## PRESS RELEASE

### **ARCADIS WINS ANOTHER \$50 MILLION FLOOD PROTECTION CONTRACT IN NEW ORLEANS**

Arnhem, the Netherlands October 2, 2007 ARCADIS (EURONEXT: ARCAD), the international consultancy and engineering company, has been awarded a second contract for flood protection work in New Orleans. This time, ARCADIS will provide general design support services, multidisciplinary consultancy services and construction management services, for the New Orleans District of the U.S. Army Corps of Engineers (Corps). The contract was won by a joint venture of ARCADIS and Bioengineering Group also involving partners HNTB, WL Delft Hydraulics and ARCADIS subsidiary Alkyon.

The contract size is a maximum of \$50 million, which includes a base period of one year and four option periods of one year each. It is the second time the U.S. Army Corps has awarded a contract involving forward-looking design services for hurricane protection in the Gulf Coast. Earlier this year the joint venture of ARCADIS and Bioengineering Group was already awarded a five year \$150 million framework contract for the same type of services.

We see this second large contract award as an important expansion of our presence as a flood protection and water resources consultant in the United States, which is fully in line with our strategy of becoming a leading player in flood protection and water management services globally, said Harrie Noy, Chief Executive Officer of ARCADIS. He added: With increasing worries about the impact of climate change, we expect a growing demand for our extensive water management experience. We are looking to expand our water management involvement in Florida and California, where we feel our flood management know-how can be of great value .

As a team we are proud of our accomplishments in the New Orleans area to date, and delighted to be recognized with further responsibility and opportunity to contribute to the region's recovery, stated Wendi Goldsmith, President of The Bioengineering Group, Inc. As the key small business venture in this large effort, we look forward to the opportunity to grow in order to best dedicate resources locally and support other recovering businesses and families in the process. We hope to continue to bring out resourcefulness and problem-solving abilities to bear on these challenges.

Project work will include the evaluation, design and construction management of levees and floodwalls; coastal restoration; special structures for flood protection; as well as major pumping facilities. Work also encompasses development, evaluation and planning studies for improved levels of flood protection for New Orleans and portions of southern Louisiana.

## Edgar Filing: ARCADIS N V - Form 6-K

ARCADIS is an international company providing consultancy, engineering and management services in infrastructure, environment and facilities, to enhance mobility, sustainability and quality of life. ARCADIS develops, designs, implements, maintains and operates projects for
