- (1) RSU. The fair value of an RSU is calculated as the stock price as of the effective date less the present value of Company stock dividends over the vesting period. This calculation requires the input of certain assumptions, including the risk-free interest rate and the expected Company stock dividends. The formula for determining the number of RSUs granted is: number of RSUs = % of base pay / RSU fair value. This Form 4 will be amended to report the number of RSUs granted when the number has been calculated.

- (2) estimate the fair value of the option. This model requires the input of certain assumptions, including risk-free interest rate, volatility, dividend yield, and expected life. The formula for determining the number of options granted is: number of options = % of base pay / option fair value. This Form 4 will be amended to report the number of options granted when that number has been calculated.
