UNITED STATES

SECURITIES AND EXCHANGE COMMISSION

WASHINGTON, D.C. 20549

FORM 10-Q

Quarterly Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

For the 13 weeks ended September 30, 2017

OR

Transition Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

For the Transition period from _____ to _____

Commission file number 1-11657

TUPPERWARE BRANDS CORPORATION

(Exact name of registrant as specified in its charter)

Delaware

(State or other jurisdiction of
incorporation or organization)

36-4062333

(I.R.S. Employer
Identification No.)

14901 South Orange Blossom Trail, Orlando, Florida 32837

(Address of principal executive offices) (Zip Code)

Registrant's telephone number, including area code: (407) 826-5050

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the Registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer

Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company

Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of October 26, 2017, 50,887,471 shares of the common stock, \$0.01 par value, of the registrant were outstanding.

Table of Contents

TUPPERWARE BRANDS CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

Note 1: Summary of Significant Accounting Policies

Basis of Presentation: The condensed consolidated financial statements include the accounts of Tupperware Brands Corporation and its subsidiaries, collectively “Tupperware” or the “Company”, with all intercompany transactions and balances having been eliminated. These condensed consolidated financial statements and related notes should be read in conjunction with the audited 2016 financial statements included in the Company's Annual Report on Form 10-K for the year ended December 31, 2016.

Certain prior year amounts have been reclassified to conform with current year presentation.

These condensed consolidated financial statements are unaudited and have been prepared following the rules and regulations of the United States Securities and Exchange Commission and, in the Company's opinion, reflect all adjustments, including normal recurring items that are necessary for a fair statement of the results for the interim periods. Certain information and note disclosures normally included in the balance sheet, statements of income, comprehensive income and cash flows prepared in conformity with accounting principles generally accepted in the United States of America have been condensed or omitted as permitted by such rules and regulations. Operating results of any interim period presented herein are not necessarily indicative of the results that may be expected for a full fiscal year.

The Company's fiscal year ends on the last Saturday of December. As a result, the 2016 fiscal year included 53 weeks with 14 weeks in the fourth quarter, whereas the 2017 fiscal year will include 52 weeks with 13 weeks in the fourth quarter.

Use of Estimates: The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions. These estimates and assumptions affect the reported amounts of assets and liabilities and disclosure of contingent liabilities at the date of the financial statements, as well as the reported amounts of revenues and expenses during the reporting period. Actual results could differ materially from these estimates.

Note 2: Shipping and Handling Costs

The cost of products sold line item includes costs related to the purchase and manufacture of goods sold by the Company. Among these costs are inbound freight charges, duties, purchasing and receiving costs, inspection costs, depreciation expense, internal transfer costs and warehousing costs of raw material, work in process and packing materials. The warehousing and distribution costs of finished goods are included in delivery, sales and administrative expense (“DS&A”). Distribution costs are comprised of outbound freight and associated labor costs. Fees billed to customers associated with the distribution of products are classified as revenue. The distribution costs included in DS&A expense for the third quarters of 2017 and 2016 were \$35.0 million and \$32.6 million, respectively, and for the year-to-date periods ended September 30, 2017 and September 24, 2016 were \$105.5 million and \$99.1 million, respectively.

Note 3: Promotional Costs

The Company frequently makes promotional offers to members of its independent sales force to encourage them to fulfill specific goals or targets for sales levels, party attendance, addition of new sales force members or other business-critical functions. The awards offered are in the form of product awards, special prizes or trips.

The Company accrues for the costs of these awards during the period over which the sales force qualifies for the award and reports these costs primarily as a component of DS&A expense. These accruals require estimates as to the cost of the awards, based upon estimates of achievement and actual cost to be incurred. During the qualification period, actual results are monitored, and changes to the original estimates are made when known. Promotional and other sales force compensation expenses included in DS&A expense totaled \$86.4 million and \$89.5 million for the third quarters of 2017 and 2016, respectively, and \$274.0 million and \$281.2 million for the year-to-date periods ended September 30, 2017 and September 24, 2016, respectively.

Note 6: Accumulated Other Comprehensive Loss

(In millions, net of tax)	Foreign Currency Items	Cash Flow Hedges	Pension and Other Post-retirement Items	Total
Balance at December 31, 2016	\$ (544.3)	\$ 4.9	\$ (32.1)	\$ (571.5)
Other comprehensive income (loss) before reclassifications	55.1	(5.4)	(5.2)	44.5
Amounts reclassified from accumulated other comprehensive loss	—	(0.6)	0.7	0.1
Net current-period other comprehensive income (loss)	55.1	(6.0)	(4.5)	44.6
Balance at September 30, 2017	\$ (489.2)	\$ (1.1)	\$ (36.6)	\$ (526.9)

(In millions, net of tax)	Foreign Currency Items	Cash Flow Hedges	Pension and Other Post-retirement Items	Total
Balance at December 26, 2015	\$ (490.6)	\$ 4.3	\$ (35.7)	\$ (522.0)
Other comprehensive income (loss) before reclassifications	(20.2)	0.2	(0.7)	(20.7)
Amounts reclassified from accumulated other comprehensive loss	—	(3.1)	1.5	(1.6)
Net current-period other comprehensive income (loss)	(20.2)	(2.9)	0.8	(22.3)
Balance at September 24, 2016	\$ (510.8)	\$ 1.4	\$ (34.9)	\$ (544.3)

Pretax amounts reclassified from accumulated other comprehensive loss that related to cash flow hedges consisted of net gains of \$1.0 million and \$4.3 million for the year-to-date periods ended September 30, 2017 and September 24, 2016, respectively. Associated with these items were tax provisions of \$0.4 million and \$1.2 million, respectively. See Note 11 for further discussion of derivatives.

For the year-to-date periods ended September 30, 2017 and September 24, 2016, pretax amounts reclassified from accumulated other comprehensive loss related to pension and other post-retirement items consisted of prior service benefits of \$1.1 million in each year, actuarial losses of \$1.1 million and \$1.3 million, respectively, and pension settlement costs of \$0.9 million and \$1.5 million, respectively. The tax benefits associated with these items were \$0.2 million in each year. See Note 13 for further discussion of pension and other post-retirement benefit costs.

Table of ContentsTUPPERWARE BRANDS CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)
(Unaudited)

Note 7: Re-engineering and Impairment Costs

The Company recorded \$9.0 million and \$2.4 million in re-engineering charges during the third quarters of 2017 and 2016, respectively, and \$43.9 million and \$5.4 million for the year-to-date periods ended September 30, 2017 and September 24, 2016, respectively.

In 2017, these charges were primarily related to restructuring actions taken in connection with the Company's plans, through 2018 or 2019, to rationalize its supply chain and to adjust the cost base of several marketing units. The restructuring charges also relate to the Company's decision to wind-down the Beauticontrol reporting unit due to a history of declining revenues, operating losses and the competitive environment in the direct selling channel and retail sector for beauty and personal care products in the United States, Canada and Puerto Rico. In connection with the decision to wind-down Beauticontrol, the Company also recorded \$3.2 million in cost of sales for inventory obsolescence.

The total cost of the restructuring actions is estimated to be \$100 million to \$110 million from the second quarter of 2017 forward. This excludes the benefit of selling fixed assets that will become excess in light of the re-engineering actions. The Company expects about 90 percent of second quarter 2017 forward re-engineering costs to require cash outflows and for these to be funded with cash flow from operations, net of investing activities, notwithstanding the timing during each fiscal year in which the Company generates the majority of its cash. Of the total costs, the Company estimates that about 80 percent relates to severance and benefits related to headcount reductions, while the balance is predominantly related to costs to exit leases and other contracts, as well as write-offs of excess assets for which there are not expected to be disposal proceeds.

The re-engineering charges by segment during the third quarter of 2017 and for the year-to-date period ended September 30, 2017 were as follows:

	13 weeks ended September 30, 2017	39 weeks ended September 30, 2017
(In millions)		
Europe	\$ 2.2	\$ 28.5
Asia Pacific	3.8	4.8
Tupperware North America	0.3	0.3
Beauty North America	2.7	10.3
Total re-engineering charges	\$ 9.0	\$ 43.9

In 2016, the charges were primarily related to severance costs incurred for headcount reductions in several of the Company's operations in connection with changes in its management and organizational structures.

The balances included in accrued liabilities related to re-engineering and impairment charges as of September 30, 2017 and December 31, 2016 were as follows:

(In millions)	September 30, 2017	December 31, 2016
Beginning of the year balance	\$ 1.6	\$ 1.7
Provision	43.9	7.6
Non-cash charges	(4.0)	(0.3)
Cash expenditures:		
Severance	(6.9)	(5.2)
Other	(1.5)	(2.2)
End of period balance	\$ 33.1	\$ 1.6

The accrual balance as of September 30, 2017, related primarily to severance payments to be made through the second quarter of 2018.

Table of Contents

TUPPERWARE BRANDS CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

(Unaudited)

Note 8: Goodwill and Intangible Assets

The Company's goodwill and intangible assets relate primarily to the December 2005 acquisition of the direct-to-consumer businesses of Sara Lee Corporation. The Company has early adopted Accounting Standards Update 2017-04: Simplifying the Test for Goodwill Impairment.

In the third quarter of 2017, the Company completed the annual assessments for all of its reporting units and indefinite-lived intangible assets, concluding there were no impairments. The Company performed only qualitative assessments in the third quarter of 2017.

In the second quarter of 2017, as part of its on-going assessment of goodwill and intangible assets, the Company noted that the sales, profitability and cash flow of Fuller Mexico had fallen below its recent trend lines and would fall significantly short of previous expectations for the year. As a result, the Company performed an interim impairment test as of the end of May 2017, recording an impairment charge of \$62.9 million.

The May 2017 impairment evaluation of the goodwill associated with the Fuller Mexico reporting unit involved comparing the fair value of the reporting unit to its carrying value, including the goodwill balance, after consideration of impairment to its long-lived assets. There were no impairments of any long-lived assets. The fair value analysis for Fuller Mexico was completed using a combination of the income and market approach with a 75 percent weighting on the income approach, which was considered a Level 3 measurement within the fair value hierarchy. The significant assumptions used in the income approach included estimates regarding future operations and the ability to generate cash flows, including projections of revenue, costs, utilization of assets and capital requirements. The income approach, or discounted cash flow approach, also requires an estimate as to the appropriate discount rate to be used. The most sensitive estimate in this valuation is the projection of operating cash flows, as these provide the basis for the estimate of fair market value. The Company's cash flow model used a forecast period of 10 years with annual revenue growth rates ranging from negative 10 percent to positive 4 percent, a compound average growth rate of 1.6 percent, and a 3 percent growth rate used in calculating the terminal value. The discount rate used was 15.8 percent. The growth rates were determined by reviewing historical results of the operating unit and the historical results of the Company's other similar business units, along with the expected contribution from growth strategies being implemented. The market approach relies on an analysis of publicly-traded companies similar to Tupperware and deriving a range of revenue and profit multiples. The publicly-traded companies used in the market approach were selected based on their having similar product lines of consumer goods, beauty products and/or companies using a direct-to-consumer distribution method. The resulting multiples were then applied to the reporting unit to determine fair value. The goodwill was then written down so that the carrying value of the Fuller Mexico reporting unit would equal its fair value.

With the estimated fair value of the reporting unit equaling its carrying value as of the end of the May 2017 evaluation, the Fuller Mexico reporting unit has a high risk of future impairment to the remaining goodwill balance of \$18.9 million. Fuller Mexico's performance in the third quarter of 2017 was not out of line with assumptions built into the fair value evaluation performed as of the end of May 2017, despite the impact of the natural disasters in Mexico during the third quarter of 2017. Any lingering impacts into the fourth quarter 2017 are expected to be temporary and not impactful to the long-term value of the business. A deterioration in key operating metrics, such as sales force size, and/or operating performance significantly below current expectations, including changes in projected future revenue, profitability and cash flow, as well as higher working capital, interest rates, or cost of capital, could have a negative effect on the fair value of the reporting unit. In addition, the Company is unable to predict, at this time, whether there will be a significant, long-term impact to the Fuller Mexico operations due to changes in the macro-economic environment. Should the Company's programs and strategies to improve the key performance indicators as outlined above not be able to overcome the general trends in the business and/or macro-economic factors in the time frame forecast, which could also impact the long-term discount rate values used in estimating fair value, the estimated fair value of the reporting unit could fall below its carrying value. This would result in recording an impairment to the goodwill of Fuller Mexico.

TUPPERWARE BRANDS CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

(Unaudited)

Note 9: Segment Information

The Company manufactures and distributes a broad portfolio of products, primarily through independent direct sales consultants. Certain operating segments have been aggregated based upon geography, consistency of economic substance, products, production process, class of customers and distribution method.

The Company's reportable segments include the following:

Europe	Primarily design-centric preparation, storage and serving solutions for the kitchen and home
Asia Pacific	through the Tupperware® brand. Europe also includes Avroy Shlain® in South Africa and
Tupperware	Nutrimetics® in France, which sell beauty and personal care products. Some units in Asia
North America	Pacific also sell beauty and personal care products under the NaturCare®, Nutrimetics® and
	Fuller® brands.
Beauty North America	Premium cosmetics, skin care and personal care products marketed under the
	BeautiControl® brand in the United States, Canada and Puerto Rico through the third quarter
	2017 and Fuller Cosmetics® brands in Mexico and Central America.
South America	Both housewares and beauty products under the Fuller®, Nutrimetics®, Nuvo® and
	Tupperware® brands.

Worldwide sales of beauty and personal care products totaled \$86.8 million and \$87.2 million in the third quarters of 2017 and 2016, respectively, and \$253.1 million and \$272.1 million in the respective year-to-date periods.

(a) \$95.5 million and \$84.6 million denominated in euros as of September 30, 2017 and December 31, 2016, respectively.

Credit Agreement

As of September 30, 2017, the Company had a weighted average interest rate on outstanding LIBOR based borrowings of 2.1 percent under its multicurrency Amended and Restated Credit Agreement (“Credit Agreement”). At September 30, 2017, the Company had \$494.6 million of unused lines of credit, including \$407.5 million under the committed, secured Credit Agreement, and \$87.1 million available under various uncommitted lines around the world. The Credit Agreement has customary financial covenants related to interest coverage and leverage. These restrictions are not expected to impact the Company's operations. As of September 30, 2017, and currently, the Company had considerable cushion under its financial covenants.

Note 11: Derivative Instruments and Hedging Activities

The Company is exposed to fluctuations in foreign currency exchange rates on the earnings, cash flows and financial position of its international operations. Although this currency risk is partially mitigated by the natural hedge arising from the Company's local manufacturing in many markets, a strengthening U.S. dollar generally has a negative impact on the Company. In response, the Company uses financial instruments to hedge certain of its exposures and to manage the foreign exchange impact to its financial statements. At its inception, a derivative financial instrument is designated as a fair value, cash flow or net equity hedge.

Fair value hedges are entered into with financial instruments such as forward contracts, with the objective of limiting exposure to certain foreign exchange risks primarily associated with accounts payable and non-permanent intercompany transactions. For derivative instruments that are designated and qualify as fair value hedges, the gain or loss on the derivative, as well as the offsetting gain or loss on the hedged item attributable to the hedged risk, are recognized in current earnings. In assessing hedge effectiveness, the Company excludes forward points, which are considered to be a component of interest expense. The forward points on fair value hedges resulted in pretax gains of \$5.9 million and \$3.4 million in the third quarters of 2017 and 2016, respectively, and \$16.1 million and \$11.2 million for the respective year-to-date periods.

The Company also uses derivative financial instruments to hedge foreign currency exposures resulting from certain forecasted purchases and classifies these as cash flow hedges. At initiation, the Company's cash flow hedge contracts are generally for periods ranging from one to fifteen months. The effective portion of the gain or loss on the hedging instrument is recorded in other comprehensive income and is reclassified into earnings as the transactions being hedged are recorded. As such, the balance at the end of the current reporting period in other comprehensive income, related to cash flow hedges, will generally be reclassified into earnings within the next twelve months. The associated asset or liability on the open hedges is recorded in other current assets or accrued liabilities, as applicable. In assessing hedge effectiveness, the Company excludes forward points, which are included as a component of interest expense.

Table of Contents

TUPPERWARE BRANDS CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

(Unaudited)

The Company also uses financial instruments, such as forward contracts and certain euro denominated borrowings under its Credit Agreement, to hedge a portion of its net equity investment in international operations and classifies these as net equity hedges. Changes in the value of these financial instruments, excluding any ineffective portion of the hedges, are included in foreign currency translation adjustments within accumulated other comprehensive loss. The Company recorded, net of tax, in other comprehensive income a net loss of \$3.8 million and \$35.9 million associated with these hedges in the third quarter and year-to-date periods of 2017, respectively, and a net gain of \$6.5 million and \$9.9 million associated with such hedges for the respective periods of 2016. Due to the permanent nature of the investments, the Company does not anticipate reclassifying any portion of these amounts to the income statement in the next twelve months. In assessing hedge effectiveness, the Company excludes forward points, which are included as a component of interest expense.

While the forward contracts used for net equity and fair value hedges of non-permanent intercompany balances mitigate its exposure to foreign exchange gains or losses, they result in an impact to operating cash flows as they are settled, whereas the hedged items do not generate offsetting cash flows. The net cash flow impact of these currency hedges for the year-to-date periods ended September 30, 2017 and September 24, 2016 was an inflow of \$5.8 million and an outflow of \$5.6 million, respectively.

The Company considers the total notional value of its forward contracts as the best measure of the volume of derivative transactions. As of September 30, 2017 and December 31, 2016, the notional amounts of outstanding forward contracts to purchase currencies were \$157.2 million and \$116.7 million, respectively, and the notional amounts of outstanding forward contracts to sell currencies were \$167.7 million and \$109.6 million, respectively. As of September 30, 2017, the notional values of the largest positions outstanding were to purchase \$123.4 million of U.S. dollars and \$23.8 million of euro and to sell \$46.4 million of Swiss francs and \$36.7 million of Mexican pesos. The following table summarizes the Company's derivative positions, which are the only assets and liabilities recorded at fair value on a recurring basis, and the impact they had on the Company's financial position as of September 30, 2017 and December 31, 2016. Fair values were determined based on third party quotations (Level 2 fair value measurement):

Derivatives designated as hedging instruments (in millions)	Asset derivatives		Fair value		Liability derivatives		Fair value	
	Balance sheet location	Non-trade amounts receivable	Sep 30 2017	Dec 31, 2016	Balance sheet location	Sep 30 2017	Dec 31, 2016	
Foreign exchange contracts			\$ 15.2	\$ 41.1	Accrued liabilities	\$ 23.0	\$ 31.7	

The following table summarizes the impact of the Company's fair value hedging positions on the results of operations for the third quarters of 2017 and 2016:

Derivatives designated as fair value hedges (in millions)	Location of gain or (loss) recognized in income on derivatives	Amount of gain or (loss) recognized in income on derivatives		Location of gain or (loss) recognized in income on related hedged items	Amount of gain or (loss) recognized in income on related hedged items

TUPPERWARE BRANDS CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

(Unaudited)

Note 12: Fair Value Measurements

Due to their short maturities or their insignificance, the carrying amounts of cash and cash equivalents, accounts and notes receivable, accounts payable, accrued liabilities and short-term borrowings approximated their fair values at September 30, 2017 and December 31, 2016. The Company estimates that, based on current market conditions, the value of its 4.75%, 2021 senior notes was \$639.8 million at September 30, 2017, compared with the carrying value of \$599.5 million. The higher fair value resulted from changes, since issuance, in the corporate debt markets and investor preferences. The fair value of debt is classified as a Level 2 liability, and is estimated using quoted market prices as provided in secondary markets that consider the Company's credit risk and market related conditions. See Note 11 to the Consolidated Financial Statements for discussion of the Company's derivative instruments and related fair value measurements.

Note 13: Retirement Benefit Plans

Components of net periodic benefit cost for the third quarter and year-to-date periods ended September 30, 2017 and September 24, 2016 were as follows:

	Third Quarter				Year-to-Date			
	Pension benefits		Post-retirement benefits		Pension benefits		Post-retirement benefits	
(In millions)	2017	2016	2017	2016	2017	2016	2017	2016
Service cost	\$2.7	\$2.7	\$—	\$0.1	\$8.1	\$8.1	\$0.1	\$0.1
Interest cost	1.4	1.6	0.2	0.2	4.2	4.8	0.5	0.6
Expected return on plan assets	(1.2)	(1.3)	—	—	(3.6)	(4.0)	—	—
Settlement/curtailment	0.1	0.9	—	—	0.9	1.5	—	—
Net amortization	0.4	0.4	(0.4)	(0.3)	1.0	1.2	(1.0)	(1.0)
Net periodic benefit cost	\$3.4	\$4.3	\$(0.2)	\$—	\$10.6	\$11.6	\$(0.4)	\$(0.3)

During the year-to-date periods ended September 30, 2017 and September 24, 2016, approximately \$0.9 million and \$1.7 million, respectively, of pretax expenses were reclassified from other comprehensive income to a component of net periodic benefit cost. As they relate to non-U.S. plans, the Company uses current exchange rates to make these reclassifications. The impact of exchange rate fluctuations is included on the net amortization line of the table above.

Note 14: Income Taxes

The effective tax rate for the third quarter and year-to-date periods of 2017 were 44.3 percent and 43.4 percent compared with 38.4 percent and 30.4 percent for the comparable 2016 periods. The change in the year-to-date rate was due to the impairment and other charges, for which limited tax benefits were available.

As of September 30, 2017 and December 31, 2016, the Company's gross unrecognized tax benefit was \$18.9 million and \$20.7 million, respectively. The Company estimates that as of September 30, 2017, approximately \$18.3 million of the unrecognized tax benefits, if recognized, would impact the effective tax rate. Interest and penalties related to uncertain tax positions in the Company's global operations are recorded as a component of the provision for income taxes. Accrued interest and penalties were \$7.8 million and \$7.1 million as of the periods ended September 30, 2017 and December 31, 2016, respectively. For year-to-date 2017, the accrual for uncertain tax positions decreased by \$3.1 million as a result of the closure of audits and statute limitation expirations in various jurisdictions.

Table of ContentsTUPPERWARE BRANDS CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)
(Unaudited)

The Company estimates that it may settle one or more audits in the next twelve months that may result in cash payments decreasing the amount of accrual for uncertain tax positions by up to \$1.3 million. For the remaining balance as of September 30, 2017, the Company is not able to reliably estimate the timing or ultimate settlement amount. While the Company does not currently expect material changes, it is possible that the amount of unrecognized benefit with respect to the uncertain tax positions will significantly increase or decrease related to audits in various foreign jurisdictions that may conclude during that period or new developments that could also, in turn, impact the Company's assessment relative to the establishment of valuation allowances against certain existing deferred tax assets. These valuation allowances relate to tax assets in jurisdictions where it is management's best estimate that there is not a greater than 50 percent probability that the benefit of the assets will be realized in the associated tax returns. The likelihood of realizing the benefit of deferred tax assets is assessed on an ongoing basis. This assessment requires estimates as to future operating results, as well as an evaluation of the effectiveness of the Company's tax planning strategies. At this time, the Company is not able to make a reasonable estimate of the range of impact on the balance of unrecognized tax benefits or the impact on the effective tax rate related to these items.

Note 15: Statement of Cash Flow Supplemental Disclosure

Under the Company's stock incentive programs, in certain jurisdictions, employees are allowed to use shares retained by the Company to satisfy minimum statutorily required withholding taxes. In the year-to-date periods ended September 30, 2017 and September 24, 2016, 9,256 and 21,189 shares, respectively, were retained to fund withholding taxes, with values totaling \$0.6 million and \$1.1 million, respectively, which were included as stock repurchases in the Consolidated Statements of Cash Flows.

Note 16: Stock Based Compensation

Stock option activity for 2017 is summarized in the following table:

	Shares subject to option	Weighted average exercise price per share	Aggregate intrinsic value (in millions)
Outstanding at December 31, 2016	2,722,965	\$ 57.78	
Expired / Forfeited	(42,087)	67.18	
Exercised	(202,486)	49.32	
Outstanding at September 30, 2017	2,478,392	\$ 58.31	\$ 13.9
Exercisable at September 30, 2017	1,374,991	\$ 58.28	\$ 9.8

The intrinsic value of options exercised totaled \$4.0 million and \$0.9 million in the year-to-date periods of 2017 and 2016, respectively, and was not material in the third quarters of 2017 and 2016.

The Company also has time-vested, performance-vested and market-vested share awards. The activity for such awards in 2017 is summarized in the following table:

	Shares outstanding	Weighted average grant date fair value
December 31, 2016	602,940	\$ 61.28
Time-vested shares granted	37,683	65.03
Market-vested shares granted	25,170	61.29
Performance shares granted	76,615	60.39
Performance share adjustments	22,505	58.92
Vested	(60,037)	73.11
Forfeited	(41,275)	63.14
September 30, 2017	663,601	\$ 60.12

Table of Contents

TUPPERWARE BRANDS CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

(Unaudited)

Compensation expense related to the Company's stock based compensation for the third quarter and year-to-date periods ended September 30, 2017 and September 24, 2016 were as follows:

(In millions)	Third		Year-to-Date	
	Quarter	2016	2017	2016
Stock options	\$0.7	\$0.6	\$ 2.2	\$ 1.9
Time, performance and market vested share awards	4.2	4.2	11.9	11.1

As of September 30, 2017, total unrecognized stock based compensation expense related to all stock based awards was \$21.9 million, which is expected to be recognized over a weighted average period of 1.7 years.

Note 17: Allowance for Long-Term Receivables

As of September 30, 2017, \$13.9 million of long-term receivables from both active and inactive customers were considered past due, the majority of which were reserved through the Company's allowance for uncollectible accounts. The balance of the allowance for long-term receivables as of September 30, 2017 was as follows:

(In millions)

Balance at December 31, 2016	\$ 11.0
Write-offs	(0.4)
Provision and reclassifications	4.3
Currency translation adjustment	1.6
Balance at September 30, 2017	\$ 16.5

Note 18: Guarantor Information

The Company's payment obligations under its senior notes due in 2021 are fully and unconditionally guaranteed, on a senior secured basis, by Dart Industries Inc. (the "Guarantor"). The guarantee is secured by certain "Tupperware" trademarks and service marks owned by the Guarantor.

Condensed consolidated financial information as of September 30, 2017 and December 31, 2016 and for the quarter and year-to-date periods ended September 30, 2017 and September 24, 2016 for Tupperware Brands Corporation (the "Parent"), the Guarantor and all other subsidiaries (the "Non-Guarantors") is as follows.

Each entity in the consolidating financial information follows the same accounting policies as described in the consolidated financial statements, except for the use by the Parent and Guarantor of the equity method of accounting to reflect ownership interests in subsidiaries that are eliminated upon consolidation. The Guarantor is 100% owned by the Parent, and there are certain entities within the Non-Guarantors classification that the Parent owns directly. There are no significant restrictions on the ability of either the Parent or the Guarantor to obtain adequate funds from their respective subsidiaries by dividend or loan that should interfere with their ability to meet their operating needs or debt repayment obligations.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

(Unaudited)

Note 19: New Accounting Pronouncements

In August 2017, the FASB issued an amendment to existing guidance on hedge accounting. Under the amendment, the impact of both the effective and ineffective components of a hedging relationship is required to be recorded in the same income statement line. After initial qualification, a qualitative assessment of effectiveness is permitted instead of a quantitative test for certain hedges. This guidance is effective for fiscal years beginning after December 15, 2018, and interim periods within those fiscal years. Early adoption is permitted. The Company estimates between \$10 million and \$15 million in interest expense will be reclassified into other line items of the Consolidated Statement of Income as a result of adoption of this amendment.

In May 2017, the FASB issued an amendment to existing guidance on stock compensation to provide clarity and reduce diversity in modification accounting. Under the amendment, modification accounting is to be applied unless the fair value, vesting conditions and classification of the modified award are the same as that of the original award immediately before the modification. This guidance is effective for fiscal years beginning after December 15, 2017, and interim periods within those fiscal years. Early adoption is permitted. The Company does not expect an impact from the adoption of this amendment on its Consolidated Financial Statements.

In March 2017, the FASB issued an amendment to existing guidance on presentation of net periodic pension and post-retirement benefit costs. Under the amendment, the service cost component will be presented in the same income statement line item as other compensation costs arising from services rendered during the period. The other components of the net periodic benefit cost will be presented separately from the service cost and outside operating income subtotal. Only the service cost will be eligible for capitalization in assets. This guidance is effective for fiscal years beginning after December 15, 2017, and interim periods within those fiscal years. Early adoption is permitted. The Company does not expect a significant impact from the adoption of this amendment on its Consolidated Financial Statements.

In May 2014, the FASB issued an amendment to existing guidance regarding revenue from contracts with customers. The amendment outlines a single comprehensive model for entities to use in accounting for revenue arising from contracts with customers. Subsequently, the FASB has issued several other amendments clarifying specific topics within the scope of the new guidance regarding contracts with customers. This guidance is effective for fiscal years beginning after December 15, 2017, and interim periods within those fiscal years. The Company has surveyed revenue recognition policies and sales incentives programs across each of its global operating segments, and has evaluated the impact of the adoption of this amendment on its Consolidated Financial Statements. While there are expected to be changes in policy in certain units, the impact to the Consolidated Financial Statements is not expected to be significant, as the majority of the Company's transactions are not accounted for under industry-specific guidance that will be superseded by the new guidance, and generally only consists of a single performance obligation to transfer non-customized, promised goods. The Company expects to use the modified retrospective method of adoption beginning January 2018.

In October 2016, the FASB issued an amendment to existing guidance on income tax consequences of intra-entity transfers of assets other than inventory. Under the amendment, the income tax consequences of an intra-entity transfer of an asset other than inventory will be recognized when the transfer occurs. This guidance is effective for fiscal years beginning after December 15, 2017, and interim periods within those fiscal years. Early adoption is permitted. The Company does not expect a significant impact from the adoption of this amendment on its Consolidated Financial Statements.

In February 2016, the FASB issued an amendment to existing guidance on lease accounting that requires the assets and liabilities arising from operating leases be presented in the balance sheet. This guidance is effective for fiscal years beginning after December 15, 2018. Early adoption is permitted. The Company is currently evaluating the specific impact of the adoption of this amendment on its Consolidated Financial Statements, though it does expect an increase in both assets and liabilities upon adoption due to recognition of operating lease assets and related liabilities.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following is a discussion of the results of operations for the 13 and 39 weeks ended September 30, 2017, compared with the 13 and 39 weeks ended September 24, 2016, and changes in financial condition during the 39 weeks ended September 30, 2017. The Company's fiscal year ends on the last Saturday of December. As a result, the 2016 fiscal year included 53 weeks with 14 weeks in the fourth quarter, whereas the 2017 fiscal year will include 52 weeks with 13 weeks in the fourth quarter.

The Company's primary means of distributing its products is through independent sales organizations and individuals, which in many cases are also its customers. The vast majority of the Company's products are, in turn, sold to end consumers who are not members of its sales force. The Company is largely dependent upon these independent sales organizations and individuals to reach end consumers, and any significant disruption of this distribution network would have a negative financial impact on the Company and its ability to generate sales, earnings and operating cash flows. The Company's primary business drivers are the size, activity, diversity and productivity of its independent sales organizations.

As the impacts of foreign currency translation are an important factor in understanding period-to-period comparisons, the Company believes the presentation of results on a local currency basis, as a supplement to reported results, helps improve readers' ability to understand the Company's operating results and evaluate performance in comparison with prior periods. The Company presents local currency information that compares results between periods as if current period exchange rates had been used to translate results in the prior period. The Company uses results on a local currency basis as one measure to evaluate performance. The Company generally refers to such amounts as calculated on a "local currency" basis, or "excluding the impact of foreign currency." These results should be considered in addition to, not as a substitute for, results reported in accordance with generally accepted accounting principles in the United States ("GAAP"). Results on a local currency basis may not be comparable to similarly titled measures used by other companies.

Table of Contents

Reported sales increased 3 percent compared with the third quarter of 2016. Excluding the impact of changes in foreign currency exchange rates, sales increased 2 percent. The Company defines established market economies as those in Western Europe (including Scandinavia), Australia, Canada, Japan, New Zealand, and the United States. All other countries are classified as having emerging market economies. The Company's businesses operating in emerging market economies had a 3 percent increase in local currency sales, primarily in Argentina, Brazil and China, partially offset by decreases in Fuller Mexico, India and Indonesia. Local currency sales in the Company's businesses that operate in established economy markets, as a group, decreased 1 percent compared with 2016, primarily driven by Europe, Nutrimetics Australia and New Zealand, partially offset by increases at Beauticontrol and in the Tupperware business in the United States and Canada.

Operating and net income decreased 25 and 36 percent, respectively, in the third quarter, including \$0.9 million and \$0.5 million positive impacts from changes in foreign currency exchange rates, respectively. In 2017 versus 2016, net income included \$20.1 million lower pre-tax gains from real estate transactions, higher pre-tax re-engineering costs in connection with the Company's restructuring plan announced in July 2017, as well as operating costs associated with the Company's decision to wind-down Beauticontrol.

Sales for the year-to-date period increased 3 percent on both a reported and local currency basis. The factors impacting the year-to-date sales were similar to those impacting the third quarter comparisons, along with increased sales in Tupperware Mexico and South Africa, while sales at Beauticontrol decreased on a year-to-date basis. The factors impacting the year-to-date net income comparison were similar to the quarter comparison, along with \$62.9 million goodwill impairment related to Fuller Mexico and lower segment profit in Europe.

Net cash flow from operating activities for the periods ending September 30, 2017 and September 24, 2016 were inflows of \$80.8 million and \$92.3 million, respectively. The unfavorable comparison primarily reflected less collections of accounts receivable mainly due to the higher balance at December 2015 versus 2016, and their subsequent collection, higher cash tax payments in the first nine months of 2017, and a larger outflow from inventory production and procurement. The net impact of these items was partially offset by a decrease in the outflow of cash related to other net working capital items, particularly payables due to the timing of payments around year-end.

Net Sales

Reported sales increased 3 percent in the third quarter. Excluding the impact of changes in foreign currency exchange rates, sales increased 2 percent. The average impact of higher prices was 2 percent.

The Company's emerging market units accounted for 71 percent of sales in the third quarters of 2017 and 2016. In 2017, reported sales in these units increased \$13.9 million, or 4 percent, which included a positive \$1.7 million impact from foreign currency exchange rates. The units with the most significant increases were mainly in Argentina, from higher prices associated with high inflation, in Brazil, due to a larger sales force size, and in China, from higher productivity, including from the addition of members that are customers of the studios and digital marketing initiatives. The sales growth in these units was partially offset by fewer active sellers in Fuller Mexico, India and Indonesia, as well as lower productivity in Indonesia. The average impact of higher prices in the emerging market units was 3 percent.

Reported sales in the established market units increased 3 percent. Excluding a positive \$4.8 million impact of changes in foreign currency exchange rates, sales decreased 1 percent, with the most significant decreases in France, and Nutrimetics Australia and New Zealand, due to fewer active sellers, and in Germany from a smaller sales force and lower productivity. These decreases were partially offset by increases at Beauticontrol, in connection with sales force stocking during the wind-down period, and the United States and Canada from a larger and more active sales force. The average impact of pricing in the established markets was negative 3 percent with about half from significant discounting at Beauticontrol, as well as more aggressive promotional activity.

On a year-to-date basis, emerging markets accounted for 69 percent and 67 percent of total Company sales in 2017 and 2016, respectively. Total sales on a reported basis in the emerging markets increased \$67.6 million or 6 percent. Total sales on a reported basis in the established markets decreased \$12.6 million, or 2 percent. The impact of foreign currency exchange rates was not significant on the year-to-date comparisons of either the emerging or established markets. The sources of the year-to-date fluctuations largely followed those of the third quarter comparison, along with increased sales from larger sales forces in Tupperware Mexico and South Africa, while sales at Beauticontrol

decreased on a year-to-date basis.

28

Table of Contents

A more detailed discussion of the sales results by reporting segment is included in the segment results section below. As discussed in Note 3 to the Consolidated Financial Statements, the Company includes promotional costs in delivery, sales and administrative expense (DS&A). As a result, the Company's net sales may not be comparable with other companies that treat these costs as a reduction of revenue.

Gross Margin

Gross margin as a percentage of sales was 66.1 percent and 67.7 percent in the third quarters of 2017 and 2016, respectively. The decrease of 1.6 percentage points ("pp") primarily reflected an unfavorable mix of products sold and higher discounting, mainly in light of the winding down of Beauticontrol operations (0.5 pp), higher resin costs (0.4 pp), more of an impact from inventory in Venezuela being included in cost of goods sold in 2017 at its stronger, historical exchange rate rather than the rate used to translate its sales compared with the impact in third quarter 2016 (0.4 pp), a higher obsolescence, mainly in light of the winding down of Beauticontrol operations (0.3 pp), and higher manufacturing costs (0.2 pp). This was partially offset by a favorable mix impact from relatively higher sales in certain units with higher than average gross margins (0.2 pp).

For the year-to-date periods, gross margin as a percentage of sales was 67.4 percent in 2017, compared with 67.9 percent for the same period of 2016. The factors leading to the 0.5 pp decrease were primarily an unfavorable mix of products sold and higher discounting, mainly at Beauticontrol and in Europe (1.0 pp), higher resin costs (0.2 pp), a negative translation impact of changes in foreign currency exchange rates, mainly in South America (0.2 pp) and higher obsolescence, mainly in light of the winding down of Beauticontrol operations (0.1 pp). This was partially offset by lower manufacturing costs (0.7 pp) and a favorable mix impact from relatively higher sales in certain units with higher than average gross margins (0.3 pp).

As discussed in Note 2 to the Consolidated Financial Statements, the Company includes costs related to the distribution of its products in DS&A. As a result, the Company's gross margin may not be comparable with other companies that include these costs in costs of products sold.

Costs and Expenses

DS&A as a percentage of sales was 52.6 percent in the third quarter of 2017, compared with 54.5 percent in 2016. The comparison reflected more efficient promotional spending primarily in Europe, Asia Pacific and Beauty North America (1.6 pp), lower marketing costs in Europe and Beauty North America (0.4 pp), accrual adjustments in the United States and Canada (0.4 pp), a positive impact from the translation effect of changes in foreign currency exchange rates (0.3 pp), and lower administrative expenses in Europe (0.2 pp). This was partially offset by increased commissions from higher sales at Beauticontrol (0.3 pp), higher bad debt expense in Europe and South America (0.3 pp), increased selling expenses in Asia Pacific and South America (0.2 pp) and higher distribution costs in Europe and Tupperware North America (0.3 pp).

For the year-to-date periods, DS&A as a percentage of sales decreased to 52.9 percent from 54.0 percent in 2016. The factors impacting the year-to-date comparison were largely the same as those impacting the quarterly comparison. Specific segment impacts are discussed in the segment results section.

Table of Contents

Re-engineering Costs

Refer to Note 7 to the Consolidated Financial Statements for a discussion of re-engineering activities and accruals. The Company recorded \$9.0 million and \$2.4 million in re-engineering charges during the third quarters of 2017 and 2016, respectively, and \$43.9 million and \$5.4 million for the year-to-date periods ended September 30, 2017 and September 24, 2016, respectively.

In 2017, these charges were primarily related to restructuring actions taken in connection with the Company's plans, through 2018 or 2019, to rationalize its supply chain and to adjust the cost base of several marketing units. The restructuring charges also relate to the Company's decision to wind-down the Beauticontrol reporting unit due to a history of declining revenues, operating losses and the competitive environment in the direct selling channel and retail sector for beauty and personal care products in the United States, Canada and Puerto Rico. In connection with the decision to wind-down Beauticontrol, the Company recorded \$3.2 million in cost of sales for inventory obsolescence, as well as \$1.5 million in operating losses in light of significant discounting, during the third quarter of 2017.

In addition to the amounts recorded in the second and third quarter of 2017, the Company expects to record \$20 to \$25 million of pretax restructuring costs in the fourth quarter of 2017 and, including these 2017 amounts, a total of \$100 to \$110 million through 2018 or 2019. This excludes the benefit of selling fixed assets that become excess in connection with the re-engineering actions to be undertaken. The proceeds associated with such sales are expected to be up to \$35 million. Of the total \$100 million to \$110 million in costs, the Company estimates that about 80 percent relates to severance and benefits, while the balance is predominantly related to costs to exit leases and other contracts, as well as write-offs of excess assets for which there are not expected to be disposal proceeds. The 2017 cash outflow related to the restructuring actions, including the wind-down of Beauticontrol, is expected to be about \$25 million, and including this amount, the total cash outflow in connection with the actions over time is expected to be \$90 to \$100 million before proceeds from the sale of fixed assets connected with the re-engineering actions. The annualized benefit of these actions once fully implemented, is expected to be about \$35 million with a small amount of benefit in 2017 and about two-thirds of the annualized benefit to be realized in 2018. Savings will come mainly through lower cost of products sold, as well as lower DS&A expense.

In 2016, the charges were primarily related to severance costs incurred for headcount reductions in several of the Company's operations in connection with changes in its management and organizational structures.

Goodwill and Indefinite-lived Intangible Assets

The Company's goodwill and intangible assets relate primarily to the December 2005 acquisition of the direct-to-consumer businesses of Sara Lee Corporation. The Company has early adopted Accounting Standards Update 2017-04: Simplifying the Test for Goodwill Impairment.

In the third quarter of 2017, the Company completed the annual assessments for all of its reporting units and indefinite-lived intangible assets, concluding there were no impairments. The Company performed only qualitative assessments in the third quarter of 2017.

In the second quarter of 2017, as part of its on-going assessment of goodwill and intangible assets, the Company noted that the sales, profitability and cash flow of Fuller Mexico had fallen below its recent trend lines and would fall significantly short of previous expectations for the year. As a result, the Company performed an interim impairment test as of the end of May 2017, recording an impairment charge of \$62.9 million.

The impairment evaluation of the Fuller Mexico reporting unit included a fair value analysis, for which the significant assumptions included annual revenue growth rates ranging from negative 10 percent to positive 4 percent, a compound average growth rate of 1.6 percent, and a 3 percent growth rate used in calculating the terminal value. The discount rate used for Fuller Mexico was 15.8 percent, which was 1.0 percentage point higher than at the time of the annual assessment performed in the third quarter of 2016 based on changes to interest rates and other macro-economic factors in Mexico since that time.

Table of Contents

In 2016, the Company estimated the fair value of this reporting unit at an amount that exceeded its carrying value by about 20 percent. However, the estimated fair value was dependent upon the Company's ability in 2017 to overcome a trend of negative sales, profit and cash flow that began in 2011, and the discount rate to be applied not increasing. In its 2016 annual assessment for Fuller Mexico, the Company projected 1 percent growth in sales for 2017, mainly from expectations over the second half of the year. Since 2011, local currency sales have declined an average of 5 percent, ranging from negative 2 percent to negative 9 percent. Local currency sales declined 9 percent in the first quarter of 2017. Operating profit as a percentage of sales declined from the mid-teens in 2012 to a high-single digit in the first quarter of 2017, though at that time, this was not considered to be significantly out of line with the reporting unit's ability to meet 2017 expectations with regard to sales and profitability, particularly as sales force and other key performance metrics were trending in a positive direction. However, in April and May of 2017, the sales, profit and cash flow trends worsened significantly with declines in the mid-to-high teens and operating profit as a percentage of sales in the mid-single digits. As a result, the Company concluded, as part of its on-going process to assess goodwill and intangible assets, that a triggering event for impairment had occurred and performed the fair value analysis as described. Since 2011, Fuller Mexico has been impacted by a challenging macro-economic environment, increased competition in the retail and direct selling sectors for beauty and personal care products, as well as the results of certain strategies and margin investments implemented by the Company that did not successfully change its negative trends in sales force and field manager key performance indicators necessary to grow the sales, profit and cash flow. Fuller Mexico continues to carry a total sales force size and field manager deficit as of the end of September, despite new programs aimed at higher rates of sales force additions and retention and increased activity. These programs and trends were considered as part of the fair value evaluation performed as of the end of May 2017. With the estimated fair value of the reporting unit equaling its carrying value as of the end of the May 2017 evaluation, the Fuller Mexico reporting unit has a high risk of future impairment to the remaining goodwill balance of \$18.9 million. Fuller Mexico's performance in the third quarter of 2017 was not out of line with assumptions built into the fair value evaluation performed as of the end of May 2017, despite the impact of the natural disasters in Mexico during the third quarter of 2017. Any lingering impacts into the fourth quarter 2017 are expected to be temporary and not impactful to the long-term value of the business. A deterioration in key operating metrics, such as sales force size, and/or operating performance significantly below current expectations, including changes in projected future revenue, profitability and cash flow, as well as higher working capital, interest rates, or cost of capital, could have a negative effect on the fair value of the reporting unit. In addition, the Company is unable to predict, at this time, whether there will be a significant, long-term impact to the Fuller Mexico operations due to changes in the macro-economic environment. Should the Company's programs and strategies to improve the key performance indicators as outlined above not be able to overcome the general trends in the business and/or macro-economic factors in the time frame forecast, which could also impact the long-term discount rate values used in estimating fair value, the estimated fair value of the reporting unit could fall below its carrying value. This would result in recording an impairment to the goodwill of Fuller Mexico.

Net Interest Expense

Net interest expense was \$10.7 million in the third quarter of 2017, compared with \$12.0 million in 2016. In the year-to-date periods, net interest expense was \$32.7 million in 2017, compared with \$33.8 million in 2016. The change in net interest expense in the year-over-year comparisons was primarily due to relative changes in forward points related to the Company's forward currency contracts.

Table of Contents

Tax Rate

The effective tax rate for the third quarter and year-to-date periods of 2017 were 44.3 percent and 43.4 percent compared with 38.4 percent and 30.4 percent, respectively, for the comparable 2016 periods. The change in the year-to-date rate was due to the impairment and other charges, for which limited tax benefits were available. As discussed in Note 14 to the Consolidated Financial Statements, the Company's uncertain tax positions increase the potential for volatility in its tax rate. As such, it is reasonably possible that the effective tax rates in any individual quarter will vary from the full year expectation. At this time, the Company is unable to estimate what impact that may have on any individual quarter. Under the FASB amendment to existing guidance regarding employee share-based payments, as of January 1, 2017, all excess tax benefits and tax deficits will be recognized in the income statement. As of September 30, 2017, the Company's estimated tax benefit regarding employee-share-based payments included in the 2017 effective rate was \$0.4 million. The Company's adoption of this amendment did not have a material impact in the third quarter of 2017, but may cause volatility in the future depending on the timing and intrinsic value of future share based compensation award exercises.

Net Income

Net income decreased \$17.4 million in the third quarter of 2017 compared with 2016, primarily reflecting \$20.1 million lower pre-tax gains from real estate transactions, \$6.6 million higher pre-tax re-engineering costs in connection with the Company's restructuring plan announced in July 2017, and a higher segment loss in Beauty North America in connection with the Company's decision to wind-down Beauticontrol.

Net income for the year-to-date period decreased 58 percent, compared with 2016, including a positive \$1.2 million translation impact from changes in foreign currency exchange rates. The factors impacting the comparison are largely the same as the quarter, along with the \$62.9 million impairment of goodwill related to Fuller Mexico, and increased segment profit in Tupperware South America, primarily from Brazil from higher volume of products sold from a larger sales force.

A more detailed discussion of the sales results by reporting segment is included in the segment results section below. International operations generated 91 percent of sales in the third quarters of 2017 and 2016 and 100 percent of the Company's segment profit in the third quarters of 2017 and 2016. In the year-to-date periods of 2017 and 2016, international operations, as a group generated 91 percent of sales in each year and 98 percent and 100 percent, respectively, of net segment profit.

The sale of beauty products generated 16 percent and 15 percent of sales in the third quarter and year-to-date periods of 2017, and 17 percent in the third quarter and year-to-date periods of 2016.

pppercentage points

Reported sales increased 3 percent compared with the third quarter of 2016. Excluding the impact of changes in foreign currency exchange rates, sales decreased 2 percent compared with the third quarter of 2016, reflecting more aggressive promotional pricing, along with lower volumes in the segment's established markets. Overall, prices decreased 1 percent in the third quarter.

Emerging markets accounted for \$47.7 million and \$43.6 million, or 43 percent and 41 percent of the reported sales in the segment in the third quarters of 2017 and 2016, respectively. On a local currency basis, the emerging market units' sales increased by 7 percent, primarily reflecting a larger sales force size in Tupperware South Africa and a more productive sales force in the Commonwealth of Independent States (CIS).

The established markets' reported sales decreased 1 percent. Excluding the impact of changes in foreign currency exchange rates, these markets decreased 7 percent, primarily reflecting a decrease from a smaller, less active sales force in France, as well as a smaller, less productive sales force in Germany.

Segment profit decreased \$0.6 million in the third quarter of 2017 versus 2016. Excluding the impact of changes in foreign currency exchange rates, segment profit decreased \$0.8 million, primarily due to lower sales, along with higher bad debt and distribution costs.

On a year-to-date basis, reported sales decreased 1 percent compared with 2016. Excluding the impact of changes in foreign currency exchange rates, sales in 2017 were down 2 percent compared with 2016. The factors impacting the sales comparison are largely the same as the quarter.

Year-to-date segment profit was down 23 percent and down 26 percent in local currency. The factors impacting the segment profit comparison were largely the same as those impacting the quarter.

The Euro and the South African rand were the main currencies that impacted the third quarter year-over-year sales comparison. There was no significant impact from currencies on the profit comparison. The Russian ruble, South African rand and Turkish lire impacted the year-to-date sales comparison, while South African rand had the main impact on the year-to-date profit comparison.

pppercentage points

Reported sales decreased 2 percent compared with the third quarter of 2016. Excluding the impact of changes in foreign currency exchange rates, sales decreased 1 percent. The average impact of higher prices was 1 percent. Emerging markets accounted for \$157.9 million and \$160.3 million, or 86 percent and 85 percent of the reported sales in the third quarters of 2017 and 2016, respectively. Excluding the negative \$2.1 million impact from changes in foreign currency exchange rates, sales in these units were even with 2016. The most significant decreases were in Indonesia from a smaller, less active and less productive sales force, and in India from significantly fewer active sellers in light of requirements under the federal government's direct selling guidelines and the constrained consumer spending due to implementation of a nationwide goods and services tax on July 1, 2017. This was partially offset by China, primarily related to higher studio productivity, including from digital marketing initiatives to its members, of which there were 62 percent more at the end of September 2017 compared with September 2016. China ended the quarter with 5,900 experience studios, which was 7 percent more than at the end of the third quarter of 2016. The units operating in the established markets decreased 7 percent in the third quarter of 2017, primarily related to a double digit decrease at Nutrimetics Australia & New Zealand due to a smaller sales force and a poor response to its activation campaigns during the period.

Segment profit increased 6 percent compared with the third quarter of 2016. Excluding the impact of changes in foreign currency exchange rates, segment profit was up 6 percent compared with 2016, despite lower local currency sales by the segment, primarily due to the higher sales in China, which has a much higher than average return on sales and a high contribution margin on incremental sales, and better overall management of promotional expense.

On a year-to-date basis, reported sales decreased 2 percent compared with the same period of 2016. Excluding the impact of changes in foreign currency exchange rates, sales were even with 2016. Local currency sales and segment profit variances largely mirrored those of the quarter.

The Malaysian ringgit and the Philippine peso had the most meaningful impact on the third quarter sales comparisons with no currencies having significant impact on the profit comparison. The Chinese renminbi also impacted the year-to-date sales and profit comparison.

pppercentage points

Reported sales in the third quarter of 2017 increased 7 percent compared with the third quarter of 2016. Excluding the impact of changes in foreign currency exchange rates, sales increased 4 percent due to a larger sales force size in Mexico, despite the impacts due to disruption from natural disasters, and more active sellers in the United States and Canada. The average impact of higher prices was 1 percent.

Reported segment profit increased 18 percent in the third quarter of 2017. Excluding the impact of foreign currency exchange rates, profit increased by 13 percent, reflecting higher sales with improved gross margin and lower operating expenses including accrual adjustments in the United States and Canada.

Reported sales increased 7 percent on a year-to-date basis. Excluding the impact of changes in foreign currency exchange rates, sales increased 8 percent. Year-to-date reported segment profit increased 13 percent and 14 percent on a local currency basis. Local currency sales and profit variances largely mirrored those of the quarter.

The Mexican peso was the main foreign currency that impacted the year-over-year comparisons.

- change is greater than 100%

In the third quarter of 2017, the Company announced it would wind-down its Beauticontrol business. During full year 2016, Beauticontrol sales were \$46.4 million, including \$9.8 million and \$11.5 million in the third and fourth quarters, respectively, and there was an operating loss of \$9.4 million, including \$3.2 million and \$0.9 million in the third and fourth quarters, respectively. In the first, second and third quarters of 2017, Beauticontrol sales were \$9.5 million, \$9.1 million and \$12.3 million, respectively, and operating losses were \$1.4 million, \$1.1 million and \$4.7 million, respectively.

Reported sales for the segment increased 3 percent in the third quarter of 2017. Excluding the impact of changes in foreign currency exchange rates, sales decreased 1 percent, reflecting lower sales by Fuller Mexico from fewer active sellers, in part, from the impacts of natural disasters occurring during the third quarter of 2017. This decrease was partially offset by higher sales at Beauticontrol in connection with sales force stocking during the wind-down period. On average, prices decreased 3 percent from significant discounting at Beauticontrol.

There was a \$4.6 million loss in the third quarter, primarily related to lower gross margins, including increased inventory write-offs and significant discounting in light of the winding down of Beauticontrol operations. This loss was partially offset by segment profit at Fuller Mexico that was lower than in the prior year from lower sales. There was no significant impact on the comparison from changes in exchange rates.

The year-to-date sales and segment profit trend was similar to the third quarter, except that on a year-to-date basis Beauticontrol sales were down, while its loss was lower than in 2016.

The Mexican peso was the main currency that impacted the year-over-year sales comparisons.

pppercentage points

Reported sales for the segment increased 12 percent in the third quarter of 2017. Excluding the impact of changes in foreign currency exchange rates, sales increased 13 percent. Of the 13 percent increase in local currency sales, around three-fourths of the increase reflected the impact of higher prices in the segment, mainly due to high inflation in Argentina and Venezuela.

The largest increase in local currency sales was in Brazil, the Company's largest business unit, reflecting a larger sales force, partially offset by lower productivity in light of a tough consumer spending environment. The sales in Argentina and Venezuela increased mainly from higher prices.

Reported and restated segment profit decreased \$0.3 million or 1 percent in the third quarter of 2017, despite the increased sales, primarily due to a \$2.4 million impact from inventory in Venezuela being included in cost of goods sold at the stronger, historical exchange rate when it was procured and produced rather than the rate used to translate sales in the quarter, and the transaction impact on net monetary assets from the weakening of the Venezuelan bolivar in light of the hyper-inflationary environment in the country, as well as a lower drop through to profit relative to sales from higher operating costs in Brazil.

The year-to-date sales and profit comparisons largely mirrored the quarter, except for a larger impact on sales from foreign currency exchange rates in the year-to-date period of 2017, and a more significant drop through to higher profit from higher sales in Brazil in the first half of 2017.

The Argentine peso, Brazilian real and the Venezuelan bolivar had the most significant translation impacts on the year-over-year sales comparisons, while the Brazilian real was the currency that most significantly impacted the profit comparisons.

Table of Contents

Financial Condition

Liquidity and Capital Resources: The Company's net working capital position decreased by \$9.2 million compared with the end of 2016. Excluding the impact of changes in foreign currency exchange rates, working capital decreased \$4.7 million, primarily reflecting a \$56.5 million increase in short-term borrowings, net of cash and cash equivalents and a \$17.8 million decrease related to amounts on the balance sheet for hedging activities. These local currency decreases were partially offset by a \$39.2 million increase in inventory, related to expectations for future sales and lower than expected sell through, a \$19.6 million increase in accounts receivable due to the level and timing of sales around the end of each period, and a \$1.3 million net decrease in accounts payable and accrued liabilities due to the timing of payments around year-end.

The Company continues to carry debt in connection with the \$600 million in senior notes due in 2021.

As of September 30, 2017, the Company had total borrowings of \$191.0 million outstanding under its Credit Agreement, including \$95.5 million denominated in euro.

Loans taken under the Credit Agreement bear interest under a formula that includes, at the Company's option, one of three different base rates, plus an applicable spread. The Company normally chooses LIBOR as its base rate. Although the Company's euro LIBOR base rate was below zero throughout the first nine months of 2017 and currently, under the Credit Agreement the base rate cannot be below zero. As of September 30, 2017, the Credit Agreement dictated a spread of 150 basis points, which gave the Company a weighted average interest rate on LIBOR based borrowings of 2.1 percent.

The Company routinely increases its revolver borrowings under the Credit Agreement and uncommitted lines during each quarter to fund operating, investing and financing activities and uses cash available at the end of each quarter to reduce borrowing levels. As a result, the Company incurs more interest expense and has higher foreign exchange exposure on the value of its cash during each quarter than would relate solely to the quarter end cash and debt balances.

The Credit Agreement contains customary covenants, including financial covenants requiring a minimum level of interest coverage and allowing a maximum amount of leverage. As of September 30, 2017, and currently, the Company had considerable cushion under its financial covenants. However, economic conditions, adverse changes in foreign exchange rates, lower than foreseen sales, profit and/or cash flow generation, including from restructuring actions, the payment of dividends, share repurchases or the occurrence of other events discussed under "Forward Looking Statements" and elsewhere could cause noncompliance.

At September 30, 2017, the Company had \$494.6 million of unused lines of credit, including \$407.5 million under the committed, secured Credit Agreement, and \$87.1 million available under various uncommitted lines around the world. If necessary, with the agreement of its lenders, the Company is permitted to increase its borrowing capacity under the Credit Agreement by a total of up to \$200.0 million.

See Note 10 to the Consolidated Financial Statements for further details regarding the Company's debt.

The Company monitors the third-party depository institutions that hold its cash and cash equivalents and diversifies its cash and cash equivalents among counterparties, which minimizes exposure to any one of these entities. Furthermore, the Company is exposed to financial market risk resulting from changes in interest rates, foreign currency rates and the possible liquidity and credit risks of its counterparties. The Company believes that it has sufficient liquidity to fund its working capital, capital spending needs, current and anticipated restructuring actions, as well as its current dividend. This liquidity includes to the extent that it is accessible, its cash and cash equivalents, which totaled \$118.9 million as of September 30, 2017, cash flows from operating activities, and access to its Credit Agreement, as well as access to other various uncommitted lines of credit around the world. The Company has not experienced any limitations on its ability to access its committed facility.

Table of Contents

Cash and cash equivalents (“cash”) totaled \$118.9 million as of September 30, 2017. Of this amount, \$118.4 million was held by foreign subsidiaries. Of the cash held outside of the United States, approximately 13 percent was not eligible for repatriation due to the level of past statutory earnings by the foreign units in which the cash was held or other local restrictions. An additional 19 percent of cash was held by foreign subsidiaries in which the Company's current intent is to indefinitely reinvest the cash, as it is needed for working capital and to otherwise fund on-going operations. In the event circumstances change, leading to the conclusion that these funds will not be indefinitely reinvested, the Company would need to provide at that time for the income taxes that would be triggered upon their repatriation. The remaining cash is subject to repatriation tax effects.

The Company's most significant foreign currency exposures are to the Brazilian real, Chinese renminbi, euro, Indonesian rupiah and the Mexican peso. Business units in which the Company generated at least \$100 million of sales in 2016 included Brazil, China, Germany, Indonesia, Fuller Mexico, Tupperware Mexico and Tupperware United States and Canada. Of these units, sales by Brazil and Tupperware United States and Canada exceeded \$200 million. Downturns in the Company's business in these units, including but not limited to, difficulties in making additions to, retention and activity of the Company's independent sales force or the success of new products and/or promotional programs, could adversely impact the Company's ability to generate operating cash flows.

Operating Activities: Net cash from operating activities for the year-to-date periods ended September 30, 2017 and September 24, 2016 were inflows of \$80.8 million and \$92.3 million, respectively. The unfavorable comparison primarily reflected less collections of accounts receivable mainly due to the higher balance at December 2015 versus 2016, and their subsequent collection, higher cash tax payments in the first nine months of 2017, and a larger outflow from inventory production and procurement. The net impact of these items was partially offset by a decrease in the outflow of cash related to other net working capital items, particularly payables due to the timing of payments around year-end.

Investing Activities: During the year-to-date periods of 2017 and 2016, the Company had \$52.6 million and \$38.2 million, respectively, of capital expenditures. In both 2017 and 2016, the most significant capital expenditures were related to molds. In 2017 and 2016, capital expenditures included \$13.7 million and \$9.0 million, respectively, related to supply chain capabilities, excluding molds. Partially offsetting the capital spending were proceeds from the sale of long-term assets of \$11.7 million and \$31.8 million in 2017 and 2016, respectively, primarily reflecting transactions associated with land near the Company's Orlando, Florida headquarters.

Financing Activities: Dividends paid to shareholders were \$103.9 million and \$104.0 million in the first nine months of 2017 and 2016, respectively. Proceeds received from the exercise of stock options were \$9.9 million and \$0.6 million in the first nine months of 2017 and 2016, respectively. The Company also increased revolver borrowings under its Credit Agreement by \$76.1 million for the funding of operating, investing and financing activities.

Open market share repurchases by the Company are permitted under an authorization that runs until February 1, 2020 and allows up to \$2.0 billion to be spent. There were no share repurchases under this program during the first nine months of 2017 or 2016. Since 2007, the Company had spent \$1.29 billion to repurchase 21.3 million shares under this program. Going forward, in setting share repurchase amounts, the Company expects to target over time a debt-to-EBITDA ratio of 1.75 times (as defined in the Company's Credit Agreement). The Company does not currently plan to make open market share repurchases in 2017.

Repurchases under the Company's stock incentive programs are made when employees use shares to satisfy the minimum statutorily required withholding taxes. In the year-to-date periods of 2017 and 2016, 9,256 and 21,189 shares were retained to fund withholding taxes, totaling \$0.6 million and \$1.1 million, respectively.

New Pronouncements

Item 3. Quantitative and Qualitative Disclosures About Market Risk

One of the Company's market risks is its exposure to the impact of interest rate changes on its borrowings. The Company has elected to manage this risk through the maturity structure of its borrowings and the currencies in which it borrows.

Loans taken under the Credit Agreement are of a short duration and bear interest under a formula that includes, at the Company's option, one of three different base rates, plus an applicable spread. The Company generally selects the London interbank offered rate ("LIBOR"). Although the Company's euro LIBOR base rate was below zero throughout the first nine months of 2017 and currently, under the Credit Agreement, the base rate cannot be below zero. As of September 30, 2017, the Credit Agreement dictated a spread of 150 basis points, which gave the Company a weighted average interest rate on its U.S. dollar and euro denominated LIBOR based borrowings under the Credit Agreement of 2.1 percent.

As of September 30, 2017, the Company had total borrowings of \$191.0 million outstanding under its Credit Agreement, with \$95.5 million denominated in euro. If short-term interest rates varied by 10 percent, which in the Company's case would mean short duration U.S. dollar and euro LIBOR, with all other variables remaining constant, the Company's annual interest expense would not be significantly impacted.

The Company routinely increases its revolver borrowings under the Credit Agreement and uncommitted lines during each quarter to fund operating, investing and financing activities and uses cash available at the end of each quarter to reduce borrowing levels. As a result, the Company incurs more interest expense and has higher foreign exchange exposure on the value of its cash during each quarter than would relate solely to the quarter end cash and debt balances.

A significant portion of the Company's sales and profit come from its international operations. Although these operations are geographically dispersed, which partially mitigates the risks associated with operating in particular countries, the Company is subject to the usual risks associated with international operations. These risks include local political and economic environments and relations between foreign and U.S. governments.

Another economic risk of the Company is exposure to changes in foreign currency exchange rates on the earnings, cash flows and financial position of its international operations. The Company is not able to project, in any meaningful way, the effect of these possible fluctuations on translated amounts or future earnings. This is due to the Company's constantly changing exposure to various currencies, the fact that all foreign currencies do not react in the same manner in relation to the U.S. dollar and the large number of currencies involved, although the Company's most significant income and cash flow exposures are to the Brazilian real, Chinese renminbi, euro, Indonesian rupiah and Mexican peso.

Although this currency risk is partially mitigated by the natural hedge arising from the Company's local product sourcing in many countries, a strengthening U.S. dollar generally has a negative impact on the Company. In response to this fact, the Company uses financial instruments, such as forward contracts, to hedge its exposure to certain foreign exchange risks associated with a portion of its investment in international operations. In addition to hedging against the balance sheet impact of changes in exchange rates, the hedge of investments in international operations also has the effect of hedging a portion of cash flows from those operations. The Company also hedges, with these instruments, certain other exposures to various currencies arising from amounts payable and receivable, non-permanent intercompany transactions and a portion of purchases forecasted for generally up to the following 15 months. The Company does not seek to hedge the impact of currency fluctuations on the translated value of the sales, profit or cash flow generated by its operations.

While the Company's derivatives that hedge a portion of its equity in its foreign subsidiaries and its fair value hedges of balance sheet risks all work together to mitigate its exposure to foreign exchange gains or losses, they result in an impact to operating cash flows as they are settled. For the year-to-date periods ended September 30, 2017 and September 24, 2016, the cash flow impact of these currency hedges was an inflow of \$5.8 million and an outflow of \$5.6 million, respectively.

Table of Contents

The U.S. dollar equivalent of the Company's most significant net open forward contracts as of September 30, 2017 were to buy \$123.4 million of U.S. dollars and \$23.8 million of euro and to sell \$46.4 million of Swiss francs and \$36.7 million of Mexican pesos. In agreements to sell foreign currencies in exchange for U.S. dollars, for example, an appreciating dollar versus the opposing currency would generate a cash inflow for the Company at settlement, with the opposite result in agreements to buy foreign currencies for U.S. dollars. The notional amounts change based upon changes in the Company's outstanding currency exposures. Based on rates existing as of September 30, 2017, the Company was in a net payable position of approximately \$7.8 million related to its currency hedges under forward contracts, which upon settlement, could have a significant impact on the Company's cash flow. The Company records the impact of forward points in net interest expense.

A precise calculation of the impact of currency fluctuations is not practical since some of the contracts are between non-U.S. dollar currencies. The Company continuously monitors its foreign currency exposure and expects to enter into additional contracts to hedge exposure in the future. See further discussion regarding the Company's hedging activities for foreign currency in Note 11 to the Consolidated Financial Statements.

The Company is subject to credit risks relating to the ability of counterparties of hedging transactions to meet their contractual payment obligations. The risks related to creditworthiness and non performance have been considered in the determination of fair value for the Company's foreign currency forward exchange contracts. The Company continues to closely monitor its counterparties and will take action, as appropriate and possible, to further manage its counterparty credit risk.

The Company is also exposed to rising material prices in its manufacturing operations and, in particular, the cost of oil and natural gas-based resins, including the fact that in some cases resin prices are actually in, or are based on, currencies other than that of the unit buying the resin, which introduces a currency exposure that is incremental to the exposure to changing market prices. Resins are the primary material used in production of most Tupperware® products, and the Company estimates that 2017 cost of sales will include approximately \$150 million for the cost of resin in the Tupperware® brand products it produces and has contract manufactured. The Company uses many different kinds of resins in its products. About three-fourths of its resins are "polyolefins" (simple chemical structure, easily refined from oil and natural gas), and as such, the price of these is typically strongly affected by the underlying price of oil and natural gas. The remaining one-fourth of its resins is more highly engineered, where the price of oil and natural gas plays a less direct role in determining price. With a comparable product mix and exchange rates, a 10 percent fluctuation in the cost of resin would impact the Company's annual cost of sales by approximately \$15 million compared with the prior year. In the third quarter of 2017, there was a \$2 million negative impact on its gross margin related to sales of the Tupperware® products it produced and had contract manufactured due to resin cost changes, as compared with 2016. For full year 2017 compared with 2016, there will be an estimated \$7 million negative impact of resin cost changes, on a local currency basis, on the Company's gross margin related to sales of the Tupperware® products it produces and has contract manufactured. In addition to the impact of the price of oil and natural gas, the price the Company pays for its resins is also impacted by the relative changes in supply and demand. The Company partially manages its risk associated with rising resin costs by utilizing a centralized procurement function that is able to take advantage of bulk discounts while maintaining multiple suppliers and also enters into short-term pricing arrangements. It also manages its margin through cash flow hedges in some cases, when it purchases resin in currencies, or effectively in currencies, other than that of the purchasing unit, through the pricing of its products, with price increases on its product offerings generally in line with consumer inflation in each market, and its mix of sales through its promotional programs and promotionally priced offers. It also, on occasion, makes advance material purchases to take advantage of current favorable pricing. At this point in time, the Company has determined that entering into forward contracts for resin is not practical or cost beneficial and has no such contracts in place. However, should circumstances warrant, the Company may consider such contracts in the future.

The Company has a program to sell land held for development around its Orlando, Florida headquarters ("Orlando Land"). This program is exposed to the risks inherent in the real estate development process. Included among these risks is the ability to obtain all necessary government approvals, the success of attracting tenants for commercial or residential developments in the Orlando real estate market, obtaining financing and general economic conditions, such as interest rate increases. Based on the variety of factors that impact the Company's ability to close sales transactions,

it cannot predict when the program will be completed.

Forward-Looking Statements

Certain written and oral statements made or incorporated by reference from time to time by the Company or its representatives in this report, other reports, filings with the Securities and Exchange Commission, press releases, conferences or otherwise are “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. Statements in this report or elsewhere that are not based on historical facts or information are forward-looking statements. Such forward-looking statements involve risks and uncertainties that may cause actual results to differ materially from those projected in forward-looking statements. Such risks and uncertainties include, among others, the following:

- successful recruitment, retention and productivity levels of the Company's independent sales forces;
- disruptions caused by the introduction of new or revised distributor operating models or sales force compensation systems or allegations by equity analysts, former distributors or sales force members, government agencies or others as to the legality or viability of the Company's business model, particularly in India;
- disruptions caused by restructuring activities impacting business models, the supply chain, facility closure, and the combination and exit of business units, as well as not fully realizing expected savings from actions taken;
- success of new products and promotional programs;
- the ability to implement appropriate product mix and pricing strategies;
- governmental regulation of materials used in products coming into contact with food (e.g. polycarbonate), as well as beauty, personal care and nutritional products;
 - the ability to procure and pay for at reasonable economic cost, sufficient raw materials and/or finished goods to meet current and future consumer demands at reasonable suggested retail pricing levels in certain markets, particularly Argentina, Ecuador, Egypt and Venezuela due to government regulations and restrictions;
- the impact of changes in consumer spending patterns and preferences, particularly given the global nature of the Company's business;
- the value of long-term assets, particularly goodwill and indefinite and definite lived intangibles associated with acquisitions, and the realizability of the value of recognized tax assets;
- changes in plastic resin prices, other raw materials and packaging components, the cost of converting such items into finished goods and procured finished products and the cost of delivering products to customers;
- the introduction of Company operations in new markets outside the United States;
- general social, economic and political conditions in markets, such as in Argentina, Brazil, Ecuador, Egypt, Greece, India, Kazakhstan, Russia, Turkey, Ukraine and Venezuela and other countries impacted by such events;
- issues arising out of the sovereign debt in the countries in which the Company operates, such as in Argentina and those in the Euro zone, resulting in potential economic and operational challenges for the Company's supply chains,
- heightened counterparty credit risk due to adverse effects on customers and suppliers, exchange controls (such as in Argentina, Egypt and Venezuela) and translation risks due to potential impairments of investments in affected markets and the potential for banks with which the Company maintains lines of credit to be unable to fulfill their commitments;
- disruptions resulting from either internal or external labor strikes, work stoppages, or similar difficulties, particularly in France and South Africa;
- changes in cash flow resulting from changes in operating results, including from changes in foreign exchange rates, restructuring activities, working capital management, debt payments, share repurchases and hedge settlements;

Table of Contents

the impact of currency fluctuations on the value of the Company's operating results, assets, liabilities and commitments of foreign operations generally, including their cash balances during and at the end of quarterly reporting periods, the results of those operations, the cost of sourcing products across geographies and the success of foreign hedging and risk management strategies;

the impact of natural disasters, terrorist activities and epidemic or pandemic disease outbreaks;

the ability to repatriate, or otherwise make available, cash in the United States and to do so at a favorable foreign exchange rate and with favorable tax ramifications, particularly from Argentina, Brazil, China, Egypt, India, Indonesia, and Mexico;

the ability to obtain all government approvals on, and to control the cost of infrastructure obligations associated with, property, plant and equipment;

the ability to timely and effectively implement, transition, maintain and protect necessary information technology systems and infrastructure;

cyber attacks and ransomware demands that could cause the Company to not be able to operate its systems and/or access or control its data, including private data;

the ability to attract and retain certain executive officers and key management personnel;

the success of land buyers in attracting tenants for commercial and residential development and obtaining financing;

the costs and covenant restrictions associated with the Company's credit arrangements;

integration of non-traditional product lines into Company operations;

the effect of legal, regulatory and tax proceedings, as well as restrictions imposed on the Company's operations or Company representatives by foreign governments, including exposure to tax responsibilities imposed on the sales force and their potential impact on the sales force's value chain and resulting disruption to the business and actions taken by governments to set or restrict the freedom of the Company to set its own prices or its suggested retail prices for product sales by its sales force to end consumers and actions taken by governments to restrict the ability to convert local currency to other currencies in order to satisfy obligations outside the country generally, and in particular Argentina, Egypt and Venezuela;

the effect of competitive forces in the markets in which the Company operates, particularly related to sales of beauty, personal care and nutritional products, where there are a greater number of competitors;

the impact of counterfeit and knocked-off products and programs in the markets in which the Company operates and the effect this can have on the confidence of the Company's sales force members;

the impact of changes, changes in interpretation of or challenges to positions taken by the Company with respect to U.S. federal, state and foreign tax or other laws, including with respect to non-income taxes issues in Brazil, India and the Philippines;

the Company's access to, and the costs of, financing; and

other risks discussed in Item 1A, Risk Factors, of the Company's 2016 Annual Report on Form 10-K, as well as the Company's Consolidated Financial Statements, Notes, other financial information appearing elsewhere in this report and the Company's other filings with the United States Securities and Exchange Commission.

Other than updating for changes in foreign currency exchange rates through its monthly website updates, the Company does not intend to update forward-looking information, except through its quarterly earnings releases, unless it expects diluted earnings per share for the current quarter, excluding items impacting comparability and changes versus its guidance of the impact of changes in foreign exchange rates, to be significantly below its previous guidance.

Table of Contents

Investors should also be aware that while the Company does, from time to time, communicate with securities analysts, it is against the Company's policy to disclose to them any material non-public information or other confidential commercial information. Accordingly, it should not be assumed that the Company agrees with any statement or report issued by any analyst irrespective of the content of the confirming financial forecasts or projections issued by others.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

The Company maintains disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15(d)-15(e)) that are designed to ensure that information required to be disclosed in the Company's reports filed or submitted under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms, and that such information is accumulated and communicated to the Company's management, including the Chief Executive Officer and the Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, management recognized that controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives.

As of the end of the period covered by this report, management, under the supervision of the Company's Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of the design and operation of the Company's disclosure controls and procedures. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the design and operation of the disclosure controls and procedures were effective.

Changes in Internal Controls

There have been no significant changes in the Company's internal control over financial reporting during the Company's third quarter that have materially affected or are reasonably likely to materially affect its internal control over financial reporting, as defined in Rule 13a-15(f) promulgated under the Securities Exchange Act of 1934, as amended (the "Exchange Act").
