**Item 7.01. Regulation FD Disclosure.**

In accordance with General Instruction B.2 of Form 8-K, the following information shall not be deemed filed for purposes of Section 18 of the Securities Exchange Act of 1934, as amended, nor shall it be deemed incorporated by reference into any filing under the Securities Act of 1933, as amended.

On November 13, 2006, Robert G. Phillips gave a presentation to investors and analysts at the Argus Vision 2007 Conference regarding the businesses, growth strategies and recent financial performance of Enterprise Products Partners L.P. ( Enterprise Products Partners ). Mr. Phillips is the President and Chief Executive Officer of Enterprise Products GP, LLC, the general partner of Enterprise Products Partners. Enterprise Products Partners is a North American midstream energy company that provides a wide range of services to producers and consumers of natural gas, natural gas liquids ( NGLs ), and crude oil. In addition, Enterprise Products Partners is an industry leader in the development of pipeline and other midstream energy assets in the continental United States and Gulf of Mexico.

A copy of the investor presentation is filed as Exhibit 99.1 to this Current Report on Form 8-K. In addition, interested parties will be able to view the presentation by visiting Enterprise Products Partners website [www.epplp.com](http://www.epplp.com). The presentation will be archived on its website for 90 days.

Unless the context requires otherwise, references to we, our, EPD, or the Company within the presentation or this Current Report on Form 8-K shall mean Enterprise Products Partners and its consolidated subsidiaries. References to EPE refer to Enterprise GP Holdings L.P., which is the sole member of Enterprise Products GP, LLC. EPE and its general partner and the Company and its general partner are under common control of Dan L. Duncan, the Chairman and controlling shareholder of EPCO, Inc. ( EPCO ). Mr. Duncan is the primary sponsor of the Company s activities.

References to GTM or GulfTerra mean Enterprise GTM Holdings L.P., the successor to GulfTerra Energy Partners, L.P. Also, merger with GTM or GTM Merger refers to the merger of GulfTerra with a wholly owned subsidiary of Enterprise Products Partners on September 30, 2004 and the various transactions related thereto.

The presentation contains various forward-looking statements. For a general discussion of such statements, please refer to Slide 2.

**USE OF NON-GAAP FINANCIAL MEASURES**

Our presentation includes references to the non-generally accepted accounting principle ( non-GAAP ) financial measures of gross operating margin, distributable cash flow, EBITDA and Consolidated EBITDA. To the extent appropriate, this Current Report on Form 8-K provides reconciliations of these non-GAAP financial measures to their most directly comparable historical financial measures calculated and presented in accordance with accounting principles generally accepted in the United States of America ( GAAP ). Our non-GAAP financial measures should not be considered as alternatives to GAAP measures such as net income, operating income, cash flow from operating activities or any other GAAP measure of liquidity or financial performance.

***Gross Operating Margin***

*Gross operating margin amounts (Slides 10 and 11).* We evaluate segment performance based on the non-GAAP financial measure of gross operating margin. Gross operating margin (either in total or by individual segment) is an important performance measure of the core profitability of our operations. This measure forms the basis of our internal financial reporting and is used by senior management in deciding how to allocate capital resources among business segments. We believe that investors benefit from having access to the same financial measures that our management uses in evaluating segment results. The GAAP measure most directly comparable to total segment gross operating margin is operating income.

We define total segment gross operating margin as operating income before: (i) depreciation, amortization and accretion expense; (ii) operating lease expenses for which we do not have the payment obligation; (iii) gains and losses on the sale of assets; and (iv) general and administrative expenses. Gross operating margin is exclusive of other income and expense transactions, provision for income taxes, minority interest, cumulative effects of changes in accounting principles, and extraordinary charges. Gross operating margin by segment is calculated by subtracting segment operating costs and expenses (net of the adjustments noted above) from segment revenues, with both segment totals before the elimination of intercompany transactions. In accordance with GAAP, intercompany accounts and transactions are eliminated in consolidation. Our non-GAAP financial measure of total segment gross operating margin should not be considered as an alternative to GAAP operating income.

## Edgar Filing: ENTERPRISE PRODUCTS PARTNERS L P - Form 8-K

We include equity earnings from unconsolidated affiliates in our measurement of segment gross operating margin and operating income. Our equity investments with industry partners are a vital component of our business strategy. They are a means by which we conduct our operations to align our interests with those of customers and/or suppliers. This method of operation also enables us to achieve favorable economies of scale relative to the level of investment and business risk assumed versus what we could accomplish on a stand-alone basis. Many of these businesses perform supporting or complementary roles to our other business operations.

Reconciliations of our non-GAAP gross operating margin amounts (as shown in the investor presentation) to their respective GAAP operating income amounts are presented in Schedule A to this Current Report on Form 8-K.

***Distributable Cash Flow***

*Distributable cash flow (Slide 11)*. We define distributable cash flow as net income or loss plus: (i) depreciation, amortization and accretion expense; (ii) operating lease expenses for which we do not have the payment obligation; (iii) cash distributions received from unconsolidated affiliates less equity in the earnings of such unconsolidated affiliates; (iv) the subtraction of sustaining capital expenditures; (v) the addition of losses or subtraction of gains relating to the sale of assets; (vi) cash proceeds from either the sale of assets or a return of investment in an unconsolidated affiliate; (vii) gains or losses on monetization of financial instruments recorded in accumulated other comprehensive income less related amortization of such amount to earnings; (viii) transition support payments received from El Paso related to the GTM merger and (ix) the addition of losses or subtraction of gains relating to other miscellaneous non-cash amounts affecting net income for the period.

Sustaining capital expenditures are capital expenditures (as defined by GAAP) resulting from improvements to and major renewals of existing assets. Such expenditures serve to maintain (or sustain) existing operations but do not generate additional revenues.

Distributable cash flow is a significant liquidity metric used by our senior management to compare the basic cash flows we generate to the cash distributions we expect to pay our partners. Using this metric, our management can compute the coverage ratio of estimated cash flows to planned cash distributions.

Distributable cash flow is also an important non-GAAP financial measure to our limited partners since it serves as an indicator of our success in providing a cash return on investment. Specifically, this financial measure indicates to investors whether or not we are generating cash flows at a level that can sustain (or support an increase in) our quarterly cash distribution rate. Distributable cash flow is also a quantitative standard used by the investment community with respect to publicly traded partnerships because the value of a partnership unit is in part measured by its yield, which in turn is based on the amount of cash distributions a partnership pays to a unitholder. The GAAP measure most directly comparable to distributable cash flow is cash flow from operating activities.

*Reinvested distributable cash flow (Slide 24)*. Our investor presentation includes estimates of the amount of distributable cash flow we reinvested in the Company since (i) January 1, 1999 and (ii) September 30, 2004, which was the date we completed the GTM Merger. These estimates were calculated by summing the distributable cash flow amounts for the respective periods and deducting the cash distributions we paid to partners with respect to such periods.

Reconciliations of our non-GAAP distributable cash flow amounts (as shown in the investor presentation) to their respective GAAP cash flow from operating activities amounts are presented in Schedule B to this Current Report on Form 8-K. Schedule C to this Current Report on Form 8-K presents (i) our calculation of the estimated reinvestment of distributable cash flow for each period and (ii) a reconciliation of the underlying quarterly distributable cash flow amounts to their respective GAAP cash flow from operating activities amounts.

***EBITDA***

*EBITDA (Slide 11)*. We define EBITDA as net income or loss plus interest expense, provision for income taxes and depreciation, amortization and accretion expense. EBITDA is commonly used as a supplemental financial measure by management and external users of our financial statements, such as investors, commercial banks, research analysts and rating agencies, to assess: (i) the financial performance of our assets without regard to financing methods, capital structures or historical cost basis; (ii) the ability of our assets to generate cash sufficient to pay interest costs and support our indebtedness; (iii) our operating performance and return on capital as compared to those of other companies in the midstream energy industry, without regard to financing and capital structure; and (iv) the viability of projects and the overall rates of return on alternative investment opportunities. Because EBITDA excludes some, but not all, items that affect net income or loss and because these

Edgar Filing: ENTERPRISE PRODUCTS PARTNERS L P - Form 8-K

measures may vary among other companies, the EBITDA data presented in our investor presentation may not be comparable to similarly titled measures of other companies. The GAAP measure most directly comparable to EBITDA is cash flow from operating activities.

## Edgar Filing: ENTERPRISE PRODUCTS PARTNERS L P - Form 8-K

Reconciliations of our non-GAAP EBITDA amounts (as shown in the investor presentation) to their respective GAAP cash flow from operating activities amounts are presented in Schedule D to this Current Report on Form 8-K.

### **Consolidated EBITDA**

Consolidated EBITDA (Slide 23). Our investor presentation includes references to Consolidated EBITDA, which is a financial measure calculated by Enterprise Products Operating L.P. (our Operating Partnership) in connection with the provisions of its multi-year revolving credit facility. Schedule E presents the Operating Partnership's calculation of Consolidated EBITDA for the twelve months ended September 30, 2006 along with a reconciliation to its closest GAAP counterpart, which is cash flow from operating activities.
