NOTES TO FINANCIAL STATEMENTS

Note 1 - Summary of Significant Accounting Policies

The Company

Moore Medical Corp. is a multi-channel, Internet-enabled marketer and distributor of medical/surgical products and pharmaceuticals. We provide these products to nearly 100,000 health care professionals in non-hospital settings nationwide, including: physicians, podiatrists, surgeons, obstetricians, gynecologists, pediatricians, emergency medical technicians, medical departments at industrial sites, municipalities, university and school health services, correctional facilities and other specialty practice communities. We market and serve our customers through the Internet, direct mail, industry specialized telephone support representatives, and key opportunity sales representatives. Moore Medical's direct marketing and distribution business has more than fifty years of operating experience.

Basis of Presentation

Moore Medical has prepared the accompanying unaudited financial statements in accordance with generally accepted accounting principles for interim financial statements. In the opinion of management, all adjustments necessary for a fair presentation of the results for the interim period have been made. The results for the three months ended March 31, 2001 do not necessarily indicate the results to be expected for the fiscal year ended December 29, 2001 or any other future period. The fiscal quarters ended on March 31, 2001 and April 1, 2000.

The accompanying unaudited financial statements should be read in conjunction with the Notes to Financial Statements and Management's Discussion and Analysis of Results of Operations and Financial Condition included in the Company's 2000 Annual Report filed on Form 10-K and in this Form 10-Q Quarterly Report.

Certain prior year amounts have been reclassified to conform with the current year presentation.

Recent Pronouncements

In December 1999, the Securities and Exchange Commission issued Staff Accounting Bulletin 101, Revenue Recognition in Financial Statements ("SAB 101"), as amended in March and June 2000. SAB 101 provides guidance on the recognition, presentation and disclosure of revenue in financial statements for all public registrants. We are

5

required to adopt SAB 101 no later than our fourth quarter of 2001. The adoption of SAB 101 is not expected to have material effect on our financial position or results of operations.

MOORE MEDICAL CORP.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL

CONDITION AND RESULTS OF OPERATIONS

OVERVIEW

Edgar Filing: MOORE MEDICAL CORP - Form 10-Q

Moore Medical's mission is to provide medical professionals with the supplies and safety products they need to improve wellness and save lives. With more than 50 years of business experience, we currently market and distribute medical/surgical and pharmaceutical products to nearly 100,000 health care professionals in non-hospital settings nationwide. Moore Medical continues to move forward with a renewed dedication to understanding the needs of the customer communities we serve and delivering quality medical products and services to our customers. While the significant investments made in technology in late 1999 and 2000 have not yet been fully realized in our financial results, Moore has begun to see the benefits of transformational changes throughout the organization. These investments, coupled with improvements in supply chain management, should help bolster earnings improvements throughout 2001 and beyond.

RESULTS OF OPERATIONS

Three Months Ended March 31, 2001 Compared to Three Months Ended

April 1, 2000

Net sales for the first quarter ended March 31, 2001 increased to \$32.2 million, an increase of \$2.7 million or 9.3% from the same period a year ago. This marked the highest year-over-year quarterly growth rate in more than five years and the third consecutive quarterly increase of over 6% on a year-to-year basis. The Company's sales growth in the first quarter was primarily attributable to the acceleration of numerous marketing programs from the second quarter in 2000 to early in the first quarter of 2001. These programs include direct mail catalogs, flyers and letters, e-marketing initiatives, customer support center representatives and specialty practice sales representatives. The sales and marketing strategy focused on optimizing direct marketing and channel deliverables resulting in a 12.2% increase in the number of customer sales orders processed in the period from the same period a year ago. The Company's e-commerce net sales quadrupled to nearly \$2.4 million for the period from \$0.6 million a year ago. The Company has achieved continued growth in its online web site since the opening of its integrated e-business site on May 30, 2000. Online sales growth was reflected across all market communities and was the result of direct

6

marketing initiatives such as e-mail campaigns, web site promotions, investments in online communities and web affiliations.

Gross profit increased \$1.1 million or 12.7% to \$9.8 million, compared to \$8.7 million for the same period a year ago. Overall gross profit margins increased to 30.3% from 29.4% in 2000. The increase is primarily attributable to the increased sales volume, product mix and continuing improvements in our supply chain operations.

Selling, general and administrative expenses increased by \$2.5 million or 27.6% to \$11.6 million in 2001 from \$9.1 million in 2000. Selling, general and administrative expenses as a percentage of net revenue was 36.0% as compared to 30.8% a year ago. The increase was attributable to the timing of publication and distribution of our direct mail catalog, increased salary expenses relating to filling key management and staff positions, outside consulting primarily associated with e-commerce initiatives and freight and distribution expenses proportionate to net revenue growth. Besides the timing of certain marketing expenses as compared to 2000, the increase in selling, general and

Edgar Filing: MOORE MEDICAL CORP - Form 10-Q

administrative expenses was primarily a result of the Company's transformation from an offline catalog direct marketer to a multi-channel Internet enabled marketer. The Company continues to improve efficiencies in its cost structure, but believes it is adequate to attain future growth.

Net income decreased to (\$1.1) million, or (\$0.35) loss per share compared to (\$0.3) million, or (\$0.09) loss per share, the same period a year ago.

Three Months Ended April 1, 2000 Compared to Three Months Ended April 3, 1999

Overall, net sales of \$29.5 million for the first quarter of 2000 increased 2% over the comparable period in 1999. Moore Medical experienced growth in its business communities and e-commerce. The favorable increase was partially offset by the contraction of pharmaceutical product sales. In the business communities, the increase in net sales was primarily due to increased account penetration with core dealer accounts. The remaining increase in the first quarter 2000 net sales was due to increased e-commerce activity on our unpromoted transactional web site, which increased \$0.4 million, or over 200%, to \$0.6 million for the three months ended April 1, 2000 from \$0.2 million for the three months ended April 3, 1999, while traffic had nearly doubled.

Gross profit decreased by \$0.8 million, or 9%, to \$8.7 million for the three months ended April 1, 2000 from \$9.5 million for the three months ended April 3, 1999. The decrease was primarily attributable to the price erosion in pharmaceutical products resulting in lower margins. Also, the Company's average order size increased 13% over the prior year, generating higher volume but at lower margins.

Selling, general and administrative expenses increased by \$0.3 million, or 3%, to \$9.1 million for the first quarter 2000 from \$8.8 million. The increase was primarily due to

7

higher depreciation charges associated with investments in technology. Other contributing factors to the increase were additional media and advertising costs associated with the acquisition of and intensive e-commerce marketing research of customers. We anticipated increased selling and marketing expenses relating to our Internet-based business as a result of accelerated spending to fully web enable the Company.

A net loss for the quarter of (\$0.3) million, or (\$0.09) loss per share, was reported compared with net income of \$0.5 million, or \$0.16 earnings per share, in the first quarter of 1999.

LIQUIDITY AND CAPITAL RESOURCES -----

The Company ended the 2001 first quarter with \$1.4 million in cash and cash equivalents, a decrease of \$3.9 million from year end. The decrease was primarily the result of net cash used in operating activities. The primary uses of cash in the current year's first quarter were net operating losses of (\$1.1) million as compared to net operating losses of (\$0.3) million a year ago. Inventories increased by \$0.8 million in the 2001 first quarter, compared with a decrease of \$3.1 million the same period a year ago, largely due to the reduction of excess inventory levels in last year's period. The increase in inventory of \$0.8 million and accounts receivable of \$1.3 million was consistent with the Company's net revenue growth.

Investing activities used \$0.3 million in the first quarter as compared to \$0.4

Edgar Filing: MOORE MEDICAL CORP - Form 10-Q

million in the same period a year ago.

Financing activities used \$0.1 million as compared to cash provided of \$1.0 million in the same period a year ago. The \$1.0 million in 2000 related to the proceeds the Company received for sale of treasury stock.

FORWARD-LOOKING INFORMATION

From time to time, the Company may make forward-looking statements, that is statements not of past or present fact but of beliefs, expectations or plans for the future. The words "expects," "anticipates," "believes," "seeks," "plans," "estimates," "projects," "intends," "should help," and similar expressions identify forward-looking statements. Such statements are qualified by certain factors such as (among others) the following which may cause actual results to differ materially from the forward-looking statements:

- . pressures on revenues resulting, for example, from customer consolidations or changes in customer buying patterns;
- . reductions in health care funding affecting its customers' services or revenues resulting, for example, from changes in legislation or regulations or in HMO, managed care or other insurance programs;

8

- . intensified competition resulting, for example, from distributor consolidations or pricing pressures from larger distributors able to benefit from economies of scale or other operating efficiencies;
- . disruptions in or cost increases for services or systems on which the Company is dependent, such as by truckers in deliveries from its suppliers, by UPS or other common carriers in deliveries to its customers, by its catalog printers or in telecommunication services, or relating to its computer systems;
- . changes in supply chain relationships, such as product availability and regulations; decreasing reliance on distributors as manufacturers establish direct internet sales channels to end-users, that could adversely effect the market, supply and flow of products;
- . rapidly changing technology and customer expectations; increased costs of hosting services; loss of business and costs to business interruptions arising from the Company's e-business platform;
- . further Internet and infrastructure developments (for example, in high speed data lines and modems);
- . difficulties in attracting and retaining qualified technical and marketing talent in an economy in which such talent is in short supply and in high demand;
- . new laws or regulations or government agency policies or positions affecting e-commerce or the distribution of pharmaceuticals or other regulated products, which could increase the cost of doing business or customers' purchase costs (for example, by the introduction of sales taxes to Internet transactions); and
- . security breaches that could significantly disrupt the Internet network, halt sales, or discourage customers.

Edgar Filing: MOORE MEDICAL CORP - Form 10-Q

These factors are not all-inclusive. Other factors may be referred to from time-to-time in other filings by the Company with the Securities and Exchange Commission. In addition, new factors may emerge from time to time, and it is not possible to predict all factors, nor can management necessarily identify or assess all factors. The factors identified should therefore not be relied on as comprehensive. Moreover, the Company does not necessarily update its forward looking statements. Accordingly, they should not be relied upon as a prediction of actual results.

ITEM 3. QUANTITATIVE & QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We have no material market risk exposure associated with activities in derivative financial statements, other financial instruments, or derivative commodity instruments.

9

PART II. OTHER INFORMATION

ITEM 5. OTHER MATTERS

Beginning in 1991, the Company's former Wholesale Division entered into contracts with the Department of Veterans Affairs. In 1996, the Company learned that there were questions regarding its pricing under the contracts and it made a voluntary disclosure to the government. On February 1, 2001, the Department of Veterans Affairs settled its claims on the Company's agreement to pay the government \$5.2 million, including \$0.5 million paid on signing, plus interest, over five years, pursuant to its promissory note. The amount of the settlement in excess of the reserve established for the claims was charged in the Company's 2000 financial statements.

ITEM 6. EXHIBITS AND REPORTS ON FORM 8-K

(a) Exhibits

Promissory Note of the Company to the U.S. Government, dated February 1, 2001. Exhibit 10.28

(b) Reports on Form 8-K

No report on Form 8-K was filed during the quarter.

10

SIGNATURES

Pursuant to the requirements of Section 13 or 15(d) of the Securities Exchange Act of 1934, the Registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.
