International Game Technology

(Exact name of registrant as specified in its charter)

Nevada

(State of Incorporation)

88-0173041

(I.R.S. Employer Identification No.)

9295 Prototype Drive

Reno, Nevada 89521

(Address of principal executive offices)

(775) 448-7777

(Registrant's telephone number, including area code)

www.IGT.com

(Registrant's website)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of "accelerated filer and large accelerated filer" in Rule 12b-2 of the Exchange Act:

Large accelerated filer ☐ Accelerated filer ☐ Non-accelerated filer ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes ☐ No ☒

The number of shares outstanding of each of the registrant's classes of common stock, as of May 3, 2007:

332,441,945 shares of common stock at \$.00015625 par value

Table of Contents**NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS****1. Summary of Significant Accounting Policies****Basis of Presentation and Consolidation**

Our fiscal accounting periods end on the Saturday nearest the last day of the quarter end month. For simplicity, we present all fiscal period endings as the calendar month end date. Accordingly, this report presents the following periods:

	Period End	
	Actual	Presented as
Current quarter	March 31, 2007	March 31, 2007
Prior year quarter	April 1, 2006	March 31, 2006
Prior fiscal year end	September 30, 2006	September 30, 2006

We prepare our consolidated financial statements in accordance with SEC requirements and include all adjustments of a normal recurring nature that are necessary to fairly present consolidated results of operations, financial position, and cash flows for all periods presented. Interim period results are not necessarily indicative of full year results. This quarterly report should be read in conjunction with our most recent Annual Report on Form 10-K.

Our consolidated financial statements include the accounts of International Game Technology and all majority-owned or controlled subsidiaries and variable interest entities for which we are the primary beneficiary. All appropriate inter-company accounts and transactions are eliminated. For investments in unconsolidated affiliates where we exercise significant influence, we use the equity method of accounting.

Unconsolidated Affiliate

In February 2006, IGT paid \$56.0 million for a 10% equity interest in Casino IP Holdings, LLC (LLC), a variable interest entity formed to hold, develop, and license Walker Digital's intellectual property identified for gambling use. IGT agreed to cooperatively develop and market products expected to be integral to our operations, using certain LLC innovations. We are not the primary beneficiary of the LLC and apply the equity method of accounting. Our net investment in the LLC of \$50.3 million is included in other non-current assets and represents our maximum exposure to loss at March 31, 2007. We recognized a loss of \$2.5 million for the six months ended March 31, 2007, primarily related to the amortization of intangibles. As the loss is not material to our financial statements, it is presented as a component of SG&A expense.

Consolidated WAP Trust VIEs

We initially consolidated our WAP trusts in Iowa and NJ beginning March 31, 2004 under FIN 46 (revised December 2003), *Consolidation of Variable Interest Entities*. Prior to consolidation, we recognized revenues from the trusts based on contractual fee arrangements. Consolidated trust assets equal liabilities and relate primarily to jackpot funding. These VIE trust consolidations increase gaming operations revenues and costs by approximately the same amount, resulting in no material impact to gross profit or net income.

In November 2005, IGT assumed direct responsibility for current and future NJ WAP jackpot system operations previously under the control of a third party trust administrator. At that time, IGT was relieved of its contractual guarantee obligation related to the third party administration of past winner payments. Accordingly, we ceased to consolidate approximately \$139.2 million of NJ VIE assets and liabilities related to past winners during the first quarter of fiscal 2006.

In November 2006, IGT executed an agreement with casino trustees to assume responsibility for and administration of the NJ past winner payments formerly under the control of a third party administrator. The resulting reconsolidation of these VIE past winner trusts initially added assets and equivalent liabilities of \$122.8 million. Consolidated Iowa and NJ VIE trust assets and equivalent liabilities totaled \$121.6 million at March 31, 2007 and \$4.1 million at September 30, 2006. Consolidated VIE trust revenues for the six months ended March 31, 2007 and 2006 comprised less than 0.1% of total revenues.

Table of Contents*Hurricane Damage*

We suffered damages and losses to our US Gulf Coast operations from the hurricanes in August and September 2005, primarily affecting gaming operations machines destroyed or temporarily shutdown. In March 2007, we negotiated a final insurance settlement totaling \$18.0 million, recovering \$6.0 million for gaming operations equipment damages and \$12.0 million for business interruption. We received a final payment of \$13.0 million, net of a \$5.0 million advance previously received in our fiscal 2006 fourth quarter. We recorded a property insurance gain of \$5.0 million to cost of gaming operations, net of \$1.0 million in insurance receivables previously accrued, and a \$12.0 million business insurance gain included in SG&A.

Recently Issued Accounting Standards*SFAS 159*

In February 2007, the FASB issued SFAS 159, *The Fair Value Option for Financial Assets and Financial Liabilities*, permitting entities to elect fair value measurement for many financial instruments and certain other items. Unrealized gains and losses on designated items will be recognized in earnings at each subsequent period. SFAS 159 also establishes presentation and disclosure requirements for similar types of assets and liabilities measured at fair value. This statement is effective for us beginning in October 2008. We are evaluating the potential impact of adopting this statement that will depend on the nature and extent of eligible items elected for fair value measurement.

SFAS 157

In September 2006, the FASB issued SFAS 157, *Fair Value Measurements*, which defines fair value, establishes a framework for measuring fair value in GAAP, and expands disclosures about fair value measurements. SFAS 157 does not require any new fair value measurements, but provides guidance on how to measure fair value by providing a fair value hierarchy used to classify the source of the information. This statement is effective for us beginning in October 2008. We are evaluating whether adoption of this statement will result in changes to our fair value measurements.

SAB 108

In September 2006, the SEC issued SAB 108, *Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements*. SAB 108 requires analysis of misstatements using both an income statement (rollover) approach and a balance sheet (iron curtain) approach in assessing materiality and provides for a one-time cumulative effect transition adjustment effective for our fiscal year ending September 30, 2007. We do not expect the adoption of this statement to have a material impact on our results of operations, financial position or cash flows.

FIN 48

In June 2006, the FASB issued FIN 48, *Accounting for Uncertainty in Income Taxes-an interpretation of FASB Statement No. 109*. FIN 48 clarifies the accounting for uncertainty in income taxes by defining criteria that a tax position on an individual matter must meet before that position is recognized in the financial statements. Additionally, FIN 48 provides guidance on measurement, derecognition, classification, interest and penalties, interim period accounting, disclosures and transition. This interpretation is effective for us beginning in October 2007. We are evaluating the potential impact of adopting this interpretation on our future results of operations, financial position or cash flows.

2. Balance Sheet Components*Inventories*

	March 31, 2007	September 30, 2006
<i>(In millions)</i>		
Raw materials	\$ 87.5	\$ 79.9
Work-in-process	5.7	4.6
Finished goods	65.3	77.6

Total inventories	\$	158.5	\$	162.1

Total	1,176.2	1,039.5
Less accumulated depreciation	(645.4)	(569.7)
Property, plant and equipment, net	\$ 530.8	\$ 469.8

Construction in process includes \$101.0 million at March 31, 2007 and \$57.7 million at September 30, 2006 related to our new facilities under construction in Las Vegas.

In March 2007, IGT sold a company airplane for \$7.8 million to a limited liability company owned by Chuck Mathewson, a former director and executive officer of IGT, and the father of Robert Mathewson, a current IGT director. Robert Mathewson has no interest in the limited liability company or in the airplane itself. IGT recognized a \$5.8 million gain on sale, less \$1.3 million in repairs and maintenance required as a condition of the sale, for a realized net benefit of \$4.5 million.

3. Share-based Compensation

Shares available for grant under the IGT Stock Incentive Plan totaled 10.8 million at March 31, 2007 and unrecognized share-based compensation costs totaled \$88.2 million with an expected weighted average life of 2.1 years. SIP grants in fiscal 2007 began vesting ratably over four years and activity is reflected below as of and for the six months ended March 31, 2007.

Options	Shares	Exercise Price	Weighted Average Remaining Contractual Term	Aggregate Intrinsic Value

Forfeited	(14)	36.20		
Outstanding at end of period	1,797	\$ 35.17	3.6	\$ 72.6

Table of Contents**4. Acquisitions**

On December 21, 2006, we purchased Venture Catalyst Incorporated (VCAT), with the Mariposa suite of gaming software products for \$21.8 million. We anticipate the Mariposa casino systems applications for customer relationship management will enhance our server-based initiatives. We are not providing pro forma financial information for this acquisition, as it was not material to our consolidated results. At March 31, 2007, the business valuation is not yet complete and we preliminarily allocated the purchase price to:

- ♠ tangible assets of \$6.5 million, including cash of \$3.5 million
- ♠ identifiable intangibles of \$8.4 million
- ♠ in-process R&D of \$0.1 million with no future alternative use, immediately charged to R&D expense
- ♠ goodwill of \$9.6 million, not deductible for tax purposes
- ♠ liabilities of \$2.8 million

5. Allowances for Receivables

	March 31, 2007	September 30, 2006
<i>(In millions)</i>		
Allowance for doubtful accounts	\$ 15.9	\$ 18.2
Allowance for doubtful notes and contracts		
Current	\$ 18.3	\$ 21.5
Long-term	16.3	17.5
	\$ 34.6	\$ 39.0

6. Concentrations of Credit Risk

Financial instruments that potentially subject us to concentrations of credit risk consist principally of cash or equivalents, short-term investments, and receivables. We place short-term investments in high credit quality financial institutions or in short duration high quality securities. With the exception of US Government and Agency securities, our investment policy limits the amount of credit exposure in any one financial institution, industry group or type of investment. Cash on deposit may be in excess of Federal Deposit Insurance Corporation limits.

Our revenues and resulting receivables are concentrated in specific legalized gaming regions as follows at March 31, 2007:

- ♠ North America: Nevada 20%, California 11%, Oklahoma 6%, jurisdictions under 5% individually 41%
- ♠ International: Europe 10%, Latin America 5%, jurisdictions under 5% individually 7%

Subsequent to March 31, 2007, IGT agreed to provide up to \$120.0 million in equipment notes and development financing loans to gaming operators in Argentina. We also committed to fund approximately \$103.0 million in equity investments and convertible notes in a strategic business partner for expansion in the Chinese video lottery market, subject to customary closing conditions.

Table of Contents**7. Goodwill and Other Intangibles*****Goodwill***

In accordance with EITF 00-23, *Issues Related to the Accounting for Stock Compensation under APB 25 and FIN 44*, goodwill was adjusted for the tax benefit of Anchor options exercised subsequent to acquisition.

<i>(In millions)</i>		
Senior credit facility	\$ 200.0	\$ 200.0
Foreign credit facilities		21.3
1.75% Convertible Debentures, net of unamortized discount		611.1
2.6% Convertible Debentures	900.0	
Total notes payable, net	\$ 1,100.0	\$ 832.4

We continue to be in compliance with all applicable covenants at March 31, 2007.

Senior Credit Facility

Borrowings outstanding under our unsecured \$2.5 billion revolving line of credit totaled \$200.0 million at March 31, 2007, with \$4.1 million reserved for letters of credit. Interest rates and facility fees applicable to the credit facility may fluctuate based on our public credit ratings and/or debt to capitalization ratio. At March 31, 2007, the interest rate was LIBOR plus 37.5 bps or 5.72% with a facility fee of 12.5 bps.

Foreign Credit Facilities

Our available foreign credit facilities totaled \$101.6 million with a weighted average interest rate of 1.9% at March 31, 2007. Renewals on these facilities occur annually.

New 2.6% Senior Convertible Debentures

On December 20, 2006, we issued \$900.0 million principal amount of 2.6% Senior Convertible Debentures due December 15, 2036 in a private placement. We will pay interest on the Debentures semiannually on June 15 and December 15 of each year, beginning June 15, 2007.

We may also pay contingent interest for the period commencing December 20, 2009 through June 14, 2010 and any six month period thereafter, if the average trading price (as defined in the indenture) per \$1,000 Debenture for the five trading day measurement period ending on the third trading day immediately preceding the first day of the interest period equals 120% or more of an equal principal amount of Debentures. The amount of contingent interest will equal 0.25% per annum of the average trading price per \$1,000 Debenture during the five trading day measurement period used to determine whether contingent interest must be paid.

Under certain circumstances, each \$1,000 Debenture will initially be convertible into 16.1875 shares of IGT Common Stock, representing a stock price of \$61.78 or a 35% conversion premium over the market price at issuance. Upon conversion, for each \$1,000 Debenture, a holder will receive cash up to \$1,000 and shares for any excess conversion value determined in a manner set forth in the indenture. We will adjust the conversion rate upon the occurrence of certain events as defined in the indenture.

The Debentures are convertible under any of the following circumstances:

- ♠ during any fiscal quarter ending after March 31, 2007 if the closing price of our common stock is more than 130% of the conversion price during any measurement period of the preceding fiscal quarter
- ♠ if the Debentures are called for redemption
- ♠ if specified corporate transactions occur
- ♠ during the last three months prior to maturity

IGT may redeem some or all of the Debentures for cash on or after December 20, 2009, at 100% of their principal amount plus accrued and unpaid interest, if any. If IGT redeems the Debentures, holders will be notified at least 15 days, but not more than 60 days, prior to the redemption date. Holders have the right to require IGT to redeem the

Debentures for cash at 100% of their principal amount plus accrued and unpaid interest, if any, on December 15, 2009, 2011, 2016, 2021, 2026 and 2031.

Under the Debenture Registration Rights Agreement, we agreed to file and keep effective a shelf registration statement covering the resale of the Debentures and underlying common stock issuable upon conversion for specified periods. Our registration statement on Form S-3 became effective on March 9, 2007. If we fail to maintain an effective registration statement for the time periods specified, subject to permitted exceptions, we will be required to pay additional interest as liquidated damages ranging from 0.25% to 0.50% of the principal amount to Debenture holders until any default under the Registration Rights Agreement is cured.

Table of Contents

In evaluating all features of our 2.6% Debentures for SFAS 133 embedded derivatives, we determined the contingent interest feature represents an embedded derivative requiring bifurcation as it is based on the market price of the debentures. The value of this derivative was nominal at issuance and March 31, 2007, as such, we recorded no related derivative asset or liability at March 31, 2007. Any derivative value would be recorded as a liability and adjusted through interest expense for changes in fair value.

Old 1.75% Zero-Coupon Debentures

On December 26, 2006, our outstanding 1.75% Debentures were called for redemption. The call of the Debentures gave holders the right to convert their Debentures before January 10, 2007, and receive aggregate consideration comprised of shares and cash under the terms of the applicable indentures. In conjunction with the redemption and related conversions, we paid holders \$612.7 million, issued 7.3 million shares and recorded a deferred tax adjustment to APIC for \$47.3 million.

9. Earnings Per Share Reconciliation

	Quarters Ended March 31,		Six Months Ended March 31,

1.7 7.6 1.6 9.2

We repurchased 3.5 million additional shares or 1% of outstanding shares between March 31, 2007 and May 3, 2007.

10. Income Taxes

Our provision for income taxes is based on estimated effective annual income tax rates. The provision differs from income taxes currently payable because certain items of income and expense are recognized in different periods for financial statement purposes than for tax return purposes. We reduce deferred tax assets by a valuation allowance when it is more likely than not that some or all of the deferred tax assets will not be realized.

Table of Contents**12. Contingencies****Litigation**

IGT has been named in and has brought lawsuits in the normal course of business. We do not expect the outcome of these suits, including the lawsuits described below, to have a material adverse effect on our financial position or results of future operations.

Bally

On December 7, 2004, IGT filed a complaint in US District Court for the District of Nevada, alleging that defendants Alliance Gaming Corp., Bally Gaming Int'l, Inc., and Bally Gaming, Inc. infringed six US patents held by IGT, US Patent numbers 6,827,646; 5,848,932; 5,788,573; 5,722,891; 6,712,698 and 6,722,985. On January 21, 2005, defendants filed an answer denying the allegations in the complaint and raising various affirmative defenses to IGT's asserted claims. Defendants also asserted fourteen counterclaims against IGT, including counterclaims for a declaratory judgment of non-infringement, invalidity and unenforceability of the asserted patents, and for antitrust violations and intentional interference with prospective business advantage. IGT has successfully moved for partial summary judgment on defendants' counterclaims for intentional interference with prospective business advantage and defendants' antitrust allegations related to the gaming machine market. IGT denies the remaining allegations, and discovery is ongoing.

On April 28, 2006, IGT filed a complaint in US District Court for the District of Delaware, alleging that defendants Bally Technologies, Inc., Bally Gaming Int'l, Inc., and Bally Gaming, Inc. infringed nine US patents held by IGT, US Patent numbers RE 38,812; RE 37,885; 6,832,958; 6,319,125; 6,244,958; 6,431,983; 6,607,441; 6,565,434; and 6,620,046. The complaint alleges that the BALLY POWER BONUSING technology infringes one or more of the claims of the asserted IGT patents. The lawsuit seeks monetary damages and an injunction. On June 30, 2006, defendants filed an answer denying the allegations in the complaint and raising various affirmative defenses to IGT's asserted claims. Defendants also asserted twelve counterclaims against IGT, including counterclaims for a declaratory judgment of non-infringement, invalidity, unenforceability of the asserted patents, antitrust violations, unfair competition, and intentional interference with prospective business advantage. IGT denies these allegations, and discovery is ongoing.

On September 5, 2006, Bally Gaming, Inc. filed a complaint in US District Court for the District of Nevada alleging that IGT is infringing US Patent No. 7,100,916, entitled Indicator Wheel System. The products named in the complaint are IGT's gaming machines with wheel features, including, without limitation, *Wheel of Fortune*, *Wheel of Gold*, *The Addams Family*, *American Bandstand*, *The Apprentice*, *Dilbert Wheelbert*, *Drew Carey Great Balls of Cash*, *Elvis*, *I Dream of Jeannie*, *I Love Lucy*, *Indiana Jones: Raiders of the Lost Ark*, *M*A*S*H**, *Megabucks with Morgan Fairchild*, *Regis On the Town*, *Sinatra* and *The Twilight Zone* gaming machines. The lawsuit seeks unspecified monetary damages and an injunction. On October 6, 2006, IGT filed an answer and counterclaims denying infringement and seeking a declaration that the patent is invalid and non-infringed. IGT intends to vigorously defend this lawsuit. Discovery is ongoing.

Aristocrat

On June 30, 2005, Aristocrat Technologies Australia PTY Ltd. filed a patent infringement lawsuit against IGT. The Complaint was served on IGT on December 13, 2005. Aristocrat alleges that IGT has willfully infringed US Patent No. 6,093,102. Aristocrat contends that the patent covers its Reel Power® video slot technology and IGT's *Multiway* video slot games. The lawsuit seeks unspecified damages and an injunction. On January 13, 2006, Aristocrat filed a First Amended Complaint adding Aristocrat Technologies, Inc. as a plaintiff. On January 19, 2006, IGT filed its Answer to the First Amended Complaint. On April 20, 2007, the US District Court for the District of Nevada entered an order granting summary judgment in favor of IGT and declaring the Aristocrat patent invalid. Summary judgment was entered for IGT on April 23, 2007. On May 1, 2007, Aristocrat requested the US Court alter or amend the summary judgment to make finality clear so that Aristocrat can appeal the decision to the US Court of Appeals for the Federal Circuit.

On June 12, 2006, Aristocrat Technologies Australia PTY Ltd. and Aristocrat Technologies, Inc. filed a patent infringement lawsuit against IGT. Aristocrat alleges that IGT has willfully infringed US Patent No. 7,056,215, which issued on June 6, 2006. The IGT products named in the complaint are the *Fort Knox*® mystery progressive slot

machines. IGT believes that the patent is invalid and not infringed and intends to vigorously defend the lawsuit.

Brochu v. Loto Quebec

Loto Quebec commenced an action in warranty against VLC, Inc., a wholly-owned subsidiary of IGT, and another manufacturer of video lottery machines in October 2003, in the Superior Court of the Province of Quebec, District of Quebec, seeking indemnification for any damages that may be awarded against Loto Quebec in a class action suit, also filed in the Superior Court of the Province of Quebec. The class action claim

Table of Contents

against Loto Quebec, to which neither IGT nor any of its affiliates are parties, was filed by Jean Brochu on behalf of himself and a class of other persons who allegedly developed pathological behaviors through the play of video lottery machines made available by Loto Quebec in taverns and other public locations. In this action, plaintiff seeks to recover on behalf of the class damages of approximately CAD\$578.7 million, representing CAD\$4,863 per class member, and CAD\$119.0 million in punitive damages. Loto Quebec filed its Plea in Defense in the main action in February 2006. The Court scheduled trial of the entire action against Loto Quebec to commence later in 2007.

Environmental Matters

CCSC, a casino operation sold by IGT in April 2003, is located in an area that has been designated by the EPA as an active superfund site because of contamination from historic mining activity in the area. In order for Anchor Coin, an entity we acquired in December 2001, to develop the CCSC site, it voluntarily entered into an administrative order on consent with the EPA to conduct soil removal and analysis (a requirement imposed on similarly situated property developers within the region) in conjunction with re-routing mine drainage. The work and obligations contemplated by the agreement were completed by Anchor in June 1998, and the EPA subsequently issued a termination of the order.

The EPA, together with other property developers excluding the CCSC, continue remediation activities at the site. While we believe our remediation obligations are complete, it is possible that additional contamination may be identified and we could be obligated to participate in remediation efforts. Under the guidance in Statement of Position 96-1, *Environmental Remediation Liabilities*, we determined the incurrence of additional remediation costs is neither probable nor reasonably estimable and no liability is recorded at this time.

Miller

In June 2003, a class action lawsuit was filed in Clark County, Nevada, District Court against Acres and its directors, entitled Paul Miller v. Acres Gaming Incorporated, et al. The complaint alleged that Acres directors breached their fiduciary duties to their stockholders in connection with the approval of the merger transaction between Acres and IGT and sought to enjoin and/or void the merger agreement among other forms of relief. On September 19, 2003, the Court denied plaintiff's motion for a TRO to prevent Acres stockholders from voting on the merger. On September 24, 2003, plaintiff petitioned the Nevada Supreme Court to vacate the denial of the TRO and to enjoin Acres from holding its stockholder vote on the merger. The Nevada Supreme Court denied the petition on September 25, 2003.

On November 5, 2003, the plaintiff amended his complaint to recover damages. On December 23, 2003, defendants filed a motion to dismiss plaintiff's second amended complaint for failure to state a claim on which relief may be granted. On May 7, 2004, the Court issued an order denying defendants' motion to dismiss.

Pursuant to stipulation of the parties, plaintiff filed a third amended complaint on September 9, 2004. Defendants filed a motion to dismiss the third amended complaint on September 14, 2004. On March 15, 2006, the Court issued an order denying defendants' motion to dismiss the third complaint. On April 7, 2006, defendant filed a Notice of Removal to United States District Court, D. Nev. (Las Vegas). Plaintiff filed a motion to remand the action to state court, which was granted by order dated August 15, 2006. On November 30, 2006, the case was transferred to business court and discovery continues.

OSHA / Wrongful Termination Matter

On July 8, 2004, two former employees filed a complaint with the US Department of Labor, OSHA, alleging retaliatory termination in violation of the Sarbanes-Oxley Act of 2002. The former employees allege that they were terminated in retaliation for questioning whether Anchor and its executives failed to properly disclose information allegedly affecting the value of Anchor's patents in connection with IGT's acquisition of Anchor in 2001. The former employees also allege that the acquired patents are overvalued on the financial statements of IGT. Outside counsel, retained by an independent committee of our Board of Directors, reviewed the allegations and found them to be entirely without merit.

On November 10, 2004, the employees withdrew their complaint filed with OSHA and filed a notice of intent to file a complaint in federal court. On December 1, 2004, a complaint was filed under seal in the US District Court for Nevada, based on the same facts set forth above regarding their OSHA complaint. IGT filed a motion for summary judgment as to all claims in plaintiffs' complaint, which is currently pending before the US District Court, D. Nev. (Reno). IGT believes that the allegations are without merit and intends to vigorously defend this matter.

Related to the Anchor acquisition purchase price allocation as of December 31, 2001, IGT used the relief of royalty valuation methodology to estimate the fair value of the patents at \$164.4 million. The carrying value of the patents at March 31, 2007 totaled \$88.5 million, with a remaining life of approximately 9 years.

Table of Contents**Arrangements with Off-Balance Sheet Risks**

In the normal course of business, we are party to financial instruments with off-balance sheet risk, such as performance bonds, guarantees and product warranties not reflected in our balance sheet. We do not expect any material losses to result from these arrangements, and we are not dependent on off-balance sheet financing arrangements to fund our operations.

Performance Bonds

Performance bonds outstanding related to gaming operations totaled \$28.7 million at March 31, 2007. We are liable to reimburse the bond issuer in the event of exercise due to nonperformance.

Letters of Credit

Outstanding letters of credit issued under our line of credit to ensure payment to certain vendors and governmental agencies totaled \$4.1 million at March 31, 2007.

IGT Licensor Arrangements

Our sales agreements that include software and intellectual property licensing arrangements may provide a clause whereby IGT indemnifies the third party licensee against liability and damages (including legal defense costs) arising from any claims of patent, copyright, trademark or trade secret infringement. Should such a claim occur, we could be required to make payments to the licensee for any liabilities or damages incurred. Historically, we have not incurred any significant costs due to infringement claims. As we consider the likelihood of incurring future costs to be remote, no liability has been recorded.

Product Warranties

Our warranty costs in the table below are accrued based on historical trends in product failure rates and expected costs to provide warranty services. The majority of our products are generally covered by a warranty for periods ranging from 90 days to one year.

Six months ended March 31, <i>(In millions)</i>	2007	2006
Balance at beginning of year	\$ 8.3	\$ 6.0
Reduction for payments made	(3.4)	(2.7)
Accrual for new warranties issued	5.1	6.6
Adjustments for pre-existing warranties	(1.3)	(0.4)
Balance at end of period	\$ 8.7	\$ 9.5

Self-Insurance

We are self-insured for various levels of workers' compensation, directors' and officers' liability, and electronic errors and omissions liability, as well as employee medical, dental, prescription drug, and disability coverage. We purchase stop loss coverage to protect against unexpected claims. Accrued insurance claims and reserves include estimated settlements for known claims, and actuarial estimates of claims incurred but not reported.

State and Federal Taxes

We are subject to sales, use, income and other tax audits and administrative proceedings in various federal, state, and local jurisdictions. While we believe we have properly reported our tax liabilities in each jurisdiction, we can give no assurance that taxing authorities will not propose adjustments that increase our tax liabilities.

13. Foreign Currency Derivatives

Our net foreign currency exposure related to monetary assets and liabilities totaled \$75.2 million at March 31, 2007 and \$151.0 million at September 30, 2006. The fair value of foreign currency contracts hedging this exposure totaled \$70.5 million at March 31, 2007 and \$148.7 million at September 30, 2006. These forward exchange contracts are not designated as hedging instruments under SFAS 133 and resulting gains or losses are recognized in current earnings. The change in exposure relates to the reduction in inter-company loans denominated in nonfunctional foreign currency of our operations.

Table of Contents**14. Business Segments**

We view our business in two regional operating segments, each incorporating all types of revenues:

♠ North America consists of our operations in the US and Canada.

♠ International encompasses our efforts in Asia, Australia, New Zealand, Europe, Japan, Latin America, Russia, Africa, and the UK.

Additionally, certain income and expense is managed at the corporate level and not allocated to any operating segment. We do not recognize inter-company revenues or expenses upon the transfer of gaming products between our operating segments. Segment profit reflects income before tax.

Our business segments are designed to allocate resources within a framework of management responsibility. We continually evaluate the alignment of our business development and administrative functions for reporting purposes, which may result in changes to segment allocations. Prior year amounts are reclassified to conform to the current management view and presentation.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations
FORWARD LOOKING STATEMENTS

This Quarterly Report on Form 10-Q contains statements which do not relate to historical or current facts, but are forward looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. These statements relate to analyses and other information based on forecasts of future results and estimates of amounts not yet determinable. These statements may also relate to future events or trends, our future prospects and proposed new products, services, developments or business strategies, among other things. These statements can generally (although not always) be identified by their use of terms and phrases such as anticipate, believe, could, would, estimate, expect, intend, may, plan, predict, project, pursue, will, continue, and other similar terms and phrases, as well as the use of the future tense.

Examples of forward looking statements in this report include, but are not limited to, the following categories of expectations about:

- ♣ our ability to introduce new products and stimulate replacement demand
- ♣ the timing and expected success of new product introductions
- ♣ the timing of the introduction of and revenues from server-based systems
- ♣ benefits from research and development efforts
- ♣ our ability to acquire, develop or protect intellectual property
- ♣ our market share, competitive advantage, and leadership position
- ♣ the advantages offered to customers by our products and product features
- ♣ gaming expansion and new market opportunities
- ♣ our ability to benefit from and effectively integrate and utilize acquired businesses and assets
- ♣ investments in other entities and improved position in related markets
- ♣ factors impacting future gross margins and tax rates
- ♣ increasing growth or contributions related to non-machine products and services
- ♣ increasing machine sales and placements
- ♣ legislative and regulatory developments and related market opportunities
- ♣ available capital resources to fund future operations and other obligations
- ♣ timing and quantity of future repurchases of IGT common stock
- ♣ expectations regarding losses from off-balance sheet arrangements

Although we believe as of today that the expectations reflected in any of our forward looking statements are reasonable, actual results could differ materially from those expressed or implied. Our future financial condition and results of operations, as well as any forward looking statements, are subject to change and to inherent known and unknown risks and uncertainties. See Item 1A, Risk Factors, in this report for a discussion of these and other risks and

uncertainties. You should not assume at any point in the future that the forward looking statements in this Quarterly Report on Form 10-Q are still valid. We do not intend, and undertake no obligation, to update our forward looking statements to reflect future events or circumstances.

COMPANY OVERVIEW

The following MDA is intended to enhance the reader's understanding of our company operations and present business environment. It should be read in conjunction with our Annual Report on Form 10-K for the year ended September 30, 2006.

Italicized text with an attached superscript trademark or copyright notation in this document indicates trademarks of IGT or its licensors. For a complete list of trademark and copyright ownership information, please visit our website at www.IGT.com.

Our MDA is organized into the following sections:

- ♠ **OUR BUSINESS** a general description of our business and operating segments
- ♠ **OUR FOCUS** a summary of our strategies and opportunities
- ♠ **RECENTLY ISSUED ACCOUNTING STANDARDS** a discussion of recently issued accounting standards with significance to our business
- ♠ **CRITICAL ACCOUNTING ESTIMATES** a discussion of accounting policies that require critical judgments and estimates

Table of Contents

- ♠ **CONSOLIDATED OPERATING RESULTS** a year-over-year comparative analysis of net income for the second quarter and first half of fiscal 2007
- ♠ **BUSINESS SEGMENT RESULTS** a year-over-year comparative analysis of business segment results for the second quarter and first half of fiscal 2007
- ♠ **LIQUIDITY AND CAPITAL RESOURCES** a year-over-year comparative analysis of cash flows and capital resources for the second quarter and first half of fiscal 2007
- ♠ **FINANCIAL CONDITION** - analysis of significant changes in our financial position

OUR BUSINESS

International Game Technology is a global company specializing in the design, manufacture, and marketing of computerized gaming equipment, systems and services. Our ultimate goal is to grow our business through a well-diversified base of profit contributors. We strive to be the preeminent supplier of gaming products to the world by maintaining a wide array of entertainment inspired gaming product lines and targeting gaming markets in all legal jurisdictions worldwide. We are committed to providing quality products at competitive prices, designed to increase the potential for operator profits by serving players better.

Our annual revenues totaled \$2.5 billion in fiscal 2006 and \$1.3 billion for the first half of fiscal 2007. We derive our revenues in two ways, either from the sale (product sales) or placement (gaming operations) of our gaming products, services and/or intellectual property. Operating results reviewed by our chief decision makers encompass all revenue sources within each geographical customer region. We currently view our business in two regional operating segments, each incorporating all types of revenues.

- ♠ North America consists of our operations in the US and Canada.

- ♠ International encompasses our efforts abroad in Asia, Australia, New Zealand, Europe, Japan, Latin America, Russia, Africa, and the UK.

Additionally, certain income and expenses related to company-wide initiatives are managed at the corporate level and are not allocated to an operating segment. See the BUSINESS SEGMENT RESULTS below and Note 14 of our Unaudited Condensed Consolidated Financial Statements for additional segment information and financial results.

OUR FOCUS

We remain dedicated to generating financial growth by continuing to focus on the three cornerstones of our success: product development, market development and capital deployment.

Product Development

We consider the driving force behind our success to be the ability to offer high quality games, platforms and systems through dedicated product development efforts and superior customer service. We continue pioneering innovation centered on serving players better by utilizing the power of networked gaming, information technology, game design, and services to maximize the potential for operator profitability. We invest a great deal more in product development than any of our principal competitors and believe this helps us deliver the broadest product lines across the most markets.

We are constantly updating our game libraries to address changing player preferences and other market trends. We strive to develop games that incorporate exciting winning combinations and appealing graphics and sound while adhering to our development standards intended to ensure quality and expedite time to market. With the favorable player reaction to the introduction of communal gaming with *Wheel of Fortune® Super Spin*, we plan further multi-player interactive game releases with the introduction of our *M-P Seriesä* products in 2007. Initial *M-P Seriesä* products are based on traditional player favorites including baccarat and roulette. In the second half of fiscal 2007, our expected release of *Ancient Chinese Secret* will allow multiple players to enter into a bonus round at the same time. The popularity of our MLP games continues to drive incremental growth in IGT's gaming operations installed base, with our newest MLP release, *Soul Trainä*, and the continuing strength of *Red Hot Jackpotsä* and our MLP flagship, *Fort Knox®*. During the next six months, we also anticipate the release of our *Indiana Jonesä* MLP featuring the

AVP® Widescreen. This new game will incorporate both MLP features as well as the group play concept allowing multiple players to enter the same bonus round.

Table of Contents

During fiscal 2007, we plan to introduce *Guaranteed Play*ä Poker, our first product developed in collaboration with Walker Digital, providing players a new option for purchasing blocks of maximum bet poker hands for a set price. We anticipate future product offerings incorporating this feature will give operators the ability to package slot play with other promotional offerings.

In spite of challenging macro-trends for domestic machine replacements and increasing competition, we have established a diverse revenue base through our continuing efforts to expand our business model beyond machine sales as we move toward a more system-centric, networked gaming environment. Our share of gaming systems in the marketplace continues to grow. At March 31, 2007, 660 IGT systems were installed worldwide, compared to 550 this time last year. Our *Table iDä* products continue gaining momentum in the market, further extending our reach into table games.

Our ongoing server-based development continues to focus on comprehensive enterprise-wide solutions designed to enhance the player experience and improve operator efficiencies. As part of our commitment to lead the industry through the networked gaming transformation, we are intent on developing server-based systems that will offer customers a seamless interface with a variety of hardware platforms. We believe our applications will differentiate our products in this area and offer operators new ways to engage and interact with their players, as well as market cross-functional products and player conveniences. With five commercial field trials in progress, we expect to begin generating revenues from *sbä* in 2009.

Market Development

We are dependent, in part, on new market opportunities to generate growth. We continue with initiatives directed at enhancing this growth rate and accommodating entry into new areas of gaming. After a relatively quiet period for new market opportunities in North America, we realized the first shipments into Pennsylvania, Florida racetracks and Arkansas during the first half of fiscal 2007 and expect further developments in these markets. We also continue expanding our installed base into non-traditional markets, most significantly in New York, Oklahoma and California. We expect recent legislation in Kansas and compact developments in Washington State may allow for a combined total of approximately 20,000 additional machines. Other legislative activity in Florida may result in tribes expanding their slot operations to include Class III machines generating replacements in that market. The recent approval of new tribal compacts by the California Senate indicates strong potential for an increase of over 20,000 additional Class III machines in the state. Although the timing of these opportunities remains uncertain, we anticipate developments within the next few years.

Prospects for growth in international markets remain favorable. We continue expanding our presence in Mexico with increased CDS placements and expect to add another 1,000 recurring revenue units by the end of fiscal 2007. We anticipate increasing IGT shipments in Japan related to the mandated market replacement of 1.2 to 1.5 million pachisuro machines as it fully transitions to a Reg-5 environment by the end of fiscal 2007. We are well positioned to capitalize on the accelerated replacement demand expected between June and September with our latest game, *Sangokushi*, scheduled for release in the third quarter and other game releases planned for the remainder of fiscal 2007. We also expect to sell or place additional machines in Argentina over the next five years in connection with the financing agreements discussed below. In addition, we plan to develop new business in the Chinese video lottery market through our recent partnership discussed below.

Capital Deployment

We continue to generate substantial operating cash flows, enabling us to reinvest in our business and return value to our shareholders through dividends and share repurchases. We anticipate an increase in share repurchase activity over the next three years. See the LIQUIDITY AND CAPITAL RESOURCES section that follows for recent share repurchase and dividend activity.

We enter into strategic business combinations and alliances to complement our internal resources. We consider businesses that offer opportunities to expand our geographic reach, product lines and customer base, as well as prospects that may leverage our existing infrastructure through economies of scale. During the first quarter of 2007, we invested \$21.8 million in the acquisition of VCAT, renamed Mariposa Software Inc. We anticipate VCAT's Mariposa software will enhance our position as a leading provider of integrated solutions for casino customer relationship management. See Note 4 of our Unaudited Condensed Consolidated Financial Statements for additional

information regarding this acquisition.

Table of Contents

In order to capitalize on international growth opportunities, we may provide financing to customers for the expansion or construction of gaming locations to reduce the time required to develop these markets. In April 2007, IGT agreed to provide up to \$120.0 million in equipment notes and development financing loans to gaming operators in Argentina. In May 2007, we also committed to fund equity investments and convertible notes of approximately \$103.0 million in a strategic business partner in China, subject to customary closing conditions.

RECENTLY ISSUED ACCOUNTING STANDARDS

IGT stays abreast of new generally accepted accounting principles and disclosure reporting requirements issued by the SEC and other standard setting agencies. Recently issued accounting standards that may materially affect our financial results are described in Note 1 of our Unaudited Condensed Consolidated Financial Statements.

CRITICAL ACCOUNTING ESTIMATES

Our consolidated financial statements were prepared in conformity with accounting principles generally accepted in the US. Accordingly, we are required to make estimates incorporating judgments and assumptions we believe are reasonable based on our historical experience, contract terms, observance of known trends in our company and the industry as a whole, as well as information available from other outside sources. Our estimates affect amounts recorded in the financial statements and actual results may differ from initial estimates.

We consider the following accounting estimates to be the most critical to fully understanding and evaluating our reported financial results. They require us to make subjective or complex judgments about matters that are inherently uncertain or variable. Senior management discussed the development, selection and disclosure of the following accounting estimates, considered most sensitive to changes from external factors, with the Audit Committee of our Board of Directors.

Goodwill, Other Intangible Assets, and Royalties

Goodwill is measured and tested for impairment using the two-step approach under SFAS 142, Goodwill and Other Intangible Assets, at least annually or more frequently when events or changes in circumstances indicate the asset may be impaired. If the carrying amount of goodwill exceeds its implied fair value, an impairment loss is recognized equal to that excess. Our goodwill totaled \$1.1 billion at March 31, 2007 and September 30, 2006. The last three annual goodwill impairment tests indicate the fair value of each reporting unit is substantially in excess of its carrying value. In determining the fair value of our reporting units, we apply the income approach using the discounted cash flow (DCF) method. We then compare the implied valuation multiples of a group of comparable competitor gaming companies under the market approach to test the reasonableness of our DCF results. The DCF analysis is based on the present value of two components: the sum of our five year projected cash flows and a terminal value assuming a long-term growth rate. The cash flow estimates are prepared based on our business plans for each reporting unit, considering historical results and anticipated future performance based on our expectations regarding product introductions and market opportunities. The discount rates used to determine the present value of future cash flows are derived from the weighted average cost of capital of a set of comparable gaming companies, considering the size and specific risks of each reporting unit.

Our portfolio of other intangibles substantially consists of finite-lived patents, contracts, trademarks, developed technology, and customer relationships. We regularly monitor events or changes in circumstances that indicate the carrying value of these intangibles may not be recoverable or requires a revision to the estimated remaining useful life in accordance with SFAS 144, Accounting for the Impairment or Disposal of Long-Lived Assets. Our other intangibles totaled \$252.3 million at March 31, 2007 and \$257.0 million at September 30, 2006. We recorded no related material impairment charges during the six months ended March 31, 2007 or 2006.

If an event or change occurs, we estimate cash flows directly associated with the use of the intangible to test recoverability and remaining useful lives based on the forecasted utilization of the asset and expected product revenues. In developing estimated cash flows, we incorporate assumptions regarding changes in legal factors, related industry climate, regulatory actions, contractual factors, operational performance and the company's strategic business plans, as well as the effects of obsolescence, demand, competition, and other market conditions. When the carrying amount exceeds the undiscounted cash flows expected to result from the use and eventual disposition of a lived intangible asset or asset group, we then compare the carrying amount to its current fair value. We estimate the fair value using prices for similar assets, if available, or more typically using a DCF model. An impairment loss is

recognized if the carrying amount is not recoverable and exceeds its fair value.

Table of Contents

We also regularly evaluate the estimated future benefit of prepaid and deferred royalties to determine amounts unlikely to be realized from forecasted sales or placements of our games. The carrying value of our prepaid and deferred royalties totaled \$125.4 million at March 31, 2007 and \$136.5 million at September 30, 2006.

Application of the impairment test to goodwill, other intangibles, and royalties requires judgment, including the identification of reporting units, allocation of related goodwill, assignment of corporate shared assets and liabilities to reporting units, estimated cash flows, and determinations of fair value. While we believe our estimates of future revenues and cash flows are reasonable, different assumptions could materially affect the assessment of useful lives, recoverability and fair value. If actual cash flows fall below initial forecasts, we may need to record additional amortization and/or impairment charges.

Jackpot Liabilities and Expenses

IGT's gaming operations encompass a variety of recurring revenue arrangements. Wide area progressive systems games are the only recurring revenue arrangements incorporating an IGT paid progressive jackpot for which we recognize corresponding jackpot liabilities and expense. Changes in our estimated amounts for jackpot liabilities and associated jackpot expense are attributable to regular analysis and evaluation of the following factors:

^a variations in slot play (i.e. jackpot life cycles and slot play patterns)

^a volume (i.e. number of WAP units in service and coin-in per unit)

^a interest rate movements

^a the size of base jackpots (i.e. initial amount of the progressive jackpots displayed to players)

Interest rates applicable to jackpot funding vary by jurisdiction and are impacted by market forces, as well as winner elections to receive a lump sum payment in lieu of periodic annual payments. Current and non-current portions of jackpot liabilities, as well as jackpot expense, may also be impacted by changes in our estimates and assumptions regarding the expected number of future winners who may elect a lump sum payout.

Our jackpot liabilities totaled \$659.8 million at March 31, 2007 and \$546.7 million at September 30, 2006. A more detailed discussion of jackpot accounting and market interest rate risk related to our cost to fund jackpot liabilities is available in our Annual Report on Form 10-K for the year ended September 30, 2006 in the following sections:

^a Note 1 of the Consolidated Financial Statements Summary of Significant Accounting Policies Jackpot Liabilities and Expense

^a Item 7A, Quantitative and Qualitative Disclosures about Market Risk Interest Rate Risk Cost to Fund Jackpot Liabilities

Inventory and Gaming Operations Equipment

The determination of obsolete or excess inventory requires us to estimate the future demand for our products within specific time horizons, generally, one year or less. If we experience a significant unexpected decrease in demand for our products or a higher occurrence of inventory obsolescence because of changes in technology or customer requirements, we could be required to increase our inventory provisions. Inventory management remains an area of focus as we balance the need to maintain strategic inventory levels to ensure competitive lead times versus the risk of inventory obsolescence because of rapidly changing technology and customer requirements. Our inventories totaled \$158.5 million at March 31, 2007 and \$162.1 million at September 30, 2006.

We are also required to estimate salvage values and useful lives for our gaming operations equipment. Trends in market demand and technological obsolescence may require us to record additional asset charges, which would have a negative impact on gross profit.

Share-based Compensation

We account for share-based compensation in accordance with SFAS 123R. Under the fair value recognition provisions, we estimate share-based compensation at the award grant date and recognize expense over the service period. Option valuation models require the input of highly subjective assumptions, and changes in the assumptions used can materially affect the fair value estimate. Judgment is required in estimating stock price volatility, forfeiture

rates, expected dividends, and expected terms that options remain outstanding. See Notes 1 and 3 of the Consolidated Financial Statements in our Annual Report on Form 10-K for the year ended September 30, 2006 for additional information regarding these assumptions.

Table of Contents

Income Taxes

Determination of the appropriate amount and classification of income taxes depends on several factors, including estimates of the timing and probability of realization of deferred income taxes, as well as income tax payment timing. We adjust deferred taxes based on the changes in the difference between the book and tax basis of our assets and liabilities, measured by future tax rates we estimate will apply when these differences are expected to reverse. This process involves estimating our current tax position in each federal, state, and foreign jurisdiction, as well as making judgments as to whether our taxable income in future periods will be sufficient to fully recover any deferred tax assets. We reduce deferred tax assets by a valuation allowance when it is more likely than not that some or all of the deferred tax assets will not be realized based on our estimation of future taxable income in each jurisdiction.

The calculation of our tax liabilities also involves dealing with uncertainties in the application of complex tax regulations. We recognize potential tax liabilities for anticipated tax audit issues in the US and other jurisdictions based on our estimate of the extent to which additional taxes will be due. If payment of these amounts proves to be unnecessary, the reversal of liabilities could result in the recognition of a future tax benefit. If our tax liabilities are understated, a charge to our tax provision would result. Changes in current tax laws, enacted tax rates, geographic mix or the estimated level of annual taxable income could change our valuation of deferred tax assets and liabilities, which in turn impacts our effective tax rate and tax provision. Additionally, we are currently evaluating the impact of the guidance issued in June 2006 under FIN 48, *Accounting for Uncertainty in Income Taxes-an interpretation of FASB Statement No. 109*, effective for IGT at the beginning of fiscal year 2008.

Net deferred tax assets totaled \$208.5 million at March 31, 2007 and \$136.6 million at September 30, 2006 and accrued income taxes totaled \$22.9 million at March 31, 2007 and \$36.1 million at September 30, 2006.

Installed base units	54,800	44,400	10,400	23%	54,800	44,400	10,400	23%

Consolidated total revenues for the quarter and six months ended March 31, 2007 declined due to lower product sales partially offset by continuing growth in our gaming operations. Improvement in gaming operations increased total gross profit compared to the prior year periods. Our ability to generate increasing gross profits with declining machine sales is, to some extent, reflective of our diverse product offerings. Total gross margin increase is the combined result of a greater mix of gaming operations, as well as margin improvements in both product sales and gaming operations discussed further below.

Significant items affecting comparability in the second quarter and first half of fiscal 2007 include:

^a a current quarter gain of \$17.0 million from our Gulf Coast hurricane business interruption and property damage insurance settlement

^a a \$4.5 million net benefit from the sale of a company airplane

Consolidated Product Sales

Revenues and gross profit for the quarter and six months were down on lower volumes due to soft demand for domestic machine replacements, combined with lower international shipments. Gross margin improvement is attributable to the greater mix of higher margin non-machine sales and reduced mix of low-margin international

machine sales. Consolidated product sales margins fluctuate depending on the geographical mix and types of products sold, and we anticipate a downward trend due to an increasing mix of lower margin international units.

Consolidated Gaming Operations

Growth in our installed base of recurring revenue machines is the primary reason for current quarter revenue and gross profit improvements. Year-over-year lease operations units grew primarily in Mexico, New York, Delaware and Rhode Island while casino operations placements grew most significantly in Oklahoma, California and Florida. Gross profit and margin also improved due to decreased jackpot expense and hurricane insurance gains in North America (see Business Segment Results below). Gaming operations margins vary depending on our installed base mix, variations in slot play, as well as interest rate movements. We are projecting a trend of 57% to 60% for the second half of fiscal 2007.

Table of Contents**Operating Expenses**

	Quarters Ended March 31,		Favorable (Unfavorable)		Six Months Ended March 31,		Favorable (Unfavorable)	
	2007	2006	Amount	%	2007	2006	Amount	%
<i>(In millions)</i>								
Selling, general and administrative	\$ 87.2	\$ 93.1	\$ 5.9	6%	\$ 185.5	\$ 177.7	\$ (7.8)	-4%
Research and development	47.8	44.4	(3.4)	-8%	97.1	85.5	(11.6)	-14%
Depreciation and amortization	19.3	20.0	0.7	4%	38.4	40.4	2.0	5%
Total	\$ 154.3	\$ 157.5	\$ 3.2	2%	\$ 321.0	\$ 303.6	\$ (17.4)	-6%
Percent of revenue	25%	24%			26%	24%		

SG&A increases during the periods included:

^a additional staffing costs of \$8.2 million for the quarter and \$15.0 million year-to-date in support of business growth initiatives

^a rising legal and compliance fees of \$3.8 million for the quarter and \$9.7 million year to date, largely related to intellectual property protection and the growing number of product submissions

The increases in SG&A were offset by:

^a Gulf Coast hurricane business interruption insurance gains of \$12.0 million

^a a \$5.8 million gain on the sale of a company airplane to a related party, less \$1.3 million in repairs and maintenance required as a condition of the sale, for a realized net benefit of \$4.5 million.

^a favorable bad debt provisions of \$4.4 million for the quarter and \$5.6 million for the first six months, resulting from improving trends in receivables quality and collections

R&D increases are primarily due to additional staffing costs of \$4.4 million for the quarter and \$9.3 million for the first half, supporting development of new technology and products.

Other Income (Expense) and Taxes

	Quarters Ended March 31,		Favorable (Unfavorable)		Six Months Ended March 31,		Favorable (Unfavorable)	
	2007	2006	Amount	%	2007	2006	Amount	%
<i>(In millions)</i>								
Interest income	\$ 21.6	\$ 15.9	\$ 5.7	36%	\$ 41.5	\$ 31.6	\$ 9.9	31%
Interest expense:	(19.3)	(11.3)	(8.0)	-71%	(35.4)	(24.9)	(10.5)	-42%
Other		0.7	(0.7)	*	0.6	1.2	(0.6)	*
Total other income (expense)	\$ 2.3	\$ 5.3	\$ (3.0)	*	\$ 6.7	\$ 7.9	\$ (1.2)	*
Income tax provisions	\$ 76.3	\$ 74.0	\$ (2.3)		\$ 145.0	\$ 141.8	\$ (3.2)	
Tax rate, including one time items	37.3%	37.4%	0.1pp		36.8%	36.7%	(0.1)pp	

Interest income improved primarily due to higher earnings on investments and receivables. Interest expense increased mainly because of higher debt balances and related interest rates, mostly due to the issuance of our 2.6% Debentures in December 2006. See Note 8 of our Unaudited Condensed Consolidated Financial Statements for additional information about our credit facilities and indebtedness.

The reconsolidation of our NJ WAP trust VIEs in the first quarter of 2007 is also contributing to increases in interest income and interest expense. See Note 1 of our Unaudited Condensed Consolidated Financial Statements for further information about the NJ trust VIE reconsolidations.

Our annual tax rate (excluding one-time items) increased to 37.3% as of March 31, 2007 compared to 36.8% in the prior year period mainly due to changes in the forecasted geographical mix of taxable income for the fiscal year. We currently anticipate no significant change in this rate for the remainder of fiscal 2007.

Installed base units	46,900	39,200	7,700	20%	46,900	39,200	7,700	20%

North America realized increased total revenues for the first half of fiscal 2007, as well as increased total gross profit and margins for the quarter and six months ended March 31, 2007. Improvements are primarily the result of continued growth in our installed base of recurring revenue games, offsetting the decline in machine sales.

North America Product Sales

Higher pricing and a greater mix of higher margin non-machine sales partially offset lower machine shipments in the current quarter and six months. Machine shipments are down because of fewer replacement opportunities due to the young age of most domestic machines in the market following the cashless replacement cycle coupled with the anticipation of upcoming technological developments related to server-based gaming. The timing of market expansion opportunities also affects machine shipments. Fewer gaming systems, parts, and conversions, partially offset by increases in license fees, are reflected in the decreased non-machine revenues in the first half of fiscal 2007.

North America Gaming Operations

Improvements in gaming operations revenues and gross profit are mainly attributable to growth in our installed base. The growth in our installed base resulted primarily from incremental placements of:

^a lease operations games in New York, Delaware and Rhode Island

^a Class III, Instant Bingo and poker products in Oklahoma

^a CDS and Class II units in California, Florida, and Alabama

Gross profit and margin also improved due to lower jackpot expense, as well as a gain of \$5.0 million from our hurricane property damage insurance settlement. Jackpot expense decreased \$8.1 million for the quarter, substantially as a result of variations in slot play. For the half-year period, jackpot expense was down \$4.6 million, with \$9.4 million attributable to variations in slot play, offset by \$4.3 million due to favorable interest rate movements.

Installed base units	7,900	5,200	2,700	52%	7,900	5,200	2,700	52%

Declines in total international revenues during the current periods are principally due to fewer machine sales partially offset by continuing growth in gaming operations. Increases in total gross margins resulted from the change in product sales mix as well as the increased contribution from gaming operations.

The decline in international product sales and gross profit during the current periods is primarily due to fewer machine sales in Japan and the UK. Japan sales decreased by 10,500 units in the current quarter and 4,100 units for the first six months of 2007 related to the timing of pachislot releases and customer purchases in anticipation of the market transition to a Reg-5 gaming environment required by September 30, 2007. UK sales declined largely due to prior year sales benefiting from a limited regulatory window of opportunity. Improvements in product sales gross margin are due to the lower mix of Japan and UK sales.

International product sales margins fluctuate depending on geographic and product mix, especially related to Japan's contribution. Successes in Japan can contribute significantly to gross profits and operating income, but lower priced pachisuro games reduce gross margin. We expect an escalation of Reg-5 sales in Japan during the second half of fiscal 2007, as all existing Reg-4 pachislots in the marketplace must be replaced by September 30, 2007. Through mid-April, we received orders for 16,000 units of our latest game scheduled for release during the third quarter. Improving gaming operations revenues and gross profit are the result of a growing international installed base of recurring revenue games. Year-over-year placements increased most significantly in Mexico reaching an installed base of 5,900 CDS units at March 31, 2007.

LIQUIDITY AND CAPITAL RESOURCES**Capital Resources**

Our principal source of liquidity is cash generated from operations, which allows us to reinvest in our business. Our sources of capital also include, but are not limited to, the issuance of public or private placement debt, bank

borrowings under our credit facilities and the issuance of equity securities. We expect our available capital resources to be sufficient to fund our operating requirements, current capital expenditures, scheduled debt repayments, share repurchases, dividends, interest and income tax obligations.

Table of Contents

Our working capital increased to \$857.6 million at March 31, 2007 from \$129.1 million at September 30, 2006, primarily related to the redemption of our 1.75% Debentures previously classified in current liabilities at September 30, 2006. Activity ratios for the trailing twelve months ended March 31, 2007 compared to the same prior year period include:

^a average days sales outstanding decreased to 75 days versus 80 days

^a inventory turns declined to 3.6 compared to 4.4

Cash Flows Summary

	Six Months Ended March 31,		Favorable (Unfavorable) Amount
<i>(In millions)</i>	2007	2006	
Operations	\$ 366.5	\$ 204.8	\$ 161.7
Investing	(178.0)	(106.5)	(71.5)
Financing	(146.4)	(109.7)	(36.7)
Effects of exchange rates	(1.4)	1.7	(3.1)
Net change	\$ 40.7	\$ (9.7)	\$ 50.4

Operations

Increased operating cash flows in the first half of fiscal 2007 are mainly related to timing of receivable collections, as well as prepayments for exclusive licensing rights in the prior half year.

Fluctuations in net cash flows related to WAP jackpot liabilities reflect timing variations in jackpot life cycles, slot play volumes, and winner payments. See Note 1 of our Consolidated Financial Statements in our most recent Form 10-K for additional information about accounting for jackpot liabilities.

Investing

The most significant fluctuations in cash used for investing include:

^a additional capital expenditures of \$47.4 million

^a \$45.8 million in reduced net proceeds from investment securities

^a \$14.4 million of increased business acquisitions

^a the equity investment of \$56.0 million in Casino IP Holdings, LLC during the prior year

Capital Expenditures

Current year capital investments in property, plant and equipment include ongoing construction of our new Las Vegas campus and updated transportation equipment. Capital expenditures for gaming operations equipment are consistent with installed base growth. We expect to spend an additional \$36.4 million to complete the Las Vegas campus construction.

	Six Months Ended March 31,		Increase (Decrease) Amount
<i>(In millions)</i>	2007	2006	
Property, plant and equipment	\$ 77.2	\$ 27.0	\$ 50.2
Gaming operations equipment	95.3	101.7	(6.4)
Intellectual property	9.4	5.8	3.6

Total capital expenditures	\$ 181.9	\$ 134.5	\$ 47.4
North America	91%	71%	
International	9%	29%	

Financing

Net cash used for financing activities increased in the current six months primarily related to increased expenditures for share repurchases and repayment of the 1.75% Debentures, offset by proceeds from the issuance of the 2.6% Debentures.

Stock Repurchases

We repurchase shares to return value to shareholders and reduce outstanding share dilution. We use open market or privately negotiated transactions, such as accelerated share repurchases and prepaid structured share repurchases, depending on market conditions and other factors, to achieve our timing, cost and volume objectives.

Table of Contents

We repurchased 8.3 million shares in open market transactions for an aggregate cost of \$362.7 million in the first half of 2007. We repurchased 3.5 million additional shares in open market transactions for an aggregate cost of \$138.3 million between March 31, 2007 and May 3, 2007. In April 2007, the board approved an increase of 50 million shares to our ongoing share repurchase authorization. Our remaining share repurchase authorization totaled 49.6 million as of May 3, 2007.

Credit Facilities and Indebtedness (See Note 8 of our Unaudited Condensed Consolidated Financial Statements) On December 20, 2006, we issued \$900.0 million principal amount of 2.6% Convertible Debentures due 2036 in a private placement. Under certain circumstances, the 2.6% Debentures are convertible into cash up to the outstanding principal amount and shares for any excess conversion value. The initial conversion rate is 16.1875 shares per \$1,000 principal, for a conversion price of \$61.78 per share. The Debentures will pay cash interest semi-annually in June and December at a rate of 2.6% per year.

On December 26, 2006, our outstanding 1.75% Debentures were called for redemption. The call of the Debentures gave holders the right to convert their Debentures before January 10, 2007 and receive aggregate consideration comprised of shares and cash under the terms of the applicable indentures. In conjunction with the redemption and related conversions, we paid holders \$612.7 million and issued 7.3 million shares in the first six months of 2007.

FINANCIAL CONDITION

	March 31, 2007	September 30, 2006	Increase (Decrease) Amount
<i>(In millions)</i>			
Total assets	\$4,186.6	\$ 3,902.7	\$283.9
Total liabilities	2,212.8	1,860.7	352.1
Total stockholders' equity	1,973.8	2,042.0	(68.2)

Assets and liabilities related to past jackpot winners increased by \$117.5 million in the current period due to the reconsolidation of the NJ trust VIEs in November 2006. See Note 1 of our Unaudited Condensed Consolidated Financial Statements for additional information on the reconsolidation of the NJ trusts.

Additionally, property, plant and equipment assets increased \$61.0 million mainly due to our Las Vegas campus construction, and deferred tax assets increased \$71.9 million largely due to the elimination of \$47.3 million in deferred tax liabilities adjusted to APIC for the 1.75% Debenture conversions.

Liabilities also increased \$288.9 million related to the refinancing of our convertible debentures in December 2006.

See Note 8 of our Unaudited Condensed Consolidated Financial Statements for additional information about our debt.

Stockholders' equity decreased during the current period primarily as a result of share repurchases and dividends paid, partially offset by current period earnings and APIC adjustments related to the 1.75% Debenture conversions.

Arrangements With Off-Balance Sheet Risks

In the normal course of business, we are a party to financial instruments with off-balance sheet risk, such as performance bonds and other guarantees not reflected in our balance sheet. We do not expect any material losses from, nor are we dependent on off-balance sheet arrangements to fund our operations.

Additional off-balance sheet arrangements are described in Note 12 of our Unaudited Condensed Consolidated Financial Statements.

We may provide indemnifications of varying scope and terms to customers, vendors, lessors, business partners and other parties with respect to certain matters, including but not limited to, losses arising:

- ^a out of our breach of agreements with those parties
- ^a from services to be provided by us
- ^a from intellectual property infringement claims made by third parties

Table of Contents

Additionally, we have agreements with our directors and certain officers that require us, among other things, to indemnify them against certain liabilities that may arise because of their status or service as directors or officers. We have also agreed to indemnify certain former officers and directors of acquired companies. We maintain director and officer insurance, covering our indemnification obligations in certain circumstances.

It is not possible to determine our maximum potential indemnification obligations due to the limited history of prior claims and the unique facts and circumstances involved in each particular agreement. Such indemnification undertakings may not be subject to maximum loss clauses. Historically, we have not incurred material costs related to indemnification obligations.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

Except for the changes to Convertible Debentures Price Risk below, there have been no material changes in our assessment of sensitivity to market risk since those presented in our Annual Report on Form 10-K, Item 7A, for the fiscal year ended September 30, 2006.

The fair value of our Debentures is affected by changes in the price of IGT stock and changes in interest rates, typically increasing and decreasing with stock price. In general, the fair value of an investment in a fixed interest rate debt instrument increases as interest rates fall and decreases as interest rates rise. The stock price and interest rate changes impact the fair value of our Debentures, however these changes currently have no material affect on our financial position, cash flows or results of operations.

We estimate the fair value of our newly issued 2.6% Debentures at March 31, 2007 totaled \$877.7 million versus \$887.6 million at issuance. See Note 8 of our Unaudited Condensed Consolidated Financial Statements for additional information about the new 2.6% Debentures issued in December 2006 and the redemption of our old 1.75% Debentures in January 2007.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

We maintain disclosure controls and procedures that are designed to provide reasonable assurance that information required to be disclosed in our periodic reports filed under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified by the SEC's rules and forms, and that such information is accumulated and communicated to our management, including the CEO and CFO, as appropriate to allow for timely decisions regarding required disclosure. We recognize that any controls and procedures, no matter how well designed and operated, can only provide reasonable assurance of achieving desired control objectives. Judgment is required when designing and evaluating the cost-benefit relationship of potential controls and procedures.

As of the end of the period covered by this report, with the supervision and participation of management, including the CEO and CFO, we evaluated the effectiveness of the design and operation of our disclosure controls and procedures. Based on this evaluation, the CEO and CFO concluded that our disclosure controls and procedures are effective at the reasonable assurance level.

Changes in Internal Control over Financial Reporting

As a part of our normal operations, we update our internal controls as necessary to accommodate any modifications to our business processes or accounting procedures. No change occurred during the most recent fiscal quarter that materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents

PART II OTHER INFORMATION

Item 1. Legal Proceedings

For a description of our legal proceedings, see Note 12 of Notes to Unaudited Condensed Consolidated Financial Statements, which is incorporated by reference in response to this item.

Item 1A. Risk Factors

With the exception of the addition of the first three risk factors below, there have been no material changes in our assessment of risk factors affecting our business since those presented in our Annual Report on Form 10-K, Item 1A, for the fiscal year ended September 30, 2006. For convenience, our updated risk factors are included below in this Item 1A.

Investments and development financing loans could adversely impact liquidity.

We may invest in and/or provide financing for expansion or construction of gaming locations and other business purposes. Such financing subjects us to increased concentrations of credit risk, as well as other inherent risks such as political or economic instability in related markets. Our liquidity or financial position may be negatively impacted if we are unable to collect on these loans or benefit from these investments.

Current environmental laws, or those enacted in the future could result in additional liabilities and costs.

Manufacturing of our products may require the use of materials that are subject to a variety of environmental, health and safety laws and regulations. Compliance with these laws could increase our costs and impact the availability of components required to manufacture our product. Violation of these laws may subject us to significant fines, penalties or disposal costs, which could negatively impact our results of operations, financial position or cash flows.

Our outstanding 2.6% Debentures subject us to additional risks.

Our 2.6% Debentures issued in December 2006 contain a net settlement feature which could impact liquidity if a significant number of Debentures convert or are otherwise redeemed.

Our ability to operate in our existing markets or expand into new jurisdictions could be adversely affected by changing regulations or problems with obtaining needed licenses or approvals.

We operate only in jurisdictions where gaming is legal. The gaming industry is subject to extensive governmental regulation by US federal, state and local governments, as well as tribal officials or organizations and foreign governments. While the regulatory requirements vary by jurisdiction, most require:

- ^a licenses and/or permits
- ^a findings of suitability
- ^a documentation of qualifications, including evidence of financial stability
- ^a other required approvals for companies who manufacture or distribute gaming equipment and services
- ^a individual suitability of officers, directors, major stockholders and key employees

Any delays in obtaining regulatory approvals needed for expansion within existing markets or into new jurisdictions can negatively affect our opportunities for growth. Further, changes in existing gaming regulations may hinder or prevent us from continuing to operate in those jurisdictions where we currently do business, which would harm our operating results. In particular, the enactment of unfavorable legislation or government efforts affecting or directed at manufacturers or gaming operators, such as referendums to increase gaming taxes or requirements to use local distributors, can have a negative impact on our operations.

Slow growth in the number of new casinos or the rate of replacement of existing gaming machines could limit or reduce our future profits.

Demand for our products is driven substantially by the replacement of existing gaming machines, the establishment of new gaming jurisdictions, and the addition of new casinos or expansion of existing casinos within existing gaming jurisdictions. The establishment or expansion of gaming in any jurisdiction typically requires a public referendum or other legislative action. As a result, gaming continues to be the subject of public debate, and there are numerous active organizations that oppose gaming. Opposition to gaming could result in restrictions on or even prohibitions of gaming

operations in any jurisdiction. In addition, the rate of growth in the North American marketplace has diminished. A continued reduction in growth or in the number of gaming jurisdictions or delays in the opening of new or expanded casinos could reduce the demand for our products.

Table of Contents

Demand for our products could be adversely affected by changes in player and operator preferences.

As a supplier of gaming machines, we must offer themes and products that appeal to gaming operators and players. If we are unable to anticipate or timely react to any significant changes in player preferences, such as a negative change in the trend of acceptance of our newest systems innovations or jackpot fatigue (declining play levels on smaller jackpots), the demand for our gaming products could decline. Further, our products could suffer a loss of floor space to table games and operators may reduce revenue sharing arrangements, each of which would harm our sales and financial results. In addition, general changes in consumer behavior, such as reduced travel activity and redirection of entertainment dollars to other venues, could result in reduced demand for our products.

Our business is vulnerable to changing economic conditions.

Unfavorable changes in general economic conditions including recession, economic slowdown, or higher fuel or other transportation costs, may reduce disposable income of casino patrons or result in fewer patrons visiting casinos. Such a decline in the relative health of the gaming industry would likely result in a decline in the amount of resources our customers have to purchase our products and services. This may also result in reduced play levels, which could cause our cash flows and revenues from revenue sharing products to decline. Our operating results may be negatively impacted by a decrease in interest rates causing an increase in jackpot expense and a reduction of investment income.

Our success in the competitive gaming industry depends in large part on our ability to develop and manage frequent introductions of innovative products.

The gaming industry is intensely competitive, and many of our competitors have substantial resources and specialize in the development and marketing of their products. Because the gaming industry is characterized by dynamic customer demand and rapid technological advances, we must continually introduce and successfully market new themes and technologies in order to remain competitive and effectively stimulate customer demand. Our customers will accept a new product only if it is likely to increase operator profits more than competitors' products. There is no guarantee that our new products will attain this market acceptance or that our competitors will not more effectively anticipate or respond to changing customer preferences. In addition, any delays by us in introducing new games on schedule could negatively impact our operating results by providing an opportunity for our competitors to introduce new products and gain market share ahead of us.

Failure to attract, retain and motivate key employees may adversely affect our ability to compete.

Our success depends largely on recruiting and retaining talented employees. The market for qualified executives and highly skilled, technical workers is intensely competitive. The loss of key employees or an inability to hire a sufficient number of technical staff could limit our ability to develop successful products and cause delays in getting new products to market.

We may be unable to protect our intellectual property.

A significant portion of our revenues is generated from products using certain intellectual property rights, and our operating results would be negatively impacted if we were unsuccessful in protecting these rights from infringement. In addition, some of our most popular games and features are based on trademarks, patents and other intellectual property licensed from third parties. The continued success of these games may depend upon our ability to retain or expand these licenses with reasonable terms. We also depend on trade secret law to protect certain proprietary knowledge and have entered into confidentiality agreements with those of our employees who have access to this information. However, there can be no guarantees that our employees will not breach these agreements, and if these agreements are breached it is unlikely that the remedies available to us will be sufficient to compensate us for the damages suffered.

We may be subject to claims of intellectual property infringement or invalidity.

Periodically we receive notification from others claiming that we are infringing their patent, trademark or other intellectual property rights. Regardless of their merit, such claims may cause us to incur significant costs. Responding to these claims could also require us to stop selling or to redesign our products, to pay significant amounts in damages or enter into agreements to pay significant licensing fees or royalties. Additionally, if any of these claims prove successful, it could limit our ability to bring new products to market in the future.

Our gaming machines and online operations may experience losses due to fraudulent activities.

We incorporate security features into the design of our gaming machines and other systems, including those responsible for our online operations, designed to prevent us and our patrons from being defrauded. However, there can be no guarantee that such security features will continue to be effective in the future. If our security systems fail to prevent fraud, our operating results could be adversely affected. Additionally, if third parties breach our security systems and defraud our patrons, the public may lose confidence in our gaming machines and operations.

Table of Contents**Our outstanding credit facility subjects us to additional risks.**

Our Senior Credit Facility subjects us to a number of financial covenants, which could result in an event of default if not complied with. The Senior Credit Facility also includes restrictions that may limit our flexibility in planning for, or reacting to, changes in our business and the industry.

The risks related to operations outside of traditional US law could negatively affect our results.

We operate in many countries outside of the US and tribal jurisdictions with sovereign immunity which subjects us to certain inherent risks including:

- ^a political or economic instability in international markets
- ^a additional costs of compliance with international laws
- ^a tariffs and other trade barriers
- ^a fluctuations in foreign exchange rates
- ^a adverse changes in the creditworthiness of parties with whom we have significant receivables or forward currency exchange contracts

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

There were no unregistered sales of equity securities.

Issuer Purchases of Equity Securities

The purpose of our 1990 common stock repurchase authorization, as amended, is to return value to our shareholders and reduce the number of shares outstanding. We may repurchase shares in the open market, in privately negotiated transactions, or under Rule 10b5-1 trading plans, depending on market conditions and other factors. The authorization does not specify an expiration date.

Our quarterly share repurchases are summarized below, excluding treasury shares acquired in non-cash transactions related to forfeited stock awards or shares exchanged for options exercised.

			Total Number of Shares Purchased as part of a Publicly Announced Plan	Maximum Number of Shares Still Available for Purchase Under the Plan
Periods	Total Number of Shares Purchased	Average Price Paid Per Share		
<i>(In millions, except per share amounts)</i>				
December 31, 2006 - January 27, 2007		\$		6.5
January 28 - February 24, 2007	1.3	43.22	1.3	5.2
February 25 - March 31, 2007	2.1	39.49	2.1	3.1
Total	3.4	\$ 40.91	3.4	

Item 3. Defaults Upon Senior Securities

None.

Table of Contents**Item 4. Submission of Matters to a Vote of Security Holders**

- (a) IGT held its annual meeting of stockholders on March 6, 2007.
- (b) The following directors were elected to serve until the next annual meeting and constitute all of the directors of IGT.

Voting was as follows:

Director	Number of Shares Voted for	Number of Shares Withheld
Neil Barsky	291,439,183	14,880,061
Robert A. Bittman	301,617,965	4,701,280
Richard R. Burt	301,898,566	4,420,679
Patti S. Hart	301,906,470	4,412,774
Leslie S. Heisz	301,920,828	4,398,417
Robert A. Mathewson	301,830,490	4,488,755
Thomas J. Matthews	291,868,231	14,451,014
Robert Miller	301,410,674	4,908,571
Frederick B. Rentschler	290,569,687	15,749,557

- (c) At the meeting, stockholders also ratified the appointment of Deloitte & Touche LLP as IGT's independent auditors for the fiscal year ending September 30, 2007. The number of shares voted for the appointment totaled 288,502,786 with 14,711,689 shares against, 3,104,769 shares abstaining and no broker non-votes.

Item 5. Other Information

None.
