NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

Note 1. Organization & Summary of Significant Accounting Policies

Description of the Company. Omnicell, Inc. (Omnicell, our, us, we, or the Company) was incorporated in California in 1992 under the name Omnicell Technologies, Inc. and reincorporated in Delaware in 2001 as Omnicell, Inc. Our major products are medication and supply dispensing systems which are sold in our principal market, which is the healthcare industry. Our market is primarily located in the United States.

Basis of Presentation. These interim condensed consolidated financial statements are unaudited but reflect, in the opinion of management, all adjustments, consisting of normal recurring adjustments and accruals, necessary to present fairly the financial position of Omnicell and its subsidiaries as of March 31, 2009, and the results of operations and cash flows for the three months ended March 31, 2009 and 2008. Certain information and footnote disclosures normally included in financial statements prepared in accordance with U.S. generally accepted accounting principles, or GAAP, have been condensed or omitted in accordance with the rules and regulations of the Securities and Exchange Commission, or SEC. These unaudited condensed consolidated financial statements should be read in conjunction with the audited consolidated financial statements and accompanying notes included in our Annual Report on Form 10-K for the year ended December 31, 2008.

Our results of operations and cash flows for the three months ended March 31, 2009 are not necessarily indicative of results that may be expected for the year ending December 31, 2009, or for any future period.

Use of estimates. The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Principles of consolidation. The condensed consolidated financial statements include the accounts of our wholly-owned subsidiaries. All significant inter-company accounts and transactions have been eliminated in consolidation.

Reclassifications. Certain reclassifications have been made to prior year reported accounts receivable, other current assets and accrued liabilities in the condensed consolidated balance sheet to conform with the current year balance sheet presentation. Certain prior period amounts in our unaudited condensed consolidated statement of cash flows have been reclassified to conform to the current period presentation. Amounts reclassified include accrued liabilities and acquisition of privately held company, net of cash acquired.

Edgar Filing: OMNICELL, Inc - Form 10-Q

Fair value of financial instrument. Effective January 1, 2008, we adopted SFAS No. 157, Fair Value Measurements, or SFAS No. 157, on a prospective basis for our financial assets and liabilities recognized at fair value on a recurring basis using the fair value hierarchy established in SFAS No. 157.

SFAS No. 157 describes three levels of inputs that may be used to measure fair value, as follows:

Level 1 inputs, which include quoted prices in active markets for identical assets or liabilities;

Level 2 inputs, which include observable inputs other than Level 1 inputs, such as quoted prices for similar assets or liabilities; quoted prices for identical or similar assets or liabilities in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the asset or liability; and

Level 3 inputs, which include unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the underlying asset or liability. Level 3 assets and liabilities include those whose fair value measurements are determined using pricing models, discounted cash flow methodologies or similar valuation techniques, as well as significant management judgment or estimation.

At March 31, 2009 and December 31, 2008, our financial assets utilizing Level 1 inputs included cash equivalents. For these items, quoted market prices are readily available. We do not currently have any financial instruments utilizing Level 2 and Level 3 inputs.

Table of Contents

Sales of accounts receivable. We offer our customers multi-year, non-cancelable payment terms. Generally we sell non-U.S. government receivables to third-party leasing companies on a non-recourse basis. We reflect the financing costs on the sale of these receivables as a component of our revenue. We record our revenue at the net present value of the multi-year payment stream using the contractual interest rate charged to us by the third-party leasing company. We record the sale of our accounts receivables as true sales in accordance with SFAS No. 140, Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities. During the three months ended March 31, 2009 and 2008, we transferred non-recourse accounts receivable totaling \$7.9 million and \$22.9 million, respectively, which approximated fair value, to leasing companies on a non-recourse basis. At March 31, 2009 and December 31, 2008, accounts receivable included \$2.8 million and \$4.7 million, respectively, from leasing companies for transferred non-recourse accounts receivable. Due to the nature of the recourse clauses in certain sales arrangements, we recorded \$0.1 million and \$0.2 million as of March 31, 2009 and December 31, 2008, respectively, as receivables subject to a sales agreement and obligation resulting from sale of receivables.

Dependence on suppliers. We have significant supply agreements with two suppliers for construction and supply of several sub-assemblies and inventory management of sub-assemblies used in our hardware products. There are no minimum purchase requirements. The contracts may be terminated by either the supplier or by us without cause and at any time upon delivery of from two to six months notice. Purchases from these suppliers for the three months ended March 31, 2009 and 2008 were approximately \$6.7 million and \$6.9 million, respectively.

Income Taxes. For the three months ended March 31, 2009 we recorded an income tax benefit of \$0.9 million as compared with income tax expense of \$2.5 million for the same period in 2008. The effective tax rate benefit for the three months ended March 31, 2009 was 32.9%, as compared to an effective tax rate of 40.5% for the same period in 2008. The income tax benefit recorded for the three months ended March 31, 2009 is a result of the book loss recorded for the three months ended March 31, 2009 partially offset by the re-measurement of our California deferred tax assets due to the enactment of California tax legislation. As of March 31, 2009 and 2008, the estimated annual effective tax rates before discrete items were 41.1% and 42.6%. The estimated annual effective rates for both periods differ from the statutory rate of 35.0% due to the impact of certain non-deductible stock compensation charges under SFAS No. 123(R), state income taxes and research and development credits.

In February 2009, California enacted a law change which allows an elective single sales factor apportionment for taxable years beginning on or after January 1, 2011. We expect to benefit from the California single sales factor election. In accordance with SFAS No. 109, Accounting for Income Taxes, we have re-measured our deferred tax assets, taking into account the reversal pattern and the expected California tax rate under the elective single sales factor. As a result of this change, we recorded a decrease to our California deferred tax assets by \$0.2 million which resulted in a discrete income tax expense of \$0.2 million for the three months ended March 31, 2009.

Other comprehensive income (loss). Other comprehensive income (loss) is the same as net income (loss) for the three months ended March 31, 2009 and 2008.

Segment Information. We manage our business on the basis of one reportable segment. Our products and technologies share similar distribution channels and customers and are sold primarily to hospitals and healthcare facilities to improve patient safety and care and enhance operational efficiency. Our sole operating segment is medication and supply dispensing systems. Substantially all of our long-lived assets are located in the United States. For the three months ended March 31, 2009 and 2008, substantially all of our total revenues and gross profits were generated by the medication and supply dispensing systems operating segment from customers in the United States and no one customer accounted for greater than 10% of our revenues.

Table of Contents

Recently Issued Accounting Pronouncements.

In April 2009, the Financial Accounting Standards Board (FASB) issued three related Staff Positions (FSP): (i) FSP 157-4, Determining Fair Value When the Volume and Level of Activity for the Asset or Liability have Significantly Decreased and Identifying Transactions That Are Not Orderly, or FSP FAS 157-4, (ii) FAS 115-2 and FAS 124-2, Recognition and Presentation of Other-Than-Temporary Impairments, or FSP FAS 115-2, and (iii) FAS 107-1 and APB 28-1, Interim Disclosures about Fair Value of Financial Instruments, or FSP FAS 107-1, which will be effective for interim and annual periods ending after June 15, 2009. FSP FAS 157-4 provides guidance on how to determine the fair value of assets and liabilities under SFAS No. 157 in the current economic environment and reemphasizes that the objective of a fair value measurement remains an exit price. If we were to conclude that there has been a significant decrease in the volume and level of activity of the asset or liability in relation to normal market activities, quoted market values may not be representative of fair value and we may conclude that a change in valuation technique or the use of multiple valuation techniques may be appropriate. FSP FAS 115-2 modifies the requirements for recognizing other-than-temporarily impaired debt securities and revise the existing impairment model for such securities, by modifying the current intent and ability indicator in determining whether a debt security is other-than-temporarily impaired. FSP FAS 107-1 enhances the disclosure of instruments under the scope of SFAS No. 157 for both interim and annual periods. We are evaluating these Staff Positions, but do not currently expect them to have a material impact on our consolidated financial statements.

In April 2009, the FASB issued FSP No. 141(R)-1 Accounting for Assets Acquired and Liabilities Assumed in a Business Combination That Arise from Contingencies, or FSP FAS 141(R)-1. FSP FAS 141(R)-1 amends the provisions in SFAS No. 141(R), Business Combinations for the initial recognition and measurement, subsequent measurement and accounting, and disclosures for assets and liabilities arising from contingencies in business combinations. The FSP eliminates the distinction between contractual and non-contractual contingencies, including the initial recognition and measurement criteria in SFAS No. 141(R) and instead carries forward most of the provisions in SFAS No. 141 for acquired contingencies. FSP FAS 141(R)-1 is effective for contingent assets and contingent liabilities acquired in business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008. We do not expect the adoption of FSP FAS 141(R)-1 will have an impact on our consolidated financial statements unless and until we complete a business combination.

Note 2. Net Income (Loss) Per Share

Edgar Filing: OMNICELL, Inc - Form 10-Q

Basic net income (loss) per share is computed by dividing net income (loss) for the period by the weighted average number of shares outstanding during the period, less shares subject to repurchase. Diluted net income (loss) per share is computed by dividing net income (loss) for the period by the weighted average number of shares less shares subject to repurchase plus, if dilutive, potential common stock outstanding during the period. Potential common stock include the effect of outstanding dilutive stock options, restricted stock awards and restricted stock units computed using the treasury stock method. Since their impact is anti-dilutive, the total number of shares excluded from the calculations of diluted net income (loss) per share for the three months ended March 31, 2009 and 2008 were 4,716,239 and 1,308,815, respectively.

The calculation of basic and diluted net income (loss) per share is as follows (in thousands, except per share amounts):

	Three Months Ended		
	March 31,		
	2009		2008
Basic:			
Net income (loss)	\$	(1,871)	\$ 3,733
Weighted average shares outstanding-basic		31,453	34,193
Net income (loss) per share-basic	\$	(0.06)	\$ 0.11
Diluted:			
Net income (loss)	\$	(1,871)	\$ 3,733
Weighted average shares outstanding-basic		31,453	34,193
Add: Dilutive effect of employee stock plans			1,389
Weighted average shares outstanding-diluted		31,453	35,582
Net income (loss) per share-diluted	\$	(0.06)	\$ 0.10

Table of Contents**Note 3. Stockholders Equity****Treasury Stock**

During 2008, our board of directors authorized stock repurchase programs for the repurchase of up to \$90.0 million of our common stock. All repurchased shares were recorded as treasury stock and were accounted for under the cost method. No repurchased shares have been retired. The timing, price and volume of the repurchases are based on market conditions, relevant securities laws and other factors. The stock repurchase program does not obligate us to repurchase any specific number of shares, and we may terminate or suspend the repurchase program at any time. From the inception of the program in February 2008 through March 31, 2009, we repurchased a total of 4,066,296 shares at an average cost of \$16.00 per share through a combination of open market purchases and pursuant to a 10b5-1 trading plan.

During the three months ended March 31, 2009, we did not repurchase any shares through the stock repurchase programs. For the three months ended March 31, 2008, we repurchased 2,133,898 shares at an average cost of \$18.75. As of March 31, 2009, we had \$25.0 million of remaining authorized funds to repurchase additional shares under the stock repurchase programs. Additionally, for the three months ended March 31, 2009, we repurchased 4,138 shares from employees who tendered shares to satisfy tax withholding obligations on the vesting of restricted stock units. For the three months ended March 31, 2008, no shares were repurchased from employees who tendered shares to satisfy tax withholding obligation on the vesting of restricted stock units.

Note 4. Stock Option Plans and Share-Based Compensation**Stock Option Plans**

As of March 31, 2009, we had three active stock option plans including the 1999 Equity Incentive Plan, or 1999 Plan, the 2003 Equity Incentive Plan, or 2003 Plan, and the 2004 Equity Incentive Plan, or 2004 Plan, and collectively, the Plans. At March 31, 2009, total shares of common stock reserved for future issuance were 2,210,481 shares under the 1999 Plan, 111,495 shares under the 2003 Plan, and 200,000 shares under the 2004 Plan, for total shares available for grant under the Plans of 2,521,976 shares. At March 31, 2009, \$7.3 million of total unrecognized compensation cost related to non-vested stock options is expected to be recognized over a weighted average period of 2.8 years.

A summary of option activity under the Plans for the three months ended March 31, 2009 is presented below:

Options:	Number of Shares (in thousands)	Weighted- Average Exercise Price
Outstanding at December 31, 2008	4,711	\$ 13.45
Granted	464	\$ 7.95
Exercised	(14)	\$ 5.43

Edgar Filing: OMNICELL, Inc - Form 10-Q

Forfeited	(146)	\$	16.64
Expired	(36)	\$	12.50
Outstanding at March 31, 2009	4,979	\$	12.87
Exercisable at March 31, 2009	3,436	\$	11.99

In March 2009, our Board approved the 2009 Equity Incentive Plan, subject to stockholder approval at the Company's 2009 Annual Meeting to be held on May 19, 2009, which, if approved, will be the successor to and continuation of the 1999 Plan, 2003 Plan and 2004 Plan. All outstanding stock awards granted under the Plans will continue to be subject to the terms and conditions as set forth in the agreements evidencing such stock awards and the terms of the Plans but no additional awards will be granted under any of the Plans after May 19, 2009, if the proposal to adopt the 2009 Equity Incentive Plan is approved.

Table of Contents**Restricted Stock and Restricted Stock Units**

The non-employee members of our Board of Directors are granted restricted stock on the day of our annual meeting of stockholders and such shares of restricted stock vest on the date of the subsequent year's annual meeting of stockholders, provided such non-employee director remains a director on such date. Restricted stock units, or RSUs, are granted to certain of our employees and generally vest over a period of four years and are expensed ratably on a straight-line basis over the vesting period. The fair value of both restricted stock and RSUs granted pursuant to our 1999 Plan is the product of the number of shares granted and the grant date fair value of our common stock as calculated pursuant to the terms of the 1999 Plan. Our unrecognized compensation cost related to nonvested restricted stock at March 31, 2009 is approximately \$0.5 million and is expected to be recognized over a weighted average period of 0.1 years. Expected future compensation expense relating to RSUs outstanding on March 31, 2009 is \$4.7 million over a weighted-average period of 3.0 years. A summary of activity of both restricted stock and RSUs for the three months ended March 31, 2009 is presented below:

	Restricted Stock		Restricted Stock Units	
	Number of Shares (in thousands)	Weighted - Average Grant Date Fair Value Per Share	Number of Shares (in thousands)	Weighted - Average Grant Date Fair Value Per Share
Non-vested, December 31, 2008	41	\$ 11.91	236	\$ 20.11
Granted		\$	81	\$ 8.00
Vested		\$	(10)	\$ 25.41
Forfeited		\$	(23)	\$ 18.85
Non-vested, March 31, 2009	41	\$ 11.91	284	\$ 16.59

Employee Stock Purchase Plan

We have an Employee Stock Purchase Plan, or ESPP, under which employees can purchase shares of our common stock based on a percentage of their compensation, but not greater than 15% of their earnings, up to a maximum of \$25,000 of fair value per year. The purchase price per share must be equal to the lower of 85% of the fair value of the common stock at the beginning of a 24-month offering period or the end of each six-month purchasing period. As of March 31, 2009, 2,331,555 shares had been issued under the ESPP. As of March 31, 2009, there were a total of 377,574 shares reserved for future issuance under the ESPP. During the three months ended March 31, 2009, 215,698 shares of common stock were purchased under the ESPP.

In March 2009, the Board approved an amendment to the ESPP, subject to stockholder approval at the Company's 2009 Annual Meeting to be held on May 19, 2009, to, among other things, increase the number of shares of common stock authorized for purchase to an aggregate total of 3,000,000 shares.

Share-based Compensation

Edgar Filing: OMNICELL, Inc - Form 10-Q

We have adopted the provisions of SFAS No. 123(R), Share-Based Payment, or SFAS No. 123(R), for share-based awards granted to employees and directors including employee stock option awards, restricted stock and RSUs issued pursuant to the Plans and employee stock purchases made under our ESPP using the estimated grant date fair value method of accounting in accordance with SFAS No. 123(R).

The impact on our results for share-based compensation for the three months ended March 31, 2009 and 2008 was as follows (in thousands):

	Three Months Ended March 31,			
	2009		2008	
Cost of product and services	\$	379	\$	510
Research and development		266		312
Selling, general and administrative		1,839		2,245
Total share-based compensation expense	\$	2,484		3,067

We value options and ESPP shares using the Black-Scholes-Merton option-pricing model.

Table of Contents

Note 5. Inventories

Edgar Filing: OMNICELL, Inc - Form 10-Q

Inventories consist of the following (in thousands):

	March 31, 2009		December 31, 2008	
Raw materials	\$	7,462	\$	7,714
Work in process		21		
Finished goods		3,351		5,243
Total	\$	10,834	\$	12,957

Note 6. Net Investment in Sales-Type Leases

Edgar Filing: OMNICELL, Inc - Form 10-Q

Our sales-type leases are for terms generally ranging up to five years. Sales-type lease receivables are collateralized by the underlying equipment. The components of our net investment in sales-type leases are as follows (in thousands):

	March 31, 2009	December 31, 2008
Net minimum lease payments to be received	\$ 16,549	\$ 17,899
Less unearned interest income portion	2,261	2,575
Net investment in sales-type leases	14,288	15,324
Less current portion(1)	4,493	4,428
Non-current net investment in sales-type leases(2)	\$ 9,795	\$ 10,896

The minimum lease payments under sales-type leases as of March 31, 2009 are as follows (in thousands):

2009 (remaining amount)	\$ 4,274
2010	5,354
2011	4,026
2012	2,276
2013	605
Thereafter	14
Total	\$ 16,549

(1) A component of other current assets.

(2) Net of allowance for doubtful accounts of \$0.3 million as of March 31, 2009 and \$0.3 million as of December 31, 2008.

Note 7. Goodwill and Other Intangible Assets

Edgar Filing: OMNICELL, Inc - Form 10-Q

Under SFAS No. 142 Goodwill and Other Intangible Assets, goodwill is not subject to amortization. Rather, we evaluate goodwill for impairment at least annually or more frequently if events and changes in circumstances suggest that the carrying amount may not be recoverable.

Edgar Filing: OMNICELL, Inc - Form 10-Q

Table of Contents

Goodwill and other intangible assets consist of the following (in thousands):

	March 31, 2009			December 31, 2008			Amortization Life
	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount	
Indefinite-lived intangible:							
Trade name	\$ 231	\$	\$ 231	\$ 231	\$	\$ 231	Indefinite
Finite-lived intangibles:							
Customer base	3,184	723	2,461	3,184	631	2,553	5-8 years

Deferred rent	875	756
Taxes payable	761	333
Accrued professional fees	799	195
Other	39	52
Total	\$ 11,184	\$ 10,187

Table of Contents

Note 10. Commitments

Edgar Filing: OMNICELL, Inc - Form 10-Q

The following table summarizes our contractual obligations at March 31, 2009 (in thousands):

	Total	Less than one year	One to three years	Three to five years	More than five years
Operating leases(1)	\$ 10,671	\$ 3,495	\$ 6,418	\$ 758	\$
Commitments to contract manufacturers and suppliers(2)	3,325	3,325			
Total	\$ 13,996	\$ 6,820	\$ 6,418	\$ 758	\$

(1) Commitments under operating leases relate primarily to leasehold property and office equipment

(2) We purchase components from a variety of suppliers and use contract manufacturers to provide manufacturing services for our products. During the normal course of business, we issue purchase orders with estimates of our requirements several months ahead of the delivery dates. We record a liability for firm, non-cancelable, and unconditional purchase commitments.

Note 11. Legal Proceedings

Edgar Filing: OMNICELL, Inc - Form 10-Q

On February 20, 2007, we were served with the third amended petition in a lawsuit entitled Alcala, et al. v. Cardinal Health, Inc., et al., case number 2006 09-4487-G, which named Omnicell as a defendant. This lawsuit was filed in the District Court of Cameron County, Texas. On January 22, 2009, the plaintiffs filed a notice of non-suit with the court dismissing all claims and causes of actions against Omnicell. Omnicell made no payments or admissions in connection with such dismissal.

On December 11, 2007, we acquired Rioux Vision, Inc., which had an existing lawsuit in progress at the time of that acquisition. Omnicell is now defending that lawsuit, as Rioux Vision is a wholly-owned subsidiary of Omnicell. On October 26, 2006, Rioux Vision was served with a complaint in a lawsuit entitled Flo Healthcare Solutions, LLC v. Rioux Vision, Inc., Case Number 1:06-cv-02600, in the United States District Court for the Northern District of Georgia, alleging claims of patent infringement regarding certain features of the mobile carts sold by Rioux Vision. On December 11, 2008, we were served with a complaint in a lawsuit entitled Flo Healthcare Solutions, LLC v. Omnicell, Inc., Case Number 1:06-cv-02600, in the same Court alleging similar claims of patent infringement regarding Omnicell's sale of the mobile carts acquired in the Rioux acquisition. In relation to this lawsuit and in accordance with SFAS No. 141, Business Combinations, we included a pre-acquisition contingency based on our assessment of its fair value in our preliminary purchase price allocation. The fair value for this pre-acquisition contingency represents the amount we and Rioux agreed to adjust the purchase price as a result of our acceptance of any and all costs and risks relating to this contingency. The pre-acquisition contingency was recorded as an accrued liability as of the acquisition date and is recorded as of March 31, 2009. While we cannot predict the outcome of this matter, there can be no assurance should an unfavorable outcome arise, that such outcome would not have a material adverse effect on our financial position, results of operations or cash flows.

On March 4, 2009, we filed, but did not serve, a complaint against Flo entitled Omnicell, Inc. v. Flo Healthcare Solutions LLC, Case Number C09 00923, in the United States District Court for the Northern District of California, with respect to the infringement of Omnicell's U.S. Patent Number 6,604,019. Flo has received a courtesy copy of the complaint. On March 10, 2009, we consented to a motion that Flo filed requesting a stay of the Flo Healthcare Solutions LLC v. Rioux Vision, Inc. lawsuit pending the final outcome, including all appeals, of the inter partes reexamination 95/000,251 of U.S. Patent No. 6,721,178, currently before the United States Patent and Trademark Office (the Reexamination), which was granted. We consented to a similar motion filed by Flo with respect to the stay of the Flo Healthcare Solutions LLC v. Omnicell, Inc. lawsuit, which was also granted. Under a tolling agreement between the parties, we agreed to dismiss without prejudice the Omnicell, Inc. v. Flo Healthcare Solutions LLC lawsuit, and Omnicell and Flo agreed to toll further actions under all three lawsuits pending the final outcome, including all appeals, of the Reexamination.

On September 30, 2008, pursuant to the terms of that certain Stock Purchase Agreement by and among Omnicell, Inc., Rioux Vision, Inc., and Shawn Rioux, dated November 29, 2007, we initiated a formal claim for arbitration against Mr. Rioux with respect to Omnicell's claims for indemnification relating to a breach of certain representations and warranties under the Stock Purchase Agreement, as well as with respect to an adjustment of the final working capital of Rioux Vision. The arbitration took place on April 8, 2009. The parties are currently awaiting a decision by the arbitrator.

Table of Contents

Note 12. Restructuring

Edgar Filing: OMNICELL, Inc - Form 10-Q

During the first quarter of 2009, we instituted a restructuring plan whereby we reduced our headcount from 844 full-time employees at December 31, 2008 to 756 full-time employees at March 31, 2009 to balance our expenses with the reduced sales and installations volume. The restructuring plan accounted for a reduction in 103 employees, which was partially offset by hiring for newly created positions during the quarter. Affected employees were eligible for a severance package that included severance pay, continuation of benefits and outplacement services. We recorded a charge of \$2.5 million in the first quarter of 2009 in connection with the restructuring. We do not expect to incur any additional charges associated with this restructuring beyond the first quarter of 2009 and we expect to pay substantially all of the accrued severance costs by the end of 2009.

A summary of the restructuring activity during the three months ended March 31, 2009 are as follows (in thousands):

	Severance Costs	
Balance of accrual as of December 31, 2008	\$	
Charges		2,524
Payments		(1,945)
Balance of accrual as of March 31, 2009	\$	579

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Forward-Looking Statements

This Quarterly Report on Form 10-Q contains forward-looking statements. The forward looking statements are contained principally in the sections entitled "Risk Factors" and "Management's Discussion and Analysis of Financial Condition and Results of Operations." These statements involve known and unknown risks, uncertainties and other factors which may cause our actual results, performance or achievements to be materially different from any future results, performances or achievements expressed or implied by the forward-looking statements. Forward-looking statements include, but are not limited to, statements about:

- the extent and timing of future revenues;
- the size and/or growth of our market or market-share;
- the opportunity presented by new products or emerging markets;
- the operating margins or earnings per share goals we may set;
- our ability to protect our intellectual property and operate our business without infringing upon the intellectual property rights of others; and
- our estimates regarding the sufficiency of our cash resources.

In some cases, you can identify forward-looking statements by terms such as "anticipates," "believes," "could," "estimates," "expects," "intends," "may," "potential," "predicts," "projects," "should," "will," "would" and similar expressions intended to identify forward-looking statements. Forward-looking statements reflect our current views with respect to future events, are based on assumptions, and are subject to risks and uncertainties. We discuss many of these risks in this Quarterly Report on Form 10-Q in greater detail in Part II "Section 1A. Risk Factors" below. Given these uncertainties, you should not place undue reliance on these forward-looking statements. Also, forward-looking statements represent our estimates and assumptions only as of the date of this Quarterly Report on Form 10-Q. You should also read our Annual Report on Form 10-K and the documents that we reference in the Annual Report on Form 10-K and have filed as exhibits, completely and with the understanding that our actual future results may be materially different from what we expect. All references in this report to "Omnicell, Inc.," "Omnicell," "our," "us," "we" or the "Company" collectively refer to Omnicell, Inc., a Delaware corporation, and its subsidiaries.

Except as required by law, we assume no obligation to update any forward-looking statements publicly, or to update the reasons actual results could differ materially from those anticipated in any forward-looking statements, even if new information becomes available in the future.

Overview

Edgar Filing: OMNICELL, Inc - Form 10-Q

We were incorporated in California in 1992 under the name Omnicell Technologies, Inc. and reincorporated in Delaware in 2001 as Omnicell, Inc. We are a leading provider of medication control and patient safety solutions which enhance operational efficiency and patient care for acute care health facilities. Approximately 1,200 hospitals have installed our automated hardware/software solutions for controlling, dispensing, acquiring, verifying and tracking medications and medical/surgical supplies. We have designed our products to enable healthcare professionals to improve patient safety through reduced medication errors and improved administrative controls, while simultaneously improving workflow and increasing operational efficiency. Our products are designed to allow nurses, pharmacists and other clinicians to spend more time on patient care while at the same time providing confirmation that the right patients are receiving the right medication, at the right time, in the right dose, via the right route.

Table of Contents

We sell our medication dispensing and supply automation systems primarily in the United States. Substantially all of our revenue is generated in the United States. However, we have seen an increase in our revenue from our international operations and we expect such revenue from our international operations to increase in future periods as we continue to grow our international business. Our sales force is organized by geographic region in the United States and Canada. We also sell through distributors in Asia, Australia, Europe, and South America. We have not sold and have no future plans to sell our products either directly or indirectly to customers located in countries that are identified as state sponsors of terrorism by the U.S. Department of State, and are subject to economic sanctions and export controls.

We operate in one business segment, the design, manufacturing, selling and servicing of medication and supply dispensing systems. Our management team evaluates our profit performance based on company-wide, consolidated results. In general, we recognize revenue when our systems are installed. Installation generally takes place two weeks to nine months after our systems are ordered for all our products except Mobile Carts. Installation of Mobile Carts takes place one to three months after the order is received. The installation process at our customers sites includes internal procedures associated with large capital expenditures and time associated with adopting new technologies. Given the length of time necessary for our customers to plan for and complete the installation of our systems, our focus is on shipping products based on the installation dates requested by our customers and working at the customer's pace. The amount of revenue recognized in future periods may depend on, among other things, the terms and timing of lease contract renewals, additional product sales and the size of such transactions. We believe that future revenue will be affected by the competitiveness of our products and services.

Operating Environment During the Three Months Ended March 31, 2009

Edgar Filing: OMNICELL, Inc - Form 10-Q

Our business has experienced a decline in revenue year over year caused by general economic conditions driving a decline in our customers demand for and their ability to purchase new automation solutions. Revenue declined 15.9% from \$62.1 million during the three months ended March 31, 2008 to \$52.2 million during the three months ended March 31, 2009. Notwithstanding our recent revenue decline, we believe our solutions remain attractive relative to our competition. In particular:

- We continue to differentiate ourselves through a strategy intended to create the best customer experience in healthcare;
- We deliver industry-leading products with differentiated product features that are designed to appeal to nurses and pharmacists; and
- Our solutions provide patient safety levels that are demanded in today's medical facilities by both regulatory agencies and patients.

During the first quarter of 2009, we instituted a restructuring plan whereby we reduced our headcount from 844 full-time employees at December 31, 2008 to 756 full-time employees at March 31, 2009 to balance our expenses with the reduced sales and installations volume. The restructuring plan accounted for a reduction of 103 employees, which was partially offset by hiring for newly created positions during the quarter. Net cash used in operating activities totaled \$1.7 million during the three months ended March 31, 2009. Our ability to grow revenue and maintain positive cash flow is dependent on our ability to continue to receive orders from customers, the volume of installations we are able to complete, our ability to meet customers' needs and provide a quality installation experience and our flexibility in manpower allocations among customers to complete installations on a timely basis.

Our overall gross margin declined to 45.6% for the quarter ended March 31, 2009 as compared to 52.1% for the quarter ended March 31, 2008, primarily due to the absorption of fixed costs over a smaller revenue base, declines in our service margins and one time restructuring charges. We believe that our gross margins will continue to fluctuate based on the mix of products sold and the related costs and changes in sales and installation headcount compared to our revenue level.

We maintain a development staff with expertise in hospital logistics and computerized automated solutions which allows us to regularly deliver new innovations to the market. In 2008 we began shipping our SinglePointe solution, which allows pharmacists to automate the distribution of specially handled medications and present market opportunities to reduce errors and provide a more efficient workflow for clinicians. During the first quarter of 2009, we introduced the Omnicell Tissue Center system which enables surgical personnel to keep tissue specimens secure, including procurement, processing and preserving of the tissue and also to maintain detailed history records. We believe these new products coupled with enhancements to products we intend to deliver in 2009, along with other patient safety and clinical workflow solutions, will continue to differentiate us in the marketplace.

Table of Contents

Critical Accounting Policies and Estimates

Edgar Filing: OMNICELL, Inc - Form 10-Q

Our discussion and analysis of our financial condition and results of operations are based on our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of these financial statements requires us to make certain estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of any contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. We regularly review our estimates and assumptions, which are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of certain assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates and assumptions. We believe that the following critical accounting policies are affected by significant judgments and estimates used in the preparation of our condensed consolidated financial statements:

- Revenue recognition;
- Provision for reserves;
- Valuation and impairment of goodwill, other intangible assets and other long lived assets;
- Inventory;
- Valuation of share-based awards; and
- Accounting for income taxes.

During the three months ended March 31, 2009, there were no significant changes in our critical accounting policies and estimates. Please refer to Management's Discussion and Analysis of Financial Condition and Results of Operations contained in Part II, Item 7 of our Annual Report on Form 10-K for the year ended December 31, 2008 for a more complete discussion of our critical accounting policies and estimates.

Recent Issued and Adopted Accounting Pronouncements

Edgar Filing: OMNICELL, Inc - Form 10-Q

In April 2009, the Financial Accounting Standards Board (FASB) issued three related Staff Positions (FSP): (i) FSP 157-4, Determining Fair Value When the Volume and Level of Activity for the Asset or Liability have Significantly Decreased and Identifying Transactions That Are Not Orderly, or FSP FAS 157-4, (ii) FAS 115-2 and FAS 124-2, Recognition and Presentation of Other-Than-Temporary Impairments, or FSP FAS 115-2 and (iii) FAS 107-1 and APB 28-1, Interim Disclosures about Fair Value of Financial Instruments, or FSP FAS 107-1, which will be effective for interim and annual periods ending after June 15, 2009. FSP FAS 157-4 provides guidance on how to determine the fair value of assets and liabilities under SFAS No. 157 in the current economic environment and reemphasizes that the objective of a fair value measurement remains an exit price. If we were to conclude that there has been a significant decrease in the volume and level of activity of the asset or liability in relation to normal market activities, quoted market values may not be representative of fair value and we may conclude that a change in valuation technique or the use of multiple valuation techniques may be appropriate. FSP FAS 115-2 modifies the requirements for recognizing other-than-temporarily impaired debt securities and revise the existing impairment model for such securities, by modifying the current intent and ability indicator in determining whether a debt security is other-than-temporarily impaired. FSP 107-1 enhances the disclosure of instruments under the scope of SFAS No. 157 for both interim and annual periods. We are currently evaluating these Staff Positions but do not currently expect them to have a material impact on our consolidated financial statements.

In April 2009, the FASB issued FSP No. 141(R)-1 Accounting for Assets Acquired and Liabilities Assumed in a Business Combination That Arise from Contingencies, or FSP FAS 141(R)-1. FSP FAS 141(R)-1 amends the provisions in SFAS No. 141(R), Business Combinations, for the initial recognition and measurement, subsequent measurement and accounting, and disclosures for assets and liabilities arising from contingencies in business combinations. The FSP eliminates the distinction between contractual and non-contractual contingencies, including the initial recognition and measurement criteria in SFAS No. 141(R) and instead carries forward most of the provisions in SFAS No. 141 for acquired contingencies. FSP FAS 141(R)-1 is effective for contingent assets and contingent liabilities acquired in business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008. We do not expect FSP FAS 141(R)-1 will have an impact on our consolidated financial statements unless and until we complete a business combination.

Table of Contents

Results of Operations

Edgar Filing: OMNICELL, Inc - Form 10-Q

The table below shows the components of our results of operations as percentages of total revenues for the three months ended March 31, 2009 and 2008:

	2009	Three Months Ended March 31, % of Revenue		2008	% of Revenue
	(in thousands, except for percentages)				
Revenues:					
Product revenues	\$ 42,295	81.0%	\$	52,415	84.4%
Services and other revenues	9,909	19.0%		9,675	15.6%
Total revenues	52,204	100.0%		62,090	100.0%
Cost of revenues:					
Cost of product revenues	20,280	38.9%		23,970	38.6%
Cost of services and other revenues	6,895	13.2%		5,776	9.3%
Restructuring charges	1,209	2.3%			%
Total cost of revenues	28,384	54.4%		29,746	47.9%
Gross profit	23,820	45.6%		32,344	52.1%
Operating expenses:					
Research and development	3,977	7.6%		4,276	6.9%
Selling, general and administrative	21,499	41.2%		23,207	37.4%
Restructuring charges	1,315	2.5%			%
Total operating expenses	26,791	51.3%		27,483	44.3%
Income (loss) from operations	(2,971)	(5.7)%		4,861	7.8%
Interest and other income (expense), net	182	0.3%		1,410	2.3%
Income (loss) before provision for (benefit from) income taxes	(2,789)	(5.4)%		6,271	10.1%
Provision for (benefit from) income taxes	(918)	(1.8)%		2,538	4.1%
Net income (loss)	\$ (1,871)	(3.6)%	\$	3,733	6.0%

Product Revenues, Cost of Product Revenues, Restructuring Charges and Gross Profit

Edgar Filing: OMNICELL, Inc - Form 10-Q

The table below shows our product revenues, cost of product revenues, restructuring charges and gross profit for the three months ended March 31, 2009 and 2008 and the percentage change between those quarters:

	2009	Three Months Ended March 31, 2008		% Change
	(in thousands, except for percentages)			
Product revenues	\$ 42,295	\$	52,415	(19.3)%
Cost of product revenues	20,280		23,970	(15.4)%
Restructuring charges	1,008			%
Gross profit	\$ 21,007	\$	28,445	(26.1)%

Product revenues decreased \$10.1 million, or 19.3% in the three months ended March 31, 2009 as compared to the same period in 2008. The decrease in product revenue was due to a decrease in the number of installations of medication and supply automation systems and pharmacy central products. This decrease in product volume year over year reflects the current global economic downturn and the consequent capital investment constraints and longer sales cycle by our customers.

Edgar Filing: OMNICELL, Inc - Form 10-Q

Cost of product revenues decreased by \$3.7 million, or 15.4% in the three months ended March 31, 2009 as compared to the same period in 2008. The decrease was primarily due to the reduction in product revenue resulting in a \$3.6 million decrease in direct material cost and a decrease in our spending of \$0.1 million, excluding restructuring charges.

Restructuring charges of \$1.0 million were recorded to cost of product revenue relating to our work force reduction during the first quarter of 2009. Costs recorded related primarily to severance pay, continuation of benefits and outplacement services. As part of the restructuring we reduced headcount by 50 employees in predominately manufacturing and field operations departments.

Table of Contents

Gross profit on product revenue decreased by \$7.4 million, or 26.1% in the three months ended March 31, 2009 as compared to the same period in 2008. The decrease in gross profit on product revenue for the three months ended March 31, 2009 was primarily a result of lower product revenues, higher absorption of fixed costs and restructuring charges related to our work force reduction.

Service and Other Revenues, Cost of Service and Other Revenues, Restructuring Charges and Gross Profit

Edgar Filing: OMNICELL, Inc - Form 10-Q

The table below shows our service and other revenues, cost of service and other revenues, restructuring charges and gross profit for the three months ended March 31, 2009 and 2008 and the percentage change between those quarters:

	2009	Three Months Ended March 31,		% Change
		2008	(in thousands, except for percentages)	
Service and other revenues	\$ 9,909	\$ 9,675		2.4%
Cost of service and other revenues	6,895	5,776		19.4%
Restructuring charges	201			%
Gross profit	\$ 2,813	\$ 3,899		(27.9)%

Service and other revenues include revenues from service and maintenance contracts, rentals of automation systems, installation of selected product lines, training and professional services. Service and other revenues increased by \$0.2 million, or 2.4% in the three months ended March 31, 2009 as compared to the same period in 2008. The modest increase in service and other revenues was primarily the result of the normal increase in service contract revenue from new installations, offset primarily by the expiration of service contracts related to end of life products.

Cost of service and other revenues increased by \$1.1 million, or 19.4% in the three months ended March 31, 2009 as compared to the same period in 2008. The increase was primarily due to \$0.5 million increase in material costs and a \$0.6 million increase in labor and support costs.

Restructuring charges of \$0.2 million were recorded to cost of service revenue relating to our work force reduction during the first quarter of 2009. As part of the restructuring we reduced headcount by 10 employees in field, customer and technical service departments. Costs recorded related primarily to severance pay, continuation of benefits and outplacement services.

Gross profit on service and other revenues decreased by \$1.1 million, or 27.9% in the three months ended March 31, 2009 as compared to the same period in 2008. The decrease in gross profit on service and other revenues was a combination of the modest increase in revenue, which was affected by the non-renewal of service contracts for end of life products, as well as certain non-recurring revenue adjustments, offset by investments in service infrastructure, the higher consumption of material costs and \$0.2 million in restructuring charges. We expect our gross profit on service and other revenues to gradually increase in 2009 as our cost structure is aligned to our current revenue levels.

Operating Expenses

Edgar Filing: OMNICELL, Inc - Form 10-Q

	Three Months Ended March 31,		
	2009	2008	% Change
	(in thousands, except for percentages)		
Research and development	\$ 3,977	\$ 4,276	(7.0)%
Selling, general and administrative	21,499	23,207	(7.4)%
Restructuring charges	1,315		%
Total operating expenses	\$ 26,791	\$ 27,483	(2.5)%

Research and Development. Research and development expenses decreased by \$0.3 million, or 7.0% in the three months ended March 31, 2009 as compared to the same period in 2008. Research and development expenses represented 7.6% and 6.9% of total revenues in the three months ended March 31, 2009 and 2008, respectively. The decrease was due primarily to \$0.6 million increase in capitalization of software development spending, offset by \$0.4 million increased support costs.

Table of Contents

We expect research and development expenses to remain at the current percent of revenue or increase slightly based on our revenue level and grow in absolute dollars in the future as our revenue grows to improve and enhance our existing technologies and to create new technologies in health care automation.

Selling, General and Administrative. Selling, general and administrative expenses decreased by \$1.7 million, or 7.4% in the three months ended March 31, 2009 as compared to the same period in 2008. Selling, general and administrative expenses represented 41.2% and 37.4% of total revenues in the three months ended March 31, 2009 and 2008, respectively. The decrease was due primarily to \$0.7 million decrease in group purchasing organization fees from lower sales volume, \$0.4 million in lower headcount related costs after the reduction in force and \$0.4 million in lower support costs.

We expect selling, general and administrative expenses to stabilize in absolute dollars as we believe that we have aligned our cost structure to the current economic and market environments.

Restructuring charges. In the first quarter of 2009, we recorded \$1.3 million related to our work force reduction. As part of this restructuring, we reduced our headcount by 12 employees in research and development, and 31 employees in selling, general and administrative positions. Costs recorded related primarily to severance pay, continuation of benefits and outplacement services.

Provision for Income Taxes

Edgar Filing: OMNICELL, Inc - Form 10-Q

For the three months ended March 31, 2009 we recorded an income tax benefit of \$0.9 million as compared with income tax expense of \$2.5 million for the same period in 2008. The effective tax rate benefit for the three months ended March 31, 2009 was 32.9%, as compared to an effective tax rate of 40.5% for the same period in 2008. The income tax benefit recorded for the three months ended March 31, 2009 is a result of the book loss recorded for the three months ended March 31, 2009 partially offset by the re-measurement of our California deferred tax assets due to the enactment of California tax legislation. As of March 31, 2009 and 2008, the estimated annual effective tax rates before discrete items were 41.1% and 42.6%. The estimated annual effective rates for both periods differ from the statutory rate of 35.0% due to the impact of certain non-deductible stock compensation charges under SFAS No. 123(R), state income taxes and research and development credits.

In February 2009, California enacted a law change which allows an elective single sales factor apportionment for taxable years beginning on or after January 1, 2011. We expect to benefit from the California single sales factor election. In accordance with SFAS No. 109, Accounting for Income Taxes, we have re-measured our deferred tax assets, taking into account the reversal pattern and the expected California tax rate under the elective single sales factor. As a result of this change, we recorded a decrease to our California deferred tax assets by \$0.2 million which resulted in a discrete income tax expense of \$0.2 million for the three months ended March 31, 2009.

Liquidity and Capital Resources

Edgar Filing: OMNICELL, Inc - Form 10-Q

We had cash and cash equivalents of \$118.9 million at March 31, 2009, as compared to \$120.4 million at December 31, 2008. All of our cash is in low risk short term money market funds or demand deposits. We have no long term investments. We believe our current cash and cash equivalent balances and cash flows generated by operations will be sufficient to satisfy our anticipated cash needs for working capital and capital expenditures for at least the next twelve months.

Cash Flows

Edgar Filing: OMNICELL, Inc - Form 10-Q

Operating activities used \$1.7 million of cash during the three months ended March 31, 2009, as compared to generating \$11.0 million for the three months ended March 31, 2008. There were two primary contributors to the decrease in cash from operations: first, our billings were lower as a result of decreased shipments during the quarter; and second, delayed first quarter billings during the implementation of our new enterprise accounting system, which also resulted in lower cash collections occurring in the quarter. Such billing delays are not expected to be a factor in future quarters.

We used \$1.6 million of cash for investing activities during the three months ended March 31, 2009, a decrease compared to \$2.4 million for the three months ended March 31, 2008. The decrease was primarily due to lower spending to support our information technology infrastructure since the implementation of our new enterprise accounting system is substantially complete.

Table of Contents

Cash generated in financing activities was \$1.7 million during the three months ended March 31, 2009, as compared to \$35.8 million in cash used during the three months ended March 31, 2008. The cash generated was from exercises of stock options and sales of our common stock under our ESPP. The net cash used in the corresponding period during 2008 was primarily for the repurchase of shares of our common stock with an aggregate value of \$40.0 million, plus brokerage fees.

Contractual Obligations

There have been no material changes to our contractual obligations during the three months ended March 31, 2009. Please refer to our Annual Report on Form 10-K for the year ended December 31, 2008 for a description of our facility leases and contractual obligations and the Notes to the consolidated financial statements included therein.

Off-Balance Sheet Arrangements

As of March 31, 2009, we had no off-balance sheet arrangements as defined under Regulation S-K 303(a)(4) of the Securities Exchange Act of 1934, as amended, and the instructions thereto.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Edgar Filing: OMNICELL, Inc - Form 10-Q

As of March 31, 2009, there were no material changes to our disclosures to market risk from the disclosures set forth under the caption, Quantitative and Qualitative Disclosures About Market Risk in Part II, Item 7A of our Annual Report on Form 10-K for the year ended December 31, 2008.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Our management, with the participation of our principal executive officer and principal financial officer has evaluated the effectiveness of our disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) as of March 31, 2009. Based on such evaluation, our principal executive officer and principal financial officer have concluded that, as of March 31, 2009, our disclosure controls and procedures were effective.

Changes in Internal Control Over Financial Reporting

There were no changes in our internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during the three months ended March 31, 2009 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II OTHER INFORMATION

Item 1. LEGAL PROCEEDINGS

Edgar Filing: OMNICELL, Inc - Form 10-Q

On February 20, 2007, we were served with the third amended petition in a lawsuit entitled Alcala, et al. v. Cardinal Health, Inc., et al., case number 2006 09-4487-G, which named Omnicell as a defendant. This lawsuit was filed in the District Court of Cameron County, Texas. On January 22, 2009, the plaintiffs filed a notice of non-suit with the court dismissing all claims and causes of actions against Omnicell. Omnicell made no payments or admissions in connection with such dismissal.

On December 11, 2007, we acquired Rioux Vision, Inc., which had an existing lawsuit in progress at the time of that acquisition. Omnicell is now defending that lawsuit, as Rioux Vision is a wholly-owned subsidiary of Omnicell. On October 26, 2006, Rioux Vision was served with a complaint in a lawsuit entitled Flo Healthcare Solutions, LLC v. Rioux Vision, Inc., Case Number 1:06-cv-02600, in the United States District Court for the Northern District of Georgia, alleging claims of patent infringement regarding certain features of the mobile carts sold by Rioux Vision. On December 11, 2008, we were served with a complaint in a lawsuit entitled Flo Healthcare Solutions, LLC v. Omnicell, Inc., Case Number 1:06-cv-02600, in the same Court alleging similar claims of patent infringement regarding Omnicell's sale of the mobile carts acquired in the Rioux acquisition.

Table of Contents

On March 4, 2009, we filed, but did not serve, a complaint against Flo entitled Omnicell, Inc. v. Flo Healthcare Solutions LLC, Case Number C09 00923, in the United States District Court for the Northern District of California, with respect to the infringement of Omnicell's U.S. Patent Number 6,604,019. Flo has received a courtesy copy of the complaint. On March 10, 2009, we consented to a motion that Flo filed requesting a stay of the Flo Healthcare Solutions LLC v. Rioux Vision, Inc. lawsuit pending the final outcome, including all appeals, of the inter partes reexamination 95/000,251 of U.S. Patent No. 6,721,178, currently before the United States Patent and Trademark Office (the Reexamination), which was granted. We consented to a similar motion filed by Flo with respect to the stay of the Flo Healthcare Solutions LLC v. Omnicell, Inc. lawsuit, which was also granted. Under a tolling agreement between the parties, we agreed to dismiss without prejudice the Omnicell, Inc. v. Flo Healthcare Solutions LLC lawsuit, and Omnicell and Flo agreed to toll further actions under all three lawsuits pending the final outcome, including all appeals, of the Reexamination

On September 30, 2008, pursuant to the terms of that certain Stock Purchase Agreement by and among Omnicell, Inc., Rioux Vision, Inc., and Shawn Rioux, dated November 29, 2007, we initiated a formal claim for arbitration against Mr. Rioux with respect to Omnicell's claims for indemnification relating to a breach of certain representations and warranties under the Stock Purchase Agreement, as well as with respect to an adjustment of the final working capital of Rioux Vision. The arbitration took place on April 8, 2009. The parties are currently awaiting a decision by the arbitrator.

Item 1A. RISK FACTORS

Edgar Filing: OMNICELL, Inc - Form 10-Q

We have identified the following risks and uncertainties that may have a material adverse effect on our business, financial condition or results of operations. Our business faces significant risks and the risks described below may not be the only risks we face. Additional risks not presently known to us or that we currently believe are immaterial may also significantly impair our business operations. If any of these risks occur, our business, results of operations or financial condition could suffer and the market price of our common stock could decline. We have marked with an asterisk (*) those risk factors below that reflect substantive changes from the risk factors included in our Annual Report on Form 10-K for the year ended December 31, 2008, filed with the Securities and Exchange Commission on February 24, 2009.

The medication management and supply chain solutions market is highly competitive and we may be unable to compete successfully against new entrants and established companies with greater resources.

The medication management and supply chain solutions market is intensely competitive. We expect continued and increased competition from current and future competitors, many of which have significantly greater financial, technical, marketing and other resources than we do. Our current direct competitors in the medication management and supply chain solutions market include Pyxis Corporation (a division of Cardinal Health, Inc.), McKesson Automation Inc. (a business unit of McKesson Corporation), AmerisourceBergen Corporation (through its acquisition of MedSelect, Inc. and Automed), Talyst, Cerner Corporation, Emerson Electronic Co. and Stinger Medical, InfoLogix, Inc. Ergotron, Inc., Artromick International, Inc., and Rubbermaid Medical Solutions (a business unit of Newell Rubbermaid Inc).

The competitive challenges we face in the medication management and supply chain solutions market include, but are not limited to, the following:

- our competitors may develop, license or incorporate new or emerging technologies or devote greater resources to the development, promotion and sale of their products and services;
- certain competitors have greater brand name recognition and a more extensive installed base of medication and supply dispensing systems or other products and services than we do, and such advantages could be used to increase their market share;
- other established or emerging companies may enter the medication management and supply chain solutions market;
- current and potential competitors may make strategic acquisitions or establish cooperative relationships among themselves or with third parties, including larger, more established healthcare supply companies, thereby increasing their ability to develop and offer products and services to address the needs of our prospective customers; and
- our competitors may secure products and services from suppliers on more favorable terms or secure exclusive arrangements with suppliers or buyers that may impede the sales of our products and services.

Table of Contents

Competitive pressures could result in increased price competition for our products and services, fewer customer orders and reduced gross margins, any of which could harm our business.

Changing customer requirements could decrease the demand for our products and services.

The medication management and supply chain solutions market is characterized by evolving technologies and industry standards, frequent new product introductions and dynamic customer requirements that may render existing products obsolete or less competitive. As a result, our position in the medication management and supply chain solutions market could erode rapidly due to unforeseen changes in the features and functions of competing products, as well as the pricing models for such products. Our future success will depend in part upon our ability to enhance our existing products and services and to develop and introduce new products and services to meet changing customer requirements. The process of developing products and services such as those we offer is extremely complex and is expected to become increasingly more complex and expensive in the future as new technologies are introduced. If we are unable to enhance our existing products or develop new products to meet changing customer requirements, demand for our products could decrease.

Unfavorable economic and market conditions and a lessening demand in the capital equipment and information system markets could adversely affect our operating results.

Our operating results have been and may continue to be adversely affected by unfavorable global economic and market conditions, foreign exchange fluctuations, as well as a lessening demand in the capital equipment and information system markets. Customer demand for our products is intrinsically linked to the strength of the economy. A reduction in demand for capital equipment and information systems caused by weak and/or deteriorating economic conditions and decreases in corporate and government spending, deferral or delay of capital equipment and information system projects, longer time frames for capital equipment and information system purchasing decisions and generally reduced expenditures for capital and information systems solutions will result in decreased revenues and lower revenue growth rates for us and our operating results could be materially and adversely affected.

Due to the tightening credit market and lack of available credit opportunities, some of our customers may experience more difficulty in securing funds to purchase our products, which could adversely affect the demand for our products.

Many of the products we sell and lease to our customers are capital equipment, and many of those customers finance their large capital equipment purchases or leases with funds secured from third-party lenders. The deterioration in the general economic climate and in the credit market could make it more difficult for our customers to secure financing on large capital equipment transactions such as ours. To the extent the tightening in the credit market results in difficulty for our customers in financing purchases or leases of our products, demand for our products could decline.

Any reduction in the demand for or adoption of our medication and supply dispensing systems and related services would reduce our revenues.

Edgar Filing: OMNICELL, Inc - Form 10-Q

Our medication and supply dispensing systems represent only one approach to managing the distribution of pharmaceuticals and supplies at healthcare facilities. Healthcare facilities still use traditional approaches that do not include automated methods of medication and supply dispensing management. As a result, we must continuously educate existing and prospective customers about the advantages of our products. Our medication and supply dispensing systems typically represent a sizeable initial capital expenditure for healthcare organizations. Changes in the budgets of these organizations and the timing of spending under these budgets can have a significant effect on the demand for our medication and supply dispensing systems and related services. In addition, these budgets are often supported by cash flows that can be negatively affected by declining investment income, and influenced by limited resources, increased operational and financing costs, macroeconomic conditions such as unemployment rates and conflicting spending priorities among different departments. Any decrease in expenditures by healthcare facilities could decrease demand for our medication and supply dispensing systems and related services and reduce our revenues.

Table of Contents

Our current and potential customers may have other business relationships with our competitors and consider those relationships when deciding between our products and services and those of our competitors.

Many of our competitors are large companies that sell a variety of products and services into the healthcare market to our current and potential customers. As a result, if a customer is a customer of one of these competitors, the customer may be motivated to purchase medication and supply dispensing systems or other automation solutions from our competitor in order to maintain or enhance their business relationship with that competitor.

If we experience delays in or loss of sales of, delays in installations of, or delays in the recognition of revenue associated with our medication and supply dispensing systems, our competitive position, results of operations and financial condition could be harmed.

The purchase of our medication and supply dispensing systems is often part of a customer's larger initiative to re-engineer its pharmacy, distribution and materials management systems. As a result, the purchase of our medication and supply dispensing systems often entail larger strategic purchases by customers that frequently require more complex and stringent contractual requirements and generally involves a significant commitment of management attention and resources by prospective customers. These larger and more complex transactions often require the input and approval of many decision-makers, including pharmacy directors, materials managers, nurse managers, financial managers, information systems managers, administrators, lawyers and boards of directors. For these and other reasons, the sales cycle associated with the sale of our medication and supply dispensing systems is often lengthy and subject to a number of delays over which we have little or no control. A delay in, or loss of, sales of our medication and supply dispensing systems could have an adverse affect upon our operating results and could harm our business.

In addition, and in part as a result of the complexities inherent in larger transactions, the average time between the purchase and installation of our systems has increased over the past few years for reasons that are often outside of our control. Since we recognize revenue only upon installation of our systems at a customer's site, any delay in installation by our customers also causes a delay in the recognition of revenue for that system.

Complications in connection with our current business information system initiative may impact our results of operations, financial condition and cash flows.

We replaced our enterprise-level business information system with a new enterprise resource planning system in January 2009. This conversion resulted in changes to the tools we use to take orders, procure materials, manage inventories, schedule production, remit billings, collect cash, make payments and perform other business functions. Based upon the complexity of this initiative, there is risk that we will not see the expected benefit from the implementation of this new system in accordance with its anticipated timeline and will incur additional costs. The implementation could result in operating inefficiencies and financial reporting delays, and the implementation could impact our ability to perform necessary business transactions. All of these risks could adversely impact our results of operations, financial condition and cash flows.

We have experienced substantial changes in our revenue levels and we can not be sure that we will be able to manage any future changes in revenue levels.*

Our revenue declined by 15.9% in the quarter ended March 31, 2009 compared to the same period in 2008. Our revenues grew by 18.2% and 37.7% in fiscal 2008 and 2007. Current macroeconomic and general market conditions have contributed to a decline in our revenue recently. Our ability to manage rapid reductions in our revenue and achieve or sustain profitability is dependent upon our ability to manage costs and control expenses. If macroeconomic and general market conditions improve and return to historical levels, our ability to grow revenue profitably will also be dependent on our ability to continue to manage costs and control expenses. If our revenue rapidly increases, we may not be able to manage this growth effectively. Management of future growth is dependent on our ability to continue to receive orders from customers, the volume of installations we are able to complete, our ability to continue to meet our customers' needs and provide a quality installation experience and our flexibility in manpower allocations among customers to complete installations on a timely basis.

Our expense control is dependent on our ability to continue to develop and leverage effective and efficient human and information technology systems, our assumptions regarding our reorganization of personnel and financial resources, our ability to gain efficiencies in our workforce through the local and worldwide labor markets and our ability to grow our outsourced vendor supply model. Our expense growth rate may equal or exceed our revenue growth rate if we are unable to streamline our operations, or fail to reduce the costs or increase the margins of our products. In addition, we may not be able to reduce our expenses to keep pace with a reduction in our revenue, which could harm our results of operations and financial position.

Table of Contents

If we are unable to recruit and retain skilled and motivated personnel, our competitive position, results of operations and financial condition could be harmed.

Our success is highly dependent upon the continuing contributions of our key management, sales, technical and engineering staff. We believe that our future success will depend upon our ability to attract, train and retain highly skilled and motivated personnel. As more of our products are installed in increasingly complex environments, greater technical expertise will be required. As our installed base of customers increases, we will also face additional demands on our customer service and support personnel, requiring additional resources to meet these demands. We may experience difficulty in recruiting qualified personnel. Competition for qualified technical, engineering, managerial, sales, marketing, financial reporting and other personnel can be intense and we cannot assure you that we will be successful in attracting and retaining qualified personnel. Competitors have in the past attempted, and may in the future attempt, to recruit our employees.

In addition, we have historically used stock options and other forms of equity compensation as key components of our employee compensation program in order to align employees' interests with the interests of our stockholders, encourage employee retention and provide competitive compensation packages. Share-based compensation expense recorded under SFAS No. 123(R) could make it more difficult and less favorable for us to grant stock options to employees in the future. If employees believe that the incentives that they would receive under any such modified strategy are less attractive, we may find it difficult to attract, retain and motivate employees. Failure to attract and retain key personnel could harm our competitive position, results of operations and financial condition.

We may not be able to successfully integrate acquired businesses or technologies into our existing business, which could negatively impact our operating results.

As a part of our business strategy we may seek to acquire businesses, technologies or products in the future. We cannot assure you that any acquisition or any future transaction we complete will result in long-term benefits to us or our stockholders, or that our management will be able to integrate or manage the acquired business effectively. Acquisitions entail numerous risks, including difficulties associated with the integration of operations, technologies, products and personnel that, if realized, could harm our operating results. Risks related to potential acquisitions include, but are not limited to:

- difficulties in combining previously separate businesses into a single unit;

- the substantial diversion of management's attention from day-to-day business when evaluating and negotiating such transactions and then integrating an acquired business;

- discovery, after completion of the acquisition, of liabilities assumed from the acquired business or of assets acquired that are not realizable;

- failure to achieve anticipated benefits such as cost savings and revenue enhancements;

- difficulties related to assimilating the products of an acquired business; and
- failure to understand and compete effectively in markets in which we have limited previous experience.

The healthcare industry faces financial constraints and consolidation that could adversely affect the demand for our products and services.

The healthcare industry has faced, and will likely continue to face, significant financial constraints. For example, the shift to managed care in the 1990s put pressure on healthcare organizations to reduce costs, and the Balanced Budget Act of 1997 significantly reduced Medicare reimbursement to healthcare organizations. Our automation solutions often involve a significant financial commitment by our customers and, as a result, our ability to grow our business is largely dependent on our customers' capital and operating budgets. To the extent healthcare spending declines or increases more slowly than we anticipate, demand for our products and services could decline.

Many healthcare providers have consolidated to create larger healthcare delivery organizations to achieve greater market power. If this consolidation continues, it could reduce the number of our target customers. In addition, the resulting organizations could have greater bargaining power, which may lead to price erosion.

Table of Contents

If we are unable to maintain our relationships with group purchasing organizations or other similar organizations, we may have difficulty selling our products and services.

We have contracts with various group purchasing organizations, such as AmeriNet, Inc., HealthTrust Purchasing Group, L.P., MAGNET Group, Novation, LLC, and Premier, Inc., which enable us to more readily sell our products and services to customers represented by these organizations. Our contracts with these organizations are terminable at the convenience of either party. The loss of any of these relationships could impact the breadth of our customer base and could impair our ability to increase our revenues. We cannot assure you that these organizations will renew our contracts on similar terms, if at all, and they may choose to terminate our contracts before they expire.

Our quarterly operating results may fluctuate and may cause our stock price to decline.

Our quarterly operating results may vary in the future depending on many factors that include, but are not limited to, the following:

- the ability to successfully install our products on a timely basis and meet other contractual obligations necessary to recognize revenue;
- the size and timing of orders for our medication and supply dispensing systems, and their installation and integration;
- the overall demand for healthcare medication management and supply chain solutions;
- changes in pricing policies by us or our competitors;
- the number, timing and significance of product enhancements and new product announcements by us or our competitors;
- the relative proportions of revenues we derive from products and services;
- our customers' budget cycles;

Edgar Filing: OMNICELL, Inc - Form 10-Q

- changes in our operating expenses and our ability to stabilize expenses;
- the performance of our products;
- changes in our business strategy; and
- economic and political conditions, including fluctuations in interest rates and tax increases.

Due to all of these factors, our quarterly revenues and operating results are difficult to predict and may fluctuate, which in turn may cause the market price of our stock to decline.

Table of Contents

If the market price of our common stock continues to be highly volatile, the value of your investment in our common stock may decline.*

During the three months ended March 31, 2009, our common stock traded between \$6.25 and \$12.97 per share. The market price for shares of our common stock has been and may continue to be highly volatile. In addition, our announcements or external events may have a significant impact on the market price of our common stock. These announcements or external events may include:

- changes in our operating results;

- developments in our relationships with corporate customers;

- changes in the ratings of our common stock by securities analysts;

- announcements by us or our competitors of technological innovations or new products; or

- general economic and market conditions.

Furthermore, the stock market as a whole from time to time has experienced extreme price and volume fluctuations, which have particularly affected the market prices for technology companies. These broad market fluctuations may cause the market price of our common stock to decline irrespective of our performance. In addition, sales of substantial amounts of our common stock in the public market could lower the market price of our common stock.

Outstanding employee stock options have the potential to dilute stockholder value and cause our stock price to decline.

We frequently grant stock options to our employees. At March 31, 2009, we had options outstanding to purchase approximately 5.0 million shares of our common stock at exercise prices ranging from \$2.00 to \$29.16 per share. If some or all of these shares are sold into the public market over a short time period, the price of our common stock may decline, as the market may not be able to absorb those shares at the prevailing market prices. Such sales may also make it more difficult for us to sell equity securities in the future on terms that we deem acceptable.

Our failure to maintain effective internal control over financial reporting in accordance with Section 404 of the Sarbanes-Oxley Act of 2002 could cause our stock price to decline.

If we fail to maintain the adequacy of our internal controls, as such standards are modified, supplemented or amended from time to time, we may not be able to ensure that we can conclude on an ongoing basis that we have effective internal controls over financial reporting in accordance with Section 404 of the Sarbanes-Oxley Act. Failure to achieve and maintain an effective internal control environment could negatively impact the market price of our common stock.

If our U.S. government customers do not receive their annual funding, our ability to recognize revenues on future sales to U.S. government customers, to sell our U.S. government receivables to third-party leasing companies or to collect payments on unsold receivables from U.S. government customers could be impaired.*

U.S. government customers sign contracts with five-year non-cancelable payment terms but are subject to one-year government budget funding cycles. In our judgment and based on our history with these accounts, we believe these receivables are collectable. However, in the future, the failure of any of our U.S. government customers to receive their annual funding could impair our ability to sell to these customers or to sell our U.S. government receivables to third-party leasing companies. In addition, the ability to collect payments on unsold receivables could be impaired and may result in a write-down of our unsold receivables to U.S. government customers. As of March 31, 2009, the balance of our unsold leases to U.S. government customers was \$16.3 million.

Table of Contents

We depend on a limited number of suppliers for our medication and supply dispensing systems and our business may suffer if we were required to change suppliers to obtain an adequate supply of components and equipment on a timely basis.

Although we generally use parts and components for our products with a high degree of modularity, certain components are presently available only from a single source or limited sources. We have generally been able to obtain adequate supplies of all components in a timely manner from existing sources, or where necessary, from alternative sources of supply. In 2007 and 2008, we engaged multiple single source third-party manufacturers to build several of our sub-assemblies. The risk associated with changing to alternative vendors, if necessary, for any of the numerous components used to manufacture our products could limit our ability to manufacture our products and harm our business. Our reliance on a few single source partners to build our hardware sub-assemblies, a reduction or interruption in supply from our partners or suppliers, or a significant increase in the price of one or more components could have an adverse impact on our business, operating results and financial condition. In addition, this impact could damage customer relationships and any failure of a contractor to perform adequately could harm our business.

If we fail to manage our inventory properly, our revenue, gross margin and profitability could suffer.

Managing our inventory of components and finished products is a complex task. A number of factors, including, but not limited to, the need to maintain a significant inventory of certain components that are in short supply or that must be purchased in bulk to obtain favorable pricing, the general unpredictability of demand for specific products and customer requests for quick delivery schedules, may result in us maintaining large amounts of inventory. Other factors, including changes in market demand, customer requirements and technology, may cause inventory to become obsolete. Any excess or obsolete inventory could result in inventory write-downs, which in turn could harm our business and results of operations.

If we are unable to successfully interface our automation solutions with the existing information systems of our customers, they may choose not to use our products and services.

For healthcare facilities to fully benefit from our automation solutions, our systems must interface with their existing information systems. This may require substantial cooperation, incremental investment and coordination on the part of our customers. There is little uniformity in the systems currently used by our customers, which complicates the interfacing process. If these systems are not successfully interfaced, our customers could choose not to use or to reduce their use of our automation solutions, which would harm our business.

Our failure to protect our intellectual property rights could negatively affect our ability to compete.

Our success depends in part on our ability to obtain patent protection for technology and processes and our ability to preserve our trademarks, copyrights and trade secrets. We have pursued patent protection in the United States and foreign jurisdictions for technology that we believe to be proprietary and for technology that offers us a potential competitive advantage for our products. We intend to continue to pursue such protection in the future. Our issued patents relate to various features of our medication and supply dispensing systems. We cannot assure you that we will file any patent applications in the future, and that any of our patent applications will result in issued patents or that, if issued, such patents will provide significant protection for our technology and processes. Furthermore, we cannot assure you that others will not develop technologies that are similar or superior to our technology or that others will not design around the patents we own. All of our system software is

Edgar Filing: OMNICELL, Inc - Form 10-Q

copyrighted and subject to the protection of applicable copyright laws. Despite our efforts to protect our proprietary rights, unauthorized parties may attempt to copy aspects of our products or obtain and use information that we regard as proprietary.

Table of Contents

Intellectual property claims against us could harm our competitive position, results of operations and financial condition.

We expect that developers of medication and supply dispensing systems will be increasingly subject to infringement claims as the number of products and competitors in our industry grows and the functionality of products in different industry segments overlaps. In the future, third parties may claim that we have infringed upon their intellectual property rights with respect to current or future products. In addition, in connection with our 2007 acquisition of Rioux Vision, Inc., we have taken on the defense of a lawsuit filed against Rioux Vision that claims that certain mobile carts designed and sold by Rioux Vision infringe a patent owned by Flo Healthcare Solutions, LLC. In connection with those proceedings, in December of 2008, Flo Healthcare Solutions, LLC filed a lawsuit against Omnicell alleging infringement of the same patent by the same carts from Rioux Vision that Omnicell markets. We do not carry special insurance that covers intellectual property infringement claims; however, such claims may be covered under our traditional insurance policies. These policies contain terms, conditions and exclusions that make recovery for intellectual property infringement claims difficult to guarantee. Any infringement claims, with or without merit, could be time-consuming to defend, result in costly litigation, divert management's attention and resources, cause product shipment delays or require us to enter into royalty or licensing agreements. These royalty or licensing agreements, if required, may not be available on terms acceptable to us, or at all, which could harm our competitive position, results of operations and financial condition.

Our software products are complex and may contain defects, which could harm our reputation, results of operations and financial condition.

We market products that contain software and software only products. Although we perform extensive testing prior to releasing software products, these products may contain undetected errors or bugs when first released. These may not be discovered until the product has been used by customers in different application environments. Failure to discover product deficiencies or bugs could delay product introductions, require design modifications to previously shipped products, cause unfavorable publicity or negatively impact system shipments, any of which could harm our business, financial condition and results of operations.

Product liability claims against us could harm our competitive position, results of operations and financial condition.

Our products provide medication management and supply chain solutions for the healthcare industry. Despite the presence of healthcare professionals as intermediaries between our products and patients, if our products fail to provide accurate and timely information or operate as designed, customers, patients or their family members could assert claims against us for product liability. Moreover, failure of health care facility employees to use our products for their intended purposes could result in product liability claims against us. Litigation with respect to liability claims, regardless of any outcome, could result in substantial cost to us, divert management's attention from operations and decrease market acceptance of our products. We possess a variety of insurance policies that include coverage for general commercial liability, technology errors and omissions liability. However, these policies may not be adequate against product liability claims. A successful claim brought against us, or any claim or product recall that results in negative publicity about us, could harm our competitive position, results of operations and financial condition. Also, in the event that any of our products is defective, we may be required to recall or redesign those products.

If our new product solutions do not achieve market acceptance, our sales and operating results will be affected.

We regularly introduce new products. Our ability to achieve our business goals is dependent in part on customer acceptance of these new products. We cannot assure you that we will be successful in marketing these products, that these products will compete effectively with similar

Edgar Filing: OMNICELL, Inc - Form 10-Q

products sold by our competitors or that the level of market acceptance of such products will be sufficient to generate expected revenues and synergies with our other products.

Deployment of these new products often requires interoperability with other Omnicell products as well as with healthcare facilities' existing information management systems. If these products fail to satisfy these demanding technological objectives, our customers may be dissatisfied and we may be unable to generate future sales. Failure to establish a significant base of customer references will significantly reduce our ability to sell these products to additional customers.

Table of Contents

We are dependent on technologies provided by third-party vendors.

Some of our products incorporate technologies owned by third parties that are licensed to us for use, modification, and distribution. If we lose access to third-party technologies, or we lose the ongoing rights to modify and distribute these technologies with our products we will either have to devote resources to independently develop, maintain and support the technologies ourselves or transition to another vendor. Any independent development, maintenance or support of these technologies by us or the transition to alternative technologies could be costly, time consuming and could delay our product releases and upgrade schedules. These factors could negatively and materially affect our ability to market, sell or distribute our products and in turn our business and prospects.

Our international operations may subject us to additional risks that can adversely affect our operating results.

We currently have operations outside of the United States, consisting primarily of software development and customer support through our India subsidiary. Our international operations subject us to a variety of risks, including:

- the difficulty of managing an organization operating in various countries;
- growing political sentiment against international outsourcing of support services and development;
- reduced protection for intellectual property rights in some countries;
- changes in foreign regulatory requirements;
- the requirement to comply with a variety of international laws and regulations, including local labor ordinances and changes in tariff rates;
- fluctuations in currency exchange rates and difficulties in transferring funds from certain countries; and
- political unrest, terrorism and the potential for other hostilities in areas in which we have facilities.

Our success depends, in part, on our ability to anticipate and address these risks. We cannot assure you that these or other factors will not adversely affect our business or operating results.

Government regulation of the healthcare industry could reduce demand for our products, or substantially increase the cost to produce our products.

While the manufacture and sale of our current products are not regulated by the United States Food and Drug Administration, or FDA, or the Drug Enforcement Administration, or DEA, these products, or our future products, if any, may be regulated in the future by these or other federal agencies due to future legislative and regulatory initiatives or reforms. Direct regulation of our business and products by FDA, DEA or other federal agencies could substantially increase the cost to produce our products and increase the time required to bring those products to market, reduce the demand for our products and reduce our revenues. In addition, healthcare providers and facilities that use our equipment and dispense controlled substances are subject to regulation by DEA. The failure of these providers and facilities to comply with DEA requirements, including the Controlled Substances Act and its implementing regulations, could reduce demand for our products and harm our competitive position, results of operations and financial condition. Pharmacies are regulated by individual state boards of pharmacy that issue rules for pharmacy licensure in their respective jurisdictions. State boards of pharmacy do not license or approve our medication and supply dispensing systems; however, pharmacies using our equipment are subject to state board approval. The failure of such pharmacies to meet differing requirements from a significant number of state boards of pharmacy could decrease demand for our products and harm our competitive position, results of operations and financial condition. Similarly, hospitals must be accredited by the Joint Commission in order to be eligible for Medicaid and Medicare funds. The Joint Commission does not approve or accredit medication and supply dispensing systems; however, disapproval of our customers' medication and supply dispensing management methods and their failure to meet Joint Commission requirements could decrease demand for our products and harm our competitive position, results of operations and financial condition.

Table of Contents

While we have implemented a Privacy and Use of Information Policy and adhere to established privacy principles, use of customer information guidelines and related federal and state statutes, we cannot assure you that we will be in compliance with all federal and state healthcare information privacy and security laws that we are directly or indirectly subject to, including, without limitation, the Health Insurance Portability and Accountability Act of 1996, or HIPAA. Among other things, this legislation required the Secretary of Health and Human Services, or HHS, to adopt national standards governing the conduct of certain electronic health information transactions and protecting the privacy and security of personally identifiable health information maintained or transmitted by covered entities, which include pharmacies and other healthcare providers with which we do business. The standards adopted to date include, among others, the Standards for Privacy of Individually Identifiable Health Information, which restrict the use and disclosure of personally identifiable health information by covered entities, and the Security Standards, which require covered entities to implement administrative, physical and technical safeguards to protect the integrity and security of certain electronic health information. While we are not directly regulated as a covered entity under HIPAA, we are a business associate to many of our customers that are covered entities. Many of these customers have required that we enter into written agreements governing the way we handle and safeguard any patient information we may encounter in providing our products and services and may impose liability on us for failure to meet our contractual obligations. A number of states have also enacted privacy and security statutes and regulations that, in some cases, are more stringent than HIPAA and may apply directly to us. If our past or present operations are found to violate any of these laws, we may be subject to fines, penalties and other sanctions. In addition, we cannot predict the potential impact of future HIPAA standards and other federal and state privacy and security laws that may be enacted at any time on our customers or on Omnicell. These laws could restrict the ability of our customers to obtain, use or disseminate patient information, which could reduce the demand for our products or force us to redesign our products in order to meet regulatory requirements.

We may need additional financing in the future to meet our capital needs and such financing may not be available on favorable terms, if at all, and may be dilutive to existing stockholders.

We intend to continue to expend substantial funds for research and development activities, product development, sales and marketing activities and the potential acquisition and integration of complementary products and businesses. As a consequence, in the future we may need to seek additional financing to meet our working capital needs and to finance capital expenditures, as well as to fund operations or potential acquisitions. We may be unable to obtain any desired additional financing on terms favorable to us, if at all. If adequate funds are not available on acceptable terms, we may be unable to fund our expansion, successfully develop or enhance products, respond to competitive pressures or take advantage of acquisition opportunities, any of which could negatively affect our business. If we raise additional funds through the issuance of equity securities, our stockholders will experience dilution of their ownership interest. If we raise additional funds by issuing debt, we may be subject to limitations on our operations.

Catastrophic events may disrupt our business and harm our operating results.

We rely on our network infrastructure, data centers, enterprise applications, and technology systems for the development, marketing, support and sales of our products, and for the internal operation of our business. These systems are susceptible to disruption or failure in the event of a major earthquake, fire, flood, cyber-attack, terrorist attack, telecommunications failure, or other catastrophic event. Further, many of these systems are housed or supported in or around our corporate headquarters located in California, near major earthquake faults, and where a significant portion of our research and development activities and other critical business operations take place. Disruptions to or the failure of any of these systems, and the resulting loss of critical data, which is not quickly recoverable by the effective execution of disaster recovery plans designed to reduce such disruption, could cause delays in our product development, prevent us from fulfilling our customers' orders, and could severely affect our ability to conduct normal business operations, the result of which would adversely affect our operating results.

Table of Contents

Anti-takeover provisions in our charter documents, our stockholders' rights plan and under Delaware law may make an acquisition of us, which may be beneficial to our stockholders, more difficult.

We are incorporated in Delaware. Certain anti-takeover provisions of Delaware law and our charter documents as currently in effect may make a change in control of our company more difficult, even if a change in control would be beneficial to the stockholders. Our anti-takeover provisions include provisions in our certificate of incorporation providing that stockholders' meetings may only be called by the board of directors and provisions in our bylaws providing that the stockholders may not take action by written consent and requiring that stockholders that desire to nominate any person for election to the board of directors or to make any proposal with respect to business to be conducted at a meeting of our stockholders be submitted in appropriate form to our Secretary within a specified period of time in advance of any such meeting. Delaware law also prohibits corporations from engaging in a business combination with any holders of 15% or more of their capital stock until the holder has held the stock for three years unless, among other possibilities, the board of directors approves the transaction. Our board of directors may use these provisions to prevent changes in the management and control of our company. Also, under applicable Delaware law, our board of directors may adopt additional anti-takeover measures in the future.

In February 2003, our board of directors adopted a stockholder rights plan that may have the effect of discouraging, delaying or preventing a change in control of our company that is beneficial to our stockholders. Pursuant to the terms of the plan, when a person or group, except under certain circumstances, acquires 15% or more of our outstanding common stock (other than two current stockholders and their affiliated entities, which will not trigger the rights plan unless they acquire beneficial ownership of 17.5% and 22.5% or more, respectively, of our outstanding common stock) or ten business days after commencement or announcement of a tender or exchange offer for 15% or more of our outstanding common stock, the rights (except those rights held by the person or group who has acquired or announced an offer to acquire 15% or more of our outstanding common stock) would generally become exercisable for shares of our common stock at a discount. Because the potential acquiror's rights would not become exercisable for our shares of common stock at a discount, the potential acquiror would suffer substantial dilution and may lose its ability to acquire us. In addition, the existence of the plan itself may deter a potential acquiror from acquiring us. As a result, either by operation of the plan or by its potential deterrent effect, a change in control of our company that our stockholders may consider in their best interests may not occur.

Item 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

None.

Item 3. DEFAULTS UPON SENIOR SECURITIES

None.
