US ENERGY CORP
Form 424B3
June 21, 2004

U.S. ENERGY CORP.
5,552,283 SHARES OF COMMON STOCK

This prospectus covers the offer and sale of up to 2,113,573 shares of common stock (\$0.01 par value) of U.S. Energy Corp. ("USE") by shareholders; up to 1,472,689 shares of common stock by holders of warrants and options on exercise thereof; up to 1,720,030 shares which may be issued on exchange of outstanding common stock, and preferred stock, in Rocky Mountain Gas, Inc. ("RMG"), a majority-owned subsidiary of USE) for common stock of USE; and up to 245,991 shares which may be issued on conversion of principal and interest on debt.

In this prospectus, "selling shareholder" or "selling shareholders" refers to Bourne Capital, LLC and five individuals who hold warrants to purchase stock in USE, all of whom also purchased stock in RMG which may be exchanged for stock in USE; 60 individuals and 12 entities which hold outstanding stock in USE; 48 individuals and 15 entities which hold warrants or options to purchase stock in USE; three institutional investors who purchased preferred stock in RMG which is convertible to USE stock, and warrants to purchase USE stock; two entities (two lenders on a mezzanine credit facility) which hold warrants to purchase to purchase stock in USE; and Tsunami Partners L.P., which holds debt convertible to USE stock and warrants to purchase stock. For information about the selling shareholders, and the transactions in which they acquired the various shares, options, warrants, and rights to exchange RMG stock for stock in the company, see "Selling Shareholders."

In this prospectus, "we," "company," and "USE" refer to U.S. Energy Corp. (and its subsidiaries unless otherwise specifically stated).

The selling shareholders may sell the shares from time to time in negotiated transactions, brokers' transactions or a combination of such methods of sale at market prices prevailing at the time of sale or at negotiated prices, or under rule 144. See "Plan of Distribution." Although we will receive proceeds if and to the extent options and warrants are exercised, we will not receive proceeds from sale of any of the shares offered by the selling shareholders.

USE is traded ("USEG") on the Nasdaq Small Cap Market (\$2.18 on June 18, 2004).

AN INVESTMENT IN THE SHARES OFFERED BY THIS PROSPECTUS IS SPECULATIVE AND SUBJECT TO RISK OF LOSS. SEE "RISK FACTORS" BEGINNING ON PAGE 8 AND THE TABLE OF CONTENTS ON PAGE 2.

NEITHER THE SECURITIES AND EXCHANGE COMMISSION NOR ANY STATE SECURITIES COMMISSION HAS APPROVED OR DISAPPROVED OF THE SECURITIES OR DETERMINED IF THIS PROSPECTUS IS TRUTHFUL OR COMPLETE. ANY REPRESENTATION TO THE CONTRARY IS A CRIMINAL OFFENSE.

THE DATE OF THIS PROSPECTUS IS JUNE 18, 2004

Edgar Filing: US ENERGY CORP - Form 424B3

The following summarizes all material information found elsewhere in this prospectus. This summary is qualified by the more detailed information in this prospectus and the exhibits filed with the registration statement which contains this prospectus.

THE COMPANY

U.S. Energy Corp. is a Wyoming corporation (formed in 1966) in the business of acquiring, exploring, developing and/or selling or leasing mineral properties. Our fiscal year ends December 31.

In 2003, almost all of our business activity was devoted to the coalbed methane ("CBM") business, which is conducted through Rocky Mountain Gas, Inc ("RMG") a subsidiary of the company.

In 2003, RMG transferred certain of its CBM assets including a producing, and several non-producing, CBM properties to Pinnacle Gas Resources, Inc. ("Pinnacle"), a newly-organized Delaware corporation. Other parties to this transaction included CCBM, Inc. and its parent company Carrizo Oil & Gas, Inc. ("CRZO") of Houston Texas; and seven affiliates of Credit Suisse First Boston Private Equity. As a result of the transaction, RMG became a 37.5% shareholder of Pinnacle; RMG accounts for its investment on the equity method. RMG recorded revenues from gas sales from mid-2002 until the transfer to Pinnacle was completed in mid-2003. See "Transaction with Pinnacle Gas Resources, Inc."

On January 30, 2004, RMG acquired producing and non-producing CBM properties located near Gillette, Wyoming, from Hi-Pro Production, LLC ("Hi-Pro"). These properties contain proven gas reserves. A portion of the purchase price was paid with a loan from institutional lenders under a \$25 million mezzanine lending facility, which was established in connection with the Hi-Pro purchase; additional loans will be available to acquire more CBM properties, subject to lenders' approval. In the first quarter of 2004, RMG raised \$1.8 million in working capital from institutional investors. See "Coal Bed Methane - Acquisition of Producing and Non-Producing Properties from Hi-Pro Production, LLC" and "RMG Equity Financing."

RMG's CBM properties are located in Wyoming and southeastern Montana (approximately 261,180 gross mineral acres, including properties under option, but not including acreage held by Pinnacle). A limited amount of exploratory drilling and testing was conducted on some of the non-producing properties in 2003, but in general, significant additional work is needed before we can determine if those properties contain gas reserves. No prediction is made when such determinations can be made.

In 2003, the company sold an indirect subsidiary (Canyon Resources) which owns commercial properties in Ticaboo, Utah. Canyon Resources was acquired in the 1990s from a utility as part of an acquisition of uranium properties and a uranium mill near Ticaboo, Utah. See "Oil And Gas, and Other Properties." The uranium properties and mill, presently inactive, have not been sold. See "Inactive Mining Properties - Uranium."

Historically, gas prices for production in the Powder River Basin (our area of activity) have been lower than national prices due to limited pipeline "takeaway capacity." This limitation was somewhat eased in late 2002 and 2003 by new pipeline construction and enlargement of existing lines, and may be further improved with more capacity in 2005. See "Gas Markets."

However, on both historical and seasonal bases, gas prices have been volatile. A return to low gas prices, particularly if aggravated by the negative price differential experienced by Powder River Basin

Edgar Filing: US ENERGY CORP - Form 424B3

producers, could adversely impact not only the economics of current production but also the economics of exploration projects as they move into production in the future.

USE and Crested originally were independent companies, with two common affiliates (John L. Larsen and Max T. Evans; Mr. Evans died in February 2002). In 1980, USE and Crested formed a joint venture ("USECC") to do business together (unless one or the other elected not to pursue an individual project). As a result of USE funding certain of Crested's obligations from time to time (due to Crested's lack of cash on hand), Crested subsequently paid a portion of this debt by issuing common stock to USE, Crested became a majority-owned subsidiary of USE in fiscal 1993. In fiscal 2001, Crested issued another 6,666,666 shares of its common stock to reduce Crested's debt owed to USE by \$3.0 million, which increased USE's ownership of Crested to 71.5%. All the operations of USE (and Crested) are in the United States.

In the first quarter 2004, USE obtained \$350,000 of equity funding from an accredited investor (100,000 restricted shares of common stock, three year warrants to purchase 50,000 shares at \$3.00 per share; and five year warrants to purchase 200,000 shares at \$3.00 per share). Proceeds will be used as working capital.

Principal executive offices of USE are located in the Glen L. Larsen building at 877 North 8th Street West, Riverton, Wyoming 82501, telephone 307-856-9271. RMG has a field office in Gillette, Wyoming.

Most of the company's operations are conducted through subsidiaries, the USECC Joint Venture with Crested, and jointly-owned subsidiaries of USE and Crested.

5

The company's subsidiaries are:

Subsidiary -----	Percent Owned by USE* -----	Primary Business Conducted -----
Plateau Resources Ltd. Motel/real estate - sold	100.0%	Uranium (Utah) - inactive mill - shut
Rocky Mountain Gas, Inc.	88.5%	Coalbed methane - active
Energx, Ltd.	90.0%	Gas - inactive - shut down
Crested Corp.	71.5%	Uranium, gold and molybdenum properties (inactive and shut down), and exploratory activities on coalbed methane properties

Edgar Filing: US ENERGY CORP - Form 424B3

Sutter Gold Mining Company	78.5%	Gold (California) - inactive - being r
Four Nines Gold, Inc.	50.9%	Contract Drilling/Construction - inact
USECC Joint Venture	50.0%	Uranium (Wyoming, Utah), gold and molybdenum,** all inactive and shut do real estate management and coalbed met exploration
Yellowstone Fuels Corp.	35.9%	Uranium (Wyoming) - inactive - shut do
Pinnacle Gas Resources, Inc.	37.5%	CBM exploration and production - activ

* Includes ownership of Crested Corp. in RMG and Sutter.

** There are no plans to put the molybdenum property into production in the foreseeable future. See "Inactive Mining Properties - Molybdenum and Item 3, "Legal Proceedings".

Until September 11, 2000, USE, USECC and Kennecott Uranium Company ("Kennecott") owned the Green Mountain Mining Venture ("GMMV"), which held a large uranium deposit and uranium mill in Wyoming. On September 11, 2000, USE and Crested settled litigation with Kennecott involving the GMMV by selling their interest in the GMMV and its properties back to Kennecott for \$3,250,000, receiving a royalty interest in the uranium properties and miscellaneous equipment. The GMMV properties are shut down. Kennecott also assumed all reclamation obligations on the GMMV properties; reclamation obligations for an ion exchange facility located on properties outside the GMMV were not assumed by Kennecott, see "Sheep Mountain Partners - Properties" below. Other uranium properties and a uranium mill in southeast Utah are held by Plateau Resources Ltd., a wholly-owned subsidiary of USE. The Utah uranium properties are shut down.

Activities on the mineral properties held by Sutter Gold Mining Company ("SGMC") were shut down because the historical market price of gold did not permit raising the necessary capital to build a mill and put the properties into production. However, improved gold prices over the last 12 months have revived the capital markets, particularly in Canada. See "Sutter Gold Mining Company."

6

In coalbed methane, we compete against many companies, some of which are much larger and better financed than the company. The principal area of competition is encountered in the financial ability to acquire good acreage positions and drill wells to explore coalbed methane potential, then, if warranted, drill production wells and install production equipment (gathering systems, compressors, etc.).

We own a royalty interest in a molybdenum property in Colorado; the property is owned by Phelps Dodge Corporation. We believe, at the present time, that Phelps Dodge does not have a plan to place the molybdenum property into production.

In the motel, real estate and airport operations area (significant as a percentage of revenues for 2003, but not our primary business focus), we own and manage an office building (where the company's headquarters are located), and

Edgar Filing: US ENERGY CORP - Form 424B3

small parcels of land, in Riverton, Wyoming, and a small amount of other land in Wyoming and Colorado. An indirect subsidiary (Canyon Resources), owned a townsite, motel, convenience store and other commercial facilities in Utah, which was sold in August 2003, thus greatly reducing activities in this commercial segment.

THE OFFERING

Securities Outstanding	13,970,866 shares of common stock, \$0.01 par value.
Securities To Be Outstanding	17,409,576 shares, assuming options and warrants on 1,472,689 shares held by the selling shareholders were exercised as of the date of this prospectus; outstanding RMG common and preferred stock is exchanged for 1,720,030 shares of USE; and 245,991 shares are issued on conversion of principal and interest on restructured debt (1 share for each \$2.25 principal and interest). The actual number of USE shares issued in exchange for RMG stock will depend on the market price for USE stock at conversion dates. See "Description of Securities - Options, Warrant, Convertible Shares of RMG, and Convertible Debt" and "Selling Shareholders."
Securities Offered	5,552,283 shares owned or to be owned by the selling shareholders.
Use of Proceeds	We will not receive any proceeds from sale of shares by the selling shareholders, but we will receive up to \$4,966,400 in proceeds from exercise of the warrants and options, if they are exercised, which will be used for working capital.
Plan of Distribution	The offering is made by the selling shareholders named in this prospectus, to the extent they sell shares. Sales may be made in the open market or in private negotiated transactions, at fixed or negotiated prices. See "Plan of Distribution."
Risk Factors	An investment is subject to risk. See "Risk Factors."

7

RISK FACTORS

An investment in our common stock is speculative in nature and involves a high degree of risk. You should carefully consider the following risks and the

Edgar Filing: US ENERGY CORP - Form 424B3

other information in this prospectus before investing.

RISK FACTORS INVOLVING THE COMPANY

LIMITED RESERVES AND PRODUCTION MAY SLOW DOWN EXPLORATION OF OTHER PROPERTIES. In June 2003, RMG transferred coalbed methane properties, including RMG's only producing wells at the time (the Bobcat property) to Pinnacle Gas Resources, Inc. ("Pinnacle") in exchange for an equity position in Pinnacle. In January, 2004, we acquired a producing field. See "Business - Transaction with Pinnacle Gas Resources, Inc." and "Acquisition of Producing and Non-Producing Properties from Hi-Pro Production, LLC."

No reserves have been established for any other properties, because we have not drilled and tested enough wells on the properties to determine if they contain economic reserves of coalbed methane. For some properties, we will have to establish at least some reserve parameters before gas transmission companies will build gas lines to our properties, and construction of lines will depend also on then-current and projected gas market prices. If we have the necessary capital, we may elect to build our own lines over to existing transmission lines near the properties in the Powder River Basin in Wyoming and Montana.

Due to permitting delays in Montana, we may not realize production from the Montana properties until mid-2005, or later. Other Wyoming properties could be in production in late 2004 - early 2005, but production might be delayed due to low market prices for gas. Low market prices could delay gas purchasers from building the lines necessary to move gas from our properties to the major gas transmission lines.

These factors may make it difficult to raise the amount of capital needed to further explore the coalbed methane production potential in our properties in a rapid manner. In the meantime, we have only limited working capital. See below.

VOLATILE GAS PRICES FOR POWDER RIVER BASIN PRODUCTION MAY HURT BUSINESS. Gas prices per Mcf (1,000 cubic feet) for Powder River Basin production (where RMG owns properties) averaged \$4.44, \$3.33 and \$2.13 for 2003, 2002 and 2001, but in those years the lowest prices were \$3.14, \$1.09 and \$1.05. The negative effect of price swings can be neutralized to some extent by fixed price contracts, but volatile prices make it difficult to pick the optimum price to fix; the fixed price could turn out to be lower than market over the life of the contract. And, even with stable prices, if a field's production declines significantly, the producer must buy gas in the open market to fill the contract.

Historically, Powder River Basin gas prices have been lower than national prices, due to the limited capacity of gas transmission lines to ship production to the mid-west and west coast markets. In 2003, this negative price differential was from 10% to 45% (and even more during the off season), although the differential decreased in the fourth quarter of 2003 and first quarter 2004, compared to prices in the fourth quarter 2002. Recent increases in this 'take away capacity,' and other pipeline increases planned or under construction, may not eliminate the negative price differential or even significantly decrease it.

A return to sustained low gas prices nationwide (particularly as amplified for Powder River Basin products through the negative pricing differential) would impair our ability to raise capital for RMG and reduce revenues from production coming on line.

Edgar Filing: US ENERGY CORP - Form 424B3

WE MAY HAVE TO BEGIN TO CURTAIL OPERATIONS IF WE DON'T RAISE MORE CAPITAL BY AUGUST 2004. At December 31, 2003 (and March 31, 2004) we had working capital of \$3,281,700 (\$3,803,100) and an accumulated deficit of \$43,073,000 (\$44,848,000). Our current level of operations, including general and administrative overhead, mineral operations (primarily holding costs for the uranium and gold properties), and costs to comply with lease and permitting obligations for the coalbed properties, are estimated to cost \$8,262,000 for the twelve months ending December 31, 2004. If we do not realize cash from liquidating assets, or other sources, or if RMG spends more money on exploration than will be covered by current arrangements, additional equity financing may be necessary to sustain the company's current level of operations after the second quarter 2004. There are no current commitments for such future financing as may be necessary.

Approximately \$21 million under a lending facility is available to a wholly-owned subsidiary of RMG (RMG I) to buy and develop coalbed methane properties, but only if the lenders approve the properties to be acquired and the development plans for those properties. Loan proceeds can't be used for USE working capital or for RMG's operating expenses unrelated to the acquired properties, and until the loans are repaid, all revenues from acquired properties are dedicated to pay only RMG I's operating expenses related to the properties, and loan payments. In addition, failure to maintain financial ratios and minimum production levels required by the lenders could result in loss of the properties, as well as our investments in the properties in excess of the loans. See "Business - Acquisition of Producing and Non-Producing Properties from Hi-Pro Production, LLC."

Only the Hi - Pro properties are in production. Lack of production and established reserves on the other properties may make it difficult to raise capital for exploration and development, or to acquire properties which are not at the level of development required by the lenders.

WE ARE SUBJECT TO CERTAIN KINDS OF RISK WHICH ARE UNIQUE TO THE MINERALS BUSINESS. The exploration for and production of minerals is highly speculative and involves risks different from and in some instances greater than risks encountered by companies in other industries. Many exploration programs do not result in the discovery of mineralization and any mineralization discovered may not be of sufficient quantity or quality. Also, the mere discovery of promising mineralization may not warrant production, because the minerals (including methane gas) may be difficult or impossible to extract (produce) on a profitable basis.

Profitability of any mining and production we may conduct will involve a number of factors, including, but not limited to: The ability to obtain all required permits; costs of bringing the property into production; the construction of adequate production facilities; the availability and costs of financing; keeping ongoing costs of production at economic levels, and market prices for the metals or hydrocarbons to be produced staying above production costs. Our properties, or properties we might acquire in the future, may not contain deposits of minerals or coalbed methane gas that will be profitable to produce.

In addition, all forms of mineral (and oil and gas and coalbed methane) exploration and production require permits to have been issued by various federal and state agencies. See below.

DELAYS IN OBTAINING PERMITS FOR METHANE WELLS COULD IMPAIR OUR BUSINESS. Drilling and producing coalbed methane wells requires obtaining permits from various governmental agencies. The ease of obtaining the necessary permits depends on the type of mineral ownership and the state in which the property is

Edgar Filing: US ENERGY CORP - Form 424B3

located. Intermittent delays in the permitting process can reasonably be expected throughout the development of any property. We may shift our exploration and development strategy as needed to accommodate the permitting process. As with all governmental permit processes, permits may not be issued in a timely fashion or in a form consistent with our plan of operations.

9

THE COMPANY'S POISON PILL COULD DISCOURAGE SOME ADVANTAGEOUS TRANSACTIONS. We have adopted a shareholder rights plan, also known as a poison pill (see "Description of Securities"). The plan is designed to discourage a takeover of the company at an unfair low price. However, it is possible that the board of directors and the takeover acquiror would not agree on a higher price, in which case the takeover might be abandoned, even though the takeover price was at a significant premium to market prices. Therefore, as a result of the mere existence of the plan, shareholders would not receive the premium price.

COMPLIANCE WITH ENVIRONMENTAL REGULATIONS MAY BE COSTLY. Our business (mostly coalbed methane) is intensely regulated by government agencies. Permits are required to drill and pump methane wells, explore for minerals, operate mines, build and operate processing plants, and handle and store waste. The regulations under which permits are issued change from time to time to reflect changes in public policy or scientific understanding of issues. If the economics of a project would not justify the changes, we might have to abandon the project.

The company must comply with numerous environmental regulations on a continuous basis, to comply with the United States Clean Air Act, the Clean Water Act, the Resource Conservation and Recovery Act ("RCRA"), and the Comprehensive Environmental Response Compensation Liability Act ("CERCLA"). For example, water and dust discharged from mines and tailings from prior mining or milling operations must be monitored and contained and reports filed with federal, state and county regulatory authorities. Additional monitoring and reporting is required by the United States Nuclear Regulatory Commission for uranium mills even if not currently operating (like the company's uranium mill at Ticaboo, Utah). The Abandoned Mine Reclamation Act in Wyoming and similar laws in other states where we have properties impose reclamation obligations on abandoned mining properties, in addition to or in conjunction with federal statutes.

Failure to comply with these regulations could result in substantial fines and environmental remediation orders.

RISK FACTORS INVOLVING THIS OFFERING

FUTURE EQUITY TRANSACTIONS, INCLUDING EXERCISE OF OPTIONS OR WARRANTS, COULD RESULT IN DILUTION; AND REGISTRATION FOR PUBLIC RESALE OF THE COMMON STOCK IN THESE TRANSACTIONS MAY DEPRESS STOCK PRICES. From time to time, the company sells restricted stock and warrants, and convertible debt (or stock in subsidiary companies, convertible to stock in the company), to investors in private placements conducted by broker-dealers, or in negotiated transactions. Because the stock is restricted, the stock is often sold at a discount to market prices compared to a public stock offering, and the exercise price of the warrants sometimes (and/or the conversion price for stock in subsidiaries) is at or even lower than market prices. These transactions cause dilution to existing shareholders. Also, from time to time, options are issued to employees and third parties as incentives, with exercise prices equal to market. Exercise of in-the-money options and warrants will result in dilution to existing shareholders;

Edgar Filing: US ENERGY CORP - Form 424B3

the amount of dilution will depend on the spread between market and exercise price, and the number of shares involved. The company will continue to grant options to employees with exercise prices equal to market price at the grant date, and in the future may sell restricted stock and warrants (or stock in subsidiary companies convertible to stock in the company), all of which may result in dilution to existing shareholders.

Public resale (pursuant to registration statements) of such restricted stock, and of stock issued in conversion of debt or stock of subsidiary companies, may depress our price. For example, all of the stock covered by this prospectus was sold to private investors, or will be issued on conversion of debt or stock in subsidiary companies which was sold to private investors; these private investors are the selling shareholders under this prospectus.

10

TERMS OF SUBSEQUENT FINANCINGS MAY ADVERSELY IMPACT YOUR INVESTMENT. We may have to raise equity, debt or preferred stock financing in the future. Your rights and the value of your investment in the common stock could be reduced. For example, if we have to issue secured debt securities, the holders of the debt would have a claim to our assets that would be prior to the rights of stockholders until the debt is paid. Interest on these debt securities would increase costs and negatively impact operating results. Preferred stock could be issued in series from time to time with such designations, rights, preferences, and limitations as needed to raise capital. The terms of preferred stock could be more advantageous to those investors than to the holders of common stock. In addition, if we need to raise more equity capital from sale of common stock, institutional or other investors may negotiate terms at least and possibly more favorable than the terms of this offering. Shares of common stock which we sell could be sold into the market, which could adversely affect market price.

REPRESENTATIONS ABOUT THIS OFFERING

We have not authorized anyone to provide you with information different from that contained in this prospectus. This prospectus is not an offer to sell nor does it seek an offer to buy the shares in any jurisdiction where this offer or sale is not permitted. The information contained in this prospectus is accurate only as of the date of this prospectus (or any supplement), regardless of when it is delivered or when any shares are sold.

FORWARD LOOKING STATEMENTS

We make statements in this prospectus which are considered to be "forward looking" statements. All statements (other than statements of historical fact) about financial and business strategy and the performance objectives of management are forward-looking statements. These forward-looking statements are based on the beliefs of management, as well as assumptions made by and information currently available to them. These statements involve risks that are both known and unknown, including unexpected economic and market factors, failure to accurately forecast operating and capital expenditures and capital needs (due to rising costs and/or different drilling and production conditions in the field), changes in timing or conditions for getting regulatory approvals to drill coalbed methane wells where needed, and other business factors. The use of the words "anticipate," "believe," "estimate," "expect," "may," "will," "should," "continue," "intend" and similar words or phrases, are intended by us to identify forward-looking statements (also known as "cautionary statements" because you should be cautious in evaluating such statements in the context of all the information in this prospectus and the information incorporated by

Edgar Filing: US ENERGY CORP - Form 424B3

reference into this prospectus). These statements reflect our current views with respect to future events. They are subject to the realization in fact of assumptions, but what we now think will happen, may turn out much different, and our assumptions may prove to have been inaccurate or incomplete.

The investment risks discussed under "Risk Factors" specifically address all of the material risk factors that may influence future operating results and financial performance. Those investment risks are not "boiler plate" but are intended to tell you about the uncertainties and risks inherent in our business at the present time which you need to evaluate before making your investment decision.

USE OF PROCEEDS

We will not receive any of the proceeds from the sale of the shares by the selling shareholders pursuant to this prospectus, but we will receive up to \$4,966,400 in proceeds from the exercise of the options and warrants, if they exercise all the options and warrants, which will be used by the company for working capital.

11

DILUTION

At March 31, 2004, the net tangible book value ("NTBV") of the company was \$7,305,500, or \$0.53 per share. NTBV per share represents the amount of our total tangible assets less total liabilities, divided by the number of shares of common stock outstanding at May 24,, 2004 of 13,658,645. Dilution in pro forma net tangible book value per share represents the difference between the amount per share paid by purchasers of common stock in this offering and the pro forma NTBV per share of common stock immediately after completion of this offering on a pro forma as adjusted basis.

After giving effect to the selling shareholders' conversion of RMG preferred and common stock to shares of the company, conversion of company debt to shares of the company, and exercise of the warrants and options held by the selling shareholders, our pro forma NTBV as of March 31, 2004 would have been \$15,369,600, or \$0.88 per share, with 17,409,576 shares outstanding, representing an immediate increase in NTBV of \$0.35 per share of common stock to existing shareholders.

Assuming the selling shareholders sell their shares at an assumed market price of \$2.21, new investors in this offering would realize an immediate dilution in pro forma NTBV of \$1.33. The table illustrates this per share dilution:

Assumed offering price per share:	\$2.21
NTBV per share at March 31, 2004:	\$0.53
Increase in NTBV per share attributable to conversions and exercise of warrants and options	\$0.35

Pro forma NTBV per share as of December 31, 2003	\$0.88

Edgar Filing: US ENERGY CORP - Form 424B3

Dilution in pro forma NTBV
per share for new investors

\$1.33

The foregoing assumes no options held by officers, directors and employees of the company are exercised. At March 31, 2004, there were 2,873,646 shares of common stock issuable on exercise of such options at a weighted average exercise price of \$2.74 per share.

12

CAPITALIZATION

The capitalization of the company at March 31, 2004, and as adjusted for the selling shareholders' conversion of common and preferred stock of RMG, conversion of company debt, and exercise of warrants and options, is shown in the table.

	March 31, 2004 December 31, 2003		
	Actual	Pro Forma Adjustments (1)	Pro Forma As Adjusted
Cash and Cash Equivalents	\$ 4,196,900	\$ 4,966,400 (2)	\$ 9,163,300
Long-term Debt	\$ 5,246,400	\$ (397,700) (3)	\$ 4,848,700
Minority Interests	\$ 2,524,100	\$ (2,000,000) (4)	\$ 524,100
Shareholders' Equity			
Common stock, unlimited number authorized, 13,658,645 shares issued and outstanding (actual); 17,797,355 shares issued and outstanding (as adjusted)	\$ 136,500	\$ 37,500 (2) (3) (4)	\$ 174,000
Additional Paid-in Capital	\$ 55,545,400	\$ 8,182,400 (2) (3) (4)	\$ 63,727,800
Accumulated Deficit	\$ (44,848,000)	\$ (155,800) (3)	\$ (45,003,800)
Total shareholders' Equity	\$ 7,305,500	\$ 8,064,100	\$ 15,369,600

13

SELLING SHAREHOLDERS

This prospectus covers the offer and sale by the selling shareholders of up to 5,552,283 shares of common stock owned or to be owned on exercise of options and warrants by the selling shareholders, on conversion of RMG common and preferred stock, and conversion of debt. The footnotes to the table below give information about shares issuable on exercise of the options and warrants by the selling shareholders.

None of the selling shareholders are affiliates of the company or any subsidiary of the company.

The shares covered by this prospectus, and the transactions in which the selling shareholders acquired their shares (or options or warrants), are summarized below:

- o 279,033 shares are held by 16 accredited investors who purchased shares at \$3.00 per share (and warrants, see below) from the company during the period June 21, 2001 to October 18, 2001, in a private placement conducted by the company (see below).
- o 1,205 shares held by 3 persons associated with McKim & Company LLC ("McKim", a registered broker-dealer, formerly VentureRound Group LLC) who acquired the shares through the exercise of warrants at \$3.75 per share.

These and other shares acquired on exercise of warrants, and outstanding warrants held by persons either associated (licensed) with, or owners of equity interests in McKim (which transactions are described below) were acquired in financing or advisory service transactions in which McKim was involved. In each of these transactions, the services provided by McKim were provided by persons associated (licensed) with McKim. The warrants were issued in partial consideration for these services, but distributed to the owners of McKim (including the licensed brokers, who also own equity interests in McKim). Those persons who received warrants as owners of McKim, but who are not licensed as brokers, did not provide securities-transaction services and did not otherwise pay for the warrants.

- o 10,667 shares held by two persons who acquired the shares on exercise of warrants at \$3.75 per share.
- o 45,795 shares underlying warrants held by 24 persons associated with McKim, exercisable at \$3.75 per share. These warrants include (a) warrants (expiring October 18, 2006) for 38,966 shares issued to McKim for services as financial advisor to the company in connection with the private placement of securities to 18 accredited investors completed on October 18, 2001 (see above), plus (b) warrants (expiring November 2, 2006) for 9,829 shares held by persons associated (licensed) with McKim, for financial planning and strategic services provided to the company by McKim.
- o 523,297 shares of restricted common stock issued to seven investors in exchange for shares of RMG.
- o 222,874 shares are held by 14 accredited investors who purchased shares at \$3.25 per share (and warrants, see below) from the company during the period February 20, 2002 to March 26, 2002, in a private placement conducted by the company (see below). There were 16 investors in the private placement; two have sold their shares (but not exercised their warrants) prior to the date of this prospectus.

Edgar Filing: US ENERGY CORP - Form 424B3

- o 56,383 shares are issuable on exercise of warrants held by the 16 investors, at an exercise price of \$4.00 per share, expiring in March 2005.

14

- o 27,813 shares under warrants held by 34 persons who own equity interests in McKim, exercisable at \$4.00 per share, expiring in March 2005.
- o 379 shares held by two persons who own equity interests in McKim, who acquired the shares on exercise of warrants at \$4.00 per share
- o 120,000 shares under warrants held by Bourne Capital, LLC, a private lender and shareholder of U.S. Energy Corp., exercisable at \$3.00 per share. These warrants originally were issued to Caydal, LLC. in connection with Caydal's May 2002 purchase of shares and warrants in the company . Caydal sold the shares and retained the warrants. On March 16, 2004, Caydal transferred all such warrants to Bourne Capital, LLC; Bourne and Caydal have the same beneficial owners.
- o 29,559 shares under warrants held by 27 persons who own equity interests in McKim, exercisable at \$3.00 per share, expiring March 18 and 25, 2005.
- o 441 shares held by two persons who own equity interests in McKim, who acquired the shares on exercise of warrants at \$3.00 per share.
- o 3,000 shares held by one person who owns an equity interest in McKim, who acquired the shares on exercise of warrants at \$3.75 per share.
- o 52,110 shares held by 10 persons who had been associated (licensed) with a broker-dealer which raised funds for Yellowstone Fuels Corp., a subsidiary of the company, under a private placement of YSFC common stock in 1997. The shares were acquired through the exercise of warrants at \$3.64 per share. The YSFC warrants were exchanged for warrants of the company in 1999. The unexercised warrants have expired.
- o 60,000 shares under warrants held by Tsunami Partners, L.P., exercisable at \$3.00 per share. These warrants expire November 19, 2005.
- o 14,799 shares under warrants held by 30 persons who own equity interests in McKim, exercisable at \$3.00 per share. These warrants expire November 19, 2005.
- o 201 shares held by two persons who own equity interests in McKim, who acquired the shares on exercise of warrants at \$3.00 per share.
- o 10,000 shares held by a trusts issued in settlement of a lawsuit involving the company's subsidiary Sutter Gold Mining Company.
- o 18,000 shares under options held by Robert Nicholas, which were issued as partial payment for legal services, exercisable at \$3.00 per share. These options expire August 9, 2004.
- o 9,805 shares held by two persons, which shares were issued as partial payment for legal services.
- o 1,913 shares were issued to Dale May and his wife Jeanne May in March 2002, in exchange for 2,500 RMG shares which were issued to Mr. May in January

Edgar Filing: US ENERGY CORP - Form 424B3

2002 as a finder's fee for his introduction to RMG of several investors. Mr. May has represented to the company that he is not a securities 'dealer' as that term is defined in the Securities Act of 1933.

- o 50,000 shares, and warrants to purchase an additional 50,000 shares (exercisable at \$5.00 per share, expiring June 30, 2006), were issued to Sanders Morris Harris Inc. ("SMH"), a financial advisory

15

firm, in partial payment of SMH's services provided to RMG in connection with RMG's transfer of certain coalbed methane properties to Pinnacle Gas Resources, Inc.

- o 15,000 held by Riches In Resources, Inc., a financial consulting firm. 7,920 shares were issued to for services to the company provided from November 15, 2002 through July 15, 2002 and another 7,080 shares were issued for services during the remaining term of the agreement (through May 15, 2004) with this consultant. This consulting agreement was entered into on May 30, 2003.
- o 12,000 shares were issued to C.C.R.I. Corporation, a financial consulting firm, under an agreement entered into May 30, 2003, for services to the company provided through September 2003. Pursuant to the same agreement, the company issued to C.C.R.I. warrants to purchase 75,000 shares, 25,000 exercisable at \$3.75 per share, 25,000 shares exercisable at \$4.50 per share and 25,000 shares exercisable at \$5.50 per share; and issued 12,000 shares and a warrant to purchase 12,500 shares, exercisable at \$3.75 per share to C & H Capital, Inc., which is owned by Jason Wayne Assad, who is associated with C.C.R.I. All of these warrants expire March 16, 2006.
- o 59,000 shares were issued to Burg Simpson Eldredge Hersh Jardine PC, a law firm representing the company in litigation, in partial payment of legal services provided to the company. 25,000 of these shares were issued in May and July 2002, and 34,000 shares were issued in July 2003.
- o 10,000 shares were issued to Tim and Betty Crotty in June of 2003 as settlement of a lease obligation relating to a property owned by the company's subsidiary, Sutter Gold Mining Company.
- o 12,500 shares were issued to Robert Hockert and 25,000 shares to Mathew B. Murphy in May of 2002 as partial payment of producing coalbed methane properties.
- o 24,260 shares were issued to James and Vida Roebling as payment for a coalbed methane lease. These shares were issued in December of 2001 and January 2002.
- o In 2002, the company borrowed \$500,000 from Tsunami Partners L.P., with rights to convert principal, but not interest, to shares of the company at a conversion rate of 1 share for each \$3.00 of principal. On October 28, 2003, the company and Tsunami amended the loan to (i) reduce the interest rate, starting September 1, 2003, from the original 8% annual rate, to be equal to the Federal Short Term Rate for annual compounding (the "Federal Short Term Rate" as defined in section 1274(d) of the Internal Revenue Code), as that rate changes from time to time; (ii) allow conversion of interest, as well as principal, to shares; (iii) not require quarterly payment of interest with cash, but add accruing interest to principal; (iv)

Edgar Filing: US ENERGY CORP - Form 424B3

extend the maturity date for the loan to December 31, 2004; (v) reduce the conversion rate for principal to (and establish the conversion rate for interest at) 1 share for each \$2.25 of principal and interest; and (vi) provide for mandatory conversion of principal and accrued interest outstanding at maturity to shares at the same conversion rate of 1 share for \$2.25 of principal and interest. Optional conversion of principal and accrued interest prior to maturity is permitted. Also, in connection with the restructuring of debt, the expiration date of the warrants issued to Tsunami was extended 12 months (from the original May 30, 2005 to the new date of May 30, 2006).

Resale of 245,991 shares issuable on Tsunami's future conversion of principal and interest is covered by this prospectus.

- o In June and July 2003, Caydal, LLC and five individuals invested \$750,000 in RMG for 333,333 shares of RMG stock (at \$2.25 per share); warrants on 62,500 RMG shares at \$3.00 per share, exercisable until June 3, 2006; and warrants on 46,875 shares of the company at \$4.00 per share, exercisable until June 3, 2006. Under the terms of the original transaction, each share of RMG stock

16

was convertible into that number of shares of the company obtained by dividing (i) \$2.25 (subject to anti-dilution adjustments) by (ii) 85% of the then-current market price of the company's shares, provided that (a) the conversion price cannot exceed \$5.00, and (b) the exchange rights expire 20 business days after the company's stock price exceeds \$7.50 for 20 consecutive trading days.

On October 28, 2003, Caydal and one individual (James McCaughey) accepted the company's and RMG's offer, made to all of the 2003 investors in RMG, to restructure the transaction by (i) refunding 50% of the investment (Caydal was refunded \$250,000 and Mr. McCaughey was refunded \$50,000), and reducing the conversion rate for their remaining total of 133,333 RMG shares down to 77.5%. The other four individuals elected to remain fully invested, for which election the company and RMG reduced the conversion rate for their remaining total of 66,666 RMG shares down to 70%.

Caydal has converted the RMG shares (at the adjusted 77.5% conversion rate) owned after Caydal accepted RMG's offer in October 2003, and has sold the conversion shares. Caydal's warrants on 31,250 shares of the company's stock now are owned by Bourne Capital, LLC.

This prospectus covers the resale of 277,838 shares of the company on conversion of RMG shares, using an assumed conversion price of \$1.00 per share. The actual number of shares issued will depend on market price at conversion dates. The RMG shares issuable on exercise of the RMG warrants are not entitled to conversion into USE shares.

This prospectus covers the resale of the 46,875 shares underlying warrants, of which 6,250 have been exercised.

- o In partial compensation for services provided by McKim to RMG and USE in connection with the June and July, 2003 investments in RMG, USE issued to McKim warrants to purchase 19,500 shares of USE common stock, exercisable at \$4.00 per share. The warrants expire June 6, 2006. Warrants to purchase an additional 3,000 shares, on the same terms, were issued to John Schlie,

Edgar Filing: US ENERGY CORP - Form 424B3

an employee of McKim.

- o Warrants to purchase 10,000 shares were issued to Frederick P. Lutz in partial compensation for consulting services he provided to the company from August 1, 2002 to January 1, 2003. The warrants are exercisable at \$2.00 per share, and expire August 1, 2005.
- o Two options to purchase a total of 80,000 shares were issued to two individuals (Murray Roark and Robert Craig, 40,000 shares each), exercisable at \$4.30 per share and expiring July 31, 2006. These options were issued to compensate Mr. Roark and Mr. Craig as finders for their introducing RMG to Carrizo Oil & Gas, Inc. in early July 2001. Mr. Roark and Mr. Craig are licensed securities brokers. Since July 2001, RMG has had an agreement with a subsidiary of Carrizo for the acquisition and exploration of coalbed methane properties in Wyoming and Montana.
- o Options to purchase 10,000 shares were issued to Karl Eppich on December 12, 2003, exercisable at \$2.90 per share and expiring December 11, 2004.
- o 200,000 restricted shares held by seven persons who were issued shares of the company as partial payment to Hi - Pro Production, LLC of the purchase price for RMG I's purchase of coalbed methane properties from Hi - Pro. See "Acquisition of Producing and Non-Producing Properties from Hi - Pro Production, LLC" above. These persons are members of Hi - Pro Production, LLC.
- o 166,667 shares issued to seven persons as payment in lieu of cash on the company's \$500,000 promissory note, issued as partial payment to Hi - Pro Production, LLC of the purchase price for

17

RMG I's purchase of coalbed methane properties from Hi - Pro. See "Acquisition of Producing and Non-Producing Properties from Hi - Pro Production, LLC" above. These persons are members of Hi - Pro Production, LLC. The shares had secured the note.

- o 312,221 shares issued on conversion of 233,333 restricted shares of RMG common stock, which RMG shares were issued to seven persons in partial payment of the purchase price for RMG I's purchase of coalbed methane properties from Hi - Pro. See "Acquisition of Producing and Non-Producing Properties from Hi - Pro Production, LLC" above. These persons are members of Hi - Pro Production, LLC. The RMG shares were converted as of May 27, 2004, at the election of the holders, into restricted shares of common stock of the company. The number of shares issued on conversion equaled (A) the number of RMG shares to be converted, multiplied by \$3.00 per share, divided by (B) the average closing sale price of the shares of the company as reported on Nasdaq for the 10 trading days prior to notice of conversion (\$2.24). Resale of the conversion shares is covered by this prospectus.
- o 1,442,192 shares of stock issuable on conversion of (and payment of dividends on) 600,000 shares of Series A preferred stock of RMG, purchased by three institutional investors (Crestview Capital Master, L.L.C.; Spring Street Partners, L.P.; and Lion Fund, L.P.) for \$1,800,000 (\$3.00 per Series A share) as of February 26, 2004. These investors also acquired warrants in the transaction (see below).

The Series A stock bears an annual dividend of 10%, and is convertible to

Edgar Filing: US ENERGY CORP - Form 424B3

common stock of the company at 90% of the company's volume weighted average pricing (VWAP) on Nasdaq for the five trading days before conversion (but the conversion price cannot be less than \$1.50 per share of the company's stock). Dividends are payable in cash or shares of the company's stock (at RMG's election) on each dividend payment date (March 1, beginning in 2005), with USE stock calculated in the same manner. Series A stock not converted on the second anniversary of investment will be converted into shares of RMG common stock.

Resale of the 1,442,192 shares issuable for conversion of (and dividends on) the Series A preferred stock is based on an assumed conversion price of \$1.50. The number of shares issued will depend on market prices.

- o 150,000 shares under warrants (held by the three institutional investors), exercisable (vesting) 25% per quarter (fully exercisable after one year, then expiring in February 2007), at a price equal to 90% of VWAP for the five trading days before exercise (but not less than \$1.50 per share). If the stock price determined under the 90% of VWAP formula exceeds \$6.00 for 15 consecutive trading days, the warrants will expire 10 on the tenth trading day after the company sends a call notice to the investors.
- o 75,000 shares under options held by consultant Michael Baybak at \$2.25 per share. The options were issued for services to be performed, on February 8, 1999, and expire August 9, 2004.
- o 350,000 shares (comprised of 100,000 shares; 50,000 shares underlying Class A warrants, exercisable at \$3.00 per share; and 200,000 shares underlying five year Class B warrants, exercisable at \$3.00 per share (the Class A warrants expire March 2, 2007; the Class B warrants expire March 2, 2009)). If the closing Nasdaq price for the company's stock is at or more than \$7.50 for any 10 consecutive trading days, the warrants shall expire on the 30th calendar day after such 10th trading day. The shares and warrants were purchased by Bourne Capital, LLC on March 2, 2007 for \$350,000 (\$300,000 for the shares and the Class A warrants, and \$50,000 for the Class B warrants).
- o 318,465 shares under warrants issued to the participating lenders (Drawbridge Special Opportunities Fund, L.P., and Highbridge/Zwirn Special Opportunities Fund, L.P.) in the mezzanine financing - see

18

"Acquisition of Producing and Non-Producing Properties from Hi - Pro Production, LLC"). The warrants are exercisable for three years (subject to vesting) at \$3.30 per share. Warrants on 63,693 shares are vested at prospectus date. The remaining warrants will vest at the rate of the right to buy one share for each \$78.50 which RMG I subsequently borrows under the credit facility. Regardless of when vested, all warrants will expire on the earlier of January 30, 2007, or the 180th day after the company notifies the warrant holders that the company's stock price has achieved or exceeded \$6.60 per share for a consecutive 15 business day period.

The selling shareholders may offer their shares for sale on a continuous basis pursuant to rule 415 under the 1933 Act.

The following information has been provided to us by the selling shareholders. All numbers of shares, and percentage ownership, are stated on a pro forma basis as of the date of this prospectus, assuming issuance of

Edgar Filing: US ENERGY CORP - Form 424B3

4,182,357 shares upon exercise of all the selling shareholders' options and warrants, and conversion of all preferred and common stock of RMG, and company debt, held by the selling shareholders. Not included in the pro forma calculations are the additional shares issuable on exercise of other options and warrants held by persons who are not selling shareholders.

The shares owned or to be owned by the selling shareholders are registered under rule 415 of the general rules and regulations of the Securities and Exchange Commission, concerning delayed and continuous offers and sales of securities. In regard to the offer and sale of such shares, we have made certain undertakings in Part II of the registration statement of which this prospectus is part, by which, in general, we have committed to keep this prospectus current during any period in which the selling shareholders make offers to sell the covered securities pursuant to rule 415.

PLAN OF DISTRIBUTION

The selling stockholders and any of their pledgees, assignees and successors-in-interest may, from time to time, sell any or all of their shares of common stock on any stock exchange, market or trading facility on which the shares are traded or in private transactions. These sales may be at fixed or negotiated prices. The selling stockholders may use any one or more of the following methods when selling shares:

- o ordinary brokerage transactions and transactions in which the broker-dealer solicits purchasers;
- o block trades in which the broker-dealer will attempt to sell the shares as agent but may position and resell a portion of the block as principal to facilitate the transaction;
- o purchases by a broker-dealer as principal and resale by the broker-dealer for its account;
- o an exchange distribution in accordance with the rules of the applicable exchange;
- o privately negotiated transactions;

Edgar Filing: US ENERGY CORP - Form 424B3

- o settlement of short sales entered into after the date of this prospectus (a short sale occurs when shares, not owned by the seller, are sold in hopes of a decline in market price so the seller can purchase in the market at a lower price to be able to deliver the shares sold);
- o broker-dealers may agree with the selling stockholders to sell a specified number of such shares at a stipulated price per share;
- o through the writing or settlement of options or other hedging transactions, whether through an options exchange or otherwise;

30

- o a combination of any such methods of sale; or
- o any other method permitted pursuant to applicable law.

The selling stockholders may also sell shares under rule 144 under the 1933 Act, if available, rather than under this prospectus. Broker-dealers engaged by the selling stockholders may arrange for other brokers-dealers to participate in sales. Broker-dealers may receive commissions or discounts from the selling stockholders (or, if any broker-dealer acts as agent for the purchaser of shares, from the purchaser) in amounts to be negotiated. The selling stockholders do not expect these commissions and discounts to exceed what is customary in the types of transactions involved. Broker-dealers may agree to sell a specified number of such shares at a stipulated price per share, and, to the extent such broker-dealer is unable to do so acting as agent for us or a selling shareholder, to purchase as principal any unsold shares at the price required to fulfill the broker-dealer commitment. Broker-dealers who acquire shares as principal may thereafter resell such shares from time to time in transactions, which may involve block transactions and sales to and through other broker-dealers, including transactions of the nature described above, in the over-the-counter markets or otherwise at prices and on terms then prevailing at the time of sale, at prices then related to the then-current market price or in negotiated transactions. In connection with such resales, broker-dealers may pay to or receive from the purchasers such share commissions as described above.

In connection with the sale of our common stock or interests therein, the selling stockholders may enter into hedging transactions with broker-dealers or other financial institutions, which may in turn engage in short sales of the common stock in the course of hedging the positions they assume. The selling stockholders may also sell shares of our common stock short and deliver these securities to close out their short positions, or loan or pledge the common stock to broker-dealers that in turn may sell these securities. The selling stockholders may also enter into option or other transactions with broker-dealers or other financial institutions or the creation of one or more derivative securities which require the delivery to such broker-dealer or other financial institution of shares offered by this prospectus, which shares such broker-dealer or other financial institution may resell pursuant to this prospectus (as supplemented or amended to reflect such transaction).

The selling stockholders also may transfer the shares of common stock in other circumstances, in which case the transferees, pledgees or other successors in interest will be the selling beneficial owners for purposes of this prospectus.

Edgar Filing: US ENERGY CORP - Form 424B3

The selling stockholders and any broker-dealers or agents that are involved in selling the shares may be deemed to be "underwriters" within the meaning of the 1933 Act in connection with such sales. In such event, any commissions received by such broker-dealers or agents and any profit on the resale of the shares purchased by them may be deemed to be underwriting commissions or discounts under the 1933 Act. The selling stockholders have informed the company that none of them have any agreement or understanding, directly or indirectly, with any person to distribute the common stock.

The company is required to pay all fees and expenses incurred by the company incident to the registration of the shares. The company has agreed to indemnify certain of the selling stockholders against certain losses, claims, damages and liabilities, including liabilities under the 1933 Act.

In order to comply with the securities laws of certain states, if applicable, the shares will be sold in such jurisdictions, if required, only through registered or licensed brokers or dealers. In addition, in certain states the shares may not be sold unless the shares have been registered or qualified for sale in such state or an exemption from registration or qualification is available.

31

BUSINESS AND PROPERTIES OF THE COMPANY

COALBED METHANE

GENERAL

Rocky Mountain Gas, Inc. ("RMG") was incorporated in Wyoming on November 1, 1999 for business in the coalbed methane industry in Wyoming and Montana. RMG is a subsidiary of the company (owned 49.4% by the company and 39.1% by Crested as of the date of this prospectus).

In 2003, RMG transferred all of its interest in certain coalbed methane properties, including a producing property, to Pinnacle. At the same time, Carrizo Oil & Gas, Inc.'s wholly owned subsidiary CCBM, Inc. ("CCBM") (with which RMG has an agreement to jointly acquire and explore properties) transferred to Pinnacle all of its interests in the same properties, and affiliates of Credit Suisse First Boston contributed equity financing to Pinnacle. See "Transaction with Pinnacle Gas Resources, Inc."

On January 30, 2004, RMG (through its wholly-owned, newly organized subsidiary RMG I LLC ("RMG I") acquired coalbed methane properties in the Powder River Basin of Wyoming. See "Acquisition of Producing and Non-Producing Properties from Hi-Pro Production, LLC." Part of the purchase price was financed under a \$25 million mezzanine credit facility.

RMG I plans to drill five development wells on the Hi-Pro properties in 2004 and upgrade existing infrastructure to improve gas production, and, subject to raising equity funding, drill up to 120 exploratory wells on undeveloped Hi-Pro acreage in 2004 and 2005.

In addition, RMG plans to drill exploratory wells on the Castle Rock and Oyster Ridge properties, and seek to acquire other producing coalbed methane properties, primarily in Wyoming. Financing may be available under the mezzanine credit facility for more acquisitions, if approved by the lenders. RMG does not

Edgar Filing: US ENERGY CORP - Form 424B3

have any agreements to acquire other producing properties.

RMG raised \$1.8 million of equity financing in the first quarter of 2004.

RMG holds leases and options on approximately 261,180 gross mineral acres of federal, state and private (fee) land in the Powder River Basin ("PRB") of Wyoming and Montana and adjacent to the Green River Basin of Wyoming, not including acreage held by Pinnacle.

There are 108 producing wells on the properties bought by RMG from Hi-Pro Production, LLC. RMG owns an average 58% working interest (46.4% average net revenue interest, before deduction of overriding royalty interests held by lenders) in these properties.

From RMG's inception, through December 31, 2003, 72 exploratory wells have been drilled, almost all with funds provided by industry partner CCBM and former industry partner SENGAI (see below). 43 of the wells were on properties transferred to Pinnacle in mid-2003. The balance of 29 wells (15 of which have been plugged and abandoned) are on properties held by RMG. Reserves have not been established for any of the properties on which these wells were drilled.

The Castle Rock property in southeast Montana, and the Oyster Ridge property adjacent to the Green River Basin (southwest Wyoming), are large properties which will require the drilling of numerous exploratory wells and extended dewatering for each group or "pod" of wells (possibly as much as 24 months after drilling and completion) before an assessment of reserves can be made.

32

Among the uncertainties we face in determining if our coalbed methane investments will yield value are the following: Prices for gas sold in the Powder River Basin are typically lower than national prices, and therefore, the economics of Powder River Basin properties can be adversely affected more readily by lower gas prices. The Hi-Pro properties, and all revenues therefrom, are pledged to service \$3,635,000 of debt. To continue exploration efforts, additional capital (in addition to RMG's one-half of remaining balance under the CCBM \$5.0 million drilling commitment, which one half of remaining balance was \$305,100 at December 31, 2003) will be needed. Permitting issues for new wells on undeveloped acreage may be delayed. An unfavorable confluence of these uncertainties could result in a write-down of the carrying value of those properties which don't produce enough gas at low prices to be economic; in a write-down of the carrying value of other properties which need more wells drilled and dewatered to establish or improve the economics of production; and/or the delay (whether from lack of capital or permitting problems) in establishing reserves for the larger prospects where many wells will have to be drilled to assess their value.

Certain technical terms used in the oil and gas industry appear in this prospectus. The following are general definitions of those terms: Working interests percentages of a mineral lease total 100%; the working interest owners together (an aggregate of 100%) pay all of the costs to hold undeveloped leases, drill and complete wells on leases, and produce minerals from the leased property (including pump costs, gathering and transmission costs and marketing costs). Net revenue interests are the percentages of production which the working interest owners own, after deduction for payment of royalties to the owners of the minerals under lease (private parties, the Bureau of Land Management, or the State, as applicable). Owners of royalty interests pay none

Edgar Filing: US ENERGY CORP - Form 424B3

of the costs to drill, complete, or operate wells on a lease. An overriding royalty interest is carved out of the total net revenue interest; overriding royalty interest holders pay none of the costs to hold, drill, or produce the minerals. All owners pay their share of ad valorem and severance taxes.

TRANSACTION WITH PINNACLE GAS RESOURCES, INC.

On June 23, 2003, RMG, CCBM and its parent company Carrizo Oil & Gas, Inc.; and seven affiliates of Credit Suisse First Boston Private Equity (the "CSFB Parties") signed and closed agreements for a transaction with Pinnacle. The transaction included: (1) the contribution to Pinnacle by RMG and CCBM of all of their ownership of a portion of the CBM properties owned by RMG and CCBM, in exchange for common stock and options to buy common stock in Pinnacle; and (2) \$17,640,000 cash to Pinnacle by the CSFB Parties for common stock and series A preferred stock of Pinnacle, and warrants to purchase series A preferred stock of Pinnacle.

Pinnacle is a private corporation. Only such information about Pinnacle, as its board of directors elects to release, is available to the public. All other information about Pinnacle is subject to confidentiality agreements between Pinnacle, RMG, and the other parties to the June 2003 transaction.

RMG's ownership in Pinnacle's common stock is 37.5%. RMG's ownership of Pinnacle on a fully-diluted basis will change if the CSFB Parties exercise their warrants to buy equity in Pinnacle, and/or if RMG and/or CCBM exercise their options to buy equity in Pinnacle, or other events occur. See the discussion under Pinnacle Equity Transaction below.

Immediately following, and in connection with, the transaction, Pinnacle acquired additional producing and non-producing CBM properties located in the Powder River Basin of Wyoming from Gastar Exploration, Ltd. ("Gastar," listed on the Toronto Stock Exchange), referred to below as the "Gastar acquisition."

33

The transaction and the follow-on Gastar acquisition provide (1) Pinnacle the funded opportunity to explore and develop the contributed and acquired assets, and to acquire and explore, and if warranted, develop, additional CBM properties in Wyoming and Montana; and (2) RMG (through its ownership interest in Pinnacle) the opportunity to benefit (on a passive basis) from the continued development of the contributed assets and other properties which Pinnacle may acquire in the future. Since June 2003, Pinnacle has acquired additional acreage, and drilled numerous exploratory and development wells.

RMG now has interests in approximately 261,180 gross (126,920 net) mineral acres: (A) 171,500 gross (68,675 net) acres in the Castle Rock, Oyster Ridge, and Baggs properties, which were not contributed to Pinnacle (these properties are operated by RMG and held with its industry partner CCBM, Inc.); and (B) 51,500 gross (46,790 net) mineral acres acquired from Hi-Pro Production, LLC, and (C) 38,184 gross and net acres held by another company, which are at the north and south ends of the Anadarko acreage. The acreage total does not reflect properties held by Pinnacle.

CCBM is a wholly-owned subsidiary of Carrizo Oil & Gas, Inc. ("Carrizo," a Nasdaq listed company). Carrizo, CCBM and RMG entered into an agreement in July 2001 for CCBM to buy a 50% interest in, and fund exploration and development of, RMG's CBM properties then owned. Prior to and in connection with the Pinnacle

Edgar Filing: US ENERGY CORP - Form 424B3

transaction, CCBM paid RMG approximately \$1.8 million cash to complete its purchase of 50% of RMG's contributed CBM properties, thus enabling CCBM to contribute its interests in the CBM properties to Pinnacle as having been fully paid for. See "Continuing Operations of RMG, Continuing Agreement with CCBM, and the AMI Agreement, After the Pinnacle Transaction" below.

- PINNACLE EQUITY TRANSACTION

Pinnacle is authorized to issue common stock (100 million shares, \$0.01 par value) and preferred stock (100 million shares, \$0.01 par value). Pinnacle has established series A preferred stock with the following provisions: Liquidation preference of \$100.00 per share; 10.5% compounded cumulative annual dividend (12.5% after July 1, 2010); redeemable at Pinnacle's option after July 1, 2004 at a premium declining to par after July 1, 2009 (mandatory redemption if there is a change in control of RMG or CCBM); and with voting rights (a) pari passu with the common stock on regular matters, and (b) as a separate class, to authorize changes in the series A preferred stock, to authorize issuance of stock senior to or in parity with the series A preferred stock, to approve any reorganization or merger of Pinnacle, to approve Pinnacle's sale of substantially all its assets, and similar matters.

Pinnacle's board of directors has eight directors (two each from RMG and CCBM, and four from the CSFB Parties).

The chart below summarizes (a) the contributions made by the parties to the transaction at the closing, and (b) thereafter in 2004 (subsequent capital call funded by the CSFB parties - see footnote (3)). At April 26, 2004, RMG owns 37.5% of the common stock of Pinnacle.

34

Parties	Contribution	Equity in Pinnacle		Equity Warrants(1)	Rights O
		Common Stock	Series A Preferred Stock		
RMG	All CBM properties (except Castle Rock, Baggs and Oyster Ridge)	75,000 shares	-0-	-0-	30,00
CCBM	All CBM properties (except Castle Rock, Baggs and Oyster Ridge)	75,000 shares	-0-	-0-	30,00
CSFB Parties	\$29,400,000 (3)	50,000 shares	250,000 shares	250,000	

Edgar Filing: US ENERGY CORP - Form 424B3

As of December 31, 2003, RMG has recorded its 37.5% equity investment in Pinnacle at the carrying value of its coalbed methane properties of approximately \$922,600.

Sanders Morris Harris Inc. ("SMH") of Houston, Texas acted as financial advisor to RMG on the Pinnacle transaction. For its services in connection with the transaction and the Gastar acquisition, SMH was paid \$650,000 by Pinnacle. As additional compensation for SMH's services, USE issued to SMH 50,000 restricted shares of common stock and warrants to purchase (until June 30, 2006) another 50,000 restricted shares of common stock (at \$5.00 per share). Resale of these shares and warrant shares is covered by this prospectus (See "Selling Shareholders"). SMH did not receive any equity or equity rights in Pinnacle in connection with the transaction or the Gastar acquisition.

- GASTAR ACQUISITION

With proceeds from the CSFB financing, Pinnacle paid Gastar \$6.2 million, effective June 1, 2003, for approximately 50% of Gastar's working interest in existing producing and non-producing CBM properties which included 95 producing wells in the early stages of dewatering and approximately 36,529 gross developed and undeveloped acres. The majority of the leases are either part of or located adjacent to the producing Bobcat property, which RMG and CCBM contributed to Pinnacle.

Pinnacle also agreed to fund up to \$14.5 million of future drilling and development costs on behalf of Gastar and Pinnacle prior to December 31, 2005, on the properties purchased from Gastar.

35

- CONTINUING OPERATIONS OF RMG, CONTINUING AGREEMENT WITH CCBM, AND THE AMI AGREEMENT AFTER THE PINNACLE TRANSACTION

RMG retained ownership, with CCBM, of the Castle Rock, Oyster Ridge, and Baggs projects, totaling about 189,000 gross acres (currently about 171,500 gross acres net of 15,200 gross acres returned to Anadarko after the transaction date and expiration of three leases). RMG and CCBM plan to continue exploration and development activities on these properties as well as acquiring other properties in Wyoming and Montana, under their July 2001 agreement (see "Carrizo - Purchase and Sale Agreement"). Presently there are no agreements for RMG and CCBM to acquire producing properties.

CCBM paid RMG approximately \$1.8 million for CCBM's outstanding purchase obligation (under the July 2001 agreement) on CCBM's interests in those properties it contributed to Pinnacle. The balance on the note at December 31, 2003 was \$836,200. The balance of CCBM's original purchase obligation is payable in monthly installments of approximately \$52,800 through November 2004 with a balloon payment of \$282,400 due on December 31, 2004.

In connection with the transaction with Pinnacle, RMG and Pinnacle signed a transition services agreement, for Pinnacle to pay RMG to assist in setting up operational accounting systems for Pinnacle through December 2003. The agreement was terminated by RMG effective January 1, 2004.

Edgar Filing: US ENERGY CORP - Form 424B3

Also in connection with the transaction, RMG, CCBM, Carrizo, USE and the CSFB Parties signed an area of mutual interest ("AMI") agreement: Until June 23, 2008, Pinnacle has the right to acquire from the other parties up to 100% of any interest in oil and gas leases, or interests therein or mineral interests or rights to acquire same, which the other parties acquire, at the same price paid or payable by the other parties, within the Powder River Basin in Montana and Wyoming (excluding most of Powder River County, Montana). The original AMI agreement between CCBM and RMG from July 2001 is superseded by the new AMI agreement, except for areas outside the new AMI agreement territory, wherein the original agreement is still in effect.

With respect to the properties acquired from Hi-Pro (see below), CCBM and Pinnacle waived their rights to buy any of the producing or undeveloped acreage.

ACQUISITION OF PRODUCING AND NON-PRODUCING PROPERTIES FROM HI-PRO PRODUCTION, LLC

On January 30, 2004, RMG I, LLC ("RMG I"), a wholly-owned subsidiary of RMG, purchased coalbed methane properties from Hi-Pro for \$6,800,000. This transaction was closed after December 31, 2003. See the subsequent event footnote to the audited financial statements in this prospectus.

The purchased properties (all located in the Powder River Basin of Wyoming) include 247 completed wells and 40,120 undeveloped fee acres. As of the date of this prospectus, 108 wells now are producing approximately 4.7 million cubic feet (Mmcf) of gas per day (approximately 2.7 Mmcf per day net to RMG I). Net daily Mmcf sales are less than gross production, due to produced gas being consumed to run compressors, and from adjustments by purchasers for thermal content (gas is sold based on BTU heat content).

RMG I owns an average 58% working (average 46.4% net revenue) interest in the producing wells and proved developed acreage, and a 100% working (average 80% net revenue) interest in all of the undeveloped acreage. The net revenue interest percentage after deduction of the overriding royal interests held by lenders (see "Mezzanine Credit Facility") are 44.66% for the producing and five future wells to the Wyodak coal, and 78.0% for production from deeper coals and all of the undeveloped acreage.

36

The transaction was structured as an asset purchase, with RMG I as the purchaser, in connection with the establishment of a mezzanine credit facility for up to \$25,000,000 of secured loans to acquire and develop more proven coalbed methane reserves. RMG may utilize RMG I for future acquisitions (none are presently under contract or agreement in principle). See "Mezzanine Credit Facility." A substantial portion of the cash consideration paid to Hi-Pro was funded with the initial advance on the credit facility. RMG I replaced Hi-Pro as the contract operator for 89% of the wells that were acquired.

RMG negotiated the purchase based on the \$7,113,000 present value, discounted 10%, of gas reserves recoverable (and the estimated future net revenues to be derived) from proved reserves in the Hi-Pro properties, as estimated as of November 1, 2003 by Netherland Sewell and Associates, Inc. See "Reserve Data" below for the estimate as of December 31, 2003.

The \$6,800,000 purchase price reflects a deduction, negotiated by the

Edgar Filing: US ENERGY CORP - Form 424B3

parties in January 2004, to account for the decrease in gas production from October 2003 due to the impact on production from deferred maintenance on the properties, and the expected cost of such maintenance work after closing.

- TERMS OF THE PURCHASE. The purchase price of \$6,800,000 was paid:
 - o \$ 776,700 cash by RMG.
 - o \$ 588,300 net revenues from November 1, 2003 to December 31, 2003, which were retained by Hi-Pro.(1)
 - o \$ 500,000 by USE's 30 day promissory note (secured by 166,667 restricted shares of USE common stock, valued at \$3.00 per share).(2)
 - o \$ 600,000 by 200,000 restricted shares of USE common stock (valued at \$3.00 per share) (2).
 - o \$ 700,000 by 233,333 restricted shares of RMG common stock (valued at \$3.00 per share).(3)
 - o \$3,635,000 cash, loaned to RMG I under the credit facility agreement.(4)
- \$6,800,000

- (1) RMG paid all January operating costs at closing. Net revenues from the purchased properties for January 2003 were credited to RMG I's obligations under the credit facility agreement. These net revenues were considered by the parties to be a reduction in the purchase price which RMG otherwise would have paid at the January 30, 2004 closing.
- (2) The note subsequently was paid in full by delivery of the collateral shares. Resale of such shares, and the 200,000 shares issued in the transaction (all of which now are held by the owners of Hi - Pro in proportion to their ownership in Hi - Pro), is covered by this prospectus. See "Selling Shareholders."
- (3) These RMG shares were held by the owners of Hi - Pro in proportion to their ownership in Hi - Pro). The RMG shares were convertible at the election of the holders into restricted shares of common stock of USE. The number of USE shares issued (on May 27, 2004) equaled (A) the number of RMG shares to be converted, multiplied by \$3.00 per share, divided by (B) the average closing sale price of the shares of USE for the 10 trading days prior to notice of conversion (\$2.24). Resale of the conversion shares is covered by this prospectus. See "Selling Shareholders."
- (4) See "Mezzanine Credit Facility."

37

- PROPERTIES PURCHASED.

RESERVE DATA

Netherland Sewell and Associates, Inc. ("NSAI," Houston, Texas), independent petroleum engineers, have prepared a report on the proved reserves, as of December 31, 2003, estimating recoverable reserves from the Hi-Pro properties, and the present value (discounted 10%) of future cash flow therefrom. NSAI's report takes into account fixed pricing for some production in 2004 and 2005, reflects the reduction in RMG's net revenue interests due to the overriding royalty interests held by lenders, and (except for fixed pricing in

Edgar Filing: US ENERGY CORP - Form 424B3

2004 and 2005) is based on the Henry Hub Spot market price of \$5.965 per mmbtu, adjusted by lease for energy content, transportation fees and regional price differentials on December 31, 2003, without price escalation. Henry Hub Spot prices closely approximate the prices paid to Powder River Basin producers.

	RESERVES (Mmcf) -----	NET PRESENT VALUE (discounted at 10%) -----
Proved Developed Producing	2,206.490	\$4,589,600
Proved Developed Non-Producing	464.423	\$1,084,800
Proved Undeveloped	733.780	\$1,382,000
	-----	-----
Total	3,404.693 =====	\$7,056,400 =====

The present value, discounted 10% value ("PV10 value") was prepared after ad valorem and production taxes on a pre-income tax basis, and is not intended to represent the current market value of the estimated gas reserves purchased from Hi-Pro. The PV10 discount factor is not the same as the standardized measure of present value calculations which are determined on an after-income tax basis.

Reserves as of November 1, 2003 were calculated by NSAI based on actual production up to June 30, 2003, with production decline curves to November 1, 2003 estimated based on that production, resulting in total net proven reserves of 4,034.5 Mmcf. For estimates as of December 31, 2003, NSAI was supplied with actual production data through that date. Because actual production was below the production predicted for the same period by the November 1, 2003 decline curves, the decline curves for the later report had a lower starting point on January 1, 2004 and a steeper rate of decline. These new decline curves thus predict lower future production (3,404.693 Mmcf net to RMG) as of December 31, 2003.

We expect production in 2004 from producing wells, and hence proven reserves (after adjustments for actual gas produced), will increase as maintenance work now in progress (which had been deferred by Hi-Pro in the last two quarters of 2003) is completed in the second quarter 2004. The reduction in the present value, discounted 10%, of proven reserves at November 1, 2003 (\$7,113,000) as compared to December 31, 2003 (\$7,056,400) was less than 1%, notwithstanding the decreased volume of reserves, due to the higher price at the later date compared with prices used in the November 1, 2003 estimate (\$4.50 per mcf in 2003, \$4.29 in 2004, and \$4.25 in 2005).

There are numerous uncertainties inherent in estimating gas reserves and their estimated values. Reservoir engineering is a subjective process of estimating underground accumulations of gas that cannot be measured exactly. Estimates of economically recoverable gas, and the future net cash flows which may be realized from the reserves, necessarily depend on a number of variable factors and assumptions, such as historical production from the area compared with production from other areas, the assumed effects of regulations by government agencies, assumptions about future gas prices and operating costs, severance

38

and excise taxes, development costs, and work-over and remedial costs. The outcomes, in fact, may vary considerably from the assumptions.

Edgar Filing: US ENERGY CORP - Form 424B3

The PV10 value takes into account RMG I's contracts to sell 2,000 Mmbtu per day in 2004 at a fixed price of \$4.76 per Mmbtu, and 1,000 Mmbtu per day in 2005 at a fixed price of \$4.14 per Mmbtu. From time to time, RMG I may sign fixed price contracts for more production. In addition, gas market prices will vary, possibly by significant amounts, throughout each year, and on an average basis from year to year. For these reasons, the cash flow realized from production likely will vary from the estimates of cash flow used to determine the PV10 value.

Estimates of the economically recoverable quantities of gas attributable to any particular property, the classification of reserves as to proved developed and proved undeveloped based on risk of recovery, and estimates of the future net cash flows expected from the properties, as prepared by different engineers or by the same engineers but at different times, may vary substantially, and the estimates may be revised up or down as assumptions change.

In addition, it is likely that actual production volumes will vary from the estimates.

The PV10 discount factor, which is required by the SEC for use in calculating discounted future net cash flows for reporting purposes, is not necessarily the most appropriate discount factor, based on interest rates in effect in the financial markets, and risks associated with the gas business.

The business of exploring for, developing, or acquiring reserves is capital intensive. To the extent operating cash flow is reduced and external capital becomes unavailable or limited, RMG's ability to make the necessary capital investment to maintain or expand the gas reserves asset base would be impaired. There is no assurance future exploration, development, and acquisition activities will result in additional proved reserves. Even if revenues increase because of higher gas prices, increased exploration and development costs could neutralize cash flows from the increased revenues.

- FUTURE PLANS FOR THE HI-PRO PRODUCTION PROPERTIES

In the second quarter of 2004, RMG I plans to drill five proven undeveloped locations to the Wyodak coal, continue a remedial workover program on a number of existing wells, and upgrade the gas gathering and pipeline facilities included in the purchase. The workover program is estimated to cost \$250,000 and will be funded by the working interest partners. The drilling and gathering upgrade is estimated to cost approximately \$640,000, and is being funded with a loan from the mezzanine credit facility. The programs are designed to enhance production from current levels. After the 5 new wells to the Wyodak are drilled, there will be no more undrilled locations on the currently producing properties available for the Wyodak coal. The first coals of interest under the undeveloped acreage are the Anderson and Canyon coals (for example under the Reno property); the Wyodak coal is not present under the undeveloped acreage. In addition to the 5 new wells, RMG-I plans to hook up 2 additional wells that were previously drilled by Hi-Pro and are in close proximity to the 5 new wells.

The Wyodak coal formation is 200 to 600 feet from surface. Existing infrastructure for the Wyodak wells (gathering lines, compressors, and water disposal) should significantly reduce drilling and completion costs for new wells to the deeper Danner and Moyer coals (950 to 1,150 feet). Subject to raising capital, up to 120 wells could be drilled and completed to these deeper coals in 2004 and 2005, all on locations now producing from the Wyodak. This development activity is contingent upon obtaining future financing. We do not expect that funding for this activity will be available through the mezzanine credit facility.

No reserves have been established for the Dannar and Moyer coals. Because no other operators are producing gas from or dewatering these coals in the vicinity of the Hi-Pro properties, we expect several pods of wells will have to be drilled and completed to these coals, with an extended dewatering period (which could be up to 24 months), before significant gas production begins.

RMG is also developing plans to put five coalbed methane wells from the Reno property on production during 2004. The Reno property was part of the Hi-Pro acquisition. The target coals on the Reno property are the Anderson coal, which is about 600-650 feet in depth and approximately 40 feet in thickness and the Canyon coal which is about 700-850 feet in depth and 35 feet in thickness.

Four wells were previously drilled by Hi-Pro, at the Reno Property which were completed in both the Anderson and Canyon coals, with slotted screening in each. In addition, in March 2004, RMG I drilled a fifth well, which has been completed in the Canyon coal. The shallower Anderson coal may be completed at a later date. Four additional well locations exist at the Reno property based upon 80-acre spacing.

The Reno property consists of 760 gross and net acres, all on fee acreage. It is located in Campbell County, Wyoming, approximately 50 miles south of Gillette. RMG owns a 100% working interest in this property.

- MEZZANINE CREDIT FACILITY.

RMG I has signed a credit agreement with Petrobridge Investment Management, LLC (Houston, Texas) as lead arranger, and institutional lenders, for up to \$25,000,000 of loans to RMG I. The loan commitment is through June 30, 2006. All loans will have a three year term from funding date.

Funding to acquire and/or improve any project is subject to the lenders' approval of the transaction and RMG I's development plan.

The first loan (\$4,340,000 on January 29, 2004) under the credit facility has been applied to the Hi-Pro asset purchase (\$3,700,000) including transaction costs and professional fees; and for a Phase I development program (\$640,000).

Terms for all loans under the credit facility include the following:

- o Principal is not amortized, but interest must be paid monthly. All revenues from the properties owned by RMG I (including all current and new wells) is paid to a lock box account controlled by the lenders, from which is paid by the lenders, the lease operating costs, revenue distributions, RMG I operating fees and RMG pumping fees (all approved by the lenders). With the exception of operating and pumping fees, no revenues will be available for RMG operations until all loans are paid off.
- o The loans are secured by all of RMG I's properties and by RMG's equity interest in RMG I.
- o The lenders, in the aggregate, receive an overriding royalty interest of 3% of production from the wells producing when the acquisition was closed, and 2% of production from new wells on an 8/8ths working interest basis, proportionately reduced where less than 100% of the working interest is owned by RMG I. For the Hi-Pro properties, the 3%

Edgar Filing: US ENERGY CORP - Form 424B3

rate applies to all wells (producing and to be drilled) to the Wyodak formation (an aggregate override of 1.74%), and 2% to all wells to deeper formations (aggregate override to be determined based on working interest ownership by well). Override payments to the lenders are not applied to the loan balances. The percentage of overrides on future properties may vary.

40

- o Negative covenants: RMG I will not permit the ratio of (a) total debt to EBITDA to exceed 2.00 to 1.00; (b) EBITDA to interest expense and rents (lease expense) to be less than 3.00 to 1.00; c) current assets to current liabilities to be less than 1.00 to 1.00; or (d) PV 10 (proved developed producing reserves) to total debt to be less than 1.00 to 1.00. All these ratios are to be determined quarterly. In addition, RMG I shall not permit net sales volume of gas from its properties to be less than 270 Mmcf, 230 Mmcf, 230 Mmcf and 210 Mmcf for each quarter in 2004, or less than 180 Mmcf per quarter in 2005 and the first two quarters of 2006.

At closing of the Hi-Pro acquisition, USE issued to the participating lenders three year warrants to purchase a total of 318,465 shares of common stock of USE (subject to vesting) at \$3.30 cash per share. At closing of the Hi-Pro Acquisition, warrants on 63,693 shares vested. The remaining warrants will vest at the rate of the right to buy one USE share for each \$78.50 which RMG I subsequently borrows under the credit facility. Regardless of when vested, all warrants will expire on the earlier of January 30, 2007, or the 180th day after USE notifies the warrant holders that USE' stock price has achieved or exceeded \$6.60 per share for a consecutive 15 business day period. Resale of the warrant shares is covered by this prospectus.

The preceding is a summary of some of the terms of the credit agreement, and is qualified by the text of the agreement, filed with the registration statement of which this prospectus is a part.

- RMG EQUITY TRANSACTION

In the first quarter, RMG raised \$1,800,000 of equity financing from the sale of shares of Series A Preferred Stock in RMG, and warrants to purchase shares of common stock of USE, to institutional investors. Proceeds are being used for RMG working capital. The terms of the securities sold are:

- o 600,000 shares of Series A Preferred Stock at \$3.00 per share. The Series A Preferred Stock bears a 10% cumulative annual dividend (payable on March 1 of each year, beginning March 1, 2005), payable at RMG's election in cash or shares of common stock of RMG (at \$3.00 per share) or shares of common stock of USE (at 90% of USE' volume weighted average price for the five days, referred to as the "set price," provided that the set price cannot be less than \$1.50). The Series A Preferred Stock is convertible at the holder's election into shares of common stock of RMG, at \$3.00 per share, or shares of common stock of USE at the set price, until February 2006, at which time all Series A Preferred Stock shares not previously converted shall automatically be converted into shares of common stock of RMG. The Series A Preferred Stock carries a liquidation preference of \$4.05 per share.
- o Warrants to purchase 150,000 shares of common stock of USE, at the set price. The investors did not pay additional consideration for the

Edgar Filing: US ENERGY CORP - Form 424B3

warrants issued in connection with the purchase of the Series A Preferred Stock. The warrants are exercisable as to 25% of the underlying shares beginning in May 2004, and an additional 25% of the underlying shares on each of the six months, nine months, and twelve months thereafter, at which time the warrants are exercisable for the full number of underlying shares. Subject to this prospectus then being current, USE may call the warrants for exercise if USE's volume weighted average price (VWAP) for its stock exceeds \$6.00 for any consecutive 15 trading days; warrants not exercised by the tenth trading day after a call notice is sent will be canceled.

- o The number of shares of RMG or USE common stock issuable in payment of dividends on, or conversion of, the Series A Preferred Stock, and the number of shares of common stock of USE issuable on exercise of the warrants, are subject to adjustment in certain events to protect the holders from dilution. The first anti-dilutive provision is 'full ratchet': If RMG or USE issue

41

shares of common stock, or derivative securities exercisable for or convertible into such shares of common stock, at a price less than \$3.00 per share for RMG stock or the set price for USE stock, at any time until 30 days after the registration statement (of which this prospectus is a part) has been declared effective by the SEC to permit the resale to the public by the holders of the USE common stock issuable on payment of dividends, in conversion, and on exercise of warrants, then the issue price for the dividends and conversions, and the exercise price of the warrants (for RMG and USE common stock, as applicable) shall be reduced (ratcheted down) to equal the lower issue price.

- o The second anti-dilutive provision would take effect after that 30th day: The issue price would be adjusted up to a fully weighted adjusted price, and would continue to be adjusted for any other issuance by RMG or USE of stock or derivative securities at a price less than \$3.00 or the set price, as applicable, until the Series A Preferred Stock is converted to common stock or RMG or USE, or until the expiration of the warrants, as applicable. As an example of fully weighted anti-dilution protection, if RMG were to sell 3,200,000 shares of common stock at \$2.50 per share, the dividend and conversion price on the Series A Preferred Stock would be \$2.91.

The preceding is a summary of some of the terms of the Series A Preferred stock designation, and the USE warrants, and is qualified by the text of the documents filed with the registrations statement (of which this prospectus is a part).

Resale of the shares into which the Series A Preferred stock may be converted, and shares issuable on exercise of the warrants, is covered by this prospectus.

VOLUMES, PRICES AND GAS OPERATING EXPENSE - BOBCAT PROPERTY (TRANSFERRED TO PINNACLE GAS RESOURCES, INC. IN JUNE 2003)

This table shows RMG's 27.6% working (22% net revenue) sales volumes of gas produced, average sales prices received for gas sold, and average production costs for those sales, for the seven months ended December 31, 2002, and for the

Edgar Filing: US ENERGY CORP - Form 424B3

year ended December, 2003, all from the Bobcat property which was transferred to Pinnacle in June 2003.

	Year Ended December 31, 2003 -----	Seven Months Ended December 31, 2002 -----
Sales volumes (mcf)	81,516	64,314
Average sales price per mcf(1)	\$3.71	\$1.86
Average cost (per mcf) (2)	\$1.91	\$1.91

- (1) From time to time, we sold some of the production at a set price and the balance at daily market prices. For the six months ended June 30, 2003, we sold 37.0% of our share of production at contract prices and 63.0% at the market. There were no gas sales after June 30, 2003.
- (2) Includes direct lifting costs (labor, repairs and maintenance, materials and supplies, workover costs, insurance and property, gathering, compression, marketing and severance taxes).

42

ACQUISITION AND EXPLORATION CAPITAL EXPENDITURES - ALL PROPERTIES THROUGH DECEMBER 31, 2003

From inception on November 1, 1999 through December 31, 2003, RMG incurred net acquisition (purchase price and holding costs) and exploration costs (drilling and completion) on CBM properties of approximately \$1,353,900, which does not include approximately \$2,194,900 funded by CCBM on RMG's behalf for leasehold, drilling and completion costs. Unproved properties on the balance sheet at December 31, 2003 reflect the reduction (by \$5,143,000) to reflect the reduction of the full cost price as a result of principal payments made by CCBM under its agreement with RMG and by payments from other industry partners. The foregoing data does not include \$922,600 spent by RMG on properties transferred to Pinnacle. The \$922,600 was recorded at December 31, 2003 as an investment in Pinnacle.

The following table shows certain information regarding the gross costs incurred by RMG. Costs associated with the Hi-Pro acquisition after December 31, 2003 are not included.

	Year Ended December 31, ----- 2003	Seven Months Ended December 31, ----- 2002	Year Ended May 31, ----- 2002
Acquisition costs	\$ 107,100	\$ 936,200	\$ 192,600
Development	158,300	97,200	87,400
	----- \$ 265,400 =====	----- \$ 1,033,400 =====	----- \$ 280,000 =====

The acquisition costs included amounts paid for properties, delay rentals, lease option payments, and general and administrative costs directly attributable to the acquisitions.

The recorded amounts for acquisition and exploration of \$265,400,

Edgar Filing: US ENERGY CORP - Form 424B3

\$1,033,400, and \$280,000 represent 1.1%, 3.6%, and 1.0% of total assets at December 31, 2003, December 31, 2002, and May 31, 2002, respectively.

We use the full-cost method of accounting for gas properties. Under this method, all acquisition and exploration costs are capitalized in a "full-cost pool" as incurred. Depletion of the pool will be recorded using the unit-of-production method. To the extent capitalized costs in the full-cost pool (net of depreciation, depletion and amortization and related deferred taxes) exceed the present value (using a 10% discount rate) of estimated future net pre-tax cash flows from proved gas reserves as established by reserve reports, the excess costs will be charged to operations.

All acquisition and exploration costs for a property are capitalized until such time as reserves can be established, or not, for the property. If no reserves are established, those capitalized costs will be transferred to the amortization basis and be subject to an impairment test. To the extent reserves are established for an exploration property to be less than such costs, the costs will be written-down to the amount of present value of the reserves. In this event, assets would decrease and expenses would increase. Once incurred, a write-down of gas properties can't later be reversed.

In addition, if future exploration work (in particular the larger prospects) is delayed because of lack of capital or permitting delays, or both, with the result that it cannot be established whether or not proved reserves exist on the properties, the exploration costs for those properties would be written-off.

43

COALBED METHANE PROPERTIES

We hold leases and options to develop approximately 261,180 gross mineral acres (including 69,895 acres under options - see "Oyster Ridge" below) under leases from the United States Bureau of Land Management, the states of Wyoming and Montana, and private landowners. Table 1 shows the total gross and net lease acres held in each prospect, and the amount of such acreage held by RMG and by companies with which RMG has agreements (CCBM, Inc. and Quaneco, L.L.C.). These agreements are summarized under "Carrizo - Purchase and Sale Agreement" and "Quaneco - Agreement." Acreage data assumes CCBM completes its obligations; CCBM will own its 50% working interest in wells drilled under CCBM's drilling fund commitment, but if CCBM does not complete its purchase obligations, CCBM would be entitled to a reduced working interest in the remaining undrilled acreage.

CCBM currently has purchase rights to acquire a 6.25% working interest in the Castle Rock prospect, and owns a 6.25% working interest in eight wells in Castle Rock, which were drilled by Suncor Energy Natural Gas America, Inc. ("SENGAI"). RMG's and CCBM's interests in the Castle Rock prospect, as shown in Table 1, reflect the completion of SENGAI's drilling program in late calendar 2001. SENGAI elected not to exercise its option under an Option and Farmin Agreement on February 8, 2002.

Prospects are evaluated for coal potential using available public and industry data, taking into account proximity to other positions held by RMG and existing or planned gas transmission lines, and whether drilling and production permits can be obtained and the costs thereof. The final decision to acquire a prospect is made by the executive officers of RMG. Well drilling and testing is

Edgar Filing: US ENERGY CORP - Form 424B3

done by outside contract drilling companies. Drilling results (cores, gas and water flow rates, and other data) are evaluated by RMG staff, using customary technical methods, to determine if any coal zones encountered in the well should be completed for production. Completion requires setting casing pipe down to the coal zone(s), installing pumps, and installing and setting up the necessary surface equipment (for example, water disposal lines and water holding tanks and/or holding ponds for evaluation wells, pending production permitting), and dewatering the well sufficiently so production can start. The decision whether to complete the well is made by the executive officers of RMG.

Table 1 reflects RMG's, Quaneco's and CCBM's acreage position. Table 1 does not reflect the reduction in net acreage held by RMG in the Oyster Ridge property if Anadarko Petroleum, Inc. exercises its options to back-in for a 25% working interest on 31,711 gross acres, or if the holder of the 38,184 gross acres (which became subject to exploration and participation agreement as of March 1, 2004) exercises its option to back-in for a 40% working interest on those acres. Also, 69,895 of the acres shown as held in Oyster Ridge assume we continue to earn acreage under the drill-to-earn-acreage provisions of the option agreements with Anadarko, and the holder of the 38,184 acres now under the exploration and participation agreement. See "Description of Prospects - Oyster Ridge" below.

44

TABLE 1

Project and Date Acquired	Gross Lease Acres	Net Lease Acres	RMG Net Acres	Quaneco Net Acres	CCBM Acre
Castle Rock Jan. 2000	123,840	111,567	48,811	55,784	
Oyster Ridge Dec. 1999	85,720	85,720	31,259	0	
Baggs North Jan. 2000	120	120	60	0	
Hi-Pro Jan.2003	51,500	51,500	46,791	0	
TOTAL	261,180	248,907	126,921	55,784	

We own a 43.75% working interest (35% net revenue interest) in the Castle Rock prospect on 123,840 gross and 111,567 net acres in southeast Montana. CCBM can purchase a 6.25% working interest in our acreage (6,973 net acres) of the Castle Rock prospect if they meet certain payment obligations. In July 2001, we sold a 50% working interest in all our coalbed methane leases, except at Castle Rock, to CCBM for \$7,500,000, plus other consideration. The acreage data in

Edgar Filing: US ENERGY CORP - Form 424B3

Table 1 reflects these transactions.

CCBM agreed to pay up to \$5,000,000 for drilling and completing CBM wells on the properties owned by RMG and CCBM. We have a carried working interest in all of the wells drilled on properties owned in July 2001 (after the Pinnacle transaction, those properties consist of the Castle Rock, Baggs, and the Oyster Ridge property (not including 38,184 acres in the Oyster Ridge area which acres now are subject to the exploration and participation agreement, under which the other party can back in for acreage). To date, CCBM has not indicated whether they will participate in the subject 38,184 acres. CCBM has the right to participate as to 50% of the working interest we acquire in properties RMG or RMG I acquires in the future; if CCBM elects to participate, RMG or RMG I would not have a carried interest in wells on future properties.

A total of 72 wells have been drilled on RMG acreage through December 31, 2003: 5 in (former) fiscal year 2001; 53 in (former) fiscal year 2002; 12 in the seven months ended December 31, 2002; and 2 in 2003. 43 of the wells were drilled on properties transferred to Pinnacle in mid-2003. Nineteen of the wells were drilled by SENGAI in Castle Rock under the terms of a option and farmin agreement. Eleven of those 19 wells were stratigraphic wells and have been plugged by SENGAI; 8 of those 19 wells were completed and are owned by RMG (93.75% working interest) and CCBM (6.25% working interest), as Quaneco opted out of maintaining a working interest in the 8 wells. Other than the Castle Rock wells, RMG and CCBM both have a 50% working interest in all of these wells (see Table 2 below).

As of December 31, 2003, CCBM and RMG have spent approximately \$2,194,900 of the \$2,500,000 drilling fund CCBM is committed to spend on RMG's behalf. This reflects a reduction of \$391,000 for RMG's participation in two of Carrizo's Gulf Coast wells. We are relying on the \$305,100 balance to pay for continued drilling and completion work on the Castle Rock and Oyster Ridge properties, as to which RMG will have a carried working interest with no financial obligation of RMG for drilling and completion costs until the drilling fund is exhausted. For other properties we acquire in which

45

CCBM elects to participate, CCBM would bear 50% of drilling and completion costs for their 50% working interest.

Future annual financial obligations for coalbed methane properties consist of approximately \$173,100 gross in rental fees to the lessors for 2004 (\$81,800 net to RMG).

Table 2 lists the number of wells drilled, the total exploration costs and the remaining number of wells currently permitted for drilling as of December 31, 2003. Wells permitted for drilling on the Hi-Pro properties are shown; exploration costs and numbers of wells drilled by Hi-Pro Production are not shown.

CARRIZO - PURCHASE AND SALE AGREEMENT. On July 10, 2001, RMG closed a Purchase and Sale Agreement with CCBM, Inc., a Delaware corporation which is wholly-owned by Carrizo Oil & Gas, Inc., Houston, Texas (NMS "CRZO"). The agreement between CCBM and RMG is intended to finance the further exploration of the properties held in Montana and Wyoming, and to acquire and develop more properties.

RMG assigned CCBM an undivided 50% interest in all of RMG's then current coalbed methane properties (with the exception of Castle Rock of which only a 6.25% working interest was assigned) for a purchase price of \$7,500,000 by a promissory note payable in principal amounts of \$125,000 per month plus interest at an annual rate of 8%, over 41 months (starting July 31, 2001) with a balloon payment due on the forty-second month. This note was reduced in connection with CCBM's contribution of properties to Pinnacle (see "Transaction with Pinnacle Gas Resources, Inc. - Continuing Operations of RMG, Continuing Agreement with CCBM, and the AMI Agreement, after the Pinnacle Transaction"), and the balance on the note is secured with a 50% undivided interest in the remaining properties (Oyster Ridge and Baggs North (but not Hi-Pro).

CCBM has the right to participate in other properties RMG may acquire under an area of mutual interest ("AMI") agreement. This agreement has been modified by the AMI agreement signed in connection with the Pinnacle transaction; CCBM waived its right to participate in the Hi-Pro acquisition.

In addition to its one-half share of revenues in proportion to its one-half share of the working interest, CCBM was entitled to a credit (applied as a prepayment of the purchase price for the undivided 50%

46

interest in RMG's acreage), equal to 20% of RMG's net revenue interest from wells drilled with the \$5,000,000 drilling budget, until the amount of that credit in favor of CCBM equals \$1,250,000. At the formation of Pinnacle, CCBM paid RMG approximately \$1.8 million to complete its purchase value on the contributed properties. The payment of \$1.8 million was a reduction to the principal on the original \$7.5 million note from CCBM. The \$1.25 million that CCBM was to recover from 20% of RMG's revenue interest on the contributed properties was netted against the total purchase price on the contributed

Edgar Filing: US ENERGY CORP - Form 424B3

properties which yielded the \$1.8 million cash payment. CCBM is not entitled to any additional disproportionate revenue distributions.

QUANECO - AGREEMENT. On January 3, 2000, RMG purchased a 50% working interest and 40% net revenue interest in the Castle Rock and Kirby prospects in the Powder River Basin of southeast Montana consisting of approximately 185,000 net mineral acres from Quaneco, L.L.C. (formerly Quantum Energy, L.L.C., Cleveland, Ohio and Oklahoma City, Oklahoma). The acreage includes 88,409 net acres of Bureau of Land Management ("BLM") land; 14,916 net acres of state land (Montana), and 82,775 net acres of fee land. In fiscal 2000 and 2001, RMG paid Quaneco the cash purchase price of \$5,500,000 for the acreage plus a drilling commitment of \$2,500,000. RMG and CCBM transferred their interests in the Kirby prospect to Pinnacle in mid-2003.

DESCRIPTION OF PROSPECTS

Leases of federal mineral rights are obtained from the United States Bureau of Land Management and expire from 2004 to 2009, unless RMG establishes production on the lease, in which event the lease is held so long as coalbed methane or other gas or oil is produced. A royalty interest of 12.5% on the production is paid to the BLM. State leases expire from 2004 to 2009 in Wyoming and Montana, unless RMG establishes production on the lease, in which event the lease is held so long as coalbed methane or other gas or oil is produced. The royalty paid to the State of Wyoming is from 12.5 % to 16.67%, and 12.5% to the State of Montana. Annual renewal fees for non-producing Federal leases is \$1.50 to \$2.00 per acre, and \$1.00 and \$2.75 for non-producing Wyoming and Montana leases.

An environmental group has filed a lawsuit against the BLM, RMG and others, challenging the validity of numerous BLM leases in the Powder River Basin of Montana. See Item 3, Legal Proceedings ("Rocky Mountain Gas Litigation").

Leases on private (fee) land for coalbed methane and conventional gas expire at various times from 2004 to 2011, unless production is established, in which event the lease is held so long as there is production. The landowner is paid a royalty from production of 12.5% to 20.0% , depending on the lease terms.

Table 3 presents total acreage (developed and undeveloped) held by RMG at May 4, 2004, and the Hi-Pro acreage as of May 4, 2004.

47

TABLE 3

Prospect	Gross Leased Acres	Net Leased Acres	Net Leased from BLM	Net Leased from State of Wyoming	Net Lease from State of Montana
Castle Rock	123,840	111,567	55,104	0	10,860

Edgar Filing: US ENERGY CORP - Form 424B3

Oyster Ridge*	18,385	18,385	15,825	0	0
Baggs North	120	120	0	120	0
Hi-Pro (undeveloped)	40,120	40,120	0	112	0
Total Undeveloped Acres	182,465	170,192	70,929	232	10,860
Hi-Pro (developed)	11,380	11,380	460	280	0
Total Acres	193,845	181,572	71,389	512	10,860

* Does not include 29,151 acres under option from Anadarko Petroleum and 38,184 acres under an exploration and participation agreement. See "Description of Properties - Oyster Ridge."

RMG's properties and mineral leases of BLM, state and fee lands require annual cash payments of approximately \$173,100 during 2004. CCBM is obligated for \$59,600 of the \$173,100 required to keep undeveloped coalbed methane leases in effect.

CASTLE ROCK: The Castle Rock project consists of 123,840 gross and 111,567 net acres located in the northeastern portion of the Powder River Basin of Montana, west of Broadus, Montana. Coals present are in the Tongue River member of the Fort Union formation and appear comparable to coals currently being developed by other operators south of the Castle Rock acreage near the Montana/Wyoming border. Currently, there are no pipelines in this area.

OYSTER RIDGE: The Oyster Ridge project consists of two acreage positions: (1) 54,536 gross and net acres located in southwestern Wyoming in the Ham's Fork Coal Field adjacent to the Green River Basin; RMG and CCBM have an option to acquire a 100% working interest (50% each) in this acreage, which is held primarily by Anadarko Petroleum, Inc.; and (2) 38,184 gross and net acres held by another company, which are at the north and south ends of the Anadarko acreage.

The area is prospective for coalbed methane production from two primary Cretaceous age coals, the Frontier and the Adaville. The Kern River pipeline, which services southern California, crosses the property. Through December 31, 2003, \$799,500 has been spent on drilling and completion at Oyster Ridge.

(1) Anadarko Petroleum, Inc. is successor to Union Pacific Land Resources Corporation, which sold the acreage subject to UPLRC's back-in option to third parties, from whom RMG acquired the acreage in December 1999.

The agreement with Anadarko is a drill-to-earn-acreage agreement: We must drill at least four wells each year, each on a new section (640 acres), to earn a lease on each drilled section, and also to keep in force previously earned leases in the 31,711 acres area. Wells drilled by the lease holder, and by us (with CCBM), have earned 2,560 acres.

48

Another 29,151 gross acres in the Oyster Ridge project are subject to an option held by Anadarko Petroleum, Inc. to participate as a 25% working interest

Edgar Filing: US ENERGY CORP - Form 424B3

owner on all wells drilled each year. Anadarko has not yet elected to participate, and has no working interest in the wells drilled to date on this prospect. If Anadarko elects to participate in the future, working interest ownership in affected wells would be 37.5% RMG, 37.5% CCBM, and 25% Anadarko.

(2) Effective as of March 1, 2004, RMG entered into an exploration and participation agreement to acquire a 60% working interest from another company in 38,184 gross acres held by the other company under federal and Wyoming state leases.

BAGGS NORTH: This prospect contains 120 gross and net acres located in Carbon County, Wyoming. This State lease is located 7 miles north of Baggs, Wyoming. RMG holds a 50% working interest in this prospect. To date, RMG has not conducted any significant exploration on the property.

GENERAL INFORMATION ABOUT COALBED METHANE.

Methane is the primary commercial component of natural gas produced from conventional gas wells. Methane also exists in its natural state in coal seams. Natural gas produced from conventional wells generally contains other hydrocarbons in varying amounts which require the natural gas to be processed. Methane gas produced from coalbeds generally contains only methane and is pipeline-quality gas after simple water dehydration.

Coalbed methane ("CBM") production is similar to conventional natural gas production in terms of the physical producing facilities. However, the subsurface mechanisms that allow gas movement to the wellbore are very different. Conventional natural gas wells require a porous and permeable reservoir, hydrocarbon migration and a natural structural or stratigraphic trap. Coalbed methane is stored in four ways: 1) as free gas within the micropores (pores with a diameter of less than .0025 inch) and cleats (set of natural fractures in the coal; 2) as dissolved gas in water within the coal; 3) as absorbed gas held by molecular attraction on surfaces of macerals (organic constituents that comprise the coal mass), micropores, and cleats in the coal; and 4) as absorbed gas within the molecular structure of the coal molecules. Coals at shallower depth with good cleat development contain significant amounts of free and dissolved gas while the percentage of absorbed methane generally increases with increasing pressure (depth) and coal rank. Coalbed methane gas is released by pressure changes when the water in the coal is removed. In contrast to conventional gas wells, new coalbed methane wells initially produce water for several months. As the formation water pressure decreases, methane gas is released from the structure.

Methane production is a direct result of reducing the hydrostatic (water) pressure in the coal formation. Three principal stages are involved:

- o Drill wells (typically eight or more in a 'pod') down to the same coal formation, in contiguous 80 acre spacing per well; test the water in the formation and test coal samples taken from the formation. Water testing determines if the geochemical environment of the coal seam is conducive to the formation of CBM.
- o Install gathering lines to hook up and put wells on pump to "dewater" the coal formation. Hydrostatic pressure must be reduced to about 50% of initial pressure before enough data is obtained (water flow rates, CBM gas flows) to determine how much CBM the wells may produce. This dewatering stage may take 6 to 18 months, and in some instances 24 months (where there is no dewatering of the coal seam occurring from wells drilled by others on adjacent properties).

- o Installing (or have a transmission company install) a compressor and transport line to carry produced gas to a gas transmission line for sale to end users. Gas production starts gradually then continues to grow in volume as hydrostatic pressure is reduced; optimal production won't occur until hydrostatic pressure is reduced approximately 90% from initial levels.

COALBED METHANE WELL PERMITTING

Operators drilling for coalbed methane are subject to many rules and regulations and must obtain drilling, water discharge and other permits from various governmental agencies depending on the type of mineral ownership and location of the property. Intermittent delays in the permitting process can reasonably be expected throughout the development of all RMG projects. As with all governmental permit processes, there is no assurance that permits will be issued in a timely fashion or in a form consistent with the plan of operations.

Drilling and production operations on our Powder River Basin leases in Wyoming and Montana are subject to environmental rules, requirements and permits issued by various federal authorities for drilling and operating on all land, regardless of ownership, and state and local regulatory agencies for land owned by the state or in fee by private interests. The primary Federal agency with related responsibilities is the Bureau of Land Management of the U.S. Department of the Interior ("BLM") which has imposed environmental limitations and conditions on coalbed methane drilling, production and related construction activities on federal leases in the PRB. These conditions and requirements are imposed through Records of Decision ("ROD") issued pursuant to Environmental Impact Statements ("EIS"). The BLM may also impose site-specific conditions on development activities, such as drilling and the construction of rights-of-way, before it approves required applications for permits to drill and plans of development.

In April 2003 the BLM issued Records of Decision finalizing two impact statements: The Powder River Basin Oil and Gas EIS (PRB-EIS) for the Wyoming portion of the basin, and the Statewide Oil and Gas EIS and Proposed Amendment for the Powder River and Billings Resource Management Plans in Montana. Together, the impact statements authorize the development of some 77,000 coalbed methane gas wells in the Powder River Basin, most of which would be drilled on the Wyoming side of the basin.

With the EIS completed, the BLM will be able to consider drilling or development proposals in the geographic areas studied, however, before any permits are approved, the BLM will conduct an additional round of environmental review to identify site-specific environmental impacts and appropriate mitigation measures. Three lawsuits have been filed challenging the Record of Decisions, however, no stays have been issued. See "Legal Proceedings, Rocky Mountain Gas, Inc."

The state-based environmental agencies primarily concern themselves with the issuance of permits related to drilling, land, air quality and water discharge. The primary state-based agencies for which coalbed methane operators are subject to include:

- o Wyoming Department of Environmental Quality ("WDEQ")
- o Wyoming Oil and Gas Conservation Commission ("WOGCC")
- o Montana Department of Environmental Quality ("MDEQ")
- o Montana Board of Oil and Gas Conservation ("MBOGC")

Edgar Filing: US ENERGY CORP - Form 424B3

While the BLM is primarily responsible for issuing broadly based EISs for each state, its jurisdiction over related matters and the actual issuance of drilling permits is primarily reserved for federal leases. Permits for drilling on state or fee owned land are issued by the WOGCC and MBOGC.

50

In contrast to Wyoming, Montana authorities have been very slow in undertaking CBM environmental studies and granting permits to drill wells. In fact, to date, only the Redstone (Fidelity) project is producing CBM gas in Montana. With the exception of a relatively small number of drilling permits available from earlier issuance (including those held by RMG which have allowed some drilling on the Castle Rock project), a drilling moratorium had been in effect during the last three years, prior to the approval of the two environmental impact statements.

The DEQs are primarily responsible for issuing air quality and water discharge permits, among other things. Water disposal has been and is expected to continue to be a significant issue, particularly with respect to coalbed methane gas production, which typically entails substantial water production at least during the dewatering phase of completion of a new well. The primary issue of concern is the salinity content in the produced water, which is measured by the sodium absorption ratio ("SAR"), which, depending upon a location, can range from slightly less than that in surface water to a substantially greater amount. Due to the discrepancies of the SAR content found in water from coalbed methane wells, the disposal of this water is tightly regulated. If the SAR content is low, the water can be used for irrigation, livestock drinking water or even as a water supply for cities. If the SAR content is higher, the water quality does not merit use for drinking water or irrigation and, under these measures, the DEQ has outlined various other methods of water disposal. Man-made ponds may also be built right beside the wells, enabling the wells to drain their water into the ponds (called surface discharge). Additionally, there might be drainages which the produced water can flow into. Finally, the water might be reinjected through wells into the ground below levels from which the water was produced. Thus far, the vast majority of associated water produced has been discharged on the surface, primarily captured in reservoirs and ponds and allowed to evaporate.

Overall, RMG has not experienced any difficulty in obtaining air quality and water discharge permits from the WDEQ, and those permits are in place for the Hi-Pro properties. RMG has not has applied for such permits in Montana.

The following summarizes permits now in place.

Table 4

Prospect	Remaining Permits	Expiration or Renewal Date
Castle Rock	5	May - July 2004
Hi-Pro	9	August - September 2004
Oyster Ridge	4	September 2004
Total	18	

Drilling permits issued by the State of Wyoming allow one year for drilling completion; permits issued by the State of Montana allow six months.

Once drilled, all wells in Wyoming are subject to a National Pollution Discharge Elimination System ("NPDES") permit relating to water testing and discharge. All wells in the Castle Rock prospect remain subject to the Montana Board of Oil and Gas Commission approval. Upon completion of drilling, wells are subject to monthly reporting regarding status and production to the respective state agencies in which they are located.

51

Due to the low pressure characteristics of the coalbeds, the production of coalbed methane is dependent on the installation of multi-stage compression facilities. Gas is gathered from the wells, and transported to a low level compression station, then on to a high level compression station and finally to the transmission pipeline. The water is commonly collected through another pipeline from each of the wells and pumped into a surface reservoir.

Companies involved in coalbed methane production generally outsource gas gathering, compression and transmission. RMG and industry partners have and will likely continue to outsource their compression and gathering to third parties at fixed charges per mcf transported.

GAS MARKETS

Gas production from the Powder River Basin is significant. Since this area is sparsely populated, most of the gas must be exported to distant markets. The existing Wyoming pipeline infrastructure is already substantial and continues to expand with gathering systems and intrastate lines, yet is ultimately dependent on large interstate pipelines. With the exception of a portion of the gathering systems, this pipeline system is typically owned and operated by independent mid-stream energy companies, rather than oil and gas operators. The pipelines generally will not be financed and constructed until appropriate amounts of gas have been proven and committed for transport on the new lines. While the total current take away capacity from the PRB is approximately 1.25 billion cubic feet per day (Bcfd), excess capacity over current production rates does not exist in all locations and not all producers have a ready market for the sale of their gas at all times. Some major producers in the region reserve portions of pipeline capacity beyond their current requirements, resulting in less than stated maximum capacity being available for other producers. In addition, total stated capacity is unavailable at times as pipelines are shut down for maintenance or construction activities.

Based on the existing pipeline systems and the gas sales markets in its area of operations in Wyoming, RMG expects that, at least for the next few years, the markets in which it sells its gas, and the spot prices to which it will be subject, will be dependent upon three major sales points:

- o The Colorado Interstate Gas ("CIG") station near Cheyenne in southeastern Wyoming, which primarily feeds regional markets or markets in the Midwest.
- o The Ventura market ("Ventura") located in Ventura, Iowa, which prices gas on the Northern Border pipeline where it interconnects with

Edgar Filing: US ENERGY CORP - Form 424B3

Northern Natural Gas and feeds markets in the Northern Plains and Midwest.

- o The Opal market ("Opal") in southwestern Wyoming, which delivers to the Kern River pipeline for delivery to Utah, Nevada, Arizona and California.

PIPELINES THAT SERVE THE CIG MARKET

Two large diameter intrastate pipelines, the Fort Union and the Thunder Creek, were constructed in the Basin in 1999, and gathering system infrastructure has continued to grow significantly. These two major intrastate pipelines currently provide almost 1.1 Bcfd capacity, flowing south out of the Basin to the CIG Hub in Southeast Wyoming.

- o Fort Union. The Fort Union Gas Gathering pipeline consists of a 106 mile, 24 inch, 434 Mmcfd capacity line completed in August 1999 and a 20" pipeline with a capacity of 200 Mmcfd completed in September 2001. It is believed that capacity could be increased by another 200 Mmcfd by adding additional compression to this line.

52

- o Thunder Creek. Thunder Creek Gas Services pipeline is a 126-mile, 24 inch pipeline which commenced operations on September 1, 1999 with a capacity of 450 Mmcfd.

The Hi-Pro production is delivered to the Thunder Creek pipeline where it is carried south and delivered to the CIG market.

El Paso Corporation's subsidiary Cheyenne Plains Gas Pipeline Co. received approval from the Federal Energy Regulatory Commission in March 2004 for construction of a new 380 mile pipeline from Cheyenne, Wyoming to Greensburg, Kansas, with a capacity of 560 Mmcfd per day. Cheyenne Plains has announced its intent to apply to the FERC for permission to enlarge the line to handle 760 Mmcfd per day. This line, with the enlarged capacity, is expected by Cheyenne Plains to be in-service in January 2005, and may help narrow the negative price differential for CIG prices compared to national prices.

PIPELINES THAT SERVE THE VENTURA MARKET

There are currently only two significant pipelines capable of transporting gas out of the Basin to the north, the Bitter Creek pipeline, which connects with the Northern Border interstate pipeline and the Grasslands pipeline. However, one additional line that is well along in its planning stages, would also deliver gas to the Northern Border pipeline. Descriptions are as follows:

- o Bitter Creek. The Bitter Creek pipeline is owned by Williston Basin Interstate Pipeline Company ("WBI"), a subsidiary of MDU Resources Group, Inc. It was completed in 2001 with initial capacity of 150 Mmcfd.
- o Grasslands. In response to the need for expandable access to the Ventura market, the Grasslands pipeline, also owned by WBI, went into service in November 2003. It is a 245 mile, 16 inch line with an initial capacity of 80 Mmcfd and expandable to 200 Mmcfd.

THE OPAL MARKET

Edgar Filing: US ENERGY CORP - Form 424B3

The Opal market, in southwestern Wyoming, is a major pipeline connection point, with several intrastate and interstate lines connecting to the major interstate Kern River line, with a recently enlarged capacity of 1.73 Bcfd, delivering to markets in Utah, Nevada, Arizona and California. If the Oyster Ridge property is put into production, gas likely could be sold into this market.

GAS PRICES

Historically, spot gas prices received by producers at the Ventura, CIG and Opal markets have generally been at discounts to the NYMEX front month contract and Henry Hub spot cash prices, although with lesser discounts during the winter months. Prices at CIG can trade at a further discount to the Ventura prices, and again with an even higher discount during the second and third quarters, because CIG is partially based on local demand which can drop outside the heating season, while Ventura serves larger national markets and is highly correlated to Chicago market prices.

The negative price differential in the prices realized by Powder River Basin producers in 2003, as compared to prices realized on the national gas market, ranged from 10% to 45% (higher outside the heating season). The negative price differential in the fourth quarter 2003 and first quarter 2004 narrowed in comparison to the fourth quarter 2002. However, there is no guarantee that increased capacity will eliminate the negative price differential or even significantly reduce it.

53

INACTIVE MINING PROPERTIES - URANIUM

GENERAL. We have interests in several uranium-bearing properties in Wyoming and Utah and in a uranium processing mill in southeastern Utah (the "Shootaring Mill" in Garfield County). All the uranium-bearing properties are in areas which produced significant amounts of uranium in the 1970s and 1980s. At some future date, we could sell, develop and/or operate these properties (directly or through a subsidiary company or a joint venture) with companies having the necessary capital to mine and mill the uranium bearing material to produce uranium concentrates ("U3O8") for sale to public utilities that operate nuclear powered electricity generating plants. Currently there is no operating uranium mill in Wyoming and it would take a substantial increase in the market price of uranium concentrate over a period of time before a company with the financial wherewithal would build a mill and place the deposits in production. Therefore, until uranium oxide prices improve significantly, the uranium properties will remain shut down.

At the dates of the consolidated balance sheets in this Report, there are no values carried on the balance sheets for uranium properties.

SHEEP MOUNTAIN - WYOMING

Unpatented lode mining claims, underground and open pit uranium mines and mining equipment in the Crooks Gap area are located on Sheep Mountain in Fremont County, Wyoming. From December 21, 1988 to June 1, 1998, these properties were held by Sheep Mountain Partners ("SMP"). On June 1, 1998, the company received back from SMP all of the Sheep Mountain mineral properties and equipment, in partial settlement of certain disputes with Nukem, Inc. ("Nukem") and its

Edgar Filing: US ENERGY CORP - Form 424B3

subsidiary Cycle Resource Investment Corp. ("CRIC"). The judgment against Nukem impressing the CIS uranium supply contracts in a constructive trust with SMP remains unresolved. See "Legal Proceedings."

We have recorded reclamation liabilities for the SMP properties. All historical costs in the SMP properties were offset against a monetary award which was received from Nukem during fiscal 1999.

UTAH

Plateau Resources Limited ("Plateau") is a wholly-owned subsidiary of USE. In 2003, reclamation work on uranium properties (the Tony M, Velvet, and Woods Complex) in San Juan County, Utah was completed.

PLATEAU'S SHOOTARING CANYON MILL AND PROPERTIES

In August 1993, USE purchased from Consumers Power Company ("CPC"), all of the outstanding stock of Plateau which owns the Shootaring Canyon uranium processing mill and support facilities in southeastern Utah (the "Shootaring Mill") for a nominal cash consideration. The Shootaring Mill holds a source materials license from the NRC. In the purchase of the stock from CPC, we agreed to various obligations, as disclosed in USE's 1998 Form 10-K at pages 15 and 16.

The Shootaring Mill is located in southeastern Utah and occupies 19 acres of a 265 acre plant site. The mill was designed to process 750 tpd, but only operated on a trial basis for two months in mid-summer of 1982. In 1984, Plateau placed the mill on standby because CPC had canceled the construction of an additional nuclear energy plant.

For information on the Shootaring mill facility and related real estate property at Ticaboo, please see "Plateau's Shootaring Canyon Mill and Properties" in the annual report (Form 10-K/A1) for the former fiscal year ended May 31, 2002.

54

THE GREEN MOUNTAIN MINING VENTURE ("GMMV") PROJECT

For information on the GMMV agreement, see "Green Mountain Mining Venture" in the annual report (Form 10-K/A1) for the (former) fiscal year ended May 31, 2002.

SHEEP MOUNTAIN PARTNERS ("SMP")

SMP PARTNERSHIP. In February 1988, USE acquired uranium mines, mining equipment and mineralized properties (Sheep Mountain Mines) at Crooks Gap in south-central Fremont County, Wyoming, from Western Nuclear, Inc. These Crooks Gap mining properties are adjacent to the Green Mountain uranium properties. USECC mined and milled uranium ore from one of the underground Sheep Mines during fiscal 1988 and 1989. In December 1988, USECC sold 50 percent of the interests in the Crooks Gap properties to Nukem's subsidiary Cycle Resource Investment Corporation ("CRIC") for cash. The parties thereafter contributed the properties to and formed Sheep Mountain Partners ("SMP"), in which USECC received an undivided 50 percent interest. SMP is a Colorado general partnership formed on December 21, 1988, between USECC and Nukem, Inc. then of Stamford, CT ("Nukem") through its wholly-owned subsidiary CRIC.

SMP was directed by a management committee, with three members appointed by

Edgar Filing: US ENERGY CORP - Form 424B3

USECC and three members appointed by Nukem/CRIC. The committee has not met since 1991 as a result of the SMP arbitration/litigation. During fiscal 1991, disputes arose between the SMP partners which resulted in litigation. See "Legal Proceedings."

PROPERTIES. USE, Crested and/or USECC own 98 unpatented lode mining claims and a 644 acre Wyoming State Mineral Lease in the Crooks Gap area.

An ion exchange plant located on the properties (to remove natural soluble uranium from mine water) was reclaimed and the plant disposed of at the Sweetwater Mill impoundment facility in fiscal 2002.

Permits to operate existing mines (now shut down) on the Crooks Gap properties had been issued by the State of Wyoming, but amendments would be needed to re-open them. A NPDES water discharge permit under the Clean Water Act has been obtained; monitoring and treatment of water removed from the mines and discharged in nearby Crooks Creek is generally required. However, for the last three years, USECC has not discharged wastewater into Crooks Creek, and the water instead is being discharged into the USECC McIntosh Pit at the Sweetwater mill owned by Kennecott (the Sweetwater mill had been part of the Green Mountain Mining venture).

INACTIVE MINING PROPERTIES - GOLD

SUTTER GOLD MINING COMPANY. In fiscal 1991, USE acquired an interest in Sutter properties located in the Mother Lode Mining District of Amador County, California. The entire Lincoln Project (which is the name we use for the properties) is owned by Sutter Gold Mining Company, a Wyoming corporation ("SGMC"), and a majority-owned subsidiary of USE.

This property has never been in production. Persistent low prices for gold made financing difficult, and in fiscal 1999 resulted in a substantial write down of the SGMC properties.

Due to the depressed gold prices in the past, litigation (since resolved) and lack of funding, SGMC has deferred the start of construction of a gold mill complex and extension of existing underground workings. A tourist visitors center has been set up (see below) and leased to a third party for \$1,500 per

55

month plus a 4% gross royalty on revenues. The conditional use permit is being kept current as necessary to allow for possible mining activities on the properties in the future.

In 1998 and 1999, the company took impairments (write-downs) in the amounts of \$1,500,000 and \$10,718,800, respectively, of the carrying value of the gold properties. These two impairments wrote off almost 85% of our investment in these properties. As a result of low market prices for gold at the time, we determined that we could not produce gold from these properties at a profit. The impairments taken in 1998 and 1999 resulted in no value for mine exploration, and the remaining assets relating to this property include raw land which is no longer needed for mining activity, and buildings and equipment. A significant portion of the raw land has been sold.

We have not obtained a final feasibility study to support a determination that the Sutter property contains proven or probable reserves of gold.

Edgar Filing: US ENERGY CORP - Form 424B3

In late 2003, SGMC signed a letter of intent for an acquisition of SGMC by Globemin Resources Inc., a British Columbia corporation listed on the TSX-V. Completion of the acquisition is subject to negotiation and execution of a share exchange agreement, approval by the TSX-V, Canadian regulatory authorities, and the boards of directors and if necessary, shareholders of SGMC and Globemin. If the acquisition is consummated, a majority of the stock of Globemin would be owned by the (former) SGMC shareholders. Globemin thereafter would seek to raise financing in Canada to begin mining the Lincoln Project and build a mill.

PROPERTIES. SGMC holds approximately 435 acres of surface and mineral rights: (87 acres of surface rights (owned), 73 acres of surface rights (leased), 146 acres of mineral rights (leased), and 289 acres of mineral rights (owned), all on patented mining claims near Sutter Creek, Amador County, California. The properties are located in the western Sierra Nevada Mountains at from 1,000 to 1,500 feet in elevation; year round climate is temperate. Access is by California State Highway 16 from Sacramento to California State Highway 49, then by paved county road approximately .4 mile outside of Sutter Creek.

Surface and mineral rights holding costs, and property taxes, will be approximately \$130,000 and \$9,900 for 2004.

The leases are for varying terms and require rental fees, annual royalty payments and payment of real property taxes and insurance.

PERMITS. The Amador County Board of Supervisors has issued a Conditional Use Permit ("CUP") allowing mining of the SGM and milling of production, subject to conditions relating to land use, environmental and public safety issues, road construction and improvement, and site reclamation. Applications will be made in the second quarter of 2004 to California regulatory authorities for a waste water discharge permit to allow the company to utilize mill tails as mine backfill and to store tails in a surface fill unit.

VISITORS CENTER. In fiscal 2000, SGMC spent approximately \$298,000 for surface infrastructure related to improving access to the mine site, and to a lesser extent tourist related improvements. The visitors center is being operated by a third party. The visitors center is an exhibit of the pictures and memorabilia from mining operations on other properties in the Sutter district in the nineteenth century, and a guided tour of the underground workings at the Lincoln Project. Revenues from this tourist operation were \$48,800 for 2003, \$49,200 for the seven months ended December 31, 2002, and \$41,200 in (former) fiscal year 2002, and are included in "real estate" in the consolidated statements of operations included in this report. These revenues offset a majority of costs for holding the Sutter properties.

56

MOLYBDENUM

As a holder of royalty, reversionary and certain other interests in properties located at Mt. Emmons near Crested Butte, Colorado, USE and Crested are entitled to receive annual advance royalties of 50,000 pounds of molybdenum, or cash equivalent. AMAX Inc. (which was acquired by Cyprus Minerals Company and was renamed Cyprus Amax Minerals Company in November 1993, then later acquired later by Phelps Dodge) delineated a deposit of molybdenum containing approximately 146,000,000 tons of mineralization averaging 0.43% molybdenum disulfide on the properties of USE and Crested.

Advance royalties are required to be paid in quarterly installments until:

Edgar Filing: US ENERGY CORP - Form 424B3

(i) commencement of production; (ii) failure to obtain certain licenses, permits, etc., that are required for production; or (iii) AMAX's return of the properties to USE and Crested. The advance royalty payments reduce the operating royalties (6% of gross production proceeds) which would otherwise be due out of production. There is no obligation to repay the advance royalties if the property is not placed in production. USE recognized \$108,500 advance royalty revenues in (former) fiscal 2001. Phelps Dodge ceased making payments in July 2001.

USE and Crested also are entitled to receive \$2,000,000 if the Mt. Emmons properties are put into production and, in the event of a sale of Mt. Emmons Mining Company (which owns the properties) or of its interest in the properties, USE and Crested are entitled to receive 15% of the first \$25,000,000 of sale proceeds.

AMAX Inc. and its successor companies have sought to put the Mt. Emmons molybdenum property into production for 20 years. Due to local opposition to mining (the property is close to the Crested Butte, Colorado recreational resort area) and AMAX's successors' failure to diligently pursue obtaining the permits needed to start mining, we know of no plans at this time to put the property into production.

USE and Crested are in litigation with Phelps Dodge concerning the properties and related agreements, see "Legal Proceedings."

OIL AND GAS AND OTHER PROPERTIES

FORT PECK LUSTRE FIELD (MONTANA). We operate a small oil production facility (three wells) at the Lustre Oil Field on the Ft. Peck Indian Reservation in northeastern Montana. We receive a fee based on oil produced. This fee and other assets of the company collateralize a \$750,000 bank line of credit.

WYOMING. The company and Crested own a 14-acre tract in Riverton, Wyoming, with a two-story 30,400 square foot office building (including underground parking). The first floor is rented to non-affiliates and government agencies; the second floor is occupied by the company. The property is mortgaged to the WDEQ as security for future reclamation work on the Sheep Mountain Crooks Gap uranium properties.

The company also owns a fixed base aircraft facility at the Riverton Regional Airport, including a 10,000 square foot aircraft hangar and 7,000 square feet of associated offices and facilities. This facility is on land leased from the City of Riverton for a term ending December 16, 2005, with an option to renew on mutually agreeable terms for five years. The aircraft fueling operation to the public was shut down late in fiscal 2002.

57

The company owns three mountain sites covering 16 acres in Fremont County, Wyoming. In Riverton, Wyoming, the company owns four city lots and improvements including two smaller office buildings.

COLORADO. USECC owns 175 acres of undeveloped land in and near Gunnison, Colorado.

UTAH. On August 14, 2003, USE's wholly-owned subsidiary Plateau Resources

Edgar Filing: US ENERGY CORP - Form 424B3

Limited (and Plateau's wholly-owned subsidiary Canyon Homesteads, Inc.) sold all of the outstanding stock of Canyon Homesteads to The Cactus Group, LLC, for \$3,470,000: \$349,250 cash and \$3,120,750 with The Cactus Group's five year promissory note. The note is secured with all the assets of The Cactus Group and Canyon (and is personally guaranteed by the six principals of The Cactus Group). The note is payable monthly (with annual interest at 7.5%) with a \$2,940,581 balloon payment due in August 2008.

The sold properties are in Ticaboo, Utah, near Lake Powell, and included a motel, restaurant and lounge, convenience store, recreational boat storage and service facility, and improved residential and mobile home lots.

RESEARCH AND DEVELOPMENT

No research and development expenditures have been incurred, either on the company's account or sponsored by customers, during the past three fiscal years.

ENVIRONMENTAL

GENERAL. Operations are subject to various federal, state and local laws and regulations regarding the discharge of materials into the environment or otherwise relating to the protection of the environment, including the Clean Air Act, the Clean Water Act, the Resource Conservation and Recovery Act ("RCRA"), and the Comprehensive Environmental Response Compensation Liability Act ("CERCLA"). With respect to mining operations conducted in Wyoming, Wyoming's mine permitting statutes, Abandoned Mine Reclamation Act and industrial development and siting laws and regulations also impact us. Similar laws and regulations in California affect SGMC operations and Utah laws and regulations effect Plateau's operations.

Management believes the company complies in all material respects with existing environmental regulations.

As of December 31, 2003, we have recorded estimated reclamation obligations of \$7,264,700. We anticipate paying for those reclamation efforts over several years. For further information on the approximate reclamation costs (decommissioning, decontamination and other reclamation efforts for which we are primarily responsible or potentially responsible), see note K to the consolidated financial statements in this prospectus.

OTHER ENVIRONMENTAL COSTS. Actual costs for compliance with environmental laws may vary considerably from estimates, depending upon such factors as changes in environmental laws and regulation (e.g., the new Clean Air Act), and conditions encountered in minerals exploration and mining. We do not anticipate that expenditures to comply with laws regulating the discharge of materials into the environment, or which are otherwise designed to protect the environment, will have any substantial adverse impact on the competitive position of the company.

58

EMPLOYEES

The company has 34 full-time employees, including 11 employees working only for RMG. Crested uses approximately 50 percent of the time of USE employees, and reimburses the company on a cost reimbursement basis.

Edgar Filing: US ENERGY CORP - Form 424B3

MINING CLAIM HOLDINGS

TITLE. Nearly all the uranium mining properties held by the company are on federal unpatented claims. Unpatented claims are located upon federal public land pursuant to procedure established by the General Mining Law. Requirements for the location of a valid mining claim on public land depend on the type of claim being staked, but generally include discovery of valuable minerals, erecting a discovery monument and posting thereon a location notice, marking the boundaries of the claim with monuments, and filing a certificate of location with the county in which the claim is located and with the BLM. If the statutes and regulations for the location of a mining claim are complied with, the locator obtains a valid possessory right to the contained minerals. To preserve an otherwise valid claim, a claimant must also pay certain rental fees annually to the federal government (currently \$100 per claim) and make certain additional filings with the county and the BLM. Failure to pay such fees or make the required filings may render the mining claim void or voidable. Because mining claims are self-initiated and self-maintained, they possess some unique vulnerabilities not associated with other types of property interests. It is impossible to ascertain the validity of unpatented mining claims solely from public real estate records and it can be difficult or impossible to confirm that all of the requisite steps have been followed for location and maintenance of a claim. If the validity of an unpatented mining claim is challenged by the government, the claimant has the burden of proving the present economic feasibility of mining minerals located thereon. Thus, it is conceivable that during times of falling metal prices, claims which were valid when located could become invalid if challenged.

PROPOSED FEDERAL LEGISLATION. The U.S. Congress has, in legislative sessions in recent years, actively considered several proposals for major revision of the General Mining Law, which governs mining claims and related activities on federal public lands. If any of the recent proposals become law, it could result in the imposition of a royalty upon production of minerals from federal lands and new requirements for mined land reclamation and other environmental control measures. It remains unclear whether the current Congress will pass such legislation and, if passed, the extent such new legislation will affect existing mining claims and operations. The effect of any revision of the General Mining Law on operations cannot be determined conclusively until such revision is enacted; however, such legislation could materially increase the carrying costs of mineral properties which are located on federal unpatented mining claims, and could increase both the capital and operating costs for such projects and impair the ability to hold or develop such properties.

LEGAL PROCEEDINGS

Material pending proceedings are summarized below. Certain of the company's affiliates are involved in ordinary routine litigation incidental to their business. Other proceedings which were pending during the year ended December 31, 2003 have been settled or otherwise finally resolved.

59

SHEEP MOUNTAIN PARTNERS ARBITRATION/LITIGATION

In 1991, disputes arose between USE/Crested d/b/a/ USECC, and Nukem, Inc. and its subsidiary Cycle Resource Investment Corp. ("CRIC"), concerning the formation and operation of their equally owned Sheep Mountain Partners (SMP) partnership. Arbitration proceedings were initiated by CRIC in June 1991 and in

Edgar Filing: US ENERGY CORP - Form 424B3

July 1991, USECC filed a lawsuit against Nukem, CRIC and others in the U.S. District Court of Colorado in Civil No. 91B1153. The Federal Court stayed the arbitration proceedings and discovery proceeded. In February 1994, all of the parties agreed to consensual and binding arbitration of all of their disputes over SMP before an arbitration panel (the "Panel").

After 73 hearing days, the Panel entered an Order and Award on April 18, 1996 and clarified the Order on July 3, 1996, finding generally in favor of USE and Crested on certain of their claims and imposed a constructive trust in favor of Sheep Mountain Partners on uranium contracts Nukem entered into to purchase uranium from CIS republics. The Panel also awarded SMP damages of \$31,355,070 against Nukem. USECC filed a petition for confirmation of the Order and on June 27, 1997, the U.S. District Court confirmed the Panel's Orders in its Second Amended Judgment.

Thereafter, Nukem/CRIC appealed the Judgment to the 10th Circuit Court of Appeals ("CCA"). On October 22, 1998, the 10th CCA issued an Order and Judgment affirming the U.S. District Court's Second Amended Judgment without modification. The ruling affirmed (i) the imposition of a constructive trust in favor of SMP on Nukem's rights to purchase CIS uranium, the uranium acquired pursuant to those rights, and the profits therefrom; and (ii) the damage award in favor of SMP against Nukem. The 10th CCA held that the Panel's Awards "clearly retains both a constructive trust and a damage award," and the Arbitration Awards and the Second Amended Judgment were "clear and unambiguous."

On February 8, 1999, the U.S. District Court ordered Nukem to pay USECC the balance of the damage award. Nukem did so, but then moved for a satisfaction of judgment without accounting for the monies earned in the Constructive Trust. The District Court denied Nukem's motion and Nukem filed its second appeal to the 10th CCA. On October 16, 2000, the 10th CCA again affirmed the order of the District Court. The 10th CCA held that Nukem had not "provided an accounting of the partnership assets," finding that "the district court order presented for our review does not decide which CIS contracts are covered by the constructive trust."

On November 3, 2000, USECC filed a motion for a further accounting of the Constructive Trust. On February 15, 2001, the District Court entered an Order of Reference appointing a Special Master to "conduct an accounting" of the Constructive Trust. The accounting was conducted and on May 1, 2003, the Special Master filed his Report with the District Court. Both parties filed objections to the Report. On July 30, 2003, the U.S. District Court adopted the Report in part and rejected it in part. Judgment was then entered by the Court on August 1, 2003 in favor of USECC and against Nukem in the amount of \$20,044,183.

On August 15, 2003, Nukem filed a "Motion to Remand to the Arbitration Panel or in the Alternative, to Alter, Amend and/or Correct the Court's August 1, 2003 Judgment and July 30, 2003 Order," and a "Motion to Correct Certain Findings or Statements in the Court's Order of July 30, 2003." On the same day, USECC filed a motion under Fed.R.Civ.P. 52(b) and 59(e) to alter or amend the July 30, 2003 Order and the August 1, 2003 Judgment. The District Court denied the parties' motions on September 10 and 11, 2003, respectively. Nukem's appeal and USECC's cross-appeal followed. Nukem's opening brief was filed on January 16, 2004 and on February 24, 2004, USECC filed an opening brief in its cross-appeal and an answer to Nukem's brief. Nukem has until March 29, 2004 or any extension thereof to file an answer to USECC's opening brief. USECC may then file a reply brief 14 days after

Edgar Filing: US ENERGY CORP - Form 424B3

service of Nukem's answer. Management believes that the ultimate outcome of this matter will not have an adverse affect on the company's financial condition or result of operations.

CONTOUR DEVELOPMENT LITIGATION

On July 28, 1998, USE and Crested filed a lawsuit in the U. S. District Court of Colorado in Case No. 98WM1630, against Contour Development Company, L.L.C. and entities and persons associated with Contour Development Company, L.L.C. (together, "Contour") seeking compensatory and consequential damages of more than \$1.3 million from the defendants for dealings in real estate owned by USE and Crested in Gunnison, Colorado. The Contour defendants asserted a counterclaim asking for payment of attorneys fee and costs. The parties settled the litigation in 2004. In the settlement, USE and Crested received \$25,000 in cash; two lots in the City of Gunnison, Colorado, which have been sold for approximately \$250,000; and an additional five development lots covering 175 acres north of Gunnison, Colorado.

PHELPS DODGE LITIGATION

USE and Crested, d/b/a USECC, were served with a lawsuit on June 19, 2002, filed in the U.S. District Court of Colorado (Case No. 02-B-0796(PAC)) by Phelps Dodge Corporation ("PD") and its subsidiary, Mt. Emmons Mining Company ("MEMCO"), over contractual obligations in USECC's agreement with PD's predecessor companies, concerning mining properties on Mt. Emmons, near Crested Butte, Colorado.

The litigation stems from agreements that date back to 1974 when USE and Crested leased the mining claims AMAX Inc., PD's predecessor company. The mining claims cover one of the world's largest and richest deposits of molybdenum discovered by AMAX. AMAX reportedly spent over \$200 million on the acquisition, exploration and mine planning activities on the Mt. Emmons properties.

The complaint filed by PD and MEMCO seeks a determination that PD's acquisition of Cyprus Amax was not a sale. Under a 1986 agreement between USECC and AMAX, if AMAX sold MEMCO or its interest in the mining properties, USE and Crested would receive 15% (7.5% each) of the first \$25 million of the purchase price (\$3.75 million). In 1991, Cyprus Minerals Company acquired AMAX to form Cyprus Amax Minerals Co. USECC's counter and cross-claims allege that in 1999, PD formed a wholly-owned subsidiary CAV Corporation, for the purpose of purchasing the controlling interest of Cyprus Amax and its subsidiaries (including MEMCO) at an estimated value in cash and PD stock exceeding \$1 billion and making Cyprus Amax a subsidiary of PD. Therefore, USECC asserts the acquisition of Cyprus Amax by PD was a sale of MEMCO and the properties that triggers the obligation of Cyprus Amax to pay USECC the \$3.75 million plus interest.

The other issue in the litigation is whether USECC must, under terms of a 1987 Royalty Deed, accept PD's and MEMCO's conveyance of the Mt. Emmons properties back to USECC, which properties now include a plant to treat mine water, costing in excess of \$1 million a year to operate in compliance with State of Colorado regulations. PD's and MEMCO's claim seek to obligate USECC to assume the operating costs of the water treatment plant. USECC refuses to have the water treatment plant included in the return of the properties because, the USECC counterclaim argues, the properties must be in the same condition as when they were acquired by AMAX before the water treatment plant was constructed by AMAX.

As added counterclaims, USECC seeks (i) damages for PD's breach of covenants of good faith and fair dealing; (ii) damages for PD's failure to develop the Mt. Emmons properties and not protecting USECC's rights as a

Edgar Filing: US ENERGY CORP - Form 424B3

revisionary owner of the mining rights to the properties, (iii) damages for unjust

61

enrichment of PD; (iv) damages for breach of the PD's fiduciary duties owed to USECC as revisionary owner of the property, and for neglecting to maintain the mining rights and interests in the properties.

On March 17, 2003, PD filed additional motions for partial summary judgment on various claims. On January 22, 2004, the District Court heard the motions and responses of USECC and additional briefs were thereafter filed with the Court. The Court is considering the motions. Management believes that the ultimate outcome of this matter will not have an adverse affect on the company's financial condition or result of operations.

ROCKY MOUNTAIN GAS, INC.

LITIGATION INVOLVING LEASES ON COALBED METHANE PROPERTIES IN MONTANA

On or about April 1, 2001, RMG, a subsidiary of USE and Crested, was served with a Second Amended Complaint wherein the Northern Plains Resource Council had filed suit in the U.S. District Court of Montana, Billings Division in Case No. CV-01-96-BLG-RWA against the United States Bureau of Land Management ("BLM"), RMG, certain of its affiliates (including USE and Crested) some 20 other defendants. The plaintiff is seeking to cancel oil and gas leases issued to RMG et. al. by the BLM in the Powder River Basin of Montana and for other relief.

The basis for the complaint appears to be that the BLM's regulations require the BLM to respond to objections filed by persons owning land or lease rights adjacent to the coalbed properties which the BLM is offering to lease to the public. The argument of plaintiff appears to be that if objections are not responded to by the BLM prior to issuing CBM leases, the leases are invalid. Based on this argument, the plaintiff appears to have been successful in forcing cancellation of some CBM leases granted to others in the Powder River Basin of Montana, because the BLM did not respond to some objecting adjacent landowners. However, all of the BLM leases in Montana held by RMG (none are held by U.S. Energy Corp. or Crested Corp. in their own corporate names) are at least four years old, and there is no record of any objections being made to the issue of those leases.

Based on filings in the case to date, it appears that the BLM is taking the initiative in responding to the plaintiff. We believe RMG's leases were validly issued in compliance with BLM procedures, and do not believe the plaintiff's lawsuit will adversely affect any of RMG's Montana BLM leases.

LAWSUITS CHALLENGING BLM'S RECORDS OF DECISIONS

Three lawsuits are currently pending in the Montana Federal District Court challenging BLM's Records of Decisions for the Powder River Basin Oil and Gas EIS (PRB-EIS) for the Wyoming portion of the basin, and the Statewide Oil and Gas EIS and Proposed Amendment for the Powder River and billings Resource Management Plans in Montana. Neither the company nor RMG are parties to any of these lawsuits.

LITIGATION INVOLVING DRILLING ON A COALBED METHANE LEASE

A drilling company, Eagle Energy Services, LLC filed a lien on RMG's

Edgar Filing: US ENERGY CORP - Form 424B3

leasehold in southwestern Wyoming for drilling services performed at RMG's Oyster Ridge Property and filed a lawsuit foreclosing the lien. Eagle Energy's bank, Community First National Bank of Sheridan, Wyoming, filed a similar suit for the same amount on an assignment from Eagle Energy against RMG, Eagle Energy Services, LLC and others who guaranteed a loan to Eagle Energy in Civil Action No. C02-9-328 in the 4th Judicial District of Sheridan County, Wyoming. Eagle Energy's claim is for a contract to drill a well for coalbed methane. RMG terminated the agreement because of the dangerous conditions of Eagle Energy's equipment and

62

other reasons. The claim against RMG is for approximately \$49,300. Negotiations to settle the lien and lawsuits are pending. Management believes that the ultimate outcome of this matter will not have an adverse affect on the company's financial condition or result of operations.

MARKET FOR COMMON STOCK, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

(a) Market Information

Shares of USE common stock are traded on the over-the-counter market, and prices are reported on a "last sale" basis on the Nasdaq Small Cap of the National Association of Securities Dealers Automated Quotation System ("Nasdaq"). The range by quarter of high and low sales prices was:

	High	Low
Quarter ended March 31, 2004	\$3.33	\$2.49
-----	-----	-----
Fiscal year ended December 31, 2003		
First quarter ended 3/31/03	\$ 3.85	\$ 2.95
Second quarter ended 6/30/03	5.92	3.12
Third quarter ended 9/30/03	5.70	3.15
Fourth quarter ended 12/31/03	3.68	2.30
Transition period ended December 31, 2002		

First quarter 8/31/02	\$ 3.95	\$ 2.00
Second quarter ended 11/30/02	4.20	3.38
Month ended 12/31/02	3.98	3.08
Fiscal year ended May 31, 2002		

First quarter ended 8/31/01	\$ 6.05	\$ 3.56
Second quarter ended 11/30/01	4.15	3.09
Third quarter ended 2/29/02	5.27	3.50
Fourth quarter ended 5/31/02	4.30	3.29
Fiscal year to ended May 31, 2001		

First quarter ended 8/31/00	\$ 3.00	\$ 1.75
Second quarter ended 11/30/00	3.38	1.75
Third quarter ended 2/28/01	4.00	2.00
Fourth quarter ended 5/31/01	6.25	3.56

(b) Holders

Edgar Filing: US ENERGY CORP - Form 424B3

(1) At May 4, 2004 the closing market price was \$2.21 per share and there were approximately 660 shareholders of record, with 13,658,645 shares of common stock issued and outstanding, including shares owned by our subsidiaries and shares in officers' and directors' names that are subject to forfeiture.

(2) Not applicable.

(c) We have not paid any cash dividends with respect to common stock. There are no contractual restrictions on our present or future ability to pay cash dividends, however, we intend to retain any earnings in the near future for operations.

63

(d) Equity Plan Compensation Information - Information about Compensation Plans as of December 31, 2003:

ITEM 6. SELECTED HISTORICAL AND PRO FORMA FINANCIAL DATA

The following sets forth selected historical financial data for U.S. Energy Corp. as of and for the dates indicated and selected pro forma financial data as of and for the year ended December 31, 2003. The selected financial data as of and for the years ended December 31, 2003, May 31, 2002, 2001, 2000 and 1999; and as of and for the seven months ended December 31, 2002 have been derived from our audited financial statements. The selected historical financial data for the year ended December 31, 2002 and as of and for the year ended December 31, 2001 has been derived from our unaudited financial statements and, in our opinion, has been prepared on the same basis as the audited financial statements, and includes all adjustments consisting of normal recurring adjustments, necessary for a fair presentation of this information.

The selected pro forma financial information reflects the Company's historical financial data for the year ended December 31, 2003 and the three months ended March 31, 2004 as adjusted for the acquisition of gas properties from Hi-Pro Production LLC on January 30, 2004. The pro forma selected operating data assumes the acquisition occurred January 1, 2003. For a description of the assumptions used in preparing the selected pro forma financial data, see the notes to the pro forma financial statements. The pro forma financial and operating data should not be considered as indicative of the historical results the company would have had or the future results the company will have due to the acquisition.

The financial data for the three months ended March 31, 2004 and March 31, 2003, has been derived from our unaudited financial statements that, in the opinion of management, reflect all adjustments necessary for a fair presentation of the financial data for those periods. Both our audited and unaudited financial statements are included in this registration statements.

The historical results presented below are not necessarily indicative of the results to be expected for any future period.

This information should be read together with "Management's Discussion and Analysis of Financial Condition and Results of Operations" immediately following these tables.

65

ITEM 6. SELECTED FINANCIAL DATA

Edgar Filing: US ENERGY CORP - Form 424B3

	December 31,		
	2003	2002	2001
	----	----	----
			(Unaudited)
Current assets	\$ 5,191,400	\$ 4,755,300	\$ 4,597,900
Current liabilities	1,909,700	2,044,400	2,563,800
Working capital (deficit)	3,281,700	2,710,900	2,034,100
Total assets	23,929,700	28,190,600	30,991,700

MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following is Management's Discussion and Analysis of significant factors, which have affected the company's liquidity, capital resources and results of operations during the periods included in the accompanying financial statements. The discussion contains forward-looking statements that involve risks and uncertainties. Due to uncertainties in the minerals business, the company's actual results may differ materially from the results discussed in any

Edgar Filing: US ENERGY CORP - Form 424B3

such forward-looking statements.

GENERAL OVERVIEW

The company and its subsidiaries historically have been involved in the acquisition, exploration, development and production of properties prospective for hard rock minerals including lead, zinc, silver, molybdenum, gold, uranium, oil and gas and commercial real estate. The company manages all of its operations through a joint venture, USECC Joint Venture ("USECC"), with one of its subsidiary companies, Crested Corp., of which it owns a consolidated 71.5%. The narrative discussion below refers only to the company (also referred to as "USE") but includes the consolidated financial statement of Crested, Rocky Mountain Gas, Inc. ("RMG"), Plateau Resources Ltd. ("Plateau"), USECC and other subsidiaries. The company has entered into partnerships through which it either joint ventured or leased properties with non-related parties for the development and production of certain of its mineral properties. Due to either depressed metal market prices or disputes in certain of the partnerships, all mineral properties have either been sold, reclaimed or are shut down. The company has had no production from any of its mineral properties during the periods from May 31, 2001 through December 31, 2003, except coalbed methane.

The company formed RMG to enter into the coalbed methane (CBM) business in 1999. The acquisition of leases and acreage for the exploration, development and production of coalbed methane has become the primary business focus of the company. At December 31, 2003, the company on a consolidated basis owned 88.5% of RMG. RMG has purchased or leased acreage for CBM exploration and development. RMG has entered into various agreements and joint operating agreements to develop and produce coalbed methane from these properties. Management of the company plans to create value in RMG by growing RMG into an industry recognized producer of CBM. Management believes the fundamentals of natural gas supply and demand are, and will remain favorable well into the future. Management further believes that the investments the company has made in RMG will provide a solid base of cash flows into the future.

The price that RMG receives for the sale of its coalbed methane is based on the Colorado Interstate Gas Index ("CIG") for the Northern Rockies. Historically, the highest prices realized on the CIG over a twelve-month period are during the months of December and January and the lowest prices realized are during the months of late summer or early fall. Calendar 2003 did not follow this trend as gas prices rose from a low of \$3.14 per mcf (thousand cubic feet) in January 2003 to a high of \$5.01 per mcf in March 2003. The following table represents a summary of historical CIG prices:

	PRICES PER MCF			
	2003	2002	2001	2000
12 Month High	\$ 5.01	\$ 3.33	\$ 8.63	\$ 5.95
12 Month Low	\$ 3.14	\$ 1.09	\$ 1.05	\$ 2.15
12 Month Average	\$ 3.98	\$ 1.97	\$ 3.50	\$ 3.37
December 31	\$ 4.44	\$ 3.33	\$ 2.13	\$ 5.95

70

Although management believes that gas prices will increase over the long

Edgar Filing: US ENERGY CORP - Form 424B3

term from present levels, no assurance can be given that will happen. Gas prices are directly affected by 1) weather conditions, which impact heating and cooling requirements; 2) electrical generation needs and 3) the amount of gas being produced by those companies in the gas production business. All of these factors are variable and cannot be accurately predicted. Many of the company's industry competitors are very large international companies that are well funded.

CRITICAL ACCOUNTING POLICIES

Readers of this document and users of the information contained in it should be aware of how certain events may impact our financial results based on the accounting policies in place. The policies we consider to be the most significant are discussed below. The company's management has discussed each critical accounting policy with the audit committee of the company's board of directors.

The selection and application of accounting policies is an important process that changes as our business changes and as accounting rules are developed. Accounting rules generally do not involve a selection among alternatives, but involve implementation and interpretation of existing rules and the use of judgment to the specific set of circumstances existing in our business.

OIL AND GAS PROPERTIES - The accounting for our business is subject to special accounting rules that are unique to the oil and gas industry. There are two allowable methods of accounting for oil and gas business activities: the successful efforts method and the full-cost method. The company follows the full-cost method of accounting under which all costs associated with property acquisition, exploration and development activities are capitalized. We also capitalize internal costs that can be directly identified with our acquisitions, exploration and development activities and do not include any costs related to production, general corporate overhead or similar activities. Under the successful efforts method, geological and geophysical costs and costs of carrying and retaining undeveloped properties are charged to expense as incurred. Costs of drilling exploratory wells that do not result in proved reserves are charged to expense. Depreciation, depletion, amortization and impairment of oil and gas properties are generally calculated on a well by well or lease or field basis versus the aggregated "full cost" pool basis. Additional gain or loss is generally recognized on all sales of oil and gas properties under the successful efforts method. As a result, our financial statements will differ from companies that apply the successful efforts method since we will generally reflect a higher level of capitalized costs as well as a higher oil and gas depreciation, depletion and amortization rate.

Capitalized costs are amortized on a composite unit-of-production method based on proved oil and gas reserves. Depreciation, depletion and amortization expense is based on the amount of estimated reserves. If we maintain the same level of production year over year, the depreciation, depletion and amortization expense may be significantly different if our estimate of remaining reserves changes significantly.

Proceeds from the sale of properties are accounted for as reductions of capitalized costs unless such sales involve a significant change in the relationship between costs and the value of proved reserves or the underlying value of unproved properties, in which case a gain or loss is recognized. No income is recognized in connection with contractual services provided by the company on properties in which we hold an economic interest.

The costs of unproved properties are excluded from amortization until the properties are evaluated. We review all of our unevaluated properties quarterly to determine whether or not and to what extent proved reserves have been assigned to the properties, and otherwise if impairment has occurred.

Unevaluated properties are grouped by major producing area where individual property costs are not significant and are assessed individually when individual costs are significant.

We review the carrying value of our oil and gas properties under the full-cost accounting rules of the Securities Exchange Commission on a quarterly basis. This quarterly review is referred to as a ceiling test. Under the ceiling test, capitalized costs, less accumulated amortization and related deferred income taxes, may not exceed an amount equal to the sum of the present value of estimated future net revenues less estimated future expenditures to be incurred in developing and producing the proved reserves discounted at 10%, less any related income tax effects. The two primary factors impacting this test are reserve levels and current prices, and their associated impact on the present value of estimate future net revenues. Revisions to estimates of natural gas and oil reserves and/or an increase or decrease in prices can have a material impact on the present value of estimate future net revenues. The process of estimating natural gas and oil reserves is very complex, requiring significant decisions in the evaluation of available geological, geophysical, engineering and economic data. The data for a given property may also change substantially over time as a result of numerous factors, including additional development activity, evolving production history and a continual reassessment of the viability of production under changing economic conditions. As a result, material revisions to existing reserve estimates occur from time to time. Although every reasonable effort is made to ensure that reserve estimates reported represent the most accurate assessments possible, the subjective decisions and variances in available data for various properties increases the likelihood of significant changes in these estimates. In addition, the prices of natural gas and oil are volatile and change from period to period. Price changes directly impact the estimated revenues from our properties and the associated present value of future net revenues. Such changes also impact the economic life of our properties and thereby affect the quantity of reserves that can be assigned to a property.

The volatility of oil and natural gas prices and the impact of revisions to reserve estimates can have a significant impact on the company's financial condition and results of operations.

ASSET RETIREMENT OBLIGATIONS - The company has adopted SFAS NO. 143, "Accounting for Asset Retirement Obligation". Under this statement the company is required to record the fair value of the reclamation liability on its shut down mining as gas properties as of the date that the liability is incurred. The company reviews the liability each quarter and determines if a change in the estimate is required. The company accrues the total liability on a quarterly basis for the future liability. The company also deducts any actual funds expended for reclamation during the quarter in which it occurs. Changes in inflation and environmental regulations, among other things, may cause significant future revisions in these estimates.

LONG LIVED ASSETS - The company evaluates its long-lived assets (other than oil and gas properties which are discussed above) for impairment when events or changes in circumstances indicate that the related carrying amount may not be recoverable. If the sum of estimated future cash flows on an undiscounted basis is less than the carrying amount of the related asset, an asset impairment is considered to exist. The impairment loss is measured by comparing estimated future cash flows on a discounted basis to the carrying amount of the asset. Changes in significant assumptions underlying future cash flow estimates may

Edgar Filing: US ENERGY CORP - Form 424B3

have a material effect on the company's financial position and results of operations. An uneconomic commodity market price, if sustained for an extended period of time, or an inability to obtain financing necessary to develop mineral interests, may result in asset impairment.

USE OF ACCOUNTING ESTIMATES - The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions. These estimates and assumptions affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

72

RECENT ACCOUNTING PRONOUNCEMENTS

SFAS 143 Effective January 1, 2003, the company adopted SFAS No. 143, "Accounting for Asset Retirement Obligation." The statement requires the company to record the fair value of the reclamation liability on its shut-down mining and gas properties as of the date the liability is incurred. The statement further requires the company to review the liability each quarter and determine if a change is required as well as accrue the total liability on a quarterly basis for the future liability.

The company will also deduct any actual funds expended for reclamation during the quarter in which it occurs. As a result of the company taking impairment allowances in prior periods on its shut-down mining properties, it has no remaining book value for these properties. See Note B to the audited financial statements.

LIQUIDITY AND CAPITAL RESOURCES - AT DECEMBER 31, 2003

During the year ended December 31, 2003, operations resulted in a loss of \$5,810,100 and consumed \$5,673,600 of cash. The company increased cash and cash equivalents during the same period by \$2,343,800. Investing activities provided \$6,964,000 as a result of the sale of CBM properties, sale of property and the reduction, after the approval of the Nuclear Regulatory Commission ("NRC"), of the cash bond for reclamation obligations. The increase in cash from investing activities of \$1,053,400 was as a result of the sale of the company's and RMG's common stock. Cash provided by investing activities was partly used to pay down third party debt.

During the year ended December 31, 2003, the company contributed its interest in producing methane gas properties to a new entity, Pinnacle Gas Resources, Inc. ("Pinnacle") See above, and Note F to the audited financial statements. The company will therefore not be receiving revenues from those properties. RMG continues to evaluate CBM properties and plans on generating cash flows from methane gas production. See Note P to the audited financial statements.

CAPITAL RESOURCES

A major component of the company's future cash flow projections is the ultimate resolution of litigation with Nukem, Inc. ("Nukem") over issues relating to Sheep Mountain Partners ("SMP") Partnership. On August 1, 2003, the U.S. District Court of Colorado entered a Judgment in favor of the company against Nukem in the amount of \$20,044,200. Nukem has appealed this Judgment to

Edgar Filing: US ENERGY CORP - Form 424B3

the 10th Circuit Court of Appeals ("CCA"). The company has filed a cross-appeal and answer to Nukem's appeal. See "Legal Proceedings" above. Should the 10th CCA affirm the District Court's Order and Judgment and/or grant the additional claims made by the company, the liquidity of the company will be significantly improved. Although no assurance can be given as to the outcome of the appeal, Nukem was required to post a supersedeas bond in the full amount of the Judgment with interest.

During the year ended December 31, 2003, the company sold its interests in the town site operations to a non-affiliated entity, The Cactus Group ("Cactus"). As a result of the sale of the town site, USE received cash of \$349,300 and a promissory note from Cactus in the amount of \$3,120,700. USE is to receive \$203,000 in payments from Cactus during calendar 2004. All of these payments will be applied to interest only. Cactus will continue to make monthly payments, primarily interest, until August 2008 at which time a balloon payment of \$2.8 million is due.

Other sources of capital are cash on hand; collection of receivables; receipt of monthly payments from an industry partner for the purchase of an interest in RMG's CBM properties; contractual funding of

73

drilling and development programs by non-affiliates; sale of excess equipment and real estate properties; a line of credit with a commercial bank, and equity financing of the company's subsidiaries.

The company has a \$750,000 line of credit with a commercial bank. The line of credit is secured by certain real estate holdings and equipment. At December 31, 2003, the full line of credit was available. The line of credit could be used for short-term working capital needs associated with operations.

CAPITAL REQUIREMENTS

The company will continue to maintain its uranium properties in a shut down mode during 2004 unless an industry partner funds the development costs of the properties. The company anticipates funding its gold property through 2004 and completing an equity funding in Canada which will provide the funds necessary to place that property into production. The company will also use its capital resources during 2004 to pay down debt and general and administrative expenses and reclamation costs associated with the SMP and Plateau uranium properties.

Our current level of operations, including general and administrative overhead, mineral operations (primarily holding costs for the uranium and gold properties), and costs to comply with lease and permitting obligations for the coalbed properties, are estimated to cost \$8,262,000 for the twelve months ending December 31, 2004. If we do not realize cash from liquidating assets, or other sources, or if RMG spends more money on exploration than will be covered by current arrangements, additional equity financing may be necessary to sustain the company's current level of operations after the second quarter 2004. There are no current commitments for such future financing as may be necessary.

MAINTAINING URANIUM PROPERTIES

SMP URANIUM PROPERTIES

The care and maintenance costs associated with the Sheep Mountain uranium mineral properties decreased by \$11,500 from \$28,000 as of December 31, 2002 to

Edgar Filing: US ENERGY CORP - Form 424B3

approximately \$16,500 per month at December 31, 2003. Included in the average monthly cost during the year ended December 31, 2003, is ongoing reclamation work on the SMP properties. It is anticipated that a total of \$125,000 in reclamation costs will be incurred during 2004.

PLATEAU RESOURCES URANIUM PROPERTIES

Plateau owns and maintains the Shootaring Canyon Uranium Mill (the "Shootaring Mill"). During the year ended December 31, 2003, Plateau requested a change in the status of the Shootaring Mill from active to reclamation from the NRC. The NRC granted the change in license status, which generated a surplus in the cash bond account of approximately \$2.9 million, which was released to Plateau.

During the year ended December 31, 2003, Plateau performed approximately \$209,600 in reclamation on the Velvet and Tony M mines and the Shootaring Mill. No further reclamation expenses are anticipated on the Velvet and Tony M mine properties. It is estimated that the company will incur approximately \$500,000 in reclamation costs at the Shootaring Mill during calendar 2004.

Although reclamation has been initiated on the Plateau properties, the company continues to evaluate the future of the properties as a result of the significant increases in the market price for uranium to approximately \$17.50/lb. U308 in March 2004 from approximately \$10.10/lb. in March 2003.

74

The cash costs per month, including reclamation costs, at the Plateau properties during calendar 2003 were approximately \$100,000 per month. These costs are projected to decrease to \$55,000 per month during the year ending December 31, 2004.

SUTTER GOLD MINING COMPANY PROPERTIES

Due to the recent increase in the price of gold, management of SGMC has decided to place its properties into production. No extensive development work or mill construction will be initiated until such time as funding from either debt or equity sources is in place. The goal is to have SGMC properties be self-supporting and not require any capital resources commitment from the company. Until such time as SGMC is able to raise its own capital, the company will continue to fund SGMC. Management projects that the total cash costs to be incurred in getting SGMC funded either through debt or equity will not exceed \$120,000. See Note P to the audited financial statements. No reclamation costs are projected to be incurred on the SGMC properties during 2004.

DEVELOPMENT OF COALBED METHANE PROPERTIES

The majority of the costs during the year ended December 31, 2003 for the development of RMG's CBM properties, was funded through an agreement that RMG entered into with CCBM, Inc. ("CCBM") a subsidiary of Carrizo Oil and Gas of Houston, Texas. At December 31, 2003, the balance remaining under this arrangement was \$610,200, one half of which was for the benefit of RMG. After this drilling commitment is completed by CCBM, RMG will have to fund its working interest amount on wells drilled.

During the year ended December 31, 2003, RMG and CCBM entered into a Subscription and Contribution Agreement with Credit Suisse First Boston Private

Edgar Filing: US ENERGY CORP - Form 424B3

Equity parties ("CSFB") to form Pinnacle Gas Resources, Inc. ("Pinnacle"). As a result of the formation of Pinnacle, RMG and CCBM contributed certain undeveloped and producing CBM properties to Pinnacle. RMG has the opportunity to increase its ownership in Pinnacle by purchasing common stock in Pinnacle through the exercise of options. Any increase in RMG's equity would be offset by contributions made by the other owners of Pinnacle. See "Transaction with Pinnacle Gas Resources, Inc." above. We do not anticipate exercising these options during calendar 2004 unless surplus capital resources are received. RMG has no capital commitments on the properties contributed to Pinnacle. See Note F to the audited financial statements.

RMG continues to pursue other investment and production opportunities in the CBM business. On January 30, 2004, RMG purchased the assets of a non-affiliated entity, which included both producing and non-producing properties. The purchase of these CBM assets was accomplished by the issuance of common stock and warrants of both RMG and USE and cash, the majority of which was borrowed as a result of mezzanine financing through Petrobridge Investment Management, LLC ("Petrobridge"). See "Acquisition of Producing and Non-Producing Properties from Hi-Pro Production, LLC" and Note P to the audited financial statements.

All cash flows from the sale of gas from the Hi-Pro properties are pledged to Petrobridge for the loan to purchase the Hi-Pro property. The Hi-Pro acquisition debt also requires minimum net production volumes through June 30, 2006 and maintenance of financial ratios. The Hi-Pro properties are held by RMG I, LLC, a wholly-owned subsidiary of RMG and are the sole collateral of the debt financing entity.

In addition, we don't expect the lenders under the mezzanine credit facility to fund more than the drilling and completion of five wells on proved undeveloped locations on the properties. Future equity financing by RMG, or industry financings, will be needed for RMG I, LLC to drill and complete wells on the substantial undeveloped acreage acquired from Hi-Pro. New production from this acreage could be

75

needed to service the acquisition debt to offset the impact of declining production from the producing properties and/or low gas prices.

The Petrobridge credit facility will fund the drilling and completion of five wells on proved undeveloped locations on the Hi-Pro properties. Future equity financing by RMG, or industry financings, will be needed for RMG I, LLC to drill and complete wells on the substantial undeveloped acreage acquired from Hi-Pro.

As a result of RMG's sale of property interests and the formation of joint operating ventures with industry partners, it is not anticipated that the company's capital resources will be used to fund RMG operations during the balance of 2004.

LIQUIDITY SUMMARY

The company's capital resources on hand at December 31, 2003 were sufficient to fund mine standby costs, limited reclamation and general and administrative expenses. Development of our gold property and undeveloped CBM properties will require funding from either debt or equity sources.

Edgar Filing: US ENERGY CORP - Form 424B3

RESULTS OF OPERATIONS - YEAR ENDED DECEMBER 31, 2003, PRIOR PERIODS

During the periods presented, the company has discontinued certain operations. Reclassifications to previously published financial statements have therefore been made to reflect ongoing operations and the effect of the discontinued operations. The company changed its year end to December 31 effective December 31, 2002.

The company began focusing its direction on the coal bed methane industry during the year ended May 31, 2002. At the same time the company began selling its other assets that produced revenues from commercial real estate operations, construction and drilling operations and the commercial repair of aircraft. The company has entered the coal bed methane industry and anticipates revenues from the production of coal bed methane during calendar 2004. Cash flows are projected to begin being recognized in calendar 2005 after debt on the company's newly acquired (from Hi - Pro) coal bed methane properties is retired.

YEAR ENDED DECEMBER 31, 2003 COMPARED TO THE YEAR ENDED DECEMBER 31, 2002

Revenues:

Revenues for the twelve months ended December 31, 2003 consisted of \$334,300 from real estate operations, \$287,400 from gas sales and \$215,600 from management fees. Revenues from gas sales were \$119,400 during the twelve months ended December 31, 2002 or an increase of \$168,000. This increase is as a result of the company producing and selling coal bed methane gas for six months during 2003 as compared only three months during 2002 as well as increased production rates during 2002.

The company recognized a minimal increase of \$23,400 in management fee revenues during the year ended December 31, 2003 to \$215,600 over the \$192,200 recognized in management fee revenues during the twelve months ended December 31, 2002. Management fee revenues were reduced after June 2003 when RMG contributed its producing and certain undeveloped properties to Pinnacle. Although RMG provided the transitional accounting services for Pinnacle through December 31, 2003, it received only its actual cost for those services.

76

Costs and Expenses:

Costs and expenses for the year ended December 31, 2003 were \$8,075,200 as compared to \$8,212,300 for the year ended December 31, 2002. Costs and expenses of real estate operations decreased by \$446,500 during that twelve months ended December 31, 2003 when compared to the costs and expenses incurred during the year ended December 31, 2002. This decrease was primarily as a result of the sale of various tracts of real estate.

During the year ended December 31, 2003 the company recognized \$313,100 in gas operating expenses. During the year ended December 31, 2002 \$355,200 in gas operating expenses were recorded. This reduction came as a result of no start up costs during the year ended December 31, 2003.

Mineral holding costs decreased by \$220,200 to \$1,461,700 at December 31, 2003 from \$1,241,500 at December 31, 2002. This decrease was as a result of the

Edgar Filing: US ENERGY CORP - Form 424B3

company placing all its mining properties on a shut-down status and reducing costs of holding those properties.

General and administrative costs increased by \$2,006,100 during the twelve months ended December 31, 2003 over the twelve months ended December 31, 2002. This increase was as a result of several non cash items. Non cash items which were expensed during the year ended December 31, 2003 were: depreciation and amortization of \$554,200; accretion of asset retirement obligations of \$366,700; amortization of debt discount of \$537,700; amortization of non cash services of \$134,700, and non cash compensation of \$893,500 for a total of \$2,486,800.

The amortization of debt discount increased primarily as a result of the acceleration in the discount amortization due to the conversion of approximately one half of the debt under the terms of \$1.0 million of debt to common shares of the company's common stock.

On January 1, 2003, the company adopted SFAS 143, Accounting for Asset Retirement Obligation. Under the terms of this accounting standard, the company is required to record the fair value of the reclamation liability on its shut-down mining and gas properties as of the date that the liability was incurred. The accounting standard further requires the company to review the liability and determine if a change in estimate is required as well as accrue the total liability for the future liability. As a result of the adoption of this accounting standard, the company recorded the non cash accretion of \$366,700.

Non cash compensation increased as a result of the initial funding of the 2001 Stock Award Plan whereby five of the executive officers of the company were granted a total of 100,000 shares of common stock at \$3.10 per share. Under the plan, each officer is to receive 10,000 shares of common stock annually under the condition that the shares cannot be sold until the officer's death or retirement. The plan was effective in 2001 and had not been funded. The funding for the twelve months ended December 2003 was therefore retroactive for two years. In addition to the increase due to the funding of the 2001 Stock Award Plan, the funding for the ESOP as well as the amortization of the deferred compensation recorded in prior periods were both for a full twelve months as compared to only seven months in the prior period.

The increase in the amortization of non cash services during the year ended December 31, 2003 resulted from the issuance of additional stock and warrants for legal and financial consulting services. These services related to the formation of Pinnacle and litigation with Phelps Dodge.

Other Income and Expenses:

Interest income decreased \$277,300 during the year ended December 31, 2003 when compared to the year ended December 31, 2002. This reduction in revenues occurred as a result of the company having

77

less amounts of cash invested in interest bearing accounts during the year ended December 31, 2003. Interest expense increased \$219,300 during the year ended December 31, 2003 over the year ended December 31, 2002. This increase was as a result of various financing activities that the company entered into with third party lenders.

Edgar Filing: US ENERGY CORP - Form 424B3

Effective January 1, 2003 the company adopted SFAS 143 "Accounting for Asset Retirement Obligations" which requires the company to record the fair value of the reclamation liability on its shut down mining and gas properties as of the date that the liability is incurred. The company is further required to accrete the total liability for the full value of the future liability. As a result of adopting this new accounting policy the company recorded a cumulative effect of accounting change of \$1,615,600 as well as an accretion expense of 366,700.

Operations for the year ended December 31, 2003 resulted in a loss of \$5,810,100 or \$0.52 per share as compared to a loss of \$7,322,300 or \$0.68 per share during the year ended December 31, 2002.

SEVEN MONTHS ENDED DECEMBER 31, 2002 COMPARED TO
THE SEVEN MONTHS ENDED DECEMBER 31, 2001

Revenues:

During the seven months ended December 31, 2002, the company recognized \$673,000 in revenues as compared to \$545,900 in revenues during the seven months ended December 31, 2001. This increase of \$127,100 in revenues was primarily as a result of the production and sale of CBM gas during the seven months ended December 31, 2002 of \$119,400 while no revenues from CBM production were recognized during the same period of the previous year.

Through the purchase of the Bobcat Field, RMG began selling CBM gas during the seven months ended December 31, 2002. As anticipated, production from these newly developed wells was lower than it will be in the future. Additionally, the market price for natural gas was very low during the summer and fall months of 2002. These reasons along with high start up and operating costs of \$355,200, resulted in a loss from operations for CBM of \$235,800. Management believes with increased production volumes, reduced ongoing operating costs and increased market prices for natural gas, the CBM properties will show profits and cash flows during 2003.

Costs and Expenses:

Costs and expenses during the seven months ended December 2002 were \$4,197,900 as compared to costs and expenses of \$4,460,800 during the seven months ended December 31, 2001. This reduction of \$262,900 was as a result of a reduction in the holding costs of shut-down mineral properties and an ongoing cost cutting program. These reductions in operating costs were offset primarily by the operating costs associated with CBM.

Other Income and Expenses:

During the seven months ended December 31, 2002, the company recognized a loss on the sale of assets of \$342,600 while it recognized a gain on the sale of assets during the seven months ended December 31, 2001 of \$592,600. The company also had an increase in interest expense of \$234,500 during the seven months ended December 31, 2002 over the same period of the previous year as a result of the interest on the company's convertible debt.

Edgar Filing: US ENERGY CORP - Form 424B3

Operations for the seven months ended December 31, 2002, resulted in a loss of \$3,840,100 or \$0.36 per share as compared to a loss of \$2,785,400 or \$0.34 per share for the seven months ended December 31, 2001.

FISCAL 2002 COMPARED TO FISCAL 2001

Revenues:

Revenues from operations decreased by \$1,038,400 to \$1,484,400 during fiscal 2002 from the \$2,522,800 recognized during fiscal 2001. Components of this decrease are reductions mineral sales of \$334,300; mineral royalties of \$108,500; and management fees of \$389,600. Mineral sales during fiscal 2001 resulted from the purchase of uranium oxide on the open market to fill uranium sales contracts and the sale of a uranium contract to a third party. We did not supply any of the uranium sold under the contracts from production out of our mines. We have not produced any minerals from mines for several years. The uranium contracts expired and no molybdenum advance royalties have been received since 2001.

There were no mineral sales during fiscal 2002 while there was one delivery under a uranium contract as well as the sale of one of the company's uranium contracts to a third party during fiscal 2001. Currently, the company does not have any delivery contracts for uranium or any other mineral. Depending on the outcome of the SMP litigation, the company may well have CIS pounds of uranium for which it will need to obtain delivery contracts.

The company holds a 6% gross royalty on the Mt. Emmons molybdenum deposit near Crested Butte, CO. Under the provisions of the royalty agreement, the company and Crested are to receive 50,000 pounds of molybdenum or its cash equivalent annually as an advance royalty. The royalty agreement was originally made with AMAX Inc. ("AMAX"), which was purchased by Cyprus Minerals Company in 1993 and changed its name to Cyprus Amax Minerals Company ("Cyprus Amax"). In 1999, Cyprus Amax was purchased by Phelps Dodge Corporation ("PD"). AMAX and Cyprus Amax had made the advance royalty payments to USECC on a timely basis. PD made one advance royalty payment and ceased making payments in fiscal 2001. PD suspended payments under the advance royalty agreement and has sued the company. The company has filed counter claims against Phelps Dodge requesting that the advance royalty be reinstated and other issues. It is not known what the outcome of this litigation will be.

Management fees were reduced by \$389,600 in fiscal 2002 from the prior period due to reduced activity in the entities from which management fees are collected.

Costs and Expenses:

During fiscal 2002, costs and expenses were reduced by \$1,061,100. This reduction came about as a result of holding costs of mineral properties being reduced by \$1,661,500 as a result of the company reducing costs associated with mineral properties that are shut down. The general and administrative costs were reduced by \$104,700. In addition to these reductions in costs and expenses, the company recognized an expense of \$123,800 in abandonment of mining equipment during fiscal 2001. There was no abandonment expense in fiscal 2002.

These reductions in costs and expenses were offset by increases in impairment of goodwill of \$1,622,700; provision for doubtful accounts of \$171,200, and other expenses of \$80,900. The impairment of goodwill came as a result of the company purchasing an additional 8.7% of RMG equity (1,105,499 shares of stock) by issuing 912,233 shares of the company's common stock. The

Edgar Filing: US ENERGY CORP - Form 424B3

shares of the

79

company's common stock were valued at \$3.92 per share. An impairment of \$1,622,700 was taken on this investment in RMG as RMG had no gas production and the impairment brought the total investment in RMG in line with the fair market value of the RMG assets.

A provision for doubtful accounts was provided on the balance of a note receivable that the company held for the sale of Ruby Mining Company to Admiralty Corporation. The note was in the original amount of \$225,000 and had been reduced to \$171,200. The note went in default during fiscal 2002 at which time the company began negotiations with Admiralty to resolve the issue of the outstanding balance. Terms were reached which required Admiralty to pay interest on the note, plus accrued interest, through August 2003, at which time the entire note balance would come due. Because of the financial condition of Admiralty, it is not known if that company will be able to pay the balance of the note when due. The entire amount of the note was therefore reserved.

Other Income and Expenses:

Gain on sale of assets income decreased by \$350,900 during fiscal 2002 to \$812,700. This decrease was as a result of the sale of a majority of the surplus mining equipment that the company had for sale during the prior year. During fiscal 2002, there was no income from litigation settlements while during fiscal 2001 there was \$7,132,800 in litigation settlement as a result of the company settling all issues pertaining to the litigation initiated by Kennecott. Interest income increased by \$152,400 during fiscal 2002 over fiscal 2001 as did interest expense which increased by \$80,000 for the same period. These increases were as a result of larger amounts of cash invested in interest bearing accounts and increased debt.

Operations for the twelve months ended May 31, 2002, resulted in a net loss of \$6,267,600 or \$0.67 per share as compared to net income of \$1,771,200 or \$0.23 per share for the previous year.

CONTRACTUAL OBLIGATIONS. The company had two divisions of contractual obligations as of December 31, 2003: Debt to third parties of \$2,249,800, and asset retirement obligations of \$7,264,700 required under these obligations are as follows:

	Total	Less than one year	One to three years	Three to five years	More five
	-----	-----	-----	-----	-----
Long-term debt obligations	\$2,249,800	\$ 932,200	\$1,285,800	\$ 31,800	\$
Capital lease obligations	--	--	--	--	
Operating lease obligations	--	--	--	--	
Purchase obligations	--	--	--	--	

Edgar Filing: US ENERGY CORP - Form 424B3

Other long-term liabilities	7,264,700	450,000	4,573,500	2,241,200	
	-----	-----	-----	-----	-----
Total obligations	\$9,514,500	\$1,382,200	\$5,859,300	\$2,273,000	\$
	=====	=====	=====	=====	=====

FUTURE OPERATIONS

We have generated operating losses for the year ended December 31, 2003, the seven months ended December 31, 2002 and in each of the three fiscal years ended May 31, 2002 as a result of costs associated with shut down mineral properties. We have discontinued our focus on these properties and at December 31, 2003 we are committed to be in the CBM business well into the future.

80

EFFECTS OF CHANGES IN PRICES

Mineral operations are significantly affected by changes in commodity prices. As prices for a particular mineral increase, prices for prospects for that mineral also increase, making acquisitions of such properties costly, and sales advantageous. Conversely, a price decline facilitates acquisitions of properties containing that mineral, but makes sales of such properties more difficult. Operational impacts of changes in mineral commodity prices are common in the mining industry.

NATURAL GAS. Our decision to expand into the CBM gas industry was predicated on the projections for natural gas demand and prices. The company is confident that it can maintain its costs at CBM industry standards but cannot predict what will happen to the price of CBM gas.

URANIUM AND GOLD. Changes in the prices of uranium and gold are not expected to materially affect operations during 2004.

MOLYBDENUM AND OIL. Changes in prices of molybdenum and petroleum are not expected to materially affect operations during 2004.

LIQUIDITY AND CAPITAL RESOURCES - AT MARCH 31, 2004

The company continues to implement its strategy of entering into the coalbed methane business. Capital resources needed to make this change of business direction have been derived by the issuance of equity; obtaining third party debt and the sale of certain interests in coal bed methane. These capital resources have been used to purchase and operate both developed and undeveloped coalbed methane properties.

Although operations for the quarter ended March 31, 2004 resulted in a loss, management projects that coalbed methane property operations will become profitable during calendar 2004. In the first quarter 2004, the only gas sales were from the Hi-Pro assets. As expected, initial operating expenses for this field were high and will continue to be high, as we continue to refurbish production equipment to enhance production volumes. A substantial amount of routine maintenance work had been deferred by the Hi-Pro sellers prior to January 30, 2004. Although this is a mature field, efforts through mid-May 2004 to increase production have been successful, and further increases in 2004 are expected. All net operating profits from this field will be applied automatically to pay the mezzanine debt incurred in the purchase transaction.

Edgar Filing: US ENERGY CORP - Form 424B3

Liquidity of the company improved during the three months ended March 31, 2004 as a result of the financing activities entered into during the quarter. The purchase, exploration and development of coalbed methane properties is a capital intensive business. Continued capital resources will need to be obtained to continue in the coalbed methane business. Management of the company continues to search for sources of capital to fully develop its undeveloped properties. In addition to equity and debt financings, the company will continue to seek out industry partners to assist in funding projects.

Cash reserves on hand at March 31, 2004, are not sufficient to complete all the development plans that the company is currently contemplating. If sufficient capital resources are not located, the company will have to implement alternate plans which could include delaying development of certain properties or selling a portion of the company's coalbed methane property assets.

CAPITAL RESOURCES

The primary sources of our capital resources are cash on hand; equity financings; the final determination of the Sheep Mountain Partners ("SMP") arbitration/litigation; proceeds under the line of credit; receipt of

81

monthly payments from CCBM, Inc. ("CCBM") for the purchase of an interest in RMG's coalbed methane properties; CCBM funding of drilling and exploration programs; projected production from RMG's coalbed methane properties; receipt of monthly payments from the Cactus Group on the sale of the Ticaboo townsite; sale of excess mine, construction and drilling equipment; sale of real estate properties which are no longer needed in the core business of the company; and the sale of partial ownership interests in exploration properties.

We have been involved in litigation with Nukem, Inc. involving Sheep Mountain Partners, ("SMP") for the past twelve years. On August 1, 2003, the company and Crested received a Judgment from the U.S. District Court of Colorado in the amount of \$20,044,184 against Nukem, Inc. The Judgment was entered and defendant Nukem posted a supersedeas bond in the full amount of the Judgment plus interest for one year, which was approved by the Court. Nukem filed a motion to alter and amend portions of the Order and Judgment and a motion to remand the case to the Arbitration Panel. The company also filed a motion to alter and amend certain portions of the Order and Judgment. Both motions were overruled. Nukem filed an appeal and the company filed a cross-appeal to the 10th Circuit Court of Appeals. Management is optimistic that the ultimate determination will be favorable to the company. No assurance, however, can be given as to the outcome of this litigation.

As of March 31, 2004, there was a balance of \$273,900 available to RMG under the CCBM work commitment. There was also a balance of \$704,800 at March 31, 2004 due from CCBM under its purchase agreement. Under the terms of the promissory note, this amount is to be paid at the rate of \$52,800 per month until November 2004 at which time a balloon payment of \$282,400 is due. These funds will fund a portion of the work plans that the company anticipates completing during the second and third quarters of 2004. CCBM's interest in RMG's coalbed methane properties is pledged as security for the note to RMG. CCBM can discontinue making payments at any time subject to certain earn-in provisions and penalties.

During the three months ended March 31, 2004, the company through RMG

Edgar Filing: US ENERGY CORP - Form 424B3

signed a credit agreement with a group of mezzanine credit lenders for up to \$25,000,000 of loans. The commitment is through June 30, 2006. All borrowings are due three years from the date of funding. The credit facility is available to RMG to purchase and improve coalbed methane properties subject to a development plan. The first draw down, in the amount of \$3.7 million, was made at the end of January 2004 to partially fund the purchase of the Hi-Pro Production LLC. ("Hi-Pro") properties. The company is currently evaluating additional prospective acquisition targets which will be funded from this credit facility.

The company and Crested currently have a \$750,000 line of credit with a commercial bank. At March 31, 2004, the entire line of credit was available to the company and Crested.

During the three months ended March 31, 2004, operating and investing activities consumed \$1,306,200 and \$4,106,800, respectively while financing activities provided \$5,525,100. These activities are consistent with the company's stated business plan of entering into the coalbed methane gas business. The capital resources which were obtained through the sale of equity of both the company and RMG, were used to purchase additional properties and reduce long term debt.

CAPITAL REQUIREMENTS

The primary requirement of the company for capital resources at March 31, 2004 is the funding of the purchase, exploration and development of its coalbed methane properties. Other requirements for capital resources include the maintaining and reclamation of certain mine properties that are currently in a shut-down mode.

82

PURCHASE AND EXPLORATION OF COALBED METHANE PROPERTIES

During the quarter ended March 31, 2004, the company through RMG purchased producing and undeveloped coalbed methane properties from Hi-Pro. The purchase price for the properties was \$6.8 million subject to certain adjustments. (See Note 12 above) In addition to the purchase of the coalbed methane properties, certain equipment, tools and inventory were also purchased for a total consumption of cash of \$162,900. The company also expended \$40,500 for the development of certain coalbed methane properties.

During the balance of calendar 2004, the company will continue to rely on funding under the CCBM work commitment to provide capital for a significant portion of its projected development drilling work on properties other than Hi-Pro. Any drilling or development work that is not covered by the CCBM work commitment, will either be funded through capital resources discussed above or delayed until such time as the necessary capital is obtained.

MAINTAINING MINERAL PROPERTIES

SMP URANIUM PROPERTIES

The holding costs associated with the uranium properties in Wyoming formerly owned by Sheep Mountain Partners ("SMP"), are approximately \$14,000 per month. It is estimated that approximately \$142,000 in reclamation work will be completed on the SMP properties during 2004.

Edgar Filing: US ENERGY CORP - Form 424B3

PLATEAU RESOURCES URANIUM PROPERTIES

Plateau owns and maintains the Tony M uranium mine and Shootaring Canyon uranium mill. We are pursuing alternative uses for these properties including the potential sale or entering into a joint venture to operate the uranium mill.

SUTTER GOLD MINING COMPANY PROPERTIES ("SGMC")

We have one full time equivalent employee at the SGMC properties to preserve the core properties. SGMC is seeking equity financing through a potential merger with a Canadian mining company to develop the property. The commitment of capital resources to the Sutter properties will be held at a minimum until such time as financing is available or the properties are sold.

DEBT PAYMENTS

Debt to non-related parties at March 31, 2004 was \$5,246,400. This debt consists of debt owed by RMG I to mezzanine lenders to purchase the Hi-Pro assets of \$3.3 million; long term debt related to the purchase of vehicles and a corporate aircraft of \$1.5 million, and convertible debt. The commitment of capital resources during the balance of calendar 2004 for equipment debt is \$430,700. The convertible debt is a forced conversion to common stock of the company so will not require any of the company's capital resources. The mezzanine lenders for the Hi-Pro acquisition sweep all funds from operations of the field to pay interest and principal with the exception of funds to pay (a) lease operating expenses, (b) royalties and (c) production related taxes.

RECLAMATION COSTS

The asset retirement obligations are long term and are either bonded through the use of cash bonds or the pledge of assets. It is anticipated that \$142,000 of reclamation work on the SMP properties and \$500,700 on the southern Utah mine uranium mine properties will be performed during 2004. The company has submitted

83

a reclamation plan to the Nuclear Regulatory Commission ("NRC") for the reclamation of the Shootaring Uranium Mill. The company has begun portions of the Shootaring reclamation during 2004.

The asset retirement obligation on the Plateau uranium mining and milling properties in Utah at March 31, 2004 is \$5,189,500, which is reflected on the Balance Sheet. This liability is fully funded by cash investments that are recorded as long term restricted assets.

The asset retirement obligation of the Sheep Mountain uranium properties in Wyoming at March 31, 2004 are \$2,075,400 and are covered by a reclamation bond which is secured by a pledge of certain real estate assets of the company and Crested.

The asset retirement obligation on the RMG coalbed methane properties in Wyoming are \$372,100. It is not anticipated that any reclamation work will commence on the coalbed methane properties during 2004.

RESULTS OF OPERATIONS - THREE MONTHS ENDED MARCH 31, 2004 AND 2003

Edgar Filing: US ENERGY CORP - Form 424B3

During the three months ended March 31, 2004, the company recorded a loss of \$1,775,000 from continuing operations as compared to a loss of \$1,130,500 from continuing operations for the three months ended March 31, 2003.

Revenues for the three months ended March 31, 2004 were \$867,500 as compared to \$425,100 for the three months ended March 31, 2003. This increase in revenues of \$442,400 was as a result of the increase in gas sales and management fees received by the company. These increases were directly as a result of the purchase of the Hi-Pro assets during the three months ended March 31, 2004. In addition, the purchase of the Hi-Pro properties resulted in an increase of \$590,600 in gas operating expenses.

With the exception of expenses incurred at the Sutter Gold Mine to complete the permitting process and place the SGMC properties in a position of being able to be merged with an industry partner, the other increases in operating costs and expenses are directly related to the acquisition of the Hi-Pro assets. As a result of the purchase of those assets, the company has added additional personnel to manage the properties as well as professional staff to direct operations and assess the potential of acquisition targets. The company also incurred approximately \$252,700 in professional services in the Hi-Pro acquisition.

Other income and expenses for the three months ended March 31, 2004, increased by \$115,400 over the same period of the previous year primarily as a result of the sale of Ruby Mining stock for \$279,200. The major offset to this increase was an increase in interest expense of \$57,300. This increase in interest expense was as a result of interest paid to an investor under a convertible debt which was entered into in a prior year.

The company recorded non-cash income of \$1,615,600 during the three months ended March 31, 2003, as a result of the implementation of SFAS No. 143. There was no similar non-cash income during the three months ended March 31, 2004.

During the quarter ended March 31, 2004, the company recognized a net loss of \$1,775,000 or \$0.14 per share as compared to net income of \$308,700 or \$0.03 per share during the three months ended March 31, 2003.

CONTRACTUAL OBLIGATIONS

The company has two divisions of contractual obligations as of March 31, 2004: Debt to third parties of \$5,246,400, and asset retirement obligations of \$7,637,000 which will be paid over a period of five to seven years. During the quarter ended March 31, 2004 the company incurred new debt of \$3,356,700, in the

84

acquisition of the assets of the Hi-Pro company. The company did an initial valuation of the asset retirement obligation of the acquired assets, of \$372,100. The following table shows the schedule of the payments on the debt, and the budgeted retirement of the asset obligations.

	Payments Due by Period		
	Less than One Year	One to Three Years	Three to Five Years
Total			

Edgar Filing: US ENERGY CORP - Form 424B3

	-----	-----	-----	-----
Long-term debt obligations	\$ 5,246,400	\$ 603,400	\$ 4,618,600	\$ 24,400
Other long-term liabilities	7,637,000	642,700	2,727,200	1,597,900
	-----	-----	-----	-----
Totals	\$ 12,883,400	\$ 1,246,100	\$ 7,345,800	\$ 1,622,300
	=====	=====	=====	=====

QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

GAS HEDGING ACTIVITIES

Our results of operations and operating cash flows are impacted by changes in market prices for gas. To mitigate a portion of the exposure to adverse market changes, the Company has entered into a derivative instrument. As of March 31, 2004, our gas derivative instruments are comprised of swaps. These instruments allow the Company to predict with greater certainty the effective gas prices to be received for our hedged production. Although derivatives often fail to achieve 100% effectiveness for accounting purposes, we believe our derivative instrument will continue to be highly effective in achieving the risk management objectives for which they are intended.

For swap instruments, the Company receives a fixed price for the hedged commodity and pays a floating market price, as defined in each instrument, to the counterparty. The fixed-price payment and the floating-price payment are netted, resulting in a net amount due to or from the counterparty.

In accordance with FASB Interpretation No. 39, the Company nets the value of its derivative arrangements with the same counterparty in the accompanying consolidated balance sheets, to the extent that a legal right of setoff exists.

Gain or losses from derivative transactions are reflected as adjustments to gas sales on the consolidated statements of operations. Following provisions of SFAS 133, changes in the fair value of derivative instruments designated as cash flow hedges, to the extent they are effective in offsetting cash flows attributable to the hedged risk, are recorded in other comprehensive income until the hedged item is recognized in earnings. Any change in fair value resulting from ineffectiveness is recognized currently in gas sales. No ineffectiveness was recorded in the quarter ended March 31, 2004.

As of March 31, 2004, the Company had the following open gas derivative instruments designed to hedge a portion of our gas production for periods after March 31, 2004:

85

NATURAL GAS (MMBTU):

	Weighted- Average Strike Price	Fair Value at March 31, 2004
Volume Mmbtu	-----	-----
-----	-----	-----

Swaps:

Edgar Filing: US ENERGY CORP - Form 424B3

2004	540,000	\$4.76	\$ (80,800)
2005	360,000	4.14	(171,500)

Total Gas	900,000		\$ (252,300)
			=====

The Company has established the fair value of all derivative instruments using appropriate future cash flow valuation methodology. The actual contribution to our future results of operations will be based on the market prices at the time of settlement and may be more or less than the fair value estimates used at March 31, 2004.

Based upon the market prices as of March 31, 2004, the Company expects to transfer approximately \$252,300 of losses included in the balance sheet in accumulated other comprehensive loss to earnings during the next 21 months. All hedged transactions as of March 31, 2004, are expected to mature by December 31, 2005.

Additional information concerning the fair value of our gas derivative instruments is as follows for the quarter ended March 31, 2004:

Fair value of contracts outstanding as of January 1	\$ --
Change in fair value of contracts during the quarter	--
Contracts realized or otherwise settled during the quarter	--
Fair value of new contracts when entered into during the quarter	(252,300)
Fair value of contracts when closed during the quarter	--

Fair value of contracts outstanding as of March 31	\$ (252,300)
	=====

Derivative instruments reflected as current in the consolidated balance sheet represent the estimated fair value of derivative instrument settlements scheduled to occur over the subsequent twelve month period based on market prices for gas as of the consolidated balance sheet date. The derivative settlement amounts are not due and payable until the month in which the related underlying hedged transaction occurs.

The Company uses a sensitivity analysis technique to evaluate the hypothetical effect that changes in the market value of gas may have on the fair value of its commodity hedging instruments. At March 31, 2004, a 10% change in the underlying commodities' prices would change the net liabilities recorded for the Company's hedging instruments by approximately \$411,000.

DIRECTORS AND EXECUTIVE OFFICERS

Information about the directors and executive officers of the company follows. As near as possible, the board of directors is divided into groups of two, with each director serving a term of three years from election.

Executive officers are elected by the board of directors at the annual

Edgar Filing: US ENERGY CORP - Form 424B3

directors' meeting, which follows each Annual Shareholders' Meeting, to serve until his successor has been duly elected.

FAMILY RELATIONSHIPS

Keith G. Larsen, a director, President and COO, and Mark J. Larsen, President of Rocky Mountain Gas, Inc., are sons of John L. Larsen, Chairman, CEO and a principal shareholder. Harold F. Herron, a director and Senior Vice-President, is a former son-in-law of John L. Larsen. Nick Bebout, a director, is a nephew of Daniel P. Svilar, a principal shareholder, Secretary and General Counsel. There are no other family relationships among the executive officers or directors of the company.

BUSINESS EXPERIENCE AND OTHER DIRECTORSHIPS OF DIRECTORS

JOHN L. LARSEN, age 72, has been principally employed as an officer and director of the company and Crested Corp. for more than the past five years. Mr. Larsen is the Chairman of the Board and Chief Executive Officer. He is also the Chairman and a director of Crested, an affiliate of the company. Crested has registered equity securities under the Securities Exchange Act of 1934 (the "Exchange Act"). Mr. Larsen is Chief Executive Officer and Chairman of the board of directors of Plateau Resources, Limited and President and a director of Sutter Gold Mining company, and he is a director of Rocky Mountain Gas, Inc. and Yellow Stone Fuels Corp.

KEITH G. LARSEN, age 45, has been principally employed by the company and Crested for more than the past five years. He has been a director of the company and its President and Chief Operating Officer since November 25, 1997. Mr. Larsen is also the Chief Executive Officer and a director of Rocky Mountain Gas, Inc. and is a director of Crested.

HAROLD F. HERRON, age 50, has been the company's Vice-President since January 1989, and now is Senior Vice President. Mr. Herron was the President of The Brunton Company, which was a wholly-owned subsidiary until Brunton was sold in February 1996. Mr. Herron is president and a director of NWG, President and a director of Plateau, Chief Executive Officer and a director of Sutter Gold Mining Company, and a director of Rocky Mountain Gas, Inc. Mr. Herron received an M.B.A. degree from the University of Wyoming after receiving a B.S. degree in Business Administration from the University of Nebraska at Omaha.

DON C. ANDERSON, age 76, has been a company director since May 1990. From January 1990 until mid-1993, Mr. Anderson was the Manager of the Geology Department for the company. Mr. Anderson was Manager of Exploration and Development for Pathfinder Mines Corporation, a major domestic uranium mining and milling corporation, from 1976 until his retirement in 1988. Previously, he was Mine Manager for Pathfinder's predecessor, Utah International, Inc., from 1965 to 1976. He received a B. S. degree in geology from Brigham Young University.

NICK BEBOUT, age 53, has been director of the company since 1989. He has been a director and President of NUCOR, Inc. ("NUCOR"), a privately-held corporation that provides exploration and development drilling services to the mineral and oil and gas industries, since 1987. Prior to that time, Mr.

87

Bebout was Vice President of NUCOR from 1984. Mr. Bebout is also an officer, director and owner of other privately-held entities involved in the resources

Edgar Filing: US ENERGY CORP - Form 424B3

industry.

H. RUSSELL FRASER, age 62, has been a director of the company since 1996 and a director of Rocky Mountain Gas, Inc. since 1999. He is past President and director of American Capital, Inc., the first "A" rated financial guarantee company in New York, New York. Mr. Fraser was chairman of the board and chief executive officer of Fitch Investors Services, L.P. for more than the past five years. Fitch Investors Services, L.P., New York, New York, is a nationwide stock and bond rating and information distribution company. From 1980-1989, Mr. Fraser served as president and chief executive officer of AMBAC, the oldest municipal bond issuer in the United States.

Before joining AMBAC, Mr. Fraser was senior vice president and director of fixed-income research at PaineWebber, Inc. While a member of the board of directors at PaineWebber, Mr. Fraser participated in both the corporate and public finance departments and headed PaineWebber's trading and sales for all corporate bond products. Previously, he managed corporate ratings at Standard & Poor's, supervising research analysis of corporate bonds, preferred stock, and commercial paper. Mr. Fraser holds a B.S. in finance and economics from the University of Arizona. He is a member of the Municipal Analysts Group of New York and founder of the Fixed Income Analysts Society.

MICHAEL THOMAS ANDERSON, age 52, was appointed to the board of directors on May 23, 2003. Mr. Anderson has run his own accounting and consulting practice since 1993. Prior to that, he was chief financial officer for an operating unit of a Fortune 500 company for eight years. From 1977 to 1985, Mr. Anderson worked in public accounting. He is a member of the AICPA and The Wyoming Society of CPAs. Mr. Anderson holds a B.S. degree in accounting from Brigham Young University.

INFORMATION CONCERNING EXECUTIVE OFFICERS WHO ARE NOT DIRECTORS

The following persons are executive officers of the company but are not directors.

DANIEL P. SVILAR, age 75, has been General Counsel for USE and Crested for more than the past five years. He also is Secretary and a director of Crested, and Secretary of USE. His positions of General Counsel to, and as officers of the companies, are at the will of the board of directors. There are no understandings between Mr. Svilar and any other person pursuant to which he was named as officer or General Counsel. He has no family relationships with any of the other executive officers or directors of USE or Crested, except his nephew Nick Bebout is a USE director. During the past five years, Mr. Svilar has not been involved in any Reg. S-K Item 401(f) proceeding.

ROBERT SCOTT LORIMER, age 53, has been Chief Accounting Officer, Chief Financial Officer and Treasurer for both USE and Crested for more than the past five years. Mr. Lorimer also has been their Vice President Finance since April 1998. He serves at the will of the board of directors. There are no understandings between Mr. Lorimer and any other person, pursuant to which he was named as an officer, and he has no family relationship with any of the other executive officers or directors of USE or Crested. During the past five years, he has not been involved in any Reg. S-K Item 401(f) listed proceeding.

MARK J. LARSEN, age 41, became the President of RMG on October 15, 2003. He was formerly the Director of Business Development for RMG and since its inception has played a lead role in each of the company's financings, acquisitions, the Carrizo partnership and the formation of Pinnacle Gas Resources, Inc. Mr. Larsen is also the Director of Business Development and Operations Manager for USE. Since 1997 he also has led the transition of USE from uranium mining to natural gas development. Mr. Larsen is the son of John L. Larsen, Chairman and CEO of U.S. Energy Corp.

88

EXECUTIVE COMPENSATION

Under a Management Agreement dated August 1, 1981, USE and Crested share certain general and administrative expenses, including compensation of the officers and directors of the companies (but excluding directors' fees) which have been paid through the USECC Joint Venture ("USECC"). Substantially all the work efforts of the officers of USE and Crested are devoted to the business of both companies.

All USECC personnel are employees of USE, in order to utilize the company's ESOP as an employee benefit mechanism. The company charges USECC for the direct and indirect costs of its employees for time spent on USECC matters, and USECC charges one-half of that amount to Crested and the company.

The following table sets forth the compensation paid to the USE Chief Executive Officer, and the four USE executive officers, and Mark J. Larsen, President of RMG, in 2001, 2002 (and the seven months ended December 31, 2002), and 2003. The company changed its fiscal year in 2002 from the (former) period ending May 31, to the calendar fiscal year ending December 31.

89

SUMMARY COMPENSATION TABLE

(a) Name and Principal Position	(b) Year	Annual Compensation			Long Term Compensation

President of RMG						

* For seven months June 1, 2002 to December 31, 2002

** Mr. Larsen became President of RMG on October 15, 2003. Compensation paid to Mr. Larsen as an employee of the company(not an officer) before that date is not included in the table.

(1) Dollar values for ESOP contributions.

(2) Consists of a bonus granted to officers and employees after the conclusion of the formation of Pinnacle Gas and an additional bonus granted to officers and employees after the successful release of a portion of the cash bond for reclamation of the Shootaring Canyon uranium mill and a Christmas Bonus. Mr. Herron was instrumental in growing The Brunton Company to the level that it could be sold to a third party. For his efforts the company granted Mr. Herron a bonus which is paid out over several years, ending in August 2004. See note (8) for data on payments prior to 2003. A break down of the bonuses paid to the officers of the company during the year ended December 31, 2003 is as follows:

90

Name	Pinnacle Bonus	Shootaring Bonus	Brunton Bonus	Christmas Bonus
----	-----	-----	-----	-----
John L. Larsen	\$ 10,000	\$ 7,500	\$	\$ 7,800
Keith G. Larsen	25,000	7,500		7,500
Daniel P. Svilar	10,000	7,500		7,200
Harold F. Herron	10,000	12,500	36,900	6,400
Robert Scott Lorimer	10,000	7,500		6,500
Mark J. Larsen	20,000	7,500		5,800

(3) Consists of Christmas bonus amounts granted to employees during the seven month period ended December 31, 2002.

(4) Consists of \$10,000 bonus granted to officers and employees after the conclusion of a coalbed methane gas transition, and a Christmas bonus granted to employees. The Christmas bonus amounts granted for John L. Larsen, Keith G. Larsen, Daniel P. Svilar, Harold F. Herron and Robert Scott Lorimer during the

Edgar Filing: US ENERGY CORP - Form 424B3

fiscal year ended May 31, 2002 were \$8,000, \$7,700, \$7,400, \$6,700 and \$7,000, respectively.

(5) Consists of a Christmas bonus paid in fiscal 2001.

(6) Consists 20,000 shares issued to each Officer pursuant to the company's 2001 Stock Compensation Plan. Under the terms of the plan each Officer is to receive 10,000 shares of the company's common stock or some other portion as approved by the compensation committee. There were no issuances of shares under the plan during the years ended May 31, 2001 and 2002 or the seven months ended December 31, 2002. The issuance of these shares to the officers was therefore retroactive for the funding of the shares due each officer for 2002 and 2003. The company has agreed under the terms of the plan to pay all taxes due. The officer has agreed not to sell these shares to the market or pledge them on obligations until after his (i) retirement; (ii) total disability or (iii) in the case of the death of the officer his estate may sell the shares of stock. Also includes shares issued under the 1996 stock award program multiplied by \$3.50 (the closing market price on the issue date for the year ending December 31, 2003). These shares are subject to forfeiture on termination of employment, except for retirement, death or disability. If the company were to pay a stock dividend, dividends would be paid on these shares. The shares issued to each officer were 15,774, 11,830, 7,887 and 7,887 shares to John L. Larsen, Daniel P. Svilar, Harold F. Herron and Robert Scott Lorimer, respectively. This is the final funding under the company's 2001 Stock Compensation Plan.

(7) Consists of shares issued under the 1996 stock award program multiplied by \$5.35 and \$3.90 (the closing market price on the issue dates for former fiscal years 2001 and 2002 respectively) These shares are subject to forfeiture on termination of employment, except for retirement, death or disability. If the company were to pay a stock dividend, dividends would be paid on these shares. The following table lists the number of shares issued to each executive each year.

Name	Number of Shares	
	2001	2002
John L. Larsen	20,000	20,000
Keith G. Larsen	-0-	-0-
Daniel P. Svilar	15,000	15,000
Harold F. Herron	10,000	10,000
R. Scott Lorimer	10,000	10,000

91

(8) Mr. Herron was instrumental in growing The Brunton Company to the level that it could be sold to a third party. For his efforts the company granted Mr. Herron a bonus which is paid out over several years, ending in August 2004. The amount of the bonus paid was \$21,200 \$36,900, and \$36,900 for the seven months ended December 31, 2002, and the fiscal years ended May 31, 2002 and 2001, respectively. The total bonus paid to Mr. Herron also includes a bonus of \$6,600 for the seven months ended December 31, 2002, and \$6,700 and \$3,900 for fiscal years ended May 31, 2002 and 2001, respectively, and a \$10,000 bonus paid in 2002 to officers and employees after the conclusion of a coalbed methane gas transaction.

Edgar Filing: US ENERGY CORP - Form 424B3

(9) Stock options granted pursuant to the company's 2001 Incentive Stock Option Plan. See details of the options under "Grants to Executive Officers (Qualified and Nonqualified)" below.

(10) Stock options granted pursuant to the company's 1998 Incentive Stock Option Plan. See details of the options under "Grants to Executive Officers (Qualified and Nonqualified)" below.

EXECUTIVE COMPENSATION PLANS AND EMPLOYMENT AGREEMENTS

The company has adopted a plan to pay the dependants of Messrs. J. Larsen and Svilar amounts equivalent to the salaries they are receiving at the time of their death, for a period of one year after death, and reduced amounts for up to five years thereafter. The amounts to be paid in such subsequent years have not yet been established, but would be established by the boards of directors of the company and Crested.

Mr. Svilar has an employment agreement with the company and Crested, which provides for an annual salary in excess of \$100,000, with the condition that Mr. Svilar pay an unspecified amount of expenses incurred by him on behalf of the company and its affiliates. In the event Mr. Svilar's employment is involuntarily terminated, he is to receive an amount equal to the salary he was being paid at termination, for a year. If he should voluntarily terminate his employment, the company and Crested will pay him that salary for nine months thereafter. The foregoing is in addition to Mr. Svilar's Executive Severance and Non-Compete Agreement with the company (see below).

In fiscal 1992, the company signed Executive Severance and Non-Compete Agreements with Messrs. John L. Larsen, Svilar and Lorimer, providing for payment to such person upon termination of his employment with the company, occurring within three years after a change in control of the company, of an amount equal to (i) severance pay in an amount equal to three times the average annual compensation over the prior five taxable years ending before change in control, (ii) legal fees and expenses incurred by such persons as a result of termination, and (iii) the difference between market value of securities issuable on exercise of vested options to purchase securities in USE, and the options' exercise price. These Agreements also provide that for the three years following termination, the terminated individual will not compete with USE in most of the western United States in regards to exploration and development activities for uranium, molybdenum, silver or gold. During fiscal 2001, the company signed similar Agreements with Keith Larsen, Mark Larsen, Richard Larsen, and Harold Herron. For such non-compete covenant, such persons will be paid monthly over a three year period an agreed amount for the value of such covenants. These Agreements are intended to benefit the company's shareholders, by enabling such persons to negotiate with a hostile takeover offeror and assist the board of directors concerning the fairness of a takeover, without the distraction of possible tenure insecurity following a change in control. As of this proxy statement, the company is unaware of any proposed hostile takeover.

The company and Crested provide all of their employees with certain forms of insurance coverage, including life and health insurance, with the exception of Messrs. John L. Larsen and Daniel P. Svilar. The company and Crested reimburse Messrs. John Larsen and Svilar for their medicare supplement

92

premiums. The health insurance plan does not discriminate in favor of executive employees; life insurance of \$200,000 is provided to each member of upper

Edgar Filing: US ENERGY CORP - Form 424B3

management (which includes all persons in the compensation table), \$100,000 of such coverage is provided to middle-management employees, and \$90,000 of such coverage is provided to other employees.

EMPLOYEE STOCK OWNERSHIP PLAN ("ESOP"). An ESOP has been adopted to encourage ownership of the common stock by employees, and to provide a source of retirement income to them. The ESOP is a combination stock bonus plan and money purchase pension plan. It is expected that the ESOP will continue to invest primarily in the common stock. Messrs. J. Larsen and Herron are the trustees of the ESOP.

Contributions to the stock bonus plan portion of the ESOP are discretionary and are limited to a maximum of 15% of the covered employees' compensation for each accounting year. Contributions to the money purchase pension portion of the ESOP are mandatory (fixed at ten percent of the compensation of covered employees for each year), are not dependent upon profits or the presence of accumulated earnings, and may be made in cash or shares of company's common stock.

The company made a contribution of 76,794 shares to the ESOP for the twelve months ended December 31, 2003, all of which were contributed under the money purchase pension plan. At the time the shares were contributed, the market price was \$3.10 per share, for a total contribution with a market value of \$236,400 (which has been funded by the company). The company and Crested each are responsible for one-half of that amount. 37,204 of the shares were allocated to the ESOP accounts of the executive officers of the company and the president of Rocky Mountain Gas, Inc. Additionally, 5,166 shares were allocated to the ESOP accounts of these same individuals from ESOP shares forfeited by terminated employees who were not fully vested.

Employee interests in the ESOP are earned pursuant to a seven year vesting schedule; after three years of service, the employee is vested to 20% of the ESOP account, and thereafter at 20% per year. Any portion which is not vested is forfeited upon termination of employment, other than by retirement, disability, or death.

The maximum loan outstanding during the twelve months ended December 31, 2003 under a loan arrangement between the company and the ESOP was \$927,013 at December 31, 2003. Interest owed by the ESOP was not booked by the company. Crested pays one-half of the amounts contributed to the ESOP by the company. Because the loans are expected to be repaid by contributions to the ESOP, Crested may be considered to indirectly owe one-half of the loan amounts to the company.

401(K) PLAN. In first quarter 2004, the company established a traditional qualified 401(k) plan for employees, by which the company will match \$0.50 for each \$1.00 contributed by participating employees, up to an annual \$3,000 per employee maximum contribution by the company. Through March 31, 2004, the company has contributed \$3,382 to this plan. Plan eligibility and vesting rules are uniform for all employees, including executive officers of the company.

1998 INCENTIVE STOCK OPTION PLAN. The company's 1998 Incentive Stock Option Plan ("1998 ISOP") reserved an aggregate of 2,750,000 shares of common stock for issuance upon exercise of options granted thereunder.

Options expire no later than ten years from the date of grant, and upon termination of employment for cause. Subject to the ten year maximum period, upon termination, unless terminated for cause, options are exercisable for three months or in the case of retirement, disability or death, for one year.

Options on 1,494,146 shares are outstanding. No more options will be issued under the 1998 ISOP.

93

2001 INCENTIVE STOCK OPTION PLAN ("2001 ISOP"). The 2001 ISOP was approved at the 2001 Annual Meeting of Shareholders meeting, and provides for the issuance of options to purchase up to 3.0 million shares of common stock; the options are intended to qualify under section 422 of the Internal Revenue Code. Options are issued at exercise prices equal to (or for holders of 10% or more of the outstanding stock at the time, 110% of) market price on grant dates, and would vest (become exercisable) at various times as determined by the executive committee and approved by the board of directors. All options are exercisable for cash, or through other means as determined by the executive committee and approved by the board of directors, in accordance with similar plans of public companies.

For information about options, please see the consolidated Financial Statements in this prospectus for the twelve months ended December 31, 2003. In 2003, no options were granted, and previously granted options on 275,621 shares were exercised.

94

AGGREGATED OPTION/SAR EXERCISES IN LAST FISCAL YEAR AND
TWELVE MONTHS ENDED 12/31/03 AND OPTION/SAR VALUES AT 12/31/03

The following table shows options exercised during the twelve months ended December 31, 2003, options exercisable at December 31, 2003, and options exercisable and the dollar values for in-the-money options, at December 31, 2003 (closing market price on that date was \$2.98).

1996 STOCK AWARD PROGRAM. The company had an annual incentive compensation arrangement for the issuance of up to 67,000 shares of common stock each year (from 1997 through 2002) to executive officers of the company, in amounts determined each year based on earnings of the company for the prior fiscal. A total of 392,536 shares were issued under this plan. The compensation committee did not award any shares under this plan during the seven months ended December 31, 2002; 43,378 shares were issued in 2003 to close out the program.

One-half of the compensation expense under the Program was the responsibility of Crested.

Each allocation of shares was issued in the name of the officer, and is earned out (vested) over 5 years, at the rate of 20% as of May 31 of each year following the date of issue. However, none of the vested shares become available to or come under the control of the officer until termination of employment by retirement, death or disability. Upon termination, the share certificates will be released to the officer; until termination, the certificates are held by the Treasurer of the company. Voting rights are exercised over the shares by the non-employee directors of the company; dividends or other distributions with respect to the shares will be held by the Treasurer for the benefit of the officers.

The number of shares awarded each year out of such 67,000 shares aggregate limit was determined by the compensation committee.

2001 STOCK COMPENSATION PLAN. The shareholders approved the 2001 Stock Compensation Plan (the "plan") at the 2001 Annual Shareholders Meeting.

The plan has an initial term of seven years, with up to 10,000 shares of common stock to be issued in January of each year to six individuals (five officers of U.S. Energy Corp: John L. Larsen, Keith G. Larsen, Robert Scott Lorimer, Harold F. Herron, Daniel P. Svilar, and Mark J. Larsen, president and a director of Rocky Mountain Gas, Inc.). The number of shares to be issued in any year is determined by the compensation committee and approved by the independent directors, taking into account our public stock prices at the date of grant and

Edgar Filing: US ENERGY CORP - Form 424B3

during the prior calendar year, the company's financial condition and business prospects, and other factors deemed appropriate. The company pays the income taxes owed by recipients as a result of receipt of the stock.

The stock recipients will agree not to sell or transfer such shares during their employment with the company. As of December 31, 2003, 100,000 shares had been granted under the Plan (20,000 shares each to John L. Larsen, Keith G. Larsen, Robert Scott Lorimer, Harold F. Herron, and Daniel P. Svilar). No shares were issued under the Plan in 2001 or 2002. Mark J. Larsen will be first eligible to receive shares under the Plan in 2005.

96

The 2001 Stock Compensation Plan is now the sole mechanism for compensating management with stock, however options may be granted to management and others under the 2001 ISOP. This plan is designed to reward executives with equity, and encourage them to increase their ownership of the company and not sell their shares in the market.

DIRECTORS' FEES AND OTHER COMPENSATION

The company pays non-employee directors a fee of \$150 per meeting attended. All directors are reimbursed for expenses incurred with attending meetings.

In addition, non-employee directors are compensated for services at \$400 per month, payable each year by the issue of shares of USE common stock based on the closing stock market price as of January 15. In 2003, the company issued 3,891 shares to the non-employee directors on that date (1,297 shares each to Don Anderson, H. Russell Fraser, and Nick Bebout), at \$3.70 per share (market price on January 15, 2003).

CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS

DEBT OWED BY A DIRECTOR. In the early 1990s, Harold F. Herron, an officer and director, had been living in and caring for a house owned by the company. In fiscal 1995, Mr. Herron purchased the house for \$260,000 (equal to appraised value), and was reimbursed by the company for \$22,830 of leasehold improvements he had made to the property. The company accepted a promissory note for \$112,170 of the purchase price, with 7% annual interest; a payment schedule was entered into and Mr. Herron is current in his payments on the note. This note was a nonrecourse note secured by 30,000 shares of the company's common stock owned by Mr. Herron. At December 31, 2003, he owed \$90,300 on the note. During 2003, he gave up 5,000 shares of the collateral to reduce the debt. The collateral now consists of 10,000 shares of the company.

FAMILY EMPLOYMENT. Three of John L. Larsen's sons, one former son-in-law (Harold F. Herron), and one grandson are employed by the company or subsidiaries. Collectively, Mr. Larsen and these family members received \$1,217,600 in total compensation for services during the twelve months ended December 31, 2003. Not included is 2003 compensation paid to two sons-in-law who ceased working for the company or its subsidiaries (including Peter Schoonmaker, who is now employed by Pinnacle Gas Resources, Inc., a minority-owned subsidiary).

TRANSACTIONS INVOLVING USECC AND CRESTED. The company and Crested conduct most activities through their equally-owned joint venture USECC. From time to time the company and Crested advance funds to or make payments on behalf of USECC, which create intercompany debt. The party extending funds is subsequently

Edgar Filing: US ENERGY CORP - Form 424B3

reimbursed by the other venturer. Crested owed the company \$9,403,300 at December 31, 2003.

PRINCIPAL ACCOUNTING FEES AND SERVICES

Grant Thornton LLP billed us for services as follows for the year ended December 31, 2003, the seven months ended December 31, 2002 and the year ended May 31, 2002. Amounts and percentages reflect billings received after December 31 of those periods.

97

	Year Ended December 31, 2003 -----	Seven Months Ended December 31, 2002 -----	Year Ended May 31, 2002 -----
Audit Fees (a)	\$ 106,600 89%	\$ 90,500 92%	\$ 84,300 90%
Audit-Related Fees (b)	\$ --	\$ --	\$ --
Tax Fees (c)	\$ 12,800 11%	\$ 8,000 8%	\$ 9,000 10%
All Other Fees (d) :	\$ --	\$ --	\$ --

Our audit committee approves the terms of engagement before we engage Grant Thornton for audit and non-audit services, except as to engagements for services outside the scope of the original terms, in which instances the services have been provided pursuant to pre-approval policies and procedures, established by the audit committee. These pre-approval policies and procedures are detailed as to the category of service and the audit committee is kept informed of each service provided. These policies and procedures, and the work performed pursuant thereto, do not include any delegation to management of the audit committee's responsibilities under the Securities Exchange Act of 1934.

The services provided for Audit-Related Fees, Tax Fees and All Other Fees were delivered pursuant to pre-approval policies and procedures established by the audit committee.

DESCRIPTION OF SECURITIES

COMMON STOCK. We are authorized by our articles of incorporation to issue an unlimited number of shares of common stock, \$0.01 par value, and 100,000 shares of preferred stock, \$0.01 par value.

Shares of common stock may be issued for such consideration and on such terms as determined by the board of directors, without shareholder approval. Holders are entitled to receive dividends when and as declared by the board of directors out of funds legally available therefore. There are no restrictions on payment of cash dividends. Cash dividends have not been declared on the common stock, although a 1 for 10 stock dividend was declared in November 1990. It is anticipated that future earnings would be reinvested into operations and not declared as dividends on the common stock. All holders of shares of common stock

Edgar Filing: US ENERGY CORP - Form 424B3

have equal voting rights, and the shares of common stock sold in this offering will have the same rights. Holders of shares of common stock are entitled to one vote per share on all matters upon which such holders are entitled to vote, and further have the right to cumulate their votes in elections of

98

directors. Cumulation means multiplying the number of shares held, by the number of nominees to the board of directors, then voting the product among the nominees as desired. Directors are elected by a plurality of the votes cast.

Shares of common stock sold in this offering are fully-paid and nonassessable shares of U.S. Energy Corp.

Pursuant to our articles of incorporation and as permitted by Wyoming law, shares of common stock held by our subsidiaries may be voted by such subsidiaries as determined by the board of directors of each, in elections of directors and other matters brought before shareholders.

In September 2001, the company adopted a shareholder rights plan ("poison pill") and filed the plan with the Securities and Exchange Commission as an exhibit to Form 8-A. The following three paragraphs briefly state principal features of the plan, which are qualified by reference to the complete plan, which is incorporated by reference into this prospectus.

Under the plan, the holder of each share of common stock has the right to purchase (when the rights become exercisable) from the company one-one thousandth (1/1,000th) of one (1) share of Series P preferred stock at a price of \$200.00 for each one-one thousandth (1/1,000th) share of such preferred stock. The purpose of the plan is to deter an unfairly low priced hostile takeover of the company, by encouraging a hostile party to negotiate a fair offer with the board of directors and thus eliminate the poison pill.

The rights trade with the common stock and aren't separable therefrom; no separate certificate for the rights is issued unless and until there is a hostile takeover attempted, after which time separate and tradable rights certificates would be issued.

The rights are not exercisable and never can be unless and until a hostile (not negotiated with the board) takeover of the company is initiated with the objective of acquiring 15% of the company's voting stock. If before the takeover is launched the hostile party comes to agreement with the board of directors about price and terms and makes a "qualified offer" to buy the stock of the company, then the board of directors may redeem (buy back) the rights for \$0.01 each. But, if such a "qualified offer" isn't agreed upon, then the rights are exercisable for preferred stock, which in turn would enable the holder to convert the preferred stock into voting common stock of the company at a price equal to one-half the market price.

PREFERRED STOCK. Shares of preferred stock may be issued by the board of directors with such dividend, liquidation, voting and conversion features as may be determined by the board of directors without shareholder approval. In June 2000, we established a Series A Convertible Preferred Stock, for which 1,000 shares of preferred stock were reserved for sale at \$10,000 per share and 200 shares were issued and outstanding at November 30, 2001. In January 2002, we converted the 200 outstanding shares of Series A stock by issuing 513,140 shares of restricted common stock to the holder, based on \$2,000,000 invested plus \$11,507 of interest (annual rate of 7.5%) which accrued in December 2001

Edgar Filing: US ENERGY CORP - Form 424B3

(previous interest had been paid in cash), divided by \$3.92 (market price for USE stock on December 5, 2001).

OPTIONS, WARRANTS, CONVERTIBLE SHARES OF RMG, AND CONVERTIBLE DEBT. As of the date of this prospectus, options are held by employees and officers to purchase a total of 2,873,646 shares of common stock, at exercise prices ranging from \$2.00 to \$3.90. These options expire at various times from 2008 to 2011.

For information on warrants, convertible shares of RMG, and convertible debt, see "Selling Shareholders."

99

DISCLOSURE OF COMMISSION POSITION ON INDEMNIFICATION FOR SECURITIES ACT LIABILITIES

Our articles of incorporation and bylaws provide that we shall indemnify directors provided that the indemnification shall not eliminate or limit the liability of a director for breach of the director's duty or loyalty to the corporation or its stockholders, or for acts of omission not in good faith or which involve intentional misconduct or a knowing violation of law.

Wyoming law permits a corporation, under specified circumstances, to indemnify its directors, officers, employees or agents against expenses (including attorney's fees), judgments, fines and amounts paid in settlements actually and reasonably incurred by them in connection with any action, suit or proceeding brought by third parties by reason of the fact that they were or are directors, officers, employees or agents of the corporation, if these directors, officers, employees or agents acted in good faith and in a manner they reasonably believed to be in or not opposed to the best interests of the corporation and, with respect to any criminal action or proceedings, had no reason to believe their conduct was unlawful. In a derivative action, i.e., one by or in the right of the corporation, indemnification may be made only for expenses actually and reasonably incurred by directors, officers, employees or agent in connection with the defense or settlement of an action or suit, and only with respect to a matter as to which they shall have acted in good faith and in a manner they reasonably believed to be in or not opposed to the best interests of the corporation, except that no indemnification shall be made if such person shall have been adjudged liable to the corporation, unless and only to the extent that the court in which the action or suit was brought shall determine upon application that the defendant directors, officers, employees or agents are fairly and reasonably entitled to indemnify for such expenses despite such adjudication of liability.

Insofar as indemnification for liabilities arising under the Securities Act of 1933 may be permitted to directors, officers and controlling persons of the company pursuant to the foregoing provisions, or otherwise (for example, in connection with the sale of securities), we have been advised that in the opinion of the Commission such indemnification is against public policy as expressed in the 1933 Act, and is, therefore, unenforceable. In the event that a claim for indemnification against such liabilities (other than the payment by the company of expenses incurred or paid by a director, officer or controlling person in the successful defense of any action, suit or proceeding) is asserted by such director, officer or controlling person in connection with the securities being registered, the company will, unless in the opinion of its counsel the matter has been settled by controlling precedent, submit to a court of appropriate jurisdiction the question whether such indemnification by it is against public policy as expressed in the 1933 Securities Act, and will be

Edgar Filing: US ENERGY CORP - Form 424B3

governed by the final adjudication of such issue.

WHERE TO FIND MORE INFORMATION

We have filed with the Securities and Exchange Commission (the "Commission") a registration statement on Form S-1 under the 1933 Act with respect to the shares offered by this prospectus. This prospectus, filed as a part of the registration statement, does not contain certain information contained in part II of the registration statement or filed as exhibits to the registration statement. We refer you to the registration statement and exhibits which may be inspected and copied at the Public Reference Section of the Commission, 450 5th Street, NW, Washington, D.C. 20549, at prescribed rates; the telephone number for the Public Reference Section is 1.800.SEC.0330. The registration statement and exhibits also are available for viewing at and downloading from the EDGAR location within the Commission's internet website (<http://www.sec.gov>).

Our common stock is registered with the Commission under section 12(g) of the Securities Exchange Act of 1934 (the "1934 Act"). Under the 1934 Act, we file with the Commission periodic reports on Forms 10-K, 10-Q and 8-K, and proxy statements, and our officers and directors file reports of stock

100

ownership on Forms 3, 4 and 5. These filings may be viewed and downloaded from the Commission's internet website (<http://www.sec.gov>) at the EDGAR location, and also may be inspected and copied at the Public Reference Section of the Commission, 450 5th Street, NW, Washington, D.C. 20549, at prescribed rates; the telephone number for the Public Reference Section is 1.800.SEC.0330. Information on the operation of the Public Reference Room can be obtained by calling the Commission at 1.800.SEC.0330.

We will provide copies of the reports and proxy statements we file with the Commission (and any amendments to those documents), on request and without charge. We hold an annual shareholder meeting each June; before the meeting, we send proxy statements and annual reports to record holders of our common stock.

LEGAL MATTERS

The validity of the issuance of the shares offered has been passed upon by The Law Office of Stephen E. Rounds, Denver, Colorado.

EXPERTS

Our consolidated balance sheets as of December 31, 2003, December 31, 2002, and May 31, 2002, and the related consolidated statements of operations, shareholders' equity and cash flows for the year ended December 31, 2003, the seven months ended December 31, 2002 and the (former) fiscal years ended May 31, 2002 and 2001, have been audited by Grant Thornton LLP, and are included in this prospectus, with the audit report from Grant Thornton LLP, in reliance upon the authority of such firm as experts in accounting and auditing.

The combined statements of revenue and direct operating expenses of certain acquired property interests, (combined statements) (the assets acquired from Hi-Production, LLC) for the years ended December 31, 2003, 2002 and 2001 have been audited by Grant Thornton LLP and are included in this prospectus with the audit report from Grant Thornton LLP, in reliance upon the authority of such firm as experts in accounting and auditing.

101

REPORT OF INDEPENDENT CERTIFIED PUBLIC ACCOUNTANTS

To U.S. Energy Corp.:

We have audited the accompanying consolidated balance sheets of U.S. Energy Corp. and subsidiaries as of December 31, 2003 and 2002 and May 31, 2002, and the related consolidated statements of operations, shareholders' equity and cash flows for the year ended December 31, 2003, the seven months ended December 31, 2002 and the fiscal years ended May 31, 2002 and 2001. These financial statements are the responsibility of the company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of U.S. Energy Corp. and subsidiaries as of December 31, 2003 and 2002 and May 31, 2002, and the results of their operations and their cash flows for the year ended December 31, 2003, the seven months ended December 31, 2002 and the fiscal years ended May 31, 2002 and 2001 in conformity with accounting principles generally accepted in the United States of America.

As discussed in Note B to the financial statements effective January 1, 2003, the Company adopted Statement of Financial Accounting Standards No. 143, Accounting for Asset Retirement Obligations, and changed its method of accounting for asset retirement obligations.

As discussed in Note A to the financial statements, certain errors resulting in overstatement of previously reported deferred tax liability as of December 31, 2002 and prior, were discovered by company management during the year ended December 31, 2003. Accordingly, an adjustment has been made to accumulated deficit as of June 1, 2000 to correct the error.

The accompanying financial statements have been prepared assuming the Company will continue as a going concern. As discussed in Note A to the financial statements, the Company has experienced significant losses from operations and has a substantial accumulated deficit. These factors raise substantial doubt about the ability of the Company to continue as a going concern. Management's plans in regards to these matters are also described in Note A. The financial statements do not include any adjustments that might result from the outcome of this uncertainty.

U.S. ENERGY CORP. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS DECEMBER 31, 2003 AND 2002, MAY 31, 2002 AND MAY 31, 2001

A. BUSINESS ORGANIZATION AND OPERATIONS:

U.S. Energy Corp. was incorporated in the State of Wyoming on January 26, 1966. U.S. Energy Corp. and subsidiaries (the "Company" or "USE") engages in the acquisition, exploration, holding, sale and/or development of mineral and coalbed methane gas properties, the production of petroleum properties and marketing of minerals and methane gas. Principal mineral interests are in coalbed methane, uranium, gold and molybdenum. The Company's uranium and gold properties are currently all in a shut down status. The Company holds various real and personal properties used in commercial activities. Most of the Company's activities are conducted through subsidiaries and through the joint venture discussed below and in Note D.

The Company was engaged in the maintenance of two uranium properties, one in southern Utah, and the second in Wyoming known as Sheep Mountain Partners ("SMP"). SMP has been involved in significant litigation (see Note K). Sutter Gold Mining Company ("SGMC"), a Wyoming corporation owned 78.5% by the Company at December 31, 2003, manages the Company's interest in gold properties. The Company also owns 100% of the outstanding stock of Plateau Resources Limited ("Plateau"), which owns a nonoperating uranium mill in southeastern Utah. Currently, the mill is nonoperating but has been granted a license to operate subject to certain conditions. Rocky Mountain Gas, Inc. ("RMG") was formed in November 1999 to consolidate all methane gas operations of the Company. The Company owns and controls 90.1% of RMG as of December 31, 2003.

The Company's Board of Directors changed the Company's year end to December 31 effective December 31, 2002.

RESTATEMENT OF BALANCE SHEETS AND SHAREHOLDERS' EQUITY

The balance sheets at December 31, 2002 and May 31, 2002 and statements of shareholders' equity have been restated to reflect the correction of an overstatement in deferred tax liability of \$1,144,800. Accumulated deficit at June 1, 2000 has been decreased by \$1,144,800. The liability overstatement occurred prior to any accompanying statements of operations presented; therefore, there was no effect on net earnings for any periods presented in the accompanying financial statements. Therefore, the statements of operations and cash flows for the years ended December 31, 2003, seven months ended December 31, 2002 and the years ended May 31, 2002 and 2001 have not been restated.

MANAGEMENT'S PLAN

The Company has generated significant net losses during recent years and has an accumulated deficit of approximately \$43,073,000 at December 31, 2003. The Company has working capital of approximately \$3,281,700 at December 31, 2003 and its cash balance has increased from \$1,741,000 at December 31, 2002 to \$4,084,800 at December 31, 2003. The Company used cash in its operating activities of \$5,673,700 and \$3,334,800 during the years ended December 31, 2003 and May 31, 2002 and used cash of \$2,857,800 during the seven months ended December 31, 2002. During the year ended December 31, 2003 and the fiscal year ended May 31, 2002 the Company experienced positive cash flow of \$2,343,800 and

Edgar Filing: US ENERGY CORP - Form 424B3

\$1,878,800 respectively. The Company experienced negative cash flow of \$823,300

114

U.S. ENERGY CORP. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS DECEMBER 31, 2003 AND 2002, MAY 31, 2002 AND MAY 31, 2001 (CONTINUED)

and \$230,900, respectively, for the seven months ended December 31, 2002 and the fiscal year ended May 31, 2001.

The Company has entered into agreements to provide funding for the development of coalbed methane properties (See Note F). After these work commitments are fully funded, the Company does not have sufficient capital available to fund its portion of the anticipated exploration and development activities on its coalbed methane properties. Additionally, the Company's known cash flows through December 31, 2004 from current operations and associated overhead are negative based on current projections. In order to improve liquidity of the Company, management intends to do the following:

- o Continue to reduce its mining activities.
- o Sell raw land in Riverton, Wyoming and Gunnison, Colorado. Management intends to sell this land at its fair market value. The land is not needed for the operations of the Company now or into the future.
- o Seek equity funding or a joint venture partner to place the SGMC property into production or sell the entire property to an industry partner.
- o Raise additional capital through a private placement and a public offering of its subsidiary Rocky Mountain Gas, Inc. The timing of such a public offering will depend on the market prices for methane gas.
- o Reduce overhead expenses and concentrate on its primary business - coalbed methane.
- o Successfully resolve disputes relating to SMP assets. (See Note K)

As a result of these plans, management believes that they will generate sufficient cash flows to meet its cash requirements in calendar 2004, although there is no assurance the plans will be accomplished.

B. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES:

PRINCIPLES OF CONSOLIDATION

The consolidated financial statements of USE and subsidiaries include the accounts of the Company, the accounts of its majority-owned or controlled subsidiaries Plateau (100%), Energx, Ltd ("Energx") (90%), Four Nines Gold, Inc. ("FNG") (50.9%), SGMC (78.5%), Crested Corp. ("Crested") (71.5%), Yellowstone Fuels Corp. ("YSFC") (35.9%) Rocky Mountain Gas ("RMG") (88.5%) and the USECC Joint Venture ("USECC"), a consolidated joint venture which is equally owned by U.S. Energy Corp. and Crested, through which the bulk of their operations are conducted.

U.S. ENERGY CORP. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
DECEMBER 31, 2003 AND 2002, MAY 31, 2002 AND MAY 31, 2001
(CONTINUED)

Investments in all 20% to 50% owned companies are accounted for using the equity method. Investments of less than 20% are accounted for by the cost method. All material intercompany profits, transactions and balances have been eliminated.

CASH EQUIVALENTS

The Company considers all highly liquid investments with original maturities of three months or less to be cash equivalents. The Company maintains its cash and cash equivalents in bank deposit accounts which exceed federally insured limits. At December 31, 2003, the Company had approximately 99% of its cash and cash equivalents with one financial institution. The Company has not experienced any losses in such accounts and believes it is not exposed to any significant credit risk on cash and cash equivalents.

RESTRICTED INVESTMENTS

Based on the provisions of Statement of Financial Accounting Standards No. 115 ("SFAS 115"), the Company accounts for its restricted investment in certain securities as held-to-maturity. Held-to-maturity securities are measured at amortized cost. If a decline in fair value of such investments is determined to be other than temporary, the investment is written down to fair value.

ACCOUNTS RECEIVABLE

The majority of the Company's accounts receivable are due from industry partners for drilling and operating expenses associated with coalbed methane gas wells for which RMG acts as operator and from sales of land. The Company determines any required allowance by considering a number of factors including length of time trade accounts receivable are past due and the Company's previous loss history. The Company writes off accounts receivable when they become uncollectable, and payments subsequently received on such receivables are credited to the allowance for doubtful accounts.

In addition, the Company is due \$863,200 from CCBM under a non-recourse promissory note receivable which arose as part of the sale of a portion of RMG's coalbed methane properties to CCBM. The note receivable is fully reserved due to its non-recourse nature with payments received credited against natural gas properties in accordance with the full cost method of accounting.

INVENTORIES

Inventories consist of aviation fuel and well casing and tubing. Inventories are stated at lower of cost or market using the average cost method.

PROPERTIES AND EQUIPMENT

Land, buildings, improvements, machinery and equipment are carried at cost. Depreciation of buildings, improvements, machinery and equipment is provided

Edgar Filing: US ENERGY CORP - Form 424B3

principally by the straight-line method over estimated useful lives ranging from 3 to 45 years. Following is a breakdown of the lives over which assets are depreciated.

116

U.S. ENERGY CORP. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS DECEMBER 31, 2003 AND 2002, MAY 31, 2002 AND MAY 31, 2001 (CONTINUED)

Office Equipment	3 to 5 years
Field Tools and Hand Equipment	5 to 7 years
Vehicles and Trucks	3 to 7 years
Heavy Equipment	7 to 10 years
Service Buildings	20 years
Corporate Headquarter's Building	45 years

The Company capitalizes all costs incidental to the acquisition of mineral properties as incurred. Costs are charged to operations if the Company determines that the property is not economical. Mineral exploration costs are expensed as incurred. When it is determined that a mineral property can be economically developed as a result of establishing proved and probable reserves, costs subsequently incurred are capitalized and amortized using units of production over the estimated recoverable proved and probable reserves. Costs and expenses related to general corporate overhead are expensed as incurred.

The Company has acquired substantial mining properties and associated facilities at minimal cash cost, primarily through the assumption of reclamation and environmental liabilities. Certain of these properties are owned by various ventures in which the Company is either a partner or venturer. (See Note F).

OIL AND GAS PROPERTIES

The Company follows the full cost method of accounting for oil and gas properties. Accordingly, all costs associated with acquisition, exploration, and development of oil and gas reserves, including directly related overhead costs, are capitalized.

All capitalized costs of oil and gas properties subject to amortization and the estimated future costs to develop proved reserves, are amortized on the unit-of-production method using estimates of proved reserves. Investments in unproved properties and major exploration and development projects are not amortized until proved reserves associated with the projects can be determined or until impairment occurs. If the results of an assessment indicate that the properties are impaired, the capitalized cost of the property will be added to the costs to be amortized.

After there are proven reserves, the capitalized costs associated with those reserves are subject to a "ceiling test," which basically limits such costs to the aggregate of the "estimated present value," discounted at a 10-percent interest rate of future net revenues from proved reserves, based on current economic and operating conditions, plus the lower of cost or fair market value of unproved properties.

Sales of proved and unproved properties are accounted for as adjustments of

Edgar Filing: US ENERGY CORP - Form 424B3

capitalized costs with no gain or loss recognized, unless such adjustments would significantly alter the relationship between capitalized costs and proved reserves of oil and gas, in which case the gain or loss is recognized in income. Abandonments of properties are accounted for as adjustments of capitalized costs with no loss recognized.

117

U.S. ENERGY CORP. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS DECEMBER 31, 2003 AND 2002, MAY 31, 2002 AND MAY 31, 2001 (CONTINUED)

LONG-LIVED ASSETS

The Company evaluates its long-lived assets (other than oil and gas properties which are discussed above) for impairment when events or changes in circumstances indicate that the related carrying amount may not be recoverable. If the sum of estimated future cash flows on an undiscounted basis is less than the carrying amount of the related asset, an asset impairment is considered to exist. The related impairment loss is measured by comparing estimated future cash flows on a discounted basis to the carrying amount of the asset. Changes in significant assumptions underlying future cash flow estimates may have a material effect on the Company's financial position and results of operations. An uneconomic commodity market price, if sustained for an extended period of time, or an inability to obtain financing necessary to develop mineral interests, may result in asset impairment.

During the fiscal year ended May 31, 2002, the Company recorded a \$1,622,700 impairment of goodwill that arose as part of the purchase of an additional 1,105,499 shares of RMG common stock. These shares of stock were purchased by issuing 910,320 shares of the Company's common stock pursuant to conversion rights granted RMG private placement investors.

During fiscal 2001, the Company recorded an impairment on its mineral properties of \$123,800 in YSFC. As of December 31, 2003, management believes no further impairment is necessary and that the fair market of remaining assets exceeds the carrying value. See Note F for further discussion.

FAIR VALUE OF FINANCIAL INSTRUMENTS

The carrying amount of cash equivalents, receivables, other current assets, accounts payable and accrued expenses approximates fair value because of the short-term nature of those instruments. The recorded amounts for short-term and long-term debt, approximate fair market value due to the variable nature of the interest rates on the short term debt, and the fact that interest rates remain generally unchanged from issuance of the long term debt.

REVENUE RECOGNITION

Revenues from real estate operations are from the rental of office space in office buildings in Riverton, Wyoming. Airport operations consist of the sale of aviation fuel, repair and maintenance of aircraft and rental of hanger space. All these revenues are reported on a gross revenue basis and are recorded at the time the service is provided.

Edgar Filing: US ENERGY CORP - Form 424B3

The Company, through its subsidiary, RMG, utilizes the entitlements method of accounting for natural gas revenues whereby revenues are recognized as the Company's share of the gas is produced and delivered to a purchaser based upon its working interest in the properties. The Company will record a receivable (payable) to the extent that it receives less (more) than its proportionate share of the gas revenues.

Revenues from mineral sales consist of the sale of uranium to a delivery contract and the sale of that contract to a third party supplier. The sale of uranium is reported on a net basis. The Company has

118

U.S. ENERGY CORP. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS DECEMBER 31, 2003 AND 2002, MAY 31, 2002 AND MAY 31, 2001 (CONTINUED)

not produced any uranium from its properties during the period covered by the enclosed financial statements and during the year ended May 31, 2001 purchased all uranium delivered under its supply contracts from the open market as all the Company's uranium operations are shut down.

Mineral royalties which are non-refundable are recognized as revenue when received (see Note F).

Management fees are recorded as a percentage of actual costs for services provided for subsidiaries and partnerships for which the Company provides management services. The Company is also paid a management fee for overseeing oil production on the Fort Peck Reservation in Montana. Management fees are recorded when the service is provided.

STOCK BASED COMPENSATION

SFAS 123, "Accounting for Stock-Based Compensation," ("SFAS 123") defines a fair value based method of accounting for employee stock options or similar equity instruments. However, SFAS 123 allows the continued measurement of compensation cost for such plans using the intrinsic value based method prescribed by APB Opinion No. 25, "Accounting for Stock Issued to Employees" ("APB 25"), provided that pro forma disclosures are made of net income or loss and net income or loss per share, assuming the fair value based method of SFAS 123 had been applied. The Company has elected to account for its stock-based compensation plans under APB 25; accordingly, for purposes of the pro forma disclosures presented below, the Company has computed the fair values of all options granted using the Black-Scholes pricing model and the following weighted average assumptions:

	Year Ended December 31, ----- 2003 ----	Seven Months ended December 31, ----- 2002 ----	Year ended May 31, ----- 2002 2001 ----- ----	
Risk-free interest rate	5.61%	4.4%	5.6%	4.29%

Edgar Filing: US ENERGY CORP - Form 424B3

Expected lives (years)	7	8.5	10	10
Expected volatility	58.95%	50.38%	62.65%	73.1%
Expected dividend yield	--	--	--	--

To estimate expected lives of options for this valuation, it was assumed options will be exercised at the end of their expected lives. All options are initially assumed to vest. Cumulative compensation cost recognized in pro forma net income or loss with respect to options that are forfeited prior to vesting is adjusted as a reduction of pro forma compensation expense in the period of forfeiture.

If the Company had accounted for its stock-based compensation plans in accordance with SFAS 123, the Company's net (loss) income and pro forma net loss per common share would have been reported as follows:

119

U.S. ENERGY CORP. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS DECEMBER 31, 2003 AND 2002, MAY 31, 2002 AND MAY 31, 2001 (CONTINUED)

	Year Ended December 31, 2003 -----	Seven Months Ended December 31, 2002 -----	Year End ----- 2002 -----
Net (loss) income to common shareholders as reported	\$ (5,810,100)	\$ (3,840,100)	\$ (6,267,600)
Deduct: Total stock based employee expense determined under fair value based method	(652,900) -----	(1,410,850) -----	(3,079,700) -----
Pro forma net loss	\$ (6,463,000) =====	\$ (5,250,950) =====	\$ (9,347,300) =====
As reported, Basic	\$ (.52)	\$ (.36)	\$ (.67)
As reported, Diluted	\$ (.52)	\$ (.36)	\$ (.67)
Pro forma, Basic	\$ (.58)	\$ (.49)	\$ (1.01)
Pro forma, Diluted	\$ (.58)	\$ (.49)	\$ (1.01)

Weighted average shares used to calculate pro forma net loss per share were determined as described in Note B, except in applying the treasury stock method to outstanding options, net proceeds assumed received upon exercise were increased by the amount of compensation cost attributable to future service periods and not yet recognized as pro forma expense.

INCOME TAXES

The Company accounts for income taxes under the provisions of Statement of Financial Accounting Standards No. 109 ("SFAS 109"), "Accounting for Income Taxes". This statement requires recognition of deferred income tax assets and

Edgar Filing: US ENERGY CORP - Form 424B3

liabilities for the expected future income tax consequences, based on enacted tax laws, of temporary differences between the financial reporting and tax bases of assets, liabilities and carryforwards.

SFAS 109 requires recognition of deferred tax assets for the expected future effects of all deductible temporary differences, loss carryforwards and tax credit carryforwards. Deferred tax assets are reduced, if deemed necessary, by a valuation allowance for any tax benefits which, based on current circumstances, are not expected to be realized.

NET (LOSS) INCOME PER SHARE

The Company reports net (loss) income per share pursuant to Statement of Financial Accounting Standards No. 128 ("SFAS 128"). SFAS 128 specifies the computation, presentation and disclosure requirements for earnings per share. Basic earnings per share is computed based on the weighted average number of common shares outstanding. Diluted earnings per share is computed based on the weighted average number of common shares outstanding adjusted for the incremental shares attributed to outstanding options to purchase common stock, if dilutive. Potential common shares relating to options and warrants are excluded from the computation of diluted earnings (loss) per share, because they were antidilutive, totaled 3,790,370, 4,910,900, 3,999,468 and 3,316,011 at December 31, 2003 and 2002 and May 31, 2002 and 2001, respectively.

120

U.S. ENERGY CORP. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS DECEMBER 31, 2003 AND 2002, MAY 31, 2002 AND MAY 31, 2001 (CONTINUED)

USE OF ESTIMATES

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions. These estimates and assumptions affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

RECLASSIFICATIONS

Certain reclassifications have been made in the prior years financial statements in order to conform with the presentation for the current year.

RECENT ACCOUNTING PRONOUNCEMENTS

SFAS 143 Effective January 1, 2003, the Company adopted SFAS No. 143, "Accounting for Asset Retirement Obligation." The statement requires the Company to record the fair value of the reclamation liability on its shut down mining and gas properties as of the date that the liability is incurred. The statement further requires that the company review the liability each quarter and determine if a change in estimate is required as well as accrue the total liability on a quarterly basis for the future liability.

Edgar Filing: US ENERGY CORP - Form 424B3

The Company will also deduct any actual funds expended for reclamation during the quarter in which it occurs. As a result of the Company taking impairment allowances in prior periods on its shut down mining properties, it has no remaining book value for these properties.

The following is a reconciliation of the total liability for asset retirement obligations

Balance December 31, 2002	\$ 8,906,800
Impact of adoption of SFAS No. 143	(1,615,600)
Addition to Liability	-0-
Liability Settled	(393,200)
Accretion Expense	366,700

Balance December 31, 2003	\$ 7,264,700
	=====

The following table shows the Company's net income (loss) and net income (loss) per share on a pro forma basis as if the provisions of SFAS No. 143 had been applied retroactively in all periods presented.

121

U.S. ENERGY CORP. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS DECEMBER 31, 2003 AND 2002, MAY 31, 2002 AND MAY 31, 2001 (CONTINUED)

	Year ended December 31, 2003 -----	Seven Months ended December 31, 2002 -----	Year 2002 -----
NET INCOME (LOSS):			
Reported net income (loss)			
from continuing operations	\$ (7,075,800)	\$ (3,857,200)	\$ (6,034,400)
Pro-forma adjustments			
net of tax	--	(200,000)	(333,000)
Pro-forma net income (loss)	\$ (7,075,800)	\$ (4,057,200)	\$ (6,367,400)
PER SHARE OF COMMON STOCK:			
Reported net income (loss) basic			
from continuing operations	\$ (0.63)	\$ (0.36)	\$ (0.65)
Pro-forma adjustments			
net of tax	--	(0.02)	(0.03)
Pro-forma net income (loss) basis	\$ (0.63)	\$ (0.38)	\$ (0.68)
Reported net income (loss) diluted	\$ (0.63)	\$ (0.36)	\$ (0.65)
Pro-forma adjustments	--	(0.02)	(0.03)
Pro-forma net income (loss) diluted	\$ (0.63)	\$ (0.38)	\$ (0.68)

Edgar Filing: US ENERGY CORP - Form 424B3

Computed on a pro-forma basis, the provisions of SFAS No. 143 would have been \$7,291,200, \$7,091,200, \$6,758,200 and \$6,441,200 at December 31, 2002, May 31, 2002 and 2001 and June 1, 2000, respectively.

The Company has reviewed other current outstanding statements from the Financial Accounting Standards Board and does not believe that any of those statements will have a material adverse affect on the financial statements of the Company when adopted.

C. RELATED-PARTY TRANSACTIONS:

The Company provides management and administrative services for affiliates under the terms of various management agreements. Revenues from services provided by the Company to unconsolidated affiliates were \$33,400 during the year ended December 31, 2003, \$55,900 during the seven months ended December 31, 2002, and \$78,800 and \$132,500 for the years ended May 31, 2002 and 2001, respectively. The Company has \$96,800 of receivables from unconsolidated subsidiaries as of December 31, 2003.

D. USECC JOINT VENTURE:

The Company operates the Glen L. Larsen office complex; holds interests in various mineral operations; conducts oil and gas operations; and transacts all operating and payroll expenses through a joint venture with Crested, the USECC joint venture.

122

U.S. ENERGY CORP. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS DECEMBER 31, 2003 AND 2002, MAY 31, 2002 AND MAY 31, 2001 (CONTINUED)

E. INVESTMENTS IN AND ADVANCES TO AFFILIATES:

The Company's restricted investments secure various decommissioning, reclamation and holding costs. Investments are comprised of debt securities issued by the U.S. Treasury that mature at varying times from three months to one year from the original purchase date. As of December 31, 2003, December 31, 2002 and May 31, 2002, the cost of debt securities was a reasonable approximation of fair market value. These investments are classified as held-to-maturity under SFAS 115 and are measured at amortized cost.

F. MINERAL CLAIMS TRANSACTIONS:

GMMV

During fiscal 1990, the Company entered into an agreement with Kennecott, a wholly-owned, indirect subsidiary of The RTZ Corporation PLC, for Kennecott to acquire a 50% interest in certain uranium mineral properties in Wyoming known as the Green Mountain Properties. During the life of the venture, the parties entered into various amendments to the GMMV Agreement.

As a result of sustained depressed uranium prices, the GMMV properties were maintained on a shut down basis. During fiscal 2000, certain differences arose in the GMMV and Kennecott sued the Company and USE. On September 11, 2000, the

Edgar Filing: US ENERGY CORP - Form 424B3

parties settled all disputes and Kennecott paid the Company and USE \$3.25 million and assumed reclamation liability for the Sweetwater Mill, Jackpot and Big Eagle Mine properties. (Note K.)

SMP

During fiscal 1989, USE and Crested, through USECC, entered into an agreement to sell a 50% interest in their Sheep Mountain properties to a subsidiary of Nukem Inc., CRIC. USECC and CRIC immediately contributed their 50% interests in the properties to a newly-formed partnership, SMP. SMP was established to further develop and mine the uranium claims on Sheep Mountain, acquire uranium supply contracts and market uranium. Certain disputes arose among USECC, CRIC and its parent Nukem, Inc. over the operation of SMP. These disputes have been in litigation/arbitration for the past thirteen years. See Note K for the status of the related litigation/arbitration.

Due to the litigation and arbitration proceedings involving SMP, the Company has expensed all of its costs related to SMP and has no carrying value of its investment in SMP at December 31, 2003, December 31, 2002 and May 31, 2002. (see Note K).

PHELPS DODGE

During prior years, the Company conveyed interests in mining claims to AMAX Inc. ("AMAX") in exchange for cash, royalties, and other consideration. AMAX merged with Cyprus Minerals ("Cyprus Amax") which was purchased by Phelps Dodge Mining Company ("Phelps Dodge") in December of 1999. The properties have not been placed into production as of December 31, 2003.

123

U.S. ENERGY CORP. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS DECEMBER 31, 2003 AND 2002, MAY 31, 2002 AND MAY 31, 2001 (CONTINUED)

Amax and later Cyprus Amax paid the Company an annual advance royalty of 50,000 pounds of molybdenum (or its cash equivalent). During fiscal 2000, Phelps Dodge assumed this obligation and made its first advance royalty payment to USE during the first quarter of 2001. Phelps Dodge is entitled to a partial credit against future royalties for any advance royalty payments made, but such royalties are not refundable if the properties are not placed into production. The Company recognized \$60,300 of revenue from the advance royalty payments during the year ended May 31, 2001. If Phelps Dodge formally decides to place the properties into production, it is obligated to pay \$2,000,000 to the Company.

Per the contract with AMAX, the Company is to receive 15% of the first \$25,000,000, or \$3,750,000, if the properties are sold, which the Company believes occurred when Phelps Dodge purchased Cyprus Amax. Phelps Dodge filed suit against the Company on June 19, 2002 regarding these matters (See Note K).

SUTTER GOLD MINING COMPANY

Sutter Gold Mining Company ("SGMC") was established in 1990 to conduct operations on mining leases and to produce gold from the Lincoln Project in California.

Edgar Filing: US ENERGY CORP - Form 424B3

SGMC has not generated any significant revenue and has no assurance of future revenue. All acquisition and mine development costs since inception were capitalized. Due to the decline in the spot price for gold and the lack of adequate financing, SGMC has put the property on a shut down status and has impaired the associated assets.

During fiscal 2000, a visitor's center was developed and became operational. Management has leased the visitor's center to partially cover stand-by costs of the property. At December 31, 2003, the spot market price for gold had attained levels management believe that will allow SGMC to produce gold from the property on an economic basis. This conclusion is based on engineering analysis completed on the property. Management of SGMC is therefore pursuing the equity capital market and non-affiliated industry partners to obtain sufficient capital to complete the development of the mine, construct a mill and place the property into production. (See Note P).

PLATEAU RESOURCES LIMITED

During fiscal 1994, USE entered into an agreement with Consumers Power Company to acquire all the issued and outstanding common stock of Plateau Resources Limited ("Plateau"), a Utah corporation. Plateau owns a uranium processing mill and support facilities and certain other real estate assets through its wholly-owned subsidiary, Canyon Homesteads, Inc., in southeastern Utah. USE paid nominal cash consideration for the Plateau stock and agreed to assume all environmental liabilities and reclamation bonding obligations. At December 31, 2003, Plateau had a cash security in the amount of \$6.8 million to cover reclamation and annual licensing of the properties (see Note K).

The Company is currently evaluating the best utilization of Plateau's assets. Evaluations are ongoing to determine when, or if, the mine and mill properties should be placed into production. The primary factor in these evaluations relates to uranium market prices.

124

U.S. ENERGY CORP. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS DECEMBER 31, 2003 AND 2002, MAY 31, 2002 AND MAY 31, 2001 (CONTINUED)

Due to uranium market conditions in 2002, Plateau decided to change the license status from operational back to reclamation and filed a new reclamation plan. The Nuclear Regulatory Commission (NRC) reviewed the revised reclamation and decommissioning plan and agreed to a \$6.1 million reclamation plan. Therefore, Plateau received about \$2.9 Million of excess reclamation bond funds on the Shootaring Canyon Uranium Mill. During the year ended December 31, 2003, management of Plateau determined that the mine and mill properties should be reclaimed.

On August 1, 2003, the Company sold all of the stock of Canyon Resources as a result of Plateau entering into a Stock Purchase Agreement to sell all the outstanding shares of Canyon Homesteads, Inc. ("Canyon") to The Cactus Group LLC, a newly formed Colorado limited liability company. The Cactus Group purchased all of the outstanding stock of Canyon for \$3,370,000. Of that amount, \$349,300 was paid in cash at closing and the balance of \$3,120,700 is to be paid under the terms of a promissory note.

Edgar Filing: US ENERGY CORP - Form 424B3

The sale did not qualify for gain recognition under the full accrual method. A gain of \$1,295,700 was deferred and reported in the consolidated balance sheet at December 31, 2003. The sale will be recognized by the installment method as cash payments are received from the purchaser. An installment note receivable of \$2,988,000 at December 31, 2003 will be reduced as payments are received.

Pursuant to the promissory note, the Company is to receive \$5,000 per month for the months of November 2003 to March 2004 and \$10,000 for the months of November 2004 to March 2005 and \$24,000 per month for the months of April to October 2004 and \$24,000 per month on a monthly basis after March of 2005 from The Cactus Group until August of 2008, at which time, a balloon payment of \$2.8 million is due. The note is secured with all the assets of The Cactus Group and Canyon along with personal guarantees by the six principals of The Cactus Group. As additional consideration for the sale, the Company will also receive the first \$210,000 in gross proceeds from the sale of either single family or mobile home lots in Ticaboo.

ROCKY MOUNTAIN GAS, INC.

During fiscal 2000, the Company organized Rocky Mountain Gas, Inc. ("RMG") to enter into the coalbed methane gas/natural gas business. RMG is engaged in the acquisition of coalbed methane gas properties and the future exploration, development and production of methane gas from those properties. At December 31, 2003, RMG is owned 90.1% by the Company.

On January 3, 2000, RMG entered into an agreement with Quantum Energy, L.L.C. (Quantum formed a subsidiary "Quaneco" to conduct its business with RMG) to purchase a 50% working interest and 40% net revenue interest in approximately 185,000 acres of unproven leasehold interests in the Powder River Basin of southeastern Montana.

RMG also acquired a 100% working interest (82% revenue interest) in 65,247 net mineral acres in southwest Wyoming during the year ended May 31, 2000.

125

U.S. ENERGY CORP. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS DECEMBER 31, 2003 AND 2002, MAY 31, 2002 AND MAY 31, 2001 (CONTINUED)

CCBM

On July 10, 2001, RMG completed a sale of gas properties to CCBM, Inc., a Delaware corporation, which is wholly-owned by Carrizo Oil & Gas, Inc., Houston, Texas (NMS "CRZO"). The agreement between CCBM and RMG is to finance the further development of coalbed methane acreage currently owned by RMG in Montana and Wyoming, and to acquire and develop more acreage in Wyoming and the Powder River Basin of Montana.

RMG is the designated operator under a Joint Operating Agreement ("JOA") between RMG and CCBM., which will govern all operations on the properties subject to a Purchase and Sale Agreement between RMG and CCBM, subject to

Edgar Filing: US ENERGY CORP - Form 424B3

pre-existing JOA's with other entities, and operations or properties in the area of mutual interest ("AMI"). CCBM has the right to participate in other properties RMG may acquire under the area of mutual interest ("AMI").

RMG assigned CCBM an undivided 50% interest in all of RMG's existing coalbed methane properties (with the exception of Castle Rock of which only a 6.25% working interest was assigned) for a sales price of \$7,500,000 in the form of a non-recourse promissory note payable in principal amounts of \$125,000 per month plus interest at an annual rate of 8% over 41 months (starting July 31, 2001) with a balloon payment due on the forty-second month. This note is accounted for on a cash basis because it is non-recourse with its principle payments reducing the natural gas properties in accordance with the full cost method of accounting. The balance due under the note at December 31, 2003 is \$863,200. (See Pinnacle below) Interest income of \$232,100, \$269,700 and \$505,000 was recognized for the year ended December 31, 2003, the nine months ended December 31, 2002 and the year ended March 31, 2002, respectively. These properties sold to CCBM consisted of the Kirby, Oyster Ridge, Clearmont, Sussex, Finley, Baggs North, and Gillette North properties. CCBM's 50% undivided interest is pledged back to RMG to collateralize the promissory note.

To start development, and as part of the consideration for the acquisition, CCBM agreed to pay \$5,000,000 to drill and complete from 30 to 60 wells on the coalbed properties. RMG is "carried" for its 50% interest in these wells, and will not be required to pay any of such costs. After the initial \$5,000,000 has been spent, RMG and CCBM each will pay for their 50% share of costs in subsequent wells, and also will pay for their 50% share of operating costs for the wells drilled and completed in this drilling program. Without CCBM's consent, none of the drilling funds can be used for operations associated with water disposal wells, gas compression beyond 100 PSIG, or for facilities downstream of compression beyond 100 PSIG. CCBM will earn a 50% working interest in each well location (80 acres) and gas production therefrom, regardless of the status of payments on the promissory note. The balance under the work commitment at December 31, 2003 was \$305,100. In 2003, a portion of these interests were exchanged for common stock of Pinnacle Gas Resources. (See Pinnacle below).

126

U.S. ENERGY CORP. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS DECEMBER 31, 2003 AND 2002, MAY 31, 2002 AND MAY 31, 2001 (CONTINUED)

BOBCAT

On April 12, 2002, RMG signed an agreement to purchase working interests in approximately 1,940 gross acres of coalbed methane properties in the Powder River Basin of Wyoming. The contract closed on June 4, 2002. RMG paid the seller \$500,000 cash and another \$150,000 by having USE issue 37,500 shares of its restricted common stock to the seller; CCBM paid \$500,000 cash to the seller and CRZO issued its restricted shares of common stock valued at \$150,000. The properties are located approximately 25 miles north of Gillette, in Campbell County, Wyoming. In 2003 these interests were exchanged for common stock of Pinnacle Gas Resources. (See Pinnacle below).

PINNACLE

On June 23, 2003, a Subscription and Contribution Agreement was executed by RMG, CCBM, and the seven affiliates of Credit Suisse First Boston Private Equity ("CSFB Parties"). Under the Agreement, RMG and CCBM contributed certain of their respective interests, having an estimated fair value of approximately \$7.5 million each, carried on RMG's books at a cost of \$922,600, comprised of (1) leases in the Clearmont, Kirby, Arvada and Bobcat CBM project areas and (2) oil and gas reserves in the Bobcat project area, to a newly formed entity, Pinnacle Gas Resources, Inc., a Delaware corporation ("Pinnacle"). In exchange for the contribution of these assets, RMG and CCBM each received 37.5% of the common stock of Pinnacle ("Pinnacle Common Stock") as of the closing date and options to purchase Pinnacle Common Stock ("Pinnacle Stock Options"). The CSFB Parties contributed \$5.0 million for 25% of the common stock in Pinnacle.

CSFB Parties also contributed approximately \$13 million of cash to Pinnacle in return for the Redeemable Preferred Stock of Pinnacle ("Pinnacle Preferred Stock"), 25% of the Pinnacle Common Stock as of the closing date and warrants to purchase Pinnacle Common Stock ("Pinnacle Warrants"). The CSFB Parties also agreed to contribute additional cash, under certain circumstances, of up to approximately \$11.8 million to Pinnacle to fund future drilling, development and acquisitions. The CSFB Parties currently have greater than 50% of the voting power of the Pinnacle capital stock through their ownership of Pinnacle Common Stock and Pinnacle Preferred Stock.

Currently, on a fully diluted basis, assuming that all parties exercised their Pinnacle Warrants and Pinnacle Options, the CSFB Parties, RMG and CCBM would have ownership interest of approximately 46.2%, 26.9% and 26.9%, respectively. On a fully-diluted basis, assuming the additional \$11.8 million of cash was contributed by the CSFB Parties and all Pinnacle Warrants and Pinnacle Options were exercised by all parties, the CSFB Parties would own 54.6% of Pinnacle and RMG and CCBM would each own 22.7% of Pinnacle.

Prior to and in connection with its contribution of assets to Pinnacle, CCBM paid RMG approximately \$1.8 million in cash as part of its outstanding purchase obligation on the coalbed methane property interests CCBM previously acquired from RMG. CCBM was also given a credit of \$1,250,000 against the note payable pursuant to the original Purchase and Sale Agreement which allowed CCBM to recover \$1,250,000 from 20% of RMG's net revenue interest from any production from the properties contributed to Pinnacle. After these payments and credits, there was a balance of approximate \$1.2

127

(CONTINUED)

million remaining on the obligation from CCBM to RMG at December 31, 2003, the balance on the note receivable for CCBM was \$863,200. The principal reductions to the note receivable from CCBM are accounted for on a cash basis because it is non-recourse.

Pinnacle is a private corporation. Only such information about Pinnacle as its board of directors elects to release is available to the public. All other information about Pinnacle is subject to confidentiality agreements between

Edgar Filing: US ENERGY CORP - Form 424B3

Pinnacle, RMG, and the other parties to the June 2003 transaction.

Oil and Gas Properties and Equipment Included the Following:

	December 31,		May 31,
	2003	2002	2002
Oil and gas properties:			
Subject to amortization	\$ 1,773,600	\$ 1,773,600	\$ 1,773,600
Acquired in calendar 2003	--	--	--

U.S. ENERGY CORP. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
 DECEMBER 31, 2003 AND 2002, MAY 31, 2002 AND MAY 31, 2001
 (CONTINUED)

As of February 27, 2004, the Company had approximately 128,200 net acres for the potential development of coalbed methane ("CBM") natural gas production in Wyoming and Montana with a cost basis of \$1,204,400. These properties were mostly acquired in 2000 and drilling projects on these properties are in the early stage of evaluation and thus no reserves are recorded at year end associated with these properties.

The results from operations of oil and gas activities for the year ended December 31, 2003 and the seven months ended December 31, 2002 are as follows:

	Year Ended December 31, 2003 -----	Seven Months Ended December 31, 2002 -----
Sales to third parties	\$ 287,400	\$ 119,400
Production costs	(224,200)	(355,200)
Depreciation, depletion and amortization	(88,900)	(65,200)
	-----	-----
Loss from oil and gas production activities	\$ (25,700)	\$ (301,000)
	=====	=====

Depreciation, depletion and amortization was \$1.09 and \$1.14 per equivalent mcf of production for the year ended December 31, 2003 and the seven months ended December 31, 2002, respectively.

G. DEBT:

LINES OF CREDIT

The Company has a \$750,000 line of credit from a commercial bank. The line of credit has a variable interest rate (5.0% as of December 31, 2003). The weighted average interest rate for the year ended December 31, 2003 was 5.12%. As of December 31, 2003, none of the line of credit had been borrowed. The line of credit is collateralized by certain real property and a share of the net proceeds of fees from production from certain oil wells.

(CONTINUED)

LONG-TERM DEBT

The components of long-term debt as of December 31, 2003, 2002 and May 31, 2002 are as follows:

	December 31,		
	2003	2002	
USECC installment notes - collateralized by equipment; interest at 5.0% to 9.0%, matures in 2004 - 2009	\$ 1,407,900	\$ 1,839,400	\$ 1,
SGMC installment notes - collateralized by certain properties, interest at 7.5% to 8.0% maturity from 2004 - 2007	62,900	531,100	
USE convertible notes - net of discount of \$221,000 at December 31, 2003, \$620,100 at December 31, 2002 and \$620,100 at May 31, 2002 collateralized by equipment and real estate, interest at 8.0%;	779,000	741,300	
PLATEAU installment note - collateralized by equipment, interest at 8.0%	--	26,000	
	2,249,800	3,137,800	2,
	(932,200)	(317,200)	(
Less current portion	\$ 1,317,600	\$ 2,820,600	\$ 2,
	=====	=====	=====

Principal requirements on long-term debt are \$932,200, \$112,800; \$116,600; \$1,056,500; \$22,600 and \$9,100 for the years ended December 31, 2004 through 2008, and thereafter, respectively.

In 2003, Caydal converted \$500,000 of debt to 211,109 shares of common stock (33,333 shares at the original \$3.00 conversion price, and 177,776 shares at the restructured price of \$2.25). The outstanding principal balance on the debts owed to Caydal and Tsunami Partners was \$500,000 and \$500,000, convertible at December 31, 2003 into 222,220 and 222,220 shares, respectively. Tsunami Partners did not convert any debt to shares in 2003. Caydal and Tsunami Partners are accredited investors.

H. INCOME TAXES:

The components of deferred taxes as of December 31, 2003, 2002 and May 31, 2002 are as follows:

	December 31,		May 31,
	2003	2002	2002
Deferred tax assets:			
Deferred compensation	\$ 445,400	\$ 345,500	\$ 273,400
Net operating loss carryforwards	11,596,000	9,560,000	9,028,600
Non-deductible reserves and other	437,200	622,800	622,800
Tax basis in excess of book basis	106,700	250,000	250,000
Total deferred tax assets	12,585,300	10,778,300	10,174,800
Deferred tax liabilities:			
Book basis in excess of tax basis	486,200	721,300	767,700
Development and exploration costs	107,600	107,600	107,600
Total deferred tax liabilities	593,800	828,900	875,300
Valuation allowance	11,991,500 (11,991,500)	9,949,400 (9,949,400)	9,299,500 (9,299,500)
Net deferred tax liability	\$ --	\$ --	\$ --

A valuation allowance for deferred tax assets is required when it is more likely than not that some portion or all of the deferred tax assets will not be realized. The ultimate realization of this deferred tax asset depends on the Company's ability to generate sufficient taxable income in the future. Management believes it is more likely than not that the net deferred tax asset will not be realized by future operating results. Deferred tax component for December 31, 2002 and May 31, 2002 have been restated (Note A).

The valuation allowance increased \$2,042,100 for the year ended December 31, 2003, increased \$649,900 for the seven months ended December 31, 2002 and decreased \$2,740,300 and \$2,641,300 for the years ended May 31, 2002 and 2001, respectively.

The income tax provision (benefit) is different from the amounts computed by applying the statutory federal income tax rate to income before taxes. The reasons for these differences are as follows:

	December 31,		May 31,	
	2003	2002	2002	
Expected federal income tax	\$ (2,405,800)	\$ (1,305,600)	\$ (2,131,000)	\$
Net operating losses not previously

U.S. ENERGY CORP. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS DECEMBER 31, 2003 AND 2002, MAY 31, 2002 AND MAY 31, 2001 (CONTINUED)

There were no taxes currently payable as of December 31, 2003, December 31, 2002, May 31, 2002, or May 31, 2001 related to continuing operations.

At December 31, 2003, the Company and its subsidiaries had available, for federal income tax purposes, net operating loss carryforwards of approximately \$33,300,000 which will expire from 2006 to 2023. The Internal Revenue Code contains provisions which limit the NOL carryforwards available which can be used in a given year when significant changes in Company ownership interests occur. In addition, the NOL amounts are subject to examination by the tax authorities.

The Internal Revenue Service has audited the Company's and subsidiaries tax returns through the year ended May 31, 2000. The Company's income tax liabilities are settled through fiscal 2000.

I. SEGMENTS AND MAJOR CUSTOMERS:

The Company's primary business activity is coalbed methane gas property acquisition and exploration and production (and holding shut down mining properties). The Company has no producing mines. The other reportable industry segment is commercial activities through motel, real estate and airport operations. The Company discontinued its drilling/construction segment in the third quarter of fiscal 2002. The following is information related to these industry segments:

J. SHAREHOLDERS' EQUITY:

STOCK OPTION PLANS

The Board of Directors adopted the U.S. Energy Corp. 1989 Stock Option Plan for the benefit of USE's key employees. The Option Plan, as amended and renamed the 1998 Incentive Stock Option Plan ("1998 ISOP"), reserved 3,250,000 shares of the Company's \$.01 par value common stock for issuance under the 1998 ISOP. Options which expired without exercise were available for reissue.

During the year ended December 31, 2003, the seven months ended December 31, 2002 and the years ended May 31, 2002 and 2001 the following activity occurred under the 1998 ISOP:

Edgar Filing: US ENERGY CORP - Form 424B3

In December 2001, the Board of Directors adopted (and the shareholders approved) the U.S. Energy Corp. 2001 Incentive Stock Option Plan (the "2001 ISOP") for the benefit of USE's key employees. The 2001 ISOP reserves 3,000,000 shares of the Company's \$.01 par value common stock for issuance for a period of 10 years.

EMPLOYEE STOCK OWNERSHIP PLAN

The Board of Directors of USE adopted the U.S. Energy Corp. 1989 Employee Stock Ownership Plan ("ESOP") in 1989, for the benefit of USE employees. During the year ended December 31, 2003 the Board of Directors of USE contributed 76,294 shares to the ESOP at the price of \$3.10 for a total expense of \$236,400. This compares to contributions to the ESOP during the seven months ended December 31, 2002 and fiscal years ended May 31, 2002 and 2001 of 43,867, 70,075 and 53,837 shares to the ESOP at prices of \$3.08, \$3.29 and \$5.35 per share, respectively. The Company has expensed \$236,400, \$135,100, \$236,900 and \$288,000 during the year ended December 31, 2003; the seven months ended December 31, 2002 and the fiscal years ended May 31, 2002 and 2001, respectively related to these contributions. As of December 31, 2003, all shares of the USE stock that have been contributed to the ESOP have been allocated. The estimated fair value of shares that are not vested is approximately \$84,800. USE has loaned the ESOP \$1,014,300 to purchase 125,000 shares from the Company and 38,550 shares on the open market. During the year ended May 31, 1996, 10,089 of these shares were used to fund the Company's annual funding commitment and reduce the loan to the Company by \$87,300. These loans, which are secured by pledges of the stock purchased, bear interest at the rate of 10% per annum. The loans are reflected as unallocated ESOP contribution in the equity section of the accompanying Consolidated Balance Sheets.

EXECUTIVE OFFICER COMPENSATION

In May 1996, the Board of Directors of USE approved an annual incentive compensation arrangement ("1996 Stock Award Program") for its CEO and four other officers of the Company payable in shares of the Company's common stock. The 1996 Stock Award Program was subsequently modified to reflect the intent of the directors which was to provide incentive to the officers of the Company to remain with USE. The shares were issued annually pursuant to the recommendation of the Compensation Committee on or before January 15 of each year, beginning

Edgar Filing: US ENERGY CORP - Form 424B3

January 15, 1997, as long as each officer is employed by the Company. The officers received up to an aggregate total of 67,000 shares per year for the years 1997 through 2002. The shares under the plan are forfeitable until retirement, death or disability of the officer. The shares are held in trust by the Company's treasurer and are voted by the Company's non-employee directors. As of December 31, 2003, 392,536 shares had been issued to the five officers of the Company under the 1996 Stock Award Plan and 62,536 shares had been released to the estate of one of the officers. The 1996 Stock award program was closed out in the year ended December 31, 2003.

140

U.S. ENERGY CORP. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS DECEMBER 31, 2003 AND 2002, MAY 31, 2002 AND MAY 31, 2001 (CONTINUED)

In December 2001, the Board of Directors adopted (and the shareholders approved) the 2001 Stock Award Plan to compensate five of its executive officers and the president of RMG. Under the Plan, an aggregate of 100,000 shares may be issued each year from 2002. 100,000 shares were issued under the Plan during the year ended December 31, 2003. No shares were issued under this Plan during the seven month ended December 31, 2002 and the fiscal year ended May 31, 2002.

OPTIONS AND WARRANTS TO OTHERS

As of December 31, 2003, there are 906,724 options and warrants outstanding to purchase shares of the Company's common stock. The Company values these warrants using the black-scholes option pricing model and expenses that value over the life of the warrants. Activity for the periods ended December 31, 2003 for warrants is represented in the following table:

	Year Ended December 31, 2003		Seven Months Ended December 31, 2002		Year Ended May 31, 2002		
	Warrants	Weighted Average Exercise Price	Warrants	Weighted Average Exercise Price	Warrants	Weighted Average Exercise Price	Warrants

FORFEITABLE SHARES

Certain of the shares issued to officers, directors, employees and third parties are forfeitable if certain conditions are not met. Therefore, these shares have been reflected outside of the Shareholders' Equity section in the accompanying Consolidated Balance Sheets until earned. During fiscal 1993, the Company's Board of Directors amended the stock bonus plan. As a result, the earn-out dates of certain individuals were extended until retirement. The Company recorded \$284,700 of compensation expense for the year ended December 31, 2003 compared to \$178,300 for the seven months ended December 31, 2002; \$298,300 and \$201,000 for the years ended May 31, 2002 and 2001, respectively. A schedule of total forfeitable shares for the Company is set forth in the following table:

Issue Date -----	Number of Shares -----	Issue Price -----	Total Compensation -----
Balance at June 1, 2000	396,608		\$ 2,584,600
May 2001	67,000	\$ 5.35	358,400

K. COMMITMENTS, CONTINGENCIES AND OTHER:

LEGAL PROCEEDINGS

Material pending proceedings are summarized below. Certain of the Company's affiliates are involved in ordinary routine litigation incidental to their business. Other proceedings which were pending during the year ended December 31, 2003 have been settled or otherwise finally resolved.

SHEEP MOUNTAIN PARTNERS ARBITRATION/LITIGATION

In 1991, disputes arose between the U.S. Energy Corp. ("USE")/Crested Corp. ("Crested") d/b/a/ USECC, and Nukem, Inc. and its subsidiary Cycle Resource Investment Corp. ("CRIC"), concerning the formation and operation of their equally owned Sheep Mountain Partners (SMP) partnership. Arbitration proceedings were initiated by CRIC in June 1991 and in July 1991, USECC filed a lawsuit against Nukem, CRIC and others in the U.S. District Court of Colorado in Civil No. 91B1153. The Federal Court stayed the arbitration proceedings and discovery proceeded. In February 1994, all of the parties agreed to

142

U.S. ENERGY CORP. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS DECEMBER 31, 2003 AND 2002, MAY 31, 2002 AND MAY 31, 2001 (CONTINUED)

consensual and binding arbitration of all of their disputes over SMP before an arbitration panel (the "Panel").

After 73 hearing days, the Panel entered an Order and Award on April 18, 1996 and clarified the Order on July 3, 1996, finding generally in favor of USE and Crested on certain of their claims and imposed a constructive trust in favor of Sheep Mountain Partners on uranium contracts Nukem entered into to purchase uranium from CIS republics. The Panel also awarded SMP damages of \$31,355,070 against Nukem. USECC filed a petition for confirmation of the Order and on June 27, 1997, the U.S. District Court confirmed the Panel's Orders in its Second Amended Judgment.

Thereafter, Nukem/CRIC appealed the Judgment to the 10th Circuit Court of Appeals ("CCA"). On October 22, 1998, the 10th CCA issued an Order and Judgment affirming the U.S. District Court's Second Amended Judgment without modification. The ruling affirmed (i) the imposition of a constructive trust in favor of SMP on Nukem's rights to purchase CIS uranium, the uranium acquired pursuant to those rights, and the profits therefrom; and (ii) the damage award in favor of SMP against Nukem. The 10th CCA held that the Panel's Awards "clearly retains both a constructive trust and a damage award," and the Arbitration Awards and the Second Amended Judgment were "clear and unambiguous."

On February 8, 1999, the U.S. District Court ordered Nukem to pay USECC the balance of the damage award. Nukem did so, but then moved for a satisfaction of judgment without accounting for the monies earned in the Constructive Trust. The

Edgar Filing: US ENERGY CORP - Form 424B3

District Court denied Nukem's motion and Nukem filed its second appeal to the 10th CCA. On October 16, 2000, the 10th CCA again affirmed the order of the District Court. The 10th CCA held that Nukem had not "provided an accounting of the partnership assets," finding that "the district court order presented for our review does not decide which CIS contracts are covered by the constructive trust."

On November 3, 2000, USECC filed a motion for a further accounting of the Constructive Trust. On February 15, 2001, the District Court entered an Order of Reference appointing a Special Master to "conduct an accounting" of the Constructive Trust. The accounting was conducted and on May 1, 2003, the Special Master filed his Report with the District Court. Both parties filed objections to the Report. On July 30, 2003, the U.S. District Court adopted the Report in part and rejected it in part. Judgment was then entered by the Court on August 1, 2003 in favor of USECC and against Nukem in the amount of \$20,044,183.

On August 15, 2003, Nukem filed a "Motion to Remand to the Arbitration Panel or in the Alternative, to Alter, Amend and/or Correct the Court's August 1, 2003 Judgment and July 30, 2003 Order," and a "Motion to Correct Certain Findings or Statements in the Court's Order of July 30, 2003." On the same day, USECC filed a motion under Fed.R.Civ.P. 52(b) and 59(e) to alter or amend the July 30, 2003 Order and the August 1, 2003 Judgment. The District Court denied the parties' motions on September 10 and 11, 2003, respectively. Nukem's appeal and USECC's cross-appeal followed. Nukem's opening brief was filed on January 16, 2004 and on February 24, 2004, USECC filed an opening brief in its cross-appeal and an answer to Nukem's brief. Nukem has until March 29, 2004 or any extension thereof to file an answer to USECC's opening brief. USECC may then file a reply brief 14 days after

143

U.S. ENERGY CORP. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS DECEMBER 31, 2003 AND 2002, MAY 31, 2002 AND MAY 31, 2001 (CONTINUED)

service of Nukem's answer. Management believes that the ultimate outcome of this matter will not have an adverse affect on the Company's financial condition or result of operation.

CONTOUR DEVELOPMENT LITIGATION

On July 28, 1998, USE and Crested filed a lawsuit in the U. S. District Court of Colorado in Case No. 98WM1630, against Contour Development Company, L.L.C. and entities and persons associated with Contour Development Company, L.L.C. (together, "Contour") seeking compensatory and consequential damages of more than \$1.3 million from the defendants for dealings in real estate owned by USE and Crested in Gunnison, Colorado. The Contour defendants asserted a counterclaim asking for payment of attorneys fee and costs. The parties settled the litigation in 2004. In the settlement, USE and Crested received \$25,000 in cash; two lots in the City of Gunnison, Colorado (one of which has been sold for a net of \$65,326 and the other lot is under contract to sell for \$180,000), and an additional five development lots covering 175 acres north of Gunnison, Colorado.

PHELPS DODGE LITIGATION

Edgar Filing: US ENERGY CORP - Form 424B3

U.S. Energy Corp. (USE) and Crested Corp. (Crested), d/b/a USECC, were served with a lawsuit on June 19, 2002, filed in the U.S. District Court of Colorado (Case No. 02-B-0796(PAC)) by Phelps Dodge Corporation (PD) and its subsidiary, Mt. Emmons Mining Company (MEMCO), over contractual obligations in USECC's agreement with PD's predecessor companies, concerning mining properties on Mt. Emmons, near Crested Butte, Colorado.

The litigation stems from agreements that date back to 1974 when USE and Crested leased the mining claims from AMAX Inc., PD's predecessor company. The mining claims cover one of the world's largest and richest deposits of molybdenum discovered by AMAX. AMAX reportedly spent over \$200 million on the acquisition, exploration and mine planning activities on the Mt. Emmons properties.

The complaint filed by PD and MEMCO seeks a determination that PD's acquisition of Cyprus Amax was not a sale. Under a 1986 agreement between USECC and AMAX, if AMAX sold MEMCO or its interest in the mining properties, U.S. Energy and Crested would receive 15% (7.5% each) of the first \$25 million of the purchase price (\$3.75 million). In 1991, Cyprus Minerals Company acquired AMAX to form Cyprus Amax Minerals Co. USECC's counter and cross-claims allege that in 1999, PD formed a wholly-owned subsidiary CAV Corporation, for the purpose of purchasing the controlling interest of Cyprus Amax and its subsidiaries (including MEMCO) at an estimated value in cash and PD stock exceeding \$1 billion and making Cyprus Amax a subsidiary of PD. Therefore, USECC asserts the acquisition of Cyprus Amax by PD was a sale of MEMCO and the properties that triggers the obligation of Cyprus Amax to pay USECC the \$3.75 million plus interest.

The other issue in the litigation is whether USECC must, under terms of a 1987 Royalty Deed, accept PD's and MEMCO's conveyance of the Mt. Emmons properties back to USECC, which properties now include a plant to treat mine water, costing in excess of \$1 million a year to operate in compliance with State of Colorado regulations. PD's and MEMCO's claim seek to obligate USECC to assume the operating costs of the water treatment plant. USECC refuses to have the water treatment plant included in

144

U.S. ENERGY CORP. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS DECEMBER 31, 2003 AND 2002, MAY 31, 2002 AND MAY 31, 2001 (CONTINUED)

the return of the properties because, the USECC counterclaim argues, the properties must be in the same condition as when they were acquired by AMAX before the water treatment plant was constructed by AMAX.

As added counterclaims, USECC seeks (i) damages for PD's breach of covenants of good faith and fair dealing; (ii) damages for PD's failure to develop the Mt. Emmons properties and not protecting USECC's rights as a revisionary owner of the mining rights to the properties, (iii) damages for unjust enrichment of PD; (iv) damages for breach of the PD's fiduciary duties owed to USECC as revisionary owner of the property, and for neglecting to maintain the mining rights and interests in the properties.

On March 17, 2003, PD filed additional motions for partial summary judgment on various claims. On January 22, 2004, the District Court heard the motions and

Edgar Filing: US ENERGY CORP - Form 424B3

responses of USECC and additional briefs were thereafter filed with the Court. The Court is considering the motions. Management believes that the ultimate outcome of this matter will not have an adverse affect on the Company's financial condition or result of operations.

ROCKY MOUNTAIN GAS, INC. (RMG)

LITIGATION INVOLVING LEASES ON COALBED METHANE PROPERTIES IN MONTANA

On or about April 1, 2001, Rocky Mountain Gas, Inc. (RMG), a subsidiary of USE and Crested, was served with a Second Amended Complaint wherein the Northern Plains Resource Council had filed suit in the U.S. District Court of Montana, Billings Division in Case No. CV-01-96-BLG-RWA against the United States Bureau of Land Management ("BLM"), RMG, certain of its affiliates (including U.S. Energy Corp. and Crested Corp.) and some 20 other defendants. The plaintiff is seeking to cancel oil and gas leases issued to RMG et. al. by the BLM in the Powder River Basin of Montana and for other relief.

The basis for the complaint appears to be that the BLM's regulations require the BLM to respond to objections filed by persons owning land or lease rights adjacent to the coalbed properties which the BLM is offering to lease to the public. The argument of plaintiff appears to be that if objections are not responded to by the BLM prior to issuing CBM leases, the leases are invalid. Based on this argument, the plaintiff appears to have been successful in forcing cancellation of some CBM leases granted to others in the Powder River Basin of Montana, because the BLM did not respond to some objecting adjacent landowners. However, all of the BLM leases in Montana held by RMG (none are held by USE in its corporate name) are at least four years old, and there is no record of any objections being made to the issue of those leases.

Based on filings in the case to date, it appears that the BLM is taking the initiative in responding to the plaintiff. We believe RMG's leases were validly issued in compliance with BLM procedures, and do not believe the plaintiff's lawsuit will adversely affect any of RMG's Montana BLM leases.

145

U.S. ENERGY CORP. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS DECEMBER 31, 2003 AND 2002, MAY 31, 2002 AND MAY 31, 2001 (CONTINUED)

LAWSUITS CHALLENGING BLM'S RECORDS OF DECISIONS

Three lawsuits are currently pending in the Montana Federal District Court challenging BLM's Records of Decisions for the Powder River Basin Oil and Gas EIS (PRB-EIS) for the Wyoming portion of the basin, and the Statewide Oil and Gas EIS and Proposed Amendment for the Powder River and billings Resource Management Plans in Montana. Neither the Company, nor RMG is a party to any of these lawsuits.

LITIGATION INVOLVING DRILLING ON A COALBED METHANE LEASE

A drilling company, Eagle Energy Services, LLC filed a lien on RMG's leasehold in southwestern Wyoming for drilling services performed at RMG's Oyster Ridge Property and filed a lawsuit foreclosing the lien. Eagle Energy's

Edgar Filing: US ENERGY CORP - Form 424B3

bank, Community First National Bank of Sheridan, Wyoming, filed a similar suit for the same amount on an assignment from Eagle Energy against RMG, Eagle Energy Services, LLC and others who guaranteed a loan to Eagle Energy in Civil Action No. C02-9-328 in the 4th Judicial District of Sheridan County, Wyoming. Eagle Energy's claim is for a contract to drill a well for coalbed methane. RMG terminated the agreement because of the dangerous conditions of Eagle Energy's equipment and other reasons. The claim against RMG is for \$49,309.50. Negotiations to settle the lien and lawsuits are pending. Management believes that the ultimate outcome of the matters will not have a material effect on the Company's financial condition or results of operations.

RECLAMATION AND ENVIRONMENTAL LIABILITIES

Most of the Company's exploration activities are subject to federal and state regulations that require the Company to protect the environment. The Company conducts its operations in accordance with these regulations. The Company's current estimates of its reclamation obligations and its current level of expenditures to perform ongoing reclamation may change in the future. At the present time, however, the Company cannot predict the outcome of future regulation or impact on costs. Nonetheless, the Company has recorded its best estimate of future reclamation and closure costs based on currently available facts, technology and enacted laws and regulations. Certain regulatory agencies, such as the Nuclear Regulatory Commission ("NRC"), the Bureau of Land Management ("BLM") and the Wyoming Department of Environmental Quality ("WDEQ") review the Company's reclamation, environmental and decommissioning liabilities, and the Company believes the recorded amounts are consistent with those reviews and related bonding requirements. To the extent that planned production on its properties is delayed, interrupted or discontinued because of regulation or the economics of the properties, the future earnings of the Company would be adversely affected. The Company believes it has accrued all necessary reclamation costs and there are no additional contingent losses or unasserted claims to be disclosed or recorded.

The majority of the Company's environmental obligations relate to former mining properties acquired by the Company. Since the Company currently does not have any properties in production, the Company's policy of providing for future reclamation and mine closure costs on a unit-of-production basis has not resulted in any significant annual expenditures or costs. For the obligations recorded on acquired properties, including site-restoration, closure and monitoring costs, actual expenditures for reclamation

146

U.S. ENERGY CORP. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS DECEMBER 31, 2003 AND 2002, MAY 31, 2002 AND MAY 31, 2001 (CONTINUED)

will occur over several years, and since these properties are all considered future production properties, those expenditures, particularly the closure costs, may not be incurred for many years. The Company also does not believe that any significant capital expenditures to monitor or reduce hazardous substances or other environmental impacts are currently required. As a result, the near term reclamation obligations are not expected to have a significant impact on the Company's liquidity.

As of December 31, 2003, estimated reclamation obligations related to the

Edgar Filing: US ENERGY CORP - Form 424B3

above mentioned mining properties total \$7,264,700. The Company currently has three mineral properties or investments that account for most of their environmental obligations, SMP, Plateau and SGMC. The environmental obligations and the nature and extent of cost sharing arrangements with other potentially responsible parties, as well as any uncertainties with respect to joint and several liability of each are discussed in the following paragraphs:

SMP

The Company is responsible for the reclamation obligations, environmental liabilities and liabilities for injuries to employees in mining operations with respect to the Sheep Mountain properties. The reclamation obligations, which are established by regulatory authorities, were reviewed by the Company and the regulatory authorities during fiscal 2002 and they jointly determined that the reclamation liability was \$2,106,600. The Company is self bonded for this obligation by mortgaging certain of their real estate assets, including the Glen L. Larsen building, and by posting cash bonds.

GMMV

During fiscal 1991, the Company acquired mineral properties on Green Mountain known as the Big Eagle Property. The GMMV also acquired a uranium mill known as the Sweetwater Mill. As part of the settlement of the GMMV litigation with Kennecott in September 2000, the Company was released from any and all reclamation and environmental obligations related to the GMMV except the Ion Exchange Plant. During fiscal 2002, the Company completed the required reclamation on the Ion Exchange Plant. The reclamation work has been completed and a final report has been submitted to and is being reviewed by the regulatory agencies. No further monitoring of the site is required and no additional reclamation work is anticipated.

SUTTER GOLD MINING COMPANY

SGMC's mineral properties are currently on shut down status and have never been in production. There has been minimal surface disturbance on the Sutter properties. Reclamation obligations consist of closing the mine entry and removal of a mine shop. The reclamation obligation to close the property has been set by the State of California at \$27,800 which is covered by a cash reclamation bond. This amount was recorded by SGMC as a reclamation liability as of December 31, 2003.

147

U.S. ENERGY CORP. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS DECEMBER 31, 2003 AND 2002, MAY 31, 2002 AND MAY 31, 2001 (CONTINUED)

PLATEAU RESOURCES LIMITED

The environmental and reclamation obligations acquired with the acquisition of Plateau include obligations relating to the Shootaring Mill. Based on the bonding requirements, Plateau transferred \$2,500,000 to a trust account as

Edgar Filing: US ENERGY CORP - Form 424B3

financial surety to pay future costs of mill decommissioning, site reclamation and long-term site surveillance. In fiscal 1997, Plateau requested that the mill be placed on operational status. The NRC increased the reclamation liability to \$6,784,000 as a result of this request. As of December 31, 2003, a cash deposit for reclamation in the amount of \$6,874,200 was held by Plateau's escrow agent to satisfy the obligation of reclamation of \$5,130,300.

EXECUTIVE COMPENSATION

The Company is committed to pay the surviving spouse or dependant children of certain of their officers one years' salary and an amount to be determined by the Boards of Directors, for a period of up to five years thereafter. This commitment applies only in the event of the death or total disability of those officers who are full-time employees of the Company at the time of total disability or death. Certain officers and employees have employment agreements with the Company. The maximum compensation due under these agreements for the officers covered by the agreement for the first year after their deaths, should they die in the same year, is \$311,400 at December 31, 2003.

L. DISCONTINUED OPERATIONS.

During the third quarter of the fiscal year ended May 31, 2002, the Company made the decision to discontinue its drilling/construction segment. The assets associated with this business segment are being sold and or converted for use elsewhere in the Company. The financial statements for the fiscal year ended May 31, 2001 have been revised to present the effect of discontinued operations. There is no material income or loss from discontinued operations from the measurement date to December 31, 2002.

During the third quarter of the year ended December 31, 2003, the Company sold its motel and retail operations in southern Utah. The financial statements for all of the periods presented have been revised to present these operations as discontinued.

M. SUPPLEMENTAL NATURAL GAS RESERVE INFORMATION (UNAUDITED):

The following estimates of proved gas reserves, both developed and undeveloped, represent interests owned by the Company located solely within the United States. Proved reserves represent estimated quantities of natural gas which geological and engineering data demonstrate with reasonable certainty to be recoverable in future years from known reservoirs under existing economic and operating conditions. Proved developed gas reserves are the quantities expected to be recovered through existing wells with existing equipment and operating methods. Proved undeveloped gas reserves are reserves that are expected to be recovered from new wells on undrilled acreage, or from existing wells for which relatively major expenditures are required for completion.

U.S. ENERGY CORP. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS DECEMBER 31, 2003 AND 2002, MAY 31, 2002 AND MAY 31, 2001 (CONTINUED)

The Company began natural gas production in June, 2002. Disclosures of gas reserves which follow are based on estimates prepared by independent engineering

Edgar Filing: US ENERGY CORP - Form 424B3

consultants as of December 31, 2002. Such estimates are subject to numerous uncertainties inherent in the estimation of quantities of proved reserves and in the projection of future rates of production and the timing of development expenditures. These estimates do not include probable or possible reserves. The information provided does not represent Management's estimate of the Company's expected future cash flows or value of proved oil and gas reserves.

RMG's sales volumes of gas produced, average sales prices received for gas sold, and average production costs for those sales, for the seven months ended December 31, 2002, and for the year ended December, 2003, all from the Bobcat property which was transferred to Pinnacle in June 2003 are as follows:

	Year Ended December 31, 2003 -----	Seven Months Ended December 31, 2002 -----
Sales volumes (mcf)	81,516	64,315
Average sales price per mcf	\$3.71	\$1.86
Average cost (per mcf)	\$1.91	\$1.91

Changes in estimated reserve quantities

The net interest in estimated quantities of proved developed and undeveloped reserves of crude oil and natural gas and changes in such quantities and discounted future net cash flow were as follows:

	(Unaudited) - Unescalated -----		
	MCF Cubic Feet -----		Discounted Future Net Cash Flow (10% Discount) -----

U.S. ENERGY CORP. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS DECEMBER 31, 2003 AND 2002, MAY 31, 2002 AND MAY 31, 2001 (CONTINUED)

P. SUBSEQUENT EVENT

ROCKY MOUNTAIN GAS, INC.

On January 30, 2004 the Company's affiliate, RMG, acquired Wyoming coalbed methane (CBM) properties from a non-affiliated party. The purchase price of \$6.8 million was paid with \$5.0 million of cash, \$500,000 in a 30 day secured note, \$600,000 in restricted USE stock and \$700,000 in restricted RMG stock. RMG financed \$3.7 million of the cash component from a recently established \$25 million credit facility arranged by Petrobridge Investment Management, LLC (Petrobridge), a mezzanine lender headquartered in Houston, TX. As defined by the agreement, terms under the credit facility include the following: (1) Advances under the credit facility are subject to lenders approval; (2) All revenues from oil and gas properties securing the credit facility will be paid to a lock box controlled by the lender. All disbursements for lease operating costs, revenue distributions and operating expenses will require approval by the lender before distributions are made, and (3) The Company must maintain certain financial ratios and production volume, among other things.

The properties acquired include 247 completed wells of which 138 wells were producing at the time of the acquisition, approximately 6.0 million cubic feet of gas per day (mmcf) (approximately 3.2 mmcf net to RMG) and 40,120 undeveloped fee acres, of which RMG owns 100%. RMG will operate 89% of the wells

Edgar Filing: US ENERGY CORP - Form 424B3

and owns an average 58% working interest in the producing wells and a 100% working interest in all of the undeveloped acreage. The properties purchased serve as the sole collateral for the credit facility. With the acquisition, RMG's gross and net acreage holdings increase to approximately 264,300 and 128,200, respectively.

SUTTER GOLD MINING CO.

On January 5, 2004, the Company, through Suttter, entered into a Letter of Intent to merge, via a reverse takeover, with Globemin Resources, Inc. a public company headquartered in Vancouver, Canada. Pursuant to the Letter of Intent, after the reverse trakeover is closed, Sutter plans on raising equity funds and begin further exploration work on the properties and the construction of a new secondary access raise to comply with US Mine Safety Health Administration regulations and improve ventilation as well as to better define known mineralization. The exploration work will be run through the Comet mineralized zone as soon as funds are made available through equity or debt financing. The current resource production plan is to initially produce a stockpile of mineralized material sufficient to operate a mill at 300 tons-per-day (tpd) while the mill is being built. The second stage of development will be to construct a conventional 300 tpd mill on site, which will be designed so that it can easily be expanded to accommodate the planned production of 500 tpd. Closing of the reverse takeover is subject to negotiation and approval of the share exchange agreements by the directors and shareholders of both companies and approval by Canadian Regulatory Authorities.

154

REPORT OF INDEPENDENT CERTIFIED PUBLIC ACCOUNTANTS ON SCHEDULE

To U.S. Energy Corp:

In connection with our audit of the consolidated financial statements of U.S. Energy Corp. and subsidiaries referred to in our report dated February 27, 2004, which is included in the Company's annual report on Form 10-K, we have also audited Schedule II for the year ended December 31, 2003, the seven months ended December 31, 2002 and the years ended May 31, 2002 and 2001. In our opinion, this schedule when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly, in all material respects, the information to be set forth therein.

Board of Directors
U.S. Energy Corp.

We have audited the accompanying Combined Statements of Revenue and Direct Operating Expenses of Acquired Hi-Pro Properties (combined statements) for the years ended December 31, 2003, 2002 and 2001. The combined statements are the responsibility of the Acquired Properties management. Our responsibility is to express an opinion on the combined statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the combined statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the combined statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the combined statements. We believe that our audits provide a reasonable basis for our opinion.

The accompanying combined statements were prepared for the purpose of complying with the rules and regulations of the Securities and Exchange Commission (for inclusion in the Form 8-K of U.S. Energy Corp.) as described in Note A and are not intended to be a complete presentation of the Acquired Properties revenue and expenses.

In our opinion, the combined statements referred to above present fairly, in all material respects, the revenue and direct operating expenses as described in Note A of the Acquired Property Interests for the years ended December 31, 2003, 2002 and 2001, in conformity with accounting principles generally accepted in the United States of America.

	1,613,500	1,451,900	2,031,500
Excess of revenue over direct operating expenses	\$2,767,600	\$2,394,700	\$4,891,000

The accompanying notes are an integral part of these statements.

158

U.S. ENERGY CORP.
NOTES TO STATEMENTS OF REVENUE AND
DIRECT OPERATING EXPENSES OF
ACQUIRED HI-PRO PROPERTIES

DECEMBER 31, 2003, 2002 AND 2001

NOTE A - BASIS OF PRESENTATION AND GENERAL INFORMATION

The accompanying combined statements present the ownership interests of the Company in the revenue and direct operating expenses of certain coalbed methane gas properties acquired in the acquisition of the Hi-Pro Properties on January 30, 2004. The combined statements include the revenue and direct operating expenses of the Properties for the years ended December 31, 2003, 2002 and 2001.

The accompanying combined statements do not reflect provisions for depletion, depreciation, and amortization, if any, which may have been recorded in the financial records of the previous owner. The combined statements do not reflect certain additional expenses that may have been incurred in connection with the ownership of the Properties such as interest on indebtedness and general and administrative expenses incurred individually by the prior interest owners as such costs are not comparable to those which will result from the future operation of the Properties.

Lease operations expense includes direct costs of operating the Properties.

The Properties are not taxpaying entities. Any taxable income arising from the operation of the Properties accrues directly to the interest owners. Accordingly, no provision for income taxes has been made in the combined statements of revenue and direct operating expenses.

NOTE B - GAS RESERVE DATA (UNAUDITED)

The following estimates of proved developed and proved undeveloped reserve quantities and related standardized measure of discounted future net cash flows are estimates only, and do not purport to reflect realizable values or fair market values of the Properties' reserves. It is emphasized that reserve estimates are inherently imprecise and that estimates of new discoveries are more imprecise than those of producing oil and gas properties. Accordingly, these estimates are expected to change as future information becomes available.

Proved reserves are estimated reserves of coalbed methane gas that geological and engineering data demonstrate with reasonable certainty to be recoverable in future years from known reservoirs under existing economic and operating conditions. Proved developed reserves are those expected to be recovered through existing wells, equipment, and operating methods.

159

U.S. ENERGY CORP.
NOTES TO STATEMENTS OF REVENUE AND
DIRECT OPERATING EXPENSES OF
ACQUIRED HI-PRO PROPERTIES

DECEMBER 31, 2003, 2002 AND 2001

The standardized measure of discounted future net cash flows is computed by applying year-end prices of gas (with consideration of price changes only to the extent provided by contractual arrangements) to the estimated future production of proved gas reserves, less estimated future expenditures (based on year-end costs) to be incurred in developing and producing the proved reserves, and assuming continuation of existing economic conditions. The estimated future net cash flows are then discounted using a rate of 10% a year to reflect the estimated timing of the future cash flows. The following summaries of changes in reserves and standardized measure of discounted future net cash flows were prepared from estimates of proved reserves developed by an independent petroleum engineer and Company personnel. The acquired properties have no proved undeveloped reserves.

PRO FORMA COMBINED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS DECEMBER 31, 2003 (UNAUDITED)

The unaudited pro forma combined condensed consolidated statements of operations for the year ended December 31, 2003 and the three months ended March 31, 2004 give effect to the acquisition of certain property interests acquired in the acquisition of the Hi-Pro Properties by U.S. Energy Corp. ("USE" or "the Company"), and its subsidiary Rocky Mountain Gas, ("RMG") which has been accounted for using the purchase method of accounting. The pro forma combined financial statements are presented for illustrative purposes only and are not necessarily indicative of the operating results that would have occurred if the transactions given pro forma effect herein had been consummated as of the time reflected herein, nor are they necessarily indicative of the future operating

Edgar Filing: US ENERGY CORP - Form 424B3

results or financial position of the Company. The pro forma adjustments are based upon available information and certain assumptions that the Company believes are reasonable. This information should be read in conjunction with the historical financial statements and related notes of the Company and the Statements of Revenue and Direct Operating Expenses of Hi-Pro Acquired Properties.

U.S. ENERGY CORP. NOTES TO UNAUDITED PRO FORMA COMBINED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS DECEMBER 31, 2003

NOTE A - BASIS OF PRESENTATION

On January 30, 2004, the Company acquired the Hi-Pro coalbed methane Properties for \$6,800,000 and other equipment, inventory and vehicles were also purchased for approximately \$235,000. The accompanying pro forma combined condensed consolidated statements of operations for the year ended December 31, 2003 and the three months ended March 31, 2004 have been prepared as if the acquisition was consummated on January 1, 2003.

Basic earnings per share are based upon the weighted average number of common shares outstanding. Diluted earnings per common share are based on the assumption that all of the common stock options and purchase warrants are converted into common shares using the treasury stock method. There are no differences in net earnings for purposes of computing basic and diluted earnings per share as conversion of the common stock options and purchase warrants would have not effect on net earnings.

NOTE B - PRO FORMA ADJUSTMENTS

Pro forma adjustments are necessary to reflect the assumed effect of the acquisition on the statement of operations assuming the acquisition was consummated on January 1, 2003. The accompanying pro forma statement of

Edgar Filing: US ENERGY CORP - Form 424B3

operations reflect the following adjustments:

- (1) To record pro forma overriding royalty to lender, depletion, fixed operating expenses and asset retirement accretion related to the Hi-Pro properties as though they had been purchased as of January 1, 2003.
- (2) To record interest expense on the long term debt and the amortization of warrants issued in relation to that debt and other debt issue cost as though the Hi-Pro properties had been purchased as of January 1, 2003.

165

U.S. ENERGY CORP. NOTES TO UNAUDITED PRO FORMA COMBINED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS DECEMBER 31, 2003

NOTE C - GAS RESERVE DATA (UNAUDITED)

The following tables contain certain gas disclosures reflecting the pro forma combined gas activities as of and for the year ended December 31, 2003.

Summary of Changes in Proved Reserves

	December 31, 2003 MCF -----
Beginning of Year	5,994,813
Revision of previous estimates	(170,404)
Exchange of reserves in place (1)	(504,087)
Production	(1,915,629)

End of Year	3,404,693 =====

- (1) During June 2003, RMG contributed proved and unproved properties in exchange for a 37.5% interest in Pinnacle

Standardized Measure of Discounted Future Net Cash Flows Relating to Proved Gas Reserves

	December 31, 2003 -----

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

1) The Condensed Consolidated Balance Sheet as of March 31, 2004 and the Condensed Consolidated Statements of Operations and Cash Flows for the three

Edgar Filing: US ENERGY CORP - Form 424B3

months ended March 31, 2004 and 2003, have been prepared by the Company without audit. The Condensed Consolidated Balance Sheet at December 31, 2003 has been taken from the audited financial statements included in the Company's Annual Report on Form 10-K for the period then ended. In the opinion of the Company, the accompanying financial statements contain all adjustments (consisting of only normal recurring accruals except for the cumulative effect of a change in accounting principal in 2003) necessary to present fairly the financial position of the Company as of March 31, 2004 and December 31, 2003 and the results of operations and cash flows for the three months ended March 31, 2004 and 2003.

2) Certain reclassifications have been made in the December 31, 2003 Financial Statements to conform to the classifications used in the March 31, 2004 Financial Statements.

3) Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted. It is suggested that these financial statements be read in conjunction with the Company's December 31, 2003 Form 10-K. The results of operations for the periods ended March 31, 2004 and 2003 are not necessarily indicative of the operating results for the full year.

4) The consolidated financial statements of the Company include its majority-owned and controlled subsidiaries: Energx Ltd. ("Energx") (90%); Crested Corp. ("Crested") (71.5%); Plateau Resources Limited ("Plateau") (100%); Sutter Gold Mining Co. ("SGMC") (78.5%); Yellow Stone Fuels Corp. ("YSFC") (35.9%); Four Nines Gold, Inc. ("FNG") (50.9%); Rocky Mountain Gas, Inc. ("RMG") (88.5%), and the USECC joint venture ("USECC"), a consolidated joint venture which is equally owned by the Company and Crested, through which the bulk of their operations are conducted. All material intercompany profits and balances have been eliminated.

5) Components of Properties and Equipment at March 31, 2004 consist of coalbed methane properties, land, buildings and equipment.

	Cost	Accumulated Amortization and Depreciation	Net Value
	-----	-----	-----
Coalbed methane and oil properties	\$ 9,429,000	\$ (1,070,700)	\$ 8,358,300
Buildings, land and equipment	11,349,500	(6,119,200)	5,230,300
	-----	-----	-----
	\$ 20,778,500	\$ (7,189,900)	\$ 13,588,600
	=====	=====	=====

The Company has impaired a portion of historical costs associated with its properties in prior periods. The Company will provide additional impairments if necessary in the future.

6) The Company presents basic and diluted earnings per share in accordance with the provisions of Statement of Financial Accounting Standards No. 128, "Earnings per Share". Basic earnings per common share, is based on the weighted average number of common shares outstanding during the period. Diluted earnings per share is computed based on the weighted average number of common shares outstanding adjusted for the incremental shares attributed to outstanding options to purchase common stock, if dilutive. Potential common shares relating to options and warrants are excluded from the computation of diluted earnings (loss) per share, because they are antidilutive. These options and warrants totaled 4,498,835 and 4,955,472 at March 31, 2004 and March 31, 2003,

Edgar Filing: US ENERGY CORP - Form 424B3

respectively. Stock options and warrants have a weighted average exercise price of \$2.96 and \$2.91 per share at March 31, 2004 and

174

March 31, 2003, respectively. Potential common shares relating to convertible debt are excluded from the computation of diluted loss per share, because they are antidilutive. They total 222,222 and 444,444 shares at March 31, 2004 and December 31, 2003, respectively, with a conversion price of \$2.25.

7) The Company has shut down the mine properties for which it is responsible for the reclamation expense. These expenses are scheduled to be completed over the next several years. Estimated future reclamation costs are based upon the Company's best engineering estimates and legal and regulatory requirements.

The Company accounts for the reclamation obligation of these properties pursuant to SFAS No. 143, "Accounting for Asset Retirement Obligation." The statement requires the Company to record the fair value of the reclamation liability on its shut-down mining properties as of the date that the liability is incurred. The statement further requires the Company to review the liability each quarter and determine its accurateness as well as accrue the total liability on a quarterly basis for the full value of the liability.

The Company will also deduct any actual funds expended for reclamation during the quarter in which it occurs. As a result of the Company taking impairment allowances in prior periods on its shut-down mining properties, it has no remaining book value for these properties. All accretion amounts will therefore be expensed in the quarter in which they are recorded.

The following is a reconciliation of the total liability for asset retirement obligations (unaudited):

Balance December 31, 2003	\$ 7,264,700
Addition to Liability	372,100
Liability Settled	(71,600)
Accretion Expense	71,800

Balance March 31, 2004	\$ 7,637,000
	=====

8) The Company has adopted the disclosure requirements of SFAS No. 148 "Accounting for Stock - Based Compensation - Transition and Disclosure" and has elected to continue to record employee compensation expense utilizing the intrinsic value method permitted under Accounting Principles Board (APB) Opinion No. 25, "Accounting for Stock Issued to Employees" and its related interpretations. Accordingly, any deferred compensation expense is recorded for stock options based on the excess of the market value of the common stock on the date the options were granted over the aggregate exercise price of the options. This deferred compensation will be amortized over the vesting period of each option. There were no options granted to employees under the two plans during the three months ended March 31, 2004.

9) The Company has reviewed other current outstanding statements from the Financial Accounting Standards Board and does not believe that any of those statements will have a material adverse affect on the financial statements of the Company when adopted.

Edgar Filing: US ENERGY CORP - Form 424B3

10) The accompanying condensed financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America, which contemplate continuation of the Company as a going concern. We have sustained substantial losses from operations in recent years, and such losses have continued through March 31, 2004. In addition, we have used, rather than provided, cash in our operations.

175

In view of the matters described in the preceding paragraph, recoverability of a major portion of the recorded asset amounts shown in the condensed consolidated accompanying balance sheet is dependent upon continued operations of the Company, which in turn is dependent upon our ability to meet our financing requirements on a continuing basis, to maintain present financing, and to succeed in our future operations.

On July 30, 2003, the Company received an Order and thereafter a Judgment on August 1, 2003 from the U.S. District Court of Colorado wherein Chief Judge Lewis T. Babcock entered an Order that Judgment be entered against Nukem/CRIC ("Nukem") in favor of the Company the total amount of \$20,044,184. The Judgment was entered and defendant Nukem posted a supersedeas bond in the full amount of the Judgment plus interest for one year, which was approved by the Court. On October 3, 2003, Nukem, as Appellants, filed a Notice of Appeal to the 10th Circuit Court of Appeals and thereafter on October 15, 2003, the Company filed a Notice of Cross-Appeal to the 10th Circuit. As of April 30, 2004, all briefs from both parties had been filed with the 10th Circuit Court of Appeals. It is not known when or if the 10th Circuit Court of Appeals will hear oral arguments or when it will make its ruling. In the event the Company should prevail, the receipt of this cash would provide significant working capital to the Company.

We continue to pursue several items that will help us meet our future cash needs. We are aggressively pursuing our claims against Nukem. We are also currently working with several different sources, including both strategic and financial investors, in order to raise sufficient capital to finance our continuing operations. Although there is no assurance that funding will be available or that the outcome in the Nukem litigation will be positive; we believe that our current business plan, if successfully funded, will significantly improve our operating results and cash flow in the future.

11) During the three months ended March 31, 2004, the Company issued 233,667 shares of common stock as payment of principal and interest to the Caydal company to settle the note due Caydal. The Company issued 100,000 shares of common stock and 250,000 warrants to purchase common stock to an accredited investor in a private placement. The Company issued 108,613 shares of common stock in exchange for 111,111 shares of Rocky Mountain Gas stock as part of a provision given to an accredited investor when it invested in Rocky Mountain Gas common stock. The Company issued 366,667 shares of common stock and 318,465 common stock warrants in the purchase of producing coal bed methane properties (See note 14). The Company issued 12,500 shares of common stock to five employees under the 2001 Stock Award Program, which was approved by the shareholders in a vote at the 2002 shareholder's meeting.

The dollar values of the issuances were \$525,600 to settle the principal and interest due Caydal; \$350,000 from the private placement to an accredited investor; \$282,900 on the exchange of Rocky Mountain Gas stock to USE stock; \$1,396,200 on the purchase of the producing coalbed methane properties, and \$37,800 under the 2001 Stock Award Program.

Edgar Filing: US ENERGY CORP - Form 424B3

12) On January 30, 2004, the Company, through its subsidiary Rocky Mountain Gas, Inc. purchased the producing, and non-producing properties of the Hi-Pro company in the Powder River Basin of Wyoming. The operations of the properties are included in the operations of the Company subsequent to January 30, 2004 (See the 8-K/A filed on April 15, 2004 for further information on the Hi-Pro transaction). The terms of the purchase were as follows:

176

- o \$ 776,700 cash paid by RMG, \$75,000 of which was non-refundable as of December 31, 2003.
 - o \$ 588,300 net revenues from November 1, 2003 to December 31, 2003, which were retained by Hi-Pro. (1)
 - o \$ 500,000 by USE's 30 day promissory note (secured by 166,667 restricted shares of USE common stock, valued at \$3.00 per share). (2)
 - o \$ 600,000 by 200,000 restricted shares of USE common stock (valued at \$3.00 per share). (3)
 - o \$ 700,000 by 233,333 restricted shares of RMG common stock (valued at \$3.00 per share). (4)
 - o \$ 3,635,000 cash, loaned to RMG I under the credit facility agreement.
 - o \$6,800,000
- =====

-
- (1) RMG I paid all January operating costs at closing. Net revenues from the purchased properties for January 2003 were credited to RMG I's obligations under the credit facility agreement. These net revenues were considered by the parties to be a reduction in the purchase price which RMG I otherwise would have paid at the January 30, 2004 closing.
- (2) Pursuant to the terms of the promissory note, USE issued 166,667 shares as payment in full of this obligation during the first quarter of 2004.
- (3) USE agreed to file a resale registration statement with the SEC to cover public resale of these 200,000 shares.
- (4) From November 1, 2004 to November 1, 2006, the RMG shares shall be convertible at Hi-Pro's sole election into restricted shares of common stock of USE. The number of USE shares to be issued to Hi-Pro shall equal (A) the number of RMG share to be converted, multiplied by \$3.00 per shares, divided by (B) the average closing sale price of the shares of USE for the 10 trading days prior to notice of conversion. The conversion right is exercisable cumulatively, as to at least 16,666 RMG shares per conversion.

The Company purchased these properties to continue its entry into the coalbed methane gas business and accounted for as a purchase transaction with the estimated fair value of assets and liabilities assumed in the acquisition as follows:

Estimated fair value of assets acquired	
Current assets	\$ 639,400
Oil and gas properties	6,498,300
Other property and equipment	146,700
Other long term assets	145,000

Total assets acquired	7,429,400

Edgar Filing: US ENERGY CORP - Form 424B3

Estimated fair value of liabilities assumed	
Current liabilities	\$ 884,800
Asset retirement obligation	372,100

Total liabilities assumed	1,256,900

Net assets acquired	\$ 6,172,500
	=====

Pro Forma (Unaudited) Statement of Operations, including the purchase of the Hi-Pro properties for the periods ended March 31, 2004 and 2003 as if the acquisition had been consummated immediately for the Company prior to January 1, 2003. The Pro Forma results are not indicative of future results.

177

	Pro Forma (Unaudited) Three months ended March 31,	
	2004	2003
	-----	-----
Revenues	\$ 1,169,400	\$ 1,503,600
Net Loss from continuing operations	\$ (1,565,000)	\$ (423,100)
Net (loss) income	\$ (1,565,000)	\$ 1,016,100
Net (loss) earnings per share basic	\$ (0.13)	\$ 0.09
Net (loss) earnings per share - diluted	\$ (0.13)	\$ 0.08

RMG financed \$3.7 million of the cash component from a recently established \$25 million credit facility arranged by Petrobridge Investment Management, LLC (Petrobridge), a mezzanine lender headquartered in Houston, TX. The properties acquired from Hi-Pro serve as the sole collateral for the credit facility. As defined by the agreement, terms under the credit facility include the following: (1) Advances under the credit facility are subject to lender's approval; (2) All revenues from oil and gas properties securing the credit facility will be paid to a lock box controlled by the lender. All disbursements for lease operating costs, revenue distributions and operating expense will require approval by the lender before distributions are made; and (3) The Company must maintain certain financial ratios and production volume, among other things. At March 31, 2004, RMG was not in compliance with one financial covenant. A waiver was granted for this reporting period by the lender and management believes that the Company will be in compliance at the next reporting date. In the event RMG is not in compliance at the next reporting date, approximately \$3,300,000 of long term debt would be reclassified as current debt and due on demand if waivers are not granted.

13) Hedging Activities. The results of operations and operating cash flows are impacted by changes in market prices for oil and gas. To mitigate a portion of this exposure, the Company has entered into certain derivative instruments. The Company's derivative instruments covered approximately 81% of net gas sales for the period ended March 31, 2004. All derivative instruments have been

Edgar Filing: US ENERGY CORP - Form 424B3

entered into and designated as cash flow hedges of gas price risk and not for speculative or trading purposes. As of March 31, 2004, the Company's derivative instruments were comprised of swaps. For swap instruments, the Company receives (pays) a fixed price for the hedged commodity and pays (receives) a floating market price, as defined in each instrument, to the counterparty. These instruments have been designated and have qualified as cash flow hedges.

The carrying values of these instruments are equal to the estimated fair values. The fair values of the derivative instruments were established using appropriate future cash flow valuation methodologies. The actual contribution to future results of operations will be based on the market prices at the time of settlement and may be more or less than fair value estimates used at March 31, 2004.

Hedging activities included in the condensed statement of operations were nominal during the period ended March 31, 2004. The Company recognized no significant amounts due to hedge ineffectiveness for the quarter ended March 31, 2004. The Company expects to transfer substantially all of the \$252,300 balance in accumulated other comprehensive loss, based upon the market prices at March 31, 2004 to earnings during the next 21 months. All forecasted transactions hedged as of March 31, 2004 are expected to occur by December 2005. Approximately 60,000 mmbtu per month are hedged at \$4.76 per mmbtu through December 2004 and 30,000 mmbtu per month are hedged at \$4.14 per mmbtu through December 2005.

14) Comprehensive loss. Other comprehensive loss consists primarily of the fair value of derivative instruments. Total comprehensive losses for the three months ended March 31, 2004 was \$252,300.
