T-Online and Deutsche Telekom enter into agreement in principle on merger

On Monday, November 8, 2004, both T-Online International AG and Deutsche Telekom AG have, with the consent of the supervisory board of T-Online International AG, entered into a framework agreement on certain basic features of a merger of T-Online International AG into Deutsche Telekom AG. Deutsche Telekom AG and T-Online International AG agreed, that both companies move towards a statutory merger which will then be subject to requisite shareholder approvals, in order to secure their leading position both in the market and with regard to innovation. Thus, an important basis has been created for the implementation of such a merger. Both companies reached agreement that they will hasten the prescribed process which is defined in practically all its aspects by the German transformation act, and take all requisite steps to this end.

The effective date of the merger shall be 1 January 2005. The timetable for the merger will be the subject matter of further coordination. The values of the two companies will be determined in the coming months. Subsequently, the exchange ratio will be established.

Part of the basic features is that the current business of T-Online International AG shall be continued within Deutsche Telekom AG as an independent organisational unit with its own management and its own profit and loss responsibility. It shall be integrated in the new strategic business unit Broadband/Fixed Network of Deutsche Telekom AG. In this context, the introduction of an integrated broadband strategy is planned with combined offerings for access, communication and entertainment services (Triple Play). The development and marketing of all IP products of the business unit Broadband/Fixed Network , in particular Triple Play products, will

continue to be the responsibility of the organisational unit T-Online. The parties are expecting growth synergies from the planned strategic approach with a net present value in the range of at least approximately Euro 1 billion.

The exchange ratio shall be determined by performing a discounted future earnings valuation (*Ertragswertverfahren*) of both companies in accordance with the generally accepted principles of the German Institute of Chartered Accountants (*Institut der Wirtschaftsprüfer*) and rulings of the higher courts.
