortized cost. Marketable securities that are bought and held principally for the purpose of selling them in the near term are classified as trading securities and are reported at fair value, with unrealized gains and losses recognized in earnings. Debt and marketable equity securities not classified as held-to-maturity or as trading are classified as available-for-sale and are carried at fair market value, with the unrealized gains and losses, net of tax, included in the determination of comprehensive loss.

The fair value of substantially all securities is determined by quoted market prices. The estimated fair value of securities for which there are no quoted market prices is based on similar types of securities that are traded in the market.

Fair Value of Financial Instruments – The Company’s financial instruments consist primarily of cash equivalents, short-term investments, accounts receivable, accounts payable, and capital lease obligations. Management believes that the carrying value of these assets and liabilities are representative of their respective fair values based on quoted market prices for investments and the short-term nature of the other instruments.

Property and Equipment – Property and equipment consists of office and laboratory equipment, office furniture and leasehold improvements and includes assets acquired under capital leases. Property and equipment are recorded at cost. Depreciation is recognized using the straight-line method over the estimated useful lives of the related assets, generally five years for laboratory and computer equipment, seven years for office furniture and equipment and the lesser of the term of the lease or the useful life for leasehold improvements. Amortization of assets acquired under capital leases is included in depreciation expense. Maintenance and repairs are expensed as incurred while expenditures that extend the useful life of an asset are capitalized.

[Back to Table of Contents](#)

PALATIN TECHNOLOGIES, INC.

and Subsidiary
Notes to Consolidated Financial Statements
(unaudited)

Impairment of Long-Lived Assets – The Company reviews its long-lived assets for impairment whenever events or changes in circumstances indicate that the carrying amount of the assets may not be fully recoverable. To determine recoverability of a long-lived asset, management evaluates whether the estimated future undiscounted net cash flows from the asset are less than its carrying amount. If impairment is indicated, the long-lived asset would be written down to fair value. Fair value is determined by an evaluation of available price information at which assets could be bought or sold, including quoted market prices if available, or the present value of the estimated future cash flows based on reasonable and supportable assumptions.

Deferred Rent – The Company’s operating leases provide for rent increases over the terms of the leases. Deferred rent consists of the difference between periodic rent payments and the amount recognized as rent expense on a straight-line basis, as well as tenant allowances for leasehold improvements. Rent expenses are being recognized ratably over the terms of the leases.

Revenue Recognition – Revenue from corporate collaborations and licensing agreements consists of up-front fees, research and development funding, and milestone payments. Non-refundable up-front fees are deferred and amortized to revenue over the related performance period. The Company estimates the performance period as the period in which it performs certain development activities under the applicable agreement. Reimbursements for research and development activities are recorded in the period that the Company performs the related activities under the terms of the applicable agreements. Revenue resulting from the achievement of milestone events stipulated in the applicable agreements is recognized when the milestone is achieved, provided that such milestone is substantive in nature. Revenue from grants is recognized as the Company provides the services stipulated in the underlying grants based on the time and materials incurred.

During the three months ended September 30, 2013, the Company received a \$1.0 million, non-refundable option fee relating to negotiation of a potential future license of bremelanotide in a defined territory outside North America for the treatment of FSD. Subject to certain contingencies, if not exercised, the option expires in the first calendar quarter of 2014. This payment, which is creditable against any upfront or initial license fee in the event of negotiation of a definitive license agreement, was recorded as unearned revenue as of September 30, 2013.

Research and Development Costs – The costs of research and development activities are charged to expense as incurred, including the cost of equipment for which there is no alternative future use.

Accrued Expenses – Third parties perform a significant portion of our development activities. We review the activities performed under significant contracts each quarter and accrue expenses and the amount of any reimbursement to be received from our collaborators based upon the estimated amount of work completed. Estimating the value or stage of completion of certain services requires judgment based on available information.

Stock-Based Compensation – The Company charges to expense the fair value of stock options and other equity awards granted. The Company determines the value of stock options utilizing the Black-Scholes option pricing model. Compensation costs for share-based awards with pro rata vesting are allocated to periods on a straight-line basis.

Income Taxes – The Company and its subsidiary file consolidated federal and separate-company state income tax returns. Income taxes are accounted for under the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying

amounts of assets and liabilities and their respective tax basis and operating loss and tax credit carryforwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences or operating loss and tax credit carryforwards are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in the period that includes the enactment date. The Company has recorded a valuation allowance against its deferred tax assets based on the history of losses incurred.

Net Loss per Common Share – Basic and diluted earnings per common share (EPS) are calculated in accordance with the provisions of Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) Topic 260, “Earnings per Share,” which includes guidance pertaining to the warrants, issued in connection with the July 3, 2012 private placement offering, that are exercisable for nominal consideration and, therefore, are to be considered in the computation of basic and diluted net loss per common share. The Series A 2012 warrants to purchase up to 31,988,151 shares of common stock were exercisable starting at July 3, 2012 and, therefore, are included in the weighted average number of common shares outstanding used in computing basic and diluted net loss per common share starting on July 3, 2012.

[Back to Table of Contents](#)

PALATIN TECHNOLOGIES, INC.

and Subsidiary
Notes to Consolidated Financial Statements
(unaudited)

The Series B 2012 warrants to purchase up to 35,488,380 shares of common stock were considered contingently issuable shares and were not included in computing basic net loss per common share until the Company received stockholder approval for the increase in authorized underlying common stock on September 27, 2012 (see note 6). For diluted EPS, contingently issuable shares are to be included in the calculation as of the beginning of the period in which the conditions were satisfied, unless the effect would be anti-dilutive. The Series B 2012 warrants have been excluded from the calculation of diluted net loss per common share during the period from July 3, 2012 until September 27, 2012 as the impact would be anti-dilutive.

As of September 30, 2013 and 2012, common shares issuable upon conversion of Series A Convertible Preferred Stock, the exercise of outstanding options and warrants (excluding the warrants issued in connection with the July 3, 2013 private placement offering), and the vesting of restricted stock units amounted to an aggregate of 28,677,356 and 27,904,284 shares, respectively. These share amounts have been excluded from the calculation of net loss per share as the impact would be anti-dilutive.

(4) AGREEMENT WITH ASTRAZENECA:

In January 2007, the Company entered into an exclusive global research collaboration and license agreement with AstraZeneca to discover, develop and commercialize compounds that target melanocortin receptors for the treatment of obesity, diabetes and related metabolic syndrome. In June 2008, the license agreement was amended to include additional compounds and associated intellectual property developed by the Company. In December 2008, the license agreement was further amended to include additional compounds and associated intellectual property developed by the Company and extended the research collaboration for an additional year through January 2010. In September 2009, the license agreement was further amended to modify royalty rates and milestone payments. The collaboration is based on the Company's melanocortin receptor obesity program and includes access to compound libraries, core technologies and expertise in melanocortin receptor drug discovery and development. As part of the September 2009 amendment to the research collaboration and license agreement, the Company agreed to conduct additional studies on the effects of melanocortin receptor specific compounds on food intake, obesity and other metabolic parameters.

In December 2009 and 2008, the Company also entered into clinical trial sponsored research agreements with AstraZeneca, under which the Company agreed to conduct studies of the effects of melanocortin receptor specific compounds on food intake, obesity and other metabolic parameters. Under the terms of these clinical trial agreements, AstraZeneca paid \$5,000,000 as of March 31, 2009 upon achieving certain objectives and paid all costs associated with these studies. The Company recognized \$3,806 as revenue in the three months ended September 30, 2012 under these clinical trial sponsored research agreements.

The Company received an up-front payment of \$10,000,000 from AstraZeneca on execution of the research collaboration and license agreement. Under the September 2009 amendment the Company was paid an additional \$5,000,000 in consideration of reduction of future milestones and royalties and providing specific materials to AstraZeneca. The Company is now eligible for milestone payments totaling up to \$145,250,000, with up to \$85,250,000 contingent on development and regulatory milestones and the balance contingent on achievement of sales targets. In addition, the Company is eligible to receive mid to high single digit royalties on sales of any approved products. AstraZeneca assumed responsibility for product commercialization, product discovery and development costs, with both companies contributing scientific expertise in the research collaboration. The Company provided research services to AstraZeneca through January 2010, the expiration of the research collaboration portion of the

research collaboration and license agreement, at a contractual rate per full-time-equivalent employee.

AstraZeneca has a number of collaboration compounds in various stages of preclinical testing, and is evaluating its program and next steps. No assurance can be given that AstraZeneca will continue to develop compounds that target melanocortin receptors for the treatment of obesity, diabetes and related metabolic syndrome, or that AstraZeneca will be successful in developing any such compound.

(5) FAIR VALUE MEASUREMENTS:

The fair value of cash equivalents and short-term investments are classified using a hierarchy prioritized based on inputs. Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities. Level 2 inputs are quoted prices for similar assets and liabilities in active markets or inputs that are observable for the asset or liability, either directly or indirectly through market corroboration, for substantially the full term of the financial instrument. Level 3 inputs are unobservable inputs based on management's own assumptions used to measure assets and liabilities at fair value. A financial asset or liability's classification within the hierarchy is determined based on the lowest level input that is significant to the fair value measurement.

The following table provides the assets carried at fair value:

	Carrying Value	Quoted prices in active markets (Level 1)	Other quoted/observable inputs (Level 2)	Significant unobservable inputs (Level 3)
September 30, 2013:				
Money Market Fund	\$ 15,679,545	\$ 15,679,545	\$ -	\$ -
U.S. Government Securities	3,749,926	3,750,082	-	-
TOTAL	\$ 19,429,471	\$ 19,429,627	\$ -	\$ -
June 30, 2013:				
Money Market Fund	\$ 16,284,184	\$ 16,284,184	\$ -	\$ -
U.S. Government Securities	5,249,654	5,249,160	-	-
TOTAL	\$ 21,533,838	\$ 21,533,344	\$ -	\$ -

(6) STOCKHOLDERS' EQUITY:

Common Stock Transactions – On July 3, 2012, the Company closed on a private placement offering in which the Company sold, for aggregate proceeds of \$35.0 million, 3,873,000 shares of its common stock, Series A 2012 warrants to purchase up to 31,988,151 shares of common stock, and Series B 2012 warrants to purchase up to 35,488,380 shares of common stock. These warrants are exercisable at an exercise price of \$0.01 per share, and expire ten years from the date of issuance. The holders may exercise the warrants on a cashless basis. The warrants are subject to a blocker provision prohibiting exercise of the warrants if the holder and its affiliates would beneficially own in excess of 9.99% of the total number of shares of common stock of the Company following such exercise (as may be adjusted to the extent set forth in the warrant). The warrants also provide that in the event of a Company Controlled Fundamental Transaction (as defined in the warrants), the Company may, at the election of the warrant holder, be required to redeem all or a portion of the warrants at an amount tied to the greater of the then market price of the Company's common stock or the amount per share paid to any other person.

Because there were not sufficient authorized shares to cover all the outstanding Series B 2012 warrants in the private placement offering as of closing, under ASC 815, "Derivatives and Hedging," the portion of the warrants above the then authorized level of common stock was required to be classified as a liability and carried at fair value on the Company's balance sheet. The fair value, including the initial fair value liability of \$16,960,963, was calculated by multiplying

the number of shares underlying the Series B 2012 warrants above the then authorized level of the Company's common stock by the closing price of its common stock less the exercise price of \$0.01 per share. The warrants were liability classified through September 27, 2012, at which time the then fair value of the warrant liability was reclassified into stockholders' equity upon stockholder approval of the increase in authorized common stock. The increase in fair value, as a result of the Company's common stock increasing from \$0.50 per share at date of issuance to \$0.71 per share upon shareholder approval, of \$7,069,165 has been recorded as a non-operating expense for the three months ended September 30, 2012.

PALATIN TECHNOLOGIES, INC.

and Subsidiary
Notes to Consolidated Financial Statements
(unaudited)

The purchase agreement for the private placement provides that the purchasers, funds under the management of QVT Financial LP, have certain rights until July 3, 2018, including rights of first refusal and participation in any subsequent equity or debt financing, provided that the funds own at least 20% of the outstanding common stock of the Company calculated as if warrants held by the funds were exercised. The purchase agreement also contains certain restrictive covenants so long as the funds continue to hold specified amounts of warrants or beneficially own specified amounts of the outstanding shares of common stock.

The net proceeds to the Company were \$34.4 million, after deducting offering expenses payable by the Company and excluding the proceeds to the Company, if any, from the exercise of the warrants issued in the offering.

Stock Options – In June 2013, the Company granted 525,000 options to its executive officers, 394,300 options to its employees and 270,000 options to its non-employee directors under the Company's 2011 Stock Incentive Plan. The Company is amortizing the fair value of these options of \$287,000, \$204,000 and \$148,000, respectively, over the 48 month vesting period ending June 2017. The Company recognized \$66,198 of stock-based compensation expense related to these options during the three months ended September 30, 2013.

In July 2012, the Company granted 285,000 options to its executive officers, 182,500 options to its employees and 112,500 options to its non-employee directors under the Company's 2011 Stock Incentive Plan. The Company is amortizing the fair value of these options of \$182,000, \$108,000 and \$72,000, respectively, over the 48 month vesting period ending July 2016. The Company recognized \$17,140 and \$35,188, respectively, of stock-based compensation expense related to these options during the three months ended September 30, 2013 and 2012, respectively.

Restricted Stock Units – In June 2013, the Company granted 420,000 restricted stock units to its executive officers and 115,000 restricted stock units to its employees under the Company's 2011 Stock Incentive Plan. The Company is amortizing the fair value of these restricted stock units of \$260,000 and \$71,000, respectively, over the 24 month vesting period ending June 2015. The Company recognized \$62,194 of stock-based compensation expense related to these restricted stock units during the three months ended September 2013.

In July 2012, the Company granted 222,500 restricted stock units to its executive officers under the Company's 2011 Stock Incentive Plan. The Company is amortizing the fair value of these restricted stock units of \$160,000 over the 24 months ending July 2014. The Company recognized \$13,673 and \$24,547, respectively, of stock-based compensation expense related to these restricted stock units during the three months ended September 30, 2013 and 2012, respectively.

In June 2011, the Company granted 500,000 restricted stock units to its executive management under the Company's 2011 Stock Incentive Plan. The Company amortized the fair value of these restricted stock units of \$430,000 over the 24 month vesting period ending June 2013. The Company recognized \$26,875 of stock-based compensation expense related to these restricted stock units during the three months ended September 30, 2012.

Stock-based compensation cost for the three months ended September 30, 2013 for stock options and equity-based instruments issued other than the stock options and restricted stock units described above was \$44,431, and \$89,493 for the three months ended September 30, 2012.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

The following discussion and analysis should be read in conjunction with the consolidated financial statements and notes to the consolidated financial statements filed as part of this report and the audited consolidated financial statements and notes thereto included in our annual report on Form 10-K for the year ended June 30, 2013.

Statements in this quarterly report on Form 10-Q, as well as oral statements that may be made by us or by our officers, directors, or employees acting on our behalf, that are not historical facts constitute "forward-looking statements", which are made pursuant to the safe harbor provisions of Section 21E of the Securities Exchange Act of 1934, as amended (the Exchange Act). The forward-looking statements in this quarterly report on Form 10-Q do not constitute guarantees of future performance. Investors are cautioned that statements that are not strictly historical statements contained in this quarterly report on Form 10-Q, including, without limitation, current or future financial performance, management's plans and objectives for future operations, ability to raise capital or repay debt, if required, clinical trials and results, uncertainties associated with product research and development, product plans and performance, management's assessment of market factors, as well as statements regarding our strategy and plans and those of our strategic partners, constitute forward-looking statements. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that could cause our actual results to be materially different from historical results or from any results expressed or implied by such forward-looking statements. Our future operating results are subject to risks and uncertainties and are dependent upon many factors, including, without limitation, the risks identified in this report, in our annual report on Form 10-K for the year ended June 30, 2013, and in our other Securities and Exchange Commission (SEC) filings.

We expect to incur losses in the future as a result of spending on our planned development programs and losses may fluctuate significantly from quarter to quarter.

In this quarterly report on Form 10-Q, references to "we", "our", "us" or "Palatin" means Palatin Technologies, Inc. and its subsidiary.

Critical Accounting Policies and Estimates

Our significant accounting policies, which are described in the notes to our consolidated financial statements included in this report and in our annual report on Form 10-K for the year ended June 30, 2013, have not changed as of September 30, 2013. We believe that our accounting policies and estimates relating to revenue recognition, accrued expenses and stock-based compensation are the most critical.

Overview

We are a biopharmaceutical company developing targeted, receptor-specific peptide therapeutics for the treatment of diseases with significant unmet medical need and commercial potential. Our programs are based on molecules that modulate the activity of the melanocortin and natriuretic peptide receptor systems. Our primary product in clinical development is bremelanotide for the treatment of female sexual dysfunction (FSD). In addition, we have drug candidates or development programs for obesity, erectile dysfunction, pulmonary diseases, cardiovascular diseases, dermatologic diseases and inflammatory diseases.

The following drug development programs are actively under development:

Bremelanotide, an on-demand subcutaneous injectable peptide melanocortin receptor agonist, for treatment of FSD. Bremelanotide is scheduled to start Phase 3 clinical trials in the first quarter of calendar 2014.

Melanocortin receptor-based compounds for treatment of obesity, under development by AstraZeneca AB (AstraZeneca) pursuant to our research collaboration and license agreement.

PL-3994, a peptide mimetic natriuretic peptide receptor A (NPR-A) agonist, for treatment of cardiovascular and pulmonary indications.

Melanocortin receptor-1 agonist (MC1R) peptides, for treatment of dermatologic and inflammatory disease indications.

[Back to Table of Contents](#)

The following chart shows the status of our drug development programs.

We are developing subcutaneously administered bremelanotide for the treatment of FSD in premenopausal women. Bremelanotide, which is a melanocortin agonist (a compound which binds to a cell receptor and activates a response), is a synthetic peptide analog of the naturally occurring hormone alpha-MSH (melanocyte-stimulating hormone). We have completed a Phase 2B clinical trial and end-of-Phase 2 meeting with the U.S. Food and Drug Administration (FDA), and are planning to start pivotal Phase 3 clinical trials in the first quarter of calendar 2014. The Phase 3 clinical study program will be conducted in premenopausal women with hypoactive sexual desire disorder, either with or without arousal difficulties, and will include two pivotal placebo-controlled, randomized parallel group trials each in 600 evaluable patients with two arms, one a fixed bremelanotide dose and one placebo. Hypoactive sexual desire disorder is the single largest specific diagnosis in FSD. We will also conduct open-label safety extension, drug interaction and other ancillary studies. The Phase 3 studies, which will be conducted in North America, will utilize a single-dose autoinjector intended for commercialization. It is anticipated that the Phase 3 program will take at least fifteen to eighteen months from initiation of patient dosing through database lock. Following database lock, clinical trial data will be analyzed and, assuming the data supports approval of bremelanotide for FSD, a New Drug Application (NDA) will be submitted to FDA. There can be no assurance that the Phase 3 data will support approval of bremelanotide for FSD or that the FDA will approve an NDA for bremelanotide.

We have initiated preclinical studies with MC1R peptide drug candidates for a number of indications, primarily dermatologic and inflammatory disease related. The MC1R is implicated in a number of diseases, including inflammatory indications such as inflammatory bowel disease and nephritis, dermatologic indications such as vitiligo and erythropoietic protoporphyria, and ocular indications such as uveitis and dry eye. We are conducting animal studies for a number of different indications, and if these efforts are successful, intend to select one or more clinical development candidates and indications during the current fiscal year. We will then start preclinical toxicology and other studies preparatory to filing an Investigational New Drug (IND) application with FDA.

Key elements of our business strategy include: using our technology and expertise to develop and commercialize innovative therapeutic products; entering into alliances and partnerships with pharmaceutical companies to facilitate the development, manufacture, marketing, sale and distribution of product candidates that we are developing; and, partially funding our product development programs with the cash flow generated from our license agreement with AstraZeneca and any other companies.

We incorporated in Delaware in 1986 and commenced operations in the biopharmaceutical area in 1996. Our corporate offices are located at 4B Cedar Brook Drive, Cranbury, New Jersey 08512 and our telephone number is (609) 495-2200. We maintain an Internet site at <http://www.palatin.com>, where among other things, we make available free of charge on and through this website our Forms 3, 4 and 5, proxy statements, annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d), Section 14A and Section 16 of the Exchange Act as soon as reasonably practicable after we electronically file such material with, or furnish it to, the SEC. Our website and the information contained in it or connected to it are not incorporated into this quarterly report on Form 10-Q.

Results of Operations

Three Months Ended September 30, 2013 Compared to the Three Months Ended September 30, 2012

Revenue – We recognized no revenue for the three months ended September 30, 2013 compared to \$3,806 for the three months ended September 30, 2012 pursuant to our license agreement with AstraZeneca. Revenue for the three months ended September 30, 2012 consisted entirely of reimbursement of development costs and per-employee compensation,

earned at the contractual rate.

12

[Back to Table of Contents](#)

Research and Development – Research and development expenses were \$3.4 million for the three months ended September 30, 2013 compared to \$2.3 million for the three months ended September 30, 2012.

Research and development expenses related to our bremelanotide, PL-3994, peptide melanocortin agonist, obesity and other preclinical programs were \$2.8 million for the three months ended September 30, 2013 compared to \$1.7 million for the three months ended September 30, 2012. Spending to date has been primarily related to our bremelanotide for the treatment of FSD program. We are currently completing protocols and preparing for initiation of pivotal Phase 3 studies of bremelanotide. The amount of such spending and the nature of future development activities are dependent on a number of factors, including primarily the availability of funds to support future development activities, success of our clinical trials and preclinical and discovery programs, and our ability to progress compounds in addition to bremelanotide and PL-3994 into human clinical trials.

The amounts of project spending above exclude general research and development spending, which consists mainly of compensation and related costs, of \$0.6 million for the three months ended September 30, 2013 and September 30, 2012.

Cumulative spending from inception to September 30, 2013 on our bremelanotide, NeutroSpec (a previously marketed imaging product which has been terminated) and other programs (which include PL-3994, other melanocortin receptor agonists, obesity and other discovery programs) amounts to approximately \$166.6 million, \$55.6 million and \$61.4 million, respectively. Due to various risk factors described in our periodic filings with the SEC, including the difficulty in currently estimating the costs and timing of future Phase 1 clinical trials and larger-scale Phase 2 and Phase 3 clinical trials for any product under development, we cannot predict with reasonable certainty when, if ever, a program will advance to the next stage of development or be successfully completed, or when, if ever, net cash inflows will be generated.

General and Administrative – General and administrative expenses, which consists mainly of compensation and related costs, were \$1.0 million for the three months ended September 30, 2013 compared to \$1.1 million for the three months ended September 30, 2012.

Liquidity and Capital Resources

Since inception, we have incurred net operating losses, primarily related to spending on our research and development programs. We have financed our net operating losses primarily through equity financings and amounts received under collaborative agreements.

Our product candidates are at various stages of development and will require significant further research, development and testing and some may never be successfully developed or commercialized. We may experience uncertainties, delays, difficulties and expenses commonly experienced by early stage biopharmaceutical companies, which may include unanticipated problems and additional costs relating to:

the development and testing of products in animals and humans;

product approval or clearance;

regulatory compliance;

good manufacturing practices (GMPs);

intellectual property rights;

product introduction;
marketing, sales and competition; and
obtaining sufficient capital.

Failure to enter into collaboration agreements and obtain timely regulatory approval for our product candidates and indications would impact our ability to increase revenues and could make it more difficult to attract investment capital for funding our operations. Any of these possibilities could materially and adversely affect our operations and require us to curtail or cease certain programs.

During the three months ended September 30, 2013, we used \$2.0 million of cash for our operating activities, compared to \$4.7 million used in the three months ended September 30, 2012. Lower net cash outflows from operations in the three months ended September 30, 2013 were primarily the result of the receipt of a \$1.0 million, non-refundable option fee relating to negotiation of a potential future license of bremelanotide in a defined territory outside North America for the treatment of FSD and, secondarily, a payment deferral into the second quarter of fiscal 2014. Our accounts payable and accrued expenses increased to \$1.0 million and \$2.2 million, respectively, as of September 30, 2013 compared to \$0.3 million and \$1.7 million, respectively, as of June 30, 2013. Our periodic accounts payable and accrued expenses balances will continue to be highly dependent on the timing of our operating costs.

[Back to Table of Contents](#)

During the three months ended September 30, 2013, net cash provided by investing activities was \$1.5 million, consisting of proceeds from the maturity of short-term investments offset by \$6,239 used for capital expenditures. Net cash used in investing activities for the three months ended September 30, 2012 of \$3,930 consisted of \$4,620 in proceeds from the sale of equipment offset by \$8,550 used for capital expenditures.

During the three months ended September 30, 2013, cash used in financing activities of \$31,056 consisted of the \$25,214 for the payment of withholding taxes related to restricted stock units and payments of \$5,841 on capital lease payments. During the three months ended September 30, 2012, cash provided by financing activities consisted of net proceeds from the completion on July 3, 2012 of our private placement of 3,873,000 shares of our common stock, Series A 2012 warrants to purchase up to 31,988,151 shares of our common stock, and Series B 2012 warrants to purchase up to 35,488,380 shares of our common stock. Aggregate gross proceeds to us were \$35.0 million, with net proceeds, after deducting offering expenses, of \$34.4 million.

As of September 30, 2013, our cash, cash equivalents and short-term investments were \$22.3 million and our current liabilities were \$4.2 million. We intend to utilize existing capital resources for general corporate purposes and working capital, including preparing for the Phase 3 clinical trial program with bremelanotide for FSD, preclinical development of our peptide MC1R program, preclinical and clinical development of our PL-3994 program and preclinical development of other portfolio products. We believe that the Phase 3 clinical trial program with bremelanotide will cost at least \$78.0 million. We do not intend to initiate patient enrollment in the Phase 3 program unless we have adequate funds, or commitments for adequate funds, to complete the Phase 3 program. We intend to seek additional capital to support the Phase 3 program through collaborative arrangements on bremelanotide, public or private equity or debt financings, or other sources.

We believe that our existing capital resources will be adequate to fund our currently planned operations, including submitting complete protocols for pivotal Phase 3 studies to the U.S. Food and Drug Administration (FDA) but not initiating patient enrollment, through at least calendar year 2014.

We anticipate incurring additional losses over at least the next few years. To achieve profitability, if ever, we, alone or with others, must successfully develop and commercialize our technologies and proposed products, conduct preclinical studies and clinical trials, obtain required regulatory approvals and successfully manufacture and market such technologies and proposed products. The time required to reach profitability is highly uncertain, and we do not know whether we will be able to achieve profitability on a sustained basis, if at all.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

Not required to be provided by smaller reporting companies.

ITEM 4. CONTROLS AND PROCEDURES.

Our management, with the participation of our Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of our disclosure controls and procedures, as defined in Exchange Act Rules 13a-15(e) and 15d-15(e), as of the end of the period covered by this report. Based on that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective as of September 30, 2013. There were no changes in our internal control over financial reporting that occurred during our most recent fiscal quarter that materially affected, or that are reasonably likely to materially affect, our internal control over financial reporting.

[Back to Table of Contents](#)

PART II - OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS.

We may be involved, from time to time, in various claims and legal proceedings arising in the ordinary course of our business. We are not currently a party to any claim or legal proceeding.

ITEM 1A. RISK FACTORS.

There have been no material changes to our risk factors disclosed in Part I, Item 1A of our annual report on Form 10-K for the fiscal year ended June 30, 2013.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS.

Issuer purchases of equity securities. We have not and do not currently intend to retire or repurchase any of our capital securities other than providing our employees with the option to withhold shares to satisfy tax withholding amounts due from employees upon the vesting of restricted stock units in connection with our 2011 Stock Incentive Plan. The following 36,543 shares were withheld during the three-month period ended September 30, 2013 at the direction of the employees as permitted under the 2011 Stock Incentive Plan in order to pay the minimum amount of tax liability owed by the employee from the vesting of those units:

Period	Total Number of Shares Purchased (1)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet be Purchased Under Announced Plans or Programs
July 1-31, 2013	-	\$ -	-	-
August 1-31, 2013	-	\$ -	-	-
September 1-30, 2013	36,543	\$ 0.69	-	-
Total	36,543	\$ 0.69	-	-

(1) Consists solely of 36,543 shares that were withheld to satisfy tax withholding amounts due from employees upon the vesting of previously issued restricted stock units.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES.

None.

ITEM 4. MINE SAFETY DISCLOSURES.

Not applicable.

ITEM 5. OTHER INFORMATION.

None.
