7. The sales of any common stock or preferred securities by Alliant Energy and the purchase price per share and the market price per share at the date of the agreement of sale.

Edgar Filing: ALLIANT ENERGY CORP - Form 35-CERT

ANSWER:

On November 15, 2001, Alliant Energy offered 9,775,000 shares of common stock at a price per share to the public of \$28.00. This number of shares included the sale of 1,275,000 shares pursuant to the exercise of the underwriters' over-allotment ("green shoe") option. The public offering was marketed through a group of underwriters, including Merrill Lynch, Morgan Stanley, Robert W. Baird & Co., Banc of America Securities, Legg Mason Wood Walker and Salomon Smith Barney. The net proceeds were approximately \$263 million.

No restricted common stock was issued during the period.

8. The total number of shares of Alliant Energy common stock issued or issuable under options granted during the quarter under employment benefit plans and dividend reinvestment plans including any employee benefit plans or dividend reinvestment plans later adopted;

ANSWER:

See attached Exhibit A

Edgar Filing: ALLIANT ENERGY CORP - Form 35-CERT

10. The amount of terms of any Alliant Energy indebtedness issued during the quarter.

ANSWER:

Alliant Energy Resources (AER) issued \$300,000,000 in senior unsecured notes, fully and unconditionally guaranteed by Alliant Energy Corporation, which was priced on November 9, 2001 for settlement on November 15, 2001. The notes mature on December 1, 2011 and carry a 7% coupon, having been priced at a spread of 275 basis points over the U.S. Treasury 5% notes due August 15, 2011 (CUSIP 9128277B2) serving as the maturity benchmark issue. The notes rank equally with AER's senior unsecured indebtedness and were assigned a rating of BBB+ by Standard & Poor's Ratings Service and Baa1 by Moody's Investor's Service, Inc. The notes are redeemable at AER's option and do not have a sinking fund provision.

11. The amount and terms of any financings consummated by any Nonutility Subsidiary that is not exempt under rule 52.

ANSWER:

None

12. The notational amount and principal terms of any Interest Rate Hedges or Anticipatory Hedges entered into during the quarter and the identity of the other parties to the transaction.

Alliant Energy Resources (AER) entered into \$250 million face value of Anticipatory Hedges in advance of pricing its issuance of \$300 million in senior unsecured notes, detailed in the answer to Item 10 above. Five Treasury lock transactions were entered into:

Counterparty	Execution Date	Face Value	All-in Yield	Unwinding Date	Spot Yield	Yield Spread
Merrill Lynch	10-30-01	\$ 50 Mill.	4.4500%	11-09-01	4.267%	0.2130%
Merrill Lynch	10-30-01	\$ 50 Mill.	4.4200%	11-09-01	4.267%	0.1830%
First Union	10-31-01	\$ 50 Mill.	4.3085%	11-09-01	4.267%	0.0805%
First Union	10-31-01	\$ 50 Mill.	4.2700%	11-09-01	4.267%	0.0420%
Merrill Lynch	10-31-01	\$ 50 Mill.	4.2800%	11-09-01	4.267%	0.0410%

Both counterparties qualified as Approved Counterparties.

The objective was to mitigate the underlying interest rate volatility between the date AER committed to proceed to market and the date AER priced the transaction, as is illustrated by the range of yields during the two days during which the hedges were layered in. It was not certain whether or not the issue would be closed at the top end of the target range of \$250 to \$300 million, so the amount hedged was the lower end of that range. The net effect of the Anticipatory Hedges was to provide an average hedged Treasury yield of 4.3611% on \$250 million of the debt issue.

The choice of Treasury locks over the alternative forward-starting interest rate swaps, which would have hedged an element of the spread of Treasury, was predicated on the comparative efficiency of the two alternatives. The spread over Treasury for comparable issues was quite volatile, in part due to the

Edgar Filing: ALLIANT ENERGY CORP - Form 35-CERT

record volume of corporate debt being issued and specific corporate events in the industry sector. The LIBOR-Treasury correlation (which impacts on the hedging efficiency of a forward-starting interest rate swap) was not as tight as it had been historically. In the event, the hedges qualified for hedge accounting treatment under U.S. GAAP and FAS 133 guidelines.

13. The name, parent company and amount invested in any intermediate subsidiary or financing, subsidiary during the quarter and the amount and terms of any securities issued by those subsidiaries during the quarter.

ANSWER:

Alliant Energy Corporation invested \$12.6 million in nonutility energy assets during the period.

Alliant Energy Corporation formed the following intermediate subsidiaries during the period.

The intermediate subsidiary is designated with an asterisk while its parent company is designated as such. The amounts in parenthesis represent the amount of investment in that intermediate subsidiary.
