### **FOR IMMEDIATE RELEASE**

### **DUANE READE INC. REPORTS SECOND QUARTER AND FIRST HALF SALES AND EARNINGS RESULTS**

New York, New York, July 19, 2004 Duane Reade Inc. (NYSE: DRD) today reported sales and earnings for the second quarter ended June 26, 2004.

### **SECOND QUARTER RESULTS**

Net sales increased 2.8% to \$365.2 million, with pharmacy sales increasing 6.5% and comprising 45.3% of net sales, as compared to the second quarter of the previous year. Same-store sales increased 0.4%, reflecting a 4.6% increase in pharmacy same-store sales and a 2.8% decline in front-end same-store sales from the previous year. Approximately 1.2% of the front-end same-store sales decline is due to decreases in sales of tobacco products attributable to restrictions on smoking in certain public places that were enacted throughout New York City in 2003 along with increased tax rates on tobacco sales.

Net income for the quarter was \$3.0 million, or \$0.12 per diluted share, compared to \$4.1 million, or \$0.17 per diluted share, in the previous year. Included in second quarter net income is \$1.5 million of expenses incurred in connection with the previously announced planned acquisition by an affiliate of Oak Hill Capital. In addition, net income reflects a \$1.1 million labor contingency expense associated with the previously announced disputed administrative law judge's recommendation in a litigation matter with the Allied Trades Council, a union representing employees in 139 of the Company's stores. Excluding these two charges, second quarter net income would have amounted to \$4.5 million, or \$0.18 per diluted share.

For the quarter, FIFO EBITDA, as defined on the attached schedule of operating data, amounted to \$21.8 million, or 6.0% of sales. This compares to \$21.8 million or 6.1% of sales in last year's second quarter.

The Company opened four new stores during the second quarter of both the current and prior years. As of June 26, 2004, the Company operated 247 stores.

Gross profit margin for the second quarter increased to 22.0% of sales, compared to 21.7% in the same quarter last year. The increase was primarily attributable to favorable selling margins and lower shrink losses that more than offset the impact of an increased mix of lower margin pharmacy sales.

Selling, general and administrative expenses were \$59.9 million, or 16.4% of sales, compared to \$57.3 million, or 16.1% of sales, in the previous year. The increase in rate is largely attributable to higher professional fees for legal and litigation related expenses that were \$0.6 million higher than the second quarter of 2003.

Interest expenses declined to \$3.3 million from \$3.5 million last year, primarily due to lower rates of interest on outstanding revolver borrowings.

Anthony J. Cuti, Chairman of the Board and Chief Executive Officer, stated, "Second quarter sales and earnings results reflect the high unemployment rates from prior periods throughout New York City that have restrained our sales growth. We are, however, pleased to see that many economic measures in the New York metropolitan market, including higher levels of employment during the

---

second quarter of this year, are beginning to gain traction and this should lead to continued job creation, improved levels of customer demand and increased sales trends during the second half of this year.

"In addition, our previously announced planned acquisition by an affiliate of Oak Hill Capital will be considered by shareholders at a July 26, 2004 special shareholders' meeting, with the closing of this transaction expected to occur shortly thereafter."

### **FIRST HALF RESULTS**

Net sales for the 26 weeks ended June 26, 2004 increased 3.8% to \$714.8 million, compared with \$688.8 million in the previous year. Pharmacy sales increased 8.3% to \$323.9 million and represented 45.3% of net sales. Front-end sales increased 0.3% to \$390.9 million, compared to \$389.7 million in the previous year. During the first half of 2004, same-store sales increased 1.0%, including a 5.5% same-store increase in pharmacy sales and a 2.5% decline in front-end same-store sales. The aforementioned New York City restrictions on smoking and increased tobacco taxes accounted for approximately 1.4% of the front-end same-store sales decline.

Net income for the first half amounted to \$4.3 million, or \$0.18 per diluted share, compared to \$7.2 million, or \$0.29 per diluted share last year. The current year's results include \$2.6 million of transaction costs associated with the planned acquisition by an affiliate of Oak Hill Capital and \$2.2 million of labor contingency expense related to the administrative law judge's recommendation referenced above. Excluding these charges, net income was \$7.2 million, or \$0.29 per diluted share.

FIFO EBITDA for the first half of 2004 amounted to \$40.6 million, or 5.7% of sales, compared to \$40.4 million, or 5.9% of sales in the previous year.

Cash flow from operating activities for the 26-week period was \$20.0 million, or 2.8% of sales, compared to \$14.0 million, or 2.0% of sales, in the previous year.

During the first six months, the Company opened seven stores and closed one, compared with 11 new stores opened and three stores closed in the prior year period. Pre-opening expenses were \$0.4 million, as compared to \$0.6 million in the same period last year.

### **CURRENT OUTLOOK**

The Company expects continued sluggish consumer demand with modest improvement resulting from the current trend of gradual increases in employment opportunities in New York City. For the full year, sales are expected to range between \$1.470 billion and \$1.485 billion, with a total same-store sales increase between 1.7% and 2.3%. Pharmacy same-store sales are expected to increase from 5.9% to 6.5%, while front-end sales are expected to decline between 1.0% and 1.6%. Smoking restrictions and increased tobacco taxes are expected to impact annual front-end same-store sales performance by approximately 1.0%, which is reflected in this sales guidance. The impact of these items on tobacco sales should largely be cycled out of the same-store sales comparisons by the first quarter next year.

For the full year, FIFO EBITDA is projected to range between \$91.0 million, or 6.2% of sales, and \$94.0 million, or 6.3% of sales.

Due to the expected completion of the acquisition of the Company during the third quarter, and the related application of purchase accounting that will result from this transaction, net income and related diluted earnings per share expectations cannot be provided at this time, and expected net income ranges shown on the attachments to this release are provided solely for the purpose of reconciliation of the non-GAAP FIFO EBITDA financial measure provided above. FIFO EBITDA will not be impacted by the application of purchase accounting that will result from the completion of the planned acquisition.

The Company projects that total current year capital spending, lease acquisitions and other investing activities will approximate \$57 million and expects to complete 17 new store openings. For fiscal 2005, capital spending, lease acquisitions and other investment spending is expected to decline to approximately \$39 million, reflecting the addition of approximately 10 new stores.

The Company's actual results for fiscal 2004 may differ from those projected as a result of various factors that are described in the last paragraph of this press release and that are more fully described in the Company's filings with the Securities and Exchange Commission.

In view of the impending July 26, 2004 shareholders' meeting to consider the planned acquisition of the Company by an affiliate of Oak Hill Capital, there will not be a second quarter earnings conference call.

(1) As used in this report, EBITDA means earnings before interest, income taxes, depreciation, amortization, transaction expenses, debt extinguishment costs, labor contingency expense, extraordinary charges, non-recurring charges and other non-cash items (primarily deferred rents). We believe that EBITDA, as presented, represents a useful measure of assessing the performance of our operating activities, as it reflects our earnings trends without the impact of certain non-cash and unusual charges or income. EBITDA is also used by our creditors in assessing debt covenant compliance. We understand that, although security analysts frequently use EBITDA in the evaluation of companies, it is not necessarily comparable to other similarly titled captions of other companies due to potential inconsistencies in the method of calculation. EBITDA is not intended as an alternative to cash flow provided by operating activities as a measure of liquidity, as an alternative to net income as an indicator of our operating performance, nor as an alternative to any other measure of performance in conformity with generally accepted accounting principles. A reconciliation of EBITDA to both net income and cash flow provided by operating activities is provided on the following page of this release.

(2) Comparative stores only, does not include new stores.
