TECH/OPS SEVCON, INC.

Notes to Consolidated Financial Statements - March 31, 2007

(Unaudited)

(1) Basis of Presentation

In the opinion of management, the accompanying unaudited condensed consolidated financial statements contain all adjustments (consisting of only normally recurring accruals) necessary to present fairly the financial position of Tech/Ops Sevcon as of March 31, 2007 and the results of operations and cash flows for the three months and six months ended March 31, 2007 and April 1, 2006.

The significant accounting policies followed by Tech/Ops Sevcon are set forth in Note 1 to the financial statements in the 2006 Tech/Ops Sevcon, Inc. Annual Report filed on Form 10-K. Other than as set forth below, there have been no changes since the end of fiscal 2006 to the significant accounting policies followed by Tech/Ops Sevcon.

The results of operations for the six month periods ended March 31, 2007 and April 1, 2006 are not necessarily indicative of the results to be expected for the full year.

(2) New Accounting Pronouncements

In July 2006 the Financial Accounting Standards Board (FASB) issued Interpretation #48 "Accounting for Uncertain Tax Positions" which will be effective for fiscal years beginning after December 15, 2006. The Company is currently evaluating the impact of this interpretation on its financial statements.

In September 2006, the FASB issued SFAS No. 158, "Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans - an amendment of FASB Statements No. 87, 88, 106, and 132(R)." SFAS No. 158 requires an employer to recognize a plan's overfunded or underfunded status in its balance sheets and recognize the changes in a plan's funded status in comprehensive income in the year which the changes occur. The Company adopted SFAS #158 effective on September 30, 2006. There was no impact on the income statement in either fiscal 2007 or 2006 arising from the adoption of SFAS #158.

(3) Stock-Based Compensation Plans

Under the Company's 1996 Equity Incentive Plan (the "Plan") there were 79,000 shares reserved and available for grant at March 31, 2007. Recipients of grants or options must execute a standard form of non-competition agreement. The plan provides for the grant of Restricted Stock, Restricted Stock Units, Options, and Stock Appreciation Rights (SARs). Stock Appreciation Rights may be awarded either separately, or in relation to options granted, and for the grant of bonus shares. Options granted are exercisable at a price not less than fair market value on the date of grant.

Since the beginning of fiscal 2006 the Company has accounted for stock based compensation under SFAS 123R "Share-Based Payment," which defines a fair value based method of accounting for employee stock options or similar equity instruments.

The fair value of each option grant is estimated on the date of grant using the Black-Scholes option pricing model. There were no option grants in the first half of fiscal 2007 or in fiscal 2006 and therefore no assumptions were made

as to risk-free interest rate, expected dividend yield, expected life or expected volatility in fiscal 2007 or fiscal 2006. When options are exercised the Company normally issues new shares.

- 6 -

A summary of option activity for all plans for the six months ended March 31, 2007 is as follows:

	Options # of shares	Weighted average Exercise Price	Weighted average remaining contractual life (years)	Aggregate Intrinsic Value
Outstanding at September 30, 2006	172,000	\$ 9.35		
Granted	-			
Exercised	-			
Cancelled	(20,000)	\$ 14.31		
Outstanding at March 31, 2007	152,000	\$ 8.70	2.8 years	\$ 170,000
Exercisable at March 31, 2007	108,350	\$ 9.84	3.1 years	\$ 87,000

The aggregate intrinsic value included in the table above represents the difference between the exercise price of the options and the market price of the Company's common stock for the options that had exercise prices that were lower than the \$6.85 market price of the Company's common stock at March 31, 2007. No options were granted or exercised during the six months ended March 31, 2007, or in the corresponding period last year. At March 31, 2007 there was \$72,000 of total unrecognized compensation expense related to options granted under all equity compensation plans. The Company expects to recognize that cost over a weighted average period of 3.3 years.

In fiscal 2006 the Company granted 25,000 shares of restricted stock to three employees which will vest in five equal annual installments and 12,000 shares of restricted stock to six non-employee directors which vested on the day before the 2007 annual meeting.

In January 2007, the Company granted 12,000 shares of restricted stock to six non-employee directors which will vest on the day before the 2008 annual meeting providing that the grantee remains a director of the Company, or as determined by the Compensation Committee. The estimated fair value of the stock on the date of grant was \$92,000 based on the fair market value of the stock on date of issue. This amount was credited to common stock and paid in surplus and the \$92,000 was netted off paid in surplus in stockholders equity. This unearned compensation is being charged to income on a straight line basis over the twelve month period during which the forfeiture conditions lapse. The charge to income for these director restricted stock grants in the second quarter and first six months of fiscal 2007 was \$15,000 and the subsequent charge will be approximately \$23,000 on a quarterly basis.

During the restriction period, five years for employees and one year for non-employee directors, ownership of unvested shares cannot be transferred. Restricted stock has the same cash dividend and voting rights as other common stock and is considered to be currently issued and outstanding. For the purposes of calculating average issued shares for earnings per share these shares are only considered to be outstanding when the forfeiture conditions lapse and the shares vest.

Restricted stock activity for the six months ended March 31, 2007 was as follows:

Number of shares of Restricted Stock	Weighted Average Grant-Date Fair Value
---	---

Edgar Filing: TECH OPS SEVCON INC - Form 10-Q

Non-vested balance as of September 30, 2006	65,000	\$	5.70
Granted	12,000	\$	7.66
Vested	(24,000)	\$	5.72
Forfeited	-		N/A
Non-vested balance as of March 31, 2007	53,000	\$	6.14

As of March 31, 2007, there was \$267,000 of total restricted stock compensation expense related to non-vested awards not yet recognized, which is expected to be recognized over a weighted average period of 2.5 years.

The stock-based compensation expense was as follows.

	Three Months ended		(in thousands of dollars)	
	March 31, 2007	April 1, 2006	March 31, 2007	April 1, 2006
Stock option expense under SFAS # 123R	\$ 9	\$ 10	\$ 20	\$ 23
Restricted stock grants:				
Employees	16	16	35	27
Non-employee directors	21	19	38	40
Total stock based compensation expense	\$ 46	\$ 45	\$ 93	\$ 90

(4) Cash Dividends

On March 13, 2007, the Company declared a quarterly dividend of \$.03 per share for the second quarter of fiscal 2007, which was paid on April 12, 2007 to stockholders of record on March 28, 2007. The Company has paid regular quarterly cash dividends since the first quarter of fiscal 1990.

(5) Calculation of Earnings per Share and Weighted Average Shares Outstanding

Basic and fully diluted earnings per share were calculated as follows:

	Three Months ended		(in thousands except per share data)	
	March 31, 2007	April 1, 2006	March 31, 2007	April 1, 2006
Net income	\$ 568	\$ 342	\$ 656	\$ 502
Weighted average shares outstanding - basic	3,167	3,141	3,158	3,134
Basic income per share	\$.18	\$.11	\$.21	\$.16
Common stock equivalents	28	17	37	18
Weighted average shares outstanding - diluted	3,195	3,158	3,195	3,152
Diluted income per share	\$.18	\$.11	\$.21	\$.16
No of options that are anti-dilutive excluded from calculation of common stock equivalents	80	105	100	105

(6) Segment information

The Company has two reportable segments: electronic controls and capacitors. The electronic controls segment produces control systems and accessories for battery powered vehicles. The capacitor segment produces electronic components for sale to electronic equipment manufacturers. Each segment has its own management team, manufacturing facilities and sales force.

The significant accounting policies of the segments are the same as those described in note (1) to the 2006 Annual Report filed on Form 10-K. Inter-segment revenues are accounted for at current market prices. The Company evaluates the performance of each segment principally based on operating income. The Company does not allocate income taxes, interest income and expense or foreign currency translation gains and losses to segments. Information concerning operations of these businesses is as follows:

- 8 -

(in thousands of dollars)

Three months ended March 31, 2007

	Controls	Capacitors	Corporate	Total
Sales to external customers	\$ 9,881	\$ 493	\$ -	\$ 10,374

Percentage of sales		9.7%	10.1%	10.2%	10.9%

- 9 -

(8) Employee Benefit Plans

Tech/Ops Sevcon has defined benefit plans covering the majority of its US and UK employees. There is also a small defined contribution plan. The following table sets forth the components of the net pension cost as defined by SFAS #158.

	Three Months ended		(in thousands of dollars) Six Months ended	
	March 31, 2007	April 1, 2006	March 31, 2007	April 1, 2006
Service cost	\$ 147	\$ 93	\$ 292	\$ 186
Interest cost	287	229	570	457
Expected return on plan assets	(284)	(215)	(564)	(429)
Amortization of transition obligation	-	-	-	-
Amortization of prior service cost	15	13	29	26
Recognized net actuarial gain (loss)	3	-	6	-
Net periodic benefit cost	168	120	333	240
Net cost of defined contribution plans	\$ 11	\$ 8	\$ 22	\$ 16

The following table sets forth the movement in the liability for pension benefits in accordance with SFAS #158 in the six months ended March 31, 2007:

	(in thousands of dollars) Six Months ended	
	March 31, 2007	April 1, 2006
Liability for pension benefits at beginning of period	\$ 2,886	\$ N/A
Net periodic benefit cost	333	N/A
Plan contributions	(379)	N/A
Effect of exchange rate changes	74	N/A
Balance at end of period	\$ 2,914	\$ N/A

Tech/Ops Sevcon contributed \$379,000 to its pension plans in the six months ended March 31, 2007 and presently anticipates contributing a further \$379,000 to fund its plans in the remainder of fiscal 2007, for a total contribution of \$758,000. In addition employee contributions to the UK plan were \$143,000 in the first six months and are estimated to total \$292,000 in fiscal 2007.

The table below sets out the movement in the amounts included in accumulated other comprehensive income that has not yet been recognized as pension costs in the income statement:

	Unrecognized transition obligation	Unrecognized prior service cost	Unrecognized net actuarial gain (loss)	Deferred Tax	Total
Balance at September 30, 2006	\$ 1	\$ 2,006	\$ 765	\$ (849)	\$ 1,923
Amounts recognized in accumulated other comprehensive income in the second quarter of fiscal 2007	-	(29)	(6)	9	(26)

Edgar Filing: TECH OPS SEVCON INC - Form 10-Q

Balance at March 31, 2007	\$	1	\$	1,977	\$	759	\$	(840)	\$	1,897
Amounts expected to be recognized in the remainder of fiscal 2007		-		(30)		(6)		11		(25)

- 10 -

(9) Inventories

Inventories were comprised of:

	(in thousands of dollars)	
	March 31, 2007	September 30, 2006
Raw materials	\$ 2,116	\$ 2,195
Work-in-process	274	119
Finished goods	2,308	2,403
	\$ 4,698	\$ 4,717

(10) Accrued expenses

Set out below is an analysis of other accrued expenses at March 31, 2007 and September 30, 2006 which shows separately any items in excess of 5% of total current liabilities.

	(in thousands of dollars)	
	March 31, 2007	September 30, 2006
Accrued compensation and related costs	\$ 745	\$ 1,047
Warranty reserves	418	364
Other accrued expenses	1,230	1,290
	\$ 2,393	\$ 2,701

(11) Warranty reserves

The movement in warranty reserves was as follows:

	Three Months ended		Six Months ended	
	March 31, 2007	April 1, 2006	March 31, 2007	April 1, 2006
Warranty reserves at beginning of period	\$ 390	\$ 382	\$ 364	\$ 364
Decrease in beginning balance for warranty obligations settled during the period	(73)	(115)	(182)	(218)
Other changes to pre-existing warranties	-	53	10	47
Net increase in warranty reserves for products sold during the period	101	130	226	257
Warranty reserves at end of period	\$ 418	\$ 450	\$ 418	\$ 450

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

FORWARD LOOKING STATEMENTS

Statements in this discussion and analysis about the Company's anticipated financial results and growth, as well as those about the development of its products and markets, are forward-looking statements that involve risks and uncertainties that could cause actual results to differ materially from those projected. These include the risks discussed under 'Risk Factors' below and throughout this Item 2.

NEW ACCOUNTING PRONOUNCEMENTS

The Company adopted SFAS #158 on September 30, 2006. See Note 2 to Consolidated Financial Statements for a more detailed description of this new accounting pronouncement.

CRITICAL ACCOUNTING ESTIMATES

The Company's significant accounting policies are summarized in Note 1 of its Consolidated Financial Statements in this Quarterly Report on Form 10-Q. While all these significant accounting policies impact its financial condition and results of operations, certain of these policies require management to use a significant degree of judgement and/or make estimates, consistent with generally accepted accounting principles, that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities as of the date of the financial statements and the reported amounts of income and expenses during the reporting periods. Since these are judgements and estimates, they are sensitive to changes in business and economic realities, and events may cause actual operating results to differ materially from the amounts derived from management's estimates and judgements.

The Company believes the following represent the most critical accounting judgments and estimates affecting its reported financial condition and results of operations:

Bad Debts

The Company estimates an allowance for doubtful accounts based on known factors related to the credit risk of each customer and management's judgment about the customer's business. Ten customers account for approximately 59% of the Company's sales in the current fiscal year to date. At March 31, 2007, the allowance for bad debts amounted to \$157,000, which represented 2% of receivables.

Because of the Company's long term relationships with the majority of its customers, in most cases, the principal bad debt risk to the Company arises from the insolvency of a customer rather than its unwillingness to pay. In addition, in certain cases the Company maintains credit insurance covering up to 90% of the amount outstanding from specific customers. The Company also carries out some of its foreign trade, particularly in the Far East, using letters of credit.

The Company reviews all accounts receivable balances on a regular basis, concentrating on any balances that are more than 30 days overdue, or where there is an identified credit risk with a specific customer. A decision is taken on a customer-by-customer basis as to whether a bad debt reserve is considered necessary based on the specific facts and circumstances of each account. In general, the Company would reserve 100% of the receivable, net of any recoverable value added taxes or insurance overages, for a customer that becomes insolvent or files for bankruptcy, and lesser amounts for less imminent defaults. To a lesser degree, the Company maintains a small bad debt reserve to cover the remaining balances based on historical default percentages.

If the financial condition of any of the Company's customers is worse than estimated or were to deteriorate, resulting in an impairment of its ability to make payments, the Company's results may be adversely affected and additional allowances may be required. With the exception of a significant loss of \$562,000 in fiscal 2001 relating to one US customer, credit losses have not been significant in the past ten years.

Inventories

Inventories are valued at the lower of cost or market. Inventory costs include materials, direct labor and manufacturing overhead, and are relieved from inventory on a first-in, first-out basis. The Company carries out a significant amount of customization of standard products and also designs and manufactures special products to meet the unique requirements of its customers. This results in a significant proportion of the Company's inventory being customer specific. The Company's reported financial condition includes a provision for estimated slow-moving and obsolete inventory that is based on a comparison of inventory levels with forecast future demand. Such demand is estimated based on many factors, including management judgments, relating to each customer's business and to economic conditions. The Company reviews in detail all significant inventory items with holdings in excess of estimated normal requirements. It also considers the likely impact of changing technology. It makes an estimate of the provision for slow moving and obsolete stock on an item-by-item basis based on a combination of likely usage based on forecast customer demand, potential sale or scrap value and possible alternative use. This provision represents the difference between original cost and market value at the end of the financial period. In cases where there is no estimated future use for the inventory item and there is no estimated scrap or resale value, a 100% provision is recorded. Where the Company estimates that only part of the total holding of an inventory item will not be used, or there is an estimated scrap, resale or alternate use value, then a proportionate provision is recorded. Once an item has been written down, it is not subsequently revalued upwards. The provision for slow moving and obsolete inventories at March 31, 2007 was \$910,000, or 16% of the original cost of gross inventory. At September 30, 2006 the provision was \$923,000, also 16% of gross inventory. If actual future demand or market conditions are less favorable than those projected by management, or if product designs change more quickly than forecast, additional inventory write-downs may be required, which may have a material adverse impact on reported results.

Warranty Costs

The Company provides for the estimated cost of product warranties at the time revenue is recognized. While the Company engages in product quality programs and processes, the Company's warranty obligation is affected by product failure rates and repair or replacement costs incurred in correcting a product failure. Accordingly, the provision for warranty costs is based upon anticipated in-warranty failure rates and estimated costs of repair or replacement. Anticipating product failure rates involves making difficult judgments about the likelihood of defects in materials, design and manufacturing errors, and other factors that are based in part on historical failure rates and trends, but also on management's expertise in engineering and manufacturing. Estimated repair and replacement costs are affected by varying component and labor costs. Should actual product failure rates and repair or replacement costs differ from estimates, revisions to the estimated warranty liability may be required and the Company's results may be materially adversely affected. In the event that the Company discovers a product defect that impacts the safety of its products, then a product recall may be necessary, which could involve the Company in substantial unanticipated expense significantly in excess of the reserve. There were no significant safety related product recalls during the past three fiscal years.

Goodwill Impairment

The Company carries out an annual assessment to determine if the goodwill relating to the controls business amounting to \$1,435,000 has been impaired, in accordance with the requirements of SFAS #142 "Goodwill and Other Intangible Assets". The assessment is based on three separate methods of valuing the controls business based on expected free cash flows, the market price of the Company's stock and an analysis of precedent transactions. These methods require estimates of future revenues, profits, capital expenditures and working capital requirements which are based on evaluation of historical trends, current budgets, operating plans and industry data. If, in future periods, the Company's results of operations, cash flows or the market price of the Company's stock were to decrease significantly then it may be necessary to record an impairment charge relating to goodwill of up to \$1,435,000.

Pension Plan Assumptions

The Company's pension plans are significant relative to the size of the Company. Pension plan assets were \$17,590,000 at September 30, 2006 and the total assets of the Company were \$18,652,000. Although the plan assets are not included in the assets of the Company, they are 94% of size of the Company's total assets. In accordance with SFAS #158 the funded status of the pension plans (plan assets less the accumulated benefit obligation) is recognized in the Company's balance sheet as "Liability for pension benefits" which amounted to a \$2,914,000 at March 31, 2007; compared to \$2,886,000 at September 30, 2006.

The Company makes a number of assumptions relating to its pension plans in order to measure the financial position of the plans and the net periodic benefit cost. The most significant assumptions relate to the discount rate, the expected long term return on plan assets and the rate of future compensation increase. If these assumptions prove to be incorrect then the Company may need to record additional expense relating to the pension plans which could have a material effect on the Company's results of operations.

The table below sets out the approximate impact on the funded status of the Company's pension plans at September 30, 2006 that the Company estimates would arise from the following respective changes in significant plan assumptions:

Plan Assumption	Change in Assumption	Impact on Funded Status (in thousands of dollars)	Change in funded status
Assumptions impacting accumulated benefit obligation:			
Discount rate	0.1%	\$450	16%
Inflation rate	0.1%	380	13%
Salary Increase	0.1%	190	7%
Mortality rate	1 year	500	17%
Assumption impacting plan assets:			
Return on plan assets	0.1% per year	\$18 per year	1% per year

OVERVIEW OF SECOND QUARTER AND FIRST SIX MONTHS

The Company reported net income of \$568,000, or \$.18 per share, for the second fiscal quarter ended March 31, 2007. Net income increased by 66% from \$342,000 in the comparable period last year. Basic and fully diluted net income was \$.18 per share, an increase of \$.07 per share compared with the second quarter of last year. Sales in the second quarter were \$10,374,000; the highest quarterly sales ever recorded by the Company. Sales revenues were 21% ahead of the second quarter last year. Volumes shipped were 14% ahead of the prior year period, augmented by foreign currency fluctuations which caused an increase in reported revenues of \$628,000, or 7%.

Operating income for the second quarter was \$898,000, an increase of \$336,000, or 60%, compared to the second quarter of last year. Gross profit increased by \$697,000 compared to last year due to both higher volumes and foreign currency fluctuations. Operating expense for the second quarter was \$361,000 higher than the same period last year, mainly due to foreign currency fluctuations.

For the six month period, revenues were \$18,600,000, an increase of \$2,217,000, or 14%, compared to last year. Higher volumes accounted for a 7% increase in sales revenues and contributed \$394,000 of additional gross profit. The weakness of the US dollar compared to the British Pound and the Euro resulted in a \$1,100,000 increase in reported sales, but this reduced operating income by \$198,000. Operating expenses, excluding the effect of foreign currency changes, were \$100,000 lower than last year. Operating income for the first half of fiscal 2007 was \$1,102,000, an increase of \$296,000, or 37%, compared to last year. For the first half of fiscal 2007, net income was \$656,000, or \$.21 per diluted share, compared to \$502,000, or \$.16 per diluted share last year.

Cash balances decreased by \$1,056,000 in the first six months of fiscal 2007 to \$234,000. Operating activities used cash of \$567,000, mainly due to the increase in working capital caused by the higher volumes shipped in the second quarter. Capital expenditures used cash of \$528,000 and dividend payments amounted to \$192,000. Exchange rate changes increased cash by \$231,000.

Results of Operations**Three months ended March 31, 2007**

The following table compares results by segment for the second quarter of fiscal 2007 with the prior year period and shows the percentage changes in total and split between the currency impact and volume / other changes.

			% change due to:		
	2007	2006	Total	Currency	Volume / other
Sales:					
Controls - to external customers	\$ 9,881	\$ 8,099	22%	7%	15%
Capacitors- to external customers	493	463	6%	12%	-6%
Capacitors - inter-segment	16	16	0%	12%	-12%
Capacitors - total	509	479	6%	12%	-6%
Total sales to external customers	10,374	8,562	21	7%	14%
Gross Profit:					
Controls	3,791	3,093	23%	0%	23%
Capacitors	223	224	0%	12%	-12%
Total	4,014	3,317	21%	1%	20%
Selling research and administrative expenses:					
Controls	2,862	2,535	13%	9%	4%
Capacitors	181	188	-4%	12%	-16%
Unallocated corporate expense	73	32	128%	0%	128%
Total	3,116	2,755	13%	9%	4%
Operating income:					
Controls	929	558	66%	-39%	105%
Capacitors	42	36	17%	12%	5%
Unallocated corporate expense	(73)	(32)	128%	0%	128%
Total	898	562	60%	-38%	98%
Other income and expense	(23)	(37)	-38%	-14%	-24%
Income before income taxes	875	525	67%	-40%	107%
Income taxes	(307)	(183)	68%	-40%	108%
Net Income	\$ 568	\$ 342	66%	-40%	106%

Sales in the second fiscal quarter ended March 31, 2007 were \$10,374,000 compared to \$8,562,000 in the same period last year, an increase of \$1,812,000, or 21%. This was a record for quarterly sales, 11% ahead of the previous high recorded in the third quarter of last fiscal year. Compared to the second quarter of fiscal 2006, the US dollar weakened by 12% compared to the British Pound and by 9% compared to the Euro. These foreign currency fluctuations accounted for a 7% increase in reported sales and volumes were 7% higher than last year. Volumes in the controller business were 15% higher than the same period last year, with gains reported in all business units. The increased revenues in the controls segment were mainly due to broadly-based higher levels of demand across most of the Company's customer base; there were no significant "one-off" or "exceptional" sales revenues in the second quarter of fiscal 2007. In the capacitor business, sales to external customers increased by \$30,000, or 6%, compared to the same period last year. Capacitor volumes were 6% down compared to the same period last year mainly due to slower conditions in the railway signaling market. Foreign currency fluctuations accounted for a \$62,000 increase in reported sales of capacitors.

Revenues in the US controller business increased by 8% compared to the second quarter of fiscal 2006. In most markets served by the Company demand was higher than last year; however, in the US aerial lift market, revenues from a major customer were lower than last year, mainly due to unusually high shipment levels in the second quarter of fiscal 2006. Controller volumes in foreign markets were ahead of last year's second quarter by 20%, mainly due to higher demand in Europe and the Far East.

- 15 -

The gross profit percentage was unchanged at 38.7% of sales in both this period and the comparable period in fiscal 2006. Gross profit increased by \$697,000 compared to the second quarter of last year. Foreign currency fluctuations increased reported gross profit by \$30,000. Net of currency impact, gross profit was \$667,000 above last year. The increase in gross profit was mainly due to higher volumes.

Selling, research and administrative expenses were \$3,116,000, an increase of \$361,000 compared to the same period last year. Foreign currency fluctuations increased reported operating expenses by \$245,000, or 9%. Therefore, excluding the impact of currency fluctuations, operating expenses for the second quarter were 4% higher than the same period last year.

Operating income for the second quarter was \$898,000, an increase of \$336,000, or 60%, compared to the same period last year. Foreign currency fluctuations had a negative impact of \$215,000 on reported operating income. Excluding the currency impact, operating income for the controller business increased by \$586,000, mainly due to higher volumes. In the capacitor business segment there was operating income of \$42,000 compared to \$36,000 in the second quarter of fiscal 2006.

In the second quarter interest expense was \$2,000, a decrease of \$12,000 compared to the prior year. There was a foreign currency loss of \$23,000 in the second quarter of fiscal 2007 compared to a loss of \$24,000 in the same period last year.

Income before income taxes was \$875,000 compared to \$525,000 in the same period last year, an increase of \$350,000, or 67%. Income taxes were 35% of pre-tax income, in line with the same period last year. Net income for the second quarter was \$568,000, an increase of \$226,000 compared to the same period last year. Basic and fully diluted income per share was \$.18 compared to \$.11 per share in the second quarter of fiscal 2006.

Six months ended March 31, 2007

The following table compares first half year results by segment for the six months ended March 31, 2007 with the same period in the prior year, and shows the percentage changes in total and split between the currency impact and volume / other changes.

	Six months ended		% change due to:		
	March 31, 2007	April 1, 2006	Total	Currency	Volume / other
Sales:					
Controls - to external customers	\$ 17,684	\$ 15,602	13%	6%	7%
Capacitors- to external customers	916	781	17%	12%	5%
Capacitors - inter-segment	31	35	-11%	12%	-23%
Capacitors - total	947	816	16%	12%	4%
Total sales to external customers	18,600	16,383	14%	7%	7%
Gross Profit:					
Controls	6,657	6,013	11%	4%	7%
Capacitors	355	351	1%	12%	-11%
Total	7,012	6,364	10%	4%	6%
Selling research and administrative expenses:					
Controls	5,409	5,060	7%	8%	-1%
Capacitors	388	369	5%	12%	-7%
Unallocated corporate expense	113	129	-12%	0%	-12%

Edgar Filing: TECH OPS SEVCON INC - Form 10-Q

Total	5,910	5,558	6%	8%	-2%
Operating income:					
Controls	1,248	953	31%	-20%	51%
Capacitors	(33)	(18)	83%	12%	71%
Unallocated corporate expense	(113)	(129)	-12%	0%	-12%
Total	1,102	806	37%	-25%	62%
Other income and expense	(93)	(35)	166%	246%	-80%
Income before income taxes	1,009	771	31%	-37%	68%
Income taxes	(353)	(269)	31%	-37%	68%
Net Income	\$ 656	\$ 502	31%	-37%	68%

- 16 -

Sales in the six months ended March 31, 2007 were \$18,600,000, an increase of \$2,217,000, or 14%, compared to the same period last year when sales were \$16,383,000. Foreign currency fluctuations accounted for an increase in reported sales of \$1,100,000 or 7%; in addition, volumes were also 7% ahead of the same period last year. The increased volumes were mainly due to broadly-based higher levels of demand across most of the Company's customer base; there were no significant "one-off" or "exceptional" sales revenues in the first six months of fiscal 2007. Volumes in the controller business were 7% better than in the same period last year, with gains in Europe and the Far East partially offset by marginally lower volumes in the USA. Shipments in the aerial lift market were ahead in foreign markets but lower in the USA. Most of the other markets served by the Company recorded higher volumes. In the capacitor business, sales to external customers increased by \$135,000 compared to the same period last year. Capacitor volumes in the first six months were higher by \$37,000, or 5%. Foreign currency fluctuations accounted for a \$98,000, or 12%, increase in the reported sales of capacitors.

Revenues in the US controller business decreased by 3% compared to the first half of last fiscal year. This was mainly due to weak demand in the aerial lift market, partially offset by growth in other markets. Controller volumes in foreign markets were ahead of last year's first six months by 15%, mainly due to higher volumes in the aerial lift market.

Gross profit was 37.7% of sales in this period compared to 38.8 % in the comparable period in fiscal 2006. Gross profit increased by \$648,000 compared to the first half of last year. The positive impact of higher volumes was augmented by favorable foreign currency fluctuations which increased reported gross profit by \$254,000. In the controller business, gross profit increased by \$644,000 compared to the second quarter of fiscal 2006 and, in the capacitor business, gross profit of \$355,000 was marginally ahead of last year.

Selling, research and administrative expenses were \$5,910,000, an increase of \$352,000 compared to the same period last year. Foreign currency fluctuations increased reported operating expenses by \$452,000, or 8%. Therefore, excluding the impact of currency fluctuations, operating expenses in the first half year were \$100,000, or 2%, lower than the same period last year.

Operating income for the first half of fiscal 2007 was \$1,102,000, an increase of \$296,000, or 37%, compared to the same period last year. Foreign currency fluctuations resulted in a \$198,000 decrease in reported operating income. Excluding the currency impact, operating income for the controller business increased by 51% compared to last year. The main cause of this increase in operating income was higher volumes. In the capacitor business segment there was an operating loss of \$33,000 compared to an \$18,000 operating loss in the first six months of fiscal 2006.

In the first half of fiscal 2007 interest expense was \$7,000 compared to \$35,000 in the same period last year. There was a foreign currency loss of \$90,000 in fiscal 2007 compared to a loss of \$2,000 in the same period last year, mainly due to the weakness of the US dollar compared to European currencies.

Income before income taxes was \$1,009,000 compared to \$771,000 in the same period last year, an increase of \$238,000, or 31%. Income taxes were 35% of pre-tax income, in line with the same period last year. Net income for the first half year was \$656,000, an increase of \$154,000, or 31%, compared to the same period last year. Basic and fully diluted income per share increased by \$.05 per share to \$.21 per share compared to \$.16 per share in the first half of fiscal 2006.

Financial Condition

The Company has, since January 1990, maintained a program of regular cash dividends. The dividend for the second quarter of fiscal 2007 was paid on April 12, 2007, and amounted to \$97,000. Cash balances at the end of the second quarter of 2007 were \$234,000 compared to \$1,290,000 on September 30, 2006, a decrease in cash of \$1,056,000 in the first six months of fiscal 2007.

In the first half of fiscal 2007, net income was \$656,000, and operating activities used \$567,000 of cash. There was an increase of \$2,491,000 in receivables mainly due to higher volumes phased towards the end of the second quarter. The number of days sales in receivables increased in the first six months of fiscal 2007 from 64 days to 68 days.

- 17 -

Inventories decreased by \$19,000 with the impact of higher volumes and foreign currency fluctuations offset by improved efficiency. Prepaid expense and other current assets increased by \$310,000. Accounts payable increased by \$1,071,000 mainly due to both higher volumes and foreign currency fluctuations. Accrued expenses decreased by \$308,000 mainly due to bonuses for fiscal 2006 performance which were paid in the first half of fiscal 2007. Accrued income taxes increased by \$345,000. Dividends paid in the first half of fiscal 2007 amounted to \$192,000. Capital expenditures in the first six months were \$528,000. Exchange rate changes increased cash by \$231,000 in the first six months of fiscal 2007.

The Company has no long-term debt and has overdraft facilities in the UK of approximately \$2.1 million and of \$200,000 in France. At the end of the second quarter the Company had no borrowings against these overdraft facilities. The UK overdraft facilities are secured by all of the Company's assets in the UK and the French overdraft facilities are unsecured.

Tech/Ops Sevcon's capital resources, in the opinion of management, are adequate for projected operations and capital spending programs. Capital spending programs are not expected to be significantly higher than depreciation over the next two years and projected volume growth is not expected to require significant additional cash resources.

Item 3. Quantitative and Qualitative Disclosures about Market Risk.

The Company's operations are sensitive to a number of market factors, any one of which could materially adversely affect its results of operations in any given year. Other risks dealing with contingencies are described in Note 5 to the Company's Consolidated Financial Statements included under Item 8 of the Company's Form 10-K for the year ended September 30, 2006 and other risks are described under the caption Risk Factors in Management's Discussion and Analysis of Financial Condition and Results of Operations above.

Foreign currency risk

The Company sells to customers throughout the industrialized world. The majority of the Company's products are manufactured in the United Kingdom. In the first six months of fiscal 2007, approximately 37% of the Company's sales were made in US Dollars, 29% were made in British Pounds and 34% were made in Euros. Over 75% of the Company's cost of sales was incurred in British Pounds. This resulted in the Company's sales and margins being exposed to fluctuations due to the change in the exchange rates of the US Dollar, the British Pound and the Euro. The Company has trade accounts receivable and accounts payable denominated in both British pounds and Euros which are exposed to exchange fluctuations.

In addition, the translation of the sales and income of foreign subsidiaries into US Dollars is also subject to fluctuations in foreign currency exchange rates.

The Company undertakes hedging activities from time-to-time to manage the foreign exchange exposures related to forecasted purchases and sales in foreign currency and the associated foreign currency denominated receivables and payables. The Company does not engage in speculative foreign exchange transactions. Details of this hedging activity and the underlying exposures are set out below.

The following table provides information about the Company's foreign currency accounts receivable, accounts payable, firmly committed sales contracts and derivative financial instruments outstanding as of March 31, 2007. The information is provided in US Dollar amounts, as presented in the Company's consolidated financial statements. The table presents the notional amount (at contract exchange rates) and the weighted average contractual foreign currency exchange rates. The contracts mature at various dates from April 2007 to June 2007.

	(in thousands of dollars, except average contract rates)			
	Expected maturity or transaction date			
	FY2007	FY2008	Total	Fair Value
On balance sheet financial instruments:				
In \$ US Functional Currency				
Accounts receivable in pounds	2,038	-	2,038	2,038

Amount recorded as other comprehensive income	\$ -	\$ -	\$ -	\$ -

Interest Rate Risk

The Company does not currently have any interest bearing debt. The Company does invest surplus funds in instruments with maturities of less than 12 months at both fixed and floating interest rates. The Company incurs short-term borrowings from time-to-time on its overdraft facilities in Europe at variable interest rates. Due to the short-term nature of the Company's investments at March 31, 2007, the risk arising from changes in interest rates was not material.

Item 4. Controls and Procedures.

(a) Evaluation of disclosure controls and procedures. The Company's principal executive officer and principal financial officer, after evaluating the effectiveness of the Company's "disclosure controls and procedures" (as defined in the Securities Exchange Act of 1934 Rule 13a-15(e)) have concluded that, as of March 31, 2007, these disclosure controls and procedures were effective.

(b) Changes in internal control over financial reporting. Our principal executive officer and principal financial officer have identified no change in the Company's "internal control over financial reporting" (as defined in Securities Exchange Act of 1934 Rule 13a-15(f)) that occurred during the period covered by this Quarterly Report on Form 10-Q that has

materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

- 19 -

PART II. OTHER INFORMATION

Item 1A. Risk Factors

In addition to the market risk factors relating to foreign currency and interest rate risk set out in PART 1 Item 3 above, the Company believes that the following represent the most significant risk factors for the Company:

Capital goods markets are cyclical

The Company's customers are mainly manufacturers of capital goods such as fork lift trucks, aerial lifts and railway signaling equipment. These markets are cyclical and are currently showing modest growth, but demand in these markets could decrease or customers could decide to purchase alternative products. In this event the Company's sales could decrease below its current break even point and there is no certainty that the Company would be able to decrease overhead expenses to enable it to operate profitably.

Single source materials and sub-contractors may not meet the Company's needs.

The Company relies on certain suppliers and sub-contractors for all of its requirements for certain components, sub-assemblies and finished products. In the event that such suppliers and sub-contractors are unable or unwilling to continue supplying the Company, or to meet the Company's cost and quality targets or needs for timely delivery, there is no certainty that the Company would be able to establish alternative sources of supply in time to meet customer demand.

Damage to the Company's or sub-contractor's buildings would hurt results.

In the controller business the majority of product is produced in a single plant in England and uses sub-assemblies sourced from a sub-contractor with two plants in Poland. The capacitor business is located in a single plant in Wales. In the event that any of these plants was to be damaged or destroyed, there is no certainty that the Company would be able to establish alternative facilities in time to meet customer demand. The Company does carry property damage and business interruption insurance but this may not cover certain lost business due to the long-term nature of the relationships with many customers.

Product liability claims may have a material adverse effect

The Company's products are technically complex and are installed and used by third parties. Defects in their design, installation, use or manufacturing may result in product liability claims against the Company. Such claims may result in significant damage awards, and the cost of any such litigation could be material.

Item 4. Submission of Matters to a Vote of Security Holders

At the Company's Annual meeting held on January 23, 2007 the shareholders approved the election of directors as follows:

To elect as directors for three year terms the following persons: Maarten Hemsley, Marvin G. Schorr and David R.A. Steadman. Mr. Hemsley received 3,090,341 votes for and 7,968 withheld; Dr. Schorr received 3,087,661 votes for and 10,648 withheld; and Mr. Steadman received 3,090,241 votes for and 8,068 withheld. There were no abstentions or broker non-votes.

Item 6. Exhibits
