## First hybrid barley hits the market

Basel, Switzerland July 10, 2003

Syngenta announced today that the world's first hybrid barley variety has been introduced in the United Kingdom. The variety - Colossus - a conventionally bred hybrid feed barley was approved earlier this year. The new barley has been specially bred for improved performance and demonstrates hybrid vigor, which translates into hardier crops and better yields.

Colossus will be sold in the United Kingdom as part of a first-of-its-kind crop production program -- the Hybrid Barley System. The System provides growers with the benefits of the new variety, three market-leading crop protection products - Syngenta's fungicides AMISTAR® and UNIX® and plant growth regulator MODDUS®, as well as a comprehensive growing program. This program incorporates know-how gathered from research trials conducted by Syngenta over several years, under varied growing conditions. This powerful combination will enable growers to get the best from the variety from the first year.

Syngenta's trials have demonstrated that the Hybrid Barley System delivers yield improvements of 10% and more compared with standard barley varieties.

Our new Hybrid Barley System provides a true benefit for growers, said Jeff Beard, COO of Syngenta Seeds. The combination of this innovative hybrid with our leading crop protection products and expert know-how will enable farmers to get the most from each and every hectare.

Syngenta will market hybrid barley in Denmark, France and Germany once variety approvals have been received.

Syngenta is a world-leading agribusiness committed to sustainable agriculture through innovative research and technology. The company is a leader in crop protection and ranks third in the high-value commercial seeds market. Sales in 2002 were approximately US \$6.2 billion. Syngenta employs some 20,000 people in over 90 countries. Syngenta is listed on the Swiss stock exchange (SYNN) and in London (SYA), New York (SYT) and Stockholm (SYN). Further information is available at [www.syngenta.com](http://www.syngenta.com).
