7

TRAMMELL CROW COMPANY AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

March 31, 2004

(in thousands, except share and per share data)

(Unaudited)

1. General

The condensed consolidated interim financial statements of Trammell Crow Company and subsidiaries (the Company) included herein have been prepared in accordance with the requirements for interim financial statements and do not include all disclosures required under accounting principles generally accepted in the United States (GAAP) for complete financial statements. These financial statements should be read in conjunction with the consolidated financial statements included in the Company's Annual Report on Form 10-K for the year ended December 31, 2003. In the opinion of management, all adjustments and eliminations, consisting only of recurring adjustments, necessary for a fair presentation of the financial statements for the interim periods have been made. Interim results of operations are not necessarily indicative of the results to be expected for the full year.

The Company has experienced and expects to continue to experience quarterly variations in revenues and net income as a result of several factors. The Company's quarterly revenues tend to increase throughout the year, particularly in the last quarter of the year, because its clients have demonstrated a tendency to close transactions toward the end of the year. The timing and introduction of new contracts, the disposition of investments in real estate assets and other factors may also cause quarterly fluctuations in the Company's results of operations.

Reclassifications

In accordance with Financial Accounting Standard Board (FASB) Statement of Financial Accounting Standards No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets* (FAS 144), certain assets and liabilities at December 31, 2003, and certain revenues and expenses for the three months ended March 31, 2003, have been reclassified to conform to the presentation at and for the three months ended March 31, 2004 (see Notes 7 and 9). As a result, certain balances differ from the amounts reported in previously filed documents.

Use of Estimates

Edgar Filing: TRAMMELL CROW CO - Form 10-Q

The preparation of the financial statements in accordance with GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Consolidation

As of March 31, 2004, the Company completed the adoption of FASB Interpretation No. 46 (revised December 2003), *Consolidation of Variable Interest Entities* (FIN 46R), which did not require the Company to change its previous accounting method for any of its subsidiaries. The Company determines whether an entity is a variable interest entity (VIE) and, if so, whether it should be consolidated by utilizing judgments and estimates that are inherently subjective. If the Company made different judgments or utilized different estimates in these evaluations, it could result in differing conclusions as to whether or not an entity is a VIE and whether or not to consolidate such entity.

8

TRAMMELL CROW COMPANY AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

March 31, 2004

(in thousands, except share and per share data)

(Unaudited)

1. General (Continued)

The accompanying consolidated financial statements include the accounts of the Company, its wholly-owned subsidiaries, and other subsidiaries that are not considered VIEs and over which the Company has control. In addition, the Company consolidates any VIEs of which it is the primary beneficiary in accordance with FIN 46R (see Note 3). Intercompany accounts and transactions have been eliminated. The Company's investments in subsidiaries (including VIEs of which the Company is not the primary beneficiary) in which it has the ability to exercise significant influence over operating and financial policies, but does not control (including subsidiaries where the Company has less than 20% ownership), are accounted for on the equity method. The Company eliminates transactions with such equity method subsidiaries to the extent of its ownership in such subsidiaries. Accordingly, the Company's share of the earnings or losses of these equity basis subsidiaries is included in consolidated net income. Investments in other subsidiaries are carried at cost. The Company's unconsolidated subsidiaries primarily own or invest in real estate development projects.

In May 2003, the Company entered into a purchase agreement with an independent third party (seller entity) to acquire parcels of undeveloped land for a purchase price of \$19,500. In conjunction with the agreement, the Company has deposited \$750 in escrow which is non-refundable in the event the Company decides not to purchase the land. This non-refundable deposit is considered to be a variable interest in the seller entity, which may be a VIE. However, based upon its evaluation, the Company is not the primary beneficiary of the seller entity, and therefore has not consolidated the seller entity that owns the property under contract. As of March 31, 2004, the Company's total exposure to loss as a result of its involvement with this VIE is limited to its deposit of \$750.

The Company is part of a co-lender group with an independent third party that has issued a mezzanine loan to the owner of two office buildings. In April 2000, the Company provided its \$567 share of the total \$5,667 mezzanine loan. At that time, another independent third party lender provided the primary financing of \$19,100 to the owner. The Company also provides building management and leasing services for the properties under a long-term contract at market rates for such services. The mezzanine loan arrangement is considered to be a variable interest in the entity that owns the properties, which the Company believes is a VIE. However, based upon its evaluation, the Company is not the primary beneficiary of the entity. Therefore, the Company has not consolidated the entity that owns the office properties for which it has provided financing. The Company's total outstanding loan balance exposed to loss as a result of its involvement with this VIE is \$567 as of March 31, 2004. Also, see Note 3 for discussion on an equity investment in a VIE.

Income Taxes

The Company accounts for income taxes using the liability method. Deferred income taxes result from temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for federal income tax purposes, and are measured using the enacted tax rates and laws that will be in effect when the differences reverse.

(in thousands, except share and per share data)
(Unaudited)

1. General (Continued)

Earnings Per Share

The weighted-average common shares outstanding used to calculate diluted earnings per share for the three months ended March 31, 2004 and 2003, include 1,891,943 and 673,274 shares, respectively, to reflect the dilutive effect of unvested restricted stock and options to purchase shares of common stock.

Stock-Based Compensation

The Company has elected to use the intrinsic method under Accounting Principles Board Opinion No. 25, *Accounting for Stock Issued to Employees* (APB 25), to account for its stock-based compensation arrangements. Compensation expense for stock options is recognized to the extent the market price of the underlying stock on the date of grant exceeds the exercise price of the option. The Company recognizes compensation expense related to restricted stock awards over the vesting period of the underlying award in an amount equal to the fair market value of the Company's stock on the date of grant.

Pro forma information regarding net income (loss) and net income (loss) per share, shown in the table below, has been determined as if the Company had applied the fair value recognition provisions of Statement of Financial Accounting Standards No. 123, *Accounting for Stock-Based Compensation*.

	Three Months Ended March 31,	
	2004	2003
Net income, as reported	\$ 2,099	\$ 1,144
Add: Stock-based employee compensation expense included in net income, net of related tax effects	694	279
Deduct: Stock-based employee compensation expense determined under fair value based method for all awards, net of related tax effects	1,206	1,462
Pro forma net income (loss)	\$ 1,587	\$ (39)
Net income (loss) per share:		
Basic as reported	\$ 0.06	\$ 0.03
Basic pro forma	\$ 0.04	\$
Net income (loss) per share:		
Diluted as reported	\$ 0.06	\$ 0.03
Diluted pro forma	\$ 0.04	\$

Non-Controlling Interests in Consolidated Limited Life Subsidiaries

In May 2003, the FASB issued Statement of Financial Accounting Standards No. 150, *Accounting for Certain Financial Instruments with Characteristics of both Liabilities and Equity* (FAS 150). Certain provisions of FAS 150 would have required the Company to classify non-controlling interests in consolidated limited life subsidiaries as liabilities adjusted to their settlement values in the Company's

TRAMMELL CROW COMPANY AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

March 31, 2004

(in thousands, except share and per share data)

(Unaudited)

1. General (Continued)

financial statements. In November 2003, the FASB indefinitely deferred application of the measurement and recognition provisions (but not the disclosure requirements) of FAS 150 with respect to these non-controlling interests. As of March 31, 2004, the estimated settlement value of non-controlling interests in the Company's consolidated limited life subsidiaries is \$10,348, as compared to book value (included in minority interest on the Company's balance sheet) of \$8,357. The excess of settlement value over book value is driven by an even larger estimated appreciation of certain consolidated real estate assets and investments from the Company's book value, offset by selling costs and debt prepayment penalties, if any.

2. Real Estate

All real estate is included in the Company's Development and Investment segment (see Note 12). Real estate owned by the Company consists of the following:

	March 31, 2004		December 31, 2003	
Real estate under development (current)	\$	56,998	\$	49,208
Real estate included in assets held for sale (see Note 7)(1)		22,836		34,068
Real estate under development (non-current)		7,748		6,345
Real estate held for investment(2)		83,037		77,334
	\$	170,619	\$	166,955

(1) Net of allowances of \$964 and \$1,048 at March 31, 2004, and December 31, 2003, respectively, to reduce the carrying value of assets to fair value less cost to sell.

(2) Net of accumulated depreciation of \$1,158 and \$1,066 at March 31, 2004, and December 31, 2003, respectively.

In the three months ended March 31, 2004 and 2003, the Company recorded provisions for losses on real estate of \$31 and \$1,452, respectively, to increase the allowances on real estate held for sale to reduce the carrying value of assets to fair value less cost to sell. Of the amount recorded in the three months ended March 31, 2003, \$1,395 was included in discontinued operations in the consolidated statements of income as it related to a real estate project that is considered a discontinued operation under FAS 144. All remaining amounts are included in general and administrative expenses in the consolidated statements of income.

In the three months ended March 31, 2003, the Company recorded writedowns for impairment of real estate (not classified as held for sale at the time of such writedowns) totaling \$1,245, which is included in general and administrative expenses in the consolidated statements of income. There were no writedowns for impairment of real estate in the three months ended March 31, 2004. The 2003 writedown for impairment related to a single-tenant office/industrial real estate project. The non-recourse note payable related to the real estate project had matured and the Company subsequently conveyed the underlying

(Unaudited)

2. Real Estate (Continued)

property to the lender to satisfy the note. The fair value of the asset was determined based on a discounted cash flow projection prior to the conveyance of the property to the lender.

In December 2003, the Company sold a parcel of land for \$1,750, of which \$1,125 of the consideration received was in the form of an interest-bearing note from the buyer. The Company retained a unilateral right to repurchase the property at any time through 2006, in addition to maintaining the right to approve any plans for development on the property. If the Company exercises its repurchase option, the Company would repay the amount it received from the buyer, plus a return on the buyer's investment. Because of the Company's continuing involvement in and option to repurchase the property, the transaction did not qualify as a sale and as a result, a financing transaction was recorded. As of March 31, 2004, real estate and other assets held for sale includes \$844 of real estate and \$1,125 of notes receivable, and liabilities related to real estate and other assets held for sale includes \$1,750 of notes payable, all related to this parcel of land.

In the three months ended March 31, 2003, the Company sold its 50% partnership interest in a consolidated subsidiary to the other partner in the partnership for a net sales price of \$1,032. The transaction resulted in a non-cash decrease in real estate and other assets held for sale of \$11,004 (accounts receivable of \$4 and real estate of \$11,000), a decrease in cash (included in real estate and other assets held for sale) of \$92, and a non-cash reduction in liabilities related to real estate and other assets held for sale of \$11,804 (decrease in accounts payable of \$61, increase in accrued expenses of \$164, decrease in notes payable on real estate of \$11,907), and a non-cash increase in minority interest of \$210. The Company recognized a gain on disposition of \$1,530 as a result of this transaction.

3. Investments in Unconsolidated Subsidiaries

Investments in unconsolidated subsidiaries consist of the following:

	March 31, 2004		December 31, 2003	
Real estate	\$	35,382	\$	35,546
Other		30,274		29,479
	\$	65,656	\$	65,025

The Company owns approximately 10.0% of the outstanding stock of Savills plc (Savills), a property services firm headquartered in the United Kingdom and a leading provider of real estate services in Europe, Asia-Pacific and Australia. The investment is classified as an "other" investment in the table above.

During 1999, the Company formed a limited liability company (the LLC) with a private investment group to develop approximately 120 acres of land adjacent to a metropolitan airport for a mixed-use business park. The land development was being jointly funded by the LLC and three public agencies, for a total expected funding of approximately \$155,800. Sources for the LLC's share of total funding included a

(Unaudited)

3. Investments in Unconsolidated Subsidiaries (Continued)

senior debt obligation of approximately \$28,200, a junior debt obligation of approximately \$13,200 and equity contributions of \$1,000, of which \$50 was made by the Company. The private investment group provided the remaining \$950 in equity contributions to the LLC and has made working capital loans to the LLC. The Company also provided development management, construction management, marketing and leasing services for the project under a long-term contract at market rates for such services. The Company's equity investment is considered to be a variable interest in the LLC, which the Company believes is a VIE. However, based upon its evaluation, the Company is not the primary beneficiary of the LLC and therefore, has not consolidated the LLC. The Company's maximum exposure to loss as a result of its involvement in this VIE is limited to its investment of \$50. In April 2004, the Company terminated its interest in and its service agreements with the LLC.

Summarized operating results for unconsolidated subsidiaries accounted for on the equity method are as follows:

	For the Three Months Ended March 31,	
	2004	2003
Real Estate:		
Total revenues	\$ 43,661	\$ 15,300
Total expenses	5,707	9,474
Net income	\$ 37,954	\$ 5,826
Other:		
Total revenues	\$ 123,182	\$ 82,319
Total expenses	119,310	82,002
Net income	\$ 3,872	\$ 317
Total:		
Total revenues	\$ 166,843	\$ 97,619
Total expenses	125,017	91,476
Net income	\$ 41,826	\$ 6,143

4. Accrued Expenses

Accrued expenses consist of the following:

	March 31, 2004	December 31, 2003
Payroll and bonuses	\$ 27,233	\$ 42,316
Commissions	22,669	38,337
Development costs	9,739	15,045

Edgar Filing: TRAMMELL CROW CO - Form 10-Q

Deferred income		8,267		5,691	
Interest		922		1,175	
Insurance		3,176		3,032	
Restructuring charges (see Note 13)		1,750		1,864	
Other		10,384		9,584	
		84,140		117,044	
Less accrued expenses included in liabilities related to real estate and other assets held for sale (see Note 7)		255		970	
		\$ 83,885		\$ 116,074	

5. Long-Term Debt

Long-term debt consists of the following:

	March 31, 2004		December 31, 2003	
Borrowings under \$150,000 line of credit with a bank (the Credit Facility)	\$		\$	10,000
Borrowings under \$25,000 discretionary line of credit with a bank				
Borrowings under £1,100 short-term borrowing facility with a bank (the European Facility)		29		
Other		878		1,095
Total long-term debt		907		11,095
Less current portion of long-term debt		895		1,081
	\$	12	\$	10,014

The Company is subject to various covenants associated with the Credit Facility, such as maintenance of minimum equity and liquidity and certain key financial data. In addition, the Company may not pay dividends or make other distributions on account of its common stock exceeding 50% of the previous year's net income before depreciation and amortization, and there are certain restrictions on investments and acquisitions that can be made by the Company. At March 31, 2004, the Company is in compliance with all covenants of the Credit Facility.

The covenants associated with the Credit Facility and the amount of the Company's other borrowings and contingent liabilities may have the effect of limiting the borrowing capacity available to the Company

TRAMMELL CROW COMPANY AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(in thousands, except share and per share data)

(Unaudited)

5. Long-Term Debt (Continued)

under the Credit Facility to an amount less than the \$150,000 commitment. At March 31, 2004, the Company has unused borrowing capacity of \$128,209 (taking into account letters of credit outstanding and limitations from certain financial covenants) under its Credit Facility.

6. Notes Payable on Real Estate

The Company has loans secured by real estate consisting of the following:

	March 31, 2004		December 31, 2003	
Current portion of notes payable on real estate	\$	65,911	\$	68,192
Notes payable on real estate included in liabilities related to real estate and other assets held for sale (see Note 7)		14,702		23,666
Total notes payable on real estate, current portion		80,613		91,858
Notes payable on real estate, non-current portion		21,353		11,409
Total notes payable on real estate	\$	101,966	\$	103,267

Notes payable on real estate held for sale are included in liabilities related to real estate and other assets held for sale. Notes payable on real estate under development (current) are included in current portion of notes payable on real estate. Notes payable on real estate under development (non-current) and real estate held for investment are classified according to payment terms and maturity date.

At March 31, 2004, \$10,424 of the current portion and \$611 of the non-current portion of notes payable on real estate are recourse to the Company. With respect to a project to which \$3,322 of the current recourse obligations relate, the Company has an agreement with an investor customer to purchase the project upon completion, the proceeds of which will be used to repay the related note payable.

The Company has a participating mortgage loan obligation related to a real estate project that is classified as real estate under development (current). The participating mortgage loan is subordinate to a construction loan on the underlying project. The lender participates in net operating cash flow of the mortgaged real estate project, if any, and capital proceeds, net of related expenses, upon the sale of the project, after payment of amounts due under the construction loan. The lender receives 6% fixed interest on the outstanding balance of its note, compounded monthly, and participates in 35% to 80% of proceeds remaining after the construction loan is paid, based on reaching various internal rates of return. The amount of the participation liability and the related debt discount are \$2,800 and \$1,400, respectively, at March 31, 2004.

7. Real Estate and Other Assets Held for Sale and Related Liabilities

Real estate and other assets held for sale include completed real estate projects or land for sale in their present condition that have met all of the held for sale criteria of FAS 144 and other assets directly related to such projects. Liabilities related to real estate and other assets held for sale have been included

9. Gain on Disposition of Real Estate and Discontinued Operations

During the three months ended March 31, 2004, the Company sold one real estate project for a net sales price of \$533, resulting in a gain on disposition of \$187. In addition, the Company recognized \$281 of deferred gain from dispositions in prior periods. During the three months ended March 31, 2003, the Company sold four real estate projects for an aggregate net sales price of \$5,133, resulting in an aggregate gain on disposition of \$4,511, and recognized \$257 of deferred gain resulting from a previous period disposition.

The Company's discontinued operations include the operations and gains on disposition of real estate projects held for sale or sold subsequent to the adoption of FAS 144 effective January 1, 2002, that are considered components of an entity as defined by FAS 144 and for which the Company does not have or expect to have any significant involvement in the operations of the project after the disposal. As required by FAS 144, certain revenues and expenses for the three months ended March 31, 2003, have been reclassified to conform to the presentation for the three months ended March 31, 2004.

In the three months ended March 31, 2004, the Company sold one real estate project that was considered a discontinued operation under FAS 144. The net sales price for this project was \$11,335, and the Company recognized a gain on disposition of \$821, including interest forgiveness of \$326. In the three months ended March 31, 2003, the Company sold two real estate projects that were considered discontinued operations under FAS 144. The aggregate sales price for these two projects was \$12,380, and the Company recognized an aggregate gain on disposition of \$1,723. The aggregate gain on disposition related to these projects has been reported as discontinued operations, net of applicable income taxes, in the consolidated statements of income.

Income tax (expense) benefit	(317)	54
Income (loss) from discontinued operations, net of income taxes	\$ 438	\$ (71)

10. Financial Instruments

As required under the Company's Credit Facility, the Company has entered into various interest rate agreements to manage market risks related to changes in interest rates. The Company's participation in derivative transactions has been limited to hedging purposes. Derivative instruments are not held or issued for trading purposes.

On March 24, 2001, an existing interest rate swap agreement was renewed for a 24-month period ending March 24, 2003, with a notional amount of \$150,000. This interest rate swap agreement established a fixed interest pay rate of 4.68% on a portion of the Company's variable rate debt. Under the interest rate swap agreement, if the actual LIBOR-based rate was less than the specified fixed interest rate, the Company was obligated to pay the differential interest amount, such amount being recorded as incremental interest expense. Conversely, if the LIBOR-based rate was greater than the specified fixed interest rate, the differential interest amount was paid to the Company and recorded as a reduction of interest expense. The weighted average receive rate under the interest rate swap agreement for the three months ended March 31, 2003 was 1.37%. In connection with this agreement, the Company recorded incremental interest expense, excluding the liability reduction described below, of \$567 for the three months ended March 31, 2003.

TRAMMELL CROW COMPANY AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

March 31, 2004

(in thousands, except share and per share data)

(Unaudited)

10. Financial Instruments (Continued)

Prior to November 1, 2001, the interest rate swap agreement was not effectively designated as a hedge (although it was entered into for hedging purposes), and the Company recognized changes in fair value in current period earnings. For the period from January 1, 2001 through October 31, 2001, \$4,809 was charged to expense due to a change in fair value of the interest rate swap agreement. As of November 1, 2001, in accordance with Statement of Financial Accounting Standards No. 133, *Accounting for Derivative Instruments and Hedging Activities* (FAS 133), the Company designated the interest rate swap agreement as a cash flow hedge of the Company's variable interest flow exposure, and began assessing effectiveness of the cash flow hedge in accordance with the hypothetical derivative method of FAS 133 Implementation Issue G7. The hypothetical derivative method captured the impact of the \$4,809 swap liability already existing at November 1, 2001, as future hedge ineffectiveness of the newly designated hedge relationship because the liability originated from interest rate movements prior to the application of hedge accounting. Accordingly, changes in fair value of the interest rate swap agreement attributable solely to the passage of time and payments made to settle the liability serve to reduce the liability, therefore benefiting net income in future periods. During the three months ended March 31, 2003, the Company recorded \$588 of payments against its liability that would have been recorded to interest expense had the interest rate swap agreement been designated as a hedge since its inception. Changes in the fair value of the interest rate swap agreement attributable to changes in benchmark market interest rates represented the effective portion of the hedge relationship. These changes in fair value were recorded in other comprehensive income in accordance with FAS 133 and were fully amortized over the remaining life of the interest rate swap agreement. Any hedge ineffectiveness was recorded in current period earnings. The interest rate swap agreement expired on March 24, 2003, therefore the liability balance is zero at March 31, 2004.

In March 2004, the Company entered into an interest rate cap agreement with a notional amount of \$10,000 expiring June 24, 2004, under which the Company will receive payments if the 30-day LIBOR based interest rate exceeds 1.3%. The interest rate cap agreement has been designated an effective hedge, and, to the extent the hedging relationship remains effective, changes in fair value of the interest rate cap agreement will be recorded in other comprehensive income.

In March 2003, the Company entered into an interest rate cap agreement in order to limit its interest expense on a construction loan with a 30-day LIBOR-based floating interest rate related to a consolidated real estate project. The interest rate cap agreement has a notional amount of \$11,400 and the Company will receive payments if the LIBOR-based interest rate exceeds 3.5%. The interest rate cap agreement has not been designated as an effective hedge, and therefore the interest rate cap agreement will be marked to market each period with the change in fair market value recognized in current period earnings. The interest rate cap agreement expires on March 1, 2005. Through March 31, 2004, amounts recorded by the Company related to this interest rate cap agreement were not material.

A consolidated real estate subsidiary of the Company has issued a mandatorily redeemable financial instrument. The instrument allows former lenders to the underlying real estate project to participate in operating cash flows and the proceeds of the future sale of the property, after payment of a separate mortgage loan on the property and certain other distribution preferences to the Company, with no

19

TRAMMELL CROW COMPANY AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

March 31, 2004

(in thousands, except share and per share data)

(Unaudited)

10. Financial Instruments (Continued)

maximum amount specified in the instrument. The instrument is redeemable at the discretion of the former lenders upon sale of the real estate project, refinancing of the mortgage loan or maturity of the instrument on September 28, 2006. As of March 31, 2004, the fair value of the financial instrument is zero, based on hypothetical liquidation of the underlying real estate project on March 31, 2004.

Accounts receivable, accounts payable and accrued expenses and other liabilities are carried at amounts that reasonably approximate their fair values. The fair values of the Company's long-term debt and notes payable on real estate reasonably approximate their fair values based on the Company's incremental borrowing rates for similar types of borrowing arrangements.

11. Commitments and Contingencies

At March 31, 2004, the Company has guaranteed repayment of a maximum of \$5,715 of real estate notes payable of its unconsolidated subsidiaries of which \$4,883 of the underlying notes payable is outstanding as of March 31, 2004. These notes are secured by the underlying real estate and have maturity dates through May 2005. At March 31, 2004, the Company has outstanding letters of credit totaling \$16,017, of which \$5,044 collateralizes amounts recorded in other current liabilities. The letters of credit expire at varying dates through March 2005. The Company did not issue or modify any guarantees or letters of credit in the first quarter of 2004 that were required to be recorded at fair value in the Company's financial statements.

In addition, at March 31, 2004, the Company has numerous completion and budget guarantees relating to development projects. Each of these guarantees requires the Company to complete construction of the relevant project within a specified time frame and/or within a specified budget, with the Company potentially being liable for costs to complete in excess of such budget. However, the Company generally has guaranteed maximum price contracts with reputable general contractors, which are intended to pass the budget risk to such contractors. Management does not expect to incur any material losses under these guarantees.

From time to time, the Company acts as a general contractor with respect to construction projects. The Company does not consider these activities to be a material part of its business. In connection with these activities, the Company seeks to subcontract construction work for certain projects to reputable subcontractors. Should construction defects arise related to the underlying projects, the Company could potentially be liable to the customer for the costs to repair such defects, but the Company would generally look to the subcontractor that performed the work to remedy the defect. Management does not expect to incur material losses with respect to construction defects.

The Company has made refundable and non-refundable earnest money deposits totaling \$3,514 in conjunction with contracts to acquire approximately \$139,836 of real estate from independent third party entities, some of which may be VIEs. Except as disclosed in Note 1, the Company has determined that it does not have any significant variable interests in any of these entities. The Company's maximum exposure

TRAMMELL CROW COMPANY AND SUBSIDIARIES

(in thousands, except share and per share data)
(Unaudited)

11. Commitments and Contingencies (Continued)

to loss as a result of its involvement with these entities is limited to the total of its non-refundable deposits, or \$2,344.

The Company and one of its subsidiaries are defendants in a lawsuit styled *Bank One Oklahoma, N.A. (the Bank), et al. v. Trammell Crow Services, Inc. and Trammell Crow Company*, No. 03 C 3624, pending in the US District Court for the Northern District of Illinois, originally filed on April 2, 2003. The claims asserted by the plaintiffs relate to a sale/leaseback transaction involving a property in Oklahoma City previously owned by the Bank. The suit alleges breach of contract, breach of fiduciary duty, negligent misrepresentation, fraudulent misrepresentation and fraudulent concealment against the Company and/or its subsidiary and alleges that the plaintiffs have been damaged in an unspecified amount in excess of \$15,000. The plaintiffs seek to recover actual damages, punitive damages and reasonable attorneys' fees. The suit is in the process of discovery, and no trial date has been set. As of the date of this Form 10-Q, the outcome of the suit cannot be predicted with any certainty, and the Company cannot at this time estimate an amount or range of potential loss in the event of an unfavorable outcome. While the Company cannot predict with any certainty the outcome of this matter, the Company currently believes the plaintiffs' claims are without merit and is vigorously defending the lawsuit.

From time to time, the Company is involved in other litigation matters that arise in the ordinary course of its business, some of which involve claims for damages which are substantial in amount. The ultimate liability for these matters cannot be determined. However, based on the information currently available, the Company does not believe that the resolution of any such matters to which it is currently a party will have a material adverse effect on the Company's results of operations, financial condition or liquidity.

12. Segment Information

Description of Services by Segment

The Global Services segment includes property and facilities management, brokerage and corporate advisory, and project and construction management services delivered to both user and investor customers. The Development and Investment segment includes development activities performed on behalf of investor and user customers on a fee basis, as well as development activity pursuant to which the Company takes an ownership position. The Development and Investment segment also includes activities related to the Company's operating real estate projects prior to disposition.

Measurement of Segment Profit or Loss and Segment Assets

The Company evaluates performance and allocates resources among its two reportable segments based on income before income taxes. The accounting policies of the reportable segments are the same as those described in the summary of significant accounting policies.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)
March 31, 2004
(in thousands, except share and per share data)
(Unaudited)

12. Segment Information (Continued)

Factors Management Used to Identify the Company's Reportable Segments

The Company's reportable segments are defined by the nature of the service provided and activities conducted. Because development services require specialized knowledge, the Company's organizational structure allows the group of individuals with specialized knowledge and experience in development activities to perform these services with greater focus through the Company's Development and Investment segment. The organizational structure of the Global Services segment allows the Company to leverage resources in specific geographic areas, as non-development services provided to user and investor customers often require similar expertise.

Virtually all of the Company's revenues are from customers located in the United States. In the three months ended March 31, 2004, one individual customer accounts for \$16,494, or 10%, of the Company's consolidated revenues. Revenues from this customer are included primarily in the Company's Global Services segment. No individual customer accounted for more than 10% of the Company's consolidated revenues in the three months ended March 31, 2003.

Income from continuing operations, before income taxes	2,861	2,152
Income (loss) from discontinued operations, before income taxes	755	(125)
Income before income taxes	\$ 3,616	\$ 2,027

TRAMMELL CROW COMPANY AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

March 31, 2004

(in thousands, except share and per share data)

(Unaudited)

12. Segment Information (Continued)

	March 31, 2004	December 31, 2003
Total Assets:		
Global Services	\$ 262,461	\$ 296,876
Development and Investment	330,154	333,250
Total consolidated assets	\$ 592,615	\$ 630,126

(1) Costs and expenses for the three months ended March 31, 2004 and 2003 include non-cash compensation expense related to the amortization of employment contracts and unearned stock compensation of \$1,016 and \$821 related to the Global Services segment and \$475 and \$108 related to the Development and Investment segment, respectively.

13. Restructuring Changes

During 2001, the Company announced an internal reorganization of its business designed to consolidate all of the property and facilities management, brokerage and corporate advisory, and construction and project management services delivered to both user and investor customers under a single leadership structure. As part of its restructuring plans, primarily during the fourth quarter of 2001, the Company closed several offices and identified offices with excess space that it intends to sublease to third parties. The Company recorded restructuring charges primarily comprised of lease obligations, costs to sublease excess space (offset by estimated future sublease income) and miscellaneous furniture and equipment writeoffs. These accruals will be relieved over the remaining terms of the underlying leases through March 2012.

No restructuring charges have been incurred or recorded since 2001. Activity related to the Company's lease obligations and related costs included in restructuring accruals for the quarter ended March 31, 2004, is as follows:

Balance at December 31, 2003	\$ 1,864
Cash payments	114
Balance at March 31, 2004	\$ 1,750

14. Supplemental Cash Flow Information

Supplemental cash flow information is summarized below:

	Three Months Ended March 31,			
	2004		2003	
Non-cash activities:				
Issuance of restricted stock, net of forfeitures	\$	199	\$	11,763
Capital lease obligations	300		651	
Amortization of participating mortgage loan discount	1,400

ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Edgar Filing: TRAMMELL CROW CO - Form 10-Q

The following discussion should be read in conjunction with the Company's unaudited Condensed Consolidated Financial Statements and the notes thereto included in Item 1 of this Quarterly Report on Form 10-Q.

Overview

Trammell Crow Company (the "Company") is one of the largest diversified commercial real estate service companies in the United States. The Company delivers a comprehensive range of services to leading multinational corporations, institutional investors and other users of real estate services. In the United States, the Company is a leading provider of commercial property and facilities management services, commercial property brokerage and transaction management services, commercial property development and construction services and project management services. In addition to its full service offices located throughout the United States, the Company has offices in Canada, Europe, Asia and Latin/South America focused on the delivery of real estate services to users of commercial real estate. The Company delivers brokerage services outside the United States through strategic alliances with leading providers in Europe and Asia, through Savills plc, ("Savills") a leading property services company based in the United Kingdom; and in Canada, through JJ Barnicke, a leading Canadian real estate services provider. The Company delivers four core services—building management services, brokerage services, project management services and development services—to both user and investor customers. The Company's business is organized under two separate national leadership structures. The Global Services Group includes substantially all of the building management services, brokerage services, and project management services delivered to both user and investor customers. Substantially all of the Company's real estate development, capital markets and investment activities are conducted through the Company's Development and Investment Group.

Within the Global Services segment, with approximately 5,800 full-time equivalent ("FTE") employees, the Company provides services to user customers, including multinational corporations, hospitals and universities, who are typically the primary occupants of commercial properties, and investor customers that are not typically the primary occupants of the commercial properties with respect to which services are performed. The building management services provided to user customers consist primarily of facilities management, which entails providing comprehensive day-to-day occupancy related services, principally to large corporations, healthcare systems and other users that occupy commercial facilities in multiple locations. These services include administration and day-to-day maintenance and repair of customer-occupied facilities. Brokerage services provided to user customers include corporate advisory services such as portfolio management and tenant representation. Project management services provided to user customers include facility planning and project management, such as construction oversight, space planning, site consolidations, facilities design, and workplace moves, adds, and changes. The building management services provided to investor customers include property management services relating to all aspects of building operations, tenant relations and oversight of building improvement processes. Brokerage services provided to investor customers include project leasing and investment sales services whereby the Company advises buyers, sellers and landlords in connection with the leasing and sale of office, industrial and retail space, and land. Project management services provided to investor customers include construction management services such as space planning and tenant finish and coordination.

Within the Development and Investment segment, encompassing approximately 190 FTE employees, the Company provides development services to both investor and user customers—both those pursuant to which the Company takes an ownership position in a project and those pursuant to which the Company provides development services to others in exchange for fees. The Company provides comprehensive project development services and acquires and disposes of commercial real estate projects. The development services provided include financial planning, site acquisition, procurement of approvals and

permits, design and engineering coordination, construction bidding and management, tenant finish coordination, project closeout and project finance coordination. The Company will continue to focus its efforts in this area on risk-mitigated opportunities for investor customers and fee development and build-to-suit projects for user customers, including those in higher education and healthcare. From time to time, the Company may pursue development and investment activities, including opportunistic property acquisitions and new development, for its own account. With an organization comprised of professionals dedicated fully to development and investment activities, the Company is positioned to pursue and execute new development business, particularly programmatic business with the Company's large investor customers, and exploit niche market opportunities.

26

Results of Operations Three Months Ended March 31, 2004 Compared to Three Months Ended March 31, 2003

In accordance with Statement of Financial Accounting Standards No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets* (FAS 144), certain revenues and expenses for the quarterly period ended March 31, 2003, have been reclassified to conform to the presentation for the quarterly period ended March 31, 2004. As a result, certain balances differ from the amounts reported in previously filed documents. See *Income (Loss) from Discontinued Operations, Net of Income Taxes*, below, for additional information.

	For the Three Months Ended March 31, 2004	2003	\$ Change	% Change
	(\$ in millions)			
REVENUES:

Income (loss) from discontinued operations, net of income taxes	0.4	(0.1)	0.5	500.0 %
Net income	\$ 2.1	\$ 1.1	\$ 1.0	90.9 %

Revenues. Facilities management revenue decreased slightly in the first quarter of 2004. Management fee revenue decreased \$1.9 million, while reimbursement of salaries, wages, benefits, and out-of-pocket general and administrative costs increased \$1.2 million in the first quarter of 2004, compared to the same period in 2003. The composition of facilities management revenue, including management fees and reimbursements, may vary significantly from period to period based on the terms of the underlying management agreements in effect each period.

Corporate advisory services revenue remained relatively flat in the first quarter of 2004. Commission revenue decreased approximately \$0.7 million from the prior period. This decrease was partially offset by increases in transaction management fees and reimbursement revenues due to expansions of transaction management services provided to existing customers subsequent to the first quarter of 2003.

Project management revenue growth in 2004 was primarily due to the expansion of services provided to existing customers subsequent to the first quarter of 2003.

The decrease in property management revenue was partially the result of decreased occupancy levels and rents in buildings managed by the Company, which drive this revenue. In addition, the revenue decrease was impacted by a reduction in square footage under management in the first quarter of 2004 as compared to 2003. The reduction in square footage was primarily driven by sales of buildings in the Company's management portfolio to REITs or other investors that self-manage their properties.

Brokerage revenue in the first quarter of 2004 was ahead of the comparable period in the prior year, with the increase primarily driven by investment sales revenue. This is in part the result of an increase in the number of brokers, as part of the Company's focus on expanding its brokerage network. In addition, the Company was successful in closing several significant transactions in the first quarter of 2004, driven by favorable capital market factors including low interest rates.

Construction management revenue is generated from services such as space planning and tenant finish coordination for investor customers in conjunction with property management and leasing assignments, and is directly related to tenants' real estate demands. This revenue remained relatively flat from the first quarter of 2003 to 2004.

Development and construction revenue decreased from the prior year due to a decrease in the Company's development starts in recent years. Typically, the impact of decreases and increases in the Company's development starts is not reflected in results immediately, and the Company experienced the consequences of reduced previous periods' starts in its development and construction revenue for the first quarter of 2004.

Some of the Company's development resources focus on providing development services to investor customers that invest in speculative commercial real estate projects. Since the latter part of 1999, speculative real estate development has declined significantly. The decline reflects the fact that demand for new product in many of the markets in which the Company operates has declined as vacancy rates have risen with the overall downturn in the economy. As a result, the Company has responded by shifting focus and resources to user-driven development areas such as development and construction activities for healthcare and higher education customers and fee development for user customers.

The Company's gain on disposition of real estate decreased significantly in the first quarter of 2004 from 2003. In the first quarter of 2004, the Company sold one real estate project for a net sales price of \$0.5 million, resulting in a gain on disposition of \$0.2 million and recognized deferred gain of \$0.3 million relating to dispositions in previous periods. In the first quarter of 2003, the Company sold four real estate projects for an aggregate net sales price of \$5.1 million, resulting in an aggregate gain on disposition of \$4.5 million, and recognized deferred gain of \$0.3 million relating to a disposition in a previous period.

Costs and Expenses. Salaries, wages and benefits expense includes all compensation paid to Company employees other than brokerage commissions. As such, it includes salaries, benefits and annual incentive bonuses for employees whose compensation is reimbursed by customers (reimbursed employees); salaries, benefits and annual incentive bonuses for employees whose compensation is not so reimbursed (unreimbursed employees); and transaction-related incentive compensation other than brokerage commissions, primarily paid in connection with development and investment transactions. The increase in the first quarter of 2004 was driven by a \$3.2 million increase in salaries, wages and benefits for unreimbursed employees and a \$3.4 million increase in salaries, wages and benefits for reimbursed employees. The increase in unreimbursed salaries, wages and benefits is a result of new hiring beginning in the second half of 2003, merit increases for existing employees and 2003 restricted stock grants to senior management of the Company. In addition, unreimbursed incentive compensation also increased in 2004, driven by an increase in the Company's income from investments in unconsolidated subsidiaries due to sales of real estate held by such unconsolidated subsidiaries. The increase in reimbursed salaries, wages and benefits is driven by an increase in project management services provided to customers.

The increase in commission expense was primarily driven by the increase in the Company's brokerage revenue, which was the result of an increase in headcount of project leasing and investment sales brokers and the closing of several significant transactions during the first quarter of 2004 as a result of the economy beginning to stabilize in the second half of 2003.

The overall increase in general and administrative expenses was comprised of a \$1.0 million increase in out-of-pocket general and administrative expenses that are reimbursed by customers, offset by a \$0.3 million decrease in costs that are not reimbursed by customers. The decrease in unreimbursed general and administrative expenses for the first quarter of 2004 is the result of a decrease in writedowns due to impairment of real estate and provisions to reduce the carrying value of real estate held for sale assets to fair value less cost to sell. The Company recorded \$0.03 million of such writedowns and provisions in 2004, as compared to \$1.3 million in 2003. This decrease was partially offset by a \$1.1 million increase in insurance expense, mainly due to higher insurance premiums. The increase in reimbursed general and administrative expenses is due to an increase in project management services provided to customers.

Depreciation and amortization expense decreased in 2004 as compared to the prior year. The Company has replaced many of its computer assets at a lower cost than the assets that were retired, which has reduced the Company's depreciation expense. This was partially offset by a slight increase in depreciation expense related to real estate assets classified as held for investment, in accordance with FAS 144.

The decrease in interest expense is primarily the result of the expiration of the interest rate swap at the end of the first quarter of 2003 for which the Company recorded \$0.6 million of interest expense in 2003. The Company also had lower average outstanding balances on its revolving line of credit.

Income (Loss) from Continuing Operations Before Income Taxes, Minority Interest and Income from Investments in Unconsolidated Subsidiaries. The Company's income (loss) from continuing operations before income taxes, minority interest and income from investments in unconsolidated subsidiaries decreased due to the fluctuations in revenues and expenses described above.

Minority Interest, Net of Income Taxes. Minority interest fluctuated from income in the first quarter of 2003 to expense in 2004. This change is primarily a result of improved 2004 results of operations of certain consolidated real estate entities in which outside parties have an interest. The improved results were driven by charges for impairment of real estate held by these entities in 2003, as compared to no charges for impairment of real estate held by these entities in 2004.

Income from Investments in Unconsolidated Subsidiaries, Net of Income Taxes. In the ordinary course of business, a significant portion of the Company's development and investment activities are conducted,

and are expected to be conducted in future periods, through unconsolidated subsidiaries. The Company also has certain investments in unconsolidated subsidiaries which are not related to its development and investment activities. Income from investments in unconsolidated subsidiaries fluctuates from period to period based on the volume and profitability of transactions carried out by the underlying unconsolidated subsidiaries. The Company's share of income from such transactions is typically driven by its ownership percentage in the unconsolidated subsidiaries. The increase in the first quarter of 2004 was primarily driven by significant income from an unconsolidated real estate subsidiary that sold its building portfolio.

Income from Continuing Operations. The Company's income from continuing operations in the first quarter of 2004 increased from the comparable period in the prior year due to the fluctuations in revenues and expenses described above.

Income (Loss) from Discontinued Operations, Net of Income Taxes. Income (loss) from discontinued operations includes the operations of real estate properties and gain on disposition of real estate properties held for sale or sold subsequent to the adoption of FAS 144 effective January 1, 2002, that were considered components of an entity under FAS 144 and in which the Company has not retained or does not expect to retain significant continuing involvement. Dispositions of real estate assets have been and will continue to be a significant part of the Company's activities and, as a result of applying the provisions of FAS 144, the Company expects a greater amount of these activities to be classified as discontinued operations in future periods as fewer asset dispositions will qualify for grandfathered treatment under FAS 144. In the first quarter of 2004, the Company sold one real estate project that was considered a discontinued operation for a net sales price of \$11.3 million. This sale resulted in a gain on disposition of real estate (before income taxes) of \$0.8 million, including interest forgiveness of \$0.3 million. In the first quarter of 2003, the Company sold two real estate projects with an aggregate net sales price of \$12.4 million for an aggregate gain on disposition of real estate (before income taxes) of \$1.7 million. Income (loss) from discontinued operations for the first quarter of 2003 also included a provision for loss of \$1.4 million to reflect a real estate held for sale asset at fair value less cost to sell. The related real estate asset was sold in the first quarter of 2004, as described above.

Net Income. Net income increased due to the fluctuations in revenues and expenses described above.

Quarterly Results of Operations and Seasonality

The results of operations for any quarter are not necessarily indicative of results for any future period. Revenues and net income during the fourth fiscal quarter historically have been somewhat greater than in each of the first three fiscal quarters, primarily because the Company's customers have demonstrated a tendency to close transactions toward the end of the fiscal year. The timing and introduction of new contracts, the disposition of investments in real estate assets, the recognition of incentive fees towards the latter part of the fiscal year as contractual targets are met and other factors may also cause quarterly fluctuations in the Company's results of operations.

Liquidity and Capital Resources

The Company's liquidity and capital resources requirements include the funding of working capital needs, primarily costs incurred in providing services to its customers before collection of related billings; the funding of capital investments, including the acquisition of or investments in other real estate service companies; the repurchase of its shares if authorized by the Board of Directors; expenditures for real estate and payments on notes payable associated with its development and investment activities; and expenditures related to upgrading the Company's management information systems. The Company finances its operations with internally generated funds and borrowings under the Credit Facility (described below). The portion of the Company's development and investment business that includes the acquisition

and development of real estate is financed with loans secured by underlying real estate, external equity, internal sources of funds, or a combination thereof.

Net cash used in operating activities totaled \$44.4 million for the first quarter of 2004, compared to \$1.1 million for the same period in 2003. Cash used in operating activities, excluding the change in real estate and related borrowings, increased to \$39.0 million in 2004 as compared to \$3.4 million in 2003, primarily due to greater collections of accounts receivable in 2003, due to higher average receivable balances in 2003. Also, although net income for the first quarter of 2004 exceeded net income for the first quarter of 2003, cash provided by (used in) earnings decreased from cash provided of \$9.5 million in the first quarter of 2003 to cash used of \$3.7 million for the comparable period in 2004. This decrease was largely due to \$10.3 million (before income taxes) of the Company's earnings for the first quarter of 2004 being generated from investments in unconsolidated subsidiaries, for which the related cash provided is reflected as an investing activity (as described below), as compared to \$0.1 million (before income taxes) in the same period of 2003. In addition, cash used in real estate activities, net of related borrowings, was \$5.4 million in the first quarter of 2004, compared to cash provided of \$2.3 million for the same period in 2003 as a result of fewer real estate dispositions in 2004.

Net cash provided by investing activities totaled \$18.1 million for the first quarter of 2004, compared to \$2.8 million for the same period in 2003. This increase in cash is partially due to proceeds of \$11.3 million from the disposition of a real estate project classified as held for investment at the time of the disposition, in accordance with FAS 144, offset by \$1.9 million of expenditures made in 2004 related to real estate classified as held for investment, as compared to similar expenditures of \$0.1 million in 2003. The increase in cash provided was also the result of distributions from investments in unconsolidated subsidiaries, net of contributions, of \$10.1 million in 2004, compared to \$3.7 million in 2003, as a result of a significant disposition of an underlying real estate project by an unconsolidated subsidiary in 2004.

Net cash used in financing activities totaled \$11.8 million for the first quarter of 2004, compared to \$9.7 million for the same period in 2003. In 2004, the Company made principal payments, net of additional borrowings, of \$11.2 million, primarily under the Credit Facility (described below), compared to principal payments, net of additional borrowings, of \$5.0 million in 2003. In addition, the Company made payments, net of borrowings, of \$9.1 million on notes payable on real estate held for investment, primarily due to the disposition of a real estate project, noted above, as compared to payments of \$0.2 million in 2003. These uses of cash were offset by contributions, net of distributions, from minority interest holders of \$7.1 million in 2004, compared to distributions, net of contributions, of \$5.6 million in 2003. This increase in cash is primarily the result of contributions received related to the Company's new discretionary development and investment fund formed in 2004. The Company also received \$1.4 million in proceeds in 2004 from the exercise of stock options and issuance of common stock, compared to \$1.1 million in 2003.

In June 2002, the Company obtained a \$150.0 million revolving line of credit (the Credit Facility) arranged by Bank of America, N.A., as the administrative agent (the Administrative Agent), which replaced the Company's previous \$150.0 million revolving line of credit. Under the terms of the Credit Facility, the Company can obtain loans, which are Base Rate Loans or Eurodollar Rate Loans. Base Rate Loans bear interest at a base rate plus a margin up to 0.75% depending on the Company's leverage ratio. The base rate is the higher of the prime lending rate announced from time to time by the Administrative Agent or an average federal funds rate plus 0.5%. Eurodollar Rate Loans bear interest at the Eurocurrency rate plus a margin, which ranges from 1.75% to 2.5%, depending upon the Company's leverage ratio. The Credit Facility contains various covenants such as the maintenance of minimum equity, liquidity, revenues, interest coverage ratios and fixed charge ratios. The Credit Facility also includes restrictions on recourse indebtedness and total indebtedness, restrictions on liens and certain restrictions on investments and acquisitions that can be made by the Company. In addition, the Company may not pay dividends, repurchase common shares, or make other distributions on account of its common stock exceeding 50% of the previous year's net income before depreciation and amortization. The Credit Facility

is guaranteed by certain significant subsidiaries of the Company and is secured by a pledge of a stock of such significant subsidiaries and a pledge of certain intercompany indebtedness.

The Company's participation in derivative transactions has been limited to hedging purposes, and derivative instruments are not held for trading purposes. The Credit Facility requires the Company to enter into one or more interest rate agreements for the Company's floating rate indebtedness in excess of \$30.0 million (other than construction loans under which interest is capitalized in accordance with accounting principles generally accepted in the United States (GAAP)) ensuring the net interest on such excess is fixed, capped or hedged. In March 2001, the Company renewed an existing interest rate swap agreement for a two-year period, with a fixed interest pay rate of 4.68% and a notional amount of \$150.0 million. The interest rate swap agreement expired on March 24, 2003, and the weighted average receive rate was 1.37% for the three months ended March 31, 2003. Subsequent to the expiration of the interest rate swap agreement, the Company has entered into various short-term interest rate agreements to comply with the requirements of the Credit Facility. In March 2004, the Company entered into an interest rate cap agreement with a notional amount of \$10.0 million expiring June 24, 2004, under which the Company will receive payments if the 30-day LIBOR based interest rate exceeds 1.3%. The interest rate cap agreement has been designated an effective hedge, and, to the extent the hedging relationship remains effective, changes in fair value of the interest rate cap agreement will be recorded in other comprehensive income.

The Company also has a \$25.0 million discretionary line of credit (the Discretionary Line) with Bank of America, N.A. Each loan obtained by the Company under the Discretionary Line matures in five business days, but no later than June 28, 2004, and bears interest at a rate agreed upon between the Company and the bank. Borrowings under the Discretionary Line are unsecured and reduce borrowing capacity under the Credit Facility.

At March 31, 2004, the Company had no borrowings outstanding under the Credit Facility or the Discretionary Line. The covenants contained in the Credit Facility and the amount of the Company's other borrowings and contingent liabilities may have the effect of limiting the credit available to the Company under the Credit Facility to an amount less than the \$150.0 million commitment. As it takes longer for the Company to dispose of real estate investments in a weaker economy, the recent economic slowdown could adversely impact the Company's ability to comply with certain of the real estate-related financial covenants in the Company's Credit Facility, which could negatively impact the Company's borrowing capacity. Also, since many of the financial covenants in the Credit Facility are dependent on the Company's EBITDA , as defined in the Credit Facility agreement and calculated on a trailing four quarter basis, a decline in the Company's overall operations could adversely impact the Company's ability to comply with these financial covenants and, in turn, the Company's borrowing capacity or the amount of its investments in real estate. The Company's unused borrowing capacity (taking into account letters of credit outstanding and limitations from certain financial covenants) under the Credit Facility was \$128.2 million at March 31, 2004. The Company expects to continue to borrow under the Credit Facility to finance future strategic acquisitions, fund its co-investment activities and provide the Company with an additional source of working capital.

In March 2003, the Company entered into an interest rate cap agreement in order to limit its interest expense on a construction loan with a 30-day LIBOR-based floating interest rate related to a consolidated real estate project. The interest rate cap agreement has a notional amount of \$11.4 million and the Company will receive payments if the LIBOR-based interest rate exceeds 3.5%. The interest rate cap agreement has not been designated as an effective hedge, and therefore the interest rate cap agreement will be marked to market each period with the change in fair market value recognized in current period earnings. The interest rate cap agreement expires on March 1, 2005. Through March 31, 2004, amounts recorded by the Company related to this interest rate cap agreement were not material.

As of March 31, 2004, the Company has various commitments that could impact its liquidity as summarized below (in millions):

	Total Amounts Committed	Amount of Commitments by Time of Expiration			
		Less than 1 year	1-3 years	4-5 years	After 5 years
Standby letters of credit	\$ 11.0	\$ 11.0	\$	\$	\$
Guarantees	4.9	3.2	1.7		
Total Commitments	\$ 15.9	\$ 14.2	\$ 1.7	\$	\$

The Company does not anticipate paying any dividends in the foreseeable future. The Company believes that funds generated from operations, together with existing cash and available credit under the Credit Facility and loans secured by underlying real estate will be sufficient to finance its current operations, planned capital expenditure requirements, payment obligations for development purchases, share repurchases, acquisitions of service companies, signing bonuses or loans for new employees and internal growth for the foreseeable future. The Company's need, if any, to raise additional funds to meet its working capital and capital requirements will depend upon numerous factors, including the success and pace of its implementation of its growth strategy. The Company regularly considers capital raising alternatives to be able to take advantage of available avenues to supplement its working capital, including strategic corporate partnerships or other alliances, bank borrowings and the sale of equity and/or debt securities.

Off-balance Sheet Arrangements

The Company does not have any off-balance sheet arrangements, as defined in Regulation S-K Item 303(a)(4)(ii)(A)-(D), that have or are reasonably likely to have a current or future effect on the Company's financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that is material to investors.

Forward-Looking Statements

Certain statements contained or incorporated by reference in this Quarterly Report on Form 10-Q, including without limitation statements containing the words believe, anticipate, forecast, will, may, expect, envision, project, budget, target, estimate, should, and words of similar import, are forward-looking statements within the meaning of the federal securities laws. Such forward-looking statements involve known and unknown risks, uncertainties and other matters which may cause the actual results, performance or achievements of the Company or industry results to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements. Such risks, uncertainties and other matters include, but are not limited to (i) the timing of individual transactions, (ii) the ability of the Company to identify, implement and maintain the benefit of cost reduction measures and achieve economies of scale, (iii) the ability of the Company to compete effectively in the international arena, (iv) the ability of the Company to retain its major customers and renew its contracts, (v) the ability of the Company to attract new user and investor customers, (vi) the ability of the Company to manage fluctuations in net earnings and cash flow which could result from the Company's participation as a principal in real estate investments, (vii) the Company's ability to continue to pursue its growth strategy, (viii) the Company's ability to pursue strategic acquisitions on favorable terms and manage challenges and issues commonly encountered as a result of those acquisitions, (ix) the Company's ability to compete in highly competitive national and local business lines, and (x) the Company's ability to attract and retain qualified personnel in all areas of its business (particularly senior management). In addition, the Company's ability to achieve certain anticipated results

will be subject to other factors affecting the Company's business that are beyond the Company's control, including but not limited to general economic conditions (including the cost and availability of capital for investment in real estate and customers' willingness to make real estate commitments) and the effect of government regulation on the conduct of the Company's business. Given these uncertainties, readers are cautioned not to place undue reliance on such forward-looking statements. The Company disclaims any obligation to update any such statements or publicly announce any updates or revisions to any of the forward-looking statements contained herein to reflect any change in the Company's expectation with regard thereto or any change in events, conditions, circumstances or assumptions underlying such statements. Reference is hereby made to the disclosures contained under the heading "Risk Factors" in Item 1. Business of the Company's Annual Report on Form 10-K filed with the Securities and Exchange Commission on March 15, 2004.

ITEM 3. Quantitative and Qualitative Disclosures About Market Risk

The Company's primary market risk exposure is to changes in interest rates. The Company is exposed to market risk related to its Credit Facility and loans secured by real estate properties as discussed in Management's Discussion and Analysis of Financial Condition and Results of Operations Liquidity and Capital Resources and in Notes 5 and 6 to the Company's Condensed Consolidated Financial Statements. The Credit Facility and the majority of the loans secured by real estate bear interest at variable rates and are subject to fluctuations in the market. From time to time, the Company purchases interest rate agreements to hedge a portion, but not all, of its exposure to fluctuations in interest rates, and, as such, the effects of interest rate changes are expected to be limited. The Company's earnings are also somewhat affected by fluctuations in the value of the U.S. dollar as compared to foreign currencies as a result of its operations in Canada, Europe, Asia and Australia. There have been no significant changes in the interest rate or foreign currency market risks since December 31, 2003.

ITEM 4. Controls and Procedures

As of the end of the period covered by this report, the Company carried out an evaluation, under the supervision and with the participation of management, including its Chief Executive Officer and Chief Financial Officer, of the effectiveness of the Company's disclosure controls and procedures (as defined in 13a-15(e) of the Securities Exchange Act of 1934 (the Exchange Act)). Based on that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures are effective in timely alerting them to material information relating to the Company (including its consolidated subsidiaries) required to be included in the Company's periodic filings with the Securities and Exchange Commission. There were no changes in the Company's internal control over financial reporting (as defined in Rule 13a-15(f) under the Exchange Act) that occurred during the Company's last fiscal quarter that have materially affected or are reasonably likely to materially affect the Company's internal control over financial reporting.

34

PART II OTHER INFORMATION

ITEM 1. Legal Proceedings

The Company and one of its subsidiaries are defendants in a lawsuit styled *Bank One Oklahoma, N.A. (the Bank), et al. v. Trammell Crow Services, Inc. and Trammell Crow Company*, No. 03 C 3624, pending in the US District Court for the Northern District of Illinois, originally filed on April 2, 2003. The claims asserted by the plaintiffs relate to a sale/leaseback transaction involving a property in Oklahoma City previously owned by the Bank. The suit alleges breach of contract, breach of fiduciary duty, negligent misrepresentation, fraudulent misrepresentation and fraudulent concealment against the Company and/or its subsidiary and alleges that the plaintiffs have been damaged in an unspecified amount in excess of \$15.0 million. The plaintiffs seek to recover actual damages, punitive damages and reasonable attorneys' fees. The suit is in the process of discovery, and no trial date has been set. As of the date of this Form 10-Q, the outcome of the suit cannot be predicted with any certainty, and the Company cannot at this time estimate an amount or range of potential loss in the event of an unfavorable outcome. While the Company cannot predict with any certainty the outcome of this matter, the Company currently believes the plaintiffs' claims are without merit and is vigorously defending the lawsuit.

From time to time, the Company is involved in other litigation matters that arise in the ordinary course of its business, some of which involve claims for damages which are substantial in amount. The ultimate liability for these matters cannot be determined. However, based on the information currently available, the Company does not believe that the resolution of any such matters to which it is currently a party will have a material adverse effect on the Company's results of operations, financial condition or liquidity.

ITEM 6. Exhibits and Reports on Form 8-K

(a) Exhibits:

- 3.1(1) Certificate of Incorporation of the Company
 - 3.2(1) Bylaws of the Company
 - 3.2.1(2) First Amendment to the Bylaws of the Company
 - 3.2.1(3) Second Amendment to the Bylaws of the Company
 - 3.2.1(4) Third Amendment to the Bylaws of the Company
 - 4.1(5) Form of Certificate for Shares of Common Stock of the Company
 - 10.1 Employment Agreement dated as of November 24, 2003, between the Company and William F. Concannon
 - 10.1.1 Amendment to Employment Agreement dated as of April 6, 2004, between the Company and William F. Concannon
 - 10.2 Employment Agreement dated as of April 6, 2004, between the Company and T. Christopher Roth
 - 10.3 Amendment to Employment Agreement dated as of April 6, 2004, between the Company and Robert E. Sulentic
 - 10.4 Amendment to Employment Agreement dated as of April 6, 2004, between the Company and Derek R. McClain
 - 10.5 Amendment to Employment Agreement dated as of April 6, 2004, between the Company and James R. Groch
 - 10.6 Amendment to Employment Agreement dated as of April 6, 2004, between the Company and Michael J. Lafitte
 - 10.7 Amendment to Employment Agreement dated as of April 6, 2004, between the Company and John A. Stirek
- 35
-

- 10.8 Employment Agreement dated as of April 27, 2004, between the Company and Diane Paddison
- 31.1 Certification by the Chief Executive Officer of the Company Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002
