NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS

1. Management's Interim Financial Statement Representation:

The accompanying consolidated condensed financial statements have been prepared by Winmark Corporation and subsidiaries (the Company), without audit, pursuant to the rules and regulations of the Securities and Exchange Commission. The Company has a 52/53 week year which ends on the last Saturday in December. The information in the consolidated condensed financial statements includes normal recurring adjustments and reflects all adjustments which are, in the opinion of management, necessary for a fair presentation of such financial statements. The consolidated condensed financial statements and notes are presented in accordance with accounting principles generally accepted in the United States of America for interim financial information and with the instructions for Form 10-Q, and therefore do not contain certain information included in the Company's annual consolidated financial statements and notes. This report should be read in conjunction with the audited consolidated financial statements and the notes thereto included in the Company's latest Annual Report on Form 10-K.

Revenues and operating results for the six months ended June 25, 2016 are not necessarily indicative of the results to be expected for the full year.

Reclassifications

Certain reclassifications of previously reported amounts have been made to conform to the current year presentation. Such reclassifications did not impact net income or shareholders' equity (deficit) as previously reported.

2. Organization and Business:

The Company offers licenses to operate franchises using the service marks Plato's Closet®, Once Upon A Child®, Play It Again Sports®, Style Encore® and Music Go Round®. The Company also operates both middle market and small-ticket equipment leasing businesses under the Winmark Capital® and Wirth Business Credit® marks.

3. Fair Value Measurements:

The Company defines fair value as the price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. The Company uses three levels of inputs to measure fair value:

- Level 1 quoted prices in active markets for identical assets and liabilities.
- Level 2 observable inputs other than quoted prices in active markets for identical assets and liabilities.
- Level 3 unobservable inputs in which there is little or no market data available, which require the reporting entity to develop its own assumptions.

The Company's marketable securities were valued based on Level 1 inputs using quoted prices.

Due to their nature, the carrying value of cash equivalents, receivables, payables and debt obligations approximates fair value.

6. Recent Accounting Pronouncements:

In May 2014, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2014-09, *Revenue from Contracts with Customers*, which provides guidance for revenue recognition that supersedes existing revenue recognition guidance (but does not apply to nor supersede accounting guidance for lease contracts). The ASU's core principle is that an entity will recognize revenue when it transfers promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The ASU also requires more detailed disclosures to enable users of financial statements to understand the nature, amount, timing and uncertainty of revenue and cash flows arising from contracts with customers. The ASU is effective for reporting periods beginning after December 15, 2016, and should be applied retrospectively to each prior reporting period presented or retrospectively with the cumulative effect of initially applying the ASU recognized at the date of initial application. In July 2015, the FASB affirmed its proposal to defer the effective date by one year. The new standard will become effective for the Company beginning with the first quarter of fiscal 2018. The Company is currently in the process of evaluating the impact of the adoption of this ASU on the Company's consolidated financial statements.

In January 2016, the FASB issued ASU 2016-01, *Financial Statements – Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities*, which requires equity investments in unconsolidated entities (other than those accounted for using the equity method of accounting) to be measured at fair value with changes in fair value recognized in net income. There will no longer be an available-for-sale classification for equity securities with readily determinable fair values. The new guidance is effective for periods beginning after December 15, 2017, with early adoption permitted. The new standard also makes targeted changes to lessor accounting. This guidance is effective for reporting periods beginning after December 15, 2018, with early adoption permitted. The provisions of this guidance are to be applied using a modified retrospective approach, with elective reliefs, which requires application of the guidance for all periods presented. The Company is currently in the process of evaluating the impact of the adoption of this ASU on the Company's consolidated financial statements.

Edgar Filing: WINMARK CORP - Form 10-Q

The Company currently has two reportable business segments, franchising and leasing. The franchising segment franchises value-oriented retail store concepts that buy, sell, trade and consign merchandise. The leasing segment includes (i) Winmark Capital Corporation, a middle-market equipment leasing business and (ii) Wirth Business Credit, Inc., a small ticket financing business. Segment reporting is intended to give financial statement users a better view of how the Company manages and evaluates its businesses. The Company's internal management reporting is the basis for the information disclosed for its business segments and includes allocation of shared-service costs. Segment assets are those that are directly used in or identified with segment operations, including cash, accounts receivable, prepaid expenses, inventory, property and equipment and investment in leasing operations. Unallocated assets include corporate cash and cash equivalents, marketable securities, current and deferred tax amounts and other corporate assets. Inter-segment balances and transactions have been eliminated. The following tables summarize financial information by segment and provide a reconciliation of segment contribution to operating income:

Table of Contents**ITEM 2: Management's Discussion and Analysis of Financial Condition and Results of Operations.***Overview*

As of June 25, 2016, we had 1,169 franchises operating under the Plato's Closet, Once Upon A Child, Play It Again Sports, Style Encore and Music Go Round brands and had a leasing portfolio of \$37.0 million. Management closely tracks the following financial criteria to evaluate current business operations and future prospects: royalties, leasing activity, and selling, general and administrative expenses.

Our most significant source of franchising revenue is royalties received from our franchise partners. During the first six months of 2016, our royalties increased \$0.9 million or 4.5% compared to the first six months of 2015.

Leasing income net of leasing expense during the first six months of 2016 was \$7.3 million compared to \$8.9 million in the same period last year. Fluctuations in period-to-period leasing income and leasing expense result primarily from the manner and timing in which leasing income and leasing expense is recognized over the term of each particular lease in accordance with accounting guidance applicable to leasing. For this reason, we believe that more meaningful levels of leasing activity are the purchases of equipment for lease customers and the medium- to long-term trend in the size of the leasing portfolio. During the first six months of 2016, we purchased \$10.6 million in equipment for lease customers compared to \$11.4 million in the first six months of 2015. Our leasing portfolio (net investment in leases - current and long-term) decreased to \$37.0 million at June 25, 2016 from \$39.0 million at December 26, 2015.

Management continually monitors the level and timing of selling, general and administrative expenses. The major components of selling, general and administrative expenses include salaries, wages and benefits, advertising, travel, occupancy, legal and professional fees. During the first six months of 2016, selling, general and administrative expenses were comparable to the first six months of 2015.

Management also monitors several nonfinancial factors in evaluating the current business operations and future prospects including franchise openings and closings and franchise renewals. The following is a summary of our franchising activity for the first six months ended June 25, 2016:

	TOTAL 12/26/15	OPENED	CLOSED	TOTAL 6/25/16	SIX MONTHS ENDED 6/25/16 AVAILABLE FOR RENEWAL	COMPLETED RENEWALS

Table of Contents

Renewal activity is a key focus area for management. Our franchisees sign 10-year agreements with us. The renewal of existing franchise agreements as they approach their expiration is an indicator that management monitors to determine the health of our business and the preservation of future royalties. During the first six months of 2016, we renewed 39 of the 41 franchise agreements available for renewal.

Our ability to grow our operating income is dependent on our ability to: (i) effectively support our franchise partners so that they produce higher revenues, (ii) open new franchises, (iii) increase lease originations and minimize write-offs in our leasing portfolio, and (iv) control our selling, general and administrative expenses.

Liquidity and Capital Resources

Our primary sources of liquidity have historically been cash flow from operations and borrowings. As of June 25, 2016, we were in compliance with all of the financial covenants under the Line of Credit and Note Agreement.

We expect to generate the cash necessary to pay our expenses, finance our leasing business and to pay the principal and interest on all of our outstanding debt from cash flows provided by operating activities and by opportunistically using other means to repay or refinance our obligations as we determine appropriate. Our ability to pay our expenses, finance our leasing business and meet our debt service obligations depends on our future performance, which may be affected by financial, business, economic, and other factors including the risk factors described under Item 1A of our Form 10-K for the fiscal year ended December 26, 2015. If we do not have enough money to pay our debt service obligations, we may be required to refinance all or part of our existing debt, sell assets, borrow more money or raise equity. In such an event, we may not be able to refinance our debt, sell assets, borrow more money or raise equity on terms acceptable to us or at all. Also, our ability to carry out any of these activities on favorable terms, if at all, may be further impacted by any financial or credit crisis which may limit access to the credit markets and increase our cost of capital.

We may utilize discounted lease financing to provide funds for a portion of our leasing activities. Rates for discounted lease financing reflect prevailing market interest rates and the credit standing of the lessees for which the payment stream of the leases are discounted. We believe that discounted lease financing will continue to be available to us at competitive rates of interest through the relationships we have established with financial institutions.

We believe that the combination of our cash on hand, the cash generated from our franchising business, cash generated from discounting sources and our Line of Credit will be adequate to fund our planned operations through 2017.

Critical Accounting Policies

The Company prepares the consolidated condensed financial statements of Winmark Corporation and Subsidiaries in conformity with accounting principles generally accepted in the United States of America. As such, the Company is required to make certain estimates, judgments and assumptions that it believes are reasonable based on information available. These estimates and assumptions affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the periods presented. There can be no assurance that actual results will not differ from these estimates. The critical accounting policies that the Company believes are most important to aid in fully understanding and evaluating the reported financial results include the following:

Revenue Recognition – Royalty Revenue and Franchise Fees

The Company collects royalties from each retail franchise based on a percentage of retail store gross sales. The Company recognizes royalties as revenue when earned. At the end of each accounting period, estimates of royalty amounts due are made based on applying historical weekly sales information to the number of weeks of unreported franchisee sales. If there are significant changes in the actual performance of franchisees versus the Company's estimates, its royalty revenue would be impacted. During the first six months of 2016, the Company collected \$104,700 less than it estimated at December 26, 2015. As of June 25, 2016, the Company's royalty receivable was \$1,269,900.

The Company collects initial franchise fees when franchise agreements are signed and recognizes the initial franchise fees as revenue when the franchise is opened, which is when the Company has performed substantially all initial services required by the franchise agreement. Franchise fees collected from franchisees but not yet recognized as income are recorded as deferred revenue in the liability section of the consolidated condensed balance sheet. As of June 25, 2016, deferred franchise fees were \$1,522,900.

Leasing Income Recognition

Leasing income for direct financing leases is recognized under the effective interest method. The effective interest method of income recognition applies a constant rate of interest equal to the internal rate of return on the lease. Generally, when a lease is more than 90 days delinquent (where more than three monthly payments are owed), the lease is classified as being on non-accrual and the Company stops recognizing leasing income on that date. Payments received on leases in non-accrual status generally reduce the lease receivable. Leases on non-accrual status remain classified as such until there is sustained payment performance that, in the Company's judgment, would indicate that all contractual amounts will be collected in full.

In certain circumstances, the Company may re-lease equipment in its existing portfolio. As this equipment may have a fair value greater than its carrying amount when re-leased, the Company may be required to account for the lease as a sales-type lease. At inception of a sales-type lease, revenue is recorded that consists of the present value of the future minimum lease payments discounted at the rate implicit in the lease. In subsequent periods, the recording of income is consistent with the accounting for a direct financing lease.

Edgar Filing: WINMARK CORP - Form 10-Q

For leases that are accounted for as operating leases, income is recognized on a straight-line basis when payments under the lease contract are due.

Allowances for Credit Losses

The Company maintains an allowance for credit losses at an amount that it believes to be sufficient to absorb losses inherent in its existing lease portfolio as of the reporting dates. Leases are collectively evaluated for potential loss. The Company's methodology for determining the allowance for credit losses includes consideration of the level of delinquencies and non-accrual leases, historical net charge-off amounts and review of any significant concentrations.

A provision is charged against earnings to maintain the allowance for credit losses at the appropriate level. If the actual results are different from the Company's estimates, results could be different. The Company's policy is to charge-off against the allowance the estimated unrecoverable portion of accounts once they reach 121 days delinquent. (See Note 5 Investment in Leasing Operations).

Stock-Based Compensation

The Company currently uses the Black-Scholes option pricing model to determine the fair value of stock options. The determination of the fair value of the awards on the date of grant using an option-pricing model is affected by stock price as well as assumptions regarding a number of complex and subjective variables. These variables include implied volatility over the term of the awards, actual and projected employee stock option exercise behaviors, risk-free interest rate and expected dividends.

The Company evaluates the assumptions used to value awards on an annual basis. If factors change and the Company employs different assumptions for estimating stock-based compensation expense in future periods or if the Company decides to use a different valuation model, the future periods may differ significantly from what it has recorded in the current period and could materially affect operating income, net income and earnings per share.

Forward Looking Statements

The statements contained in this Item 2 Management's Discussion and Analysis of Financial Condition and Results of Operations that are not strictly historical fact, including without limitation, the Company's belief that it will have adequate capital and reserves to meet its current and contingent obligations and operating needs, as well as its disclosures regarding market rate risk are forward looking statements made under the safe harbor provision of the Private Securities Litigation Reform Act. Such statements are based on management's current expectations as of the date of this Report, but involve risks, uncertainties and other factors that may cause actual results to differ materially from those contemplated by such forward looking statements. Investors are cautioned to consider these forward looking statements in light of important factors which may result in material variations between results contemplated by such forward looking statements and actual results and conditions. See the section appearing in our Annual Report on Form 10-K for the fiscal year ended December 26, 2015 entitled Risk Factors and Part II, Item 1A in this Report for a more complete discussion of certain factors that may cause the Company's actual results to differ from those in its forward looking statements. You should not place undue reliance on these forward-looking statements, which speak only as of the date they were made. The Company undertakes no obligation to revise or update publicly any forward-looking statements for any reason.

ITEM 3: Quantitative and Qualitative Disclosures About Market Risk

The Company incurs financial market risk in the form of interest rate risk. Risk can be quantified by measuring the financial impact of a near-term adverse increase in short-term interest rates. At June 25, 2016, the Company had available a \$55.0 million line of credit with The PrivateBank and Trust Company and BMO Harris Bank, N.A. The interest rates applicable to this agreement are based on either the bank's base rate or LIBOR for short-term borrowings (twelve months or less). The Company had \$30.5 million of debt outstanding at June 25, 2016 under this line of credit, all of which was in the form of short-term borrowings subject to daily changes in the bank's base rate or LIBOR. The Company's earnings would be affected by changes in these short-term interest rates. With the Company's borrowings at June 25, 2016, a one percent increase in short-term rates would reduce annual pretax earnings by \$305,000. The Company had no interest rate derivatives in place at June 25, 2016.

None of the Company's cash and cash equivalents at June 25, 2016 was invested in money market mutual funds, which are subject to the effects of market fluctuations in interest rates. The Company's portfolio of marketable securities is subject to customary equity market risk.

Foreign currency transaction gains and losses were not material to the Company's results of operations for the six months ended June 25, 2016. During fiscal 2015, less than 5% of the Company's total revenues and 1% of expenses were denominated in a foreign currency. Based upon these revenues and expenses, a 10% increase or decrease in the foreign currency exchange rates would impact annual pretax earnings by approximately \$350,000. To date, the Company has not entered into any foreign currency forward exchange contracts or other derivative financial instruments to hedge the effects of adverse fluctuations in foreign currency exchange rates.

ITEM 4: Controls and Procedures

As of the end of the period covered by this report, the Company conducted an evaluation, under the supervision and with the participation of the principal executive officer and principal financial officer, of its disclosure controls and procedures as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (the Exchange Act). Based upon, and as of the date of that evaluation, the principal executive officer and principal financial officer concluded that the Company's disclosure controls and procedures are effective to ensure that information required to be disclosed by the Company in reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms, and that such information is accumulated and communicated to the Company's management, including its principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosure. There was no change in the Company's internal control over financial reporting during its most recently completed fiscal quarter that has materially affected, or is reasonably likely to materially affect, its internal control over financial reporting.

We are aware of no material changes to the Risk Factors discussed in our Annual Report on Form 10-K for the year ended December 26, 2015.
