Fair Value Measurements

Generally accepted accounting principles (GAAP) require disclosure regarding the inputs and valuation techniques used to measure fair value and any changes in valuation inputs or techniques. In addition, investments shall be disclosed by major category.

The Fund categorizes its fair value measurements according to a three-level hierarchy that maximizes the use of observable inputs and minimizes the use of unobservable inputs by prioritizing that the most observable input be used when available. Observable inputs are those that market participants would use in pricing an investment based on market data obtained from sources independent of the reporting entity. Unobservable inputs are those that reflect the Fund's assumptions about the information market participants would use in pricing an investment. An investment's level within the fair value hierarchy is based on the lowest level of any input that is deemed significant to the asset or liability's fair value measurement. The input levels are not necessarily an indication of the risk or liquidity associated with investments at that level. For example, certain U.S. government securities are generally high quality and liquid, however, they are reflected as Level 2 because the inputs used to determine fair value may not always be quoted prices in an active market.

Fair value inputs are summarized in the three broad levels listed below:

- Level 1 - Valuations based on quoted prices for investments in active markets that the Fund has the ability to access at the measurement date (including NAV for open-end mutual funds). Valuation adjustments are not applied to Level 1 investments.

Edgar Filing: TRI-CONTINENTAL CORP - Form N-Q

- Level 2 Valuations based on other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risks, etc.).
- Level 3 Valuations based on significant unobservable inputs (including the Fund's own assumptions and judgment in determining the fair value of investments).

Inputs that are used in determining fair value of an investment may include price information, credit data, volatility

Edgar Filing: TRI-CONTINENTAL CORP - Form N-Q

statistics, and other factors. These inputs can be either observable or unobservable. The availability of observable inputs can vary between investments, and is affected by various factors such as the type of investment, and the volume and level of activity for that investment or similar investments in the marketplace. The inputs will be considered by the Investment Manager, along with any other relevant factors in the calculation of an investment's fair value. The Fund uses prices and inputs that are current as of the measurement date, which may include periods of market dislocations. During these periods, the availability of prices and inputs may be reduced for many investments. This condition could cause an investment to be reclassified between the various levels within the hierarchy.

Investments falling into the Level 3 category are primarily supported by quoted prices from brokers and dealers participating in the market for those investments. However, these may be classified as Level 3 investments due to lack of market transparency and corroboration to support these quoted prices. Additionally, valuation models may be used as the pricing source for any remaining investments classified as Level 3. These models rely on one or more significant unobservable inputs and/or significant assumptions by the Investment Manager. Inputs used in valuations may include, but are not limited to, financial statement analysis, capital account balances, discount rates and estimated cash flows, and comparable company data.

The following table is a summary of the inputs used to value the Fund's investments as of September 30, 2011:

The Fund's assets assigned to the Level 2 input category are generally valued using the market approach, in which a security's value is determined

through reference to prices and information from market transactions for similar or identical assets.

Edgar Filing: TRI-CONTINENTAL CORP - Form N-Q

The Fund's assets assigned to the Level 3 category are valued utilizing the valuation technique deemed most appropriate in the circumstances. Certain Limited Partnerships classified as Level 3 securities are valued using the market approach. To determine fair value for these securities, management considered various factors which may have included, but were not limited to, estimated cash flows of the securities and observed yields on securities management deemed comparable.

(a) See the Portfolio of Investments for all investment classifications not indicated in the table.

(b) There were no significant transfers between Levels 1 and 2 during the period.

(c) Money market fund that is a sweep investment for cash balances in the Fund at September 30, 2011.

(d) Derivative instruments are valued at unrealized appreciation (depreciation).

The following table is a reconciliation of Level 3 assets for which significant unobservable inputs were used to determine fair value.

Balance as of December 31, 2010	Limited Partnerships \$ 2,019,088
Accrued discounts/premiums	
Realized gain (loss)	
Change in unrealized appreciation (depreciation)*	(23,988)
Sales	
Purchases	
Transfers into Level 3	
Transfers out of Level 3	
Balance as of September 30, 2011	\$ 1,995,100

*Change in unrealized appreciation (depreciation) relating to securities held at September 30, 2011 was \$(23,988).

Transfers in and/or out of Level 3 are determined based on the fair value at the beginning of the period for security positions held throughout the period.
