eMAGIN CORPORATION
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

Note 1: Summary of Significant Accounting Policies

The Business

eMagin Corporation (the “Company”) designs, develops, manufactures, and markets OLED (organic light emitting diode) on silicon microdisplays and virtual imaging products which utilize OLED microdisplays. The Company’s products are sold mainly in North America, Asia, and Europe.

Basis of Presentation

In the opinion of management, the accompanying unaudited condensed consolidated financial statements of eMagin Corporation and its subsidiary reflect all adjustments, including normal recurring accruals, necessary for a fair presentation. All significant intercompany balances and transactions have been eliminated in consolidation. Certain information and footnote disclosure normally included in annual financial statements prepared in accordance with accounting principles generally accepted in the United States have been condensed or omitted pursuant to instructions, rules and regulations prescribed by the Securities and Exchange Commission. The Company believes that the disclosures provided herein are adequate to make the information presented not misleading when these unaudited condensed consolidated financial statements are read in conjunction with the audited consolidated financial statements contained in the Company’s Annual Report on Form 10-K for the year ended December 31, 2012. The results of operations for the period ended March 31, 2013 are not necessarily indicative of the results to be expected for the full year. The consolidated condensed financial statements of December 31, 2012 are derived from audited financial statements included in the Company’s Annual Report on Form 10-K for the year ended December 31, 2012.

In accordance with accounting principles generally accepted in the United States of America, management utilizes certain estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. On an on-going basis, management evaluates its estimates and judgments related to, among others, allowance for doubtful accounts, warranty reserves, inventory reserves, stock-based compensation expense, deferred tax asset valuation allowances, litigation and other loss contingencies. Management bases its estimates and judgments on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results could differ from those estimates.

Revenue and Cost Recognition

Revenue is recognized when persuasive evidence of an arrangement exists, delivery has occurred, selling price is fixed or determinable and collection is reasonably assured. Product revenue is generally recognized when products are shipped to customers. The Company defers revenue recognition on products sold directly to the consumer with a maximum thirty day right of return. Revenue is recognized upon the expiration of the right of return.

The Company also earns revenues from certain research and development (“R&D”) activities (contract revenues) under both firm fixed-price contracts and cost-type contracts. Revenues relating to firm fixed-price contracts and cost-type contracts are generally recognized on the percentage-of-completion method of accounting as costs are incurred (cost-to-cost basis). Progress is generally based on a cost-to-cost approach however an alternative method may be used such as physical progress, labor hours or others depending on the type of contract. Physical progress is

determined as a combination of input and output measures as deemed appropriate by the circumstances. Contract costs include all direct material and labor costs and an allocation of allowable indirect costs as defined by each contract, as periodically adjusted to reflect revised agreed upon rates. These rates are subject to audit by the other party.

Table of Contents

Investments

Investments consist of debt securities including corporate obligations and FDIC-insured certificates of deposit with maturities up to twelve months. The Company classifies these securities as held-to-maturity since it has the positive intent and ability to hold them until maturity. These securities are carried at amortized cost.

The held-to-maturity investments consist of the following as of March 31, 2013 and December 31, 2012 (in thousands):

	March 31, 2013 (unaudited)			Aggregate Fair Value	December 31, 2012			Aggregate Fair Value
	Amortized Cost	Gross Unrecognized Gains	Gross Unrecognized Losses		Amortized Cost	Gross Unrecognized Gains	Gross Unrecognized Losses	
Current investments:								
Corporate debt securities	\$760	\$ —	\$ —	\$ 760	\$ 1,520	\$—	\$ —	\$ 1,520
Certificates of deposit	8,000	—	—	8,000	7,000	—	—	7,000
Total current investments	\$8,760	\$ —	\$ —	\$ 8,760	\$ 8,520	\$—	\$ —	\$ 8,520
Long-term investments:								
Corporate debt securities	\$—	\$ —	\$ —	\$—	\$ 500	\$—	\$ —	\$ 500

As of March 31, 2013, the current investments mature within one year.

Net Income per Common Share

Basic income per share is computed using the weighted average number of common shares outstanding during the period, and excludes any dilutive effects of common stock equivalent shares, such as stock options, warrants, and convertible preferred stock. Diluted income per share is computed using the weighted average number of common shares outstanding and potentially dilutive common stock equivalent shares outstanding during the period. Common stock equivalent shares are excluded from the computation if their effect is anti-dilutive.

The Company's Series B Convertible Preferred stock ("Preferred Stock – Series B") is considered a participating security as the preferred stock participates in dividends with the common stock, which requires the use of the two-class method when computing basic and diluted earnings per share. The Preferred Stock – Series B is not required to absorb any net loss. Though the Company paid a one-time special dividend in 2012, the Company does not expect to continue to pay dividends on its common or preferred stock in the near future.

Table of Contents

The following table sets forth the computation of basic and diluted earnings per share (in thousands, except share and per share data):

	Three Months Ended March 31, 2013 (unaudited)		
	Income	Shares	Per Share Amount
Basic EPS			
Net Income	\$205		
Income allocated to participating securities	\$50		
Income allocated to common shares	\$155	23,527,072	\$0.01
Diluted EPS			
Diluted potential common shares (1)		1,805,904	
Income allocated to common shares	\$155	25,332,976	\$0.01

(1) Dilutive potential common shares consist of stock options and warrants.

For the three months ended March 31, 2013, there were stock options and warrants to acquire 2,841,215 shares of the Company's common stock which were excluded from the computation of its diluted earnings per share as their effect would be antidilutive.

For the three months ended March 31, 2012, the Company reported a loss and as a result, basic and diluted net loss per share are the same. Therefore in calculating net loss per share amounts, 13,174,082 shares underlying the following potentially dilutive common stock equivalents were excluded from the calculation of diluted net income per common share because their effect was anti-dilutive.

The following is a table of the potentially dilutive common stock equivalents for the three month period ended March 31, 2012:

Options and warrants	5,628,749
Convertible preferred stock	7,545,333
Total potentially dilutive common stock equivalents	13,174,082

Note 2: Accounts Receivable, net

The majority of the Company's commercial accounts receivable are due from Original Equipment Manufacturers ("OEM's"). Credit is extended based on an evaluation of a customer's financial condition and, generally, collateral is not required.

Accounts receivable consisted of the following (in thousands):

	March 31, 2013 (unaudited)	December 31, 2012
Accounts receivable	\$ 5,857	\$ 5,386
Less allowance for doubtful accounts	(232)	(232)
Net receivable	\$ 5,625	\$ 5,154

Table of Contents

Note 3: Inventories, net

The components of inventories are as follows (in thousands):

	March 31, 2013 (unaudited)	December 31, 2012
Raw materials	\$ 1,625	\$ 1,745
Work in process	825	898
Finished goods	793	651
Total inventories	3,243	3,294
Less inventory reserve	(99)	(71)
Total inventories, net	\$ 3,144	\$ 3,223

Note 4: Line of Credit

At March 31, 2013, the Company had available a credit facility with Access Business Finance, LLC (“Access”) under which the Company may borrow up to a maximum of \$3 million based on a borrowing base equivalent of 75% of eligible accounts receivable. The terms are: the minimum monthly interest payment is \$1,000; the interest rate is Prime plus 5% but not less than 8.25%; and the early termination fee is \$6,000. The renewal date of the line of credit is September 1, 2013. The Company’s obligations under the agreement are secured by its assets. For the three months ended March 31, 2013, the Company had not borrowed on its line of credit.

Note 5: Stock-based Compensation

The Company uses the fair value method of accounting for share-based compensation arrangements. The fair value of stock options is estimated at the date of grant using the Black-Scholes option valuation model. Stock-based compensation expense is reduced for estimated forfeitures and is amortized over the vesting period using the straight-line method.

The following table summarizes the allocation of non-cash stock-based compensation to our expense categories for the three month periods ended March 31, 2013 and 2012 (in thousands):

	Three Months Ended March 31, (unaudited)	
	2013	2012
Cost of revenue	\$ 79	\$ 64
Research and development	155	141
Selling, general and administrative	385	544
Total stock compensation expense	\$ 619	\$ 749

At March 31, 2013, total unrecognized compensation costs related to stock options was approximately \$2.3 million, net of estimated forfeitures. Total unrecognized compensation cost will be adjusted for future changes in estimated forfeitures and is expected to be recognized over a weighted average period of approximately 1.8 years.

The following key assumptions were used in the Black-Scholes option pricing model to determine the fair value of stock options granted:

	For the Three Months Ended	
	2013	2012
Dividend yield	0 %	0 %
Risk free interest rates	0.37 – 0.88 %	0.51 – 0.87 %
Expected volatility	71.6 to 73.8 %	71.8 to 81.2 %
Expected term (in years)	3.5 to 5.0	3.5 to 5.5

The Company paid a special one-time dividend in 2012. However, the Company does not expect to continue to pay dividends in the near future therefore the Company used an expected dividend yield of 0%. The risk-free interest rate used in the Black-Scholes option pricing model is based on the implied yield currently available on U.S. Treasury securities with an equivalent term. Expected volatility is based on the weighted average historical volatility of the Company's common stock for the equivalent term. The expected term of options represents the period that our stock-based awards are expected to be outstanding and was determined based on historical experience and vesting schedules of similar awards.

Table of Contents

A summary of the Company's stock option activity for the three months ended March 31, 2013 is presented in the following table (unaudited):

	Number of Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life (In Years)	Aggregate Intrinsic Value
Outstanding at December 31, 2012	4,685,434	\$3.82		
Options granted	161,325	3.55		
Options exercised	(12,655)	1.88		
Options forfeited	(23,146)	3.39		
Options cancelled or expired	(80,850)	6.51		
Outstanding at March 31, 2013	4,730,108	\$3.78	4.98	\$3,927,574
Vested or expected to vest at March 31, 2013 (1)	4,686,508	\$3.77	4.98	\$3,921,739
Exercisable at March 31, 2013	3,640,131	\$3.43	5.13	\$3,781,715

(1) The expected to vest options are the result of applying the pre-vesting forfeiture rate assumptions to total unvested options.

The aggregate intrinsic value in the table above represents the difference between the exercise price of the underlying options and the quoted price of the Company's common stock. During the three months ended March 31, 2013, the aggregate intrinsic value of options exercised was \$19 thousand. The Company issues new shares of common stock upon exercise of stock options.

Note 6: Shareholders' Equity

Preferred Stock - Series B Convertible Preferred Stock ("the Preferred Stock – Series B")

As of March 31, 2013 and December 31, 2012, there were 5,659 shares of Preferred Stock – Series B issued and outstanding.

Common Stock

The Company received approximately \$24 thousand for the exercise of 12,655 stock options in the three months ended March 31, 2013. The Company received approximately \$29 thousand for the exercise of 24,000 stock options in the three months ended March 31, 2012.

Note 7: Income Taxes

The Company's effective tax rate is calculated quarterly based upon current assumptions relating to the full year's estimated operating results and various tax-related items. The Company's effective tax rate for the three months ended March 31, 2013 and 2012 was 36.9% and 37.1%, respectively. The differences between the effective tax rate of 36.9% and 37.1%, respectively, and the U.S. federal statutory rate of 34% for the three months ended March 31, 2013 and 2012, respectively, were primarily due to the impact of state income taxes and alternative minimum tax.

Due to the Company's operating loss carryforwards, all tax years remain open to examination by the major taxing jurisdictions to which the Company is subject. In the event that the Company is assessed interest or penalties at some

point in the future, it will be classified in the financial statements as tax expense.

Table of Contents

The Company's deferred tax assets and their potential realizability are evaluated each quarter to determine if any changes should be made to the valuation allowance. As of March 31, 2013, the Company has determined based on the weight of the available evidence, both positive and negative, it is more likely than not that \$8.9 million of its deferred tax asset will be realized and no additional valuation allowance was released.

Note 8: Commitments and Contingencies

Royalty Payments

The Company signed a license agreement on March 29, 1999 with Eastman Kodak ("Kodak"), under which it is obligated to make royalty payments. Under this agreement, the Company must pay to Kodak a minimum royalty plus a certain percentage of net sales with respect to certain products, which percentages are defined in the agreement. The percentages are on a sliding scale depending on the amount of sales generated. Any minimum royalties paid will be credited against the amounts due based on the percentage of sales. The royalty agreement terminates upon the expiration of the issued patent which is the last to expire. The Company was notified that Kodak sold substantially all rights and obligations under the Company's license agreement to Global OLED Technology ("GOT") as of December 30, 2009.

In late 2008, the Company began evaluating the status of its manufacturing process and the use of the intellectual property ("IP") associated with its license agreement. After this analysis and after making a few changes to its manufacturing process, by the end of 2008 the Company had stopped using the IP covered under the license agreement. The last royalty payment under the license agreement was made in November 2009. The Company determined that it is no longer required to pay the minimum royalty payment and as such has not paid or accrued this amount.

In April 2011, the Company received a request for royalty payments from a representative of GOT. The Company responded stating that the licenses were no longer in force and that the request for royalties was untimely. Although GOT does not agree, both parties have expressed an interest in resolving the disagreement amicably. Communications to date have been preliminary regarding its resolution. The Company estimates that the range of loss contingency is between \$0 and \$250 thousand.

Operating Leases

The Company leases office facilities and office, lab and factory equipment under operating leases. Certain leases provide for payments of monthly operating expenses. The Company currently has lease commitments for space in Hopewell Junction, New York, Bellevue, Washington, and Santa Clara, California.

The Company's manufacturing facilities are leased from IBM in Hopewell Junction, New York. The Company leases approximately 37,000 square feet to house its equipment for OLED microdisplay fabrication and for research and development, an assembly area and administrative offices. The lease expires May 31, 2014 with the option of extending the lease for five years. The corporate headquarters are located in Bellevue, Washington where eMagin leases approximately 6,300 square feet. The lease expires on August 31, 2014. In addition, the Company leases approximately 2,400 square feet of office space for design and product development in Santa Clara, California and the lease expires October 31, 2015.

Rent expense was approximately \$303 thousand and \$302 thousand, respectively, for the three months ended March 31, 2013 and 2012.

Equipment Purchase Commitments

The Company has committed to equipment purchases of \$0.3 million at March 31, 2013.

Note 9: Concentrations

For the three months ended March 31, 2013, approximately 62% of the Company's net revenues were derived from customers in the United States and approximately 38% of the Company's net revenues were derived from international customers. For the three months ended March 31, 2012, approximately 52% of the Company's net revenues were derived from customers in the United States and approximately 48% of the Company's net revenues were derived from international customers. For the three months ended March 31, 2013, three customers accounted for 36% of its net revenue. For the three months ended March 31, 2012, there was no customer that accounted for more than 10% of its revenue.

The following is a schedule of revenue by geographic location (in thousands):

	Three Months Ended March 31, (unaudited)	
	2013	2012
North and South America	\$ 5,622	\$ 3,375
Europe, Middle East, and Africa	2,107	2,042
Asia Pacific	774	720
Total	\$ 8,503	\$ 6,137

The Company purchases principally all of its silicon wafers from a single supplier located in Taiwan.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Statement of Forward-Looking Information

In this quarterly report, references to "eMagin Corporation," "eMagin," "Virtual Vision," "the Company," "we," "us," and "our" refer to eMagin Corporation and its wholly owned subsidiary, Virtual Vision, Inc.

Except for the historical information contained herein, some of the statements in this Report contain forward-looking statements that involve risks and uncertainties. These statements are found in the sections entitled "Management's Discussion and Analysis of Financial Condition and Results of Operation" and "Risk Factors." They include statements concerning: our business strategy; expectations of market and customer response; liquidity and capital expenditures; future sources of revenues; expansion of our proposed product line; and trends in industry activity generally. In some cases, you can identify forward-looking statements by words such as "may," "will," "should," "expect," "plan," "could," "anticipate," "intend," "believe," "estimate," "predict," "potential," "goal," or "continue" or similar terminology. These statements are only predictions and involve known and unknown risks, uncertainties and other factors, including, but not limited to, the risks outlined under "Risk Factors," that may cause our actual results, levels of activity, performance or achievements to be materially different from any future results, levels of activity, performance or achievements expressed or implied by such forward-looking statements. For example, assumptions that could cause actual results to vary materially from future results include, but are not limited to: our ability to successfully develop and market our products to customers; our ability to generate customer demand for our products in our target markets; the development of our target markets and market opportunities; our ability to manufacture suitable products at competitive cost; our ability to successfully launch new equipment on our manufacturing line; market pricing for our products and for competing products; the extent of increasing competition; technological developments in our target markets and the development of alternate, competing technologies in them; and sales of shares by existing shareholders. Although we believe that the expectations reflected in the forward looking statements are reasonable, we cannot guarantee future results, levels of activity, performance or achievements. Unless we are required to do so under federal securities laws or other applicable laws, we do not intend to update or revise any forward-looking statements.

Overview

We design and manufacture miniature displays, which we refer to as OLED-on-silicon-microdisplays, and microdisplay modules for virtual imaging, primarily for incorporation into the products of other manufacturers. Microdisplays are typically smaller than many postage stamps, but when viewed through a magnifier they can contain all of the information appearing on a high-resolution personal computer screen. Our microdisplays use organic light emitting diodes, or OLEDs, which emit light themselves when a current is passed through the device. Our technology permits OLEDs to be coated onto silicon chips to produce high resolution OLED-on-silicon microdisplays.

We believe that our OLED-on-silicon microdisplays offer a number of advantages in near to the eye applications over other current microdisplay technologies, including lower power requirements, less weight, fast video speed without flicker, and wider viewing angles. In addition, many computer and video electronic system functions can be built directly into the OLED-on-silicon microdisplay, resulting in compact systems with lower expected overall system costs relative to alternate microdisplay technologies.

We have developed a strong intellectual property portfolio that includes patents, manufacturing know-how and unique proprietary technologies to create high performance OLED-on-silicon microdisplays and related optical systems. We believe our technology, intellectual property portfolio and position in the marketplace, gives us a leadership position in OLED and OLED-on-silicon microdisplay technology. We are one of only a few companies in the world to market and produce significant quantities of high resolution full-color small molecule OLED-on-silicon microdisplays.

Our first quarter of 2013 was an exciting quarter in many ways. Total revenues of \$8.5 million were a first quarter record, up approximately 39% from first quarter last year. We sold 55 design reference kits (DRKs) in the quarter of which 17 were for the WUXGA and DSVGA displays. These are two of our newer displays and the DRK sales indicate customers are designing these displays into their new products. We continued shipping large numbers of Display Beam Combiner Assemblies (DBCAs), which is a SVGA display subassembly which includes an integrated cube-beamsplitter optic for our customer Exelis for the Enhanced Night Vision Goggle II (ENVGII) program. Exelis Geospatial Systems was also awarded funding for ENVG II which is the next night vision goggle production lot program. We expect deliveries to continue well into 2014. We continued our work designing and building a high brightness color 2,000 by 2,000 pixel display for NAVAIR (U.S. Navy) targeted for avionic head mounted displays and high performance portable digital goggle systems. We made progress in completing our new XGA display, working with and targeted for many large digital camera companies. This quarter was the first quarter where a sizable amount of the OLED deposition was done by our new OLED deposition tool. We are continuing to optimize the tool, which is expected to greatly expand our OLED deposition capacity. At March 31, 2013, we had a total of 103 full-time and part-time employees as compared to 100 employees at December 31, 2012.

Table of Contents

A detailed discussion of our business may be found in Part I, "Business," of our 2012 Annual Report on Form 10-K for the year ended December 31, 2012 as filed with the Securities and Exchange Commission on March 14, 2013.

CRITICAL ACCOUNTING POLICIES

Revenue and Cost Recognition

Revenue is recognized when persuasive evidence of an arrangement exists, delivery has occurred, selling price is fixed or determinable and collection is reasonably assured. Product revenue is generally recognized when products are shipped to customers. We defer revenue recognition on products sold directly to the consumer with a maximum thirty day right of return. Revenue is recognized upon the expiration of the right of return.

We also earn revenues from certain R&D activities (contract revenues) under both firm fixed-price contracts and cost-type contracts. Revenues relating to firm fixed-price contracts and cost-type contracts are generally recognized on the percentage-of-completion method of accounting as costs are incurred (cost-to-cost basis). Progress is generally based on a cost-to-cost approach however an alternative method may be used such as physical progress, labor hours or others depending on the type of contract. Physical progress is determined as a combination of input and output measures as deemed appropriate by the circumstances. Contract costs include all direct material and labor costs and an allocation of allowable indirect costs as defined by each contract, as periodically adjusted to reflect revised agreed upon rates. These rates are subject to audit by the other party.

Income Taxes

Our deferred tax assets and their potential realizability are evaluated each quarter to determine if any changes should be made to the valuation allowance. As of March 31, 2013, we have determined based on the weight of the available evidence, both positive and negative, it is more likely than not that \$8.8 million of our deferred tax asset will be realized and no additional valuation allowance was released.

Other critical accounting policies, as described in our Annual Report on Form 10-K for the fiscal year ended December 31, 2012, relate to product warranty, use of estimates, fair value of financial instruments and stock-based compensation, and additional information on accounting for income taxes.

RESULTS OF OPERATIONS

THREE MONTHS ENDED MARCH 31, 2013 COMPARED TO THREE MONTHS ENDED MARCH 31, 2012

Revenues

Revenues for the three months ended March 31, 2013 were approximately \$8.5 million as compared to approximately \$ 6.1 million for the three months ended March 31, 2012, an increase of approximately \$2.4 million or 39% for the three month period.

Product revenue is comprised of sales of displays, Z800 systems, and other hardware. For the three months ended March 31, 2013, product revenue increased approximately \$2.3 million or 40% as compared to the three months ended March 31, 2012. The increase in revenue resulted from an increase in number of units sold and an increase in the average selling price per unit. The increase in average selling price was due to the mix of products sold.

Contract revenue is comprised of revenue from research and development or non-recurring engineering (“NRE”) contracts. For the three months ended March 31, 2013, contract revenue increased approximately \$67 thousand or 22% as compared to the three months ended March 31, 2012. We had one active contract in Q1 2013 compared to five active contracts in Q1 2012. Although contract revenue increased over Q1 2012, it decreased from the prior quarter, Q4 2012, which had 6 active projects. Although we have been and expect to continue to be successful in winning new research and development contracts, the U.S. government budget issues have impacted the number and amount of contracts available.

Cost of Goods Sold

Cost of goods sold is comprised of costs of product and contract revenues. Cost of product revenue includes materials, labor and manufacturing overhead related to our products. Cost of contract revenue includes direct and allocated indirect costs associated with performance of contracts. Cost of goods sold was approximately \$4.8 million for the three month period ended March 31, 2013 as compared to approximately \$3.5 million for the three months ended March 31, 2012, an increase of approximately \$1.3 million or 37%. Cost of goods sold as a percentage of revenues was 56% for both the three months ended March 31, 2013 and 2012.

Table of Contents

The following table outlines product, contract and total gross profit and related gross margins for the three months ended March 31, 2013 and 2012 (dollars in thousands):

	Three months ended March 31, 2013 2012 (unaudited)	
Product revenue gross profit	\$ 3,592	\$ 2,528
Product revenue gross margin	44%	43%
Contract revenue gross profit	\$ 159	\$ 153
Contract revenue gross margin	42%	50%
Total gross profit	\$ 3,751	\$ 2,681
Total gross margin	44%	44%

The gross profit for the three months ended March 31, 2013 was approximately \$3.8 million as compared to approximately \$2.7 million for the three months ended March 31, 2012, an increase of approximately \$1.1 million or 41% for the three month period. Gross margin was 44% for both the three months ended March 31, 2013 and 2012.

The product gross profit for the three months ended March 31, 2013 was approximately \$3.6 million as compared to approximately \$2.5 million for the three months ended March 31, 2012, an increase of \$1.1 million for the three month period. Product gross margin was 44% for the three months ended March 31, 2013 up from 43% for the three month period ended March 31, 2012. Although gross margin increased, the cost per display unit increased from Q1 2012 due primarily to the higher manufacturing costs associated with the new OLED deposition tool. It is expected these costs and cost per unit will decrease as we optimize the tool.

The contract gross profit was approximately \$0.2 million for both the three months ended March 31, 2013 and 2012. For the three months ended March 31, 2013, contract gross margin decreased to 42% down from 50% for the three months ended March 31, 2012. Contract gross margin is dependent upon the mix of internal and external third party costs, with external costs causing a lower contract gross margin, and upon the nature of the specific contract work done in the quarter.

Operating Expenses

Research and Development. Research and development (“R&D”) expenses are company-funded and include salaries and related benefits, development materials and other costs specifically allocated to the development of new technologies and microdisplay products, OLED materials and subsystems. R&D related costs associated with fulfilling contracts are categorized as contract cost of goods sold. R&D expenses for the three months ended March 31, 2013 were approximately \$1.2 million or 14% of revenue as compared to approximately \$1.1 million or 18% of revenue for the three months ended March 31, 2012. The increase was due primarily to an increase in personnel costs.

Selling, General and Administrative. Selling, general and administrative expenses consist principally of salaries and related benefits, professional services fees and marketing, general corporate, and administrative expenses. Selling, general and administrative expenses for the three months ended March 31, 2013 were approximately \$2.2 million or 26% of revenue as compared to approximately \$2.3 million or 38% of revenue for the three months ended March 31, 2012. The decrease was due primarily to a decrease in stock compensation and accounting fee expenses.

Other Income (Expense), net. Other income (expense), net consists primarily of interest income earned on investments and interest expense. For the three months ended March 31, 2013, interest expense was approximately \$11 thousand as compared to approximately \$11 thousand offset by the capitalization of interest of \$8 thousand for

the three months ended March 31, 2012. We have no debt upon which we are incurring interest expense however we pay fees to keep our line of credit available. Other income, primarily interest income, for the three months ended March 31, 2013 was approximately \$14 thousand as compared to approximately \$7 thousand for the three months ended March 31, 2012.

Liquidity and Capital Resources

As of March 31, 2013, we had approximately \$14.4 million of cash, cash equivalents, and investments as compared to \$13.4 million at December 31, 2012. Of the \$14.4 million in cash, approximately \$8.8 million was invested in certificates of deposits ("CDs") and corporate bonds.

Cash flow provided by operating activities during the three months ended March 31, 2013 was approximately \$1.1 million, attributable to our net income of approximately \$0.2 million and net non-cash expenses of \$0.9 million. Cash flow provided by operating activities during the three months ended March 31, 2012 was approximately \$0.3 million, approximately \$0.8 million was from net non-cash expenses offset by the net loss of \$0.5 million.

Table of Contents

Cash provided by investing activities during the three months ended March 31, 2013 was approximately \$0.1 million of which \$3.0 million was received from maturing investments offset by purchased investments in CDs and corporate bonds of approximately \$2.8 million and approximately \$0.1 million purchased equipment primarily for upgrading our production line. Cash used in investing activities during the three months ended March 31, 2012 was approximately \$2.1 million of which \$1.0 million was received from maturing investments offset by purchased investments in CDs of \$2.5 million and approximately \$0.6 million for equipment purchases primarily for upgrading our production line. Presently we have committed approximately \$0.2 million for capital expenditures for the balance of 2013.

Cash provided by financing activities during the three months ended March 31, 2013 and 2012 was approximately \$24 thousand and \$29 thousand, respectively, representing proceeds from the exercise of stock options.

Credit Facility

At March 31, 2013, we had a credit facility with Access Business Finance, LLC (“Access”) that provides for up to a maximum amount of \$3 million based on a borrowing base equivalent of 75% of eligible accounts receivable. The interest on the credit facility is equal to the Prime Rate plus 5% but may not be less than 8.25% with a minimum monthly interest payment of \$1 thousand. The credit facility will automatically renew on September 1, 2013 for a one year term unless written notice is provided. We did not draw on our credit facility during the quarter ended March 31, 2013 or at any time since its inception in September 2010 and there is no outstanding balance.

The credit facility contains the customary representations and warranties as well as affirmative and negative covenants. We were in compliance with all debt covenants as of March 31, 2013.

We expect our business to experience revenue growth which may result in higher accounts receivable levels and may require increased production and/or higher inventory levels. We anticipate that our cash needs to fund these requirements as well as other operating or investing cash requirements over the next twelve months will be less than our current cash on hand, investments and the cash we anticipate generating from operations. We anticipate that we will not require additional funds over the next twelve months other than perhaps for discretionary capital spending. If unanticipated events arise during the next twelve months, we believe we can raise sufficient funds. However, if we are unable to obtain sufficient funds, we may have to reduce the size of our organization and/or be forced to reduce and/or curtail our production and operations, all of which could have a material adverse impact on our business prospects.

Off-Balance Sheet Arrangements

We do not have any off balance sheet arrangements that are reasonably likely to have a current or future effect on our financial condition, revenues, results of operations, liquidity or capital expenditures.

ITEM 3. Quantitative and Qualitative Disclosures About Market Risk

Market rate risk

We are exposed to market risk related to changes in interest rates.

Interest rate risk

We hold our cash in cash and cash equivalents, certificates of deposits, and corporate bonds. We do not hold derivative financial instruments or equity securities. At March 31, 2013, we have not drawn on our revolving line of credit and therefore do not have any related interest rate risk. A change in interest rates would not have had a material

effect on our consolidated financial position, results of operations, or cash flows in the three months ended March 31, 2013.

Foreign currency exchange rate risk

We do not have any material foreign currency exchange rate risk.

ITEM 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Our management, with the participation of our Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of our disclosure controls and procedures (as defined in Rule 13a-15 under the Securities Exchange Act of 1934 (the “Exchange Act”)) as of the end of the period covered by this Quarterly Report on Form 10-Q.

Based on our evaluation, our Chief Executive Officer and Chief Financial Officer concluded that, as of the end of the period covered by this report, our disclosure controls and procedures were effective.

Limitations on the Effectiveness of Internal Controls.

Our disclosure controls and procedures are designed to provide reasonable, not absolute, assurance that the objectives of our disclosure control system are met. Because of inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues, if any, within a company have been detected.

Changes in Internal Controls.

There were no changes in our internal controls over financial reporting during the fiscal quarter ended March 31, 2013 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.
