

MARTEN TRANSPORT LTD
Form 10-Q
August 10, 2009

UNITED STATES

SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

Form 10-Q

Quarterly Report Under Section 13 or 15(d) of the Securities Exchange Act of 1934

For the Quarter ended June 30, 2009

Commission File Number 0-15010

MARTEN TRANSPORT, LTD.

(Exact name of registrant as specified in its charter)

Delaware
(State of incorporation)

39-1140809
(I.R.S. employer
identification no.)

129 Marten Street, Mondovi, Wisconsin 54755

(Address of principal executive offices)

715-926-4216

(Registrant's telephone number)

Edgar Filing: MARTEN TRANSPORT LTD - Form 10-Q

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the Registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (Section 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the Registrant was required to submit and post such files). Yes No

Indicate by check mark whether the Registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act.

Large accelerated filer

Accelerated filer

Non-accelerated filer

Smaller reporting company

(Do not check if a smaller reporting company)

Indicate by check mark whether the Registrant is a shell company (as defined in Exchange Act Rule 12b-2). Yes No

The number of shares outstanding of the Registrant's Common Stock, par value \$.01 per share, was 21,885,073 as of August 5, 2009.

PART I. FINANCIAL INFORMATION

Item 1. Financial Statements.

NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS

SIX MONTHS ENDED JUNE 30, 2009

(Unaudited)

(1) Basis of Presentation

The accompanying unaudited consolidated condensed financial statements have been prepared in accordance with U.S. generally accepted accounting principles for interim financial statements, and therefore do not include all information and disclosures required by U.S. generally accepted accounting principles for complete financial statements. In the opinion of management, such statements reflect all adjustments (consisting of normal recurring adjustments) considered necessary to fairly present our consolidated financial condition, results of operations and cash flows for the interim periods presented. The results of operations for any interim period do not necessarily indicate the results for the full year. The unaudited interim consolidated financial statements should be read with reference to the consolidated financial statements and notes to consolidated financial statements in our 2008 Annual Report on Form 10-K.

The accompanying unaudited consolidated condensed financial statements include the accounts of Marten Transport, Ltd., its subsidiaries and its 45% owned affiliate, MW Logistics, LLC (MWL). MWL is a third-party provider of logistics services to the transportation industry. We have applied the provisions of FASB Interpretation No. 46, Consolidation of Variable Interest Entities, as revised, to our investment in MWL. All material intercompany accounts and transactions have been eliminated in consolidation. MWL has elected to be classified as a partnership for federal income tax purposes. Consequently, federal income taxes are not payable by MWL.

(2) Cash and Cash Equivalents

Cash in excess of current operating requirements is invested in short-term, highly liquid investments. We consider all highly liquid investments purchased with original maturities of three months or less to be cash equivalents.

(3) Earnings Per Common Share

Basic and diluted earnings per common share were computed as follows:

(In thousands, except per share amounts)	Three Months Ended June 30,		Six Months Ended June 30,	
	2009	2008	2009	2008
Numerator:				
Net income	\$ 4,477	\$ 3,469	\$ 8,530	\$ 6,122
Denominator:				
Basic earnings per common share - weighted-average shares	21,871	21,764	21,855	21,760

Edgar Filing: MARTEN TRANSPORT LTD - Form 10-Q

Effect of dilutive stock options	122	154	123	152
Diluted earnings per common share - weighted-average shares and assumed conversions	21,993	21,918	21,978	21,912
Basic earnings per common share	\$ 0.20	\$ 0.16	\$ 0.39	\$ 0.28
Diluted earnings per common share	\$ 0.20	\$ 0.16	\$ 0.39	\$ 0.28

The diluted earnings per common share for the six months ended June 30, 2009 exceeds the sum of the diluted earnings per common share for the first and second quarters of 2009 due to differences in rounding.

Options totaling 278,600 and 308,100 shares for the three-month and six-month periods ended June 30, 2009, respectively, and 314,100 shares for each of the three-month and six-month periods ended June 30, 2008 were outstanding but were not included in the calculation of diluted earnings per share, primarily because their exercise prices were greater than the average market price of the common shares and, therefore, including the options in the denominator would be antidilutive, or decrease the number of weighted-average shares. Additionally, performance-based option awards totaling 107,000 and 90,500 shares for the 2009 and 2008 periods, respectively, were also not included in the calculation of diluted earnings per share because the performance condition was not considered probable of achievement.

(4) Related Party Transactions

We purchase fuel and obtain tires and related services from Bauer Built, Inc., or BBI. Jerry M. Bauer, one of our directors, is the president and a stockholder of BBI. We paid BBI \$382,000 in the first six months of 2009 and \$758,000 in the first six months of 2008 for fuel and tire services. In addition, we paid \$703,000 in the first six months of 2009 and \$1.3 million in the first six months of 2008 to tire manufacturers for tires that we purchased from the tire manufacturers but were provided by BBI. BBI received commissions from the tire manufacturers related to these purchases. Other than any benefit received from his ownership interest, Mr. Bauer receives no compensation or other benefits from our business with BBI.

We paid Durand Builders Service, Inc. \$832,000 in the first six months of 2009 and \$285,000 in the first six months of 2008 for various construction projects. Larry B. Hagness, one of our directors, is the president and owner of Durand Builders Service, Inc. Other than any benefit received from his ownership interest, Mr. Hagness receives no compensation or other benefits from these transactions.

(5) Income Taxes

Our reserves for unrecognized tax benefits were \$137,000 as of June 30, 2009 and \$131,000 as of December 31, 2008. The \$6,000 increase in the amount reserved in the first six months of 2009 relates to current period tax positions. If recognized, \$89,000 of the unrecognized tax benefits as of June 30, 2009 would impact our effective tax rate. No potential interest or penalties related to unrecognized tax benefits were recognized in our financial statements as of June 30, 2009. We do not expect the reserves for unrecognized tax benefits to change significantly within the next twelve months.

The federal statute of limitations remains open for 2005 and forward. We file tax returns in numerous state jurisdictions with varying statutes of limitations.

(6) Accounting for Share-based Payment Arrangement Compensation

We account for share-based payment arrangements in accordance with Statement of Financial Accounting Standards No. 123R, Share-Based Payment as interpreted by SEC Staff Accounting Bulletin No. 107. During the six months ended June 30, 2009, there were no significant changes to the structure of our share-based payment arrangements. Total pre-tax share-based compensation expense recorded in the first six months of 2009 was \$346,000 and in the first six months of 2008 was \$358,000. See Note 8 to our consolidated financial statements in our 2008 Annual Report on Form 10-K for a detailed description of stock-based awards under our 2005 Stock Incentive Plan and 1995 Stock Incentive Plan.

(7) Fair Value Measurements

In September, 2006, the FASB issued Statement of Financial Accounting Standards No. 157, Fair Value Measurements, (SFAS 157). This statement provides a single definition for fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. Under SFAS 157, fair value is defined as the exit price, or the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants as of the measurement date. SFAS 157 also establishes a hierarchy for inputs used in measuring fair value that maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that the most observable inputs be used when available. Observable inputs are inputs market participants would use in valuing the asset or liability developed based on market data obtained from independent sources. Unobservable inputs are inputs that reflect a company's assumptions about the factors market participants would use in valuing the asset or liability developed based upon the best information available in the circumstances.

The following table presents information about our financial assets and liabilities that are measured at fair value on a recurring basis as of June 30, 2009, and indicates the fair value hierarchy of the valuation techniques utilized to determine such fair value. The hierarchy is broken down into three levels. Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities. Level 2 inputs include data points that are observable such as quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, and inputs (other than quoted prices) such as interest rates and yield curves that are observable for the asset or liability, either directly or indirectly. Level 3 inputs are unobservable data points for the asset or liability, and include situations where there is little, if any, market activity for the asset or liability.

(In thousands)	Asset Balance as of June 30, 2009	Fair Value Measurements Using:		
		Level 1	Level 2	Level 3
Marketable securities	\$ 8,710	\$ 8,710	\$	\$

Our investment in short-term marketable securities is in a mutual fund which is valued daily based upon quoted prices in an active market.

There were no fair value measurements with respect to nonfinancial assets or liabilities that are recognized or disclosed at fair value in our consolidated condensed financial statements as of June 30, 2009.

The carrying amounts of accounts receivable, direct financing leases receivable and accounts payable approximate fair value because of the short maturity of these instruments. The fair value of our total long-term debt is estimated to be \$1.4 million at June 30, 2009 and \$2.9 million at December 31, 2008. The fair value was estimated by discounting future cash flows using a current borrowing rate for similar long-term debt instruments.

(8) Business Segments

Our presentation includes two reportable segments Truckload and Logistics. The primary source of our operating revenue is truckload revenue, which we generate by transporting freight for our customers and report within our Truckload segment. Generally, we are paid by the mile for our services. We also derive truckload revenue from fuel surcharges, loading and unloading activities, equipment detention and other ancillary services.

Our operating revenue also includes revenue reported within our Logistics segment, which consists of revenue from our internal brokerage and intermodal operations, both launched in 2005, and through our 45% interest in MWL, a third-party provider of logistics services to the transportation industry. Brokerage services involve arranging for another company to transport freight for our customers while we retain the billing, collection and customer management responsibilities. Intermodal services involve the transport of our trailers on railroad flatcars for a portion of a trip, with the balance of the trip using our tractors or, to a lesser extent, contracted carriers.

Edgar Filing: MARTEN TRANSPORT LTD - Form 10-Q

The following table sets forth for the periods indicated our operating revenue, operating income and operating ratio by segment. We do not prepare separate balance sheets by segment and, as a result, assets are not separately identifiable by segment.

(Dollars in thousands)	Three Months Ended June 30,		Six Months Ended June 30,	
	2009	2008	2009	2008
Operating revenue:				
Truckload revenue, net of fuel surcharge revenue	\$ 87,969	\$ 96,506	\$ 176,504	\$ 191,137
Truckload fuel surcharge revenue	11,286	37,568	21,123	64,066
Total Truckload revenue	99,255	134,074	197,627	255,203
Logistics revenue, net of intermodal fuel surcharge revenue(1)				
Intermodal fuel surcharge revenue	1,324	2,554	2,257	4,054
Total Logistics revenue	26,549	25,920	50,132	48,165
Total operating revenue	\$ 125,804	\$ 159,994	\$ 247,759	\$ 303,368
Operating income:				
Truckload	\$ 5,697	\$ 4,634	\$ 11,530	\$ 8,361
Logistics	1,806	1,794	3,224	3,549
Total operating income	\$ 7,503	\$ 6,428	\$ 14,754	\$ 11,910
Operating ratio(2):				
Truckload	94.3%	96.5%	94.2%	96.7%
Logistics	93.2	93.1	93.6	92.6
Consolidated operating ratio	94.0%	96.0%	94.0%	96.1%

(1) Logistics revenue is net of \$2.5 million and \$5.8 million of inter-segment revenue in the three-month and six-month periods ended June 30, 2009, respectively, for loads transported by our tractors and arranged by MWL that have been eliminated in consolidation. Inter-segment revenue was \$4.3 million and \$8.6 million for the three-month and six-month periods ended June 30, 2008.

(2) Operating expenses as a percentage of operating revenue.

(9) Adoption of FASB Statement No. 160 Noncontrolling Interests in Consolidated Financial Statements an amendment of ARB No. 51

Effective January 1, 2009, we adopted the provisions of Statement of Financial Accounting Standards No. 160, Noncontrolling Interests in Consolidated Financial Statements an amendment of ARB No. 51, which requires retrospective application of the required presentation and disclosure resulting in the following reclassifications. The noncontrolling interest balance of \$1.7 million as of December 31, 2008 in our consolidated condensed balance sheets, the income before income taxes attributable to noncontrolling interest balances of \$225,000 for the three months ended June 30, 2008 and \$605,000 for the six months ended June 30, 2008 in our consolidated condensed statements of operations, and the income before income taxes attributable to noncontrolling interest and noncontrolling interest distributions balances of \$566,000 for the six months ended June 30, 2008 and (\$134,000) for the six months ended December 31, 2008 in our consolidated condensed statements of stockholders' equity have been reclassified to be consistent with the current presentation. These reclassifications do not have a material effect on our consolidated condensed financial statements.

(10) Evaluation of Subsequent Events

As a result of our evaluation through August 10, 2009, the issuance date of this Quarterly Report on Form 10-Q, we have determined that no events or transactions have occurred subsequent to June 30, 2009 which require recognition or disclosure in the financial statements.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

The following discussion and analysis of our financial condition and results of operations should be read together with the selected consolidated financial data and our consolidated condensed financial statements and the related notes appearing elsewhere in this report. This discussion and analysis contains forward-looking statements that involve risks, uncertainties and assumptions. Our actual results may differ materially from those anticipated in these forward-looking statements as a result of many factors, including but not limited to those included in our Form 10-K, Part I, Item 1A for the year ended December 31, 2008. We do not assume, and specifically disclaim, any obligation to update any forward-looking statement contained in this report.

Overview

The primary source of our operating revenue is truckload revenue, which we generate by transporting long-haul and regional freight for our customers and report within our Truckload segment. Generally, we are paid by the mile for our services. We also derive truckload revenue from fuel surcharges, loading and unloading activities, equipment detention and other ancillary services. The main factors that affect our truckload revenue are the rate per mile we receive from our customers, the percentage of miles for which we are compensated and the number of miles we generate with our equipment. We monitor our revenue production primarily through average truckload revenue, net of fuel surcharges, per tractor per week. We also analyze our average truckload revenue, net of fuel surcharges, per total mile, non-revenue miles percentage, the miles per tractor we generate, our accessorial revenue and our other sources of operating revenue.

Our operating revenue also includes revenue reported within our Logistics segment, which consists of revenue from our internal brokerage and intermodal operations, both launched in 2005, and through our 45% interest in MWL, a third-party provider of logistics services to the transportation industry. Brokerage services involve arranging for another company to transport freight for our customers while we retain the billing, collection and customer management responsibilities. Intermodal services involve the transport of our trailers on railroad flatcars for a portion of a trip, with the balance of the trip using our tractors or, to a lesser extent, contracted carriers. The main factors that affect our logistics revenue are the rate per mile and other charges we receive from our customers and the rates charged by third-party providers.

In addition to the factors discussed above, our operating revenue is also affected by, among other things, the United States economy, inventory levels, the level of truck and rail capacity in the transportation market and specific customer demand.

Our operating revenue decreased \$55.6 million, or 18.3%, in the first six months of 2009. This decrease was primarily due to fuel surcharge revenue decreasing by \$44.7 million, or 65.7%, caused by significantly lower fuel prices in the first six months of 2009. Our operating revenue, net of fuel surcharges, decreased \$10.9 million, or 4.6%, compared with the first six months of 2008. Truckload segment revenue, net of fuel surcharges, decreased 7.7% primarily due to a decrease in our average truckload revenue, net of fuel surcharges, per tractor per week of 7.8% in the first six months of 2009. Our average miles per tractor decreased by 9.8% in the first six months of 2009 due to the difficult freight environment and our reduced length of haul. This was partially offset by a 1.7% increase in our average truckload revenue, net of fuel surcharges, per total mile as a result of an improved freight mix and the reduced length of haul. The changes in our operating statistics are consistent with the continued growth of our regional temperature-controlled operations. By focusing on shorter lengths of haul in certain defined areas, we are addressing customer trends toward regional distribution to lower their transportation expense, furthering our own objectives of reducing fuel consumption per load, and matching some of our drivers' desires to stay closer to home. The concentration of a portion of our fleet in these markets is evident in a 7.7% reduction from the first six months of 2008 in average length of haul to 810 miles. Our average fleet size increased by 17 tractors in the first six months of 2009 from the same period of 2008. Logistics segment revenue, net of intermodal fuel surcharges, increased 8.5% compared with the first six months of 2008. The increase in logistics revenue primarily resulted from continued volume growth in each of our internal brokerage and intermodal services, partially offset by a decrease in revenue generated by MWL. Logistics revenue represented 20.2% of our operating revenue in the first six months of 2009.

Our profitability on the expense side is impacted by variable costs of transporting freight for our customers, fixed costs and expenses containing both fixed and variable components. The variable costs include fuel expense, driver-related expenses, such as wages, benefits, training, and recruitment, and independent contractor costs, which are recorded under purchased transportation. Expenses that have both fixed and variable components include maintenance and tire expense and our total cost of insurance and claims. These expenses generally vary with the miles we travel, but also have a controllable component based on safety, fleet age, efficiency and other factors. Our main fixed costs relate to the acquisition and financing of long-term assets, such as revenue equipment and operating terminals. We expect our annual cost of tractor and trailer ownership will increase in future periods as a result of higher prices of new equipment. Although certain factors affecting our expenses are beyond our control, we monitor them closely and attempt to anticipate changes in these factors in managing our business. For example, fuel prices fluctuated dramatically at various times during the last several years, with the D.O.E. national average cost of fuel decreasing to \$2.26 per gallon in the first six months of 2009 from \$3.98 per gallon in the first six months of 2008. We manage our exposure to changes in fuel prices primarily through fuel surcharge programs with our customers, as well as through volume fuel purchasing arrangements with national fuel centers and bulk purchases of fuel at our terminals. To help further reduce fuel expense, we have installed auxiliary power units in our tractors to provide climate control and electrical power for our drivers without idling the tractor engine. For our Logistics segment, our profitability on the expense side is impacted by the percentage of logistics revenue we pay to providers for the transportation services we arrange.

Our operating expenses as a percentage of operating revenue, or operating ratio, was 94.0% in the first six months of 2009 compared with 96.1% in the first six months of 2008. The increased profitability in the first six months of 2009 was primarily due to an improvement in our overall cost structure, partially offset by the decrease in revenue per tractor per week in our Truckload segment. Our earnings per diluted share increased to \$0.39 in the first six months of 2009 from \$0.28 in the same period of 2008.

Our business requires substantial, ongoing capital investments, particularly for new tractors and trailers. At June 30, 2009, we had approximately \$15.7 million of cash and cash equivalents and marketable securities, net of checks issued in excess of cash balances, \$1.4 million of long-term debt, including current maturities, and \$267.1 million in stockholders' equity. In the first six months of 2009, we spent \$25.8 million to purchase new revenue equipment, net of proceeds from dispositions. These expenditures were funded with cash flows from operations. We estimate that capital expenditures, net of proceeds from dispositions, will be approximately \$40 million to \$50 million for the remainder of 2009, which we will adjust throughout the year as we size our fleet to existing customer demand. We believe our sources of liquidity are adequate to meet our current and anticipated needs for at least the next twelve months. Based upon anticipated cash flows, existing cash and cash equivalents and marketable securities balances, current borrowing availability and other sources of financing we expect to be available to us, we do not anticipate any significant liquidity constraints in the foreseeable future.

This Management's Discussion and Analysis of Financial Condition and Results of Operations includes discussions of operating, truckload and logistics revenue, net of fuel surcharges, and net fuel expense (fuel and fuel taxes net of fuel surcharge revenue and surcharges passed through to independent contractors, outside drayage carriers and railroads). We provide these additional disclosures because management believes these measures provide a more consistent basis for comparing results of operations from period to period. These financial measures in this report have not been determined in accordance with U.S. generally accepted accounting principles (GAAP). Pursuant to Item 10(e) of Regulation S-K, we have included the amounts necessary to reconcile these non-GAAP financial measures to the most directly comparable GAAP financial measures, operating revenue and fuel and fuel taxes.

Results of Operations

The following table sets forth for the periods indicated certain operating statistics regarding our revenue and operations:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2009	2008	2009	2008
Truckload Segment:				
Revenue (in thousands)	\$ 99,255	\$ 134,074	\$ 197,627	\$ 255,203
Average truckload revenue, net of fuel surcharges, per total mile	\$ 1.501	\$ 1.497	\$ 1.513	\$ 1.488
Average miles per tractor(1)	24,581	27,162	48,922	54,245
Average truckload revenue, net of fuel surcharges, per tractor per week(1)	\$ 2,838	\$ 3,128	\$ 2,863	\$ 3,105
Average tractors (1)	2,384	2,373	2,385	2,368
Average miles per trip	796	865	810	878
Total miles company-employed drivers (in thousands)	52,557	55,587	104,669	109,897
Total miles independent contractors (in thousands)	6,045	8,877	11,988	18,548
Logistics Segment:				
Brokerage:				
Marten Transport				
Revenue (in thousands)	\$ 8,072	\$ 6,182	\$ 15,321	\$ 11,614
Loads	4,298	2,711	8,152	5,448
MWL				
Revenue (in thousands)	\$ 7,787	\$ 10,305	\$ 14,992	\$ 20,097
Loads	5,067	5,267	8,819	10,143
Intermodal:				
Revenue (in thousands)	\$ 10,690	\$ 9,433	\$ 19,819	\$ 16,454
Loads	4,656	2,773	8,309	4,926
Average tractors	64	51	59	45

(1) Includes tractors driven by both company-employed drivers and independent contractors. Independent contractors provided 221 and 246 tractors as of June 30, 2009 and 2008, respectively.

Edgar Filing: MARTEN TRANSPORT LTD - Form 10-Q

Comparison of Three Months Ended June 30, 2009 to Three Months Ended June 30, 2008

The following table sets forth for the periods indicated our operating revenue, operating income and operating ratio by segment, along with the change for each component:

(Dollars in thousands)	Three Months Ended June 30,		Dollar Change Three Months Ended June 30, 2009 vs. 2008		Percentage Change Three Months Ended June 30, 2009 vs. 2008	
	2009	2008				
Operating revenue:						
Truckload revenue, net of fuel surcharge revenue	\$ 87,969	\$ 96,506	\$ (8,537)		(8.8)%	
Truckload fuel surcharge revenue	11,286	37,568	(26,282)		(70.0)	
Total Truckload revenue	99,255	134,074	(34,819)		(26.0)	
Logistics revenue, net of intermodal fuel surcharge revenue(1)						
Intermodal fuel surcharge revenue	25,225	23,366	1,859		8.0	
Total Logistics revenue	1,324	2,554	(1,230)		(48.2)	
Total operating revenue	26,549	25,920	629		2.4	
Total operating revenue	\$ 125,804	\$ 159,994	\$ (34,190)		(21.4)%	
Operating income:						
Truckload	\$ 5,697	\$ 4,634	\$ 1,063		22.9%	
Logistics	1,806	1,794	12		0.7	
Total operating income	\$ 7,503	\$ 6,428	\$ 1,075		16.7%	
Operating ratio(2):						
Truckload	94.3%	96.5%			2.3%	
Logistics	93.2	93.1			(0.1)	
Consolidated operating ratio	94.0%	96.0%			2.1%	

(1) Logistics revenue is net of \$2.5 million and \$4.3 million of inter-segment revenue in the 2009 and 2008 periods, respectively, for loads transported by our tractors and arranged by MWL that have been eliminated in consolidation.

(2) Operating expenses as a percentage of operating revenue.

Our operating revenue decreased \$34.2 million, or 21.4%, to \$125.8 million in the 2009 period from \$160.0 million in the 2008 period. This decrease was primarily due to fuel surcharge revenue decreasing to \$12.6 million in the 2009 period from \$40.1 million in the 2008 period, caused by significantly lower fuel prices in the 2009 period. Our operating revenue, net of fuel surcharges, decreased \$6.7 million, or 5.6%, to \$113.2 million in the 2009 period from \$119.9 million in the 2008 period. The decrease in operating revenue, net of fuel surcharges, was due to a decrease in truckload revenue, net of fuel surcharges, partially offset by growth in logistics revenue.

Truckload segment revenue decreased \$34.8 million, or 26.0%, to \$99.3 million in the 2009 period from \$134.1 million in the 2008 period. Truckload segment revenue, net of fuel surcharges, decreased 8.8% primarily due to a decrease in our average truckload revenue, net of fuel surcharges, per tractor per week of 9.3% in the 2009 period. Our average miles per tractor decreased by 9.5% in the 2009 period due to the difficult freight environment and our reduced length of haul. This was partially offset by a 0.3% increase in our average truckload revenue, net

of fuel surcharges, per total mile as a result of an improved freight mix and the reduced length of haul. The changes in our operating statistics are consistent with the continued growth of our regional temperature-controlled operations. By focusing on shorter lengths of haul in certain defined

Edgar Filing: MARTEN TRANSPORT LTD - Form 10-Q

areas, we are addressing customer trends toward regional distribution to lower their transportation expense, furthering our own objectives of reducing fuel consumption per load, and matching some of our drivers' desires to stay closer to home. The concentration of a portion of our fleet in these markets is evident in an 8.0% reduction from the 2008 period in average length of haul to 796 miles. Our average fleet size increased by 11 tractors in the 2009 period from the 2008 period. The improvement in our overall cost structure, partially offset by the decrease in revenue per tractor per week, resulted in increased profitability from the 2008 period.

Logistics segment revenue increased \$629,000, or 2.4%, to \$26.5 million in the 2009 period from \$25.9 million in the 2008 period. Logistics segment revenue, net of intermodal fuel surcharges, increased 8.0%. The increase in logistics revenue primarily resulted from continued volume growth in each of our internal brokerage and intermodal services, partially offset by a decrease in revenue generated by MWL. The operating ratio for our Logistics segment in the 2009 period was approximately the same as in the 2008 period.

The following table sets forth for the periods indicated the dollar and percentage increase or decrease of the items in our unaudited consolidated condensed statements of operations, and those items as a percentage of operating revenue:

(Dollars in thousands)	Dollar Change Three Months Ended June 30, 2009 vs. 2008	Percentage Change Three Months Ended June 30, 2009 vs. 2008	2009	Percentage of Operating Revenue Three Months Ended June 30, 2008
Operating revenue	\$ (34,190)	(21.4)%	100.0%	100.0%
Operating expenses (income):				
Salaries, wages and benefits	(1,996)	(5.3)	28.4	23.6
Purchased transportation	(5,352)	(17.1)	20.6	19.6
Fuel and fuel taxes	(27,513)	(53.1)	19.3	32.4
Supplies and maintenance	180	1.9	7.6	5.9
Depreciation	1,040	8.4	10.6	7.7
Operating taxes and licenses	(60)	(3.4)	1.4	1.1
Insurance and claims	(1,975)	(29.7)	3.7	4.2
Communications and utilities	93	10.2	0.8	0.6
Gain on disposition of revenue equipment	399	43.0	(0.4)	(0.6)
Other	(81)	(3.1)	2.0	1.6
Total operating expenses	(35,265)	(23.0)	94.0	96.0
Operating income	1,075	16.7	6.0	4.0
Other expenses (income):				
Interest expense	(268)	(88.7)		0.2
Interest income and other	7	18.9		
	(261)	(98.5)		0.2
Income before income taxes	1,336	21.7	6.0	3.9
Less: Income before income taxes attributable to noncontrolling interest	(80)	(35.6)	0.1	0.1
Income before income taxes attributable to Marten Transport, Ltd.	1,416	23.8	5.8	3.7
Provision for income taxes	408	16.5	2.3	1.5
Net income	\$ 1,008	29.1%	3.6%	2.2%

Salaries, wages and benefits consist of compensation for our employees, including both driver and non-driver employees, employees' health insurance, 401(k) plan contributions and other fringe benefits. These expenses vary depending upon the ratio of company drivers to independent contractors, our efficiency, our experience with employees' health insurance claims, changes in health care premiums and other factors. The decrease in salaries, wages and benefits resulted primarily from a 5.5% decrease in the total miles driven by company drivers and a \$760,000 decrease in our self-insured medical claims, which decreased our employees' health insurance expense.

Purchased transportation consists of payments to independent contractor providers of revenue equipment and to carriers for transportation services we arrange in connection with brokerage and intermodal activities. This category will vary depending upon the ratio of company drivers versus independent contractors, the amount of fuel surcharges passed through to independent contractors and the amount and rates, including fuel surcharges, we pay to third-party railroad and motor carriers. Purchased transportation expense decreased \$5.4 million in total, or 17.1%, in the 2009 period from the 2008 period. Payments to carriers for transportation services we arranged in our brokerage and intermodal operations decreased \$139,000 to \$19.4 million in the 2009 period from \$19.5 million in the 2008 period. The portion of purchased transportation expense related to our independent contractors, including fuel surcharges, decreased \$5.2 million in the 2009 period, primarily due to a decrease in the number of independent contractor-owned tractors in our fleet and a decrease in the amount of fuel surcharges paid to the independent contractors. We expect that purchased transportation expense will increase as we continue to grow our Logistics segment.

Net fuel expense (fuel and fuel taxes net of fuel surcharge revenue and surcharges passed through to independent contractors, outside drayage carriers and railroads) decreased \$4.1 million, or 23.5%, to \$13.4 million in the 2009 period from \$17.6 million in the 2008 period. Fuel surcharges passed through to independent contractors, outside drayage carriers and railroads were \$1.8 million in the 2009 period and \$5.9 million in the 2008 period. Over the past year, we have worked diligently to control fuel usage and costs by improving our volume purchasing arrangements and optimizing our drivers' fuel purchases with national fuel centers, focusing on shorter lengths of haul, installing and tightly managing the use of auxiliary power units in our tractors to minimize engine idling and improving fuel usage in our trailers' refrigeration units. Auxiliary power units, which were fully installed in our company-owned tractors as of June 30, 2009, provide climate control and electrical power for our drivers without idling the tractor engine. The decrease in net fuel expense was primarily due to a significant decrease in the D.O.E. national average cost of fuel to \$2.34 per gallon in the 2009 period from \$4.42 per gallon in the 2008 period, a 5.5% decrease in the total miles driven by our company-owned fleet and to the cost control measures stated above. Net fuel expense represented 13.8% of truckload and intermodal revenue, net of fuel surcharges, in the 2009 period, compared with 17.0% in the 2008 period.

Depreciation relates to owned tractors, trailers, auxiliary power units, communications units, terminal facilities and other assets. The increase in depreciation was primarily due to a continued increase in the cost of revenue equipment and an increase in the relative percentage of company-owned tractors to independent contractor-owned tractors in the 2009 period. We expect our annual cost of tractor and trailer ownership will increase in future periods as a result of higher prices of new equipment, which will result in greater depreciation over the useful life.

Insurance and claims consist of the costs of insurance premiums and the accruals we make for claims within our self-insured retention amounts, primarily for personal injury, property damage, physical damage to our equipment, cargo claims and workers' compensation claims. These expenses will vary primarily based upon the frequency and severity of our accident experience, our self-insured retention levels and the market for insurance. The \$2.0 million decrease in insurance and claims in the 2009 period was primarily due to reduced physical damage claims related to our tractors and trailers and decreases in the cost of self-insured auto liability and workers' compensation accident claims. We are responsible for the first \$1.0 million on each auto liability claim and also responsible for up to \$1.0 million for 33% of each auto liability claim amount in excess of \$1.0 million. We are responsible for the first \$750,000 on each workers' compensation claim. Our significant self-insured retention exposes us to the possibility of significant fluctuations in claims expense between periods depending on the frequency, severity and timing of claims and to adverse financial results if we incur large or numerous losses.

A decrease in the market value for used revenue equipment, which we believe was driven by capacity reductions in the industry, caused our gain on disposition of revenue equipment to decrease to \$528,000 in the 2009 period from \$927,000 in the 2008 period, despite an increase in the number of trailers sold. Future gains or losses on disposition of revenue equipment will be impacted by the market for used revenue equipment, which is beyond our control. We do not expect our gain on disposition to improve in the near future as we believe that there are few buyers with adequate financing in comparison with available inventory, and the expectation of additional trucking company failures is likely to keep used truck inventories high.

As a result of the foregoing factors, our operating expenses as a percentage of operating revenue, or operating ratio, was 94.0% in the 2009 period compared with 96.0% in the 2008 period.

Interest expense primarily consists of interest on our senior unsecured notes and unsecured committed credit facility. The decrease in interest expense of \$268,000, or 88.7%, in the 2009 period from the 2008 period was primarily the result of lower average debt balances outstanding.

Our effective income tax rate decreased to 39.1% in the 2009 period from 41.6% in the 2008 period, primarily due to several tax credits recorded in the 2009 period.

As a result of the factors described above, net income increased to \$4.5 million in the 2009 period from \$3.5 million in the 2008 period. Net earnings increased to \$0.20 per diluted share in the 2009 period from \$0.16 per diluted share in the 2008 period.

Edgar Filing: MARTEN TRANSPORT LTD - Form 10-Q

Comparison of Six Months Ended June 30, 2009 to Six Months Ended June 30, 2008

The following table sets forth for the periods indicated our operating revenue, operating income and operating ratio by segment, along with the change for each component:

(Dollars in thousands)	2009	Six Months Ended June 30,	2008	Dollar Change Six Months Ended June 30, 2009 vs. 2008	Percentage Change Six Months Ended June 30, 2009 vs. 2008
Operating revenue:					
Truckload revenue, net of fuel surcharge revenue	\$ 176,504		\$ 191,137	\$ (14,633)	(7.7)%
Truckload fuel surcharge revenue	21,123		64,066	(42,943)	(67.0)
Total Truckload revenue	197,627		255,203	(57,576)	(22.6)
Logistics revenue, net of intermodal fuel surcharge revenue(1)					
Intermodal fuel surcharge revenue	47,875		44,111	3,764	8.5
Total Logistics revenue	2,257		4,054	(1,797)	(44.3)
Total operating revenue	50,132		48,165	1,967	4.1
Total operating revenue	\$ 247,759		\$ 303,368	\$ (55,609)	(18.3)%
Operating income:					
Truckload	\$ 11,530		\$ 8,361	\$ 3,169	37.9%
Logistics	3,224		3,549	(325)	(9.2)
Total operating income	\$ 14,754		\$ 11,910	\$ 2,844	23.9%
Operating ratio(2):					
Truckload	94.2%		96.7%		2.6%
Logistics	93.6		92.6		(1.1)
Consolidated operating ratio	94.0%		96.1%		2.2%

(1) Logistics revenue is net of \$5.8 million and \$8.6 million of inter-segment revenue in the 2009 and 2008 periods, respectively, for loads transported by our tractors and arranged by MWL that have been eliminated in consolidation.

(2) Operating expenses as a percentage of operating revenue.

Our operating revenue decreased \$55.6 million, or 18.3%, to \$247.8 million in the 2009 period from \$303.4 million in the 2008 period. This decrease was primarily due to fuel surcharge revenue decreasing to \$23.4 million in the 2009 period from \$68.1 million in the 2008 period, caused by significantly lower fuel prices in the 2009 period. Our operating revenue, net of fuel surcharges, decreased \$10.9 million, or 4.6%, to \$224.4 million in the 2009 period from \$235.2 million in the 2008 period. The decrease in operating revenue, net of fuel surcharges, was due to a decrease in truckload revenue, net of fuel surcharges, partially offset by growth in logistics revenue.

Truckload segment revenue decreased \$57.6 million, or 22.6%, to \$197.6 million in the 2009 period from \$255.2 million in the 2008 period. Truckload segment revenue, net of fuel surcharges, decreased 7.7% primarily due to a decrease in our average truckload revenue, net of fuel surcharges, per tractor per week of 7.8% in the 2009 period. Our average miles per tractor decreased by 9.8% in the 2009 period due to the difficult freight environment and our reduced length of haul. This was partially offset by a 1.7% increase in our average truckload revenue, net

of fuel surcharges, per total mile as a result of an improved freight mix and the reduced length of haul. The changes in our operating statistics are consistent with the continued growth of our regional temperature-controlled operations. By focusing on shorter lengths of haul in certain defined

Edgar Filing: MARTEN TRANSPORT LTD - Form 10-Q

areas, we are addressing customer trends toward regional distribution to lower their transportation expense, furthering our own objectives of reducing fuel consumption per load, and matching some of our drivers' desires to stay closer to home. The concentration of a portion of our fleet in these markets is evident in a 7.7% reduction from the 2008 period in average length of haul to 810 miles. Our average fleet size increased by 17 tractors in the 2009 period from the 2008 period. The improvement in our overall cost structure, partially offset by the decrease in revenue per tractor per week, resulted in increased profitability from the 2008 period.

Logistics segment revenue increased \$2.0 million, or 4.1%, to \$50.1 million in the 2009 period from \$48.2 million in the 2008 period. Logistics segment revenue, net of intermodal fuel surcharges, increased 8.5%. The increase in logistics revenue primarily resulted from continued volume growth in each of our internal brokerage and intermodal services, partially offset by a decrease in revenue generated by MWL. Within the difficult freight environment, our operating ratio for the Logistics segment in the 2009 period increased by 1.1% from the 2008 period.

The following table sets forth for the periods indicated the dollar and percentage increase or decrease of the items in our unaudited consolidated condensed statements of operations, and those items as a percentage of operating revenue:

(Dollars in thousands)	Dollar Change Six Months Ended June 30, 2009 vs. 2008	Percentage Change Six Months Ended June 30, 2009 vs. 2008	Percentage of Operating Revenue Six Months Ended June 30, 2009	2008

Net income	\$ 2,408	39.3%	3.4%	2.0%

Edgar Filing: MARTEN TRANSPORT LTD - Form 10-Q

The decrease in salaries, wages and benefits resulted primarily from a 4.8% decrease in the total miles driven by company drivers and a \$1.4 million decrease in our self-insured medical claims, which decreased our employees' health insurance expense, which was partially offset by a \$382,000 increase in bonus compensation expensed for our non-driver employees.

Purchased transportation expense decreased \$10.6 million in total, or 17.9%, in the 2009 period from the 2008 period. Payments to carriers for transportation services we arranged in our brokerage and intermodal operations were \$36.3 million for each of the 2009 and 2008 periods. The portion of purchased transportation expense related to our independent contractors, including fuel surcharges, decreased \$10.6 million in the 2009 period, primarily due to a decrease in the number of independent contractor-owned tractors in our fleet and a decrease in the amount of fuel surcharges paid to the independent contractors.

Net fuel expense (fuel and fuel taxes net of fuel surcharge revenue and surcharges passed through to independent contractors, outside drayage carriers and railroads) decreased \$9.6 million, or 27.0%, to \$26.0 million in the 2009 period from \$35.6 million in the 2008 period. Fuel surcharges passed through to independent contractors, outside drayage carriers and railroads were \$3.2 million in the 2009 period and \$10.0 million in the 2008 period. Over the past year, we have worked diligently to control fuel usage and costs by improving our volume purchasing arrangements and optimizing our drivers' fuel purchases with national fuel centers, focusing on shorter lengths of haul, installing and tightly managing the use of auxiliary power units in our tractors to minimize engine idling and improving fuel usage in our trailers' refrigeration units. Auxiliary power units, which were fully installed in our company-owned tractors as of June 30, 2009, provide climate control and electrical power for our drivers without idling the tractor engine. The decrease in net fuel expense was primarily due to a significant decrease in the D.O.E. national average cost of fuel to \$2.26 per gallon in the 2009 period from \$3.98 per gallon in the 2008 period, a 4.8% decrease in the total miles driven by our company-owned fleet and to the cost control measures stated above. Net fuel expense represented 13.4% of truckload and intermodal revenue, net of fuel surcharges, in the 2009 period, compared with 17.5% in the 2008 period.

The increase in depreciation was primarily due to a continued increase in the cost of revenue equipment and an increase in the relative percentage of company-owned tractors to independent contractor-owned tractors in the 2009 period.

The \$2.0 million decrease in insurance and claims in the 2009 period was primarily due to reduced physical damage claims related to our tractors and trailers and a decrease in the cost of self-insured workers' compensation accident claims.

A decrease in the market value for used revenue equipment, which we believe was driven by capacity reductions in the industry, caused our gain on disposition of revenue equipment to decrease to \$1.0 million in the 2009 period from \$2.0 million in the 2008 period.

As a result of the foregoing factors, our operating expenses as a percentage of operating revenue, or operating ratio, was 94.0% in the 2009 period compared with 96.1% in the 2008 period.

The decrease in interest expense of \$738,000, or 88.3%, in the 2009 period from the 2008 period was primarily the result of lower average debt balances outstanding.

Our effective income tax rate decreased to 41.0% in the 2009 period from 42.2% in the 2008 period, primarily due to several tax credits recorded in the second quarter of 2009.

As a result of the factors described above, net income increased to \$8.5 million in the 2009 period from \$6.1 million in the 2008 period. Net earnings increased to \$0.39 per diluted share in the 2009 period from \$0.28 per diluted share in the 2008 period.

Liquidity and Capital Resources

Our business requires substantial, ongoing capital investments, particularly for new tractors and trailers. Our primary sources of liquidity are funds provided by operations, our unsecured senior notes and our revolving credit facility. A portion of our tractor fleet is provided by independent contractors who own and operate their own equipment. We have no capital expenditure requirements relating to those drivers who own their tractors or obtain financing through third parties. However, to the extent we purchase tractors and extend financing to the independent contractors through our tractor purchase program, we have an associated capital expenditure requirement.

The table below reflects our net cash flows provided by operating activities, net cash flows (used for) provided by investing activities and net cash flows used for financing activities for the periods indicated.

(In thousands)	Six Months Ended June 30,	
	2009	2008
Net cash flows provided by operating activities	\$ 42,528	\$ 21,718
Net cash flows (used for) provided by investing activities	(35,299)	2,770
Net cash flows used for financing activities	(1,640)	(27,032)

In December 2007, our Board of Directors approved a share repurchase program to repurchase up to one million shares of our common stock either through purchases on the open market or through private transactions. The timing and extent to which we will repurchase shares depends on market conditions and other corporate considerations. In the first quarter of 2008 we repurchased and retired 67,500 shares of our common stock for \$810,000. We made no purchases in the remainder of 2008 or in the first six months of 2009. The repurchase program does not have an expiration date.

In the first six months of 2009, we spent \$25.8 million to purchase new revenue equipment, net of proceeds from dispositions. These expenditures were funded with cash flows from operations. We estimate that capital expenditures, net of proceeds from dispositions, will be approximately \$40 million to \$50 million for the remainder of 2009, which we will adjust throughout the year as we size our fleet to existing customer demand. We believe our sources of liquidity are adequate to meet our current and anticipated needs for at least the next twelve months. Based upon anticipated cash flows, existing cash and cash equivalents and marketable securities balances, current borrowing availability and other sources of financing we expect to be available to us, we do not anticipate any significant liquidity constraints in the foreseeable future.

We have outstanding senior unsecured notes with an aggregate principal balance of \$1.4 million at June 30, 2009. These notes mature in April 2010, require annual principal payments of \$1.4 million and bear interest at a fixed annual rate of 8.57%. We have not prepaid the remaining principal balance of these notes due to substantial prepayment penalties.

We maintain a credit agreement that provides for a five-year unsecured committed credit facility maturing in September 2011 in an aggregate principal amount of up to \$75 million. The aggregate principal amount of the credit facility may be increased at our option up to a maximum aggregate principal amount of \$100 million. At June 30, 2009, there was no outstanding principal balance on the credit facility. As of that date, we had outstanding standby letters of credit of \$8.4 million and remaining borrowing availability of \$66.6 million. This facility bears interest at

Edgar Filing: MARTEN TRANSPORT LTD - Form 10-Q

a variable rate based on the London Interbank Offered Rate or the agent bank's Prime Rate, in each case plus/minus applicable margins.

Our credit facility prohibits us from paying, in any fiscal year, dividends in excess of 25% of our net income from the prior fiscal year. The debt agreements discussed above also contain restrictive covenants which, among other matters, require us to maintain certain financial ratios, including debt-to-equity, cash flow

leverage, interest coverage and fixed charge coverage. We were in compliance with all of these covenants at June 30, 2009.

We had \$433,000 in direct financing receivables from independent contractors under our tractor purchase program as of June 30, 2009, compared with \$797,000 in receivables as of December 31, 2008. These receivables, which are collateralized by the financed tractors, are used to attract and retain qualified independent contractors. We deduct payments from the independent contractors' settlements weekly and, as a result, have experienced minimal collection issues for these receivables. The decrease in the receivables balance is related to a program to direct the leases to a third-party leasing vendor beginning in 2007.

The following is a summary of our contractual obligations as of June 30, 2009.

(In thousands)	Remainder of 2009	Payments Due by Period			Total
		2010 and 2011	2012	Thereafter	
Purchase obligations for					
revenue equipment	\$ 5,254	\$	\$	\$	\$ 5,254
Long-term debt obligations		1,428			1,428
Operating lease obligations	234	460	83	56	833
Building construction					
obligations	539				539
Total	\$ 6,027	\$ 1,888	\$ 83	\$ 56	\$ 8,054

Related Parties

We purchase fuel and obtain tires and related services from Bauer Built, Inc., or BBI. Jerry M. Bauer, one of our directors, is the president and a stockholder of BBI. We paid BBI \$382,000 in the first six months of 2009 and \$758,000 in the first six months of 2008 for fuel and tire services. In addition, we paid \$703,000 in the first six months of 2009 and \$1.3 million in the first six months of 2008 to tire manufacturers for tires that we purchased from the tire manufacturers but were provided by BBI. BBI received commissions from the tire manufacturers related to these purchases. Other than any benefit received from his ownership interest, Mr. Bauer receives no compensation or other benefits from our business with BBI.

We paid Durand Builders Service, Inc. \$832,000 in the first six months of 2009 and \$285,000 in the first six months of 2008 for various construction projects. Larry B. Hagness, one of our directors, is the president and owner of Durand Builders Service, Inc. Other than any benefit received from his ownership interest, Mr. Hagness receives no compensation or other benefits from these transactions.

Off-balance Sheet Arrangements

Other than standby letters of credit maintained in connection with our self-insurance programs in the amount of \$8.4 million and operating leases summarized above in our summary of contractual obligations, we did not have any other material off-balance sheet arrangements at June 30, 2009.

Inflation and Fuel Costs

Most of our operating expenses are inflation-sensitive, with inflation generally producing increased costs of operations. During the last two years, the most significant effects of inflation have been on revenue equipment prices, accident claims, health insurance and employee compensation. We attempt to limit the effects of inflation through increases in freight rates and cost control efforts.

In addition to inflation, fluctuations in fuel prices can affect our profitability. We require substantial amounts of fuel to operate our tractors and power the temperature-control units on our trailers. Substantially all of our contracts with customers contain fuel surcharge provisions. Although we historically have been able to pass through most long-term increases in fuel prices and related taxes to customers in the form of surcharges and higher rates, such increases usually are not fully recovered.

Seasonality

Our tractor productivity generally decreases during the winter season because inclement weather impedes operations and some shippers reduce their shipments. At the same time, operating expenses generally increase, with harsh weather creating higher accident frequency, increased claims and more equipment repairs.

Critical Accounting Policies

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions about future events, and apply judgments that affect the reported amounts of assets, liabilities, revenue and expenses in our consolidated condensed financial statements and related notes. We base our estimates, assumptions and judgments on historical experience, current trends and other factors believed to be relevant at the time our consolidated condensed financial statements are prepared. However, because future events and their effects cannot be determined with certainty, actual results could differ from our estimates and assumptions, and such differences could be material. We believe that the following critical accounting policies affect our more significant estimates, assumptions and judgments used in the preparation of our consolidated condensed financial statements.

Revenue Recognition. We recognize revenue, including fuel surcharges, at the time shipment of freight is completed.

Accounts Receivable. We are dependent upon a limited number of customers, and, as a result, our trade accounts receivable are highly concentrated. Trade accounts receivable are recorded at the invoiced amounts, net of an allowance for doubtful accounts. Our allowance for doubtful accounts was \$335,000 as of June 30, 2009 and \$380,000 as of December 31, 2008. A considerable amount of judgment is required in assessing the realization of these receivables including the current creditworthiness of each customer and related aging of the past-due balances, including any billing disputes. In order to assess the collectibility of these receivables, we perform ongoing credit evaluations of our customers financial condition. Through these evaluations, we may become aware of a situation where a customer may not be able to meet its financial obligations due to deterioration of its financial viability, credit ratings or bankruptcy. The allowance for doubtful accounts is based on the best information available to us and is reevaluated and adjusted as additional information is received. We evaluate the allowance based on historical write-off experience, the size of the individual customer balances, past-due amounts and the overall national economy. We review the adequacy of our allowance for doubtful accounts monthly.

Property and Equipment. The transportation industry requires significant capital investments. Our net property and equipment was \$317.7 million as of June 30, 2009 and \$314.3 million as of December 31, 2008.

Our depreciation expense was \$26.8 million for the first six months of 2009 and \$24.3 million for the first six months of 2008. We compute depreciation of our property and equipment for financial reporting purposes based on the cost of each asset, reduced by its estimated salvage value, using the straight-line method over its estimated useful life. We determine and periodically evaluate our estimate of the projected salvage values and useful lives primarily by considering the market for used equipment, prior useful lives and changes in technology. We have not changed our policy regarding salvage values as a percentage of initial cost or useful lives of tractors and trailers within the last ten years. We believe that our policies and past estimates have been reasonable. Actual results could differ from these estimates. A 5% decrease in estimated salvage values would have decreased our net property and equipment as of June 30, 2009 by approximately \$9.0 million, or 2.8%.

In the first six months of 2009, we replaced most of our company-owned tractors within approximately 4.5 years and our trailers within approximately 5.5 years after purchase. Our useful lives for depreciating tractors is five years and trailers is seven years, with a 25% salvage value for tractors and a 35% salvage value for trailers. These salvage values are based upon the expected market values of the equipment after five years for tractors and seven years for trailers. Depreciation expense calculated in this manner approximates the continuing declining value of the revenue equipment, and continues at a consistent straight-line rate for units held beyond the normal replacement cycle. Calculating tractor depreciation expense with a five-year useful life and a 25% salvage value results in the same depreciation rate of 15% of cost per year and the same net book value of 32.5% of cost at the 4.5-year replacement date as using a 4.5-year useful life and 32.5% salvage value. As a result, there is no difference in recorded depreciation expense on a quarterly or annual basis with our five-year useful life and 25% salvage value compared with a 4.5-year useful life and 32.5% salvage value. Similarly, calculating trailer depreciation expense with seven-year useful life and a 35% salvage value results in the same depreciation rate of 9.3% of cost per year and the same net book value of 48.9% of cost at the 5.5-year replacement date as using a 5.5-year useful life and 48.9% salvage value. As a result, there is no difference in recorded depreciation expense on a quarterly or annual basis with our seven-year useful life and 35% salvage value compared with a 5.5-year useful life and 48.9% salvage value.

Impairment of Assets. Long-lived assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to future net undiscounted cash flows expected to be generated by the asset. If such assets are considered to be impaired, the impairment to be recognized is measured by the amount by which the carrying amount of the assets exceeds the fair value of the assets. Assets to be disposed of are reported at the lower of the carrying amount or fair value less the costs to sell.

Insurance and Claims. We self-insure, in part, for losses relating to workers' compensation, auto liability, general liability, cargo and property damage claims, along with employees' health insurance with varying risk retention levels. We maintain insurance coverage for per-incident and total losses in excess of these risk retention levels in amounts we consider adequate based upon historical experience and our ongoing review. However, we could suffer a series of losses within our self-insured retention limits or losses over our policy limits, which could negatively affect our financial condition and operating results. We are responsible for the first \$1.0 million on each auto liability claim and also responsible for up to \$1.0 million for 33% of each auto liability claim amount in excess of \$1.0 million. We are responsible for the first \$750,000 on each workers compensation claim. We have \$8.4 million in standby letters of credit to guarantee settlement of claims under agreements with our insurance carriers and regulatory authorities. The insurance and claims accruals in our consolidated condensed balance sheets were \$22.0 million as of June 30, 2009, and \$21.4 million as of December 31, 2008. We reserve currently for the estimated cost of the uninsured portion of pending claims. We periodically evaluate and adjust these reserves based on our evaluation of the nature and severity of outstanding individual claims and our estimate of future claims development based on historical claims development factors. We believe that our claims development factors have historically been reasonable, as indicated by the adequacy of our insurance and claims accruals compared to settled claims. Actual results could differ from these current estimates. In addition, to the extent that claims are litigated and not settled, jury awards are difficult to predict. If our claims settlement experience worsened causing our historical claims development factors to increase by 5%, our estimated outstanding loss reserves as of June 30, 2009 would have needed to increase by approximately \$3.4 million.

Share-based Payment Arrangement Compensation. We have granted stock options to certain employees and non-employee directors. We recognize compensation expense for all share-based payment arrangements granted after December 31, 2005 and prior to but not yet vested as of December 31, 2005, in accordance with Statement of Financial Accounting Standards No. 123R, Share-Based Payment (SFAS 123R). Under the fair value recognition provisions of SFAS 123R, we record share-based compensation expense net of an estimated forfeiture rate and only record compensation expense for those shares expected to vest on a straight-line basis over the requisite service period for service-based awards (normally the vesting period). Compensation expense will be recorded for performance-based awards in the periods in which the performance condition is probable of achievement. Determining the appropriate fair value model and calculating the fair value of share-based payment arrangements require the input of highly subjective assumptions, including the expected life of the share-based payment arrangements and stock price volatility. We use the Black-Scholes model to value our stock option awards. We believe that future volatility will not materially differ from our historical volatility. Thus, we use the historical volatility of our common stock over the expected life of the award. The assumptions used in calculating the fair value of share-based payment awards represent our best estimates, but these estimates involve inherent uncertainties and the application of judgment. As a result, if factors change and we use different assumptions, share-based compensation expense could be materially different in the future. In addition, we are required to estimate the expected forfeiture rate and only recognize expense for those shares expected to vest. If the actual forfeiture rate is materially different from the estimate, share-based compensation expense could be significantly different from what has been recorded in the current period.

Recent Accounting Pronouncements

In June 2009, the Financial Accounting Standards Board issued Statement of Financial Accounting Standards No. 167, Amendments to FASB Interpretation No. 46(R), (SFAS 167). SFAS 167 eliminates Interpretation No. 46(R)'s exceptions to consolidating qualifying special-purpose entities, contains new criteria for determining the primary beneficiary (the reporting entity that must consolidate the variable interest entity), and increases the frequency of required reassessments to determine whether a company is the primary beneficiary of a variable interest entity. SFAS 167 also clarifies, but does not significantly change, the characteristics that identify a variable interest entity. This statement is effective for the first quarter of 2010. The adoption of SFAS 167 is not expected to have a significant impact on our financial condition, results of operations or cash flows.

Item 3. Quantitative And Qualitative Disclosures About Market Risk.

We are exposed to a variety of market risks, most importantly the effects of the price and availability of diesel fuel. Our operations are heavily dependent upon the use of diesel fuel. The price and availability of diesel fuel can vary and are subject to political, economic and market factors that are beyond our control. Significant increases in diesel fuel costs could materially and adversely affect our results of operations and financial condition. Historically, we have been able to recover a portion of diesel fuel price increases from customers in the form of fuel surcharges.

We presently use fuel surcharges to address the risk of high fuel prices. Fuel surcharge programs are widely accepted among our customers, though they can vary somewhat from customer-to-customer. We believe fuel surcharges are effective at mitigating the risk of high fuel prices, although we do not recover the full amount of fuel price increases.

While we do not currently have any outstanding hedging instruments to mitigate this market risk, we may enter into derivatives or other financial instruments to hedge a portion of our fuel costs in the future.

We from time to time invest our cash in excess of our current needs in a mutual fund that holds short-term debt securities such as commercial paper, repurchase agreements, variable rate demand notes and bank instruments. Holding excess cash in a mutual fund subjects us to fluctuations in the value of the fund's investment portfolio. A drop in value or other unstable market conditions could cause a loss in the value of our short-term investments.

Item 4. Controls and Procedures.

As required by Rule 13a-15 under the Securities Exchange Act of 1934 (the Exchange Act), we have carried out an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Exchange Act Rule 13a-15(e)) as of the end of the period covered by this report. This evaluation was carried out under the supervision and with the participation of our management, including our Chief Executive Officer and our Chief Financial Officer. Based upon that evaluation, our Chief Executive Officer and our Chief Financial Officer concluded that our disclosure controls and procedures were effective as of June 30, 2009. There were no changes in our internal control over financial reporting that occurred during the period covered by this report that have materially affected, or that are reasonably likely to materially affect, our internal control over financial reporting. We intend to periodically evaluate our disclosure controls and procedures as required by the Exchange Act Rules.

PART II. OTHER INFORMATION**Item 1A. Risk Factors.**

We do not believe there are any material changes from the risk factors previously disclosed in Item 1A to Part 1 of our Form 10-K for the year ended December 31, 2008.

Item 4. Submission of Matters to a Vote of Security Holders.

Our annual meeting of stockholders was held on May 5, 2009. The following items were voted upon at the meeting:

(a) Six incumbent directors were elected to serve one-year terms expiring at the annual meeting of stockholders to be held in 2010. The following summarizes the votes cast for, votes withheld and broker non-votes for each nominee:

Nominee	Votes For	Votes Withheld	Broker Non-Votes
Randolph L. Marten	18,771,531	69,016	
Larry B. Hagness	10,179,209	8,661,338	
Thomas J. Winkel	11,703,864	7,136,683	
Jerry M. Bauer	12,665,202	6,175,345	
Robert L. Demorest	18,836,991	3,556	
G. Larry Owens	13,078,059	5,762,488	

(b) The stockholders also voted to confirm the appointment of KPMG LLP as our independent public accountants for the year ending December 31, 2009 by a vote of 19,894,799 shares in favor, 70,137 shares against and 8,873 shares abstaining.

Item 6. Exhibits.

Item No.	Item	Method of Filing
31.1	Certification pursuant to Item 601(b)(31) of Regulation S-K, as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002, by Randolph L. Marten, the Registrant's Chief Executive Officer (Principal Executive Officer)	Filed with this Report.
31.2	Certification pursuant to Item 601(b)(31) of Regulation S-K, as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002, by James J. Hinnendael, the Registrant's Chief Financial Officer (Principal Financial Officer)	Filed with this Report.

32.1 Certification pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002 Filed with this Report.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the Registrant has duly caused this Report to be signed on its behalf by the undersigned, thereunto duly authorized.
