APPLIED INDUSTRIAL TECHNOLOGIES, INC. AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Dollar amounts in thousands, except per share amounts) (Unaudited)

1. BASIS OF PRESENTATION

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States for interim financial information and with the instructions to Form 10-Q and Regulation S-X. Accordingly, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation of the financial position of Applied Industrial Technologies, Inc. (the Company) as of September 30, 2006 and the results of operations and cash flows for the three month periods ended September 30, 2006 and 2005 have been included. This Quarterly Report on Form 10-Q should be read in conjunction with the Company's Annual Report on Form 10-K for the year ended June 30, 2006.

Operating results for the three month period ended September 30, 2006 are not necessarily indicative of the results that may be expected for the remainder of the fiscal year ending June 30, 2007.

Cost of sales for interim financial statements are computed using estimated gross profit percentages, which are adjusted throughout the year based upon available information. Adjustments to actual cost are made based on periodic physical inventories and the effect of year-end inventory quantities on LIFO costs.

All share and per share data have been restated to reflect a three-for-two stock split effective June 15, 2006.

Subsequent to the issuance of the Company's Form 10-Q for the period ended September 30, 2005, the Company determined, as required by Statement of Financial Accounting Standards No. 123(R), Share-Based Payment, that the excess tax benefits resulting from share based compensation should have been presented as a financing cash flow instead of as an operating cash flow. The accompanying condensed statement of consolidated cash flows for the three months ended September 30, 2005 has been restated to conform to the current period presentation, resulting in a \$1,407 increase in net cash used in operating activities and a corresponding decrease in net cash used in financing activities from the amounts previously reported.

(Dollar amounts in thousands, except per share amounts) (Unaudited)

2. NEW PRONOUNCEMENTS

In June 2006, the Financial Accounting Standards Board issued Financial Interpretation No. 48, Accounting for Uncertainty in Income Taxes (FIN 48). FIN 48, which is an interpretation of Statement of Financial Accounting Standards No. 109, Accounting for Income Taxes, provides guidance on the manner in which tax positions taken or to be taken on tax returns should be reflected in an entity's financial statements prior to their resolution with taxing authorities. The Company is required to adopt FIN 48 during the first quarter of fiscal 2008. The Company is currently evaluating the requirements of FIN 48 and has not yet determined the impact, if any, this interpretation may have on its consolidated financial statements.

In September 2006, the Financial Accounting Standards Board issued Statement of Financial Accounting Standards No. 158 (SFAS 158), Employers Accounting for Defined Benefit Pension and Other Postretirement Plans, an amendment of SFAS 87, 88, 106, and 132 (R). This statement requires a company to recognize the overfunded or underfunded status of a defined benefit postretirement plan as an asset or liability in its balance sheet and to recognize changes in that funded status in the year in which the changes occur through comprehensive income. The Company is required to adopt SFAS 158 in the fourth quarter of fiscal 2007 and is currently evaluating the impact on its consolidated financial statements.

In September 2006, Securities & Exchange Commission released Staff Accounting Bulletin No. 108, Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements (SAB 108). SAB 108 provides guidance on quantifying financial statement misstatements. SAB 108 requires a company to quantify misstatements using both the balance sheet and income statement approaches and to evaluate whether either approach results in quantifying an error that is material. The Company is required to adopt SAB 108 at the end of the current fiscal year. The Company has not completed the process of evaluating the impact, if any, that will result from adopting SAB 108.

3. SEGMENT INFORMATION

The accounting policies of the Company's reportable segment and its other businesses are the same as those used to prepare the condensed consolidated financial statements. Sales between the service center based distribution segment and the other businesses are not significant.

APPLIED INDUSTRIAL TECHNOLOGIES, INC. AND SUBSIDIARIES
REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The accompanying condensed consolidated financial statements of the Company have been reviewed by the Company's independent registered public accounting firm, Deloitte & Touche LLP, whose report covering their review of the financial statements follows.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of
Applied Industrial Technologies, Inc.
Cleveland, Ohio

We have reviewed the accompanying condensed consolidated balance sheet of Applied Industrial Technologies, Inc. and subsidiaries (the Company) as of September 30, 2006, and the related condensed statements of consolidated income and cash flows for the three-month periods ended September 30, 2006 and 2005. These interim financial statements are the responsibility of the Company's management.

We conducted our reviews in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States), the objective of which is the expression of an opinion regarding the financial statements taken as a whole.

Accordingly, we do not express such an opinion.

Based on our reviews, we are not aware of any material modifications that should be made to such condensed consolidated interim financial statements for them to be in conformity with accounting principles generally accepted in the United States of America.

We have previously audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet of Applied Industrial Technologies, Inc. and subsidiaries as of June 30, 2006, and the related statements of consolidated income, shareholders' equity, and cash flows for the year then ended (not presented herein); and in our report dated August 18, 2006, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying condensed consolidated balance sheet as of June 30, 2006 is fairly stated, in all material respects, in relation to the consolidated balance sheet from which it has been derived.

APPLIED INDUSTRIAL TECHNOLOGIES, INC. AND SUBSIDIARIES

**ITEM 2: MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS**

The following is Management's Discussion and Analysis of certain significant factors which have affected the Company's (1) financial condition at September 30, 2006 and June 30, 2006, and (2) results of operations and cash flows during the periods included in the accompanying Condensed Statements of Consolidated Income and Consolidated Cash Flows.

Overview

Net income and net income per share for the three months ended September 30, 2006 increased over the prior year period by 25.3% and 30.6%, respectively. These increases were driven in part by an 11.1% increase in sales and a 3.8% reduction in the number of average common shares outstanding.

Working capital increased to \$378 million and shareholders' equity to \$421 million at September 30, 2006. Our current ratio was 3.1 to 1. Cash provided by operations increased to \$16 million.

The Company monitors the Purchasing Managers Index (PMI) as published by the Institute for Supply Management and the Manufacturers Capacity Utilization (MCU) index published by the Federal Reserve Board and considers these indices key indicators of potential Company business environment changes. During the quarter both the MCU and the PMI index moderated downward, however they remain at levels which continue to indicate an expanding economy, albeit at a slower pace. The Company's performance traditionally lags these key indicators by up to 6 months.

The Company had 4,598 associates at September 30, 2006 and 4,490 associates at September 30, 2005. The increase over prior year is primarily attributable to a business acquired since the prior year period.

The Company had a total of 451 operating facilities at September 30, 2006 and 443 operating facilities at September 30, 2005. The increase over prior year is primarily attributable to a business acquired since the prior year period.

Results Of Operations

Three Months Ended September 30, 2006 and 2005

Sales during the three months ended September 30, 2006 increased \$49.4 million or 11.1% compared to the prior year, reflecting increased sales in both our service center based distribution segment and other businesses. The number of selling days during the three months ended September 30, 2006 was 63 days and was 64 days during the three months ended September 30, 2005.

Sales from our service center based distribution segment increased \$28.6 million or 6.9% during the three months ended September 30, 2006 from the same period in the prior year. The increase in sales was driven by the impact of supplier price increases, sales generated by acquired businesses that were not owned in the prior year period, sales mix and the impact of currency fluctuations.

Table of Contents

APPLIED INDUSTRIAL TECHNOLOGIES, INC. AND SUBSIDIARIES

**ITEM 2: MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS**

Sales from our other businesses increased \$20.8 million or 67.8% during the three months ended September 30, 2006 from the same period in the prior year. The majority of the increase between the two periods was due to sales generated by businesses acquired since the prior year period.

From a geographical perspective, sales from our Canadian operations increased \$6.8 million or 14.6% during the three months ended September 30, 2006 from the same period in the prior year. Favorable currency translation accounted for approximately two thirds of the increase between the two periods. The remaining net sales increase was due to a combination of sales mix and pricing.

During the three months ended September 30, 2006, industrial products and fluid power products accounted for 80.8% and 19.2%, respectively, of sales. In comparison, industrial products and fluid power products accounted for 83.6% and 16.4%, respectively, of sales for the same period in the prior year. The increase in the percentage of sales accounted for by fluid power products was primarily a result of the Company's acquisition of Spencer Fluid Power on September 30, 2005.

Gross profit as a percentage of sales decreased slightly to 27.4% from 27.6%. We experienced higher than expected supplier purchasing incentives and lower net freight costs during the quarter. While we continue to focus on customer pricing improvements we did experience some slight downward pricing pressure during the quarter primarily due to a temporary situation from supplier price increases. While the businesses acquired since the prior year continue to be accretive and have solid operating results, their gross margin percentages are lower than the Company average which also impacted the overall gross profit margin. Overall the gross profit margin for this quarter is slightly higher than our forecast for the remainder of the year, which remains at approximately 27.0% as our expectations are for supplier purchasing incentives to decline from the levels experienced in the first quarter.

During the quarter we experienced reductions in certain U.S. inventories that are valued using the last-in, first-out (LIFO) method. These interim inventory reductions caused a temporary liquidation of LIFO inventory quantities which are carried at lower costs. As required under generally accepted accounting principles, we did not give effect to any income statement benefit from this temporary liquidation of LIFO inventories as we expect to replace the inventory by year-end.

SD&A increased during the three months ended September 30, 2006 by \$7.3 million or 7.7% over the prior year period, but declined as a percentage of sales to 20.7% from 21.3% in the prior year period. The increase in SD&A is primarily attributable to businesses acquired since the prior year period and increases in associate compensation, some of which resulted from improved financial performance of the company.

Income tax expense as a percentage of income before taxes was 35.6% for the quarter ended September 30, 2006 compared to 37.3% for the quarter ended September 30, 2005. The lower tax rate for the quarter relates primarily to state and local tax adjustments. We expect our full-year fiscal 2007 effective tax rate to be in the range of 36.0% to 36.5%.

Table of Contents

APPLIED INDUSTRIAL TECHNOLOGIES, INC. AND SUBSIDIARIES

**ITEM 2: MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS**

As a result of the above factors, net income increased by 25.3% compared to the same quarter of last year. Net income per share increased at a higher rate of 30.6% due to the lower number of shares outstanding from the stock buyback program.

Liquidity and Capital Resources

Cash provided by operating activities for the quarter ended September 30, 2006 was \$16.1 million. This compares to approximately \$2.1 million used in operating activities in the same period a year ago. Cash flows from operations depend primarily upon generating operating income, controlling the investment in inventories and receivables, and managing the timing of payments to suppliers. During the three month period ended September 30, 2006, inventories were relatively stable and only increased approximately \$2.0 million. Accounts receivable increased \$9.1 million during the three months ended September 30, 2006 due to the overall increase in sales.

Capital expenditures were \$2.5 million for the three months ended September 30, 2006 compared to \$1.7 million in the prior year. For the entire year the Company expects total capital expenditures to be in the range of \$10.0 to \$12.0 million. Depreciation expense for the entire year is expected to be within the range of \$13.0 million to \$14.0 million. Share-based compensation and amortization of intangibles and other assets as reported on the condensed statements of consolidated cash flows is expected to be in the range of \$5.0 million to \$5.5 million for the entire year.

The Company has a \$100.0 million revolving credit facility with a group of banks expiring in June 2010. The Company had no borrowings outstanding under this facility at September 30, 2006. Unused lines under this facility, net of outstanding letters of credit, total \$94.7 million, and are available to fund future acquisitions or other capital and operating requirements.

The Company has an agreement with Prudential Investment Management, Inc. expiring in February 2007, for an uncommitted shelf facility that enables the Company to borrow up to \$100.0 million in additional long-term financing at the Company's discretion with terms of up to twelve years. At September 30, 2006, there was no borrowing under this agreement.

The Company's long-term debt matures as follows: \$50.0 million due in fiscal 2008 and \$25.0 million due in fiscal 2011.

The Board of Directors has authorized the purchase of shares of the Company's common stock for the purpose of funding benefit programs, stock option and award programs, and future business acquisitions. These purchases may be made in open market and negotiated transactions, from time to time, depending upon market conditions. The Company acquired 520,900 shares of its common stock for \$12.4 million during the three months ended September 30, 2006. At September 30, 2006, the Company had remaining authorization to repurchase 979,100 additional shares.

AND RESULTS OF OPERATIONS**

Cautionary Statement Under Private Securities Litigation Reform Act

Management's Discussion and Analysis and other sections of this report, including documents incorporated by reference, contain statements that are forward-looking, based on management's current expectations about the future. Forward-looking statements are often identified by qualifiers such as expect, expectation, forecast, believe, intend, similar expressions. Similarly, descriptions of objectives, strategies, plans, or goals are also forward-looking statements. These statements may discuss, among other things, expected growth, future sales, future cash flows, future capital expenditures, future performance, and the anticipation and expectations of the Company and its management as to future occurrences and trends. The Company intends that the forward-looking statements be subject to the safe harbors established in the Private Securities Litigation Reform Act of 1995 and by the Securities and Exchange Commission in its rules, regulations, and releases.

Readers are cautioned not to place undue reliance on any forward-looking statements. All forward-looking statements are based on current expectations regarding important risk factors, many of which are outside the Company's control. Accordingly, actual results may differ materially from those expressed in the forward-looking statements, and the making of those statements should not be regarded as a representation by the Company or any other person that the results expressed in the statements will be achieved. In addition, the Company assumes no obligation publicly to update or revise any forward-looking statements, whether because of new information or events, or otherwise, except as may be required by law.

Important risk factors include, but are not limited to, the following: risks relating to the operations levels of customers and the economic factors that affect them; reduced demand for the Company's products in targeted markets due to reasons including consolidation in customer industries and the transfer of manufacturing capacity to foreign countries; changes in customer preferences for products and services of the nature and brands sold by the Company; changes in customer procurement policies and practices; changes in the price for products and services relative to the cost of providing them; loss of key supplier authorizations, lack of product availability, or changes in supplier distribution programs; competitive pressures; the cost of products and energy and other operating costs; disruption of the Company's information systems; the Company's ability to retain and attract qualified sales and customer service personnel; the Company's ability to identify and complete future acquisitions, integrate them effectively, and realize their anticipated benefits; disruption of operations at the Company's headquarters or distribution centers; risks and uncertainties associated with the Company's foreign operations, including more volatile economic conditions, political instability, cultural and legal differences, and currency exchange fluctuations; risks related to legal proceedings to which we are a party; the variability and timing of new business opportunities including acquisitions, alliances, customer relationships, and supplier authorizations; the incurrence of debt and contingent liabilities in connection with acquisitions; our ability to access capital markets as needed; changes in accounting policies and practices; organizational changes within the Company; the volatility of the Company's stock price and the resulting impact on our financial statements;

AND RESULTS OF OPERATIONS**

adverse regulation and legislation; and the occurrence of extraordinary events (including prolonged labor disputes, natural events and acts of god, terrorist acts, fires, floods, and accidents). Other factors and unanticipated events could also adversely affect the Company's business, financial condition, or results of operations. We discussed certain of these matters more fully in our Annual Report on Form 10-K for the year ended June 30, 2006.

ITEM 3: QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The Company has evaluated its exposure to various market risk factors, including but not limited to, interest rate, foreign currency exchange and commodity price risks. The Company is primarily affected by market risk exposure through the effects of changes in interest rates and foreign exchange rates.

The Company manages interest rate risk through the use of a combination of fixed rate long-term debt and variable rate borrowings under its committed revolving credit agreement and interest rate swaps. The Company had no variable rate borrowings outstanding under its committed revolving credit agreement at September 30, 2006. The Company has no interest rate swap agreements outstanding. All of the Company's outstanding long-term debt is currently at fixed interest rates at September 30, 2006 and scheduled for repayment in December 2007 and beyond.

The Company mitigates its foreign currency exposure from the Canadian dollar through the use of cross currency swap agreements as well as foreign-currency denominated debt. Hedging of the U.S. dollar denominated debt, used to fund a substantial portion of the Company's net investment in its Canadian operations, is accomplished through the use of cross currency swaps. Any gain or loss on the hedging instrument offsets the gain or loss on the underlying debt. Translation exposures with regard to our Mexican business are not hedged because the Mexican activity is not material. For the three months ended September 30, 2006, a uniform 10% strengthening of the U.S. dollar relative to foreign currencies that affect the Company would have resulted in a \$0.3 million decrease in net income. A uniform 10% weakening of the U.S. dollar would have resulted in a \$0.3 million increase in net income.

ITEM 4: CONTROLS AND PROCEDURES

The Company maintains a set of disclosure controls and procedures designed to ensure that information required to be disclosed by the Company in reports that it files or submits under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms. An evaluation was carried out under the supervision and with the participation of the Company's management, including the Chief Executive Officer (CEO) and Chief Financial Officer (CFO), of the effectiveness of the Company's disclosure controls and procedures as of the end of the period covered by this report. Based on that evaluation, these officers have concluded that the Company's disclosure controls and procedures are effective. During the first quarter of fiscal 2007, there were no material changes in the Company's internal controls or in other factors that materially affected, or are reasonably likely to materially affect, the Company's internal controls over financial reporting.

Table of Contents

PART II. OTHER INFORMATION

ITEM 1. Legal Proceedings.

The Company has been named a defendant in pending legal proceedings with respect to various product liability, commercial, and other matters. Although it is not possible to predict the outcome of these unresolved actions or the range of possible loss, the Company does not believe, based on circumstances currently known, that any liabilities that may result from these proceedings are reasonably likely to have a material adverse effect on the Company's consolidated financial position, results of operations, or cash flows.

ITEM 2. Unregistered Sales of Equity Securities and Use of Proceeds.

Repurchases in the quarter ended September 30, 2006 were as follows:

Period	(a) Total Number of Shares	(b) Average Price Paid per Share (\$)	(c) Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	(d) Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs
July 1, 2006 to July 31, 2006	-0-	-0-	-0-	1,500,000
August 1, 2006 to August 31, 2006	40,000	22.52	40,000	1,460,000
September 1, 2006 to September 30, 2006	480,900	23.93	480,900	979,100
Total	520,900	23.82	520,900	979,100

(1) On July 18, 2006, the Board of Directors authorized the purchase of up to 1.5 million shares of the Company's common stock. The Company publicly announced the authorization that day. These purchases may be made in the open market or in privately negotiated transactions. This authorization is in effect until all

shares are purchased or the authorization is revoked or amended by the Board of Directors.

- (2) During the quarter the Company purchased 43 shares in connection with the exercise of stock options and other employee benefit programs. These purchases are not counted within the aforementioned Board authorization.
