(IRS Employer Identification No.)

3100 Zinfandel Drive, Rancho Cordova, California

(Address of principal executive offices)

95670

(Zip code)

Edgar Filing: AMERICAN RIVER BANKSHARES - Form 10-K

Registrant's telephone number, including area code 916-851-0123

Securities registered pursuant to Section 12(b) of the Act:

Title of Each Class	Name of Each Exchange On Which Registered
---------------------	---

Common Stock, no par value	NASDAQ Global Select Market
----------------------------	-----------------------------

Securities registered pursuant to Section 12(g) of the Act:

None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes ☐ No ☒

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act.

Yes ☐ No ☒

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes ☒ No ☐

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§229.405 of this chapter) is not contained herein, and will not be contained, to the best of the registrant's knowledge, in definitive proxy

Edgar Filing: AMERICAN RIVER BANKSHARES - Form 10-K

or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. [X]

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of “large accelerated filer,” “accelerated filer” and “smaller reporting company” in Rule 12b-2 of the Exchange Act.

Large accelerated filer ☐

Accelerated filer ☐

Non-accelerated filer [X] (Do not check if a smaller reporting company)

Smaller reporting company ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act).

Yes ☐ No [X]

State the aggregate market value of the voting and non-voting common equity held by non-affiliates computed by reference to the price at which the common equity was last sold, or the average bid and asked price of such common equity, as of the last business day of the registrant’s most recently completed second fiscal quarter. \$55,870,000.

Indicate the number of shares outstanding of each of the registrant’s classes of common stock, as of the latest practicable date.

As of March 1, 2012, the registrant’s no par value Common Stock totaled 9,858,707 shares outstanding.

#### DOCUMENTS INCORPORATED BY REFERENCE

The following documents are incorporated by reference into this Form 10-K: Part III, Items 10 through 14 from Registrant’s definitive proxy statement for the 2012 annual meeting of shareholders.

#### Cautionary Statements Regarding Forward-Looking Statements

Certain matters discussed or incorporated by reference in this Annual Report on Form 10-K including, but not limited to, matters described in “Item 7 - Management’s Discussion and Analysis of Financial Condition and Results of Operations,” are “forward-looking statements” within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended, Section 27A of the Securities Act of 1933, as amended, and subject to the safe-harbor provisions of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements may contain words related to future projections including, but not limited to, words such as “believe,” “expect,” “anticipate,” “intend,” “may,” “will,” “should,” “could,” “would,” and variations of those words and similar words that are subject to risks, uncertainties and other factors that could cause actual results to differ significantly from those projected. Factors that could cause or contribute to such differences include, but are not limited to, the following:

- the duration of financial and economic volatility and decline and actions taken by the United States Congress and governmental agencies, including the United States Department of the Treasury, to deal with challenges to the U.S. financial system;
- the risks presented by a continued economic recession, which could adversely affect credit quality, collateral values, including real estate collateral, investment values, liquidity and loan originations and loan portfolio delinquency rates;
- variances in the actual versus projected growth in assets and return on assets;
- potential continued or increasing loan and lease losses;
- potential increasing levels of expenses associated with resolving nonperforming assets as well as regulatory changes;
- changes in the interest rate environment including interest rates charged on loans, earned on securities investments and paid on deposits and other borrowed funds;
- competitive effects;
- potential declines in fee and other noninterest income earned associated with economic factors as well as regulatory changes;
- general economic conditions nationally, regionally, and within our operating markets could be less favorable than expected or could have a more direct and pronounced effect on us than expected and adversely affect our ability to continue internal growth at historical rates and maintain the quality of our earning assets;
- changes in the regulatory environment including government intervention in the U.S. financial system;
- changes in business conditions and inflation;
- changes in securities markets, public debt markets, and other capital markets;
- potential data processing and other operational systems failures or fraud;
- potential continued decline in real estate values in our operating markets;
-

the effects of uncontrollable events such as terrorism, the threat of terrorism or the impact of the current military conflicts in Afghanistan and Iraq and the conduct of the war on terrorism by the United States and its allies, worsening financial and economic conditions, natural disasters, and disruption of power supplies and communications;

- changes in accounting standards, tax laws or regulations and interpretations of such standards, laws or regulations;
- projected business increases following any future strategic expansion could be lower than expected;
- the goodwill we have recorded in connection with acquisitions could become impaired, which may have an adverse impact on our earnings;
- the reputation of the financial services industry could experience further deterioration, which could adversely affect our ability to access markets for funding and to acquire and retain customers;
- the efficiencies we may expect to receive from any investments in personnel and infrastructure may not be realized; and
- downgrades in the credit rating of the United States by credit rating agencies.

The factors set forth under “Item 1A-Risk Factors” in this report and other cautionary statements and information set forth in this report should be carefully considered and understood as being applicable to all related forward-looking statements contained in this report, when evaluating the business prospects of the Company and its subsidiaries.

Forward-looking statements are not guarantees of performance. By their nature, they involve risks, uncertainties and assumptions. The future results and shareholder values may differ significantly from those expressed in these forward-looking statements. You are cautioned not to put undue reliance on any forward-looking statement. Any such statement speaks only as of the date of this report, and in the case of any documents that may be incorporated by reference, as of the date of those documents. We do not undertake any obligation to update or release any revisions to any forward-looking statements, to report any new information, future event or other circumstances after the date of this report or to reflect the occurrence of unanticipated events, except as required by law. However, your attention is directed to any further disclosures made on related subjects in our subsequent reports filed with the Securities and Exchange Commission (the “SEC”) on Forms 10-K, 10-Q and 8-K.

## **Introduction**

American River Bankshares (the “Company”) is a bank holding company registered under the Bank Holding Company Act of 1956, as amended. The Company was incorporated under the laws of the State of California in 1995. As a bank holding company, the Company is authorized to engage in the activities permitted under the Bank Holding Company Act of 1956, as amended, and regulations thereunder. Its principal office is located at 3100 Zinfandel Drive, Suite 450, Rancho Cordova, California 95670 and its telephone number is (916) 851-0123.

The Company owns 100% of the issued and outstanding common shares of its banking subsidiary, American River Bank, and American River Financial, a California corporation which has been inactive since its incorporation in 2003.

American River Bank was incorporated and commenced business in Fair Oaks, California, in 1983 and thereafter moved its headquarters to Sacramento, California in 1985. American River Bank operates five full service offices in Sacramento and Placer Counties including the main office located at 1545 River Park Drive, Suite 107, Sacramento and branch offices in Sacramento, Fair Oaks, and Roseville. American River Bank also operates two full service offices in Sonoma County in Healdsburg and Santa Rosa, operated under the name “North Coast Bank, a division of American River Bank.” North Coast Bank was incorporated and commenced business in 1990 as Windsor Oaks National Bank in Windsor, California. In 1997, the name was changed to North Coast Bank. In 2000, North Coast Bank was acquired by the Company as a separate bank subsidiary. Effective December 31, 2003, North Coast Bank was merged with and into American River Bank. On December 3, 2004, the Company acquired Bank of Amador located in Jackson, California. Bank of Amador was merged with and into American River Bank and now operates three full service banking offices in Amador County in Jackson, Pioneer, and Ione, operating as “Bank of Amador, a division of American River Bank.”

American River Bank's deposits are insured by the Federal Deposit Insurance Corporation ("FDIC") up to applicable legal limits. On July 21, 2010, President Obama signed the Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act"). The Dodd-Frank Act includes a permanent increase to \$250,000 as the maximum FDIC insurance limit per depositor retroactive to January 1, 2008 and the extension of unlimited FDIC insurance for noninterest-bearing transaction accounts effective December 31, 2010 through December 31, 2012. On November 9, 2010, the FDIC implemented a final rule to increase the coverage and extension under the Dodd-Frank Act.

American River Bank does not offer trust services or international banking services and does not plan to do so in the near future. American River Bank's primary business is serving the commercial banking needs of small to mid-sized businesses within those counties listed above. American River Bank accepts checking and savings deposits, offers money market deposit accounts and certificates of deposit, makes secured and unsecured commercial, secured real estate, and other installment and term loans and offers other customary banking services. American River Bank also conducts lease financing for most types of business equipment, from computer software to heavy earth-moving equipment. American River Bank owns 100% of two inactive companies, ARBCO and American River Mortgage. ARBCO was formed in 1984 to conduct real estate development and has been inactive since 1995. American River Mortgage has been inactive since its formation in 1994.

During 2011, the Company conducted no significant activities other than holding the shares of its subsidiaries. However, it is authorized, with the prior approval of the Board of Governors of the Federal Reserve System (the “Board of Governors”), the Company’s principal regulator, to engage in a variety of activities which are deemed closely related to the business of banking.

The common stock of the Company is registered under the Securities Exchange Act of 1934, as amended, and is listed and traded on the Nasdaq Global Select Market under the symbol “AMRB.”

At December 31, 2011, the Company had consolidated assets of \$582 million, deposits of \$462 million and shareholders’ equity of \$94 million.

## **General**

The Company is a community-oriented bank holding company headquartered in Sacramento, California. The principal communities served are located in Sacramento, Placer, Yolo, El Dorado, Sonoma, and Amador counties. The Company generates most of its revenue by providing a wide range of products and services to small and middle-market businesses and individuals. The Company’s principal source of revenue comes from interest income. Interest income is derived from interest and fees on loans and leases and interest on investments (principally government securities) and Federal funds sold (funds loaned on a short-term basis to other banks). For the year ended December 31, 2011, these sources comprised 79.5% and 20.5%, respectively, of the Company’s interest income.

American River Bank’s deposits are not received from a single depositor or group of affiliated depositors, the loss of any one of which would have a materially adverse effect on the business of the Company. A material portion of American River Bank’s deposits are not concentrated within a single industry or group of related industries.

As of December 31, 2011 and December 31, 2010, American River Bank held \$29,000,000 in certificates of deposit for the State of California. In connection with these deposits, American River Bank is generally required to pledge securities to secure such deposits, except for the first \$250,000 insured by the FDIC.

American River Bank competes with approximately 35 other banking or savings institutions in Sacramento County and 30 in Placer County. American River Bank’s market share of FDIC insured deposits in the service areas of Sacramento County and Placer County was approximately 1.3% and 0.9%, respectively, (based upon the most recent information made available by the FDIC through June 30, 2011). North Coast Bank, a division of American River Bank, competes with approximately 21 other banking or savings institutions in its service areas and its market share of

FDIC insured deposits in the service area of Sonoma County was approximately .7% (based upon the most recent information made available by the FDIC through June 30, 2011). Bank of Amador, a division of American River Bank, competes with approximately 6 other banking or savings institutions in its service areas and its market share of FDIC insured deposits in the service area of Amador County was approximately 13.6% (based upon the most recent information made available by the FDIC through June 30, 2011).

## Employees

At December 31, 2011, the Company and its subsidiaries employed 110 persons on a full-time equivalent basis. The Company believes its employee relations are good.

## Website Access

The Company maintains a website where certain information about the Company is posted. Through the website, its Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, and amendments thereto, as well as Section 16 Reports and amendments thereto, are available as soon as reasonably practicable after such material is electronically filed with or furnished to the SEC. These reports are free of charge and can be accessed through the address [www.amrb.com](http://www.amrb.com) by selecting the *SEC Filings* link located at that address. Once you have selected the *SEC Filings* link you will have the option to access the Section 16 Reports or the reports filed on Forms 10-K, 10-Q and 8-K by the Company by selecting the appropriate link.

## **Supervision and Regulation**

### **General**

The common stock of the Company is subject to the registration requirements of the Securities Act of 1933, as amended, and the qualification requirements of the California Corporate Securities Law of 1968, as amended. The Company is also subject to the periodic reporting requirements of Section 13 of the Securities Exchange Act of 1934, as amended, which include, but are not limited to, annual, quarterly and other current reports with the SEC.

American River Bank is licensed by the California Commissioner of Financial Institutions (the “Commissioner”), and its deposits are insured by the FDIC up to the applicable legal limits. Beginning December 31, 2010, through December 31, 2012, all noninterest-bearing transaction accounts are fully insured, regardless of the balance of the account, at all FDIC-insured institutions. American River Bank has chosen not to become a member of the Federal Reserve System. Consequently, American River Bank is subject to the supervision of, and is regularly examined by, the Commissioner and the FDIC. The supervision and regulation includes comprehensive reviews of all major aspects of American River Bank’s business and condition, including its capital ratios, allowance for possible loan and lease losses and other factors. However, no inference should be drawn that such authorities have approved any such factors. American River Bankshares and American River Bank are required to file reports with the Board of Governors, the Commissioner, and the FDIC and provide any additional information that the Board of Governors, the Commissioner, and the FDIC may require.

American River Bankshares is a bank holding company within the meaning of the Bank Holding Company Act of 1956, as amended (the “Bank Holding Company Act”), and is registered as such with, and subject to the supervision of, the Board of Governors. The Company is required to obtain the approval of the Board of Governors before it may acquire all or substantially all of the assets of any bank, or ownership or control of the voting shares of any bank if, after giving effect to such acquisition of shares, the Company would own or control more than 5% of the voting shares of such bank. The Bank Holding Company Act prohibits the Company from acquiring any voting shares of, or interest in, all or substantially all of the assets of, a bank located outside the State of California unless such an acquisition is specifically authorized by the laws of the state in which such bank is located. Any such interstate acquisition is also subject to applicable California and federal law.

The Company, and any subsidiaries which it may acquire or organize, are deemed to be “affiliates” within the meaning of that term as defined in the Federal Reserve Act. This means, for example, that there are limitations (a) on loans by American River Bank to affiliates, and (b) on investments by American River Bank in affiliates’ stock as collateral for loans to any borrower. The Company and its subsidiaries are also subject to certain restrictions with respect to engaging in the underwriting, public sale and distribution of securities.

In addition, regulations of the Board of Governors under the Federal Reserve Act require that reserves be maintained by American River Bank in conjunction with any liability of the Company under any obligation (promissory note, acknowledgement of advance, banker's acceptance or similar obligation) with a weighted average maturity of less than seven (7) years to the extent that the proceeds of such obligations are used for the purpose of supplying funds to American River Bank for use in its banking business, or to maintain the availability of such funds.

## **Capital Standards**

The Board of Governors and the FDIC have adopted risk-based capital guidelines for evaluating the capital adequacy of bank holding companies and banks. The guidelines are designed to make capital requirements sensitive to differences in risk profiles among banking organizations, to take into account off-balance sheet exposures and to aid in making the definition of bank capital uniform internationally. Under the guidelines, American River Bankshares and American River Bank are required to maintain capital equal to at least 8.0% of its assets and commitments to extend credit, weighted by risk, of which at least 4.0% must consist primarily of common equity (including retained earnings) and the remainder may consist of subordinated debt, cumulative preferred stock, or a limited amount of loan and lease loss reserves.

Assets, commitments to extend credit, and off-balance sheet items are categorized according to risk and certain assets considered to present less risk than others permit maintenance of capital at less than the 8% ratio. For example, most home mortgage loans are placed in a 50% risk category and therefore require maintenance of capital equal to 4% of those loans, while commercial loans are placed in a 100% risk category and therefore require maintenance of capital equal to 8% of those loans.

Under the risk-based capital guidelines, assets reported on an institution's balance sheet and certain off-balance sheet items are assigned to risk categories, each of which has an assigned risk weight. Capital ratios are calculated by dividing the institution's qualifying capital by its period-end risk-weighted assets. The guidelines establish two categories of qualifying capital: Tier 1 capital (defined to include common shareholders' equity and noncumulative perpetual preferred stock) and Tier 2 capital which includes, among other items, limited life (and in the case of banks, cumulative) preferred stock, mandatory convertible securities, subordinated debt and a limited amount of reserve for credit losses. Tier 2 capital may also include up to 45% of the pretax net unrealized gains on certain available-for-sale equity securities having readily determinable fair values (i.e., the excess, if any, of fair market value over the book value or historical cost of the investment security). The federal regulatory agencies reserve the right to exclude all or a portion of the unrealized gains upon a determination that the equity securities are not prudently valued. Unrealized gains and losses on other types of assets, such as bank premises and available-for-sale debt securities, are not included in Tier 2 capital, but may be taken into account in the evaluation of overall capital adequacy and net unrealized losses on available-for-sale equity securities will continue to be deducted from Tier 1 capital as a cushion against risk. Each institution is required to maintain a minimum risk-based capital ratio (including Tier 1 and Tier 2 capital) of 8%, of which at least half must be Tier 1 capital.

A leverage capital standard was adopted as a supplement to the risk-weighted capital guidelines. Under the leverage capital standard, an institution is required to maintain a minimum ratio of Tier 1 capital to the sum of its quarterly average total assets and quarterly average reserve for loan losses, less intangible assets not included in Tier 1 capital. Period-end assets may be used in place of quarterly average total assets on a case-by-case basis. The Board of Governors and the FDIC have also adopted a minimum leverage ratio for bank holding companies as a supplement to the risk-weighted capital guidelines. The leverage ratio establishes a minimum Tier 1 ratio of 3% (Tier 1 capital to total assets) for the highest rated bank holding companies or those that have implemented the risk-based capital market risk measure. All other bank holding companies must maintain a minimum Tier 1 leverage ratio of 4% with higher leverage capital ratios required for bank holding companies that have significant financial and/or operational weakness, a high risk profile, or are undergoing or anticipating rapid growth.

At December 31, 2011, American River Bankshares and American River Bank were in compliance with the risk-weighted capital and leverage ratio guidelines.

### **Prompt Corrective Action**

The Board of Governors and the FDIC have adopted regulations implementing a system of prompt corrective action pursuant to Section 38 of the Federal Deposit Insurance Act and Section 131 of the FDIC Improvement Act of 1991 ("FDICIA"). The regulations establish five capital categories with the following characteristics: (1) "Well capitalized" - consisting of institutions with a total risk-based capital ratio of 10% or greater, a Tier 1 risk-based capital ratio of 6% or greater and a leverage ratio of 5% or greater, and the institution is not subject to an order, written agreement, capital directive or prompt corrective action directive; (2) "Adequately capitalized" - consisting of institutions with a total risk-based capital ratio of 8% or greater, a Tier 1 risk-based capital ratio of 4% or greater and a leverage ratio of 4% or greater, and the institution does not meet the definition of a "well capitalized" institution; (3) "Undercapitalized" -

consisting of institutions with a total risk-based capital ratio less than 8%, a Tier 1 risk-based capital ratio of less than 4%, or a leverage ratio of less than 4%; (4) “Significantly undercapitalized” - consisting of institutions with a total risk-based capital ratio of less than 6%, a Tier 1 risk-based capital ratio of less than 3%, or a leverage ratio of less than 3%; (5) “Critically undercapitalized” - consisting of an institution with a ratio of tangible equity to total assets that is equal to or less than 2%.

The regulations established procedures for classification of financial institutions within the capital categories, filing and reviewing capital restoration plans required under the regulations and procedures for issuance of directives by the appropriate regulatory agency, among other matters. The regulations impose restrictions upon all institutions to refrain from certain actions which would cause an institution to be classified within any one of the three “undercapitalized” categories, such as declaration of dividends or other capital distributions or payment of management fees, if following the distribution or payment the institution would be classified within one of the “undercapitalized” categories. In addition, institutions which are classified in one of the three “undercapitalized” categories are subject to certain mandatory and discretionary supervisory actions. Mandatory supervisory actions include (1) increased monitoring and review by the appropriate federal banking agency; (2) implementation of a capital restoration plan; (3) total asset growth restrictions; and (4) limitations upon acquisitions, branch expansion, and new business activities without prior approval of the appropriate federal banking agency. Discretionary supervisory actions may include (1) requirements to augment capital; (2) restrictions upon affiliate transactions; (3) restrictions upon deposit gathering activities and interest rates paid; (4) replacement of senior executive officers and directors; (5) restrictions upon activities of the institution and its affiliates; (6) requiring divestiture or sale of the institution; and (7) any other supervisory action that the appropriate federal banking agency determines is necessary to further the purposes of the regulations. Further, the federal banking agencies may not accept a capital restoration plan without determining, among other things, that the plan is based on realistic assumptions and is likely to succeed in restoring the depository institution’s capital. In addition, for a capital restoration plan to be acceptable, the depository institution’s parent holding company must guarantee that the institution will comply with such capital restoration plan. The aggregate liability of the parent holding company under the guaranty is limited to the lesser of (i) an amount equal to 5 percent of the depository institution’s total assets at the time it became undercapitalized, and (ii) the amount that is necessary (or would have been necessary) to bring the institution into compliance with all capital standards applicable with respect to such institution as of the time it fails to comply with the plan. If a depository institution fails to submit an acceptable plan, it is treated as if it were “significantly undercapitalized.” FDICIA also restricts the solicitation and acceptance of and interest rates payable on brokered deposits by insured depository institutions that are not “well capitalized.” An “undercapitalized” institution is not allowed to solicit deposits by offering rates of interest that are significantly higher than the prevailing rates of interest on insured deposits in the particular institution’s normal market areas or in the market areas in which such deposits would otherwise be accepted.

Any financial institution which is classified as “critically undercapitalized” must be placed in conservatorship or receivership within 90 days of such determination unless it is also determined that some other course of action would better serve the purposes of the regulations. Critically undercapitalized institutions are also prohibited from making (but not accruing) any payment of principal or interest on subordinated debt without prior regulatory approval and regulators must prohibit a critically undercapitalized institution from taking certain other actions without prior approval, including (1) entering into any material transaction other than in the usual course of business, including investment expansion, acquisition, sale of assets or other similar actions; (2) extending credit for any highly leveraged transaction; (3) amending articles or bylaws unless required to do so to comply with any law, regulation or order; (4) making any material change in accounting methods; (5) engaging in certain affiliate transactions; (6) paying excessive compensation or bonuses; and (7) paying interest on new or renewed liabilities at rates which would increase the weighted average costs of funds beyond prevailing rates in the institution’s normal market areas.

## **Additional Regulations**

Under the FDICIA, the federal financial institution agencies have adopted regulations which require institutions to establish and maintain comprehensive written real estate policies which address certain lending considerations, including loan-to-value limits, loan administrative policies, portfolio diversification standards, and documentation, approval and reporting requirements. The FDICIA further generally prohibits an insured state bank from engaging as a principal in any activity that is impermissible for a national bank, absent FDIC determination that the activity would not pose a significant risk to the Bank Insurance Fund, and that the bank is, and will continue to be, within applicable capital standards.

The Federal Financial Institution Examination Counsel (“FFIEC”) utilizes the Uniform Financial Institutions Rating System (“UFIRS”) commonly referred to as “CAMELS” to classify and evaluate the soundness of financial institutions. Bank examiners use the CAMELS measurements to evaluate capital adequacy, asset quality, management, earnings, liquidity and sensitivity to market risk. Effective January 1, 2005, bank holding companies such as the Company, were subject to evaluation and examination under a revised bank holding company rating system. The so-called BOPEC rating system implemented in 1979 was primarily focused on financial condition, consolidated capital and consolidated earnings. The rating system reflects the change toward analysis of risk management (as reflected in bank examination under the CAMELS measurements), in addition to financial factors and the potential impact of nondepository subsidiaries upon depository institution subsidiaries.

The federal financial institution agencies have established bases for analysis and standards for assessing a financial institution's capital adequacy in conjunction with the risk-based capital guidelines including analysis of interest rate risk, concentrations of credit risk, risk posed by non-traditional activities, and factors affecting overall safety and soundness. The safety and soundness standards for insured financial institutions include analysis of (1) internal controls, information systems and internal audit systems; (2) loan documentation; (3) credit underwriting; (4) interest rate exposure; (5) asset growth; (6) compensation, fees and benefits; and (7) excessive compensation for executive officers, directors or principal shareholders which could lead to material financial loss. If an agency determines that an institution fails to meet any standard, the agency may require the financial institution to submit to the agency an acceptable plan to achieve compliance with the standard. If the agency requires submission of a compliance plan and the institution fails to timely submit an acceptable plan or to implement an accepted plan, the agency must require the institution to correct the deficiency. The agencies may elect to initiate enforcement action in certain cases rather than rely on an existing plan particularly where failure to meet one or more of the standards could threaten the safe and sound operation of the institution.

Community Reinvestment Act ("CRA") regulations evaluate banks' lending to low and moderate income individuals and businesses across a four-point scale from "outstanding" to "substantial noncompliance," and are a factor in regulatory review of applications to merge, establish new branches or form bank holding companies. In addition, any bank rated in "substantial noncompliance" with the CRA regulations may be subject to enforcement proceedings. In its most recent exam for CRA compliance, American River Bank has a rating of "satisfactory."

### **Limitations on Dividends**

The Company's ability to pay cash dividends is subject to restrictions set forth in the California General Corporation Law. Funds for payment of any cash dividends by the Company would be obtained from its investments as well as dividends and/or management fees from its subsidiaries. The payment of cash dividends and/or management fees by American River Bank is subject to restrictions set forth in the California Financial Code, as well as restrictions established by the FDIC. On July 27, 2009, it was announced that the Board of Directors had temporarily suspended the payment of cash dividends, until such time that it was prudent to reestablish the payment of cash dividends. The Company relies on distributions from the Bank in the form of cash dividends in order to pay cash dividends to our shareholders. See Item 5. "Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities" for more information regarding cash dividends.

### **Competition**

### **Competitive Data**

*American River Bank.* At June 30, 2011, based on the most recent “Data Book Summary of Deposits in FDIC Insured Commercial and Savings Banks” report at that date, the competing commercial and savings banks had 195 offices in the cities of Fair Oaks, Rancho Cordova, Roseville and Sacramento, California, where American River Bank has its 5 Sacramento area offices, 60 offices in the cities of Healdsburg and Santa Rosa, California, where American River Bank has its 2 Sonoma County offices, and 3 offices in the cities of Jackson, Pioneer and Ione, California, where American River Bank has its 3 Amador County offices. Additionally, American River Bank competes with thrifts and, to a lesser extent, credit unions, finance companies and other financial service providers for deposit and loan customers.

Larger banks may have a competitive advantage because of higher lending limits and major advertising and marketing campaigns. They also perform services, such as trust services, international banking, discount brokerage and insurance services, which American River Bank is not authorized nor prepared to offer currently. American River Bank has made arrangements with its correspondent banks and with others to provide some of these services for its customers. For borrowers requiring loans in excess of American River Bank’s legal lending limits, American River Bank has offered, and intends to offer in the future, such loans on a participating basis with its correspondent banks and with other community banks, retaining the portion of such loans which is within its lending limits. As of December 31, 2011, American River Bank’s aggregate legal lending limits to a single borrower and such borrower’s related parties were \$14,504,000 on an unsecured basis and \$24,173,000 on a fully secured basis based on capital and allowable reserves of \$96,693,000.

American River Bank's business is concentrated in its service area, which primarily encompasses Sacramento County, South Western Placer County, Sonoma County, and Amador County. The economy of American River Bank's service area is dependent upon government, manufacturing, tourism, retail sales, agriculture, population growth and smaller service oriented businesses.

Based upon the most recent "Data Book Summary of Deposits in FDIC Insured Commercial and Savings Banks" report dated June 30, 2011, there were 230 operating commercial and savings bank offices in Sacramento County with total deposits of \$20,330,590,000. This was an increase of \$584,434,000 compared to the June 30, 2010 balances. American River Bank held a total of \$254,365,000 in deposits, representing approximately 1.3% of total commercial and savings banks deposits in Sacramento County as of June 30, 2011.

Based upon the most recent "Data Book Summary of Deposits in FDIC Insured Commercial and Savings Banks" report dated June 30, 2011, there were 116 operating commercial and savings bank offices in Placer County with total deposits of \$7,291,615,000. This was an increase of \$142,456,000 over the June 30, 2010 balances. American River Bank held a total of \$68,408,000 in deposits, representing approximately 0.9% of total commercial and savings banks deposits in Placer County as of June 30, 2011.

Based upon the most recent "Data Book Summary of Deposits in FDIC Insured Commercial and Savings Banks" report dated June 30, 2011, there were 132 operating commercial and savings bank offices in Sonoma County with total deposits of \$10,303,217,000. This was an increase of \$232,444,000 compared to the June 30, 2010 balances. American River Bank held a total of \$72,482,000 in deposits, representing approximately 0.7% of total commercial and savings banks deposits in Sonoma County as of June 30, 2011.

Based upon the most recent "Data Book Summary of Deposits in FDIC Insured Commercial and Savings Banks" report dated June 30, 2011, there were 13 operating commercial and savings bank offices in Amador County with total deposits of \$620,252,000. This was an increase of \$84,129,000 compared to the June 30, 2010 balances. American River Bank held a total of \$84,129,000 in deposits, representing approximately 13.6% of total commercial and savings bank deposits in Amador County as of June 30, 2011.

## **FDIC Insurance**

On October 3, 2008, the Emergency Economic Stabilization Act of 2008 (the "EESA") was signed into law. The EESA temporarily raised the limit on federal deposit insurance coverage provided by the FDIC from \$100,000 to \$250,000 per depositor. On July 21, 2010, President Obama signed the Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act") into law, which, in part, permanently raises the current standard maximum deposit insurance amount per depositor to \$250,000.

On November 9, 2010, the FDIC issued a final rule implementing section 343 of the Dodd-Frank Act that provides for unlimited insurance coverage of noninterest-bearing transaction accounts. Beginning December 31, 2010, through December 31, 2012, all noninterest-bearing transaction accounts are fully insured, regardless of the balance of the account, at all FDIC-insured institutions. The unlimited insurance coverage is available to all depositors, including consumers, businesses, and government entities. This unlimited insurance coverage is separate from, and in addition to, the insurance coverage provided to a depositor's other deposit accounts held at an FDIC-insured institution.

On December 16, 2008, the FDIC approved an earlier proposed seven basis point rate increase for the first quarter 2009 assessment period effective January 1, 2009 as part of the Deposit Insurance Fund ("DIF") restoration plan to achieve a minimum Designated Reserve Ratio ("DRR") of 1.15 percent within five years. In addition, the FDIC adopted a final rule revising its risk-based assessment system, effective April 1, 2009. The changes to the assessment system involved adjustments to the risk-based calculation of an institution's unsecured debt, secured liabilities and brokered deposits. The revisions effectively resulted in a range of possible assessments under the risk-based system of 7 to 77.5 basis points. Depending on any future losses that the FDIC DIF may suffer due to failed institutions, additional significant premium increases might occur in order to replenish the DIF. The FDIC also imposed a special assessment of 5 basis points on all insured institutions. This emergency assessment was calculated based on the insured institution's assets at June 30, 2009 and paid on September 30, 2009. Based on our June 30, 2009 assets subject to the FDIC assessment, the Bank was assessed approximately \$253,000 for the special assessment. On November 12, 2009, the FDIC announced a final rule to require most banks to prepay their estimated quarterly risk-based assessments for 2010, 2011 and 2012. This prepaid amount for the Bank was \$3,886,000.

The Dodd-Frank Act signed into law on July 21, 2010 also established a minimum DRR of 1.35 percent of estimated insured deposits. The Act also mandates that the FDIC adopt a restoration plan should the DIF balance fall below 1.35 percent and provides for dividends to financial institutions should the DIF balance exceed 1.50 percent. On February 7, 2011, the FDIC adopted a final rule which redefines the deposit insurance assessment base as required by the Dodd-Frank Act; makes changes to insurance premium assessment rates; implements DIF dividend provisions; and revises the risk-based assessment system for large insured depository institutions (i.e., those institutions with at least \$10 billion in total assets). In December 2010, the FDIC increased the DRR of the DIF to 2.0 percent effective January 1, 2011.

It is uncertain what effect the implementation of the changes to the insurance assessments will have upon the Company; however, continued deterioration or lack of improvement in the economic conditions impacting financial institutions may necessitate further increases in premium assessments to maintain the DIF which could adversely impact the Company's earnings.

### **General Competitive Factors**

In order to compete with the major financial institutions in its primary service areas, American River Bank uses to the fullest extent possible the flexibility which is accorded by their community bank status. This includes an emphasis on specialized services, local promotional activity, and personal contacts by their respective officers, directors and employees. American River Bank also seeks to provide special services and programs for individuals in their primary service area who are employed in the agricultural, professional and business fields, such as loans for equipment, furniture, tools of the trade or expansion of practices or businesses. In the event there are customers whose loan demands exceed their respective lending limits, they seek to arrange for such loans on a participation basis with other financial institutions. Furthermore, American River Bank also assists those customers requiring services not offered by either bank to obtain such services from correspondent banks.

Commercial banks compete with savings and loan associations, credit unions, other financial institutions and other entities for funds. For instance, yields on corporate and government debt securities and other commercial paper affect the ability of commercial banks to attract and hold deposits. Commercial banks also compete for loans with savings and loan associations, credit unions, consumer finance companies, mortgage companies and other lending institutions.

Banking is a business that depends on interest rate differentials. In general, the difference between the interest rate paid by a bank to obtain their deposits and other borrowings and the interest rate received by a bank on loans extended to customers and on securities held in a bank's portfolio comprise the major portion of a bank's revenues.

The interest rate differentials of a bank, and therefore their revenues, are affected not only by general economic conditions, both domestic and foreign, but also by the monetary and fiscal policies of the United States as set by statutes and as implemented by federal agencies, particularly the Federal Reserve Board. The Federal Reserve Board can and does implement national monetary policy, such as seeking to curb inflation and combat recession, by its open market operations in United States government securities, adjustments in the amount of interest free reserves that banks and other financial institutions are required to maintain, and adjustments to the discount rates applicable to borrowing by banks from the Federal Reserve Board. These activities influence the growth of bank loans, investments and deposits and also affect interest rates charged on loans and paid on deposits. The nature and timing of any future changes in monetary policies and their impact on American River Bank is not predictable.

### **Impact of Certain Legislation and Regulation**

*Interstate Banking.* Since 1996, California law implementing certain provisions of prior federal law has (1) permitted interstate merger transactions; (2) prohibited interstate branching through the acquisition of a branch business unit located in California without acquisition of the whole business unit of the California bank; and (3) prohibited interstate branching through de novo establishment of California branch offices. Initial entry into California by an out-of-state institution must be accomplished by acquisition of or merger with an existing whole bank which has been in existence for at least five years. The Dodd-Frank Act signed into law by President Obama on July 21, 2010, includes provisions authorizing national and state banks to establish branch offices in other states to the same extent as a bank chartered by that state would be permitted to branch. Previously, banks could only establish branch offices in other states if the host state expressly permitted out-of-state banks to establish branch offices in that state. Accordingly, banks may be able to enter new markets more freely.

*Gramm-Leach-Bliley Act* . In 1999, the Gramm-Leach-Bliley Act (the “GLB Act”) was signed into law. The GLB Act eliminates most of the remaining depression-era “firewalls” between banks, securities firms and insurance companies which was established by The Banking Act of 1933, also known as the Glass-Steagall Act (“Glass-Steagall”). Glass-Steagall sought to insulate banks as depository institutions from the perceived risks of securities dealing and underwriting, and related activities. The GLB Act repealed Section 20 of Glass-Steagall which prohibited banks from affiliating with securities firms. Bank holding companies that can qualify as “financial holding companies” can acquire securities firms or create them as subsidiaries, and securities firms can acquire banks or start banking activities through a financial holding company. The GLB Act includes provisions which permit national banks to conduct financial activities through a subsidiary that are permissible for a national bank to engage in directly, as well as certain activities authorized by statute, or that are financial in nature or incidental to financial activities to the same extent as permitted to a “financial holding company” or its affiliates. This liberalization of United States banking and financial services regulation applies both to domestic institutions and foreign institutions conducting business in the United States. Consequently, the common ownership of banks, securities firms and insurance firms is possible, as is the conduct of commercial banking, merchant banking, investment management, securities underwriting and insurance within a single financial institution using a “financial holding company” structure authorized by the GLB Act.

Prior to the GLB Act, significant restrictions existed on the affiliation of banks with securities firms and on the direct conduct by banks of securities dealing and underwriting and related securities activities. Banks were also (with minor exceptions) prohibited from engaging in insurance activities or affiliating with insurers. The GLB Act removed these restrictions and substantially eliminated the prohibitions under the Bank Holding Company Act on affiliations between banks and insurance companies. Bank holding companies which qualify as financial holding companies can insure, guarantee, or indemnify against loss, harm, damage, illness, disability, or death; issue annuities; and act as a principal, agent, or broker regarding such insurance services.

In order for a commercial bank to affiliate with a securities firm or an insurance company pursuant to the GLB Act, its bank holding company must qualify as a financial holding company. A bank holding company will qualify if (i) its banking subsidiaries are “well capitalized” and “well managed” and (ii) it files with the Board of Governors a certification to such effect and a declaration that it elects to become a financial holding company. The amendment of the Bank Holding Company Act permits financial holding companies to engage in activities, and acquire companies engaged in activities, that are financial in nature or incidental to such financial activities. Financial holding companies are also permitted to engage in activities that are complementary to financial activities if the Board of Governors determines that the activity does not pose a substantial risk to the safety or soundness of depository institutions or the financial system in general. These standards expand upon the list of activities “closely related to banking” which to date have defined the permissible activities of bank holding companies under the Bank Holding Company Act.

One further effect of the GLB Act is to require that federal financial institution and securities regulatory agencies prescribe regulations to implement the policy that financial institutions must respect the privacy of their customers and protect the security and confidentiality of customers’ non-public personal information. These regulations require, in general, that financial institutions (1) may not disclose non-public personal information of customers to non-affiliated third parties without notice to their customers, who must have the opportunity to direct that such information not be disclosed; (2) may not disclose customer account numbers except to consumer reporting agencies; and (3) must give

prior disclosure of their privacy policies before establishing new customer relationships.

Neither American River Bankshares or American River Bank have determined whether or when they may seek to acquire and exercise powers or activities under the GLB Act.

*Patriot Act.* On October 26, 2001, President Bush signed the USA Patriot Act (the “Patriot Act”), which includes provisions pertaining to domestic security, surveillance procedures, border protection, and terrorism laws to be administered by the Secretary of the Treasury. Title III of the Patriot Act entitled, “International Money Laundering Abatement and Anti-Terrorist Financing Act of 2001” includes amendments to the Bank Secrecy Act which expand the responsibilities of financial institutions in regard to anti-money laundering activities with particular emphasis upon international money laundering and terrorism financing activities through designated correspondent and private banking accounts.

Effective December 25, 2001, Section 313(a) of the Patriot Act prohibits any insured financial institution such as American River Bank, from providing correspondent accounts to foreign banks which do not have a physical presence in any country (designated as “shell banks”), subject to certain exceptions for regulated affiliates of foreign banks. Section 313(a) also requires financial institutions to take reasonable steps to ensure that foreign bank correspondent accounts are not being used to indirectly provide banking services to foreign shell banks, and Section 319(b) requires financial institutions to maintain records of the owners and agent for service of process of any such foreign banks with whom correspondent accounts have been established.

Effective July 23, 2002, Section 312 of the Patriot Act created a requirement for special due diligence for correspondent accounts and private banking accounts. Under Section 312, each financial institution that establishes, maintains, administers, or manages a private banking account or a correspondent account in the United States for a non-United States person, including a foreign individual visiting the United States, or a representative of a non-United States person shall establish appropriate, specific, and, where necessary, enhanced, due diligence policies, procedures, and controls that are reasonably designed to detect and record instances of money laundering through those accounts.

The Patriot Act contains various provisions in addition to Sections 313(a) and 312 that affect the operations of financial institutions by encouraging cooperation among financial institutions, regulatory authorities and law enforcement authorities with respect to individuals, entities and organizations engaged in, or reasonably suspected of engaging in, terrorist acts or money laundering activities. The Company and American River Bank are not currently aware of any account relationships between American River Bank and any foreign bank or other person or entity as described above under Sections 313(a) or 312 of the Patriot Act.

Certain surveillance provisions of the Patriot Act were scheduled to expire on December 31, 2005, and actions to restrict the use of the Patriot Act surveillance provisions were filed by the ACLU and other organizations. On March 9, 2006, after temporary extensions of the Patriot Act, President Bush signed the “USA Patriot Improvement and Reauthorization Act of 2005” and the “USA Patriot Act Additional Reauthorizing Amendments Act of 2006,” which reauthorized all expiring provisions of the Patriot Act and extended certain provisions related to surveillance and production of business records until December 31, 2009. The extended deadline for those provisions was subsequently further extended at various times during 2010 and 2011 and on May 26, 2011, President Obama signed a further four year extension of the surveillance provisions.

The effects which the Patriot Act and any amendments to the Patriot Act or additional legislation enacted by Congress may have upon financial institutions is uncertain; however, such legislation could increase compliance costs and thereby potentially may have an adverse effect upon the Company’s results of operations.

*Sarbanes-Oxley Act.* On July 30, 2002, President Bush signed into law the Sarbanes-Oxley Act of 2002 (the “Act”) which responded to issues in corporate governance and accountability. Among other matters, key provisions of the

Act and rules promulgated by the SEC pursuant to the Act include the following:

- Expanded oversight of the accounting profession by creating a new independent public company oversight board to be monitored by the SEC.
- Revised rules on auditor independence to restrict the nature of non-audit services provided to audit clients and to require such services to be pre-approved by the audit committee.
- Improved corporate responsibility through mandatory listing standards relating to audit committees, certifications of periodic reports by the CEO and CFO and making issuer interference with an audit a crime.
- Enhanced financial disclosures, including periodic reviews for largest issuers and real time disclosure of material company information.
- Enhanced criminal penalties for a broad array of white collar crimes and increases in the statute of limitations for securities fraud lawsuits.
- Disclosure of whether a company has adopted a code of ethics that applies to the company's principal executive officer, principal financial officer, principal accounting officer or controller, or persons performing similar functions, and disclosure of any amendments or waivers to such code of ethics.

- Disclosure of whether a company's audit committee of its board of directors has a member of the audit committee who qualifies as an "audit committee financial expert."
- A prohibition on insider trading during pension plan black-out periods.
- Disclosure of off-balance sheet transactions.
- A prohibition on personal loans to directors and officers.
- Conditions on the use of non-GAAP (generally accepted accounting principles) financial measures.
- Standards on professional conduct for attorneys requiring attorneys having an attorney-client relationship with a company, among other matters, to report "up the ladder" to the audit committee, another board committee or the entire board of directors certain material violations.
- Expedited filing requirements for Form 4 reports of changes in beneficial ownership of securities reducing the filing deadline to within 2 business days of the date a transaction triggers an obligation to report.
- Accelerated filing requirements for Forms 10-K and 10-Q by public companies which qualify as "accelerated filers" to a phased-in reduction of the filing deadline for Form 10-K reports and Form 10-Q reports.
- Disclosure concerning website access to reports on Forms 10-K, 10-Q and 8-K, and any amendments to those reports, by "accelerated filers" as soon as reasonably practicable after such reports and material are filed with or furnished to the SEC.
- Rules requiring national securities exchanges and national securities associations to prohibit the listing of any security whose issuer does not meet audit committee standards established pursuant to the Act.
- The requirement to report on internal controls over financial reporting in accordance with Section 404 of the Act.

The Company's securities are listed on the Nasdaq Global Select Market. Consequently, in addition to the rules promulgated by the SEC pursuant to the Act, the Company must also comply with the listing standards applicable to Nasdaq listed companies. The Nasdaq listing standards applicable to the Company include standards related to (i) director independence, (ii) executive session meetings of the board, (iii) requirements for audit, nominating and compensation committee charters, membership qualifications and procedures, (iv) shareholder approval of equity compensation arrangements, and (v) code of conduct requirements that comply with the code of ethics under the Act.

The effect of the Act upon the Company is uncertain; however, the Company has incurred and it is anticipated that it will continue to incur increased costs to comply with the Act and the rules and regulations promulgated pursuant to the Act by the SEC, Nasdaq and other regulatory agencies having jurisdiction over the Company or the issuance and listing of its securities. The Company does not currently anticipate, however, that compliance with the Act and such rules and regulations will have a material adverse effect upon its financial position or results of its operations or its cash flows.

*Corporate Disclosure Act.* Effective January 1, 2003, the California Corporate Disclosure Act (the "CCD Act") required publicly traded corporations incorporated or qualified to do business in California to disclose information about their past history, auditors, directors and officers. Effective September 28, 2004, the CCD Act, as currently in effect and codified at California Corporations Code Section 1502.1, requires the Company to file with the California Secretary of State and disclose within 150 days after the end of its fiscal year certain information including the following:

Edgar Filing: AMERICAN RIVER BANKSHARES - Form 10-K

The name of the a company's independent auditor and a description of services, if any, performed for a company during the previous two fiscal years and the period from the end of the most recent fiscal year to the date of filing;  
The annual compensation paid to each director and the five most highly compensated non-director executive officers (including the CEO) during the most recent fiscal year, including all plan and non-plan compensation for all services rendered to a company as specified in Item 402 of Regulation S-K such as grants, awards or issuance of stock, stock options and similar equity-based compensation;  
A description of any loans made to a director at a "preferential" loan rate during the company's two most recent fiscal years, including the amount and terms of the loans;  
Whether any bankruptcy was filed by a company or any of its directors or executive officers within the previous 10 years;

Whether any director or executive officer of a company has been convicted of fraud during the previous 10 years; and

A description of any material pending legal proceedings other than ordinary routine litigation as specified in Item 103 of Regulation S-K and a description of such litigation where the company was found legally liable by a final judgment or order.

The Company does not currently anticipate that compliance with the CCD Act will have a material adverse effect upon its financial position or results of its operations or its cash flows.

*Fair and Accurate Credit Transactions Act.* The Board of Governors, the FDIC, the other federal financial institution regulatory agencies, and the Federal Trade Commission issued a joint press release on October 31, 2007 and final rules and guidelines effective January 1, 2008, subject to mandatory compliance as of November 1, 2008, implementing sections 114 and 315 of the Fair and Accurate Credit Transactions Act of 2003 to require financial institutions and other creditors to develop and implement a written identity theft prevention program. The program must include reasonable policies and procedures for detecting, preventing, and mitigating identity theft in connection with certain new and existing covered accounts. Covered accounts are defined as (i) an account primarily for personal, family, or household purposes (i.e., consumer accounts), or (ii) any other account for which there is a reasonably foreseeable risk to customers or the safety and soundness of the financial institution or creditor from identity theft. The program must be appropriate to the size and complexity of the financial institution or creditor and the nature and scope of its activities and should be designed to:

- identify relevant patterns, practices, and specific forms of activity that are “red flags” of possible identity theft and incorporate those red flags into the program;
- detect the occurrence of red flags incorporated into the program;
- respond appropriately to any red flags that are detected to prevent and mitigate identity theft; and
- ensure that the program is updated periodically to reflect changes in risks to customers or to the safety and soundness of the financial institution or creditor from identity theft.

The regulations include guidelines that each financial institution must consider and, to the extent appropriate, include in its program and steps that must be taken to administer the program including (i) obtaining approval of the program by the board of directors or a committee of the board, (ii) ensuring oversight of the development, implementation and administration of the program, (iii) training staff, and (iv) overseeing service provider arrangements. The guidelines contemplate that existing fraud prevention procedures may be incorporated into the program.

## **Recent Legislation to Stabilize Financial Markets**

In response to global credit and liquidity issues involving a number of financial institutions, the United States government, particularly the United States Department of the Treasury (the “U.S. Treasury”) and the federal financial

institution regulatory agencies, have taken a variety of extraordinary measures designed to restore confidence in the financial markets and to strengthen financial institutions, including capital injections, guarantees of bank liabilities and the acquisition of illiquid assets from banks.

*Emergency Economic Stabilization Act.* On October 3, 2008, the Emergency Economic Stabilization Act of 2008 (the “EESA”) was signed into law. Pursuant to the EESA, the U.S. Treasury was granted the authority to take a range of actions for the purpose of stabilizing and providing liquidity to the U.S. financial markets and has implemented several programs, including the purchase by the U.S. Treasury of certain troubled assets from financial institutions under the Troubled Asset Relief Program” (the “TARP”) and the direct purchase by the U.S. Treasury of equity securities of financial institutions under the Capital Purchase Program (the “CPP”). The EESA also temporarily raised the limit on federal deposit insurance coverage provided by the FDIC from \$100,000 to \$250,000 per depositor.

*Capital Purchase Program.* On October 24, 2008, the U.S. Treasury announced plans to direct \$250 billion of the TARP funding into the CPP to acquire preferred stock investments in bank holding companies and banks with the capital acquired through such investments accorded Tier 1 capital treatment. Bank holding companies and banks eligible to participate as a Qualifying Financial Institution (“QFI”) in the CPP were required to enter into agreements with the U.S. Treasury containing various standard terms and conditions. The Company did not participate in the CPP and instead raised \$25.3 million (in gross proceeds) in a public offering in December 2009 to augment capital.

*Temporary Liquidity Guarantee Program.* Among other programs and actions taken by the U.S. Treasury and other regulatory agencies, the FDIC implemented the Temporary Liquidity Guarantee Program (the “TLGP”) to strengthen confidence and encourage liquidity in the financial system. The TLGP was comprised of the Debt Guarantee Program (the “DGP”) and the Transaction Account Guarantee Program (the “TAGP”). The DGP guaranteed all newly issued senior unsecured debt (e.g., promissory notes, unsubordinated unsecured notes and commercial paper) up to prescribed limits issued by participating entities beginning on October 14, 2008 and continuing through April 30, 2010. For eligible debt issued by that date, the FDIC provided the guarantee coverage until the earlier of the maturity date of the debt or June 30, 2012. The TAGP offered full guarantee for noninterest-bearing transaction accounts held at FDIC-insured depository institutions. The unlimited deposit coverage was voluntary for eligible institutions and was in addition to the \$250,000 FDIC deposit insurance per account that was included as part of the EESA. In addition to the risk-based deposit insurance premium paid on deposits, TAGP participants were assessed, on a quarterly basis, an annualized 25 basis points fee on balances in noninterest-bearing transaction accounts that exceeded the existing deposit insurance limit of \$250,000. The TAGP coverage became effective on October 14, 2008 and terminated on December 31, 2010 for all participating institutions. American River Bank opted to participate in the TAGP.

On November 9, 2010, the FDIC issued a final rule implementing section 343 of the Dodd-Frank Act that made permanent the \$250,000 deposit insurance limit per depositor and provides unlimited insurance coverage for noninterest-bearing transaction accounts. Beginning December 31, 2010, through December 31, 2012, all noninterest-bearing transaction accounts are fully insured, regardless of the balance of the account, at all FDIC-insured institutions. The unlimited insurance coverage is available to all depositors, including consumers, businesses, and government entities. This unlimited insurance coverage is separate from, and in addition to, the insurance coverage provided to a depositor’s other deposit accounts held at an FDIC-insured institution.

*Financial Stability Plan.* On February 10, 2009, the U.S. Treasury announced a Financial Stability Plan (the “FSP”) as a comprehensive approach to strengthening the financial system and credit crisis. The Plan included a Capital Assistance Program (the “CAP”) intended to serve as a bridge to raising private capital and to ensure sufficient capital to preserve or increase lending in a worse-than-expected economic deterioration. Eligibility to participate in the CAP was consistent with the criteria for QFI’s under the CPP. Eligible institutions with consolidated assets in excess of \$100 billion were able to obtain capital under the CAP, subject to a supervisory review process and comprehensive stress test assessment of the losses that could occur over a two year period in the future across a range of economic scenarios, including conditions more severe than anticipated or as typically used in capital planning processes. Eligible institutions with consolidated assets below \$100 billion were able to obtain capital under the CAP after a supervisory review. As announced, the CAP included issuance of a convertible preferred security to the U.S. Treasury at a discount to the participating institution’s stock price as of February 9, 2009, subject to a dividend to be determined. The security instrument was designed to incentivize institutions to replace the CAP capital with private capital or redeem it. Institutions participating in the CPP under TARP might also be permitted to exchange their CPP preferred stock for the convertible preferred CAP security. The Company did not participate in the CAP.

*American Recovery and Reinvestment Act.* On February 17, 2009, the American Recovery and Reinvestment Act of 2009 (the “ARRA”) was signed into law. Section 7001 of the ARRA amended Section 111 of the EESA in its entirety. While the U.S. Treasury was required to promulgate regulations to implement the restrictions and standards set forth

in Section 7001, the ARRA, among other things, significantly expands the executive compensation restrictions previously imposed by the EESA. Such restrictions apply to any entity that has received financial assistance under the TARP, and shall generally continue to apply for as long as any obligation arising from financial assistance provided under the TARP, including preferred stock issued under the CPP, remains outstanding. These ARRA restrictions do not apply to any TARP recipient during such time when the federal government (i) only holds any warrants to purchase common stock of such recipient or (ii) holds no preferred stock or warrants to purchase common stock of such recipient. Since the Company determined not to participate in the CPP, the executive compensation restrictions and standards set forth in Section 7001 of the ARRA are not applicable to the Company.

*Term Asset-Backed Securities Loan Facility.* On March 3, 2009, the U.S. Treasury and the Board of Governors announced the Term Asset-Backed Securities Loan Facility (the “TALF”). The TALF is one of the programs under the Financial Stability Plan announced by the U.S. Treasury on February 10, 2009. The TALF was intended to help stimulate the economy by facilitating securitization activities which allow lenders to increase the availability of credit to consumers and businesses. Under the TALF, the Federal Reserve Bank of New York (“FRBNY”) would lend up to \$200 billion to provide financing to investors as support for purchases of certain AAA-rated asset-backed securities (“ABS”) initially for newly and recently originated auto loans, credit card loans, student loans, SBA-guaranteed small business loans, and rental, commercial, and government vehicle fleet leases, small ticket equipment, heavy equipment, and agricultural equipment loans and leases. The loan asset classes included commercial mortgages, non-Agency residential mortgages, and/or other asset classes. The FRBNY indicated an intention to cease making new loans on June 30, 2010, but loans collateralized by certain types of ABS were scheduled to cease on March 31, 2010, subject to extension of the TALF by the Board of Governors.

*The Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010.* On July 21, 2010, President Obama signed into law the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 ( the “Dodd-Frank Act”). The Dodd-Frank Act is intended to restructure the regulation of the financial services sector by, among other things, (i) establishing a framework to identify systemic risks in the financial system implemented by a newly created Financial Stability Oversight Council and other federal banking agencies; (ii) expanding the resolution authority of the federal banking agencies over troubled financial institutions; (iii) authorizing changes to capital and liquidity requirements; (iv) changing deposit insurance assessments; and (v) enhancing regulatory supervision to improve the safety and soundness of the financial services sector. The Dodd-Frank Act is expected to have a significant impact upon our business as its provisions are implemented over time. Below is a summary of certain provisions of the Dodd-Frank Act which, directly or indirectly, may affect us.

*Changes to Capital Requirements.* The federal banking agencies are required to establish minimum leverage and risk-based capital requirements for banks and bank holding companies which will not be lower and could be higher than current regulatory capital and leverage standards for insured depository institutions. Under these requirements, trust preferred securities will be excluded from Tier 1 capital unless such securities were issued prior to May 19, 2010 by a bank holding company with less than \$15 billion in assets. The Dodd-Frank Act requires capital requirements to be counter cyclical so that the required amount of capital increases in times of economic expansion and decreases in times of economic contraction consistent with safety and soundness.

*Enhanced Regulatory Supervision.* The Dodd-Frank Act increases regulatory oversight, supervision and examination of banks, bank holding companies and their respective subsidiaries by the appropriate regulatory agency.

*Consumer Protection.* The Dodd-Frank Act creates the Consumer Financial Protection Bureau (“CFPB”) within the Federal Reserve System. The CFPB is responsible for establishing and implementing rules and regulations under various federal consumer protection laws governing certain consumer products and services. The CFPB has primary enforcement authority over large financial institutions with assets of \$10 billion or more, while smaller institutions will be subject to the CFPB’s rules and regulations through the enforcement authority of the federal banking agencies. States are permitted to adopt consumer protection laws and regulations that are more stringent than those laws and regulations adopted by the CFPB and state attorneys general are permitted to enforce consumer protection laws and regulations adopted by the CFPB.

*Deposit Insurance.* The Dodd-Frank Act permanently increases the deposit insurance limit for insured deposits to \$250,000 per depositor and extends unlimited deposit insurance to non-interest bearing transaction accounts through December 31, 2012. Other deposit insurance changes under the Dodd-Frank Act include (i) amendment of the assessment base used to calculate an insured depository institution's deposit insurance premiums paid to the Deposit Insurance Fund ("DIF") by elimination of deposits and substitution of average consolidated total assets less average tangible equity during the assessment period as the revised assessment base; (ii) increasing the minimum designated reserve ratio of the DIF from 1.15 percent to 1.35 percent of the estimated amount of total insured deposits; (iii) eliminating the requirement that the FDIC pay dividends to depository institutions when the reserve ratio exceeds certain thresholds; and (iv) repeal of the prohibition upon the payment of interest on demand deposits to be effective one year after the date of enactment of the Dodd-Frank Act. In December 2010, pursuant to the Dodd-Frank Act, the FDIC increased the reserve ratio of the DIF to 2.0 percent effective January 1, 2011.

*Transactions with Affiliates.* The Dodd-Frank Act enhances the requirements for certain transactions with affiliates under Section 23A and 23B of the Federal Reserve Act, including an expansion of the definition of “covered transactions” and increasing the amount of time for which collateral requirements regarding covered transactions must be maintained.

*Transactions with Insiders.* Insider transaction limitations are expanded through the strengthening of loan restrictions to insiders and the expansion of the types of transactions subject to the various limits, including derivative transactions, repurchase agreements, reverse repurchase agreements and securities lending or borrowing transactions. Restrictions are also placed on certain asset sales to and from an insider to an institution, including requirements that such sales be on market terms and, in certain circumstances, approved by the institution’s board of directors.

*Enhanced Lending Limitations.* The Dodd-Frank Act strengthens the existing limits on a depository institution’s credit exposure to include credit exposure arising from derivative transactions, repurchase agreements, and securities lending and borrowing transactions.

*Debit Card Interchange Fees.* The Dodd-Frank Act requires that the amount of any interchange fee charged by a debit card issuer with respect to a debit card transaction must be reasonable and proportional to the cost incurred by the issuer. Within nine months of enactment of the Dodd-Frank Act, the Federal Reserve Board is required to establish standards for reasonable and proportional fees which may take into account the costs of preventing fraud. The restrictions on interchange fees, however, do not apply to banks that, together with their affiliates, have assets of less than \$10 billion.

*Interstate Branching.* The Dodd-Frank Act authorizes national and state banks to establish branch offices in other states to the same extent as a bank chartered by that state would be permitted to branch. Previously, banks could only establish branch offices in other states if the host state expressly permitted out-of-state banks to establish branch offices in that state. Accordingly, banks may be able to enter new markets more freely.

*Charter Conversions.* Effective one year after enactment of the Dodd-Frank Act, depository institutions that are subject to a cease and desist order or certain other enforcement actions issued with respect to a significant supervisory matter are prohibited from changing their federal or state charters, except in accordance with certain notice, application and other procedures involving the applicable regulatory agencies.

*Compensation Practices.* The Dodd-Frank Act provides that the appropriate federal banking regulators must establish standards prohibiting as an unsafe and unsound practice any compensation plan of a bank holding company or other “covered financial institution” that provides an insider or other employee with “excessive compensation” or could lead to a material financial loss to such firm. In June 2010, prior to the enactment of the Dodd-Frank Act, the federal bank regulatory agencies jointly issued the *Interagency Guidance on Sound Incentive Compensation Policies* (“Guidance”), which requires that financial institutions establish metrics for measuring the risk to the financial institution of such loss from incentive compensation arrangements and implement policies to prohibit inappropriate risk taking that may lead to material financial loss to the institution. Together, the Dodd-Frank Act and the Guidance may impact our compensation policies and arrangements.

*Corporate Governance.* The Dodd-Frank Act will enhance corporate governance requirements to include (i) requiring publicly traded companies to give shareholders a non-binding vote on executive compensation at their first annual meeting taking place six months after the date of enactment and at least every three years thereafter and on so-called “golden parachute” payments in connection with approvals of mergers and acquisitions unless previously

voted on by shareholders; (ii) authorizing the SEC to promulgate rules that would allow shareholders to nominate their own candidates for election as directors using a company's proxy materials; (iii) directing the federal banking regulators to promulgate rules prohibiting excessive compensation paid to executives of depository institutions and their holding companies with assets in excess of \$1.0 billion, regardless of whether or not the company is publicly traded; and (iv) authorizing the SEC to prohibit broker discretionary voting on the election of directors and on executive compensation matters.

Many of the requirements under the Dodd-Frank Act will be implemented over an extended period of time. Therefore, the nature and extent of regulations that will be issued by various regulatory agencies and the impact such regulations will have on the operations of financial institutions such as ours is unclear. Such regulations resulting from the Dodd-Frank Act may impact the profitability of our business activities, require changes to certain of our business practices, impose upon us more stringent capital, liquidity and leverage ratio requirements or otherwise adversely affect our business. These changes may also require us to invest significant management attention and resources to evaluate and make necessary changes in order to comply with new statutory and regulatory requirements.

*Small Business Jobs Act of 2010/Small Business Lending Fund.* On September 27, 2010, President Obama signed into law the Small Business Jobs Act of 2010 (the “SBJ Act”), which, among other matters, authorizes the U.S. Treasury to buy up to \$30 billion in preferred stock or subordinated debt issued by community banks (or their bank holding companies provided 90% of the funds received are downstreamed to the bank subsidiary) with assets less than \$10 billion pursuant to the Small Business Lending Fund (the “SBLF”) created under the SBJ Act. Funds received as capital investments will qualify as Tier 1 capital. The SBLF investments are intended to increase the availability of credit for small businesses and thereby induce the creation of jobs in support of economic recovery.

The participating banks (or bank holding companies) will pay an annual dividend on the preferred stock or subordinated debt purchased by the U.S. Treasury in an amount which ranges between 5% and 1% during the initial measurement period of approximately two years determined by reducing the dividend rate 1% for every 2.5% increase in the bank’s small business lending up to a lending increase of 10%. The dividend rate will be adjusted quarterly during the initial period. If a participant’s lending activity does not increase in the initial period, the dividend rate will increase thereafter to 7%. After 4.5 years, the dividend rate increases to 9% until the SBLF funds are repaid. The Company did not participate in the SBLF.

On December 23, 2010, the federal banking agencies jointly issued guidance on underwriting standards for small business loans originated under the SBLF which require adherence to safe and sound credit standards and risk management processes. It is uncertain whether the SBLF will have the intended effect of creating jobs in sufficient numbers to positively impact the economic recovery.

## **Future Legislation and Regulation**

In addition to legislative changes, the various federal and state financial institution regulatory agencies frequently propose rules and regulations to implement and enforce already existing legislation. It cannot be predicted whether or in what form any such rules or regulations will be enacted or the effect that such regulations may have on American River Bankshares or American River Bank. However, in light of the current conditions in the U.S. financial markets and economy, Congress and regulators have increased their focus on the regulation of the financial services industry. The Company anticipates that additional regulations will likely increase the Company’s expenses, which may adversely impact the Company’s results of operations, financial condition, future prospects, profitability, and stock price.

## **Item 1A. Risk Factors.**

**The Company and its subsidiary, American River Bank, conduct business in an environment that includes certain risks described below which could have a material adverse effect on the Company’s business, results of**

**operations, financial condition, future prospects and stock price. You are also referred to the matters described under the heading “Cautionary Statements Regarding Forward-Looking Statements,” in Part I, Item 1 and Part II, Item 7 of this report on Form 10-K for additional information regarding factors that may affect the Company’s business.**

**· We are subject to extensive regulation, which could adversely affect our business.**

Our operations are subject to extensive regulation by federal, state and local governmental authorities and are subject to various laws and judicial and administrative decisions imposing requirements and restrictions on part or all of our operations. We believe that we are in substantial compliance in all material respects with laws, rules and regulations applicable to the conduct of our business. Because our business is highly regulated, the laws, rules and regulations applicable to us are subject to regular modification and change. These laws, rules and regulations may be modified, or other new laws, rules or regulations, may be adopted in the future, which could make compliance much more difficult or expensive, or restrict our ability to originate, broker or sell loans, reduce service charge income on deposits, or further limit or restrict the amount of commissions, or interest or other charges earned on loans originated or sold by us or otherwise adversely affect our business, results of operations, financial condition, or future prospects. The Dodd-Frank Act, signed into law on July 21, 2010, has had and is expected to continue to have a broad impact on the financial services sector, including significant regulatory and compliance changes. Many of the Dodd-Frank Act requirements will be implemented over an extended period of time and due to the uncertainty associated with the manner in which they will be implemented by the various regulatory agencies, the full extent of the impact such requirements will have on our operations is not clear. Changes resulting from the Dodd-Frank Act may impact the profitability of our business activities, require changes to certain of our business practices, impose upon us more stringent capital, liquidity and leverage ratio requirements or otherwise adversely affect our business, results of operations, financial condition or future prospects.

**·Difficult market conditions have adversely affected our business.**

Dramatic declines have occurred in the housing market during the recent economic downturn resulting in falling home prices and increasing foreclosures. These circumstances along with unemployment and under-employment have negatively impacted the credit performance of our loan portfolio and resulted in significant write-downs of asset values. These asset write-downs have had a significant impact on the Company's financial results and ratios, including our net income, earnings per share, return on average equity and return on average assets. Our net income decreased from \$7,751,000 in 2008 to \$1,586,000 in 2009 and \$476,000 in 2010, then increased to \$2,504,000 in 2011. Our earnings per share decreased from \$1.30 per share in 2008 to \$0.26 per share in 2009 and \$0.05 per share in 2010, then increased to \$0.25 per share in 2011. Our return on average equity decreased from 12.39% in 2008 to 2.44% in 2009 and 0.53% in 2010, then increased to 2.74% in 2011. Our return on average assets decreased from 1.32% in 2008 to 0.28% in 2009 and 0.08% in 2010, then increased to 0.43% in 2011. While there were increases in our financial results and ratios in 2011, the increases are below our historical averages and there is no guarantee that these increases will continue into the future, which could adversely affect our stock price. A significant decline in our stock price could result in substantial losses for individual shareholders.

**·Worsening economic conditions could adversely affect our business.**

The economic conditions in the United States in general and within California and in our operating markets may continue to deteriorate. Unemployment nationwide and in California has increased significantly through the recent economic downturn and is anticipated to increase or remain elevated for the foreseeable future. As of December 31, 2011, the unemployment rate nationwide was 8.5% compared to 9.4% at December 31, 2010, 9.9% at December 31, 2009, and 7.3% at December 31, 2008. As of December 31, 2011, the unemployment rate in California was 11.1% compared to 12.5% at December 31, 2010, 12.3% at December 31, 2009 and 8.7% at December 31, 2008. The unemployment rate in the Company's primary markets of Sacramento, Sonoma, and Amador Counties was 10.9%, 8.9% and 12.7% at December 31, 2011, compared to 12.7%, 10.0% and 13.4% at December 31, 2010, 12.2%, 10.3% and 12.5% at December 31, 2009, and 8.7%, 7.0% and 9.3% at December 31, 2008, respectively. These unemployment statistics may not reflect the full extent of unemployment conditions nationwide, in California and in the Company's primary operating markets due to the exclusion of statistics regarding the number of persons who are no longer seeking employment, among other statistical data. Availability of credit and consumer spending, real estate values, and consumer confidence have all declined markedly. The volatility of the capital markets and the credit, capital and liquidity problems confronting the U.S. financial system have not been resolved despite massive government expenditures and legislative efforts to stabilize the U.S. financial system. These conditions may not improve or be resolved in the foreseeable future.

The Bank conducts banking operations principally in Northern California. As a result, our financial condition, results of operations and cash flows are subject to changes in the economic conditions in Northern California. Our business results are dependent in large part upon the business activity, population, income levels, deposits and real estate activity in Northern California, and continued adverse economic conditions could have a material adverse effect upon us. In addition, California is currently experiencing significant budgetary and fiscal difficulties, which has resulted in the number of California government employees being reduced. The businesses operating in California and, in

particular in the City of Sacramento, depend on these government employees for business, and reduced spending activity by these government employees could have a material impact on the success or failure of these businesses, some of which are current or could become future customers of the Bank.

The economic conditions in the United States in general and in the State of California and within our operating markets may further deteriorate and such deterioration may materially and adversely affect us. A further deterioration in economic conditions locally, regionally or nationally could result in a further economic downturn in Northern California with the following consequences, any of which could further adversely affect our business:

- § loan delinquencies and defaults may increase;
- § problem assets and foreclosures may increase;
- § demand for our products and services may decline;
- § low cost or noninterest bearing deposits may decrease;
- § collateral for loans may decline in value, in turn reducing customers' borrowing power, and reducing the value of assets and collateral as sources of repayment of existing loans;
- § foreclosed assets may not be able to be sold;
- § volatile securities market conditions could adversely affect valuations of investment portfolio assets; and
- § reputational risk may increase due to public sentiment regarding the banking industry.

**Non-performing assets take significant time to resolve and adversely affect our results of operations and financial condition.**

At December 31, 2011, our non-performing loans and leases were 4.46% of total loans and leases compared to 6.52% at December 31, 2010, 5.46% at December 31, 2009 and 1.49% at December 31, 2008, and at December 31, 2011, our non-performing assets (which include foreclosed real estate and repossessed assets) to total assets were 3.73% compared to 4.36% at December 31, 2010, 3.95% at December 31, 2009, and 1.49% at December 31, 2008. The allowance for loan and lease losses as a percentage of non-performing loans and leases was 52.5% as of December 31, 2011 compared to 33.6% at December 31, 2010, 37.7% at December 31, 2009 and 94.8% at December 31, 2008. Non-performing assets adversely affect our net income in various ways. Until economic and market conditions improve, we expect to continue to incur losses relating to an increase in non-performing assets. We generally do not record interest income on non-performing loans or other real estate owned, thereby adversely affecting our income and increasing our loan administration costs. When we take collateral in foreclosures and similar proceedings, we are required to mark the related asset to the then fair market value of the collateral, which may ultimately result in a loss. An increase in the level of non-performing assets increases our risk profile and may impact the capital levels our regulators believe are appropriate in light of the ensuing risk profile, which could result in a request to reduce our level of non-performing assets and/or raise additional capital. When we reduce problem assets through loan sales, workouts, restructurings and otherwise, decreases in the value of the underlying collateral, or in these borrowers' performance or financial condition, whether or not due to economic and market conditions beyond our control, could adversely affect our business, results of operations and financial condition. In addition, the resolution of non-performing assets requires significant commitments of time from management and our directors, which can be detrimental to the performance of their other responsibilities. We may experience increases in non-performing assets and the disposition of such non-performing assets may adversely affect our profitability.

**Tightening of credit markets and liquidity risk could adversely affect our business, financial condition and results of operations.**

A tightening of the credit markets or any inability to obtain adequate funds for continued loan growth at an acceptable cost could adversely affect our asset growth and liquidity position and, therefore, our earnings capability. In addition to core deposit growth, maturity of investment securities and loan and lease payments, we also rely on alternative funding sources including unsecured borrowing lines with correspondent banks, secured borrowing lines with the Federal Home Loan Bank of San Francisco and the Federal Reserve Bank of San Francisco, and public time certificates of deposits. Our ability to access these sources could be impaired by deterioration in our financial condition as well as factors that are not specific to us, such as a disruption in the financial markets or negative views and expectations for the financial services industry or serious dislocation in the general credit markets. In the event such a disruption should occur, our ability to access these sources could be adversely affected, both as to price and availability, which would limit or potentially raise the cost of the funds available to us.

**· We have a concentration risk in real estate related loans.**

At December 31, 2011, \$241.7 million, or 80.3% of our total loan and lease portfolio, consisted of real estate related loans. Of that amount, \$204.0 million, or 84.4%, consisted of commercial real estate, \$10.4 million, or 4.3% consisted of commercial and residential construction loans (including land acquisition and development loans) and \$27.3 million, or 11.3%, consisted of residential mortgages and residential multi-family real estate. Substantially all of our real property collateral is located in our operating markets in Northern California. The continuing trend of deteriorating economic conditions in California and in our operating markets has contributed to an overall decline in commercial and residential real estate values. A continuing substantial decline in commercial and residential real estate values in our primary market areas could occur as a result of worsening economic conditions or other events including natural disasters such as earthquakes, fires, and floods. Such a decline in values could have an adverse impact on us by limiting repayment of defaulted loans through sale of commercial and residential real estate collateral and by a likely increase in the number of defaulted loans to the extent that the financial condition of our borrowers is adversely affected by such a decline in values.

At December 31, 2011, our residential construction loans (including land acquisition and development loans) were just \$6.8 million, or 2.2% of our total loans and leases, and these loans were comprised of 13.6% owner-occupied loans and 86.4% non-owner-occupied loans. Construction, land acquisition and development lending involves additional risks because funds are advanced on the security of the project, which is of uncertain value prior to its completion. Because of the uncertainties inherent in estimating construction costs, as well as the market value of the completed project and the effects of governmental regulation on real property, it is relatively difficult to evaluate accurately the total funds required to complete a project and the related loan-to-value ratio. As a result, non-owner-occupied construction loans often involve the disbursement of substantial funds with repayment dependent, in part, on the completion of the project and the ability of the borrower to sell the property, rather than the ability of the borrower or the guarantor to repay the principal and interest. If our appraisal of the value of the completed project proves to be overstated, we may have inadequate security for the repayment of the loan upon completion of construction of the project. If we are forced to foreclose on a project prior to or at completion due to a default, we may not be able to recover all of the unpaid balance and accrued interest related to the loan, as well as related foreclosure and holding costs. In addition, we may be required to fund additional amounts to complete the project and may have to hold the property for an unspecified period of time. The adverse effects of the foregoing matters upon our real estate portfolio could necessitate a material increase in the provision for loan and lease losses.

**Our allowance for loan and lease losses may not be adequate to cover actual losses.**

Like all financial institutions, the Bank maintains an allowance for loan and lease losses to provide for loan defaults and non-performance, but its allowance for loan and lease losses may not be adequate to cover actual loan and lease losses. In addition, future provisions for loan and lease losses could materially and adversely affect the Bank's and therefore our Company's operating results. The adequacy of the Bank's allowance for loan and lease losses is based on prior experience, as well as an evaluation of the risks in the current portfolio. The amount of realizable future losses is susceptible to changes in economic, operating and other conditions, including changes in the local and general California real estate market and operating environment, as well as interest rates, employment levels and other economic factors that may be beyond our control, and these losses may exceed current estimates.

Federal regulatory agencies, as an integral part of the examination process, review the Bank's loans and leases and allowance for loan and lease losses, as well as management's policies and procedures for determining the adequacy of the allowance for loan and lease losses. We believe that our allowance for loan and lease losses policies are effective and that our allowance for loan and lease losses is adequate to cover current losses. However, the Bank may have to further increase the allowance for loan and lease losses as a result of the effects of continued deterioration of economic conditions nationally and in the operating markets in which the Bank conducts business and/or as a result of changes in regulation or accounting methodologies.

**Our focus on lending to small to mid-sized community-based businesses may increase our credit risk.**

As of December 31, 2011, our largest outstanding commercial business loan and largest outstanding commercial real estate loan amounted to \$2.5 million and \$5.9 million, respectively. At such date, our commercial real estate loans amounted to \$204.0 million, or 67.8% of our total loan and lease portfolio, and our commercial business loans amounted to \$42.1 million, or 14.0% of our total loan and lease portfolio. Commercial real estate and commercial business loans generally are considered riskier than single-family residential loans because they have larger balances to a single borrower or group of related borrowers. Commercial real estate and commercial business loans involve risks because the borrowers' ability to repay the loans typically depends primarily on the successful operation of the businesses or the properties securing the loans. Most of the Bank's commercial real estate and commercial business loans are made to small business or middle market customers who may have a heightened vulnerability to economic conditions. Moreover, a portion of these loans have been made by us in recent years and the borrowers may not have experienced a complete business or economic cycle. Furthermore, the deterioration of our borrowers' businesses may hinder their ability to repay their loans with us, which could adversely affect our results of operations.

**Our business is subject to interest rate risk, and variations in interest rates may negatively affect our financial performance.**

Changes in the interest rate environment may reduce our net interest income. It is expected that we will continue to realize income from the differential or “margin” between the interest earned on loans, securities and other interest-earning assets, and interest paid on deposits, borrowings and other interest-bearing liabilities. Net interest margins are affected by the difference between the maturities and repricing characteristics of interest-earning assets and interest-bearing liabilities. In addition, loan volume and yields are affected by market interest rates on loans, and rising interest rates generally are associated with a lower volume of loan originations. We may be unable to minimize our interest rate risk. In addition, an increase in the general level of interest rates may adversely affect the ability of certain borrowers to pay the interest on and principal of their obligations. Accordingly, changes in levels of market interest rates could materially and adversely affect our net interest margin, asset quality, and loan origination volume.

**Governmental monetary policies and intervention to stabilize the U.S. financial system may affect our business and are beyond our control.**

The business of banking is affected significantly by the fiscal and monetary policies of the federal government and its agencies. Such policies are beyond our control. We are particularly affected by the policies established by the Federal Reserve Board in relation to the supply of money and credit in the United States. The instruments of monetary policy available to the Federal Reserve Board can be used in varying degrees and combinations to directly affect the availability of bank loans and deposits, as well as the interest rates charged on loans and paid on deposits, and this can and does have a material effect on our business.

Recent legislation including the Emergency Economic Stabilization Act of 2008 (the “EESA”), signed into law by President Bush on October 3, 2008, and the American Recovery and Reinvestment Act of 2009 (the “ARRA”), signed into law by President Obama on February 17, 2009, each included programs intended to help stabilize the U.S. financial system. However, the degree to which such legislation has helped to resolve the volatility of capital and credit markets or improve capital and liquidity problems confronting the financial system remains uncertain. The failure of the EESA or ARRA and other legislation intended to mitigate or eliminate such volatility and problems affecting the financial markets and a continuation or worsening of current financial market conditions could limit our access to capital or sources of liquidity in amounts and at times necessary to conduct operations in compliance with applicable regulatory requirements.

**The Bank faces strong competition from banks, financial service companies and other companies that offer banking services, which could adversely affect our business.**

Increased competition in our market may result in reduced loans and deposits or the rates charged or paid on these instruments and adversely affect our net interest margin. Ultimately, we may not be able to compete successfully

against current and future competitors. Many competitors offer similar banking services to those that are offered by the Bank in its service area. These competitors include national and super-regional banks, finance companies, investment banking and brokerage firms, credit unions, government-assisted farm credit programs, other community banks and technology-oriented financial institutions offering online services. In particular, the Bank's competitors include several major financial companies whose greater resources may afford them a marketplace advantage by enabling them to maintain numerous banking locations and mount extensive promotional and advertising campaigns. Additionally, banks and other financial institutions with larger capitalization and financial intermediaries not subject to bank regulatory restrictions have larger lending limits than we do and are thereby better able to serve the credit needs of larger customers. Areas of competition include interest rates for loans and deposits, efforts to obtain loans and deposits, as well as the range and quality of products and services provided, including new technology-driven products and services. Technological innovation continues to contribute to greater competition in domestic and international financial services markets as technological advances, such as Internet-based banking services that cross traditional geographic bounds, enable more companies to provide financial services. If the Bank is unable to attract and retain banking customers, we may be unable to maintain our historical levels of loans and leases and deposits or our net interest margin.

**·Our operations are dependent upon key personnel.**

Our future prospects are and will remain highly dependent on our directors, executive officers and other key personnel. Our success will, to some extent, depend on the continued service of our directors and continued employment of the executive officers, in addition to our ability to attract and retain experienced banking professionals to serve us and the Bank in other key positions. The unexpected loss of the services of any of these individuals could have a detrimental effect on our business.

**Technology implementation problems or computer system failures could adversely affect us.**

Our future growth prospects will be highly dependent on the ability of the Bank to implement changes in technology that affect the delivery of banking services such as the increased demand for computer access to bank accounts and the availability to perform banking transactions electronically. The Bank's ability to compete will depend upon its ability to continue to adapt technology on a timely and cost-effective basis to meet such demands. In addition, our business and operations and those of the Bank could be susceptible to adverse effects from computer failures, communication and energy disruption, and activities such as fraud of unethical individuals with the technological ability to cause disruptions or failures of the Bank's data processing system.

**·Information security breaches or other technological difficulties could adversely affect us.**

We cannot be certain that the continued implementation of safeguards will eliminate the risk of vulnerability to technological difficulties or failures or ensure the absence of a breach of information security. The Bank will continue to rely on the services of various vendors who provide data processing and communication services to the banking industry. Nonetheless, if information security is compromised or other technology difficulties or failures occur at the Bank or with one of our vendors, information may be lost or misappropriated, services and operations may be interrupted and the Bank could be exposed to claims from its customers as a result.

**·Our controls over financial reporting and related governance procedures may fail or be circumvented.**

Management regularly reviews and updates our internal control over financial reporting, disclosure controls and procedures, and corporate governance policies and procedures. We maintain controls and procedures to mitigate risks such as processing system failures or errors and customer or employee fraud, and we maintain insurance coverage for certain of these risks. Any system of controls and procedures, however well designed and operated, is based in part on certain assumptions and provides only reasonable, not absolute, certainty that the objectives of the system will be met. Events could occur which are not prevented or detected by our internal controls, are not insured against, or are in excess of our insurance limits. Any failure or circumvention of our controls and procedures, or failure to comply with

regulations related to controls and procedures, could have an adverse effect on our business.

**· We may not be successful in raising additional capital needed in the future.**

If additional capital is needed in the future as a result of losses, our business strategy or regulatory requirements, our efforts to raise such additional capital may be unsuccessful or shares sold in the future may be sold at prices or on terms that are not equal to or better than the current market price. The inability to raise additional capital when needed or at prices and terms acceptable to us could adversely affect our ability to implement our business strategies.

**· The effects of legislation in response to current credit conditions may adversely affect us.**

Legislation that has or may be passed at the federal level and/or by the State of California in response to current conditions affecting credit markets could cause us to experience higher credit losses if such legislation reduces the amount that the Bank's borrowers are otherwise contractually required to pay under existing loan contracts. Such legislation could also result in the imposition of limitations upon the Bank's ability to foreclose on property or other collateral or make foreclosure less economically feasible. Such events could result in increased loan and lease losses and require a material increase in the allowance for loan and lease losses.

**The effects of changes to FDIC insurance coverage limits and assessments are uncertain and increased premiums may adversely affect us.**

FDIC insurance premium assessments are uncertain and increased premium assessments may adversely affect our earnings. The FDIC charges insured financial institutions premiums to maintain the Deposit Insurance Fund (“DIF”). Current economic conditions have resulted and may continue to result in bank failures. In such event, the FDIC may take control of failed institutions and guarantee payment from the DIF up to the insured limit for deposits held at such failed institutions. Depending on any future losses that the DIF may suffer due to failed institutions, there may be additional significant premium increases in order to replenish the DIF.

The FDIC adopted a final rule revising its risk-based assessment system, effective April 1, 2009. The changes to the assessment system involved adjustments to the risk-based calculation of an institution’s unsecured debt, secured liabilities and brokered deposits. The revisions effectively resulted in a range of possible assessments under the risk-based system of 7 to 77.5 basis points. The FDIC also imposed a special assessment of 5 basis points on all insured institutions. This emergency assessment was calculated based on the insured institution’s assets at June 30, 2009 and paid on September 30, 2009. Based on our June 30, 2009 assets subject to the FDIC assessment, the Bank was assessed approximately \$253,000 for the special assessment. In addition, on November 12, 2009, the FDIC announced a final rule to require most banks to prepay their estimated quarterly risk-based assessments for 2010, 2011 and 2012. This prepaid amount for the Bank was \$3,886,000.

On November 9, 2010, the FDIC issued a final rule implementing section 343 of the Dodd-Frank Wall Street Reform and Consumer Protection Act (the “Dodd-Frank Act”) that made permanent a \$250,000 deposit insurance limit per depositor and provides unlimited insurance coverage for noninterest-bearing transaction accounts. Beginning December 31, 2010, through December 31, 2012, all noninterest-bearing transaction accounts are fully insured, regardless of the balance of the account, at all FDIC-insured institutions. The unlimited insurance coverage is available to all depositors, including consumers, businesses, and government entities. This unlimited insurance coverage is separate from, and in addition to, the insurance coverage provided to a depositor’s other deposit accounts held at an FDIC-insured institution.

It is not clear how depositors will respond regarding the \$250,000 per depositor increase in insurance coverage. Despite the increase, some depositors may reduce the amount of deposits held at the Bank if concerns regarding bank failures persist, which could affect the level and composition of the Bank’s deposit portfolio and thereby directly impact the Bank’s funding costs and net interest margin. The Bank’s funding costs may also be adversely affected in the event that the activities of the Federal Reserve Board and the U.S. Treasury, intended to provide liquidity for the banking system and improvement in capital markets, are curtailed or unsuccessful. Such events could reduce liquidity in the markets, thereby increasing funding costs to the Bank or reducing the availability of funds to the Bank to finance its existing operations and thereby adversely affecting our results of operations.

In addition to permanently increasing the deposit insurance limit for insured deposits to \$250,000 per depositor and extending unlimited deposit insurance to non-interest bearing transaction accounts through December 31, 2012, the Dodd-Frank Act also made other deposit insurance changes which may affect our insurance premium assessments to include (i) amendment of the assessment base used to calculate an insured depository institution's deposit insurance premiums paid to the DIF by elimination of deposits and substitution of average consolidated total assets less average tangible equity during the assessment period as the revised assessment base; (ii) increasing the minimum designated reserve ratio of the DIF from 1.15 percent to 1.35 percent of the estimated amount of total insured deposits; (iii) eliminating the requirement that the FDIC pay dividends to depository institutions when the reserve ratio exceeds certain thresholds; and (iv) repeal of the prohibition upon the payment of interest on demand deposits to be effective one year after the date of enactment of the Dodd-Frank Act. In December 2010, pursuant to the Dodd-Frank Act, the FDIC increased the designated reserve ratio of the DIF to 2.0 percent effective January 1, 2011. It is uncertain what effect these changes will have on our future insurance assessments and costs of operations, but any increases in premium assessments or further prepayment of assessments will adversely impact our earnings.

**In the future we may be required to recognize impairment with respect to investment securities, including the FHLB stock we hold.**

Our securities portfolio currently includes securities with unrecognized losses. We may continue to observe declines in the fair market value of these securities. We evaluate the securities portfolio for any other than temporary impairment each reporting period, as required by generally accepted accounting principles, and as of December 31, 2011, we did not recognize any securities as other than temporarily impaired. Future evaluations of the securities portfolio may require us to recognize an impairment charge with respect to these and other holdings. In addition, as a condition to membership in the Federal Home Loan Bank of San Francisco (the "FHLB"), we are required to purchase and hold a certain amount of FHLB stock. Our stock purchase requirement is based, in part, upon the outstanding principal balance of advances from the FHLB. At December 31, 2011, we held stock in the FHLB totaling \$3.1 million. The FHLB stock held by us is carried at cost and is subject to recoverability testing under applicable accounting standards. The FHLB currently distributes cash dividends on its shares, however, this dividend paying practice may not continue. As of December 31, 2011, we did not recognize an impairment charge related to our FHLB stock holdings. Future negative changes to the financial condition of the FHLB may require us to recognize an impairment charge with respect to such holdings.

**If the goodwill we have recorded in connection with our acquisition of Bank of Amador becomes impaired, it could have an adverse impact on our earnings and capital.**

At December 31, 2011, we had approximately \$16.3 million of goodwill on our balance sheet attributable to our merger with Bank of Amador in December 2004. In accordance with accounting principles generally accepted in the United States of America, our goodwill is not amortized but rather evaluated for impairment on an annual basis or more frequently if events or circumstances indicate that a potential impairment exists. Such evaluation is based on a variety of factors, including the quoted price of our common stock, market prices of the common stock of other banking organizations, common stock trading multiples, discounted cash flows, and data from comparable acquisitions. Future evaluations of goodwill may result in findings of impairment and write-downs, which could be material.

**The effects of terrorism and other events beyond our control may adversely affect our results of operations.**

The terrorist actions on September 11, 2001 and thereafter, as well as the military conflicts in Afghanistan and Iraq, have had significant adverse effects upon the United States economy. Whether terrorist activities in the future and the actions of the United States and its allies in combating terrorism on a worldwide basis will adversely impact us and the extent of such impact is uncertain. Similar events beyond our control including, but not limited to, financial and economic volatility and governmental actions in response, natural disasters such as earthquakes, floods, fires, and similar adverse weather occurrences, disruption of power supplies and communications equipment such as telephones, cellular phones, computers, and other forms of electronic equipment or media, and widespread, adverse public health occurrences, may adversely affect our future results of operations by, among other things, disrupting the conduct of our operations and those of our customers, which could result in a reduction in the demand for loans and other products and services offered by the Bank, increase non-performing loans and the amounts reserved for loan and lease losses, or cause significant declines in our level of deposits.

**Future acquisitions and expansion activities may disrupt our business and adversely affect our operating results.**

We regularly evaluate potential acquisitions and expansion opportunities. To the extent that we grow through acquisitions, we cannot ensure that we will be able to adequately or profitably manage this growth. Acquiring other banks, branches or other assets, as well as other expansion activities, involves various risks including the risks of incorrectly assessing the credit quality of acquired assets, encountering greater than expected costs of incorporating acquired banks or branches into the Bank, executing cost savings measures, and being unable to profitably deploy funds in an acquisition.

**We may raise additional capital, which could have a dilutive effect on the existing holders of our common stock and adversely affect the market price of our common stock.**

In December 2009, the Company raised \$25.3 million (in gross proceeds) in a public offering of 4,048,000 shares of its common stock at \$6.25 per share. Our articles of incorporation, as amended, provide the authority to issue without further shareholder approval, 20,000,000 shares of common stock, no par value per share, of which 9,890,909 shares were issued and outstanding at December 31, 2011. Pursuant to the Company's 2010 Equity Incentive Plan and its 2000 Stock Option Plan, at December 31, 2011, employees and directors of the Company had outstanding options to purchase 358,198 shares of common stock. As of December 31, 2011, 1,463,531 shares of common stock remained available for awards under the 2010 Equity Incentive Plan.

We are not restricted from issuing additional shares of common stock or securities that are convertible into or exchangeable for, or that represent the right to receive, common stock. We frequently evaluate opportunities to access the capital markets taking into account our regulatory capital ratios, financial condition and other relevant considerations, and subject to market conditions, we may take further capital actions. Such actions could include, among other things, the issuance of additional shares of common stock in public or private transactions in order to further increase our capital levels above the requirements for a well-capitalized institution established by the federal bank regulatory agencies as well as other regulatory targets.

The issuance of any additional shares of common stock or securities convertible into or exchangeable for common stock or that represent the right to receive common stock, or the exercise of such securities including, without limitation, securities issued upon exercise of outstanding equity awards under our 2010 Equity Incentive Plan or outstanding options under our 2000 Stock Option Plan, could be substantially dilutive to shareholders of our common stock. Holders of our shares of common stock have no preemptive rights that entitle holders to purchase their pro rata share of any offering of shares of any class or series and, therefore, such sales or offerings could result in increased dilution to our shareholders. The market price of our common stock could decline as a result of sales of shares of our common stock or the perception that such sales could occur.

**The price of our common stock may fluctuate significantly, and this may make it difficult for shareholders to resell shares of common stock they own at times or at prices they find attractive.**

The stock market and, in particular, the market for financial institution stocks, has experienced significant volatility, which reached unprecedented levels during the recent economic downturn. In some cases, the markets have produced downward pressure on stock prices for certain issuers without regard to those issuers' underlying financial strength. As a result, the trading volume in our common stock may fluctuate more than usual and cause significant price variations to occur. This may make it difficult for shareholders to resell shares of common stock they own at times or at prices they find attractive. The low trading volume in our common shares on the NASDAQ Global Select Market means that our shares may have less liquidity than other publicly traded companies. We cannot ensure that the volume of trading in our common shares will be maintained or will increase in the future.

The trading price of the shares of our common stock will depend on many factors, which may change from time to time and which may be beyond our control, including, without limitation, our financial condition, performance, creditworthiness and prospects, future sales or offerings of our equity or equity related securities, and other factors identified above in the forward-looking statement discussion in Part I, Item 1 of this Annual Report on Form 10-K under the heading "Cautionary Statements Regarding Forward-Looking Statements" and below. These broad market fluctuations have adversely affected and may continue to adversely affect the market price of our common stock. Among the factors that could affect our stock price are:

§ actual or anticipated quarterly fluctuations in our operating results and financial condition;

§ changes in financial estimates or publication of research reports and recommendations by financial analysts or  
§ actions taken by rating agencies with respect to our common stock or those of other financial institutions;  
§ failure to meet analysts' revenue or earnings estimates;  
§ speculation in the press or investment community generally or relating to our reputation, our market area, our  
§ competitors or the financial services industry in general;  
§ strategic actions by us or our competitors, such as acquisitions, restructurings, dispositions or financings;  
§ actions by our current shareholders, including sales of common stock by existing shareholders and/or directors and  
§ executive officers;  
§ fluctuations in the stock price and operating results of our competitors;  
§ future sales of our equity, equity-related or debt securities;  
§ changes in the frequency or amount of dividends or share repurchases;  
§ proposed or adopted regulatory changes or developments;  
§ anticipated or pending investigations, proceedings, or litigation that involves or affects us;  
§ trading activities in our common stock, including short-selling;  
§ domestic and international economic factors unrelated to our performance; and  
§ general market conditions and, in particular, developments related to market conditions for the financial services  
§ industry.

A significant decline in our stock price could result in substantial losses for individual shareholders.

**· We may be unable or choose not to pay cash dividends in the foreseeable future.**

Our ability to pay dividends on our common stock depends on a variety of factors. On July 27, 2009 we announced suspension of our quarterly dividends, as compared to our quarterly dividends of \$0.143 per share declared each quarter since the fourth quarter of 2007. The Company relies on distributions from the Bank in the form of cash dividends in order to pay cash dividends to our shareholders. Cash dividends may or may not be paid in the future since they are subject to regulatory restrictions and to evaluation by our Board of Directors of financial factors including, but not limited to, our earnings, financial condition and capital requirements.

**· Anti-takeover provisions in our articles of incorporation and bylaws and California law could make a third party acquisition of us difficult.**

Our articles of incorporation and bylaws contain provisions that could make it more difficult for a third party to acquire us (even if doing so would be beneficial to our shareholders) and for holders of our common stock to receive any related takeover premium for their common stock. We are also subject to certain provisions of California law that would delay, deter or prevent a change in control of the Company. These provisions could limit the price that investors might be willing to pay in the future for shares of our common stock.

**· Credit Downgrade Risk and European Market Risk.**

On August 5, 2011, Standard & Poor's downgraded the long-term credit rating of the U.S. from "AAA" to "AA+." This was the first downgrade of the U.S. credit rating in history. Prior to the action taken by S&P, Moody's placed the U.S. government under review for a possible credit ratings downgrade, but on August 2, 2011, Moody's confirmed the U.S. government's "AAA" credit rating while stating that the rating outlook was negative. Also, on August 2, 2011, Fitch affirmed its existing U.S. government credit rating, but stated that the rating was under review. It is uncertain whether future additional downgrades may occur by such rating agencies.

The federal bank regulatory agencies jointly issued guidance on August 5, 2011 regarding the impact of the S&P downgrade upon risk-based capital treatment. The agencies advised banks that for risk-based capital purposes, the risk weights for Treasury securities and other securities issued or guaranteed by the U.S. government, government agencies, and government-sponsored entities will not change. The agencies also advised that treatment of Treasury securities and other securities issued or guaranteed by the U.S. government, government agencies, and government-sponsored entities under other federal banking agency regulations, including, for example, the Federal Reserve Board's Regulation W, will also be unaffected.

The effects of credit agency downgrade of the U.S. government's credit rating, or in the credit ratings of instruments issued, insured or guaranteed by related institutions, agencies or instrumentalities is uncertain, but such downgrades could result in risks to the Company and general economic conditions in the U.S. and in the Company's market areas, which we are unable to predict. In addition, there is existing uncertainty about the effects upon the U.S. economy of the financial instability of several countries in the European Union and the risks of debt defaults posed by those countries. These economic circumstances could have a significant adverse effect on our business, results of operations and financial condition, which in turn could adversely affect our stock price.

**Item 1B. Unresolved Staff Comments.**

None.

**Item 2. Properties.**

The Company and American River Bank lease nine and own two of their respective premises. The Company's headquarters is located at 3100 Zinfandel Drive, Suite 450, Rancho Cordova, California. The office space is located in a six-story office building. The lease term is seven (7) years and expires on July 31, 2017. The premises consist of approximately 12,218 square feet on the fourth floor of the building. The space is leased from MSCP Capital Center Investors, LLC, successor to One Capital Center.

American River Bank's main office is located at 1545 River Park Drive, Suite 107, Sacramento, California, in a modern, five-story building which has off-street parking for its clients. American River Bank leases premises in the building from Hines VAF II Sacramento Properties, L.P., the successor to Spieker Properties. The lease term is for one-hundred and twenty-seven (127) months and expires on February 28, 2021. The premises consist of 1,643 square feet on the ground floor.

American River Bank leases premises at 9750 Business Park Drive, Sacramento, California. The premises are leased from Bradshaw Plaza, Associates, Inc., which is owned in part by Charles D. Fite, a director of the Company. The lease term is ten (10) years and expires on November 30, 2016. The premises consist of 3,711 square feet on the ground floor.

American River Bank leases premises at 10123 Fair Oaks Boulevard, Fair Oaks, California. The premises are leased from Marjorie Wood-Taylor, Trustee of Marjorie Wood-Taylor Trust Established by Declaration of Trust dated September 2, 1992 under the provisions of a Trust Agreement dated September 2, 1992. Marjorie Wood-Taylor, is a former director of the Company. The most recent lease term was twelve (12) years and expired on March 1, 2009. On May 14, 2009, the lease term was extended for five (5) years, beginning on March 1, 2009 and expiring on March 1, 2014. Beginning March 1, 2011, the Company has a unilateral right to cancel the lease at any time by proving lessor with a six (6) month written notice. The premises consist of 2,380 square feet on the ground floor.

American River Bank leases premises at 2240 Douglas Boulevard, Roseville, California. The premises are leased from LUM YIP KEE, LIMITED (doing business as Twin Tree Land Company). The lease term is ten (10) years and

expires on November 30, 2016. The premises consist of 3,790 square feet on the ground floor.

American River Bank leases premises at 520 Capitol Mall, Sacramento, California. The premises are leased from 520 Capitol Mall, Inc. The lease term is ten (10) years and expires on June 1, 2014. The premises consist of 4,010 square feet on the ground floor.

North Coast Bank, a division of American River Bank, owns premises at 412 Center Street, Healdsburg, California. The premises were purchased June 1, 1993. The purchase price for the land and building was \$343,849. The building consists of 2,620 square feet. The land consists of 10,835 square feet.

North Coast Bank, a division of American River Bank, leases premises at 90 South E Street, Santa Rosa, California. The premises were subleased from Chicago Title Company through November 11, 2011 and now are leased from 90 E Street, LLC until January 31, 2019. The combined sublease and lease term is ten (10) years and expires on January 31, 2019. The premises consist of 3,600 square feet on the ground floor.

Bank of Amador, a division of American River Bank, leases premises at 422 Sutter Street, Jackson, California. The premises are leased from the United States Postal Service. The most recent lease term was five (5) years and expired on May 31, 2011 and the premises consisted of 6,400 square feet on the ground floor and second floor. Effective June 1, 2011, the lease was extended for an additional five (5) years set to expire on May 31, 2016. The new lease term does not include the second floor and the new premises consists of approximately 3,600 square feet on the ground floor.

Bank of Amador, a division of American River Bank, leases land at 26395 Buckhorn Ridge Road, Pioneer, California. The premises are leased from Joseph T. Bellamy, Trustee of the Joseph T. Bellamy 2005 Trust. The lease term is ten (10) years and expires on October 31, 2017. The premises consist of 1,757 square feet of office space on the ground floor, an attached garage consisting of approximately 400 square feet and 1,223 feet of office space on the second floor.

Bank of Amador, a division of American River Bank, owns premises at 66 Main Street, Ione, California. The premises were purchased April 1, 1995. The purchase price for the land and building was \$167,500. The building consists of 2,576 square feet. The land consists of 9,700 square feet.

The leases on the premises located at 1545 River Park Drive, 9750 Business Park Drive, 90 South E Street, 26395 Buckhorn Ridge Road, 422 Sutter Street, and 3100 Zinfandel Drive, contain options to extend for five years. Included in the above premises are two facilities leased from current or former directors of the Company at terms and conditions which management believes are consistent with the commercial lease market. The foregoing summary descriptions of leased premises are qualified in their entirety by reference to the lease agreements listed as exhibits in Part IV, Item 15 of this Annual Report on Form 10-K.

### **Item 3. Legal Proceedings.**

There are no material legal proceedings adverse to the Company and its subsidiaries to which any director, officer, affiliate of the Company, or 5% shareholder of the Company or its subsidiaries, or any associate of any such director, officer, affiliate or 5% shareholder of the Company or its subsidiaries are a party, and none of the above persons has a material interest adverse to the Company or its subsidiaries.

From time to time, the Company and/or its subsidiaries may be a party to claims and legal proceedings arising in the ordinary course of business. The Company's management is not aware of any pending legal proceedings to which either it or its subsidiaries may be a party or has recently been a party, which will have a material adverse effect on the financial condition or results of operations of the Company or its subsidiaries.

### **Item 4. Mine Safety Disclosures.**

Not applicable.

## PART II

### Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.

#### Market Information

The Company's common stock began trading on the NASDAQ National Stock Market ("Nasdaq") under the symbol "AMRB" on October 26, 2000. Effective July 3, 2006, the Company's common stock became listed and traded on the Nasdaq Global Select Market. The following table shows the high and the low prices for the common stock, for each quarter during 2011 and 2010, as reported by Nasdaq.

2011	High	Low
First quarter	\$6.75	\$5.95
Second quarter	6.89	6.00
Third quarter	6.59	4.55
Fourth quarter	5.00	4.55
2010	High	Low
First quarter	\$8.50	\$7.50
Second quarter	8.91	7.25
Third quarter	7.58	5.65
Fourth quarter	6.49	5.50

The closing price for the Company's common stock on February 29, 2012 was \$6.74.

#### Holdings

As of February 27, 2012, there were approximately 2,700 shareholders of record of the Company's common stock.

## Dividends

The Company paid quarterly cash dividends on its common stock from the first quarter of 2004 through the second quarter of 2009. Prior to that, the Company paid cash dividends twice a year since 1992. On July 27, 2009, the Company announced that the Board of Directors had temporarily suspended the payment of cash dividends, until such time that it was prudent to reestablish the payment of cash dividends. The Company relies on distributions from the Bank in the form of cash dividends in order to pay cash dividends to our shareholders. In 2011 and 2010, there were no cash dividends paid. It is uncertain whether any dividends will be paid in the future since they are subject to regulatory and statutory restrictions and the evaluation by the Company's Board of Directors of financial factors including, but not limited to earnings, financial condition and capital requirements of the Company and its subsidiaries.

The California General Corporation Law (the "Corporation Law") provides that a corporation may make a distribution to its shareholders if the corporation's retained earnings equal at least the amount of the proposed distribution. The Corporation Law further provides that, in the event that sufficient retained earnings are not available for the proposed distribution, a corporation may nevertheless make a distribution to its shareholders if it meets two conditions, which generally stated are as follows: (1) the corporation's assets equal at least 1-1/4 times its liabilities; and (2) the corporation's current assets equal at least its current liabilities or, if the average of the corporation's earnings before taxes on income and before interest expenses for the two preceding fiscal years was less than the average of the corporation's interest expenses for such fiscal years, then the corporation's current assets must equal at least 1-1/4 times its current liabilities.

The Board of Governors generally prohibits a bank holding company from declaring or paying a cash dividend which would impose undue pressure on the capital of subsidiary banks or would be funded only through borrowing or other arrangements that might adversely affect a bank holding company's financial position. The Board of Governors' policy is that a bank holding company should not continue its existing rate of cash dividends on its common stock unless its net income is sufficient to fully fund each dividend and its prospective rate of earnings retention appears consistent with its capital needs, asset quality and overall financial condition.

The payment of cash dividends by American River Bank is subject to restrictions set forth in the California Financial Code (the “Financial Code”). The Financial Code provides that a bank may not make a cash distribution to its shareholders in excess of the lesser of (a) the bank’s retained earnings; or (b) the bank’s net income for its last three fiscal years, less the amount of any distributions made by the bank or by any majority-owned subsidiary of the bank to the shareholders of the bank during such period. However, a bank may, with the approval of the Commissioner, make a distribution to its shareholders in an amount not exceeding the greater of (a) its retained earnings; (b) its net income for its last fiscal year; or (c) its net income for its current fiscal year. In the event that the Commissioner determines that the shareholders’ equity of a bank is inadequate or that the making of a distribution by the bank would be unsafe or unsound, the Commissioner may order the bank to refrain from making a proposed distribution.

The FDIC may also restrict the payment of dividends by a subsidiary bank if such payment would be deemed unsafe or unsound or if after the payment of such dividends, the bank would be included in one of the “undercapitalized” categories for capital adequacy purposes pursuant to the FDIC Improvement Act of 1991.

## Stock Repurchases

On January 16, 2008, the Board of Directors of the Company authorized a stock repurchase program which allowed the repurchase of up to six and one half percent (6.5%) annually of the Company’s outstanding shares of common stock (adjusted for stock splits or stock dividends). On July 27, 2009, the Company announced that the Board of Directors was temporarily suspending the stock repurchase program. The following table lists shares repurchased during the quarter ended December 31, 2011 and the maximum amount available to repurchase under the repurchase plan, which as a result of the suspension of the repurchase program was zero.

Period	(a)	(b)	(c)	(d)
	Total Number of Shares (or Units) Purchased	Average Price Paid Per Share (or Unit)	Total Number of Shares (or Units) Purchased as Part of Publicly Announced Plans or Programs	Maximum Number (or Approximate Dollar Value) of Shares (or Units) That May Yet Be Purchased Under the Plans or Programs
Month #1 October 1 through October 31, 2011	None	N/A	None	None
Month #2 November 1 through November 30, 2011	None	N/A	None	None
	None	N/A	None	None

Month #3  
December 1  
through  
December 31,  
2011

Total	None	N/A	None
-------	------	-----	------

The Company did not repurchase any of its shares in 2011, 2010 or in 2009. The Company purchased 115,815 shares in 2008, 426,668 shares in 2007, 299,410 shares in 2006, 92,986 shares in 2005, 11,869 shares in 2004, 1,915 shares in 2003 and 83,747 shares in 2002. Share amounts have been adjusted for stock dividends and/or splits.

On January 26, 2012, the Company terminated the existing stock repurchase program and approved and authorized a new stock repurchase program for 2012 (the “2012 Program”). The 2012 Program authorizes the repurchase during 2012 of up to 5% of the outstanding shares of the Company’s common stock, or approximately 494,500 shares based on the 9,890,909 shares outstanding as of January 26, 2012. Any repurchases under the 2012 Program will be made from time to time by the Company in the open market as conditions allow. All such transactions will be structured to comply with Commission Rule 10b-18 and all shares repurchased under the 2012 Program will be retired. The number, price and timing of the repurchases will be at the Company’s sole discretion and the 2012 Program may be re-evaluated depending on market conditions, capital and liquidity needs or other factors. Based on such re-evaluation, the Board of Directors may suspend, terminate, modify or cancel the 2012 Program at any time without notice.

**Item 6. Selected Financial Data.**

**FINANCIAL SUMMARY-** The following table presents certain consolidated financial information concerning the business of the Company and its subsidiaries. This information should be read in conjunction with the Consolidated Financial Statements, the notes thereto, and Management's Discussion and Analysis included in this report. All per share data has been retroactively restated to reflect stock dividends and stock splits.

**As of and for the Years Ended December 31,**

(In thousands, except per share amounts and ratios)

	2011	2010	2009	2008	2007					
<b>Operations Data:</b>										
Net interest income	\$21,591	\$22,256	\$24,032	\$25,925	\$26,402					
Provision for loan and lease losses	3,625	7,365	8,530	1,743	450

(4) Non-performing loans and leases consist of loans and leases past due 90 days or more and still accruing and nonaccrual loans and leases.

## **Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.**

The following is American River Bankshares management's discussion and analysis of the significant changes in income and expense accounts for the years ended December 31, 2011, 2010, and 2009.

### **Cautionary Statements Regarding Forward-Looking Statements**

Certain matters discussed or incorporated by reference in this Annual Report on Form 10-K including, but not limited to, matters described in "Item 7 - Management's Discussion and Analysis of Financial Condition and Results of Operations," are "forward-looking statements" within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended, Section 27A of the Securities Act of 1933, as amended, and subject to the safe-harbor provisions of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements may contain words related to future projections including, but not limited to, words such as "believe," "expect," "anticipate," "intend," "may," "will," "should," "could," "would," and variations of those words and similar words that are subject to risks, uncertainties and other factors that could cause actual results to differ materially from those projected. Factors that could cause or contribute to such differences include, but are not limited to, the following: (1) the duration of financial and economic volatility and decline and actions taken by the United States Congress and governmental agencies, including the United States Department of the Treasury, to deal with challenges to the U.S. financial system; (2) the risks presented by a continued economic recession, which could adversely affect credit quality, collateral values, including real estate collateral, investment values, liquidity and loan originations and loan portfolio delinquency rates; (3) variances in the actual versus projected growth in assets and return on assets; (4) potential continued or increasing loan and lease losses; (5) potential increasing levels of expenses associated with resolving non-performing assets as well as regulatory changes; (6) changes in the interest rate environment including interest rates charged on loans, earned on securities investments and paid on deposits and other borrowed funds; (7) competitive effects; (8) potential declines in fee and other noninterest income earned associated with economic factors as well as regulatory changes; (9) general economic conditions nationally, regionally, and within our operating markets could be less favorable than expected or could have a more direct and pronounced effect on us than expected and adversely affect our ability to continue internal growth at historical rates and maintain the quality of our earning assets; (10) changes in the regulatory environment including government intervention in the U.S. financial system; (11) changes in business conditions and inflation; (12) changes in securities markets, public debt markets, and other capital markets; (13) potential data processing and other operational systems failures or fraud; (14) potential continued decline in real estate values in our operating markets; (15) the effects of uncontrollable events such as terrorism, the threat of terrorism or the impact of the current military conflicts in Afghanistan and Iraq and the conduct of the war on terrorism by the United States and its allies, worsening financial and economic conditions, natural disasters, and disruption of power supplies and communications; (16) changes in accounting standards, tax laws or regulations and interpretations of such standards, laws or regulations; (17) projected business increases following any future strategic expansion could be lower than expected; (18) the goodwill we have recorded in connection with acquisitions could become impaired, which may have an adverse impact on our earnings; (19) the reputation of the financial services industry could experience further deterioration, which could adversely affect our ability to access markets for funding and to acquire and retain customers; (20) the efficiencies we may expect to receive from any investments in personnel and infrastructure may not be realized; and (21) downgrades in the credit rating of the United States by credit rating agencies.

The factors set forth under “Item 1A - Risk Factors” in this report and other cautionary statements and information set forth in this report should be carefully considered and understood as being applicable to all related forward-looking statements contained in this report, when evaluating the business prospects of the Company and its subsidiaries.

Forward-looking statements are not guarantees of performance. By their nature, they involve risks, uncertainties and assumptions. The future results and shareholder values may differ significantly from those expressed in these forward-looking statements. You are cautioned not to put undue reliance on any forward-looking statement. Any such statement speaks only as of the date of this report, and in the case of any documents that may be incorporated by reference, as of the date of those documents. We do not undertake any obligation to update or release any revisions to any forward-looking statements, to report any new information, future event or other circumstances after the date of this report or to reflect the occurrence of unanticipated events, except as required by law. However, your attention is directed to any further disclosures made on related subjects in our subsequent reports filed with the Securities and Exchange Commission (the “SEC”) on Forms 10-K, 10-Q and 8-K.

## **Critical Accounting Policies**

### *General*

The Company's financial statements are prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP"). The financial information contained within our statements is, to a significant extent, financial information that is based on measures of the financial effects of transactions and events that have already occurred. We use historical loss data and the economic environment as factors, among others, in determining the inherent loss that may be present in our loan and lease portfolio. Actual losses could differ significantly from the factors that we use. In addition, GAAP itself may change from one previously acceptable method to another method. Although the economics of our transactions would be the same, the timing of events that would impact our transactions could change.

### *Allowance for Loan and Lease Losses*

The allowance for loan and lease losses is an estimate of the credit loss risk in our loan and lease portfolio. The allowance is based on two basic principles of accounting: (1) "Accounting for Contingencies," which requires that losses be accrued when it is probable that a loss has occurred at the balance sheet date and such loss can be reasonably estimated; and (2) the "Receivables" topic, which requires that losses be accrued on impaired loans based on the differences between the value of collateral, present value of future cash flows or values that are observable in the secondary market and the loan balance.

The allowance for loan and lease losses is determined based upon estimates that can and do change when the actual risk, loss events, or changes in other factors, occur. The analysis of the allowance uses an historical loss view as an indicator of future losses and as a result could differ from the actual losses incurred in the future. If the allowance for loan and lease losses falls below that deemed adequate (by reason of loan and lease growth, actual losses, the effect of changes in risk factors, or some combination of these), the Company has a strategy for supplementing the allowance for loan and lease losses, over the short-term. For further information regarding our allowance for loan and lease losses, see "Allowance for Loan and Lease Losses Activity."

### *Stock-Based Compensation*

The Company recognizes compensation expense over the vesting period in an amount equal to the fair value of all share-based payments which consist of stock options and restricted stock awarded to directors and employees. The fair value of each stock option award is estimated on the date of grant and amortized over the service period using a Black-Scholes-Merton based option valuation model that requires the use of assumptions. Critical assumptions that affect the estimated fair value of each award include expected stock price volatility, dividend yields, option life and the risk-free interest rate. The fair value of each restricted award is estimated on the date of award and amortized over the service period.

### *Goodwill*

Business combinations involving the Company's acquisition of the equity interests or net assets of another enterprise or the assumption of net liabilities in an acquisition of branch offices constituting a business may give rise to goodwill. Goodwill represents the excess of the consideration paid for an acquired entity over the net fair value of the amounts assigned to assets acquired and liabilities assumed in transactions accounted for under the purchase method of accounting. The value of goodwill is ultimately derived from the Company's ability to generate net earnings after the acquisition. A decline in net earnings could be indicative of a decline in the fair value of goodwill and result in impairment. For that reason, goodwill is assessed for impairment at a reporting unit level at least annually following the year of acquisition. The Company performed an evaluation of goodwill, recorded as a result of the Bank of Amador acquisition, during the December 2011 and determined that there was no impairment. While the Company believes all assumptions utilized in its assessment of goodwill for impairment are reasonable and appropriate, changes in earnings, the effective tax rate, historical earnings multiples and the cost of capital could all cause different results for the calculation of the present value of future cash flows upon which the assessment is based.

### *Income Taxes*

The Company files its income taxes on a consolidated basis with its subsidiaries. The allocation of income tax expense (benefit) represents each entity's proportionate share of the consolidated provision for income taxes.

The Company accounts for income taxes using the balance sheet method, under which deferred tax assets and liabilities are recognized for the tax consequences of temporary differences between the reported amounts of assets and liabilities and their tax bases. Deferred tax assets and liabilities are adjusted for the effects of changes in tax laws and rates on the date of enactment. On the consolidated balance sheet, net deferred tax assets are included in accrued interest receivable and other assets. Deferred tax assets are reduced by a valuation allowance when, in the opinion of management, it is more likely than not that some or all of the deferred tax assets will not be realized. The Company conducted an analysis to assess the need for a valuation allowance at December 31, 2011. As part of this assessment, all available evidence, including both positive and negative, was considered to determine whether based on the weight of such evidence, a valuation allowance on the Company's deferred tax assets was needed. A valuation allowance is deemed to be needed when, based on the weight of the available evidence, it is more likely than not (a likelihood of more than percent) that some portion or all of a deferred tax asset will not be realized. The future realization of the deferred tax asset depends on the existence of sufficient taxable income within the carryback and carry forward periods.

The Company accounts for uncertainty in income taxes under "Accounting for Uncertainty in Income Taxes". Under the provisions of Accounting for Uncertainty in Income Taxes, only tax positions that met the more-likely-than-not recognition threshold are recognized. The benefit of a tax position is recognized in the financial statements in the period during which, based on all available evidence, management believes it is more likely than not that the position will be sustained upon examination, including the resolution of appeals or litigation processes, if any. Tax positions taken are not offset or aggregated with other positions. Tax positions that meet the more-likely-than-not recognition threshold are measured as the largest amount of tax benefit that is more than 50 percent likely of being realized upon settlement with the applicable taxing authority. The portion of the benefits associated with tax positions taken that exceeds the amount measured as described above is reflected as a liability for unrecognized tax benefits in the accompanying balance sheet along with any associated interest and penalties that would be payable to the taxing authorities upon examination. The election has been made to record interest expense related to tax exposures in tax expense, if applicable, and the exposure for penalties related to tax exposures in tax expense, if applicable.

## Overview

The Company recorded net income in 2011 of \$2,504,000, a 426.1% increase from \$476,000 in 2010. Diluted earnings per share for 2011 were \$0.25, an increase of \$0.20 from the \$0.05 recorded in 2010. For 2011, the Company realized a return on average equity of 2.74% and a return on average assets of 0.43%, as compared to 0.53% and 0.08% for 2010.

Net income for 2010 was \$1,110,000 (70.0%) lower than the \$1,586,000 recorded in 2009. In 2009, diluted earnings per share were \$0.26, return on average assets was 0.28% and return on average equity was 2.44%. Table One below provides a summary of the components of net income for the years indicated (dollars in thousands):

**Table One: Components of Net Income**

For the years ended:	2011	2010	2009
Net interest income*	\$21,830	\$22,465	\$24,331
Provision for loan and lease losses	(3,625 )	(7,365 )	(8,530 )
Noninterest income	2,108	1,804	2,269
Noninterest expense	(16,301 )	(16,470 )	(15,811 )
(Provision for) benefit from income taxes	(1,269 )	251	(374 )
Tax equivalent adjustment	(239 )	(209 )	(299 )
Net income	\$2,504	\$476	\$1,586
Average total assets	\$578,217	\$584,114	\$572,473
Net income as a percentage of average total assets	0.43 %	0.08 %	0.28 %

\* Fully taxable equivalent basis (FTE)

Under accounting principles generally accepted in the United States of America all share and per share data is adjusted for stock dividends and stock splits. There were no stock dividends or stock splits in 2011, 2010 or 2009.

During 2011, total assets of the Company increased \$2,578,000 (0.4%) to a total of \$581,518,000 at year-end. At December 31, 2011, net loans totaled \$293,731,000, down \$44,802,000 (13.2%) from the ending balance on December 31, 2010. Deposits decreased \$2,837,000 or 0.6% during 2011 resulting in ending deposit balances of \$462,285,000. Shareholders' equity increased 5.1% during 2011, increasing by \$4,555,000 to end the year at \$94,099,000. The Company ended 2011 with a leverage capital ratio of 13.1% and a total risk-based capital ratio of 22.8% compared to leverage 1 capital ratio of 12.6% and a total risk-based capital ratio of 20.3% at the end of 2010.

## **Results of Operations**

### **Net Interest Income and Net Interest Margin**

Net interest income represents the excess of interest and fees earned on interest earning assets (loans, securities, Federal funds sold and interest-bearing deposits in other banks) over the interest paid on deposits and borrowed funds. Net interest margin is net interest income expressed as a percentage of average earning assets.

The Company's fully taxable equivalent net interest margin was 4.36% in 2011, 4.49% in 2010, and 4.90% in 2009. The fully taxable equivalent net interest income was down \$635,000 (2.8%) in 2011 compared to 2010. The fully taxable equivalent net interest income was down \$1,866,000 (7.7%) in 2010 compared to 2009.

The fully taxable equivalent interest income component decreased from \$25,915,000 in 2010 to \$24,438,000 in 2011, representing a 5.7% decrease. The decrease in the fully taxable equivalent interest income for 2011 compared to the same period in 2010 is comprised of two components - rate (down \$72,000) and volume (down \$1,405,000). The rate decrease can be attributed to the overall lower interest rate environment, forgone interest on nonaccrual loans, and lower average loan balances replaced with higher average investment securities. During 2011, foregone interest income on nonaccrual loans was approximately \$1,706,000, compared to foregone interest of \$1,736,000 during 2010. The average balance of earning assets decreased slightly from \$500,882,000 in 2010 to \$500,200,000 in 2011; however, there was a significant change in the average earning asset mix in 2011. There was an increase in investment securities, offset by a decrease in loan balances. When compared to 2010, average loan balances were down \$39,135,000 (10.8%) to \$323,310,000 for 2011 and average investment securities were up \$36,926,000 (26.8%) to \$174,935,000 for 2011. The overall low interest rate environment, the negative effect of the foregone interest on loans, and the change in the asset mix (lower loan totals and higher investment security totals) resulted in a 28 basis point decrease in the yield on average earning assets from 5.17% for 2010 to 4.89% for 2011. The decrease in the

yield on earning assets was partially offset by higher rates on investment securities. The yield on investment securities was positively impacted by a slowdown in mortgage prepayments. As mortgage prepayments slow, the premium paid on these securities is amortized over a longer period of time, resulting in a higher yield. The yield on investment securities increased from 2.67% in 2010 to 2.96% in 2011. While the overall dollar decrease in 2011 of fully taxable equivalent interest income due to rates was \$72,000, the increase in the investment securities due to rate added \$525,000. The volume decrease of \$1,405,000 occurred mainly as a result of the decrease in average loans. The market in which the Company operates continues to see a slowdown in new loan volume as existing and potential new borrowers continue to pay down debt and delay expansion plans.

The fully taxable equivalent interest income component decreased from \$29,421,000 in 2009 to \$25,915,000 in 2010, representing an 11.9% decrease. The decrease in the fully taxable equivalent interest income for 2010 compared to the same period in 2009 is comprised of two components - rate (down \$2,695,000) and volume (down \$811,000). The rate decrease can be attributed to the overall lower interest rate environment, forgone interest on nonaccrual loans, and lower average loans replaced with higher average investment securities. During 2010, foregone interest income on nonaccrual loans was approximately \$1,736,000, compared to foregone interest of \$1,281,000 during 2009. The average balance of earning assets increased 0.9% from \$496,202,000 in 2009 to \$500,882,000 in 2010, however, much of the increase relates to an increase in investment securities, offset by a decrease in loan balances. When compared to 2009, average loan balances were down \$42,094,000 (10.4%) to \$362,445,000 for 2010 and average investment securities were up \$47,982,000 (53.3%) to \$138,031,000 for 2010. The overall low interest rate environment, the negative effect of the foregone interest on loans, and the change in the asset mix (lower loan totals and higher investment security totals) resulted in a 76 basis point decrease in the yield on average earning assets from 5.93% for 2009 to 5.17% for 2010. The volume decrease of \$811,000 occurred mainly as a result of the decrease in average loans.

Interest expense was \$842,000 (24.4%) lower in 2011 compared to 2010. The average balances on interest bearing liabilities were \$16,438,000 (4.5%) lower in 2011 compared to 2010. The lower balances accounted for a \$267,000 decrease in interest expense. Average borrowings were down \$3,418,000 (16.7%) as the Company replaced higher cost borrowings with lower cost checking and money market accounts. Average deposit balances decreased \$5,649,000 or 1.2% from \$469,177,000 during 2010 to \$463,528,000 during 2011. While there was an overall decrease in deposits, the Company continues to have success attracting new deposit relationships as a direct result of its business development efforts. The Company's business development efforts have been focused on building checking and savings deposits and other non-CD balances. These non-CD balances increased \$12,956,000 (3.7%) during 2011 and CD balances decreased \$18,605,000 (15.4%) during 2011. The overall lower interest rate environment accounted for a decrease in rates and a \$575,000 reduction in interest expense in 2011 compared to 2010. Rates paid on interest bearing liabilities decreased 19 basis points from 0.94% in 2010 to 0.75% in 2011.

Interest expense was \$1,640,000 (32.2%) lower in 2010 compared to 2009. The average balances on interest bearing liabilities were \$19,366,000 (5.0%) lower in 2010 compared to 2009. The lower balances accounted for a \$719,000 decrease in interest expense. Average borrowings were down \$29,287,000 (58.9%) as the Company replaced higher cost borrowings with lower cost checking and money market accounts. Average deposit balances increased \$16,449,000 or 3.6% from \$452,728,000 during 2009 to \$469,177,000 during 2010. The Company continues to have success attracting new deposit relationships, as a direct result of its business development efforts. As a result of the lower overall interest rate environment, the decrease in rates accounted for a \$921,000 reduction in interest expense for 2010 compared to 2009. Rates paid on interest bearing liabilities decreased 38 basis points between 2009 to 2010 from 1.32% to 0.94%.

Table Two, Analysis of Net Interest Margin on Earning Assets, and Table Three, Analysis of Volume and Rate Changes on Net Interest Income and Expenses, are provided to enable the reader to understand the components and past trends of the Company's interest income and expenses. Table Two provides an analysis of net interest margin on earning assets setting forth average assets, liabilities and shareholders' equity; interest income earned and interest expense paid and average rates earned and paid; and the net interest margin on earning assets. Table Three sets forth a summary of the changes in interest income and interest expense from changes in average asset and liability balances (volume), computed on a daily average basis, and changes in average interest rates.

Net interest income & margin (3)		\$21,830	4.36 %		\$22,465	4.49 %		\$24,331	4.90 %

- (1) Loan and lease interest includes loan and lease fees of \$95,000, \$56,000 and \$46,000 in 2011, 2010 and 2009, respectively.
- (2) Includes taxable-equivalent adjustments that primarily relate to income on certain securities that is exempt from federal income taxes. The effective federal statutory tax rate was 34% in 2011, 2010 and 2009.
- (3) Net interest margin is computed by dividing net interest income by total average earning assets.

**Table Three: Analysis of Volume and Rate Changes on Net Interest Income and Expenses**

Year ended December 31, 2011 over 2010 (dollars in thousands)

Increase (decrease) in interest income and expense due to change in:

Interest-earning assets:	Volume	Rate (4)	Net Change
Net loans and leases (1)(2)	\$(2,400)	\$(592)	\$(2,992)
Taxable investment securities	767	618	1,385
Tax-exempt investment securities (3)	209	(93 )	116
Corporate stock	—	—	—
Federal funds sold & other	—	—	—
Interest bearing deposits in other banks	19	(5 )	14
Total	(1,405)	(72 )	(1,477)

Interest-bearing liabilities:

Demand deposits	3	(286)	(283 )
Savings deposits	28	(69 )	(41 )
Time deposits	(215 )	(175)	(390 )
Other borrowings	(83 )	(45 )	(128 )
Total	(267 )	(575)	(842 )
Interest differential	\$(1,138)	\$503	\$(635 )

Year Ended December 31, 2010 over 2009 (dollars in thousands)

Increase (decrease) in interest income and expense due to change in:

Interest-earning assets:	Volume	Rate (4)	Net Change
Net loans and leases (1)(2)	\$(2,641)	\$(510 )	\$(3,151)
Taxable investment securities	2,248	(2,171)	77
Tax-exempt investment securities (3)	(373 )	1	(372 )
Corporate stock	(1 )	(5 )	(6 )
Federal funds sold & other	—	—	—
Interest bearing deposits in other banks	(44 )	(10 )	(54 )
Total	(811 )	(2,695)	(3,506)

Interest-bearing liabilities:

Demand deposits	163	(211 )	(48 )
-----------------	-----	--------	-------

Edgar Filing: AMERICAN RIVER BANKSHARES - Form 10-K

Savings deposits	47	(52 )	(5 )
Time deposits	(289 )	(709 )	(998 )
Other borrowings	(640 )	51	(589 )
Total	(719 )	(921 )	(1,640 )
Interest differential	\$(92 )	\$(1,774)	\$(1,866 )

- (1) The average balance of non-accruing loans and leases is immaterial as a percentage of total loans and leases and, as such, has been included in net loans and leases.
- (2) Loan and lease fees of \$95,000, \$66,000 and \$46,000 for the years ended December 31, 2011, 2010 and 2009, respectively, have been included in the interest income computation.
- (3) Includes taxable-equivalent adjustments that primarily relate to income on certain securities that is exempt from federal income taxes. The effective federal statutory tax rate was 34% in 2011, 2010 and 2009.
- (4) The rate/volume variance has been included in the rate variance.

40

—

### Provision for Loan and Lease Losses

The Company provided \$3,625,000 for loan and lease losses in 2011 as compared to \$7,365,000 for 2010. Net loan and lease losses for 2011 were \$4,168,000 as compared to \$7,689,000 in 2010. In 2011, net loan and lease losses as a percentage of average loans outstanding were 1.29% compared to 2.12% in 2010. In 2009, the Company provided \$8,530,000 for loan and lease losses and net charge-offs were \$6,539,000. The Company has continued to provide amounts to the allowance for loan and lease losses in 2011 because of a continued high level of nonperforming loans and leases. The high level of nonperforming loans and leases is due to the impact that the overall challenging economy in the Company's market areas and the United States, overall, has had on the Company's borrowers. For additional information see the "Allowance for Loan and Lease Losses Activity."

### Service Charges and Fees and Other Income

Table Four below provides a summary of the components of noninterest income for the periods indicated (dollars in thousands):

**Table Four: Components of Noninterest Income**

	Year Ended December 31,		
	2011	2010	2009
Service charges on deposit accounts	\$761	\$866	\$1,018
Merchant fee income	467	420	437
Earnings on Bank owned life insurance	272	277	246
Gain on sale and call of securities	353	7	270
Other	255	234	298
	\$2,108	\$1,804	\$2,269

Noninterest income was up \$304,000 (16.9%) to \$2,108,000 in 2011 from the 2010 level. The increase from 2010 to 2011 was primarily related to an increase in the gains on sales of investment securities. For 2011, gains on sales of investment securities were \$353,000 compared to \$7,000 for 2010. During 2011, the Company sold selected municipal bonds to improve the credit quality of the securities portfolio and some mortgage related bonds to reinvest in mortgage bonds with better risk reward structures. The increase from investment sales was partially offset by lower service charges on deposit accounts (down \$105,000 or 12.1%). The lower service charges on deposit accounts resulted from decreased fees on overdrawn checking accounts (down \$81,000 or 17.6%).

Noninterest income was down \$465,000 (20.5%) to \$1,804,000 in 2010 from the 2009 level. The decrease from 2009 to 2010 was primarily related to lower service charges on deposit accounts (down \$152,000 or 14.9%) and lower gain on sale of securities (down \$263,000 or 97.4%). The lower service charges on deposit accounts resulted from decreased fees on overdrawn checking accounts (down \$147,000 or 24.2%).

### **Salaries and Benefits**

Salaries and benefits were \$8,465,000 (up \$589,000 or 7.5%) for 2011 as compared to \$7,876,000 in 2010. The increase in salary and benefits was due in part to an increase in core salaries which increased \$58,000 (1.0%) mainly due to normal merit increases. Incentive accruals increased \$385,000 from \$82,000 in 2010 to \$467,000 in 2011, primarily due to an increase in the Company's net income in relationship to targeted net income and the reduction in classified loans in relationship to the targeted levels. In addition, salary and benefit expense was higher due to a decrease in direct costs associated with the production of new loans since the Company allocates the direct costs of originating loans as a reduction to salary expense in accordance with accounting principles generally accepted in the United States of America. As loan volume decreases less direct costs of loan production are allocated against salary expense. The offset direct cost allocation decreased \$82,000 (18.1%) from \$453,000 in 2010 to \$371,000 in 2011. The remaining increase in salaries and benefits is related to an increase in employee benefits, would include employee health insurance, and employer taxes. The average FTE's decreased from 113 in 2010 to 111 during 2011 and, at the end of 2011, the full-time equivalent staff was 110, down from 111 at the end of 2010.

Salaries and benefits were \$7,876,000 (up \$597,000 or 8.2%) for 2010 as compared to \$7,279,000 in 2009. The increase in salaries and benefits was due in part to a decrease in direct costs associated with the production of new loans. The direct cost allocation decreased \$221,000 (32.8%) from \$674,000 in 2009 to \$453,000 in 2010. Overall salary expense increased \$80,000 (1.3%) mainly due to the additional staff added to the loan collection and workout department. Employee benefits, which include employee health insurance, increased \$279,000 (27.8%). The average FTE's decreased from 117 in 2009 to 113 during 2010 and, at the end of 2010, the full-time equivalent staff was 111, down 7 from 118 at the end of 2009.

### **Other Real Estate Owned**

The total other real estate owned (“OREO”) expense in 2011 was \$1,288,000 (up \$78,000 or 6.4%) compared to \$1,210,000 in 2010. The increased expense is related to the higher valuation allowances required on the properties held due to further declines in property values during 2011 as compared to 2010. Write-downs due to updated property valuations in 2011 were \$978,000 compared to \$805,000 in 2010.

The total OREO expense in 2010 was \$1,210,000 compared to \$1,441,000 in 2009. The reduced expense (\$231,000 or 16.0%) is related to lower write-downs due to property valuations in 2010 as compared to 2009.

### **Occupancy, Furniture and Equipment**

Occupancy expense decreased \$131,000 (10.3%) during 2011 to \$1,140,000, compared to \$1,271,000 in 2010. The majority of the decrease relates to lower rent associated with the Company’s banking offices as a result of restructuring some leases during the last two years. Furniture and equipment expense was \$718,000 in 2011 compared to \$720,000 in 2010, representing a \$2,000 decrease.

Occupancy expense decreased \$118,000 (8.5%) during 2010 to \$1,271,000, compared to \$1,389,000 in 2009. The majority of the decrease relates to lower rent associated with the Company’s banking offices. Furniture and equipment expense was \$720,000 in 2010 compared to \$759,000 in 2009, representing a \$39,000 (5.1%) decrease.

### **Regulatory Assessments**

Regulatory assessments include fees paid to the California Department of Financial Institutions (the “DFI”) and the Federal Deposit Insurance Corporation (the “FDIC”). FDIC assessments decreased \$560,000 (39.4%) during 2011 to \$863,000, compared to \$1,423,000 in 2010. The majority of this decrease relates to lower deposit balances, the change in the FDIC assessment methodology from a deposit based system to an asset risk-based system, and the Bank’s improved risk assessment category. The assessments paid to the DFI in 2011 were \$68,000 compared to \$67,000 in 2010.

FDIC assessments increased \$653,000 (84.8%) during 2010 to \$1,423,000, up from \$770,000 in 2009. The increase relates to increased assessments from the FDIC based on the growth in the Company's deposits balances, changes to the Bank's assessment category, and higher expenses incurred by the FDIC. The assessments paid to the DFI in 2010 were \$67,000 compared to \$69,000 in 2009.

## Other Expenses

Table Five below provides a summary of the components of the other noninterest expenses for the periods indicated (dollars in thousands):

	Year Ended December 31,		
	2011	2010	2009
Professional fees	\$1,037	\$1,191	\$1,061
Telephone and postage	330	336	375
Directors' expense	327	371	390
Outsourced item processing	427	414	369
Advertising and promotion	231	198	232
Stationery and supplies	183	208	205
Amortization of intangible assets	219	242	263
Other operating expenses	1,004	1,010	1,278
	\$3,758	\$3,970	\$4,173

Other expenses were \$3,758,000 (down \$212,000 or 5.3%) for 2011 as compared to \$3,970,000 for 2010. Professional fees decreased \$154,000 (12.9%) due in part to lower legal and other professional services to resolve problem loans. The remainder of the decrease in other expenses resulted as the Company continued to focus on reducing expenses and outside services. The overhead efficiency ratio on a taxable equivalent basis for 2011 was 67.2% as compared to 66.9% in 2010. Much of the increase in the overhead efficiency is related to the decrease in the net interest margin and not as a result of an increase in noninterest expense.

Other expenses were \$3,970,000 (down \$203,000 or 4.9%) for 2010 as compared to \$4,173,000 for 2009. Professional fees increased \$130,000 (12.3%) due in part to higher legal, accounting, and other professional services to comply with changes in the regulatory environment and to resolve problem loans. This increase was offset by reductions in several other expense related items. The overhead efficiency ratio on a taxable equivalent basis for 2010 was 66.9% as compared to 58.5% in 2009. Much of the increase is related to the increase in salaries and benefits and FDIC assessments, in addition to overall lower revenue.

### **Provision for (Benefit from) Income Taxes**

The effective tax rate (benefit) on income was 33.6%, (111.6%), and 19.1% in 2011, 2010 and 2009, respectively. The effective tax rate differs from the federal statutory tax rate due to state tax (benefit) expense (net of federal tax effect) of \$287,000, (\$66,000), and \$59,000 in these years. Tax-exempt income of \$1,006,000, \$894,000, and \$1,125,000 from investment securities and bank owned life insurance in these years helped to reduce the effective tax rate. The benefit recorded in 2010 and the lower effective tax rate in 2009 resulted from the Company realizing the benefits of tax-free income related to such items as municipal bonds and bank owned life insurance against an overall lower amount of taxable income.

### **Balance Sheet Analysis**

The Company's total assets were \$581,518,000 at December 31, 2011 as compared to \$578,940,000 at December 31, 2010, representing an increase of \$2,578,000 (0.4%). The average balances of total assets during 2011 were \$578,217,000, down \$5,897,000 or 1.0% from the 2010 total of \$584,114,000.

### **Investment Securities**

The Company classifies its investment securities as trading, held-to-maturity or available-for-sale. The Company's intent is to hold all securities classified as held-to-maturity until maturity and management believes that it has the ability to do so. Securities classified as available-for-sale may be sold to implement asset/liability management strategies as part of our contingency funding plan and in response to changes in interest rates, prepayment rates and similar factors. Table Six below summarizes the values of the Company's investment securities held on December 31 of the years indicated. The Company did not have any investment securities classified as trading in any of the years indicated below.

**Table Six: Investment Securities Composition**

(dollars in thousands)

Available-for-sale (at fair value)	2011	2010	2009
Debt securities:			
Mortgage-backed securities	\$179,454	\$138,644	\$76,009
Obligations of states and political subdivisions	29,188	15,792	20,587
Equity securities:			
Corporate stock	69	79	86
Total available-for-sale investment securities	\$208,711	\$154,515	\$96,682

## Held-to-maturity (at amortized cost)

## Debt securities:

Mortgage-backed securities	\$4,010	\$6,149	\$12,331
Total held-to-maturity investment securities	\$4,010	\$6,149	\$12,331

See Table Fifteen for a breakdown of the investment securities by maturity and the corresponding weighted average yields.

## Loans and Leases

The Company concentrates its lending activities in the following principal areas: (1) commercial; (2) commercial real estate; (3) multi-family real estate; (4) real estate construction (both commercial and residential); (5) residential real estate; (6) lease financing receivable; (7) agriculture; and (8) consumer loans. At December 31, 2011, these categories accounted for approximately 14%, 68%, 2%, 3%, 7%, 1%, 1% and 4%, respectively, of the Company's loan portfolio. This mix was relatively unchanged compared to 17%, 62%, 2%, 5%, 7%, 1%, 2% and 4%, at December 31, 2010. Continuing focus in the Company's market area, new borrowers developed through the Company's marketing efforts, and credit extensions expanded to existing borrowers resulted in the Company originating approximately \$39 million in new loans in 2011. Normal pay downs, loan charge-offs, and loans transferred to OREO during 2011, resulted in an overall decrease in total loans and leases of \$45,471,000 (13.2%) from December 31, 2010. The market in which the Company operates continues to see a slowdown in new loan volume as existing borrowers continue to pay down debt and delay expansion plans. The Company reported net decreases in balances for commercial loans (\$16,153,000 or 27.7%), commercial real estate (\$12,033,000 or 5.6%), real estate construction (\$5,615,000 or 35.2%), residential real estate (\$6,404,000 or 24.5%), lease financing receivable (\$1,041,000 or 37.6%), agriculture (\$2,619,000 or 36.4%), and consumer loans (\$2,218,000 or 16.8%) and an increase in multi-family real estate (\$612,000 or 8.8%). Table Seven below summarizes the composition of the loan and lease portfolio for the past five years as of December 31.

**Table Seven: Loan and Lease Portfolio Composition**

	December 31,				
(dollars in thousands)	2011	2010	2009	2008	2007
Commercial	\$42,108	\$58,261	\$72,621	\$90,625	\$94,632
Real estate:					
Commercial	204,043	216,076	223,685	218,626	191,774
Multi-family	7,580	6,968	8,476	8,938	5,830
Construction	10,356	15,971	27,482	48,664	66,022
Residential	19,695	26,099	26,922	24,706	20,120
Lease financing receivable	1,725	2,766	3,920	4,475	4,070
Agriculture	4,583	7,202	7,472	8,015	8,177
Consumer	10,984	13,202	14,253	14,796	10,750
	301,074	346,545	384,831	418,845	401,375
Deferred loan fees, net	(302 )	(427 )	(600 )	(571 )	(517 )
Allowance for loan and lease losses	(7,041 )	(7,585 )	(7,909 )	(5,918 )	(5,883 )
Total net loans and leases	\$293,731	\$338,533	\$376,322	\$412,356	\$394,975

A significant portion of the Company's loans and leases are direct loans and leases made to individuals and local businesses. The Company relies substantially on local promotional activity and personal contacts by American River Bank officers, directors and employees to compete with other financial institutions. The Company makes loans and leases to borrowers whose applications include a sound purpose and a viable primary repayment source, generally supported by a secondary source of repayment.

Commercial loans consist of credit lines for operating needs, loans for equipment purchases, working capital, and various other business loan products. Consumer loans include a range of traditional consumer loan products such as personal lines of credit and homeowner equity lines of credit and non-mortgage products to finance purchases of autos, boats, recreational vehicles, mobile homes and various other consumer items. Construction loans are generally comprised of commitments to customers within the Company's service area for construction of commercial properties, multi-family properties and custom and semi-custom single-family residences. Other real estate loans consist primarily of loans secured by first trust deeds on commercial and residential properties typically with maturities from 3 to 10 years and original loan-to-value ratios generally from 65% to 75%. Agriculture loans consist primarily of vineyard loans and development loans to plant vineyards. In general, except in the case of loans under SBA programs or Farm Services Agency guarantees, the Company does not make long-term mortgage loans.

"Subprime" real estate loans generally refer to residential mortgages made to higher-risk borrowers with lower credit and/or income histories. Within the industry, many of these loans were originated with adjustable interest rates that reset upward after an introductory period. These "subprime" loans coupled with declines in housing prices have led to an increase in the banking industry's default rates resulting in many instances of increased foreclosure rates as the adjustable interest rates reset to higher levels. The Company did not have any such "subprime" loans at December 31, 2011 and December 31, 2010.

Average loans and leases in 2011 were \$323,310,000 which represents a decrease of \$39,135,000 (10.8%) compared to the average in 2010. Average loans and leases in 2010 were \$362,445,000 which represented a decrease of \$42,094,000 (10.4%) from the average in 2009.

## **Risk Elements**

The Company assesses and manages credit risk on an ongoing basis through a total credit culture that emphasizes excellent credit quality, extensive internal monitoring and established formal lending policies. Additionally, the Company contracts with an outside loan review consultant to periodically review the existing loan and lease portfolio to assist in assessing and managing credit risk. Management believes its ability to identify and assess risk and return characteristics of the Company's loan and lease portfolio is critical for profitability and growth. Management strives to continue its emphasis on credit quality in the loan and lease approval process, through active credit administration and regular monitoring. With this in mind, management has designed and implemented a comprehensive loan and lease review and grading system that functions to continually assess the credit risk inherent in the loan and lease portfolio.

Ultimately, underlying trends in economic and business cycles may influence credit quality. American River Bank's business is concentrated in the Sacramento Metropolitan Statistical Area, which is a diversified economy but with a large State of California government presence and employment base. American River Bank operates in Sonoma County, through North Coast Bank, a division of American River Bank, whose business is focused on businesses within the two communities in which it has offices (Santa Rosa and Healdsburg) and in Amador County, through Bank of Amador, a division of American River Bank, whose business is focused on businesses and consumers within the three communities in which it has offices (Jackson, Pioneer, and Ione). The economy of Sonoma County is diversified with professional services, manufacturing, agriculture and real estate investment and construction, while the economy of Amador County is reliant upon government, services, retail trade, manufacturing industries and Indian gaming.

The Company has significant extensions of credit and commitments to extend credit that are secured by real estate. The ultimate repayment of these loans is generally dependent on personal or business cash flows or the sale or refinancing of the real estate. The Company monitors the effects of current and expected market conditions and other factors on the collectability of real estate loans. The more significant factors management considers involve the following: lease rate and terms, vacancy rates, absorption and sale rates; real estate values, supply and demand factors, and rates of return; operating expenses; inflation; and sufficiency of repayment sources independent of the real estate including, in some instances, personal guarantees. In extending credit and commitments to borrowers, the Company generally requires collateral and/or guarantees as security. The repayment of such loans is expected to come from cash flow or from proceeds from the sale of selected assets of the borrowers. The Company's requirement for collateral and/or guarantees is determined on a case-by-case basis in connection with management's evaluation of the creditworthiness of the borrower. Collateral held varies but may include accounts receivable, inventory, property, plant and equipment, income-producing properties, residences and other real property. The Company secures its collateral by perfecting its security interest in business assets, obtaining deeds of trust, or outright possession among other means.

In management's judgment, a concentration exists in real estate loans which represented approximately 80.3% of the Company's loan and lease portfolio at December 31, 2011, up from 76.5% at December 31, 2010. Management believes that the residential land and residential construction portion of the Company's loan portfolio carries more than the normal credit risk that it has seen in the past several years due primarily to severely curtailed demand for new and resale residential property, a large supply of unsold residential land and new and resale homes, and observed reductions in values throughout the Company's market area. Management has responded by evaluating loans that it considers to carry any significant risk above the normal risk of collectability and taking actions where possible to reduce credit risk exposure by methods that include, but are not limited to, seeking liquidation of the loan by the borrower, seeking additional tangible collateral or other repayment support, converting the property through judicial or non-judicial foreclosure proceedings, and other collection techniques.

Management currently believes that it maintains its allowance for loan and lease losses at levels adequate to reflect the loss risk inherent in its total loan portfolio. A continued substantial further decline in the economy in general, or a continued additional decline in real estate values in the Company's primary market areas in particular, could have an adverse impact on the collectability of real estate loans and require an increase in the provision for loan and lease losses. This could adversely affect the Company's future prospects, results of operations, profitability and stock price. Management believes that its lending practices and underwriting standards may help to manage the risk of loss in an economic downturn; however, it is uncertain whether such lending practices and underwriting standards will result in a reduction of losses under such economic circumstances. The Company's lending practices and underwriting standards include, but are not limited to, the following: (1) maintaining a thorough understanding of the Company's service area and originating a significant majority of its loans within that area, (2) maintaining a thorough understanding of borrowers' knowledge, capacity, and market position in their field of expertise, (3) basing real estate loan approvals not only on market demand for the project, but also on the borrowers' capacity to support the project financially in the event it does not perform to expectations (whether sale or income performance), and (4) maintaining conforming and prudent loan-to-value and loan-to-cost ratios based on independent outside appraisals and ongoing inspection and analysis by the Company's lending officers or contracted third-party professionals.

#### **Nonaccrual, Past Due and Restructured Loans and Leases**

Management generally places loans and leases on nonaccrual status when they become 90 days past due or if a loss is expected, unless the loan or lease is well secured and in the process of collection. Loans and leases are partially or fully charged off when, in the opinion of management, collection of such amount appears unlikely.

The recorded investments in nonaccrual loans and leases and loans and leases that were 90 days or more past due and on accrual totaled \$13,423,000 and \$22,571,000 at December 31, 2011 and 2010, respectively. Of the \$13,423,000 in non-performing loans and leases at December 31, 2011, there were sixteen real estate loans totaling \$9,809,000; thirteen commercial loans totaling \$2,775,000; one agriculture loan totaling \$597,000; four consumer loans totaling \$225,000; and two leases totaling \$17,000. At December 31, 2010, the \$22,571,000 in non-performing loans consisted of twenty-nine real estate loans totaling \$18,735,000; fifteen commercial loans totaling \$3,491,000; seven consumer loans totaling \$317,000; and three leases totaling \$28,000.

The net interest due on nonaccrual loans and leases but excluded from interest income was approximately \$1,706,000 during 2011, \$1,736,000 during 2010, and \$1,281,000 during 2009. Interest income recognized from payments received on nonaccrual loans and leases was approximately \$440,000 in 2011, \$338,000 in 2010 and \$79,000 in 2009.

Table Eight below sets forth nonaccrual loans and leases and loans and leases past due 90 days or more and on accrual as of year-end for the past five years.

**Table Eight: Non-Performing Loans and Leases**

	December 31,				
(dollars in thousands)	2011	2010	2009	2008	2007
Past due 90 days or more and still accruing:					
Commercial	\$—	\$—	\$—	\$—	\$—
Real estate	—	—	—	444	455
Lease financing receivable	—	—	—	22	—
Consumer and other	—	—	—	8	—
Nonaccrual:					
Commercial	2,775	3,491	6,143	261	148
Real estate	9,809	18,735	14,048	5,487	6,787
Lease financing receivable	17	28	55	19	50
Consumer and other	822	317	718	—	—
Total non-performing loans and leases	\$13,423	\$22,571	\$20,964	\$6,241	\$7,440

Management monitors the Company's performance metrics including those ratios related to non-performing loans and leases. From 2008 to 2010, the Company had experienced an increase in non-performing loan and lease ratios. However, in 2011, the focused efforts of the previous three years resulted in a decrease in these ratios. Furthermore, the variations in the amount of non-performing loans and leases does not directly impact the level of the Company's allowance for loan and lease losses as management monitors each of the loans and leases for loss potential or probability of loss on an individual basis using accounting principles generally accepted in the United States of America.

There were no loan or lease concentrations in excess of 10% of total loans and leases not otherwise disclosed as a category of loans and leases as of December 31, 2011. Management is not aware of any potential problem loans, which were accruing and current at December 31, 2011, where serious doubt exists as to the ability of the borrower to comply with the present repayment terms and that would result in a significant loss to the Company.

### **Impaired Loans and Leases**

The Company considers a loan to be impaired when, based on current information and events, it is probable that it will be unable to collect all amounts due (principal and interest) according to the original contractual terms of the loan or lease agreement. The measurement of impairment may be based on (i) the present value of the expected cash flows of the impaired loan or lease discounted at the loan or lease's original effective interest rate, (ii) the observable market price of the impaired loan or lease, or (iii) the fair value of the collateral of a collateral-dependent loan or lease. The Company generally does not apply this definition to smaller-balance loans that are collectively evaluated for credit risk. In assessing whether a loan or lease is impaired, the Company reviews all loans or leases graded substandard or lower with outstanding principal balances in excess of \$100,000 as well as loans considered troubled debt restructures with outstanding principal balances in excess of \$25,000, except in the instance where management believes it is prudent to do otherwise. The recorded investment in loans and leases that were considered to be impaired totaled \$30,085,000 at December 31, 2011 and had a related valuation allowance of \$1,680,000. The average recorded investment in impaired loans and leases during 2011 was approximately \$31,956,000. As of December 31, 2010, the recorded investment in loans and leases that were considered to be impaired totaled \$40,237,000 and had a related valuation allowance of \$1,619,000. The average recorded investment in impaired loans and leases during 2010 was approximately \$44,594,000. As of December 31, 2009, the recorded investment in loans and leases that were considered to be impaired totaled \$41,937,000 and had a related valuation allowance of \$3,810,000. The average recorded investment in impaired loans and leases during 2009 was approximately \$29,947,000.

As of December 31, 2011, the Company had forty-nine TDRs, and of these there were twenty-seven extensions totaling \$6,076,000, seven conversions to amortizing loans totaling \$7,275,000, six conversion from revolving lines of credit to term loans totaling \$605,000, five rate reductions totaling \$3,493,000, two interest only structure changes totaling \$1,948,000, and two court ordered restructures totaling \$724,000. All were performing as agreed except for six extensions totaling \$1,040,000, four conversions to amortizing loans totaling \$1,482,000, two conversions to term loans totaling \$140,000, one interest only structure change totaling \$1,880,000 and one rate reduction totaling \$60,000. The Company will return TDRs to accrual status after the borrower makes six consecutive payments on the

restructured loan or lease and has demonstrated the capacity to continue to make these payments.

### **Allowance for Loan and Lease Losses Activity**

The Company maintains an allowance for loan and lease losses (“ALLL”) to cover probable losses inherent in the loan and lease portfolio, which is based upon management’s estimate of those losses. The ALLL is established through a provision for loan and lease losses and is increased by provisions charged against current earnings and recoveries and reduced by charge-offs. Actual losses for loans and leases can vary significantly from this estimate. The methodology and assumptions used to calculate the allowance are continually reviewed as to their appropriateness given the most recent losses realized and other factors that influence the estimation process. The model assumptions and resulting allowance level are adjusted accordingly as these factors change.

The adequacy of the ALLL and the level of the related provision for loan and lease losses is determined based on management’s judgment after consideration of numerous factors including, but not limited to the following: (i) history of actual charge-offs (ii) local and regional economic conditions, (iii) the financial condition of the borrowers, (iv) loan impairment and the related level of expected charge-offs, (v) evaluation of industry trends, (vi) industry and other concentrations, (vii) loans and leases which are contractually current as to payment terms but demonstrate a higher degree of risk as identified by management, (viii) continuing evaluations of the performing loan portfolio, (ix) ongoing review and evaluation of problem loans identified as having loss potential, (x) quarterly review by the Board of Directors, and (xi) assessments by banking regulators and other third parties. Management and the Board of Directors evaluate the ALLL and determine its appropriate level considering objective and subjective measures, such as knowledge of the borrowers’ business, valuation of collateral, the determination of impaired loans or leases and exposure to potential losses.

The allowance for loan and lease losses totaled \$7,041,000 or 2.34% of total loans and leases at December 31, 2011, \$7,585,000 or 2.19% of total loans and leases at December 31, 2010, and \$7,909,000 or 2.06% at December 31, 2009. The Company establishes general and specific reserves in accordance with accounting principles generally accepted in the United States of America. The ALLL is composed of categories of the loan and lease portfolio based on loan type and loan rating; however, the entire allowance is available to cover actual loan and lease losses. While management uses available information to recognize possible losses on loans and leases, future additions to the allowance may be necessary, based on changes in economic conditions and other matters. In addition, various regulatory agencies, as an integral part of their examination process, periodically review the Company's ALLL. Such agencies may require the Company to provide additions to the allowance based on their judgment of information available to them at the time of their examination.

The allowance for loans and leases as a percentage of non-performing loans and leases was 27.0% at December 31, 2011 and 33.6% at December 31, 2010. The allowance for loans and leases as a percentage of impaired loans and leases was 12.0% at December 31, 2011 and 18.9% at December 31, 2010. Of the total non-performing and impaired loans and leases outstanding as of December 31, 2011, there were \$5,878,000 in loans or leases that had been reduced by partial charge-offs of \$4,194,000. As these loan or lease balances are charged off the remaining balances, following analysis, normally do not require specific reserves and are not eligible for general reserves. The impact on credit ratios is such that the Company's allowance for loan and lease losses as a percentage may be lower, however, the partial charge-offs have reduced the potential future losses related to those credits.

At December 31, 2011, there were \$8,139,000 in impaired loans or leases that did not carry a specific reserve. Of this amount, \$1,572,000 were loans or leases that had previous partial charge-offs and \$6,567,000 in loans or leases that were analyzed and determined not to require a specific reserve or charge-off because the collateral value or discounted cash flow value exceeded the loan or lease balance. The Company has been operating in a market that has experienced significant decreases in real estate values of commercial, residential, land, and construction properties. As such, the Company is focused on monitoring collateral values for those loans considered collateral dependent. The collateral evaluations performed by the Company are updated as necessary, which is generally once every six months, and are reviewed by a qualified credit officer.

The Company's policy with regard to loan or lease charge-offs continues to be that a loan or lease is charged off against the allowance for loan and lease losses when management believes that the collectability of the principal is unlikely. Generally, a loan or lease is charged off when estimated losses related to impaired loans and leases are identified. If the loan is collateralized by real estate the impaired portion will be charged off to the allowance for loan and lease losses unless it is in the process of collection, in which case a specific reserve may be warranted. If the collateral is other than real estate the Company will typically charge off the impaired portion of a loan, unless it is in the process of collection, in which case a specific reserve may be warranted.

It is the policy of management to maintain the allowance for loan and lease losses at a level believed to be adequate for known and inherent risks in the portfolio. Our methodology incorporates a variety of risk considerations, both quantitative and qualitative, in establishing an allowance for loan and lease losses that management believes is

appropriate at each reporting date. Based on information currently available to analyze inherent credit risk, which includes but is not limited to economic factors, overall credit quality, historical delinquencies and a history of actual charge-offs, management believes that the provision for loan and lease losses and the allowance for loan and lease losses are prudent and adequate. Adjustments may be made based on differences from estimated loan and lease growth, the types of loans constituting this growth, changes in risk ratings within the portfolio, and general economic conditions. However, no prediction of the ultimate level of loans and leases charged off in future periods can be made with any certainty.

Table Nine below summarizes, for the periods indicated, the activity in the ALLL.

**Table Nine: Allowance for Loan and Lease Losses**

(dollars in thousands)

	Year Ended December 31,									
	2011		2010		2009		2008		2007	
Average loans and leases outstanding	\$323,310		\$362,445		\$404,539		\$410,293		\$390,488	
Allowance for loan & lease losses at beginning of period	\$7,585		\$7,909		\$5,918		\$5,883		\$5,874	
Loans and leases charged off:										
Commercial	713		2,570		2,944		422		301	
Real estate	3,765		5,048		3,257		1,114		72	
Consumer	—		173		216		139		105	
Lease financing receivable	220		30		171		59		70	
Total	4,698		7,821		6,588		1,734		548	
Recoveries of loans and leases previously charged off:										
Commercial	163		63		33		12		41	
Real estate	346		68		1		—		—	
Consumer	—		1		8		—		—	
Lease financing receivable	20		—		7		14		66	
Total	529		132		49		26		107	
Net loans and leases charged off	4,169		7,689		6,539		1,708		441	
Additions to allowance charged to operating expenses	3,625		7,365		8,530		1,743		450	
Allowance for loan and lease losses at end of period	\$7,041		\$7,585		\$7,909		\$5,918		\$5,883	
Ratio of net charge-offs to average loans and leases outstanding	1.29	%	2.12	%	1.62	%	.42	%	.11	%
Provision for loan and lease losses to average loans and leases outstanding	1.12	%	2.03	%	2.11	%	.42	%	.12	%
Allowance for loan and lease losses to loans to nonperforming loans and leases, at end of period	2.34	%	2.19	%	2.06	%	1.41	%	1.47	%
Allowance for loan and lease losses to loans to nonperforming loans and leases, at end of period	52.45	%	33.60	%	37.73	%	94.83	%	79.07	%

As part of its loan review process, management has allocated the overall allowance based on specific identified problem loans and leases, qualitative factors, uncertainty inherent in the estimation process and historical loss data. A risk exists that future losses cannot be precisely quantified or attributed to particular loans or leases or classes of loans and leases. Management continues to evaluate the loan and lease portfolio and assesses current economic conditions that will affect management's conclusion as to future allowance levels. Table Ten below summarizes the allocation of the allowance for loan and lease losses for the five years ended December 31, 2011.

**Table Ten: Allowance for Loan and Lease Losses by Loan Category**

(dollars in thousands)

	December 31, 2011			December 31, 2010			December 31, 2009		
	Amount	Percent of loans in each category to total loans		Amount	Percent of loans in each category to total loans		Amount	Percent of loans in each category to total loans	
Commercial	\$1,620	14.0	%	\$2,556	16.8	%	\$2,178	18.9	%
Real estate	4,794	80.3	%	4,574	76.5	%	5,009	74.5	%
Agriculture	176	1.5	%	228	2.1	%	203	1.9	%
Consumer	367	3.6	%	220	3.8	%	426	3.7	%
Lease financing receivable	84	0.6	%	7	0.8	%	93	1.0	%
Total allocated	\$7,041	100.0	%	\$7,585	100.0	%	\$7,909	100.0	%

	December 31, 2008			December 31, 2007		
	Amount	Percent of loans in each category to total loans		Amount	Percent of loans in each category to total loans	
Commercial	\$1,644	21.6	%	\$1,369	23.6	%
Real estate	4,030	71.8	%	4,314	70.7	%
Agriculture	8	1.9	%	8	2.0	%
Consumer	170	3.5	%	108	2.7	%
Lease financing receivable	66	1.2	%	84	1.0	%
Total allocated	\$5,918	100.0	%	\$5,883	100.0	%

The allocation presented should not be interpreted as an indication that charges to the allowance for loan and lease losses will be incurred in these amounts or proportions, or that the portion of the allowance allocated to each loan and lease category represents the total amounts available for charge-offs that may occur within these categories.

**Other Real Estate Owned**

The balance in OREO at December 31, 2011 consisted of 21 properties acquired through foreclosure. The balance in OREO at December 31, 2010 consisted of fourteen properties. During 2011, the Company received \$1,705,000 from the net proceeds of the sale of thirteen OREO properties with net losses of \$24,000 recognized on these sales and acquired 20 properties through foreclosure totaling \$9,489,000 and subsequently reduced these balances by \$1,288,000 after receiving updated property appraisals. There was \$8,246,000 in other real estate owned at December 31, 2011 with a valuation allowance of \$56,000 and \$2,796,000 in other real estate owned at December 31, 2010 with a valuation allowance of \$100,000.

The Company periodically obtains property valuations to determine whether the recorded book value is considered fair value. During 2011, this valuation process resulted in the Company reducing the book value of the properties by \$1,022,000. During 2010, the valuation process resulted in \$705,000 in book value reductions.

## **Deposits**

At December 31, 2011, total deposits were \$462,285,000 representing a decrease of \$2,837,000 (0.6%) from the December 31, 2010 balance of \$465,122,000. The Company's deposit growth plan for 2011 was to concentrate its efforts on increasing noninterest-bearing demand, interest-bearing money market and NOW accounts, and savings accounts. Due to these efforts, the Company experienced increases during 2011 in noninterest-bearing (\$6,804,000 or 5.4%), money market (\$1,608,000 or 1.2%) and savings (\$2,382,000 or 5.2%) and decreases in time deposits (\$12,515,000 or 11.4%) and interest-bearing checking (\$1,116,000 or 2.5%).

**Other Borrowed Funds**

Other borrowings outstanding as of December 31, 2011 consist of advances from the Federal Home Loan Bank (the “FHLB”). The following table summarizes these borrowings (dollars in thousands):

	2011		2010		2009	
	Amount	Rate	Amount	Rate	Amount	Rate
Short-term borrowings:						
FHLB advances	\$5,000	2.08 %	\$7,000	2.40 %	\$14,500	2.84 %
Long-term borrowings:						
FHLB advances	\$14,000	1.80 %	\$10,000	2.41 %	\$17,000	2.41 %

The maximum amount of short-term borrowings at any month-end during 2011, 2010 and 2009, was \$12,000,000, \$9,500,000, and \$69,448,000, respectively. The FHLB advances are collateralized by loans and securities pledged to the FHLB. The following is a breakdown of rates and maturities on FHLB advances (dollars in thousands):

	Short-term	Long-term
Amount	\$5,000	\$14,000
Maturity	2012	2013 to 2016
Average rates	2.08%	1.80%

The Company has also been issued a total of \$10,000,000 as of December 31, 2011 and \$9,000,000 as of December 31, 2010 in letters of credit by the FHLB which have been pledged to secure Local Agency Deposits. The letters of credit act as a guarantee of payment to certain third parties in accordance with specified terms and conditions. The letters of credit were not drawn upon in 2011 or 2010 and management does not expect to draw upon these lines in the foreseeable future.

**Capital Resources**

The current and projected capital position of the Company and the impact of capital plans and long-term strategies are reviewed regularly by management. The Company’s capital position represents the level of capital available to support continuing operations and expansion.

On January 16, 2008, the Board of Directors of the Company authorized a stock repurchase program which allowed the repurchase of up to 6.5% annually of the Company's outstanding common stock. Effective July 27, 2009, the Company temporarily suspended the stock repurchases. On January 26, 2012, the Company terminated the existing stock repurchase program and approved and authorized a new stock repurchase program for 2012 (the "2012 Program"). The 2012 Program authorizes the repurchase during 2012 of up to 5% of the outstanding shares of the Company's common stock, or approximately 494,500 shares based on the 9,890,909 shares outstanding as of January 26, 2012. Any repurchases under the 2012 Program will be made from time to time by the Company in the open market as conditions allow. All such transactions will be structured to comply with Commission Rule 10b-18 and all shares repurchased under the 2012 Program will be retired. The number, price and timing of the repurchases will be at the Company's sole discretion and the 2012 Program may be re-evaluated depending on market conditions, capital and liquidity needs or other factors. Based on such re-evaluation, the Board of Directors may suspend, terminate, modify or cancel the 2012 Program at any time without notice. The Company did not repurchase any shares in 2011, 2010 or 2009 and repurchased 115,815 shares in 2008. Under stock repurchase programs in effect prior to 2008, the Company repurchased 426,668 shares in 2007, 299,410 shares in 2006, 92,986 shares in 2005, 11,869 shares in 2004, 1,915 shares in 2003 and 83,747 shares in 2002. Share amounts have been adjusted for stock dividends and/or splits. See Part II, Item 5, "Stock Repurchases" for more information regarding stock repurchases.

The Company and American River Bank are subject to certain regulatory capital requirements administered by the Board of Governors of the Federal Reserve System and the Federal Deposit Insurance Corporation. Failure to meet these minimum capital requirements can initiate certain mandatory, and possibly additional discretionary, actions by regulators that, if undertaken, could have a direct material effect on the Company's consolidated financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, banks must meet specific capital guidelines that involve quantitative measures of their assets, liabilities and certain off-balance-sheet items as calculated under regulatory accounting practices. The Company's and American River Bank's capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings and other factors.

At December 31, 2011, shareholders' equity was \$94,099,000, representing an increase of \$4,555,000 (5.1%) from \$89,544,000 at December 31, 2010. The increase resulted from the addition of the net income for the period, the increase due to stock based compensation expense, and the increase in other comprehensive income. In 2010, shareholders' equity increased \$2,199,000 (2.5%) from \$87,345,000 at December 31, 2009. The increase resulted from the addition of the net income for the period, the increase due to stock based compensation expense, and the increase in other comprehensive income. The ratio of total risk-based capital to risk adjusted assets was 22.8% at December 31, 2011 compared to 20.3% at December 31, 2010. Tier 1 risk-based capital to risk-adjusted assets was 21.5% at December 31, 2011 and 19.1% at December 31, 2010.

Table Eleven below lists the Company's actual capital ratios at December 31, 2011 and 2010, as well as the minimum capital ratios for capital adequacy.

**Table Eleven: Capital Ratios**

	At December 31,		Minimum Regulatory Capital Requirements	
Capital to Risk-Adjusted Assets	2011	2010		
Leverage ratio	13.1 %	12.6 %	4.00	%
Tier 1 Risk-Based Capital	21.5 %	19.1 %	4.00	%
Total Risk-Based Capital	22.8 %	20.3 %	8.00	%

Capital ratios are reviewed on a regular basis to ensure that capital exceeds the prescribed regulatory minimums and is adequate to meet future needs. American River Bank's ratios are in excess of the regulatory definition of "well capitalized." Management believes that the Company's capital is adequate to support current operations and anticipated growth and currently foreseeable future capital requirements of the Company and its subsidiaries.

**Market Risk Management**

*Overview.* Market risk is the risk of loss from adverse changes in market prices and rates. The Company's market risk arises primarily from interest rate risk inherent in its loan and deposit functions. The goal for managing the assets and liabilities of the Company is to maximize shareholder value and earnings while maintaining a high quality balance sheet without exposing the Company to undue interest rate risk. The Board of Directors has overall responsibility for the interest rate risk management policies. The Company has a Risk Management Committee that establishes and monitors guidelines to control the sensitivity of earnings to changes in interest rates.

*Asset/Liability Management.* Activities involved in asset/liability management include, but are not limited to, lending, accepting and placing deposits and investing in securities. Interest rate risk is the primary market risk associated with asset/liability management. Sensitivity of earnings to interest rate changes arises when yields on assets change in a different time period or in a different amount from that of interest costs on liabilities. To mitigate interest rate risk, the structure of the consolidated balance sheet is managed with the goal that movements of interest rates on assets and liabilities are correlated and contribute to earnings even in periods of volatile interest rates. The asset/liability management policy sets limits on the acceptable amount of variance in net interest margin and market value of equity under changing interest environments. The Company uses simulation models to forecast earnings, net interest margin and market value of equity.

Simulation of earnings is the primary tool used to measure the sensitivity of earnings to interest rate changes. Using computer-modeling techniques, the Company is able to estimate the potential impact of changing interest rates on earnings. A balance sheet forecast is prepared quarterly using inputs of actual loans and leases, securities and interest bearing liabilities (i.e. deposits/borrowings) positions as the beginning base. The forecast balance sheet is processed against three interest rate scenarios. The scenarios include a 200 basis point rising rate forecast, a flat rate forecast and a 200 basis point falling rate forecast which take place within a one year time frame. The net interest income is measured during the year assuming a gradual change in rates over the twelve-month horizon. The simulation modeling indicated below attempts to estimate changes in the Company's net interest income utilizing a forecast balance sheet projected from year-end balances. Table Twelve below summarizes the effect on net interest income (NII) of a  $\pm 200$  basis point change in interest rates as measured against a constant rate (no change) scenario.

**Table Twelve: Interest Rate Risk Simulation of Net Interest as of December 31, 2011**

(dollars in thousands)

	\$ Change in NII from Current 12 Month Horizon
Variation from a constant rate scenario	
+200bp	\$ 773
-200bp	\$(1,192 )

The simulations of earnings do not incorporate any management actions, which might moderate the negative consequences of interest rate deviations. Therefore, they do not reflect likely actual results, but serve as reasonable estimates of interest rate risk.

*Interest Rate Sensitivity Analysis*

Interest rate sensitivity is a function of the repricing characteristics of the portfolio of assets and liabilities. These repricing characteristics are the time frames within which the interest-bearing assets and liabilities are subject to change in interest rates either at replacement, repricing or maturity. Interest rate sensitivity management focuses on the maturity of assets and liabilities and their repricing during periods of changes in market interest rates. Interest rate sensitivity is measured as the difference between the volumes of assets and liabilities in the current portfolio that are subject to repricing at various time horizons. The differences are known as interest sensitivity gaps. A positive cumulative gap may be equated to an asset sensitive position. An asset sensitive position in a rising interest rate environment will cause a bank's interest rate margin to expand. This results as floating or variable rate loans reprice more rapidly than fixed rate certificates of deposit that reprice as they mature over time. Conversely, a declining interest rate environment will cause the opposite effect. A negative cumulative gap may be equated to a liability sensitive position. A liability sensitive position in a rising interest rate environment will cause a bank's interest rate margin to contract, while a declining interest rate environment will have the opposite effect.

**Inflation**

The impact of inflation on a financial institution differs significantly from that exerted on manufacturing, or other commercial concerns, primarily because its assets and liabilities are largely monetary. In general, inflation primarily affects the Company through its effect on market rates of interest, which affects the Company's ability to attract loan customers. Inflation affects the growth of total assets by increasing the level of loan demand, and potentially adversely affects capital adequacy because loan growth in inflationary periods can increase at rates higher than the rate that capital grows through retention of earnings which may be generated in the future. In addition to its effects on interest rates, inflation increases overall operating expenses. Inflation has not had a material effect upon the results of operations of the Company during the years ended December 31, 2011, 2010 and 2009.

## **Liquidity**

Liquidity management refers to the Company's ability to provide funds on an ongoing basis to meet fluctuations in deposit levels as well as the credit needs and requirements of its clients. Both assets and liabilities contribute to the Company's liquidity position. Federal funds lines, short-term investments and securities, and loan and lease repayments contribute to liquidity, along with deposit increases, while loan and lease funding and deposit withdrawals decrease liquidity. The Company assesses the likelihood of projected funding requirements by reviewing historical funding patterns, current and forecasted economic conditions and individual client funding needs. Commitments to fund loans and outstanding standby letters of credit at December 31, 2011 were approximately \$36,479,000 and \$10,086,000, respectively. Such loan commitments relate primarily to revolving lines of credit and other commercial loans and to real estate construction loans. Since some of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements.

The Company's sources of liquidity consist of cash and due from correspondent banks, overnight funds sold to correspondent banks, unpledged marketable investments and loans held for sale. On December 31, 2011, consolidated liquid assets totaled \$177.3 million or 30.5% of total assets compared to \$128.1 million or 22.1% of total assets on December 31, 2010. In addition to liquid assets, the Company maintains short-term lines of credit in the amount of \$17,000,000 with two of its correspondent banks. At December 31, 2011, the Company had \$17,000,000 available under this credit line. Additionally, American River Bank is a member of the FHLB. At December 31, 2011, American River Bank could have arranged for up to \$91,242,000 in secured borrowings from the FHLB. These borrowings are secured by pledged mortgage loans and investment securities. At December 31, 2011, the Company had \$62,242,000 available under these secured borrowing arrangements. American River Bank also has a secured borrowing arrangement with the Federal Reserve Bank. The borrowing can be secured by pledging selected loans and investment securities. Based on the amount of assets pledged at the Federal Reserve Bank at December 31, 2011, the Company's borrowing capacity was \$30,396,000.

The Company serves primarily a business and professional customer base and, as such, its deposit base is susceptible to economic fluctuations. Accordingly, management strives to maintain a balanced position of liquid assets to volatile and cyclical deposits.

Liquidity is also affected by portfolio maturities and the effect of interest rate fluctuations on the marketability of both assets and liabilities. The Company can sell any of its unpledged securities held in the available-for-sale category to meet liquidity needs. These securities are also available to pledge as collateral for borrowings if the need should arise. American River Bank can also pledge additional securities to borrow from the Federal Reserve Bank and the FHLB.

The maturity distribution of certificates of deposit is set forth in Table Thirteen below for the period presented. These deposits are generally more rate sensitive than other deposits and, therefore, are more likely to be withdrawn to obtain higher yields elsewhere if available.

**Table Thirteen: Certificates of Deposit Maturities**

December 31, 2011

(dollars in thousands)	Less than \$100,000	Over \$100,000
Three months or less	\$ 8,060	\$ 39,323
Over three months through six months	5,755	6,626
Over six months through twelve months	7,479	7,680
Over twelve months	6,965	15,835
Total	\$ 28,259	\$ 69,464

Loan and lease demand also affects the Company's liquidity position. Table Fourteen below presents the maturities of loans and leases for the period indicated.

**Table Fourteen: Loan and Lease Maturities (Gross Loans and Leases)**

December 31, 2011

(dollars in thousands)	One year or less	One year through five years	Over five years	Total
Commercial	\$20,116	\$20,981	\$1,011	\$42,108
Real estate	26,468	102,362	112,844	241,674
Agriculture	411	1,442	2,730	4,583
Consumer	935	7,060	2,989	10,984
Leases	207	1,518	—	1,725
Total	\$48,137	\$133,363	\$119,574	\$301,074

Loans and leases shown above with maturities greater than one year include \$188,120,000 of floating interest rate loans and \$64,817,000 of fixed rate loans and leases.

The carrying amount, maturity distribution and weighted average yield of the Company's investment securities available-for-sale and held-to-maturity portfolios are presented in Table Fifteen below. The yields on tax-exempt obligations have been computed on a tax equivalent basis. Yields may not represent actual future income to be recorded. Timing of principal prepayments on mortgage-backed securities may increase or decrease depending on market factors and the homeowners' ability to make unscheduled principal payments. Fast prepayments on bonds that were purchased with a premium will result in a lower yield and slower prepayments on premium bonds will result in a higher yield, the opposite would be true for bonds purchased at a discount. Table Fifteen does not include FHLB Stock, which does not have stated maturity dates or readily available market values. The balance in FHLB Stock at December 31, 2011, 2010 and 2009 was \$3,093,000, \$3,486,000 and \$3,922,000, respectively.

**Table Fifteen: Securities Maturities and Weighted Average Yields**

**December 31,**

(Taxable Equivalent Basis)

(dollars in thousands)	2011 Carrying Amount	Weighted Average Yield	2010 Carrying Amount	Weighted Average Yield	2009 Carrying Amount	Weighted Average Yield	
<b>Available-for-sale securities:</b>							
State and political subdivisions							
Maturing within 1 year	\$833	5.69	% \$499	5.24	% \$3,749	4.40	%
Maturing after 1 year but within 5 years	2,675	6.08	% 5,782	6.07	% 7,397	6.10	%
Maturing after 5 years but within 10 years	10,139	5.93	% 5,511	5.78	% 4,473	6.21	%
Maturing after 10 years	15,541	5.26	% 4,000	5.47	% 4,968	5.77	%
Mortgage-backed securities	179,454	2.54	% 138,644	2.84	% 76,009	3.50	%
Other							
Non-maturing	69	0.00	% 79	0.00	% 86	0.00	%
Total investment securities	\$208,711	2.45	% \$154,515	3.14	% \$96,682	3.97	%
<b>Held-to-maturity securities:</b>							
Mortgage-backed securities	\$4,010	4.50	% \$6,149	4.49	% \$12,331	4.48	%
Total investment securities	\$4,010	4.50	% \$6,149	4.49	% \$12,331	4.48	%

The carrying values of available-for-sale securities include net unrealized gains of \$5,930,000, \$2,848,000 and \$377,000 at December 31, 2011, 2010 and 2009, respectively. The carrying values of held-to-maturity securities do not include unrealized gains or losses; however, the net unrecognized gains at December 31, 2011, 2010 and 2009 were \$221,000, \$323,000 and \$558,000, respectively.

**Off-Balance Sheet Arrangements**

The Company is a party to financial instruments with off-balance-sheet risk in the normal course of business in order to meet the financing needs of its customers and to reduce its exposure to fluctuations in interest rates. These financial instruments consist of commitments to extend credit and letters of credit. These instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized on the balance sheet.

As of December 31, 2011, commitments to extend credit and letters of credit were the only financial instruments with off-balance sheet risk. The Company has not entered into any contracts for financial derivative instruments such as futures, swaps, options or similar instruments. At origination, real estate commitments are generally secured by property with a loan-to-value ratio of 55% to 75%. In addition, the majority of the Company's commitments have variable interest rates.

The Company's exposure to credit loss in the event of nonperformance by the other party for commitments to extend credit and letters of credit is represented by the contractual amount of those instruments. The Company uses the same credit policies in making commitments and letters of credit as it does for loans included on the consolidated balance sheets. The following financial instruments represent off-balance-sheet credit:

	December 31,	
	2011	2010
Commitments to extend credit (dollars in thousands):		
Revolving lines of credit secured by		
1-4 family residences	\$4,642	\$5,964
Commercial real estate, construction and		
land development commitments secured by real estate	10,129	12,746
Other unused commitments, principally commercial loans	21,708	23,738
	\$36,479	\$42,448
Letters of credit	\$10,086	\$10,033

Certain financial institutions have elected to use special purpose vehicles ("SPV") to dispose of problem assets. The SPV is typically a subsidiary company with an asset and liability structure and legal status that makes its obligations secure even if the parent corporation goes bankrupt. Under certain circumstances, these financial institutions may exclude the problem assets from their reported impaired and non-performing assets. The Company does not use those vehicles or any other structures to dispose of problem assets.

### Contractual Obligations

The Company leases certain facilities at which it conducts its operations. Future minimum lease commitments under non-cancelable operating leases are noted in Table Sixteen below. Table Sixteen below presents certain of the Company's contractual obligations as of December 31, 2011. Included in the table are amounts payable under the Company's Deferred Compensation Plan, Deferred Fees Plan and salary continuation agreements listed in the "Other Long-Term Liabilities..." category. At December 31, 2011, these amounts represented \$3,310,000 most of which is anticipated to be primarily payable at least five years in the future.

### Table Sixteen: Contractual Obligations

(dollars in thousands)

Payments due by period				
Total	Less	1-3	3-5	More
	than	years	years	than

		1 year			5 years
Long-Term Debt	\$ 14,000	\$—	\$ 10,000	\$4,000	\$—

Operating Leases	4,483	850	1,630	1,378	625
Purchase Obligations	—	—	—	—	—
Other Long-Term Liabilities Reflected on the Company's Balance Sheet under GAAP	3,310	95	129	125	2,961
Total	\$21,793	\$945	\$11,759	\$5,503	\$3,586

### Accounting Pronouncements

In December 2010, the Financial Accounting Standards Board ("FASB") amended existing guidance relating to goodwill impairment testing. This guidance requires that if the carrying amount of a reporting unit is zero or negative, a qualitative assessment be performed to determine if it is more likely than not that goodwill is impaired. Step 2 of the impairment test shall be performed if it is determined that it is more likely than not that goodwill is impaired. The amendments in this guidance were effective for fiscal years, and interim periods within those years, beginning after December 15, 2010. The effect of adopting this standard did not have a material effect on the Company's consolidated financial position, results of operations or cash flows.

In April 2011, the FASB amended existing guidance for assisting a creditor in determining whether a restructuring is a troubled debt restructuring. The amendments clarify the guidance for a creditor's evaluation of whether it has granted a concession and whether a debtor is experiencing financial difficulties. With regard to determining whether a concession has been granted, the ASU clarifies that creditors are precluded from using the effective interest method to determine whether a concession has been granted. In the absence of using the effective interest method, a creditor must now focus on other considerations such as the value of the underlying collateral, evaluation of other collateral or guarantees, the debtor's ability to access other funds at market rates, interest rate increases and whether the restructuring results in a delay in payment that is insignificant. This guidance is effective for interim and annual reporting periods beginning after June 15, 2011, and should be applied retrospectively to the beginning of the annual period of adoption. For purposes of measuring impairment on newly identified troubled debt restructurings, the amendments should be applied prospectively for the first interim or annual period beginning on or after June 15, 2011. The effect of adopting this standard did not have a material effect on the Company's consolidated financial position, results of operations or cash flows.

In May, 2011, the FASB issued an amendment to achieve common fair value measurement and disclosure requirements between U.S. and International accounting principles. Overall, the guidance is consistent with existing U.S. accounting principles; however, there are some amendments that change a particular principle or requirement for measuring fair value or for disclosing information about fair value measurements. The amendments in this guidance are effective for interim and annual reporting periods beginning after December 15, 2011. The Company is currently evaluating the impact of this amendment on the consolidated financial statements.

In June 2011, the FASB amended existing guidance and eliminated the option to present the components of other comprehensive income as part of the statement of changes in shareholder's equity. The amendment requires that comprehensive income be presented in either a single continuous statement or in two separate consecutive statements. The amendments in this guidance are effective as of the beginning of a fiscal reporting year, and interim periods within that year, that begins after December 15, 2011. Early adoption is permitted. The adoption of this amendment will change the presentation of the components of comprehensive income for the Company as this presentation will no longer be included as part of the consolidated statement of shareholders' equity.

In September 2011, the FASB amended existing guidance relating to goodwill impairment testing. The amendment permits an assessment of qualitative factors to determine whether the existence of events or circumstances leads to a determination that it is more likely than not that the fair value of a reporting unit is less than its carrying amount. If, after assessing these events or circumstances, it is concluded that it is not more likely than not that the fair value of a reporting unit is less than its carrying amount, then performing the two-step impairment test is unnecessary. The amendments in this guidance are effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011. Early adoption is permitted, including for annual and interim goodwill impairment tests performed as of a date before September 15, 2011, if financial statements for the most recent annual or interim period have not yet been issued. The Company is currently evaluating the impact of this amendment on the consolidated financial statements.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Shareholders and Board of Directors

American River Bankshares

Rancho Cordova, California

We have audited the accompanying consolidated balance sheet of American River Bankshares and subsidiaries (the “Company”) as of December 31, 2011, and the related consolidated statements of income, changes in shareholders’ equity and cash flows for the year then ended. These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company’s internal control over financial reporting. Accordingly, we express no such opinion. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of American River Bankshares and subsidiaries as of December 31, 2011, and the results of their operations and their cash flows for the year then ended in conformity with U.S. generally accepted accounting principles.

**REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM**

The Shareholders and Board of Directors

American River Bankshares

Rancho Cordova, California

We have audited the accompanying consolidated balance sheet of American River Bankshares and subsidiaries (the “Company”) as of December 31, 2010 and the related consolidated statements of income, changes in shareholders’ equity and cash flows for each of the two years in the period ended December 31, 2010. These consolidated financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of American River Bankshares and subsidiaries as of December 31, 2010, and the consolidated results of their operations and their consolidated cash flows for each of the two years in the period ended December 31, 2010, in conformity with accounting principles generally accepted in the United States of America.

## AMERICAN RIVER BANKSHARES AND SUBSIDIARIES

### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

#### 1. THE BUSINESS OF THE COMPANY

American River Bankshares (the “Company”) was incorporated under the laws of the State of California in 1995 under the name of American River Holdings and changed its name in 2004 to American River Bankshares. As a bank holding company, the Company is authorized to engage in the activities permitted under the Bank Holding Company Act of 1956, as amended, and regulations thereunder. As a community oriented bank holding company, the principal communities served are located in Sacramento, Placer, Yolo, El Dorado, Amador, and Sonoma counties.

The Company owns 100% of the issued and outstanding common shares of its banking subsidiary, American River Bank (“ARB” or the “Bank”). ARB was incorporated in 1983. ARB accepts checking and savings deposits, offers money market deposit accounts and certificates of deposit, makes secured and unsecured commercial, secured real estate, and other installment and term loans and offers other customary banking services. ARB operates five banking offices in Sacramento and Placer counties, two banking offices in Sonoma County under the name North Coast Bank, a division of ARB, and three banking offices in Amador County under the name Bank of Amador, a division of ARB. The Company also owns one inactive subsidiary, American River Financial.

ARB does not offer trust services or international banking services and does not plan to do so in the near future. The deposits of ARB are insured by the Federal Deposit Insurance Corporation (the “FDIC”) up to applicable legal limits.

The Bank was participating in the FDIC’s Transaction Account Guarantee Program. Under that program, through December 31, 2010, all noninterest-bearing transaction accounts were fully guaranteed by the FDIC for the entire amount in the account. Coverage under the Transaction Account Guarantee Program was in addition to and separate from the coverage available under the FDIC’s general deposit insurance rules. Although coverage under the Transaction Account Guarantee Program expired December 31, 2010, the FDIC adopted a final rule amending its deposit insurance regulations on November 15, 2010 to implement Section 343 of the Dodd-Frank Wall Street Reform and Consumer Protection Act providing for unlimited deposit insurance for noninterest-bearing transaction accounts for two years starting December 31, 2010.

#### 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

##### General

The accounting and reporting policies of the Company and its subsidiaries conform with accounting principles generally accepted in the United States of America and prevailing practices within the financial services industry.

##### Reclassifications

Certain reclassifications have been made to prior years' balances to conform to classifications used in 2011. Reclassifications had no affect on prior year net income or shareholders' equity.

Principles of Consolidation

The consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries. All material intercompany transactions and accounts have been eliminated in consolidation.

AMERICAN RIVER BANKSHARES AND SUBSIDIARIES

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

(Continued)

**2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)**

Use of Estimates

The preparation of consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions. These estimates and assumptions affect the reported amounts of assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates. The allowance for loan and lease losses, deferred tax assets and fair values of financial instruments are particularly subject to change.

Cash and Cash Equivalents

For the purpose of the statement of cash flows, cash and due from banks and Federal funds sold are considered to be cash equivalents. Generally, Federal funds are sold for one-day periods.

Investment Securities

Investments are classified into the following categories:

Available-for-sale securities, reported at fair value, with unrealized gains and losses excluded from earnings and reported, net of taxes, as accumulated other comprehensive income (loss) within shareholders' equity.

Held-to-maturity securities, which management has the positive intent and ability to hold to maturity, reported at amortized cost, adjusted for the accretion of discounts and amortization of premiums.

Management determines the appropriate classification of its investments at the time of purchase and may only change the classification in certain limited circumstances. All transfers between categories are accounted for at fair value. There were no transfers during the years ended December 31, 2011 and 2010. As of December 31, 2011 and 2010, the Company did not have any trading securities.

Gains or losses on the sale of investment securities are computed on the specific identification method. Interest earned on investment securities is reported in interest income, net of applicable adjustments for accretion of discounts and amortization of premiums.

An investment security is impaired when its carrying value is greater than its fair value. Investment securities that are impaired are evaluated on at least a quarterly basis and more frequently when economic or market conditions warrant such an evaluation to determine whether a decline in their value is other than temporary. Management utilizes criteria such as the magnitude and duration of the decline and the intent and ability of the Company to retain its investment in the securities for a period of time sufficient to allow for an anticipated recovery in fair value, in addition to the reasons underlying the decline, to determine whether the loss in value is other than temporary. The term “other than temporary” is not intended to indicate that the decline is permanent, but indicates that the prospects for a near-term recovery of value is not necessarily favorable, or that there is a lack of evidence to support a realizable value equal to or greater than the carrying value of the investment. Once a decline in value is determined to be other than temporary and management does not intend to sell the security or it is more likely than not that management will not be required to sell the security before recovery, only the portion of the impairment loss representing credit exposure is recognized as a charge to earnings, with the balance recognized as a charge to other comprehensive income. If management intends to sell the security or it is more likely than not that management will be required to sell the security before recovering its forecasted cost, the entire impairment loss is recognized as a charge to earnings.

AMERICAN RIVER BANKSHARES AND SUBSIDIARIES

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

(Continued)

**2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)**

Federal Home Loan Bank Stock

Investments in Federal Home Loan Bank of San Francisco (the “FHLB”) stock are carried at cost and are redeemable at par with certain restrictions. Investments in FHLB stock are necessary to participate in FHLB programs.

Loans and Leases

Loans and leases are reported at the principal amounts outstanding, adjusted for unearned income, deferred loan origination fees and costs, purchase premiums and discounts, write-downs and the allowance for loan and lease losses. Loan and lease origination fees, net of certain deferred origination costs, and purchase premiums and discounts are recognized as an adjustment to the yield of the related loans and leases.

The accrual of interest on loans and leases is discontinued when, in the opinion of management, there is an indication that the borrower may be unable to meet payment requirements within an acceptable time frame relative to the terms stated in the loan agreement. Upon such discontinuance, all unpaid accrued interest is reversed against current income unless the loan or lease is well secured and in the process of collection. Interest received on nonaccrual loans and leases is either applied against principal or reported as interest income, according to management’s judgment as to the collectibility of principal. Generally, loans and leases are restored to accrual status when the obligation is brought current and has performed in accordance with the contractual terms for a reasonable period of time and the ultimate collectibility of the total contractual principal and interest is no longer in doubt.

Direct financing leases are carried net of unearned income. Income from leases is recognized by a method that approximates a level yield on the outstanding net investment in the lease.

Loan Sales and Servicing

Included in the loan and lease portfolio are Small Business Administration (SBA) loans and Farm Service Agency guaranteed loans that may be sold in the secondary market. At the time the loan is sold, the related right to service the loan is either retained, with the Company earning future servicing income, or released in exchange for a one-time servicing-released premium. A portion of this premium may be required to be refunded if the borrower defaults or the loan prepays within ninety days of the settlement date. There were no sales of loans subject to these recourse provisions at December 31, 2011, 2010 and 2009. Loans subsequently transferred to the loan portfolio are transferred at the lower of cost or fair value at the date of transfer. Any difference between the carrying amount of the loan and its outstanding principal balance is recognized as an adjustment to yield by the interest method. There were no loans held for sale at December 31, 2011 and 2010.

SBA and Farm Service Agency loans with unpaid balances of \$390,000 and \$449,000 were being serviced for others as of December 31, 2011 and 2010, respectively. The Company also serviced loans that are participated with other financial institutions totaling \$5,873,000 and \$6,673,000 as of December 31, 2011 and 2010, respectively.

Servicing rights acquired through 1) a purchase or 2) the origination of loans which are sold or securitized with servicing rights retained are recognized as separate assets or liabilities. Servicing assets or liabilities are initially recorded at fair value and are subsequently amortized in proportion to and over the period of the related net servicing income or expense. Servicing assets are periodically evaluated for impairment. Servicing assets were not considered material for disclosure purposes at December 31, 2011 and 2010.

AMERICAN RIVER BANKSHARES AND SUBSIDIARIES

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

(Continued)

**2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)**

Allowance for Loan and Lease Losses

The allowance for loan and lease losses is an estimate of probable credit losses inherent in the Company's credit portfolio that have been incurred as of the balance-sheet date. The allowance is established through a provision for loan and lease losses which is charged to expense. Additions to the allowance are expected to maintain the adequacy of the total allowance after credit losses and loan growth. Credit exposures determined to be uncollectible are charged against the allowance. Cash received on previously charged off amounts is typically recorded as a recovery to the allowance. The overall allowance consists of two primary components, specific reserves related to impaired credits and general reserves for inherent losses related to credits that are not impaired.

For all segments of the portfolio, a loan or lease is considered impaired when, based on current information and events, it is probable that the Company will be unable to collect all amounts due, including principal and interest, according to the contractual terms of the original agreement. Impaired loans are individually evaluated to determine the extent of impairment, if any, except for smaller-balance loans that are collectively evaluated for credit risk. When a loan or lease is impaired, the Company measures impairment based on the present value of expected future cash flows discounted at the credit's original interest rate, except that as a practical expedient, it may measure impairment based on a credit's observable market price, or the fair value of the collateral if the credit is collateral dependent. A loan or lease is collateral dependent if the repayment of the credit is expected to be provided by the sale or operation of the underlying collateral.

A restructuring of a debt constitutes a troubled debt restructuring ("TDR") if the Company grants a concession to the borrower for economic or legal reasons related to the borrower's financial difficulties that it would not otherwise consider. Restructured workout loans typically present an elevated level of credit risk as the borrowers are not able to perform according to the original contractual terms. Loans or leases that are reported as TDRs are evaluated for impairment and, if impaired, measured for impairment as described above.

The determination of the general reserve for loans and leases that are not impaired is based on estimates made by management, to include, but not limited to, consideration of historical losses by portfolio segment, internal asset classifications, and qualitative factors to include economic trends in the Company's service areas, industry experience and trends, geographic concentrations, estimated collateral values, the Company's underwriting policies, the character of the credit portfolio, and probable losses inherent in the portfolio taken as a whole.

The Company determines a separate allowance for each portfolio segment. These portfolio segments include commercial, real estate construction (including land and development loans), residential real estate, multi-family real estate, commercial real estate, leases, agriculture and consumer loans. The allowance for loan and lease losses attributable to each portfolio segment, which includes both impaired credits and credits that are not impaired, is combined to determine the Company's overall allowance, which is included as a component of loans and leases on the consolidated balance sheet and available for all loss exposures.

The Company assigns a risk rating to all loans and periodically performs detailed reviews of all such loans over a certain threshold to identify credit risks and to assess the overall collectability of the portfolio. These risk ratings are also subject to examination by independent specialists engaged by the Company and the Company's regulators. During the internal reviews, management monitors and analyzes the financial condition of borrowers and guarantors, trends in the industries in which borrowers operate and the fair values of collateral securing these loans. These credit quality indicators are used to assign a risk rating to each individual credit. The risk ratings can be grouped into six major categories, defined as follows:

***Pass*** – A pass loan is a strong credit with no existing or known potential weaknesses deserving of management's close attention.

## AMERICAN RIVER BANKSHARES AND SUBSIDIARIES

### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

#### 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

##### Allowance for Loan and Lease Losses (Continued)

**Watch** – A watch credit is a loan or lease that otherwise meets the definition of a standard or minimum acceptable quality loan, but which requires more than normal attention due to any of the following items: deterioration of borrower financial condition less severe than those warranting more adverse grading, deterioration of repayment ability and/or collateral value, increased leverage, adverse effects from a downturn in the economy, local market or industry, adverse changes in local or regional employer, management changes (including illness, disability, and death), and adverse legal action. Payments are current per the terms of the agreement. If conditions persist or worsen, a more severe risk grade may be warranted.

**Special Mention** – A special mention credit is a loan or lease that has potential weaknesses that deserve management's close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the credit or in the Company's position at some future date. Special Mention credits are not adversely classified and do not expose the Company to sufficient risk to warrant adverse classification.

**Substandard** – A substandard credit is a loan or lease that is not adequately protected by the current sound worth and paying capacity of the borrower or the value of the collateral pledged, if any. Credits classified as substandard have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt. Well defined weaknesses include inadequate cash flow or collateral support, a project's lack of marketability, failure to complete construction on time or a project's failure to fulfill economic expectations. They are characterized by the distinct possibility that the Company will sustain some loss if the deficiencies are not corrected.

**Doubtful** – Credits classified as doubtful are loans or leases that have all the weaknesses inherent in those classified as substandard with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently known facts, conditions and values, highly questionable and improbable.

**Loss** – Credits classified as loss are loans or leases considered uncollectible and charged off immediately.

The general reserve component of the allowance for loan and lease losses also consists of reserve factors that are based on management's assessment of the following for each portfolio segment: (1) inherent credit risk, (2) historical losses and (3) other qualitative factors. These reserve factors are inherently subjective and are driven by the repayment risk associated with each portfolio segment described below.

**Real estate construction** – These loans generally possess a higher inherent risk of loss than other real estate portfolio segments. A major risk arises from the necessity to complete projects within specified cost and time lines. Trends in the construction industry significantly impact the credit quality of these loans, as demand drives

construction activity. In addition, trends in real estate values significantly impact the credit quality of these loans, as property values determine the economic viability of construction projects.

***Commercial real estate*** – Commercial real estate mortgage loans generally possess a higher inherent risk of loss than other real estate portfolio segments, except land and construction loans. Adverse economic developments or an overbuilt market impact commercial real estate projects and may result in troubled loans. Trends in vacancy rates of commercial properties impact the credit quality of these loans. High vacancy rates reduce operating revenues and the ability for properties to produce sufficient cash flow to service debt obligations.

## AMERICAN RIVER BANKSHARES AND SUBSIDIARIES

### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

#### 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

##### Allowance for Loan and Lease Losses (Continued)

**Commercial** – Commercial loans generally possess a lower inherent risk of loss than real estate portfolio segments because these loans are generally underwritten to existing cash flows of operating businesses. Debt coverage is provided by business cash flows and economic trends influenced by unemployment rates and other key economic indicators are closely correlated to the credit quality of these loans.

**Multi-family** – Multi-family loans are non-construction term mortgages for the acquisition, refinance, or improvement of residential rental properties with generally more than 4 dwelling units. Underwriting is generally based on borrower creditworthiness, sufficiency of net operating income to service the bank loan payment, and a prudent loan-to-value ratio, among other factors.

**Residential** – Residential loans are generally loans to purchase or refinance 1-4 unit single-family residences, either owner-occupied or investor-owned. Some residential loans are short term to match their intended source of repayment through sale or refinance. The remainder are fixed or floating-rate term first mortgages with an original maturity between 2 and 10 years, generally with payments based on a 25-30 year amortization.

**Leases** – Leases originated by the bank are non-consumer finance leases (as contrasted with operating leases) for the acquisition of titled and non-titled business equipment. Leases are generally amortized over a period from 36 to 84 months, depending on the useful life of the equipment acquired. Residual (balloon) payments at lease end range from 0-20% of original cost, and are a non-optional obligation of the lessee. Lessees are contractually responsible for all costs, expenses, taxes, and liability associated with the leased equipment.

**Agricultural** – Loans secured by crop production and livestock are especially vulnerable to two risk factors that are largely outside the control of Company and borrowers: commodity prices and weather conditions.

**Consumer** – The consumer loan portfolio is comprised of a large number of small loans scheduled to be amortized over a specific period. Most installment loans are made directly for consumer purchases, but business loans granted for the purchase of heavy equipment or industrial vehicles may also be included. Also included in the consumer loan portfolio are home equity lines of credit. Economic trends determined by unemployment rates and other key economic indicators are closely correlated to the credit quality of these loans. Weak economic trends indicate that the borrowers' capacity to repay their obligations may be deteriorating.

Although management believes the allowance to be adequate, ultimate losses may vary from its estimates. At least quarterly, the Board of Directors reviews the adequacy of the allowance, including consideration of the relative risks in the portfolio, current economic conditions and other factors. If the Board of Directors and management determine

that changes are warranted based on those reviews, the allowance is adjusted. In addition, the Company's primary regulators, the FDIC and the California Department of Financial Institutions, as an integral part of their examination process, review the adequacy of the allowance. These regulatory agencies may require additions to the allowance based on their judgment about information available at the time of their examinations.

Allowance for Credit Losses on Off-Balance-Sheet Credit Exposures

The Company also maintains a separate allowance for off-balance-sheet commitments. Management estimates anticipated losses using historical data and utilization assumptions. The allowance for off-balance-sheet commitments is included in accrued interest payable and other liabilities on the consolidated balance sheet.

AMERICAN RIVER BANKSHARES AND SUBSIDIARIES

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

(Continued)

**2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)**

Other Real Estate Owned

Other real estate owned includes real estate acquired in full or partial settlement of loan obligations. When property is acquired, any excess of the recorded investment in the loan balance and accrued interest income over the estimated fair market value of the property less estimated selling costs is charged against the allowance for loan and lease losses. A valuation allowance for losses on other real estate may be maintained to provide for temporary declines in value. The allowance is established through a provision for losses on other real estate which is included in other expenses. Subsequent gains or losses on sales or writedowns resulting from permanent impairments are recorded in other income or expense as incurred. During 2011, the Company received \$1,705,000 in net proceeds from the sale of other real estate owned with net losses of \$24,000 recognized on the sale. During 2010, the Company received \$3,195,000 in net proceeds from the sale of other real estate owned with net losses of \$103,000 recognized on the sale. The recorded investment in other real estate owned totaled \$8,246,000 and \$2,796,000 at December 31, 2011 and 2010, respectively, and had related valuation allowances of \$56,000 and \$100,000, respectively.

Premises and Equipment

Premises and equipment are carried at cost. Depreciation is determined using the straight-line method over the estimated useful lives of the related assets. The useful life of the building and improvements is forty years. The useful lives of furniture, fixtures and equipment are estimated to be three to ten years. Leasehold improvements are amortized over the life of the asset or the term of the related lease, whichever is shorter. When assets are sold or otherwise disposed of, the cost and related accumulated depreciation or amortization are removed from the accounts, and any resulting gain or loss is recognized in income for the period. The cost of maintenance and repairs is charged to expense as incurred. Impairment of long-lived assets is evaluated by management based upon an event or changes in circumstances surrounding the underlying assets which indicate long-lived assets may be impaired.

Goodwill and Intangible Assets

Business combinations involving the Company's acquisition of equity interests or net assets of another enterprise or the assumption of net liabilities in an acquisition of branches constituting a business may give rise to goodwill. Goodwill represents the excess of the cost of an acquired entity over the net of the amounts assigned to assets acquired and liabilities assumed. The value of goodwill is ultimately derived from the Company's ability to generate net earnings after the acquisition and is not deductible for tax purposes. A decline in net earnings could be indicative of a decline in the fair value of goodwill and result in impairment. For that reason, goodwill is assessed for impairment at least annually.

Intangible assets are comprised of core deposit intangibles which represent the estimated fair value of the long-term deposit relationships that were assumed when the Company acquired Bank of Amador in December 2004. Core deposit intangibles are amortized over a period that approximates the expected run-off of the deposit base, which, in

this case, is eight years. Management evaluates the recoverability and remaining useful life annually to determine whether events or circumstances warrant a revision to the intangible assets or the remaining amortization period.

#### Income Taxes

The Company files its income taxes on a consolidated basis with its subsidiaries. The allocation of income tax expense (benefit) represents each entity's proportionate share of the consolidated provision for income taxes.

AMERICAN RIVER BANKSHARES AND SUBSIDIARIES

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

(Continued)

**2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)**

Income Taxes (Continued)

The Company accounts for income taxes using the balance sheet method, under which deferred tax assets and liabilities are recognized for the tax consequences of temporary differences between the reported amounts of assets and liabilities and their tax bases. Deferred tax assets and liabilities are adjusted for the effects of changes in tax laws and rates on the date of enactment. The deferred provision for income taxes is the result of the net change in the deferred tax asset and deferred tax liability balances during the year. This amount, combined with the current taxes payable or refundable, results in the income tax expense for the current year. On the consolidated balance sheet, net deferred tax assets are included in accrued interest receivable and other assets.

The determination of the amount of deferred income tax assets which are more likely than not to be realized is primarily dependent on projections of future earnings, which are subject to uncertainty and estimates that may change given economic conditions and other factors. The realization of deferred income tax assets is assessed and a valuation allowance is recorded if it is “more likely than not” that all or a portion of the deferred tax assets will not be realized. “More likely than not” is defined as greater than a 50% chance. All available evidence, both positive and negative is considered to determine whether, based on the weight of that evidence, a valuation allowance is needed. Based upon the Company’s analysis of available evidence, the Company determined that it is “more likely than not” that all of the deferred income tax assets as of December 31, 2011 and 2010 will be fully realized and therefore no valuation allowance was recorded.

The Company uses a comprehensive model for recognizing, measuring, presenting and disclosing in the financial statements tax positions taken or expected to be taken on a tax return. A tax position is recognized as a benefit only if it is “more likely than not” that the tax position would be sustained in a tax examination, with a tax examination being presumed to occur. The amount recognized is the largest amount of tax benefit that is greater than 50% likely of being realized on examination. For tax positions not meeting the “more likely than not” test, no tax benefit is recorded. Interest expense and penalties associated with unrecognized tax benefits, if any, are classified as income tax expense in the consolidated statement of income.

Comprehensive Income

Comprehensive income is reported in addition to net income for all periods presented. Comprehensive income is a more inclusive financial reporting methodology that includes disclosure of other comprehensive income (loss) that historically has not been recognized in the calculation of net income. Unrealized gains and losses on the Company’s available-for-sale investment securities are included in other comprehensive income (loss), adjusted for realized gains or losses included in net income. Total comprehensive income and the components of accumulated other comprehensive income (loss) are presented in the consolidated statement of changes in shareholders’ equity.

Earnings Per Share

Basic earnings per share ("EPS"), which excludes dilution, is computed by dividing income available to common shareholders by the weighted-average number of common shares outstanding for the period. Diluted EPS reflects the potential dilution that could occur if securities or other contracts to issue common stock, such as stock options or restricted stock, result in the issuance of common stock that shares in the earnings of the Company. The treasury stock method has been applied to determine the dilutive effect of stock options and restricted stock in computing diluted EPS. Earnings and dividends per share are restated for all stock splits and stock dividends through the date of issuance of the consolidated financial statements. There were no stock splits or stock dividends in 2011, 2010 or 2009.

## AMERICAN RIVER BANKSHARES AND SUBSIDIARIES

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

## 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Stock-Based Compensation

At December 31, 2011, the Company has two stock-based compensation plans, which are described more fully in Note 13. Compensation expense, net of related tax benefits, recorded in 2011, 2010 and 2009 totaled \$180,000, \$204,000 and \$155,000, or \$0.02, \$0.02 and \$0.03 per diluted share, respectively. Compensation expense is recognized over the vesting period on a straight line accounting basis.

The fair value of each option award is estimated on the date of grant using a Black-Scholes-Merton based option valuation model that uses the assumptions noted in the following table. Because Black-Scholes-Merton based option valuation models incorporate ranges of assumptions for inputs, those ranges are disclosed. Expected volatilities are based on historical volatility of the Company's stock and other factors. The Company uses historical data to estimate the dividend yield, option life and forfeiture rate within the valuation model. The expected option life represents the period of time that options granted are expected to be outstanding. The risk-free rate for the period representing the contractual life of the option is based on the U.S. Treasury yield curve in effect at the time of grant.

	2009
Dividend yield	6.74 %
Expected volatility	24.6 %
Risk-free interest rate	2.18 %
Expected option life in years	7
Weighted average fair value of options granted during the year	\$0.69

There were no options granted in 2011 or 2010 under either stock-based compensation plans.

Restricted stock awards are grants of shares of the Company's common stock that are subject to forfeiture until specific conditions or goals are met. Conditions may be based on continuing employment or service and/or achieving specified performance goals. During the period of restriction, Plan participants holding restricted share awards have voting and cash dividend rights. The restrictions lapse in accordance with a schedule or with other conditions determined by the Board of Directors as reflected in each award agreement. Upon the vesting of each restricted stock award, the Company issues the associated common shares from its inventory of authorized common shares. All outstanding awards under the Plan immediately vest in the event of a change of control of the Company. The shares

associated with any awards that fail to vest become available for re-issuance under the Plan.

Stock-Based Compensation (Continued)

The following is a summary of stock-based compensation information as of or for the years ended December 31, 2011, 2010 and 2009:

	2011	2010	2009
	(Dollars in thousands)		
Total intrinsic value of options exercised	\$—	\$—	\$28
Aggregate cash received for option exercises	\$—	\$—	\$22
Total fair value of options vested	\$178	\$248	\$298
Total compensation cost, options and restricted stock	\$202	\$236	\$210
Tax benefit recognized	\$22	\$32	\$55
Net compensation cost, options and restricted stock	\$180	\$204	\$155
Total compensation cost for nonvested option awards not yet recognized	\$62	\$216	\$377
Weighted average years for compensation cost for nonvested options to be recognized	.8	1.1	1.5
Total compensation cost for restricted stock not yet recognized	\$151	\$158	
Weighted average years for compensation cost for restricted stock to be recognized	1.6	1.7	

There were no restricted stock awards in 2009.

Operating Segments

While the chief decision-makers monitor the revenue streams of the various products and services, operations are managed and financial performance is evaluated on a Company-wide basis. Operating segments are aggregated into one as operating results for all segments are similar. Accordingly, all of the financial service operations are considered by management to be aggregated in one reportable operating segment.

Adoption of New Accounting Standards

In December 2010, the Financial Accounting Standards Board (FASB) amended existing guidance relating to goodwill impairment testing. This guidance requires that if the carrying amount of a reporting unit is zero or negative, a qualitative assessment be performed to determine if it is more likely than not that goodwill is impaired. Step 2 of the impairment test shall be performed if it is determined that it is more likely than not that goodwill is impaired. The amendments in this guidance were effective for fiscal years, and interim periods within those years, beginning after December 15, 2010. The effect of adopting this standard did not have a material effect on the Company's consolidated financial position, results of operations or cash flows.

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

(Continued)

**2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)**

Adoption of New Accounting Standards (Continued)

In April 2011, the FASB amended existing guidance for assisting a creditor in determining whether a restructuring is a troubled debt restructuring. The amendments clarify the guidance for a creditor's evaluation of whether it has granted a concession and whether a debtor is experiencing financial difficulties. With regard to determining whether a concession has been granted, the ASU clarifies that creditors are precluded from using the effective interest method to determine whether a concession has been granted. In the absence of using the effective interest method, a creditor must now focus on other considerations such as the value of the underlying collateral, evaluation of other collateral or guarantees, the debtor's ability to access other funds at market rates, interest rate increases and whether the restructuring results in a delay in payment that is insignificant. This guidance is effective for interim and annual reporting periods beginning after June 15, 2011, and should be applied retrospectively to the beginning of the annual period of adoption. For purposes of measuring impairment on newly identified troubled debt restructurings, the amendments should be applied prospectively for the first interim or annual period beginning on or after June 15, 2011. The effect of adopting this standard did not have a material effect on the Company's consolidated financial position, results of operations or cash flows.

In May, 2011, the FASB issued an amendment to achieve common fair value measurement and disclosure requirements between U.S. and International accounting principles. Overall, the guidance is consistent with existing U.S. accounting principles; however, there are some amendments that change a particular principle or requirement for measuring fair value or for disclosing information about fair value measurements. The amendments in this guidance are effective for interim and annual reporting periods beginning after December 15, 2011. The Company is currently evaluating the impact of this amendment on the consolidated financial statements.

In June 2011, the FASB amended existing guidance and eliminated the option to present the components of other comprehensive income as part of the statement of changes in shareholders' equity. The amendment requires that comprehensive income be presented in either a single continuous statement or in two separate consecutive statements. The amendments in this guidance are effective as of the beginning of a fiscal reporting year, and interim periods within that year, that begins after December 15, 2011. Early adoption is permitted. The adoption of this amendment will change the presentation of the components of comprehensive income for the Company, as this presentation will no longer be included as part of the consolidated statement of shareholders' equity.

In September 2011, the FASB amended existing guidance relating to goodwill impairment testing. The amendment permits an assessment of qualitative factors to determine whether the existence of events or circumstances leads to a determination that it is more likely than not that the fair value of a reporting unit is less than its carrying amount. If, after assessing these events or circumstances, it is concluded that it is not more likely than not that the fair value of a reporting unit is less than its carrying amount, then performing the two-step impairment test is unnecessary. The

amendments in this guidance are effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011. Early adoption is permitted, including for annual and interim goodwill impairment tests performed as of a date before September 15, 2011, if financial statements for the most recent annual or interim period have not yet been issued. The Company did not early adopt this guidance and is currently evaluating the impact of this amendment on the consolidated financial statements.

## 3. FAIR VALUE MEASUREMENTS

The carrying amounts and estimated fair values of the Company's financial instruments are as follows (dollars in thousands):

	December 31, 2011		December 31, 2010	
	Carrying Amount	Estimated Fair Value	Carrying Amount	Estimated Fair Value
Financial assets:				
Cash and due from banks	\$23,768	\$23,768	\$31,871	\$31,871
Interest-bearing deposits in banks	1,250	1,254	2,248	2,248
Investment securities	212,721	212,942	160,664	160,987
Loans and leases, net	293,731	290,505	338,533	332,964
FHLB stock	3,093	3,093	3,486	3,486
Accrued interest receivable	1,952	1,952	1,876	1,876
Financial liabilities:				
Deposits	\$462,285	\$463,218	\$465,122	\$465,985
Short-term borrowings	5,000	5,000	7,000	7,000
Long-term borrowings	14,000	14,326	10,000	10,523
Accrued interest payable	226	226	268	268

Estimated fair values are disclosed for financial instruments for which it is practicable to estimate fair value. These estimates are made at a specific point in time based on relevant market data and information about the financial instruments. These estimates do not reflect any premium or discount that could result from offering the Company's entire holdings of a particular financial instrument for sale at one time, nor do they attempt to estimate the value of anticipated future business related to the instruments. In addition, the tax ramifications related to the realization of unrealized gains and losses can have a significant effect on fair value estimates and have not been considered in any of these estimates.

Because no market exists for a significant portion of the Company's financial instruments, fair value estimates are based on judgments regarding current economic conditions, risk characteristics of various financial instruments and

other factors. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and therefore cannot be determined with precision. Changes in assumptions could significantly affect the fair values presented.

The following methods and assumptions were used by the Company to estimate the fair value of its financial instruments at December 31, 2011 and 2010:

Cash and due from banks: For cash and due from banks, the carrying amount is estimated to be fair value.

Interest-bearing deposits in banks: The fair values of interest-bearing deposits in banks are estimated by discounting their future cash flows using rates at each reporting date for instruments with similar remaining maturities offered by comparable financial institutions.

Investment securities: For investment securities, fair values are based on quoted market prices, where available. If quoted market prices are not available, fair values are estimated using quoted market prices for similar securities and indications of value provided by brokers.

Loans and leases: For variable-rate loans and leases that reprice frequently with no significant change in credit risk, fair values are based on carrying values. The fair values for other loans and leases are estimated using discounted cash flow analyses, using interest rates being offered at each reporting date for loans and leases with similar terms to borrowers of comparable creditworthiness. The carrying amount of accrued interest receivable approximates its fair value.

## AMERICAN RIVER BANKSHARES AND SUBSIDIARIES

### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

#### 3. FAIR VALUE MEASUREMENTS (Continued)

FHLB stock: It was not practicable to determine the fair value of FHLB stock due to restrictions placed on its transferability.

Deposits: The fair values for non-maturing deposits are, by definition, equal to the amount payable on demand at the reporting date represented by their carrying amount. Fair values for fixed-rate certificates of deposit are estimated using a discounted cash flow analysis using interest rates offered at each reporting date for certificates with similar remaining maturities. The carrying amount of accrued interest payable approximates its fair value.

Short-term and long-term borrowings: The fair value of short-term borrowings is estimated to be the carrying amount. The fair value of long-term borrowings is estimated using a discounted cash flow analysis using interest rates currently available for similar debt instruments.

Commitments to extend credit: The fair value of commitments are based on fees currently charged to enter into similar agreements, net of origination fees. These fees were not material at December 31, 2011 and 2010.

The following tables present information about the Company's assets and liabilities measured at fair value on a recurring and nonrecurring basis as of December 31, 2011 and 2010. They indicate the fair value hierarchy of the valuation techniques utilized by the Company to determine such fair value. In general, fair values determined by Level 1 inputs utilize quoted prices (unadjusted) in active markets for identical assets or liabilities that the Company has the ability to access. Fair values determined by Level 2 inputs utilize inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals. Level 3 inputs are unobservable inputs for the asset or liability, and include situations where there is little, if any, market activity for the asset or liability. In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, the level in the fair value hierarchy within which the fair value measurement in its entirety falls has been determined based on the lowest level input that is significant to the fair value measurement in its entirety. The Company's assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment and considers factors specific to the asset or liability.

## AMERICAN RIVER BANKSHARES AND SUBSIDIARIES

### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

#### 3. FAIR VALUE MEASUREMENTS (Continued)

Impaired loans with an unpaid principal balance of \$31,744,000 were written down to \$30,085,000 at December 31, 2011, resulting in an impairment charge of \$1,659,000, which was included in earnings for the period. Impaired loans with a carrying value of \$30,711,000 at December 31, 2010 were written down to \$28,957,000, resulting in an impairment charge of \$1,754,000, which was included in earnings for the period.

Other real estate owned of \$9,168,000 was written down to \$8,190,000 at December 31, 2011, resulting in an impairment charge of \$978,000, which was included in earnings for the period. Other real estate owned with a carrying value of \$3,604,000 at December 31, 2010 was written down to \$2,696,000, resulting in an impairment charge of \$908,000, which was included in earnings for the period.

There were no material changes in the valuation techniques used during 2011. The following methods were used to estimate the fair value of each class of financial instrument above:

**Available-for-sale securities** – Fair values for investment securities are based on quoted market prices, if available, or evaluated pricing models that vary by asset class and incorporate available trade, bid and other market information. Pricing applications apply available information, as applicable, through processes such as benchmark curves, benchmarking to like securities, sector groupings and matrix pricing.

**Impaired loans** – The fair value of collateral dependent impaired loans adjusted for specific allocations of the allowance for loan losses is generally based on recent real estate appraisals and/or evaluations. These appraisals and/or evaluations may utilize a single valuation approach or a combination of approaches including comparable sales, cost and the income approach. Adjustments are routinely made in the appraisal process by the independent appraisers to adjust for differences between the comparable sales and income and other available data. Such adjustments are usually significant and typically result in a Level 3 classification of the inputs for determining fair value.

**Other real estate owned** – Certain commercial and residential real estate properties classified as other real estate owned (OREO) are measured at fair value, less costs to sell. Fair values are based on recent real estate appraisals and/or evaluations. These appraisals and/or evaluations may use a single valuation approach or a combination of approaches including comparable sales, cost and the income approach. Adjustments are routinely made in the appraisal process by the independent appraisers to adjust for differences between the comparable sales and income and other available data. Such adjustments are usually significant and typically result in a Level 3 classification of the inputs for determining fair value.

#### 4. GOODWILL AND OTHER INTANGIBLE ASSETS

At December 31, 2011 and 2010, goodwill totaled \$16,321,000. Goodwill is evaluated annually for impairment and was most recently evaluated in December 2011 under the provisions of the codification Topic 350, *Goodwill and Other Intangibles*. Management determined that no impairment recognition was required for the years ended December 31, 2011, 2010 and 2009.

Other intangible assets are comprised of core deposit intangibles totaling \$183,000 and \$402,000 at December 31, 2011 and 2010, respectively. Amortization of the intangible assets included in other expense totaled \$219,000, \$242,000 and \$263,000 for the years ended December 31, 2011, 2010 and 2009, respectively. The entire remaining balance of \$183,000 will be amortized over the next year.

## 5. INVESTMENT SECURITIES

The amortized cost and estimated fair value of investment securities at December 31, 2011 and 2010 consisted of the following (dollars in thousands):

Available-for-Sale

	2011			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
Debt securities:				
U.S. Government guaranteed and sponsored entity mortgage-backed securities	\$ 175,038	\$ 4,570	\$ (154 )	\$ 179,454
Obligations of states and political subdivisions	27,678	1,510		29,188
Equity securities:				
Corporate stock	65	4		69
	\$ 202,781	\$ 6,084	\$ (154 )	\$ 208,711

	2010			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
Debt securities:				
U.S. Government guaranteed and sponsored entity mortgage-backed securities	\$ 135,915	\$ 3,156	\$ (427 )	\$ 138,644
Obligations of states and political subdivisions	15,675	242	(125 )	15,792
Equity securities:				
Corporate stock	77	8	(6 )	79
	\$ 151,667	\$ 3,406	\$ (558 )	\$ 154,515

Net unrealized gains on available-for-sale investment securities totaling \$5,930,000 were recorded, net of \$2,372,000 in tax liabilities, as accumulated other comprehensive income within shareholders' equity at December 31, 2011. Proceeds and gross realized gains from the sale and call of available-for-sale investment securities for the year ended December 31, 2011 totaled \$11,071,000 and \$353,000, respectively. There were no transfers of available-for-sale investment securities during the year ended December 31, 2011.

Net unrealized gains on available-for-sale investment securities totaling \$2,848,000 were recorded, net of \$1,139,000 in tax liabilities, as accumulated other comprehensive income within shareholders' equity at December 31, 2010. Proceeds and gross realized gains from the sale and call of available-for-sale investment securities for the year ended December 31, 2010 totaled \$9,702,000 and \$7,000, respectively. There were no transfers of available-for-sale investment securities during the year ended December 31, 2010.

Proceeds and gross realized gains from the sale and call of available-for-sale investment securities for the year ended December 31, 2009 totaled \$11,075,000 and \$270,000, respectively.

160

Edgar Filing: AMERICAN RIVER BANKSHARES - Form 10-K

	Cost	Value	Cost	Value
Within one year	\$826	\$833		
After one year through five years	2,648	2,675		
After five years through ten years	9,602	10,139		
After ten years	14,602	15,541		
	27,678	29,188		
Investment securities not due at a single maturity date:				
Mortgage-backed securities	175,038	179,454	\$4,010	\$ 4,231
Corporate stock	65	69		
	\$202,781	\$208,711	\$4,010	\$ 4,231

Expected maturities will differ from contractual maturities because the issuers of the securities may have the right to call or prepay obligations with or without call or prepayment penalties.

Investment securities with amortized costs totaling \$46,518,000 and \$47,729,000 and estimated fair values totaling \$48,709,000 and \$49,839,000 were pledged to secure State Treasury funds on deposit, public agency and bankruptcy trustee deposits and borrowing arrangements (see Note 10) at December 31, 2011 and 2010, respectively.

## AMERICAN RIVER BANKSHARES AND SUBSIDIARIES

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

## 5. INVESTMENT SECURITIES (Continued)

Investment securities with unrealized losses at December 31, 2011 and 2010 are summarized and classified according to the duration of the loss period as follows (dollars in thousands):

	2011					
	Less than 12 Months		12 Months or More		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
<u>Available-for-Sale</u>						
Debt securities:						
U.S. Government guaranteed and sponsored entity mortgage-backed securities	\$23,749	\$ (154 )	\$ —	\$ —	\$23,749	\$ (154 )

	2010					
	Less than 12 Months		12 Months or More		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
<u>Available-for-Sale</u>						
Debt securities:						
U.S. Government guaranteed and sponsored entity mortgage-backed securities	\$29,535	\$ (427 )			\$29,535	\$ (427 )
Obligations of states and political sub-divisions	5,169	(125 )			5,169	(125 )
Corporate stock	5	(2 )	\$5	\$ (4 )	10	(6 )
	\$34,709	\$ (554 )	\$5	\$ (4 )	\$34,714	\$ (558 )

At December 31, 2011, the Company held 189 securities of which 11 were in a loss position for less than twelve months and none were in a loss position for twelve months or more. All 11 securities are mortgage-backed securities.

The unrealized loss on the Company's investments in mortgage-backed securities is primarily driven by interest rates. Because the decline in market value is attributable to a change in interest rates and not credit quality, and because the Company has the ability and intent to hold these investments until recovery of fair value, which may be maturity, management does not consider these investments to be other-than-temporarily impaired.

## AMERICAN RIVER BANKSHARES AND SUBSIDIARIES

## 6. LOANS AND LEASES

Outstanding loans and leases are summarized as follows (dollars in thousands):

	December 31,	
	2011	2010
Real estate – commercial	\$204,043	\$216,076
Real estate – construction	10,356	15,971
Real estate – multi-family	7,580	6,968
Real estate – residential	19,695	26,099
Commercial	42,108	58,261
Lease financing receivable	1,725	2,766
Agriculture	4,583	7,202
Consumer	10,984	13,202
	301,074	346,545
Deferred loan and lease origination fees, net	(302 )	(427 )
Allowance for loan and lease losses	(7,041 )	(7,585 )
	\$293,731	\$338,533

Certain loans are pledged as collateral for available borrowings with the FHLB and the Federal Reserve Bank of San Francisco (the “FRB”). Pledged loans totaled \$181,034,000 and \$201,749,000 at December 31, 2011 and 2010, respectively (see Note 10).

The components of the Company’s lease financing receivable are summarized as follows (dollars in thousands):

December 31,

	2011	2010
Future lease payments receivable	\$ 1,731	\$ 2,908
Residual interests	122	104
Unearned income	(128 )	(246 )
Net lease financing receivable	\$ 1,725	\$ 2,766

Future lease payments receivable are as follows (dollars in thousands):

Year Ending December 31,	
2012	\$ 804
2013	548
2014	226
2015	148
2016	5
Total lease payments receivable	\$ 1,731

Salaries and employee benefits totaling \$371,000, \$453,000 and \$674,000 have been deferred as loan and lease origination costs for the years ended December 31, 2011, 2010 and 2009, respectively.

The recorded investment in loans and leases that were considered to be impaired totaled \$30,085,000 at December 31, 2011 and had a related valuation allowance of \$1,680,000. The average recorded investment in impaired loans and leases during 2011 was approximately \$31,956,000.

The recorded investment in loans and leases that were considered to be impaired totaled \$40,237,000 at December 31, 2010 and had a related valuation allowance of \$1,619,000. The average recorded investment in impaired loans and leases during 2010 was approximately \$44,594,000.

Non-accrual loans and leases totaled approximately \$13,423,000 and \$22,571,000 at December 31, 2011 and 2010, respectively. There were no loans and leases past due 90 days or more and still accruing interest at December 31, 2011 and 2010. Interest income on non-accrual loans is generally recognized on a cash basis and was approximately \$440,000, \$338,000 and \$79,000 for the years ended December 31, 2011, 2010 and 2009. Interest foregone on non-accrual loans was approximately \$1,706,000, \$1,736,000 and \$1,281,000 for the years ended December 31, 2011, 2010 and 2009, respectively.

## AMERICAN RIVER BANKSHARES AND SUBSIDIARIES

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

## 7. ALLOWANCE FOR LOAN AND LEASE LOSSES (Continued)

Troubled Debt Restructurings

The Company has allocated \$535,000 and \$1,491,000 of specific reserves to customers whose loan terms have been modified in troubled debt restructurings as of December 31, 2011 and 2010, respectively. The Company has not committed to lend additional amounts as of December 31, 2011 and 2010 to borrowers with outstanding loans that are classified as troubled debt restructurings.

During the period ended December 31, 2011, the terms of certain loans were modified as troubled debt restructurings. The modification of the terms of such loans included one or a combination of the following: a reduction of the stated interest rate of the loan at a stated rate of interest lower than the current market rate for new debt with similar risk; an extension of the maturity date; or a permanent reduction of the recorded investment in the loan.

Modifications involving a reduction of the stated interest rate of the loan were for periods ranging from 2 months to 5 years. Modifications involving an extension of the maturity date were for periods ranging from 1 year to 10 years.

The following table presents loans by class modified as troubled debt restructurings during the year ended December 31, 2011:

	Number of Loans	Pre- Modification Outstanding Recorded Investment	Post- Modification Outstanding Recorded Investment
Troubled debt restructurings:			
Commercial	15	\$ 2,165	\$ 2,165
Real estate – commercial	13	10,917	10,341
Real estate – multi-family	2	1,319	1,319
Real estate – construction	1	355	255
Real estate – residential	4	1,665	1,621
Other – agriculture	2	1,012	1,012
Other – consumer	3	370	370
Total	40	\$ 17,803	\$ 17,083

The troubled debt restructurings described above increased the allowance for loan and lease losses by \$459,000 and resulted in charge offs of \$620,000 during the year ended December 31, 2011.

The following table presents loans by class modified as troubled debt restructurings for which there was a payment default within twelve months following the modification during the year ended December 31, 2011:

	Number of Loans	Recorded Investment
Troubled debt restructurings that subsequently defaulted:		
Commercial	1	\$ 35
Real estate – commercial	1	198
Other – agriculture	1	597
Total	3	\$ 830

## AMERICAN RIVER BANKSHARES AND SUBSIDIARIES

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

## 7. ALLOWANCE FOR LOAN AND LEASE LOSSES (Continued)

Troubled Debt Restructurings (Continued)

A loan is considered to be in payment default once it is 90 days contractually past due under the modified terms.

The troubled debt restructurings that subsequently defaulted described above increased the allowance for loan and lease losses by \$114,000 and resulted in charge offs of \$87,000 during the year ended December 31, 2011.

In order to determine whether a borrower is experiencing financial difficulty, an evaluation is performed of the probability that the borrower will be in payment default on any of its debt in the foreseeable future without the modification. This evaluation is performed under the Company's internal underwriting policy.

## 8. PREMISES AND EQUIPMENT

Premises and equipment consisted of the following (dollars in thousands):

	December 31,	
	2011	2010
Land	\$206	\$206
Building and improvements	836	734
Furniture, fixtures and equipment	5,676	5,180
Leasehold improvements	1,725	1,567
	8,443	7,687
Less accumulated depreciation and amortization	(6,088)	(5,661)
	\$2,355	\$2,026

Depreciation and amortization included in occupancy and furniture and equipment expense totaled \$520,000, \$543,000 and \$569,000 for the years ended December 31, 2011, 2010 and 2009, respectively.

## 9. INTEREST-BEARING DEPOSITS

Interest-bearing deposits consisted of the following (dollars in thousands):

	December 31,	
	2011	2010
Savings	\$47,919	\$45,537
Money market	139,244	137,636
NOW accounts	43,959	45,075
Time, \$100,000 or more	69,464	78,147
Other time	28,259	32,091
	\$328,845	\$338,486

The Company held \$29,000,000 in certificates of deposit for the State of California as of December 31, 2011 and 2010. This amount represents 6.3% of total deposit balances at December 31, 2011 and 6.2% at December 31, 2010.

AMERICAN RIVER BANKSHARES AND SUBSIDIARIES

9. **INTEREST-BEARING DEPOSITS** (Continued)

Aggregate annual maturities of time deposits are as follows (dollars in thousands):

Year Ending December 31,	
2012	\$74,923
2013	4,184
2014	4,418
2015	2,337
2016	4,826
Thereafter	35
	\$97,723

Interest expense recognized on interest-bearing deposits consisted of the following (dollars in thousands):

	Year Ended December 31,		
	2011	2010	2009
Savings	\$183	\$224	\$229
Money market	1,000	1,268	1,304
NOW accounts	44	59	71
Time, \$100,000 or more	601	806	1,481
Other time	410	595	918
	\$2,238	\$2,952	\$4,003

## 10. **BORROWING ARRANGEMENTS**

The Company has \$17,000,000 in unsecured short-term borrowing arrangements to purchase Federal funds with two of its correspondent banks. There were no advances under the borrowing arrangements as of December 31, 2011 and 2010.

In addition, the Company has a line of credit available with the FHLB which is secured by pledged mortgage loans (see Note 6) and investment securities (see Note 5). Borrowings may include overnight advances as well as loans with a term of up to thirty years. Advances totaling \$19,000,000 were outstanding from the FHLB at December 31, 2011, bearing fixed interest rates ranging from .67% to 2.08% and maturing between January 9, 2012 and July 20, 2016. Advances totaling \$17,000,000 were outstanding from the FHLB at December 31, 2010, bearing fixed interest rates ranging from 1.85% to 3.78% and maturing between March 2, 2011 and January 13, 2014. Amounts available under the borrowing arrangement with the FHLB at December 31, 2011 and 2010 totaled \$62,242,000 and \$55,160,000, respectively.

In addition, the Company entered into a secured borrowing agreement with the FRB in 2008. The borrowing arrangement is secured by pledging selected loans (see Note 6) and investment securities (see Note 5). There were no advances outstanding as of December 31, 2011 and 2010. Amounts available under the borrowing arrangement with the FRB at December 31, 2011 and 2010 totaled \$24,994,000 and \$30,702,000, respectively.

## AMERICAN RIVER BANKSHARES AND SUBSIDIARIES

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

## 10. BORROWING ARRANGEMENTS (Continued)

The following table summarizes these borrowings (in thousands):

	December 31,					
	2011	Weighted Average		2010	Weighted Average	
	Amount	Rate		Amount	Rate	
Short-term portion of borrowings	\$5,000	2.08	%	\$7,000	2.40	%
Long-term borrowings	14,000	1.80	%	10,000	2.41	%
	\$19,000	1.88	%	\$17,000	2.40	%

Payments over the next five years are as follows:

Year Ending December 31,	
2012	\$5,000,000
2013	2,000,000
2014	8,000,000
2015	2,000,000
2016	2,000,000
	\$19,000,000

The Company has also been issued \$10,000,000 in letters of credit by the FHLB, included in the amounts available from the FHLB previously discussed, which have been pledged to secure Local Agency Deposits. The letters of credit act as a guarantee of payment to certain third parties in accordance with specified terms and conditions. The letters of credit were not drawn upon in 2011 and management does not expect these lines to be drawn in the future.

## 11. INCOME TAXES

The provision for (benefit from) income taxes for the years ended December 31, 2011, 2010, and 2009 consisted of the following (dollars in thousands):

	Federal	State	Total
<u>2011</u>			
Current	\$ 1,340	\$ 367	\$ 1,707
Deferred	(352 )	(86 )	(438 )
Provision for income taxes	\$ 988	\$ 281	\$ 1,269
<u>2010</u>			
Current	\$ 2	\$ 74	\$ 76
Deferred	(140 )	(187 )	(327 )
Benefit from income taxes	\$ (138 )	\$ (113 )	\$ (251 )

AMERICAN RIVER BANKSHARES AND SUBSIDIARIES

Edgar Filing: AMERICAN RIVER BANKSHARES - Form 10-K

Federal Home Loan Bank stock dividends	(211 )	(238 )
Premises and equipment		(15 )
Total deferred tax liabilities	(3,345)	(2,358)
Net deferred tax assets	\$2,865	\$3,729

The Company and its subsidiaries file income tax returns in the United States and California jurisdictions. There are currently no pending federal, state or local income tax examinations by tax authorities with the exception of the California Franchise Tax Board audit of the Company's net interest deduction for the tax years ended 2007, 2008 and 2009. The Company expects to finalize this audit during 2012. Furthermore, with few exceptions, the Company is no longer subject to the examination by federal taxing authorities for the years ended before December 31, 2008 and by state and local taxing authorities for years before December 31, 2007. The unrecognized tax benefits and changes therein and the interest and penalties accrued by the Company as of December 31, 2011 were not significant.

## AMERICAN RIVER BANKSHARES AND SUBSIDIARIES

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

## 11. INCOME TAXES (Continued)

The provision for income taxes differs from amounts computed by applying the statutory Federal income tax rate of 34% in 2011, 2010 and 2009 to income before income taxes. The significant items comprising these differences consisted of the following:

	Year Ended December 31,		
	2011	2010	2009
Federal income tax statutory rate	34.0%	34.0 %	34.0 %
State franchise tax, net of Federal tax effect	7.6 %	(29.5 )%	3.0 %
Tax benefit of interest on obligations of states and political subdivisions	(6.6 )%	(93.0 )%	(15.2)%
Tax-exempt income from life insurance policies	(2.5 )%	(42.0 )%	(4.3 )%
Equity compensation expense	0.7 %	17.0 %	1.3 %
Other	0.4 %	1.9 %	0.3 %
Effective tax rate	33.6%	(111.6)%	19.1 %

## 12. COMMITMENTS AND CONTINGENCIES

Leases

The Company leases branch facilities, administrative offices and various equipment under noncancelable operating leases which expire on various dates through the year 2021. Certain of the leases have five year renewal options. One of the branch facilities is leased from a current member of the Company's Board of Directors (see Note 17).

Future minimum lease payments are as follows (dollars in thousands):

Year Ending December 31,	
2012	\$850

2013	854
2014	776
2015	713
2016	665
Thereafter	625

\$4,483

Rental expense included in occupancy, furniture and equipment expense totaled \$832,000, \$956,000 and \$1,050,000 for the years ended December 31, 2011, 2010 and 2009, respectively.

#### Financial Instruments With Off-Balance-Sheet Risk

The Company is a party to financial instruments with off-balance-sheet risk in the normal course of business in order to meet the financing needs of its customers and to reduce its exposure to fluctuations in interest rates. These financial instruments consist of commitments to extend credit and standby letters of credit. These instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized on the consolidated balance sheet.

## AMERICAN RIVER BANKSHARES AND SUBSIDIARIES

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

## 12. COMMITMENTS AND CONTINGENCIES (Continued)

Financial Instruments With Off-Balance-Sheet Risk (Continued)

The Company's exposure to credit loss in the event of nonperformance by the other party for commitments to extend credit and standby letters of credit is represented by the contractual amount of those instruments. The Company uses the same credit policies in making commitments and standby letters of credit as it does for loans included on the consolidated balance sheet.

The following financial instruments represent off-balance-sheet credit risk (dollars in thousands):

	December 31,	
	2011	2010
Commitments to extend credit:		
Revolving lines of credit secured by 1-4 family residences	\$4,642	\$5,964
Commercial real estate, construction and land development commitments secured by real estate	10,129	12,746
Other unused commitments, principally commercial loans	21,708	23,738
	\$36,479	\$42,448
Standby letters of credit	\$10,086	\$10,033

At inception, real estate commitments are generally secured by property with a loan to value ratio of 55% to 75%. In addition, the majority of the Company's commitments have variable interest rates.

Commitments to extend credit are agreements to lend to a client as long as there is no violation of any conditions established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since some of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. Each client's creditworthiness is evaluated on a case-by-case basis. The amount of collateral obtained, if deemed necessary upon extension of credit, is based on management's credit evaluation of the borrower. Collateral held varies but may include accounts receivable, inventory, equipment and deeds of trust on residential real estate and income-producing commercial properties.

Standby letters of credit are conditional commitments issued to guarantee the performance or financial obligation of a client to a third party. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loans to clients.

Significant Concentrations of Credit Risk

The Company grants real estate mortgage, real estate construction, commercial, agricultural and consumer loans to clients throughout Sacramento, Placer, Yolo, Amador, El Dorado, and Sonoma counties.

In management's judgment, a concentration exists in real estate-related loans which represented approximately 80% and 76% of the Company's loan portfolio at December 31, 2011 and 2010, respectively. A continued substantial decline in the economy in general, or a continued decline in real estate values in the Company's primary market areas in particular, could have an adverse impact on collectibility of these loans. However, personal and business income represent the primary source of repayment for a majority of these loans.

## AMERICAN RIVER BANKSHARES AND SUBSIDIARIES

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

## 12. COMMITMENTS AND CONTINGENCIES (Continued)

Correspondent Banking Agreements

The Company maintains funds on deposit with other federally insured financial institutions under correspondent banking agreements. The Company did not have any uninsured deposits at December 31, 2011.

Contingencies

The Company is subject to legal proceedings and claims which arise in the ordinary course of business. In the opinion of management, the amount of ultimate liability with respect to such actions will not materially affect the consolidated financial position or results of operations of the Company.

## 13. SHAREHOLDERS' EQUITY

Earnings Per Share

A reconciliation of the numerators and denominators of the basic and diluted earnings per share computations is as follows (dollars and shares in thousands, except per share data):

For the Year Ended	Net Income	Weighted Average Number of Shares Outstanding	Per-Share Amount
<u>December 31, 2011</u>			
Basic earnings per share	\$2,504	9,852	\$ 0.25
Effect of dilutive stock-based compensation		6	
Diluted earnings per share	\$2,504	9,858	\$ 0.25
<u>December 31, 2010</u>			

Edgar Filing: AMERICAN RIVER BANKSHARES - Form 10-K

Basic earnings per share	\$476	9,846	\$ 0.05
Effect of dilutive stock-based compensation		3	
Diluted earnings per share	\$476	9,849	\$ 0.05

December 31, 2009

Basic earnings per share	\$ 1,586	6,031	\$ 0.26
Effect of dilutive stock-based compensation		7	
Diluted earnings per share	\$ 1,586	6,038	\$ 0.26

Stock options for 358,198 shares, 379,571 shares and 381,021 shares of common stock were not considered in computing diluted earnings per common share for the years ended December 31, 2011, 2010 and 2009, respectively, because they were antidilutive.

## AMERICAN RIVER BANKSHARES AND SUBSIDIARIES

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

## 13. SHAREHOLDERS' EQUITY (Continued)

Stock Based Compensation

In 2000, the Board of Directors adopted and the Company's shareholders approved a stock option plan (the "2000 Plan"), under which 358,198 options remain outstanding at December 31, 2011. On March 17, 2010, the Board of Directors adopted the 2010 Equity Incentive Plan (the "2010 Plan"). The 2010 Plan was approved by the Company's shareholders on May 20, 2010. The total number of authorized shares that are available for issuance under the 2010 Plan is 1,463,531. The 2010 Plan provides for the following types of stock-based awards: incentive stock options; nonqualified stock options; stock appreciation rights; restricted stock; restricted performance stock; unrestricted Company stock; and performance units. Awards granted under the 2000 Plan were either incentive stock options or nonqualified stock options. The 2010 Plan and the 2000 Plan (collectively the "Plans"), under which equity incentives may be granted to employees and directors under incentive and nonstatutory agreements, require that the option price may not be less than the fair value of the stock at the date the option is granted. The option awards under the Plans expire on dates determined by the Board of Directors, but not later than ten years from the date of award. The vesting period is generally five years; however, the vesting period can be modified at the discretion of the Company's Board of Directors. Outstanding option awards under the Plans are exercisable until their expiration; however, no new options will be awarded under the 2000 Plan. The Plans do not provide for the settlement of awards in cash and new shares are issued upon exercise of an option.

A summary of the outstanding and vested stock option activity for the year ended December 31, 2011 is as follows:

	Outstanding		Nonvested	
		Weighted Average Exercise Price		Weighted Average Fair Value
	Shares	Per Share	Shares	Per Share
Balance, January 1, 2011	379,571	\$ 17.18	119,795	\$ 2.73
Options vested			(32,928 )	\$ 5.05
Options expired or canceled	(21,373 )	\$ 16.04	(21,373 )	\$ 3.60
Balance, December 31, 2011	358,198	\$ 17.25	65,494	\$ 2.08

A summary of options as of December 31, 2011 is as follows:

Weighted average exercise price of nonvested stock options	\$13.43
Aggregate intrinsic value of nonvested stock options	\$—
Weighted average remaining contractual term in years of nonvested stock options	6.49
Number of vested stock options	292,704
Number of options expected to vest	52,395
Weighted average exercise price per share	\$18.10
Aggregate intrinsic value	\$—
Weighted average remaining contractual term in years	3.98

	358,198		292,704

Restricted Stock

There were 18,902 shares of restricted stock awarded during the third quarter of 2011. Of the 18,902 restricted common shares, 13,335 will vest one year from the date of the award and 5,567 will vest 20% per year from the date of the award. The weighted average contractual term over which the restricted stock will vest is 1.56 years. There were 29,334 shares of restricted stock awarded during the third quarter of 2010. Grant date fair value is determined by the market price of the Company's common stock on the date of grant (\$6.99 on July 21, 2010 and \$5.25 on August 17, 2011). Of the 29,334 restricted common shares awarded in 2010, 13,298 vested on July 21, 2011, 2,860 were forfeited, and 13,176 will vest 20% per year. The intrinsic value of unvested restricted stock at December 31, 2011 was \$146,000.

Restricted Stock	Shares	Weighted Average Grant Date Fair Value
Nonvested at January 1, 2011	29,334	\$ 6.99
Awarded	18,902	5.25
Vested	(13,298)	6.99
Cancelled	(2,860 )	6.99
Nonvested at December 31, 2011	32,078	5.96

The shares awarded to employees and directors under the restricted stock agreements vest on applicable vesting dates only to the extent the recipient of the shares is then an employee or a director of the Company or one of its subsidiaries, and each recipient will forfeit all of the shares that have not vested on the date his or her employment or service is terminated. New shares are issued upon vesting of the restricted common stock.

## AMERICAN RIVER BANKSHARES AND SUBSIDIARIES

### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

#### 13. SHAREHOLDERS' EQUITY (Continued)

##### Common Stock Repurchase Program

On January 16, 2008, the Board of Directors of the Company authorized a stock repurchase program which allowed the repurchase of up to six and one half percent (6.5%) annually of the Company's outstanding shares of common stock (adjusted for stock splits or stock dividends). On July 27, 2009, the Company announced that the Board of Directors was temporarily suspending the stock repurchase program.

On January 26, 2012, the Company terminated the existing stock repurchase program and approved and authorized a new stock repurchase program for 2012 (the "2012 Program"). The 2012 Program authorizes the repurchase during 2012 of up to 5% of the outstanding shares of the Company's common stock, or approximately 494,500 shares based on the 9,890,909 shares outstanding as of January 26, 2012. Any repurchases under the 2012 Program will be made from time to time by the Company in the open market as conditions allow. All such transactions will be structured to comply with Commission Rule 10b-18 and all shares repurchased under the 2012 Program will be retired. The number, price and timing of the repurchases will be at the Company's sole discretion and the 2012 Program may be re-evaluated depending on market conditions, capital and liquidity needs or other factors. Based on such re-evaluation, the Board of Directors may suspend, terminate, modify or cancel the 2012 Program at any time without notice.

#### 14. REGULATORY MATTERS

##### Dividends

Upon declaration by the Board of Directors of the Company, all shareholders of record will be entitled to receive dividends.

In 2009, the Company declared cash dividends in the amount of \$0.29 per common share. There is no assurance, however, that any dividends will be paid in the future since they are subject to regulatory restrictions, and dependent upon earnings, financial condition and capital requirements of the Company and its subsidiaries. On July 24, 2009, the Board of Directors temporarily suspended the payment of cash dividends until such time as it is prudent to reestablish payment of cash dividends. As a result there were no cash dividends declared or paid in 2010 and 2011. The California Financial Code restricts the total dividend payment of any state banking association in any calendar year to the lesser of (1) the bank's retained earnings or (2) the bank's net income for its last three fiscal years, less distributions made to shareholders during the same three-year period. In addition, subject to prior regulatory approval, any state banking association may request an exception to this restriction.

Regulatory Capital

The Company and ARB are subject to certain regulatory capital requirements administered by the Board of Governors of the Federal Reserve System and the FDIC. Failure to meet these minimum capital requirements can initiate certain mandatory, and possibly additional discretionary, actions by regulators that, if undertaken, could have a direct material effect on the Company's consolidated financial statements.

## AMERICAN RIVER BANKSHARES AND SUBSIDIARIES

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

## 14. REGULATORY MATTERS (Continued)

Regulatory Capital (Continued)

Under capital adequacy guidelines, the Company and ARB must meet specific capital guidelines that involve quantitative measures of their assets, liabilities and certain off-balance-sheet items as calculated under regulatory accounting practices. These quantitative measures are established by regulation and require that minimum amounts and ratios of total and Tier 1 capital to risk-weighted assets and of Tier 1 capital to average assets be maintained. Capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings and other factors.

To be categorized as well capitalized, ARB must maintain minimum total risk-based, Tier 1 risk-based and Tier 1 leverage ratios as set forth in the table below.

Management believes that the Company and ARB met all their capital adequacy requirements as of December 31, 2011 and 2010.

## 16. EMPLOYEE BENEFIT PLANS

### American River Bankshares 401(k) Plan

The American River Bankshares 401(k) Plan has been in place since January 1, 1993 and is available to all employees. Under the plan, the Company will match 100% of each participants' contribution up to 3% of annual compensation plus 50% of the next 2% of annual compensation. Employer Safe Harbor matching contributions are 100% vested upon entering the plan. The Company's contributions totaled \$172,000, \$173,000 and \$176,000 for the years ended December 31, 2011, 2010 and 2009, respectively.

### Employee Stock Purchase Plan

The Company contracts with an administrator for an Employee Stock Purchase Plan which allows employees to purchase the Company's stock at fair market value as of the date of purchase. The Company bears all costs of administering the Plan, including broker's fees, commissions, postage and other costs actually incurred.

AMERICAN RIVER BANKSHARES AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

16.EMPLOYEE BENEFIT PLANS (Continued)

American River Bankshares Deferred Compensation Plan

The Company has established a Deferred Compensation Plan for certain members of the management team and a Deferred Fee Agreement for Non-Employee Directors for the purpose of providing the opportunity for participants to defer compensation. Participants of the management team, who are selected by a committee designated by the Board of Directors, may elect to defer annually a minimum of \$5,000 or a maximum of eighty percent of their base salary and all of their cash bonus. Directors may also elect to defer up to one hundred percent of their monthly fees. The Company bears all administration costs and accrues interest on the participants' deferred balances at a rate based on U.S. Government Treasury rates plus 4.0%. This rate was 6.0% at December 31, 2011. Deferred compensation, including interest earned, totaled \$2,327,000 and \$2,330,000 at December 31, 2011 and 2010, respectively. The expense recognized under this plan totaled \$138,000, \$150,000 and \$116,000 for the years ended December 31, 2011, 2010 and 2009, respectively.

Salary Continuation Plan

- The Company has agreements to provide certain current executives, or their designated beneficiaries, with annual benefits for up to 15 years after retirement or death. These benefits are substantially equivalent to those available under life insurance policies purchased by the Company on the lives of the executives. The Company accrues for these future benefits from the effective date of the agreements until the executives' expected final payment dates in a systematic and rational manner. As of December 31, 2011 and 2010, the Company had accrued \$983,000 and \$867,000, respectively, for potential benefits payable. This payable approximates the then present value of the benefits expected to be provided at retirement and is included in accrued interest payable and other liabilities on the consolidated balance sheet. The expense recognized under this plan totaled \$166,000, \$153,000 and \$141,000 for the years ended December 31, 2011, 2010 and 2009, respectively.

In connection with these plans, the Company invested in single premium life insurance policies with cash surrender values totaling \$11,292,000 and \$11,019,000 at December 31, 2011 and 2010, respectively. On the consolidated balance sheet, the cash surrender value of life insurance policies is included in accrued interest receivable and other assets. Tax-exempt income on these policies, net of expense, totaled approximately \$272,000, \$277,000 and \$246,000 for the years ended December 31, 2011, 2010 and 2009, respectively.

17.RELATED PARTY TRANSACTIONS

During the normal course of business, the Company enters into transactions with related parties, including Directors and affiliates. These transactions include borrowings from the Company with substantially the same

terms, including rates and collateral, as loans to unrelated parties. The following is a summary of the aggregate activity involving related party borrowers during 2011 (dollars in thousands):

Balance, January 1, 2011	\$3,976
Disbursements	58
Amounts repaid	(147 )
Balance, December 31, 2011	\$3,887
Undisbursed commitments to related parties, December 31, 2011	\$6

The Company also leases one of its branch facilities from a current member of the Company's Board of Directors. Rental payments to the Director totaled \$100,000, \$101,000 and \$87,000 for the years ended December 31, 2011, 2010 and 2009, respectively.

**Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure.**

The Company reported in its Current Report on Form 8-K (the “8-K”) filed with the Commission on November 4, 2011, that Perry-Smith LLP (“Perry-Smith”) was dismissed as the Company’s independent registered public accounting firm and replaced by Crowe Horwath LLP (“Crowe”) as the independent registered public accounting firm for the Company for the year ending December 31, 2011. This change in accountants was a result of a transaction which was consummated on November 1, 2011, whereby Crowe acquired certain assets of Perry-Smith and certain Perry-Smith personnel became associated with Crowe. Except as described in the Form 8-K, there has been no change in the independent accountants engaged to audit the financial statements of the Company and its subsidiaries during the last two fiscal years ended December 31, 2011. There have been no disagreements with such independent registered public accountants during the last two fiscal years ended December 31, 2011, on any matter of accounting principles or practices, financial statement disclosure, or auditing scope or procedure.

**Item 9A. Controls and Procedures.**

**Effectiveness of Disclosure Controls and Procedures**

The Company, under the supervision and with the participation of its management, including the Chief Executive Officer and the Chief Financial Officer, evaluated the effectiveness of the design and operation of the Company’s “disclosure controls and procedures” (as defined in Rule 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended) as of December 31, 2011. Based on that evaluation, the Chief Executive Officer and the Chief Financial Officer concluded that the Company’s disclosure controls and procedures are effective in timely making known to them material information relating to the Company and the Company’s consolidated subsidiaries required to be disclosed in the Company’s reports filed or submitted under the Exchange Act.

During the quarter ended December 31, 2011, there have been no changes in the Company’s internal controls over financial reporting that have materially affected, or are reasonably likely to materially affect, these controls.

**Report of Management on Internal Control Over Financial Reporting**

Management of the Company is responsible for establishing and maintaining adequate internal control over financial reporting for the Company (as defined in Rule 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934, as amended).

The Company's management, including the Chief Executive Officer and Chief Financial Officer, has assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2011, presented in conformity with accounting principles generally accepted in the United States of America. In making this assessment, management used the criteria applicable to the Company as set forth by the Committee of Sponsoring Organizations of the Treadway Commission in *Internal Control—Integrated Framework*. Based upon such assessment, management believes that, as of December 31, 2011, the Company's internal control over financial reporting is effective based upon those criteria.

This Annual Report on Form 10-K does not include an attestation report of the Company's independent registered public accounting firm regarding internal control over financial reporting. Management's report was not subject to attestation by the Company's independent registered public accounting firm pursuant to the rules of the Securities and Exchange Commission that permit the Company to provide only management's report in this Annual Report on Form 10-K.
