CITY NATIONAL CORPORATION

NOTES TO THE UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

1. **Organization** - City National Corporation (the Corporation) is the holding company for City National Bank (the Bank). The Bank delivers banking, trust and investment services through 63 offices in Southern California, the San Francisco Bay area, Nevada and New York City. Additionally, the Corporation delivers investment and wealth advisory services through its wealth advisory affiliates. The Corporation also has an unconsolidated subsidiary, Business Bancorp Capital Trust I. The Corporation is approved as a financial holding company pursuant to the Gramm-Leach-Bliley Act of 1999. References to the Company mean the Corporation, Bank, all subsidiaries and affiliates together.

2. **Consolidation** - The financial statements of the Company include the accounts of the Corporation, its non-bank subsidiaries, the Bank and the Bank's wholly-owned subsidiaries, after the elimination of all material intercompany transactions. Preferred stock, issued by the Company's REITs and third-party equity ownership in affiliates are reflected as Minority interest in consolidated subsidiaries in the Consolidated Balance Sheet. The related minority share of earnings is shown as Minority interest expense in the Consolidated Statement of Income.

*The Company's investment management and wealth advisory affiliates are organized as limited liability companies. The Corporation generally owns a majority position in each affiliate and certain management members of each affiliate own the remaining shares. The Corporation has contractual arrangements with its affiliates whereby a percentage of revenue is allocable to fund affiliate operating expenses (operating share) while the remaining portion of revenue (distributable revenue) is allocable to the Corporation and the minority owners. All majority-owned affiliates are consolidated. The Corporation's interest in one investment management affiliate in which it holds a minority share is accounted for using the equity method. Additionally, the Company has various interests in variable interest entities that are not required to be consolidated. See Note 13 for a more detailed discussion on variable interest entities.*

3. **Acquisitions** - On February 28, 2007, the Company completed the acquisition of Business Bank Corporation, the parent of Business Bank of Nevada (BBNV) and an unconsolidated subsidiary, Business Bancorp Capital Trust I, in a cash and stock transaction valued at \$167 million. BBNV operated as a wholly-owned subsidiary of City National Corporation until after the close of business on April 30, 2007, at which time it was merged into the Bank.

On May 1, 2007, the Corporation completed the acquisition of Lydian Wealth Management in an all-cash transaction. The investment advisory firm is headquartered in Rockville, Maryland and now manages or advises on client assets totaling \$10.2 billion. Lydian Wealth Management changed its name to Convergent Wealth Advisors (Convergent Wealth) and became a subsidiary of Convergent Capital Management LLC, the Chicago-based asset management holding company that the Company acquired in 2003. All of the senior executives of Convergent Wealth signed employment agreements and acquired a significant minority ownership interest in Convergent Wealth.

4. **Accounting Policies** - Our accounting and reporting policies conform to generally accepted accounting principles ( GAAP ) and practices in the financial services industry. To prepare the financial statements in conformity with GAAP, management must make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements, and income and expenses during the reporting period. Circumstances and events that differ significantly from those underlying our estimates and assumptions could cause actual financial results to differ from our estimates. The material estimates included in the financial statements relate to the allowance for loan and lease losses, the reserve for off-balance sheet credit commitments, valuation of stock options, income taxes, goodwill and intangible asset values and valuation of financial assets and liabilities reported at fair value. The Company has applied its critical accounting policies and estimation methods consistently in all periods presented in these financial statements to the periods in which they applied. The allowance for loan and lease losses reflects management s ongoing assessment of the credit quality of the company s portfolio, which is affected by various economic trends, including weakness in the housing sector. Additional factors affecting the provision include net loan charge-offs, nonaccrual loans, risk-rating migration and growth in the portfolio. The Company s estimates and assumptions are expected to change as changes in market conditions and the Company s portfolio occur in subsequent periods.

The Company is on the accrual basis of accounting for income and expense. The results of operations reflect any interim adjustments, all of which are of a normal recurring nature, unless otherwise disclosed in this Form 10-Q, and which, in the opinion of management, are necessary for a fair presentation of the results for the interim periods presented. In accordance with the usual practice of banks, assets and liabilities of individual trust, agency and fiduciary funds have not been included in the financial statements. These unaudited consolidated financial statements should be

Table of Contents

read in conjunction with the audited consolidated financial statements included in the Company's Annual Report on Form 10-K for the year ended December 31, 2007. The results for the 2008 interim period are not necessarily indicative of the results expected for the full year. The Company has not made any significant changes in its critical accounting policies or its estimates and assumptions from those disclosed in its 2007 Annual Report other than the adoption of SFAS 157 effective January 1, 2008, and changes in the valuation methodology for certain collateralized debt obligation securities associated with the adoption of FSP 157-3. The Company has revised certain assumptions related to the adoption of SFAS 157 as discussed below and in Note 5 to these consolidated financial statements.

Certain prior period balances have been reclassified to conform to the current period presentation.

During the nine months ended September 30, 2008, the following accounting pronouncements applicable to the Company were issued or became effective:

- The Company adopted FASB Statement No. 157, *Fair Value Measurements* ( SFAS 157 ) effective January 1, 2008. SFAS 157 defines fair value for financial reporting purposes, establishes a framework for measuring fair value and expands disclosures about fair value measurements. SFAS 157 does not require new fair value measurements, but does apply under other accounting pronouncements where fair value is required or permitted. The provisions of the statement are being applied prospectively. The Company was not required to record a transition adjustment upon adoption of the Statement.

- On February 12, 2008, the FASB issued FASB Staff Position No. FAS 157-2, *Effective Date of FASB Statement No. 157* ( FSP 157-2 ). FSP 157-2 amends FASB Statement No. 157, *Fair Value Measurements* ( SFAS 157 ), to delay the effective date of SFAS 157 for all non-financial assets and non-financial liabilities, except those that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually). Examples of non-financial assets for the Company include goodwill and intangible assets associated with acquisitions. FSP 157-2 defers the effective date of SFAS 157 for items within its scope to fiscal years beginning after November 15, 2008, and interim periods within those fiscal years.

- The Company adopted FASB Statement No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities* ( SFAS 159 ) as of January 1, 2008. SFAS 159 provides companies with an option to report selected financial assets and liabilities at fair value on an instrument-by-instrument basis. Unrealized gains and losses on instruments for which the fair value option has been elected are reported in earnings at each subsequent reporting date. The objective of the Statement is to reduce both complexity in accounting for financial instruments and the volatility in earnings caused by measuring related assets and liabilities differently. The Company has not elected the fair value option for any financial assets or liabilities previously reported at cost.

- FASB Staff Position, ( FSP ) FIN 39-1, which amends certain aspects of FASB Interpretation Number 39, *Offsetting of Amounts Related to Certain Contracts - an interpretation of APB Opinion No. 10 and FASB Statement No. 105* ( FIN 39 ) became effective for the Company on January 1, 2008. The FSP amends paragraph 10 of FIN 39 to permit a reporting entity to offset fair value amounts recognized for the right to reclaim cash collateral (a receivable)

or the obligation to return cash collateral (a payable) against fair value amounts, including amounts that approximate fair value, recognized for **derivative instruments** executed with the same counterparty under the same master netting arrangement. Derivative instruments permitted to be netted for the purposes of the FSP include those instruments that meet the definition of a derivative in FASB Statement No. 133, *Accounting for Derivative Instruments and Hedging Activities*, including those that are not included in the scope of SFAS 133. The FSP only impacts the presentation of the derivative's fair value and the related collateral on the balance sheet. From time to time the Company may require or accept cash collateral. As of September 30, 2008, the Company held \$4.4 million of cash collateral from a counterparty. The Company opted not to offset the fair value amount of the obligation to return cash collateral against the fair value amount of derivative instruments executed with the same counterparty.

- EITF Issue No. 06-11, *Accounting for Income Tax Benefits of Dividends on Share-Based Payment Awards*, that became effective for the Company on January 1, 2008, provides that realized income tax benefits from dividends or dividend equivalents that are charged to retained earnings and paid to employees for equity classified nonvested equity shares, nonvested equity share units, and outstanding equity share options are to be recognized as an increase to additional paid-in capital. The amount recognized in additional paid-in capital for the realized income tax benefit from dividends on those awards are to be included in the pool of excess tax benefits available to absorb tax deficiencies on share-based payment awards. The Company previously recognized tax benefits associated with

Table of Contents

dividend payments on unvested shares as a reduction of income tax expense. The change in accounting for these tax benefits under the EITF did not have a significant impact on the Company's financial statements.

- On March 19, 2008, the FASB issued FASB Statement No. 161, *Disclosures about Derivative Instruments and Hedging Activities* ( SFAS 161 ). The Statement expands disclosure requirements for derivative instruments and hedging activities. The new disclosures will address how derivative instruments are used, how derivatives and the related hedged items are accounted for under SFAS 133, how derivative instruments and related hedged items affect an entity's financial position, financial performance and cash flows. In addition, companies will be required to disclose the fair values of derivative instruments and their gains and losses in a tabular format. SFAS 161 is effective for fiscal years beginning after November 15, 2008.
- On April 25, 2008, the FASB issued FASB Staff Position No. 142-3, *Determination of the Useful Life of Intangible Assets* ( FSP 142-3 ). FSP 142-3 amends the factors that should be considered in developing renewal or extension assumptions used to determine the useful life of a recognized intangible asset under FASB Statement No. 142, *Goodwill and Other Intangible Assets* ( SFAS 142 ). The intent of the FSP is to improve the consistency between the useful life of a recognized intangible asset under SFAS 142 and the period of expected cash flows used to measure the fair value of the asset under FASB Statement No. 141, *Business Combinations*, when the underlying arrangement includes renewal or extension terms. FSP 142-3 permits an entity to use its own assumptions, based on its historical experience, about the renewal or extension of an arrangement to determine the useful life of an intangible asset. These assumptions are to be adjusted for the entity-specific factors detailed in SFAS 142. FSP 142-3 is effective on a prospective basis for fiscal years beginning after December 15, 2008. The Company does not expect the adoption of FSP 142-3 to have a significant impact on its consolidated financial statements.
- In May 2008, the FASB issued FASB Statement No. 162, *The Hierarchy of Generally Accepted Accounting Principles* ( SFAS 162 ). SFAS 162 identifies the sources of accounting principles and the framework for selecting the principles used in the preparation of financial statements of nongovernmental entities that are presented in conformity with generally accepted accounting principles in the United States. SFAS 162 becomes effective 60 days following approval from the Securities and Exchange Commission, ( SEC ) of the Public Company Accounting Oversight Board, ( PCAOB ) amendments to AU Section 411, *The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles*. The adoption of SFAS 162 is not expected to have a material effect on the Company's financial statements.
- In June 2008, the FASB issued FSP EITF 03-6-1, *Determining Whether Instruments Granted in Share-Based Payment Transactions Are Participating Securities*. FSP EITF 03-6-1 states that all outstanding unvested share-based payment awards that contain rights to nonforfeitable dividends are considered participating securities. As such, the issuing entity is required to apply the two-class method of computing basic and diluted earnings per share. This pronouncement will be effective for the Company for fiscal years beginning after December 15, 2008. The Company is assessing the impact of the adoption of FSP EITF 03-6-1 on its financial statements.

- On September 12, 2008, the FASB issued FASB Staff Position No. 133-1 and FASB Interpretation No. 45-4, *Disclosures about Credit Derivatives and Certain Guarantees: An Amendment of FASB Statement No. 133 and FASB Interpretation No. 45; and Clarification of the Effective Date of FASB Statement No. 161 ( the FSP )*. The FSP expands disclosures about credit derivatives by requiring more information about the potential adverse effects of changes in credit risk on the financial position, financial performance and cash flows of the sellers of credit derivatives. It also amends FASB Interpretation No. 45, *Guarantors Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness to Others*, to require additional disclosure about the current status of the payment/performance risk of a guarantee. Finally, the FSP clarifies the effective date of FASB Statement No. 161, *Disclosures about Derivative Instruments and Hedging Activities*. The provisions of the FSP that amend Statement 133 and FIN 45 are effective for reporting periods ending after November 15, 2008. The disclosures required by Statement 161 should be provided for any reporting period beginning after November 15, 2008. The Company does not expect the adoption of the FSP to have a material effect on its financial statements.
  
- On October 10, 2008, the FASB issued FASB Staff Position No. FAS 157-3, *Determining the Fair Value of a Financial Asset in a Market that is Not Active ( FSP 157-3 )*. FSP 157-3 clarifies the application of FASB Statement No. 157, *Fair Value Measurements*, in an inactive market. The FSP is effective upon issuance, including prior periods for which financial statements have not been issued. The Company adopted FSP 157-3 effective

Table of Contents

September 30, 2008. Adoption of the FSP impacted the valuation of certain collateralized debt obligation securities for which the market has become inactive.

5. **Fair Value Measurements** - The Company adopted FASB Statement No. 157, *Fair Value Measurements* ( *SFAS 157* ) effective January 1, 2008 on a prospective basis. SFAS 157 defines fair value for financial reporting purposes as the price that would be received to sell an asset or paid to transfer a liability in an orderly market transaction between market participants at the measurement date (reporting date). Under the statement, fair value is based on an exit price in the principal market or most advantageous market in which the reporting entity could transact.

For each asset and liability required to be reported at fair value, management has identified the unit of account and valuation premise to be applied for purposes of measuring fair value. The unit of account is the level at which an asset or liability is aggregated or disaggregated for purposes of applying SFAS 157. The valuation premise is a concept that determines whether an asset is measured on a standalone basis or in combination with other assets. For purposes of applying the provisions of SFAS 157, the Company measures its assets and liabilities on a standalone basis then aggregates assets and liabilities with similar characteristics for disclosure purposes.

Fair Value Hierarchy

Management employs market standard valuation techniques in determining the fair value of assets and liabilities. Inputs used in valuation techniques are based on assumptions that market participants would use in pricing an asset or liability. SFAS 157 prioritizes inputs used in valuation techniques as follows:

**Level 1**-Quoted market prices in an active market for identical assets and liabilities.

**Level 2**-Observable inputs including quoted prices (other than Level 1) in active markets for similar assets or liabilities, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset or liability such as interest rates, yield curves, volatilities and default rates, and inputs that are derived principally from or corroborated by observable market data.

**Level 3**-Unobservable inputs reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability based on the best information available.

If the determination of fair value measurement for a particular asset or liability is based on inputs from different levels of the fair value hierarchy, the level in the fair value hierarchy within which the entire fair value measurement falls is based on the lowest level input that is

## Edgar Filing: CITY NATIONAL CORP - Form 10-Q

significant to the fair value measurement in its entirety. Management's assessment of the significance of a particular input to the fair value measurement requires judgment and considers factors specific to the asset or liability measured.

### Valuation Techniques

#### *Securities*

Fair values for U.S. Treasury securities, marketable equity securities and trading securities, with the exception of agency securities held in the trading account, are based on quoted market prices. Securities with fair values based on quoted market prices are classified in Level 1 of the fair value hierarchy. Level 2 securities include the Company's portfolio of federal agency, mortgage-backed, state and municipal securities for which fair values are calculated with models using quoted prices and other inputs directly or indirectly observable for the asset or liability. Prices for 99 percent of these securities are obtained through a third-party valuation source. Management reviewed the valuation techniques and assumptions used by the provider and determined that the provider utilizes widely accepted valuation techniques based on observable market inputs appropriate for the type of security being measured. Prices for the remaining securities are obtained from dealer quotes. Securities classified in Level 3 include collateralized debt obligation instruments for which the market has become inactive. Fair values for these securities were determined using internal models based on assumptions that are not observable in the market.

Table of Contents

*Loans*

The Company does not record loans at fair value with the exception of impaired loans which are measured for impairment in accordance with SFAS 114, *Accounting by Creditors for Impairment of a Loan* ( SFAS 114 ). Under SFAS 114, loans measured for impairment based on the fair value of collateral or observable market prices are within the scope of SFAS 157. Loans reported at fair value in the following table were measured for impairment by valuing the underlying collateral based on third-party appraisals. These loans are classified in Level 2 of the fair value hierarchy.

*Derivatives*

The Company uses interest rate swaps to manage its interest rate risk. The fair value of these swaps is obtained through third-party valuation sources that use conventional valuation algorithms. The pricing model is a discounted cash flow model that relies on inputs, such as interest rate futures, from highly liquid and active markets. The Company also enters into interest rate risk protection products with certain clients. These contracts are offset by paired trades with derivative dealers. The fair value of these derivatives is obtained from a third-party valuation source that uses conventional valuation algorithms.

To comply with the provisions of SFAS 157, the Company incorporates credit valuation adjustments to appropriately reflect nonperformance risk for both the Company and counterparties in the fair value measurements. Although the Company has determined that the majority of the inputs used to value derivative contracts fall within Level 2 of the fair value hierarchy, the credit valuation adjustments utilize Level 3 inputs, such as estimates of credit spreads. The Company has determined that the impact of the credit valuation adjustments is not significant to the overall valuation of these derivatives. As a result, the Company has classified the derivative contract valuations in their entirety in Level 2 of the fair value hierarchy.

The fair value of foreign exchange options and transactions are derived from market spot and/or forward foreign exchange rates and are classified in Level 1 of the fair value hierarchy.

*Other Real Estate Owned ( OREO )*

The fair value of OREO is based on third-party appraisals of the properties performed in accordance with professional appraisal standards and Bank regulatory requirements under the Financial Institutions Reform Recovery and Enforcement Act of 1989 ( FIRREA ). Appraisals are reviewed and approved by the Company's appraisal department. OREO is classified in Level 2 of the fair value hierarchy.

The Company records securities available-for-sale, trading securities and derivative contracts at fair value on a recurring basis. Certain other assets such as impaired loans and OREO are recorded at fair value on a nonrecurring basis. Nonrecurring fair value measurements typically involve assets that are evaluated for impairment and for which any impairment is recorded in the period in which the remeasurement is performed. A distribution of asset and liability fair values according to the fair value hierarchy at September 30, 2008 is provided in the table below:

Table of Contents

(In thousands)

Asset or Liability Measured at Fair Value	September 30, 2008	Fair Value Measurements at Reporting Date Using		
		Quoted Prices in Active Markets Level 1	Significant Other Observable Inputs Level 2	Significant Unobservable Inputs Level 3

<b>Total assets at fair value</b>	<b>\$ 70,667</b>	<b>\$</b>	<b>\$ 70,667</b>	<b>\$</b>

- (1) Reported in Other assets in the consolidated balance sheet.  
(2) Reported in Other liabilities in the consolidated balance sheet.  
(3) Impaired loans for which fair value was calculated using the collateral valuation method.  
(4) OREO balance of \$2,279 in the consolidated balance sheet is net of estimated disposal costs.

The changes in Level 3 assets measured at fair value on a recurring basis are summarized in the following table:

**Level 3 Assets Measured on a Recurring Basis**

(In thousands)

	Securities Available-for-Sale
Balance of recurring Level 3 assets at January 1, 2008	\$ 32,977
Total gains or losses (realized/unrealized):	
Included in earnings	(7,159)
Included in other comprehensive income	1,999
Purchases, sales, issuances and settlements, net	(2,751)
Transfers in and/or out of Level 3	25,778

Edgar Filing: CITY NATIONAL CORP - Form 10-Q

Balance of recurring Level 3 assets at September 30, 2008	\$	50,844
---	----	--------

There were no purchases or sales of Level 3 assets during the period. The \$7.2 million loss included in earnings is an impairment loss recognized on CDO income notes. Refer to Note 6, Investment Securities, on page 13 for further discussion of impairment. The \$25.8 million transfer in to Level 3 includes AAA-rated collateralized debt obligations for which the market is inactive. The fair values of these instruments are determined using an internal model based on assumptions, such as the yield that would be required by market participants, that are not observable in the market. Unrealized gains and losses on Level 3 assets are reported as a component of other comprehensive income in the consolidated balance sheet.

Table of Contents

FSP 157-2 issued on February 12, 2008, amends SFAS 157, to delay its effective date for all non-financial assets and non-financial liabilities, except those that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually). Therefore, the Company's goodwill and customer-relationship intangibles will be subject to the provisions of SFAS 157 effective January 1, 2009.

6. **Investment Securities** Securities are classified based on management's intention on the date of purchase. All securities other than trading securities are classified as available-for-sale and are valued at fair value. Unrealized gains or losses on securities available-for-sale are excluded from net income, to the extent they are considered temporary, but are included as separate components of other comprehensive income, net of taxes. Premiums or discounts on securities available-for-sale are amortized or accreted into income using the interest method over the expected lives of the individual securities. For most of the Company's investments, fair values are determined based upon externally verifiable quoted prices or other observable inputs. Realized gains or losses on sales of securities available-for-sale are recorded using the specific identification method. Trading securities are valued at fair value with any unrealized gains or losses included in net income.

Impairment Assessment

Impairment exists when the fair value of a security is less than its cost. Cost includes adjustments made to the cost basis of a security for accretion, amortization and previous other-than-temporary impairments. The Company performs a quarterly assessment of the debt and equity securities in its investment portfolio that have an unrealized loss to determine whether the decline in the fair value of these securities below their cost is other-than-temporary. Impairment is considered other-than-temporary when it becomes probable that an investor will be unable to recover the cost of an investment. The Company's impairment assessment takes into consideration factors such as the length of time and the extent to which the market value has been less than cost; the financial condition and near-term prospects of the issuer including events specific to the issuer or industry; defaults or deferrals of scheduled interest, principal or dividend payments; external credit ratings and recent downgrades; and the Company's intent and ability to hold the security for a period of time sufficient to allow for a recovery in fair value. If a decline in fair value is judged to be other than temporary, the cost basis of the individual security is written down to fair value which then becomes the new cost basis. The amount of the write down is included in Impairment loss on securities in the consolidated income statement. The new cost basis is not adjusted for subsequent recoveries in fair value.

The following table provides a summary of the gross unrealized losses and fair value of investment securities that are not deemed to be other-than-temporarily impaired aggregated by investment category and length of time that the securities have been in a continuous unrealized loss position as of September 30, 2008:

(In thousands) Temporarily Impaired Securities at September 30, 2008	Less than 12 months		12 months or Greater		Total	
	Fair Value	Estimated Unrealized Loss	Fair Value	Estimated Unrealized Loss	Fair Value	Estimated Unrealized Loss
CMOs	\$ 560,935	\$ 24,476	\$ 203,704	\$ 16,402	\$ 764,639	\$ 40,878
Mortgage-backed	187,183	1,427	343,609	8,524	530,792	9,951
State and Municipal	205,954	7,421	6,654	388	212,608	7,809
Other debt securities	57,843	14,199	7,305	1,103	65,148	15,302
Total debt securities	1,011,915	47,523	561,272	26,417	1,573,187	73,940
Equity securities and mutual funds	54,442	3,594			54,442	3,594

Edgar Filing: CITY NATIONAL CORP - Form 10-Q

Total Securities	\$	1,066,357	\$	51,117	\$	561,272	\$	26,417	\$	1,627,629	\$	77,534
------------------	----	-----------	----	--------	----	---------	----	--------	----	-----------	----	--------

At September 30, 2008, total securities available-for-sale had a fair value of \$2,159.9 million, which included the temporarily impaired securities above of \$1,627.6 million. Other securities in the portfolio had a fair value of \$532.3 million, which included an unrealized gain of \$7.3 million. The Company attributes the losses on these securities to temporary factors such as the level of interest rates and current volatility in the credit markets. Because the Company has the ability and intent to hold these investments until their fair value recovers or until maturity, for those securities with stated maturity dates, the Company does not consider these investments to be other-than-temporarily impaired.

Table of ContentsSecurities Deemed to be Other-Than-Temporarily Impaired

Through the impairment assessment process, the Company determined that the investments discussed below were other-than-temporarily impaired at September 30, 2008. The Company recorded an impairment loss on available-for-sale securities of \$31.9 million for the three- and nine-months ended September 30, 2008. No impairment was recorded for the three- and nine-months ended September 30, 2007.

(In thousands) Impairment Losses on Other- Than-Temporarily Impaired Securities	For the three months ended September 30,		For the nine months ended September 30,	
	2008	2007	2008	2007
Debt securities	\$ 7,159	\$	\$ 7,159	\$
Equity securities and mutual funds	24,777		24,777	
Total	\$ 31,936	\$	\$ 31,936	\$

Perpetual Preferred Stock

The Company recorded a \$21.9 million impairment loss in third quarter 2008 on its investment in perpetual preferred stock issued by the Federal Home Loan Mortgage Corporation and the Federal National Mortgage Association. The action taken by the Federal Housing Finance Agency on September 7, 2008 placing these Government-Sponsored Agencies into conservatorship and eliminating the dividends on their preferred shares led to the Company's determination that these securities are other-than-temporarily impaired. The adjusted cost basis of these equity securities is \$1.8 million at September 30, 2008.

Collateralized Debt Obligation Income Notes

These securities ( CDO Notes ) are equity interests in a multi-class, cash flow collateralized bond obligation backed by a collection of Trust Preferred securities issued by financial institutions. The equity interests represent ownership of all residual cash flow from the asset pools after all fees have been paid and debt issues have been serviced. CDO Notes are collateralized by debt securities with stated maturities and are therefore reported as debt securities in the consolidated balance sheet. The market for CDO Notes has become increasingly inactive since the fourth quarter of 2007 with no visible trade activity in the past 6 months. The valuation of these securities requires substantial judgment and estimation of the factors used in the cash flow model that are not currently observable in the market. CDO Notes are classified as Level 3 in the fair value hierarchy. Refer to Note 5, Fair Value Measurements on page 10 for further discussion of fair value.

The Company recorded a \$7.2 million impairment loss in third quarter 2008 on its investments in CDO Notes. The fair value of these securities was determined using an internal discounted cash flow model that incorporates the Company's assumptions about projected cash flows and risk-adjusted discount rates. The Company considered a number of factors in determining the discount rate used in the valuation model including the implied rate of return at the last date the market for CDO Notes and similar securities was active, rates of return that market participants would consider in valuing the securities and indicative quotes from dealers. The Company determined that 25 percent is the appropriate rate to apply in discounting the projected cash flows of its CDO Notes. The adjusted cost basis of CDO Notes is \$22.7 million at September 30, 2008.

Equity Securities

The Company recorded a \$2.9 million impairment loss in third quarter 2008 on its investments in equity securities and mutual funds ( equity securities ). The fair value of equity securities is based on observable market prices. Overall, the fair value of many of the securities held has declined in recent months. The Company attributes most of the decline to recent significant market volatility and believes that current valuations are not indicative of the underlying value of these investments. Securities have been determined to be other-than-temporarily impaired based on the magnitude and duration of the decline in fair value below cost, the likelihood of recovery and other qualitative factors specific to the individual securities. The adjusted cost basis of equity securities is \$72.0 million at September 30, 2008.

Table of Contents

The following table provides a summary of the gross unrealized losses and fair value of investment securities that are not deemed to be other-than-temporarily impaired aggregated by investment category and length of time that the securities have been in a continuous unrealized loss position as of December 31, 2007:

(In thousands) Temporarily Impaired Securities at December 31, 2007	Less than 12 months		12 months or Greater		Total	
	Fair Value	Estimated Unrealized Loss	Fair Value	Estimated Unrealized Loss	Fair Value	Estimated Unrealized Loss
Federal Agency	\$ 30,933	\$ 66	\$ 30,933	\$ 66	\$ 30,933	\$ 66
CMOs	51,989	279	875,376	14,432	927,365	14,711
Mortgage-backed	11,398	10	712,749	15,939	724,147	15,949
State and Municipal	37,978	232	68,201	588	106,179	820
Other debt securities	22,781	1,328	8,220	541	31,001	1,869
Total debt securities	124,146	1,849	1,695,479	31,566	1,819,625	33,415
Equity securities and mutual funds	17,654	437			17,654	437
Total Securities	\$ 141,800	\$ 2,286	\$ 1,695,479	\$ 31,566	\$ 1,837,279	\$ 33,852

At December 31, 2007, total securities available-for-sale had a fair value of \$2,462.7 million, which included the temporarily impaired securities above of \$1,837.3 million. Other securities in the portfolio had a fair value of \$625.4 million, which included an unrealized gain of \$11.6 million.

7. **Shareholders Equity** - There were no purchases by the Company of equity securities that are registered by the Company pursuant to Section 12 of the Securities and Exchange Act of 1934 during the three-month period ended September 30, 2008.

On April 23, 2008 the Corporation's shareholders approved the reservation of an additional 3.5 million shares for issuance under the Corporation's 2008 Omnibus Plan. In total there are 4.1 million shares available to be issued under this plan.

Basic earnings per share are based on the weighted average shares of common stock outstanding less unvested restricted shares and units. Diluted earnings per share give effect to all potential dilutive common shares, which consist of stock options and restricted shares and units that were outstanding during the period, as well as shares that may be issued under our deferred compensation plan. At September 30, 2008, there were 1,643,305 antidilutive options compared to 924,816 antidilutive options at September 30, 2007.

8. **Share-Based Compensation** - The Company applies FASB Statement No. 123 (revised), Share-Based Payment, ( SFAS 123R ) in accounting for stock option plans. The Company uses a Black-Scholes methodology to determine the stock-based compensation expense for these plans. On September 30, 2008, the Company had one stock-based compensation plan, the City National Corporation 2008 Omnibus Plan (the Plan ), which was approved by the Company's shareholders on April 23, 2008. No new awards will be granted under predecessor plans. A description of the Plan is provided below. The compensation cost that has been recognized for all share-based awards was \$3.6 million and \$10.8 million for the three- and nine-month periods ended September 30, 2008, respectively,

compared to \$3.4 million and \$10.5 million for the three- and nine-month periods ended September 30, 2007. The Company received \$19.6 million and \$21.0 million in cash for the exercise of stock options during the nine-month periods ended September 30, 2008 and September 30, 2007, respectively. The tax benefit recognized in equity for share-based compensation arrangements was \$3.8 million and \$7.2 million for the nine months ended September 30, 2008 and 2007, respectively.

Plan Description

The Plan permits the grant of stock options, restricted stock, restricted stock units, performance shares, performance share units, performance units and stock appreciation rights, or any combination thereof, to the Company's eligible employees and non-employee directors. No grants of performance shares, performance share units, performance units or stock appreciation rights had been made as of September 30, 2008. The purpose of the Plan is to promote the success of

Table of Contents

the Company by providing an additional means to attract, motivate, retain and reward key employees of the Company with awards and incentives for high levels of individual performance and improved financial performance of the Company, and to link non-employee director compensation to shareholder interests through equity grants. Stock option awards are granted with an exercise price equal to the market price of the Company's stock at the date of grant. These awards vest in four years and have 10-year contractual terms. Restricted stock awards granted under the Plan vest over a period of at least three years, as determined by the Compensation, Nominating and Governance Committee. The participant is entitled to dividends and voting rights for all shares issued even though they are not vested. Restricted stock awards issued under predecessor plans vest over five years. The Plan provides for acceleration of vesting if there is a change in control (as defined in the Plan) or a termination of service, which may include disability or death. Unvested options are forfeited upon termination of employment, except for those instances noted above, and the case of the retirement of a retirement-age employee for options granted prior to January 31, 2006. All unexercised options expire 10 years from the grant date. At September 30, 2008 there were approximately 4.1 million shares available for future grants.

Fair Value

The fair value of each option award is estimated on the date of grant using a Black-Scholes option valuation methodology that uses the assumptions noted in the following table. The Company evaluates exercise behavior and values options separately for executive and non-executive employees. Expected volatilities are based on the historical volatility of the Company's stock. As of February 2008, the Company began using a 20-year look back period to calculate the volatility factor. The longer look back period reduces the impact of the recent disruptions in the capital markets, and provides values that management believes are more representative of expected future volatility. Prior to this date, the Company used a look back period equal to the expected term of the options. The Company uses historical data to predict option exercise and employee termination behavior. The expected term of options granted is derived from the historical exercise activity over the past 20 years and represents the period of time that options granted are expected to be outstanding. The risk-free rate for periods within the contractual life of the option is based on the U.S. Treasury yield curve in effect at the time of grant. The dividend yield is equal to the dividend yield of the Company's stock at the time of the grant.

To estimate the fair value of stock option awards, the Company uses the Black-Scholes valuation method, which incorporates the assumptions summarized in the table below:

	For the three months ended September 30,		For the nine months ended September 30,	
	2008	2007	2008	2007
Weighted-average volatility	29.91%	21.08%	29.32%	21.90%
Dividend yield	3.61%	2.65%	3.56%	2.48%
Expected term (in years)	6.35	6.38	6.06	6.13
Risk-free interest rate	4.57%	4.79%	4.01%	4.68%

Using the Black-Scholes methodology, the weighted-average grant-date fair values of options granted during the nine-month periods ended September 30, 2008 and 2007 were \$12.75 and \$17.15, respectively. The total intrinsic values of options exercised during the nine-month periods ended September 30, 2008 and 2007 were \$11.2 million, and \$16.3 million, respectively.

A summary of option activity and related information under the Plan for the nine-month period ended September 30, 2008 is presented below:

Table of Contents

Options	Shares (000)	Weighted- Average Exercise Price	Aggregate Intrinsic Value (\$000) (1)	Weighted- Average Remaining Contractual Term
Outstanding at January 1, 2008	4,171	\$ 52.60	\$ 34,708	5.03
Granted	626	54.29	383	
Exercised	(599)	32.65	(11,164)	
Forfeited or expired	(125)	67.31	(50)	
Outstanding at September 30, 2008	4,073	\$ 55.35	\$ 22,070	5.60
Exercisable at September 30, 2008	2,786	\$ 51.21	\$ 21,687	4.19

(1) Includes in-the-money options only.

A summary of changes in unvested options and related information for the nine-month period ended September 30, 2008 is presented below:

Unvested Shares	Shares (000)	Weighted-Average Grant-Date Fair Value
Unvested at January 1, 2008	1,141	\$ 17.29
Granted	626	\$ 12.75
Vested	(406)	\$ 17.03
Forfeited	(74)	\$ 16.46
Unvested at September 30, 2008	1,287	\$ 15.22

The number of options vested during the nine-month period ended September 30, 2008 was 406,039. The total fair value of options vested during the nine-month period ended September 30, 2008 was \$6.9 million.

Restricted stock is valued at the closing price of the Company's stock on the date of award. During the nine-month period ending September 30, 2008, the Compensation, Nominating and Governance Committee (the Committee) of the Company's Board of Directors awarded 170,923 shares of restricted common stock having an intrinsic value of \$9.3 million. During the nine-month period ending September 30, 2007, the Committee awarded 133,291 shares of restricted common stock having an intrinsic value of \$9.3 million. The portion of the market value of the restricted stock related to the current service period was recognized as compensation expense during the nine-month periods ending September 30, 2008 and 2007. The portion of the market value relating to future service periods was recorded as deferred equity compensation and will be amortized over the remaining vesting period. The compensation expense related to restricted stock for the first nine months of 2008 was \$4.5 million compared to \$4.4 million for the same period in 2007. As of September 30, 2008 the unrecognized compensation cost related to restricted shares granted under the plan was \$5.3 million. There were 444,570 restricted shares that had not vested as of September 30, 2008.

As of September 30, 2008, there was \$21.9 million of total unrecognized compensation cost related to unvested stock-based compensation arrangements granted under the Plan. That cost is expected to be recognized over a weighted-average period of 3.2 years.

9. **Derivatives and Hedging** - As part of its asset and liability management strategies, the Company uses interest-rate swaps to reduce cash flow variability and to moderate changes in the fair value of financial instruments. In accordance with SFAS 133 the Company recognizes derivatives as assets or liabilities on the balance sheet at their fair value. The treatment of changes in the fair value of derivatives depends on the character of the transaction.

In accordance with SFAS 133, the Company documents its hedge relationships, including identification of the hedging instruments and the hedged items, as well as its risk management objectives and strategies for undertaking the hedge transaction at the time the derivative contract is executed. This includes designating each derivative contract as either (i) a fair value hedge which is a hedge of a recognized asset or liability, (ii) a cash flow hedge which hedges a forecasted transaction or the variability of the cash flows to be received or paid related to a recognized asset or liability or (iii) an

Table of Contents

undesignated hedge, a derivative contract not designated as a hedging instrument whose change in fair value is recognized directly in the consolidated statement of income. All derivatives designated as fair value or cash flow hedges are linked to specific hedged items or to groups of specific assets and liabilities on the balance sheet. As of September 30, 2008 and September 30, 2007, the Company had derivative contracts with customers with a notional value of \$234.7 million and \$26.0 million, respectively, that would be considered undesignated hedges.

Both at inception and at least quarterly thereafter, the Company assesses whether the derivatives used in hedging transactions are highly effective (as defined in SFAS 133) in offsetting changes in either the fair value or cash flows of the hedged item. Retroactive effectiveness is assessed, as well as the expectation that the hedge will remain effective prospectively.

For cash flow hedges, in which derivatives hedge the variability of cash flows (interest payments) on loans that are indexed to U.S. dollar LIBOR or the Bank's prime interest rate, the effectiveness is assessed prospectively at the inception of the hedge, and prospectively and retrospectively at least quarterly thereafter. Ineffectiveness of the cash flow hedges is measured using the hypothetical derivative method described in Derivatives Implementation Group Issue G7, *Measuring the Ineffectiveness of a Cash Flow Hedge of Interest Rate Risk under Paragraph 30(b) When the Shortcut Method is not Applied*. For cash flow hedges, the effective portion of the changes in the derivatives' fair value is not included in current earnings but is reported as Accumulated other comprehensive income (loss). When the cash flows associated with the hedged item are realized, the gain or loss included in Accumulated other comprehensive income is recognized on the same line in the consolidated statement of income as the hedged item, i.e., included in Interest income on loans and leases. Any ineffective portion of the changes of fair value of cash flow hedges is recognized immediately in Other noninterest income in the consolidated statement of income.

For fair value hedges, the Company uses interest-rate swaps to hedge the fair value of certain certificates of deposits, subordinated debt and other long-term debt. The certificates of deposit are single maturity, fixed-rate, non-callable, negotiable certificates of deposit that pay interest only at maturity and contain no compounding features. The certificates cannot be redeemed early without penalty except in the case of the holder's death. The interest-rate swaps are executed at the time the deposit transactions are negotiated. The subordinated debt and other long-term debt consists of City National Bank ten-year subordinated with a face value of \$150.0 million due on September 1, 2011, and City National Corporation senior notes with a face value of \$220.9 million due on February 15, 2013. Interest-rate swaps are structured so that all key terms of the swaps match those of the underlying deposit or debt transactions, therefore ensuring no hedge ineffectiveness at inception. The Company ensures that the interest-rate swaps meet the requirements for utilizing the short-cut method in accordance with paragraph 68 of SFAS 133 and maintains appropriate documentation for each interest-rate swap. On a quarterly basis, fair value hedges are analyzed to ensure that the key terms of the hedged items and hedging instruments remain unchanged, and the hedging counterparties are evaluated to ensure that there are no adverse developments regarding counterparty default, therefore ensuring continuous effectiveness. For fair value hedges, the effective portion of the changes in the fair value of derivatives is reflected in current earnings, on the same line in the consolidated statement of income as the related hedged item. For both fair value and cash flow hedges, the periodic accrual of interest receivable or payable on interest rate swaps is recorded as an adjustment to net interest income for the hedged items.

The Company also offers various derivatives products to clients and enters into derivative transactions in due course. These transactions are not linked to specific Company assets or liabilities in the balance sheet or to forecasted transactions in an accounting hedge relationship and, therefore, do not qualify for hedge accounting. They are carried at fair value with changes in fair value recorded as part of Other noninterest income in the income statement. Fair values are determined from verifiable third-party sources that have considerable experience with the derivative markets. The credit component of the fair value of these derivative contracts is calculated using an internal model.

The Company discontinues hedge accounting prospectively when (i) a derivative is no longer highly effective in offsetting changes in the fair value or cash flows of a hedged item, (ii) a derivative expires or is sold, terminated, or exercised, (iii) a derivative is un-designated as a hedge, because it is unlikely that a forecasted transaction will occur; or (iv) the Company determines that designation of a derivative as a hedge is no longer appropriate. If a fair value hedge derivative instrument is terminated or the hedge designation removed, the previous adjustments to the

## Edgar Filing: CITY NATIONAL CORP - Form 10-Q

carrying amount of the hedged asset or liability would be subsequently accounted for in the same manner as other components of the carrying amount of that asset or liability. For interest-earning assets and interest-bearing liabilities, such adjustments would be amortized into earnings over the remaining life of the respective asset or liability. If a cash flow hedge derivative instrument is terminated or the hedge designation is removed, related amounts reported in other comprehensive income are reclassified into earnings in the same period or periods during which the hedged forecasted transaction affects earnings.

Table of Contents

10. **Income Taxes** - The Company adopted the provisions of FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes, an interpretation of FASB Statement No. 109*, ( FIN 48 ) on January 1, 2007. Upon adoption, the Company recognized a cumulative effect adjustment of approximately \$28 million, comprised of a \$25.2 million increase to its tax liability and \$2.8 million increase in accrued interest. The adjustment was recorded as a charge to January 1, 2007 retained earnings and the contingent tax reserve.

The Company recognizes accrued interest and penalties relating to unrecognized tax benefits as an income tax provision expense. For the nine-month period ended September 30, 2008, the Company accrued approximately \$1.3 million in potential interest and penalties associated with uncertain tax positions. The Company had approximately \$10.3 million, \$8.9 million, and \$5.9 million of accrued interest and penalties as of September 30, 2008, December 31, 2007, and September 30, 2007, respectively.

The Company and its subsidiaries file a consolidated federal income tax return and also file income tax returns in various state jurisdictions. The Internal Revenue Service ( IRS ) completed its audits of the Company for the tax years 2002 through 2005 resulting in no material financial statement impact. The Company is currently being audited by the IRS for the years 2006-2007 and by the Franchise Tax Board for the years 1998-2004. The potential financial statement impact, if any, resulting from completion of these audits cannot be determined at this time.

From time to time, there may be differences in opinion with respect to the tax treatment accorded transactions. If a tax position which was previously recognized on the financial statements is no longer more likely than not to be sustained upon a challenge from the taxing authorities, the tax benefit from the tax position will be derecognized. As of September 30, 2008, the Company does not have any tax positions which dropped below a more likely than not threshold.

11. **Retirement Plans** - The Company has a profit-sharing retirement plan with an Internal Revenue Code Section 401(k) feature covering eligible employees. Employer contributions are made annually into a trust fund and are allocated to participants based on their salaries. The profit sharing contribution requirement is based on a percentage of annual operating income subject to a percentage of salary cap. The Company recorded profit sharing contributions expense of \$4.4 million and \$12.9 million for the three and nine-month periods ended September 30, 2008, respectively, compared to \$4.1 million and \$12.1 million for the three and nine-month periods ended September 30, 2007, respectively.

The Company has a Supplemental Executive Retirement Plan ( SERP ) for one of its executive officers. The SERP meets the definition of a pension plan per FASB Statement No. 87, *Employers Accounting for Pensions*. The Company applies FASB Statement No. 158, *Accounting for Defined Benefit Pension and Other Postretirement Plans* ( SFAS 158 ), in accounting for the SERP. At September 30, 2008, there was a \$3.7 million unfunded pension liability related to the SERP. Pension expense for the three- and nine-month periods ended September 30, 2008 was \$0.1 million and \$0.4 million, respectively. Pension expense for the same periods of 2007 were \$0.2 million and \$0.6 million, respectively.

There is also a SERP covering three former executives of the Pacific Bank, which the Company acquired in 2000. As of September 30, 2008 there was an unfunded pension liability for this SERP of \$2.3 million. Expense for the three- month periods ended September 30, 2008 and 2007 was insignificant. Expense for the nine-month periods ended September 30, 2008 and 2007 was \$0.1 million.

The Company does not provide any other post-retirement employee benefits beyond the profit-sharing retirement plan and the SERPs.

12. **Guarantees** - In connection with the liquidation of an investment acquired in a previous bank merger, the Company has an outstanding long-term guarantee. The maximum liability under the guarantee is \$23 million. The Company does not expect to make any payments under the terms of this guarantee, and accordingly, has not accrued for any portion of it.

13. **Variable Interest Entities** - The Company holds ownership interests in certain special-purpose entities formed to provide affordable housing. The Company evaluates its interest in these entities to determine whether they meet the definition of a variable interest entity ( VIE ) and whether the Company is required to consolidate these entities. None of the Company's investments in VIEs met the criteria for consolidation at September 30, 2008, December 31, 2007, or September 30, 2007. The Company initially records its investment in these entities at cost, which approximates the maximum exposure to loss as a result of its involvement with these unconsolidated entities. Subsequently, the carrying value is amortized over the stream of available tax credits and benefits. The Company expects to recover its investments

Table of Contents

over time, primarily through realization of federal low-income housing tax credits. The balance of affordable housing investments was \$72.5 million, \$73.6 million and \$67.9 million at September 30, 2008, December 31, 2007, and September 30, 2007, respectively. Affordable housing VIEs are included in Affordable housing investments in the consolidated balance sheet with associated income reported in Other noninterest income in the consolidated statement of income.

The Company also has ownership interests in several private equity and alternative investment funds that are variable interest entities. The Company is not required to consolidate these VIEs. The Company carries its investment in these entities at cost, which approximates the maximum exposure to loss as a result of its involvement with these entities. The Company expects to recover its investments over time, primarily through the allocation of fund income or loss, gains or losses on the sale of fund assets or interest income. The balance in these entities was \$34.0 million, \$28.4 million and \$23.6 million at September 30, 2008, December 31, 2007, and September 30, 2007, respectively, and is included in Other assets in the consolidated balance sheet. Income associated with these investments is reported in Other noninterest income in the consolidated statement of income. The Company reviews these investments at least quarterly for possible other-than-temporary impairment. In addition to the entities described above, Convergent Wealth is the administrative manager of the Barlow Long-Short Equity Fund, a hedge fund that is a variable interest entity. Convergent Wealth is not required to consolidate this entity.

14. **Minority Interests** - The Corporation holds a majority ownership interest in eight investment management and wealth advisory affiliates, an investment affiliate holding company, and a minority interest in one other firm. In general, the management of each affiliate has a significant minority ownership position in their firm and supervises the day-to-day operations of the affiliate. The Corporation's investment in each affiliate is governed by operating agreements and other documents which provide the Corporation certain rights, benefits and obligations. Generally, these affiliate operating agreements direct a percentage of revenue allocable to fund affiliate operating expenses ( operating share ) while the remaining portion of revenue ( distributable revenue ) is allocable to profits to be distributed to the Corporation and other affiliate owners. The Corporation determines the appropriate method of accounting based upon these agreements and the factors contained therein. All majority-owned affiliates have met the criteria for consolidation and are accordingly included in the consolidated financial statements.

For affiliate operations included in the consolidated financial statements, the portion of the income allocated to owners other than the Corporation is included in Minority interest expense in the consolidated statements of income. Minority interest on the Consolidated Balance Sheet includes capital and undistributed income owned by the affiliate minority owners. All material intercompany balances and transactions have been eliminated. The Corporation applies the equity method of accounting to investments where it does not hold a majority equity interest. For equity method investments, the Corporation's portion of income before taxes is included in Trust and investment fees.

Most of the affiliate operating agreements provide the affiliate minority owners the conditional right to require the parent company to purchase a portion of their ownership interests at certain intervals ( put rights ). These agreements also provide the parent company a conditional right to require affiliate owners to sell their ownership interests to it upon their death, permanent disability or termination of employment, and also provide affiliate owners a conditional right to require the parent company to purchase such ownership interests upon the occurrence of specified events. Management is unable to predict when these specified events might occur. Additionally, in many instances the purchase of interests can be settled using a combination of cash and notes payable, and in all cases the parent company can consent to the transfer of these interests directly to other individuals.

As of September 30, 2008, affiliate minority ownership interests with a redemption value of \$23.0 million could be put to the Company over the next 10 years or longer under the put provisions in the affiliate operating agreements. The terms of the put provisions vary by agreement, but the

## Edgar Filing: CITY NATIONAL CORP - Form 10-Q

value of the put is generally based on the application of a growth multiple to distributable revenues. In the event of certain circumstances, including but not limited to death or disability, the parent company may be obligated to purchase some of these shares. This estimate reflects the maximum obligation to purchase equity interests in the affiliates that may be put to the parent company by affiliate owners exercising their put rights under normal operating circumstances. The amount and timing of the obligation can be limited by various factors such as our ownership level, first rights of refusal by other minority owners and other factors contained in the affiliate operating agreements. In extraordinary circumstances, including but not limited to death or disability of affiliate minority owners, the estimated purchase obligations could be accelerated or be greater than the amounts shown. There are additional affiliate ownership interests held by affiliate minority owners that are not available to be put to the parent company in the normal course of operations, but that the parent company may be required to purchase under

Table of Contents

certain circumstances, such as death or disability of the minority shareholder. The parent company carries key man life insurance policies to fund a portion of these conditional purchase obligations.

The Bank has two wholly-owned subsidiaries that have issued preferred stock to third-party investors. In 2001, the Bank formed and funded CN Real Estate Investment Corporation ( CN ), contributing cash and participation interests in certain loans in exchange for 100 percent of the common stock of CN. The net income and assets of CN are eliminated in consolidation for all periods presented. CN sold 33,933 shares of 8.50 percent Series A Preferred Stock to accredited investors for \$3.4 million in 2001, and 6,828 shares of 8.50 percent Series B Preferred Stock for \$6.8 million to accredited investors in 2002, both of which are included in Minority interest. Dividends of \$868,811, which are included in Minority interest expense, will be paid in 2008 and were paid in each of the years 2007, 2006 and 2005 on these preferred stock issues. In 2002, the Bank also converted its former registered investment company to a real estate investment trust called City National Real Estate Investment Corporation II ( CNII ). The net income and assets of CNII are eliminated in consolidation for all periods presented. During 2002 and 2003 CNII sold shares of 8.50 percent Series A Preferred Stock to accredited investors for \$15.3 million, which is included in Minority Interest. Dividends of \$1,297,780 will be paid in 2008 and were paid in each of the years 2007, 2006 and 2005. Dividends are included in Minority interest expense.

15. **Segment Reporting** - The Company has three reportable segments: Commercial and Private Banking, Wealth Management and Other. The factors considered in determining whether individual operating segments could be aggregated include that the operating segments: (i) offer the same products and services, (ii) offer services to the same types of clients, (iii) provide services in the same manner and (iv) operate in the same regulatory environment. The management accounting process measures the performance of the operating segments based on the Company's management structure and is not necessarily comparable with similar information for other financial services companies. If the management structures and/or the allocation process changes, allocations, transfers and assignments may change.

The Commercial and Private Banking reportable segment is the aggregation of the Commercial and Private Banking, Real Estate, Entertainment, Corporate Banking and Core Branch Banking operating segments. The Commercial and Private Banking segment provides banking products and services, including commercial and mortgage loans, lines of credit, deposits, cash management services, international trade finance and letters of credit to small and medium-sized businesses, entrepreneurs and affluent individuals. This segment primarily serves clients in California, New York and Nevada.

The Wealth Management segment includes the Corporation's investment advisory affiliates and the Bank's Wealth Management Services. The asset management affiliates and the Wealth Management division of the Bank make the following investment advisory and wealth management resources and expertise available to individual and institutional clients: investment management, wealth advisory services, brokerage, estate and financial planning and personal, business, custodial and employee trust services. The Wealth Management segment also advises and makes available mutual funds under the name of CNI Charter Funds. Both the asset management affiliates and the Bank's Wealth Management division provide proprietary and nonproprietary products to offer a full spectrum of investment solutions in all asset classes and investment styles, including fixed-income instruments, mutual funds, domestic and international equities and alternative investments such as hedge funds.

The Other segment includes all other subsidiaries of the Company, the portion of corporate departments, including the Treasury Department and the Asset Liability Funding Center, that have not been allocated to the other segments, and inter-segment eliminations for revenue recognized in multiple segments for management reporting purposes. The Company uses traditional matched-maturity funds transfer pricing methodology. However, both positive and negative variances occur over time when transfer pricing non-maturing balance sheet items such as demand

## Edgar Filing: CITY NATIONAL CORP - Form 10-Q

deposits. These variances, offset in the Funding Center, are evaluated annually by management and allocated back to the business segments as deemed necessary.

Business segment earnings are the primary measure of the segment's performance as evaluated by management. Business segment earnings include direct revenue and expenses of the segment as well as corporate and inter-unit allocations. Allocations of corporate expenses, such as data processing and human resources, are calculated based on estimated activity levels for the fiscal year. Inter-unit support groups, such as Operational Services, are allocated based on actual expenses incurred. Capital is allocated using a methodology similar to that used for federal regulatory risk-based capital purposes. If applicable, any provision for credit losses is allocated based on various credit factors,

Table of Contents

including but not limited to, credit risk ratings, ratings migration, charge-offs and recoveries and loan growth. Income taxes are charged on unit income at the Company's overall effective tax rate.

Exposure to market risk is managed in the Company's Treasury department. Interest rate risk is removed from the units comprising the Commercial and Private Banking segment to the Funding Center through a fund transfer pricing (FTP) model. The FTP model records a cost of funds or credit for funds using a combination of matched maturity funding for most assets and liabilities and a blended rate based on various maturities for the remaining assets and liabilities.

The Bank's investment portfolio and unallocated equity are included in the Other segment. Customer-relationship intangible amortization is charged to the affected operating segments.

Operating results for the segments are discussed in the Segment Results section of Management's Discussion and Analysis. Selected financial information for each segment is presented in the following tables. Commercial and Private Banking includes all revenue and costs from products and services utilized by clients of Commercial and Private Banking, including both revenue and costs for Wealth Management products and services. The revenues and costs associated with Wealth Management products and services that are allocated to Commercial and Private Banking for management reporting purposes are eliminated in the Other segment.

**16. Loan Concentration-** The Company's lending activities are predominantly in California, and to a lesser extent, New York and Nevada. Concentrations of credit risk arise when a number of clients are engaged in similar business activities or activities in the same geographic region, or have similar economic features that would cause their ability

to meet contractual obligations to be similarly affected by changes in economic conditions. Although the Company has a diversified loan portfolio, a substantial portion of the loan portfolio and credit performance depends on the economic stability of Southern California. Credit performance also depends, to a lesser extent, on economic conditions in the San Francisco Bay area, New York and Nevada.

**17. Subsequent Event-** On October 27, 2008, the Company received preliminary approval of its application for the United States Treasury Department to invest approximately \$395 million in the Company's preferred stock and warrants. This investment will increase the Company's tier 1 capital ratio to approximately 12 percent. The Company will use the funds to pursue its longstanding growth strategy which includes expanding existing client relationships, adding new clients, increasing loans and making selected acquisitions. The terms of the investment will be consistent with those established in the Treasury's Capital Purchase Program. The transaction is expected to close in the fourth quarter of 2008.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITIONS AND RESULTS OF OPERATIONS

See Cautionary Statement for Purposes of the Safe Harbor Provisions of the Private Securities Litigation Reform Act of 1995, below relating to forward-looking statements included in this report.

**RESULTS OF OPERATIONS**

*Critical Accounting Policies*

The accounting and reporting policies of the Company conform with U.S. generally accepted accounting principles. The Company's accounting policies are fundamental to understanding management's discussion and analysis of results of operations and financial condition. The Company has identified seven policies as being critical because they require management to make estimates, assumptions and judgments that affect the reported amount of assets and liabilities, contingent assets and liabilities, and revenues and expenses included in the consolidated financial statements. Circumstances and events that differ significantly from those underlying the Company's estimates, assumptions and judgments could cause the actual amounts reported to differ significantly from these estimates. The Company's critical accounting policies include those that address the accounting for securities, allowance for loan and lease losses and reserve for off-balance sheet credit commitments, stock-based compensation plans, goodwill and other intangible assets, derivatives and hedging activities, income taxes, and the valuation of financial assets and liabilities reported at fair value. The Company has not made any significant changes in its critical accounting policies or its estimates and assumptions from those disclosed in its 2007 Annual Report other than the adoption of SFAS 157 effective January 1, 2008. The Company has revised certain assumptions related to the adoption of SFAS 157 as discussed below and in Note 5 to the consolidated financial statements.

The Company, with the concurrence of the Audit & Risk Committee, has reviewed and approved these critical accounting policies, which are further described in Management's Discussion and Analysis and Note 1 (Summary of Significant Accounting Policies) of the Notes to The Consolidated Financial Statements in the Company's Form 10-K as of December 31, 2007. Management has applied its critical accounting policies and estimation methods consistently in all periods presented in these financial statements.

There were several new accounting pronouncements in the first nine months of 2008. See Note 4 of the Notes to The Consolidated Financial Statements in this Form 10-Q and Note 1 of the Notes to The Consolidated Financial Statements in the Company's Form 10-K as of December 31, 2007 for further details. The Company does not anticipate these pronouncements will have a significant impact on its financial statements.

*Overview*

The Company recorded net income of \$16.6 million, or \$0.34 per share, for the third quarter of 2008. The Company earned \$1.22 per share in the third quarter of 2007, and \$0.73 per share in the second quarter of 2008. Excluding securities impairment charges of \$19.6 million, or \$0.40 per share, third-quarter net income amounted to \$36.2 million, or \$0.74 per share. Management believes that it is useful for investors to understand the impact of the impairment charges on the Company's results of operations. Although third-quarter earnings were challenged by

securities impairment charges stemming from unprecedented disruption in the financial markets, City National's fundamentals are solid and capital, liquidity and credit reserves remain strong. The Company is not burdened by many of the highly publicized problems affecting other financial institutions. City National Bank does not make subprime residential mortgage loans, nor does the Company hold any subprime loans or subprime collateralized debt obligations in its loan or securities portfolio.

*Highlights*

- Average loans and leases for the second quarter of 2008 grew to \$12.2 billion, up 9 percent from the same period a year ago.
- Average core deposits were \$10.5 billion, up 1 percent from the third quarter of 2007.
- Third-quarter 2008 net income reflects a \$35 million provision for credit losses. Taking into account net charge-offs of \$12.8 million, the third-quarter provision added an incremental \$23 million to the Company's allowance for loan and lease losses. At September 30, 2008, the Company's allowance was \$208.0 million, or 169 basis points of total loans and leases. The Company made no provision for credit losses in the third quarter of 2007.

Table of Contents

- Noninterest income decreased to \$50.1 million for the current quarter from \$81.5 million for the year-earlier quarter. Excluding securities impairment charges, noninterest income totaled \$82.7 million, an increase of 2 percent from the third quarter of 2007.
- The Company's net interest margin averaged 4.23 percent in the third quarter of 2008, unchanged from the second quarter of this year.
- The Company remained well capitalized. Its period-end ratio of equity-to-total assets at September 30, 2008 was 10.2 percent, compared to 10.5 percent at September 30, 2007 and 10.2 percent at June 30, 2008.

***Outlook***

The Company had a profitable third quarter, as most of its businesses continued to perform in line with expectations. The Company's credit reserves, capital and liquidity remain strong.

Looking to the fourth quarter of 2008, the Company expects noninterest income to slow due to declines in the equity markets. The Company also anticipates more subdued loan growth and additional pressure on its net interest margin due to lower interest rates.

The Company expects 2008 earnings per share of between \$2.65 and \$2.75. Excluding the after-tax impairment charges of \$19.6 million, or \$0.40 per share, the Company expects 2008 earnings per share of between \$3.05 and \$3.15.

As previously disclosed, on October 27, 2008 the Company received preliminary approval of its application for the United States Treasury Department to invest approximately \$395 million in the Company's preferred stock and warrants. This investment will increase the Company's Tier 1 capital ratio to approximately 12 percent.

***Net Interest Income***

Fully taxable-equivalent net interest income totaled \$157.1 million for the third quarter of 2008, compared to \$158.1 million for the same period last year and \$154.4 million in the second quarter of 2008.

Edgar Filing: CITY NATIONAL CORP - Form 10-Q

Dollars in millions	For the three months ended September 30,			For the three months ended		
	2008	2007	% Change	June 30, 2008	% Change

Average Deposits	11,737.1	12,442.2	(6)	11,694.7	0	
Average Core Deposits	10,514.8	10,388.0	1	10,551.4	(0)	
Fully Taxable-Equivalent						
Net Interest Income	157.1	158.1	(1)	154.4	2	
Net Interest Margin	4.23%	4.42%	(4)	4.23%	0	

The Company's yield on earning assets for the third quarter of 2008 was 5.38 percent down from 5.42 percent in the second quarter of 2008 and 6.55 percent in the third quarter of 2007. The bank's prime rate was 5.00 percent on September 30, 2008, down from 2.75 percent from September 30, 2007 and unchanged from June 30, 2008. The net interest margin for the third quarter of 2008 was 4.23 percent, compared to 4.23 percent and 4.42 percent for the quarters ended June 30, 2008 and September 30, 2007, respectively. The decline from the prior year is attributable primarily to reductions in short-term interest rates and growth in average loan and leases.

Third-quarter average loan and lease balances reached \$12.2 billion, an increase of 9 percent over the same period last year and 1 percent from the second quarter of 2008. The commercial loan portfolio grew 10 percent over the third quarter of 2007 and 1 percent from the second quarter of 2008. Average single family residential mortgage loans to the Company's private banking clients increased 9 percent from the third quarter of last year and 2 percent from the second quarter of 2008. The residential mortgage loan portfolio has an average loan-to-value ratio of 50 percent at origination and continues to perform well. Commercial real estate loans grew 10 percent from the third quarter of 2007 but were virtually unchanged from the second quarter of 2008. Real estate construction loans outstanding increased 4 percent from the

Table of Contents

same period a year ago and decreased 4 percent from the second quarter of 2008. Within the construction portfolio, there is weakness in consumer-oriented property types, including for-sale housing and, to a lesser extent, retail projects. These portfolios are diverse in terms of geography and product type. They consist primarily of recourse loans to well-established real estate developers and are generally located in established urban markets. Most of these developers are clients with whom the Bank has significant long-term relationships.

The Company's average deposits totaled \$11.7 billion in the third quarter of 2008, a 6 percent decrease from the third quarter of 2007 as the Company was able to reduce its holdings of higher-cost non-core time deposits. Average deposits grew slightly from the second quarter of 2008.

As part of its long-standing asset and liability management strategies, the Company uses plain vanilla interest rate swaps to hedge loans, deposits, and borrowings. The notional value of these swaps was \$715.9 million at September 30, 2008, unchanged from September 30, 2007, and down slightly from \$0.9 billion at December 31, 2007. The following table presents the impact of fair value and cash-flow hedges on net interest income:

(Dollars in millions)	Third Quarter 2008	Fourth Quarter 2007	Third Quarter 2007
Fair Value Hedges	\$ 1.1	\$ 0.0	\$ 0.0
Cash Flow Hedges	1.3	(0.1)	(1.2)
Total	\$ 2.4	\$ (0.1)	\$ (1.2)

Recent decreases in interest rates are expected to reduce interest income on variable rate loans. This reduction will be partially offset by the income from existing swaps qualifying as cash flow hedges. The net interest accrual on these swaps over the next 12 months is projected to be \$1.6 million based on current market conditions. Both the income for the quarter and the projected income for the next 12 months should be viewed in context with the benefit the Company has received from increases in interest rates in the past and the decline in income the Company will experience from decreases in interest rates.

Net interest income is the difference between interest income (which includes yield-related loan fees) and interest expense. Net interest income on a fully taxable-equivalent basis expressed as a percentage of average total earning assets is referred to as the net interest margin, which represents the average net effective yield on earning assets. The following table presents the components of net interest income on a fully taxable-equivalent basis for the three and nine-month periods ended September 30, 2008 and 2007.

- 
- (1) Net interest income is presented on a fully taxable-equivalent basis.
  - (2) Certain prior period balances have been reclassified to conform to the current period presentation.
  - (3) Includes average nonaccrual loans of \$112,377 and \$23,162 for 2008 and 2007, respectively.
  - (4) Loan income includes loan fees of \$13,601 and \$13,443 for 2008 and 2007, respectively.

Table of Contents

Net interest income is impacted by the volume (changes in volume multiplied by prior rate), interest rate (changes in rate multiplied by prior volume), and mix of interest-earning assets and interest-bearing liabilities. The following table shows changes in net interest income on a fully taxable-equivalent basis between the third quarter and first nine months of 2008 and 2007, as well as between the third quarter and first nine months of 2007 and 2006.

**Changes In Net Interest Income**

Table of Contents

The impact of interest rate swaps, which affect interest income on loans and leases and interest expense on deposits and borrowings, is included in rate changes.

*Provision for Credit Losses*

The Company accounts for the credit risk associated with lending activities through its allowance for loan and lease losses, reserve for off-balance sheet credit commitments and provision for credit losses. The provision is the expense recognized in the income statement to adjust the allowance and the reserve for off-balance sheet credit commitments to the level deemed appropriate by management, as determined through application of the Company's allowance methodology procedures (see "Critical Accounting Policies" on page 29 of the Company's Form 10-K for the year ended December 31, 2007).

The Company recorded a \$35 million provision for credit losses in the quarter ended September 30, 2008. The provision for credit losses reflects management's ongoing assessment of the current credit environment and was significantly influenced by current period net charge-offs, the level of criticized assets and, to a lesser extent, growth in loans and leases and credit commitments. For the three months ended September 30, 2008, December 31, 2007, and September 30, 2007, net charge-offs totaled \$12.8 million, \$3.9 million, and \$3.6 million, respectively. For these same periods, nonaccrual loans at period end totaled \$150.9 million, \$75.6 million, and \$26.2 million, respectively. While a majority of new nonaccrual loans are centered in the homebuilder portfolio, there was an increase in the number of nonaccrual loans in the commercial portfolio. Although there is significant economic uncertainty, we anticipate the rate of increase in non-accrual loans to moderate through 2009 based on a decrease in the residential construction portfolio as loans are restructured, payoff and/or are charged off.

*Noninterest Income*

Third-quarter 2008 noninterest income of \$50.1 million was 38 percent lower than the third quarter of 2007 due primarily to impairment charges resulting from unprecedented disruptions in the financial markets. Third quarter results include a \$21.9 million write-down of Fannie Mae and Freddie Mac perpetual preferred investments and a \$10.7 million write down of other securities held in the Company's \$2.2 billion available-for-sale securities portfolio.

*Wealth Management*

The Bank provides various trust, investment and wealth advisory services to its individual and business clients. The Company delivers these services through the Bank's Wealth Management division as well as through its wealth management affiliates. Trust services are provided only by the Bank. Trust and investment fee revenue includes fees from trust, investment and asset management, and other wealth advisory services. A portion of these fees are based on the market value of client assets managed, advised, administered or held in custody. The remaining portion of these fees is based on the specific service provided, such as estate and financial planning services, or may be fixed fees. For those fees based on market valuations, the mix of assets held in client accounts impacts how closely changes in trust and investment fee income correlate with changes in the financial markets. Changes in market valuations are reflected in fee income primarily on a trailing-quarter basis. Trust and investment fees decreased 11 percent over the third quarter of 2007 and 2 percent from the prior quarter. The 25 percent increase in brokerage and mutual fund fees for the current quarter compared with the year-earlier period is due to growth in money market funds and managed fixed income accounts.

Edgar Filing: CITY NATIONAL CORP - Form 10-Q

Dollars in millions	At or for the three months ended September 30,		% Change	At or for the three months ended June 30, 2008	
	2008	2007			% Change
Trust and Investment Fee Revenue	\$ 33	\$ 37	(11)	\$ 34	(2)
Brokerage and Mutual Fund Fees	19	16	25	19	4
Total	\$ 52	\$ 53		\$ 53	
Assets Under Management (1)	\$ 33,106	\$ 37,112	(11)	\$ 33,773	(2)
Total Assets Under Management or Administration (1)	\$ 52,367	\$ 59,244	(12)	\$ 53,510	(2)

(1) Excludes \$6.9 billion, \$12.1 billion, and \$9.0 billion of assets under management for an asset manager in which the Company held a minority ownership interest as of September 30, 2008, September 30, 2007, and June 30, 2008, respectively.

Assets under management (AUM) include assets for which the Company makes investment decisions on behalf of its clients and assets under advisement for which the Company receives advisory fees from its clients. Assets under administration are assets the Company holds in a fiduciary capacity or for which it provides non-advisory services. The table below provides a summary of AUM:

Table of Contents

(Dollars in thousands)	At September 30,		% Change	At June 30,	
	2008	2007		2008	% Change
<b>Assets Under Management</b>	\$ 33,106	\$ 37,112	(11)	\$ 33,773	(2)
<b>Assets Under Administration</b>					
Brokerage	7,277	7,982	(9)	6,558	11
Custody and other fiduciary	11,984	14,150	(15)	13,179	(9)
Subtotal	19,261	22,132	(13)	19,737	(2)
Total assets under management or administration (1)	\$ 52,367	\$ 59,244	(12)	\$ 53,510	(2)

(1) Excludes \$6.9 billion, \$12.1 billion, and \$9.0 billion of assets under management for an asset manager in which the Company held a minority ownership interest as of September 30, 2008, September 30, 2007, and June 30, 2008, respectively.

Assets under management fell 11 percent from the year-earlier period and 2 percent from the prior quarter. Assets under management or administration fell 12 percent from the year-earlier period and 2 percent from the prior quarter. Growth in the Company's money market funds and managed fixed income accounts, resulting from a flight to safety by investors during a time of market volatility, was offset by declines in assets under management at the Company's wealth management affiliates. The decline in AUM at the affiliates is due in part to an anticipated shift of funds by the former owner of an institutional asset management affiliate to its in-house investment manager. The level of AUM is also significantly impacted by lower market valuations.

A distribution of AUM by type of investment is provided in the following table:

Investment	% of AUM	% of AUM	% of AUM
	September 30, 2008	June 30, 2008	September 30, 2007
Equities	34%	40%	51%
U.S. Fixed Income	20	18	17
Cash and Cash Equivalents	26	25	19
Other (1)	20	17	13
	100%	100%	100%

(1) Includes international equities, private equity and other alternative investments.

On a percentage basis, the investment mix of assets generally does not change significantly on a quarter to quarter basis. Over the past year, there has been some shift from equities to fixed income and cash due to the relative difference in equity returns versus cash and fixed income returns in addition to the loss of certain institutional equity assets.

*Other Noninterest Income*

## Edgar Filing: CITY NATIONAL CORP - Form 10-Q

Cash management and deposit transaction fees for the third quarter of 2008 grew 41 percent from the same period last year and 2 percent from the second quarter of 2008, due to the impact of declining interest rates on compensating deposit balances and the sale of additional cash management services.

International service fees for the third quarter of 2008 grew 3 percent from the same period last year reflecting increased demand for both foreign exchange services and letters of credit, and remained unchanged from the second quarter of 2008. International services income includes foreign exchange fees, fees on commercial letters of credit and standby letters of credit, foreign collection and other fee income. International services fees are recognized when earned, except for the fees on commercial and standby letters of credit, which are generally deferred and recognized in income over the terms of the letters of credit.

Table of Contents

Other service charges and fees for the third quarter of 2008 amounted to \$8.4 million, up 16 percent, from the same period one year ago. These fees were up \$0.2 million or 3 percent from the second quarter of 2008.

***Noninterest and Minority Interest Expense***

Third-quarter 2008 noninterest and minority interest expense amounted to \$145.8 million, up 6 percent from the same period last year and 3 percent from the second quarter of 2008. The increase from last year was due in part to \$1.8 million of additional expense for FDIC premiums and a \$1.6 million settlement relating to licensing of check imaging and processing technology. Excluding the higher FDIC premiums, the Company's third quarter 2008 noninterest expense grew 4 percent from the same period last year.

Staffing expenses for the quarter amounted to \$89.4 million, up 6 percent from one year ago, as a result of salary increases and higher stock-based compensation expense. Average full-time equivalent staff increased to 3,027 for the quarter ended September 30, 2008, compared with 2,878 for the year-earlier period. Staffing expenses were up 2 percent from the second quarter of 2008.

Legal and professional fees fell 3 percent from the third quarter of 2007 due to lower litigation expenses and customer-related professional fees, and increased 11 percent from the second quarter of 2008.

Minority interest expense consists of preferred stock dividends paid by the Bank's real estate investment trust subsidiaries as well as the minority ownership share of the earnings of the Corporation's majority-owned investment advisory affiliates. See Note 14 to the Unaudited Financial Statements for additional information about minority interest expense.

The Company's third-quarter efficiency ratio was 70.74 percent compared with 57.66 percent for the third quarter of 2007, and 60.13 percent for the second quarter of 2008. The increase from the third quarter of 2007 was due primarily to the securities impairment charges mentioned earlier.

***Share-Based Compensation Expense***

The Company applies SFAS 123R in accounting for stock option plans. A Black-Scholes valuation methodology is used to determine the fair value of options granted.

The compensation cost charged against income for all share-based awards was \$3.6 million and \$10.8 million for the three and nine-month periods ended September 30, 2008, respectively, compared to \$3.4 million and \$10.5 million for the three and nine-month periods ended September 30, 2007, respectively. The Company received \$19.6 million and \$21.0 million in cash from the exercise of stock options during the nine months ended September 30, 2008 and September 30, 2007, respectively. The tax benefit recognized in equity for stock-based

## Edgar Filing: CITY NATIONAL CORP - Form 10-Q

compensation arrangements was \$3.8 million and \$7.2 million for the nine months ended September 30, 2008 and 2007, respectively. See Note 8 to the Unaudited Financial Statements for a description of the stock option plan and method of estimating the fair value of option awards.

As of September 30, 2008 there was \$21.9 million of total unrecognized compensation cost related to unvested share-based compensation arrangements granted under the Plan. That cost is expected to be recognized over a weighted-average period of 3.2 years. The total number of shares vested during the nine months ended September 30, 2008 was 406,039.

### *Segment Results*

Our reportable segments are Commercial and Private Banking, Wealth Management and Other. For a more complete description of our segments, including summary financial information, see Note 15 to the Unaudited Financial Statements.

Table of Contents

*Commercial and Private Banking*

Net income of \$41.5 million in the third quarter of 2008 for the Commercial and Private Banking segment decreased \$12.9 million, or 24 percent, from the \$54.4 million for the third quarter of 2007 primarily as a result of the \$35.0 million provision for credit losses. For the first nine months of 2008, net income decreased to \$115.1 million, a decline of 27 percent compared to the same period in 2007. The decrease in net income for the quarter and year to date is due to the higher provision for credit losses in 2008. Refer to page 32 of this report for further discussion of the Provision for Credit Losses. Net interest income increased to \$160.3 million and \$473.4 million for the third quarter and first nine months of 2008, respectively, from \$157.9 million and \$456.9 million for the year-earlier periods, respectively. The increase in net interest income for the quarter and year-to-date compared with the prior year periods was driven by loan growth, primarily in commercial, commercial real estate and residential mortgage loans. Loan growth offset the impact of decreases in the prime rate and net interest margin compared with the year-earlier periods. Average loans were \$12.1 billion in the third quarter of 2008, up 10 percent from \$11.1 billion in the third quarter of 2007. Average deposits were \$10.8 billion in the third quarter of 2008, a decrease of 4 percent from the same period last year. The decrease in deposits was primarily due to the planned maturity and non-renewal of higher cost promotional certificates of deposit. Noninterest income increased 27 percent to \$48.8 million in the third quarter of 2008 compared to the third quarter of 2007, and 26 percent for the first nine months of 2008 compared to the same period of 2007. The increase is primarily due to higher cash management and deposit transaction fees, higher trust and mutual fund fees and higher international services fees. Noninterest expense, including depreciation, was \$12.2 million, or 11 percent, higher for the three months ended September 30, 2008 compared to the same period in 2007. Year-to-date noninterest expense was \$36.2 million or 11 percent higher in 2008 than in 2007.

*Wealth Management*

The Wealth Management segment had net income of \$12.4 million in the third quarter of 2008, an increase of \$3.0 million, or 32 percent, from \$9.4 million for the third quarter of 2007. Net income increased to \$33.7 million, or 26 percent, for the nine months ended September 30, 2008, compared to \$26.6 million for the comparable period in 2007. Noninterest income of \$53.6 million for third quarter 2008 was down slightly from the prior year period. For the nine months ended September 30, 2008, noninterest income increased to \$161.7 million, or 9 percent, from the year-earlier period. Refer to page 32 of this report for a discussion of the factors impacting fee income for the Wealth Management segment. Noninterest expense, including depreciation, was \$1.8 million, or 5 percent, lower during the third quarter of 2008 compared to the third quarter of 2007. The decrease in noninterest expense compared with the prior year quarter is largely due to the decrease in minority interest expense. Year-to-date noninterest expense, including depreciation and minority interest expense, was \$6.8 million, or 6 percent, higher in 2008 than in 2007. Year-to-date noninterest expense for 2008 includes nine months of expense for Convergent Wealth compared with 5 months for 2007, and expenses related to the opening of the Los Angeles office of Convergent Wealth in 2008.

*Other*

The net loss in the Other segment increased to \$37.4 million for the third quarter of 2008 compared to \$3.7 million for the third quarter of 2007, and to \$52.8 million, for the nine months ended September 30, 2008, compared to \$7.8 million for the same period in 2007. The increase in the net loss for the quarter and year to date is largely due to \$19.6 million, after tax, of impairment charges recorded on investment securities. Results for the segment were also impacted by higher net funding costs in the Asset Liability Funding Center and an increase in inter-segment revenue, which is eliminated in this segment.

*Income Taxes*

The effective tax rate for the third quarter of 2008 was 25.2 percent, compared to 38.4 percent in the third quarter of last year. The effective tax rate for the first nine months of 2008 was 33.8 percent compared to 37.4 percent for the same period in 2007. The lower effective tax rate for third-quarter 2008 is attributable to the fact that the Company's beneficial permanent book to tax differences are stable from period to period and as a result, the favorable impact of these differences on the Company's effective tax rate increases as pre-tax income decreases relative to these stable book to tax differences.

The Company recognizes accrued interest and penalties relating to unrecognized tax benefits as an income tax provision expense. For the nine-month period ended September 30, 2008, the Company recognized approximately \$1.3

Table of Contents

million in interest and penalties. The Company had approximately \$10.3 million and \$8.9 million of accrued interest and penalties as of September 30, 2008 and December 31, 2007, respectively.

The Internal Revenue Service ( IRS ) has completed its audits of the Company for the years 2002 through 2005 resulting in no material financial statement impact. The Company is currently being audited by the IRS for the years 2006-2007 and by the Franchise Tax Board for the years 1998-2004. The potential financial statement impact, if any, resulting from the completion of the audits is not determinable at this time.

**BALANCE SHEET ANALYSIS**

Total assets were \$16.3 billion at September 30, 2008 compared to \$15.5 billion at September 30, 2007, and \$16.3 billion at June 30, 2008. Average assets for the third quarter of 2008 were \$16.1 billion compared to \$15.6 billion for the third quarter of 2007.

Total average interest-earning assets for the third quarter of 2008 were \$14.8 billion, compared to \$14.2 billion for the third quarter of 2007 and \$14.7 billion for the second quarter of 2008.

*Securities*

Comparative period-end securities portfolio balances are presented below:

## Edgar Filing: CITY NATIONAL CORP - Form 10-Q

At September 30, 2008, securities available-for-sale totaled \$2.2 billion, a decrease of \$0.4 billion from \$2.6 billion at September 30, 2007. At September 30, 2008, the portfolio had a net unrealized loss of \$70.3 million compared with net unrealized losses of \$22.2 million at December 31, 2007 and \$40.0 million at September 30, 2007. The mortgage-backed securities and collateralized mortgage obligations ( CMOs ) in the Company s portfolio are all issued by GNMA, FNMA, Freddie Mac or AAA-rated private label issues. Refer to *Impairment Assessment* on the following page for a discussion of management s assessment of the investment portfolio for other-than-temporary impairment.

The average duration of total available-for-sale securities at September 30, 2008 was 3.4 years. This duration compares with 3.4 years at December 31, 2007 and 3.4 years at September 30, 2007. Duration provides a measure of fair value sensitivity to changes in interest rates. The average duration is within the investment guidelines set by the Company s Asset/Liability Committee and the interest-rate risk guidelines set by the Board of Directors. See *Asset/Liability Management* for a discussion of the Company s interest rate position.

The following table provides the expected remaining maturities and yields (on a fully taxable-equivalent basis) of debt securities included in the securities portfolio as of September 30, 2008, except for mortgage-backed securities which are allocated according to final maturities. Final maturities will differ from contractual maturities because mortgage debt issuers

Table of Contents

may have the right to repay obligations prior to contractual maturity. To compare the tax-exempt asset yields to taxable yields, amounts are adjusted to pre-tax equivalents based on the marginal corporate federal tax rate of 35 percent.

**Debt Securities Available-for-Sale**

Dollars in thousands	One year or less		Over 1 year thru 5 years		Over 5 years thru 10 years		Over 10 years		Total	
	Amount	Yield (%)	Amount	Yield (%)	Amount	Yield (%)	Amount	Yield (%)	Amount	Yield (%)

Amortized cost	\$ 175,334		\$ 1,343,955		\$ 546,337		\$ 92,565		\$ 2,158,191	

Dividend income included in interest income on securities in the Unaudited Consolidated Statements of Income for the third quarter of 2008 and 2007 was \$2.2 million and \$1.0 million, respectively. Dividend income included in interest income on securities in the Unaudited Consolidated Statements of Income for the first nine months of 2008 and 2007 was \$6.7 million and \$5.0 million, respectively.

Impairment Assessment

Impairment exists when the fair value of a security is less than its cost. Cost includes adjustments made to the cost basis of a security for accretion, amortization and previous other-than-temporary impairments. The Company performs a quarterly assessment of the debt and equity securities in its investment portfolio that have an unrealized loss to determine whether the decline in the fair value of these securities below their cost is other-than-temporary. Impairment is considered other-than-temporary when it becomes probable that an investor will be unable to recover the cost of an investment. The Company's impairment assessment takes into consideration factors such as the length of time and the extent to which the market value has been less than cost; the financial condition and near-term prospects of the issuer including events specific to the issuer or industry; defaults or deferrals of scheduled interest, principal or dividend payments; external credit ratings and recent downgrades; and the Company's intent and ability to hold the security for a period of time sufficient to allow for a recovery in fair value. If a decline in fair value is judged to be other than temporary, the cost basis of the individual security is written down to fair value which then becomes the new cost basis. The amount of the write down is included in Impairment loss on securities in the consolidated income statement. The new cost basis is not adjusted for subsequent recoveries in fair value.

The following table provides a summary of the gross unrealized losses and fair value of investment securities that are not deemed to be other-than-temporarily impaired aggregated by investment category and length of time that the securities have been in a continuous unrealized loss position as of September 30, 2008:

Table of Contents

(In thousands) Temporarily Impaired Securities at September 30, 2008	Less than 12 months		12 months or Greater		Total	
	Fair Value	Estimated Unrealized Loss	Fair Value	Estimated Unrealized Loss	Fair Value	Estimated Unrealized Loss
CMOs	\$ 560,935	\$ 24,476	\$ 203,704	\$ 16,402	\$ 764,639	\$ 40,878
Mortgage-backed	187,183	1,427	343,609	8,524	530,792	9,951

Equity securities and mutual funds	54,442	3,594			54,442	3,594
Total Securities	\$ 1,066,357	\$ 51,117	\$ 561,272	\$ 26,417	\$ 1,627,629	\$ 77,534

At September 30, 2008, total securities available-for-sale had a fair value of \$2,159.9 million, which included the temporarily impaired securities above of \$1,627.6 million. Other securities in the portfolio had a fair value of \$532.3 million, which included an unrealized gain of \$7.3 million. The Company attributes the losses on these securities to temporary factors such as the level of interest rates and current volatility in the credit markets. Because the Company has the ability and intent to hold these investments until their fair value recovers or until maturity, for those securities with stated maturity dates, the Company does not consider these investments to be other-than-temporarily impaired.

Securities Deemed to be Other-Than-Temporarily Impaired

Through the impairment assessment process, the Company determined that the investments discussed below were other-than-temporarily impaired at September 30, 2008. The Company recorded an impairment loss on available-for-sale securities of \$31.9 million for the three- and nine-months ended September 30, 2008. No impairment was recorded for the three- and nine-months ended September 30, 2007.

(In thousands)

Other-Than-Temporary Impairment Losses	For the three months ended September 30,		For the nine months ended September 30,	
	2008	2007	2008	2007
Debt securities	\$ 7,159	\$	\$ 7,159	\$
Equity securities and mutual funds	24,777		24,777	
Total	\$ 31,936	\$	\$ 31,936	\$

Perpetual Preferred Stock

The Company recorded a \$21.9 million impairment loss in third quarter 2008 on its investment in perpetual preferred stock issued by the Federal Home Loan Mortgage Corporation and the Federal National Mortgage Association. The action taken by the Federal Housing Finance Agency on September 7, 2008 placing these Government-Sponsored Agencies into conservatorship and eliminating the dividends on their preferred shares led to the Company's determination that these securities are other-than-temporarily impaired. The adjusted cost basis of these equity securities is \$1.8 million at September 30, 2008.

Collateralized Debt Obligation Income Notes

These securities ( CDO Notes ) are equity interests in a multi-class, cash flow collateralized bond obligation backed by a collection of Trust Preferred securities issued by financial institutions. The equity interests represent ownership of all residual cash flow from the asset pools after all fees have been paid and debt issues have been serviced. CDO Notes are collateralized by debt securities with stated maturities and are therefore reported as debt securities in the consolidated balance sheet. The market for CDO Notes has become increasingly inactive since the fourth quarter of 2007 with no visible trade activity in the past 6 months. The valuation of these securities requires substantial judgment and estimation of the factors used in the cash flow model that are not currently observable in the market. CDO Notes are classified as Level 3 in the fair value hierarchy. See Note 5, Fair Value Measurements, to the Unaudited Financial Statements for further discussion of fair value.

Table of Contents

The Company recorded a \$7.2 million impairment loss in third quarter 2008 on its investments in CDO Notes. The fair value of these securities was determined using an internal discounted cash flow model that incorporates the Company's assumptions about projected cash flows and risk-adjusted discount rates. The Company considered a number of factors in determining the discount rate used in the valuation model including the implied rate of return at the last date the market for CDO Notes and similar securities was active, rates of return that market participants would consider in valuing the securities and indicative quotes from dealers. The Company determined that 25 percent is the appropriate rate to apply in discounting the projected cash flows of its CDO Notes. The adjusted cost basis of CDO Notes is \$22.7 million at September 30, 2008.

Equity Securities

The Company recorded a \$2.9 million impairment loss in third quarter 2008 on its investments in equity securities and mutual funds ( equity securities ). The fair value of equity securities is based on observable market prices. Overall, the fair value of many of the securities held has declined in recent months. The Company attributes most of the decline to recent significant market volatility and believes that current valuations are not indicative of the underlying value of these investments. Securities have been determined to be other-than-temporarily impaired based on the magnitude and duration of the decline in fair value below cost, the likelihood of recovery and other qualitative factors specific to the individual securities. The adjusted cost basis of equity securities is \$72.0 million at September 30, 2008.

The following table provides a summary of the gross unrealized losses and fair value of investment securities that are not deemed to be other-than-temporarily impaired aggregated by investment category and length of time that the securities have been in a continuous unrealized loss position as of December 31, 2007:

(In thousands) Temporarily Impaired Securities at December 31, 2007	Less than 12 months		12 months or Greater		Total	
	Fair Value	Estimated Unrealized Loss	Fair Value	Estimated Unrealized Loss	Fair Value	Estimated Unrealized Loss
Federal Agency	\$	\$	\$ 30,933	\$ 66	\$ 30,933	\$ 66

Total debt securities	124,146	1,849	1,695,479	31,566	1,819,625	33,415
Equity securities and mutual funds	17,654	437			17,654	437
Total Securities	\$ 141,800	\$ 2,286	\$ 1,695,479	\$ 31,566	\$ 1,837,279	\$ 33,852

At December 31, 2007, total securities available-for-sale had a fair value of \$2,462.7 million, which included the temporarily impaired securities above of \$1,837.3 million. Other securities in the portfolio had a fair value of \$625.4 million, which included an unrealized gain of \$11.6 million.

Table of Contents*Loan and Lease Portfolio*

A comparative period-end loan and lease table is presented below:

Dollars in thousands	September 30, 2008	Loans and Leases December 31, 2007	September 30, 2007
Commercial	\$ 4,428,992	\$ 4,193,436	\$ 3,973,985
Commercial real estate mortgages	2,159,101	1,954,539	1,894,753
Residential mortgages	3,364,332	3,176,322	3,114,335
Real estate construction	1,313,735	1,429,761	1,391,034
Equity lines of credit	540,937	432,513	404,869
Installment	154,377	178,195	169,041
Lease financing	317,043	265,872	242,063
Total loans and leases, gross	12,278,517	11,630,638	11,190,080
Less allowance for loan and lease losses	(208,046)	(168,523)	(152,018)
Total loans and leases, net	\$ 12,070,471	\$ 11,462,115	\$ 11,038,062

Total gross loans and leases at September 30, 2008 were 6 percent and 10 percent higher than at December 31, 2007 and September 30, 2007, respectively. The growth from the third quarter of 2007 was primarily in commercial and residential mortgages and is due primarily to organic growth.

As reported in the Company's Annual Report on Form 10-K for the year ended December 31, 2007, the federal banking regulatory agencies issued final guidance on December 6, 2006 on risk management practices for financial institutions with high or increasing concentrations of commercial real estate ( CRE ) loans on their balance sheets. The regulatory guidance reiterates the need for sound internal risk management practices for those institutions that have experienced rapid growth in CRE lending, have notable exposure to specific types of CRE, or are approaching or exceeding the supervisory criteria used to evaluate the CRE concentration risk, but the guidance is not to be construed as a limit for CRE exposures. The supervisory criteria are: total reported loans for construction, land development and other land represent 100 percent of the institution's total risk-based capital and both total CRE loans represent 300 percent or more of the institution's total risk-based capital and the institution's CRE loan portfolio and has increased 50 percent or more within the last 36 months. As of September 30, 2008, total loans for construction, land development and other land represented 89 percent of total risk-based capital; total CRE loans represented 204 percent of total risk-based capital and the total portfolio of loans for construction, land development, other land and CRE increased 54 percent over the last 36 months.

The following table presents information concerning nonaccrual loans, Other Real Estate Owned ( OREO ), loans which are contractually past due 90 days or more as to interest or principal payments and still accruing, and restructured loans. Company policy requires that a loan be placed on nonaccrual status if either principal or interest payments are 90 days past due, unless the loan is both well secured and in process of collection, or if full collection of interest or principal becomes uncertain, regardless of the time period involved. The \$2.3 million balance of OREO at September 30, 2008 is a 38 unit townhome complex. In October of 2008, the Company entered into a contract to sell the property. Escrow is expected to close during the fourth quarter. The Company had no OREO at December 31, 2007 or September 30, 2007.

Edgar Filing: CITY NATIONAL CORP - Form 10-Q

The following table provides information on nonaccrual loans and OREO as of September 30, 2008, June 30, 2008, December 31, 2007, and September 30, 2007:

Table of Contents

Loans past due 90 days or more on accrual status:				
Commercial	\$ 4,930	\$	\$	\$
Other		2	1	
Total	\$ 4,930	\$ 2	\$ 1	\$

At September 30, 2008, there were \$145.4 million of impaired loans included in nonaccrual loans, with an allowance allocation of \$19.4 million. The remaining \$5.5 million of nonaccrual loans at September 30, 2008 are loans under \$500,000 that are not individually evaluated for impairment. Impaired loans with commitments of less than \$500,000 are aggregated for the purpose of measuring impairment using historical loss factors as a means of measurement. On a comparable basis, at June 30, 2008 there were \$100.6 million of impaired loans included in nonaccrual loans, with an allowance allocation of \$15.4 million. At December 31, 2007 there were \$71.4 million of impaired loans, which had an allowance allocation of \$8.4 million, while at September 30, 2007 impaired loans were \$22.7 million with an allowance allocation of \$2.7 million. The assessment for impairment occurs when and while such loans are on nonaccrual, or when the loan has been restructured. When a loan with unique risk characteristics has been identified as being impaired, the amount of impairment will be measured by the Company using discounted cash flows, except when it is determined that the primary (remaining) source of repayment for the loan is the operation or liquidation of the underlying collateral. In these cases, the current fair value of the collateral, reduced by costs to sell, will be used in place of discounted cash flows. As a final alternative, the observable market price of the debt may be used to assess impairment.

If the measurement of the impaired loan is less than the recorded investment in the loan (including accrued interest, net deferred loan fees or costs and unamortized premium or discount), an impairment allowance is recognized by creating or adjusting the existing allocation of the allowance for loan and lease losses. The Company's policy is to record cash receipts on impaired loans first as reductions in principal and then as interest income.

The following table summarizes activity in nonaccrual loans and OREO for the three- and nine-months ended September 30, 2008 and 2007:

Table of Contents**Changes in Nonaccrual Loans**

Dollars in thousands	For the three months ended September 30,		For the nine months ended September 30,	
	2008	2007	2008	2007
Balance, beginning of period	\$ 106,177	\$ 22,308	\$ 75,561	\$ 20,883
Loans placed on nonaccrual	81,753	12,622	178,298	23,222
Loans from acquisitions				50
Charge-offs	(13,417)	(3,724)	(32,983)	(7,351)
Loans returned to accrual status		(2,635)		(2,755)
Repayments (including interest applied to principal)	(21,348)	(2,344)	(55,100)	(7,822)
Transferred to OREO	(2,279)		(14,890)	
Balance, end of period	\$ 150,886	\$ 26,227	\$ 150,886	\$ 26,227

In addition to loans in nonaccrual status disclosed above, management has also identified \$43.2 million of credits to 33 borrowers where known information about the borrowers causes management to have doubts about the ability of the borrowers to comply with the loan repayment terms. However, the inability of the borrowers to comply with the repayment terms was not sufficiently probable to place the loans on nonaccrual status at September 30, 2008, and the identification of these loans is not necessarily indicative of whether the loans will be placed on nonaccrual status. Of the potential problem loans identified, most are extensions of credit to borrowers that develop, construct and/or sell single-family residences. Potential problem loans were \$98.8 million at June 30, 2008 and \$67.9 million as of December 31, 2007.

Management's classification of credits as nonaccrual or potential problem loans does not necessarily indicate that the principal is uncollectible in whole or in part.

***Allowance for Loan and Lease Losses and Reserve for Off-Balance Sheet Credit Commitments***

At September 30, 2008, the allowance for loan and lease losses was \$208.0 million or 1.69 percent of outstanding loans and leases, and the reserve for off-balance sheet credit commitments was \$23.4 million. The process used in the determination of the adequacy of the reserve for off-balance sheet credit commitments is consistent with the process for the allowance for loan and lease losses.

The following tables summarize the activity in the allowance for loan and lease losses and the reserve for off-balance sheet credit commitments for the three- and nine-months ended September 30, 2008 and 2007:

Table of Contents**Changes in Allowance for Loan and Lease Losses**

**Deposits**

Deposits totaled \$12.2 billion at September 30, 2008, unchanged from September 30, 2007, and an increase of 3 percent from \$11.8 billion at December 31, 2007. Core deposits, which continued to provide substantial benefits to the Bank's cost of funds, were 89 percent of total deposits at September 30, 2008, and increased \$0.3 billion since December 31, 2007.

Average deposits totaled \$11.7 billion for the third quarter of 2008, a decrease of 6 percent from the third quarter of 2007, as the Company was able to reduce its holdings of higher-cost non-core time deposits. Average deposits grew slightly from the second quarter of 2008. Average non-interest bearing deposits increased 1 percent from the third quarter of 2007 but were down slightly from the second quarter of 2008. Title and escrow deposit balances averaged \$1.0 billion, down \$0.2 billion from the third quarter of 2007 and unchanged from the second quarter of this year, due to a decline in residential and commercial real estate activity.

**Borrowings**

Borrowed funds were \$2.3 billion at September 30, 2008, compared with \$2.2 billion at December 31, 2007, and \$1.5 billion at September 30, 2007. Short-term borrowings increased to fund loan growth and to replace maturing higher cost certificates of deposits.

**Off- Balance Sheet****Income Taxes**

In the normal course of business, the Company is a party to financial instruments with off-balance sheet exposure. These financial instruments include commitments to extend credit, letters of credit, and financial guarantees. These instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount reflected in the consolidated balance sheet. Commitments to extend credit are agreements to lend to a client, as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since a portion of the commitments is expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The Company evaluates each client's creditworthiness on a case-by-case basis.

The Company had off-balance sheet credit commitments aggregating \$5.7 billion at September 30, 2008, compared with \$5.3 billion and \$5.5 billion at December 31, 2007 and September 30, 2007, respectively. In addition, the Company had \$688.7 million outstanding in bankers acceptances and letters of credit of which \$674.6 million related to standby letters of credit at September 30, 2008. At December 31, 2007, the Company had \$840.2 million in outstanding bankers' acceptances and letters of credit of which \$822.1 million related to standby letters of credit. Substantially all of the Company's loan commitments are on a variable-rate basis and are comprised of real estate and commercial loan commitments.

Table of Contents

As of September 30, 2008, the Company had private equity and alternative investment fund commitments of \$60.7 million, of which \$34.6 million was funded. As of December 31, 2007 and September 30, 2007, the Company had private equity and alternative investment fund commitments of \$60.7 million and \$55.7 million, respectively, of which \$31.0 million and \$26.7 million was funded. In addition, the Company had unfunded affordable housing fund commitments of \$21.8 million, \$30.3 million, and \$26.4 million as of September 30, 2008, December 31, 2007, and September 30, 2007, respectively.

In connection with the liquidation of an investment acquired in a previous bank merger, the Company has an outstanding long-term guarantee. The maximum liability under the guarantee is \$23.0 million, but the Company does not expect to make any payments under the terms of this guarantee.

**Fair Value Measurements**

The Company adopted FASB Statement No. 157, *Fair Value Measurements* ( *SFAS 157* ) effective January 1, 2008 on a prospective basis. SFAS 157 defines fair value for financial reporting purposes as the price that would be received to sell an asset or paid to transfer a liability in an orderly market transaction between market participants at the measurement date (reporting date). Under the statement, fair value is based on an exit price in the principal market or most advantageous market in which the reporting entity could transact.

For each asset and liability required to be reported at fair value, management has identified the unit of account and valuation premise to be applied for purposes of measuring fair value. The unit of account is the level at which an asset or liability is aggregated or disaggregated for purposes of applying SFAS 157. The valuation premise is a concept that determines whether an asset is measured on a standalone basis or in combination with other assets. For purposes of applying the provisions of SFAS 157, the Company measures its assets and liabilities on a standalone basis then aggregates assets and liabilities with similar characteristics for disclosure purposes.

*Fair Value Hierarchy*

Management employs market standard valuation techniques in determining the fair value of assets and liabilities. Inputs used in valuation techniques are based on assumptions that market participants would use in pricing an asset or liability. SFAS 157 prioritizes inputs used in valuation techniques based on whether the inputs are observable or unobservable as follows:

**Level 1**-Quoted market prices in an active market for identical assets and liabilities.

**Level 2**-Observable inputs including quoted prices (other than Level 1) in active markets for similar assets or liabilities, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset or liability such as interest rates, yield curves, volatilities and default rates, and inputs that are derived principally from or corroborated by observable market data.

**Level 3**-Unobservable inputs reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability based on the best information available.

The Company utilizes quoted market prices to measure fair value to the extent available (Level 1). If market prices are not available, fair value measurements are based on models that use primarily market-based assumptions including interest rate yield curves, anticipated prepayment rates, default rates and foreign currency rates (Level 2). In certain circumstances, market observable inputs for model-based valuation techniques may not be available and the Company is required to make judgments about assumptions that market participants would use in estimating the fair value of a financial instrument.

At September 30, 2008, \$2.5 billion, or approximately 15%, of the Company's total assets were recorded at fair value on a recurring basis. The majority of these financial assets were valued using Level 1 or Level 2 inputs. Less than one-half of 1% of total assets were measured using Level 3 inputs. It was determined subsequent to the initial adoption of SFAS 157 that collateralized debt obligations should be classified as Level 3 based on limited market liquidity for these securities. In addition, certain inputs to the discounted cash flow model used to value CDOs may be unobservable. At September 30, 2008, \$4.3 million of the Company's total liabilities were recorded at fair value on a recurring basis using Level 1 or Level 2 inputs.

Table of Contents

At September 30, 2008, \$70.7 million, or less than one-half of 1%, of the Company's total assets were recorded at fair value on a nonrecurring basis. Assets measured on a nonrecurring basis include impaired loans and other real estate owned. These assets were measured using Level 2 inputs based on market-based information. No liabilities were measured at fair value on a nonrecurring basis at September 30, 2008.

**CAPITAL ADEQUACY REQUIREMENT**

The following table presents the regulatory standards for well capitalized institutions and the capital ratios for the Corporation and CNB at September 30, 2008, December 31, 2007 and September 30, 2007.

Tier 1 capital ratios at September 30, 2008 include the impact of \$25.4 million of preferred stock issued by real estate investment trust subsidiaries of the Bank, which is included in minority interest in consolidated subsidiaries, and \$5.2 million of trust preferred securities issued by an unconsolidated capital trust subsidiary of the holding company.

	Regulatory Well-Capitalized Standards	September 30, 2008	December 31, 2007	September 30, 2007
City National Corporation				
Tier 1 leverage	N/A%	8.01%	7.97%	7.80%
Tier 1 risk-based capital	6.00	9.13	9.31	9.57
Total risk-based capital	10.00	11.04	11.27	12.01
City National Bank				
Tier 1 leverage	5.00	7.87	7.95	7.84
Tier 1 risk-based capital	6.00	8.98	9.28	9.61
Total risk-based capital	10.00	10.90	11.24	12.04

The ratio of shareholders' equity to assets as of September 30, 2008 was 10.20 percent, compared to 10.51 percent at September 30, 2007 and was 10.42 percent as of December 31, 2007.

The accumulated other comprehensive loss, primarily related to available-for-sale securities and interest rate swaps, was \$38.1 million at September 30, 2008 compared to \$22.8 million at September 30, 2007 and \$9.3 million at December 31, 2007.

The following table provides information about purchases by the Company during the nine months ended September 30, 2008 of equity securities that are registered by the Company pursuant of Section 12 of the Exchange Act.

Period	Total Number of Shares (or Units) Purchased	Average Price Paid per Share (or Unit)	Total number of Shares (or Units) Purchased as Part of Publicly Announced Plans or	Maximum Number of Shares that May Yet Be Purchased Under the Plans or

---

(1) On January 24, 2008 the company's Board of Directors authorized the Company to repurchase 1 million additional shares of the Company's stock following the completion of its previously approved initiative. Unless terminated earlier by resolution of our

Table of Contents

Board of Directors, the program will expire when the Company has repurchased all shares authorized for repurchase thereunder. We received no shares in payment for the exercise price of stock options.

**LIQUIDITY MANAGEMENT**

The Company continues to manage its liquidity through the combination of core deposits, certificates of deposits, short-term federal funds purchased, sales of securities under repurchase agreements, collateralized borrowing lines at the Federal Reserve Bank and the Federal Home Loan Bank of San Francisco and a portfolio of securities available-for-sale. Liquidity is also provided by maturities and pay downs on securities and loans.

**ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**

**ASSET/LIABILITY MANAGEMENT**

Market risk results from the variability of future cash flows and earnings due to changes in the financial markets. These changes may also impact the fair values of loans, securities and borrowings. The values of financial instruments may change because of interest rate changes, foreign currency exchange rate changes or other market changes. The Company's asset/liability management process entails the evaluation, measurement and management of interest rate risk, market risk and liquidity risk. The principal objective of asset/liability management is to optimize net interest income subject to margin volatility and liquidity constraints over the long term. Margin volatility results when the rate reset (or repricing) characteristics of assets are materially different from those of the Company's liabilities. The Board of Directors approves asset/liability policies and sets guidelines within which the risks must be managed. The Asset/Liability Management Committee (ALCO), which is comprised of senior management and key risk management individuals, sets risk management targets within the broader limits approved by the Board, monitors the risks and periodically reports results to the Board.

A quantitative and qualitative discussion about market risk is included on pages 48 to 52 of the Corporation's Form 10-K for the year ended December 31, 2007.

*Net Interest Simulation:* As part of its overall interest rate risk management process, the Company performs stress tests on net interest income projections based on a variety of factors, including interest rate levels, changes in the relationship between the prime rate and short-term interest rates, and the shape of the yield curve. The Company uses a simulation model to estimate the severity of this risk and to develop mitigation strategies, including interest-rate hedges. The magnitude of the change is determined from historical volatility analysis. The assumptions used in the model are updated periodically and reviewed and approved by ALCO. In addition, the Board of Directors has adopted limits within which interest rate exposure must be contained. Within these broader limits, ALCO sets management guidelines to further contain interest rate risk exposure.

## Edgar Filing: CITY NATIONAL CORP - Form 10-Q

The Company is naturally asset-sensitive due to its large portfolio of rate-sensitive commercial loans that are funded in part by rate-stable core deposits. As a result, if there are no significant changes in the mix of assets and liabilities, the net interest margin increases when interest rates increase and decreases when interest rate decrease. The Company uses on and off-balance sheet hedging vehicles to manage this risk. The Company uses a simulation model to estimate the impact of changes in interest rates on net interest income. The model projects net interest income assuming no change in loan or deposit mix as it stood at September 30, 2008. Interest rate scenarios include stable rates and 100 and 200 basis point parallel shifts in the yield curve occurring gradually over a twelve-month period. Loan yields and deposit rates change over the twelve-month horizon based on current product spreads and adjustment factors that are statistically derived using historical rate and balance sheet data.

The Company remains in a relatively neutral position. As of September 30, 2008, the simulation model indicates that a 100 basis point decline in the yield curve over a twelve-month horizon would result in a decrease in projected net interest income of approximately 0.5 percent while a 200 basis point decline would reduce projected net interest income by approximately 1.3 percent. This compares to a decrease in projected net interest income of 0.5 percent with 100 basis point decline and 1.6 percent with a 200 basis point decline at September 30, 2007. At September 30, 2008, a gradual 100 basis point parallel increase in the yield curve over the next 12 months would result in an increase in projected net interest income of approximately 0.3 percent while a 200 basis point increase would increase projected net interest income by approximately 0.6 percent. This compares to an increase in projected net interest income of 1.0 percent with a 100 basis point increase and 1.9 percent with a 200 basis point increase at September 30, 2007. The Company's interest rate risk exposure remains within Board limits and ALCO guidelines.

*Market Value of Portfolio Equity:* The simulation model indicates that the market value of portfolio equity ( MVPE ) is somewhat vulnerable to a sudden and substantial increase in interest rates. As of September 30, 2008, a

Table of Contents

200-basis-point parallel increase in interest rates results in a 3.9 percent decline in MVPE. This compares to a 3.4 percent decline for the year-earlier period. The higher sensitivity is due to changes in the deposit mix and a reduction in the duration of wholesale funding. As of September 30, 2008, a 200-basis-point parallel decrease in interest rates would improve MVPE by 2.7 percent. As of September 30, 2007, the MVPE would have improved by 1.8 percent if rates decreased by 200 basis points.

The following table presents the notional amount and fair value of the Company's interest rate swap agreements according to the specific asset or liability hedged:

Dollars in millions	September 30, 2008			December 31, 2007			September 30, 2007		
	Notional Amount	Fair Value	Duration	Notional Amount	Fair Value	Duration	Notional Amount	Fair Value	Duration
<b>Fair Value</b>									
<b>Interest Rate Swap</b>									
Certificates of deposit	\$ 20.0	\$ 0.9	2.0	\$ 20.0	\$ 0.9	2.7	\$ 20.0	\$ 0.5	2.8
Long-term and subordinated debt	370.9	12.7	3.5	490.9	11.1	3.0	490.9	0.1	3.1
Total fair value hedge swaps	390.9	13.6	3.4	510.9	12.0	3.0	510.9	0.6	3.1
<b>Cash Flow Hedge</b>									
<b>Interest Rate Swap</b>									
US Dollar LIBOR based loans	200.0	2.9	2.0	100.0	3.9	2.3	150.0	1.9	1.7
Prime based loans	125.0	1.0	1.5	250.0	0.8	0.4	300.0	(0.2)	0.3
Total cash flow hedge swaps	325.0	3.9	1.8	350.0	4.7	0.9	450.0	1.7	0.8
<b>Fair Value and Cash Flow Hedge</b>									
<b>Interest Rate Swaps</b>	\$ 715.9	\$ 17.5(1)	2.7	\$ 860.9	\$ 16.7	2.2	\$ 960.9	\$ 2.3	2.0

(1) Net fair value is the estimated net gain (loss) to settle derivative contracts. The net fair value is the sum of the mark-to-market asset (if applicable) and mark-to-market liability.

Interest-rate swap agreements involve the exchange of fixed and variable-rate interest payments based upon a notional principal amount and maturity date. The Company's interest rate risk management instruments had \$7.2 million of credit risk exposure at September 30, 2008 and \$8.1 million as of September 30, 2007. The credit exposure represents the cost to replace, on a present value basis and at current market rates, all contracts outstanding by trading counterparty having an aggregate positive market value. The Company's swap agreements require the deposit of cash or marketable debt securities as collateral for this risk if it exceeds certain market value thresholds. These requirements apply individually to City National Corporation and to City National Bank. As of September 30, 2008, collateral valued at \$10.7 million had been received from swap counterparties. At September 30, 2007, the Company had delivered securities with a market value of \$6.7 million as margin for swaps with a negative replacement value of \$5.2 million; collateral valued at \$1.0 million had been received from swap counterparties.

The Company also offers interest-rate swaps and interest-rate caps, floors and collars to its clients to assist them in hedging their cash flow and operations. These derivative contracts are offset by paired trades with unrelated third parties. They are not designated as hedges under SFAS 133, and the positions are marked to market each reporting period. As of September 30, 2008, the Company had entered into derivative contracts with clients (and offsetting derivative contracts with counterparties) having a notional balance of \$234.7 million.

Table of Contents

ITEM 4. CONTROL AND PROCEDURES

**DISCLOSURE CONTROLS AND PROCEDURES**

Under the supervision and with the participation of the Company's management, including its Chief Executive Officer and Chief Financial Officer, the Company has evaluated the effectiveness of the design and operation of its disclosure controls and procedures (as defined in Rules 13a - 15(e) under the Securities and Exchange Act of 1934 (the "Exchange Act")). Based upon this evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that, as of the end of the period covered by this report, the Company's disclosure controls and procedures were effective.

**INTERNAL CONTROL OVER FINANCIAL REPORTING**

There was no change in the Company's internal control over financial reporting that occurred during the registrant's last fiscal quarter to which this report relates that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

Table of Contents

**CAUTIONARY STATEMENT FOR PURPOSES OF THE SAFE HARBOR PROVISIONS  
OF THE PRIVATE SECURITIES LITIGATION REFORM ACT OF 1995**

We have made forward-looking statements in this document about the company, for which the company claims the protection of the safe harbor provisions contained in the Private Securities Litigation Reform Act of 1995.

Forward-looking statements are based on management's knowledge and belief as of today and include information concerning the company's possible or assumed future financial condition, and its results of operations, business and earnings outlook. These forward-looking statements are subject to risks and uncertainties. A number of factors, some of which are beyond the company's ability to control or predict, could cause future results to differ materially from those contemplated by such forward-looking statements. These factors include (1) unknown impact of recently enacted federal legislation (i.e., the Emergency Economic Stabilization Act (EESA)) on the financial markets, including levels of volatility and limited credit availability currently being experienced, (2) significant changes in banking laws or regulations, including without limitation, as a result of EESA and the creation of the Troubled Asset Relief Program and the Capital Purchase Program and related executive compensation requirements, (3) more adversely than expected changes in general business and economic conditions, either nationally, regionally or locally in areas where the company conducts its business, which may affect, among other things, the level of nonperforming assets, charge-offs and provision expense, (4) unprecedented volatility in equity, fixed income and other market valuations, (5) changes in market rates and prices which may adversely impact the value of financial products including securities, loans, deposits, debt and derivative financial instruments, and other similar financial instruments, (6) changes in interest rate environment and market liquidity which may reduce interest margins and impact funding sources, (7) increased competition in the company's markets, (8) higher-than-expected credit losses due to business losses, real estate cycles, capital market disruptions, changes in commercial real estate development and real estate prices or other economic factors, (9) changes in the financial performance and/or condition of the Company's borrowers, (10) a substantial and permanent loss of either client accounts and/or assets under management at the Company's investment advisory affiliates or its wealth management division, (11) soundness of other financial institutions which could adversely affect the Company, (12) increases in Federal Deposit Insurance Corporation premiums due to market developments and regulatory changes, (13) protracted labor disputes in the Company's markets, (14) earthquake, fire or other natural disasters affecting the condition of real estate collateral, (15) the effect of acquisitions and integration of acquired businesses and de novo branching efforts, (16) the impact of changes in regulatory, judicial or legislative tax treatment of business transactions, (17) changes in accounting policies or procedures as may be required by the Financial Accounting Standards Board or regulatory agencies, and (18) the success of the company at managing the risks involved in the foregoing.

Forward-looking statements speak only as of the date they are made, and the company does not undertake to update forward-looking statements to reflect circumstances or events that occur after the date the statements are made, or to update earnings guidance, including the factors that influence earnings.

For a more complete discussion of these risks and uncertainties, see the company's Annual Report on Form 10-K for the year ended December 31, 2007 and particularly Part I, Item 1A, titled "Risk Factors."

Table of Contents

**PART II OTHER INFORMATION**

**ITEM 1A. RISK FACTORS**

Forward-looking statements are based on management's knowledge and belief as of today and include information concerning the company's possible or assumed future financial condition, and its results of operations, business and earnings outlook. These forward-looking statements are subject to risks and uncertainties. A number of factors, some of which are beyond the company's ability to control or predict, could cause future results to differ materially from those contemplated by such forward-looking statements. These factors include (1) unknown impact of recently enacted federal legislation (i.e., the Emergency Economic Stabilization Act (EESA)) on the financial markets, including levels of volatility and limited credit availability currently being experienced, (2) significant changes in banking laws or regulations, including without limitation, as a result of EESA and the creation of the Troubled Asset Relief Program and the Capital Purchase Program and related executive compensation requirements, (3) more adversely than expected changes in general business and economic conditions, either nationally, regionally or locally in areas where the company conducts its business, which may affect, among other things, the level of nonperforming assets, charge-offs and provision expense, (4) unprecedented volatility in equity, fixed income and other market valuations, (5) changes in market rates and prices which may adversely impact the value of financial products including securities, loans, deposits, debt and derivative financial instruments, and other similar financial instruments, (6) changes in interest rate environment and market liquidity which may reduce interest margins and impact funding sources, (7) increased competition in the company's markets, (8) higher-than-expected credit losses due to business losses, real estate cycles, capital market disruptions, changes in commercial real estate development and real estate prices or other economic factors, (9) changes in the financial performance and/or condition of the Company's borrowers, (10) a substantial and permanent loss of either client accounts and/or assets under management at the Company's investment advisory affiliates or its wealth management division, (11) soundness of other financial institutions which could adversely affect the Company, (12) increases in Federal Deposit Insurance Corporation premiums due to market developments and regulatory changes, (13) protracted labor disputes in the Company's markets, (14) earthquake, fire or other natural disasters affecting the condition of real estate collateral, (15) the effect of acquisitions and integration of acquired businesses and de novo branching efforts, (16) the impact of changes in regulatory, judicial or legislative tax treatment of business transactions, (17) changes in accounting policies or procedures as may be required by the Financial Accounting Standards Board or regulatory agencies, and (18) the success of the company at managing the risks involved in the foregoing.

Forward-looking statements speak only as of the date they are made, and the company does not undertake to update forward-looking statements to reflect circumstances or events that occur after the date the statements are made, or to update earnings guidance, including the factors that influence earnings.

Except for the addition of the risk factors detailed below, there has been no other material changes to the risk factors disclosed in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2007.

**More adverse than expected changes in general business and economic conditions.**

Dramatic declines in the housing market over the past year, with falling home prices and increasing foreclosures, unemployment and under-employment, have negatively impacted the credit performance of real estate related loans and resulted in significant write-downs of asset values by financial institutions, including government sponsored entities. These write-downs, initially of asset-backed securities but spreading to other securities and loans, have caused many financial institutions to seek additional capital, to reduce or eliminate dividends, to merge with larger and stronger institutions and, in some cases, to fail. Reflecting concern about the stability of the financial markets generally and the strength of counterparties, many lenders and institutional investors have reduced or ceased providing funding to borrowers, including to other

financial institutions. This market turmoil and tightening of credit have led to an increased level of commercial and consumer delinquencies, lack of consumer confidence, increased market volatility and widespread reduction of business activity generally. The resulting economic pressure on consumers and lack of confidence in the financial markets could adversely affect our business, financial condition and results of operations. A worsening of these conditions would likely exacerbate the adverse effects of these difficult market conditions on us and others in the financial institutions industry.

**Current levels of market volatility are unprecedented.**

The capital and credit markets have been experiencing volatility and disruption for more than 12 months. Recently, the volatility and disruption has reached unprecedented levels. In some cases, the markets have produced downward pressure on stock prices and credit availability for certain issuers without regard to those issuers' underlying financial strength. If current levels of market disruption and volatility continue or worsen, there can be no assurance that we will not experience an

Table of Contents

adverse effect, which may be material, on our ability to access capital and on our business, financial condition and results of operations.

**The soundness of other financial institutions could adversely affect us.**

Financial services institutions are interrelated as a result of trading, clearing, counterparty or other relationships. We have exposure to many different industries and counterparties, and we routinely execute transactions with counterparties in the financial industry, including brokers and dealers, commercial banks, investment banks, mutual and hedge funds, and other institutional clients. Many of these transactions expose us to credit risk in the event of default of our counterparty or client. In addition, our credit risk may be exacerbated when the collateral held by us cannot be realized upon or is liquidated at prices not sufficient to recover the full amount of the financial instrument exposure due us. Any such losses could have a material adverse affect on our financial condition and results of operations.

**There can be no assurance that recently enacted legislation will stabilize the U.S. financial system.**

On October 3, 2008, President Bush signed into law the Emergency Economic Stabilization Act of 2008 (the EESA). The legislation was the result of a proposal by Treasury Secretary Henry Paulson to the U.S. Congress in response to the financial crises affecting the banking system and financial markets and threats to investment banks and other financial institutions. Pursuant to the EESA, the U.S. Treasury will have the authority to, among other things, purchase up to \$700 billion of mortgages, mortgage-backed securities and certain other financial instruments from financial institutions for the purpose of stabilizing and providing liquidity to the U.S. financial markets. On October 14, 2008, the U.S. Department of Treasury announced a program under the EESA pursuant to which it would make senior preferred stock investments in participating financial institutions (the TARP Capital Purchase Program). On October 14, 2008, the Federal Deposit Insurance Corporation announced the development of a guarantee program under the systemic risk exception to the Federal Deposit Act (FDA) pursuant to which the FDIC would offer a guarantee of certain financial institution indebtedness in exchange for an insurance premium to be paid to the FDIC by issuing financial institutions (the FDIC Temporary Liquidity Guarantee Program).

There can be no assurance, however, as to the actual impact that the EESA and its implementing regulations, the FDIC programs, or any other governmental program will have on the financial markets. The failure of the EESA, the FDIC, or the U.S. government to stabilize the financial markets and a continuation or worsening of current financial market conditions could materially and adversely affect our business, financial condition, results of operations, access to credit or the trading price of our common stock.

**The impact on us of recently enacted legislation, in particular the Emergency Economic Stabilization Act of 2008 and its implementing regulations, and actions by the FDIC, cannot be predicted at this time.**

The programs established or to be established under the EESA and Troubled Asset Relief Program may have adverse effects upon us. We may face increased regulation of our industry. Compliance with such regulation may increase our costs. Also, participation in specific programs may subject us to additional restrictions. For example, participation in the TARP Capital Purchase Program will limit (without the consent of the Department of Treasury) our ability to increase our dividend or to repurchase our common stock for so long as any securities issued under such program remain outstanding. It will also subject us to additional executive compensation restrictions. Similarly, programs established by the FDIC under the systemic risk exception of the FDA, may have an adverse effect on us. Participation in the FDIC Temporary Liquidity Guarantee Program likely will require the payment of additional insurance premiums to the FDIC.

For a more complete discussion of these risks and uncertainties, see the company's Annual Report on Form 10-K for the year ended December 31, 2007 and particularly Part I, Item 1A, titled "Risk Factors."

**ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS**

(c) Purchase of Equity Securities by the Issuer and Affiliated Purchaser.

The information required by subsection (c) of this item regarding purchases by the Company during the quarter ended September 30, 2008 of equity securities that are registered by the Company pursuant to Section 12 of the Exchange Act is incorporated by reference from that portion of Part I, Item 1 of the report under Note 7.
