## Edgar Filing: NOVARTIS AG - Form 6-K

**Basel, 22 April 2004** Commenting on the first quarter results published today, Dr. Daniel Vasella, Chairman and CEO of Novartis, said, "In the first quarter, we delivered a strong performance with highly competitive sales increases and double digit gains in both operating and net income. I am pleased that our team is continuing to strengthen our operational excellence, turning in good results driven by the dynamic growth of our novel medicines. Based on our excellent pipeline and broad, young product portfolio, we expect to outpace the market in sales growth and continue to gain market share. Barring unforeseen events, we anticipate delivering record full year operating and net income."

## Sales

### Group sales up 16% to USD 6.6 billion

First quarter sales climbed 16% (8% lc) driven by dynamic growth of the young pharmaceutical product portfolio. Volume expansion of 5% was the key driver of local currency sales growth, with price increases adding 2% and acquisitions 1%.

### Pharmaceuticals sales up 19% to USD 4.3 billion

Sustaining its momentum, the core Pharmaceuticals business achieved above-market growth<sup>3</sup> to post a 19% (11% lc) rise in first quarter 2004 sales.

---

<sup>3</sup> Based on IMS data

The cardiovascular (22%; 16% lc) and oncology franchises (26%; 17% lc) were key growth drivers in the first quarter, led by *Diovan*, *Lotrel*, *Gleevec/Glivec*, *Zometa* and *Femara*. Newly launched products *Elidel* and *Zelnorm/Zelmac* also performed well.

Based on IMS data, Novartis increased global health care market share from 4.35% to 4.45% in the first quarter of 2004, with pharmaceutical sales up 12% in the US, 13% in Japan and 27% in Europe.

### Consumer Health sales up 10% to USD 2.3 billion

First quarter sales increase of 10% (2% lc) for Consumer Health was driven by an exceptionally strong performance of OTC and solid growth of Medical Nutrition, Infant & Baby and CIBA Vision, all of which posted double-digit growth in USD.

Sandoz US sales were impacted by increased competition for AmoxC, while Omeprazole sales provided positive upside. Key international markets including the UK, France and Russia performed well.

OTC sales increased 24% (14% lc), driven mainly by the 31% growth of global strategic brands, including cough and cold products growth of 20% versus first quarter 2003. *Nicotinell* benefited from good underlying fundamentals and continued consumer preference for its coated gum offering. *Lamisil* grew primarily in the US and in Japan.

Animal Health benefited from increased share of sales for new products particularly *Milbemax*, *Atopica* and *Deramaxx* which rose from 6% in 2003 to 14% in the first quarter of 2004.

The Medical Nutrition acquisition of Mead Johnson was consolidated for the first time and contributed an additional USD 34 million of sales in the quarter. Excluding the positive acquisition impact, sales grew by 5% in local currency.

Infant & Baby sales grew 14% (13% lc) based on strong performance of food products in the US.

CIBA Vision sales increased 14% (5% lc) due to the strong performance of *Focus Night & Day* and *Dailies*.

**Operating income****First quarter**

	Q1 2004		Q1 2003		Change in %
	USD m	% of sales	USD m	% of sales	
<b>Pharmaceuticals</b>	<b>1 246</b>	<b>28.9</b>	1 100	30.5	<b>13</b>
<b>Consumer Health</b>	<b>335</b>	<b>14.4</b>	277	13.1	<b>21</b>
Corporate income/expense, net	-87		-26		
<b>Total</b>	<b>1 494</b>	<b>22.5</b>	1 351	23.6	<b>11</b>

**Group operating income rises 11% to USD 1.5 billion**

Mainly driven by dynamic Pharmaceuticals sales, group operating income grew 11% in the first quarter of 2004. Continued improvement of product mix and productivity gains led to a further decline in COGS to 23.1% of sales. Aggressive investment continued in the build-up of the new Novartis Institutes for Biomedical Research (NIBR) facility in Boston, driving Research & Development costs up 12%. Marketing & Sales costs decreased by one percentage point to 31.0% of sales, but grew 12% in USD as investment in the marketed brand portfolio continued. On a comparable basis, General & Administrative costs increased to 9.1% of sales versus 8.9% in the first quarter of 2003 after adjusting for the benefit of a USD 178 million divestment gain in 2003.

**Pharmaceuticals operating income climbs 13% to USD 1.2 billion**

Strong sales drove double-digit pharmaceutical operating income expansion in the first quarter of 2004. Improvements in product mix and productivity gains resulted in a 0.9% reduction in COGS as a percentage of sales. As a result of relatively lower advertising outlays, Marketing & Sales costs decreased by 2.1 percentage points to 32.1% of sales. Research & Development reached 18.2% of sales, as investments in NIBR continued as planned.

**Consumer Health operating income rises 21% to USD 0.3 billion**

Dynamic operating income expansion of 21% was mainly driven by strong performances in OTC, CIBA Vision and Infant & Baby, which more than offset the AmoxC competitive pressures at Sandoz.

**Group net income**

Net income jumped 22%, reaching USD 1.3 billion as a result of strong operational business expansion and the improved performance of our Roche investment. Group tax rate remained at 17.0% for the quarter.

**Group outlook** (barring any unforeseen events)

Novartis expects to deliver strong top-line growth ahead of the market and in the high single-digit range in local currencies, driven by key pharmaceutical brands, seven of which are forecast to be blockbusters by 2008, and boosted by the launch and roll-out of attractive new products.

The rapid build-up phase of NIBR in Cambridge is scheduled for completion in 2004. At the same time, Development investments are expected to grow strongly, reflecting the rich late-stage pharmaceutical pipeline. The over proportionate investment in Research & Development is expected to ease in 2004, providing Novartis with the platform to fulfill its commitment to bringing innovative new therapies to patients.

Barring unforeseen events, both full-year operating and net income are expected to exceed 2003 levels.

## Potential Transaction with Aventis

The Board of Directors of Novartis has decided to accept the offer of the Aventis Supervisory Board to negotiate conditions for a potential business combination. No assurances can be given that an agreement can be reached.

## Pharmaceutical business and key product highlights

### Primary Care

**Diovan** (+30%; +22% lc; US: +11%) strengthened its position as the world's leading angiotensin receptor blocker (ARB) and fastest growing top anti-hypertensive. Combination formulations continued to gain in the US, with double digit growth in several large European markets. Regulatory submissions for the post-myocardial infarction indication were filed in Sweden, the UK and Switzerland in the first quarter of 2004. A significant category management program is being launched in the US to strengthen Novartis leadership in the hypertension market.

**Lotrel** (US: +21%), the leading combination treatment for hypertension, posted dynamic growth in the first quarter.

**Lamisil** (+26%; +19% lc; US: +28%), the leading treatment with high cure rates of fungal nail infections, delivered significant sales growth in the US.

**Elidel** (+70%; +65% lc; US: +47%), the number one branded prescription treatment for eczema, delivered high double-digit growth founded on continued strong demand for this novel product. New launches in Spain, South Africa, South Korea and Saudi Arabia, marked the increasing global presence of the brand, which is now available in over 50 countries.

**Zelnorm/Zelmac** (+240%; +233% lc; US: +287%), a breakthrough therapy for constipation-prone irritable bowel syndrome, grew dynamically due to enhanced physician adoption. Phase III trials for the dyspepsia indication and proof of concept studies in GERD<sup>4</sup> began in the first quarter.

---

4

Gastroesophageal Reflux Disease

### Oncology

**Gleevec/Glivec** (+51%; +37% lc; US: +14%), for all stages of Philadelphia-Chromosome positive chronic myeloid leukemia (CML) and certain forms of gastro-intestinal stromal tumors (GIST), continued to grow dynamically, boosted by an increased penetration in reaching patients in the first line CML segment and enhanced use of new treatment regimens with higher average daily doses that improve patient outcomes. With better results possible for GIST patients<sup>5</sup>, there are more patients being diagnosed and treated, which has further boosted sales. The number of patients reached by the *Gleevec/Glivec* patient assistance programs rose to more than 8000 worldwide, providing treatment to many needy patients at reduced cost who otherwise would not have access.

---

5

Gastrointestinal Stromal Tumors Diagnosis, Epidemiology, and Prognosis, Lars-Gunnar Kindblom.  
Oral Presentation at the American Society of Clinical Oncology 2003.

**Zometa** (+21%; +15% lc; US: +4%), the most prescribed intravenous bisphosphonate for bone metastases, continued to post strong growth outside the US. In the US, market growth has been dampened by Medicare reform. In February, the FDA revised the labeling for *Zometa* to include longer-term data that confirm the safety profile established at the time of the initial approval of *Zometa*. *Zometa* now has been used in more than 600 000 patients worldwide, continuing to demonstrate its efficacy and long-term safety in patients with advanced cancer.

**Femara** (+39%; +30% lc; US: +53%), first-line therapy for advanced breast cancer in postmenopausal women, posted dynamic sales growth supported by its strong profile and the landmark results of the MA-17 extended adjuvant study published in the fourth quarter of 2003. These showed a 43% reduction in the risk of cancer recurrence, in addition to significantly improved disease-free survival in postmenopausal women with early breast cancer who had completed prior standard adjuvant tamoxifen therapy.

#### **First quarter regulatory and clinical highlights**

Novartis continues to pursue new treatments and cures for patients through industry-leading research and development activities. The current pipeline includes ten new medicines in late-stage development with combined potential peak sales projected at over USD 10 billion. Of the 79 development projects underway, 64 compounds are in Phase II/III or registration.

Three highly promising compounds LAF237, a Dipeptidylpeptidase (DPP-4) inhibitor, for the treatment of Type-II diabetes; SPP100, a renin inhibitor, for the treatment of hypertension; and *Zelmac/Zelnorm* FD, for dyspepsia moved into Phase III clinical trials in the first quarter of 2004.

#### **Major approvals and launches**

*Diovan* received its first approval for the post-myocardial infarction indication in Turkey based on VALIANT data. Filings for the post-myocardial infarction indication were submitted in Sweden, the UK and Switzerland in the first quarter. *Co-Diovan* 160/25 launched in Germany and *Co-Diovan* 160/12.5 launched in Ireland and the Netherlands in the first quarter.

*Certican*, which targets the primary causes of allograft dysfunction, including acute rejection, launched in Germany after receiving final national approvals in six European countries in the first quarter. *Certican* completed the Mutual Recognition Procedure in 15 EU countries for the prevention of rejection in kidney and heart transplantation in combination with low dose *Neoral*.

*Elidel* launched in Spain, South Africa, South Korea and Saudi Arabia in the first quarter. The leading non-steroidal treatment for eczema is now available in more than 50 markets.

*Myfortic* is an advanced, enteric-coated formulation of the sodium salt of mycophenolic acid (MPA), a key immunosuppressant used in combination therapy in renal transplant patients. *Myfortic* successfully completed the European Mutual Recognition Procedure and received US FDA approval in February. *Myfortic* is now registered in over 40 countries worldwide.

#### **Corporate**

##### **Corporate income/expense, net**

Net corporate expense totaled USD 87 million, USD 61 million higher than in the first quarter of 2003, principally due to lower pension income.

##### **Financial income, net**

Net financial income declined in the first quarter as a result of the low yield environment. The overall return on net liquidity was 2.6%.

##### **Result from associated companies**

Novartis' stake in Chiron Corporation generated income of USD 17 million. The improved performance of the Roche stake versus prior year resulted in income of USD 11 million, USD 288 million higher than last year. In total, associated companies resulted in overall income of USD 31 million.

### **Strong balance sheet**

In July 2002, Novartis started a third program to repurchase shares via a second trading line on the SWX Swiss Exchange. Since the program began, a total of 51.2 million shares have been repurchased for USD 2.1 billion. Of these, 4.3 million shares were repurchased in the first quarter of 2004 for approximately USD 188 million. Additional shares were purchased for USD 128 million on the first trading line.

Overall, the Group's equity decreased by USD 1.1 billion over the three months to USD 29.3 billion as of 31 March 2004. First quarter Group net income of USD 1.3 billion and positive fair value adjustments of USD 0.2 billion were more than offset by translation losses of USD 0.3 billion, treasury share purchases of USD 0.3 billion and dividend payments of USD 2.0 billion. The debt/equity ratio was 0.22:1 vs. 0.20:1 at the end of 2003.

Novartis thus maintained the strength of its balance sheet and continues to be rated Triple A by Standard & Poor's and Moody's, a rating it has held since its creation in 1996. Novartis is now one of just two European-based non-financial companies with this rating.

### **Cash flow**

Free cash flow in the first quarter fell by USD 998 million, principally due to an increase in dividend payment of USD 244 million and a reduction in cash flow from operating activities of USD 597 million due to USD 705 million of withholding tax on the dividend being paid in the first quarter of 2004 compared with a corresponding payment occurring in the second quarter in 2003.

### **Disclaimer**

This release contains certain "forward-looking statements", relating to the Group's business, which can be identified by the use of forward-looking terminology such as "forecast", "Outlook", "expects", "expected", "projected", "scheduled", "potential", "anticipated" or similar expressions, or express or implied discussions regarding potential future sales of existing products, potential new products or potential new indications for existing products, or by other discussions of strategy, plans or intentions. Such statements reflect the current views of the Group with respect to future events and are subject to certain risks, uncertainties and assumptions. There can be no guarantee that existing products will reach any particular sales levels, or that any new products will be approved for sale in any market, or that any new indications will be approved for existing products in any market. In particular, management's expectations could be affected by, among other things, new clinical data; unexpected clinical trial results; unexpected regulatory actions or delays or government regulation generally; the company's ability to obtain or maintain patent or other proprietary intellectual property protection; competition in general; government pricing pressures and other risks and factors referred to in the Company's current Form 20-F on file with the US Securities and Exchange Commission. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described herein as anticipated, believed, estimated or expected. Novartis is providing the information in this press release as of this date and does not undertake any obligation to update any forward-looking statements contained in this press release as a result of new information, future events or otherwise.

Novartis AG (NYSE: NVS) is a world leader in pharmaceuticals and consumer health. In 2003, the Group's businesses achieved sales of USD 24.9 billion and a net income of USD 5.0 billion. The Group invested approximately USD 3.8 billion in R&D. Headquartered in Basel, Switzerland, Novartis Group companies employ about 78 500 people and operate in over 140 countries around the world. For further information please consult <http://www.novartis.com>.

**Notes to the interim financial report for the first three months ended 31 March 2004** (unaudited)**1. Basis of preparation**

This unaudited interim financial report has been prepared in accordance with the accounting policies set out in the 2003 Annual Report and International Accounting Standard 34 on Interim Financial Reporting.

There were no significant changes in accounting policies or estimates or in any contingent liabilities from those disclosed in the 2003 Annual Report.

**2. Changes in the scope of consolidation and other significant transactions**

The following significant transactions were made during the three months to 31 March 2004 and in 2003:

**2004****Medical Nutrition**

On 13 February, the business unit completed the acquisition of Mead Johnson & Company's global adult medical nutrition business for USD 385 million in cash. These activities are included in the consolidated financial statements from this date with USD 34 million of sales being recorded in the first quarter. Based on a preliminary estimate, goodwill of USD 135 million has been recorded on this transaction.

**2003****Pharmaceuticals**

On 11 February, Novartis announced the completed sale of the US rights to its *Fioricet* and *Fiorinal* lines (tension headache treatments) to Watson Pharmaceuticals, Inc. for USD 178 million.

On 23 April, the urinary incontinence treatment *Enablex* (darifenacin) was acquired from Pfizer for a total of up to USD 225 million, part of which is still conditional on certain marketing approvals in the US and EU.

On 8 May, 51% of the capital stock of Idenix Pharmaceuticals Inc. was acquired for an initial payment of USD 255 million in cash. This company is included in the consolidated financial statements from this date. Goodwill of USD 297 million has been recorded on this transaction.
