UNITED STATES ANTIMONY CORP Form 10-K March 28, 2011

UNITED STATES SECURITIES AND EXCHANGE COMMISSION Washington, D.C. 20549

FORM 10-K

(Mark One)

- ANNUAL REPORT UNDER SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934 For the fiscal year ended December 31, 2010
- o TRANSITION REPORT UNDER SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934 For the transition period to

Commission file number 33-00215

UNITED STATES ANTIMONY CORPORATION (Exact name of registrant as specified in its charter)

Montana
(State or other jurisdiction of incorporation or organization)

81-0305822 (I.R.S. Employer Identification No.)

P.O. Box 643, Thompson Falls, Montana 59873 (Address of principal executive offices) (Zip Code)

Registrant's telephone number, including area code: (406) 827-3523

Securities registered pursuant to Section 12(b) of the Act: None

Securities registered pursuant to Section 12(g) of the Act: Common Stock, par value \$.01 per share

Check whether the issuer (1) filed all reports required to be filed by Section 13 or 15(d) of the Exchange Act during the past 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes x No o

Check if there is no disclosure of delinquent filers in response to Item 405 of Regulation S-K contained in this form and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. x

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definitions of "large accelerated filer," "accelerated filer" and "small reporting company" in Rule 12b-2 of the Exchange Act.

Large Accelerated Filer o

Accelerated Filer o

Non-Accelerated Filer o

Smaller reporting company x

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act) Yes o No x

The aggregate market value of the voting stock held by non-affiliates of the registrant, based on the average bid price of such stock, was \$16,640,355 as of June 30, 2010.

At March 25, 2011, the registrant had 56,307,382 outstanding shares of par value \$0.01 common stock.

Item 1. Description of Business

General

Explanatory Note: As used in this report, the terms "we," "us" and "our" are used to refer to United States Antimony Corporation and, as the context requires, its management.

Some of the information in this Form 10-K contains forward-looking statements that involve substantial risks and uncertainties. You can identify these statements by forward-looking words as "may," "will," "expect," "anticipate," "believe," "estimate" and "continue," or similar words. You should read statements that contain these words carefully because they:

- discuss our future expectations;
- contain projections of our future results of operations or of our financial condition; and
 - state other "forward-looking" information.

History

United States Antimony Corporation ("USAC") was incorporated in Montana in January 1970 to mine and produce antimony products. In December 1983, we suspended antimony mining operations but continued to produce antimony products from domestic and foreign sources. In April 1998 we formed United States Antimony SA de CV ("USAMSA") to min and smelt antimony in Mexico. Bear River Zeolite Company ("BRZ") was incorporated in 2000, and it mined and produces zeolite in southeastern Idaho. On August 19, 2005, USAC formed Antimonio de Mexico, S. A. de C. V. to explore and develop antimony and silver deposits in Mexico. Our principal business is the production and sale of antimony and zeolite products.

Overview-2010

Antimony Sales

During 2010, sales of our antimony products increased approximately 159% from 2009. The profitability of the Antimony Division increased from \$352,164 in 2009 to \$903,560 in 2010.

Zeolite Sales

During 2010, sales of zeolite increased 57% in 2010 from 2009 and the gross profit increased from \$16,882 in 2009 to \$470,172 in 2010.

Antimony Division

Our antimony mill and metallurgical plant are located in the Burns Mining District of Sanders County, Montana, approximately 15 miles west of Thompson Falls. We hold 3 patented mill sites which are contiguous, and 2 patented mill sites where the plant is located. We have no "proven reserves" or "probable reserves" of antimony, as these terms are defined by the Securities and Exchange Commission. Environmental restrictions preclude mining at this site.

Prior to 1984, we mined antimony underground by driving drifts and using slushers in room and pillar type stopes. Mining was suspended in December 1983, because antimony could be purchased more economically from

foreign sources.

Because we depend on foreign sources for raw materials, there are risks of interruption in procurement from these sources and/or volatile changes in world market prices for these materials that are not controllable by us. We are currently developing sources of antimony through our sites in Mexico and working with suppliers in Central America, Europe and South America.

We currently own 100% of the common stock, equipment, and the lease on real property of United States Antimony, Mexico S.A. de C.V. ("USAMSA"), which was formed in April 1998. This plant is currently ready to begin production.

- 4 -

The San Miguel property is located in the State of Queretaro, Mexico. The property began operations in 2009 using equipment shipped from Montana. We currently own 100% of the stock in Antimonia de Mexico SA de CV (AM) which owns the San Miguel property.

In our existing operations in Montana, from antimony raw materials we produce antimony oxide products of different particle size using proprietary furnace technology, several grades of sodium antimonate using hydro metallurgical techniques, and antimony metal. Antimony oxide is a fine, white powder that is used primarily in conjunction with a halogen to form a synergistic flame retardant system for plastics, rubber, fiberglass, textile goods, paints, coatings and paper. Antimony oxide is also used as a color fastener in paint, as a catalyst for production of polyester resins for fibers and film, as a phosphorescent agent in fluorescent light bulbs and as an opacifier for porcelains. Sodium antimonate is primarily used as a fining agent (degasser) for glass in cathode ray tubes used in television picture tubes and as a flame retardant. We also sell antimony metal for use in bearings, storage batteries and ordnance.

We estimate (but have not independently confirmed) that our present share of the domestic market for antimony oxide products is approximately 2%. We are the only significant U.S. producer of antimony products, however, many of the Company's competitors have substantially more resources and market share. The balance of domestic demand is satisfied by foreign imports (primarily China).

For the year ended December 31, 2010, we sold 1,679,042 pounds of antimony products generating \$6,657,369 in revenues which is an increase of 159%. During 2009, we sold 1,103,824 pounds of antimony products generating \$2,567,107 in revenues. During 2010 and 2009, approximately 37% and 40%, respectively, of our antimony sales were made to one customer.

Marketing We employ full-time marketing personnel and have negotiated various commission based sales agreements with other chemical distribution companies.

	Year		Average Price
2010		\$3.67	
2009		2.28	
	2008		2.88
	2007		2.52
	2006		2.28
	2005		1.73
	2004		1.32
	2003		1.21
	2002		0.88
	2001		0.58

Antimony Price Fluctuations: Our operating results have been, and will continue to be, directly related to the market prices of antimony metal, which have fluctuated widely in recent years. The volatility of prices is illustrated by the following table, which sets forth the average prices of antimony metal per pound as reported by sources deemed reliable by us.

The range of sales prices for antimony oxide per pound was as follows for the periods indicated:

Year	High	Low	Average Price
2010	\$9.74	\$2.58	\$3.67
2009	5.89	1.78	2.37
2008	7.50	2.35	2.72
2007	5.45	2.23	2.52

Edgar Filing: UNITED STATES ANTIMONY CORP - Form 10-K

2006	5.14	1.76	2.28
2005	5.45	1.36	1.58
2004	5.45	0.95	1.48
2003	5.45	1.01	1.27
2002	5.25	0.71	0.99
2001	5.99	0.66	0.93

Antimony metal prices are determined by a number of variables over which we have no control. These include the availability and price of imported metals, the quantity of new metal supply, and industrial and commercial demand. If metal prices decline and remain depressed, our revenues and profitability may be adversely affected.

We use various antimony raw materials to produce our products. We currently obtain antimony raw material from sources in North America, Mexico, Europe, South America and Australia.

Zeolite Division

We own 100% of Bear River Zeolite Company (BRZ), an Idaho corporation incorporated on June 1, 2000. BRZ has a lease with Webster Farm, L.L.C. that entitles BRZ to surface mine and process zeolite on property located near Preston, Idaho, in exchange for a royalty payment. In 2010 the royalty was adjusted to \$10 per ton sold. The current minimum annual royalty is \$60,000. In addition, BRZ has located more zeolite on U.S. Bureau of Land Management land. A company controlled by Al Dugan, a significant stockholder and, as such, an affiliate, payment equal to 3% of net sales on zeolite products. On a combined basis, royalties vary from 8%-13%. BRZ has constructed a processing plant on the property and it has improved its productive capacity. Through December 31, 2010, we had spent approximately \$3,700,000 to purchase and construct the processing plant and develop sales.

We have no "proven reserves" or "probable reserves" of zeolite, as these terms are defined by the Securities and Exchange Commission.

"Zeolite" refers to a group of minerals that consist of hydrated aluminosilicates that hold cations such as calcium, sodium, ammonium and potassium in their crystal lattice. Water is loosely held in cavities in the lattice. BRZ's zeolite deposits have characteristics which make the mineral useful for a variety of purposes including:

- Soil Amendment and Fertilizer. Zeolite has been successfully used to fertilize golf courses, sports fields, parks and common areas, and high value crops, including corn, potatoes, soybeans, red beets, acorn squash, green beans, sorghum sudangrass, brussel sprouts, cabbage, carrots, tomatoes, cauliflower, radishes, strawberries, wheat, lettuce and broccoli.
- Water Filtration. Zeolite is used for particulate, heavy metal and ammonium removal in swimming pools, municipal water systems, fisheries, fish farms, and aquariums.
- Sewage Treatment. Zeolite is used in sewage treatment plants to remove nitrogen and as a carrier for microorganisms.
- Nuclear Waste and Other Environmental Cleanup. Zeolite has shown a strong ability to selectively remove strontium, cesium and various other radioactive isotopes from solution. Zeolite can also be used for the cleanup of soluble metals such as mercury, chromium, copper, lead, zinc, arsenic, molybdenum, nickel, cobalt, antimony, calcium, silver and uranium.
- Odor Control. A major cause of odor around cattle, hog, and poultry feed lots is the generation of the ammonium in urea and manure. The ability of zeolite to absorb ammonium prevents the formation of ammonia gas, which generates the odor.
- Gas Separation. Zeolite has been used for some time to separate gases, to re-oxygenate downstream water from sewage plants, smelters, pulp and paper plants, and fish ponds and tanks, and to remove carbon dioxide, sulfur dioxide and hydrogen sulfide from methane generators as organic waste, sanitary landfills, municipal sewage systems and animal waste treatment facilities.

- Animal Nutrition. Feeding up to 2% zeolite increases growth rates, decreases conversion rates, prevents worms, and increases longevity.
- Miscellaneous Uses. Other uses include catalysts, petroleum refining, building applications, solar energy and heat exchange, desiccants, pellet binding, horse and kitty litter, floor cleaner and carriers for insecticides, pesticides and herbicides.

- 6 -

Environmental Matters

Our exploration, development and production programs conducted in the United States are subject to local, state and federal regulations regarding environmental protection. Some of our production and mining activities are conducted on public lands. We believe that our current discharge of waste materials from our processing facilities is in material compliance with environmental regulations and health and safety standards. The U.S. Forest Service extensively regulates mining operations conducted in National Forests. Department of Interior regulations cover mining operations carried out on most other public lands. All operations by us involving the exploration for or the production of minerals are subject to existing laws and regulations relating to exploration procedures, safety precautions, employee health and safety, air quality standards, pollution of water sources, waste materials, odor, noise, dust and other environmental protection requirements adopted by federal, state and local governmental authorities. We may be required to prepare and present to the authorities data pertaining to the effect or impact that any proposed exploration for or production of minerals may have upon the environment. Any changes to our reclamation and remediation plans, which may be required due to changes in state or federal regulations, could have an adverse effect on our operations. The range of reasonably possible loss in excess of the amounts accrued, by site, cannot be reasonably estimated at this time.

We accrue environmental liabilities when the occurrence of such liabilities is probable and the costs are reasonably estimable. The initial accruals for all our sites are based on comprehensive remediation plans approved by the various regulatory agencies in connection with permitting or bonding requirements. Our accruals are further based on presently enacted regulatory requirements and adjusted only when changes in requirements occur or when management revises its estimate of costs required to comply with existing requirements. As remediation activity has physically commenced, management has been able to refine and revise its estimates of costs required to fulfill future environmental tasks based on contemporaneous cost information, operating experience, and changes in regulatory requirements. In instances where costs required to complete our remaining environmental obligations are clearly determined to be in excess of the existing accrual, we have adjusted the accrual accordingly. When regulatory agencies require additional tasks to be performed in connection with our environmental responsibilities, we evaluate the costs required to perform those tasks and adjust our accrual accordingly as the information becomes available. In all cases, however, our accrual at year-end is based on the best information available at that time to develop estimates of environmental liabilities.

Yankee Fork Mill Site.

During 2006, USAC finished the bulk of the reclamation work at the Yankee Fork mill site. On December 18, 2006, the Idaho Department of Environmental Quality terminated the voluntary Consent Order. On January 22, 2007, the Department dropped the requirement for any additional groundwater quality monitoring.

Antimony Processing Site.

We have environmental remediation obligations at our antimony processing site near Thompson Falls, Montana ("the Stibnite Hill Mine Site"). Under the regulatory jurisdiction of the U.S. Forest Service and subject to the operating permit requirements of the Montana Department of Environmental Quality require that we line a storm water pond and construct a water treatment facility and thus fulfill the majority of our environmental responsibilities at the Stibnite Hill Mine site. At December 31, 2010, we have accrued \$100,000.

Yellow Jacket Mine.

During 2006, USAC received a reclamation award for the Yellow Jacket Mine from the U. S. Forest Service, Idaho Department of Lands, U. S. Department of the Interior Bureau of Land Management, Idaho Department of Water Resources, and Idaho Fish and Game.

BRZ.

During 2001, we recorded a reclamation accrual for our Bear River Zeolite subsidiary, based on an analysis performed by management and reviewed and approved by regulatory authorities for environmental bonding purposes. The accrual of \$7,500 represents the Company's estimated costs of reclaiming, in accordance with regulatory requirements; the acreage disturbed by our zeolite operations and remains unchanged at December 31, 2010.

- 7 -

General.

Reclamation activities at the Thompson Falls Antimony Plant have proceeded under supervision of the U.S. Forest Service and Montana Department of Environmental Quality. We have complied with regulators' requirements and do not expect the imposition of substantial additional requirements.

We have posted cash performance bonds with a bank and the U.S. Forest Service in connection with our reclamation activities.

We believe we have accrued adequate reserves to fulfill our environmental remediation responsibilities as of December 31, 2010. We have made significant reclamation and remediation progress on all our properties over the past three years and have complied with regulatory requirements in our environmental remediation efforts.

Employees

As of December 31, 2010, we employed 27 full-time employees. The number of full-time employees may vary seasonally. None of our employees are covered by any collective bargaining agreement.

Other

We hold no material patents, licenses, franchises or concessions, however we consider our antimony processing plant proprietary in nature. We use the trade name "Montana Brand Antimony Oxide" for marketing our antimony products.

We are subject to the requirements of the Federal Mining Safety and Health Act of 1977, the Occupational Safety and Health Administration's regulations, requirements of the state of Montana and the state of Idaho, federal and state health and safety statutes and Sanders County, Montana and Franklin County, Idaho health ordinances.

Item 1A. Risk Factors

There may be events in the future that we are not able to accurately predict or over which we have no control. The risk factors listed below, as well as any cautionary language in this report, provide examples of risks, uncertainties and events that may cause our actual results to differ materially from the expectations we describe in our forward-looking statements.

If we were liquidated, our common stockholders could lose part or all of their investment.

In the event of our dissolution, the proceeds (if any) realized from the liquidation of our assets will be distributed to our stockholders only after satisfaction of claims of our creditors and preferred stockholders. The ability of a purchaser of shares to recover all or any portion of the purchase price for the shares in that event will depend on the amount of funds realized and the claims to be satisfied by those funds.

We are delinquent or in arrears on significant current liabilities.

As of December 31, 2010, we are delinquent on the payment of several current liabilities including accounts payable of approximately \$79,900 and accrued interest payable of approximately \$16,500. In the absence of payment arrangements, creditors could individually or collectively demand immediate payment and jeopardize our ability to fund operations and correspondingly damage our business.

We may have unasserted liabilities for environmental reclamation.

Our research, development, manufacturing and production processes involve the controlled use of hazardous materials, and we are subject to various environmental and occupational safety laws and regulations governing the use, manufacture, storage, handling, and disposal of hazardous materials and some waste products. The risk of accidental contamination or injury from hazardous materials cannot be completely eliminated. In the event of an accident, we could be held liable for any damages that result and any liability could exceed our financial resources. We also have one ongoing environmental reclamation and remediation projects at our current production facility in Montana. Adequate financial resources may not be available to ultimately finish the reclamation activities if changes in environmental laws and regulations occur; and these changes could adversely affect our cash flow and profitability. We do not have environmental liability insurance now; and we do not expect to be able to obtain insurance at a reasonable cost. If we incur liability for environmental damages while we are uninsured, it could have a harmful effect on our financial condition and us. The range of reasonably possible losses from our exposure to environmental liabilities in excess of amounts accrued to date cannot be reasonably estimated at this time.

We have accruals for environmental obligations.

We have accruals totaling \$107,500 on our balance sheet at December 31, 2010, for our environmental reclamation responsibilities. If we are not able to adequately perform our reclamation activities on a timely basis, we could be subject to fines and penalties from regulatory agencies.

Item 1B. Unresolved Staff Comments

Not applicable to a Smaller Reporting Company.

Item 2. Description of Properties

Antimony Division

Our principal antimony plant is located in the Burns Mining District, Sanders County, Montana approximately 14 miles west of Thompson Falls on Montana Highway 471. This highway is asphalt, and the property is accessed by cars and trucks. The property includes 2 5-acre patented mill sites that are owned fee-simple by the Company. The claims are U. S. Antimony Mill Site No 1 (Mineral Survey 10953) and U. S. Antimony Mill Site No. 2 (Mineral Survey 10953). There are 3 other patented Mill Site claims known as the Station Mill Site (Mineral Survey 9190B, 4.394 acres), Excelsior Mill Site (Mineral Survey 9190B, 4.972 acres), and Mammoth Mill Site (Mineral Survey 9190B, 5.000 acres) that the Company has paid taxes on for 39 years that are being disputed by the U. S. Forest Service concerning ownership. The Company has been paying Sanders County property taxes on 3 patented mill site claims in the Burns Mining District of Montana since 1969 when the Company purchased the original block of claims. USAC was the registered owner of the claims at the Sanders County Courthouse. The claims include the Station Mill Site (4.994 acres), Excelsior Mill Site (4.972 acres), and the Mammoth Mill Site (5.000 acres) Patent Survey No. 9190 A. We discovered that the BLM cancelled the patents on 12 January2000 because "the claims were not filed with the BLM in accordance with the FLPMA and are deemed to be abandoned and void by operation of law." Neither USAC nor the Sanders County Court House were ever notified of this decision and we continue to pay taxes. We do not believe that this taking is valid. It does not have a substantial impact on the Company.

The U. S. Antimony Mill Sites were used to run a flotation mill and processing plant for antimony that the Company mined on adjacent claims that have been sold. Presently the Company runs a processing plant that includes nine furnaces of a proprietary design to produce antimony metal, antimony oxide, and various other products. The facility includes 6 buildings and the main office of the Company. There are no plans to resume mining on the claims that have been sold or abandoned although the mineral rights have been retained on many of the patented mining claims. The U. S. Forest Service and Montana Department of Environmental Quality have told the Company that the resumption of mining would require an Environmental Impact Statement, massive cash bonding, and would be followed by years of law suits. The mill site is serviced with three-phase electricity from Northwest Power, and water is pumped from a well.

U. S. Antimony claims no reserves on any of these properties.

- 9 -

Antimony mining and milling operations in the U.S. were curtailed during 1983 due to continued declines in the price of antimony. We are currently purchasing foreign raw antimony materials and continue to produce antimony metal, oxide and sodium antimonate from our antimony processing facility near Thompson Falls, Montana.

MINE PROPERTIES

LOS JAUREZ GROUP.

USAC holds three properties that are collectively called the "Los Juarez" property in Coahuila as follows:

- 1. San Miguel I and II are being purchased by a USAC subsidiary named Antimonio de Mexico, S. A. de C. V ("AM") for US\$1,480,500. To date the Company has paid \$612,891.32. The property consists of 40 hectares.
- 2. San Juan I and II are concessions owned by AM and include 466 hectares.
- 3. San Juan III is held by a lease Agreement by AM in which the Company will pay a 10% royalty based on the net smelter returns from another USAC Mexican subsidiary named United States Antimony Mexico, S. A. de C. V. ("USAMSA"). It consists of 214 hectares.

The concessions are contiguous and collectively constitute 720 hectares. The claims are accessed by roads that lead to highways.

- 10 -

Part of the USAC Mexican property including San Miguel I and II and part of San Juan III was originally drilled by Penoles in 1970 when antimony metal prices were high. They did not proceed with the property due to the complex metallurgy of antimony. Subsequently, the Mexican Government did additional work and reported a reserve of 1,000,000 metric tons (mt) grading 1.8% antimony and 8.1 ounces of silver per metric ton (opmt) in Consejo de Recursos Minerales (Publicacion M-4e). However, the Securities and Exchange Commission does not recognize this report, and the Company claims no reserves.

- 11 -

The mineralized zone is a classic manto-type deposit in the Cretaceous El Doctor Limestone. The mineralization is confined to a silicified breccia zone that is probably a low angle thrust fault. The manto strikes north 70 degrees west and dips to the north at about 20 degrees. The manto is concordant with the bedding. On the west (San Miguel I and II) most of the manto is covered down dip to the north; on the east end (San Juan I and II) the manto forms a dip slope that is exposed. The silicified breccia is resistant to erosion and supports the ridge.

The dimensions of the manto are still conjectural. However, the strike length appears to be more than 4,500 meters. On the west end, the manto is exposed in a narrow band, but exposures in shafts, an open pit, and comparison to the manto on the east end indicate a potential width of 250 meters or more. At this point the northern down-dip extension of the manto is not visible. The thickness is 8 meters in an open pit. However, the thickness of the manto is irregular.

- 12 -

At the USAC (ADM) discovery at San Juan I and II, the Ejido of Los Juarez, on the east end of the mineralized zone there are numerous trenches, surface workings, and prospects throughout the Ejido. The manto is much better exposed here, and it constitutes a dip slope with a resistant pediment gravel. There is no published report on it although the inhabitants are completely aware of the mineralization. Rock fences, houses and roads have been built with the mineralization.

The mineralization is typically very fine-grained stibnite with silver and minor amount of gold. It is primarily sulfide in nature due to its encapsulation in silica. This affords it recoverable by flotation methods unlike many Mexican deposits that contain oxides.

The mining for many years will be by open pit methods. Eventually it will be by underground methods to the north where the zone dips faster than the topography. The deeper part of the manto would be accessed by short cross-cuts with strike drifts in the foot wall. Higher-level strike-drifts can be accessed by more cross cuts or from lower cross cuts driven below the manto with ore passes from the higher strike drifts. Stoping would be done with slushers and haulage would be performed by LHD equipment. Initially, it appears that selective mining methods will be necessary with jack-legs, air tracks, or jumbos. By taking lower grades, bulk-mining methods could be utilized.

At the present time, mineralized rock is being hand-sorted for the flotation mill, a powder magazine is being built, and the haul road has been resurfaced. Surface overburden has been removed in the mine areas.

SOYATAL MINING DISTRICT, PINAL DE AMOLES, QUERETARO, MEXICO

USAC through USAMSA also holds a Supply Agreement with Pinar de Amores S. A. de C. V. on 4 concessions in the Soyatal Mining District in the State of Queretaro totaling 283 hectares. The concessions are the Chihuahua and three Fox-1's. Reportedly, the

Soyatal District was the third largest producer of antimony in Mexico. U. S. Geological Survey Bulletin 960-B, 1948, Donald E. White, Antimony Deposits of Soyatal District state of Queretaro, Mexico records the production from 1905-1943 at 25,000 tons of antimony metal content. In 1942, the mines produced ore containing 1,737 tons of metal, and in 1943, they produced ore containing 1,864 tons of metal. This mining was performed primarily all hand labor with no compressors, trammers, and the ore was transported by mules in sacks to the railroad. Recoveries were less than 40% of the values. Mining continued throughout World War II.

White remarks p. 84 and 85"

"In the Soyatal Mines, as in practically all antimony mines, it is difficult to estimate the reserves, for the following reasons. (1) The individual deposits are so extremely irregular in size, shape, and grade that the amount of ore in any one of them is unknown until the ore has been mined. (2) As only the relatively high grade shipping ore is recovered, the ore bodies are not systematically sampled and assayed...The total reserves are thus unknown and cannot be estimated accurately, but they probably would suffice to maintain a moderate degree of activity in the district for at least 10 years. The mines may even contain enough ore to equal the total past production."

USAMSA does not claim any reserves at Soyatal. However, hand sorted rock is being mined and purchased by USAMSA according to a schedule for direct shipping ore.

USAMSA FLOTATION MILL, QUEREARO, MEXICO.

A flotation mill was completed at San Antonio de la Cal in the Municipio of Toliman. All of the permits to construct and operate the plant were obtained. The Governor of the State of Queretaro then said that he would not allow the plant to operate due to the designation of a nearby area as a UNESCO World Heritage site. The plant has a capacity of 150 metric tons per day. It includes a 10" x 36" jaw crusher, 4' x 8' double deck screen, 29" cone crusher, 8' x 48" Hardinge

type ball mill, 8 No 24 Denver sub A tyope flotation machines, 8' disc filter, front end loaders, tools and other equipment. Presently, USAC is locating another mill site in the neighboring State of Guanajuato to move the plant. The plant will be used for the processing of rock from Los Juarez, Soyatal, and other properties..

USAMSA SMELTER, ESTACION MADERO, PARRAS DE LA FUENTE, COAHUILA, MEXICO.

USAC through its wholly owned subsidiary, USAMSA, owns and operates a smelting facility at Estacion Madero in the Municipio of Parras de la Fuente, Coahuila, Mexico. The property includes 13.48 hectares. Three furnaces are operating and a fourth furnace is being permitted. Other equipment includes cooling ducting, dust collectors, scrubber, laboratory, warehouse, slag vault, stack, jaw crusher, screen, hammer mill, and a 3.5' x 8' rod mill. The plant has a capacity of 40 to 100 tons per month depending on the grade of the feed, but after the No,. 4 furnace has been installed the plant capacity will be more than 200 tons per month of feed. Currently, crude antimony oxide is being made, but the plant has the ability of making metal. Concentrates and hand-sorted rock from Newfoundland, Peru, Honduras, Mexico, and other areas is being processed. The crude oxide is shipped to the Montana plant to produce finished oxide. Access to the plant is by road and railroad. Following are location maps:

- 13 -

Zeolite Division

LOCATION

The property is located in the southeast corner of Idaho approximately 7 road miles west of Preston, Idaho, 34 road miles north of Logan, Utah, 79 road miles south of Pocatello, Idaho, and 100 road miles north of Salt Lake City, Utah.

The mine is located in the N ½ of section 10 and the W ½ section 2, section 3, and the E ½ section 4, Township 15, Range 40 East of the Boise Meridian, Franklin County, Idaho. The plant and the initial pit is located on the Webster Farm, L.L.C. which is private land.

TRANSPORTATION

The property is accessed by 7 miles of paved road and about 1 mile of gravel road from Preston Idaho. Preston is near the major north-south Interstate highway 15 to Salt Lake City or Pocatello.

Several Union Pacific rail sidings may be available to the mine. Bonida is approximately 25 road miles west of the mine and includes acreage out of town where bulk rock could be stored possibly in existing silos or on the ground. Three- phase power is installed at this abandoned site. Finished goods could be shipped from the Franklin County Grain Growers feed mill in the town of Preston on the Union Pacific.

The Burlington Northern Railroad can be accessed at Logan, Utah.

Location Map

- 15 -

PROPERTY AND OWNERSHIP

BRZ leases 320 acres from the Webster Farm, L.L.C. The term of the lease is 15 years and it began on 1 March 2010. This includes the mill site and zeolite in the area of the open pit. The property is the NW ¼ and W ½ of the SW ¼ of section 3 and the N ½ of the W ¼ of section 10, Township 15 South, Range 40 East of the Boise Meridian, Franklin County, Idaho. The lease requires a payment of \$10.00 per ton plus an additional annual payment of \$10,000 on March 1st of each year. In addition there are two other royalty holders. Nick Raymond and the estate of George Desboroug have a 3% royalty that is now being challenged in court. Delaware Royalty a Company owned by Al Dugan (the father of a Director of USAC) holds a 3% royalty. BRZ discovered that it was paying a 3% royalty on the zeolite production to Nick Raymond and George Desborough that also included the packaging and trucking. The contract that we had with the two royalty holders specifically said that the royalty was to be paid on "zeolite sales". USAC made adjustments for what the Company had over paid. Subsequently, Desborough and Raymond filed a lawsuit in the District Court of the Sixth Judicial District of the State of Idaho, in and for the County of Franklin to make USAC pay the royalty on the zeolite, packaging, and trucking. USAC has filed for a summary judgment to pay the royalty on the "zeolite" only. Should USASC lose, the Company will have to continue to pay the 3% royalty on everything. Should USAC prevail, the Company will realize a savings.

The balance of the property is on Bureau of Land Management property and includes 480 acres held by 24 20-acre Placer claims. Should USAC drop its lease with Webster Farms LLC. It will retain these placer claims as follows:

BRZ 1	IMC 185308	BRZ 20	IMC 186183
BRZ 2	IMC 185309	BRZ 21	IMC 186184
BRZ 3	IMC 185310	BRZ 22	IMC 186185
BRZ 4	IMC 185311	BRZ 23	IMC 186186
BRZ 5	IMC 185312	BRZ 24	IMC 186187
BRZ 6	IMC 185313	BRZ 25	IMC 186188

GEOLOGY

Placer Claims

GEOLOGY

The deposit is a very thick sedimentary deposit of zeolitized volcanic ash of Tertiary age known as the Salt Lake Formation. The sedimentary interval in which the clinoptilolite occurs is more than 1000 feet thick in the area. Thick intervals of the zeolite are separated by thin limestone beds deposited in the freshwater lake where the volcanic ash accumulated.

The deposit includes an 800- foot mountain. Zeolite can be sampled over a vertical extent of 800 feet and on more than 700 acres. The current pit covers more than 3 acres. Despite the apparent size of the deposit, the Company claims no reserves.

- 18 -

EXPLORATION, DEVELOPMENT, AND MINING

Exploration has been limited to the examination and sampling of surface outcrops and mine faces.

MINING METHODS

Depending on the location, the zeolite is overlain by 1 to 12 feet of zeolite rich soil. On the ridges, the cover is very little, and in the draws the soil is thicker. The overburden is stripped using a tractor dozer, currently a Caterpillar D 8 K. It is moved to the toe of the pit, and will eventually be dozed back over the pit for reclamation.

Although near-surface rock is easily ripped, it is more economical to drill and blast it. An Ingersol Rand LM 200 air track with a 750 cfm compressor is used to drill 10- foot holes on a 3 to 4 foot center basis. Holes are loaded with ammonium nitrate and primed with powder and non L primers. Breakage is generally good. Initial benches were 20 to 30 foot, but these will be divided into 50 foot benches. Each bench is accessed by a road.

Loading is best performed with a Liehberr R 965 excavator with a 2 yard bucket to allow sorting of the oversize. Alternatively, a Caterpillar 988A loader with a 6 cubic yard bucket is used. The benches are cleaned with the D 8 K.

Haulage is over approximately 4000 foot of road on an uphill grade of 2.5% to the mill. On higher benches, the grade will eventually be downhill. Caterpillar 769 A and 769 B rock trucks are used. They haul 18 to 20 tons per load, and the cycle time is about 30 minutes.

With both trucks and the other existing equipment, the mine is capable of producing 80 tons per hour.

MILLING

PRIMARY CRUSHER

The primary crushing circuit is a conventional closed circuit utilizing a Stephens-Adamson 42" x 12' apron feeder, Pioneer 30" x 42" jaw crusher, Nordberg standard 3' cone crusher, a 5' by 12' double deck Kohlberg screen, and it also has a self-cleaning dust collector. The rock is crushed to minus 1 inch and the circuit has a rated capacity of more than 50 tons per hour.

DRYER

There are two dryer circuits, one for lines one and two and one for the Raymond mill. The dryer circuits include one 50 ton feed bin, and each dryer has a conveyor bypass around each dryer, a bucket elevator, and a dry rock bin. The dryers are 25 feet long and 5 foot in diameter and are fired with propane at 750,000 BTU's of fuel. One self- cleaning bag house services both dryers. Depending on the wetness of the feed rock, the capacity is in the range of 10 tph per dryer. During most of the year, the dryers are not run.

COARSE PRODUCTS CIRCUITS

There are two lines to produce coarse products: line 1 and line 2.

Line 1 is a closed circuit with a Philadelphia CXFOO16, 15 H.P. hammer mill and a 4' x 8' high frequency Midwestern MEV triple deck screen. Line 2 include a Jeffries 30 inch by 24 inch 60 HP hammer mill in closed circuit with two 5' x 12' triple deck Midwestern Multi Vibe high frequency screens. The circuits also include bucket elevators, 3 125 ton capacity product silos, a 6 ton capacity Crust Buster blender, augers, Sweco screens, and dust collectors.

FINE PRODUCTS CIRCUIT

The fine products circuit is in one building and it includes (2) 3.5' x 10.5' Derrick 2 deck high frequency (3450 RPM) screens and various bucket elevators, augers, bins, and Sweco screens for handling product. Depending on the screening sizes, the plants can generate approximately 150 tons of granules and 125 tons of fines per 24- hour day.

RAYMOND MILL CIRCUIT

The Raymond mill circuit includes a 6058 high- side Raymond mill with a double whizzer, dust collector, two 100 ton product silos, feed bin, conveyors, air slide, bucket elevators, and control booth. The Raymond mill has a rated capacity of more than 10 tons per hour.

- 19 -

Item 3. Legal Proceedings

USAC has been named in a lawsuit against one of its previous customers, currently we do not anticipate any contingent liabilities arising from these matters.

Item 4. (Removed and Reserved)

PART II

Item 5. Market for Common Equity and Related Stockholder Matters

Currently, our common stock is traded on the Over the Counter Bulletin Board ("OTCBB") under the symbol "UAMY.OB." The following table sets forth the range of high and low bid prices as reported by the OTCBB for the periods indicated. The quotations reflect inter-dealer prices without retail mark-up, markdown or commission, and may not necessarily represent actual transactions.

2010	High	Low
First Quarter	\$0.52	\$0.32
Second Quarter	0.60	0.40
Third Quarter	0.60	0.32
Fourth Quarter	0.60	0.36
2009	High	Low
First Quarter	\$0.35	\$0.10
Second Quarter	0.45	0.20
Third Quarter	0.55	0.25
Fourth Quarter	0.55	0.36

The approximate number of record holders of our common stock at March 25, 2011 is 2,500.

We have not declared or paid any dividends to our stockholders during the last five years and do not anticipate paying dividends on our common stock in the foreseeable future. Instead, we expect to retain earnings for the operation and expansion of our business.

Item 6. Selected Financial Data

Not applicable to a Smaller Reporting Company.

Item 7. Management's Discussion and Analysis or Plan of Operations

Certain matters discussed are forward-looking statements that involve risks and uncertainties, including the impact of antimony prices and production volatility, changing market conditions and the regulatory environment and other risks. Actual results may differ materially from those projected. These forward-looking statements represent the Company's judgment as of the date of this filing. The Company disclaims, however, any intent or obligation to update these forward-looking statements.

Results of Operations

The Company reported a net income of \$805,213 in 2010 compared to a net loss of \$294,843 in 2009. The increase in net income was due primarily to increased sales of antimony and an income tax benefit caused by the release of a deferred tax asset valuation allowance.

- 20 -

In the Antimony Division, sales increased from \$2,567,107 in 2009 to \$6,657,369 in 2010, an increase of 159%. Gross profit from antimony operations rose from \$352,164 in 2009 to \$903,560 in 2010. The increase in revenue was due to increased sales volume and price. Sales of antimony products during the year ended December 31, 2010 consisted of 1,679,042 pounds at an average sale price of \$3.96 per pound. During the year ended December 31, 2009, sales of antimony products consisted of 1,103,824 pounds at an average sale price of \$2.33 per pound. Combined costs of antimony sales were \$5,753,809 or \$3.43 per pound sold for the year ended December 31, 2010, as compared to \$2,214,943 or \$2.01 per pound sold for the year ended December 31, 2009. Depreciation expense in the Antimony division was \$168,808 during 2010 compared to \$71,929 during 2009. Direct sales expenses were \$45,447 for 2010 compared to \$46,875 for 2009.

Total sales of zeolite products were \$2,415,955 for 2010, compared with \$1,536,233 for 2009, an increase of 57%. Combined costs of zeolite sales were \$1,945,783 for 2010, compared with \$1,519,351 for 2009. The tons shipped in 2010 were 15,319 tons at an average price of \$157.71 per ton compared to 11,519 tons at an average price of \$133.37 in 2009, a 33% increase in tonnage. Depreciation expense was \$187,068 for BRZ during 2010, compared to \$190,523 during 2009. Direct sales expenses for 2010 were \$70,100 compared to \$69,766 for 2009. Gross profit of \$470,172 was earned in 2010, which was an increase from a \$16,882 profit in 2009. This increase in profit from operations was due primarily to decreased production costs, decreased delivery costs and an increase in average sales price.

During 2010, the Company incurred general and administrative expenses totaling \$352,804, compared with \$474,215 during 2009. In 2010, the Company incurred professional fees of \$152,357 compared to \$121,588 in 2009. The Company incurred \$245,700 of exploration expense during 2010 compared to \$58,529 in 2009. The exploration was on property located in Mexico.

In 2009, the Company exchanged fully depreciated equipment in payment of an outstanding note payable, resulting in a gain of \$49,100.

Net interest (income)/expense was \$(7,751) for 2010, compared with \$5,605 for 2009. The decrease in interest expense was due to the conversion of a significant amount of debt to common stock during 2009.

Accounts receivable factoring expense was \$119,107 for 2010, compared with \$90,124 for 2009. The increase was due primarily to increased sales during 2010 compared to 2009.

In 2009 the Company management performed an analysis of significantly aged payables for validity which resulted in the extinguishment of \$37,072 in payables.

Subsidiaries

The Company has a 100% investment in two subsidiaries in Mexico, USAMSA and AM, whose carrying value was assessed at December 31, 2010 for impairment. Management's assessment of the subsidiaries' fair value was based on future benefit to the Company. During fiscal year 2010 USAMSA was forced to begin relocation to a new mill site causing an impairment of approximately \$200,000.

Financial Condition and Liquidity

At December 31, 2010, Company assets totaled \$5,862,902, and stockholders' equity was \$4,888,673. At December 31, 2010, the Company's total current assets exceeded its total current liabilities by \$1,064,503.

Other significant financial commitments for future periods will include:

- Servicing notes payable to bank.
 - Paying accounts payable.
- Fulfilling responsibilities with environmental, labor safety and securities regulatory agencies.

Cash provided by operating activities during 2010 was \$307,350.

- 21 -

Cash used by investing activities during 2010 was \$965,919, which was primarily related to the construction and purchases of capital assets used at the Bear River Zeolite facility and for construction of a plant and mill in Mexico.

During 2010 from net cash provided by financing activities of \$926,817 including \$799,522 generated from sales of unregistered common stock through direct sales and through the exercise of warrants.

The Company hopes that it will have additional financial resources from increasing gross profits from its antimony business and sales of zeolite from BRZ.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

Not applicable to a Smaller Reporting Company.

Item 8. Financial Statements

The consolidated financial statements of the registrant are included herein on pages F1-F20.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None.

Item 9-A(T). Controls and Procedures Evaluation of disclosure controls and procedures

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in our reports under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to management, as appropriate, to allow timely decisions regarding required disclosure. Our president, who serves as the chief accounting officer, conducted an evaluation of the effectiveness of the Company's disclosure controls and procedures (as defined in the Securities Exchange Act of 1934 Rules 13a-15(e) and 15d-15(e)) as of December 31, 2010. Based upon this evaluation, it was determined that there were material weaknesses affecting our internal control over financial reporting (described below) and, as a result of those weaknesses, our disclosure controls and procedures were not effective as of December 31, 2010.

Internal control over financial reporting

Management's annual report on internal control over financial reporting

The management of United States Antimony Corporation is responsible for establishing and maintaining adequate internal control over financial reporting. This internal control system has been designed to provide reasonable assurance to the Company's management and Board of Directors regarding the preparation and fair presentation of the Company's published financial statements.

All internal control systems, no matter how well designed, have inherent limitations. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation.

The management of United States Antimony Corporation has assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2010. To make this assessment, we used the criteria for effective internal control over financial reporting described in Internal Control-Integrated Framework, issued by the Committee

of Sponsoring Organizations of the Treadway Commission (COSO).

As a result of our assessment, we concluded that we have material weaknesses in our internal control over financial reporting as of December 31, 2010. These weaknesses are as follows:

• The Company does not have either internally or on its Board of Directors the expertise to produce financial statements to be filed with the SEC.

- 22 -

- The Company lacks proper segregation of duties. As with any company the size of this Company, this lack of segregation of duties is due to limited resources. The president authorizes the majority of the expenditures and signs checks.
- The Company lacks accounting personnel with sufficient skills and experience to ensure proper accounting for complex, non-routine transactions.
- During its year end audit, our independent registered accountants discovered material misstatements in our financial statements that required audit adjustments.

We are aware of these material weaknesses and will develop procedures to ensure that independent review of material transactions is performed. In addition, we plan to consult with independent experts when complex transactions are entered into.

Because these material weaknesses exist, management has concluded that the Company's internal control over financial reporting as of December 31, 2010 is not effective.

This annual report does not include an attestation report of the Company's registered public accounting firm regarding internal control over financial reporting. Management's report was not subject to attestation by the company's registered public accounting firm pursuant to temporary rules of the Securities and Exchange Commission that permit the company to provide only management's report in this annual report.

Changes in internal control over financial reporting

There have been no changes, during the quarter ended December 31, 2010, in the Company's internal controls over financial reporting that have materially affected, or are reasonably likely to materially affect, internal controls over financial reporting.

Item 9b. Other Information

None.

PART III

Item 10. Directors, Executive Officers, Promoters and Control Persons, Compliance with Section 16(a) of the Exchange Act

Identification of directors and executive officers at December 31, 2010, is as follows:

Name	Age	Affiliation	Expiration of Term
John C. Lawrence	72	Chairman, President, Secretary, and Treasurer; Director	Annual meeting
Leo Jackson	67	Director	Annual meeting
Gary A. Babbitt	65	Director	Annual meeting
Patrick W. Dugan, Esq.	58	Director	Annual meeting

Russell C. Lawrence 42 Director Annual meeting

Business Experience of Directors and Executive Officers

John C. Lawrence. Mr. Lawrence has been the president and a director since our inception. Mr. Lawrence was the president and a director of AGAU Mines, Inc., our corporate predecessor, since the inception of AGAU Mines, Inc. in

- 23 -

1968. He is a member of the Society of Mining Engineers and a recipient of the Uuno Sahinen Silver Medallion Award presented by Butte Tech, University of Montana. He has a vast background in mining, milling, smelting, chemical processing and oil and gas.

Leo Jackson. Mr. Jackson is a resident of El Paso, Texas. For the past 18 years, he has been a principal owner and the president of Production Minerals, Inc. Mr. Jackson is one of the principal owners of Minera de Roja, S.A. de C.V., and has been involved in the production and marketing of industrial minerals such as fluorspar and celestite in the United States and Mexico for 27 years. Mr. Jackson speaks fluent Spanish and has a BBA degree from the Sul Ross State University in Texas.

Gary A. Babbitt. Mr. Babbitt has experience in mining industry with approximately 30 years dealing with joint ventures, financing, contracting and employment. He has a working knowledge of Spanish and has negotiated contracts in Latin America. Mr. Babbitt has a B.A. from the Albertson College of Idaho, and earned his J.D. from the University of Chicago.

Patrick W. Dugan, Esq. Mr. Dugan has been a Director, Vice President and General Counsel of Nortex Corporation, a company involved in the oil and gas business, for the past 20 years. He is also a Director, Vice President and General Counsel of San Luis Development, L.P., and a Director of Gow Communications, LLC. Mr. Dugan graduated with a B.A. and a J.D. from the University of Texas at Austin.

Russell C. Lawrence. Mr. Lawrence has experience in the lines of applied physics, mining, refining, excavation, electricity, electronics, and building contracting. He graduated from the University of Idaho with a degree in physics in 1994 and worked for the Physics Department at the University of Idaho for a period of 10 years. He has also worked as a building contractor and for USAC at the smelter and laboratory at Thompson Falls, for USAMSA in the construction and operation of the USAMSA smelter in Mexico, and for Antimonio de Mexico, S. A. de C. V. at the San Miguel Mine and the Cadereyta mill site in Mexico.

We are not aware of any involvement by our directors or executive officers during the past five years in legal proceedings that are material to an evaluation of the ability or integrity of any director or executive officer.

Board Meetings and Committees. Our Board of Directors held four (4) regular meetings during the 2010 calendar year. Each incumbent director attended all of the meetings held during the 2010 calendar year, in the aggregate, by the Board and each committee of the Board of which he was a member. Our Board of Directors does not have a Compensation Committee or a Nominating Committee.

Our Board of Directors has established an Audit Committee consisting of one member (Gary Babbitt) of the Board of Directors not involved in our day-to-day financial management. Mr. Babbitt is not considered a financial expert; the Company does not have the necessary capital resources to attract and retain an independent financial expert to serve on an Audit Committee.

Board Member Compensation. We paid directors' fees in the form of 26,000 shares of our common stock per director during 2010.

Section 16(a) Beneficial Ownership Reporting Compliance. Section 16(a) of the Securities Exchange Act of 1934 requires our directors and executive officers and the holders of 10% or more of our common stock to file reports of ownership and changes in ownership with the Securities and Exchange Commission. Officers, directors and stockholders holding more than 10% of our common stock are required by the regulation to furnish us with copies of all Section 16(a) forms they have filed.

Based solely on our review of copies of Forms 3, 4 and 5 furnished to us, Mr. Lawrence, Mr. Jackson, Mr. Babbitt, Mr. Dugan and Mr. Lawrence did not file timely Forms 3, 4 or Form 5 reports during 2010.

Code of Ethics

The Company has adopted a Code of Ethics that applies to the Company's executive officers and its directors. The Company will provide, without charge, a copy of the Code of Ethics on the written request of any person addressed to the Company at: United States Antimony Corporation, P.O. Box 643, Thompson Falls, MT 59873.

- 24 -

Item 11. Executive Compensation

Summary Compensation Table

The Securities and Exchange Commission requires the following table setting forth for fiscal years ending December 31, 2010 and 2009; the compensation paid by USAC to its principal executive officer.

		Annual Compensation			Long-Term Compensation			ion
					Av	wards	F	Payouts
Name and Principal Position	Year	Salary	Bonus	Other Annual Compensation (1)	Restricted Options/ Awards (2)	Securities Underlying LTIP SARs	All Other Payouts	All Other Compensation
John C. Lawrence, President	2010	\$102,500	N/A	\$5,538	\$13,520	None	None	None
John C. Lawrence, President	2009	\$100,000	N/A	\$5,538	\$6,500	None	None	None

⁽¹⁾ Represents earned but unused vacation.

Item 12. Security Ownership of Certain Beneficial Owners and Management

The following table sets forth information regarding beneficial ownership of our common stock as of March 25, 2011, by (i) each person who is known by us to beneficially own more than 5% of our Series A, C, and D preferred stock or common stock; (ii) each of our executive officers and directors; and (iii) all of our executive officers and directors as a group. Unless otherwise stated, each person's address is c/o United States Antimony Corporation, P.O. Box 643, 1250 Prospect Creek Road, Thompson Falls, Montana 59873.

Title of Class	Name and Address of Beneficial Owner(1)	Amount and Nature of Beneficial Ownership	
Common stock	Reed Family Limited Partnership 328 Adams Street Milton, MA 02186	3,918,335	7
Common stock	The Dugan Family c/o A. W. Dugan 1415 Louisiana Street, Suite 3100 Houston, TX 77002	6,362,927(3)	11
Series C Preferred	Richard A. Woods 59 Penn Circle West Penn Plaza Apts. Pittsburgh, PA 15206	48,305(4)	27

⁽²⁾ These figures represent the fair values, as of the date of issuance, of the annual director's fee payable to Mr. Lawrence in the form of shares of USAC's common stock.

Series C Preferred	Dr. Warren A. Evans 69 Ponfret Landing Road Brooklyn, CT 06234	48,305(4)	27
Series C Preferred	Edward Robinson 1007 Spruce Street 1st Floor Philadelphia, PA 19107	32,203(4)	18
Common stock	John C. Lawrence	4,103,653(2)	7
Common stock	Pat Dugan	156,000	Nil
Common stock	Russ Lawrence	156,000	Nil
Common stock	Leo Jackson	292,000	Nil
Common stock	Gary Babbitt	134,167	Nil
Series D Preferred	John C. Lawrence	1,590,672(4)	91
Series D Preferred	Leo Jackson	102,000	5
Series D Preferred	All directors and executive		
	officers as a group (3 persons)	1,751,005	100

- (1) Beneficial Ownership is determined in accordance with the rules of the Securities and Exchange Commission and generally includes voting or investment power with respect to securities. Shares of common stock subject to options or warrants currently exercisable or convertible, or exercisable or convertible within 60 days of March 25, 2011 are deemed outstanding for computing the percentage of the person holding options or warrants but are not deemed outstanding for computing the percentage of any other person. Percentages are based on a total of 56,307,382 shares of common stock, 177,904 shares of Series C Preferred Stock, and 1,751,005 shares of Series D Preferred Stock outstanding on March 25, 2011.
- (2) Includes 3,801,653 shares of common stock and 250,000 stock purchase warrants. Excludes 158,324 shares owned by Mr. Lawrence's sister, as to which Mr. Lawrence disclaims beneficial ownership.
- (3)Includes shares owned by Al W. Dugan and shares owned by companies owned and controlled by Al W. Dugan. Excludes 183,333 shares owned by Lydia Dugan as to which Mr. Dugan disclaims beneficial ownership.
- (4) The outstanding Series A, Series C and Series D preferred shares carry voting rights.

Item 13. Certain Relationships and Related Transactions

Described below are transactions during the last two years to which we are a party and in which any director, executive officer or beneficial owner of five percent (5%) or more of any class of our voting securities or relatives of our directors, executive officers or five percent (5%) beneficial owners has a direct or indirect material interest. See also transactions described in notes 4, 9, 10, 11, 12, 15 and 19 to our Financial Statements as of December 31, 2010.

During 2009, John C. Lawrence, a director and Chief Executive Officer, converted a \$100,000 note receivable into 500,000 shares of common stock and exercised warrants for 1,000,000 shares of common stock in exchange for the forgiveness of \$200,000 of related party payables and accrued interest.

We reimbursed John C. Lawrence, a director and Chief Executive Officer, for operational and maintenance expenses incurred in connection with our use of equipment owned by Mr. Lawrence, including welding trucks, backhoes, and an aircraft. Reimbursements for 2010 and 2009 totaled \$53,932 and \$100,150, respectively.

During 2010, the Company issued 26,000 of its common stock to its Board of Directors as compensation for their services as directors. In connection with the issuances, the Company recorded \$67,600 in director compensation expense.

During 2009, the Company issued 26,000 of its common stock to its Board of Directors as compensation for their services as directors. In connection with the issuances, the Company recorded \$39,000 in director compensation expense.

ITEM 14. Principal Accountant Fees and Services

The Company's Board of Directors and audit committee reviews and approves audit and permissible non-audit services performed by DeCoria, Maichel & Teague P.S., as well as the fees charged by DeCoria, Maichel & Teague P.S. for such services. In its review of non-audit service fees and its appointment of DeCoria, Maichel & Teague P.S. as the Company's independent accountants, the Board of Directors considered whether the provision of such services is compatible with maintaining DeCoria, Maichel & Teague P.S. independence. All of the services provided and fees charged by DeCoria, Maichel & Teague P.S. in 2010 were pre-approved by the Board of Directors and its audit committee.

Audit Fees

The aggregate fees billed by DeCoria, Maichel & Teague P.S. for professional services for the audit of the annual financial statements of the Company and the reviews of the financial statements included in the Company's quarterly reports on Form 10-Q for 2010 and 2009 were \$73,976 and \$64,888, respectively, net of expenses.

Audit-Related Fees

There were no other fees billed by DeCoria, Maichel & Teague P.S. during the last two fiscal years for assurance and related services that were reasonably related to the performance of the audit or review of the Company's financial statements and not reported under "Audit Fees" above.

- 26 -

Tax Fees

The aggregate fees billed by DeCoria, Maichel & Teague P.S. during the last two fiscal years for professional services rendered by DeCoria, Maichel & Teague P.S. for tax compliance for 2010 and 2009 were \$5,236 and \$5,433 respectively.

All Other Fees

• There were no other fees billed by DeCoria, Maichel & Teague P.S. during the last two fiscal years for products and services provided by DeCoria, Maichel & Teague P.S

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of United States Antimony Corporation

We have audited the accompanying consolidated balance sheets of United States Antimony Corporation and its subsidiaries as of December 31, 2010 and 2009, and the related consolidated statements of operations, changes in stockholders' equity and cash flows for the years then ended. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of United States Antimony Corporation and its subsidiaries as of December 31, 2010 and 2009, and the consolidated results of their operations and their cash flows for the years then ended, in conformity with accounting principles generally accepted in the United States of America.

DeCoria, Maichel & Teague P.S. Spokane, Washington

Eastern U.S. Mining operations Adjusted EBITDA increased \$94.3 million, or 3:

Our Australian Mining operations Adjusted EBITDA increased \$152.2 million in the current year, a 302.2% increase compared to prior year due to an increase of \$16.23, or 197.4%, in margin per ton and 2.2 million additional tons shipped. Our Australian operations produce mostly (75% to 85%) high margin metallurgical coal. The two mines we acquired in April 2004 added \$87.4 million to Adjusted EBITDA compared to eight months of ownership in 2004. The remaining increase of \$64.8 million was primarily due to an increase in volume, including tonnage from our surface operation opened at the end of the prior year, and an increase of 63.3% in average per ton sale price. While current year margins benefited from strong sales prices, margin growth was limited by the impact of port congestion, related demurrage costs and higher costs due to geological problems at the underground mine.

Trading and Brokerage operations Adjusted EBITDA increased \$2.0 million from the prior year primarily due to higher brokerage results. Results in 2005 included a net charge of \$4.0 million, primarily related to the breach of a coal supply contract by a producer.

Table of Contents

Reconciliation of Segment Adjusted EBITDA to Income Before Income Taxes and Minority Interests

	Y	Year Ended December 31,		Increase (Decrease) to Income		
		2005	2004	\$	%	
	(Dollars in thousands)					
Total Segment Adjusted EBITDA	\$	1,079,307	\$ 773,820	\$ 305,487	39.5%	
Corporate and Other Adjusted EBITDA		(208,909)	(214,576)	5,667	2.6%	
Depreciation, depletion and amortization		(316,114)	(270,159)	(45,955)	(17.0)%	
Asset retirement obligation expense		(35,901)	(42,387)	6,486	15.3%	
Interest expense and early debt extinguishment costs		(102,939)	(98,544)	(4,395)	(4.5)%	
Interest income		10,641	4,917	5,724	116.4%	
Income before income taxes and minority interests	\$	426,085	\$ 153,071	\$ 273,014	178.4%	

Income before income taxes and minority interest of \$426.1 million for the current year is \$273.0 million, or 178.4%, higher than prior year primarily due to improved segment Adjusted EBITDA as discussed above. Increases in depreciation, depletion and amortization expense and interest expense offset improvements in Corporate and Other Adjusted EBITDA, asset retirement obligation expense, debt extinguishment costs and interest income.

Corporate and Other Adjusted EBITDA results include selling and administrative expenses, equity income from our Venezuelan joint venture, net gains on asset disposals or exchanges, costs associated with past mining obligations and revenues and expenses related to our other commercial activities such as coalbed methane, generation development and resource management. The \$5.7 million improvement in Corporate and Other Adjusted EBITDA (net expense) in 2005 compared to 2004 included:

net gains on asset sales that were \$77.7 million higher than prior year primarily due to a \$37.4 million gain from a property exchange related to settlement of a contract dispute with a third-party coal supplier (see Note 3 to our consolidated financial statements), sales of Penn Virginia Resource Partners, L.P. (PVR) units (\$31.1 million) (see Note 9 to our consolidated financial statements), resource sales involving non-strategic coal assets and properties (\$12.5 million), and an asset exchange in which we acquired Illinois Basin coal reserves (\$6.2 million). The gain from PVR unit sales in 2005 was from the sale of all of our remaining 0.838 million units compared to a gain of \$15.8 million on the sale of 0.775 million units in two separate transactions during 2004. All other gains on asset disposals in 2005 and 2004 were \$14.3 million and \$8.0 million, respectively;

higher equity income of \$18.7 million from our 25.5% interest in Carbones del Guasare (acquired in December 2004), which owns and operates the Paso Diablo Mine in Venezuela, and;

lower net expenses related to generation development of \$5.1 million, primarily due to reimbursements from the Prairie State Energy Campus partnership group.

These improvements were partially offset by:

a \$36.0 million increase in past mining obligations expense, primarily related to higher retiree health care costs. The increase in retiree health care costs was actuarially driven by higher trend rates, and lower interest discount assumptions and higher amortization of actuarial losses in 2005, and;

an increase of \$46.8 million in selling and administrative expenses primarily related to accruals for higher short-term and long-term performance-based incentive plans (\$32.2 million). These incentives are principally long-term plans that are driven by total shareholder returns. Our share price increased 104% during 2005,

significantly outperforming industrial benchmarks and our coal

68

Table of Contents

peer group average. The remaining increase in selling and administrative expenses was due to higher personnel and outside services costs needed to advance our growth initiatives in areas such as China and BTU conversion, acquisitions and regulatory costs (e.g. Sarbanes-Oxley), and an increase in advertising costs related to an industry awareness campaign launched in late 2005.

Depreciation, depletion and amortization increased \$46.0 million during 2005. Approximately 56% of the increase was due to acquisitions completed during 2004 and the remainder was from increased volumes at existing mines and operations opened during 2005. Asset retirement obligation expense decreased \$6.5 million in 2005 due to additional expenses incurred in 2004 to accelerate the planned reclamation of certain closed mine sites. Interest expense increased \$6.1 million primarily related to a full year of interest in 2005 on \$250 million of 5.875% Senior Notes issued in late March of 2004 and increases in the cost of floating rate debt due to higher interest rates. Interest income improved \$5.7 million due to higher yields on short-term interest rates and an increase in invested balances due to improved cash flows during 2005.

Net Income

	Y	Year Ended December 31,		Increase (Decrease) to Income		
		2005		2004	\$	%
			(D	ollars in the	ousands)	
Income before income taxes and minority interests	\$	426,085	\$	153,071	\$ 273,014	178.4%
Income tax benefit (provision)		(960)		26,437	(27,397)	(103.6)%
Minority interests		(2,472)		(1,282)	(1,190)	(92.8)%
•						
Income from continuing operations		422,653		178,226	244,427	(137.1)%
Loss from discontinued operations				(2,839)	2,839	n/a
·						
Net income	\$	422,653	\$	175,387	\$ 247,266	141.0%

Net income increased \$247.3 million, or 141.0%, compared to the prior year due to the increase in income before income taxes and minority interests discussed above, partially offset by increases in our income tax provision. The income tax benefit in 2004 included a \$25.9 million reduction in the valuation allowance on net operating loss carry-forwards and alternative minimum tax credits. The income tax provision in 2005 was higher based on the increase in pretax income which was partially offset by the higher permanent benefit of percentage depletion and the partial benefit of tax loss from a deemed liquidation of a subsidiary arising as an indirect consequence of a comprehensive and strategic internal restructuring we completed during 2005. This restructuring resulted from efforts to better align corporate ownership of subsidiaries on a geographic and functional basis.

Outlook

Events Impacting Near-Term Operations

In October 2006, we acquired Excel Coal Limited, which included three operating mines, two late development-stage mines and a development-stage mine. These development-stage mines are expected to begin shipments in 2007, and our 2007 results will be impacted to the extent we complete ramp up activities at these development-stage mines on time and at expected capacity. Furthermore, our two primary Australian shipping points, Dalrymple Bay Coal Terminal and Port of Newcastle, are experiencing significant queues of vessels, which could result in delayed shipments and demurrage charges.

Currently depressed Central Appalachian coal prices combined with escalating costs of our third-party contractors could adversely impact our saleable production as it becomes uneconomic to mine.

Although we expect that the Twentymile longwall system will allow for expanded capacity over the next several years, we continue to manage equipment and lower coal quality issues at our Twentymile mine.

69

Table of Contents

Shipments from our Powder River Basin mines improved in 2006, but were still impacted by rail service disruptions. Rail carriers are expected to continue improvements in 2007. Although we currently expect to increase our shipment levels from our Powder River Basin operations in 2007 compared with 2006, our ability to reach these targeted shipment levels is dependent upon the performance of the rail carriers.

Our union workforce east of the Mississippi River is primarily represented by the UMWA. The UMWA-represented workers at one of our eastern mines operate under a contract that expires on December 31, 2007. The remainder of our UMWA-represented workers in the east operate under a recently signed, five-year labor agreement expiring December 31, 2011. The new contract mirrors the 2007 National Bituminous Coal Wage Agreement and stipulates a \$1.50 per hour increase to wages effective January 1, 2007 and a total wage increase of \$4.00 per hour over the life of the agreement. The contract also calls for a \$1,000 bonus for each of our UMWA-represented employees.

Long-Term Outlook

Our outlook for the coal markets remains positive. We believe strong coal markets will continue worldwide, as long as growth continues in the U.S., Asia and other industrialized economies that are increasing coal demand for electricity generation and steelmaking. Approximately 115 gigawatts of new coal-fueled electricity generating capacity is scheduled to come on line around the world over the next three years, and the EIA projects an additional 156 gigawatts of new U.S. coal-fueled generation by 2030, which by itself represents more than 500 million tons of additional coal demand.

Global coal markets continued to grow, driven by increased demand from growing economies. The U.S. economy grew at an annual rate of 3.5% based on fourth quarter 2006 data as reported by the U.S. Commerce Department, while China s economy grew 10.7% in 2006 as published by the National Bureau of Statistics of China. Metallurgical coal continued to sell at a significant premium to steam coal. Metallurgical markets, while off record levels, remain strong as seaborne metallurgical coal prices for the upcoming fiscal year were settling from a reference price near \$100 per metric ton and as China steel production shows signs of continued growth over 2005 levels. We expect to capitalize on the strong global market for metallurgical coal primarily through production and sales of metallurgical coal from our Appalachia and Australian operations. In response to growing international markets, we established an international trading group in 2006, and added another operations office in Europe in early 2007.

Coal-to-gas and coal-to-liquids (CTL) plants represent a significant avenue for long-term industry growth. The EIA continues to project an increase in demand for unconventional sources of transportation fuel, including coal-to-liquids, and in the U.S. coal-to-liquid technologies are receiving growing bipartisan support as demonstrated by the newly introduced CTL bills such as the Coal-to-Liquid Fuel Promotion Act within the Senate. China and India are developing coal-to-gas and coal-to-liquids facilities.

Demand for Powder River Basin coal remains strong, particularly for our ultra-low sulfur products. The Powder River Basin represents more than half of our production. We control approximately 3.5 billion tons of proven and probable reserves in the Southern Powder River Basin, and we sold 138.4 million tons of coal from this region during 2006, an increase of 10.1% over the prior year.

We are targeting 2007 production of 240 to 260 million tons and total sales volume of 265 to 285 tons, including 15 to 18 million tons of metallurgical coal. As of December 31, 2006, our unpriced 2007 volumes for planned produced tonnage were 5 to 15 million U.S. tons and 14 million Australia tons. Our total unpriced planned production for 2008 is approximately 70 to 80 million tons in the United States and 20 to 22 million tons in Australia.

Management plans to aggressively control costs and operating performance to mitigate external cost pressures, geologic conditions and potentially adverse port and rail performance. We are experiencing increases in operating costs related to fuel, explosives, steel, tires, contract mining and healthcare, and have taken measures to mitigate the increases in these costs, including a company-wide initiative to instill best

70

Table of Contents

practices at all operations. In addition, historically low long-term interest rates also have a negative impact on expenses related to our actuarially determined, employee-related liabilities. We may also encounter poor geologic conditions, lower third-party contract miner or brokerage source performance or unforeseen equipment problems that limit our ability to produce at forecasted levels. To the extent upward pressure on costs exceeds our ability to realize sales increases, or if we experience unanticipated operating or transportation difficulties, our operating margins would be negatively impacted. See Cautionary Notice Regarding Forward-Looking Statements and Item 1A. Risk Factors for additional considerations regarding our outlook.

Critical Accounting Policies and Estimates

Our discussion and analysis of our financial condition, results of operations, liquidity and capital resources is based upon our financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States. Generally accepted accounting principles require that we make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. On an on-going basis, we evaluate our estimates. We base our estimates on historical experience and on various other assumptions that we believe are reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

Employee-Related Liabilities

We have significant long-term liabilities for our employees postretirement benefit costs, workers compensation obligations and defined benefit pension plans. Detailed information related to these liabilities is included in Notes 14, 15 and 16 to our consolidated financial statements. The adoption of SFAS No. 158 on December 31, 2006 resulted in each of these liabilities recorded on the consolidated balance sheet as of December 31, 2006 being equal to the funded status of the plans. Liabilities for postretirement benefit costs and workers compensation obligations are not funded. Our pension obligations are funded in accordance with the provisions of federal law. Expense for the year ended December 31, 2006, for these liabilities totaled \$178.7 million, while payments were \$146.2 million.

Each of these liabilities are actuarially determined and we use various actuarial assumptions, including the discount rate and future cost trends, to estimate the costs and obligations for these items. Our discount rate is determined by utilizing a hypothetical bond portfolio model which approximates the future cash flows necessary to service our liabilities.

We make assumptions related to future trends for medical care costs in the estimates of retiree health care and work-related injuries and illnesses obligations. Our medical trend assumption is developed by annually examining the historical trend of our cost per claim data. In addition, we make assumptions related to future compensation increases and rates of return on plan assets in the estimates of pension obligations.

If our assumptions do not materialize as expected, actual cash expenditures and costs that we incur could differ materially from our current estimates. Moreover, regulatory changes could increase our obligation to satisfy these or additional obligations. Our most significant employee liability is postretirement health care, and assumed discount rates and health care cost trend rates have a significant effect on the expense and liability amounts reported for health care plans.

71

Table of Contents

Below we have provided two separate sensitivity analyses to demonstrate the significance of these assumptions in relation to reported amounts.

Health care cost trend rate:

	One-Percentage- Point Increase		One-Percentage- Point Decrease	
	(Dollars in thousands)			
Effect on total service and interest cost components ⁽¹⁾	\$ 9,501	\$	(7,989)	
Effect on total postretirement benefit obligation ⁽¹⁾	\$ 179,264	\$	(150,765)	
Discount rate:				
	Percentage- t Increase	One-Percentage- Point Decrease		
	(Dollars in thousands)			
Effect on total service and interest cost components ⁽¹⁾	\$ 1,064	\$	(1,496)	
Effect on total postretirement benefit obligation ⁽¹⁾	\$ (78,243)	\$	82,702	

Asset Retirement Obligations

Our asset retirement obligations primarily consist of spending estimates for surface land reclamation and support facilities at both surface and underground mines in accordance with federal and state reclamation laws as defined by each mining permit. Asset retirement obligations are determined for each mine using various estimates and assumptions including, among other items, estimates of disturbed acreage as determined from engineering data, estimates of future costs to reclaim the disturbed acreage, the timing of these cash flows, and a credit-adjusted, risk-free rate. As changes in estimates occur (such as mine plan revisions, changes in estimated costs, or changes in timing of the reclamation activities), the obligation and asset are revised to reflect the new estimate after applying the appropriate credit-adjusted, risk-free rate. If our assumptions do not materialize as expected, actual cash expenditures and costs that we incur could be materially different than currently estimated. Moreover, regulatory changes could increase our obligation to perform reclamation and mine closing activities. Asset retirement obligation expense for the year ended December 31, 2006, was \$40.1 million, and payments totaled \$36.6 million. See detailed information regarding our asset retirement obligations in Note 13 to our consolidated financial statements.

Income Taxes

We account for income taxes in accordance with SFAS No. 109, Accounting for Income Taxes (SFAS No. 109), which requires that deferred tax assets and liabilities be recognized using enacted tax rates for the effect of temporary differences between the book and tax basis of recorded assets and liabilities. SFAS No. 109 also requires that deferred tax assets be reduced by a valuation allowance if it is more likely than not that some portion or all of the deferred tax asset will not be realized. In our annual evaluation of the need for a valuation allowance, we take into account various factors, including the expected level of future taxable income and available tax planning strategies. If actual results differ from the assumptions made in our annual evaluation of our valuation allowance, we may record a change in valuation allowance through income tax expense in the period such determination is made.

⁽¹⁾ In addition to the effect on total service and interest cost components of expense, changes in trend and discount rates would also increase or decrease the actuarial gain or loss amortization expense component. The gain or loss amortization would approximate the increase or decrease in the obligation divided by 8.47 years at December 31, 2006.

We establish reserves for tax contingencies when, despite the belief that our tax return positions are fully supported, certain positions are likely to be challenged and may not be fully sustained. The tax contingency reserves are analyzed on a quarterly basis and adjusted based upon changes in facts and circumstances, such as the progress of federal and state audits, case law and emerging legislation. Our effective tax rate includes the impact of tax contingency reserves and changes to the reserves, including

72

Table of Contents

related interest. We establish the reserves based upon management s assessment of exposure associated with permanent tax differences (i.e. tax depletion expense, etc.) and certain tax sharing agreements. We are subject to federal audits for several open years due to our previous inclusion in multiple consolidated groups and the various parties involved in finalizing those years. Additional details regarding the effect of income taxes on our consolidated financial statements is available in Note 11.

Interpretation No. 48 Accounting for Uncertainty in Income Taxes an interpretation of FASB Statement No. 109 (FIN No. 48) prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. FIN No. 48 also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure and transition. This interpretation is effective for fiscal years beginning after December 15, 2006 (January 1, 2007 for the Company).

Revenue Recognition

In general, we recognize revenues when they are realizable and earned. We generated 98% of our revenue in 2006 from the sale of coal to our customers. Revenue from coal sales is realized and earned when risk of loss passes to the customer. Coal sales are made to our customers under the terms of coal supply agreements, most of which are long-term (greater than one year). Under the typical terms of these coal supply agreements, title and risk of loss transfer to the customer at the mine or port, where coal is loaded to the rail, barge, ocean-going vessel, truck or other transportation source(s) that delivers coal to its destination.

With respect to other revenues, other operating income, or gains on asset sales recognized in situations unrelated to the shipment of coal, we carefully review the facts and circumstances of each transaction and apply the relevant accounting literature as appropriate, and do not recognize revenue until the following criteria are met: persuasive evidence of an arrangement exists; delivery has occurred or services have been rendered; the seller s price to the buyer is fixed or determinable; and collectibility is reasonably assured.

Trading Activities

We engage in the buying and selling of coal in over-the-counter markets. Our coal trading contracts are accounted for on a fair value basis under SFAS No. 133, Accounting for Derivative Instruments and Hedging Activities. To establish fair values for our trading contracts, we use bid/ask price quotations obtained from multiple, independent third-party brokers to value coal and emission allowance positions. Prices from these sources are then averaged to obtain trading position values. We could experience difficulty in valuing our market positions if the number of third-party brokers should decrease or market liquidity is reduced.

All of the contracts in our trading portfolio as of December 31, 2006 were valued utilizing prices from over-the-counter market sources, adjusted for coal quality and traded transportation differentials. As of December 31, 2006, 41% of the estimated future value of our trading portfolio was scheduled to be realized by the end of 2007 and 80% within 24 months. See Note 5 to our consolidated financial statements for additional details regarding assets and liabilities from our coal trading activities.

Liquidity and Capital Resources

Our primary sources of cash include sales of our coal production to customers, cash generated from our trading and brokerage activities, sales of non-core assets and financing transactions, including the sale of our accounts receivable (through our securitization program). Our primary uses of cash include our cash costs of coal production, capital expenditures, interest costs and costs related to past mining obligations as well as planned acquisitions. Our ability to pay dividends, service our debt (interest and principal) and acquire new productive assets or businesses is dependent upon our ability to continue to generate cash from the primary sources noted above in excess of the primary uses. Future dividends,

73

Table of Contents

among other things, are subject to limitations imposed by our Senior Notes and Debenture covenants. We expect to fund all of our capital expenditure requirements with cash generated from operations.

Net cash provided by operating activities was \$595.7 million for the year ended December 31, 2006, a decrease of \$107.1 million compared to \$702.8 million provided by operating activities in the prior year. The decrease was primarily related to the timing of working capital needs. The decrease in cash from operating activities would have been \$30.4 million lower had 2006 and 2005 operating cash flows been shown on a comparable basis. The 2006 operating cash flows include a required reclassification of the excess tax benefit related to stock option exercises (\$33.2 million) from operating to financing activities.

Net cash used in investing activities was \$2.14 billion for the year ended December 31, 2006 compared to \$584.2 million used in the prior year. The increase reflects the acquisition of Excel for \$1.51 billion, net of cash acquired, higher capital expenditures of \$93.4 million, higher federal coal lease expenditures of \$59.8 million, the acquisition of an additional interest in a joint venture for \$44.5 million, and the receipt of notes in lieu of payments on asset sales of \$45.6 million, partially offset by higher proceeds from asset disposals of \$46.9 million in 2006 and the purchase of mining and related assets of \$141.2 million in 2005. Capital expenditures included longwall equipment and mine development at our Australian mines (including our recently acquired Excel operations), the opening of new mines and the purchase of equipment for expansion. The \$141.2 million purchase of mining and related assets in 2005 included 70 million tons of Illinois and Indiana coal reserves, surface properties and equipment from Lexington Coal Company (\$56.5 million) and rail, loadout and surface facilities as well as other mining assets for \$84.7 million from another major coal producer.

Net cash provided by financing activities was \$1.37 billion during the year ended December 31, 2006, compared to a use of \$4.9 million in 2005. In 2006, we issued net borrowings of \$1.74 billion, which were utilized to fund the \$1.51 billion Excel acquisition, the repayment of Excel s bank facility and a portion of its outstanding bonds, and other corporate purposes. See the detailed discussion of our Senior Unsecured Credit Facility, Convertible Junior Subordinated Debentures, Senior Notes offerings and borrowings under our Senior Unsecured Credit Facility below. In addition to the net issuance of debt related to the Excel acquisition, we repaid \$23.8 million of debt held by a majority-owned joint venture, purchased \$7.7 million of our 5.875% Senior Notes in the open market, and made scheduled debt repayments of \$11.1 million on our 5% Subordinated Note and other notes payable.

The 2006 activity compared to 2005 also reflected payments for common stock repurchases of \$99.8 million, debt issuance costs of \$40.6 million and higher dividends of \$18.9 million. During the year ended December 31, 2006, we repurchased 2.2 million of our common shares at a cost of \$99.8 million under our share repurchase program as authorized by the Board of Directors. The 2006 activity included a decrease in the usage of our accounts receivable securitization program of \$5.8 million compared to an increase of \$25.0 million in 2005. The 2006 activity compared to 2005 also reflected \$7.0 million lower proceeds from the exercise of stock options as well as a \$33.2 million tax benefit related to stock option exercises included in financing activity based on the newly adopted accounting standard for share-based compensation (see Newly Adopted Accounting Pronouncements below for more discussion about the adoption of this standard). In 2005, the tax benefit related to stock option exercises (totaling \$30.4 million) was included in operating activities.

74

Table of Contents

Senior Unsecured Credit Facility

In September 2006, we entered into a Third Amended and Restated Credit Agreement, which established a \$2.75 billion Senior Unsecured Credit Facility and which amended and restated in full our then existing \$1.35 billion Senior Secured Credit Facility. The Senior Unsecured Credit Facility provides a \$1.8 billion Revolving Credit Facility and a \$950.0 million Term Loan Facility. The Revolving Credit Facility replaced our previous \$900.0 million revolving credit facility and the increased capacity is intended to accommodate working capital needs, letters of credit, the funding of capital expenditures and other general corporate purposes. The Revolving Credit Facility also includes a \$50.0 million sub-facility available for same-day swingline loan borrowings. In September 2006, we borrowed \$312.0 million under the Revolver in conjunction with the Excel acquisition and repaid this \$312.0 million outstanding balance in December 2006 with net proceeds from the Debentures.

The Term Loan Facility consisted of an unsecured \$440.0 million portion, which was drawn at closing to replace the previous term loan (\$437.5 million balance at time of replacement; \$442.5 million at December 31, 2005) issued under the Senior Secured Credit Facility. The Term Loan Facility also included a Delayed Draw Term Loan Sub-Facility of up to \$510.0 million, which was fully drawn in October 2006 in connection with the Excel acquisition. In December 2006, \$403.0 million of the outstanding balance of the Term Loan Facility (\$950.0 million was outstanding at time of repayment) was repaid with the net proceeds from the Debentures. In conjunction with the establishment of the Senior Unsecured Credit Facility, we incurred \$8.6 million in financing costs, of which \$5.6 million related to the Revolving Credit Facility and \$3.0 million related to the Term Loan Facility. These debt issuance costs will be amortized to interest expense over five years, the term of the Senior Unsecured Credit Facility.

Loans under the facility are available in U.S. dollars, with a sub-facility under the Revolving Credit Facility available in Australian dollars, pounds sterling and Euros. Letters of credit under the Revolving Credit Facility are available to us in U.S. dollars with a sub-facility available in Australian dollars, pounds sterling and Euros. The interest rate payable on the Revolving Credit Facility and the Term Loan Facility under the Senior Unsecured Credit Facility is LIBOR plus 1.0% with step-downs to LIBOR plus 0.50% based on improvement in the leverage ratio, as

defined in the Third Amended and Restated Credit Agreement. The rate applicable to the Term Loan Facility was 6.35% at December 31,2006.

75

Table of Contents

Under the Senior Unsecured Credit Facility, we must comply with certain financial covenants on a quarterly basis including a minimum interest coverage ratio and a maximum leverage ratio, as defined in the Third Amended and Restated Credit Agreement. The financial covenants also place limitations on our investments in joint ventures, unrestricted subsidiaries, indebtedness of non-loan parties, and the imposition of liens on our assets. The new facility is less restrictive with respect to limitations on our dividend payments, capital expenditures, asset sales or stock repurchases. The Senior Unsecured Credit Facility matures on September 15, 2011.

As of December 31, 2006, we had no borrowings outstanding under our Revolving Credit Facility. Our revolving line of credit was primarily used for standby letters of credit until September 2006, when we also used the revolving line of credit to facilitate the Excel acquisition. As discussed above, the \$312.0 million outstanding under the revolving line of credit was repaid in December 2006 with net proceeds from the Debentures. The remaining available borrowing capacity (\$1.29 billion as of December 31, 2006) will be used to fund strategic acquisitions or meet other financing needs, including standby letters of credit. During 2005, we had no borrowings outstanding under our previous \$900.0 million revolving line of credit, which we used primarily for standby letters of credit. We were in compliance with all of the covenants of the Senior Unsecured Credit Facility, the 6.875% Senior Notes, the 5.875% Senior Notes, the 7.375% Senior Notes, the 7.875% Senior Notes, and the Convertible Junior Subordinated Debentures as of December 31, 2006.

Convertible Junior Subordinated Debentures

On December 20, 2006, we issued \$732.5 million aggregate principal amount of 4.75% Convertible Junior Subordinated Debentures due 2066 (the Debentures), including \$57.5 million issued pursuant to the underwriters exercise of their over-allotment option. Net proceeds from the offering, after deducting underwriting discounts and offering expenses, were \$715.0 million and were used to repay indebtedness under our Senior Unsecured Credit Facility. The Debentures will pay interest semiannually at a rate of 4.75% per year. We may elect to, and if and to the extent that a mandatory trigger event (as defined in the indenture governing the Debentures) has occurred and is continuing will be required to, defer interest payments on the Debentures. After five years of deferral at our option, or upon the occurrence of a mandatory trigger event, we generally must sell warrants or preferred stock with specified characteristics and use the funds from that sale to pay deferred interest, subject to certain limitations. In no event may we defer payments of interest on the Debentures for more than ten years.

The Debentures are convertible at any time on or prior to December 15, 2036 if any of the following conditions occur: (i) our closing common stock price exceeds 140% of the then applicable conversion price for the Debentures (currently \$86.73 per share) for at least 20 of the final 30 trading days in any quarter; (ii) a notice of redemption is issued with respect to the Debentures; (iii) a change of control, as defined in the indenture governing the Debentures; (iv) satisfaction of certain trading price conditions; and (v) other specified corporate transactions described in the indenture governing the Debentures. In addition, the Debentures are convertible at any time after December 15, 2036 to December 15, 2041, the scheduled maturity date. In the case of conversion following a notice of redemption or upon a non-stock change of control, as defined in the indenture governing the Debentures, holders may convert their Debentures into cash in the amount of the principal amount of their Debentures and shares of our common stock for any conversion value in excess of the principal amount. In all other conversion circumstances, holders will receive perpetual preferred stock (see Note 17 to our consolidated financial statements) with a liquidation preference equal to the principal amount of their Debentures, and any conversion value in excess of the principal amount will be settled with our common stock. The consideration delivered upon conversion will be based upon an initial conversion rate of 16.1421 shares of common stock per \$1,000 principal amount of Debentures, subject to adjustment. This conversion rate represents an initial conversion price of approximately \$61.95 per share, a 40% premium over the closing stock price of \$44.25 on December 14, 2006, the date of the pricing of the offering of the Debentures.

The Debentures are unsecured obligations, ranking junior to all existing and future senior and subordinated debt (excluding trade accounts payable or accrued liabilities arising in the ordinary course of

Table of Contents

business) except for any future debt that ranks equal to or junior to the Debentures. The Debentures will rank equal in right of payment with our obligations to trade creditors. Substantially, all of our existing indebtedness is senior to the Debentures. In addition, the Debentures will be effectively subordinated to all indebtedness of our subsidiaries. The indenture governing the Debentures places no limitation on the amount of additional indebtedness that we or any of our subsidiaries may incur (see Note 12 of our consolidated financial statements for additional information on the Debentures).

7.375% Senior Notes Due November 2016 and 7.875% Senior Notes Due November 2026

On October 12, 2006, we completed a \$650 million offering of 7.375% 10-year Senior Notes due 2016 and \$250 million of 7.875% 20-year Senior Notes due 2026. The notes are general unsecured obligations and rank senior in right of payment to any subordinated indebtedness; equally in right of payment with any senior indebtedness; effectively junior in right of payment to our existing and future secured indebtedness, to the extent of the value of the collateral securing that indebtedness; and effectively junior to all the indebtedness and other liabilities of our subsidiaries that do not guarantee the notes. Interest payments are scheduled to occur on May 1 and November 1 of each year, commencing on May 1, 2007.

The notes are guaranteed by our Subsidiary Guarantors, as defined in the note indenture. The note indenture contains covenants that, among other things, limit our ability to create liens and enter into sale and lease-back transactions. The notes are redeemable at a redemption price equal to 100% of the principal amount of the notes being redeemed plus a make-whole premium, if applicable, and any accrued unpaid interest to the redemption date. Net proceeds from the offering, after deducting underwriting discounts and expenses, were \$886.1 million.

Series Bonds

As of December 31, 2006, we had \$74.0 million in Series Bonds outstanding, which were assumed as part of the Excel acquisition. The 6.84% Series A Bonds have a balloon maturity in December 2014. The 6.34% Series B Bonds mature in December 2014 and are payable in installments beginning December 2008. The 6.84% Series C Bonds mature in December 2016 and are payable in installments beginning December 2012. Interest payments occur in June and December of each year.

Interest Rate Swaps

Prior to completion of the Senior Unsecured Credit Facility, we had two \$400.0 million interest rate swaps. A \$400.0 million notional amount floating-to-fixed interest rate swap was designated as a hedge of changes in expected cash flows on the previous term loan under the Senior Secured Credit Facility. Under this swap, we paid a fixed rate of 6.764% and received a floating rate of LIBOR plus 2.5% that reset each March 15, June 15, September 15 and December 15 based upon the three-month LIBOR rate. A \$400.0 million notional amount fixed-to-floating interest rate swap was designated as a hedge of the changes in the fair value of the 6.875% Senior Notes due 2013. Under this swap, we paid a floating rate of LIBOR plus 1.97% that reset each March 15, June 15, September 15 and December 15 based upon the three-month LIBOR rate and received a fixed rate of 6.875%.

In conjunction with the completion of the new Senior Unsecured Credit Facility, the \$400.0 million notional amount floating-to-fixed interest rate swap was terminated and resulted in payment to us of \$5.2 million. We recorded the \$5.2 million fair value of the swap in Accumulated other comprehensive loss on the consolidated balance sheet and will amortize this amount to interest expense over the remaining term of the forecasted interest payments initially hedged. We then entered into a \$120.0 million notional amount floating-to-fixed interest rate swap with a fixed rate of 6.25% and a floating rate of LIBOR plus 1.0%. This interest rate swap was designated as a hedge of the variable interest payments on the Term Loan under the new Senior Unsecured Credit Facility.

We also terminated \$280.0 million of our \$400.0 million notional amount fixed-to-floating interest rate swap designated as a hedge of the changes in fair value of the 6.875% Senior Notes due 2013. Reducing the notional amount of the interest rate swap to \$120.0 million resulted in payment of \$5.2 million to the

Table of Contents

counterparty. Reduction of the notional amount of the swap did not affect our floating and fixed rates. The \$5.2 million of fair value associated with the termination of the \$280.0 million portion of the swap was recorded as an adjustment to the carrying value of long-term debt and will be amortized to interest expense through maturity of the 6.875% Senior Notes due 2013.

Because the critical terms of the swaps and the respective debt instruments they hedge coincide, there was no hedge ineffectiveness recognized in the consolidated statements of operations during the years ended December 31, 2006 and 2005. At December 31, 2006 there was an unrealized loss related to the cash flow hedge of \$2.5 million and at December 31, 2005 there was an unrealized gain related to the cash flow hedge of \$2.3 million. As of December 31, 2006 and 2005, the net unrealized loss on the fair value hedges discussed above were \$13.8 million and \$8.9 million, respectively, which is reflected as an adjustment to the carrying value of the Senior Notes (see table above).

Third-party Security Ratings

In 2006, third-party rating agencies performed a comprehensive review of our securities ratings based on our entrance into the new senior unsecured credit facility and the issuance of additional debt securities to facilitate the Excel acquisition. The ratings for our senior unsecured credit facility and our senior unsecured notes are as follows: Moody s issued a Ba1 rating, Standard & Poor s issued a BB rating and Fitch issued a BB+ rating. The rating on our convertible junior subordinated debentures issued in December 2006 were as follows: Moody s issued a Ba2 rating, Standard & Poor s issued a B rating and Fitch issued a BB- rating. These security ratings reflected the views of the rating agency only. An explanation of the significance of these ratings may be obtained from the rating agency. Such ratings are not a recommendation to buy, sell or hold securities, but rather an indication of creditworthiness. Any rating can be revised upward or downward or withdrawn at any time by a rating agency if it decides that the circumstances warrant the change. Each rating should be evaluated independently of any other rating.

Shelf Registration Statement

On July 28, 2006, we filed an automatic shelf registration statement on Form S-3 as a well-known seasoned issuer with the Securities and Exchange Commission. The registration was for an indeterminate number of securities and is effective for three years, at which time we can file an automatic shelf registration statement that would become immediately effective for another three-year term. Under this universal shelf registration statement, we have the capacity to offer and sell from time to time securities, including common stock, preferred stock, debt securities, warrants and units. The Debentures, 7.375% Senior Notes due 2016 and 7.875% Senior Notes due 2026 were issued pursuant to the shelf registration statement.

Excel Transaction

On July 5, 2006, we signed a merger implementation agreement to acquire Excel Coal Limited (Excel), an independent coal company, by means of a scheme of arrangement transaction under Australian law. The merger implementation agreement was amended on September 18, 2006, and we agreed to pay A\$9.50 per share (US\$7.16 as of the amendment date) for the outstanding shares of Excel. On September 20, 2006, as part of the amended agreement, we acquired 19.99% of the outstanding shares of Excel at A\$9.50 per share, resulting in payment of A\$408.3 million, or US\$307.8 million. In October 2006, we acquired the remaining interest in Excel for A\$9.50 per share (US\$7.07 per share), a total of A\$1.63 billion or US\$1.21 billion. The total acquisition price, including the advance purchase of 19.99% and related costs, was US\$1.54 billion in cash plus assumed debt of US\$293.0 million, less US\$30.0 million of cash acquired in the transaction, and was financed with borrowings under our Senior Unsecured Credit Facility and Senior Notes due 2016 and 2026 (see Note 12 of our consolidated financial statements for additional information on the financing of the Excel acquisition). The Excel acquisition includes three operating mines (Wambo Open-Cut Mine, Metropolitan Mine and Chain Valley Mine) and three development-stage mines (North Wambo Underground Mine, Wilpinjong Mine and Millennium Mine), with more than 500 million tons of proven and probable coal reserves. We also acquired a 51.0%

78

Table of Contents

interest in Excelven Pty Ltd., which owns Transportes Coal-Sea de Venezuela C.A. and a 96.7% interest in Cosila Complejo Siderurgico Del Lago S.A., which owns the Las Carmelitas coal mine development project. The results of operations of Excel are included in our Australian Mining Operations segment from October 2006. The acquisition was accounted for as a purchase in accordance with SFAS No. 141, Business Combinations (see Note 4 of our consolidated financial statements for additional information on the Excel acquisition).

Contractual Obligations

The following is a summary of our contractual obligations as of December 31, 2006:

	Payments Due By Year							
	Within 1 Year	2-3 Years	4-5 Years	After 5 Years				
		(Dollars in	thousands)					
Long-term debt obligations (principal and interest)	\$ 303,849	\$ 481,974	\$ 859,965	\$4,323,807				
Capital lease obligations (principal and interest)	11,335	21,806	15,686	23,428				
Operating leases obligations	102,256	152,264	101,386	168,076				
Unconditional purchase obligations ⁽¹⁾	125,791							
Coal reserve lease and royalty obligations	216,996	344,407	25,459	46,611				
Other long-term liabilities ⁽²⁾	170,716	337,809	396,113	1,362,711				
Total contractual cash obligations	\$930,943	\$ 1,338,260	\$ 1,398,609	\$ 5,924,633				

- (1) We have purchase agreements with approved vendors for most types of operating expenses. However, our specific open purchase orders (which have not been recognized as a liability) under these purchase agreements, combined with any other open purchase orders, are not material. The commitments in the table above relate to significant capital purchases.
- (2) Represents long-term liabilities relating to our postretirement benefit plans, work-related injuries and illnesses, defined benefit pension plans and mine reclamation and end of mine closure costs.

As of December 31, 2006, we had \$125.8 million of purchase obligations for capital expenditures and \$479.8 million of obligations related to federal coal reserve lease payments due over the next three years. Total capital expenditures for 2007 are expected to range from \$450 million to \$525 million, excluding federal coal reserve lease payments, and relate to replacement, improvement, or expansion of existing mines, particularly in Australia, Appalachia and the Midwest, and growth initiatives such as increasing capacity in the Powder River Basin. Approximately \$10 million of the expenditures relate to safety equipment that will be utilized to comply with recently issued federal and state regulations. Capital expenditures were funded primarily through operating cash flow. Despite the acquisition of three development stage mines in 2006, we will exercise capital discipline in 2007, limiting capital expenditures to 2006 levels.

Our subsidiary, Peabody Pacific, has committed to pay up to a maximum of A\$0.20/tonne (approximately US\$0.15/tonne) of coal sales for a period of five years to the Australian COAL21 Fund. The COAL21 Fund is a voluntary coal industry fund to support clean coal technology demonstration projects and research in Australia. All major coal companies in Australia have committed to this fund. The commitment to pay starts on April 1, 2007 with a levy of A\$0.10/tonne of coal sales. This levy is expected to rise to A\$0.20/tonne on July 1, 2007.

Off-Balance Sheet Arrangements

In the normal course of business, we are a party to certain off-balance sheet arrangements. These arrangements include guarantees, indemnifications, financial instruments with off-balance sheet risk, such

79

Table of Contents

as bank letters of credit and performance or surety bonds and our accounts receivable securitization. Liabilities related to these arrangements are not reflected in our consolidated balance sheets, and we do not expect any material adverse effects on our financial condition, results of operations or cash flows to result from these off-balance sheet arrangements.

We use a combination of surety bonds, corporate guarantees (i.e. self bonds) and letters of credit to secure our financial obligations for reclamation, workers compensation, postretirement benefits and coal lease obligations as follows as of December 31, 2006:

	 clamation oligations	Lease igations	Com	orkers pensation ligations Dollars in n	Hea Obl	etiree althcare igations	0	ther ⁽¹⁾	7	Γotal
Self Bonding	\$ 685.3	\$	\$		\$		\$	2.9	\$	688.2
Surety Bonds	441.5	83.9		31.7				27.2		584.3
Letters of Credit	4.1	20.3		156.8		119.4		208.8		509.4
	\$ 1,130.9	\$ 104.2	\$	188.5	\$	119.4	\$	238.9	\$ 1	,781.9

(1) Includes financial guarantees primarily related to joint venture debt, the Pension Benefit Guarantee Corporation and collateral for surety companies.

As part of arrangements through which we obtain exclusive sales representation agreements with small coal mining companies (the Counterparties), we issued financial guarantees on behalf of the Counterparties. These guarantees facilitate the Counterparties efforts to obtain bonding or financing. In July 2006, we issued \$5.2 million of financial guarantees, expiring at various dates through July 2013, on behalf of a small coal producer to facilitate its efforts in obtaining financing. In the event of default, we have multiple recourse options, including the ability to assume the loans and procure title and use of the equipment purchased through the loans. If default occurs, we have the ability and intent to exercise our recourse options, so the liability associated with the guarantee has been valued at zero. We have also guaranteed bonding for a partnership in which we formerly held an interest. The aggregate amount guaranteed for all such Counterparties was \$12.1 million, and the fair value of the guarantees recognized as a liability was \$0.4 million as of December 31, 2006. Our obligations under the guarantees extend to September 2015. In March 2006, we issued a guarantee for certain equipment lease arrangements on behalf of one of the sales representation parties with maximum potential future payments totaling \$2.7 million at December 31, 2006, and with lease terms that extend to April 2010. See Note 21 to our consolidated financial statements included in this report for a discussion of our guarantees.

Under our accounts receivable securitization program, undivided interests in a pool of eligible trade receivables contributed to our wholly-owned, bankruptcy-remote subsidiary are sold, without recourse, to a multi-seller, asset-backed commercial paper conduit (Conduit). Purchases by the Conduit are financed with the sale of highly rated commercial paper. We utilize proceeds from the sale of our accounts receivable as an alternative to other forms of debt, effectively reducing our overall borrowing costs. The funding cost of the securitization program was \$1.9 million and \$2.5 million for the years ended December 31, 2006 and 2005, respectively. The securitization program is scheduled to expire in September 2009. The securitization transactions have been recorded as sales, with those accounts receivable sold to the Conduit removed from the consolidated balance sheets. The amount of undivided interests in accounts receivable sold to the Conduit was \$219.2 million and \$225.0 million as of December 31, 2006 and 2005 (see Note 6 to our consolidated financial statements for additional information on accounts receivable securitization).

Table of Contents

The following is a summary of specified types of commercial commitments available to us as of December 31, 2006:

Expiration Per Year

	Total Amounts Committed	Within 1 Year	2-3 Years	4-5 Years	Over 5 Years
		(Doll	ars in thousar	nds)	
Lines of credit and/ or standby letters of	\$ 1,800,000	\$	\$	\$1,800,000	\$

Newly Adopted Accounting Pronouncements

We adopted Emerging Issues Task Force (EITF) Issue No. 04-6, Accounting for Stripping Costs in the Mining Industry (EITF Issue No. 04-6) on January 1, 2006 and utilized the cumulative effect adjustment approach whereby a cumulative effect adjustment reduced retained earnings by \$150.3 million, net of tax. EITF Issue No. 04-6 states—that stripping costs incurred during the production phase of a mine are variable production costs that should be included in the costs of the inventory produced during the period that the stripping costs are incurred. Advance stripping costs include those costs necessary to remove overburden above an unmined coal seam as part of the surface mining process and prior to the adoption were included as the work-in-process—component of Inventories—in the consolidated balance sheet. EITF Issue No. 04-6 and its interpretations require stripping costs incurred during a period to be attributed only to the inventory costs of the coal that is extracted during that same period, and therefore, advance stripping costs are no longer separately classified as a component of inventory.

On January 1, 2006, we adopted SFAS No. 123 (revised 2004), Share-Based Payment (SFAS No. 123(R)), which is a revision of SFAS No. 123, Accounting for Stock-Based Compensation (SFAS No. 123). SFAS No. 123(R) supersedes Accounting Principles Board (APB) Opinion No. 25, Accounting for Stock Issued to Employees (APB Opinion No. 25) and amends SFAS No. 95, Statement of Cash Flows. Prior to January 1, 2006, we applied APB Opinion No. 25 and related interpretations in accounting for our stock option plans, as permitted under SFAS No. 123 and SFAS No. 148 Accounting for Stock-Based Compensation-Transition and Disclosure. We applied SFAS No. 123(R) through use of the modified prospective method, in which compensation cost is recognized beginning with the effective date (a) based on the requirements of SFAS No. 123(R) for all share-based payments granted or modified after the effective date and (b) based on the requirements of SFAS No. 123 for all awards granted to employees prior to the effective date of SFAS No. 123(R) that remain unvested on the effective date. SFAS No. 123(R) requires all share-based payments to employees, including grants of employee stock options, to be recognized in the income statement based on their fair values at the grant date. SFAS No. 123(R) also requires that the excess income tax benefits from stock options exercised be recorded as financing cash inflow on the statements of cash flows. The excess income tax benefit from stock option exercises during 2005 and 2004 are included in operating cash flows, netted in deferred tax activity.

For share-based payment instruments excluding restricted stock, we recognized \$17.7 million (or \$0.07 per diluted share), \$24.8 million (or \$0.09 per diluted share) and \$12.8 million (or \$0.05 per diluted share) of expense, net of taxes, for the years ended December 31, 2006, 2005 and 2004, respectively. As a result of adopting SFAS No. 123(R), our net income for the year ended December 31, 2006 was \$4.4 million (or \$0.02 per diluted share) lower than if we had continued to account for share-based compensation under APB Opinion No. 25. Share-based compensation expense is recorded in Selling and administrative expenses in the consolidated statements of operations. We used the Black-Scholes option pricing model to determine the fair value of stock options and employee stock purchase plan share-based payments made before and after the adoption of SFAS No. 123(R). We began utilizing restricted stock as part of our equity-based compensation strategy in January 2005. Accounting for restricted stock awards was not changed by the adoption of SFAS No. 123(R). As of December 31, 2006, the total unrecognized compensation cost

related to nonvested awards was \$24.0 million, net of taxes, which is expected to be

81

Table of Contents

recognized over 5.0 years with a weighted-average period of 1.3 years. See Note 18 to our consolidated financial statements for further discussion of our share-based compensation plans.

In September 2006, the Financial Accounting Standards Board (FASB) issued SFAS No. 158, Employers Accounting for Defined Benefit Pension and Other Postretirement Plans (SFAS No. 158). For fiscal years ending after December 15, 2006, SFAS No. 158 requires recognition of the funded status of pension and other postretirement benefit plans (an asset for overfunded status or a liability for underfunded status) in a company s balance sheet. In addition, the standard requires recognition of actuarial gains and losses, prior service cost, and any remaining transition amounts from the initial application of SFAS No. 87, Employers Accounting for Pensions (SFAS No. 87) and SFAS No. 106, Employers Accounting for Postretirement Benefits Other Than Pensions (SFAS No. 106) when determining a plan s funded status, with a corresponding charge to accumulated other comprehensive income (loss).

We adopted SFAS No. 158 on December 31, 2006, and as a result, recorded a noncurrent liability of \$376.1 million, which reflected the total underfunded status of the pension, retiree healthcare and workers compensation plans. The funded status of each plan was measured as the difference between the fair value of the assets and the projected benefit obligation (the funded status). SFAS No. 158 did not impact net income. The impact to the balance sheet was as follows (see Notes 14, 15, and 16 to our consolidated financial statements for additional details):

	Before Application of SFAS No. 158	Adjustments	After Application of SFAS No. 158
		(Dollars in thousands)	
Workers compensation obligations	\$ 237,965	\$ (4,558)	\$ 233,407
Accrued postretirement benefit costs	973,164	395,522	1,368,686
Other noncurrent liabilities (includes long-term pension and UMWA Combined			
Fund liabilities)	375,485	(14,855)	360,630
Deferred income taxes (long-term			
liability)	344,712	(149,499)	195,213
Total liabilities	6,915,583	226,610	7,142,193
Accumulated other comprehensive loss	(22,448)	(226,610)	(249,058)
Total stockholders equity	2,565,136	(226,610)	2,338,526

Accounting Pronouncements Not Yet Implemented

In June 2006, the FASB issued FIN No. 48. This interpretation prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. FIN No. 48 also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure and transition. This interpretation is effective for fiscal years beginning after December 15, 2006 (January 1, 2007 for the Company). Any adjustments required upon the adoption of this interpretation must be recorded directly to retained earnings in the year of adoption and reported as a change in accounting principle. We expect the adoption of FIN No. 48 will not have a material impact on our financial position.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk.

The potential for changes in the market value of our coal trading, interest rate and currency portfolios is referred to as market risk. Market risk related to our coal trading portfolio is evaluated using a value at risk analysis (described below). Value at risk analysis is not used to evaluate our non-trading interest rate and currency portfolios. A description of each market risk category is set forth below. We attempt to manage market risks through diversification, controlling position sizes, and executing hedging strategies. Due to lack of quoted market prices and the long term, illiquid nature of the positions, we have not quantified market risk related to our non-trading, long-term

82

Coal Trading Activities and Related Commodity Price Risk

We engage in over-the-counter and direct trading of coal. These activities give rise to commodity price risk, which represents the potential loss that can be caused by an adverse change in the market value of a particular commitment. We actively measure, monitor and adjust traded position levels to remain within risk limits prescribed by management. For example, we have policies in place that limit the amount of total exposure, in value at risk terms, that we may assume at any point in time.

We account for coal trading using the fair value method, which requires us to reflect financial instruments with third parties, such as forwards, options and swaps, at market value in our consolidated financial statements. Our trading portfolio included forwards and swaps as of December 31, 2006 and forwards as of December 31, 2005.

We perform a value at risk analysis on our coal trading portfolio, which includes over-the-counter and brokerage trading of coal. The use of value at risk allows us to quantify in dollars, on a daily basis, the price risk inherent in our trading portfolio. Value at risk represents the potential loss in value of our mark-to-market portfolio due to adverse market movements over a defined time horizon (liquidation period) within a specified confidence level. Our value at risk model is based on the industry standard variance/co-variance approach. This captures our exposure related to both option and forward positions. Our value at risk model assumes a 15-day holding period and a 95% one-tailed confidence interval. This means that there is a one in 20 statistical chance that the portfolio would lose more than the value at risk estimates during the liquidation period.

The use of value at risk allows management to aggregate pricing risks across products in the portfolio, compare risk on a consistent basis and identify the drivers of risk. Due to the subjectivity in the choice of the liquidation period, reliance on historical data to calibrate the models and the inherent limitations in the value at risk methodology, we perform regular stress and scenario analysis to estimate the impacts of market changes on the value of the portfolio. Additionally, back-testing is regularly performed to monitor the effectiveness of our value at risk measure. The results of these analyses are used to supplement the value at risk methodology and identify additional market-related risks.

We use historical data to estimate our value at risk and to better reflect current asset and liability volatilities. Given our reliance on historical data, value at risk is effective in estimating risk exposures in markets in which there are not sudden fundamental changes or shifts in market conditions. An inherent limitation of value at risk is that past changes in market risk factors may not produce accurate predictions of future market risk. Value at risk should be evaluated in light of this limitation.

During the year ended December 31, 2006, the actual low, high, and average values at risk for our coal trading portfolio were \$0.7 million, \$2.7 million, and \$1.4 million, respectively. As of December 31, 2006, the timing of the estimated future realization of the value of our trading portfolio was as follows:

Year of Expiration	Percentage of Portfolio
2007	41%
2008	39%
2009	15%
2010	5%
	100%

We also monitor other types of risk associated with our coal trading activities, including credit, market liquidity and counterparty nonperformance.

Credit Risk

Our concentration of credit risk is substantially with energy producers and marketers and electric utilities. Our policy is to independently evaluate each customer s creditworthiness prior to entering into

Table of Contents

transactions and to constantly monitor the credit extended. In the event that we engage in a transaction with a counterparty that does not meet our credit standards, we will protect our position by requiring the counterparty to provide appropriate credit enhancement. When appropriate (as determined by our credit management function), we have taken steps to reduce our credit exposure to customers or counterparties whose credit has deteriorated and who may pose a higher risk of failure to perform under their contractual obligations. These steps include obtaining letters of credit or cash collateral, requiring prepayments for shipments or the creation of customer trust accounts held for our benefit to serve as collateral in the event of a failure to pay. To reduce our credit exposure related to trading and brokerage activities, we seek to enter into netting agreements with counterparties that permit us to offset receivables and payables with such counterparties. Counterparty risk with respect to interest rate swap and foreign currency forwards and options transactions is not considered to be significant based upon the creditworthiness of the participating financial institutions.

Foreign Currency Risk

We utilize currency forwards to hedge currency risk associated with anticipated Australian dollar expenditures. Our currency hedging program for 2007 targets hedging approximately 70% of our anticipated, non-capital Australian dollar-denominated expenditures. As of December 31, 2006, we had in place forward contracts designated as cash flow hedges with notional amounts outstanding totaling A\$1.35 billion of which A\$764.2 million, A\$359.7 million, A\$196.7 million and A\$28.8 million will expire in 2007, 2008, 2009, and 2010, respectively. The accounting for these derivatives is discussed in Note 2 to our consolidated financial statements. Our current expectation for 2007 non-capital, Australian dollar-denominated cash expenditures is approximately \$1.37 billion. An increase or decrease in the Australian dollar/ U.S. dollar exchange rate of US\$0.01 (ignoring the effects of hedging) would result in an increase or decrease, respectively, in our Operating costs and expenses of \$13.7 million per year.

Interest Rate Risk

Our objectives in managing exposure to interest rate changes are to limit the impact of interest rate changes on earnings and cash flows and to lower overall borrowing costs. To achieve these objectives, we manage fixed-rate debt as a percent of net debt through the use of various hedging instruments, which are discussed in detail in Note 12 to our consolidated financial statements. As of December 31, 2006, after taking into consideration the effects of interest rate swaps, we had \$2.61 billion of fixed-rate borrowings and \$649.3 million of variable-rate borrowings outstanding. A one percentage point increase in interest rates would result in an annualized increase to interest expense of \$6.5 million on our variable-rate borrowings. With respect to our fixed-rate borrowings, a one percentage point increase in interest rates would result in a \$0.2 million decrease in the estimated fair value of these borrowings.

Other Non-trading Activities

We manage our commodity price risk for our non-trading, long-term coal contract portfolio through the use of long-term coal supply agreements, rather than through the use of derivative instruments. We sold 90% of our sales volume under long-term coal supply agreements during 2006 and 2005. As of December 31, 2006, we had 5 to 15 million tons of expected U.S. production unpriced for 2007. We had 14 million tons remaining to be priced in Australia at December 31, 2006. We have approximately 70 to 80 million tons of expected U.S. production unpriced for 2008, with an additional 20 to 22 million tons of expected Australia coal production.

Some of the products used in our mining activities, such as diesel fuel and explosives, are subject to commodity price risk. To manage this risk, we use a combination of forward contracts with our suppliers and financial derivative contracts, primarily swap contracts with financial institutions. As of December 31, 2006, we had derivative contracts outstanding that are designated as cash flow hedges of anticipated purchases of fuel and explosives.

84

Table of Contents

Notional amounts outstanding under fuel-related, derivative swap contracts were 11.6 million gallons of heating oil scheduled to expire through 2007 and 83.2 million gallons of crude oil scheduled to expire through 2009. At December 31, 2006, we had outstanding option contracts designated as a collar of crude oil prices with notional amounts of 43.1 million gallons, expiring through 2007. We expect to consume 100 to 105 million gallons of fuel next year. On a per gallon basis, based on this usage, a change in fuel prices of one cent per gallon (ignoring the effects of hedging) would result in an increase or decrease in our operating costs of approximately \$1 million per year. Alternatively, a one dollar per barrel change in the price of crude oil would increase or decrease our annual fuel costs (ignoring the effects of hedging) by approximately \$2.4 million.

Notional amounts outstanding under explosives-related swap contracts, scheduled to expire through 2009, were 5.7 mmbtu of natural gas. We expect to consume 315,000 to 325,000 tons of explosives per year. Through our natural gas hedge contracts, we have fixed prices for approximately 46% of our anticipated explosives requirements for 2007. Based on our expected usage, a change in natural gas prices of ten cents per mmbtu (ignoring the effects of hedging) would result in an increase or decrease in our operating costs of approximately \$0.6 million per year.

Item 8. Financial Statements and Supplementary Data.

See Part IV, Item 15 of this report for information required by this Item.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure.

None.

Item 9A. Controls and Procedures.

Evaluation of Disclosure Controls and Procedures

As of the end of the period covered by this Annual Report on Form 10-K, we carried out an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures. Based upon that evaluation, the Chief Executive Officer and the Chief Financial Officer concluded that our disclosure controls and procedures were effective in timely alerting them to material information relating to our company and its consolidated subsidiaries required to be included in our periodic SEC filings.

Changes in Internal Control Over Financial Reporting

There were no changes in our internal control over financial reporting identified during the last fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Management s Report on Internal Control Over Financial Reporting

Management is responsible for maintaining and establishing adequate internal control over financial reporting. Our internal control framework and processes were designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of our consolidated financial statements for external purposes in accordance with U.S. generally accepted accounting principles.

Because of inherent limitations, any system of internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management conducted an assessment of the effectiveness of our internal control over financial reporting using the criteria set by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in *Internal Control Integrated Framework*. Based on this assessment,

85

Table of Contents

management concluded that the Company s internal control over financial reporting was effective as of December 31, 2006

Management s assessment of internal control over financial reporting excludes the operations of Excel Coal Limited acquired during 2006, as allowed by SEC guidance related to internal controls of recently acquired entities. These operations constituted \$2.34 billion and \$1.58 billion of total and net assets, respectively; and \$105.1 million and \$8.4 million of revenues and operating profits, respectively; and such amounts are included in our consolidated financial statements as of and for the year ended December 31, 2006. Management did not assess the effectiveness of internal control over financial reporting at these operations because we continue to integrate these operations into our control environment, thus making it impractical to complete an assessment by December 31, 2006.

Our Independent Registered Public Accounting Firm, Ernst & Young LLP, has audited this assessment of our internal control over financial reporting, as stated in their attestation report included herein.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Stockholders

Peabody Energy Corporation

We have audited management s assessment, included in the accompanying Management s Report on Internal Controls, that Peabody Energy Corporation maintained effective internal control over financial reporting as of December 31, 2006, based on criteria established in Internal Control Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). Peabody Energy Corporation s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting. Our responsibility is to express an opinion on management s assessment and an opinion on the effectiveness of the Company s internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, evaluating management s assessment, testing and evaluating the design and operating effectiveness of internal control, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company s internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company s internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company s assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

As indicated in the accompanying Management s Report on Internal Control Over Financial Reporting, management s assessment of and conclusion on the effectiveness of internal control over financial reporting did not include the internal controls over Excel Coal Limited acquired in 2006, which is included in the December 31, 2006, consolidated financial statements of Peabody Energy Corporation and constituted \$2.34 billion and \$1.58 billion of total and net assets, respectively, as of December 31, 2006, and \$105.1 million and \$8.4 million of revenues and operating profits, respectively, for the year then ended. Our audit of internal control over financial reporting of Peabody Energy Corporation also did not include an evaluation of the internal control over financial reporting of Excel Coal Limited.

In our opinion, management s assessment that Peabody Energy Corporation maintained effective internal control over financial reporting as of December 31, 2006, is fairly stated, in all material respects, based on the COSO criteria. Also, in our opinion, Peabody Energy Corporation maintained, in all material respects, effective internal control over financial reporting as of December 31, 2006, based on the COSO criteria.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Peabody Energy Corporation as of

87

Table of Contents

December 31, 2006 and 2005, and the related consolidated statements of operations, changes in stockholders equity, and cash flows for each of the three years in the period ended December 31, 2006, and our report dated February 20, 2007, expressed an unqualified opinion thereon.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Stockholders

Peabody Energy Corporation

We have audited the accompanying consolidated balance sheets of Peabody Energy Corporation as of December 31, 2006 and 2005, and the related consolidated statements of operations, changes in stockholders equity, and cash flows for each of the three years in the period ended December 31, 2006. These financial statements are the responsibility of the Company s management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Peabody Energy Corporation at December 31, 2006 and 2005, and the consolidated results of its operations and its cash flows for each of the three years in the period ended December 31, 2006, in conformity with U.S. generally accepted accounting principles.

As discussed in Note 1 to the consolidated financial statements, on January 1, 2006, the Company changed its method of accounting for stripping costs and share-based payments, and on December 31, 2006, the Company changed its method of accounting for defined pension benefit and other postretirement plans.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the effectiveness of Peabody Energy Corporation s internal control over financial reporting as of December 31, 2006, based on criteria established in Internal Control Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission, and our report dated February 20, 2007, expressed an unqualified opinion thereon.

PEABODY ENERGY CORPORATION NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(1) Summary of Significant Accounting Policies

Basis of Presentation

The consolidated financial statements include the accounts of Peabody Energy Corporation (the Company) and its affiliates. All intercompany transactions, profits and balances have been eliminated in consolidation.

Description of Business

The Company is engaged in the mining of steam coal for sale primarily to electric utilities and metallurgical coal for sale to industrial customers. The Company s mining operations are located in the United States and Australia, and include an equity interest in mining operations in Venezuela. In addition to the Company s mining operations, the Company markets, brokers and trades coal. The Company s other energy related commercial activities include the development of mine-mouth coal-fueled generating plants, the management of its vast coal reserve and real estate holdings, coalbed methane production and Btu conversion technologies. The Company s Btu conversion projects are designed to expand the uses of coal through various technologies such as coal-to-liquids and coal gasification.

New Accounting Pronouncements

In September 2006, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standard (SFAS) No. 158, Employers Accounting for Defined Benefit Pension and Other Postretirement Plans (SFAS No. 158). For fiscal years ending after December 15, 2006, SFAS No. 158 requires recognition of the funded status of pension and other postretirement benefit plans (an asset for overfunded status or a liability for underfunded status) in a company s balance sheet. In addition, the standard requires recognition of actuarial gains and losses, prior service cost, and any remaining transition amounts from the initial application of SFAS No. 87, Employers Accounting for Pensions (SFAS No. 87) and SFAS No. 106, Employers Accounting for Postretirement Benefits Other Than Pensions (SFAS No. 106) when determining a plan s funded status, with a corresponding charge to accumulated other comprehensive income (loss).

The Company adopted SFAS No. 158 on December 31, 2006, and as a result, recorded a noncurrent liability of \$376.1 million, which reflected the net underfunded status of the pension, retiree healthcare and workers compensation plans. The funded status of each plan was measured as the difference between the fair value of the assets and the projected benefit obligation (the funded status). SFAS No. 158 did not impact net income. The impact to the balance sheet was as follows (see Notes 14, 15, and 16 for additional details):

	Before Application of SFAS No. 158 Adjustments				After Application of SFAS No. 158		
		(Do	llars	in thousand	ls)		
Workers compensation obligations	\$	237,965	\$	(4,558)	\$	233,407	
Accrued postretirement benefit costs		973,164		395,522		1,368,686	
Other noncurrent liabilities (includes long-term							
pension and UMWA Combined Fund liabilities)		375,485		(14,855)		360,630	
Deferred income taxes (long-term liability)		344,712		(149,499)		195,213	
Total liabilities		6,915,583		226,610		7,142,193	
Accumulated other comprehensive loss		(22,448)		(226,610)		(249,058)	
Total stockholders equity		2,565,136		(226,610)		2,338,526

Table of Contents

PEABODY ENERGY CORPORATION NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

In June 2006, the FASB issued Interpretation No. 48, Accounting for Uncertainty in Income Taxes an interpretation of FASB Statement No. 109 (FIN No. 48). This interpretation prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. FIN No. 48 also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure and transition. This interpretation is effective for fiscal years beginning after December 15, 2006 (January 1, 2007 for the Company). Any adjustments required upon the adoption of this interpretation must be recorded directly to retained earnings in the year of adoption and reported as a change in accounting principle. The Company expects the adoption of FIN No. 48 will not have a material impact on its results of operations or financial position.

In March 2005, the Emerging Issues Task Force (EITF) issued EITF Issue No. 04-6, Accounting for Stripping Costs in the Mining Industry (EITF Issue No. 04-6). EITF Issue No. 04-6 and its interpretations require stripping costs incurred during a period to be attributed only to the inventory costs of the coal that is extracted during that same period. The Company adopted EITF Issue No. 04-6 on January 1, 2006 and utilized the cumulative effect adjustment approach whereby the cumulative effect adjustment reduced retained earnings by \$150.3 million, net of tax. This non-cash item is excluded from the consolidated statements of cash flows. Advance stripping costs are primarily expensed as incurred.

In December 2004, the FASB issued SFAS No. 123 (revised 2004), Share-Based Payment (SFAS No. 123(R)), which is a revision of SFAS No. 123, Accounting for Stock-Based Compensation (SFAS No. 123). SFAS No. 123(R) supersedes APB Opinion No. 25, Accounting for Stock Issued to Employees (APB Opinion No. 25) and amends FASB Statement No. 95, Statement of Cash Flows. Generally, the approach in SFAS No. 123(R) is similar to the approach described in SFAS No. 123. However, SFAS No. 123(R) requires all share-based payments to employees, including employee stock options, to be recognized in the income statement based on their fair values at the grant date.

The Company adopted SFAS No. 123(R) on January 1, 2006 and used the modified prospective method, in which compensation cost is recognized beginning with the effective date (a) based on the requirements of SFAS No. 123(R) for all share-based payments granted or modified after the effective date and (b) based on the requirements of SFAS No. 123 for all awards granted to employees prior to the effective date of SFAS No. 123(R) that remain unvested on the effective date. Prior to January 1, 2006, the Company had elected to apply APB Opinion No. 25 and related interpretations in accounting for its stock option plans, as permitted under SFAS No. 123 and SFAS No. 148 Accounting for Stock-Based Compensation-Transition and Disclosure. Beginning in 2006, SFAS No. 123(R) also requires that excess income tax benefits from stock options exercised be recorded as financing cash inflow on the statements of cash flows. The excess income tax benefit from stock option exercises during 2005 and 2004 is included in operating cash flows, netted in deferred tax activity.

Sales

The Company s revenue from coal sales is realized and earned when risk of loss passes to the customer. Coal sales are made to the Company s customers under the terms of coal supply agreements, most of which are long-term (greater than one year). Under the typical terms of these coal supply agreements, title and risk of loss transfer to the customer at the mine or port, where coal is loaded to the rail, barge, ocean-going vessel, truck or other transportation source(s) that serves each of the Company s mines. The Company incurs certain add-on taxes and fees on coal sales. Coal sales are reported including taxes and fees charged by various federal and state governmental bodies.

PEABODY ENERGY CORPORATION NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Other Revenues

Other revenues include royalties related to coal lease agreements, sales agency commissions, farm income, coalbed methane revenues, property and facility rentals, generation development activities, net revenues from coal trading activities accounted for under SFAS No. 133, Accounting for Derivative Instruments and Hedging Activities (SFAS No. 133), as amended, and contract termination or restructuring payments. Royalty income generally results from the lease or sublease of mineral rights to third parties, with payments based upon a percentage of the selling price or an amount per ton of coal produced. Certain agreements require minimum annual lease payments regardless of the extent to which minerals are produced from the leasehold. The terms of these agreements generally range from specified periods of five to 15 years, or can be for an unspecified period until all reserves are depleted.

Discontinued Operations

The Company classifies items within discontinued operations in the consolidated statements of operations when the operations and cash flows of a particular component (defined as operations and cash flows that can be clearly distinguished, operationally and for financial reporting purposes, from the rest of the entity) of the Company have been (or will be) eliminated from the ongoing operations of the Company as a result of a disposal transaction, and the Company will no longer have any significant continuing involvement in the operations of that component. Discontinued operations for the year ended December 31, 2004, reflected a \$2.8 million loss, net of taxes, related to the Company s former Citizens Power subsidiary.

Cash and Cash Equivalents

Cash and cash equivalents are stated at cost, which approximates fair value. Cash equivalents consist of highly liquid investments with original maturities of three months or less.

Inventories

Materials and supplies and coal inventory are valued at the lower of average cost or market. Raw coal represents coal stockpiles that may be sold in current condition or may be further processed prior to shipment to a customer. Coal inventory costs include labor, supplies, equipment, operating overhead and other related costs. Prior to the adoption of EITF Issue No. 04-6, advance stripping consisted of the costs to remove overburden above an unmined coal seam as part of the surface mining process. As a result of the adoption of EITF Issue No. 04-6 on January 1, 2006, advance stripping costs are primarily expensed as incurred.

Assets and Liabilities from Coal Trading Activities

The Company s coal trading activities are evaluated under SFAS No. 133, as amended. Trading contracts that meet the SFAS No. 133 definition of a derivative are accounted for at fair value, while contracts that do not qualify as derivatives are accounted for under the accrual method. All trading contracts are recorded subject to the requirements of EITF Issue No. 02-3, Issues Involved in Accounting for Derivative Contracts Held for Trading Purposes and Contracts Involved in Energy Trading and Risk Management Activities (EITF Issue No. 02-3).

The Company s trading contracts are reflected at fair value and are included in Assets and liabilities from coal trading activities in the consolidated balance sheets as of December 31, 2006 and 2005. Under EITF Issue No. 02-3, all mark-to-market gains and losses on energy trading contracts (including derivatives and hedged contracts) are presented on a net basis in the statement of operations, even if

F-8

Table of Contents

PEABODY ENERGY CORPORATION NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

settled physically. The Company s consolidated statements of operations reflect revenues related to all mark-to-market trading contracts on a net basis in Other revenues.

Property, Plant, Equipment and Mine Development

Property, plant, equipment and mine development are recorded at cost. Interest costs applicable to major asset additions are capitalized during the construction period, including \$3.0 million, \$0.1 million and \$0.2 million for the years ended December 31, 2006, 2005 and 2004, respectively.

Expenditures which extend the useful lives of existing plant and equipment assets are capitalized. Maintenance and repairs are charged to operating costs as incurred. Costs incurred to develop coal mines or to expand the capacity of operating mines are capitalized. Costs incurred to maintain current production capacity at a mine and exploration expenditures are charged to operating costs as incurred. Costs to acquire computer hardware and the development and/or purchase of software for internal use are capitalized and depreciated over the estimated useful lives.

Coal reserves are recorded at cost, or at fair value in the case of acquired businesses. As of December 31, 2006 and 2005, the net book value of coal reserves totaled \$5.2 billion and \$3.7 billion, respectively. These amounts included \$2.1 billion and \$1.8 billion at December 31, 2006 and 2005, respectively, attributable to properties where the Company was not currently engaged in mining operations or leasing to third parties and, therefore, the coal reserves were not currently being depleted. Included in the book value of coal reserves are mineral rights for leased coal interests including advance royalties and the net book value of these mineral rights was \$3.5 billion and \$2.1 billion at December 31, 2006 and 2005, respectively.

Depletion of coal reserves and amortization of advance royalties is computed using the units-of-production method utilizing only proven and probable reserves in the depletion base. Mine development costs are principally amortized over the estimated lives of the mines using the straight-line method.

Depreciation of plant and equipment (excluding life of mine assets) is computed using the straight-line method over the estimated useful lives as follows:

Years

Building and improvements Machinery and equipment Leasehold improvements 10 to 30 3 to 30 Life of Lease

In addition, certain plant and equipment assets associated with mining are depreciated using the straight-line method over the estimated life of the mine, which varies from one to 33 years.

Goodwill and Intangible Assets

Assets and liabilities acquired in business combinations are accounted for using the purchase method and recorded at their respective fair values. Substantially all goodwill is assigned to the reporting unit that acquires a business. A reporting unit is an operating segment as defined in SFAS No. 131, Disclosures about Segments of an Enterprise and Related Information, or a business one level below an operating segment if discrete financial information is prepared and regularly reviewed by the segment manager. The Company conducts a formal impairment test of goodwill on an annual basis and between annual tests if an event occurs or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying value. Under the impairment test, if a reporting unit s carrying amount exceeds its estimated fair value, a goodwill impairment is recognized to the extent that the reporting unit s carrying amount of goodwill exceeds the implied fair value of the goodwill.

F-9

Table of Contents

PEABODY ENERGY CORPORATION NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

All of the Company s intangibles (other than goodwill) are subject to amortization. Intangibles consist of contractual obligations and are amortized based on tons sold. These intangibles are also subject to evaluation for potential impairment if an event occurs or circumstances change that indicate the carrying amount may not be recoverable.

Investments in Joint Ventures

The Company accounts for its investments in less than majority owned corporate joint ventures under either the equity or cost method. The Company applies the equity method to investments in joint ventures when it has the ability to exercise significant influence over the operating and financial policies of the joint venture. Investments accounted for under the equity method are initially recorded at cost, and any difference between the cost of the Company s investment and the underlying equity in the net assets of the joint venture at the investment date is amortized over the lives of the related assets that gave rise to the difference. The Company s pro rata share of earnings from joint ventures and basis difference amortization is reported in the consolidated statements of operations in Income from equity affiliates. The book value of the Company s equity method investments as of December 31, 2006 and 2005 was \$65.5 million and \$97.2 million, respectively, and is reported in Investments and other assets in the consolidated balance sheets. Included in the Company s equity method investments was its 25.5% interest in Carbones del Guasare, which owns and operates the Paso Diablo Mine in Venezuela. The Company s investment in Paso Diablo was \$60.1 million and \$50.3 million as of December 31, 2006 and 2005, respectively. The Company recorded income from this equity affiliate of \$28.0 million, \$20.0 million and \$1.2 million for the years ended December 31, 2006, 2005 and 2004, respectively, which is reported in Income from equity affiliates in the consolidated statements of operations.

Generation Development Costs

Development costs related to coal-based electricity generation, including expenditures for permitting and licensing, are capitalized at cost under the guidelines in SFAS No. 142, Goodwill and Other Intangible Assets. Start-up costs, as defined in Statement of Position (SOP) No. 98-5, Reporting on the Costs of Start-up Activities, are expensed as incurred. Development costs of \$21.4 million and \$22.4 million were recorded as part of Investments and other assets in the consolidated balance sheets as of December 31, 2006 and 2005, respectively.

Asset Retirement Obligations

SFAS No. 143, Accounting for Asset Retirement Obligations (SFAS No. 143) addresses financial accounting and reporting for obligations associated with the retirement of tangible long-lived assets and the associated asset retirement costs. The Company s asset retirement obligation (ARO) liabilities primarily consist of spending estimates related to reclaiming surface land and support facilities at both surface and underground mines in accordance with federal and state reclamation laws as defined by each mining permit.

The Company estimates its ARO liabilities for final reclamation and mine closure based upon detailed engineering calculations of the amount and timing of the future cash spending for a third-party to perform the required work. Spending estimates are escalated for inflation and then discounted at the credit-adjusted risk-free rate. The Company records an ARO asset associated with the discounted liability for final reclamation and mine closure. The obligation and corresponding asset are recognized in the period in which the liability is incurred. The ARO asset is amortized on the units-of-production method over its expected life and the ARO liability is accreted to the projected spending date. As changes in estimates occur (such as mine plan revisions, changes in estimated costs or changes in timing of the performance of reclamation activities), the revisions to the obligation and asset are recognized at the appropriate credit-

F-10

Table of Contents

PEABODY ENERGY CORPORATION NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

adjusted risk-free rate. The Company also recognizes an obligation for contemporaneous reclamation liabilities incurred as a result of surface mining. Contemporaneous reclamation consists primarily of grading, topsoil replacement and revegetation of backfilled pit areas.

Environmental Liabilities

Included in Other noncurrent liabilities are accruals for other environmental matters that are recorded in operating expenses when it is probable that a liability has been incurred and the amount of the liability can be reasonably estimated. Accrued liabilities are exclusive of claims against third parties and are not discounted. In general, costs related to environmental remediation are charged to expense.

Income Taxes

Income taxes are accounted for using a balance sheet approach in accordance with SFAS No. 109, Accounting for Income Taxes. The Company accounts for deferred income taxes by applying statutory tax rates in effect at the date of the balance sheet to differences between the book and tax basis of assets and liabilities. A valuation allowance is established if it is more likely than not that the related tax benefits will not be realized. In determining the appropriate valuation allowance, the Company considers projected realization of tax benefits based on expected levels of future taxable income, available tax planning strategies, and the overall deferred tax position.

Postretirement Health Care and Life Insurance Benefits

The Company accounts for postretirement benefits other than pensions in accordance with SFAS No. 106, which requires the costs of benefits to be provided to be accrued over the employees period of active service. These costs are determined on an actuarial basis. As a result of the adoption of SFAS No. 158 on December 31, 2006, the Company s consolidated balance sheet as of December 31, 2006 reflects the funded status of postretirement benefits.

Multi-Employer Benefit Plans

The Company has an obligation to contribute to two plans established by the Coal Industry Retiree Health Benefits Act of 1992 (the Coal Act) the Combined Fund and the 1992 Benefit Plan . A third fund, the 1993 Benefit Fund (the 1993 Benefit Plan), was originally established through collective bargaining, but is now a statutory plan under the terms of the 2006 Tax Relief and Health Care Act. The Combined Fund obligations are accounted for in accordance with EITF Issue No. 92-13, Accounting for Estimated Payments in Connection with the Coal Industry Retiree Health Benefit Act of 1992, as determined on an actuarial basis. The 1992 Benefit Plan and 1993 Benefit Plan qualify as multi-employer plans under SFAS No. 106 and expense is recognized as contributions are made.

Pension Plans

The Company sponsors non-contributory defined benefit pension plans accounted for in accordance with SFAS No. 87, which requires that the cost to provide the benefits be accrued over the employees period of active service. These costs are determined on an actuarial basis. SFAS No. 158 amended SFAS No. 87 and as a result of the adoption of SFAS No. 158 on December 31, 2006, the Company s consolidated balance sheet as of that date reflects the funded status of the defined benefit pension plans.

The Company also participates in two multi-employer pension plans, the United Mine Workers of America 1950 Pension Plan (the 1950 Plan) and the United Mine Workers of America 1974 Pension Plan (the 1974 Plan). These plans qualify as multi-employer plans under SFAS No. 87 and expense is recognized as contributions are made.

F-11

PEABODY ENERGY CORPORATION NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Postemployment Benefits

The Company provides postemployment benefits to qualifying employees, former employees and dependents and accounts for these benefits on the accrual basis in accordance with SFAS No. 112 Employers Accounting for Postemployment Benefits. Postemployment benefits include workers compensation occupational disease, which is accounted for on the actuarial basis over the employees period of active service; workers compensation traumatic injury claims, which are accounted for based on estimated loss rates applied to payroll and claim reserves determined by independent actuaries and claims administrators; disability income benefits, which are accrued when a claim occurs; and continuation of medical benefits, which are recognized when the obligation occurs. As a result of the adoption of SFAS No. 158 on December 31, 2006, the Company s consolidated balance sheet as of December 31, 2006 reflects the funded status of postemployment benefits.

Derivatives

SFAS No. 133, as amended, requires the recognition at fair value of all derivatives as assets or liabilities on the consolidated balance sheets. Gains or losses from derivative financial instruments designated as fair value hedges are recognized immediately in the consolidated statements of operations, along with the offsetting gain or loss related to the underlying hedged item.

Gains or losses on derivative financial instruments designated as cash flow hedges are recorded as a separate component of stockholders—equity until settlement (or until hedge ineffectiveness is determined), whereby gains or losses are reclassified to the consolidated statements of operations in conjunction with the recognition of the underlying hedged item. To the extent that the periodic changes in the fair value of the derivatives are not effective, or if the hedge ceases to qualify for hedge accounting, the ineffective portion of the periodic non-cash changes are recorded in Operating costs and expenses—in the consolidated statement of operations in the period of the change. The potential for hedge ineffectiveness is only present in the design of the hedge relationship in the Company—s cash flow hedges of anticipated fuel purchases (see Note 2 for additional details).

Use of Estimates in the Preparation of the Consolidated Financial Statements

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

In particular, the Company has significant long-term liabilities relating to retiree health care, work-related injuries and illnesses and defined benefit pension plans. Each of these liabilities is actuarially determined and the Company uses various actuarial assumptions, including the discount rate and future cost trends, to estimate the costs and obligations for these items. In addition, the Company has significant asset retirement obligations that involve estimations of costs to remediate mining lands and the timing of cash outlays for such costs. If these assumptions do not materialize as expected, actual cash expenditures and costs incurred could differ materially from current estimates. Moreover, regulatory changes could increase the obligation to satisfy these or additional obligations.

Finally, in evaluating the valuation allowance related to the Company s deferred tax assets, the Company takes into account various factors, including the expected level of future taxable income and available tax planning strategies. If actual results differ from the assumptions made in the evaluation of the valuation allowance, the Company may record a change in valuation allowance through income tax expense in the period such determination is made.

F-12

PEABODY ENERGY CORPORATION NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Impairment of Long-Lived Assets

The Company records impairment losses on long-lived assets used in operations when events and circumstances indicate that assets might be impaired and the undiscounted cash flows estimated to be generated by those assets under various assumptions are less than the carrying amounts of the assets. Impairment losses are measured by comparing the estimated fair value of the impaired asset to its carrying amount. There were no impairment losses recorded during the periods covered by the consolidated financial statements.

Fair Value of Financial Instruments

SFAS No. 107, Disclosures About Fair Value of Financial Instruments, defines the fair value of a financial instrument as the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale. See Note 22 for additional information.

Foreign Currency Translation

For the Company s foreign subsidiaries where the functional currency is the U.S. dollar, monetary assets and liabilities are translated at year-end exchange rates while non-monetary items are translated at historical rates. Income and expense accounts are translated at the average rates in effect during the year, except for those expenses related to balance sheet amounts that are remeasured at historical exchange rates. The Company has foreign subsidiaries whose functional currency is the U.S. dollar during the years ended December 31, 2006, 2005, and 2004. Gains and losses from foreign currency remeasurement are included in the consolidated statements of operations. The foreign currency remeasurement loss for the year ended December 31, 2006 was \$12.8 million. Gains and losses from foreign currency remeasurement did not have a material impact on the Company s consolidated financial position or results of operations for the years ended December 31, 2005 and 2004.

(2) Risk Management and Derivative Financial Instruments

The Company is exposed to various types of risk in the normal course of business, including fluctuations in commodity prices, interest rates and foreign currency exchange rates. These risks are actively monitored to ensure compliance with the risk management policies of the Company. In most cases, commodity price risk (excluding coal trading activities) related to the sale of coal is mitigated through the use of long-term, fixed-price contracts rather than financial instruments, while commodity price risk related to materials used in production is managed through the use of fixed price and cost plus contracts and derivatives. Interest rate and foreign currency exchange risk are managed through the use of forward contracts, swaps and options. The Company s usage of interest rate swaps is discussed in Note 12.

Trading Activities

The Company performs a value at risk analysis of its trading portfolio, which includes over-the-counter and brokerage trading of coal. The use of value at risk allows management to quantify, in dollars, on a daily basis, the price risk inherent in its trading portfolio. The Company s value at risk model is based on the industry standard variance/co-variance approach. This captures exposure related to both option and forward positions. During the year ended December 31, 2006, the low, high, and average values at risk for the Company s coal trading portfolio were \$0.7 million, \$2.7 million and \$1.4 million, respectively. Further discussion of the Company s coal trading assets and liabilities is included in Note 5.

The Company also monitors other types of risk associated with its coal trading activities, including credit, market liquidity and counterparty nonperformance.

F-13

PEABODY ENERGY CORPORATION NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Commodity Price Risk

In addition to the derivatives related to trading activities, the Company manages its exposure to price volatility of materials used in production, including diesel fuel and explosives, through various contractual arrangements. As of December 31, 2006, the Company had designated derivative contracts as cash flow hedges for 137.9 million gallons of anticipated fuel usage with contract maturities extending through 2009. The consolidated balance sheet at December 31, 2006 reflects unrealized gains on these cash flow hedges of \$12.9 million, which is recorded net of a \$5.2 million tax provision in Accumulated other comprehensive loss (see Note 19).

A measure of ineffectiveness is inherent in hedging future diesel fuel purchases with derivative positions based on crude oil or other mid-distillate commodities. The amount of ineffectiveness in the Company s hedge of physical fuel purchases with heating oil derivatives has historically been insignificant and is expected to remain minimal because the hedged diesel fuel contracts are priced based on the derivative underlying, heating oil, adjusted for a fixed transportation differential. Due to the market volatility of crude oil prices and refining spreads, the measured ineffectiveness in the Company s hedges of physical diesel fuel purchases with crude oil derivatives has historically been greater than for hedging contracts based on heating oil. Due to the implicit market volatility of crude and heating oil prices and refining crack spreads, the Company is unable to predict the amount of ineffectiveness that may occur in future periods, including the loss of hedge accounting (which could be determined on a derivative by derivative basis or in the aggregate), which may result in increased volatility in the Company s future results.

Due to the inherent ineffectiveness that occurs when the price of a derivative contract does not perfectly mirror the value of the hedged instrument or transaction, SFAS No. 133 permits a degree of ineffectiveness within a narrowly defined corridor, provided that critical terms of the hedge contract and the hedged activity are sufficiently matched, including maturity and notional amount, and provided that historical and expected future prices are sufficiently correlated. During 2006, the Company did not recognize any impact due to ineffectiveness of hedging contracts that exceeded the defined corridor stipulated in SFAS No. 133. During 2005, the Company recognized approximately \$0.1 million of lower operating costs and expenses related to the ineffectiveness of its diesel fuel hedges. Hedge ineffectiveness had no effect on results of operations for the year ended December 31, 2004.

The notional amounts outstanding of 137.9 million gallons included derivative swap contracts for 11.6 million gallons of heating oil and 83.2 million gallons of crude oil and collar contracts for 43.1 million gallons of crude oil that were designated as cash flow hedges of future anticipated diesel fuel purchases as of December 31, 2006. The heating oil contracts are used to hedge fuel purchases in the Company s Eastern mining operations, and the crude oil swaps are used to hedge incremental fuel purchases in the Company s Eastern mining operations with any excess over Eastern requirements allocated to Western operations. The crude collar contracts hedge the Company s remaining expected diesel fuel usage in excess of the crude and heating oil derivative swap contracts in the Eastern and Western mining operations.

In addition to the derivatives related to trading activities and diesel fuel, the Company enters contracts to manage its exposure to the price volatility of explosives. As of December 31, 2006, the Company had derivative contracts designated as cash flow hedges with notional amounts outstanding totaling 5.7 million MMBtu of natural gas, with maturities extending through May 2009. The consolidated balance sheet as of December 31, 2006, reflects unrealized losses on these cash flow hedges of \$6.6 million, which is recorded net of a \$2.6 million tax benefit in Accumulated other comprehensive loss (see Note 19). The Company s hedge of explosives with natural gas is perfectly effective by design since the contractual purchase of explosives is fixed to the previous month s closing price for natural gas, which occurs in a constant ratio of MMBtu per ton in the manufacture of explosives, plus a fixed surcharge.

F-14

PEABODY ENERGY CORPORATION NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Credit Risk

The Company s concentration of credit risk is substantially with energy producers and marketers and electric utilities, although it also has exposure to international steel producers, brokerage sources and trading counterparties. The Company s policy is to independently evaluate each customer s creditworthiness prior to entering into transactions and to constantly monitor the credit extended. In the event that the Company engages into a transaction with a counterparty that does not meet its credit standards, the Company may protect its position by requiring the counterparty to provide appropriate credit enhancement.

When appropriate, the Company has taken steps to reduce the Company s credit exposure to customers or counterparties whose credit has deteriorated and who may pose a higher risk, as determined by the Company s credit management function, of failure to perform under their contractual obligations. These steps include obtaining letters of credit or cash collateral, requiring prepayments for shipments or the creation of customer trust accounts held for the Company s benefit to fund payment for coal under existing coal supply agreements.

To reduce the Company scredit exposure related to its trading and brokerage activities, the Company seeks to enter into netting agreements with counterparties that permit the Company to offset receivables and payables with such counterparties. Counterparty risk with respect to interest rate swap and foreign currency forwards transactions is not considered to be significant based upon the creditworthiness of the participating financial institutions.

Foreign Currency Risk

The Company utilizes currency forwards to hedge currency risk associated with anticipated Australian dollar expenditures. As of December 31, 2006, the Company had forward contracts designated as cash flow hedges with notional amounts outstanding totaling approximately A\$1.35 billion, with maturities extending through 2010. The consolidated balance sheet as of December 31, 2006, reflects unrealized gains on the cash flow hedges of \$64.1 million, which is recorded net of a \$25.6 million tax benefit in Accumulated other comprehensive loss (see Note 19).

Employees

As of December 31, 2006, the Company had approximately 9,200 employees. As of December 31, 2006, approximately 40% of the Company s hourly employees were represented by organized labor unions and generated 14% of the 2006 coal production. Relations with its employees and, where applicable, organized labor are important to the Company s success.

United States Labor Relations

The United Mine Workers of America (UMWA) represented approximately 26% of the Company s subsidiaries hourly employees, who generated 11% of the Company s domestic production during the year ended December 31, 2006. An additional 5% of the hourly employees are represented by labor unions other than the UMWA. These employees generated 1% of the Company s domestic production during the year ended December 31, 2006. Hourly workers at the Company s mine in Arizona are represented by the UMWA under the Western Surface Agreement of 2000, which is effective through September 1, 2007. The Company s union workforce east of the Mississippi River is primarily represented by the UMWA. The UMWA-represented workers at one of the Company s eastern mines operate under a contract that expires on December 31, 2007. The remainder of the Company s UMWA-represented workers in the east operate under a recently signed, five-year labor agreement expiring December 31, 2011. This contract replaced a contract that had expired on December 31, 2006 and mirrors the 2007 National Bituminous Coal Wage Agreement.

F-15

PEABODY ENERGY CORPORATION NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Australia Labor Relations

The Australian coal mining industry is unionized and the majority of workers employed at the Company s Australian Mining Operations are members of trade unions. The Construction Forestry Mining and Energy Union represents the Company s hourly production employees. As of December 31, 2006, the Company s Australian hourly employees were approximately 9% of its hourly workforce and generated 2% of its total production in the year then ended. The labor agreement at the Wilkie Creek Mine was renewed in June 2006 and that agreement expires in June 2009. The North Goonyella Mine operates under an agreement due to expire in 2008, and the Metropolitan Mine operates under an agreement that expires in June 2007.

(3) Resource Management and Other Commercial Events

During 2006, the Company sold non-strategic coal reserves and surface lands located in Kentucky and West Virginia for proceeds of \$75.3 million and recognized a gain of \$58.9 million. In June 2006, the Company exchanged with the Bureau of Land Management approximately 63 million tons of leased coal reserves at its Caballo mining operation for approximately 46 million tons of coal reserves contiguous with its North Antelope Rochelle mining operation. Based on the fair value of the coal reserves exchanged, the Company recognized a gain on assets exchanged totaling \$39.2 million. This non-cash addition is not included in Additions to property, plant, equipment and mine development in the consolidated statement of cash flows. The gains from these transactions are included in Net gain on disposal or exchange of assets in the consolidated statements of operations.

The Company recognized \$35.8 million during the year ended December 31, 2006 in gains related to the settlement of commitments by a third-party coal producer following a brokerage contract restructuring. The gains are included in Other revenues in the consolidated statements of operations.

In the fourth quarter of 2005, the Company acquired rail, loadout and surface facilities as well as other mining assets from another major coal producer for \$84.7 million and exchanged 60 million ton blocks of leased coal reserves in the Powder River Basin. The Company plans to utilize these reserves and infrastructure to accelerate the development of a new mine, which will include adjoining Company-leased reserves. In the first quarter of 2005, the Company purchased mining assets from Lexington Coal Company for \$61.0 million, of which \$56.5 million was recorded in Property, plant, equipment and mine development and the remainder recorded primarily to Inventories in the consolidated balance sheet. The Company used the acquired assets to open a new mine that produced 2.4 million tons of coal during 2006 and to provide other synergies to existing properties.

In the third quarter of 2005, the Company exchanged certain idle steam coal reserves for steam and metallurgical coal reserves as part of a contractual dispute settlement. Under the settlement, the Company received \$10.0 million in cash, a new coal supply agreement that partially replaced the disputed coal supply agreement, and exchanged the idle steam coal reserves. As a result of the final settlement and based on the fair values of the items exchanged in the overall settlement transaction, the Company recorded net contract losses of \$4.0 million and a gain on assets exchanged of \$37.4 million. The fair value of assets exchanged exceeded the book value by \$33.4 million and this non-cash addition is not included in Additions to property, plant, equipment and mine development in the consolidated statements of cash flows. The gain from this transaction is included in Net gain on disposal or exchange of assets in the consolidated statements of operations.

(4) Business Combinations

The results of operations for each of the acquired entities discussed below are included in the Company s consolidated statements of operations from the effective date of each acquisition. Had the

F-16

PEABODY ENERGY CORPORATION NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

results of operations for Dodge Hill Holding JV, LLC and Carbones del Guasare been included in the Company s results of operations since January 1 of the year acquired, there would have been no material effect on the Company s consolidated statements of operations, financial position or cash flows.

Excel Coal Limited

On July 5, 2006, the Company signed a Merger Implementation Agreement (the Merger Implementation Agreement) to acquire Excel Coal Limited (Excel), an independent coal company, by means of a scheme of arrangement transaction under Australian law (the Transaction). The Merger Implementation Agreement was amended on September 18, 2006, and the Company agreed to pay A\$9.50 per share (US\$7.16 as of the amendment date) for the outstanding shares of Excel. On September 20, 2006, as part of the amended agreement, the Company acquired 19.99% of the outstanding shares of Excel at A\$9.50 per share (the Advance Purchase), resulting in payment of A\$408.3 million, or US\$307.8 million. In October 2006, the Company acquired the remaining interest in Excel for A\$9.50 per share (US\$7.07 per share), a total of A\$1.63 billion or US\$1.21 billion. The total acquisition price, including the Advance Purchase and related costs, was US\$1.54 billion in cash plus assumed debt of US\$293.0 million, less US\$30.0 million of cash acquired in the transaction, and was financed with borrowings under the Company s Senior Unsecured Credit Facility and Senior Notes due 2016 and 2026 as discussed in Note 12. The Excel acquisition includes three operating mines (Wambo Open-Cut Mine, Metropolitan Mine and Chain Valley Mine) and three development-stage mines (North Wambo Underground Mine, Wilpinjong Mine and Millennium Mine), with more than 500 million tons of proven and probable coal reserves. The Company also acquired a 51.0% interest in Excelven Pty Ltd., which owns Transportes Coal-Sea de Venezuela C.A. and a 96.7% interest in Cosila Complejo Siderurgico Del Lago S.A., which owns the Las Carmelitas coal mine development project. The results of operations of Excel are included in the Company s Australian Mining Operations segment from October 2006. The acquisition was accounted for as a purchase in accordance with SFAS No. 141, Business Combinations.

The preliminary purchase accounting allocations related to the acquisition have been recorded in the accompanying consolidated financial statements as of, and for periods subsequent to, October 2006. The final valuation of the net assets acquired is expected to be finalized once third-party appraisals are completed. The following table summarizes the preliminary estimated fair values of the assets acquired and the liabilities assumed at the date of acquisition:

	((Dollars in thousands)
Accounts receivable, net	\$	18,700
Inventories		32,044
Other current assets		5,336
Property, plant, equipment and mine development, net		1,897,672
Goodwill		240,667
Current maturities of long-term debt		(17,090)
Accounts payable and accrued expenses		(135,474)
Long-term debt less current maturities		(275,934)
Deferred income taxes, net		(179,026)
Other noncurrent assets and liabilities, net		(60,857)
Minority interests		(18,263)
Total purchase price, net of cash received of \$29,995	\$	1,507,775

Table of Contents 116

F-17

PEABODY ENERGY CORPORATION NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The preliminary amount allocated to goodwill reflects the excess of the purchase price of acquiring Excel over the net fair value of assets acquired and liabilities assumed and is primarily attributable to customer relations and the Company s ability to acquire and develop coal reserves adjacent to certain operations. The Company is conducting drilling and reserve studies on the acquired properties, the outcome of which will determine the fair value to be allocated to reserve assets. Goodwill will be adjusted upon the final valuation of the net acquired assets and allocated to reporting units. Also, in connection with the Excel acquisition, the Company acquired contract based intangibles consisting solely of coal supply agreement obligations (customer contracts) that were unfavorable based upon current market prices for similar coal in October 2006. These below market obligations were recorded at their preliminarily determined fair value when allocating the purchase price, resulting in a \$27.7 million liability. The liability will be amortized as the coal is shipped over an average amortization period of approximately five years.

The following unaudited pro forma financial information presents the combined results of operations of the Company and Excel, on a pro forma basis, as though the companies had been combined as of the beginning of each period presented. The pro forma financial information does not necessarily reflect the results of operations that would have occurred had the Company and Excel constituted a single entity during those periods:

RAG Coal International AG

On April 15, 2004, the Company purchased, through two separate agreements, all of the equity interests in three coal operations from RAG Coal International AG. The combined purchase price, including related costs and fees, of \$442.2 million was funded from equity and debt offerings. The purchases included two mines in Queensland, Australia that collectively produce 6 to 7 million tons per year of metallurgical coal and the Twentymile Mine in Colorado, which produces 8 to 9 million tons per year of steam coal. The results of operations of the two mines in Queensland, Australia are included in the Company s Australian Mining Operations segment and the results of operations of the Twentymile Mine are included in the Company s Western U.S. Mining Operations segment from the April 15, 2004, purchase date. The acquisition was accounted for as a purchase.

In connection with the acquisition of the assets of the Australian mines and the Twentymile Mine, the Company acquired contract based intangibles consisting solely of coal supply agreement obligations (customer contracts) that were unfavorable based upon current market prices for similar coal as of

PEABODY ENERGY CORPORATION NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

April 15, 2004. These below market obligations were recorded at fair value as part of the purchase price allocation resulting in a \$46.8 million liability, which is amortized as the coal is shipped. As of December 31, 2006, the carrying value of these acquired contract liabilities is \$8.1 million and the estimated amortization (reduction to Depreciation, depletion and amortization in the consolidated statements of operations) is \$6.5 million, \$1.0 million and \$0.6 million for the years ending December 31, 2007, 2008, and 2009, respectively.

Dodge Hill Holding JV, LLC

On December 29, 2004, the Company purchased the remaining 55% interest in Dodge Hill Holding JV, LLC for \$7.0 million of assumed debt that was repaid immediately upon closing, \$2.8 million of cash and contingent earn-out payments based on annual and cumulative EBIT (as defined in the purchase agreement) through 2007. Dodge Hill Holding JV, LLC is located in Kentucky and operates an underground operation which mines approximately 1.5 million tons per year. The acquisition was accounted for as a purchase.

Carbones del Guasare

On December 2, 2004, the Company acquired a 25.5% equity interest in Carbones del Guasare, S.A., from RAG Coal International AG for a net purchase price of \$32.5 million. Carbones del Guasare, a joint venture that includes Anglo American plc and a Venezuelan governmental partner, operates the Paso Diablo surface mine in northwestern Venezuela. In 2006, the mine produced approximately 6 million tons of steam coal for electricity generators and steel producers primarily in North America and Europe. The Company accounted for the purchase under the equity method of accounting.

(5) Assets and Liabilities from Coal Trading Activities

The Company s coal trading portfolio included forward and swap contracts as of December 31, 2006 and forward contracts as of December 31, 2005. The fair value of coal trading derivatives and related hedge contracts is set forth below:

	Decemb	December 31, 2006			December 31, 2005			
	Assets		Liabilities As		Liabilities Assets		L	iabilities
			(Dollars in	thousands)				
Forward contracts	\$ 142,105	\$	120,718	\$ 146,596	\$	131,988		
Financial swaps	8,268		6,013					
Other						385		
Total	\$ 150,373	\$	126,731	\$ 146,596	\$	132,373		

All of the contracts in the Company s trading portfolio as of December 31, 2006 were valued utilizing prices from over-the-counter market sources, adjusted for coal quality and traded transportation differentials.

F-19

Table of Contents

PEABODY ENERGY CORPORATION NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

As of December 31, 2006, the estimated future realization of the value of the Company s trading portfolio was as follows:

Year of Expiration	Percentage of Portfolio
2007	41%
2008	39%
2009	15%
2010	5%
	100%

At December 31, 2006, 62% of the Company s credit exposure related to coal trading activities was with investment grade counterparties and 38% was with non-investment grade counterparties. The Company s coal trading operations traded 79.1 million tons, 36.2 million tons and 33.4 million tons for the years ended December 31, 2006, 2005 and 2004, respectively.

(6) Accounts Receivable Securitization

The Company has established an accounts receivable securitization program through its wholly-owned, bankruptcy-remote subsidiary (Seller). Under the program, the Company contributes undivided interests in a pool of eligible trade receivables to the Seller, which then sells, without recourse, to a multi-seller, asset-backed commercial paper conduit (Conduit). Purchases by the Conduit are financed with the sale of highly rated commercial paper. The Company utilizes proceeds from the sale of its accounts receivable as an alternative to other forms of debt, effectively reducing its overall borrowing costs. The funding cost of the securitization program was \$1.9 million, \$2.5 million and \$1.7 million for the years ended December 31, 2006, 2005 and 2004, respectively. The securitization program is currently scheduled to expire in September 2009.

The securitization transactions have been recorded as sales, with those accounts receivable sold to the Conduit removed from the consolidated balance sheets. The amount of undivided interests in accounts receivable sold to the Conduit was \$219.2 million and \$225.0 million as of December 31, 2006 and 2005, respectively.

The Seller is a separate legal entity whose assets are available first and foremost to satisfy the claims of its creditors. Eligible receivables, as defined in the securitization agreement, consist of trade receivables from most of the Company s domestic subsidiaries, and are reduced for certain items such as past due balances and concentration limits. Of the eligible pool of receivables contributed to the Seller, undivided interests in only a portion of the pool are sold to the Conduit. The Company (the Seller) continues to own \$166.4 million of receivables as of December 31, 2006, that represents collateral supporting the securitization program. The Seller s interest in these receivables is subordinate to the Conduit s interest in the event of default under the securitization agreement. If the Company defaulted under the securitization agreement or if its pool of eligible trade receivables decreased significantly, the Company could be prohibited from selling any additional receivables in the future under the agreement.

F-20

PEABODY ENERGY CORPORATION NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(7) Earnings per Share

A reconciliation of weighted-average shares outstanding follows:

Year Ended December 31,

	2006	2005	2004
Weighted-average shares outstanding basic Dilutive impact of stock options, restricted stock units and	263,419,344	261,519,424	248,732,744
performance units	5,746,661	6,494,052	6,079,888
Weighted-average shares outstanding diluted	269,166,005	268,013,476	254,812,632

For the year ended December 31, 2004, options for three thousand shares were excluded from the diluted earnings per share calculations for the Company s common stock because they were anti-dilutive.

(8) Inventories

Inventories consisted of the following:

	December 31,		
	2006		2005
	(Dollars in thousan		
Materials and supplies	\$ 85,242	\$	65,942
Raw coal	42,693		14,033
Saleable coal	87,449		64,274
Advance stripping			245,522
Total	\$ 215,384	\$	389,771

Due to an accounting change that was effective on January 1, 2006, advance stripping costs are no longer a separate component of inventory (see Note 1).

(9) Leases

The Company leases equipment and facilities under various noncancelable lease agreements. Certain lease agreements require the maintenance of specified ratios and contain restrictive covenants which limit indebtedness, subsidiary dividends, investments, asset sales and other Company actions. Rental expense under operating leases was \$106.9 million, \$108.6 million and \$108.1 million for the years ended December 31, 2006, 2005 and 2004, respectively. The net book value of property, plant, equipment and mine development assets under capital leases was \$56.7 million and \$1.5 million as of December 31, 2006 and 2005, respectively, related primarily to the leasing of mining equipment.

The Company also leases coal reserves under agreements that require royalties to be paid as the coal is mined. Certain agreements also require minimum annual royalties to be paid regardless of the amount of coal mined during the year. Total royalty expense was \$336.8 million, \$288.1 million and \$233.9 million for the years ended December 31, 2006, 2005 and 2004, respectively.

A substantial amount of the coal mined by the Company is produced from mineral reserves leased from the owner. One of the major lessors is the U.S. government, from which the Company leases substantially all of the coal it mines in Wyoming and Colorado under terms set by Congress and administered by the U.S. Bureau of Land Management. These leases are generally for an initial term of ten years but may be extended by diligent development and mining of the reserve until all economically recoverable reserves are depleted. The Company has met the diligent development requirements for substantially all of these federal leases either directly through production or by including the lease as

F-21

PEABODY ENERGY CORPORATION NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

part of a logical mining unit with other leases upon which development has occurred. Annual production on these federal leases must total at least 1.0% of the original amount of coal in the entire logical mining unit. In addition, royalties are payable monthly at a rate of 12.5% of the gross realization from the sale of the coal mined using surface mining methods and at a rate of 8.0% of the gross realization for coal produced using underground mining methods. The Company also leases coal reserves in Arizona from The Navajo Nation and the Hopi Tribe under leases that are administered by the U.S. Department of the Interior. These leases expire upon exhaustion of the leased reserves or upon the permanent ceasing of all mining activities on the related reserves as a whole. The royalty rates are also generally based upon a percentage of the gross realization from the sale of coal. These rates are subject to redetermination every ten years under the terms of the leases. The remainder of the leased coal is generally leased from state governments, land holding companies and various individuals. The duration of these leases varies greatly. Typically, the lease terms are automatically extended as long as active mining continues. Royalty payments are generally based upon a specified rate per ton or a percentage of the gross realization from the sale of the coal.

Future minimum lease and royalty payments as of December 31, 2006, are as follows:

Year Ended December 31,	Capital Leases	Operating Leases	Coal Reserves
	(De	ollars in thousa	nds)
2007	\$ 11,335	\$ 102,256	\$216,996
2008	9,986	86,358	201,839
2009	11,820	65,906	142,568
2010	7,843	56,666	14,664
2011	7,843	44,720	10,795
2012 and thereafter	23,428	168,076	46,611
Total minimum lease payments	\$ 72,255	\$ 523,982	\$ 633,473
Less interest	15,548		
Present value of minimum capital lease payments	\$ 56,707		

During 2002, the Company entered into a transaction with Penn Virginia Resource Partners, L.P. (PVR) whereby the Company sold 120 million tons of coal reserves in exchange for \$72.5 million in cash and 2.76 million units, or 15%, of the PVR master limited partnership. The Company subsidiaries leased back the coal and pay royalties as the coal is mined. No gain or loss was recorded at the inception of this transaction. In 2005 and 2004, the Company sold 0.838 million and 0.775 million, respectively, of the PVR units received in the original transaction. As of December 31, 2006 and 2005, the Company had no remaining ownership in PVR. The PVR unit sales were accounted for under SFAS No. 66, Sales of Real Estate, and gains of \$31.1 million and \$15.8 million were recognized in the years ended December 31, 2005 and 2004, respectively. The remaining deferred gain from the sales of the reserves and units of \$13.3 million at December 31, 2006 is intended to provide for the Company s potential exposure to loss resulting from its continuing involvement in the properties and will be amortized over the minimum term of the leases.

As of December 31, 2006, certain of the Company s lease obligations were secured by outstanding surety bonds and letters of credit totaling \$104.2 million.

Current deferred income taxes	\$ 106,967	\$	9,027
Noncurrent deferred income taxes	(195,213)		(338,488)
Net deferred tax liability	\$ (88,246)	\$	(329,461)

The Company s deferred tax assets included alternative minimum tax (AMT) credits of \$32.8 million and \$26.2 million, U.S. net operating loss (NOL) carryforwards of \$538.0 million and \$553.1 million and foreign NOL and capital loss carryforwards of \$39.6 million and \$0.2 million as of December 31, 2006 and 2005, respectively. The AMT credits and foreign NOL and capital loss carryforwards have no expiration date and the U.S. NOL carryforwards begin to expire in the year 2019. Utilization of these AMT credits and U.S. NOL carryforwards is subject to various limitations because of previous changes in ownership (as defined in the Internal Revenue Code) of the Company, and ultimate realization could be negatively impacted by market conditions and other variables not known or anticipated at

this time. The AMT credits and U.S. NOL carryforwards are offset by a valuation allowance of \$215.7 million. The valuation allowance was reduced by \$169.9 million and \$25.9 million for the years ended December 31, 2006 and 2004, respectively. The valuation allowance was increased by \$216.9 million for the year ended December 31, 2005, to correspond with an increase in available NOLs. The Company evaluated and assessed the expected near-term utilization of NOLs, book and taxable income trends, available tax strategies and the overall deferred tax position to determine the amount and timing of valuation allowance adjustments. The foreign capital loss carryforwards and a deferred tax asset related to

F-25

Table of Contents

PEABODY ENERGY CORPORATION NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

certain coal reserves are offset by a valuation allowance of \$6.6 million. The valuation allowance was increased by \$6.3 million for the year ended December 31, 2006.

During 2005, the Company completed a comprehensive and strategic internal corporate restructuring project. This restructuring focused on realigning the Company s subsidiary ownership on a geographic and functional basis and facilitated the consolidation of assets in a tax-efficient manner, better positioning the Company to execute future strategic transactions. One of the indirect consequences of the internal corporate restructuring was a deduction for a deemed liquidation of a subsidiary for tax purposes, which, as a result, increased the Company s NOLs by \$1.0 billion.

The Company establishes reserves for tax contingencies when, despite the belief that the Company s tax return positions are fully supported, certain positions are likely to be challenged and may not be fully sustained. The tax contingency reserves are analyzed on a quarterly basis and adjusted based upon changes in facts and circumstances, such as the progress of federal and state audits, case law and emerging legislation. The Company s effective tax rate includes the impact of tax contingency reserves and changes to the reserves, including related interest, as considered appropriate by management. The Company establishes the reserves based upon management s assessment of exposure associated with permanent tax differences (e.g., tax depletion expense). The tax contingency reserve was decreased for the year ended December 31, 2006, by \$28.7 million reflecting the reduction in exposure due to the completion of federal and state audits. The tax contingency reserve was increased by \$45.0 million for the tax year ended December 31, 2005.

The total amount of undistributed earnings of foreign subsidiaries for income tax purposes was approximately \$318.9 million and \$156.0 million at December 31, 2006 and 2005, respectively. The Company has not provided deferred taxes on foreign earnings because such earnings were intended to be indefinitely reinvested outside the United States. Should the Company repatriate all of these earnings, a one-time income tax charge to the Company s consolidated results of operations of up to \$110 million could occur.

The Company made U.S. Federal tax payments totaling \$3.9 million and \$1.4 million for the years ended December 31, 2006 and 2004, respectively. The Company made no U.S. Federal tax payments for the year ended December 31, 2005. The Company paid state and local income taxes totaling \$0.5 million, \$0.3 million and \$0.3 million for the years ended December 31, 2006, 2005 and 2004, respectively. The Company made non-U.S. tax payments totaling \$23.1 million, \$2.8 million and \$6.3 million for the years ended December 31, 2006, 2005 and 2004, respectively.

Total	\$ 3,263,826	\$ 1,405,506

Senior Unsecured Credit Facility

On September 15, 2006, the Company entered into a Third Amended and Restated Credit Agreement (the Agreement), which established a \$2.75 billion Senior Unsecured Credit Facility (the Senior Unsecured Credit Facility) and which amended and restated in full the Company s then existing \$1.35 billion Senior Secured Credit Facility (the Senior Secured Credit Facility). The Senior Unsecured Credit Facility provides a \$1.8 billion Revolving Credit Facility (the Revolver) and a \$950.0 million Term Loan Facility (the Term Loan Facility).

The Revolver replaced the Company s previous \$900.0 million revolving credit facility, and the increased capacity is intended to accommodate working capital needs, letters of credit, the funding of capital expenditures and other general corporate purposes. The Revolver also includes a \$50.0 million sub-facility available for same-day swingline loan borrowings. In September 2006, the Company borrowed \$312.0 million under the Revolver in conjunction with the Excel acquisition and repaid this \$312.0 million outstanding balance in December 2006 with net proceeds from the Debentures. As of December 31, 2006, the remaining available borrowing capacity under the Revolver was \$1.29 billion.

The Term Loan Facility consisted of an unsecured \$440.0 million portion (the Term Loan), which was drawn at closing to replace the previous term loan (\$437.5 million balance at time of replacement; \$442.5 million at December 31, 2005) issued under the Senior Secured Credit Facility. The Term Loan Facility also includes a Delayed Draw Term Loan Sub-Facility of up to \$510.0 million, which was fully drawn in October 2006 in connection with the Excel acquisition. In December 2006, \$403.0 million of the outstanding balance of the Term Loan Facility (\$950.0 million was outstanding at time of repayment) was repaid with the net proceeds from the Debentures. In conjunction with the establishment of the Senior Unsecured Credit Facility, the Company incurred \$8.6 million in

F-27

Table of Contents

PEABODY ENERGY CORPORATION NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

\$5.6 million related to the Revolver and \$3.0 million related to the Term Loan. These debt issuance costs are being amortized to interest expense over five years, the term of the Senior Unsecured Credit Facility.

Loans under the facility are available to the Company in U.S. dollars, with a sub-facility under the Revolver available in Australian dollars, pounds sterling and Euros. Letters of credit under the Revolver are available to the Company in U.S. dollars with a sub-facility available in Australian dollars, pounds sterling and Euros. The interest rate payable on the Revolver and the Term Loan under the Senior Unsecured Credit Facility is LIBOR plus 1.0% with step-downs to LIBOR plus 0.50% based on improvement in the leverage ratio, as defined in the Agreement. The rate applicable to the Term Loan Facility was 6.35% at December 31, 2006.

Under the Senior Unsecured Credit Facility, the Company must comply with certain financial covenants on a quarterly basis including a minimum interest coverage ratio and a maximum leverage ratio, as defined in the Agreement. The financial covenants also place limitations on the Company s investments in joint ventures, unrestricted subsidiaries, indebtedness of non-loan parties and the imposition of liens on Company assets. The new facility is less restrictive with respect to limitations on the Company s dividend payments, capital expenditures, asset sales and stock repurchases. The Senior Unsecured Credit Facility matures on September 15, 2011.

Convertible Junior Subordinated Debentures

On December 20, 2006, the Company issued \$732.5 million aggregate principal amount of 4.75% Convertible Junior Subordinated Debentures due 2066 (the Debentures), including \$57.5 million issued pursuant to the underwriters exercise of their over-allotment option. Net proceeds from the offering, after deducting underwriting discounts and offering expenses, were \$715.0 million and were used to repay indebtedness under the Company s Senior Unsecured Credit Facility.

The Debentures will pay interest semiannually at a rate of 4.75% per year. The Company may elect to, and if and to the extent that a mandatory trigger event (as defined in the indenture governing the Debentures) has occurred and is continuing will be required to, defer interest payments on the Debentures. After five years of deferral at the Company s option, or upon the occurrence of a mandatory trigger event, the Company generally must sell warrants or preferred stock with specified characteristics and use the funds from that sale to pay deferred interest, subject to certain limitations. In no event may the Company defer payments of interest on the Debentures for more than ten years.

The Debentures are convertible at any time on or prior to December 15, 2036 if any of the following conditions occur: (i) the Company s closing common stock price exceeds 140% of the then applicable conversion price for the Debentures (currently \$86.73 per share) for at least 20 of the final 30 trading days in any quarter; (ii) a notice of redemption is issued with respect to the Debentures; (iii) a change of control, as defined in the indenture governing the Debentures; (iv) satisfaction of certain trading price conditions; and (v) other specified corporate transactions described in the indenture governing the Debentures. In addition, the Debentures are convertible at any time after December 15, 2036 to December 15, 2041, the scheduled maturity date. In the case of conversion following a notice of redemption or upon a non-stock change of control, as defined in the indenture governing the Debentures, holders may convert their Debentures into cash in the amount of the principal amount of their Debentures and shares of the Company s common stock for any conversion value in excess of the principal amount. In all other conversion circumstances, holders will receive perpetual preferred stock (see Note 17) with a liquidation preference equal to the principal amount of their Debentures, and any conversion value in excess of the principal amount will be settled with the Company s common stock. The consideration delivered upon conversion will be based upon an initial conversion rate of 16.1421 shares of common stock per \$1,000 principal amount of Debentures, subject to adjustment. This conversion rate represents an

F-28

Table of Contents

PEABODY ENERGY CORPORATION NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

initial conversion price of approximately \$61.95 per share, a 40% premium over the closing stock price of \$44.25 on December 14, 2006, the date of the pricing of the Debentures.

The Debentures are not subject to redemption prior to December 20, 2011. Between December 20, 2011 and December 19, 2036 the Company may redeem the Debentures, in whole or in part, if for at least 20 out of the 30 consecutive trading days immediately prior to the date on which notice of redemption is given, the Company s closing common stock price has exceeded 130% of the then applicable conversion price for the Debentures. On or after December 20, 2036, whether or not the redemption condition is satisfied, the Company may redeem the Debentures, in whole or in part. The Company may not redeem any Debentures unless (i) all accrued and unpaid interest on the Debentures has been paid in full on or prior to the redemption date and (ii) if any perpetual preferred stock is outstanding, the Company has first given notice to redeem the perpetual preferred stock in the same proportion as the redemption of the Debentures. Any redemption of the Debentures will be at a cash redemption price of 100% of the principal amount of the Debentures to be redeemed, plus accrued and unpaid interest to the date of redemption.

On December 15, 2041, the scheduled maturity date, the Company will use commercially reasonable efforts, subject to the occurrence of a market disruption event, as defined in the indenture governing the Debentures, to issue securities of equivalent equity content in an amount sufficient to pay the principal amount of the Debentures, together with accrued and unpaid interest. The final maturity date of the Debentures is December 15, 2066, on which date the entire principal amount of the Debentures will mature and become due and payable, together with accrued and unpaid interest.

In connection with the issuance of the Debentures, the Company entered into a Capital Replacement Covenant (the CRC). Pursuant to the CRC, the Company covenanted for the benefit of holders of covered debt, as defined in the CRC (currently the Company s 7.875% Senior Notes due 2026, issued in the aggregate principal amount of \$250.0 million), that neither the Company nor any of its subsidiaries shall repay, redeem or repurchase all or any part of the Debentures on or after December 15, 2041 and prior to December 15, 2046, except to the extent that the total repayment, redemption or repurchase price does not exceed the sum of: (i) 400% of the Company s net cash proceeds from the sale of its common stock and rights to acquire its common stock (including common stock issued pursuant to the Company s dividend reinvestment plan or employee benefit plans); (ii) the Company s net cash proceeds from the sale of its mandatorily convertible preferred stock, as defined in the CRC, or debt exchangeable for equity, as defined in the CRC; and (iii) the Company s net cash proceeds from the sale of other replacement capital securities, as defined in the CRC, in each case, during the six months prior to the notice date for the relevant payment, redemption or repurchase.

The Debentures are unsecured obligations of the Company, ranking junior to all existing and future senior and subordinated debt (excluding trade accounts payable or accrued liabilities arising in the ordinary course of business) except for any future debt that ranks equal to or junior to the Debentures. The Debentures will rank equal in right of payment with the Company s obligations to trade creditors. Substantially, all of the Company s existing indebtedness is senior to the Debentures. In addition, the Debentures will be effectively subordinated to all indebtedness of the Company s subsidiaries. The indenture governing the Debentures places no limitation on the amount of additional indebtedness that the Company or any of the Company s subsidiaries may incur.

7.375% Senior Notes Due November 2016 and 7.875% Senior Notes Due November 2026

On October 12, 2006, the Company completed a \$650 million offering of 7.375% 10-year Senior Notes due 2016 and \$250 million of 7.875% 20-year Senior Notes due 2026. The notes are general unsecured obligations of the Company and rank senior in right of payment to any subordinated indebtedness of the Company; equally in right of payment with any senior indebtedness of the Company; effectively junior in right of payment to the Company s existing and future secured indebtedness, to the

F-29

Table of Contents

PEABODY ENERGY CORPORATION NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

extent of the value of the collateral securing that indebtedness; and effectively junior to all the indebtedness and other liabilities of the Company s subsidiaries that do not guarantee the notes. Interest payments are scheduled to occur on May 1 and November 1 of each year, commencing on May 1, 2007.

The notes are guaranteed by the Company s Subsidiary Guarantors, as defined in the note indenture. The note indenture contains covenants that, among other things, limit the Company s ability to create liens and enter into sale and lease-back transactions. The notes are redeemable at a redemption price equal to 100% of the principal amount of the notes being redeemed plus a make-whole premium, if applicable, and any accrued unpaid interest to the redemption date. Net proceeds from the offering, after deducting underwriting discounts and expenses, were \$886.1 million.

6.875% Senior Notes Due March 2013

On March 21, 2003, the Company issued \$650.0 million of 6.875% Senior Notes due March 2013. The notes are senior unsecured obligations of the Company and rank equally with all of the Company s other senior unsecured indebtedness. Interest payments are scheduled to occur on March 15 and September 15 of each year. The notes are guaranteed by the Company s Subsidiary Guarantors as defined in the note indenture. The note indenture contains covenants which, among other things, limit the Company s ability to incur additional indebtedness and issue preferred stock, pay dividends or make other distributions, make other restricted payments and investments, create liens, sell assets and merge or consolidate with other entities. The notes are redeemable prior to March 15, 2008, at a redemption price equal to 100% of the principal amount plus a make-whole premium (as defined in the indenture) and on or after March 15, 2008, at fixed redemption prices as set forth in the indenture.

5.875% Senior Notes Due March 2016

On March 23, 2004, the Company completed an offering of \$250.0 million of 5.875% Senior Notes due March 2016. The notes are senior unsecured obligations of the Company and rank equally with all of the Company s other senior unsecured indebtedness. Interest payments are scheduled to occur on April 15 and October 15 of each year, and commenced on April 15, 2004. The notes are guaranteed by the Company s Subsidiary Guarantors as defined in the note indenture. The note indenture contains covenants which, among other things, limit the Company s ability to incur additional indebtedness and issue preferred stock, pay dividends or make other distributions, make other restricted payments and investments, create liens, sell assets and merge or consolidate with other entities. The notes are redeemable prior to April 15, 2009, at a redemption price equal to 100% of the principal amount plus a make-whole premium (as defined in the indenture) and on or after April 15, 2009, at fixed redemption prices as set forth in the indenture. Net proceeds from the offering, after deducting underwriting discounts and expenses, were \$244.7 million.

5.0% Subordinated Note

The 5.0% Subordinated Note is recorded net of discount with interest and principal payable each March 1. The Company repaid \$10.0 million of principal in March 2006, with the remaining \$60.0 million due March 1, 2007. The 5.0% Subordinated Note is expressly subordinated in right of payment to all prior indebtedness as disclosed above.

Series Bonds

As of December 31, 2006, the Company had \$74.0 million in Series Bonds outstanding, which were assumed as part of the Excel acquisition. The 6.84% Series A Bonds have a balloon maturity in December 2014. The 6.34% Series B Bonds mature in December 2014 and are payable in installments beginning

F-30

Table of Contents

PEABODY ENERGY CORPORATION NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

December 2008. The 6.84% Series C Bonds mature in December 2016 and are payable in installments beginning December 2012. Interest payments occur in June and December of each year.

Interest Rate Swaps

Prior to completion of the Senior Unsecured Credit Facility, the Company had two \$400.0 million interest rate swaps. A \$400.0 million notional amount floating-to-fixed interest rate swap was designated as a hedge of changes in expected cash flows on the previous term loan under the Senior Secured Credit Facility. Under this swap, the Company paid a fixed rate of 6.764% and received a floating rate of LIBOR plus 2.5% that reset each March 15, June 15, September 15 and December 15 based upon the three-month LIBOR rate. A \$400.0 million notional amount fixed-to-floating interest rate swap was designated as a hedge of the changes in the fair value of the 6.875% Senior Notes due 2013. Under this swap, the Company paid a floating rate of LIBOR plus 1.97% that reset each March 15, June 15, September 15 and December 15 based upon the three-month LIBOR rate and received a fixed rate of 6.875%.

In conjunction with the completion of the new Senior Unsecured Credit Facility, the \$400.0 million notional amount floating-to-fixed interest rate swap was terminated and resulted in payment to the Company of \$5.2 million. The Company recorded the \$5.2 million fair value of the swap in Accumulated other comprehensive loss on the consolidated balance sheet and will amortize this amount to interest expense over the remaining term of the forecasted interest payments initially hedged. The Company then entered into a \$120.0 million notional amount floating-to-fixed interest rate swap with a fixed rate of 6.25% and a floating rate of LIBOR plus 1.0%. This interest rate swap was designated as a hedge of the variable interest payments on the Term Loan under the new Senior Unsecured Credit Facility.

The Company also terminated \$280.0 million of its \$400.0 million notional amount fixed-to-floating interest rate swap designated as a hedge of the changes in fair value of the 6.875% Senior Notes due 2013. Reducing the notional amount of the interest rate swap to \$120.0 million resulted in payment of \$5.2 million to the counterparty. Reduction of the notional amount of the swap did not affect its floating and fixed rates. The \$5.2 million of fair value associated with the termination of the \$280.0 million portion of the swap was recorded as an adjustment to the carrying value of long-term debt and will be amortized to interest expense through maturity of the 6.875% Senior Notes due 2013.

Because the critical terms of the swaps and the respective debt instruments they hedge coincide, there was no hedge ineffectiveness recognized in the consolidated statements of operations during the years ended December 31, 2006 and 2005. At December 31, 2006 there was an unrealized loss related to the cash flow hedge of \$2.5 million and at December 31, 2005 there was an unrealized gain related to the cash flow hedge of \$2.3 million. As of December 31, 2006 and 2005, net unrealized loss on the fair value hedges discussed above was \$13.8 million and \$8.9 million, respectively, which is reflected as an adjustment to the carrying value of the Senior Notes (see table above).

Capital Lease Obligations and Other

Capital lease obligations include obligations assumed from the Excel acquisition, primarily for mining equipment (see Note 9 for additional information on the Company s capital lease obligations).

Other long-term debt, which consists principally of notes payable, is due in installments through 2016. The weighted-average effective interest rate of this debt was 3.98% as of December 31, 2006.

F-31

PEABODY ENERGY CORPORATION NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The aggregate amounts of long-term debt maturities subsequent to December 31, 2006, including capital lease obligations, were as follows:

Year of Maturity

	(Dollars in	n thousands)
2007	\$	95,757
2008		47,078
2009		40,504
2010		37,051
2011		445,842
2012 and thereafter		2,597,594
Total	\$	3,263,826

Interest paid on long-term debt was \$114.6 million, \$94.2 million and \$87.4 million for the years ended December 31, 2006, 2005 and 2004, respectively. The Company paid interest expense of \$3.3 million on the Revolver in 2006 and no interest was paid on the Revolver in 2005 or 2004.

Early Debt Extinguishment Costs

For the year ended December 31, 2006, the Company recorded net early debt extinguishment costs of \$1.4 million, primarily related to the repayment of borrowings under the Term Loan Facility.

In 2004, the Company recorded a net charge for early debt extinguishment of \$1.8 million. In connection with the refinancing of the Senior Secured Credit Facility on October 27, 2004, the Company incurred a non-cash charge of \$2.4 million to write-off unamortized debt issuance costs related to the term loan. In connection with the July 2004 repurchase of \$10.5 million of 5.875% Senior Notes due March 2016, the Company realized a gain of \$0.6 million.

Shelf Registration Statement

On July 28, 2006, the Company filed an automatic shelf registration statement on Form S-3 as a well-known seasoned issuer with the Securities and Exchange Commission. The registration was for an indeterminate number of securities and is effective for three years, at which time the Company can file an automatic shelf registration statement that would become immediately effective for another three-year term. Under this universal shelf registration statement, the Company has the capacity to offer and sell from time to time securities, including common stock, preferred stock, debt securities, warrants and units. The Debentures, 7.375% Senior Notes due 2016 and 7.875% Senior Notes due 2026 were issued pursuant to the shelf registration statement.

PEABODY ENERGY CORPORATION NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(13) Asset Retirement Obligations

Reconciliations of the Company s liability for asset retirement obligations were as follows:

		December 31,		
		2006	2005	
	(Dollars in th	ousands)	
Balance at beginning of year	\$	399,203	\$ 396,022	
Liabilities incurred or acquired		18,573	24,101	
Liabilities settled or disposed		(40,621)	(40,341)	
Accretion expense		29,480	24,095	
Revisions to estimate		16,396	(4,674)	
Balance at end of year	\$	423,031	\$ 399,203	

As of December 31, 2006, asset retirement obligations of \$423.0 million consisted of \$354.0 million related to locations with active mining operations and \$69.0 million related to locations that are closed or inactive. As of December 31, 2005, asset retirement obligations of \$399.2 million consisted of \$340.7 million related to locations with active mining operations and \$58.5 million related to locations that are closed or inactive. The credit-adjusted risk-free interest rates were 6.16% and 5.81% at January 1, 2006 and 2005, respectively.

In 2006, the Company assumed \$7.2 million of asset retirement obligations with the Excel acquisition (see Note 4) and incurred additional obligations related to the opening of new mine pits. For the year ended December 31, 2005, the Company recorded a \$9.2 million reduction in its asset retirement obligations associated with the disposal of non-strategic properties and the assumption of the related reclamation liabilities by the purchaser. Also during 2005, the Company recorded \$21.6 million for asset retirement obligations associated with assets acquired from Lexington Coal Company (see Note 3).

As of December 31, 2006 and 2005, the Company had \$441.5 million and \$323.6 million, respectively, in surety bonds outstanding to secure reclamation obligations or activities. The amount of reclamation self-bonding in certain states in which the Company qualifies was \$685.2 million and \$671.8 million as of December 31, 2006 and 2005, respectively. Additionally, the Company had \$4.1 million and \$0.1 million of letters of credit in support of reclamation obligations or activities as of December 31, 2006 and 2005, respectively.

(14) Workers Compensation Obligations

Certain subsidiaries of the Company are subject to the Federal Coal Mine Health and Safety Act of 1969 and the related workers—compensation laws in the states in which they operate. These laws require the subsidiaries to pay benefits for occupational disease resulting from coal workers—pneumoconiosis (occupational disease). Changes to the federal regulations became effective in August 2001, and the revised regulations could ultimately result in higher costs, although experience to date has not resulted in higher claims costs. Provisions for occupational disease costs are based on determinations by independent actuaries or claims administrators.

The Company provides income replacement and medical treatment for work related traumatic injury claims as required by applicable state law. Provisions for estimated claims incurred are recorded based on estimated loss rates applied to payroll and claim reserves determined by independent actuaries or claims administrators. Certain subsidiaries of the Company are required to contribute to state workers—compensation funds for second injury and other costs incurred by the state fund based on a payroll-based assessment by the applicable state. Provisions are recorded based on the payroll-based assessment criteria.

PEABODY ENERGY CORPORATION NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The workers compensation provision consisted of the following components:

Year Ended December 31,

Year Ended December 31,

	2006	2005	2004
	(Doll	ars in thousa	nds)
Service cost	\$ 4,175	\$ 4,491	\$ 4,346
Interest cost	10,327	10,425	11,568
Net amortization	(1,894)	(1,213)	742
Total occupational disease	12,608	13,703	16,656
Traumatic injury claims	20,743	25,610	27,141
State assessment taxes	10,676	16,820	15,365
Total provision	\$ 44,027	\$ 56,133	\$59,162

The weighted-average assumptions used to determine the workers compensation provision were as follows:

			,
	2006	2005	2004
Discount rate	5.90%	6.10%	6.40%
Inflation rate	3.50%	3.50%	3.50%

Workers compensation obligations consist of amounts accrued for loss sensitive insurance premiums, uninsured claims and related taxes and assessments under black lung and traumatic injury workers compensation programs.

The workers compensation obligations consisted of the following:

		December 31,				
		2006		2006 2005	2006 2005	
		(Dollars in t	thous	sands)		
Occupational disease costs	\$	187,477	\$	190,347		
Traumatic injury claims		76,896		81,539		
Total obligations		264,373		271,886		
Less current portion (included in Accounts payable and accrued expenses)		(30,966)		(34,312)		
Noncurrent obligations (included in Workers compensation obligations)	\$	233,407	\$	237,574		

As a result of the adoption of SFAS No. 158 on December 31, 2006, the accrued workers compensation liability on the consolidated balance sheet at December 31, 2006 reflects the accumulated obligation less any portion that is

currently funded. The adoption of SFAS No. 158 decreased liabilities by \$4.6 million and Accumulated other comprehensive loss by \$2.7 million at December 31, 2006.

As of December 31, 2006 and 2005, the Company had \$188.5 million and \$163.8 million, respectively, in surety bonds and letters of credit outstanding to secure workers compensation obligations.

F-34

PEABODY ENERGY CORPORATION NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The reconciliation of changes in the occupational disease liability benefit obligation were as follows:

December 31,

	2006		2005
	(Dollars in t	hous	sands)
Change in benefit obligation:			
Beginning of year obligation	\$ 187,907	\$	199,346
Service cost	4,175		4,491
Interest cost	10,327		10,425
Net actuarial gain	(6,122)		(16,071)
Benefit and administrative payments	(8,810)		(10,284)
Net obligation at end of year	187,477		187,907
Change in plan assets:			
Fair value of plan assets at beginning of period			
Employer contributions	8,810		10,284
Benefits paid	(8,810)		(10,284)
Fair value of plan assets at end of period			
Funded status at end of period	(187,477)		(187,907)
Unrecognized actuarial gain			(2,440)
Accrued cost	\$ (187,477)	\$	(190,347)

The liability for occupational disease claims represents the actuarially-determined present value of known claims and an estimate of future claims that will be awarded to current and former employees. The liability for occupational disease claims was based on a discount rate of 6.0% and 5.9% at December 31, 2006 and 2005, respectively. Traumatic injury workers—compensation obligations are estimated from both case reserves and actuarial determinations of historical trends, discounted at 5.9% and 6.1% for the years ended December 31, 2006 and 2005, respectively.

Federal Black Lung Excise Tax Refund Claims

In addition to the obligations discussed above, certain subsidiaries of the Company are required to pay black lung excise taxes to the Federal Black Lung Trust Fund (the Trust Fund). The Trust Fund pays occupational disease benefits to entitled former miners who worked prior to July 1, 1973. Excise taxes are based on the selling price of coal, up to a maximum of \$1.10 per ton for underground mines and \$0.55 per ton for surface mines. The Company had a receivable for excise tax refunds of \$19.4 million as of December 31, 2006 and 2005. In a January 2007 decision, a federal appellate court ruled that the Company is also entitled to collect interest on the \$19.4 million refund from the federal government.

(15) Pension and Savings Plans

One of the Company s subsidiaries, Peabody Investments Corp., sponsors a defined benefit pension plan covering certain U.S. salaried employees and eligible hourly employees at certain Peabody Investments Corp. subsidiaries (the Peabody Plan). A Peabody Investments Corp. subsidiary also has a defined benefit pension plan covering eligible employees who are represented by the UMWA under the Western Surface Agreement of 2000 (the Western Plan).

Peabody Investments Corp. also sponsors an unfunded supplemental retirement plan to provide senior management with benefits in excess of limits under the federal tax law.

F-35

Table of Contents

PEABODY ENERGY CORPORATION NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Annual contributions to the plans are made as determined by consulting actuaries based upon the Employee Retirement Income Security Act of 1974 minimum funding standard. In May 1998, the Company entered into an agreement with the Pension Benefit Guaranty Corporation which requires the Company to maintain certain minimum funding requirements. Beginning on January 1, 2008, new minimum funding standards will be required by the Pension Protection Act of 2006. Assets of the plans are primarily invested in various marketable securities, including U.S. government bonds, corporate obligations and listed stocks.

Net periodic pension costs included the following components:

Year Ended December 31,

	2006	2005	2004
	(Doll	lars in thousa	nds)
Service cost for benefits earned	\$ 12,234	\$ 11,853	\$ 12,275
Interest cost on projected benefit obligation	46,034	45,499	43,658
Expected return on plan assets	(54,587)	(52,812)	(49,813)
Other amortizations and deferrals	22,653	24,588	22,366
Net periodic pension costs	26,334	29,128	28,486
Curtailment charges		9,527	
Total net periodic pension costs	\$ 26,334	\$ 38,655	\$ 28,486

The Company amortizes actuarial gains and losses using a 5% corridor with a five-year amortization period. The estimated net actuarial loss and prior service cost that will be amortized from accumulated other comprehensive income (loss) into net periodic pension costs during the year ended December 31, 2007 are \$19.2 million and less than \$0.1 million, respectively.

The 2005 curtailment loss resulted from the termination of operations at two of the three operating mines that participate in the Western Plan during 2005. The loss is actuarially determined and consists of an increase in the actuarial liability, the accelerated recognition of previously unamortized prior service cost and contractual termination benefits under the Western Plan resulting from the termination of operations.

During the period ended March 31, 1999, the Company made an amendment to phase out the Peabody Plan. Effective January 1, 2001, certain employees no longer accrue future service under the plan while other employees accrue reduced service under the plan based on their age and years of service as of December 31, 2000. For plan benefit calculation purposes, employee earnings are also frozen as of December 31, 2000. The Company has adopted an enhanced savings plan contribution structure in lieu of benefits formerly accrued under the defined benefit pension plan.

F-36

PEABODY ENERGY CORPORATION NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The following summarizes the change in benefit obligation, change in plan assets and funded status of the Company s plans:

December 31,

	2006		2005
	(Dollars in thousands)		
Change in benefit obligation:	,		
Projected benefit obligation at beginning of period	\$ 801,818	\$	759,283
Service cost	12,234		11,853
Interest cost	46,034		45,499
Plan amendments			(225)
Curtailments			(1,309)
Special termination benefits			7,896
Benefits paid	(40,323)		(38,315)
Actuarial loss	13,037		17,136
Projected benefit obligation at end of period	832,800		801,818
·			
Change in plan assets:			
Fair value of plan assets at beginning of period	654,023		642,400
Actual return on plan assets	84,326		42,707
Employer contributions	6,146		7,231
Benefits paid	(40,323)		(38,315)
•			
Fair value of plan assets at end of period	704,172		654,023
	,		•
Funded status at end of year	(128,628)		(147,795)
Unrecognized actuarial loss			141,517
Unrecognized prior service cost			346
Accrued pension liability	\$ (128,628)	\$	(5,932)
	, ,		() /
Amounts recognized in the consolidated balance sheets:			
Accrued benefit liability	\$ (128,628)	\$	(125,622)
Intangible asset	,		2,362
Additional minimum pension liability, included in other comprehensive income			117,328
			,
Net amount recognized	\$ (128,628)	\$	(5,932)

Prior to being amended by SFAS No. 158, the provisions of SFAS No. 87 required the recognition of an additional minimum liability and related intangible asset to the extent that accumulated benefits exceed plan assets. As of December 31, 2005, the Company had recorded \$117.3 million to reflect the Company s minimum liability. SFAS No. 158, which was adopted on December 31, 2006, eliminated the need to recognize an additional minimum pension liability and related intangible asset.

The current portion of the Company s pension liability as reflected in Accounts payable and accrued expenses at December 31, 2006 and 2005 was \$1.3 million and \$7.9 million, respectively. The noncurrent portion of the Company s pension liability as reflected in Other noncurrent liabilities at December 31, 2006 and 2005 was \$127.3 million and \$115.4 million, respectively.

F-37

PEABODY ENERGY CORPORATION NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

As a result of the adoption of SFAS No. 158 on December 31, 2006, the accrued pension liability recorded on the consolidated balance sheet at December 31, 2006 reflects the projected benefit obligation less any portion of the obligation currently funded. The accumulated actuarial loss and prior service cost that had not yet been reflected in net periodic pension costs were included in Accumulated other comprehensive loss at December 31, 2006 as follows:

	(Dollars	in thousands)
Accumulated actuarial loss	\$	(102,060)
Prior service cost		(379)
Accumulated other comprehensive loss	\$	(102,439)

The change in Accumulated other comprehensive loss due to the application of SFAS No. 158 was as follows:

	2000111	,
	2006	2005
	(Dollars in t	housands)
Additional minimum pension liability (before SFAS No. 158)	\$ (78,110)	\$ (117,328)
Intangible asset (before SFAS No. 158)	1,908	2,362
Accumulated other comprehensive loss (before SFAS No. 158)	(76,202)	(114,966)
Net decrease in accumulated other comprehensive loss due to the adoption of SFAS No. 158	(26,237)	
Accumulated other comprehensive loss	\$ (102,439)	\$ (114,966)

The weighted-average assumptions used to determine the benefit obligations as of the end of each year were as follows:

Year Ended December 31,

December 31,

	2006	2005
Discount rate	6.00%	5.90%
Rate of compensation increase	3.50%	3.50%
Measurement date	December 31, 2006	December 31, 2005

The weighted-average assumptions used to determine net periodic benefit cost were as follows:

Year Ended December 31,

	2006	2005	2004
Discount rate	5.90%	6.10%	6.40%

Expected long-term return on plan

assets	8.75%	8.75%	8.75%
Rate of compensation increase	3.50%	3.50%	3.75%
Measurement date	December 31, 2005	December 31, 2004	December 31, 2003

The expected rate of return on plan assets is determined by taking into consideration expected long-term returns associated with each major asset class (net of inflation) based on long-term historical ranges, inflation assumptions and the expected net value from active management of the assets based on actual results.

F-38

PEABODY ENERGY CORPORATION NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The projected benefit obligation and the accumulated benefit obligation exceeded plan assets for all plans as of December 31, 2006 and 2005. The accumulated benefit obligation for all pension plans was \$808.4 million and \$779.6 million as of December 31, 2006, and 2005, respectively.

Plan Assets

Assets of the Peabody Plan and the Western Plan are commingled in the Peabody Investment Corporation Master Trust (the Master Trust) and are invested in accordance with investment guidelines that have been established by the Company s Retirement Committee (the Retirement Committee) after consultation with outside investment advisors and actuaries.

As of the year ended December 31, 2006, Master Trust assets totaled \$704.2 million and were invested in the following major asset categories:

	Percentage Allocation of Total Assets	Target Allocation
Equity securities	58.5%	55.0%
Fixed income	32.9%	35.0%
Real estate	7.6%	10.0%
Cash fund	1.0%	0.0%
Total	100.0%	100.0%

As of the year ended December 31, 2005, Master Trust assets totaled \$654.0 million and were invested in the following major asset categories:

	Percentage Allocation of Total Assets
Equity securities	55.1%
Fixed income	37.9%
Real estate	6.9%
Cash fund	0.1%
Total	100.0%

The asset allocation targets have been set with the expectation that the plan s assets will fund the plan s expected liabilities with an appropriate level of risk. To determine the appropriate target asset allocations, the Retirement Committee considers the demographics of the plan participants, the funding status of the plan, the business and financial profile of the Company and other associated risk preferences. These allocation targets are reviewed by the Retirement Committee on a regular basis and revised as necessary. Periodically, assets are rebalanced among major asset categories to maintain the allocations within a range of plus or minus 5% of the target allocation.

Plan assets are either under active management by third-party investment advisors or in index funds, all selected and monitored by the Retirement Committee. The Retirement Committee has established specific investment

guidelines for each major asset class including performance benchmarks, allowable and prohibited investment types and concentration limits. In general, the plan investment guidelines do not permit leveraging the Master Trust s assets. Equity investment guidelines do not permit entering into put or call options (except as deemed appropriate to manage currency risk), and futures contracts are permitted only to the extent necessary to equitize cash holdings.

F-39

PEABODY ENERGY CORPORATION NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Contributions

The Company expects to contribute \$6.9 million to its funded pension plans and make \$1.3 million in expected benefit payments attributable to its unfunded pension plans during 2007.

Estimated Future Benefit Payments

The following benefit payments (net of retiree contributions), which reflect expected future service, as appropriate, are expected to be paid by the Master Trust:

	Pension Benefits	
	(Dollars in thousands)	
2007	\$ 42,75	7
2008	44,97	0
2009	46,53	1
2010	48,45	3
2011	51,01	4
Years 2012-2016	301,25	7

Multi-Employer Pension Plans

Certain subsidiaries participate in multi-employer pension plans (the 1950 Plan and the 1974 Plan), which provide defined benefits to substantially all hourly coal production workers represented by the UMWA other than those covered by the Western Plan. Benefits under the UMWA plans are computed based on service with the subsidiaries or other signatory employers. There were no contributions to the multi-employer pension plans during the years ended December 31, 2006, 2005 or 2004. In December 2006, the 2007 National Bituminous Coal Wage Agreement was signed, which required funding of the 1974 Plan through 2011 under a phased funding schedule. The funding is based on an hourly rate for certain UMWA workers. Under the labor contract, the per hour funding rate increased to \$2.00 in 2007 and increases each year thereafter until reaching \$5.50 in 2011. During 2006, represented employees subject to the new rate worked a total of approximately four million hours.

Defined Contribution Plans

The Company sponsors employee retirement accounts under three 401(k) plans for eligible salaried U.S. employees. The Company matches voluntary contributions to each plan up to specified levels. The expense for these plans was \$16.5 million, \$10.7 million and \$10.2 million for the years ended December 31, 2006, 2005 and 2004, respectively. A performance contribution feature allows for additional contributions from the Company based upon meeting specified Company performance targets, and the performance contributions made by the Company were \$10.5 million, \$11.4 million and \$6.7 million for the years ended December 31, 2006, 2005 and 2004, respectively.

(16) Postretirement Health Care and Life Insurance Benefits

The Company currently provides health care and life insurance benefits to qualifying salaried and hourly retirees and their dependents from defined benefit plans established by the Company. Plan coverage for health and life insurance benefits is provided to future hourly retirees in accordance with the applicable labor agreement.

F-40

Table of Contents

PEABODY ENERGY CORPORATION NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Net periodic postretirement benefit costs included the following components:

Year Ended December 31,

	2006	2005	2004
	(Dolla	ars in thousa	nds)
Service cost for benefits earned	\$ 8,077	\$ 5,343	\$ 4,430
Interest cost on accumulated postretirement benefit obligation	73,803	72,673	63,635
Amortization of prior service cost	(4,836)	(5,339)	(13,230)
Amortization of actuarial losses	31,342	26,304	3,575
Net periodic postretirement benefit costs	\$ 108,386	\$ 98,981	\$ 58,410

The Company amortizes actuarial gains and losses using a 0% corridor with an amortization period that covers the average remaining service period of active employees (8.47 years and 8.99 years at January 1, 2006 and 2005, respectively). The estimated net actuarial loss and prior service cost that will be amortized from accumulated other comprehensive income (loss) into net periodic postretirement benefit costs during the year ended December 31, 2007 are \$43.3 million and \$3.1 million, respectively.

F-41

PEABODY ENERGY CORPORATION NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The following table sets forth the plans combined funded status reconciled with the amounts shown in the consolidated balance sheets:

December 31,

		2006	2005	
		(Dollars in t	housands)	
Change in benefit obligation:		,	ŕ

2010	95,985
2011	100,312
Years 2012-2016	568,391

Medicare and Other Plan Changes

Effective November 15, 2006, the medical premium reimbursement plan was changed for salaried employees who retired after December 31, 2004. The plan change did not apply to Powder River or Lee Ranch employees. The amendment resulted in a \$20.6 million increase to the retiree health care liability. The Company began recognizing the effect of the plan amendment over 10.25 years beginning November 15, 2006. The effect was \$0.3 million for the year ended December 31, 2006, and is estimated to be \$2.0 million for the full year ended December 31, 2007.

On December 8, 2003, the Medicare Prescription Drug, Improvement and Modernization Act of 2003 (the Act) was signed into law. The Company elected not to defer the effects of the Act as discussed in FASB Staff Position 106-1, Accounting and Disclosure Requirements Related to the Medicare Prescription Drug, Improvement and Modernization Act of 2003. Additionally, the Company did not elect the federal subsidy provisions of the Act; rather the Company coordinated benefits with available Medicare coverage considered the primary payer, whether or not the beneficiary enrolled and paid the required premiums.

The Company recognized a reduction in the benefit obligation on two distinct components. For plans that required amendment to incorporate the Act, the Company recognized a liability reduction of \$19.1 million. This reduction was treated as a negative plan amendment and is being amortized to income over six years beginning December 15, 2003. For plans that did not require amendment, the Company recognized a liability reduction of \$162.4 million. The reduction was treated as a change in the estimated cost to provide benefits to Medicare eligible beneficiaries constituting a component of the cumulative actuarial gain or loss subject to amortization in accordance with the Company s amortization method.

In July 2001, the Company adopted changes to the prescription drug program. Effective January 1, 2002, an incentive mail order and comprehensive utilization management program was added to the prescription drug program. At the time of adoption, the effect of the change on the retiree health care liability was \$38.4 million. The Company began recognizing the effect of the plan amendment over three years beginning July 1, 2001. Net periodic postretirement benefit costs were reduced by \$6.4 million for the year ended December 31, 2004, for this change.

In January 1999, the Company adopted reductions to the salaried employee medical coverage levels for employees retiring before January 1, 2003, which was changed to January 1, 2005, in 2002. For F-44

Table of Contents

PEABODY ENERGY CORPORATION NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

employees retiring on or after January 1, 2005, the previous medical plan was replaced with a medical premium reimbursement plan. This plan change did not apply to Powder River or Lee Ranch salaried employees. The change in the retiree health care plan resulted in a \$22.4 million reduction to the salaried retiree health care liability. The Company began recognizing the effect of the plan amendment over nine years beginning January 1, 1999. The effect was \$1.0 million, \$1.0 million and \$2.5 million for the years ended December 31, 2006, 2005 and 2004, respectively.

Multi-Employer Benefit Plans

Retirees formerly employed by certain subsidiaries and their predecessors, who were members of the UMWA, last worked before January 1, 1976 and were receiving health benefits on July 20, 1992, receive health benefits provided by the Combined Fund, a fund created by the Coal Act. The Coal Act requires former employers (including certain subsidiaries of the Company) and their affiliates to contribute to the Combined Fund according to a formula.

The Company has recorded an actuarially determined liability representing the amounts anticipated to be due to the Combined Fund. The noncurrent portion related to this obligation as reflected within Other noncurrent liabilities in the consolidated balance sheets as of December 31, 2006 and 2005, was \$25.6 million and \$27.9 million, respectively. The current portion related to this obligation reflected in Accounts payable and accrued expenses in the consolidated balance sheets as of December 31, 2006 and 2005, was \$5.2 million and \$8.8 million, respectively.

Expense of \$2.5 million was recognized related to the Combined Fund for the year ended December 31, 2006, and consisted of interest discount of \$2.4 million and amortization of actuarial loss of \$0.1 million. Expense of \$0.9 million was recognized related to the Combined Fund for the year ended December 31, 2005, and consisted of interest discount of \$1.0 million and amortization of actuarial gain of \$0.1 million. Expense of \$4.9 million was recognized related to the Combined Fund for the year ended December 31, 2004, and consisted of interest discount of \$3.8 million and amortization of actuarial loss of \$1.1 million. The Company made contributions of \$8.3 million, \$4.0 million and \$16.6 million to the Combined Fund for the years ended December 31, 2006, 2005 and 2004, respectively.

The Coal Act also established the 1992 Benefit Plan, which provides medical and death benefits to persons who are not eligible for the Combined Fund, who retired prior to October 1, 1994 and whose employer and any affiliates are no longer in business. A prior national labor agreement established the 1993 Benefit Plan to provide health benefits for retired miners not covered by the Coal Act. The 1993 Benefit Plan provides benefits to qualifying retired former employees, who retired after September 30, 1994, of certain signatory companies which have gone out of business and defaulted in providing their former employees with retiree medical benefits. Beneficiaries continue to be added to this fund as employers go out of business. The 1992 Benefit Plan and the 1993 Benefit Plan qualify under SFAS No. 106 as multi-employer benefit plans, which allows the Company to recognize expense as contributions are made. The expense related to these funds was \$5.7 million, \$4.0 million and \$4.4 million for the years ended December 31, 2006, 2005 and 2004, respectively.

The Surface Mining Control and Reclamation Act Amendments of 2006 (the 2006 Act), which was enacted in December 2006, amended the federal laws establishing the Combined Fund, 1992 Benefit Plan and the 1993 Benefit Plan. Among other things, the 2006 Act guarantees full funding of all beneficiaries in the Combined Fund, provides funds on a phased-in basis for the 1992 Benefit Plan, and authorizes the trustees of the 1993 Benefit Plan to determine the contribution rates through 2010 for pre-2007 beneficiaries. The new and additional federal expenditures to the Combined Fund, 1992 Benefit Plan, 1993 Benefit Plan and certain Abandoned Mine Land payments to the states and Indian tribes are collectively limited by an aggregate annual cap of \$490 million. To the extent that (i) the annual funding of the programs exceeds this amount (plus the amount of interest from the Abandoned Mine Land trust

Table of Contents

PEABODY ENERGY CORPORATION NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

fund paid with respect to the Combined Benefit Fund), and (ii) Congress does not allocate additional funds to cover the shortfall, contributing employers and affiliates, including some of the Company s subsidiaries, would be responsible for the additional costs.

Pursuant to the provisions of the Coal Act and the 1992 Benefit Plan, the Company was required to provide security in an amount equal to three times the annual cost of providing health care benefits for all individuals receiving benefits from the 1992 Benefit Plan who are attributable to the Company, plus all individuals receiving benefits from an individual employer plan maintained by the Company who are entitled to receive such benefits. In accordance with the 1992 Benefit Plan, the Company had outstanding letters of credit of \$119.4 million as of December 31, 2006, to secure the Company s obligation. Beginning in 2007, the amount of security the Company is required to provide for the 1992 Plan is reduced to one times the annual cost to provide the above mentioned health care benefits.

(17) Stockholders Equity

Common Stock

The Company has 800.0 million authorized shares of \$0.01 par value common stock. Holders of common stock are entitled to one vote per share on all matters to be voted upon by the stockholders. The holders of common stock do not have cumulative voting rights in the election of directors. Holders of common stock are entitled to receive ratably dividends if, as and when dividends are declared from time to time by the Board of Directors out of funds legally available for that purpose, after payment of dividends required to be paid on outstanding preferred stock or series common stock. Upon liquidation, dissolution or winding up, any business combination or a sale or disposition of all or substantially all of the assets, the holders of common stock are entitled to receive ratably the assets available for distribution to the stockholders after payment of liabilities and accrued but unpaid dividends and liquidation preferences on any outstanding preferred stock or series common stock. The common stock has no preemptive or conversion rights and is not subject to further calls or assessment by the Company. There are no redemption or sinking fund provisions applicable to the common stock.

Effective February 22, 2006, the Company implemented a two-for-one stock split on all shares of its common stock. The Company had a similar two-for-one stock split on March 30, 2005. All share and per share amounts in these consolidated financial statements and related notes reflect the stock splits.

On March 23, 2004, the Company completed an offering of 35.3 million shares of the Company s common stock, priced at \$11.25 per share. Net proceeds from the offering, after deducting underwriting discounts and commissions and other expenses, were \$383.1 million, and were primarily used, as discussed in Note 4, to fund the acquisition of three coal operations from RAG Coal International AG.

Preferred Stock and Series Common Stock

In addition to the common stock, the Board of Directors is authorized to issue up to 10.0 million shares of preferred stock and up to 40.0 million shares of series common stock. The Board of Directors is authorized to determine the terms and rights of each series, including the number of authorized shares, whether dividends (if any) will be cumulative or non-cumulative and the dividend rate of the series, redemption or sinking fund provisions, conversion terms, prices and rates, and amounts payable on shares of the series in the event of any voluntary or involuntary liquidation, dissolution or winding up of the affairs of the Company. The Board of Directors may also determine restrictions on the issuance of shares of the same series or of any other class or series, and the voting rights (if any) of the holders of the series. There were no outstanding shares of preferred stock or series common stock as of December 31, 2006.

Perpetual Preferred Stock

As discussed in Note 12, the Company issued \$732.5 million aggregate principal amount of Debentures on December 20, 2006. Perpetual preferred stock issued upon a conversion of Debentures will be fully paid and non-assessable, and holders will have no preemptive or preferential right to purchase any of the Company s other securities. The perpetual preferred stock has a liquidation preference of \$1,000 per share, is not convertible and is redeemable at the Company s option at any time at a cash redemption price per share equal to the liquidation preference plus any accumulated dividends. Holders are entitled to receive cumulative dividends at an annual rate of 3.0875% if and when declared by the Company s Board of Directors. After the Company has failed to pay dividends on the perpetual preferred stock for five years, or upon the occurrence of a mandatory trigger event, as defined in the

F-47

Table of Contents

PEABODY ENERGY CORPORATION NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

the perpetual preferred stock, the Company generally must sell warrants or preferred stock with specified characteristics and use the funds from that sale to pay accumulated dividends after the payment in full of any deferred interest on the Debentures, subject to certain limitations. In the event of a mandatory trigger event, the Company may not declare dividends on the perpetual preferred stock other than those funded through the sale of warrants or preferred stock as described above. Any deferred interest on the Debentures at the time of notice of conversion will be reflected as accumulated dividends on the perpetual preferred stock at issuance. Additionally, holders of the perpetual preferred stock are entitled to elect two additional members to serve on the Company s Board of Directors if (i) prior to any remarketing of the perpetual preferred stock, the Company fails to declare and pay dividends with respect to the perpetual stock for ten consecutive years or (ii) after any successful remarketing or any final failed remarketing of the perpetual preferred stock, the Company fails to declare and pay six dividends thereon, whether or not consecutive. The perpetual preferred stock may be remarketed at the holder s election after December 15, 2046 or earlier, upon the first occurrence of a change of control if the Company does not redeem the perpetual preferred stock. There were no outstanding shares of perpetual preferred stock as of December 31, 2006.

Preferred Share Purchase Rights Plan and Series A Junior Participating Preferred Stock

Each outstanding share of common stock, par value \$0.01 per share, of the Company carries one preferred share purchase right (a Right). The Rights are governed by a plan that expires in August 2012.

The Rights have certain anti-takeover effects. The Rights will cause substantial dilution to a person or group that attempts to acquire the Company on terms not approved by the Company s Board of Directors, except pursuant to any offer conditioned on a substantial number of Rights being acquired. The Rights should not interfere with any merger or other business combination approved by the Board of Directors since the Rights may be redeemed by the Company at a redemption price of \$0.001 per Right prior to the time that a person or group has acquired beneficial ownership of 15% or more of the common stock of the Company. In addition, the Board of Directors is authorized to reduce the 15% threshold to not less than 10%.

Each Right entitles the holder to purchase one quarter of one-hundredth of a share of series A junior participating preferred stock from the Company at an exercise price of \$27.50, which in turn provides rights to receive the number of common stock shares having a market value of two times the exercise price of the Right. The Right is exercisable only if a person or group acquires 15% or more of the Company s common stock. The Board of Directors is authorized to issue up to 1.5 million shares of series A junior participating preferred stock. There were no outstanding shares of series A junior participating preferred stock as of December 31, 2006.

Treasury Stock

In July 2005, the Company s Board of Directors authorized a share repurchase program of up to 5% of the then outstanding shares of its common stock, or approximately 13.1 million shares. The repurchases may be made from time to time based on an evaluation of the Company s outlook and general business conditions, as well as alternative investment and debt repayment options. During the year ended December 31, 2006, the Company repurchased 2,184,958 of its common shares at a cost of \$99.8 million.

During the year ended December 31, 2004, the Company received 20,136 shares of common stock as consideration for employees exercise of stock options. The value of the common stock tendered by employees to exercise stock options was based upon the closing price on the dates of the respective transactions. The common stock tenders were in accordance with the provisions of the 1998 Stock Purchase and Option Plan, which was previously approved by the Company s Board of Directors.

F-48

PEABODY ENERGY CORPORATION NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(18) Share-Based Compensation

The Company recognizes share-based compensation expense in accordance with SFAS No. 123(R), which it adopted on January 1, 2006, and utilizes restricted stock, nonqualified stock options, performance units, and an employee stock purchase plan as part of its share-based compensation program. The Company has four equity incentive plans for employees and non-employee directors that in the aggregate allow for the issuance of share-based compensation in the form of stock appreciation rights, restricted stock, performance awards, incentive stock options, nonqualified stock options and stock units. Members of the Company s Board of Directors are eligible for stock option and restricted stock grants at the date of their election and annually in January. These plans made 47.4 million shares of the Company s common stock available for grant, with 15.0 million shares available for grant as of December 31, 2006. Additionally, in 2001, the Company established an employee stock purchase plan that provided for the purchase of up to 6.0 million shares of the Company s common stock.

The Company began utilizing restricted stock as part of its equity-based compensation strategy in January 2005. Accounting for restricted stock awards was not changed by the adoption of SFAS No. 123(R). The Company recognized \$4.2 million and \$0.9 million of expense, net of taxes, for the years ended December 31, 2006 and 2005, respectively, related to restricted stock. For share-based payment instruments excluding restricted stock, the Company recognized \$17.7 million (or \$0.07 per diluted share), \$24.8 million (or \$0.09 per diluted share) and \$12.8 million (or \$0.05 per diluted share) of expense, net of taxes, for the years ended December 31, 2006, 2005 and 2004, respectively. As a result of adopting SFAS No. 123(R), the Company s net income for the year ended December 31, 2006 was \$4.4 million (or \$0.02 per diluted share) lower than if it had continued to account for share-based compensation under APB Opinion No. 25. Share-based compensation expense is recorded in Selling and administrative expenses in the consolidated statements of operations. As of December 31, 2006, the total unrecognized compensation cost related to nonvested awards was \$24.0 million, net of taxes, which is expected to be recognized over 5.0 years with a weighted-average period of 1.3 years.

The Company used the Black-Scholes option pricing model to determine the fair value of stock options and employee stock purchase plan share-based payments made before and after the adoption of SFAS No. 123(R). The Company utilized U.S. Treasury yields as of the grant date for its risk-free interest rate assumption, matching the treasury yield terms to the expected life of the option or vesting period of the performance unit awards. The Company utilized historical, company data to develop its dividend yield, expected volatility and expected option life assumptions.

Stock Options

Employee and director stock options granted since the Company s initial public offering (IPO) of common stock in May 2001 generally vest ratably over three years and expire after ten years from the date of the grant, subject to earlier termination upon discontinuation of an employee s service. Options granted prior to the IPO generally cliff vest in 2007 and 2010. Of the 9.3 million options outstanding at December 31, 2006, 4.1 million options cliff vest in November 2007. Option grants are typically made in January of each year or following the inception of employment for employees hired during the year who are eligible to participate in the plan. The fair value of each option grant is estimated on the date of grant using the Black-Scholes option-pricing model. The Company recognized expense, net of taxes, of \$4.7 million, \$0.1 million and \$0.2 million for the years ended December 31, 2006, 2005 and 2004, respectively, related to stock option grants to employees and non-employee directors.

F-49

Vested and exercisable options:					
Granted Pre-IPO	235,720				
Granted Post-IPO	2,279,950				
	2,515,670				

During the years ended December 31, 2006, 2005 and 2004, the total intrinsic value of options exercised, defined as the excess fair value of the underlying stock over the exercise price of the options, was \$84.2 million, \$77.6 million and \$40.5 million, respectively. The weighted-average fair values of the Company s stock options and the assumptions used in applying the Black-Scholes option pricing model (for grants during the years ended December 31, 2006, 2005 and 2004) were as follows:

		December 31,			
	2006	2005	2004		
Weighted-average fair value	\$ 16.52	\$ 8.03	\$ 4.46		
Risk-free interest rate	4.3%	3.6%	3.9%

Performance Units

Performance units, which are typically granted annually in January, vest over a three-year measurement period, subject to the achievement of performance goals and stock price performance at the conclusion of the three years. Three performance unit grants were outstanding during 2006 (the 2004, 2005 and 2006 grants) and 2005 (the 2003, 2004 and 2005 grants). The payout related to the 2003 grant (which was settled in cash in February 2006) was based on the Company s stock price performance compared to both an industry peer group and a S&P index. The payouts related to the 2004 grant (which will be settled in cash in January 2007) and 2005 and 2006 grants (which will be settled in common stock in 2008 and 2009, respectively) are based 50% on stock price performance compared to both an industry peer group and a S&P index (a market condition under SFAS No. 123(R)) and 50% on a return on capital target (a performance condition under SFAS No. 123(R)). During the years ended December 31, 2006, 2005, and 2004, the Company granted 0.2 million, 0.2 million and 0.5 million performance units in each period, respectively. Under APB Opinion No. 25, all of the performance unit awards were accounted for as variable awards. Under SFAS No. 123(R), the awards settled in cash are accounted for as liability awards and adjusted to fair value at each period-end, and the awards settled in common stock are accounted for based on their grant date fair value. The performance condition awards were valued utilizing the grant date fair values of the Company s stock adjusted for dividends foregone during the vesting period. The market condition awards were valued utilizing a Monte Carlo simulation which incorporates the total shareholder return hurdles set for each grant. The Company recognized expense, net of taxes, of \$11.7 million, \$24.7 million, and \$12.6 million for the years ended December 31, 2006, 2005, and 2004, respectively, related to performance units. The assumptions used in the valuations for grants during the years ended December 31, 2006 and 2005 were as follows:

	Decemb	ber 31,
	2006	2005
Risk-free interest rate	4.3%	3.3%
Expected volatility	36%	40%
Dividend yield	0.8%	1.0%

PEABODY ENERGY CORPORATION NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Employee Stock Purchase Plan

Based on the Company s employee stock purchase plan, eligible full-time and part-time employees are able to contribute up to 15% of their base compensation into this plan, subject to a limit of \$25,000 per person per year. Employees are able to purchase Company common stock at a 15% discount to the lower of the fair market value of the Company s common stock on the initial or final trading dates of each six-month offering period. Offering periods begin on January 1 and July 1 of each year. The fair value of the six-month look-back option in the Company s employee stock purchase plan is estimated by adding the fair value of 0.15 of one share of stock to the fair value of 0.85 of an option on one share of stock. The Company recognized expense, net of taxes, of \$1.3 million for the year ended December 31, 2006 related to its employee stock purchase plan. Shares purchased under the plan were 0.2 million, 0.2 million and 0.3 million for the years ended December 31, 2006, 2005 and 2004, respectively.

PEABODY ENERGY CORPORATION NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Comprehensive income differs from net income by the amount of unrealized gain or loss resulting from valuation changes of the Company s cash flow hedges (which include fuel and natural gas hedges, currency forwards and interest rate swaps) during the periods, and for the year ended December 31, 2006, the adjustment required by SFAS No. 158 to record the funded status of the Company s pension and other post-retirement benefit plans. The values of the Company s cash flow hedging instruments are affected by changes in interest rates, crude oil, heating oil and natural gas prices and the U.S. dollar/ Australian dollar exchange rate.

(20) Related Party Transactions

On March 23, 2004, August 4, 2003, and May 7, 2003, Lehman Brothers Merchant Banking Partners II L.P. and affiliates (Merchant Banking Fund), the Company s largest stockholder as of those dates, sold 41.1 million, 21.6 million, and 22.5 million shares, respectively, of the Company s common stock. The Company did not receive any proceeds from the sales of shares by Merchant Banking Fund. The March 2004 offering completed Merchant Banking Fund s planned exit strategy and eliminated the remaining portion of their beneficial ownership of the Company.

Lehman Brothers Inc. (Lehman Brothers) is an affiliate of the Merchant Banking Fund. In March 2004, Morgan Stanley and Lehman Brothers served as joint managers in connection with the secondary equity offering discussed above. Lehman Brothers received from third parties customary underwriting discounts and commissions from the offering. The Company paid no fees to Lehman Brothers related to the secondary equity offerings.

Lehman Brothers served as lead underwriter in connection with the Company s sale of limited partner interests in PVR in March 2004 and December 2003, as discussed in Note 9 above. Lehman Brothers received customary fees, plus reimbursement of certain expenses, for those services.

(21) Guarantees and Financial Instruments With Off-Balance-Sheet Risk

In the normal course of business, the Company is a party to guarantees and financial instruments with off-balance-sheet risk, such as bank letters of credit, performance or surety bonds and other guarantees and indemnities, which are not reflected in the accompanying consolidated balance sheets. Such financial instruments are valued based on the amount of exposure under the instrument and the likelihood of required performance. In the Company s past experience, virtually no claims have been made against these financial instruments. Management does not expect any material losses to result from these guarantees or off-balance-sheet instruments.

Letters of Credit and Bonding

The Company has letters of credit, surety bonds and corporate guarantees (such as self bonds) in support of the Company s reclamation, lease, workers compensation, retiree healthcare and other obligations as follows as of December 31, 2006:

	Reclamation Obligations	Lease Obligations	Workers Compensation Obligations (Dollars in	Retiree Healthcare Obligations thousands)	Other ⁽¹⁾	Total
Self Bonding	\$ 685,235	\$	\$	\$	\$ 2,917	\$ 688,152
Surety Bonds	441,524	83,877	31,646		27,245	584,292
Letters of Credit	4,125	20,282	156,826	119,397	208,783	509,413
	\$ 1,130,884	\$ 104,159	\$ 188,472	\$ 119,397	\$ 238,945	\$ 1,781,857

F-53

PEABODY ENERGY CORPORATION NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

⁽¹⁾ Other includes the three letter of credit obligations described below and an additional \$54.1 million in self-bonding, letters of credit and surety bonds related to collateral for surety companies, road maintenance, performance guarantees and other operations.

The Company owns a 30.0% interest in a partnership that leases a coal export terminal from the Peninsula Ports Authority of Virginia under a 30-year lease that permits the partnership to purchase the terminal at the end of the lease term for a nominal amount. The partners have severally (but not jointly) agreed to make payments under various agreements which in the aggregate provide the partnership with sufficient funds to pay rents and to cover the principal and interest payments on the floating-rate industrial revenue bonds issued by the Peninsula Ports Authority, and which are supported by letters of credit from a commercial bank. As of December 31, 2006, the Company s maximum reimbursement obligation to the commercial bank was in turn supported by a letter of credit totaling \$42.8 million.

The Company is party to an agreement with the Pension Benefit Guarantee Corporation (PBGC) and TXU Europe Limited, an affiliate of the Company's former parent corporation, under which the Company is required to make special contributions to two of the Company's defined benefit pension plans and to maintain a \$37.0 million letter of credit in favor of the PBGC. If the Company or the PBGC gives notice of an intent to terminate one or more of the covered pension plans in which liabilities are not fully funded, or if the Company fails to maintain the letter of credit, the PBGC may draw down on the letter of credit and use the proceeds to satisfy liabilities under the Employee Retirement Income Security Act of 1974, as amended. The PBGC, however, is required to first apply amounts received from a \$110.0 million guarantee in place from TXU Europe Limited in favor of the PBGC before it draws on the Company's letter of credit. On November 19, 2002 TXU Europe Limited was placed under the administration process in the United Kingdom (a process similar to bankruptcy proceedings in the United States) and continues under this process as of December 31, 2006. As a result of these proceedings, TXU Europe Limited may be liquidated or otherwise reorganized in such a way as to relieve it of its obligations under its guarantee.

In conjunction with the acquisition of Excel, the Company issued a \$105.0 million letter of credit as collateral for bank guarantees issued with respect to certain reclamation and performance obligations.

Other Guarantees

As part of arrangements through which the Company obtains exclusive sales representation agreements with small coal mining companies (the Counterparties), the Company issued financial guarantees on behalf of the Counterparties. These guarantees facilitate the Counterparties efforts to obtain bonding or financing. In July 2006, the Company issued \$5.2 million of financial guarantees, expiring at various dates through July 2013, on behalf of a certain Counterparty to facilitate its efforts in obtaining financing. In the event of default, the Company has multiple recourse options, including the ability to assume the loans and procure title and use of the equipment purchased through the loans. If default occurs, the Company has the ability and intent to exercise its recourse options, so the liability associated with the guarantee has been valued at zero. The Company also guaranteed bonding for a partnership in which it formerly held an interest. The aggregate amount guaranteed by the Company for all such Counterparties was \$12.1 million, and the fair value of the guarantees recognized as a liability was \$0.4 million as of December 31, 2006. The Company s obligations under the guarantees extend to September 2015.

In March 2006, the Company issued a guarantee for certain equipment lease arrangements on behalf of one of the sales representation parties with maximum potential future payments totaling \$2.7 million at December 31, 2006, and with lease terms that extend to April 2010. The Company has multiple recourse options in the event of default, including the ability to assume the lease and procure use of the equipment

F-54

Table of Contents

PEABODY ENERGY CORPORATION NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

or to settle the lease and take title to the assets. If default occurs, the Company has the ability and intent to exercise its recourse options, so the liability associated with the guarantee has been valued at zero.

The Company is the lessee under numerous equipment and property leases. It is common in such commercial lease transactions for the Company, as the lessee, to agree to indemnify the lessor for the value of the property or equipment leased, should the property be damaged or lost during the course of the Company s operations. The Company expects that losses with respect to leased property would be covered by insurance (subject to deductibles). The Company and certain of its subsidiaries have guaranteed other subsidiaries performance under their various lease obligations. Aside from indemnification of the lessor for the value of the property leased, the Company s maximum potential obligations under its leases are equal to the respective future minimum lease payments as presented in Note 9, and the Company assumes that no amounts could be recovered from third parties.

The Company has provided financial guarantees under certain long-term debt agreements entered into by its subsidiaries, and substantially all of the Company s subsidiaries provide financial guarantees under long-term debt agreements entered into by the Company. The maximum amounts payable under the Company s debt agreements are equal to the respective principal and interest payments. See Note 12 for the descriptions of the Company s (and its subsidiaries) debt. Supplemental guarantor/non-guarantor financial information is provided in Note 26.

In connection with the sale of Citizens Power LLC (Citizens Power), the Company has indemnified the buyer from certain losses resulting from specified power contracts and guarantees. The indemnity is described in detail in Note 23. A discussion of the Company s accounts receivable securitization is included in Note 6 to the consolidated financial statements.

(22) Fair Value of Financial Instruments

The following methods and assumptions were used by the Company in estimating its fair value disclosures for financial instruments as of December 31, 2006 and 2005:

Cash and cash equivalents, accounts receivable and accounts payable and accrued expenses have carrying values which approximate fair value due to the short maturity or the financial nature of these instruments.

The fair value of the Company s coal trading assets and liabilities was determined as described in Note 5.

Long-term debt fair value estimates are based on observed prices for securities with an active trading market when available, and otherwise on estimated borrowing rates to discount the cash flows to their present value. The 7.875% Senior Notes due 2026 and the 5.0% Subordinated Note carrying amount are net of unamortized note discount.

The fair values of interest rate swap contracts, currency forward contracts, explosives hedge contracts and fuel hedge contracts were provided by the respective contract counterparties, and were based on benchmark transactions entered into on terms substantially similar to those entered into by the Company and the contract counterparties. Based on these estimates as of December 31, 2006, the Company would have paid \$10.9 million and \$6.6 million, respectively, upon liquidation of its interest rate swaps and explosives hedges and would have received \$64.1 million and \$12.9 million, respectively, upon liquidation of its currency forwards and diesel fuel hedges.

At December 31, 2005, Other noncurrent liabilities included a deferred purchase obligation related to the prior purchase of a mine facility. The fair value estimate was based on the same assumption as long-term debt. This obligation was paid in full during 2006.

F-55

PEABODY ENERGY CORPORATION NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The carrying amounts and estimated fair values of the Company s debt and deferred purchase obligation are summarized as follows:

	December 31, 2006		Decembe	r 31, 2005
	Carrying Amount	Estimated Fair Value	Carrying Amount	Estimated Fair Value
		(Dollars in	thousands)	
Long-term debt Deferred purchase obligation	\$3,263,826	\$3,297,384	\$1,405,506 1,397	\$1,389,666 1,402

See Note 2 for a discussion of the Company s derivative financial instruments.

(23) Commitments and Contingencies

Commitments

As of December 31, 2006, purchase commitments for capital expenditures were \$125.8 million. Commitments for expenditures to be made under coal leases are reflected in Note 9.

Litigation Relating to Continuing Operations

Navajo Nation Litigation

On June 18, 1999, the Navajo Nation served three of the Company s subsidiaries, including Peabody Western Coal Company (Peabody Western), with a complaint that had been filed in the U.S. District Court for the District of Columbia. The Navajo Nation has alleged 16 claims, including Civil Racketeer Influenced and Corrupt Organizations Act (RICO) violations and fraud. The complaint alleges that the defendants jointly participated in unlawful activity to obtain favorable coal lease amendments. The plaintiff is seeking various remedies including actual damages of at least \$600 million, which could be trebled under the RICO counts, punitive damages of at least \$1 billion, a determination that Peabody Western s two coal leases have terminated due to Peabody Western s breach of these leases and a reformation of these leases to adjust the royalty rate to 20%. Subsequently, the court allowed the Hopi Tribe to intervene in this lawsuit and the Hopi Tribe is also seeking unspecified actual damages, punitive damages and reformation of its coal lease. On March 4, 2003, the U.S. Supreme Court issued a ruling in a companion lawsuit involving the Navajo Nation and the United States rejecting the Navajo Nation s allegation that the United States breached its trust responsibilities to the Tribe in approving the coal lease amendments. On February 9, 2005, the U.S. District Court for the District of Columbia granted a consent motion to stay the litigation until further order of the court. Peabody Western, the Navajo Nation, the Hopi Tribe and the owners of the power plants served by the suspended Black Mesa mine and the Kayenta mine are in mediation with respect to this litigation and other business issues.

The outcome of this litigation, or the current mediation, is subject to numerous uncertainties. Based on the Company s evaluation of the issues and their potential impact, the amount of any future loss cannot be reasonably estimated. However, the Company believes this matter is likely to be resolved without a material adverse effect on its financial condition, results of operations or cash flows.

Salt River Project Agricultural Improvement and Power District Mine Closing and Retiree Health Care Salt River Project and the other owners of the Navajo Generating Station filed a lawsuit on September 27, 1996, in the Superior Court of Maricopa County in Arizona seeking a declaratory judgment that certain costs relating to final reclamation, environmental monitoring work and mine decommissioning and costs primarily relating to retiree health care benefits are not recoverable by the Company s subsidiary, Peabody Western, under the terms of a coal supply agreement dated February 18, 1977. The contract

Table of Contents

PEABODY ENERGY CORPORATION NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

expires in 2011. The trial court subsequently ruled that the mine decommissioning costs were subject to arbitration but that the retiree health care costs were not subject to arbitration. The Company has recorded a receivable for mine decommissioning costs of \$76.8 million and \$74.2 million included in Investments and other assets in the consolidated balance sheets as of December 31, 2006 and 2005, respectively.

The outcome of this litigation and arbitration is subject to numerous uncertainties. Based on the Company s evaluation of the issues and their potential impact, the amount of any future loss cannot be reasonably estimated. However, the Company believes this matter is likely to be resolved without a material adverse effect on its financial condition, results of operations or cash flows.

Gulf Power Company Litigation

On June 21, 2006, the Company s subsidiary filed a complaint in the U.S. District Court, Southern District of Illinois, seeking a declaratory judgment upholding its declaration of a permanent force majeure under a coal supply agreement with Gulf Power Company. On June 22, 2006, Gulf Power Company filed a breach of contract lawsuit against the Company s subsidiary in the U.S. District Court, Northern District of Florida, contesting the force majeure declaration and seeking damages for alleged past and future tonnage shortfalls of nearly 5 million tons under the coal supply agreement, which would have expired on December 31, 2007. The parties have filed motions to determine which court will hear the lawsuits. On October 6, 2006, the Florida District Court stayed Gulf Power s lawsuit until the Illinois court decides whether it has jurisdiction.

The outcome of this litigation is subject to numerous uncertainties. Based on the Company s evaluation of the issues and their potential impact, the amount of any future loss cannot reasonably be estimated. However, the Company believes this matter is likely to be resolved without a material adverse effect on its financial condition, results of operations or cash flows.

Claims and Litigation relating to Indemnities or Historical Operations

Citizens Power

In connection with the August 2000 sale of the Company s former subsidiary, Citizens Power LLC (Citizens Power), the Company has indemnified the buyer, Edison Mission Energy, from certain losses resulting from specified power contracts and guarantees. During the period that Citizens Power was owned by the Company, Citizens Power guaranteed the obligations of two affiliates to make payments to third parties for power delivered under fixed-priced power sales agreements with terms that extend through 2008. Edison Mission Energy has stated and the Company believes there will be sufficient cash flow to pay the power suppliers, assuming timely payment by the power purchasers. There is no pending litigation with respect to these indemnities at this time. In 2004, the Company incurred costs related to restructuring one of the indemnified power purchase agreements of \$2.8 million, net of a tax benefit of \$1.9 million. These amounts are classified within discontinued operations in the statement of operations.

Oklahoma Lead Litigation

Gold Fields Mining, LLC (Gold Fields) is a dormant, non-coal producing entity that was previously managed and owned by Hanson PLC, the Company s predecessor owner. In a February 1997 spin-off, Hanson PLC transferred ownership of Gold Fields to the Company, despite the fact that Gold Fields had no ongoing operations and the Company had no prior involvement in its past operations. Today Gold Fields is one of the Company s subsidiaries. The Company indemnified TXU Group with respect to certain claims relating to a former affiliate of Gold Fields. A predecessor of Gold Fields formerly operated

F-57

Table of Contents

PEABODY ENERGY CORPORATION NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

two lead mills near Picher, Oklahoma prior to the 1950s and mined, in accordance with lease agreements and permits, approximately 0.15% of the total amount of the crude ore mined in the county.

Gold Fields and two other companies are defendants in two class action lawsuits. The plaintiffs have asserted claims predicated on allegations of intentional lead exposure by the defendants and are seeking compensatory damages, punitive damages and the implementation of medical monitoring and relocation programs for the affected individuals. Gold Fields is also a defendant, along with other companies, in several personal injury lawsuits involving over 50 children, arising out of the same lead mill operations. Plaintiffs in these actions are seeking compensatory and punitive damages for alleged personal injuries from lead exposure. The first personal injury trial has been scheduled for March 2007 and Gold Fields along with the former affiliate will be the only defendants. In December 2003, the Quapaw Indian tribe and certain Quapaw land owners filed a class action lawsuit against Gold Fields and five other companies. The plaintiffs are seeking compensatory and punitive damages based on a variety of theories. Gold Fields has filed a third-party complaint against the United States, and other parties. In February 2005, the state of Oklahoma on behalf of itself and several other parties sent a notice to Gold Fields and other companies regarding a possible natural resources damage claim. All of the lawsuits are pending in the U.S. District Court for the Northern District of Oklahoma.

The outcome of litigation and these claims are subject to numerous uncertainties. Based on the Company s evaluation of the issues and their potential impact, the amount of any future loss cannot be reasonably estimated. However, the Company believes this matter is likely to be resolved without a material adverse effect on its financial condition, results of operations or cash flows.

Environmental Claims and Litigation

The Company is subject to applicable federal, state and local environmental laws and regulations in those countries where it conducts operations. Current and past mining operations in the United States are primarily covered by the Surface Mining Control and Reclamation Act of 1977, the Clean Water Act and the Clean Air Act but also include the Comprehensive Environmental Response, Compensation and Liability Act of 1980, as amended (CERCLA or Superfund), the Superfund Amendments and Reauthorization Act of 1986 and the Resource Conservation and Recovery Act of 1976. Superfund and similar state laws create liability for investigation and remediation in response to releases of hazardous substances in the environment and for damages to natural resources. Under that legislation and many state Superfund statutes, joint and several liability may be imposed on waste generators, site owners and operators and others regardless of fault. These regulations could require us to do some or all of the following: (i) remove or mitigate the effects on the environment at various sites from the disposal or release of certain substances; (ii) perform remediation work at such sites; and (iii) pay damages for loss of use and non-use values.

The Company s policy is to accrue environmental cleanup-related costs of a non-capital nature when those costs are believed to be probable and can be reasonably estimated. The quantification of environmental exposures requires an assessment of many factors, including the nature and extent of contamination, the timing, extent and method of the remedial action, changing laws and regulations, advancements in environmental technologies, the quality of information available related to specific sites, the assessment stage of each site investigation, preliminary findings and the length of time involved in remediation or settlement. The Company also assesses the financial capability and proportional share of costs of other PRPs and, where allegations are based on tentative findings, the reasonableness of its apportionment. The Company has not anticipated any recoveries from insurance carriers in the estimation of liabilities recorded in its consolidated balance sheets.

Although waste substances generated by coal mining and processing are generally not regarded as hazardous substances for the purposes of Superfund and similar legislation and are generally covered by

F-58

Table of Contents

PEABODY ENERGY CORPORATION NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

the Surface Mining Control and Reclamation Act of 1977, some products used by coal companies in operations, such as chemicals, and the disposal of these products are governed by the Superfund statute. Thus, coal mines currently or previously owned or operated by the Company, and sites to which the Company has sent waste materials, may be subject to liability under Superfund and similar state laws.

Environmental claims have been asserted against Gold Fields related to activities of Gold Fields or a former affiliate. Gold Fields or the former affiliate has been named a potentially responsible party (PRP) based on CERCLA at five sites, and claims have been asserted at 18 other sites. The number of PRP sites in and of itself is not a relevant measure of liability, because the nature and extent of environmental concerns varies by site, as does the estimated share of responsibility for Gold Fields or the former affiliate. Undiscounted liabilities for environmental cleanup-related costs for all of the sites noted above were \$43.0 million as of December 31, 2006 and \$42.5 million as of December 31, 2005, \$14.4 million and \$23.6 million of which was reflected as a current liability, respectively. These amounts represent those costs that the Company believes are probable and reasonably estimable. In September 2005, Gold Fields and other PRPs received a letter from the U.S. Department of Justice alleging that the PRPs mining operations caused the Environmental Protection Agency (EPA) to incur approximately \$125 million in residential vard remediation costs at Picher, Oklahoma and will cause the EPA to incur additional remediation costs relating to historical mining sites. Gold Fields has participated in the ongoing settlement discussions. A predecessor of Gold Fields formerly operated two lead mills near Picher, Oklahoma prior to the 1950s and mined, in accordance with lease agreements and permits, approximately 0.15% of the total amount of the crude ore mined in the county. Gold Fields believes it has meritorious defenses to these claims. Gold Fields is involved in other litigation in the Picher area, and the Company indemnified TXU Group with respect to a defendant as is more fully discussed under the Oklahoma Lead Litigation caption above. Significant uncertainty exists as to whether claims will be pursued against Gold Fields in all cases, and where they are pursued, the amount of the eventual costs and liabilities, which could be greater or less than this provision.

Other

In addition, at times the Company becomes a party to other claims, lawsuits, arbitration proceedings and administrative procedures in the ordinary course of business. The Company believes that the ultimate resolution of such other pending or threatened proceedings is not reasonably likely to have a material adverse effect on its financial position, results of operations or liquidity.

F-59

PEABODY ENERGY CORPORATION NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(24) Summary Quarterly Financial Information (Unaudited)

A summary of the unaudited quarterly results of operations for the years ended December 31, 2006 and 2005, is presented below. Peabody Energy common stock is listed on the New York Stock Exchange under the symbol BTU.

Year Ended December 31, 2006

	First Quarter		Se	Second Quarter		Third Quarter		ourth Quarter
		(Dollars	in tho	ousands except p	er s	hare and stock	price	e data)
Revenues	\$	1,311,810	\$	1,316,388	\$	1,264,988	\$	1,363,129
Operating profit		171,241		175,695		173,004		143,142
Net income		130,222		153,434		142,008		175,033
Basic earnings per share	\$	0.49	\$	0.58	\$	0.54	\$	0.67
Diluted earnings per share	\$	0.48	\$	0.57	\$	0.53	\$	0.65
Weighted average shares used in								
calculating basic earnings per

Weighted average shares used in								
calculating diluted earnings per								
share		269,358,728		269,756,666		268,822,681		268,137,610
Stock price high and low prices	\$ 5	52.54-\$41.24	\$	76.29-\$46.81	\$	59.90-\$32.94	\$	48.59-\$34.05
Dividends per share	\$	0.06	\$	0.06	\$	0.06	\$	0.06

Second quarter operating profit included \$39.2 million of gains resulting from exchanges of coal reserves (see Note 3 for information). Net income for the second quarter included the tax benefit related to a reduction in tax reserves due to the favorable finalization of former parent companies federal tax audits, partially offset by higher pretax earnings in 2006. Operating profit in the third and fourth quarters of 2006 included \$30.0 million and \$28.9 million, respectively, of gains from the sale of non-strategic coal reserves and surface lands (see Note 3 for information). Operating profit for the third quarter of 2006 benefited from lower performance-based compensation expense of \$20.6 million. Net income for the fourth

Dividends per share	\$	0.0375	\$	0.0375	\$	0.0475	\$	0.0475

Operating profit for the first quarter of 2005 included a \$31.1 million gain on the sale of PVR common units as discussed in Note 9 offset by \$34.0 million of contract losses primarily related to a breach of a coal supply contract by a producer. Second quarter operating profit included \$12.5 million of gains from property sales and a \$12.5 million reduction of estimated contract losses recorded in the first quarter of 2005. Operating profit in the third quarter of 2005 included \$43.6 million of gains resulting from exchanges of assets and an additional \$6.7 million recovery of the contract losses recorded in the first quarter. Operating profit for the third quarter and fourth quarter of 2005 included charges related to long-term compensation plans of \$18.6 million and \$11.6 million, respectively. Net income for the fourth quarter of 2005 included the tax benefit realized from the deemed liquidation of a subsidiary as discussed in Note 11 partially offset by an increase in the valuation allowance on NOL carryforwards.

(25) Segment Information

The Company reports its operations primarily through the following reportable operating segments: Western U.S. Mining, Eastern U.S. Mining, Australian Mining and Trading and Brokerage. Western U.S. Mining operations reflect the aggregation of the Powder River Basin, Southwest and Colorado operating segments, and Eastern U.S. Mining operations reflect the aggregation of the Appalachia and Midwest operating segments. The principal business of the Western U.S. Mining, Eastern U.S. Mining and Australian Mining segments is the mining, preparation and sale of steam coal, sold primarily to electric utilities, and metallurgical coal, sold to steel and coke producers. For the year ended December 31, 2006, 87% of the Company s sales were to U.S. electricity generators, 4% were to the U.S. industrial sector, and 9% were to customers outside the United States. Western U.S. Mining operations are characterized by predominantly surface mining extraction processes, lower sulfur content and Btu of coal and longer shipping distances from the mine to the customer. Conversely, Eastern U.S. Mining operations are characterized by a majority of underground mining extraction processes, higher sulfur content and Btu of coal and shorter shipping distances from the mine to the customer. Geologically, Western operations mine bituminous and subbituminous coal deposits, and Eastern operations mine bituminous coal deposits. Australian Mining operations are characterized by both surface and underground extraction processes, mining low-sulfur, high Btu coal (metallurgical coal) as well as

F-61

PEABODY ENERGY CORPORATION NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

sold to an international customer base with a small portion sold to Australian steel producers and power generators. The Trading and Brokerage segment s principal business is the marketing, brokerage and trading of coal. Corporate and Other includes selling and administrative expenses, net gains on property disposals, costs associated with past mining obligations, joint venture earnings related to the Company s 25.5% investment in a Venezuelan mine and revenues and expenses related to the Company s other commercial activities such as coalbed methane, generation development and resource management.

The Company s chief operating decision maker uses Adjusted EBITDA as the primary measure of segment profit and loss. Adjusted EBITDA is defined as income from continuing operations before deducting early debt extinguishment costs, net interest expense, income taxes, minority interests, asset retirement obligation expense and depreciation, depletion and amortization.

Operating segment results for the year ended December 31, 2006 were as follows:

	Western	Eastern	Australian	Trading and	Corporate	
	U.S. Mining	U.S. Mining	Mining	Brokerage	and Other	Consolidated
			(Dollars in	thousands)		
Revenues	\$1,703,445	\$ 2,035,841	\$ 843,194	\$ 652,029	\$ 21,806	\$ 5,256,315
Adjusted EBITDA	473,074	384,107	278,411	92,604	(147,792)	1,080,404
Total assets	2,628,070	1,420,795	2,784,922	240,329	2,439,940	9,514,056
Additions to property, plant, equipment and

(26) Supplemental Guarantor/Non-Guarantor Financial Information

In accordance with the indentures governing the 6.875% Senior Notes due March 2013, the 5.875% Senior Notes due March 2016, the 7.375% Senior Notes due November 2016 and the 7.875% Senior Notes due November 2026, certain wholly-owned U.S. subsidiaries of the Company have fully and unconditionally guaranteed these Senior Notes, on a joint and several basis. Separate financial statements and other disclosures concerning the Guarantor Subsidiaries are not presented because management believes that such information is not material to the Senior Note holders. The following historical financial statement information is provided for the Guarantor/ Non-Guarantor Subsidiaries.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Stockholders

Peabody Energy Corporation

We have audited the consolidated financial statements of Peabody Energy Corporation as of December 31, 2006 and 2005, and for each of the three years in the period ended December 31, 2006, and have issued our report thereon dated February 20, 2007. Our audits also included the financial statement schedule listed in Item 15(a). This schedule is the responsibility of the Company s management. Our responsibility is to express an opinion based on our audits. In our opinion, the financial statement schedule referred to above, when considered in relation to the basic financial statements taken as a whole, presents fairly in all material respects the information set forth therein.
