Results of Power Generation in First Quarter of 2004

Huaneng Power International, Inc. (the "Company") announced its power generation in the first quarter of 2004.

This announcement is issued pursuant to Rule 13.09(2) of the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited.

Based on preliminary statistics, as of 31st March 2004, the Company's total power generation based on a consolidated basis for the first quarter of 2004 was 24.56 billion kWh, an increase of 24.04% over the same period last year on the same basis. Among the power plants of the Company, Fuzhou Power Plant, Jining Power Plant, Nantong Power Plant and Shanghai Shidongkou Second Power Plant have achieved relatively high increase rates in power generation.

The increase in power generation of the Company's power plants was mainly attributable to the following reasons:

1. Stable generation capacity of the newly operated generating units 5 and 6 of Jining Power Plant (2 x 135 MW);
2. Increase in power generation was contributed by Xindian Power Plant and Yushe Power Plant, which were acquired in 2003;
3. Significant increase in power consumption in the regions where the Company's power plants operated, thereby providing the conditions for the growth of the Company's power generation;
4. The effective arrangement of maintenance programs during the Chinese New Year and the improved reliability of the Company's generating units, together with stable coal supply, thereby assuring the growth in the Company's power generation; and
