Table of Contents

JABIL CIRCUIT, INC. AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

Note 1. Basis of Presentation

The accompanying unaudited Condensed Consolidated Financial Statements have been prepared in accordance with U.S. generally accepted accounting principles (U.S. GAAP) for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by U.S. GAAP for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) necessary to present fairly the information set forth therein have been included. The accompanying unaudited Condensed Consolidated Financial Statements should be read in conjunction with the Consolidated Financial Statements and footnotes included in the Annual Report on Form 10-K of Jabil Circuit, Inc. (the Company) for the fiscal year ended August 31, 2010. Results for the three month period ended November 30, 2010 are not necessarily an indication of the results that may be expected for the full fiscal year ending August 31, 2011.

Certain amounts in the prior periods financial statements have been reclassified to conform to the current period's presentation.

Note 2. Inventories

The components of inventories consist of the following (in thousands):

	November 30, 2010	August 31, 2010
Raw materials	\$ 1,557,502	\$ 1,509,886
Work in process	392,879	390,069
Finished goods	207,854	194,180
Total inventories	\$ 2,158,235	\$ 2,094,135

Note 3. Earnings Per Share and Dividends**a. Earnings Per Share**

The Company calculates its basic earnings per share by dividing net income attributable to Jabil Circuit, Inc. by the weighted average number of common shares and participating securities outstanding during the period. In periods of a net loss, participating securities are not included in the basic loss per share calculation as such participating securities are not contractually obligated to fund losses. The Company's diluted earnings per share is calculated in a similar manner, but include the effect of dilutive securities. To the extent these securities are anti-dilutive, they are excluded from the calculation of diluted earnings per share. The following table sets forth the calculations of basic and diluted earnings per share attributable to the stockholders of Jabil Circuit, Inc. (in thousands, except earnings per share data):

	Three months ended November 30, 2010	November 30, 2009
Numerator:		
Net income attributable to Jabil Circuit, Inc.	\$ 106,677	\$ 28,288
Denominator for basic and diluted earnings per share:		
Weighted-average common shares outstanding	211,474	208,360
Share-based payment awards classified as participating securities	2,921	5,305

Edgar Filing: JABIL CIRCUIT INC - Form 10-Q

Denominator for basic earnings per share	214,395	213,665
Dilutive common shares issuable under the employee stock purchase plan and upon exercise of stock options and stock appreciation rights	533	301
Dilutive unvested non-participating restricted stock awards	2,477	1,093
Denominator for diluted earnings per share	217,405	215,059
Earnings per share:		
Income attributable to the stockholders of Jabil Circuit, Inc.:		
Basic	\$ 0.50	\$ 0.13
Diluted	\$ 0.49	\$ 0.13

Table of Contents

For the three months ended November 30, 2010 and 2009, options to purchase 5,948,410 and 6,688,903 shares of common stock and 5,442,658 and 7,997,567 stock appreciation rights, respectively, were excluded from the computation of diluted earnings per share as their effect would have been anti-dilutive.

b. Dividends

The following table sets forth certain information relating to the Company's cash dividends declared to common stockholders of the Company during the three months ended November 30, 2010 and 2009:

Dividend Information

	Dividend Declaration Date	Dividend per Share (in thousands, except for per share data)	Total Cash Dividends Declared	Date of Record for Dividend Payment	Dividend Cash Payment Date
Fiscal year 2011:	October 25, 2010	\$0.07	\$15,563	November 15, 2010	December 1, 2010
Fiscal year 2010:	October 22, 2009	\$0.07	\$15,186 ⁽¹⁾	November 16, 2009	December 1, 2009

- (1) Of the \$15.2 million in total dividends declared during the first quarter of fiscal year 2010, \$14.4 million was paid out of additional paid-in capital (which represents the amount of dividends declared in excess of the Company's retained earnings balance as of the date that the dividend was declared).

Note 4. Stock-Based Compensation

The Company recognizes stock-based compensation expense, reduced for estimated forfeitures, on a straight-line basis over the requisite service period of the award, which is generally the vesting period for outstanding stock awards. The Company recorded \$19.5 million and \$14.0 million of gross stock-based compensation expense, which is included in selling, general and administrative expenses within the Condensed Consolidated Statements of Operations for the three months ended November 30, 2010 and 2009, respectively. The Company recorded tax effects related to the stock-based compensation expense of \$0.5 million and \$0.3 million, which is included in income tax expense within the Condensed Consolidated Statements of Operations for the three months ended November 30, 2010 and 2009, respectively. Included in the compensation expense recognized by the Company are \$0.7 million and \$1.0 million related to the Company's employee stock purchase plan (ESPP) during the three months ended November 30, 2010 and 2009, respectively. The Company capitalizes stock-based compensation costs related to awards granted to employees whose compensation costs are directly attributable to the cost of inventory. At November 30, 2010 and August 31, 2010, \$0.4 million and \$0.2 million, respectively, of stock-based compensation costs were classified as inventories on the Condensed Consolidated Balance Sheets.

Cash received from exercises under all share-based payment arrangements, including the Company's ESPP, for the three months ended November 30, 2010 and 2009 was \$0.6 million and \$0.2 million, respectively. The proceeds for the three months ended November 30, 2010 and 2009 were offset by \$9.6 million and \$3.3 million, respectively, of restricted shares withheld by the Company to satisfy the minimum amount of its income tax withholding requirements. The market value of the restricted shares withheld was determined on the date that the restricted shares vested and resulted in the withholding of 674,898 shares and 218,102 shares of the Company's common stock during the three months ended November 30, 2010 and 2009, respectively. The amounts have been classified as treasury stock on the Condensed Consolidated Balance Sheets. The Company currently expects to satisfy share-based awards with registered shares available to be issued.

a. Stock Option and Stock Appreciation Right Plans

The Company applies a lattice valuation model for Options granted, excluding those granted under the ESPP. The lattice valuation model is a more flexible analysis to value employee Options, as compared to a Black-Scholes model, because of its ability to incorporate inputs that change over time, such as volatility and interest rates, and to allow for actual exercise behavior of Option holders.

Table of Contents

There were no options granted during the three months ended November 30, 2010. The weighted-average grant-date fair value per share of Options granted during the three months ended November 30, 2009 was \$6.36. The total intrinsic value of Options exercised during the three months ended November 30, 2010 and 2009 was \$95.8 thousand and \$5.1 thousand, respectively. As of November 30, 2010, there was \$4.2 million of unrecognized compensation costs related to non-vested Options that is expected to be recognized over a weighted-average period of 1.0 year. The total fair value of Options vested during the three months ended November 30, 2010 and 2009 was \$3.6 million and \$6.3 million, respectively.

Following are the grant date weighted-average and range assumptions, where applicable, used for each respective period:

	Three months ended	
	November 30, 2010	November 30, 2009
Expected dividend yield	*	1.9%
Risk-free interest rate	*	0.6% to 3.4%
Weighted-average expected volatility	*	60.2%
Weighted-average expected life	*	5.6 years

* The Company did not grant Options during the quarter ended November 30, 2010.

The fair-value method is also applied to non-employee awards. The measurement date for equity awards granted to non-employees is the earlier of the performance commitment date or the date the services required under the arrangement have been completed. Non-employee awards are classified as liabilities on the Condensed Consolidated Balance Sheets and are therefore remeasured at each interim reporting period until the Options are exercised, canceled or expire unexercised. At November 30, 2010 and August 31, 2010, \$25.0 thousand and \$8.0 thousand, respectively, related to non-employee stock-based awards were classified as a liability on the Company's Condensed Consolidated Balance Sheets and a loss of \$18.0 thousand and \$11.0 thousand were recorded within the Condensed Consolidated Statements of Operations for the three months ended November 30, 2010 and 2009, respectively, resulting from re-measurement of the awards.

The following table summarizes Option activity from August 31, 2010 through November 30, 2010:

	Shares	Aggregate Intrinsic Value (in thousands)	Weighted- Average Exercise Price	Weighted- Average Remaining Contractual Life (years)
	Available for Grant	Options Outstanding		
Balance at August 31, 2010	10,480,001	13,154,272	\$ 24.10	4.09
Options authorized				
Options expired	(380,566)		\$ 42.53	
Options granted				
Options canceled	551,782	(551,782)	\$ 25.18	
Restricted stock awards ⁽¹⁾	(4,907,268)			
Options exercised		(49,636)	\$ 12.99	
Balance at November 30, 2010	5,743,949	12,552,854	\$ 23.57	3.9

Exercisable at November 30, 2010	11,958,026	\$	2,826	\$	23.72	3.8
----------------------------------	------------	----	-------	----	-------	-----

- (1) Represents the maximum number of shares that can be issued based on the achievement of certain performance criteria.

b. Restricted Stock Awards

Certain key employees have been granted time-based, performance-based, and market-based restricted stock awards. The time-based restricted awards granted generally vest on a graded vesting schedule over three years. The performance-based restricted awards generally vest on a cliff vesting schedule over three years and provide a range of vesting possibilities from 0% to 200% depending on the level of achievement of the specified performance condition. The market-based restricted awards have a vesting condition that is tied to the Standard and Poor's 500 Composite Index.

The stock-based compensation expense for these restricted stock awards (including restricted stock and restricted stock units) is measured at fair value on the date of grant based on the number of shares expected to vest and the quoted market price of the Company's common stock. For restricted stock awards with performance conditions, stock-based compensation expense is originally

Table of Contents

based on the number of shares that would vest if the Company achieved 100% of the performance goal, which was the probable outcome at the grant date. Throughout the requisite service period, management monitors the probability of achievement of the performance condition. If it becomes probable, based on the Company's performance, that more or less than the current estimate of the awarded shares will vest, an adjustment to stock-based compensation expense will be recognized as a change in accounting estimate. For restricted stock awards with market conditions, the market conditions are considered in the grant date fair value of the award using a lattice model, which utilizes multiple input variables to determine the probability of the Company achieving the specified market conditions. Stock-based compensation expense related to an award with a market condition will be recognized over the requisite service period regardless of whether the market condition is satisfied, provided that the requisite service period has been completed.

At November 30, 2010, there was \$116.9 million of total unrecognized stock-based compensation expense related to restricted stock awards granted under the 2002 Stock Incentive Plan. This expense is expected to be recognized over a weighted-average period of 1.6 years.

The following table summarizes restricted stock activity from August 31, 2010 through November 30, 2010:

	Shares	Weighted - Average Grant-Date Fair Value
Non-vested balance at August 31, 2010	12,189,271	\$ 13.13
Changes during the period		
Shares granted ⁽¹⁾	6,073,258	\$ 14.20
Shares vested	(2,636,303)	\$ 17.03
Shares forfeited	(1,165,990)	\$ 13.07
Non-vested balance at November 30, 2010	14,460,236	\$ 12.87

⁽¹⁾ Represents the maximum number of shares that can vest based on the achievement of certain performance criteria.

c. Employee Stock Purchase Plan

The ESPP was adopted by the Company's Board of Directors in October 2001 and approved by the shareholders in January 2002. Initially there were 2,000,000 shares reserved under the ESPP. An additional 2,000,000 shares and 3,000,000 shares were authorized for issuance under the ESPP and approved by stockholders in January 2006 and January 2009, respectively. The Company also adopted a tax advantaged sub-plan under the ESPP for its Indian employees. Shares are issued under the Indian sub-plan from the authorized shares under the ESPP.

Employees are eligible to participate in the ESPP after 90 days of employment with the Company. The ESPP permits eligible employees to purchase common stock through payroll deductions, which may not exceed 10% of an employee's compensation, as defined in the ESPP, at a price equal to 85% of the fair value of the common stock at the beginning or end of the offering period, whichever is lower. The ESPP is intended to qualify under Section 423 of the Internal Revenue Code. Unless terminated sooner, the ESPP will terminate on October 17, 2011.

The maximum number of shares that a participant may purchase in an offering period is determined in June and December. As such, there were no stock purchases under the ESPP during the three months ended November 30, 2010 and 2009, respectively. At November 30, 2010, a total of 5,791,719 shares had been issued under the ESPP.

Note 5. Concentration of Risk and Segment Data***a. Concentration of Risk***

The Company operates in 22 countries worldwide. Sales to unaffiliated customers are based on the Company's location that provides the comprehensive electronics design, production and product management services. The following table sets forth external net revenue, net of intercompany eliminations, and long-lived asset information

where individual countries represent a material portion of the total (in thousands):

11

Table of Contents

	Three months ended	
	November 30, 2010	November 30, 2009
External net revenue:		
Mexico	\$ 1,015,027	\$ 843,129
China	804,005	617,603
United States	553,346	428,882
Hungary	422,879	240,042
Malaysia	276,320	219,570
Brazil	200,278	134,732
Other	810,326	604,298
	\$ 4,082,181	\$ 3,088,256

	November 30, 2010	August 31, 2010
Long-lived assets:		
China	\$ 496,620	\$ 483,181
United States	258,253	255,108
Mexico	212,891	212,409
Taiwan	115,043	110,237
Poland	113,283	98,395
Malaysia	101,452	102,700
Other	317,989	321,930
	\$ 1,615,531	\$ 1,583,960

Total foreign source net revenue represented 86.4% of net revenue for the three months ended November 30, 2010 compared to 86.1% for the three months ended November 30, 2009.

Sales of the Company's products are concentrated among specific customers. For the three months ended November 30, 2010, the Company's five largest customers accounted for approximately 46% of its net revenue and 48 customers accounted for approximately 90% of its net revenue. Sales to the above customers were reported in the Diversified Manufacturing Services (DMS), Enterprise & Infrastructure (E&I) and High Velocity Systems (HVS) segments.

Production levels for the HVS segment are subject to seasonal influences. The Company may realize greater net revenue during its first fiscal quarter due to higher demand for consumer related products manufactured in the HVS segment during the holiday selling season. Therefore, quarterly results should not be relied upon as necessarily being indicative of results for the entire fiscal year.

b. Segment Data

Operating segments are defined as components of an enterprise that engage in business activities from which it may earn revenues and incur expenses; for which separate financial information is available; and whose operating results are regularly reviewed by the chief operating decision maker to assess the performance of the individual segment and make decisions about resources to be allocated to the segment.

The Company derives its revenue from providing comprehensive electronics design, production and product management services. Management, including the Chief Executive Officer, the Chief Financial Officer and the Chief

Operating Officer evaluates performance and allocates resources on a segment basis. Prior to the first quarter of fiscal year 2011, the Company managed its business based on three segments, Electronic Manufacturing Services, Consumer and Aftermarket Services. On September 1, 2010, the Company reorganized its reporting structure to align with the chief operating decision maker's management of resource allocation and performance assessment. Accordingly, the Company's operating segments now consist of three segments - DMS, E&I and HVS. All prior period disclosures below have been restated to reflect this change.

Net revenue for the operating segments is attributed to the segment in which the product is manufactured or service is performed. An operating segment's performance is evaluated based on its pre-tax operating contribution, or segment income. Segment income is defined as net revenue less cost of revenue, segment selling, general and administrative expenses, segment research and development expenses and an allocation of corporate manufacturing expenses and selling, general and administrative expenses, and does not include stock-based compensation expense, amortization of intangibles, restructuring and impairment charges, loss on disposal of subsidiaries, other (income) expense, interest income, interest expense, income tax expense or adjustment for net income attributable to noncontrolling interests. Total segment assets are defined as trade accounts receivable, inventories, net customer-related

Table of Contents

machinery and equipment, intangible assets net of accumulated amortization and goodwill. All other non-segment assets are reviewed on a global basis by management.

The following table sets forth operating segment information (in thousands):

	Three months ended	
	November 30, 2010	November 30, 2009
Net revenue		
DMS	\$ 1,394,644	\$ 953,363

	\$ 6,384,454	\$ 6,367,747

Note 6. Commitments and Contingencies

a. Legal Proceedings

The Company is party to certain lawsuits in the ordinary course of business. The Company does not believe that these proceedings, individually or in the aggregate, will have a material adverse effect on the Company's financial position, results of operations or cash flows.

b. Warranty Provision

The Company maintains a provision for limited warranty repair of shipped products, which is established under the terms of specific manufacturing contract agreements. The warranty liability is included in accrued expenses on the Condensed Consolidated Balance Sheets. The warranty period varies by product and customer industry sector. The provision represents management's estimate of probable liabilities, calculated as a function of sales volume and historical repair experience, for each product under warranty. The

Table of Contents

estimate is re-evaluated periodically for accuracy. A rollforward of the warranty liability for the three months ended November 30, 2010 and 2009 is as follows (in thousands):

	Amount
Balance at August 31, 2010	\$ 10,828
Accruals for warranties	1,290
Settlements	(46)
Balance at November 30, 2010	\$ 12,072
	Amount
Balance at August 31, 2009	\$ 14,280
Accruals for warranties	3,099
Settlements	(1,982)
Balance at November 30, 2009	\$ 15,397

Table of Contents**Note 7. Goodwill and Other Intangible Assets**

The Company performs a goodwill impairment analysis using the two-step method on an annual basis and whenever events or changes in circumstances indicate that the carrying value may not be recoverable. The recoverability of goodwill is measured at the reporting unit level, which the Company has determined to be consistent with its operating segments, by comparing the reporting unit's carrying amount, including goodwill, to the fair value of the reporting unit. If the carrying amount of the reporting unit exceeds its fair value, goodwill is considered impaired and a second step is performed to measure the amount of loss, if any.

The Company completed its annual impairment test for goodwill during the fourth quarter of fiscal year 2010 and determined the fair values of the reporting units were substantially in excess of the carrying values and that no impairment existed as of the date of the impairment test. For each annual impairment test the Company consistently determines the fair value of its reporting units based on an average weighting of both projected discounted future results and the use of comparative market multiples. On September 1, 2010, the Company reorganized its business into the DMS, E&I and HVS segments. In doing so, the Company reassigned its goodwill to the new reporting units (which are deemed to be consistent with the new segments) and was required to perform an interim goodwill impairment test based on these new reporting units. Based on this interim goodwill impairment test, the Company determined that the fair values of its new reporting units were substantially in excess of the carrying values and that no impairment existed as of the date of the interim impairment test.

The following table presents the changes in goodwill allocated to the Company's reportable segments during the three months ended November 30, 2010 (in thousands):

Reportable Segment	August 31, 2010			November 30, 2010		
	Gross Balance	Accumulated Impairment Balance	Foreign Currency Impact	Gross Balance	Accumulated Impairment Balance	Net Balance
DMS	\$ 583,423	\$ (558,768)	\$ 119	\$ 583,542	\$ (558,768)	\$ 24,774
E&I	335,584	(331,784)		335,584	(331,784)	3,800
HVS	132,269	(132,269)		132,269	(132,269)	
Total	\$ 1,051,276	\$ (1,022,821)	\$ 119	\$ 1,051,395	\$ (1,022,821)	\$ 28,574

Intangible assets consist primarily of contractual agreements and customer relationships, which are being amortized on a straight-line basis over periods of up to 10 years, intellectual property which is being amortized on a straight-line basis over a period of up to five years and a trade name which has an indefinite life. The Company completed its annual impairment test for its indefinite-lived intangible asset during the fourth quarter of fiscal year 2010 and determined that no impairment existed as of the date of the impairment test. Significant judgments inherent in this analysis included assumptions regarding appropriate revenue growth rates, discount rates and royalty rates. No significant residual value is estimated for the amortizable intangible assets. The value of the Company's intangible assets purchased through business acquisitions is principally determined based on valuations of the net assets acquired. The following tables present the Company's total purchased intangible assets at November 30, 2010 and August 31, 2010 (in thousands):

	Gross carrying amount	Accumulated amortization	Net carrying amount
November 30, 2010			
Contractual agreements and customer relationships	\$ 84,406	\$ (46,251)	\$ 38,155
Intellectual property	75,666	(62,486)	13,180
Trade name	50,313		50,313

Total	\$ 210,385	\$ (108,737)	\$ 101,648
	Gross		Net
	carrying	Accumulated	carrying
	amount	amortization	amount
August 31, 2010			
Contractual agreements and customer relationships	\$ 83,746	\$ (43,698)	\$ 40,048
Intellectual property	85,166	(68,989)	16,177
Trade name	47,888		47,888
Total	\$ 216,800	\$ (112,687)	\$ 104,113

Table of Contents

The weighted-average amortization period for aggregate net intangible assets at November 30, 2010 is 7.3 years, which includes a weighted-average amortization period of 9.5 years for net contractual agreements and customer relationships and a weighted-average amortization period of 4.8 years for net intellectual property.

The estimated future amortization expense is as follows (in thousands):

Fiscal year ending August 31,	Amount
2011 (remaining nine months)	\$ 15,587
2012	13,074
2013	8,789
2014	7,635
2015	4,745
Thereafter	1,505
Total	\$ 51,335

Note 8. Trade Accounts Receivable Securitization and Sale Programs***a. Asset-Backed Securitization Program***

In February 2004, the Company entered into an asset-backed securitization program with a bank, which originally provided for net cash proceeds at any one time of an amount up to \$100.0 million on the sale of eligible trade accounts receivable of certain foreign and domestic operations. Subsequent to fiscal year 2004, several amendments adjusted the net cash proceeds available at any one time under the securitization program to an amount of \$300.0 million. The transactions in this program were historically accounted for as sales under applicable accounting guidance. Effective September 1, 2010, the Company adopted new accounting guidance that resulted in more stringent conditions for reporting the transfer of a financial asset as a sale. As a result of the adoption of this new guidance, the accounts receivable transferred under this program no longer qualified for sale treatment and as such were accounted for as secured borrowings. During the first quarter of fiscal year 2011, this program was amended to again account for the transfer of the applicable accounts receivable as a sale. The amended program allows the Company to continuously sell a designated pool of trade accounts receivable to a wholly-owned subsidiary, which in turn sells 100% of the eligible receivables to conduits, administered by unaffiliated financial institutions. This wholly-owned subsidiary is a separate bankruptcy-remote entity and its assets would be available first to satisfy the creditor claims of the conduits. As the receivables sold are collected, the wholly-owned subsidiary is able to sell additional receivables up to the maximum permitted amount under the program. Any portion of the purchase price for the receivables which is not paid in cash upon the sale taking place is recorded as a deferred purchase price receivable, which is paid by the conduits from available cash as payments on the receivables are collected. The securitization program requires compliance with several financial covenants including an interest coverage ratio and debt to EBITDA ratio, as defined in the securitization agreements. The securitization agreement, as amended on November 5, 2010, expires on November 4, 2011.

Net receivables sold under this program are excluded from trade accounts receivable on the Condensed Consolidated Balance Sheets and are reflected as cash provided by operating activities on the Condensed Consolidated Statements of Cash Flows. The wholly-owned subsidiary is assessed a fee on the unused portion of the program of 0.50% per annum based on the average daily unused aggregate receivables sold during the period and a usage fee on the utilized portion of the program is equal to 0.95% per annum (inclusive of the unused fee) on the average daily outstanding aggregate receivables sold during the immediately preceding calendar month. The securitization conduits and the investors in the conduits have no recourse to the Company's assets for failure of debtors to pay when due.

The Company continues servicing the receivables sold and in exchange receives a servicing fee. Servicing fees recognized during the three months ended November 30, 2010 and 2009 were not material and are included in other expense within the Condensed Consolidated Statements of Operations. The Company does not record a servicing asset or liability as the Company estimates the fee it receives in return for its obligation to service these receivables is at fair value.

At November 30, 2010, the Company had sold \$485.9 million of eligible trade accounts receivable, which represents the face amount of total outstanding receivables at that date. In exchange, the Company received cash proceeds of \$260.6 million and a net deferred purchase price receivable of approximately \$218.8 million which was recorded at fair value as prepaid expenses and other current assets on the Condensed Consolidated Balance Sheets. The deferred purchase price receivable was valued using unobservable inputs (Level 3 inputs), and takes into account the credit quality and short-term maturity of the related accounts receivable. At November 30, 2009, the Company had sold \$418.8 million of eligible trade accounts receivable, which represents the face amount of total outstanding receivables at that date. In exchange, the Company received cash proceeds of \$164.5 million and retained an interest in the receivables of approximately \$254.3 million. Prior to execution of the previously discussed amendment, the Company recognized interest expense of approximately \$0.5 million during the three months ended November 30, 2010. Additionally, the Company recognized pretax losses on the sale of receivables of approximately \$0.5 million and \$1.0 million during the three months

Table of Contents

ended November 30, 2010 and 2009, respectively, which are recorded to other expense within the Condensed Consolidated Statements of Operations.

b. Foreign Asset-Backed Securitization Program

In April 2008, the Company entered into an asset-backed securitization program with a bank conduit which originally provided for net borrowings available at any one time of an amount up to \$200.0 million. Subsequent to fiscal year 2008, certain amendments have adjusted the net borrowing available at any one time to \$100.0 million. In connection with the securitization program certain of the Company's foreign subsidiaries sell, on an ongoing basis, an undivided interest in designated pools of trade accounts receivable to a special purpose entity, which in turn borrows up to \$100.0 million from a third party bank conduit and grants a security interest in the accounts receivable as collateral for the borrowings. The securitization program is accounted for as a borrowing. The Company has the power to direct the activities of the special purpose entity and the obligation to absorb the majority of the expected losses or the right to receive benefits from the transfer of trade accounts receivable into the special purpose entity and, as such, is deemed the primary beneficiary. Accordingly, the Company consolidates the special purpose entity. The loan balance is calculated based on the terms of the securitization program agreements. The securitization program requires compliance with several covenants including a limitation on certain corporate actions such as mergers, consolidations and sale of substantially all assets. The Company pays interest at designated commercial paper rates plus a spread. The securitization program, as amended on March 18, 2010, expires on March 17, 2011.

The Company continues servicing the receivables in the program and in exchange receives a servicing fee. Servicing fees recognized during the three months ended November 30, 2010 and 2009 were not material and are included in interest expense within the Condensed Consolidated Statements of Operations. The Company does not record a servicing asset or liability on the Condensed Consolidated Balance Sheets as the Company estimates the fee it receives in return for its obligation to service these receivables is at fair value.

The Company had \$82.8 million and \$81.9 million of debt outstanding under the program at November 30, 2010 and 2009, respectively. In addition, the Company incurred interest expense of \$0.3 million recorded within the Condensed Consolidated Statements of Operations during the three months ended November 30, 2010 compared to \$0.7 million for the three months ended November 30, 2009.

c. Trade Accounts Receivable Factoring Agreements

In October 2004, the Company entered into an agreement with an unrelated third party for the factoring of specific trade accounts receivable of a foreign subsidiary. The factoring of trade accounts receivable under this agreement is accounted for as a sale. Under the terms of the factoring agreement, the Company transfers ownership of eligible trade accounts receivable without recourse to the third party purchaser in exchange for cash. Proceeds on the transfer reflect the face value of the account less a discount. The discount is recorded as a loss to other expense within the Condensed Consolidated Statements of Operations in the period of the sale. In September 2010, the factoring agreement was extended through March 31, 2011, at which time it is expected to automatically renew for an additional six-month period.

The receivables sold pursuant to this factoring agreement are excluded from trade accounts receivable on the Condensed Consolidated Balance Sheets and are reflected as cash provided by operating activities on the Condensed Consolidated Statements of Cash Flows. The Company continues to service, administer and collect the receivables sold under this program. The third party purchaser has no recourse to the Company's assets for failure of debtors to pay when due.

The Company had sold \$12.0 million and \$19.7 million of trade accounts receivable, which represents the face amount of total outstanding receivables at November 30, 2010 and 2009, respectively, and in exchange, received cash proceeds of \$11.9 million and \$19.7 million at November 30, 2010 and 2009, respectively. The resulting losses on the sales of trade accounts receivables sold under this factoring agreement were recorded to other expense within the Condensed Consolidated Statements of Operations.

d. Trade Accounts Receivable Sale Programs

In fiscal year 2010, the Company entered into two separate uncommitted accounts receivable sale agreements with banks which originally allowed the Company and certain of its subsidiaries to elect to sell and the banks to elect to purchase at a discount, on an ongoing basis, up to a maximum of \$150.0 million and \$75.0 million of specific trade

accounts receivable at any one time. During the first quarter of fiscal year 2011, one of the sale programs was amended to increase the facility limit from \$150.0 million to \$200.0 million of specific trade accounts receivable at any one time. Each of these programs is accounted for as a sale. Net receivables sold under these programs are excluded from trade accounts receivable on the Condensed Consolidated Balance Sheets and are reflected as cash provided by operating activities on the Condensed Consolidated Statements of Cash Flows. The \$200.0 million and \$75.0 million sale programs expire on May 25, 2011 and August 24, 2011, respectively.

Table of Contents

The Company continues servicing the receivables sold under each trade accounts receivable sale program in exchange for a servicing fee. No servicing asset or liability is recorded at the time of sale as the Company has determined the servicing fee earned is at a market rate. Servicing costs are recognized as incurred over the servicing period.

At November 30, 2010, the Company had sold \$383.7 million of trade accounts receivable under these programs. In exchange, the Company received cash proceeds of \$383.4 million. The resulting loss on the sale of trade accounts receivable was \$0.3 million for the three months ended November 30, 2010, which was recorded to other expense within the Condensed Consolidated Statements of Operations.

Note 9. Retirement Benefits

The Company sponsors defined benefit pension plans in several countries in which it operates. The pension obligations relate primarily to the following: (a) a funded retirement plan in the United Kingdom, which provides benefits based on average employee earnings over a three-year service period preceding retirement and (b) primarily unfunded retirement plans mainly in Taiwan, Germany, Japan, The Netherlands, Poland and Austria, which provide benefits based upon years of service and compensation at retirement.

There are no domestic pension or postretirement benefit plans maintained by the Company.

The components of net periodic benefit cost for the Company's pension plans are as follows (in thousands):

	Three months ended	
	November 30, 2010	November 30, 2009
Service cost	\$ 378	\$ 399
Interest cost	1,406	1,510
Expected long-term return on plan assets	(1,096)	(1,119)
Amortization of prior service cost	(6)	(31)
Recognized actuarial loss	500	323
Net periodic benefit cost	\$ 1,182	\$ 1,082

For the three months ended November 30, 2010, the Company has made contributions of approximately \$0.9 million to its defined benefit pension plans. The Company presently anticipates total fiscal year 2011 contributions to approximate \$3.5 million to \$4.2 million.

Note 10. Notes Payable and Long-Term Debt

Notes payable and long-term debt outstanding at November 30, 2010 and August 31, 2010 are summarized below (in thousands):

	November 30, 2010	August 31, 2010
7.750% Senior Notes due 2016	\$ 302,212	\$ 301,782
8.250% Senior Notes due 2018	397,235	397,140
5.625% Senior Notes due 2020 (a)	400,000	
Borrowings under credit facilities	108,500	73,750
Borrowings under loans	2,260	342,380
Securitization program obligations	82,847	71,436
Miscellaneous borrowings	5,323	8
Total notes payable and long-term debt	\$ 1,298,377	\$ 1,186,496
Less current installments of notes payable and long-term debt	198,928	167,566

Notes payable and long-term debt, less current installments	\$ 1,099,449	\$ 1,018,930
---	--------------	--------------

The \$400.0 million of 5.625% senior unsecured notes (the 5.625% Senior Notes), \$312.0 million of 7.750% senior unsecured notes (the 7.750% Senior Notes) and \$400.0 million of 8.250% senior unsecured notes (the 8.250% Senior Notes) outstanding are carried at the principal amount of each note, less any unamortized discount. The estimated fair value of these senior notes was approximately \$393.0 million, \$350.2 million and \$457.0 million, respectively, at November 30, 2010. The fair value estimates are based upon non-binding market quotes that are corroborated by observable market data (Level 2 criteria).

Table of Contents***a. 5.625% Senior Notes Offering***

During the first quarter of fiscal year 2011, the Company issued the ten-year publicly registered 5.625% Senior Notes at par. The net proceeds from the offering of \$400.0 million were used to fully repay the term portion of the Credit Facility and partially repay amounts outstanding under the Company's foreign asset-backed securitization program. The 5.625% Senior Notes mature on December 15, 2020. Interest on the 5.625% Senior Notes is payable semiannually on June 15 and December 15 of each year, beginning on June 15, 2011. The 5.625% Senior Notes are the Company's senior unsecured obligations and rank equally with all other existing and future senior unsecured debt obligations. The Company is subject to covenants such as limitations on its and/or its subsidiaries' ability to: consolidate or merge with, or convey, transfer or lease all or substantially all of the Company's assets to, another person; create certain liens; enter into sale and leaseback transactions; create, incur, issue, assume or guarantee any funded debt (which only applies to the Company's restricted subsidiaries); and guarantee any of the Company's indebtedness (which only applies to the Company's subsidiaries). The Company is also subject to a covenant requiring its repurchase of the 5.625% Senior Notes upon a change of control repurchase event.

Note 11. Derivative Financial Instruments and Hedging Activities

The Company is directly and indirectly affected by changes in certain market conditions. These changes in market conditions may adversely impact the Company's financial performance and are referred to as market risks. The Company, where deemed appropriate, uses derivatives as a risk management tool to mitigate the potential impact of certain market risks. The primary market risks managed by the Company through the use of derivatives instruments are foreign currency fluctuation risk and interest rate risk.

All derivative instruments are recorded gross on the Condensed Consolidated Balance Sheets at their respective fair values. The accounting for changes in the fair value of a derivative instrument depends on the intended use and designation of the derivative instrument. For derivative instruments that are designated and qualify as a fair value hedge, the gain or loss on the derivative and the offsetting gain or loss on the hedged item attributable to the hedged risk are recognized in current earnings. For derivative instruments that are designated and qualify as a cash flow hedge, the effective portion of the gain or loss on the derivative instrument is initially reported as a component of accumulated other comprehensive income (AOCI), net of tax, and is subsequently reclassified into the line item within the Condensed Consolidated Statements of Operations in which the hedged items are recorded in the same period in which the hedged item affects earnings. The ineffective portion of the gain or loss is recognized immediately in current earnings. For derivative instruments that are not designated as hedging instruments, gains and losses from changes in fair values are recognized currently in earnings.

For derivatives accounted for as hedging instruments, the Company formally designates and documents, at inception, the financial instruments as a hedge of a specific underlying exposure, the risk management objective and the strategy for undertaking the hedge transaction. In addition, the Company formally assesses, both at inception and at least quarterly thereafter, whether the financial instruments used in hedging transactions are effective at offsetting changes in the cash flows on the related underlying exposures.

a. Foreign Currency Risk Management

Forward contracts are put in place to manage the foreign currency risk associated with various commitments arising from trade accounts receivable, trade accounts payable and fixed purchase obligations. A hedging relationship existed that related to certain anticipated foreign currency denominated revenues and expenses, with an aggregate notional amount outstanding of \$43.5 million and \$49.4 million at November 30, 2010 and 2009, respectively. The related forward foreign exchange contracts have been designated as hedging instruments and are accounted for as cash flow hedges. The forward foreign exchange contract transactions will effectively lock in the value of anticipated foreign currency denominated revenues and expenses against foreign currency fluctuations. The anticipated foreign currency denominated revenues and expenses being hedged are expected to occur between December 1, 2010 and April 30, 2011.

In addition to derivatives that are designated and qualify for hedge accounting, the Company also enters into forward contracts to economically hedge transactional exposure associated with commitments arising from trade accounts receivable, trade accounts payable and fixed purchase obligations denominated in a currency other than the functional currency of the respective operating entity. The aggregate notional amount of these outstanding contracts at

November 30, 2010 and 2009 was \$420.0 million and \$700.9 million, respectively.

The following table presents the Company's assets and liabilities related to forward foreign exchange contracts measured at fair value on a recurring basis as of November 30, 2010, aggregated by the level in the fair-value hierarchy within which those measurements fall (in thousands):

19

Table of Contents

	Level 1	Level 2	Level 3	Total
Assets:				
Forward foreign exchange contracts	\$	\$ 10,186	\$	\$ 10,186
Liabilities:				
Forward foreign exchange contracts		(6,600)		(6,600)
Total	\$	\$ 3,586	\$	\$ 3,586

The Company's forward foreign exchange contracts are measured on a recurring basis at fair value, based on foreign currency spot rates and forward rates quoted by banks or foreign currency dealers.

The following table presents the fair value of the Company's derivative instruments located on the Condensed Consolidated Balance Sheets utilized for foreign currency risk management purposes at November 30, 2010 (in thousands):

Fair Values of Derivative Instruments
At November 30, 2010

	Asset Derivatives		Liability Derivatives	
	Balance Sheet	Fair	Balance Sheet	Fair
	Location	Value	Location	Value
Derivatives designated as hedging instruments				
Forward foreign exchange contracts	Prepaid expenses and other current assets	\$ 645	Accrued expense	\$ 636
Derivatives not designated as hedging instruments				
Forward foreign exchange contracts	Prepaid expenses and other current assets	\$ 9,541	Accrued expense	\$ 5,964

The following table presents the fair value of the Company's derivative instruments located on the Condensed Consolidated Balance Sheets utilized for foreign currency risk management purposes at August 31, 2010 (in thousands):

Fair Values of Derivative Instruments
At August 31, 2010

	Asset Derivatives		Liability Derivatives	
	Balance Sheet	Fair	Balance Sheet	Fair
	Location	Value	Location	Value
Derivatives designated as hedging instruments				
Forward foreign exchange contracts	Prepaid expenses and other current assets	\$ 669	Accrued expense	\$ 1,046

Derivatives not designated as hedging instruments

Forward foreign exchange contracts	Prepaid expenses and other current assets	\$ 4,814	Accrued expense	\$ 3,268
------------------------------------	---	----------	-----------------	----------

The following table presents the impact that changes in fair value of derivatives utilized for foreign currency risk management purposes and designated as hedging instruments had on AOCI and earnings during the three months ended November 30, 2010 (in thousands):

Table of Contents

				Location of Gain	Amount of Gain (Loss)

November 30, 2009					
Forward foreign exchange contracts	\$ 1,773	Cost of revenue	\$ 636	Cost of revenue	\$ 627

As of November 30, 2010, the Company estimates that it will reclassify into earnings during the next 12 months existing losses related to foreign currency risk management hedging arrangements of approximately \$0.4 million from

the amounts recorded in AOCI as the anticipated cash flows occur.

The following table presents the impact that changes in fair value of derivatives utilized for foreign currency risk management purposes and not designated as hedging instruments had on earnings during the three months ended November 30, 2010 (in thousands):

Location of Gain (Loss) Recognized in		Amount of Gain (Loss) Recognized in Income on Derivative for the Three months ended November 30, 2010
Derivatives not designated as hedging instruments		Income on Derivative
Forward foreign exchange contracts	Cost of revenue	\$ 5,716

b. Interest Rate Risk Management

The Company periodically enters into interest rate swaps to manage interest rate risk associated with the Company's borrowings.

During the fourth quarter of fiscal year 2007, the Company entered into forward interest rate swap transactions to hedge the fixed interest rate payments for an anticipated debt issuance, which was the issuance of the 8.250% Senior Notes. The swaps were accounted for as a cash flow hedge and had a notional amount of \$400.0 million. Concurrently with the pricing of the 8.250% Senior Notes, the Company settled the swaps by its payment of \$43.1 million. The ineffective portion of the swaps was immediately recorded to interest expense within the Condensed Consolidated Statements of Operations. The effective portion of the swaps is recorded on the Company's Condensed Consolidated Balance Sheets as a component of AOCI and is being amortized to interest expense within the Company's Condensed Consolidated Statements of Operations over the life of the 8.250% Senior Notes, which is through March 15, 2018.

The following table presents the impact that changes in the fair value of the derivative utilized for interest rate risk management and designated as a hedging instrument had on AOCI and earnings for the three months ended November 30, 2010 (in thousands):

Table of Contents

				Location of Gain or (Loss)	Amount of Gain or (Loss)

Interest rate swap	\$ (13)	Interest expense	\$ (1,148)	Interest expense	\$

As of November 30, 2010, the Company estimates that it will reclassify into earnings during the next 12 months existing losses related to interest rate risk management hedging arrangements of approximately \$4.0 million from the amounts recorded in AOCI as the anticipated cash flows occur.

Edgar Filing: JABIL CIRCUIT INC - Form 10-Q

The following table presents the changes related to cash flow hedges included in AOCI net of tax for the three months ended November 30, 2010 and 2009 (in thousands):

	Three months ended November 30, 2010
Accumulated comprehensive loss, August 31, 2010	\$ (16,086)
Net gain for the period	849
Net loss transferred to earnings	779
Accumulated comprehensive loss, November 30, 2010	\$ (14,458)
	Three months ended November 30, 2009
Accumulated comprehensive loss, August 31, 2009	\$ (18,861)
Net gain for the period	1,760
Net loss transferred to earnings	512
Accumulated comprehensive loss, November 30, 2009	\$ (16,589)

Note 12. Income Taxes

The Internal Revenue Service (IRS) completed its field examination of the Company's tax returns for the fiscal years 2003 through 2005 and issued a Revenue Agent's Report (RAR) on April 30, 2010 proposing adjustments primarily related to: (1) certain costs that the Company treated as corporate expenses and that the IRS proposes be charged out to its foreign affiliates and (2) certain purported intangible values the IRS felt were transferred to certain of the Company's foreign subsidiaries free of charge. If the IRS ultimately prevails in its positions, the Company's additional income tax payment due for the fiscal years 2003 through 2005 would be approximately \$69.3 million before utilization of any tax attributes arising in periods subsequent to fiscal year 2005. In addition, the IRS will likely make similar claims in future audits with respect to these types of transactions (at this time, determination of the additional income tax due for these later years is not practicable). Also, the IRS has proposed interest and penalties on the Company with respect to fiscal years 2003 through 2005, and the Company anticipates the IRS may seek to impose interest and penalties in subsequent years with respect to the same types of issues.

The Company disagrees with the proposed adjustments and intends to vigorously contest this matter through applicable IRS and judicial procedures, as appropriate. As the final resolution of the proposed adjustments remains uncertain, the Company continues to provide for the uncertain tax position based on the more likely than not standards. Accordingly, the Company did not record any

Table of Contents

significant additional tax liabilities related to this RAR on the Condensed Consolidated Balance Sheets for the three months ended November 30, 2010. While the resolution of the issues may result in tax liabilities, interest and penalties, which are significantly higher than the amounts provided for this matter, management currently believes that the resolution will not have a material effect on the Company's financial position or liquidity. Despite this belief, an unfavorable resolution, particularly if the IRS successfully asserts similar claims for later years, could have a material effect on the Company's results of operations and financial condition (particularly in the quarter in which any adjustment is recorded or any tax is due or paid).

Note 13. Loss on Disposal of Subsidiaries***a. Jabil Circuit Automotive, SAS***

On October 27, 2009, the Company sold its subsidiary, Jabil Circuit Automotive, SAS, an automotive electronics manufacturing subsidiary located in Western Europe to an unrelated third party. As a result of this sale, the Company recorded a loss on disposition of \$15.7 million in the first quarter of fiscal year 2010, which included transaction-related costs of approximately \$4.2 million. These costs are recorded to loss on disposal of subsidiaries within the Condensed Consolidated Statements of Operations, which is a component of operating income. Jabil Circuit Automotive had net revenue and an operating loss of \$15.5 million and \$1.4 million, respectively from the beginning of the 2010 fiscal year through the date of disposition.

b. French and Italian Subsidiaries

On July 16, 2010, the Company sold its operations in Italy as well as its remaining operations in France to an unrelated third party. Divested operations, inclusive of four sites and approximately 1,500 employees, had net revenues and an operating loss of \$298.6 million and \$39.6 million, respectively, from the beginning of the 2010 fiscal year through the date of disposition.

In connection with this transaction, the Company provided an aggregate \$25.0 million working capital loan to the disposed operations and agreed to provide for the aggregate potential reimbursement of up to \$10.0 million in restructuring costs dependent upon the occurrence of certain future events. The working capital loan bears interest on a quarterly basis at LIBOR plus 500 basis points and is repayable over approximately 44 months dependent upon the achievement of certain specified quarterly financial results of the disposed operations, which if not met, would result in the forgiveness of all or a portion of the loan. Accordingly, dependent on the occurrence of such future events, the Company may incur up to an additional \$28.5 million of charges. As a result of this sale, the Company recorded a loss on disposition of \$8.9 million in the fourth quarter of fiscal year 2010, which included transaction-related costs of \$1.7 million and a charge of \$6.5 million in order to record the working capital loan at its respective fair value at August 31, 2010 based upon a discounted cash flow analysis (Level 3). These costs were recorded to loss on disposal of subsidiaries within the Consolidated Statements of Operations during the fourth quarter of fiscal year 2010, which is a component of operating income.

Note 14. New Accounting Guidance***a. Recently Adopted Accounting Guidance***

In October 2009, the Financial Accounting Standards Board (the "FASB") issued new accounting guidance for revenue arrangements with multiple deliverables. This guidance impacts the determination of when the individual deliverables included in a multiple-element arrangement may be treated as separate units of accounting. Additionally, this new accounting guidance modifies the manner in which the transaction consideration is allocated across the separately identified deliverables by no longer permitting the residual method of allocating arrangement consideration. The new guidance was effective for the Company prospectively for revenue arrangements entered into or materially modified beginning in the first quarter of fiscal year 2011. The adoption of this guidance did not have a significant impact on the Company's Condensed Consolidated Financial Statements.

In June 2009, the FASB amended its guidance on accounting for variable interest entities ("VIE"). The new accounting guidance resulted in a change in the Company's accounting policy effective September 1, 2010. Among other things, the new guidance requires a qualitative rather than a quantitative analysis to determine the primary beneficiary of a VIE, requires continuous assessments of whether an enterprise is the primary beneficiary of a VIE, enhances disclosures about an enterprise's involvement with a VIE and amends certain guidance for determining whether an entity is a VIE. Under the new guidance, a VIE must be consolidated if the enterprise has both (a) the

power to direct the activities of the VIE that most significantly impact the entity's economic performance and (b) the obligation to absorb losses or the right to receive benefits from the VIE that could potentially be significant to the VIE. The adoption of this guidance did not have a significant impact on the Company's Condensed Consolidated Financial Statements.

Table of Contents

In June 2009, the FASB issued new accounting guidance on accounting for transfers of financial assets. This new guidance became effective for the Company on September 1, 2010. This guidance amends previous guidance by eliminating the concept of a qualifying special-purpose entity, creating more stringent conditions for reporting a transfer of a portion of a financial asset as a sale, clarifying other sale-accounting criteria and changing the initial measurement of a transferor's interest in transferred financial assets. Additionally, the guidance requires extensive new disclosure regarding an entity's involvement in a transfer of financial assets. As a result of the adoption of this new guidance, the accounts receivable transferred under the asset-backed securitization program, prior to amendment on November 5, 2010, no longer qualified for sale treatment and as such were accounted for as secured borrowings. During the first quarter of fiscal year 2011, the program was amended to again be accounted for as a sale. The amended program allows the Company to continuously sell a designated pool of trade accounts receivable to a wholly-owned subsidiary, which in turn sells 100% of the eligible receivables to conduits, administered by unaffiliated financial institutions. Refer to Note 8 Trade Accounts Receivable Securitization and Sale Programs.

b. Recently Issued Accounting Guidance

In July 2010, the FASB issued new disclosure guidance related to the credit quality of financing receivables and the allowance for credit losses. This guidance will require companies to provide more information about the credit quality of their financing receivables in the disclosures to the financial statements including, but not limited to, significant purchases and sales of financing receivables, aging information and credit quality indicators. The Company will adopt this accounting standard upon its effective date for periods ending on or after December 15, 2010. This accounting guidance is not expected to have a significant impact on the Company's Condensed Consolidated Financial Statements.

Note 15. Subsequent Events

The Company has evaluated subsequent events that occurred through the date of the filing of the Company's first quarter Form 10-Q.

On December 7, 2010, the Company amended and restated its five-year \$800.0 million revolving credit facility (the Amended and Restated Credit Facility). The Amended and Restated Credit Facility provides for a revolving credit in the amount of \$1.0 billion, subject to potential increases up to \$1.3 billion, and expires on December 7, 2015. Interest and fees on the Amended and Restated Credit Facility advances are based on the Company's non-credit enhanced long-term senior unsecured debt rating as determined by S&P and Moody's. Interest is charged at a rate equal to either 0.40% to 1.50% above the base rate or 1.40% to 2.50% above the Eurocurrency rate, where the base rate represents the greatest of Citibank, N.A.'s prime rate, 0.50% above the federal funds rate or 1.0% above one-month LIBOR, and the Eurocurrency rate represents the adjusted London Interbank Offered Rate for the applicable interest period, each as more fully described in the Agreement. Fees include a facility fee based on the revolving credit commitments of the lenders and a letter of credit fee based on the amount of outstanding letters of credit. The Company, along with its subsidiaries, are subject to the following financial covenants: (1) a maximum ratio of (a) Debt (as defined in the credit agreement) to (b) Consolidated EBITDA (as defined in the credit agreement) and (2) a minimum ratio of (a) Consolidated EBITDA to (b) interest payable on, and amortization of debt discount in respect of, debt and loss on sales of trade accounts receivables pursuant to our securitization program. In addition, the Company is subject to other covenants, such as: limitation upon liens; limitation upon mergers, etc.; limitation upon accounting changes; limitation upon subsidiary debt; limitation upon sales, etc. of assets; limitation upon changes in nature of business; payment restrictions affecting subsidiaries; compliance with laws, etc.; payment of taxes, etc.; maintenance of insurance; preservation of corporate existence, etc.; visitation rights; keeping of books; maintenance of properties, etc.; transactions with affiliates; and reporting requirements.

JABIL CIRCUIT, INC. AND SUBSIDIARIES

References in this report to the Company, Jabil, we, our, or us mean Jabil Circuit, Inc. together with its subsidiaries, except where the context otherwise requires. This Quarterly Report on Form 10-Q contains certain statements that are, or may be deemed to be, forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended (the Securities Act) and Section 21E of the Securities Exchange Act of 1934, as amended (the Exchange Act) which are made in reliance upon the protections provided by such acts for forward-looking statements. These forward-looking statements (such as when we describe what will, may, or should occur, what we plan, intend, estimate, believe, expect or anticipate will occur, and other similar statements) include, but are not limited to, statements regarding future sales and operating results, future prospects, anticipated benefits of proposed (or future) acquisitions and new facilities, growth, the capabilities and capacities of business operations, any financial or other guidance and all statements that are not based on historical fact, but rather reflect our current expectations concerning future results and events. We make certain assumptions when making forward-looking statements, any of which could prove inaccurate, including, but not limited to, statements about our future operating results and business plans. Therefore, we can give no assurance that the results implied by these forward-looking statements will be realized. Furthermore, the inclusion of forward-looking information should not be regarded as a representation by the Company or any other person that future events, plans or expectations contemplated by the Company will be achieved. The ultimate correctness of these forward-looking statements is dependent upon a number of known and unknown risks and events, and is subject to various uncertainties and other factors that may cause our actual results, performance or achievements to be different from any future results, performance or achievements expressed or implied by these statements. The following important factors, among others, could affect future results and events, causing those results and events to differ materially from those expressed or implied in our forward-looking statements:

business conditions and growth or declines in our customers industries, the electronic manufacturing services industry and the general economy;

variability of our operating results;

our dependence on a limited number of major customers;

the potential consolidation of our customer base, and the potential movement by some of our customers of a portion of their manufacturing from us in order to more fully utilize their excess internal manufacturing capacity;

availability of components;

our dependence on certain industries;

our production levels are subject to the variability of customer requirements, including seasonal influences on the demand for certain end products;

our substantial international operations, and the resulting risks related to our operating internationally;

our ability to successfully negotiate definitive agreements and consummate acquisitions, and to integrate operations following the consummation of acquisitions;

our ability to take advantage of our past, current and possible future restructuring efforts to improve utilization and realize savings and whether any such activity will adversely affect our cost structure, our ability to service customers and our labor relations;

our ability to maintain our engineering, technological and manufacturing process expertise;

other economic, business and competitive factors affecting our customers, our industry and our business generally; and

other factors that we may not have currently identified or quantified.

For a further list and description of various risks, relevant factors and uncertainties that could cause future results or events to differ materially from those expressed or implied in our forward-looking statements, see the Risk Factors and Management's Discussion and Analysis of Financial Condition and Results of Operations sections contained in this document, as well as our Annual Report on Form 10-K for the fiscal year ended August 31, 2010, any subsequent reports on Form 10-Q and Form 8-K and other filings with the Securities and Exchange Commission. Given these risks and uncertainties, the reader should not place undue reliance on these forward-looking statements.

All forward-looking statements included in this Quarterly Report on Form 10-Q are made only as of the date of this Quarterly Report on Form 10-Q, and we do not undertake any obligation to publicly update or correct any forward-looking statements to reflect events or circumstances that subsequently occur, or of which we hereafter become aware. You should read this document and the documents that we incorporate by reference into this Quarterly Report on Form 10-Q completely and with the understanding that our actual future results may be materially different from what we expect. We may not update these forward-looking statements, even if our situation changes in the future. All forward-looking statements attributable to us are expressly qualified by these cautionary statements.

Item 2: MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Overview

We are one of the leading providers of worldwide electronic manufacturing services and solutions. We provide comprehensive electronics design, production and product management services to companies in the aerospace, automotive, computing, consumer, defense, industrial, instrumentation, medical, networking, peripherals, solar, storage and telecommunications industries. We serve our customers primarily with dedicated business units that combine highly automated, continuous flow manufacturing with advanced electronic design and design for manufacturability. We currently depend upon a relatively small number of customers for a significant percentage of our revenue, net of estimated return costs (net revenue). Based on net revenue, for the three months ended November 30, 2010 our largest customers currently include Apple Inc., Cisco Systems, Inc., EchoStar Corporation, General Electric Company, Hewlett-Packard Company, International Business Machines Corporation, NetApp, Inc., Pace plc, Research in Motion Limited and Sony Corporation. For the three months ended November 30, 2010, we had net revenues of approximately \$4.1 billion and net income attributable to Jabil Circuit, Inc. of approximately \$106.7 million.

We offer our customers comprehensive electronics design, production and product management services that are responsive to their manufacturing and supply chain management needs. Our business units are capable of providing our customers with varying combinations of the following services:

integrated design and engineering;

component selection, sourcing and procurement;

automated assembly;

design and implementation of product testing;

parallel global production;

enclosure services;

systems assembly, direct order fulfillment and configure to order; and

aftermarket services.

We currently conduct our operations in facilities that are located in Austria, Belgium, Brazil, China, England, Germany, Hungary, India, Ireland, Japan, Malaysia, Mexico, The Netherlands, Poland, Russia, Scotland, Singapore, Taiwan, Turkey, Ukraine, the U.S. and Vietnam. Our global manufacturing production sites allow customers to manufacture products simultaneously in the optimal locations for their products. Our services allow customers to improve supply-chain management, reduce inventory obsolescence, lower transportation costs and reduce product fulfillment time. We have identified our global presence as a key to assessing our business opportunities.

On September 1, 2010, we reorganized our business into the following three segments: Diversified Manufacturing Services (DMS), Enterprise & Infrastructure (E&I) and High Velocity Systems (HVS). Our DMS segment is composed of dedicated resources to manage higher complexity global products in regulated industries and bring materials and process technologies including design and aftermarket services to our global customers. Our E&I and HVS segments offer integrated global supply chain solutions designed to provide cost effective solutions for our customers. Our E&I segment is focused on our customers primarily in the computing, storage, networking and telecommunication sectors. Our HVS segment is focused on the particular needs of the consumer products industry, including mobility, display, set-top boxes and peripheral products such as printers and point of sale terminals.

The industry in which we operate is composed of companies that provide a range of manufacturing and design services to companies that utilize electronics components. The industry experienced rapid change and growth through

the 1990s as an increasing number of companies chose to outsource an increasing portion, and, in some cases, all of their manufacturing requirements. In mid-2001, the industry's revenue declined as a result of significant cut-backs in customer production requirements, which was consistent with the overall downturn in the technology sector at the time. In response to this downturn in the technology sector, we implemented restructuring programs to reduce our cost structure and further align our manufacturing capacity with the geographic production demands of our customers. Industry revenues generally began to stabilize in 2003 and companies turned to outsourcing versus internal manufacturing. In addition, the number of industries serviced, as well as the market penetration in certain industries, by electronic manufacturing service providers has increased over the past several years. In mid-2008, the industry's revenue declined when a deteriorating macro-economic environment resulted in illiquidity in the overall credit markets and a significant economic downturn in

Table of Contents

the North American, European and Asian markets. In response to this downturn, we implemented additional restructuring programs to reduce our cost structure and further align our manufacturing capacity with the geographic production demands of our customers.

Though significant uncertainty remains regarding the extent and timing of the economic recovery, we continue to see signs of stabilization as the overall credit markets have significantly improved and it appears that the global economic stimulus programs put in place are having a positive impact, particularly in China. We will continue to monitor the current economic environment and its potential impact on both the customers that we serve as well as our end-markets and closely manage our costs and capital resources so that we can respond appropriately as circumstances continue to change. Also, as a result of the relatively recent negative economic conditions, some of our customers have moved a portion of their manufacturing from us in order to more fully utilize their excess internal manufacturing capacity. Possible future movements of business from us may negatively affect our results of operations.

Summary of Results

Net revenues for the first quarter of fiscal year 2011 increased approximately 32.2% to \$4.1 billion compared to \$3.1 billion for the same period of fiscal year 2010. These increases are primarily due to increased revenue from existing customers and programs as our customers' confidence in their markets strengthen and their end-customers demand levels increase, as well as new customer wins and new program wins with existing customers.

The following table sets forth, for the three month period indicated, certain key operating results and other financial information (in thousands, except per share data).

	Three months ended	
	November 30, 2010	November 30, 2009
Net revenue	\$ 4,082,181	\$ 3,088,256
Gross profit	\$ 310,591	\$ 231,776
Operating income	\$ 156,000	\$ 66,264
Net income attributable to Jabil Circuit, Inc	\$ 106,677	\$ 28,288
Income per share basic	\$ 0.50	\$ 0.13
Income per share diluted	\$ 0.49	\$ 0.13
Cash dividend per share declared	\$ 0.07	\$ 0.07

Key Performance Indicators

Management regularly reviews financial and non-financial performance indicators to assess the Company's operating results. The following table sets forth, for the quarterly periods indicated, certain of management's key financial performance indicators:

	Three months ended			
	November 30, 2010	August 31, 2010	May 31, 2010	February 28, 2010
Sales cycle	16 days	17 days	16 days	17 days
Inventory turns	7 turns	7 turns	7 turns	7 turns
Days in trade accounts receivable	26 days	33 days	33 days	35 days
Days in inventory	52 days	53 days	50 days	51 days
Days in accounts payable	62 days	69 days	67 days	69 days

The sales cycle is calculated as the sum of days in trade accounts receivable and days in inventory, less the days in accounts payable; accordingly, the variance in the sales cycle quarter over quarter is a direct result of changes in these indicators. During the three months ended November 30, 2010, days in trade accounts receivable decreased seven days to 26 days as compared to the prior sequential quarter as a result of the adoption of new accounting guidance related to the transfer of financial assets, coupled with an amendment to the asset-backed securitization program

during the first quarter of fiscal year 2011, which resulted in a deferred purchase price receivable being recorded to prepaid expenses and other current assets on the Condensed Consolidated Balance Sheets at November 30, 2010 as compared to a retained interest on receivables sold which was recorded to trade accounts receivable on the Condensed Consolidated Balance Sheets at August 31, 2010. Refer to Note 8 Trade Accounts Receivable Securitization and Sale Programs and Note 14 New Accounting Guidance to the Condensed Consolidated Financial Statements for further details. During the three months ended November 30, 2010, days in inventory decreased one day to 52 days and inventory turns remained constant at seven turns as compared to the prior sequential quarter primarily due to increased sales activity during the quarter. During

Table of Contents

the three months ended November 30, 2010, days in accounts payable decreased seven days to 62 days as compared to the prior sequential quarter, as a result of the timing of purchases and cash payments during the quarter.

Critical Accounting Policies and Estimates

The preparation of our Condensed Consolidated Financial Statements and related disclosures in conformity with U.S. generally accepted accounting principles (U.S. GAAP) requires management to make estimates and judgments that affect our reported amounts of assets and liabilities, revenues and expenses, and related disclosures of contingent assets and liabilities. On an on-going basis, we evaluate our estimates and assumptions based upon historical experience and various other factors and circumstances. Management believes that our estimates and assumptions are reasonable under the circumstances; however, actual results may vary from these estimates and assumptions under different future circumstances. We have identified the following critical accounting policies that affect the more significant judgments and estimates used in the preparation of our Condensed Consolidated Financial Statements. For further discussion of our significant accounting policies, refer to Note 1 Description of Business and Summary of Significant Accounting Policies to the Consolidated Financial Statements in our Annual Report on Form 10-K for the fiscal year ended August 31, 2010.

Revenue Recognition

We derive revenue principally from the product sales of electronic equipment built to customer specifications. We also derive revenue to a lesser extent from aftermarket services, design services and excess inventory sales. Revenue from product sales and excess inventory sales is generally recognized, net of estimated product return costs, when goods are shipped; title and risk of ownership have passed; the price to the buyer is fixed or determinable; and recoverability is reasonably assured. Aftermarket service related revenue is recognized upon completion of the services. Design service related revenue is generally recognized upon completion and acceptance by the respective customer. We assume no significant obligations after product shipment.

Allowance for Doubtful Accounts

We maintain an allowance for doubtful accounts related to receivables not expected to be collected from our customers. This allowance is based on management's assessment of specific customer balances, considering the age of receivables and financial stability of the customer. If there is an adverse change in the financial condition and circumstances of our customers, or if actual defaults are higher than provided for, an addition to the allowance may be necessary.

Inventory Valuation

We purchase inventory based on forecasted demand and record inventory at the lower of cost or market. Management regularly assesses inventory valuation based on current and forecasted usage, customer inventory-related contractual obligations and other lower of cost or market considerations. If actual market conditions or our customers product demands are less favorable than those projected, additional valuation adjustments may be necessary.

Long-Lived Assets

We review property, plant and equipment and amortizable intangible assets for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability of property, plant and equipment is measured by comparing its carrying value to the undiscounted projected cash flows that the asset(s) or asset group(s) are expected to generate. If the carrying amount of an asset or an asset group is not recoverable, we recognize an impairment loss based on the excess of the carrying amount of the long-lived asset over its respective fair value, which is generally determined as either the present value of estimated future cash flows or the appraised value. The impairment analysis is based on significant assumptions of future results made by management, including revenue and cash flow projections. Circumstances that may lead to impairment of property, plant and equipment include unforeseen decreases in future performance or industry demand and the restructuring of our operations resulting from a change in our business strategy or adverse economic conditions.

We have recorded intangible assets, including goodwill, in connection with business acquisitions. Estimated useful lives of amortizable intangible assets are determined by management based on an assessment of the period over which the asset is expected to contribute to future cash flows. The fair value of acquired amortizable intangible assets impacts the amounts recorded as goodwill.

We perform a goodwill impairment analysis using the two-step method on an annual basis and whenever events or changes in circumstances indicate that the carrying value may not be recoverable. The recoverability of goodwill is measured at the reporting unit level, which we have determined to be consistent with our operating segments, by comparing the reporting unit's carrying amount, including goodwill, to the fair value of the reporting unit. We determine the fair value of our reporting units based on an average weighting of both projected discounted future results and the use of comparative market multiples. If the carrying amount of the reporting unit exceeds its fair value, goodwill is considered impaired and a second test is performed to measure the amount of loss, if any.

Table of Contents

We completed our annual impairment test for goodwill during the fourth quarter of fiscal year 2010 and determined that the fair values of our reporting units are substantially in excess of the carrying values and that no impairment existed as of the date of the impairment test. In addition, on September 1, 2010, we reorganized our business into the DMS, E&I and HVS segments. In doing so, we reassigned goodwill to the new reporting units (which are deemed to be consistent with our segments) and were required to perform an interim goodwill impairment test based on these new reporting units. Based on this interim goodwill impairment test, we determined that the fair values of our new reporting units are substantially in excess of the carrying values and no impairment existed as of the date of the interim impairment test.

Restructuring and Impairment Charges

We have recognized restructuring and impairment charges related to reductions in workforce, re-sizing and closure of certain facilities and the transition of production from certain facilities into other new and existing facilities. These charges were recorded pursuant to formal plans developed and approved by management and our Board of Directors. The recognition of restructuring and impairment charges requires that we make certain judgments and estimates regarding the nature, timing and amount of costs associated with these plans. The estimates of future liabilities may change, requiring additional restructuring and impairment charges or the reduction of liabilities already recorded. At the end of each reporting period, we evaluate the remaining accrued balances to ensure that no excess accruals are retained and the utilization of the provisions are for their intended purpose in accordance with the restructuring programs.

Retirement Benefits

We have pension and postretirement benefit costs and liabilities in certain foreign locations that are developed from actuarial valuations. Actuarial valuations require management to make certain judgments and estimates of discount rates, compensation rate increases and return on plan assets. We evaluate these assumptions on a regular basis taking into consideration current market conditions and historical market data. The discount rate is used to state expected future cash flows at a present value on the measurement date. This rate represents the market rate for high-quality fixed income investments. A lower discount rate increases the present value of benefit obligations and increases pension expense. When considering the expected long-term rate of return on pension plan assets, we take into account current and expected asset allocations, as well as historical and expected returns on plan assets. Other assumptions include demographic factors such as retirement, mortality and turnover. For further discussion of our pension and postretirement benefits, refer to Note 9 Retirement Benefits to the Condensed Consolidated Financial Statements.

Income Taxes

We estimate our income tax provision in each of the jurisdictions in which we operate, a process that includes estimating exposures related to examinations by taxing authorities. We must also make judgments regarding the ability to realize the deferred tax assets. The carrying value of our net deferred tax assets is based on our belief that it is more likely than not that we will generate sufficient future taxable income in certain jurisdictions to realize these deferred tax assets. A valuation allowance has been established for deferred tax assets that we do not believe meet the more likely than not criteria. We assess whether an uncertain tax position taken or expected to be taken in a tax return meets the threshold for recognition and measurement in the Condensed Consolidated Financial Statements. Our judgments regarding future taxable income as well as tax positions taken or expected to be taken in a tax return may change due to changes in market conditions, changes in tax laws or other factors. If our assumptions and consequently our estimates change in the future, the valuation allowances and/or tax reserves established may be increased or decreased, resulting in a respective increase or decrease in income tax expense.

The Internal Revenue Service (IRS) completed its field examination of our tax returns for the fiscal years 2003 through 2005 and issued a Revenue Agent's Report (RAR) on April 30, 2010 proposing adjustments primarily related to: (1) certain costs that we treated as corporate expenses and that the IRS proposes be charged out to our foreign affiliates and (2) certain purported intangible values the IRS felt were transferred to certain of our foreign subsidiaries free of charge. If the IRS ultimately prevails in its positions, our additional income tax payment due for the fiscal years 2003 through 2005 would be approximately \$69.3 million before utilization of any tax attributes arising in periods subsequent to fiscal year 2005. In addition, the IRS will likely make similar claims in future audits with

respect to these types of transactions (at this time, determination of the additional income tax due for these later years is not practicable). Also, the IRS has proposed interest and penalties with respect to fiscal years 2003 through 2005, and we anticipate the IRS may seek to impose interest and penalties in subsequent years with respect to the same types of issues.

We disagree with the proposed adjustments and intend to vigorously contest this matter through applicable IRS and judicial procedures, as appropriate. As the final resolution of the proposed adjustments remains uncertain, we continue to provide for the uncertain tax position based on the more likely than not standards. Accordingly, we did not record any significant additional tax liabilities related to this RAR on the Condensed Consolidated Balance Sheets during the three months ended November 30, 2010. While the resolution of the issues may result in tax liabilities, interest and penalties, which are significantly higher than the amounts provided for this matter, we currently believe that the resolution will not have a material effect on our financial position or liquidity.

Table of Contents

Despite this belief, an unfavorable resolution, particularly if the IRS successfully asserts similar claims for later years, could have a material effect on our results of operations and financial condition (particularly in the quarter in which any adjustment is recorded or any tax is due or paid). For further discussion related to our income taxes, refer to Note 12 Income Taxes to the Condensed Consolidated Financial Statements, Risk Factors We are subject to the risk of increased taxes and Note 4 Income Taxes to the Consolidated Financial Statements in our Annual Report on Form 10-K for the fiscal year ended August 31, 2010.

Stock-Based Compensation

We recognize stock-based compensation expense within our Condensed Consolidated Statements of Operations related to stock appreciation rights using a lattice model to determine the fair value. Option pricing models require the input of subjective assumptions, including the expected life of the option or stock appreciation right, risk-free rate, expected dividend yield and the price volatility of the underlying stock. Judgment is also required in estimating the number of stock awards that are expected to vest as a result of satisfaction of time-based vesting schedules or the achievement of certain performance or market conditions. If actual results or future changes in estimates differ significantly from our current estimates, stock-based compensation expense could increase or decrease. For further discussion of our stock-based compensation, refer to Note 4 - Stock-Based Compensation to the Condensed Consolidated Financial Statements.

Recent Accounting Guidance

See Note 14 New Accounting Guidance to the Condensed Consolidated Financial Statements for a discussion of recent accounting guidance.

Results of Operations

The following table sets forth, for the periods indicated, certain statements of operations data expressed as a percentage of net revenue:

	Three months ended	
	November 30, 2010	November 30, 2009
Net revenue	100.0%	100.0%
Cost of revenue	92.4%	92.5%
Gross profit	7.6%	7.5%
Operating expenses:		
Selling, general and administrative	3.6%	4.3%
Research and development	0.1%	0.2%
Amortization of intangibles	0.1%	0.2%
Restructuring and impairment charges		0.1%
Loss on disposal of subsidiaries		0.5%
Operating income	3.8%	2.2%
Other (income) expense		
Interest income		
Interest expense	0.5%	0.7%
Income before income tax	3.3%	1.5%
Income tax expense	0.7%	0.6%
Net income	2.6%	0.9%
Net income attributable to noncontrolling interests, net of income tax expense		

Net income attributable to Jabil Circuit, Inc	2.6%	0.9%
---	------	------

For the Three Months Ended November 30, 2010 Compared to the Three Months Ended November 30, 2009

Net Revenue. Our net revenue for the three months ended November 30, 2010 increased 32.2% to \$4.1 billion up from \$3.1 billion for the three months ended November 30, 2009. Specific increases include a 67% increase in the sale of instrumentation and healthcare products; a 54% increase in the sale of specialized services products; a 29% increase in the sale of industrial and CleanTech products; a 29% increase in the sale of E&I products; and a 24% increase in the sale of HVS products. These increases are primarily due to increased revenue from existing customers and programs as our customers' confidence in their markets strengthen and their end-customers' demand levels increase, as well as new customer wins and new program wins with existing customers.

30

Table of Contents

Generally, we assess revenue on a global customer basis regardless of whether the growth is associated with organic growth or as a result of an acquisition. Accordingly, we do not differentiate or report separately revenue increases generated by acquisitions as opposed to existing business. In addition, the added cost structures associated with our acquisitions have historically been relatively insignificant when compared to our overall cost structure.

The following table sets forth, for the periods indicated, revenue by sector expressed as a percentage of net revenue. The distribution of revenue across our sectors has fluctuated, and will continue to fluctuate, as a result of numerous factors, including but not limited to the following: fluctuations in customer demand as a result of recent recessionary conditions; efforts to de-emphasize the economic performance of certain sectors, most specifically, our former automotive sector; seasonality in our business; and business growth from new and existing customers. As discussed in the Overview section, on September 1, 2010, we reorganized our business into the following three segments: DMS, E&I and HVS. In conjunction with this reorganization, there have been certain reclassifications made within the reported sectors.

The following table sets forth, for the periods indicated, revenue by segment expressed as a percentage of net revenue:

	Three months ended	
	November 30, 2010	November 30, 2009
DMS		
Specialized Services	15%	13%
Industrial & CleanTech	12%	12%
Instrumentation & Healthcare	7%	6%
Total DMS	34%	31%
Total E&I	28%	29%
Total HVS	38%	40%
Total	100%	100%

Foreign source revenue represented 86.4% of net revenue for the three months ended November 30, 2010. This is compared to 86.1% of net revenue for the three months ended November 30, 2009, respectively. We currently expect our foreign source revenue to remain relatively consistent as compared to current levels over the course of the next twelve months.

Gross Profit. Gross profit increased to \$310.6 million (7.6% of net revenue) for the three months ended November 30, 2010 from \$231.8 million (7.5% of net revenue) for the three months ended November 30, 2009. The increase in gross profit on an absolute basis and as a percentage of net revenue for the three months ended November 30, 2010 versus the same period in the prior fiscal year was primarily due to increased revenue from existing customers and programs as our customers' confidence in their markets strengthen and their end-customers demand levels increase, new customer wins and new program wins with existing customers which allow us to better utilize capacity and absorb fixed costs, an increased focus on controlling costs and improving productivity and additional growth in the DMS segment, which typically has higher margins than the E&I and HVS segments.

Selling, General and Administrative. Selling, general and administrative expenses increased to \$142.4 million (3.6% of net revenue) for the three months ended November 30, 2010 from \$131.6 million (4.3% of net revenue) for the three months ended November 30, 2009. This increase is largely due to \$5.5 million in incremental stock-based

compensation expense primarily resulting from retirement eligibility provisions that accelerate the requisite service period of certain restricted stock awards and an increase in the number of performance-based restricted stock awards expected to vest and \$2.6 million in additional salary expense associated with increased headcount.

Research and Development. Research and development expenses decreased to \$5.7 million (0.1% of net revenue) for the three months ended November 30, 2010 compared to \$7.7 million (0.2% of net revenue) for the three months ended November 30, 2009. The decrease for the three months ended November 30, 2010 is primarily due to the completion of certain research and development projects which were moved into the production phase.

Amortization of Intangibles. We recorded \$6.0 million of amortization of intangible assets for the three months ended November 30, 2010 as compared to \$7.1 million for the three months ended November 30, 2009. The decrease is primarily attributable to certain intangible assets that became fully amortized since November 30, 2009. For additional information regarding purchased intangibles, see Note 7 Goodwill and Other Intangible Assets to the Condensed Consolidated Financial Statements.

Table of Contents

Restructuring and Impairment Charges.

a. 2009 Restructuring Plan

Upon the approval by our Board of Directors, we initiated a restructuring plan in the second quarter of fiscal year 2009 (the 2009 Restructuring Plan). We have substantially completed restructuring activities under this plan and expect to incur the remaining costs over the remainder of fiscal year 2011.

During the three months ended November 30, 2010, we recorded \$0.1 million of restructuring and impairment costs compared to charges of \$3.5 million of restructuring and impairment costs during the three months ended November 30, 2009. The charges related to the 2009 Restructuring Plan incurred during the three months ended November 30, 2010 are primarily related to lease commitment costs.

At November 30, 2010, accrued liabilities of approximately \$0.7 million related to the 2009 Restructuring Plan are expected to be paid over the next twelve months.

The 2009 Restructuring Plan is expected to yield annualized cost savings of approximately \$55.0 million. The majority of these annual cost savings are expected to be reflected as a reduction in cost of revenue, with a small portion being reflected as a reduction of selling, general and administrative expense. These expected annualized cost savings reflect a reduction in employee expense of approximately \$41.8 million, a reduction in depreciation expense of approximately \$5.9 million, a reduction in lease commitment costs of approximately \$0.1 million, a reduction of other manufacturing costs of approximately \$3.8 million and a reduction of selling, general and administrative expenses of approximately \$3.4 million. Of the \$55.0 million of expected annualized cost savings, we have realized a cumulative annualized cost savings of approximately \$50.0 million by the end of the first quarter of fiscal year 2011.

As part of the 2009 Restructuring Plan, we have determined that it was more likely than not that certain deferred tax assets would not be realized as a result of the contemplated restructuring activities. Therefore, we recorded a valuation allowance of \$14.8 million on net deferred tax assets related to the 2009 Restructuring Plan. The valuation allowance is excluded from the restructuring and impairment charges incurred through November 30, 2010 as it was recorded to income tax expense within our Condensed Consolidated Statements of Operations.

b. 2006 Restructuring Plan

Upon the approval by our Board of Directors, we initiated a restructuring plan in the fourth quarter of fiscal year 2006 (the 2006 Restructuring Plan). We have substantially completed restructuring activities under this plan and expect to incur the remaining costs over the remainder of fiscal year 2011.

During the three months ended November 30, 2010, we recorded approximately \$0.3 million of restructuring and impairment charges compared to a reversal of \$0.1 million of restructuring and impairment charges recognized for the three months ended November 30, 2009. The restructuring and impairment costs for the three months ended November 30, 2010 are primarily related to lease commitment costs.

At November 30, 2010, liabilities of approximately \$0.6 million related to the 2006 Restructuring Plan are expected to be paid out over the next twelve months. The remaining liability of \$2.1 million relates primarily to the charge for employee severance and termination benefits payments.

Loss on Disposal of Subsidiaries. On October 27, 2009, we sold the operations of Jabil Circuit Automotive, SAS, an automotive electronic manufacturing subsidiary located in Western Europe to an unrelated third party. In connection with this sale, we recorded a loss on disposition of approximately \$15.7 million, which includes approximately \$4.2 million in transaction costs incurred in connection with the sale during the three months ended November 30, 2009.

Other (Income) Expense. We recorded other income of \$0.2 million and other expense of \$1.0 million for the three months ended November 30, 2010 and 2009, respectively. The increase in other income for the three months ended November 30, 2010 was primarily due to an incremental gain of \$0.6 million associated with the purchase of receivables from an unrelated third party and an incremental gain of \$0.4 million associated with the sale of an available-for-sale security. In addition, the loss recognized in connection with our trade accounts receivable securitization and sales programs decreased by \$0.3 million compared to the first quarter of fiscal year 2010 due to a decrease in interest rates, partially off-set by additional sales under trade accounts receivable programs that were entered into during the third and fourth quarters of fiscal year 2010. For further discussion of our trade accounts receivable securitization and sales programs, see Note 8 Trade Accounts Receivable Securitization and Sale Programs

to the Condensed Consolidated Financial Statements.

Interest Income. Interest income remained constant at \$0.9 million for the three months ended November 30, 2010 and 2009.

Table of Contents

Interest Expense. Interest expense increased to \$22.2 million for the three months ended November 30, 2010 from \$20.1 million for the three months ended November 30, 2009. The increase was primarily due to interest associated with the issuance of our new 5.625% Senior Notes during the first quarter of fiscal year 2011.

Income Taxes. Income tax expense reflects an effective tax rate of 20.4% for the three months ended November 30, 2010, as compared to an effective tax rate of 37.2% for the three months ended November 30, 2009. The effective tax rate differs from the previous period due to the sale of the French subsidiary in fiscal year 2010. Also, the tax rate is predominantly a function of the mix of tax rates in the various jurisdictions in which we do business. Most of our international operations have historically been taxed at a lower rate than in the U.S., primarily due to tax incentives granted to our sites in Brazil, China, Hungary, Malaysia, Poland, Singapore and Vietnam. The material tax incentives expire at various dates through 2020. Such tax incentives are subject to conditions with which we expect to continue to comply. See Management's Discussion and Analysis of Financial Condition and Results of Operations Critical Accounting Policies and Estimates Income Taxes, Risk Factors We are subject to the risk of increased taxes and Note 4 Income Taxes to the Consolidated Financial Statements in the Annual Report on Form 10-K for the fiscal year ended August 31, 2010 for further discussion.

Non-U.S. GAAP Core Financial Measures

The following discussion and analysis of our financial condition and results of operations include certain non-U.S. GAAP financial measures as identified in the reconciliation below. The non-U.S. GAAP financial measures disclosed herein do not have standard meaning and may vary from the non-U.S. GAAP financial measures used by other companies or how we may calculate those measures in other instances from time to time. Non-U.S. GAAP financial measures should not be considered a substitute for, or superior to, measures of financial performance prepared in accordance with U.S. GAAP. Also, our core financial measures should not be construed as an inference by us that our future results will be unaffected by those items which are excluded from our core financial measures.

Management believes that the non-U.S. GAAP core financial measures set forth below are useful to facilitate evaluating the past and future performance of our ongoing manufacturing operations over multiple periods on a comparable basis by excluding the effects of the amortization of intangibles, restructuring and impairment charges, goodwill impairment charges, certain distressed customer charges, loss on disposal of subsidiaries, certain deferred tax valuation allowance charges and stock-based compensation expense and related charges. Among other uses, management uses non-U.S. GAAP core financial measures as a factor in determining employee performance when determining incentive compensation.

We are reporting core operating income and core earnings to provide investors with an additional method for assessing operating income and earnings, presenting what we believe are our core manufacturing operations. Most of the items that are excluded for purposes of calculating core operating income and core earnings also impacted certain balance sheet assets, resulting in all or a portion of an asset being written off without a corresponding recovery of cash we may have previously spent with respect to the asset. In the case of restructuring charges, we may be making associated cash payments in the future. In addition, although, for purposes of calculating core operating income and core earnings, we exclude stock-based compensation expense (which we anticipate continuing to incur in the future) because it is a non-cash expense, the associated stock issued may result in an increase in our outstanding shares of stock, which may result in the dilution of our stockholders' ownership interest. We encourage you to evaluate these items and the limitations for purposes of analysis in excluding them.

Included in the table below is a reconciliation of the non-U.S. GAAP financial measures to the most directly comparable U.S. GAAP financial measures as provided in our Condensed Consolidated Financial Statements (in thousands):

	Three months ended	
	November 30, 2010	November 30, 2009
Operating income (U.S. GAAP)	\$ 156,000	\$ 66,264
Amortization of intangibles	5,969	7,105

Edgar Filing: JABIL CIRCUIT INC - Form 10-Q

Stock-based compensation and related charges	19,500	13,981
Restructuring and impairment charges	432	3,435
Loss on disposal of subsidiaries		15,722
Core operating income (Non-U.S. GAAP)	\$ 181,901	\$ 106,507

33

Table of Contents

	Three months ended	
	November 30, 2010	November 30, 2009
Net income attributable to Jabil Circuit, Inc. (U.S. GAAP)	\$ 106,677	\$ 28,288
Amortization of intangibles, net of tax	5,958	7,093
Stock-based compensation and related charges, net of tax	19,005	13,710
Restructuring and impairment charges, net of tax	432	3,438
Loss on disposal of subsidiaries, net of tax		15,722
Core earnings (Non-U.S. GAAP)	\$ 132,072	\$ 68,251
Earnings per share: (U.S. GAAP)		
Basic	\$ 0.50	\$ 0.13
Diluted	\$ 0.49	\$ 0.13
Core earnings per share: (Non-U.S. GAAP)		
Basic	\$ 0.62	\$ 0.32
Diluted	\$ 0.61	\$ 0.32
Common shares used in the calculations of earnings per share (U.S. GAAP & Non-U.S. GAAP):		
Basic	214,395	213,665
Diluted	217,405	215,059

Core operating income for the first quarter of fiscal year 2011 increased 70.8% to \$181.9 million compared to \$106.5 million for the first quarter of fiscal year 2010. Core earnings increased 93.5% to \$132.1 million compared to \$68.3 million for the first quarter of fiscal year 2010. These increases were the result of the same factors described above in Management's Discussion and Analysis of Financial Condition and Results of Operations For the Three Months Ended November 30, 2010 Compared to the Three Months Ended November 30, 2009 Gross Profit.

Acquisitions and Expansion

We have made a number of acquisitions in prior years that were accounted for using the purchase method of accounting. Our Condensed Consolidated Financial Statements include the operating results of each business from the date of acquisition. See Risk Factors We have on occasion not achieved, and may not in the future achieve, expected profitability from our acquisitions.

Seasonality

Production levels for the HVS segment are subject to seasonal influences. We may realize greater net revenue during our first fiscal quarter due to higher demand for consumer related products manufactured in the HVS segment during the holiday selling season. Therefore, quarterly results should not be relied upon as necessarily being indicative of results for the entire fiscal year.

Dividends

The following table sets forth certain information relating to our cash dividends declared to common stockholders during fiscal years 2011 and 2010:

34

Table of Contents

Dividend Information					
	Dividend	Dividend	Total	Date of Record for	Dividend Cash
	Declaration Date	per	Dividends	Dividend Payment	Payment Date
		Share	Declared		
		(in thousands, except for per share data)			
Fiscal year 2011:	October 25, 2010	\$ 0.07	\$ 15,563	November 15, 2010	December 1, 2010
Fiscal year 2010:	October 22, 2009	\$ 0.07	\$ 15,186 ⁽¹⁾	November 16, 2009	December 1, 2009
	January 22, 2010	\$ 0.07	\$ 15,238	February 16, 2010	March 1, 2010
	April 14, 2010	\$ 0.07	\$ 15,221	May 17, 2010	June 1, 2010
	July 22, 2010	\$ 0.07	\$ 15,247	August 16, 2010	September 1, 2010

(1) Of the \$15.2 million in total dividends declared during the first quarter of fiscal year 2010, \$14.4 million was paid out of additional paid-in capital (which represents the amount of dividends declared in excess of the Company's retained earnings balance at the date that the dividends were declared).

We currently expect to continue to declare and pay quarterly dividends of an amount similar to our past declarations. However, the declaration and payment of future dividends are discretionary and will be subject to determination by our Board of Directors each quarter following its review of our financial performance.

Liquidity and Capital Resources

At November 30, 2010, our principle sources of liquidity consisted of cash, available borrowings under our credit facilities and the accounts receivable securitization and uncommitted sale programs.

The following table sets forth, for the three months ended November 30, 2010, selected consolidated cash flow information (in thousands):

	Three months ended	
	November	November
	30,	30,
	2010	2009
Net cash (used in) provided by operating activities	\$ (82,728)	\$ 74,263
Net cash used in investing activities	(108,359)	(35,137)
Net cash provided by (used in) financing activities	78,234	(70,406)
Effect of exchange rate changes on cash and cash equivalents	(1,322)	7,075
Net decrease in cash and cash equivalents	\$ (114,175)	\$ (24,205)

Net cash used in operating activities for the three months ended November 30, 2010 was approximately \$82.7 million. This resulted primarily from net income of \$107.4 million, a \$150.1 million increase in inventories, a \$139.8 million decrease in accounts payable and accrued expenses and a \$17.2 million increase in prepaid expenses and other current assets; which were partially offset by \$75.0 million in non-cash depreciation and amortization expense, \$19.5 million in non-cash stock-based compensation expense, a \$13.2 million increase in income tax payable and an \$11.2 million decrease in trade accounts receivable. The decrease in accounts payable and accrued expenses was primarily driven by the timing of purchases and cash payments. The decrease in accounts receivable was primarily driven by improved cash collections partially offset by increased sales levels. The increase in prepaid expenses and other current assets was primarily driven by our purchase of receivables from an unrelated third party. The increase in inventories was primarily due to the ramp up of inventory levels to support new business wins, as well as raw material shortages due to a constrained materials environment. For further discussion of material shortages see

Risk Factors We depend on a limited number of suppliers for components that are critical to our manufacturing processes. A shortage of these components or an increase in their price could interrupt our operations and reduce our profits, increase our inventory carrying costs, increase our risk of exposure to inventory obsolescence and cause us to purchase components of a lesser quality.

Net cash used in investing activities for the three months ended November 30, 2010 was \$108.4 million. This consisted primarily of capital expenditures of \$101.3 million principally for machinery and equipment for new business, including new process technology within our DMS segment, maintenance levels of machinery and equipment and information technology infrastructure upgrades and \$14.9 million for the cost of receivables purchased from an unrelated third party, net of collections; which were partially offset by \$5.8 million of proceeds from the disposal of an available for sale investment and \$2.0 million of proceeds from the sale of property and equipment.

Net cash provided by financing activities for the three months ended November 30, 2010 was \$78.2 million. This resulted from our receipt of approximately \$1.7 billion of proceeds from borrowings under existing debt agreements, which primarily included an

Table of Contents

aggregate of \$1.1 billion of borrowings under the revolving portion of the Company's five year unsecured credit facility dated as of July 19, 2007 (the "Credit Facility") and \$400.0 million in borrowings as we completed the offering of \$400.0 million in aggregate principal amount of publicly-registered 5.625% senior unsecured notes (the "5.625% Senior Notes"). This was offset by repayments in an aggregate amount of approximately \$1.6 billion during the three months ended November 30, 2010, which primarily included an aggregate of \$1.1 billion of repayments under the revolving portion of the Credit Facility and \$340.0 million under the term portion of the Credit Facility. In addition, we paid \$15.2 million of dividends to stockholders during fiscal year 2011.

We may need to finance day-to-day working capital needs, as well as future growth and any corresponding working capital needs, with additional borrowings under the Amended and Restated Credit Facility and our other revolving credit facilities described below, as well as additional public and private offerings of our debt and equity. Currently, we have a shelf registration statement with the SEC registering the potential sale of an indeterminate amount of debt and equity securities in the future, from time to time, to augment our liquidity and capital resources.

During the second quarter of fiscal year 2004, we entered into an asset-backed securitization program with a bank, which originally provided for net cash proceeds at any one time of an amount up to \$100.0 million on the sale of eligible trade accounts receivable of certain domestic operations. Subsequent to fiscal year 2004, several amendments have adjusted the net cash proceeds available at any one time under the securitization program to an amount of \$300.0 million and extended the program until November 4, 2011. The transactions in this program were historically accounted for as sales under applicable accounting guidance. Effective September 1, 2010, we adopted new accounting guidance that resulted in more stringent conditions for reporting the transfer of a financial asset as a sale. As a result of the adoption of this new guidance the accounts receivable transferred under this program no longer qualified for sale treatment and as such were accounted for as secured borrowings. During the first quarter of fiscal year 2011, this program was amended to again account for the transfer of applicable accounts receivable as a sale. The amended program allows us to continuously sell a designated pool of trade accounts receivable to a wholly-owned subsidiary, which in turn sells 100% of the eligible receivables to conduits, administered by unaffiliated financial institutions. This wholly-owned subsidiary is a separate bankruptcy-remote entity and its assets would be available first to satisfy the claims of the conduits. As the receivables sold are collected, we are able to sell additional receivables up to the maximum permitted amount under the program. Any portion of the purchase price for the receivables which is not paid in cash upon the sale taking place is recorded as a deferred purchase price receivable, which is paid by the conduits from available cash as payments on the receivables are collected. The securitization program requires compliance with several financial covenants including an interest coverage ratio and debt to EBITDA ratio, as defined in the securitization agreements. Net receivables sold under this program are excluded from trade accounts receivable on our Condensed Consolidated Balance Sheets and are reflected as cash provided by operating activities on our Condensed Consolidated Statements of Cash Flows. We pay a fee on the unused portion of the program of 0.50% per annum based on the average daily unused aggregate receivables sold during the period and a usage fee on the utilized portion of the program equal to 0.95% per annum (inclusive of the unused fee) on the average daily outstanding aggregate receivables sold during the immediately preceding calendar month. The securitization conduits and the investors in the conduits have no recourse to our assets for failure of debtors to pay when due. We continue to service, administer and collect the receivables sold under this program and in exchange receive a servicing fee. Servicing fees recognized during the three months ended November 30, 2010 and 2009 were not material and are included in other expense within the Condensed Consolidated Statements of Operations. We do not record a servicing asset or liability as we estimate the fee we receive in return for our obligation to service these receivables is at fair value. At November 30, 2010, we had sold \$485.9 million of eligible trade accounts receivable, which represents the face amount of total outstanding receivables at that date. In exchange, we received cash proceeds of \$260.6 million and a deferred purchase price receivable of approximately \$218.8 million which was recorded at fair value as prepaid expenses and other current assets on the Condensed Consolidated Balance Sheets. The deferred purchase price receivable was valued using unobservable inputs (Level 3 inputs), and takes into account the credit quality and short-term maturity of the related accounts receivable. At November 30, 2009, we had sold \$418.8 million of eligible trade accounts receivable, which represents the face amount of total outstanding receivables at that date. In exchange, we received cash proceeds of \$164.5 million and retained an interest in the receivables of approximately

\$254.3 million. In connection with the securitization program, we recognized interest expense of approximately \$0.5 million during the three months ended November 30, 2010 and prior to execution of the previously discussed amendment. Additionally, we recognized pretax losses on the sale of receivables of approximately \$0.5 million and \$1.0 million during the three months ended November 30, 2010 and 2009, respectively, which are recorded to other expense within the Condensed Consolidated Statements of Operations. See Note 8 Trade Accounts Receivable Securitization and Sale Programs and Note 14 New Accounting Guidance to the Condensed Consolidated Financial Statements.

During the first quarter of fiscal year 2005, we entered into an agreement with an unrelated third party for the factoring of specific trade accounts receivable of a foreign subsidiary. The factoring of trade accounts receivable under this agreement is accounted for as a sale. Under the terms of the factoring agreement, we transfer ownership of eligible trade accounts receivable without recourse to the third party purchaser in exchange for cash. Proceeds on the transfer reflect the face value of the account less a discount. The discount is recorded as a loss within our Condensed Consolidated Statements of Operations in the period of the sale. In September 2010, the factoring agreement was extended through March 31, 2011, at which time it is expected to automatically renew for an additional six-month period. The receivables sold pursuant to this factoring agreement are excluded from trade accounts receivable on our Condensed Consolidated Balance Sheets and are reflected as cash provided by operating activities on our Condensed Consolidated

Table of Contents

Statements of Cash Flows. We continue to service, administer and collect the receivables sold under this program. The third party purchaser has no recourse to our assets for failure of debtors to pay when due. We had sold \$12.0 million and \$19.7 million of trade accounts receivable, which represents the face amount of total outstanding receivables at November 30, 2010 and 2009, respectively, and in exchange, received cash proceeds of \$11.9 million and \$19.7 million at November 30, 2010 and 2009, respectively. The resulting losses on the sales of trade accounts receivables sold under this factoring agreement were recorded to other expense within the Condensed Consolidated Statements of Operations.

In fiscal year 2010, we entered into two separate uncommitted accounts receivable sale agreements with banks which originally allowed us and certain of our subsidiaries to elect to sell and the banks to elect to purchase at a discount, on an ongoing basis, up to a maximum of \$150.0 million and \$75.0 million of specific trade accounts receivable at any one time. The sale programs have been amended to increase the facility limits from \$150.0 million to \$200.0 million and from \$75.0 million to \$100.0 million of specific trade accounts receivable at any one time. The programs are accounted for as sales. Net receivables sold under the programs are excluded from trade accounts receivable on the Condensed Consolidated Balance Sheets and are reflected as cash provided by operating activities on the Condensed Consolidated Statements of Cash Flows. The \$200.0 million and \$100.0 million sale programs expire on May 25, 2011 and August 24, 2011, respectively.

We continue to service the receivables sold under each trade accounts receivable sales program in exchange for a servicing fee. No servicing asset or liability is recorded at the time of sale as we have determined the servicing fee earned is at a market rate. Servicing costs are recognized as incurred over the servicing period. For the three months ended November 30, 2010, we had sold \$383.7 million of trade accounts receivable pursuant to the agreements discussed in the immediately preceding two paragraphs. In exchange, we received cash proceeds of \$383.4 million. The resulting loss on the sale of trade accounts receivable sold under this sales program was \$0.3 million for three months ended November 30, 2010 which was recorded to other expense within our Condensed Consolidated Statements of Operations.

Notes payable and long-term debt outstanding at November 30, 2010 and August 31, 2010 are summarized below (in thousands):

	November 30, 2010	August 31, 2010
7.750% Senior Notes due 2016 (a)	\$ 302,212	\$ 301,782
8.250% Senior Notes due 2018 (b)	397,235	397,140
5.625% Senior Notes due 2020 (c)	400,000	
Borrowings under credit facilities (d)	108,500	73,750
Borrowings under loans (e)	2,260	342,380
Securitization program obligations (f)	82,847	71,436
Miscellaneous borrowings	5,323	8
Total notes payable and long-term debt	1,298,377	\$ 1,186,496
Less current installments of notes payable and long-term debt	198,928	167,566
Notes payable and long-term debt, less current installments	\$ 1,099,449	\$ 1,018,930

- (a) During the fourth quarter of fiscal year 2009, we issued a total of \$312.0 million, seven-year, publicly-registered senior unsecured notes (the 7.750% Senior Notes) at 96.1% of par, resulting in net proceeds of approximately \$300.0 million. The 7.750% Senior Notes mature on July 15, 2016 and pay interest semiannually on January 15 and July 15. Also, the 7.750% Senior Notes are our senior unsecured obligations and rank equally with all other existing and future senior unsecured debt obligations. We are subject to covenants such as limitations on our

and/or our subsidiaries ability to: consolidate or merge with, or convey, transfer or lease all or substantially all of our assets to, another person; create certain liens; enter into sale and leaseback transactions; create, incur, issue, assume or guarantee funded debt (which only applies to our restricted subsidiaries); and guarantee any of our indebtedness (which only applies to our subsidiaries). We are also subject to a covenant requiring our repurchase of the 7.750% Senior Notes upon a change of control repurchase event.

- (b) During the second and third quarters of fiscal year 2008, we issued \$250.0 million and \$150.0 million, respectively, of ten-year, unregistered 8.250% notes at 99.965% of par and 97.5% of par, respectively, resulting in net proceeds of approximately \$245.7 million and \$148.5 million, respectively. On July 18, 2008, we completed an exchange whereby all of the outstanding unregistered 8.250% Notes were exchanged for registered 8.250% Notes (collectively the 8.250% Senior Notes) that are substantially identical to the unregistered notes except that the 8.250% Senior Notes are registered under the Securities Act and do not have any transfer restrictions, registration rights or rights to additional special interest.

The 8.250% Senior Notes mature on March 15, 2018 and pay interest semiannually on March 15 and September 15. The interest rate payable on the 8.250% Senior Notes is subject to adjustment from time to time if the credit ratings assigned to the 8.250%

Table of Contents

Senior Notes increase or decrease, as provided in the 8.250% Senior Notes. The 8.250% Senior Notes are our senior unsecured obligations and rank equally with all other existing and future senior unsecured debt obligations.

We are subject to covenants such as limitations on our and/or our subsidiaries' ability to: consolidate or merge with, or convey, transfer or lease all or substantially all of our assets to, another person; create certain liens; enter into sale and leaseback transactions; create, incur, issue, assume or guarantee any funded debt (which only applies to our restricted subsidiaries); and guarantee any of our indebtedness (which only applies to our subsidiaries). We are also subject to a covenant requiring our repurchase of the 8.250% Senior Notes upon a change of control repurchase event.

- (c) During the first quarter of fiscal year 2011, we issued the 5.625% Senior Notes at par. The net proceeds from the offering of \$400.0 million were used to fully repay the term portion of the Credit Facility and partially repay amounts outstanding under our foreign asset-backed securitization program. The 5.625% Senior Notes mature on December 15, 2020. Interest on the 5.625% Senior Notes is payable semiannually on June 15 and December 15 of each year, beginning on June 15, 2011. The 5.625% Senior Notes are our senior unsecured obligations and rank equally with all other existing and future senior unsecured debt obligations. We are subject to covenants such as limitations on our and/or our subsidiaries' ability to: consolidate or merge with, or convey, transfer or lease all or substantially all of our assets to, another person; create certain liens; enter into sale and leaseback transactions; create, incur, issue, assume or guarantee any funded debt (which only applies to our restricted subsidiaries); and guarantee any of our indebtedness (which only applies to our subsidiaries). We are also subject to a covenant requiring our repurchase of the 5.625% Senior Notes upon a change of control repurchase event.
- (d) As of November 30, 2010, three of our foreign subsidiaries have entered into credit facilities to finance their future growth and any corresponding working capital needs. The credit facilities are denominated in U.S. dollars. The credit facilities incur interest at fixed and variable rates ranging from 1.82% to 4.02% with \$108.5 million outstanding at November 30, 2010.
- (e) During the fourth quarter of fiscal year 2007, we entered into the five-year Credit Facility which provided for a revolving credit portion in the initial amount of \$800.0 million, subject to potential increases up to \$1.0 billion, and provided for a term portion in the amount of \$400.0 million. During the three months ended November 30, 2010, we borrowed \$1.1 billion against the revolving credit portion of the Credit Facility. These borrowings were repaid in full during the first quarter of fiscal year 2011. A draw in the amount of \$400.0 million was made under the term portion of the Credit Facility in the fourth quarter of fiscal year 2007, and was repaid in full during the first quarter of fiscal year 2011.

On December 7, 2010, we amended and restated the Credit Facility (the "Amended and Restated Credit Facility"). The Amended and Restated Credit Facility provides for a revolving credit in the amount of \$1.0 billion, subject to potential increases up to \$1.3 billion, and expires on December 7, 2015. Some or all of the lenders under the Amended and Restated Credit Facility and their affiliates have various other relationships with us and our subsidiaries involving the provision of financial services, including cash management, loans, letter of credit and bank guarantee facilities, investment banking and trust services. We, along with some of our subsidiaries, have entered into foreign exchange contracts and other derivative arrangements with certain of the lenders and their affiliates. In addition, many if not most of the agents and lenders under the Amended and Restated Credit Facility held positions as agent and/or lender under our Credit Facility. Interest and fees on the Amended and Restated Credit Facility advances are based on our non-credit enhanced long-term senior unsecured debt rating as determined by S&P and Moody's. Interest is charged at a rate equal to either 0.40% to 1.50% above the base rate or 1.40% to 2.50% above the Eurocurrency rate, where the base rate represents the greatest of Citibank, N.A.'s prime rate, 0.50% above the federal funds rate or 1.0% above one-month LIBOR, and the Eurocurrency rate represents adjusted London Interbank Offered Rate for the applicable interest period, each as more fully

described in this credit agreement. Fees include a facility fee based on the revolving credit commitments of the lenders and a letter of credit fee based on the amount of outstanding letters of credit. We, along with our subsidiaries, are subject to the following financial covenants: (1) a maximum ratio of (a) Debt (as defined in the credit agreement) to (b) Consolidated EBITDA (as defined in the credit agreement) and (2) a minimum ratio of (a) Consolidated EBITDA to (b) interest payable on, and amortization of debt discount in respect of, all Debt (as defined in the credit agreement) and loss on sale of trade accounts receivables pursuant to any of our, or our subsidiaries, securitization programs. In addition, we are subject to other covenants, such as: limitation upon liens; limitation upon mergers, etc.; limitation upon accounting changes; limitation upon subsidiary debt; limitation upon sales, etc. of assets; limitation upon changes in nature of business; payment restrictions affecting subsidiaries; compliance with laws, etc.; payment of taxes, etc.; maintenance of insurance; preservation of corporate existence, etc.; visitation rights; keeping of books; maintenance of properties, etc.; transactions with affiliates; and reporting requirements.

In addition to the loans described above, at November 30, 2010, we have additional loans outstanding to fund working capital needs. These additional loans total approximately \$2.3 million and are denominated in Euros. The loans are due and payable within 12 months and are classified as short-term on our Condensed Consolidated Balance Sheets.

- (f) During the third quarter of fiscal year 2008, we entered into an asset-backed securitization program with a bank conduit which originally provided for net borrowings available at any one time of an amount up to \$200.0 million. Subsequent to fiscal year

Table of Contents

2008, certain amendments have adjusted the net borrowing available at any one time to \$100.0 million. In connection with the securitization program certain of our foreign subsidiaries sell, on an ongoing basis, an undivided interest in designated pools of trade accounts receivable to a special purpose entity, which in turn borrows up to \$100.0 million from a third party bank conduit and grants a security interest in the accounts receivable as collateral for the borrowings. The securitization program is accounted for as a borrowing. We have the power to direct the activities of the special purpose entity and the obligation to absorb the majority of the expected losses or the right to receive benefits from the transfer of trade accounts receivable into the special purpose entity and, as such, are deemed the primary beneficiary. Accordingly, we consolidate the special purpose entity. The loan balance is calculated based on the terms of the securitization program agreements. The securitization program requires compliance with several covenants including a limitation on certain corporate actions such as mergers, consolidations and sale of substantially all assets. We pay interest at designated commercial paper rates plus a spread. The securitization program, as amended on March 18, 2010, expires on March 17, 2011. We continue servicing the receivables in the program and in exchange receive a servicing fee. Servicing fees recognized during the three months ended November 30, 2010 and 2009 were not material and are included in interest expense within the Condensed Consolidated Statements of Operations. We do not record a servicing asset or liability on the Condensed Consolidated Balance Sheets as we estimate the fee we receive in return for our obligation to service these receivables is at fair value. We had \$82.8 million and \$81.9 million of debt outstanding under the program at November 30, 2010 and 2009, respectively. In addition, we incurred interest expense of \$0.3 million and \$0.7 million recorded within our Condensed Consolidated Statements of Operations during the three months ended November 30, 2010 and 2009, respectively.

At November 30, 2010 and 2009, we were in compliance with all covenants under the Credit Facility and our securitization programs.

Our working capital requirements and capital expenditures could continue to increase in order to support future expansions of our operations through construction of greenfield operations or acquisitions. It is possible that future expansions may be significant and may require the payment of cash. Future liquidity needs will also depend on fluctuations in levels of inventory and shipments, changes in customer order volumes and timing of expenditures for new equipment.

For discussion of our cash management and risk management policies, see Quantitative and Qualitative Disclosures About Market Risk.

We currently anticipate that during the next 12 months, our capital expenditures will be in the range of \$375.0 million to \$425.0 million, principally for machinery and equipment for new business, including new process technology within our DMS segment, maintenance levels of machinery and equipment and information technology infrastructure upgrades. We believe that our level of resources, which include cash on hand, available borrowings under our revolving credit facilities, additional proceeds available under our trade accounts receivable securitization programs and potentially available under our uncommitted trade accounts receivable sale programs and funds provided by operations, will be adequate to fund these capital expenditures, the payment of any declared quarterly dividends, payments for current and future restructuring activities and our working capital requirements for the next 12 months. Our \$300.0 million asset-backed securitization program expires in November 2011, our \$100.0 million foreign asset-backed securitization program expires in March 2011 and our \$200.0 million and \$100.0 million uncommitted trade accounts receivable sale programs expire in May 2011 and August 2011, respectively, and we may be unable to renew any or all of them.

Should we desire to consummate significant additional acquisition opportunities or undertake significant additional expansion activities, our capital needs would increase and could possibly result in our need to increase available borrowings under our revolving credit facilities or access public or private debt and equity markets. There can be no assurance, however, that we would be successful in raising additional debt or equity on terms that we would consider acceptable.

Our contractual obligations for short and long-term debt arrangements, future interest on notes payable and long-term debt, future minimum lease payments under non-cancelable operating lease arrangements, estimated future benefit payments to plan and capital commitments as of November 30, 2010 are summarized below. We do not participate in, or secure financing for, any unconsolidated limited purpose entities. We generally do not enter into

non-cancelable purchase orders for materials until we receive a corresponding purchase commitment from our customer. Non-cancelable purchase orders do not typically extend beyond the normal lead time of several weeks at most. Purchase orders beyond this time frame are typically cancelable.

	Total	Payments due by period (in thousands)			
		Less than 1 year	1-3 years	4-5 years	After 5 years
Contractual Obligations					
Notes payable and long-term debt	\$ 1,298,377	\$ 198,928	\$ 2	\$	\$ 1,099,447
Future interest on notes payable and long-term debt (a)	609,899	80,565	161,352	161,131	206,851
Operating lease obligations	189,899	48,418	70,081	38,694	32,706
		39			

Table of Contents

	Total	Payments due by period (in thousands)			
		Less than 1 year	1-3 years	4-5 years	After 5 years
Estimated future benefit payments to plan	51,251	4,404	9,382	9,531	27,934
Capital commitments (b)					
Total contractual cash obligations					
(c)	\$ 2,149,426	\$ 332,315	\$ 240,817	\$ 209,356	\$ 1,366,938

- (a) At November 30, 2010, our notes payable and long-term debt pay interest at predominately fixed rates.
- (b) During the first quarter of fiscal year 2009, we committed \$10.0 million to an independent private equity limited partnership which invests in companies that address resource limits in energy, water and materials (commonly referred to as the CleanTech sector). Of that amount, we have invested \$4.8 million as of November 30, 2010. The remaining commitment of \$5.2 million is callable over the next 33 months by the general partner. As the capital calls have no specified timing, this commitment has been excluded from the above table as we cannot currently determine when such commitment calls will occur.
- (c) At November 30, 2010, we have \$0.6 million and \$89.4 million recorded as a current and a long-term liability, respectively, for uncertain tax positions. We are not able to reasonably estimate the timing of payments, or the amount by which our liability for these uncertain tax positions will increase or decrease over time, and accordingly, this liability has been excluded from the above table.

Table of Contents**Item 3: QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK****Foreign Currency Exchange Risks**

We transact business in various foreign countries and are, therefore, subject to risk of foreign currency exchange rate fluctuations. We enter into forward contracts to economically hedge transactional exposure associated with commitments arising from trade accounts receivable, trade accounts payable, intercompany transactions and fixed purchase obligations denominated in a currency other than the functional currency of the respective operating entity. We do not intend to use derivative financial instruments for speculative purposes. All derivative instruments are recorded on our Condensed Consolidated Balance Sheets at their respective fair values. At November 30, 2010, except for certain foreign currency contracts, with a notional amount outstanding of \$43.5 million and a fair value of \$0.6 million recorded in prepaid and other current assets and \$0.6 million recorded in accrued expenses, we have elected not to prepare and maintain the documentation required for the transactions to qualify as accounting hedges and, therefore, changes in fair value are recorded within our Condensed Consolidated Statements of Operations.

The aggregate notional amount of outstanding contracts at November 30, 2010 that do not qualify as accounting hedges was \$420.0 million. The fair value of these contracts amounted to a \$9.5 million asset recorded in prepaid and other current assets and a \$6.0 million liability recorded to accrued expenses on our Condensed Consolidated Balance Sheets. The forward contracts will generally expire in less than four months, with five months being the maximum term of the contracts outstanding at November 30, 2010. Upon expiration of the contracts, the change in fair value will be reflected in cost of revenue within our Condensed Consolidated Statements of Operations. The forward contracts are denominated in Brazilian real, British pounds, Chinese yuan renminbis, Euros, Hungarian forints, Indian rupees, Japanese yen, Malaysian ringgits, Mexican pesos, Polish zlotys, Russian rubles, Singapore dollars and U.S. dollars.

Interest Rate Risk

A portion of our exposure to market risk for changes in interest rates relates to our domestic investment portfolio. We do not, and do not intend to, use derivative financial instruments for speculative purposes. We place cash and cash equivalents with various major financial institutions. We protect our invested principal funds by limiting default risk, market risk and reinvestment risk. We mitigate these risks by generally investing in investment grade securities and by frequently positioning the portfolio to try to respond appropriately to a reduction in credit rating of any investment issuer, guarantor or depository to levels below the credit ratings dictated by our investment policy. The portfolio typically includes only marketable securities with active secondary or resale markets to ensure portfolio liquidity. At November 30, 2010, there were no significant outstanding investments.

We pay interest on several of our outstanding borrowings at interest rates that fluctuate based upon changes in various base interest rates. There were \$191.3 million in borrowings outstanding under these facilities at November 30, 2010. See Management's Discussion and Analysis of Financial Condition and Results of Operations Liquidity and Capital Resources and Note 10 Notes Payable and Long-Term Debt to the Condensed Consolidated Financial Statements for additional information regarding our outstanding debt obligations.

Item 4: CONTROLS AND PROCEDURES**Evaluation of Disclosure Controls and Procedures**

We carried out an evaluation required by Rules 13a-15 and 15d-15 under the Exchange Act (the Evaluation), under the supervision and with the participation of our President and Chief Executive Officer (CEO) and Chief Financial Officer (CFO), of the effectiveness of our disclosure controls and procedures as defined in Rules 13a-15 and 15d-15 under the Exchange Act (Disclosure Controls) as of November 30, 2010. Based on the Evaluation, our CEO and CFO concluded that the design and operation of our Disclosure Controls were effective to ensure that information required to be disclosed by us in reports that we file or submit under the Exchange Act is (i) recorded, processed, summarized and reported within the time periods specified in SEC rules and forms, and (ii) accumulated and communicated to our senior management, including our CEO and CFO, to allow timely decisions regarding required disclosure.

Changes in Internal Control over Financial Reporting

For our fiscal quarter ended November 30, 2010, we did not identify any modifications to our internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Our internal control over financial reporting, including our internal control documentation and testing efforts, remain ongoing to ensure continued compliance with the Exchange Act. For our fiscal quarter ended November 30, 2010, we identified certain internal controls that management believed should be modified to improve them. These improvements include further formalization of policies and procedures, improved segregation of duties, additional information technology system controls and additional monitoring

Table of Contents

controls. We are making improvements to our internal control over financial reporting as a result of our review efforts. We have reached our conclusions set forth above, notwithstanding those improvements and modifications.

Limitations on the Effectiveness of Controls and Other Matters

Our management, including our CEO and CFO, does not expect that our Disclosure Controls and internal control over financial reporting will prevent all error and all fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of simple error or mistake. Additionally, controls may be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the control.

The design of any system of controls also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions; over time, a control may become inadequate because of changes in conditions, or the degree of compliance with the policies or procedures may deteriorate. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected.

Notwithstanding the foregoing limitations on the effectiveness of controls, we have nonetheless reached the conclusions set forth above on our disclosure controls and procedures and our internal control over financial reporting.

CEO and CFO Certifications

Exhibits 31.1 and 31.2 are the Certifications of the CEO and the CFO, respectively. The Certifications are required in accordance with Section 302 of the Sarbanes-Oxley Act of 2002 (the "Section 302 Certifications"). This Item of this report, which you are currently reading is the information concerning the Evaluation referred to in the Section 302 Certifications and this information should be read in conjunction with the Section 302 Certifications for a more complete understanding of the topics presented.

PART II. OTHER INFORMATION

Item 1: LEGAL PROCEEDINGS

We are party to certain lawsuits in the ordinary course of business. We do not believe that these proceedings, individually or in the aggregate, will have a material adverse effect on our financial position, results of operations or cash flows.

Table of Contents

Item 1A: Risk Factors

As referenced, this Quarterly Report on Form 10-Q includes certain forward-looking statements regarding various matters. The ultimate correctness of those forward-looking statements is dependent upon a number of known and unknown risks and events, and is subject to various uncertainties and other factors that may cause our actual results, performance or achievements to be different from those expressed or implied by those statements. Undue reliance should not be placed on those forward-looking statements. The following important factors, among others, as well as those factors set forth in our other SEC filings from time to time, could affect future results and events, causing results and events to differ materially from those expressed or implied in our forward-looking statements.

Our operating results may fluctuate due to a number of factors, many of which are beyond our control.

Our annual and quarterly operating results are affected by a number of factors, including:

- adverse changes in current macro-economic conditions, both in the U.S. and internationally;
- the level and timing of customer orders;
- the level of capacity utilization of our manufacturing facilities and associated fixed costs;
- the composition of the costs of revenue between materials, labor and manufacturing overhead;
- price competition;
- changes in demand for our products or services;
- changes in demand in our customers' end markets;
- our exposure to financially troubled customers;
- our level of experience in manufacturing a particular product;
- the degree of automation used in our assembly process;
- the efficiencies achieved in managing inventories and fixed assets;
- fluctuations in materials costs and availability of materials;
- adverse changes in political conditions, both in the U.S. and internationally, including among other things, adverse changes in tax laws and rates (and the governments' interpretations thereof), adverse changes in trade policies and adverse changes in fiscal and monetary policies;
- seasonality in customers' product requirements; and
- the timing of expenditures in anticipation of increased sales, customer product delivery requirements and shortages of components or labor.

The volume and timing of orders placed by our customers vary due to variation in demand for our customers' products; our customers' attempts to manage their inventory; electronic design changes; changes in our customers' manufacturing strategies; and acquisitions of or consolidations among our customers. In addition, our sales associated with consumer-related products are subject to seasonal influences. We may realize greater revenue during our first fiscal quarter due to high demand for consumer products during the holiday selling season. In the past, changes in customer orders that reduce net revenue have had a significant effect on our results of operations as a result of our overhead remaining relatively fixed while our net revenue decreased. Any one or a combination of these factors could adversely affect our annual and quarterly results of operations in the future. See Management's Discussion and Analysis of Financial Condition and Results of Operations—Results of Operations.

Because we depend on a limited number of customers, a reduction in sales to any one of our customers could cause a significant decline in our revenue.

For the three months ended November 30, 2010, our five largest customers accounted for approximately 46% of our net revenue and our top 48 customers accounted for approximately 90% of our net revenue. We currently depend, and expect to continue to depend, upon a relatively small number of customers for a significant percentage of our net revenue and upon their growth, viability and financial stability. If any of our customers experience a decline in the demand for their products due to economic or other forces, they may reduce their purchases from us or terminate their relationship with us. Our customers' industries have experienced rapid technological change, shortening of product life cycles, consolidation, and pricing and margin pressures. Consolidation among our customers may further reduce the number of customers that generate a significant percentage of our net revenue and exposes us to increased risks relating to dependence on a small number of customers. A significant reduction in sales to any of our customers or a customer exerting significant pricing and margin pressures on us could have a material adverse effect on our results of

operations. In

43

Table of Contents

the past, some of our customers have terminated their manufacturing arrangements with us or have significantly reduced or delayed the volume of design, production or product management services ordered from us, including moving a portion of their manufacturing from us in order to more fully utilize their excess internal manufacturing capacity.

Our revenues declined in 2009 as consumers and businesses postponed spending in response to tighter credit, negative financial news, declines in income or asset values or general uncertainty about global economic conditions. These economic conditions had a negative impact on our results of operations over this period and similar conditions may exist in the future. In addition, some of our customers have moved a portion of their manufacturing from us in order to more fully utilize their excess internal manufacturing capacity. We cannot assure you that present or future customers will not terminate their design, production and product management services arrangements with us or significantly change, reduce or delay the amount of services ordered from us. If they do, it could have a material adverse effect on our results of operations. In addition, we generate significant accounts receivable in connection with providing design, production and product management services to our customers. If one or more of our customers were to become insolvent (which two of our customers experienced in fiscal year 2009) or otherwise were unable to pay for the services provided by us on a timely basis, or at all, our operating results and financial condition could be adversely affected. Such adverse effects could include one or more of the following: a decline in revenue, a charge for bad debts, a charge for inventory write-offs, a decrease in inventory turns, an increase in days in inventory and an increase in days in trade accounts receivable.

Certain of the industries to which we provide services, have recently experienced significant financial difficulty, with some of the participants filing for bankruptcy. Such significant financial difficulty has negatively affected our business and, if further experienced by one or more of our customers, may further negatively affect our business due to the decreased demand of these financially distressed customers, the potential inability of these companies to make full payment on amounts owed to us, or both. See Management's Discussion and Analysis of Financial Condition and Results of Operations and Risk Factors. We face certain risks in collecting our trade accounts receivable.

Consolidation in industries that utilize electronics components may adversely affect our business.

Consolidation in industries that utilize electronics components may further increase as companies combine to achieve further economies of scale and other synergies, which could result in an increase in excess manufacturing capacity as companies seek to divest manufacturing operations or eliminate duplicative product lines. Excess manufacturing capacity may increase pricing and competitive pressures for our industry as a whole and for us in particular. Consolidation could also result in an increasing number of very large companies offering products in multiple industries. The significant purchasing power and market power of these large companies could increase pricing and competitive pressures for us. If one of our customers is acquired by another company that does not rely on us to provide services and has its own production facilities or relies on another provider of similar services, we may lose that customer's business. Such consolidation among our customers may further reduce the number of customers that generate a significant percentage of our net revenue and exposes us to increased risks relating to dependence on a small number of customers. Any of the foregoing results of industry consolidation could adversely affect our business.

Our customers face numerous competitive challenges, such as decreasing demand from their customers, rapid technological change and short life cycles for their products, which may materially adversely affect their business, and also ours.

Factors affecting the industries that utilize electronics components in general, and our customers specifically, could seriously harm our customers and, as a result, us. These factors include:

- recessionary periods in our customers' markets;
- the inability of our customers to adapt to rapidly changing technology and evolving industry standards, which contributes to short product life cycles;
- the inability of our customers to develop and market their products, some of which are new and untested;
- the potential that our customers' products become obsolete;
- the failure of our customers' products to gain widespread commercial acceptance;
- increased competition among our customers and their respective competitors which may result in a loss of business, or a reduction in pricing power, for our customers; and

new product offerings by our customers competitors may prove to be more successful than our customers product offerings.

At times our customers have been, and may be in the future, unsuccessful in addressing these competitive challenges, or any others that they may face, and their business has been, and may be in the future, materially adversely affected. As a result, the demand for our services has at times declined and may decline in the future. Even if our customers are successful in responding to these challenges, their responses may have consequences which affect our business relationships with our customers (and possibly our results of operations) by altering our production cycles and inventory management.

Table of Contents

The success of our business is dependent on both our ability to independently keep pace with technological changes and competitive conditions in our industry, and also our ability to effectively adapt our services in response to our customers keeping pace with technological changes and competitive conditions in their respective industries.

If we are unable to offer technologically advanced, cost effective, quick response manufacturing services, demand for our services will decline. In addition, if we are unable to offer services in response to our customers' changing requirements, then demand for our services will also decline. A substantial portion of our net revenue is derived from our offering of complete service solutions for our customers. For example, if we fail to maintain high-quality design and engineering services, our net revenue may significantly decline.

Most of our customers do not commit to long-term production schedules, which makes it difficult for us to schedule production and capital expenditures, and to maximize the efficiency of our manufacturing capacity.

The volume and timing of sales to our customers may vary due to:

- variation in demand for our customers' products;
- our customers' attempts to manage their inventory;
- electronic design changes;
- changes in our customers' manufacturing strategy; and
- acquisitions of or consolidations among customers.

Due in part to these factors, most of our customers do not commit to firm production schedules for more than one quarter. Our inability to forecast the level of customer orders with certainty makes it difficult to schedule production and maximize utilization of manufacturing capacity. In the past, we have been required to increase staffing and other expenses in order to meet the anticipated demand of our customers. Anticipated orders from many of our customers have, in the past, failed to materialize or delivery schedules have been deferred as a result of changes in our customers' business needs, thereby adversely affecting our results of operations. On other occasions, our customers have required rapid increases in production, which have placed an excessive burden on our resources. Such customer order fluctuations and deferrals have had a material adverse effect on us in the past, including the most recent several fiscal quarters, and we may experience such effects in the future. See Management's Discussion and Analysis of Financial Condition and Results of Operations.

In addition to our difficulty in forecasting customer orders, we sometimes experience difficulty forecasting the timing of our receipt of revenue and earnings following commencement of manufacturing an additional product for new or existing customers. The necessary process to begin this commencement of manufacturing can take from several months to more than a year before production begins. Delays in the completion of this process can delay the timing of our sales and related earnings. In addition, because we make capital expenditures during this ramping process and do not typically recognize revenue until after we produce and ship the customer's products, any delays or unanticipated costs in the ramping process may have a significant adverse effect on our cash flows and our results of operations.

Our customers may cancel their orders, change production quantities, delay production or change their sourcing strategy.

Our industry must provide increasingly rapid product turnaround for its customers. We generally do not obtain firm, long-term purchase commitments from our customers and we continue to experience reduced lead-times in customer orders. Customers have previously canceled their orders, changed production quantities, delayed production and changed their sourcing strategy for a number of reasons, and may do one or more of these in the future. Such changes, delays and cancellations have led to, and may lead in the future to a decline in our production and our possession of excess or obsolete inventory which we may not be able to sell to the customer or a third party. This has resulted in, and could result in future additional, write downs of inventories that have become obsolete or exceed anticipated demand or net realizable value.

The success of our customers' products in the market affects our business. Cancellations, reductions, delays or changes in sourcing strategy by a significant customer or by a group of customers have negatively impacted, and could further negatively impact in the future, our operating results by reducing the number of products that we sell, delaying the payment to us for inventory that we purchased and reducing the use of our manufacturing facilities which

have associated fixed costs not dependent on our level of revenue.

In addition, we make significant decisions, including determining the levels of business that we will seek and accept, production schedules, component procurement commitments, personnel needs and other resource requirements, based on our estimate of customer requirements. The short-term nature of our customers' commitments, their uncertainty about future economic conditions, and the possibility of rapid changes in demand for their products reduce our ability to accurately estimate the future requirements of

Table of Contents

those customers. In addition, uncertainty about future economic conditions makes it difficult to forecast operating results and make production planning decisions about future periods.

On occasion, customers may require rapid increases in production, which can stress our resources and reduce operating margins. In addition, because many of our costs and operating expenses are relatively fixed, a reduction in customer demand can harm our gross profits and operating results.

We depend on a limited number of suppliers for components that are critical to our manufacturing processes. A shortage of these components or an increase in their price could interrupt our operations and reduce our profits, increase our inventory carrying costs, increase our risk of exposure to inventory obsolescence and cause us to purchase components of a lesser quality.

Most of our significant long-term customer contracts permit quarterly or other periodic adjustments to pricing based on decreases and increases in component prices and other factors; however, we typically bear the risk of component price increases that occur between any such re-pricings or, if such re-pricing is not permitted, during the balance of the term of the particular customer contract. Accordingly, certain component price increases could adversely affect our gross profit margins. Almost all of the products we manufacture require one or more components that are only available from a single source. Some of these components are allocated from time to time in response to supply shortages. In some cases, supply shortages will substantially curtail production of all assemblies using a particular component. A supply shortage can also increase our cost of goods sold, as a result of our having to pay higher prices for components in limited supply, and cause us to have to redesign or reconfigure products to accommodate a substitute component. In addition, at various times industry-wide shortages of electronic components have occurred, particularly of semiconductor, relay and capacitor products. These shortages resulted in a delay in the realization of an incremental amount of revenue, which, if realized in fiscal year 2010, would have likely had a positive impact on our gross profit and net income. Some shortages are occurring currently, and may continue to occur. We believe these shortages may be due to increased economic activity following recent recessionary conditions. In the past, such circumstances have produced insignificant levels of short-term interruption of our operations, but could have a material adverse effect on our results of operations in the future. Our production of a customer's product could be negatively impacted by any quality or reliability issues with any of our component suppliers. The financial condition of our suppliers could affect their ability to supply us with components which could have a material adverse effect on our operations.

In addition, if a component shortage is threatened or we anticipate one, we may purchase such component early to avoid a delay or interruption in our operations. A possible result of such an early purchase is that we may incur additional inventory carrying costs, for which we may not be compensated, and have a heightened risk of exposure to inventory obsolescence, the cost of which may not be recoverable from our customers. Such costs would adversely affect our gross profit and net income. A component shortage may also require us to look to second tier vendors or to procure components through brokers with whom we are not familiar. These components may be of lesser quality than those we've historically purchased and could cause us to incur costs to bring such components up to our typical quality levels or to replace defective ones. See Management's Discussion and Analysis of Financial Condition and Results of Operations and Business Components Procurement in our Annual Report on Form 10-K for the fiscal year ended August 31, 2010.

Introducing programs requiring implementation of new competencies, including new process technology within our mechanical operations, could affect our operations and financial results.

The introduction of programs requiring implementation of new competencies, including new process technology within our mechanical operations, presents challenges in addition to opportunities. Deployment of such programs may require us to invest significant resources and capital in facilities, equipment and/or personnel. We may not meet our customers' expectations or otherwise execute properly or in a cost-efficient manner, which could damage our customer relationships and result in remedial costs or the loss of our invested capital and anticipated revenues and profits. In addition, there are risks of market acceptance and product performance that could result in less demand than anticipated and our having excess capacity. The failure to ensure that our agreed terms appropriately reflect the anticipated costs, risks, and rewards of such an opportunity could adversely affect our profitability. If we do not meet one or more of these challenges, our operations and financial results could be adversely affected.

Customer relationships with emerging companies may present more risks than with established companies.

Customer relationships with emerging companies present special risks because such companies do not have an extensive product history. As a result, there is less demonstration of market acceptance of their products making it harder for us to anticipate needs and requirements than with established customers. In addition, due to the current economic environment, additional funding for such companies may be more difficult to obtain and these customer relationships may not continue or materialize to the extent we planned or we previously experienced. This tightening of financing for start-up customers, together with many start-up customers' lack of prior operations and unproven product markets increase our credit risk, especially in trade accounts receivable and inventories. Although we perform ongoing credit evaluations of our customers and adjust our allowance for doubtful accounts receivable for all

Table of Contents

customers, including start-up customers, based on the information available, these allowances may not be adequate. This risk may exist for any new emerging company customers in the future.

We compete with numerous other electronic manufacturing services and design providers and others, including our current and potential customers who may decide to manufacture some or all of their products internally.

Our business is highly competitive. We compete against numerous domestic and foreign electronic manufacturing services and design providers, including Benchmark Electronics, Inc., Celestica, Inc., Flextronics International Ltd., Hon-Hai Precision Industry Co., Ltd., Plexus Corp. and Sanmina-SCI Corporation. In addition, past consolidation in our industry has resulted in larger and more geographically diverse competitors who have significant combined resources with which to compete against us. Also, we may in the future encounter competition from other large electronic manufacturers, and manufacturers that are focused solely on design and manufacturing services, that are selling, or may begin to sell electronics manufacturing services. Most of our competitors have international operations and significant financial resources and some have substantially greater manufacturing, R&D and marketing resources than us. These competitors may:

- respond more quickly to new or emerging technologies;
- have greater name recognition, critical mass and geographic market presence;
- be better able to take advantage of acquisition opportunities;
- adapt more quickly to changes in customer requirements;
- devote greater resources to the development, promotion and sale of their services;
- be better positioned to compete on price for their services, as a result of any combination of lower labor costs, lower components costs, lower facilities costs or lower operating costs; and
- have excess capacity, and be better able to utilize such excess capacity which may reduce the cost of their product or service.

We also face competition from the manufacturing operations of our current and potential customers, who are continually evaluating the merits of manufacturing products internally against the advantages of outsourcing. Recently, some of our customers have moved a portion of their manufacturing from us in order to more fully utilize their excess internal manufacturing capacity.

We may be operating at a cost disadvantage compared to competitors who have greater direct buying power from component suppliers, distributors and raw material suppliers or who have lower cost structures as a result of their geographic location or the services they provide or who are willing to make sales or provide services at lower margins than us (including relationships where our competitors are willing to accept a lower margin from certain of their customers for whom they perform other higher margin business). As a result, competitors may procure a competitive advantage and obtain business from our customers. Our manufacturing processes are generally not subject to significant proprietary protection. In addition, companies with greater resources or a greater market presence may enter our market or increase their competition with us. We also expect our competitors to continue to improve the performance of their current products or services, to reduce the sales prices of their current products or services and to introduce new products or services that may offer greater performance and improved pricing. Any of these developments could cause a decline in our sales, loss of market acceptance of our products or services, compression of our profits or loss of our market share.

The economies of the U.S., Europe and certain countries in Asia are, or have recently been, in a recession.

There was an erosion of global consumer confidence amidst concerns over declining asset values, inflation, volatility in energy costs, geopolitical issues, the availability and cost of credit, rising unemployment, and the stability and solvency of financial institutions, financial markets, businesses, and sovereign nations. These concerns slowed global economic growth and resulted in recessions in many countries, including in the U.S., Europe and certain countries in Asia. Even though we have seen signs of an overall economic recovery beginning to take place and the National Bureau of Economic Research declared that the U.S. recession ended in June 2009, such recovery may be weak and/or short-lived. Recessionary conditions may return. If any of these potential negative, or less than positive, economic conditions occur, a number of negative effects on our business could result, including customers or potential customers reducing or delaying orders, increased pricing pressures, the insolvency of key suppliers, which could result

in production delays, the inability of customers to obtain credit, and the insolvency of one or more customers. Thus, these economic conditions (1) could negatively impact our ability to (a) forecast customer demand, (b) effectively manage inventory levels and (c) collect receivables; (2) could increase our need for cash; and (3) have decreased our net revenue and profitability and negatively impacted the value of certain of our properties and other assets. Depending on the length of time that these conditions exist, they may cause future additional negative effects, including some of those listed above.

The financial markets have recently experienced significant turmoil, which may adversely affect financial arrangements we may need to enter into, refinance or repay.

Table of Contents

The effects of the recent credit market turmoil could negatively impact the counterparties to our forward exchange contracts and trade accounts receivable securitization and sale programs; our lenders under the Amended and Restated Credit Facility; and our lenders under various foreign subsidiary credit facilities. These potential negative impacts could potentially limit our ability to borrow under these financing agreements, contracts, facilities and programs. In addition, if we attempt to obtain future additional financing, such as renewing or refinancing our \$300.0 million asset-backed securitization program expiring on November 4, 2011, our \$100.0 million foreign asset-backed securitization program expiring on March 17, 2011 or our \$200.0 million and \$100.0 million uncommitted trade accounts receivable sale programs expiring on May 25, 2011 and August 24, 2011, respectively, the effects of the recent credit market turmoil could negatively impact our ability to obtain such financing. Finally, the credit market turmoil has negatively impacted certain of our customers and certain of their customers. These impacts could have several consequences which could have a negative effect on our results of operations, including one or more of the following: a negative impact on our liquidity; a decrease in demand for our services; a decrease in demand for our customers' products; and bad debt charges or inventory write-offs.

Our business could be adversely affected by any delays, or increased costs, resulting from issues that our common carriers are dealing with in transporting our materials, our products, or both.

We rely on a variety of common carriers to transport our materials from our suppliers to us, and to transport our products from us to our customers. Problems suffered by any of these common carriers, whether due to a natural disaster, labor problem, increased energy prices or some other issue, could result in shipping delays, increased costs, or some other supply chain disruption, and could therefore have a material adverse effect on our operations.

We derive a majority of our revenue from our international operations, which may be subject to a number of risks and often require more management time and expense to achieve profitability than our domestic operations.

We derived 86.4% of net revenue from international operations for the three months ended November 30, 2010 compared to 86.1% for the three months ended November 30, 2009. We currently expect our foreign source revenue to remain relatively consistent as compared to current levels over the course of the next 12 months. At November 30, 2010, we operate outside the U.S. in Vienna, Austria; Hasselt, Belgium; Belo Horizonte, Manaus and Sorocaba, Brazil; Beijing, Huangpu, Nanjing, Shanghai, Shenzhen, Suzhou, Tianjin, Wuxi and Yantai, China; Coventry, England; Jena, Germany; Szombathely and Tiszaújváros, Hungary; Pune, Mumbai and Ranjangaon, India; Dublin, Ireland; Gotemba, Hachioji and Tokyo, Japan; Penang, Malaysia; Chihuahua, Guadalajara, Nogales and Reynosa, Mexico; Amsterdam and Eindhoven, The Netherlands; Bydgoszcz and Kwidzyn, Poland; Tver, Russia; Ayr and Livingston, Scotland; Alexandra, Tampines and Toa Payoh, Singapore; Hsinchu, Taichung and Taipei, Taiwan; Ankara, Turkey; Uzhgorod, Ukraine and Ho Chi Minh City, Vietnam. We continually consider additional opportunities to make foreign acquisitions and construct and open new foreign facilities. Our international operations are, have been and may be subject to a number of risks, including:

- difficulties in staffing and managing foreign operations;
- less flexible employee relationships which can be difficult and expensive to terminate;
- labor unrest and dissatisfaction, including increased scrutiny of the labor practices (including but not limited to working conditions, compliance with employment and labor laws and compensation) of us and others in our industry by the media and other third parties, which may result in further scrutiny and allegations of violations, more stringent and burdensome labor laws and regulations, higher labor costs, and/or loss of revenues if our customers become dissatisfied with our labor practices and diminish or terminate their relationship with us;
- political and economic instability (including acts of terrorism, widespread criminal activities and outbreaks of war);
- inadequate infrastructure for our operations (for example, lack of adequate power, water, transportation and raw materials);
- health concerns and related government actions;
- coordinating our communications and logistics across geographic distances and multiple time zones;
- risk of governmental expropriation of our property;
- less favorable, or relatively undefined, intellectual property laws;

unexpected changes in regulatory requirements and laws or government or judicial interpretations of such regulatory requirements and laws;
longer customer payment cycles and difficulty collecting trade accounts receivable;
domestic and foreign export control laws, including the International Traffic in Arms Regulations and the Export Administration Regulations (EAR), regulation by the United States Department of Commerce's Bureau of Industry and Security under the EAR, as well as additional export duties, import controls and trade barriers (including quotas);
adverse trade policies, and adverse changes to any of the policies of either the U.S. or any of the foreign jurisdictions in which we operate;

Table of Contents

adverse changes in tax rates;
 adverse changes to the manner in which the U.S. taxes U.S.-based multinational companies or interprets its tax laws;
 legal or political constraints on our ability to maintain or increase prices;
 governmental restrictions on the transfer of funds to us from our operations outside the U.S.;
 burdens of complying with a wide variety of labor practices and foreign laws, including those relating to export and import duties, environmental policies and privacy issues;
 fluctuations in currency exchange rates, which could affect local payroll and other expenses;
 inability to utilize net operating losses incurred by our foreign operations against future income in the same jurisdiction; and
 economies that are emerging or developing, that may be subject to greater currency volatility, negative growth, high inflation, limited availability of foreign exchange and other risks.

These factors may harm our results of operations, and any measures that we may implement to reduce the effect of volatile currencies and other risks of our international operations may not be effective. In our experience, entry into new international markets requires considerable management time as well as start-up expenses for market development, hiring and establishing facilities before any significant revenue is generated. As a result, initial operations in a new market may operate at low margins or may be unprofitable. See Management's Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources.

Another significant legal risk resulting from our international operations is compliance with the U.S. Foreign Corrupt Practices Act (FCPA). In many foreign countries, particularly in those with developing economies, it may be a local custom that businesses operating in such countries engage in business practices that are prohibited by the FCPA or other U.S. laws and regulations. Although we have implemented policies and procedures designed to cause compliance with the FCPA and similar laws, there can be no assurance that all of our employees, and agents, as well as those companies to which we outsource certain of our business operations, will not take actions in violation of our policies. Any such violation, even if prohibited by our policies, could have a material adverse effect on our business.

If we do not manage our growth effectively, our profitability could decline.

Areas of our business at times experience periods of rapid growth which can place considerable additional demands upon our management team and our operational, financial and management information systems. Our ability to manage growth effectively requires us to continue to implement and improve these systems; avoid cost overruns; maintain customer, supplier and other favorable business relationships during possible transition periods; continue to develop the management skills of our managers and supervisors; and continue to train, motivate and manage our employees. Our failure to effectively manage growth could have a material adverse effect on our results of operations. See Management's Discussion and Analysis of Financial Condition and Results of Operations.

We have on occasion not achieved, and may not in the future achieve, expected profitability from our acquisitions.

We cannot assure you that we will be able to successfully integrate the operations and management of our recent acquisitions. Similarly, we cannot assure you that we will be able to (1) identify future strategic acquisitions, (2) consummate these potential acquisitions on favorable terms, if at all, or (3) if consummated, successfully integrate the operations and management of future acquisitions. Acquisitions involve significant risks, which could have a material adverse effect on us, including:

Financial risks, such as (1) the payment of a purchase price that exceeds the future value that we may realize from the acquired operations and businesses; (2) an increase in our expenses and working capital requirements, which could reduce our return on invested capital; (3) potential known and unknown liabilities of the acquired businesses; (4) costs associated with integrating acquired operations and businesses; (5) the dilutive effect of the issuance of any additional equity securities we issue as consideration for, or to finance, the acquisition; (6) the incurrence of additional debt; (7) the financial impact of incorrectly valuing goodwill and other intangible assets involved in any acquisitions, potential future impairment write-downs of goodwill and indefinite life intangibles and the amortization of other intangible assets; (8) possible adverse tax and accounting effects; and (9) the risk that we spend substantial amounts purchasing these manufacturing facilities and assume significant contractual and other obligations with no guaranteed levels of revenue or that we may

have to close or sell acquired facilities at our cost, which may include substantial employee severance costs and asset write-offs, which have resulted, and may result, in our incurring significant losses.

Operating risks, such as (1) the diversion of management's attention to the assimilation of the acquired businesses; (2) the risk that the acquired businesses will fail to maintain the quality of services that we have historically provided; (3) the need to implement financial and other systems and add management resources; (4) the need to maintain customer, supplier or other favorable business relationships of acquired operations and restructure or terminate unfavorable relationships;

Table of Contents

(5) the potential for deficiencies in internal controls of the acquired operations; (6) we may not be able to attract and retain the employees necessary to support the acquired businesses; (7) unforeseen difficulties (including any unanticipated liabilities) in the acquired operations; and (8) the impact on us of any unionized work force we may acquire or any labor disruptions that might occur.

Most of our acquisitions involve operations outside of the U.S. which are subject to various risks including those described in Risk Factors. We derive a majority of our revenue from our international operations, which may be subject to a number of risks and often require more management time and expense to achieve profitability than our domestic operations.

We have acquired and may continue to pursue the acquisition of manufacturing and supply chain management operations from our customers (or potential customers). In these acquisitions, the divesting company will typically enter into a supply arrangement with the acquirer. Therefore, our competitors often also pursue these acquisitions. In addition, certain divesting companies may choose not to offer to sell their operations to us because of our current supply arrangements with other companies or may require terms and conditions that may impact our profitability. If we are unable to attract and consummate some of these acquisition opportunities at favorable terms, our growth and profitability could be adversely impacted.

In addition to those risks listed above, arrangements entered into with these divesting companies typically involve certain other risks, including the following:

- the integration into our business of the acquired assets and facilities may be time-consuming and costly;
- we, rather than the divesting company, may bear the risk of excess capacity;
- we may not achieve anticipated cost reductions and efficiencies;
- we may be unable to meet the expectations of the divesting company as to volume, product quality, timeliness, pricing requirements and cost reductions; and
- if demand for the divesting company's products declines, it may reduce their volume of purchases and we may not be able to sufficiently reduce the expenses of operating the facility we acquired from them or use such facility to provide services to other customers.

In addition, when acquiring manufacturing operations, we may receive limited commitments to firm production schedules. Accordingly, in these circumstances, we may spend substantial amounts purchasing these manufacturing facilities and assume significant contractual and other obligations with no or insufficient guaranteed levels of revenue. We may also not achieve expected profitability from these arrangements. As a result of these and other risks, these outsourcing opportunities may not be profitable.

We have expanded the primary scope of our acquisitions strategy beyond acquiring the manufacturing assets of our customers and potential customers to include manufacturing service providers with business plans similar to ours and companies with certain key technologies and capabilities that complement and support our other current business activities. The amount and scope of the risks associated with acquisitions of this type extend beyond those that we have traditionally faced in making acquisitions. These extended risks include greater uncertainties in the financial benefits and potential liabilities associated with this expanded base of acquisitions.

We face risks arising from the restructuring of our operations.

Over the past few years, we have undertaken initiatives to restructure our business operations with the intention of improving utilization and realizing cost savings in the future. These initiatives have included changing the number and location of our production facilities, largely to align our capacity and infrastructure with current and anticipated customer demand. This alignment includes transferring programs from higher cost geographies to lower cost geographies. The process of restructuring entails, among other activities, moving production between facilities, closing facilities, reducing the level of staff, realigning our business processes and reorganizing our management.

We continuously evaluate our operations and cost structure relative to general economic conditions, market demands, cost competitiveness and our geographic footprint as it relates to our customers' production requirements. As a result of this ongoing evaluation, we initiated the 2006 Restructuring Plan and the 2009 Restructuring Plan. See

Management's Discussion and Analysis of Financial Condition and Results of Operations—Results of Operations Restructuring and Impairment Charges for further details. If we incur unexpected restructuring charges related to the 2006 Restructuring Plan, the 2009 Restructuring Plan, or both, or in connection with any potential future restructuring

program, our financial condition and results of operations may suffer. We expect that in the future we may continue to transfer certain of our operations to lower cost geographies, which may require us to take additional restructuring charges. We also may decide to transfer certain operations to other geographies based on changes in our customers requirements, the tax rates in the jurisdictions in which we operate or other factors. Restructurings present significant potential risks of events occurring that could adversely affect us, including a decrease in employee morale, delays encountered in finalizing the scope of, and implementing, the restructurings (including extensive consultations concerning potential workforce reductions, particularly in locations outside of the U.S.), the failure to achieve targeted cost savings and the failure to meet operational

Table of Contents

targets and customer requirements due to the loss of employees and any work stoppages that might occur. These risks are further complicated by our extensive international operations, which subject us to different legal and regulatory requirements that govern the extent and speed, of our ability to reduce our manufacturing capacity and workforce. In addition, the current global economic conditions may change how governments regulate restructuring as the recent global recession has impacted local economies. Finally, we may have to obtain agreements from our affected customers for the re-location of our facilities in certain instances. Obtaining these agreements, along with the volatility in our customers' demand, can further delay restructuring activities.

We may not be able to maintain our engineering, technological and manufacturing process expertise.

The markets for our manufacturing and engineering services are characterized by rapidly changing technology and evolving process development. The continued success of our business will depend upon our ability to:

- hire, retain and expand our qualified engineering and technical personnel;
- maintain technological leadership;
- develop and market manufacturing services that meet changing customer needs; and
- successfully anticipate or respond to technological changes in manufacturing processes on a cost-effective and timely basis.

Although we believe that our operations use the assembly and testing technologies, equipment and processes that are currently required by our customers, we cannot be certain that we will develop the capabilities required by our customers in the future. The emergence of new technology, industry standards or customer requirements may render our equipment, inventory or processes obsolete or noncompetitive. In addition, we may have to acquire new assembly and testing technologies and equipment to remain competitive. The acquisition and implementation of new technologies and equipment may require significant expense or capital investment, which could reduce our operating margins and our operating results. In facilities that we establish or acquire, we may not be able to maintain our engineering, technological and manufacturing process expertise. Our failure to anticipate and adapt to our customers' changing technological needs and requirements or to hire and retain a sufficient number of engineers and maintain our engineering, technological and manufacturing expertise, could have a material adverse effect on our business.

If our manufacturing processes and services do not comply with applicable statutory and regulatory requirements, or if we manufacture products containing design or manufacturing defects, demand for our services may decline and we may be subject to liability claims.

We manufacture and design products to our customers' specifications, and, in some cases, our manufacturing processes and facilities may need to comply with applicable statutory and regulatory requirements. For example, medical devices that we manufacture or design, as well as the facilities and manufacturing processes that we use to produce them, are regulated by the Food and Drug Administration and non-U.S. counterparts of this agency. Similarly, items we manufacture for customers in the defense and aerospace industries, as well as the processes we use to produce them, are regulated by the Department of Defense and the Federal Aviation Authority. In addition, our customers' products and the manufacturing processes that we use to produce them often are highly complex. As a result, products that we manufacture may at times contain manufacturing or design defects, and our manufacturing processes may be subject to errors or not be in compliance with applicable statutory and regulatory requirements. Defects in the products we manufacture or design, whether caused by a design, manufacturing or component failure or error, or deficiencies in our manufacturing processes, may result in delayed shipments to customers or reduced or canceled customer orders. If these defects or deficiencies are significant, our business reputation may also be damaged. The failure of the products that we manufacture or our manufacturing processes and facilities to comply with applicable statutory and regulatory requirements may subject us to legal fines or penalties and, in some cases, require us to shut down or incur considerable expense to correct a manufacturing process or facility. In addition, these defects may result in liability claims against us or expose us to liability to pay for the recall of a product. The magnitude of such claims may increase as we expand our medical and aerospace and defense manufacturing services, as defects in medical devices and aerospace and defense systems could seriously harm or kill users of these products and others. Even if our customers are responsible for the defects, they may not, or may not have resources to, assume responsibility for any costs or liabilities arising from these defects, which could expose us to additional liability claims.

Our regular manufacturing processes and services may result in exposure to intellectual property infringement and other claims.

Providing manufacturing services can expose us to potential claims that the product design or manufacturing processes infringe third party intellectual property rights. Even though many of our manufacturing services contracts generally require our customers to indemnify us for infringement claims relating to their products, including associated product specifications and designs, a particular customer may not, or may not have the resources to assume responsibility for such claims. In addition, we may be responsible for claims that our manufacturing processes or components used in manufacturing infringe third party intellectual property rights. Infringement claims could subject us to significant liability for damages, and potentially injunctive action, or hamper our normal

Table of Contents

operations such as by interfering with the availability of components and, regardless of merits, could be time-consuming and expensive to resolve.

Our design services and turnkey solutions offerings may result in additional exposure to product liability, intellectual property infringement and other claims, in addition to the business risk of being unable to produce the revenues necessary to profit from these services.

We continue our efforts to offer certain design services, primarily those relating to products that we manufacture for our customers, and we also continue to offer design services related to collaborative design manufacturing. We also offer turnkey solutions for the design and manufacture of end-user products and components as well as related services. Providing such products and services can expose us to different or greater potential liabilities than those we face when providing our regular manufacturing services, including an increase in exposure to potential product liability claims resulting from injuries caused by defects in products we design, as well as potential claims that products we design or process, or components we use, infringe third party intellectual property rights. Such claims could subject us to significant liability for damages, subject the infringing portion of our business to injunction and, regardless of their merits, could be time-consuming and expensive to resolve. We also may have greater potential exposure from warranty claims and from product recalls due to problems caused by product design. Costs associated with possible product liability claims, intellectual property infringement claims and product recalls could have a material adverse effect on our results of operations. When providing collaborative design manufacturing or turnkey solutions, we may not be guaranteed revenue needed to recoup or profit from the investment in the resources necessary to design and develop products or provide services. No revenue may be generated from these efforts, particularly if our customers do not approve the designs in a timely manner or at all, or if they do not then purchase anticipated levels of products. Furthermore, contracts may allow the customer to delay or cancel deliveries and may not obligate the customer to any volume of purchases, or may provide for penalties or cancellation of orders if we are late in delivering designs or products. We may also have the responsibility to ensure that products we design or offer satisfy safety and regulatory standards and to obtain any necessary certifications. Failure to timely obtain the necessary approvals or certifications could prevent us from selling these products, which in turn could harm our sales, profitability and reputation.

In our contracts with turnkey solutions customers, we generally provide them with a warranty against defects in our designs. If a turnkey solutions product or component that we design is found to be defective in its design, this may lead to increased warranty claims. Warranty claims may also extend to defects caused by components or materials used in the products but which are provided to us by our suppliers. Although we have product liability insurance coverage, it may not be available on acceptable terms, in sufficient amounts, or at all. A successful product liability claim in excess of our insurance coverage or any material claim for which insurance coverage was denied or limited and for which indemnification was not available could have a material adverse effect on our business, results of operations and financial condition. Moreover, even if the claim relates to a defect caused by a supplier, we may not be able to get an adequate remedy from the supplier.

The success of our turnkey solution activities depends in part on our ability to obtain, protect and leverage intellectual property rights to our designs.

We strive to obtain and protect certain intellectual property rights to our turnkey solutions designs. We believe that having a significant level of protected proprietary technology gives us a competitive advantage in marketing our services. However, we cannot be certain that the measures that we employ will result in protected intellectual property rights or will result in the prevention of unauthorized use of our technology. If we are unable to obtain and protect intellectual property rights embodied within our designs, this could reduce or eliminate the competitive advantages of our proprietary technology, which would harm our business.

Intellectual property infringement claims against our customers, our suppliers or us could harm our business.

Our turnkey solutions products and services and those of our customers may compete against the products of other companies, many of whom may own the intellectual property rights underlying those products. Such products and services may also infringe the intellectual property rights of third parties that may hold key intellectual property rights in areas in which we operate but which such third parties do not actively provide products or services. Patent clearance or licensing activities, if any, may be inadequate to anticipate and avoid third party claims. As a result, in addition to

the risk that we could become subject to claims of intellectual property infringement, our customers or suppliers could become subject to infringement claims. Additionally, customers for our turnkey solutions, or collaborative designs in which we have significant technology contributions, typically require that we indemnify them against the risk of intellectual property infringement. If any claims are brought against us or against our customers for such infringement, regardless of their merits, we could be required to expend significant resources in the defense or settlement of such claims, or in the defense or settlement of related indemnification claims from our customers. In the event of a claim, we may be required to spend a significant amount of money to develop non-infringing alternatives or obtain licenses. We may not be successful in developing such alternatives or obtaining such a license on reasonable terms or at all. Our customers may be required to or decide to discontinue products which are alleged to be infringing rather than face continued costs of defending the infringement claims, and such discontinuance may result in a significant decrease in our business.

Table of Contents

We depend on our officers, managers and skilled personnel.

Our success depends to a large extent upon the continued services of our executive officers and other skilled personnel. Generally our employees are not bound by employment or non-competition agreements, and we cannot assure you that we will retain our executive officers and other key employees. We could be seriously harmed by the loss of any of our executive officers. In order to manage our growth, we will need to internally develop and recruit and retain additional skilled management personnel and if we are not able to do so, our business and our ability to continue to grow could be harmed.

Any delay in the implementation of our information systems could disrupt our operations and cause unanticipated increases in our costs.

We have completed the installation of an Enterprise Resource Planning system in most of our manufacturing sites, excluding certain of the sites we acquired in the Taiwan Green Point Enterprises Co., Ltd. (Green Point) acquisition transaction, and in our corporate location. We are in the process of installing this system in certain of our remaining facilities, including additional Green Point sites, which will replace the current Manufacturing Resource Planning system, and financial information systems. Any delay in the implementation of these information systems could result in material adverse consequences, including disruption of operations, loss of information and unanticipated increases in costs.

Compliance or the failure to comply with current and future environmental, product stewardship and producer responsibility laws or regulations could cause us significant expense.

We are subject to a variety of federal, state, local and foreign environmental, product stewardship and producer responsibility laws and regulations, including those relating to the use, storage, discharge and disposal of hazardous chemicals used during our manufacturing process, those requiring design changes or conformity assessments or those relating to the recycling of products we manufacture. If we fail to comply with any present and future regulations, we could become subject to future liabilities, and we could face the suspension of production, or prohibitions on sales of products we manufacture. In addition, such regulations could restrict our ability to expand our facilities or could require us to acquire costly equipment, or to incur other significant expenses, including expenses associated with the recall of any non-compliant product or with changes in our procurement and inventory management activities.

Certain environmental laws impose liability for the costs of investigation, removal or remediation of hazardous or toxic substances on an owner, occupier or operator of real estate, even if such person or company was unaware of or not responsible for the presence of such substances. Soil and groundwater contamination may have occurred at some of our facilities. From time to time we investigate, remediate and monitor soil and groundwater contamination at certain of our operating sites. In certain instances where contamination existed prior to our ownership or occupation of a site, landlords or former owners have retained some contractual responsibility for contamination and remediation. However, failure of such persons to perform those obligations could result in us being required to remediate such contamination. As a result, we may incur clean-up costs in such potential removal or remediation efforts. In other instances, we may be solely responsible for clean-up costs associated with remediation efforts.

From time to time new regulations are enacted, or existing requirements are changed, and it is difficult to anticipate how such regulations and changes will be implemented and enforced. We continue to evaluate the necessary steps for compliance with regulations as they are enacted.

Over the last several years, we have become subject to certain legal requirements, principally in Europe, regarding the use of certain hazardous substances in, and the collection, reuse and recycling of waste from, certain products that use or generate electricity. Similar requirements are being developed or imposed in other areas of the world where we manufacture or sell products, including China and the U.S. We believe that we comply, and will be able to continue to comply, with such emerging requirements. We may experience negative consequences from these emerging requirements however, including, but not limited to, supply shortages or delays, increased raw material and component costs, accelerated obsolescence of certain of our raw materials, components and products and the need to modify or create new designs for our existing and future products.

Our failure to comply with any applicable regulatory requirements or with related contractual obligations could result in our being directly or indirectly liable for costs (including product recall and/or replacement costs), fines or penalties and third party claims, and could jeopardize our ability to conduct business in the jurisdictions implementing

them.

In addition, as global warming issues become more prevalent, the U.S. and foreign governments are beginning to respond to these issues. This increasing governmental focus on global warming may result in new environmental regulations that may negatively affect us, our suppliers and our customers. This could cause us to incur additional direct costs in complying with any new environmental regulations, as well as increased indirect costs resulting from our customers, suppliers or both incurring additional compliance costs that get passed on to us. These costs may adversely impact our operations and financial condition.

Table of Contents

We and our customers are increasingly concerned with environmental issues, such as waste management (including recycling) and climate change (including reducing carbon outputs). We expect these concerns to grow and require increased investments of time and resources.

We are subject to the risk of increased taxes.

We base our tax position upon the anticipated nature and conduct of our business and upon our understanding of the tax laws of the various countries in which we have assets or conduct activities. Our tax position, however, is subject to review and possible challenge by taxing authorities and to possible changes in law (including adverse changes to the manner in which the U.S. taxes U.S. based multinational companies). We cannot determine in advance the extent to which some jurisdictions may assess additional tax or interest and penalties on such additional taxes.

For example, during the third quarter of fiscal year 2010, the Internal Revenue Service (IRS) completed its field examination of our tax returns for the fiscal years 2003 through 2005 and issued a Revenue Agent's Report on April 30, 2010 proposing adjustments primarily related to: (1) certain costs that we treated as corporate expenses and that the IRS proposes be charged out to our foreign affiliates and (2) certain purported intangible values the IRS felt were transferred to certain of our foreign subsidiaries free of charge. If the IRS ultimately prevails in its positions, our additional income tax payment due for the fiscal years 2003 through 2005 would be approximately \$69.3 million before utilization of any tax attributes arising in periods subsequent to fiscal year 2005. In addition, the IRS will likely make similar claims in future audits with respect to these types of transactions (at this time, determination of the additional income tax due for these later years is not practicable). Also, the IRS has proposed interest and penalties with respect to fiscal years 2003 through 2005 and we anticipate the IRS may seek to impose interest and penalties in subsequent years with respect to the same types of issues. We disagree with the proposed adjustments and intend to vigorously contest this matter through applicable IRS and judicial procedures, as appropriate. While we currently believe that the resolution of these issues will not have a material effect on our financial position or liquidity, an unfavorable resolution, particularly if the IRS successfully asserts similar claims for later years, could have a material effect on our results of operations and financial condition (particularly in the quarter in which any adjustment is recorded or any tax is due or paid). For further discussion related to our income taxes, refer to Note 12 Income Taxes to the Condensed Consolidated Financial Statements, Management's Discussion and Analysis of Financial Condition and Results of Operations Critical Accounting Policies and Estimates Income Taxes and Note 4 Income Taxes to the Consolidated Financial Statements in our Annual Report on Form 10-K for the fiscal year ended August 31, 2010.

In addition, our effective tax rate may be increased by the generation of higher income in countries with higher tax rates, or changes in local tax rates. For example, China enacted a unified enterprise income tax law, effective January 1, 2008, which has resulted in a higher tax rate on operations in China as the rate increase is phased in over several years.

Several countries in which we are located allow for tax incentives to attract and retain business. We have obtained incentives where available and practicable. Our taxes could increase if certain tax incentives are retracted (which in some cases could occur if we fail to satisfy the conditions on which such incentives are based), or if they are not renewed upon expiration, or tax rates applicable to us in such jurisdictions are otherwise increased. It is anticipated that tax incentives with respect to certain operations will expire within the next year. However, due to the possibility of changes in existing tax law and our operations, we are unable to predict how these expirations will impact us in the future. In addition, acquisitions may cause our effective tax rate to increase, depending on the jurisdictions in which the acquired operations are located.

Our credit rating may be downgraded.

Our credit is rated by credit rating agencies. Our 7.750% Senior Notes, our 8.250% Senior Notes and our 5.625% Senior Notes are currently rated BBB- by Fitch Ratings (Fitch), Ba1 by Moody's and BB+ by S&P, and are considered to be below investment grade debt by Moody's and S&P and investment grade debt by Fitch. Any potential future negative change in our credit rating, may make it more expensive for us to raise additional capital in the future on terms that are acceptable to us, if at all; may negatively impact the price of our common stock; may increase our interest payments under existing debt agreements; and may have other negative implications on our business, many of which are beyond our control. In addition, as discussed in Management's Discussion and Analysis of Financial Condition and Results of Operations Liquidity and Capital Resources, the interest rate payable on the 8.250% Senior

Notes and under the Amended and Restated Credit Facility is subject to adjustment from time to time if our credit ratings change. Thus, any potential future negative change in our credit rating may increase the interest rate payable on the 8.250% Senior Notes, the Amended and Restated Credit Facility and certain of our other borrowings.

Our amount of debt could significantly increase in the future.

As of November 30, 2010, our debt obligations consisted of \$400.0 million under our 8.250% Senior Notes, \$312.0 million under our 7.750% Senior Notes and \$400.0 million under our 5.625% Senior Notes. As of November 30, 2010, there was \$198.9 million outstanding under various bank loans to certain of our foreign subsidiaries and under various other debt obligations. Refer to

Table of Contents

Management's Discussion and Analysis of Financial Condition and Results of Operations Liquidity and Capital Resources and Note 10 Notes Payable and Long-Term Debt to the Condensed Consolidated Financial Statements for further details.

As of the filing of this Quarterly Report, we have the ability to borrow up to \$1.0 billion under the Amended and Restated Credit Facility. In addition, the Amended and Restated Credit Facility contemplates a potential increase of the revolving credit portion of up to an additional \$300.0 million, if we and the lenders later agree to such increase. We could incur additional indebtedness in the future in the form of bank loans, notes or convertible securities.

Should we desire to consummate significant additional acquisition opportunities, undertake significant additional expansion activities or make substantial investments in our infrastructure, our capital needs would increase and could possibly result in our need to increase available borrowings under our revolving credit facilities or access public or private debt and equity markets. There can be no assurance, however, that we would be successful in raising additional debt or equity on terms that we would consider acceptable. An increase in the level of our indebtedness, among other things, could:

- make it difficult for us to obtain any necessary financing in the future for other acquisitions, working capital, capital expenditures, debt service requirements or other purposes;
- limit our flexibility in planning for, or reacting to changes in, our business;
- make us more vulnerable in the event of a downturn in our business; and
- impact certain financial covenants that we are subject to in connection with our debt and securitization programs, including, among others, the maximum ratio of debt to consolidated EBITDA (as defined in our debt agreements and securitization programs).

There can be no assurance that we will be able to meet future debt service obligations.

We are subject to risks of currency fluctuations and related hedging operations.

More than an insignificant portion of our business is conducted in currencies other than the U.S. dollar. Changes in exchange rates among other currencies and the U.S. dollar will affect our cost of sales, operating margins and net revenue. We cannot predict the impact of future exchange rate fluctuations. We use financial instruments, primarily forward contracts, to economically hedge U.S. dollar and other currency commitments arising from trade accounts receivable, trade accounts payable, fixed purchase obligations and other foreign currency obligations. Based on our calculations and current forecasts, we believe that our hedging activities enable us to largely protect ourselves from future exchange rate fluctuations. If, however, these hedging activities are not successful or if we change or reduce these hedging activities in the future, we may experience significant unexpected expenses from fluctuations in exchange rates.

An adverse change in the interest rates for our borrowings could adversely affect our financial condition.

We pay interest on outstanding borrowings under our revolving credit facilities and certain other long term debt obligations at interest rates that fluctuate based upon changes in various base interest rates. An adverse change in the base rates upon which our interest rates are determined could have a material adverse effect on our financial position, results of operations and cash flows.

We face certain risks in collecting our trade accounts receivable.

Most of our customer sales are paid for after the goods and services have been delivered. If any of our customers has any liquidity issues (the risk of which could be relatively high, relative to historical conditions, due to current economic conditions), then we could encounter delays or defaults in payments owed to us which could have a significant adverse impact on our financial condition and results of operations. For example, two of our customers each filed a petition in fiscal year 2009 for reorganization under bankruptcy law. We have analyzed our financial exposure resulting from both of these customers' bankruptcy filings and as a result have recorded an allowance for doubtful accounts based upon our anticipated exposure associated with these events. Our allowance for doubtful trade accounts receivable was \$7.5 million as of November 30, 2010 (which represented approximately 1% of our gross trade accounts receivable balance) and \$13.9 million as of August 31, 2010 (which represented approximately 1% of our gross trade accounts receivable balance).

Certain of our existing stockholders have significant control.

Edgar Filing: JABIL CIRCUIT INC - Form 10-Q

At November 30, 2010, our executive officers, directors and certain of their family members collectively beneficially owned 11.9% of our outstanding common stock, of which William D. Morean, our Chairman of the Board, beneficially owned 6.9%. As a result, our executive officers, directors and certain of their family members have significant influence over (1) the election of our Board of Directors, (2) the approval or disapproval of any other matters requiring stockholder approval and (3) the affairs and policies of Jabil.

Table of Contents

Our stock price may be volatile.

Our common stock is traded on the New York Stock Exchange (the "NYSE"). The market price of our common stock has fluctuated substantially in the past and could fluctuate substantially in the future, based on a variety of factors, including future announcements covering us or our key customers or competitors, government regulations, litigation, changes in earnings estimates by analysts, fluctuations in quarterly operating results, or general conditions in our industry and the aerospace, automotive, computing, consumer, defense, industrial, instrumentation, medical, networking, peripherals, solar, storage and telecommunications industries. Furthermore, stock prices for many companies and high technology companies in particular, fluctuate widely for reasons that may be unrelated to their operating results. Those fluctuations and general economic, political and market conditions, such as recessions or international currency fluctuations and demand for our services, may adversely affect the market price of our common stock.

Provisions in our charter documents and state law may make it harder for others to obtain control of us even though some shareholders might consider such a development to be favorable.

Our shareholder rights plan, provisions of our amended certificate of incorporation and the Delaware Corporation Laws may delay, inhibit or prevent someone from gaining control of us through a tender offer, business combination, proxy contest or some other method. These provisions may adversely impact our shareholders because they may decrease the possibility of a transaction in which our shareholders receive an amount of consideration in exchange for their shares that is at a significant premium to the then current market price of our shares. These provisions include:

- a poison pill shareholder rights plan;
- a restriction in our bylaws on the ability of shareholders to take action by less than unanimous written consent; and
- a statutory restriction on business combinations with some types of interested shareholders.

Changes in the securities laws and regulations have increased, and may continue to increase, our costs; and any future changes would likely increase our costs.

The Sarbanes-Oxley Act of 2002, as well as related rules promulgated by the SEC and the NYSE, required changes in some of our corporate governance, securities disclosure and compliance practices. Compliance with these rules has increased our legal and financial accounting costs for several years following the announcement and effectiveness of these new rules. While these costs are no longer increasing, they may in fact increase in the future. In addition, given the recent turmoil in the securities and credit markets, as well as the global economy, many U.S. and international governmental, regulatory and supervisory authorities including, but not limited to, the SEC and the NYSE, have recently enacted additional changes in their laws, regulations and rules (such as the recent Dodd-Frank Wall Street Reform and Consumer Protection Act) and may be contemplating additional changes. These changes, and any such future changes, may cause our legal and financial accounting costs to increase.

Due to inherent limitations, there can be no assurance that our system of disclosure and internal controls and procedures will be successful in preventing all errors or fraud, or in informing management of all material information in a timely manner.

Our management, including our CEO and CFO, does not expect that our disclosure controls and internal controls and procedures will prevent all error and all fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system reflects that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the company have been or will be detected. These inherent limitations include the realities that judgments in decision-making can be faulty and that breakdowns can occur simply because of error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the control.

The design of any system of controls also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions; over time, a control may become inadequate because of changes in conditions, or the degree of compliance with the policies or procedures may deteriorate. Because of the inherent limitations in a cost-effective

control system, misstatements due to error or fraud may occur and may not be detected.

If we receive other than an unqualified opinion on the adequacy of our internal control over financial reporting as of August 31, 2011 or any future year-ends, investors could lose confidence in the reliability of our financial statements, which could result in a decrease in the value of your shares.

Pursuant to Section 404 of the Sarbanes-Oxley Act of 2002, public companies are required to include an annual report on internal control over financial reporting in their annual reports on Form 10-K that contains an assessment by management of the effectiveness of the company's internal control over financial reporting. Our former independent registered public accounting firm,

Table of Contents

KPMG LLP, issued an unqualified opinion on the effectiveness of our internal control over financial reporting as of August 31, 2010. While we continuously conduct a rigorous review of our internal control over financial reporting in order to assure compliance with the Section 404 requirements, if our independent registered public accounting firm interprets the Section 404 requirements and the related rules and regulations differently from us or if our independent registered public accounting firm is not satisfied with our internal control over financial reporting or with the level at which it is documented, operated or reviewed, they may issue an adverse opinion. An adverse opinion could result in an adverse reaction in the financial markets due to a loss of confidence in the reliability of our Consolidated Financial Statements.

In addition, we have spent a significant amount of resources in complying with Section 404's requirements. For the foreseeable future, we will likely continue to spend substantial amounts complying with Section 404's requirements, as well as improving and enhancing our internal control over financial reporting.

There are inherent uncertainties involved in estimates, judgments and assumptions used in the preparation of financial statements in accordance with U.S. generally accepted accounting principles (U.S. GAAP). Any changes in U.S. GAAP or in estimates, judgments and assumptions could have a material adverse effect on our business, financial position and results of operations.

The Condensed Consolidated Financial Statements included in the periodic reports we file with the SEC are prepared in accordance with U.S. GAAP. The preparation of financial statements in accordance with U.S. GAAP involves making estimates, judgments and assumptions that affect reported amounts of assets, liabilities and related reserves, revenues, expenses and income. Estimates, judgments and assumptions are inherently subject to change in the future, and any such changes could result in corresponding changes to the amounts of assets, liabilities and related reserves, revenues, expenses and income. Any such changes could have a material adverse effect on our financial position and results of operations. In addition, the principles of U.S. GAAP are subject to interpretation by the Financial Accounting Standards Board, the American Institute of Certified Public Accountants, the SEC and various bodies formed to create appropriate accounting policies, and interpret such policies. A change in those policies can have a significant effect on our accounting methods. For example, although not yet currently required, the SEC could require us to adopt the International Financial Reporting Standards in the next few years, which could have a significant effect on certain of our accounting methods.

We are subject to risks associated with natural disasters and global events.

Our operations may be subject to natural disasters or other business disruptions, which could seriously harm our results of operation and increase our costs and expenses. We are susceptible to losses and interruptions caused by hurricanes (including in Florida, where our headquarters are located), earthquakes, power shortages, telecommunications failures, water shortages, tsunamis, floods, typhoons, fire, extreme weather conditions, geopolitical events such as terrorist acts or widespread criminal activities and other natural or manmade disasters. Our insurance coverage with respect to natural disasters is limited and is subject to deductibles and coverage limits. Such coverage may not be adequate, or may not continue to be available at commercially reasonable rates and terms.

Energy price increases may negatively impact our results of operations.

Certain of the components that we use in our manufacturing activities are petroleum-based. In addition, we, along with our suppliers and customers, rely on various energy sources (including oil) in our transportation activities. While significant uncertainty currently exists about the future levels of energy prices, a significant increase is possible. Increased energy prices could cause an increase to our raw material costs and transportation costs. In addition, increased transportation costs of certain of our suppliers and customers could be passed along to us. We may not be able to increase our product prices enough to offset these increased costs. In addition, any increase in our product prices may reduce our future customer orders and profitability.

Item 2: UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

The following table provides information relating to the Company's repurchase of common stock for the first quarter of fiscal year 2011.

Approximate

Period		Total Number of Shares Purchased (1)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Program	Dollar Value of Shares that May Yet Be Purchased Under the Program
September 1, 2010	September 30, 2010		\$		
October 1, 2010	October 31, 2010	674,898	\$ 14.27		
November 1, 2010	November 30, 2010		\$		
Total		674,898	\$ 14.27		

- (1) The number of shares reported above as purchased are attributable to shares surrendered to us by employees in payment of the exercise price related to Option exercises or minimum tax obligations related to vesting of restricted shares.
