The exact stock prices and effective dates may not be set forth on the table above, in which case:

if the stock price is between two stock prices in the table or the effective date is between two effective dates in the table, the number of additional shares will be determined by a straight-line interpolation between the number of additional shares set forth for the higher and lower stock prices and the earlier and later effective dates, based on a 365-day year, as applicable;

if the stock price is greater than \$95.00 per share (subject to adjustment in the same manner as the stock prices set forth in the first row of the table above), no additional shares will be issued upon conversion; and

if the stock price is less than \$20.21 per share (subject to adjustment in the same manner as the stock prices set forth in the first row of the table above), no additional shares will be issued upon conversion.

Our obligation to increase the applicable conversion rate as described above could be considered a penalty, in which case the enforceability thereof would be subject to general principles of law and equity. In addition, in no event will the applicable conversion rate after adjustment exceed 49.4805 per \$1,000 principal amount of notes, subject to adjustments in the same manner as the base conversion rate as set forth under **Conversion Rate Adjustments** in the preliminary prospectus supplement.

Correction

The following correction is made to the definition of **C** in the antidilution adjustment event described in paragraph (4) appearing on page S-40 of the preliminary prospectus supplement:

C = the aggregate amount by which the aggregate amount of cash so distributed in any single quarterly period applicable to one share of common stock exceeds the base dividend amount.
