EBITDA Reconciliation

The company's management believes earnings before interest, taxes, depreciation and amortization, EBITDA, in addition to operating profit, net income and other measures under United States generally accepted accounting principles, or GAAP, is a useful indicator of Hill's financial and operating performance and its ability to generate cash flows from operations that are available for taxes, capital expenditures and debt service. EBITDA is not a measure of financial performance under GAAP. Investors should recognize that EBITDA might not be comparable to similarly-titled measures of other companies. This measure should be considered in addition to, and not as a substitute for or superior to, any measure of performance prepared in accordance with GAAP. A reconciliation of EBITDA to the most directly comparable GAAP measure follows:
