² For the ten-month period ended October 31, 2008. The Fund changed its fiscal year end from December 31 to October 31.

³ Based on the average daily shares outstanding.

⁴ Total return based on net asset value reflects changes in the Fund's net asset value during each period. Total return based on market value reflects changes in market value. Each figure assumes that dividend and capital gain distributions, if any, were reinvested. These figures will differ depending upon the level of any discount from or premium to net asset value at which the Fund's shares traded during the period.

⁸ Ratios calculated on the basis of expenses relative to the average net assets of common shares. Without the exclusion of preferred shares, the ratios of expenses would have been 0.76%, 0.77%, 0.77% and 0.77% for the periods ended 12-31-07, 12-31-06, 12-31-05 and 12-31-04, respectively.

⁹ Ratios calculated on the basis of net investment income relative to the average net assets of common shares. Without the exclusion of preferred shares, the ratios of net investment income would have been 6.26%, 5.77%, 5.47% and 5.36% for the periods ended 12-31-07, 12-31-06, 12-31-05 and 12-31-04, respectively.

¹⁰ The Portfolio turnover rate, including the effect of "TBA" (to be announced) securities for the year ended 10-31-09 was 100%.

¹¹ Calculated by subtracting the Fund's total liabilities from the Fund's total assets and dividing that amount by the number of APS outstanding, as of the applicable 1940 Act Evaluation Date, which may differ from the financial reporting date.

¹² In May 2008, the Fund entered into a Revolving Credit Agreement with a third-party commercial bank in order to redeem the APS. The redemption of all APS was completed on June 12, 2008.

¹³ Asset coverage equals the total net assets plus APS divided by the APS of the Fund outstanding at period end.

¹⁴ Asset coverage equals the total net assets plus borrowings divided by the borrowing of the Fund outstanding at period end (Note 8).

Note 1 Organization

John Hancock Investors Trust (the Fund) is a closed-end diversified management investment company registered under the Investment Company Act of 1940, as amended (the 1940 Act).

Note 2 □ Significant accounting policies

The financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America, which require management to make certain estimates and assumptions at the date of the financial statements. Actual results could differ from those estimates. Events or transactions occurring after the end of the fiscal period through the date that the financial statements were issued have been evaluated in the preparation of the financial statements. The following summarizes the significant accounting policies of the Fund:

Security valuation. Investments are stated at value as of the close of the regular trading on the New York Stock Exchange (NYSE), normally at 4:00 P.M., Eastern Time. The Fund uses a three-tier hierarchy to prioritize the pricing assumptions, referred to as inputs, used in valuation techniques to measure fair value. Level 1 includes quoted prices in active markets for identical securities. Level 2 includes significant observable inputs. Observable inputs may include quoted prices for similar securities, interest rates, prepayment speeds and credit risk. Prices for securities valued using these techniques are received from independent pricing vendors and brokers and are based on an evaluation of the inputs described. Level 3 includes significant unobservable inputs when market prices are not readily available or reliable, including the Fund's own assumptions in determining the fair value of investments. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The following is a summary of the values by input classification of the Fund's investments as of April 30, 2010, by major category type:

Net transfers in and/ out of Level 3	(750,000)	(3,876,324)	□	(562,500)	(5,188,824)
Balance as of 4-30-10	□	\$1,132,985	\$1,868,943	\$30,000	\$3,031,928

During the six-month period ended April 30, 2010, there were no significant transfers in/out of Level 1 and Level 2 assets.

In order to value the securities, the Fund uses the following valuation techniques. Equity securities held by the Fund are valued at the last sale price or official closing price on the principal securities exchange on which they trade. In the event there were no sales during the day or closing prices are not available, then securities are valued using the last quoted bid or evaluated price. Foreign securities and currencies are valued in U.S. dollars, based on foreign currency exchange rates supplied by an independent pricing service. Certain securities traded only in the over-the-counter market are valued at the last bid price quoted by brokers making markets in the securities at the close of trading. Certain short-term securities are valued at amortized cost.

Other portfolio securities and assets, where market quotations are not readily available, are valued at fair value, as determined in good faith by the Fund's Pricing Committee, following procedures established by the Board of Trustees. Generally, trading in non-U.S. securities is substantially completed each day at various times prior to the close of trading on the NYSE. The values of non-U.S. securities, used in computing the net asset value of the Fund's shares, are generally determined at these times. Significant market events that affect the values of non-U.S. securities may occur after the time when the valuation of the securities is generally determined and the close of the NYSE. During significant market events, these securities will be valued at fair value, as determined in good faith, following procedures established by the Board of Trustees.

Security transactions and related investment income. Investment security transactions are accounted for on a trade date plus one basis for daily net asset value calculations. However, for financial reporting purposes, investment transactions are reported on trade date. Interest income is accrued as earned. Gains and losses on securities sold are determined on the basis of identified cost and may include proceeds from litigation. Dividend

income is recorded on the ex-date except for certain foreign dividends where the ex-date may have passed, which are recorded when the Fund becomes aware of the dividends. Interest income includes coupon interest and amortization/accretion of premiums/discounts on debt securities. Debt obligations may be placed in a non-accrual status and related interest income may be reduced by stopping current accruals and writing off interest receivables when the collection of all or a portion of interest has become doubtful.

Overdrafts. Pursuant to the custodian agreement, the Fund's custodian may, in its discretion, advance funds to the Fund to make properly authorized payments. When such payments result in an overdraft, the Fund is obligated to repay the custodian for any overdraft, including any costs or expenses associated with the overdraft. The custodian has a lien, security interest or security entitlement in any Fund property, that is not segregated, to the maximum extent permitted by law to the extent of any overdraft.

26 Investors Trust | Semiannual report

Expenses. The majority of expenses are directly attributable to an individual fund. Expenses that are not readily attributable to a specific fund are allocated among all funds in an equitable manner, taking into consideration, among other things, the nature and type of expense and the fund's relative assets. Expense estimates are accrued in the period to which they relate and adjustments are made when actual amounts are known.

Stripped securities. Stripped mortgage backed securities are financial instruments that derive their value from other instruments so that one class receives the entire principal from the underlying mortgage assets (PO or principal only), while the other class receives the interest cash flows (IO or interest only). Both PO and IO investments represent an interest in the cash flows of an underlying stripped mortgage backed security. If the underlying mortgage assets experience greater than anticipated prepayments of principal, the Fund may fail to fully receive its initial investment in an IO security. The market value of these securities can be extremely volatile in response to changes in interest rates. In addition, these securities present additional credit risk such that the Fund may not receive all or part of its principal because the counterparty or issuer has defaulted on its obligation.

Federal income taxes. The Fund intends to qualify as a regulated investment company by complying with the applicable provisions of the Internal Revenue Code and will not be subject to federal income tax on taxable income that is distributed to shareholders. Therefore, no federal income tax provision is required.

For federal income tax purposes, the Fund has a capital loss carryforward of \$12,033,875 available to offset future net realized capital gains. The following table details the capital loss carryforward available as of October 31, 2009.

CAPITAL LOSS CARRYFORWARD EXPIRING AT OCTOBER 31

2012	2013	2014	2015	2016	2017
\$1,668,465	\$2,866,857	\$2,605,424	\$1,304,634	\$912,660	\$2,675,835

As of October 31, 2009, the Fund had no uncertain tax positions that would require financial statement recognition, de-recognition or disclosure. The Fund's federal tax return is subject to examination by the Internal Revenue Service for a period of three years.

Distribution of income and gains. Distributions to shareholders from net investment income and net realized gains, if any, are recorded on the ex-date. The Fund generally declares and pays dividends quarterly and capital gain distributions, if any, annually.

Such distributions, on a tax basis, are determined in conformity with income tax regulations, which may differ from accounting principles generally accepted in the United States of America. Material distributions in excess of tax basis earnings and profits, if any, are reported in the Fund's financial statements as a return of capital.

Capital accounts within financial statements are adjusted for permanent book-tax differences. These adjustments have no impact on net assets or the results of operations. Temporary book-tax differences will reverse in a subsequent period. Permanent book-tax differences are primarily attributable to derivative transactions, amortization and accretion on debt securities and defaulted bonds.

Statement of cash flows. Information on financial transactions that have been settled through the receipt and disbursement of cash is presented in the Statement of Cash Flows. The cash amount shown in the Statement of Cash Flows is the amount included in the Fund's Statement of Assets and Liabilities and represents the cash on hand at its custodian and does not include any short-term investments.

Note 3 □ Derivative instruments

The Fund may invest in derivatives, including future contracts and swap contracts, in order to meet its investment objectives. The Fund may use derivatives to manage against a decline in the value of securities owned by the Fund due to anticipated interest rate, currency or market changes. In addition, the Fund will use futures contracts for duration management or to gain exposure to a securities market.

The use of derivatives may involve risks different from, or potentially greater than, the risks associated with investing directly in securities. Specifically, derivatives expose a Fund to the risk that the counterparty to an over-the-counter (OTC) derivatives contract will be unable or unwilling to make timely settlement payments or otherwise honor its obligations. OTC derivatives transactions typically can only be closed out with the other party to the transaction. If the counterparty defaults, the Fund will have contractual remedies, but there is no assurance that the counterparty will meet its contractual obligations or the Fund will succeed in enforcing them.

Futures. A future is a contractual agreement to buy or sell a particular commodity, currency, or financial instrument at a pre-determined price in the future. Risks related to the use of futures contracts include possible illiquidity of the future markets, contract prices that can be highly volatile and imperfectly correlated to movements in hedged security values and/or interest rates and potential losses in excess of the fund's initial investment.

Futures contracts are valued at quoted daily settlement prices established by the exchange on which they trade. Upon entering into a futures contract, the Fund is required to deposit initial margin with the broker in the form of cash or securities. The amount of required margin is generally based on a percentage of the contract value; this amount is the initial margin for the trade. The margin deposit must then be maintained at the established level over the life of the contract. Futures contracts are marked to market daily and an appropriate payable or receivable for the change in value (variation margin) is recorded by the Fund.

During the six months ended April 30, 2010, the Fund used futures contracts to manage duration of the portfolio. The following table summarizes the contracts held at April 30, 2010. The range of futures contracts notional amounts held by the Fund during the six months ended April 30, 2010 was approximately \$2.6 million to \$6.9 million.

Note Futures	22	Short	Jun-10		2,556,750	(37,187)
					\$6,828,554	(\$27,862)

Swaps. The Fund may enter into interest rate, credit default, and other forms of swap agreements. Swap agreements are privately negotiated agreements between a Fund and counterparty to exchange cash flows, assets, foreign currencies or market-linked returns at specified intervals. Swaps are marked to market daily based upon values from third party vendors or broker quotations, and the change in value is recorded as an unrealized appreciation/depreciation of swap contracts.

Upfront payments made/received by the Fund are amortized/accreted for financial reporting purposes, with the unamortized/unaccreted portion included in the Statement of Assets and Liabilities. A termination payment by the counterparty or the Fund is recorded as realized gain or loss, as well as, the net periodic payments received or paid by a Fund.

28 Investors Trust | **Semiannual report**

Entering into swap agreements involves, to varying degrees, elements of credit, market and documentation risk that may amount to values that are in excess of the amounts recognized on the Statement of Assets and Liabilities. Such risks involve the possibility that there will be no liquid market for the swap, that a counterparty may default on its obligation or delay payment under the swap terms. The counterparty may disagree or contest the terms of the swap. Market risks may also accompany the swap, including interest rate risk. The Fund may also suffer losses if it is unable to terminate or assign outstanding swaps or reduce its exposure through offsetting transactions.

Interest rate swaps. Interest rate swaps represent an agreement between a Fund and counterparty to exchange cash flows based on the difference between two interest rates applied to a notional amount. The payment flows are usually netted against each other, with the difference being paid by one party to the other. The Fund settles accrued net interest receivable or payable under the swap contracts on a periodic basis.

During the six months ended April 30, 2010, the Fund used interest rate swaps in anticipation of rising interest rates. The following table summarizes the interest rate swap contracts held as of April 30, 2010. During the six months ended April 30, 2010, the Fund invested in interest rate swaps with total notional amount as represented below.

Note 4 □ Guarantees and indemnifications

Under the Fund’s organizational documents, its Officers and Trustees are indemnified against certain liabilities arising out of the performance of their duties to the Fund. Additionally, in the normal course of business, the Fund enters into contracts with service providers that contain general indemnification clauses. The Fund’s maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Fund that have not yet occurred.

Note 5 □ Fees and transactions with affiliates

John Hancock Advisers, LLC (the Adviser) serves as investment adviser for the Fund. The Adviser is indirect wholly owned subsidiary of Manulife Financial Corporation (MFC).

Management fee. The Fund has an investment management contract with the Adviser under which the Fund pays a daily management fee to the Adviser equivalent, on an annual basis, to the sum of (a) 0.650% of the first \$150,000,000 of the Fund’s average daily net assets and the value attributable to the credit facility agreement (collectively, managed assets), (b) 0.375% of the next \$50,000,000, (c) 0.350% of the next \$100,000,000 and (d) 0.300% of the Fund’s average daily managed assets in excess of \$300,000,000. The Adviser has a subadvisory agreement with MFC Global Investment Management (U.S.), LLC, an indirect owned subsidiary of MFC and an affiliate of the Adviser. The Fund is not responsible for payment of the subadvisory fees. The investment management fees incurred for the six months ended April 30, 2010 were equivalent to an annual effective rate of 0.56% of the Fund’s managed assets.

Accounting and legal services. Pursuant to the Service Agreement, the Fund reimburses the Adviser for all expenses associated with providing the administrative, financial, legal, accounting and recordkeeping services of the Fund, including the preparation of all tax returns, periodic reports to shareholders and regulatory reports amongst other services. The accounting and legal services fees incurred for the six months ended April 30, 2010, which amounted to an annual rate of 0.02% of the Fund’s average daily net assets.

Trustee expenses. The Trust compensates each Trustee who is not an employee of the Adviser or its affiliates. These Trustees may, for tax purposes, elect to defer receipt of this compensation under the John Hancock Group of Funds Deferred Compensation Plan (the Plan). Deferred amounts are invested in various John Hancock funds and remain in the funds until distributed in accordance with the Plan. The investment of deferred amounts and the offsetting liability are included in the accompanying Statement of Assets and Liabilities.

Note 6 □ Fund share transactions

Transactions in Fund shares for the six month period ended April 30, 2010 and the year ended October 31, 2009 were as follows:

Six month period ended 4-30-10		Year ended 10-31-09	
(unaudited)			
Shares	Amount	Shares	Amount

Distributions reinvested	35,885	\$666,840	74,427	\$1,087,350
--------------------------	--------	-----------	--------	-------------

Note 7 ☐ Leverage

The Fund utilizes a Committed Facility Agreement (CFA) to increase its assets available for investment. When the Fund leverages its assets, common shareholders bear the fees associated with the facility and have the potential for benefit or be disadvantaged from the use of leverage. The Adviser's fee is also incurred from the use of leverage. Consequently, the Fund and the Adviser may have differing interests in determining whether to leverage the Fund's assets. Leverage creates risks which may adversely affect the return for the holders of common shares, including:

- ☐ the likelihood of greater volatility of net asset value and market price of common shares
- ☐ fluctuations in the interest rate paid for the use of the CFA
- ☐ increased operating costs, which may reduce the Fund's total return
- ☐ the potential for a decline in the value of an investment acquired through leverage, while the Fund's obligations under such leverage remains fixed
- ☐ the Fund is more likely to have to sell securities in a volatile market in order to meet asset coverage or other debt compliance requirements

To the extent the income or capital appreciation derived from securities purchased with funds received from leverage exceeds the cost of leverage, the Fund's return will be greater than if leverage had not been used, conversely, return would be lower if the cost of the leverage exceeds the income or capital appreciation derived.

Note 8 ☐ Committed facility agreement

Effective April 21, 2010, the Fund entered into a CFA with a subsidiary of BNP Paribas (BNP) that allows it to borrow up to \$80 million and to invest the borrowings in accordance with its investment practices. Borrowings under the CFA are secured by the assets of the Fund as disclosed in the Fund's investments. Interest charged is at the rate of one month LIBOR (reset daily) plus 0.95% and is payable monthly. Under the terms of the CFA, the Fund also pays a one time arrangement fee of 0.25% of the maximum commitment financing, which is amortized over 270 days, and a commitment fee of 0.70% per annum on the unused portion of the commitment. If the Fund elects to renew the CFA, a renewal fee of 0.25% of the maximum commitment financing is due to BNP each 540th calendar day.

Prior to April 21, 2010, the Fund utilized a Credit Agreement (CA) with a third party commercial bank that allowed it to borrow up to \$67 million and to invest the borrowings in accordance with its investment practices. Borrowings under the CA were secured by all the assets of the Fund. Interest was charged at the one-, two-, three- or six-month LIBOR, at the Fund's election, plus 1.25% and was payable monthly. In addition, the Fund could elect to convert the interest rate to an alternative rate, which is the highest of the prime rate in effect on such day, the Federal Fund's rate in effect on such day plus 1.25% or the overnight LIBOR rate plus 1.25%. Under the terms of the CA, the Fund also paid a commitment fee of 0.25% per annum on the bank's commitment amount, regardless of usage and a structuring fee of 0.25% on the committed financing in the first year of

the CA, which amounted to \$167,500. The structuring fee was amortized during the first year of the agreement.

Arrangement, commitment, and structuring fees expensed for the six months ended April 30, 2010 amounted to \$5,556, \$80,107 and \$90,654, respectively, and are included in the interest expense in the Statement of Operations. As of April 30, 2010, the Fund had borrowings of \$80,000,000 at an interest rate of 1.2300%. November 1, 2009 to April 30, 2010, the average borrowings under the CA and CFA and the effective average interest rate were \$67,563,534 and 1.4798%.

The Fund may renew the CFA and would incur a renewal fee upon renewal. In addition, the Fund may terminate the agreement with 60 days' notice if the Board of Trustees has determined that the elimination of all indebtedness leveraging in the Fund's investments is in the best interest of the Fund's shareholders. In certain circumstances, the CFA may automatically terminate, or be reduced to a 30-day facility. In addition, upon the occurrence of certain defaults, the lender may terminate the agreement upon 270 days' notice.

On April 21, 2010, the Fund entered into an agreement with BNP that allows BNP to borrow a portion of the pledged collateral (Lent Securities) in an amount not to exceed the lesser of: (i) outstanding borrowings owed by the Fund to BNP and (ii) thirty three and one third percent of the Fund's total assets. The Fund can designate any security within the pledged collateral as ineligible to be a Lent Security and can recall any of the Lent Securities. The Fund also has the right to apply and set-off an amount equal to one hundred percent (100%) of the then-current fair market value of such Lent Securities against the current borrowings under the CFA.

Note 9 – Purchase and sale of securities

Purchases and sales of securities, other than short-term securities and U.S. Treasury obligations, aggregated \$77,024,264 and \$88,846,504, respectively for the six months ended April 30, 2010. Purchases and sales of U.S. Treasury obligations aggregated \$27,797,563 and \$1,364,320, respectively for the six months ended April 30, 2010.

Investment objective and policy

The Fund is a closed-end diversified management investment company, common shares of which were initially offered to the public on January 29, 1971 and are publicly traded on the NYSE. The Fund's primary investment objective is to generate income for distribution to its shareholders, with capital appreciation as a secondary objective. The preponderance of the Fund's assets is invested in a diversified portfolio of debt securities, some of which may carry equity features. Up to 50% of the value of the Fund's assets may be invested in restricted securities acquired through direct placement. The Fund may also invest in repurchase agreements.

Bylaws and Declaration of Trust

In November 2002, the Board of Trustees adopted several amendments to the Fund's bylaws, including provisions relating to the calling of a special meeting and requiring advance notice of shareholder proposals or nominees for Trustee. The advance notice provisions in the bylaws require shareholders to notify the Fund in writing of any proposal that they intend to present at an annual meeting of shareholders, including any nominations for Trustee, between 90 and 120 days prior to the first anniversary of the mailing date of the notice from the prior year's annual meeting of shareholders. The notification must be in the form prescribed by the bylaws. The advance notice provisions provide the Fund and its Trustees with the opportunity to thoughtfully consider and address the matters proposed before the Fund prepares and mails its proxy statement to shareholders. Other amendments set forth the procedures that must be followed in order for a shareholder to call a special meeting of shareholders. In October 2008, the Fund's bylaws were amended with respect to notice requirements for Trustee nominations and other proposals by the Fund's shareholders. These provisions require the disclosure of the nominating

shareholder and the nominee's investment interests as they relate to the Fund, as well as the name of any other shareholder supporting the nominee for election as a Trustee or the proposal of other business. In order for notice to be proper, such notice must disclose the economic interests of the nominating shareholder and nominee, including his or her holdings of shares in the Fund, the intent upon which those shares were acquired, and any hedging arrangements (including leveraged or short positions) made with respect to the shares of the Fund. Additionally, any material interest that the shareholder has in the business to be brought before the meeting must be disclosed. Please contact the Secretary of the Fund for additional information about the advance notice requirements or the other amendments to the bylaws. On August 21, 2003, shareholders approved the amendment of the Fund's bylaws, effective August 26, 2003, to provide for the issuance of preferred shares.

On March 31, 2008, the shareholders approved an amendment to the Fund's Declaration of Trust to permit the Fund's Board of Trustees to delegate the authority to declare dividends to a Dividend Committee consisting of officers, employees or agents of the Fund.

Financial futures contracts and options

The Fund may buy and sell financial futures contracts and options on futures contracts to hedge against the effects of fluctuations in interest rates and other market conditions. The Fund's ability to hedge successfully will depend on the Adviser's ability to predict accurately the future direction of interest rate changes and other market factors. There is no assurance that a liquid market for futures and options will always exist.

In addition, the Fund could be prevented from opening, or realizing the benefits of closing out, a futures or options position because of position limits or limits on daily price fluctuations imposed by an exchange.

Semiannual report | Investors Trust 33

The Fund will not engage in transactions in futures contracts and options on futures for speculation, but only for hedging or other permissible risk management purposes. All of the Fund's futures contracts and options on futures will be traded on a U.S. commodity exchange or board of trade. The Fund will not engage in a transaction in futures or options on futures if, immediately thereafter, the sum of initial margin deposits on existing positions and premiums paid for options on futures would exceed 5% of the Fund's total assets.

Dividends and distributions

During the six month period ended April 30, 2010, distributions totaling \$1.02 per share were paid to common shareholders. The dates of payments and the amounts per share are as follows:

PAYMENT DATE	INCOME DIVIDEND
December 31, 2009	\$0.5018
March 31, 2010	0.5218
Total	\$1.0236

Dividend reinvestment plan

The Fund offers its shareholders a Dividend Reinvestment Plan (the Plan), which offers the opportunity to earn compounded yields. Any shareholder will automatically have all distributions of dividend and capital gains reinvested in lieu of all or a portion of the cash dividends. The Plan is available to all shareholders without charge. Mellon Bank, N.A. (the Plan Agent) will act as agent for participating shareholders.

Shareholders may join the Plan by notifying the Plan Agent by telephone, in writing or by visiting the Plan Agent's Web site at www.melloninvestor.com, showing an election to reinvest all or a portion of dividend payments. If received in proper form by the Plan Agent prior to the record date for a dividend, the election will be effective with respect to all dividends paid after such record date. Shareholders whose shares are held in the name of a broker or nominee should contact the broker or nominee to determine whether and how they may participate in the Plan.

The Board of Trustees of the Fund has authorized the Dividend Committee to declare dividends from net investment income payable in cash or, in the case of shareholders participating in the Plan, partially or entirely in the Fund's common shares. The number of shares to be issued for the benefit of each shareholder will be determined by dividing the amount of the cash dividend, otherwise payable to such shareholder on shares included under the Plan, by the per share net asset value of the common shares on the date for payment of the dividend, unless the net asset value per share on the payment date is less than 95% of the market price per share on that date, in which event the number of shares to be issued to a shareholder will be determined by dividing the amount of the cash dividend payable to such shareholder, by 95% of the market price per share of the common shares on the payment date. The market price of the common shares on a particular date shall be the mean between the highest and lowest sales price on the NYSE on that date. Net asset value will be determined in accordance with the established procedures of the Fund. However, if as of such payment date the market price of the common shares is lower than such net asset value per share, the number of shares to be issued will be determined on the basis of such market price. Fractional shares, carried out to four decimal places, will be credited to the shareholder's account. Such fractional shares will be entitled to future dividends.

The shares issued to participating shareholders, including fractional shares, will be held by the Plan Agent in the name of the participant. A confirmation will be sent to each shareholder promptly, normally within seven days, after the payment date of the dividend. The confirmation will show the total number of shares held by such shareholder before and after the dividend, the amount of the most recent cash dividend that the shareholder has elected to reinvest and the number of shares acquired with such dividend.

34 Investors Trust | **Semiannual report**

Participation in the Plan may be terminated at any time by contacting the Plan Agent by telephone, in writing or by visiting the Plan Agent's Web site, and such termination will be effective immediately. However, notice of termination must be received prior to the record date of any distribution to be effective for that distribution. Upon termination, certificates will be issued representing the number of full shares of common shares held by the Plan Agent. A shareholder will receive a cash payment for any fractional share held.

The reinvestment of dividends will not relieve participants of any federal, state or local income tax, which may be due with respect to such dividend. Dividends reinvested in common shares will be treated on your federal income tax return as though you had received a dividend in cash in an amount equal to the fair market value of the shares received, as determined by the prices for common shares of the Fund on the NYSE as of the dividend payment date. Distributions from the Fund's long-term capital gains will be processed as noted above for those electing to reinvest in common shares and will be taxable to you as long-term capital gains. The confirmation referred to above will contain all the information you will require for determining the cost basis of shares acquired and should be retained for that purpose. At year end, each account will be supplied with detailed information necessary to determine total tax liability for the calendar year.

All correspondence or additional information concerning the Plan should be directed to the Plan Agent, Mellon Bank, N.A., c/o Mellon Investor Services, P.O. Box 358015, Pittsburgh, PA 15252-8015 (Telephone: 1-800-852-0218).
