(Commission file number)

PRINCIPAL FINANCIAL GROUP, INC.

(Exact name of registrant as specified in its charter)

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-Q

Delaware

(State or other jurisdiction of incorporation or organization)

42-1520346

(I.R.S. Employer Identification Number)

711 High Street, Des Moines, Iowa 50392

(Address of principal executive offices)

(515) 247-5111

(Registrant's telephone number, including area code)

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports) and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company or an emerging growth company. See the definitions of large accelerated filer, accelerated filer, smaller reporting company and emerging growth company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company Emerging growth company
(Do not check if a smaller reporting company)

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The total number of shares of the registrant's Common Stock, \$0.01 par value, outstanding as of July 25, 2018, was 284,748,761.

Notes to Consolidated Financial Statements

**June 30, 2018
(Unaudited)**

1. Nature of Operations and Significant Accounting Policies

Basis of Presentation

The accompanying unaudited consolidated financial statements of Principal Financial Group, Inc. (PFG) have been prepared in conformity with accounting principles generally accepted in the U.S. (U.S. GAAP) for interim financial statements and with the instructions to Form 10-Q and Article 10 of Regulation S-X. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for the three and six months ended June 30, 2018, are not necessarily indicative of the results that may be expected for the year ended December 31, 2018. These interim unaudited consolidated financial statements should be read in conjunction with our annual audited financial statements as of December 31, 2017, included in our Form 10-K for the year ended December 31, 2017, filed with the United States Securities and Exchange Commission (SEC). The accompanying consolidated statement of financial position as of December 31, 2017, has been derived from the audited consolidated statement of financial position but does not include all of the information and footnotes required by U.S. GAAP for complete financial statements.

Certain reclassifications have been made to the prior period consolidated statements of cash flows to conform to the current period presentation.

Consolidation

We have relationships with various special purpose entities and other legal entities that must be evaluated to determine if the entities meet the criteria of a variable interest entity (VIE) or a voting interest entity (VOE). This assessment is performed by reviewing contractual, ownership and other rights, including involvement of related parties, and requires use of judgment. First, we determine if we hold a variable interest in an entity by assessing if we have the right to receive expected losses and expected residual returns of the entity. If we hold a variable interest, then the entity is assessed to determine if it is a VIE. An entity is a VIE if the equity at risk is not sufficient to support its activities, if the equity holders lack a controlling financial interest or if the entity is structured with non-substantive voting rights. In addition to the previous criteria, if the entity is a limited partnership or similar entity, it is a VIE if the limited partners do not have the power to direct the entity's most significant activities through substantive kick-out rights or participating rights. A VIE is evaluated to determine the primary beneficiary. The primary beneficiary of a VIE is the enterprise with (1) the power to direct the activities of a VIE that most significantly impact the entity's economic performance and (2) the obligation to absorb losses of the entity or the right to receive benefits from the entity that could potentially be significant to the VIE. When we are the primary beneficiary, we are required to consolidate the entity in our financial statements. We reassess our involvement with VIEs on a quarterly basis. For further information about VIEs, refer to Note 2, Variable Interest Entities.

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-Q

If an entity is not a VIE, it is considered a VOE. VOEs are generally consolidated if we own a greater than 50% voting interest. If we determine our involvement in an entity no longer meets the requirements for consolidation under either the VIE or VOE models, the entity is deconsolidated. Entities in which we have management influence over the operating and financing decisions but are not required to consolidate, other than investments accounted for at fair value under the fair value option, are reported using the equity method.

Recent Accounting Pronouncements

Description	Date of adoption	Effect on our consolidated financial statements or other significant matters
<i>Standards not yet adopted:</i>		
<p>Goodwill impairment testing This authoritative guidance simplifies how an entity is required to test goodwill for impairment by eliminating Step 2 (which measures a goodwill impairment loss by comparing the implied fair value of a reporting unit's goodwill to the carrying amount of that goodwill) from the goodwill impairment test. A goodwill impairment loss will be the amount by which a reporting unit's carrying value exceeds its fair value, not to exceed the carrying amount of goodwill. Entities will continue to have the option to perform a qualitative assessment to determine if a quantitative impairment test is necessary. Early adoption is permitted.</p>	January 1, 2020	We are currently evaluating the impact this guidance will have on our consolidated financial statements.
<p>Credit losses This authoritative guidance requires entities to use a current expected credit loss (CECL) model to measure impairment for most financial assets that are not recorded at fair value through net income. Under the CECL model, an entity will estimate lifetime expected credit losses considering available relevant information about historical events, current conditions and reasonable and supportable forecasts. The CECL model does not apply to available-for-sale debt securities. This guidance also expands the required credit loss disclosures and will be applied using a modified retrospective approach by recording a cumulative effect adjustment to retained earnings as of the beginning of the fiscal year of adoption. Early adoption is permitted.</p>	January 1, 2020	We are currently evaluating the impact this guidance will have on our consolidated financial statements. We believe estimated credit losses under the CECL model will generally result in earlier loss recognition for loans and other receivables.
<p>Targeted improvements to accounting for hedging activities This authoritative guidance updates certain recognition and</p>	January 1, 2019	We are currently evaluating the impact this guidance will have on our consolidated financial statements.

<p>measurement requirements for hedge accounting. The objective of the guidance is to more closely align the economics of a company's risk management activities in its financial results and reduce the complexity of applying hedge accounting. The updates include the expansion of hedging strategies that are eligible for hedge accounting, elimination of the separate measurement and reporting of hedge ineffectiveness, presentation of the changes in the fair value of the hedging instrument in the same consolidated statement of operations line as the earnings effect of the hedged item and simplification of hedge effectiveness assessments. This guidance also includes new disclosures and will be applied using a modified retrospective approach by recording a cumulative effect adjustment to retained earnings as of the beginning of the fiscal year of adoption. Early adoption is permitted.</p>		
<p>Premium amortization on purchased callable debt securities This authoritative guidance applies to entities that hold certain non-contingently callable debt securities, where the amortized cost basis is at a premium to the price repayable by the issuer at the earliest call date. Under the guidance the premium will be amortized to the first call date. This guidance requires adoption through a cumulative effect adjustment to retained earnings as of the beginning of the fiscal year of adoption. Early adoption is permitted.</p>	<p>January 1, 2019</p>	<p>We are currently evaluating the impact this guidance will have on our consolidated financial statements.</p>

Table of Contents

Principal Financial Group, Inc.
Notes to Consolidated Financial Statements (continued)
June 30, 2018
(Unaudited)

Description	Date of adoption	Effect on our consolidated financial statements or other significant matters
<p>Nonemployee share-based payment accounting</p> <p>This authoritative guidance simplifies the accounting for share-based payments to nonemployees by generally aligning it with the accounting for share-based payments to employees. Under the guidance, the measurement of equity-classified nonemployee awards will be fixed at the grant date, where today the measurement is fixed at performance completion date. The guidance will be applied to equity-classified nonemployee awards for which a measurement date has not been established as of the date of adoption by recognizing a cumulative effect adjustment to retained earnings as of the beginning of the annual period of adoption. Early adoption is permitted.</p>	January 1, 2019	We are currently evaluating the impact this guidance will have on our consolidated financial statements.
<p>Leases</p> <p>This authoritative guidance requires lessee recognition of lease assets and lease liabilities on the balance sheet. The concept of an operating lease, where the lease assets and liabilities are off balance sheet, is eliminated under the new guidance. For lessors, the guidance modifies lease classification criteria and accounting for certain types of leases. Other key aspects of the guidance relate to the removal of the current real estate-specific guidance and new presentation and disclosure requirements. Lessees and lessors are required to recognize and measure leases at the beginning of the earliest period presented using a modified retrospective approach, which includes certain optional practical expedients that may be elected. Early adoption is permitted.</p>	January 1, 2019	Our evaluation process includes, but is not limited to, identifying leases that are within the scope of the guidance, reviewing and documenting our accounting for these contracts, implementing system and process changes and determining disclosure impacts. We are currently evaluating other impacts this guidance will have on our consolidated financial statements.

Description	Date of adoption	Effect on our consolidated financial statements or other significant matters
<p>Revenue recognition This authoritative guidance replaces all general and most industry specific revenue recognition guidance currently prescribed by U.S. GAAP. The core principle is that an entity recognizes revenue to reflect the transfer of a promised good or service to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for that good or service. This guidance also provides clarification on when an entity is a principal or an agent in a transaction. In addition, the guidance updates the accounting for certain costs associated with obtaining and fulfilling a customer contract. The guidance may be applied using one of the following two methods: (1) retrospectively to each prior reporting period presented, or (2) retrospectively with the cumulative effect of initially applying the standard recognized at the date of initial application.</p>	January 1, 2018	We adopted the guidance using the modified retrospective approach. The guidance did not have a material impact on our consolidated financial statements. Further details are included under the caption Adoption of Revenue Recognition Guidance and in Note 13, Revenues from Contracts with Customers.
<p>Income tax - intra-entity transfers of assets This authoritative guidance requires entities to recognize current and deferred income tax resulting from an intra-entity asset transfer when the transfer occurs. Prior to issuance of this guidance, U.S. GAAP did not allow recognition of income tax consequences until the asset had been sold to a third party. This guidance requires adoption through a cumulative effect adjustment to the balance sheet as of the beginning of the fiscal year of adoption with early adoption permitted.</p>	January 1, 2018	We adopted the guidance using the modified retrospective approach. A cumulative effect adjustment of \$8.7 million was recorded as an increase to retained earnings. In addition, other assets and deferred income taxes decreased \$21.1 million and \$29.8 million, respectively, due to the adoption of this guidance.
<p>Financial instruments - recognition and measurement This authoritative guidance addresses certain aspects of recognition, measurement, presentation and disclosure of financial instruments. The guidance eliminated the classification of equity securities into different categories (trading or available-for-sale) and requires equity investments to be measured at fair value with changes in the fair value recognized through net income. The guidance also updated certain financial instrument disclosures and eliminated the</p>	January 1, 2018	We adopted this guidance using the modified retrospective approach. A cumulative effect adjustment of \$1.0 million was recorded as a decrease to AOCI and a corresponding increase to retained earnings. The guidance did not have a material impact on our consolidated financial statements. As of December 31, 2017, we had \$96.0 million of equity securities classified as available-for-sale and \$1,770.6 million classified as trading. The consolidated

requirement to disclose the methods and significant assumptions used to estimate the fair value of financial instruments that are measured at amortized cost on the balance sheet.

statements of financial position have been updated to eliminate these classifications and present only equity securities. See Note 3, Investments, for further details.

Description	Date of adoption	Effect on our consolidated financial statements or other significant matters
<p>Nonfinancial asset derecognition and partial sales of nonfinancial assets</p> <p>This authoritative guidance clarifies the scope of the recently established guidance on nonfinancial asset derecognition and the accounting for partial sales of nonfinancial assets. The guidance conforms the derecognition guidance on nonfinancial assets with the model for transactions in the new revenue recognition standard.</p>	January 1, 2018	The guidance was adopted and did not have a material impact on our consolidated financial statements.
<p>Presentation of net periodic pension cost and net periodic postretirement benefit cost</p> <p>This authoritative guidance requires that an employer disaggregate the service cost component from the other components of net benefit cost. The guidance also provides explicit guidance on the presentation of the service cost component and the other components of net benefit cost in the consolidated statement of operations and allows only the service cost component of net benefit cost to be eligible for capitalization.</p>	January 1, 2018	The guidance was adopted and did not have a material impact on our consolidated financial statements.
<p>Definition of a business</p> <p>This authoritative guidance clarifies the definition of a business to assist with evaluating when transactions involving an integrated set of assets and activities (a set) should be accounted for as acquisitions or disposals of assets or businesses. The guidance requires that when substantially all of the fair value of the gross assets acquired or disposed of is concentrated in a single identifiable asset or a group of similar identifiable assets, the set is not a business. The guidance also requires a set to include, at a minimum, an input and a substantive process that together significantly contribute to the ability to create output to be considered a business. Lastly, the guidance removes the evaluation of whether a market participant could replace missing elements and narrows the definition of outputs by more closely aligning it with how</p>	January 1, 2018	The guidance was adopted and did not have a material impact on our consolidated financial statements.

<p>outputs are described in the revenue recognition guidance. The guidance will be applied prospectively. Early application is permitted in certain circumstances.</p>		
<p>Employee share-based payment accounting This authoritative guidance changes certain aspects of accounting for and reporting share-based payments to employees including changes related to the income tax effects of share-based payments, tax withholding requirements and accounting for forfeitures. Various transition methods will apply depending on the situation being addressed.</p>	<p>January 1, 2017</p>	<p>The guidance was adopted prospectively as indicated by the guidance for each area of change and did not have a material impact on our consolidated financial statements.</p>

When we adopt new accounting standards, we have a process in place to perform a thorough review of the pronouncement, identify the financial statement and system impacts and create an implementation plan among our impacted business units to ensure we are compliant with the pronouncement on the date of adoption. This includes having effective processes and controls in place to support the reported amounts. Each of the standards listed above is in varying stages in our implementation process based on its issuance and adoption dates. We are on track to implement guidance by the respective effective dates.

(Unaudited)

Adoption of Revenue Recognition Guidance

On January 1, 2018, we adopted the guidance using the modified retrospective approach. A cumulative effect adjustment of \$39.7 million was recorded as a decrease to total stockholders' equity. The impact of the guidance to our consolidated financial statements primarily relates to a change to the amortization pattern, or a write-off, of existing capitalized costs transferred from deferred acquisition costs (DAC) to a contract cost asset, where authoritative guidance was superseded. This was offset in part by deferring certain sales compensation related to obtaining customer contracts that was not previously capitalized.

Results of reporting periods beginning January 1, 2018, are presented under the new guidance, while prior period amounts are not adjusted and continue to be reported in accordance with our legacy accounting. The guidance did not have a material impact on our consolidated statements of operations and did not impact earnings per common share. The impacts to the consolidated statements of financial position were as follows:

Consolidated Statements of Financial Position

	June 30, 2018		
	As reported	As adjusted (1)	Impact of adopting
		<i>(in millions)</i>	revenue recognition
			accounting guidance
Assets			
Deferred acquisition costs (2)	\$ 3,574.4	\$ 3,766.9	\$ (192.5)
Other assets (3)	1,488.9	1,351.7	137.2
Liabilities			
Deferred income taxes	887.9	908.3	(20.4)
Stockholders' equity			
Total stockholders' equity	11,706.5	11,741.4	(34.9)

(1) Excludes the impact of adopting revenue recognition accounting guidance.

(2) Certain costs to obtain a contract previously recorded as DAC are now recorded as a contract cost asset or are no longer deferrable under revenue recognition guidance.

(3) Includes the contract cost asset.

Separate Accounts

The separate accounts are legally segregated and are not subject to the claims that arise out of any of our other business. The client, rather than us, directs the investments and bears the investment risk of these funds. The separate account assets represent the fair value of funds that are separately administered by us for contracts with equity, real estate and fixed income investments and are presented as a summary total within the consolidated statements of financial position. An equivalent amount is reported as separate account liabilities, which represent the obligation to return the monies to the client. We receive fees for mortality, withdrawal and expense risks, as well as administrative, maintenance and investment advisory services that are included in the consolidated statements of operations. Net deposits, net investment income and realized and unrealized capital gains and losses of the separate accounts are not reflected in the consolidated statements of operations.

Separate account assets and separate account liabilities include certain international retirement accumulation products where the segregated funds and associated obligation to the client are consolidated within our financial statements. We have determined that summary totals are the most meaningful presentation for these funds.

Table of Contents

Principal Financial Group, Inc.
Notes to Consolidated Financial Statements (continued)
June 30, 2018
(Unaudited)

As of June 30, 2018 and December 31, 2017, the separate accounts included a separate account valued at \$122.1 million and \$170.5 million, respectively, which primarily included shares of our stock that were allocated and issued to eligible participants of qualified employee benefit plans administered by us as part of the policy credits issued under our 2001 demutualization. These shares are included in both basic and diluted earnings per share calculations. In the consolidated statements of financial position, the separate account shares are recorded at fair value and are reported as separate account assets with a corresponding separate account liability to eligible participants of the qualified plan. Changes in fair value of the separate account shares are reflected in both the separate account assets and separate account liabilities and do not impact our results of operations.

2. Variable Interest Entities

We have relationships with various types of entities which may be VIEs. Certain VIEs are consolidated in our financial results. See Note 1, Nature of Operations and Significant Accounting Policies, under the caption Consolidation for further details of our consolidation accounting policies. We did not provide financial or other support to investees designated as VIEs for the periods ended June 30, 2018 and December 31, 2017.

Consolidated Variable Interest Entities

Grantor Trusts

We contributed undated subordinated floating rate notes to two grantor trusts. The trusts separated their cash flows by issuing an interest-only certificate and a residual certificate related to each note contributed. Each interest-only certificate entitles the holder to interest on the stated note for a specified term, while the residual certificate entitles the holder to interest payments subsequent to the term of the interest-only certificate and to all principal payments. We retained the interest-only certificates and the residual certificates were subsequently sold to third parties. We determined these grantor trusts are VIEs due to insufficient equity to sustain them. We determined we are the primary beneficiary as a result of our contribution of securities into the trusts and our significant continuing interest in the trusts.

Commercial Mortgage-Backed Securities

We sold commercial mortgage loans to a real estate mortgage investment conduit trust. The trust issued various commercial mortgage-backed securities (CMBS) certificates using the cash flows of the underlying commercial mortgage loans it purchased. This is considered a VIE due to insufficient equity to sustain itself. We determined we are the primary beneficiary as we retained the special servicing role for the assets within

the trust as well as the ownership of the bond class that controls the unilateral kick-out rights of the special servicer.

Mandatory Retirement Savings Funds

We hold an equity interest in Chilean mandatory privatized social security funds in which we provide asset management services. We determined the mandatory privatized social security funds, which also include contributions for voluntary pension savings, voluntary non-pension savings and compensation savings accounts, are VIEs. This is because the equity holders as a group lack the power, due to voting rights or similar rights, to direct the activities of the entity that most significantly impact the entity's economic performance and also because equity investors are protected from below-average market investment returns relative to the industry's return, due to a regulatory guarantee that we provide. Further we concluded we are the primary beneficiary through our power to make decisions and our significant variable interest in the funds. The purpose of the funds, which reside in legally segregated entities, is to provide long-term retirement savings. The obligation to the customer is directly related to the assets held in the funds and, as such, we present the assets as separate account assets and the obligation as separate account liabilities within our consolidated statements of financial position.

Principal International Hong Kong offers retirement pension schemes in which we provide trustee, administration and asset management services to employers and employees under the Hong Kong Mandatory Provident Fund (MPF) and Occupational Retirement Schemes Ordinance (ORSO) pension schemes. Each pension scheme has various guaranteed and non-guaranteed constituent funds, or investment options, in which customers can invest their money. The guaranteed funds provide either a guaranteed rate of return to the customer or a minimum guarantee on withdrawals under certain qualifying events. We determined the guaranteed funds are VIEs due to the fact the equity holders, as a group, lack the obligation to absorb expected losses due to the guarantee we provide. We concluded we are the primary beneficiary because we have the

Table of Contents

Principal Financial Group, Inc.
Notes to Consolidated Financial Statements (continued)
June 30, 2018
(Unaudited)

power to make decisions and to receive benefits and the obligation to absorb losses that could be potentially significant to the VIE. Therefore, we consolidate the underlying assets and liabilities of the funds and present as separate accounts or within the general account, depending on the terms of the guarantee.

Real Estate

We invest in several real estate limited partnerships and limited liability companies. The entities invest in real estate properties. Certain of these entities are VIEs based on the combination of our significant economic interest and related voting rights. We determined we are the primary beneficiary as a result of our power to control the entities through our significant ownership. Due to the nature of these real estate investments, the investment balance will fluctuate as we purchase and sell interests in the entities and as capital expenditures are made to improve the underlying real estate.

Sponsored Investment Funds

We sponsor and invest in certain investment funds for which we provide asset management services. Although our asset management fee is commensurate with the services provided and consistent with fees for similar services negotiated at arms-length, we have a variable interest for funds where our other interests are more than insignificant. The funds are VIEs as the equity holders lack power through voting rights to direct the activities of the entity that most significantly impact its economic performance. We determined we are the primary beneficiary of the VIEs where our interest in the entity is more than insignificant and we are the asset manager.

We also invest in certain series of another investment fund. These series are VIEs as the equity holders of each series lack the power to direct the most significant activities of the VIE. We determined we are the primary beneficiary of these series as our interest is more than insignificant and collectively we have the power to direct the most significant activities of the fund.

Assets and Liabilities of Consolidated Variable Interest Entities

The carrying amounts of our consolidated VIE assets, which can only be used to settle obligations of consolidated VIEs, and liabilities of consolidated VIEs for which creditors do not have recourse were as follows:

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-Q

	June 30, 2018		December 31, 2017	
	Total assets	Total liabilities	Total assets	Total liabilities
	<i>(in millions)</i>			
Grantor trusts (1)	\$ 243.8	\$ 229.2	\$ 268.8	\$ 253.1
CMBS	8.0		9.4	
Mandatory retirement savings funds (2)	40,157.7	39,794.8	42,311.4	41,921.4
Real estate (3)	351.5	56.5	387.1	19.5
Sponsored investment funds (4)	260.3	12.4	178.1	1.0
Total	\$ 41,021.3	\$ 40,092.9	\$ 43,154.8	\$ 42,195.0

- (1) The assets of grantor trusts are primarily fixed maturities, available-for-sale. The liabilities are primarily other liabilities that reflect an embedded derivative of the forecasted transaction to deliver the underlying securities.
- (2) The assets of the mandatory retirement savings funds include separate account assets and equity securities. The liabilities include separate account liabilities and contractholder funds.
- (3) The assets of the real estate VIEs primarily include real estate, other investments and cash. Liabilities primarily include long-term debt and other liabilities.
- (4) The assets of sponsored investment funds are primarily fixed maturities and equity securities, which are reported with other investments, and cash. The consolidated statements of financial position included a \$66.3 million and \$52.4 million redeemable noncontrolling interest for sponsored investment funds as of June 30, 2018 and December 31, 2017, respectively.

Table of Contents

Principal Financial Group, Inc.
Notes to Consolidated Financial Statements (continued)
June 30, 2018
(Unaudited)

Unconsolidated Variable Interest Entities

Invested Securities

We hold a variable interest in a number of VIEs where we are not the primary beneficiary. Our investments in these VIEs are reported in fixed maturities, available-for-sale; fixed maturities, trading; equity securities (equity securities, trading as of December 31, 2017) and other investments in the consolidated statements of financial position and are described below.

Unconsolidated VIEs include certain CMBS, residential mortgage-backed pass-through securities (RMBS) and other asset-backed securities (ABS). All of these entities were deemed VIEs because the equity within these entities is insufficient to sustain them. We determined we are not the primary beneficiary in the entities within these categories of investments. This determination was based primarily on the fact we do not own the class of security that controls the unilateral right to replace the special servicer or equivalent function.

We invest in cash collateralized debt obligations, collateralized bond obligations, collateralized loan obligations and other collateralized structures, which are VIEs due to insufficient equity to sustain the entities. We have determined we are not the primary beneficiary of these entities primarily because we do not control the economic performance of the entities and were not involved with the design of the entities or because we do not have a potentially significant variable interest in the entities for which we are the asset manager.

We have invested in various VIE trusts and similar entities as a debt holder. Most of these entities are classified as VIEs due to insufficient equity to sustain them. In addition, we have an entity classified as a VIE based on the combination of our significant economic interest and lack of voting rights. We have determined we are not the primary beneficiary primarily because we do not control the economic performance of the entities and were not involved with the design of the entities.

We have invested in partnerships and other funds, which are classified as VIEs. The entities are VIEs as equity holders lack the power to control the most significant activities of the entities because the equity holders do not have either the ability by a simple majority to exercise substantive kick-out rights or substantive participating rights. We have determined we are not the primary beneficiary because we do not have the power to direct the most significant activities of the entities.

As previously discussed, we sponsor and invest in certain investment funds that are VIEs. We determined we are not the primary beneficiary of the VIEs for which we are the asset manager but do not have a potentially significant variable interest in the funds.

We hold an equity interest in Mexican mandatory privatized social security funds in which we provide asset management services. Our equity interest in the funds is considered a variable interest. We concluded the funds are VIEs because the equity holders as a group lack decision-making ability through their voting rights. We are not the primary beneficiary of the VIEs because although we, as the asset manager, have the power to direct the activities of the VIEs, we do not have a potentially significant variable interest in the funds.

Commercial mortgage-backed securities	0.7	0.7
Equity securities	77.1	77.1
Other investments:		
Other limited partnership and fund interests	797.4	1,438.0

(1) Our risk of loss is limited to our initial investment measured at amortized cost for fixed maturities, available-for-sale. Our risk of loss is limited to our investment measured at fair value for our fixed maturities, trading and equity securities. Our risk of loss is limited to our carrying value plus any unfunded commitments and/or guarantees and similar provisions for our other investments. Unfunded commitments are not liabilities on our consolidated statements of financial position because we are only required to fund additional equity when called upon to do so by the general partner or investment manager.

(2) As of June 30, 2018, the maximum exposure to loss for other limited partnership and fund interests excludes \$557.7 million of debt within certain of our managed international real estate funds that is fully secured by assets whose value exceeds the amount of the debt, but may also include recourse to the investment manager.

Money Market Funds

We are the investment manager for certain money market mutual funds. These types of funds are exempt from assessment under any consolidation model due to a scope exception for money market funds registered under Rule 2a-7 of the Investment Company Act of 1940 or similar funds. As of June 30, 2018 and December 31, 2017, money market mutual funds we manage held \$3.9 billion and \$4.4 billion in total assets, respectively. We have no contractual obligation to contribute to these funds; however, we provide support through the waiver of fees and through expense reimbursements. The amount of fees waived and expenses reimbursed was insignificant.

Principal Financial Group, Inc.
Notes to Consolidated Financial Statements (continued)
June 30, 2018
(Unaudited)

3. Investments

Fixed Maturities and Equity Securities

Fixed maturities include bonds, ABS, redeemable preferred stock and certain non-redeemable preferred securities. Equity securities include mutual funds, common stock, non-redeemable preferred stock and required regulatory investments. We classify fixed maturities as either available-for-sale or trading at the time of the purchase and, accordingly, carry them at fair value. Equity securities are also carried at fair value. See Note 11, Fair Value Measurements, for methodologies related to the determination of fair value. Unrealized gains and losses related to fixed maturities, available-for-sale, excluding those in fair value hedging relationships, are reflected in stockholders equity, net of adjustments associated with DAC and related actuarial balances, derivatives in cash flow hedge relationships and applicable income taxes. Mark-to-market adjustments on equity securities, unrealized gains and losses related to hedged portions of fixed maturities, available-for-sale in fair value hedging relationships and mark-to-market adjustments on certain fixed maturities, trading are reflected in net realized capital gains (losses). Mark-to-market adjustments related to certain securities carried at fair value with an investment objective to realize economic value through mark-to-market changes are reflected in net investment income.

The cost of fixed maturities is adjusted for amortization of premiums and accrual of discounts, both computed using the interest method. The cost of fixed maturities, available-for-sale is adjusted for declines in value that are other than temporary. Impairments in value deemed to be other than temporary are primarily reported in net income as a component of net realized capital gains (losses), with noncredit impairment losses for certain fixed maturities, available-for-sale reported in other comprehensive income (OCI). For loan-backed and structured securities, we recognize income using a constant effective yield based on currently anticipated cash flows.

The recognition and measurement of equity investments was changed under authoritative guidance effective January 1, 2018. The guidance eliminated the classification of equity securities into different categories (trading or available-for-sale) and requires equity investments to be measured at fair value with changes in the fair value recognized through net income. See Note 1, Nature of Operations and Significant Accounting Policies, under the caption Recent Accounting Pronouncements for details of the adoption.

Total	\$ 58,505.1	\$ 59,311.7

Actual maturities may differ because borrowers may have the right to call or prepay obligations. Our portfolio is diversified by industry, issuer and asset class. Credit concentrations are managed to established limits.

Net Realized Capital Gains and Losses

Net realized capital gains and losses on sales of investments are determined on the basis of specific identification. In general, in addition to realized capital gains and losses on investment sales and periodic settlements on derivatives not

Table of Contents

Principal Financial Group, Inc.
Notes to Consolidated Financial Statements (continued)
June 30, 2018
(Unaudited)

designated as hedges, we report gains and losses related to the following in net realized capital gains (losses): other-than-temporary impairments of securities and subsequent realized recoveries, mark-to-market adjustments on equity securities, mark-to-market adjustments on certain fixed maturities, trading, mark-to-market adjustments on sponsored investment funds, fair value hedge and cash flow hedge ineffectiveness, mark-to-market adjustments on derivatives not designated as hedges, changes in the mortgage loan valuation allowance provision, impairments of real estate held for investment and impairments on equity method investments. Investment gains and losses on sales of certain real estate held for sale due to investment strategy and mark-to-market adjustments on certain securities carried at fair value with an investment objective to realize economic value through mark-to-market changes are reported as net investment income and are excluded from net realized capital gains (losses). The major components of net realized capital gains (losses) on investments were as follows:

	For the three months ended		For the six months ended	
	June 30,		June 30,

(1) Unrealized gains (losses) on fixed maturities, trading still held at the reporting date were \$(2.7) million and \$1.4 million for the three months ended June 30, 2018 and 2017, respectively, and \$(13.4) million and \$2.4 million for the six months ended June 30, 2018 and 2017, respectively.

(2) Unrealized gains (losses) on equity securities, trading still held at the reporting date were \$9.9 million and \$27.6 million for the three and six months ended June 30, 2017, respectively. This excludes \$6.6 million and \$27.3 million of unrealized gains (losses) on equity securities, trading still held at the reporting date for the three and six months ended June 30, 2017, respectively, that were reported in net investment income.

(3) Unrealized gains (losses) on equity securities still held at the reporting date were \$0.1 million and \$(14.1) million for the three and six months ended June 30, 2018, respectively. This excludes \$3.3 million and \$3.2 million of unrealized gains (losses) on equity securities still held at the reporting date for the three and six months ended June 30, 2018, respectively, that were reported in net investment income.

- (4) Other gains in 2018 primarily include a gain from the sale of an equity method investment.

Proceeds from sales of investments (excluding call and maturity proceeds) in fixed maturities, available-for-sale were \$525.9 million and \$444.1 million for the three months ended June 30, 2018 and 2017, and \$1,737.7 million and \$805.4 million for the six months ended June 30, 2018 and 2017, respectively.

Other-Than-Temporary Impairments

We have a process in place to identify fixed maturity securities that could potentially have an impairment that is other than temporary. Prior to 2018, we also used this process to assess equity securities for impairment. This process involves monitoring market events that could impact issuers' credit ratings, business climate, management changes, litigation and government actions and other similar factors. This process also involves monitoring late payments, pricing levels, downgrades by rating agencies, key financial ratios, financial statements, revenue forecasts and cash flow projections as indicators of credit issues.

Table of Contents

Principal Financial Group, Inc.
Notes to Consolidated Financial Statements (continued)
June 30, 2018
(Unaudited)

Each reporting period, all securities are reviewed to determine whether an other-than-temporary decline in value exists and whether losses should be recognized. We consider relevant facts and circumstances in evaluating whether a credit or interest rate related impairment of a security is other than temporary. Relevant facts and circumstances considered include: (1) the extent and length of time the fair value has been below cost; (2) the reasons for the decline in value; (3) the financial position and access to capital of the issuer, including the current and future impact of any specific events; (4) for structured securities, the adequacy of the expected cash flows; (5) for fixed maturities, our intent to sell a security or whether it is more likely than not we will be required to sell the security before the recovery of its amortized cost which, in some cases, may extend to maturity and (6) for equity securities, our ability and intent to hold the security for a period of time that allows for the recovery in value. To the extent we determine a security is deemed to be other than temporarily impaired, an impairment loss is recognized.

The way in which impairment losses on fixed maturities are recognized in the financial statements is dependent on the facts and circumstances related to the specific security. If we intend to sell a security or it is more likely than not that we would be required to sell a security before the recovery of its amortized cost, we recognize an other-than-temporary impairment in net income for the difference between amortized cost and fair value. If we do not expect to recover the amortized cost basis, we do not plan to sell the security and if it is not more likely than not that we would be required to sell a security before the recovery of its amortized cost, the recognition of the other-than-temporary impairment is bifurcated. We recognize the credit loss portion in net income and the noncredit loss portion in OCI (bifurcated OTTI). Prior to 2018, impairment losses on equity securities were recognized in net income and were measured as the difference between amortized cost and fair value.

Total other-than-temporary impairment losses, net of recoveries from the sale of previously impaired securities, were as follows:

	For the three months ended			For the six months ended		
	June 30,			June 30,		
	2018	2017	(in millions)	2018	2017	
Fixed maturities, available-for-sale	\$ (8.2)	\$ (2.4)	\$	\$ (6.9)	\$ (29.7)	
Total other-than-temporary impairment losses, net of recoveries from the sale of previously impaired securities	(8.2)	(2.4)		(6.9)	(29.7)	
Other-than-temporary impairment losses on fixed maturities, available-for-sale reclassified from OCI (1)	(0.8)	(11.8)		(12.0)	(13.3)	
Net impairment losses on available-for-sale securities	\$ (9.0)	\$ (14.2)	\$	\$ (18.9)	\$ (43.0)	

(1) Represents the net impact of (a) gains resulting from reclassification of noncredit impairment losses for fixed maturities with bifurcated OTTI from net realized capital gains (losses) to OCI and (b) losses resulting from reclassification of previously recognized noncredit impairment losses from OCI to net realized capital gains (losses) for fixed maturities with bifurcated OTTI that had additional credit losses or fixed maturities that previously had bifurcated OTTI that have now been sold or are intended to be sold.

We estimate the amount of the credit loss component of a fixed maturity security impairment as the difference between amortized cost and the present value of the expected cash flows of the security. The present value is determined using the best estimate cash flows discounted at the effective interest rate implicit to the security at the date of purchase or the current yield to accrete an asset-backed or floating rate security. The methodology and assumptions for establishing the best estimate cash flows vary depending on the type of security. The ABS cash flow estimates are based on security specific facts and circumstances that may include collateral characteristics, expectations of delinquency and default rates, loss severity and prepayment speeds and structural support, including subordination and guarantees. The corporate security cash flow estimates are derived from scenario-based outcomes of expected corporate restructurings or liquidations using bond specific facts and circumstances including timing, security interests and loss severity.

Of the total amounts, Principal Life Insurance Company's (Principal Life's) consolidated portfolio represented \$32,057.3 million in available-for-sale fixed maturities with gross unrealized losses of \$966.9 million. Of the available-for-sale fixed maturities within Principal Life's consolidated portfolio in a gross unrealized loss position, 96% were investment grade (rated AAA through BBB-) with an average price of 97 (carrying value/amortized cost) as of June 30, 2018. Gross unrealized losses in our fixed maturities portfolio increased during the six months ended June 30, 2018, primarily due to an increase in interest rates and a widening of credit spreads.

Table of Contents

Principal Financial Group, Inc.
Notes to Consolidated Financial Statements (continued)
June 30, 2018
(Unaudited)

For those securities that had been in a continuous unrealized loss position for less than twelve months, Principal Life's consolidated portfolio held 3,384 securities with a carrying value of \$27,795.1 million and unrealized losses of \$702.0 million reflecting an average price of 98 as of June 30, 2018. Of this portfolio, 96% was investment grade (rated AAA through BBB-) as of June 30, 2018, with associated unrealized losses of \$671.6 million. The unrealized losses on these securities can primarily be attributed to changes in market interest rates and changes in credit spreads since the securities were acquired.

For those securities that had been in a continuous unrealized loss position greater than or equal to twelve months, Principal Life's consolidated portfolio held 761 securities with a carrying value of \$4,262.2 million and unrealized losses of \$264.9 million. The average credit rating of this portfolio was AA- with an average price of 94 as of June 30, 2018. Of the \$264.9 million in unrealized losses, the corporate sector accounts for \$94.4 million in unrealized losses with an average price of 93 and an average credit rating of BBB+. The remaining unrealized losses also include \$50.9 million within the commercial mortgage-backed securities sector with an average price of 94 and an average credit rating of AA+. The unrealized losses on these securities can primarily be attributed to changes in market interest rates and changes in credit spreads since the securities were acquired.

Because we expected to recover our amortized cost, it was not our intent to sell the fixed maturity available-for-sale securities with unrealized losses and it was not more likely than not that we would be required to sell these securities before recovery of the amortized cost, which may be at maturity, we did not consider these investments to be other-than-temporarily impaired as of June 30, 2018.

Total equity securities, available-for-sale	\$	\$	\$	40.4	\$	5.4	\$	40.4	\$	5.4

Of the total amounts, Principal Life Insurance Company's (Principal Life's) consolidated portfolio represented \$14,059.5 million in available-for-sale fixed maturities with gross unrealized losses of \$239.7 million. Of the available-for-sale fixed maturities within Principal Life's consolidated portfolio in a gross unrealized loss position, 97% were investment grade (rated AAA through BBB-) with an average price of 98 (carrying value/amortized cost) as of December 31, 2017. Gross unrealized losses in our fixed maturities portfolio decreased during the year ended December 31, 2017, primarily due to tightening of credit spreads.

For those securities that had been in a continuous unrealized loss position for less than twelve months, Principal Life's consolidated portfolio held 1,209 securities with a carrying value of \$9,360.9 million and unrealized losses of \$75.4 million reflecting an average price of 99 as of December 31, 2017. Of this portfolio, 98% was investment grade (rated AAA through BBB-) as of December 31, 2017, with associated unrealized losses of \$71.5 million. The unrealized losses on these securities can primarily be attributed to changes in market interest rates and changes in credit spreads since the securities were acquired.

For those securities that had been in a continuous unrealized loss position greater than or equal to twelve months, Principal Life's consolidated portfolio held 775 securities with a carrying value of \$4,698.6 million and unrealized losses of \$164.3 million. The average credit rating of this portfolio was AA- with an average price of 97 as of December 31, 2017. Of the

Table of Contents

(Unaudited)

\$164.3 million in unrealized losses, the corporate sector accounts for \$52.2 million in unrealized losses with an average price of 97 and an average credit rating of BBB+. The remaining unrealized losses also include \$38.1 million within the commercial mortgage-backed securities sector with an average price of 96 and an average credit rating of AA+. The unrealized losses on these securities can primarily be attributed to changes in market interest rates and changes in credit spreads since the securities were acquired.

Because we expected to recover our amortized cost, it was not our intent to sell the fixed maturity available-for-sale securities with unrealized losses and it was not more likely than not that we would be required to sell these securities before recovery of the amortized cost, which may be at maturity, we did not consider these investments to be other-than-temporarily impaired as of December 31, 2017.

Net Unrealized Gains and Losses on Available-for-Sale Securities and Derivative Instruments

The net unrealized gains and losses on investments in available-for-sale securities, the noncredit component of impairment losses on fixed maturities available-for-sale and the net unrealized gains and losses on derivative instruments in cash flow hedge relationships are reported as separate components of stockholders' equity. The cumulative amount of net unrealized gains and losses on available-for-sale securities and derivative instruments in cash flow hedge relationships net of adjustments related to DAC and related actuarial balances and applicable income taxes was as follows:

	June 30, 2018		December 31, 2017
	<i>(in millions)</i>		
Net unrealized gains on fixed maturities, available-for-sale (1)	\$	855.8	\$ 2,898.5
Noncredit component of impairment losses on fixed maturities, available-for-sale		(81.3)	(93.3)
Net unrealized gains on equity securities, available-for-sale			2.0
Adjustments for assumed changes in amortization patterns		(8.0)	(150.6)
Adjustments for assumed changes in policyholder liabilities		(361.1)	(645.5)
Net unrealized gains on derivative instruments		111.0	108.2
Net unrealized gains on equity method subsidiaries and noncontrolling interest adjustments		40.5	31.3
Provision for deferred income taxes		(118.1)	(695.5)
Net unrealized gains on available-for-sale securities and derivative instruments	\$	438.8	\$ 1,455.1

(1) Excludes net unrealized gains (losses) on fixed maturities, available-for-sale included in fair value hedging relationships.

Mortgage Loans

Mortgage loans consist of commercial and residential mortgage loans. We evaluate risks inherent in our commercial mortgage loans in two classes: (1) brick and mortar property loans, including mezzanine loans, where we analyze the property's rent payments as support for the loan, and (2) credit tenant loans (CTL), where we rely on the credit analysis of the tenant for the repayment of the loan. We evaluate risks inherent in our residential mortgage loan portfolio in two classes: (1) home equity mortgages and (2) first lien mortgages. The carrying amount of our mortgage loan portfolio was as follows:

	June 30, 2018		December 31, 2017
	<i>(in millions)</i>		
Commercial mortgage loans	\$	13,071.9	\$ 12,897.3
Residential mortgage loans		1,326.1	1,285.9

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-Q

Our residential mortgage loan portfolio is composed of home equity mortgages with an amortized cost of \$19.0 million and \$23.0 million and first lien mortgages with an amortized cost of \$1,307.1 million and \$1,262.9 million as of June 30, 2018 and December 31, 2017, respectively. Our residential home equity mortgages are concentrated in the United States and are generally second lien mortgages comprised of closed-end loans and lines of credit. Our first lien loans are concentrated in Chile and the United States.

Mortgage Loan Credit Monitoring

Commercial Credit Risk Profile Based on Internal Rating

We actively monitor and manage our commercial mortgage loan portfolio. All commercial mortgage loans are analyzed regularly and substantially all are internally rated, based on a proprietary risk rating cash flow model, in order to monitor the financial quality of these assets. The model stresses expected cash flows at various levels and at different points in

Table of Contents

Principal Financial Group, Inc.
Notes to Consolidated Financial Statements (continued)
June 30, 2018
(Unaudited)

time depending on the durability of the income stream, which includes our assessment of factors such as location (macro and micro markets), tenant quality and lease expirations. Our internal rating analysis presents expected losses in terms of an S&P Global (S&P) bond equivalent rating. As the credit risk for commercial mortgage loans increases, we adjust our internal ratings downward with loans in the category B+ and below having the highest risk for credit loss. Internal ratings on commercial mortgage loans are updated at least annually and potentially more often for certain loans with material changes in collateral value or occupancy and for loans on an internal watch list .

Commercial mortgage loans that require more frequent and detailed attention are identified and placed on an internal watch list . Among the criteria that would indicate a potential problem are significant negative changes in ratios of loan to value or contract rents to debt service, major tenant vacancies or bankruptcies, borrower sponsorship problems, late payments, delinquent taxes and loan relief/restructuring requests.

The amortized cost of our commercial mortgage loan portfolio by credit risk, as determined by our internal rating system expressed in terms of an S&P bond equivalent rating, was as follows:

	Brick and mortar	June 30, 2018 CTL <i>(in millions)</i>		Total
A- and above	\$ 11,858.1	\$ 123.4	\$	11,981.5
BBB+ thru BBB-	907.5	84.9		992.4
BB+ thru BB-	91.9			91.9
B+ and below	6.0	0.1		6.1
Total	\$ 12,863.5	\$ 208.4	\$	13,071.9

	Brick and mortar	December 31, 2017 CTL <i>(in millions)</i>		Total
A- and above	\$ 11,636.2	\$ 129.0	\$	11,765.2
BBB+ thru BBB-	934.1	102.4		1,036.5
BB+ thru BB-	89.0			89.0
B+ and below	6.3	0.3		6.6
Total	\$ 12,665.6	\$ 231.7	\$	12,897.3

Residential Credit Risk Profile Based on Performance Status

Our residential mortgage loan portfolio is monitored based on performance of the loans. Monitoring on a residential mortgage loan increases when the loan is delinquent or earlier if there is an indication of potential impairment. We define non-performing residential mortgage loans as loans 90 days or greater delinquent or on non-accrual status.

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-Q

The amortized cost of our performing and non-performing residential mortgage loans was as follows:

	Home equity	June 30, 2018 First liens <i>(in millions)</i>	Total
	Home equity	December 31, 2017 First liens <i>(in millions)</i>	Total
Performing	\$ 16.5	\$ 1,251.4	\$ 1,267.9
Non-performing	6.5	11.5	18.0
Total	\$ 23.0	\$ 1,262.9	\$ 1,285.9

(Unaudited)

Non-Accrual Mortgage Loans

Commercial and residential mortgage loans are placed on non-accrual status if we have concern regarding the collectability of future payments or if a loan has matured without being paid off or extended. Factors considered may include conversations with the borrower, loss of major tenant, bankruptcy of borrower or major tenant, decreased property cash flow for commercial mortgage loans or number of days past due and other circumstances for residential mortgage loans. Based on an assessment as to the collectability of the principal, a determination is made to apply any payments received either against the principal, against the valuation allowance or according to the contractual terms of the loan. When a loan is placed on non-accrual status, the accrued unpaid interest receivable is reversed against interest income. Accrual of interest resumes after factors resulting in doubts about collectability have improved. Residential first lien mortgages in the Chilean market are carried on accrual for a longer period of delinquency than domestic loans, as assessment of collectability is based on the nature of the loans and collection practices in that market.

The amortized cost of mortgage loans on non-accrual status was as follows:

	June 30, 2018	December 31, 2017	
		<i>(in millions)</i>	
Residential:			
Home equity	\$ 5.2	\$	6.5
First liens	11.5		3.9
Total	\$ 16.7	\$	10.4

The aging of our mortgage loans, based on amortized cost, was as follows:

				June 30, 2018		
30-59 days past due	60-89 days past due	90 days or more past due	Total past due <i>(in millions)</i>	Current	Total loans	Recorded investment 90 days or more and accruing

Total	\$ 39.1	\$ 8.6	\$ 11.4	\$ 59.1	\$ 14,124.1	\$ 14,183.2	\$ 7.6

Mortgage Loan Valuation Allowance

We establish a valuation allowance to provide for the risk of credit losses inherent in our portfolio. The valuation allowance includes loan specific reserves for loans that are deemed to be impaired as well as reserves for pools of loans with similar risk characteristics where a property risk or market specific risk has not been identified but for which we anticipate a loss may occur. Mortgage loans on real estate are considered impaired when, based on current information and events, it is probable we will be unable to collect all amounts due according to contractual terms of the loan agreement. When we determine a loan is impaired, a valuation allowance is established equal to the difference between the carrying amount of the mortgage loan and the estimated value reduced by the cost to sell. Estimated value is based on either the present value of the expected future cash flows

Table of Contents

Principal Financial Group, Inc.
Notes to Consolidated Financial Statements (continued)
June 30, 2018
(Unaudited)

discounted at the loan's effective interest rate, the loan's observable market price or fair value of the collateral. Subsequent changes in the estimated value are reflected in the valuation allowance. Amounts on loans deemed to be uncollectible are charged off and removed from the valuation allowance. The change in the valuation allowance provision is included in net realized capital gains (losses) on our consolidated statements of operations.

The valuation allowance is maintained at a level believed adequate by management to absorb estimated probable credit losses. Management's periodic evaluation and assessment of the valuation allowance adequacy is based on known and inherent risks in the portfolio, adverse situations that may affect a borrower's ability to repay, the estimated value of the underlying collateral, composition of the loan portfolio, portfolio delinquency information, underwriting standards, peer group information, current economic conditions, loss experience and other relevant factors. The evaluation of our impaired loan component is subjective, as it requires the estimation of timing and amount of future cash flows expected to be received on impaired loans.

We review our commercial mortgage loan portfolio and analyze the need for a valuation allowance for any loan that is delinquent for 60 days or more, in process of foreclosure, restructured, on the internal watch list or that currently has a valuation allowance. In addition to establishing allowance levels for specifically identified impaired commercial mortgage loans, management determines an allowance for all other loans in the portfolio for which historical experience and current economic conditions indicate certain losses exist. These loans are segregated by risk rating level with an estimated loss ratio applied against each risk rating level. The loss ratio is generally based upon historical loss experience for each risk rating level as adjusted for certain current environmental factors management believes to be relevant.

For our residential mortgage loan portfolio, we separate the loans into several homogeneous pools, each of which consist of loans of a similar nature including but not limited to loans similar in collateral, term and structure and loan purpose or type. We evaluate loan pools based on aggregated risk ratings, estimated specific loss potential in the different classes of credits, and historical loss experience by pool type. We adjust these quantitative factors for qualitative factors of present conditions. Qualitative factors include items such as economic and business conditions, changes in the portfolio, value of underlying collateral and concentrations. Residential mortgage loan pools exclude loans that have been restructured or impaired, as those loans are evaluated individually.

A rollforward of our valuation allowance and ending balances of the allowance and loan balance by basis of impairment method was as follows:

	For the three months ended June 30, 2018			Total
	Commercial	Residential <i>(in millions)</i>

Impaired Mortgage Loans

Impaired mortgage loans are loans with a related specific valuation allowance, loans whose carrying amount has been reduced to the expected collectible amount because the impairment has been considered other than temporary or a loan modification has been classified as a troubled debt restructuring (TDR). Based on an assessment as to the collectability of the principal, a determination is made to apply any payments received either against the principal, against the valuation allowance or according to the contractual terms of the loan. Our recorded investment in and unpaid principal balance of impaired loans along with the related loan specific allowance for losses, if any, and the average recorded investment and interest income recognized during the time the loans were impaired were as follows:

	Recorded investment	June 30, 2018 Unpaid principal balance (in millions)	Related allowance
With no related allowance recorded:

Mortgage Loan Modifications

Our commercial and residential mortgage loan portfolios can include loans that have been modified. We assess loan modifications on a case-by-case basis to evaluate whether a TDR has occurred. When we have commercial mortgage loan TDRs, they are modified to delay or reduce principal payments and to reduce or delay interest payments. The commercial mortgage loan modifications result in delayed cash receipts, a decrease in interest income and loan rates that are considered below market. When we have residential mortgage loan TDRs, they include modifications of interest-only payment periods, delays in principal balloon payments and interest rate reductions. Residential mortgage loan modifications result in delayed or decreased cash receipts and a decrease in interest income.

The following table includes information about outstanding loans that were modified and met the criteria of a TDR during the periods indicated. In addition, the table includes information for loans that were modified and met the criteria of a TDR within the past twelve months that were in payment default during the periods indicated:

	Number of contracts	For the three months ended June 30, 2018		For the three months ended June 30, 2017

When we have commercial mortgage loan TDRs they are reserved for in the mortgage loan valuation allowance at the estimated fair value of the underlying collateral reduced by the cost to sell.

When we have residential mortgage loan TDRs they are specifically reserved for in the mortgage loan valuation allowance if losses result from the modification. Residential mortgage loans that have defaulted or have been discharged through bankruptcy are reduced to the expected collectible amount.

Securities Posted as Collateral

As of June 30, 2018 and December 31, 2017, we posted \$3,549.5 million and \$2,807.4 million, respectively, in commercial mortgage loans and residential first lien mortgages to satisfy collateral requirements associated with our obligation under funding agreements with Federal Home Loan Bank of Des Moines (FHLB Des Moines). In addition, as of June 30, 2018 and December 31, 2017, we posted \$2,462.8 million and \$2,486.2 million, respectively, in fixed maturities, available-for-sale and trading securities to satisfy collateral requirements primarily associated with a reinsurance arrangement, our derivative credit support annex (collateral) agreements, Futures Commission Merchant (FCM) agreements, a lending arrangement and our obligation under funding agreements with FHLB Des Moines. Since we did not relinquish ownership rights on these instruments, they are reported as mortgage loans and fixed maturities, available-for-sale, respectively, on our consolidated statements of financial position. Of the securities posted as collateral, as of June 30, 2018 and December 31, 2017, \$170.7 million and \$173.3 million, respectively, could be sold or pledged by the secured party.

Balance Sheet Offsetting

Financial assets subject to master netting agreements or similar agreements were as follows:

	Gross amounts not offset in the consolidated statements of financial position				Net amount
	Gross amount of recognized assets (1)	Financial instruments (2)	Collateral received		
	<i>(in millions)</i>				
June 30, 2018					
Derivative assets	\$ 192.9	\$ (94.2)	\$ (92.3)	\$	6.4
Reverse repurchase agreements	42.3		(42.3)	\$	
Total	\$ 235.2	\$ (94.2)	\$ (134.6)	\$	6.4
December 31, 2017					
Derivative assets	\$ 287.0	\$ (116.3)	\$ (149.5)	\$	21.2
Reverse repurchase agreements	17.6		(17.6)	\$	
Total	\$ 304.6	\$ (116.3)	\$ (167.1)	\$	21.2

(1) The gross amount of recognized derivative and reverse repurchase agreement assets are reported with other investments and cash and cash equivalents, respectively, on the consolidated statements of financial position. The above excludes \$12.3 million and \$17.0 million of derivative assets as of June 30, 2018 and December 31, 2017, respectively, that are not subject to master netting agreements or similar agreements. The gross amounts of derivative and reverse repurchase agreement assets are not netted against offsetting liabilities for presentation on the consolidated statements of financial position.

(2) Represents amount of offsetting derivative liabilities that are subject to an enforceable master netting agreement or similar agreement that are not netted against the gross derivative assets for presentation on the consolidated statements of financial position.

Financial liabilities subject to master netting agreements or similar agreements were as follows:

	Gross amount of recognized liabilities (1)	Gross amounts not offset in the consolidated statements of financial position			Net amount
		Financial instruments (2)	Collateral pledged		
		<i>(in millions)</i>			
June 30, 2018					
Derivative liabilities	\$ 263.1	\$ (94.2)	\$ (145.2)	\$	23.7
Repurchase agreements	8.0		(8.0)		
Total	\$ 271.1	\$ (94.2)	\$ (153.2)	\$	23.7
December 31, 2017					
Derivative liabilities	\$ 272.5	\$ (116.3)	\$ (143.5)	\$	12.7
Total	\$ 272.5	\$ (116.3)	\$ (143.5)	\$	12.7

(1) The gross amount of recognized derivative liabilities are reported with other liabilities on the consolidated statements of financial position. The above excludes \$275.6 million and \$415.6 million of derivative liabilities as of June 30, 2018 and December 31, 2017, respectively, which are primarily embedded derivatives that are not subject to master netting agreements or similar agreements. The gross amount of recognized repurchase agreement liabilities are reported with short-term debt on the consolidated statements of financial position. The gross amounts of derivative and repurchase agreement liabilities are not netted against offsetting assets for presentation on the consolidated statements of financial position.

(2) Represents amount of offsetting derivative assets that are subject to an enforceable master netting agreement or similar agreement that are not netted against the gross derivative liabilities for presentation on the consolidated statements of financial position.

The financial instruments that are subject to master netting agreements or similar agreements include right of setoff provisions. Derivative instruments include provisions to setoff positions covered under the agreements with the same counterparties and provisions to setoff positions outside of the agreements with the same counterparties in the event of default by one of the parties. Derivative instruments also include collateral or variation margin provisions, which are generally settled daily with each counterparty. See Note 4, Derivative Financial Instruments, for further details.

Repurchase and reverse repurchase agreements include provisions to setoff other repurchase and reverse repurchase balances with the same counterparty. Repurchase and reverse repurchase agreements also include collateral provisions with the counterparties. For reverse repurchase agreements we require the counterparties to pledge collateral with a value greater than the amount of cash transferred. We have the right but do

not sell or repledge collateral received in reverse repurchase agreements. Repurchase agreements are structured as secured borrowings for all counterparties. We pledge fixed maturities available-for-sale, which the counterparties have the right to sell or repledge. Interest incurred on repurchase agreements is reported as part of operating expenses on the consolidated statements of operations. Net proceeds related to repurchase agreements are reported as a component of financing activities on the consolidated statements of cash flows.

4. Derivative Financial Instruments

Derivatives are generally used to hedge or reduce exposure to market risks associated with assets held or expected to be purchased or sold and liabilities incurred or expected to be incurred. Derivatives are used to change the characteristics of our asset/liability mix consistent with our risk management activities. Derivatives are also used in asset replication strategies.

Types of Derivative Instruments

Interest Rate Contracts

Interest rate risk is the risk we will incur economic losses due to adverse changes in interest rates. Sources of interest rate risk include the difference between the maturity and interest rate changes of assets with the liabilities they support, timing differences between the pricing of liabilities and the purchase or procurement of assets and changing cash flow profiles from

Table of Contents

Principal Financial Group, Inc.
Notes to Consolidated Financial Statements (continued)
June 30, 2018
(Unaudited)

original projections due to prepayment options embedded within asset and liability contracts. We use various derivatives to manage our exposure to fluctuations in interest rates.

Interest rate swaps are contracts in which we agree with other parties to exchange, at specified intervals, the difference between fixed rate and/or floating rate interest amounts based upon designated market rates or rate indices and an agreed upon notional principal amount. Generally, no cash is exchanged at the outset of the contract and no principal payments are made by any party. Cash is paid or received based on the terms of the swap. We use interest rate swaps primarily to more closely match the interest rate characteristics of assets and liabilities and to mitigate the risks arising from timing mismatches between assets and liabilities (including duration mismatches). We also use interest rate swaps to hedge against changes in the value of assets we anticipate acquiring and other anticipated transactions and commitments. Interest rate swaps are used to hedge against changes in the value of the guaranteed minimum withdrawal benefit (GMWB) liability. The GMWB rider on our variable annuity products provides for guaranteed minimum withdrawal benefits regardless of the actual performance of various equity and/or fixed income funds available with the product.

Interest rate options, including interest rate caps and interest rate floors, which can be combined to form interest rate collars, are contracts that entitle the purchaser to pay or receive the amounts, if any, by which a specified market rate exceeds a cap strike interest rate, or falls below a floor strike interest rate, respectively, at specified dates. We use interest rate options to manage prepayment risks in our assets and minimum guaranteed interest rates and lapse risks in our liabilities.

A swaption is an option to enter into an interest rate swap at a future date. We have purchased swaptions to offset or modify existing exposures. Swaptions provide us the benefit of the agreed-upon strike rate if the market rates for liabilities are higher, with the flexibility to enter into the current market rate swap if the market rates for liabilities are lower. Swaptions not only hedge against the downside risk, but also allow us to take advantage of any upside benefits.

In exchange-traded futures transactions, we agree to purchase or sell a specified number of contracts, the values of which are determined by the values of designated classes of securities, and to post variation margin on a daily basis in an amount equal to the difference in the daily market values of those contracts. We enter into exchange-traded futures with regulated futures commissions merchants who are members of a trading exchange. We have used exchange-traded futures to reduce market risks from changes in interest rates and to alter mismatches between the assets in a portfolio and the liabilities supported by those assets.

Foreign Exchange Contracts

Foreign currency risk is the risk we will incur economic losses due to adverse fluctuations in foreign currency exchange rates. This risk arises from foreign currency-denominated funding agreements we issue, foreign currency-denominated fixed maturity and equity securities we invest in, capital transactions with our international operations and the financial results of our international operations. We use various derivatives to

manage our exposure to fluctuations in foreign currency exchange rates.

Currency swaps are contracts in which we agree with other parties to exchange, at specified intervals, a series of principal and interest payments in one currency for that of another currency. Generally, the principal amount of each currency is exchanged at the beginning and termination of the currency swap by each party. The interest payments are primarily fixed-to-fixed rate; however, they may also be fixed-to-floating rate or floating-to-fixed rate. These transactions are entered into pursuant to master agreements that provide for a single net payment to be made by one counterparty for payments made in the same currency at each due date. We use currency swaps to reduce market risks from changes in currency exchange rates with respect to investments or liabilities denominated in foreign currencies that we either hold or intend to acquire or sell.

Currency forwards are contracts in which we agree with other parties to deliver or receive a specified amount of an identified currency at a specified future date. Typically, the price is agreed upon at the time of the contract and payment for such a contract is made at the specified future date. We use currency forwards to reduce market risks from changes in currency exchange rates with respect to investments or liabilities denominated in foreign currencies that we either hold or intend to acquire or sell. We sometimes use currency forwards to hedge the currency risk associated with a business combination or to hedge certain net equity investments in or expected cash flows from our foreign operations.

Currency options are contracts that give the holder the right, but not the obligation to buy or sell a specified amount of the identified currency within a limited period of time at a contracted price. The contracts are net settled in cash, based on the differential in the current foreign exchange rate and the strike price. Purchased and sold options can be combined to form a

Table of Contents

Principal Financial Group, Inc.
Notes to Consolidated Financial Statements (continued)
June 30, 2018
(Unaudited)

foreign currency collar where we receive a payment if the foreign exchange rate is below the purchased option strike price and make a payment if the foreign exchange rate is above the sold option strike price. We use currency options to hedge expected cash flows from our foreign operations.

Equity Contracts

Equity risk is the risk that we will incur economic losses due to adverse fluctuations in common stock prices. We use various derivatives to manage our exposure to equity risk, which arises from products in which the interest we credit is tied to an external equity index as well as products subject to minimum contractual guarantees.

We purchase equity call spreads (option collars) to hedge the equity participation rates promised to contractholders in conjunction with our fixed deferred annuity and universal life products that credit interest based on changes in an external equity index. We use exchange-traded futures and equity put options to hedge against changes in the value of the GMWB liability related to the GMWB rider on our variable annuity product. The premium associated with certain options is paid quarterly over the life of the option contract.

Credit Contracts

Credit risk relates to the uncertainty associated with the continued ability of a given obligor to make timely payments of principal and interest. We use credit default swaps to enhance the return on our investment portfolio by providing comparable exposure to fixed income securities that might not be available in the primary market. They are also used to hedge credit exposures in our investment portfolio. Credit derivatives are used to sell or buy credit protection on an identified name or names on an unfunded or synthetic basis in return for receiving or paying a quarterly premium. The premium generally corresponds to a referenced name's credit spread at the time the agreement is executed. In cases where we sell protection, we also buy a quality cash bond to match against the credit default swap, thereby entering into a synthetic transaction replicating a cash security. When selling protection, if there is an event of default by the referenced name, as defined by the agreement, we are obligated to pay the counterparty the referenced amount of the contract and receive in return the referenced security in a principal amount equal to the notional value of the credit default swap.

Total return swaps are contracts in which we agree with other parties to exchange, at specified intervals, an amount determined by the difference between the previous price and the current price of a reference asset based upon an agreed upon notional principal amount plus an additional amount determined by the financing spread. We have used futures traded on an exchange (exchange-traded) and total return swaps referencing equity indices to hedge our portfolio from potential credit losses related to systemic events.

Other Contracts

Embedded Derivatives. We purchase or issue certain financial instruments or products that contain a derivative instrument that is embedded in the financial instrument or product. When it is determined that the embedded derivative possesses economic characteristics that are not clearly or closely related to the economic characteristics of the host contract and a separate instrument with the same terms would qualify as a derivative instrument, the embedded derivative is bifurcated from the host instrument for measurement purposes. The embedded derivative, which is reported with the host instrument in the consolidated statements of financial position, is carried at fair value.

We had investment contracts in which the return was tied to a leveraged inflation index. We economically hedged the risk associated with these investment contracts.

We offer group annuity contracts that have guaranteed separate accounts as an investment option. We also offer funds with embedded fixed-rate guarantees as investment options in our defined contribution plans in Hong Kong.

We have structured investment relationships with trusts we have determined to be VIEs, which are consolidated in our financial statements. The notes issued by these trusts include obligations to deliver an underlying security to residual interest holders and the obligations contain an embedded derivative of the forecasted transaction to deliver the underlying security.

We have fixed deferred annuities and universal life products that credit interest based on changes in an external equity index. We also have certain variable annuity products with a GMWB rider, which allows the customer to make withdrawals of a

Table of Contents

Principal Financial Group, Inc.
Notes to Consolidated Financial Statements (continued)
June 30, 2018
(Unaudited)

specified annual amount, either for a fixed number of years or for the lifetime of the customer, even if the account value is fully exhausted. Declines in the equity markets may increase our exposure to benefits under contracts with the GMWB. We economically hedge the exposure in these contracts, as previously explained.

Exposure

Our risk of loss is typically limited to the fair value of our derivative instruments and not to the notional or contractual amounts of these derivatives. We are also exposed to credit losses in the event of nonperformance of the counterparties. Our current credit exposure is limited to the value of derivatives that have become favorable to us. This credit risk is minimized by purchasing such agreements from financial institutions with high credit ratings and by establishing and monitoring exposure limits. We also utilize various credit enhancements, including collateral and credit triggers to reduce the credit exposure to our derivative instruments.

Derivatives may be exchange-traded or they may be privately negotiated contracts, which are usually referred to as over-the-counter (OTC) derivatives. Certain of our OTC derivatives are cleared and settled through central clearing counterparties (OTC cleared), while others are bilateral contracts between two counterparties (bilateral OTC). Our derivative transactions are generally documented under International Swaps and Derivatives Association, Inc. (ISDA) Master Agreements. Management believes that such agreements provide for legally enforceable set-off and close-out netting of exposures to specific counterparties. Under such agreements, in connection with an early termination of a transaction, we are permitted to set off our receivable from a counterparty against our payables to the same counterparty arising out of all included transactions. For reporting purposes, we do not offset fair value amounts of bilateral OTC derivatives for the right to reclaim cash collateral or the obligation to return cash collateral against fair value amounts recognized for derivative instruments executed with the same counterparties under master netting agreements. OTC cleared derivatives have variation margin that is legally characterized as settlement of the derivative exposure, which reduces their fair value in the consolidated statements of financial position.

We posted \$191.7 million and \$195.0 million in cash and securities under collateral arrangements as of June 30, 2018 and December 31, 2017, respectively, to satisfy collateral and initial margin requirements associated with our derivative credit support agreements and FCM agreements.

Certain of our derivative instruments contain provisions that require us to maintain an investment grade rating from each of the major credit rating agencies on our debt. If the ratings on our debt were to fall below investment grade, it would be in violation of these provisions and the counterparties to the derivative instruments could request immediate payment or demand immediate and ongoing full overnight collateralization on derivative instruments in net liability positions. The aggregate fair value, inclusive of accrued interest, of all derivative instruments with credit-risk-related contingent features that were in a liability position without regard to netting under derivative credit support annex agreements as of June 30, 2018 and December 31, 2017, was \$246.5 million and \$280.4 million, respectively. Cleared derivatives have contingent features

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-Q

that require us to post excess margin as required by the FCM. The terms surrounding excess margin vary by FCM agreement. With respect to derivatives containing collateral triggers, we posted collateral and initial margin of \$191.7 million and \$195.0 million as of June 30, 2018 and December 31, 2017, respectively, in the normal course of business, which reflects netting under derivative agreements. If the credit-risk-related contingent features underlying these agreements were triggered on June 30, 2018, we would be required to post an additional \$29.0 million of collateral to our counterparties.

As of June 30, 2018 and December 31, 2017, we had received \$81.1 million and \$124.7 million, respectively, of cash collateral associated with our derivative credit support annex agreements and FCM agreements, for which we recorded a corresponding liability reflecting our obligation to return the collateral.

Notional amounts are used to express the extent of our involvement in derivative transactions and represent a standard measurement of the volume of our derivative activity. Notional amounts represent those amounts used to calculate contractual flows to be exchanged and are not paid or received, except for contracts such as currency swaps. Credit exposure represents the gross amount owed to us under derivative contracts as of the valuation date. The notional amounts and credit exposure of our derivative financial instruments by type were as follows:

	June 30, 2018	<i>(in millions)</i>	December 31, 2017
Notional amounts of derivative instruments			
Interest rate contracts:			
Interest rate swaps	\$ 30,491.5		\$ 23,543.4
Interest rate options	1,127.0		657.0
Interest rate futures	111.0		236.5
Swaptions			14.0

Total derivative instruments	\$ 205.2	\$ 304.0	\$ 538.7	\$ 688.1

(1) The fair value of derivative assets is reported with other investments on the consolidated statements of financial position.

(2) The fair value of derivative liabilities is reported with other liabilities on the consolidated statements of financial position, with the exception of certain embedded derivative liabilities. Embedded derivative liabilities with a fair value of \$42.8 million and \$160.3 million as of June 30, 2018 and December 31, 2017, respectively, are reported with contractholder funds on the consolidated statements of financial position.

Credit Derivatives Sold

When we sell credit protection, we are exposed to the underlying credit risk similar to purchasing a fixed maturity security instrument. Our credit derivative contracts sold reference a single name or reference security (referred to as single name credit default swaps). These instruments are either referenced in an OTC credit derivative transaction or embedded within an investment structure that has been fully consolidated into our financial statements.

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-Q

These credit derivative transactions are subject to events of default defined within the terms of the contract, which normally consist of bankruptcy, failure to pay, or modified restructuring of the reference entity and/or issue. If a default event occurs for a reference name or security, we are obligated to pay the counterparty an amount equal to the notional amount of the credit derivative transaction. As a result, our maximum future payment is equal to the notional amount of the credit derivative. In certain cases, we also may have purchased credit protection with identical underlyings to certain of our sold protection transactions. As of June 30, 2018 and December 31, 2017, we did not purchase credit protection relating to our sold protection transactions. In certain circumstances, our potential loss could also be reduced by any amount recovered in the default proceedings of the underlying credit name.

Fair Value Hedges

We use fixed-to-floating rate interest rate swaps to more closely align the interest rate characteristics of certain assets and have used them to align the interest rate characteristics of certain liabilities. In general, these swaps are used in asset and liability management to modify duration, which is a measure of sensitivity to interest rate changes.

The net interest effect of interest rate swap transactions for derivatives in fair value hedges is recorded as an adjustment to income or expense of the underlying hedged item in our consolidated statements of operations.

Hedge effectiveness testing for fair value relationships is performed utilizing a regression analysis approach for both prospective and retrospective evaluations. This regression analysis will consider multiple data points for the assessment that the hedge continues to be highly effective in achieving offsetting changes in fair value. In certain periods, the comparison of the change in value of the derivative and the change in the value of the hedged item may not be offsetting at a specific period in time

Table of Contents

Principal Financial Group, Inc.
Notes to Consolidated Financial Statements (continued)

(Unaudited)

due to small movements in value. However, any amounts recorded as fair value hedges have shown to be highly effective in achieving offsetting changes in fair value both for present and future periods.

The following table shows the effect of derivatives in fair value hedging relationships and the related hedged items on the consolidated statements of operations. All gains or losses on derivatives were included in the assessment of hedge effectiveness.

Derivatives in fair value hedging relationships	Amount of gain (loss) recognized in net income on derivatives for the three months ended June 30, (1)		Hedged items in fair value hedging relationships	Amount of gain (loss) recognized in net income on related hedged item for the three months ended June 30, (1)

- (2) Reported in benefits, claims and settlement expenses on the consolidated statements of operations.

Cash Flow Hedges

We utilize floating-to-fixed rate interest rate swaps to eliminate the variability in cash flows of recognized financial assets and liabilities and forecasted transactions.

We enter into currency exchange swap agreements to convert both principal and interest payments of certain foreign denominated assets and liabilities into U.S. dollar denominated fixed-rate instruments to eliminate the exposure to future currency volatility on those items.

The net interest effect of interest rate swap and currency swap transactions for derivatives in cash flow hedges is recorded as an adjustment to income or expense of the underlying hedged item in our consolidated statements of operations.

Table of Contents

Principal Financial Group, Inc.
Notes to Consolidated Financial Statements (continued)
June 30, 2018
(Unaudited)

The maximum length of time we are hedging our exposure to the variability in future cash flows for forecasted transactions, excluding those related to the payments of variable interest on existing financial assets and liabilities, is 2.0 years. As of June 30, 2018, we had \$0.0 million of net gains reported in AOCI on the consolidated statements of financial position related to active hedges of forecasted transactions. If a hedged forecasted transaction is no longer probable of occurring, cash flow hedge accounting is discontinued. If it is probable that the hedged forecasted transaction will not occur, the deferred gain or loss is immediately reclassified from AOCI into net income. We reclassified \$0.2 million and \$0.0 million from AOCI into net realized capital gains (losses) as a result of the determination that hedged cash flows were probable of not occurring during the six months ended June 30, 2018 and 2017, respectively.

The following table shows the effect of derivatives in cash flow hedging relationships on the consolidated statements of operations and consolidated statements of financial position. All gains or losses on derivatives were included in the assessment of hedge effectiveness.

Derivatives in cash flow hedging relationships	Related hedged item	Amount of gain (loss) recognized in AOCI on derivatives (effective portion) for the three months ended June 30,		Location of gain (loss) reclassified from AOCI into net income (effective portion)	Amount of gain (loss) reclassified from AOCI on derivatives (effective portion) for the three months ended June 30,

Table of Contents

Principal Financial Group, Inc.
Notes to Consolidated Financial Statements (continued)
June 30, 2018
(Unaudited)

The following table shows the periodic settlements on interest rate contracts and foreign exchange contracts in cash flow hedging relationships.

Hedged item	Amount of gain (loss) for the three months ended June 30,		Amount of gain (loss) for the six months ended June 30,	
	2018	2017	2018	2017
			<i>(in millions)</i>	
Fixed maturities, available-for-sale (1)	\$ 1.5	\$ 1.6	\$ 3.1	\$ 3.4
Investment contracts (2)		(0.1)	(0.1)	(0.9)

(1) Reported in net investment income on the consolidated statements of operations.

(2) Reported in benefits, claims and settlement expenses on the consolidated statements of operations.

The ineffective portion of our cash flow hedges is reported in net realized capital gains (losses) on the consolidated statements of operations. The net gain (loss) resulting from the ineffective portion of derivatives in cash flow hedging relationships was \$0.0 million and \$0.0 million for the three months ended June 30, 2018 and 2017, respectively. The net gain (loss) resulting from the ineffective portion of derivatives in cash flow hedging relationships was \$0.0 million and \$0.0 million for the six months ended June 30, 2018 and 2017, respectively.

We expect to reclassify net gains of \$17.4 million from AOCI into net income in the next 12 months, which includes net deferred gains on discontinued hedges and net losses on periodic settlements of active hedges. Actual amounts may vary from this amount as a result of market conditions.

Derivatives Not Designated as Hedging Instruments

Our use of futures, certain swaptions and swaps, option collars, options and forwards are effective from an economic standpoint, but they have not been designated as hedges for financial reporting purposes. As such, periodic changes in the market value of these instruments, which includes mark-to-market gains and losses as well as periodic and final settlements, primarily flow directly into net realized capital gains (losses) on the consolidated statements of operations.

The following table shows the effect of derivatives not designated as hedging instruments, including fair value changes of embedded derivatives that have been bifurcated from the host contract, on the consolidated statements of operations.

Derivatives not designated as hedging instruments	Amount of gain (loss) recognized in net income on derivatives for the three months ended June 30,		Amount of gain (loss) recognized in net income on derivatives for the six months ended June 30,	
	2018	2017	2018	2017
	<i>(in millions)</i>			
Interest rate contracts	\$ (19.8)	\$ (19.4)	\$ (67.8)	\$ (44.2)
Foreign exchange contracts	(24.2)	7.2	(15.4)	18.3
Equity contracts	(43.0)	(34.3)	(58.2)	(98.7)
Credit contracts	1.2	(20.2)	1.3	(12.4)
Other contracts	52.1	(29.0)	115.8	25.8
Total	\$ (33.7)	\$ (95.7)	\$ (24.3)	\$ (111.2)

(Unaudited)

5. Insurance Liabilities**Liability for Unpaid Claims**

The liability for unpaid claims is reported in future policy benefits and claims within our consolidated statements of financial position. Activity associated with unpaid claims was as follows:

	For the six months ended June 30,		
	2018		2017
	<i>(in millions)</i>		
Balance at beginning of period	\$	2,130.5	\$ 2,001.3
Less reinsurance recoverable		375.8	340.3
Net balance at beginning of period		1,754.7	1,661.0
Incurred:			
Current year		617.3	591.6
Prior years		17.9	23.9
Total incurred		635.2	615.5
Payments:			
Current year		358.3	343.4
Prior years		231.8	225.9
Total payments		590.1	569.3
Net balance at end of period		1,799.8	1,707.2
Plus reinsurance recoverable		388.2	356.1
Balance at end of period	\$	2,188.0	\$ 2,063.3
Amounts not included in the rollforward above:			
Claim adjustment expense liabilities	\$	51.9	\$ 50.3

Incurred liability adjustments relating to prior years, which affected current operations during 2018 and 2017, resulted in part from developed claims for prior years being different than were anticipated when the liabilities for unpaid claims were originally estimated. These trends have been considered in establishing the current year liability for unpaid claims.

6. Long-Term Debt**Contingent Funding Agreements for Senior Debt Issuance**

On March 8, 2018, we entered into two contingent funding agreements: (1) a 10-year contingent funding agreement with a Delaware trust (2028 Trust) formed by us in connection with the sale by the trust of \$400.0 million pre-capitalized trust securities redeemable February 15, 2028 (2028 P-Caps) in a Rule 144A private placement and (2) a 30-year contingent funding agreement with a Delaware trust (2048 Trust) formed by us in connection with the sale by the trust of \$350.0 million pre-capitalized trust securities redeemable February 15, 2048 (2048 P-Caps) in a Rule 144A private placement. The trusts invested the proceeds from the sale of the 2028 P-Caps and 2048 P-Caps in a portfolio of principal and interest strips of U.S. Treasury securities. The contingent funding agreements provide us a put option that gives us the right to sell at any time: (1) to the 2028 Trust up to \$400.0 million of its 4.111% Senior Notes due 2028 (4.111% Senior Notes) and (2) to the 2048 Trust up to \$350.0 million of its 4.682% Senior Notes due 2048 (4.682% Senior Notes) and receive in exchange a corresponding amount of the principal and interest strips of U.S. Treasury securities held by the trusts. The 4.111% Senior Notes and 4.682% Senior Notes will not be issued unless and until a put option is exercised. We agreed to pay a semi-annual put premium of 1.275% and 1.580% per annum on the unexercised portion of the put option to the 2028 Trust and 2048 Trust, respectively, and to reimburse the trusts for expenses. The put option premiums are recorded in operating expenses in the consolidated statements of operations. The 4.111% Senior Notes and 4.682% Senior Notes will be fully, irrevocably and unconditionally guaranteed by Principal Financial Services, Inc. (PFS). In addition, our obligations under the put option agreement and the expense reimbursement agreement with the trusts are also guaranteed by PFS. The contingent funding agreements with the trusts provide us with a source of liquid assets, which could be used to meet future financial obligations or to provide additional capital.

Table of Contents

Principal Financial Group, Inc.
Notes to Consolidated Financial Statements (continued)
June 30, 2018
(Unaudited)

The put options described above will be exercised automatically in full if we fail to make certain payments to the trusts, including any failure to pay the put option premium or expense reimbursements when due, if such failure is not cured within 30 days, and upon certain bankruptcy events involving us or PFS. We are also required to exercise the put option in full: (i) if we reasonably believe that our consolidated shareholders equity, calculated in accordance with U.S. GAAP but excluding AOCI and noncontrolling interest, has fallen below \$4.0 billion, subject to adjustment in certain cases; (ii) upon the occurrence of an event of default under the 4.111% Senior Notes and 4.682% Senior Notes; and (iii) if certain events occur relating to each trust's status as an investment company under the Investment Company Act of 1940. In addition, we are required to purchase from the trusts any principal and interest strips of U.S. Treasury securities that are due and not paid.

We have an unlimited right to unwind a prior voluntary exercise of the put options by repurchasing all of the 4.111% Senior Notes and 4.682% Senior Notes held by the trusts in exchange for a corresponding amount of principal and interest strips of U.S. Treasury securities. If the put options have been fully exercised, the 4.111% Senior Notes and 4.682% Senior Notes issued may be redeemed by us prior to their maturity at par or, if greater, at a make-whole redemption price, in each case plus accrued and unpaid interest to the date of redemption. The 2028 P-Caps are to be redeemed by the 2028 Trust on February 15, 2028, or upon any early redemption of the 4.111% Senior Notes. The 2048 P-Caps are to be redeemed by the 2048 Trust on February 15, 2048, or upon any early redemption of the 4.682% Senior Notes.

7. Income Taxes**Effective Income Tax Rate**

Our provision for income taxes may not have the customary relationship of taxes to income. A reconciliation between the U.S. corporate income tax rate and the effective income tax rate was as follows:

	For the three months ended		For the six months ended	
	June 30,		June 30,	
	2018	2017	2018	2017
U.S. corporate income tax rate	21 %	35 %	21 %	35 %
U.S. tax rate change - prior year remeasurements	(4)		(3)	
Dividends received deduction	(3)	(12)	(3)	(11)
Tax credits	(3)	(3)	(3)	(3)
Impact of equity method presentation	(1)	(3)	(1)	(3)
State income taxes	1		1	
Other		(3)	(1)	(4)
Effective income tax rate	11 %	14 %	11 %	14 %

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-Q

The U.S. tax reform enacted on December 22, 2017, made broad and complex changes to the U.S. Internal Revenue Code applicable to us. The U.S. statutory tax rate was reduced from 35% to 21% effective January 1, 2018. Other provisions of the U.S. tax reform effective January 1, 2018, include, but are not limited to: 1) provisions reducing the dividends received deduction; 2) essentially eliminating U.S. federal income taxes on dividends from foreign subsidiaries; 3) retaining an element of current inclusion of certain earnings of controlled foreign corporations; 4) eliminating the corporate alternative minimum tax (AMT); and 5) changing how existing AMT credits will be realized.

The effects of tax legislation on deferred taxes are recognized in the period of enactment. The primary impact on our fourth quarter 2017 financial results was associated with the effect of reducing the U.S. statutory tax rate from 35% to 21% on our deferred tax balances as of December 31, 2017, and a one-time deemed repatriation tax on certain unremitted earnings of foreign subsidiaries. The effects of the U.S. tax reform were reflected in the December 2017 financial statements as determined or as reasonably estimated provisional amounts based on available information subject to interpretation in accordance with the SEC's Staff Accounting Bulletin No. 118 (SAB 118). SAB 118 provides guidance on accounting for the effects of the U.S. tax reform where our determinations are incomplete but we are able to determine a reasonable estimate. A final determination is required to be made within a measurement period not to extend beyond one year from the enactment date of the U.S. tax reform. The provisional amounts were primarily associated with estimation of the one-time deemed repatriation tax considering complexity, as well as limited and changing technical tax guidance. Further, the provisional amounts also apply in regard to other potential technical interpretations of accounting and taxing authorities related to elements of the U.S. tax reform subject to change. There was no adjustment in income taxes related to our provisional amounts during the six months ended June 30, 2018.

Settlements		(135.5)	(36.7)
Balance at end of period (1)	\$	54.5	\$ 194.1

(1) Of this amount, \$31.5 million, if recognized, would reduce the 2018 effective income tax rate. We recognize interest and penalties related to uncertain tax positions in operating expenses within the consolidated statements of operations.

As of June 30, 2018 and December 31, 2017, we had recognized \$53.8 million and \$125.5 million of accumulated pre-tax interest and penalties related to unrecognized tax benefits, respectively. During the six months ended June 30, 2018, settlement agreements applicable to tax years 1995 to 2003 were executed with the Department of Justice, as previously approved by the Joint Committee of Taxation in August 2017. We do not expect the final determination of these unrecognized tax benefits to have a material impact on our net income.

Contributions

Our funding policy for our qualified pension plan is to fund the plan annually in an amount at least equal to the minimum annual contribution required under the Employee Retirement Income Security Act (ERISA) and, generally, not greater than the maximum amount that can be deducted for federal income tax purposes. It is too early to determine, but we do not anticipate that we will be required to fund a minimum required contribution under ERISA. Regardless, it is possible that we may fund the qualified and nonqualified pension plans in 2018 for a combined total of up to \$200.0 million. During the three and six months ended June 30, 2018, we contributed \$54.4 million and \$89.8 million to these plans, respectively.

9. Contingencies, Guarantees and Indemnifications

Litigation and Regulatory Contingencies

We are regularly involved in litigation, both as a defendant and as a plaintiff, but primarily as a defendant. Litigation naming us as a defendant ordinarily arises out of our business operations as a provider of asset management and accumulation products and services, individual life insurance, specialty benefits insurance and our investment activities. Some of the lawsuits may be class actions, or purport to be, and some may include claims for unspecified or substantial punitive and treble damages.

We may discuss such litigation in one of three ways. We accrue a charge to income and disclose legal matters for which the chance of loss is probable and for which the amount of loss can be reasonably estimated. We may disclose contingencies for which the chance of loss is reasonably possible and provide an estimate of the possible loss or range of loss or a statement that such an estimate cannot be made. Finally, we may voluntarily disclose loss contingencies for which the chance of loss is remote in order to provide information concerning matters that potentially expose us to possible losses.

In addition, regulatory bodies such as state insurance departments, the SEC, the Financial Industry Regulatory Authority (FINRA), the Department of Labor (DOL) and other regulatory agencies in the U.S. and in international locations in which we do business, regularly make inquiries and conduct examinations or investigations concerning our compliance with, among other things, insurance laws, securities laws, ERISA and laws governing the activities of broker-dealers. We receive requests from regulators and other governmental authorities relating to industry issues and may receive additional requests, including subpoenas and interrogatories, in the future.

As of June 30, 2018, we had no litigation or regulatory contingencies for which we believe disclosure is appropriate.

Guarantees and Indemnifications

In the normal course of business, we have provided guarantees to third parties primarily related to former subsidiaries and joint ventures. The terms of these agreements range in duration and often are not explicitly defined. The maximum exposure under these agreements as of June 30, 2018, was approximately \$135.0 million. At inception, the fair value of such guarantees was insignificant. In addition, we believe the likelihood is remote that material payments will be required. Therefore, any liability accrued within our consolidated statements of financial position is insignificant. Should we be required to perform under these guarantees, we generally could recover a portion of the loss from third parties through recourse provisions included in agreements with such parties, the sale of assets held as collateral that can be liquidated in the event performance is required under the guarantees or other recourse generally available to us; therefore, such guarantees would not result in a material adverse effect on our business or financial position. While the likelihood is remote, such outcomes could materially affect net income in a particular quarter or annual period. Furthermore, in connection with our P-Caps contingent funding agreements, we are required to purchase any principal and interest strips of U.S. Treasury securities that are due and not paid from the associated unconsolidated trusts. The maximum exposure under these agreements as of June 30, 2018, was \$750.0 million. See Note 6, Long-Term Debt, for further details.

We manage mandatory privatized social security funds in Chile. By regulation, we have a required minimum guarantee on the funds' relative return. Because the guarantee has no limitation with respect to duration or amount, the maximum exposure of the guarantee in the future is indeterminable.

Table of Contents

Principal Financial Group, Inc.
Notes to Consolidated Financial Statements (continued)
June 30, 2018
(Unaudited)

We are also subject to various other indemnification obligations issued in conjunction with divestitures, acquisitions and financing transactions whose terms range in duration and often are not explicitly defined. Certain portions of these indemnifications may be capped, while other portions are not subject to such limitations; therefore, the overall maximum amount of the obligation under the indemnifications cannot be reasonably estimated. At inception, the fair value of such indemnifications was insignificant. In addition, we believe the likelihood is remote that material payments will be required. Therefore, any liability accrued within our consolidated statements of financial position is insignificant. While we are unable to estimate with certainty the ultimate legal and financial liability with respect to these indemnifications, we believe that performance under these indemnifications would not result in a material adverse effect on our business or financial position. While the likelihood is remote, performance under these indemnifications could materially affect net income in a particular quarter or annual period.

Noncontrolling Interest

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-Q

Interests held by unaffiliated parties in consolidated entities are reflected in noncontrolling interest, which represents the noncontrolling partners share of the underlying net assets of our consolidated subsidiaries. Noncontrolling interest that is not redeemable is reported in the equity section of the consolidated statements of financial position.

The noncontrolling interest holders in certain of our consolidated entities maintain an equity interest that is redeemable at the option of the holder, which may be exercised on varying dates. Since redemption of the noncontrolling interest is outside of our control, this interest is excluded from stockholders' equity and reported separately as redeemable noncontrolling interest on the consolidated statements of financial position. Our redeemable noncontrolling interest primarily relates to consolidated sponsored investment funds for which interests are redeemed at fair value from the net assets of the funds.

For our redeemable noncontrolling interest related to other consolidated subsidiaries, redemptions are required to be purchased at fair value or a value based on a formula that management intended to reasonably approximate fair value based on a fixed multiple of earnings over a measurement period. The carrying value of the redeemable noncontrolling interest is compared to the redemption value at each reporting period. Any adjustments to the carrying amount of the redeemable noncontrolling interest for changes in redemption value prior to exercise of the redemption option are determined after the attribution of net income or loss of the subsidiary and are recognized in the redemption value as they occur. Adjustments to the carrying value of redeemable noncontrolling interest result in adjustments to additional paid-in capital and/or retained

Table of Contents

Principal Financial Group, Inc.
Notes to Consolidated Financial Statements (continued)

(Unaudited)

earnings. Adjustments are recorded in retained earnings to the extent the redemption value of the redeemable noncontrolling interest exceeds its fair value and will impact the numerator in our earnings per share calculations. All other adjustments to the redeemable noncontrolling interest are recorded in additional paid-in capital.

Following is a reconciliation of the changes in the redeemable noncontrolling interest (in millions):

Balance as of January 1, 2017	\$	97.5
Net income attributable to redeemable noncontrolling interest		5.9
Redeemable noncontrolling interest of deconsolidated entities (1)		(1.4)
Contributions from redeemable noncontrolling interest		16.4
Distributions to redeemable noncontrolling interest		(25.7)
Change in redemption value of redeemable noncontrolling interest		2.0
Other comprehensive income attributable to redeemable noncontrolling interest		0.4
Balance as of June 30, 2017	\$	95.1
Balance as of January 1, 2018	\$	101.3
Net income attributable to redeemable noncontrolling interest		2.1
Redeemable noncontrolling interest of deconsolidated entities (1)		(3.2)
Contributions from redeemable noncontrolling interest		56.4
Distributions to redeemable noncontrolling interest		(15.7)
Change in redemption value of redeemable noncontrolling interest		(0.6)
Other comprehensive loss attributable to redeemable noncontrolling interest		(1.4)
Balance as of June 30, 2018	\$	138.9

(1) We deconsolidated certain sponsored investment funds as they no longer met the requirements for consolidation.

11. Fair Value Measurements

We use fair value measurements to record fair value of certain assets and liabilities and to estimate fair value of financial instruments not recorded at fair value but required to be disclosed at fair value. Certain financial instruments, particularly policyholder liabilities other than investment contracts, are excluded from these fair value disclosure requirements.

Valuation Hierarchy

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (an exit price). The fair value hierarchy prioritizes the inputs to valuation techniques used to measure fair value into three levels. The level in the fair value hierarchy within which the fair value measurement in its entirety falls is determined based on the lowest level input that is significant to the fair value measurement in its entirety considering factors specific to the asset or liability.

- **Level 1** Fair values are based on unadjusted quoted prices in active markets for identical assets or liabilities. Our Level 1 assets and liabilities primarily include exchange traded equity securities, mutual funds and U.S. Treasury bonds.
- **Level 2** Fair values are based on inputs other than quoted prices within Level 1 that are observable for the asset or liability, either directly or indirectly. Our Level 2 assets and liabilities primarily include fixed maturities (including public and private bonds), equity securities, cash equivalents, derivatives and other investments.
- **Level 3** Fair values are based on at least one significant unobservable input for the asset or liability. Our Level 3 assets and liabilities primarily include fixed maturities, real estate and commercial mortgage loan investments of our separate accounts, complex derivatives and embedded derivatives.

Table of Contents

Principal Financial Group, Inc.
Notes to Consolidated Financial Statements (continued)
June 30, 2018
(Unaudited)

Determination of Fair Value

The following discussion describes the valuation methodologies and inputs used for assets and liabilities measured at fair value on a recurring basis or disclosed at fair value. The techniques utilized in estimating the fair value of financial instruments are reliant on the assumptions used. Care should be exercised in deriving conclusions about our business, its value or financial position based on the fair value information of financial instruments presented below.

Fair value estimates are made based on available market information and judgments about the financial instrument at a specific point in time. Such estimates do not consider the tax impact of the realization of unrealized gains or losses. In addition, the disclosed fair value may not be realized in the immediate settlement of the financial instrument. We validate prices through an investment analyst review process, which includes validation through direct interaction with external sources, review of recent trade activity or use of internal models. In circumstances where broker quotes are used to value an instrument, we generally receive one non-binding quote. Broker quotes are validated through an investment analyst review process, which includes validation through direct interaction with external sources and use of internal models or other relevant information. We did not make any significant changes to our valuation processes during 2018.

Fixed Maturities

Fixed maturities include bonds, ABS, redeemable preferred stock and certain non-redeemable preferred securities. When available, the fair value of fixed maturities is based on quoted prices of identical assets in active markets. These are reflected in Level 1 and primarily include U.S. Treasury bonds and actively traded redeemable corporate preferred securities.

When quoted prices of identical assets in active markets are not available, our first priority is to obtain prices from third party pricing vendors. We have regular interaction with these vendors to ensure we understand their pricing methodologies and to confirm they are utilizing observable market information. Their methodologies vary by asset class and include inputs such as estimated cash flows, benchmark yields, reported trades, broker quotes, credit quality, industry events and economic events. Fixed maturities with validated prices from pricing services, which includes the majority of our public fixed maturities in all asset classes, are generally reflected in Level 2. Also included in Level 2 are corporate bonds when quoted market prices are not available, for which an internal model using substantially all observable inputs or a matrix pricing valuation approach is used. In the matrix approach, securities are grouped into pricing categories that vary by sector, rating and average life. Each pricing category is assigned a risk spread based on studies of observable public market data from the investment professionals assigned to specific security classes. The expected cash flows of the security are then discounted back at the current Treasury curve plus the appropriate risk spread. Although the matrix valuation approach provides a fair valuation of each pricing category, the valuation of an individual security within each pricing category may also be impacted by company specific factors.

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-Q

If we are unable to price a fixed maturity security using prices from third party pricing vendors or other sources specific to the asset class, we may obtain a broker quote or utilize an internal pricing model specific to the asset utilizing relevant market information, to the extent available and where at least one significant unobservable input is utilized. These are reflected in Level 3 in the fair value hierarchy and can include fixed maturities across all asset classes. As of June 30, 2018, less than 1% of our total fixed maturities were Level 3 securities valued using internal pricing models.

The primary inputs, by asset class, for valuations of the majority of our Level 2 investments from third party pricing vendors or our internal pricing valuation approach are described below.

U.S. Government and Agencies/Non-U.S. Governments. Inputs include recently executed market transactions, interest rate yield curves, maturity dates, market price quotations and credit spreads relating to similar instruments.

States and Political Subdivisions. Inputs include Municipal Securities Rulemaking Board reported trades, U.S. Treasury and other benchmark curves, material event notices, new issue data and obligor credit ratings.

Corporate. Inputs include recently executed transactions, market price quotations, benchmark yields, issuer spreads and observations of equity and credit default swap curves related to the issuer. For private placement corporate securities valued through the matrix valuation approach inputs include the current Treasury curve and risk spreads based on sector, rating and average life of the issuance.

Table of Contents

Principal Financial Group, Inc.
Notes to Consolidated Financial Statements (continued)
June 30, 2018
(Unaudited)

RMBS, CMBS, Collateralized Debt Obligations and Other Debt Obligations. Inputs include cash flows, priority of the tranche in the capital structure, expected time to maturity for the specific tranche, reinvestment period remaining and performance of the underlying collateral including prepayments, defaults, deferrals, loss severity of defaulted collateral and, for RMBS, prepayment speed assumptions. Other inputs include market indices and recently executed market transactions.

Equity Securities

Equity securities include mutual funds, common stock, non-redeemable preferred stock and required regulatory investments. Fair values of equity securities are determined using quoted prices in active markets for identical assets when available, which are reflected in Level 1. When quoted prices are not available, we may utilize internal valuation methodologies appropriate for the specific asset that use observable inputs such as underlying share prices or the net asset value (NAV), which are reflected in Level 2. Fair values might also be determined using broker quotes or through the use of internal models or analysis that incorporate significant assumptions deemed appropriate given the circumstances and consistent with what other market participants would use when pricing such securities, which are reflected in Level 3.

Derivatives

The fair values of exchange-traded derivatives are determined through quoted market prices, which are reflected in Level 1. Exchange-traded derivatives include futures that are settled daily, which reduces their fair value in the consolidated statements of financial position. The fair values of OTC cleared derivatives are determined through market prices published by the clearinghouses, which are reflected in Level 2. The clearinghouses may utilize the overnight indexed swap (OIS) curve in their valuation. Variation margin associated with OTC cleared derivatives is settled daily, which reduces their fair value in the consolidated statements of financial position. The fair values of bilateral OTC derivative instruments are determined using either pricing valuation models that utilize market observable inputs or broker quotes. The majority of our bilateral OTC derivatives are valued with models that use market observable inputs, which are reflected in Level 2. Significant inputs include contractual terms, interest rates, currency exchange rates, credit spread curves, equity prices and volatilities. These valuation models consider projected discounted cash flows, relevant swap curves and appropriate implied volatilities. Certain bilateral OTC derivatives utilize unobservable market data, primarily independent broker quotes that are nonbinding quotes based on models that do not reflect the result of market transactions, which are reflected in Level 3.

Our non-cleared derivative contracts are generally documented under ISDA Master Agreements, which provide for legally enforceable set-off and close-out netting of exposures to specific counterparties. Collateral arrangements are bilateral and based on current ratings of each entity. We utilize the LIBOR interest rate curve to value our positions, which includes a credit spread. This credit spread incorporates an appropriate level of nonperformance risk into our valuations given the current ratings of our counterparties, as well as the collateral agreements in place. Counterparty credit risk is routinely monitored to ensure our adjustment for non-performance risk is appropriate. Our centrally cleared derivative contracts are conducted with regulated centralized clearinghouses, which provide for daily exchange of

cash collateral or variation margin equal to the difference in the daily market values of those contracts that eliminates the non-performance risk on these trades.

Interest Rate Contracts. For non-cleared contracts we use discounted cash flow valuation techniques to determine the fair value of interest rate swaps using observable swap curves as the inputs. These are reflected in Level 2. For centrally cleared contracts we use published prices from clearinghouses. These are reflected in Level 2. In addition, we have interest rate options and have had a limited number of complex inflation-linked interest rate swaps and swaptions that are valued using broker quotes. These are reflected in Level 3.

Foreign Exchange Contracts. We use discounted cash flow valuation techniques that utilize observable swap curves and exchange rates as the inputs to determine the fair value of foreign currency swaps. These are reflected in Level 2. Currency forwards and currency options are valued using observable market inputs, including forward currency exchange rates. These are reflected in Level 2. In addition, we have a limited number of non-standard currency swaps and currency options that are valued using broker quotes. These are reflected within Level 3.

Equity Contracts. We use an option pricing model using observable implied volatilities, dividend yields, index prices and swap curves as the inputs to determine the fair value of equity options. These are reflected in Level 2.

Table of Contents

Principal Financial Group, Inc.
Notes to Consolidated Financial Statements (continued)
June 30, 2018
(Unaudited)

Credit Contracts. We use either the ISDA Credit Default Swap Standard discounted cash flow model that utilizes observable default probabilities and recovery rates as inputs or broker prices to determine the fair value of credit default swaps. These are reflected in Level 3.

Other Investments

Other investments reported at fair value include invested assets of consolidated sponsored investment funds, unconsolidated sponsored investment funds, other investment funds reported at fair value, commercial mortgage loans of consolidated VIEs for which the fair value option was elected and equity method real estate investments for which the fair value option was elected. In addition, in 2017 we had other investment funds for which the fair value option was elected.

Invested assets of consolidated sponsored investment funds include equity securities, fixed maturities and other investments, for which fair values are determined as previously described, and are reflected in Level 1 and Level 2.

The fair value of unconsolidated sponsored investment funds and other investment funds is determined using the NAV of the fund. The NAV of the fund represents the price at which we would be able to initiate a transaction. Investments for which the NAV represents a quoted price in an active market for identical assets are reflected in Level 1. Investments that do not have a quoted price in an active market are reflected in Level 2.

Commercial mortgage loans of consolidated VIEs are valued using the more observable fair value of the liabilities of the consolidated collateralized financing entities (CCFEs) under the measurement alternative guidance and are reflected in Level 2. The liabilities are affiliated so are not reflected in our consolidated results.

Equity method real estate investments for which the fair value option was elected are reflected in Level 3. The equity method real estate investments consist of underlying real estate and debt. The real estate fair value is estimated using a discounted cash flow valuation model that utilizes public real estate market data inputs such as transaction prices, market rents, vacancy levels, leasing absorption, market cap rates and discount rates. The debt fair value is estimated using a discounted cash flow analysis based on our incremental borrowing rate for similar borrowing arrangements.

Cash Equivalents

Certain cash equivalents are reported at fair value on a recurring basis and include money market instruments and other short-term investments with maturities of three months or less. Fair values of these cash equivalents may be determined using public quotations, when available, which are reflected in Level 1. When public quotations are not available, because of the highly liquid nature of these assets, carrying amounts may be used to approximate fair values, which are reflected in Level 2.

Separate Account Assets

Separate account assets include equity securities, debt securities, cash equivalents and derivative instruments, for which fair values are determined as previously described, and are reflected in Level 1, Level 2 and Level 3. Separate account assets also include commercial mortgage loans, for which the fair value is estimated by discounting the expected total cash flows using market rates that are applicable to the yield, credit quality and maturity of the loans. The market clearing spreads vary based on mortgage type, weighted average life, rating and liquidity. These are reflected in Level 3. Finally, separate account assets include real estate, for which the fair value is estimated using discounted cash flow valuation models that utilize various public real estate market data inputs. In addition, each property is appraised annually by an independent appraiser. The real estate included in separate account assets is recorded net of related mortgage encumbrances for which the fair value is estimated using discounted cash flow analysis based on our incremental borrowing rate for similar borrowing arrangements. The real estate within the separate accounts is reflected in Level 3.

Investment Contracts

Certain annuity contracts and other investment contracts include embedded derivatives that have been bifurcated from the host contract and are measured at fair value on a recurring basis, which are reflected in Level 3. The key assumptions for calculating the fair value of the embedded derivative liabilities are market assumptions (such as equity market returns, interest rate levels, market volatility and correlations) and policyholder behavior assumptions (such as lapse, mortality, utilization and withdrawal patterns). Risk margins are included in the policyholder behavior assumptions. The

Table of Contents

Principal Financial Group, Inc.
Notes to Consolidated Financial Statements (continued)
June 30, 2018
(Unaudited)

assumptions are based on a combination of historical data and actuarial judgment. The embedded derivative liabilities are valued using stochastic models that incorporate a spread reflecting our own creditworthiness.

The assumption for our own non-performance risk for investment contracts and any embedded derivatives bifurcated from certain annuity and investment contracts is based on the current market credit spreads for debt-like instruments we have issued and are available in the market.

Other Liabilities

Certain obligations reported in other liabilities include embedded derivatives to deliver underlying securities of structured investments to third parties. The fair value of the embedded derivatives is calculated based on the value of the underlying securities that are valued based on prices obtained from third party pricing vendors as utilized and described in our discussion of how fair value is determined for fixed maturities, which are reflected in Level 2.

As of December 31, 2016, obligations of consolidated VIEs for which the fair value option was elected were included in other liabilities. The synthetic entity that had these obligations matured in the first quarter of 2017. The VIEs' unaffiliated obligations were valued utilizing internal pricing models, which were reflected in Level 3.

Assets and Liabilities Measured at Fair Value on a Recurring Basis

(1) Within the consolidated statements of financial position, derivative assets are reported with other investments and derivative liabilities are reported with other liabilities. Refer to Note 4, Derivative Financial Instruments, for further information on fair value by class of derivative instruments.

(2) Primarily includes sponsored investment funds, other investment funds, equity method real estate investments reported at fair value and commercial mortgage loans of consolidated VIEs.

- (3) Includes money market instruments and short-term investments with a maturity date of three months or less when purchased.
- (4) Includes bifurcated embedded derivatives that are reported at fair value within the same line item in the consolidated statements of financial position in which the host contract is reported.
- (5) Certain investments are measured at fair value using the NAV per share (or its equivalent) practical expedient and have not been classified in the fair value hierarchy. Other investments using the NAV practical expedient consist of certain fund interests that are restricted until maturity with unfunded commitments totaling \$38.3 million and \$46.1 million as of June 30, 2018 and December 31, 2017, respectively. Separate account assets using the NAV practical expedient consist of hedge funds with varying investment strategies that also have a variety of redemption terms and conditions. We do not have unfunded commitments associated with these hedge funds.

(1) Both realized gains (losses) and mark-to-market unrealized gains (losses) are generally reported in net realized capital gains (losses) within the consolidated statements of operations. Realized and unrealized gains (losses) on certain securities with an investment objective to realize economic value through mark-to-market changes are reported

in net investment income within the consolidated statements of operations.

- (2) Gains and losses for separate account assets do not impact net income as the change in value of separate account assets is offset by a change in value of separate account liabilities. Foreign currency translation adjustments related to the Principal International segment separate account assets are recorded in AOCI and are offset by foreign currency translation adjustments of the corresponding separate account liabilities.
- (3) Includes foreign currency translation adjustments related to our Principal International segment.
- (4) Gross purchases, sales, issuances and settlements were:

Transfers between fair value hierarchy levels are recognized at the beginning of the reporting period.

Separate account assets transferred from Level 1 to Level 2 during the six months ended June 30, 2018, primarily included cash equivalents as a result of additional analysis to clarify the source of the price.

Assets transferred into Level 3 during the three and six months ended June 30, 2018 and 2017, primarily included those assets for which we are now unable to obtain pricing from a recognized third party pricing vendor as well as assets that were previously priced using a matrix valuation approach that may no longer be relevant when applied to asset-specific situations.

Assets transferred out of Level 3 during the three and six months ended June 30, 2018 and 2017, primarily included those for which we are now able to obtain pricing from a recognized third party pricing vendor or from internal models using substantially all market observable information.

Quantitative Information about Level 3 Fair Value Measurements

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-Q

The following table provides quantitative information about the significant unobservable inputs used for recurring fair value measurements categorized within Level 3, excluding assets and liabilities for which significant quantitative unobservable inputs are not developed internally, which primarily consists of those valued using broker quotes or the measurement alternative for CCFEs. Refer to Assets and liabilities measured at fair value on a recurring basis for a complete valuation hierarchy summary.

		Discounted cash flow - real estate		Discount rate (1)	5.8%-17.2%	6.9%
				Terminal capitalization rate	4.3%-9.3%	6.1%
		Discounted cash flow - real estate debt		Average market rent growth rate	0.5%-4.7%	2.9%
				Loan to value	12.1%-71.4%	45.8%
		Market interest rate	3.1%-4.5%	3.8%		
Liabilities						
Investment contracts	(160.3)	Discounted cash flow	Long duration interest rate	2.5%-2.7% (2)		
			Long-term equity market volatility	18.7%-41.1%		
			Non-performance risk	0.2%-1.2%		
			Utilization rate	See note (3)		
			Lapse rate	1.3%-16.0%		
			Mortality rate	See note (4)		

(1) Represents market comparable interest rate or an index adjusted rate used as the base rate in the discounted cash flow analysis prior to any credit spread, illiquidity or other adjustments, where applicable.

(2) Represents the range of rate curves used in the valuation analysis that we have determined market participants would use when pricing the instrument. Derived from interpolation between various observable swap rates.

(3) This input factor is the number of contractholders taking withdrawals as well as the amount and timing of the withdrawals and a range does not provide a meaningful presentation.

(4) This input is based on an appropriate industry mortality table and a range does not provide a meaningful presentation.

Market comparable discount rates are used as the base rate in the discounted cash flows used to determine the fair value of certain assets. Increases or decreases in the credit spreads on the comparable assets could cause the fair value of the assets to significantly decrease or increase, respectively. Additionally, we may adjust the base discount rate or the modeled price by applying an illiquidity premium given the highly structured nature of certain assets. Increases or decreases in this illiquidity premium could cause significant decreases or increases, respectively, in the fair value of the asset.

Embedded derivatives within our investment contracts liability can be in either an asset or liability position, depending on certain inputs at the reporting date. Increases to an asset or decreases to a liability are described as increases to fair value. Increases or decreases in market volatilities could cause significant decreases or increases, respectively, in the fair value of embedded derivatives in investment contracts. Long duration interest rates are used as the mean return when projecting the growth in the value of associated account value and impact the discount rate used in the discounted future cash flows valuation. The amount of claims will increase if account value is not sufficient to cover guaranteed withdrawals.

Table of Contents

Principal Financial Group, Inc.
Notes to Consolidated Financial Statements (continued)
June 30, 2018
(Unaudited)

Increases or decreases in risk-free rates could cause the fair value of the embedded derivative to significantly increase or decrease, respectively. Increases or decreases in our own credit risks, which impact the rates used to discount future cash flows, could significantly increase or decrease, respectively, the fair value of the embedded derivative. All of these changes in fair value would impact net income.

Decreases or increases in the mortality rate assumption could cause the fair value of the embedded derivative to decrease or increase, respectively. Decreases or increases in the overall lapse rate assumption could cause the fair value of the embedded derivative to decrease or increase, respectively. The lapse rate assumption varies dynamically based on the relationship of the guarantee and associated account value. A stronger or weaker dynamic lapse rate assumption could cause the fair value of the embedded derivative to decrease or increase, respectively. The utilization rate assumption includes how many contractholders will take withdrawals, when they will take them and how much of their benefit they will take. Increases or decreases in the assumption of the number of contractholders taking withdrawals could cause the fair value of the embedded derivative to decrease or increase, respectively. Assuming contractholders take withdrawals earlier or later could cause the fair value of the embedded derivative to decrease or increase, respectively. Assuming contractholders take more or less of their benefit could cause the fair value of the embedded derivative to decrease or increase, respectively.

Assets and Liabilities Measured at Fair Value on a Nonrecurring Basis

Certain assets are measured at fair value on a nonrecurring basis. During the six months ended June 30, 2018, certain mortgage loans had been marked to fair value of \$5.5 million. The net impact of write-downs of loans reclassified to held-for-sale, impairments and improvements in estimated fair value of previously impaired loans resulted in a net loss of \$0.6 million for both the three and six months ended June 30, 2018, that was recorded in net realized capital gains (losses) as part of the mortgage loan valuation allowance. This includes the impact of certain loans no longer on our books. These collateral-dependent mortgage loans are a Level 3 fair value measurement, as fair value is based on the fair value of the underlying real estate collateral, which is estimated using appraised values that involve significant unobservable inputs.

During the six months ended June 30, 2017, certain mortgage loans had been marked to fair value of \$0.8 million. The net impact of write-downs of loans reclassified to held-for-sale, impairments and improvements in estimated fair value of previously impaired loans resulted in a net loss of \$0.0 million and \$0.3 million for the three and six months ended June 30, 2017, respectively, that was recorded in net realized capital gains (losses) as part of the mortgage loan valuation allowance. This includes the impact of certain loans no longer on our books. These collateral-dependent mortgage loans are a Level 3 fair value measurement, as fair value is based on the fair value of the underlying real estate collateral, which is estimated using appraised values that involve significant unobservable inputs.

Fair Value Option

We elected fair value accounting for:

- Certain commercial mortgage loans of consolidated VIEs for which it was not practicable for us to determine the carrying value. In addition, as of December 31, 2016, we had certain obligations of consolidated VIEs for which it was not practicable for us to determine the carrying value. The synthetic entity that had these obligations matured in the first quarter of 2017.
- Certain real estate ventures that are subject to the equity method of accounting because the nature of the investments is to add value to the properties and generate income from the operations of the properties. Other equity method real estate investments are not fair valued because the investments mainly generate income from the operations of the underlying properties.
- In 2017, we had certain investment funds for which we did not have enough influence to account for under the equity method in order to reflect the economics of the investment in the financial statements. We did not elect the fair value option for other similar investments as these investments are generally accounted for under the equity method of accounting.

12. Segment Information

We provide financial products and services through the following segments: Retirement and Income Solutions, Principal Global Investors, Principal International and U.S. Insurance Solutions. In addition, we have a Corporate segment. The segments are managed and reported separately because they provide different products and services, have different strategies or have different markets and distribution channels.

The Retirement and Income Solutions segment provides retirement and related financial products and services primarily to businesses, their employees and other individuals. The segment is organized into Retirement and Income Solutions – Fee, which includes full service accumulation, trust services and individual variable annuities; and Retirement and Income Solutions – Spread, which includes individual fixed annuities, investment only, full service payout and banking services.

The Principal Global Investors segment provides asset management services to our asset accumulation business, our insurance operations, the Corporate segment and third party clients. This segment also includes our mutual fund business.

Table of Contents

Principal Financial Group, Inc.
Notes to Consolidated Financial Statements (continued)
June 30, 2018
(Unaudited)

The Principal International segment has operations in Latin America (Brazil, Chile and Mexico) and Asia (China, Hong Kong Special Administrative Region, India and Southeast Asia). We focus on locations with large middle classes, favorable demographics and growing long-term savings, ideally with voluntary or mandatory pension markets. We entered these locations through acquisitions, start-up operations and joint ventures.

The U.S. Insurance Solutions segment focuses on solutions for individuals and small-to-medium sized businesses and their employees. The segment is organized into Specialty Benefits insurance, which provides group dental and vision insurance, individual and group disability insurance, critical illness, accident, group life insurance and non-medical fee-for-service claims administration; and Individual Life insurance, which provides universal life, variable universal life, indexed universal life and traditional life insurance.

Our Corporate segment manages the assets representing capital that has not been allocated to any other segment. Financial results of the Corporate segment primarily reflect our financing activities (including financing costs), income on capital not allocated to other segments, inter-segment eliminations, income tax risks and certain income, expenses and other adjustments not allocated to the segments based on the nature of such items. Results of Principal Securities, Inc. (PSI), our retail broker-dealer and registered investment advisor (RIA), and our exited group medical and long-term care insurance businesses are reported in this segment.

Management uses segment pre-tax operating earnings in evaluating performance, which is consistent with the financial results provided to and discussed with securities analysts. We determine segment pre-tax operating earnings by adjusting U.S. GAAP income before income taxes for pre-tax net realized capital gains (losses), as adjusted, pre-tax other adjustments that management believes are not indicative of overall operating trends and certain adjustments related to equity method investments and noncontrolling interest. Pre-tax net realized capital gains (losses), as adjusted, are net of related changes in the amortization pattern of DAC and related actuarial balances, recognition of deferred front-end fee revenues for sales charges on retirement and life insurance products and services, amortization of hedge accounting book value adjustments for certain discontinued hedges, net realized capital gains and losses distributed, certain adjustments related to equity method investments, certain adjustments related to sponsored investment funds and certain market value adjustments to fee revenues. Pre-tax net realized capital gains (losses), as adjusted, exclude periodic settlements and accruals on derivative instruments not designated as hedging instruments and exclude certain market value adjustments of embedded derivatives and realized capital gains (losses) associated with our exited group medical insurance business. Segment operating revenues exclude net realized capital gains (losses) (except periodic settlements and accruals on derivatives not designated as hedging instruments), including their impact on recognition of front-end fee revenues, certain market value adjustments to fee revenues, certain adjustments related to equity method investments, certain adjustments related to sponsored investment funds and amortization of hedge accounting book value adjustments for certain discontinued hedges; certain adjustments related to equity method investments, pre-tax other adjustments management believes are not indicative of overall operating trends and revenue from our exited group medical insurance business. While these items may be significant components in understanding and assessing the consolidated financial performance, management believes the presentation of pre-tax operating earnings enhances the understanding of our results of operations by highlighting pre-tax earnings attributable to the normal, ongoing operations of the business.

The accounting policies of the segments are consistent with the accounting policies for the consolidated financial statements, with the exception of: (1) pension and other postretirement employee benefits (OPEB) cost allocations and (2) income tax allocations. For purposes of determining pre-tax operating earnings, the segments are allocated the service component of pension and other postretirement benefit costs. The Corporate segment reflects the non-service components of pension and other postretirement benefit costs as assumptions are established and funding

decisions are managed from a company-wide perspective. The Corporate segment functions to absorb the risk inherent in interpreting and applying tax law. For purposes of determining non-GAAP operating earnings, the segments are allocated tax adjustments consistent with the positions we took on tax returns. The Corporate segment results reflect any differences between the tax returns and the estimated resolution of any disputes.

Total fees and other revenues per consolidated statements of operations	\$ 1,012.6	\$ 955.1	\$ 2,023.9	\$ 1,895.7

(1) Fees and other revenues not within the scope of the revenue recognition guidance primarily represent revenue on contracts accounted for under the financial instruments or insurance contracts standards.

(2) Pre-tax other adjustments relate to the recognition of deferred front-end fee revenues for sales charges on retirement and life insurance products and certain market value adjustments to fee revenues.

Table of Contents

Principal Financial Group, Inc.
Notes to Consolidated Financial Statements (continued)
June 30, 2018
(Unaudited)

Retirement and Income Solutions - Fee

Retirement and Income Solutions - Fee offers service and trust agreements for defined contribution plans, including 401(k) plans, 403(b) plans, and employee stock ownership plans. The investment components of these service agreements are in the form of mutual fund offerings. In addition, plan sponsor trust services are also available through an affiliated trust company.

Fees and other revenues are earned for administrative activities performed for the defined contribution plans including recordkeeping and reporting as well as trust, asset management and investment services. The majority of these activities are performed daily over time. Fee-for-service transactions are also provided upon client request. These services are considered distinct or grouped into a bundle until a distinct performance obligation is identified. Some performance obligations are considered a series of distinct services, which are substantially the same and have the same pattern of transfer to the customer.

Fees and other revenues can be based on a fixed contractual rate for these services or can be variable based upon contractual rates applied to the market value of the client's investment portfolio each day. If the consideration for this series of performance obligations is based on daily market value, it is considered variable each day as the services are performed over time. The consideration becomes unconstrained and thus recognized as revenue for each day's series of distinct services once the market value of the clients' investment portfolios is determined at market close or carried over at the end of the day for days when the market is closed. Additionally, fixed fees and other revenues are recognized point-in-time as fee-for-service transactions upon completion.

The types of revenues from contracts with customers were as follows:

	For the three months ended			For the six months ended		
	2018	June 30,	2017	2018	June 30,	2017
			<i>(in millions)</i>			
Administrative service fee revenue	\$	66.3	\$	65.1	\$	127.9
Other fee revenue		0.6		0.5		0.7
Total revenues from contracts with customers		66.9		65.6		128.6
Fees and other revenues not within the scope of revenue recognition guidance		282.8		271.4		569.2
Total fees and other revenues		349.7		337.0		697.8
Premiums and other considerations		0.9		0.7		2.4
Net investment income		106.2		113.8		216.2
Total operating revenues	\$	456.8	\$	451.5	\$	916.4
				\$		901.9

Retirement and Income Solutions - Spread

Retirement and Income Solutions Spread offers individual retirement accounts (IRAs) through Principal Bank, which are primarily funded by retirement savings rolled over from qualified retirement plans. The IRAs are held in savings accounts, money market accounts and certificates of deposit. Revenues are earned through fees as the performance of establishing and maintaining IRA accounts is completed. Fee-for-service transactions are also provided upon client request. The establishment fees and annual maintenance fees are accrued into earnings over a period of time using the average account life. Upfront and recurring bank fees are related to performance obligations that have the same pattern of transfer to the customer and are recognized in income over time with control transferred to the customers utilizing the output method. These fees are based on a fixed contractual rate. Fixed fees and other revenues are also recognized point-in-time as fee-for-service transactions upon completion.

Principal Global Investors

Fees and other revenues earned for asset management, investment advisory and distribution services provided to institutional and retail clients are based largely upon contractual rates applied to the specified amounts of the clients' portfolios. Each service is a distinct performance obligation, or a series of distinct services that are a single performance obligation in that the services are substantially the same and have the same pattern of transfer to the customer. Fees and other revenues received for performance obligations such as asset management and other services are typically recognized over time utilizing the output method as the service is performed. Performance fees and transaction fees on certain accounts are recognized in income when the probability of significant reversal will not occur upon resolution of the uncertainty, which could be based on a variety of factors such as market performance or other internal metrics. Asset management fees are accrued each month based on the fee terms within the applicable agreement and are generally billed quarterly when values used for the calculation are available. Management fees and performance fees are variable consideration as they are subject to fluctuation based on assets under management (AUM) and other constraints. These fees are not recognized until unconstrained at the end of each reporting period.

The types of revenues from contracts with customers were as follows:

Principal International

Fees and other revenues are earned for asset management and distribution services provided to retail and institutional clients in addition to trustee and/or administrative services performed for retirement savings plans. Each service is considered a distinct performance obligation; however, if the services are not distinct on their own, we combine them into a distinct bundle or we have a series of distinct services that are substantially the same and have the same pattern of transfer to the customer. Fees and other revenues are typically based upon contractual rates applied to the market value of the clients' investment portfolios and are considered variable consideration. The transaction price generally includes the amount determined at the end of the reporting period, whereby fees are deducted from the clients' investment portfolios and are recognized as revenue when no longer constrained and satisfied as the services are performed over time utilizing the output method. In addition, payments to

customers can take the form of an incentive given by us to entice the customer to purchase its goods or services. Incentives offered to customers are recognized as part of the transaction price as a reduction of revenue either over the period the customer remains in order to receive the incentive or monthly throughout the life of the contract.

Incentive-based fees are recognized in income when the probability of significant reversal will not occur upon the resolution of the uncertainty, which is based on market performance.

Fees for managing customers' mandatory retirement savings accounts in Chile are collected with each monthly deposit made by our customers. If a customer stops contributing before retirement age, we collect no fees but services are still provided. We recognize revenue from these contracts as services are performed over the life of the contract and review annually.

U.S. Insurance Solutions

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-Q

Fees and other revenues are earned for administrative services performed including recordkeeping and reporting services for fee-for-service products, nonqualified benefit plans, separate accounts and dental networks. Services within contracts are not distinct on their own; however, we combine the services into a distinct bundle and account for the bundle as a single performance obligation, which is satisfied over time utilizing the output method as services are rendered. The transaction price corresponds with the performance completed to date, for which the value is recognized as revenue during the period. Variability of consideration is resolved at the end of each period and payments are due when billed.

Commission income is earned through sponsored brokerage services. Performance obligations are satisfied at a point in time, upon delivery of a placed case, and the transaction price calculated per the compensation schedule is recognized as revenue.

Corporate

Fees and other revenues are earned on the performance of selling and servicing of securities and related products offered through PSI, an introducing broker-dealer registered with the FINRA.

PSI enters into selling and distribution agreements with the obligation to sell or distribute the securities products, such as mutual funds, annuities and products sold through RIAs, to individual clients in return for a front-end sales charges, 12b-1 service fees, annuity fees and asset-based fees. Front-end sales charges, 12b-1 fees and annuity fees are related to a single sale and are earned at the time of sale. PSI also enters into

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-Q

agreements with individual customers to provide securities trade execution and custody through a brokerage services platform in return for ticket charge and other service fee revenue. These services are bundled as one single distinct service referred to as brokerage services. This revenue is related to distinct transactions and is earned at a point in time.

PSI also enters into agreements with individual customers to provide trade execution, clearing services, custody services and investment research services through our proprietary offered fee-based products. These services are bundled as one single distinct service referred to as advisory services. In addition, for outside RIA business PSI performs sales and distribution services only. The revenues are earned over time as the service is performed utilizing the output method.

A majority of our revenue is based upon contractual rates applied to the market value of the clients' portfolios and considered variable consideration.

Contract Costs

Sales compensation and other incremental costs of obtaining a contract are capitalized and amortized over the period of contract benefit if the costs are expected to be recovered. The contract cost asset, which is included in other assets on the consolidated statements of financial position, was \$137.3 million as of June 30, 2018.

We apply the practical expedient for certain costs where we recognize the incremental costs of obtaining these contracts as an expense when incurred if the amortization period of the assets is one year or less. These costs, along with costs that are not deferrable, are included in operating expenses on the consolidated statements of operations.

Deferred contract costs consist primarily of commissions and variable compensation. We amortize capitalized contract costs on a straight-line basis over the expected contract life, reflecting lapses as they are incurred. Deferred contract costs on contracts are subject to impairment testing on an annual basis, or when a triggering event occurs that could warrant an impairment. To the extent future revenues less future maintenance expenses are not adequate to cover the asset balance, an impairment is recognized. For the three and six months ended June 30, 2018, \$5.9 million and \$11.6 million, respectively, of amortization expense was recorded in operating expenses on the consolidated statements of operations and no impairment loss was recognized in relation to the costs capitalized.

14. Stock-Based Compensation Plans

As of June 30, 2018, we had the 2014 Stock Incentive Plan, the Employee Stock Purchase Plan, the 2014 Directors Stock Plan, the Amended and Restated 2010 Stock Incentive Plan, the 2005 Directors Stock Plan, the Stock Incentive Plan and the Directors Stock Plan (Stock-Based Compensation Plans). As of May 20, 2014, no new grants will be made under the Amended and Restated 2010 Stock Incentive Plan or the 2005 Directors Stock Plan. No grants have been made under the Stock Incentive Plan or the Directors Stock Plan since at least 2005. Under the terms of the 2014 Stock Incentive Plan, grants may be nonqualified stock options, incentive stock options qualifying under Section 422 of the Internal Revenue Code, restricted stock, restricted stock units, stock appreciation rights, performance shares, performance units or other stock-based awards. The 2014 Directors Stock Plan provides for the grant of nonqualified stock options, restricted stock, restricted stock units or other stock-based awards to our nonemployee directors. To date, we have not granted any incentive stock options, restricted stock or performance units under any plans.

As of June 30, 2018, the maximum number of new shares of common stock available for grant under the 2014 Stock Incentive Plan and the 2014 Directors Stock Plan was 7.3 million.

Table of Contents

Principal Financial Group, Inc.
Notes to Consolidated Financial Statements (continued)
June 30, 2018
(Unaudited)

For awards with graded vesting, we use an accelerated expense attribution method. The compensation cost that was charged against net income for stock-based awards granted under the Stock-Based Compensation Plans was as follows:

		For the six months ended June 30,	
		2018	2017
		<i>(in millions)</i>	
Compensation cost	\$	42.7	\$ 43.2
Related income tax benefit		9.3	14.2
Capitalized as part of an asset		1.1	1.2

Nonqualified Stock Options

Nonqualified stock options were granted to certain employees under the 2014 Stock Incentive Plan. Total options granted were 0.8 million for the six months ended June 30, 2018. The fair value of stock options is estimated using the Black-Scholes option pricing model. The following is a summary of the assumptions used in this model for the stock options granted during the period:

		For the six months ended	
		June 30, 2018	
Expected volatility		26.0	%
Expected term (in years)		7.0	
Risk-free interest rate		2.8	%
Expected dividend yield		3.19	%
Weighted average estimated fair value per common share	\$	14.85	

As of June 30, 2018, we had \$7.6 million of total unrecognized compensation cost related to nonvested stock options. The cost is expected to be recognized over a weighted-average service period of approximately 1.2 years.

Performance Share Awards

Performance share awards were granted to certain employees under the 2014 Stock Incentive Plan. Total performance share awards granted were 0.2 million for the six months ended June 30, 2018. The performance share awards granted represent initial target awards and do not reflect potential increases or decreases resulting from the final performance results to be determined at the end of the performance period. The actual

number of common shares to be awarded at the end of each performance period will range between 0% and 150% of the initial target awards. The fair value of performance share awards is determined based on the closing stock price of our common shares on the grant date. The weighted-average grant date fair value of these performance share awards granted was \$63.98 per common share.

As of June 30, 2018, we had \$8.4 million of total unrecognized compensation cost related to nonvested performance share awards granted. The cost is expected to be recognized over a weighted-average service period of approximately 1.1 years.

Restricted Stock Units

Restricted stock units were issued to certain employees pursuant to the 2014 Stock Incentive Plan and non-employee directors pursuant to the 2014 Directors Stock Plan. Total restricted stock units granted were 0.8 million for the six months ended June 30, 2018. The fair value of restricted stock units is determined based on the closing stock price of our common shares on the grant date. The weighted-average grant date fair value of these restricted stock units granted was \$63.74 per common share.

As of June 30, 2018, we had \$66.9 million of total unrecognized compensation cost related to nonvested restricted stock unit awards granted. The cost is expected to be recognized over a weighted-average period of approximately 1.9 years.

Employee Stock Purchase Plan

Under the Employee Stock Purchase Plan, employees purchased 0.4 million shares for the six months ended June 30, 2018. The weighted average fair value of the discount on the stock purchased was \$8.64 per share.

Table of Contents

Principal Financial Group, Inc.
Notes to Consolidated Financial Statements (continued)
June 30, 2018
(Unaudited)

As of June 30, 2018, a total of 2.5 million of new shares were available to be made issuable by us for this plan.

15. Earnings Per Common Share

The computations of the basic and diluted per share amounts were as follows:

	For the three months ended			For the six months ended		
	2018	June 30,	2017	2018	June 30,	2017
	<i>(in millions, except per share data)</i>					
Net income	\$	459.5	\$	314.8	\$	862.0
Subtract:						
Net income attributable to noncontrolling interest		2.9		5.3		8.3
Total	\$	456.6	\$	309.5	\$	853.7
Weighted-average shares outstanding:						
Basic		286.4		288.9		287.9
Dilutive effects:						
Stock options		1.0		1.8		1.2
Restricted stock units		1.6		1.8		1.8
Performance share awards		0.2		0.2		0.2
Diluted		289.2		292.7		291.1
Net income per common share:						
Basic	\$	1.59	\$	1.07	\$	2.97
Diluted	\$	1.58	\$	1.06	\$	2.93

The calculation of diluted earnings per share for the three and six months ended June 30, 2018 and 2017, excludes the incremental effect related to certain outstanding stock-based compensation grants due to their anti-dilutive effect.

16. Condensed Consolidating Financial Information

Principal Life has established special purpose entities to issue secured medium-term notes. Under the program, the payment obligations of principal and interest on the notes are secured by funding agreements issued by Principal Life. Principal Life's payment obligations on the funding agreements are fully and unconditionally guaranteed by PFG. All of the outstanding stock of Principal Life is indirectly owned by PFG and PFG is the only guarantor of the payment obligations of the funding agreements.

The following tables set forth condensed consolidating financial information of (i) PFG, (ii) Principal Life, (iii) PFS and all other direct and indirect subsidiaries of PFG on a combined basis and (iv) the eliminations necessary to arrive at the information for PFG on a consolidated basis as of June 30, 2018 and December 31, 2017, and for the six months ended June 30, 2018 and 2017.

In presenting the condensed consolidating financial statements, the equity method of accounting has been applied to (i) PFG's interest in all direct subsidiaries of PFG, (ii) Principal Life's interest in all direct subsidiaries of Principal Life and (iii) PFS's interest in Principal Life even though all such subsidiaries meet the requirements to be consolidated under U.S. GAAP. Earnings of subsidiaries are, therefore, reflected in the parent's investment and earnings. All intercompany balances and transactions, including elimination of the parent's investment in subsidiaries, between PFG, Principal Life and PFS and all other subsidiaries have been eliminated, as shown in the column Eliminations. These condensed consolidating financial statements should be read in conjunction with the consolidated financial statements. The financial information may not necessarily be indicative of results of operations, cash flows or financial position had the subsidiaries operated as independent entities.

PFG sponsors nonqualified benefit plans for select employees and agents and is responsible for the obligations of these plans. Nonqualified plan assets are held in Rabbi trusts for the benefit of all nonqualified plan participants. The Rabbi trusts are separate legal entities and are not a part of PFG on a stand-alone basis. The plan assets are available to satisfy the claims of general creditors only in the event of bankruptcy and are, therefore, consolidated in our statements of financial position.

Principal Financial Group, Inc.
Notes to Consolidated Financial Statements (continued)
June 30, 2018
(Unaudited)

Under our current shelf registration that was filed with the SEC and became effective May 3, 2017, we have the ability to issue, in unlimited amounts, unsecured senior debt securities or subordinated debt securities, junior subordinated debt, preferred stock, common stock, warrants, depositary shares, purchase contracts and purchase units of PFG. Our wholly owned subsidiary, PFS, may guarantee, fully and unconditionally or otherwise, our obligations with respect to any non-convertible securities, other than common stock, described in the shelf registration.

The following tables set forth condensed consolidating financial information of (i) PFG, (ii) PFS, (iii) Principal Life and all other direct and indirect subsidiaries of PFG on a combined basis and (iv) the eliminations necessary to arrive at the information for PFG on a consolidated basis as of June 30, 2018 and December 31, 2017, and for the six months ended June 30, 2018 and 2017.

In presenting the condensed consolidating financial statements, the equity method of accounting has been applied to (i) PFG's interest in all direct subsidiaries of PFG and (ii) PFS's interest in Principal Life and all other subsidiaries, where applicable, even though all such subsidiaries meet the requirements to be consolidated under U.S. GAAP. Earnings of subsidiaries are, therefore, reflected in the parent's investment and earnings. All intercompany balances and transactions, including elimination of the parent's investment in subsidiaries, between PFG, PFS and Principal Life and all other subsidiaries have been eliminated, as shown in the column Eliminations. These condensed consolidating financial statements should be read in conjunction with the consolidated financial statements. The financial information may not necessarily be indicative of results of operations, cash flows or financial position had the subsidiaries operated as independent entities.

PFG sponsors nonqualified benefit plans for select employees and agents and is responsible for the obligations of these plans. Nonqualified plan assets are held in Rabbi trusts for the benefit of all nonqualified plan participants. The Rabbi trusts are separate legal entities and are not a part of PFG on a stand-alone basis. The plan assets are available to satisfy the claims of general creditors only in the event of bankruptcy and are, therefore, consolidated in our statements of financial position.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following analysis discusses our financial condition as of June 30, 2018, compared with December 31, 2017, and our consolidated results of operations for the three and six months ended June 30, 2018 and 2017, prepared in conformity with U.S. GAAP. The discussion and analysis includes, where appropriate, factors that may affect our future financial performance. The discussion should be read in conjunction with our Form 10-K, for the year ended December 31, 2017, filed with the SEC and the unaudited consolidated financial statements and the related notes to the financial statements and the other financial information included elsewhere in this Form 10-Q.

Forward-Looking Information

Our narrative analysis below contains forward-looking statements intended to enhance the reader's ability to assess our future financial performance. Forward-looking statements include, but are not limited to, statements that represent our beliefs concerning future operations, strategies, financial results or other developments, and contain words and phrases such as anticipate, believe, plan, estimate, expect, intend, similar expressions. Forward-looking statements are made based upon management's current expectations and beliefs concerning future developments and their potential effects on us. Such forward-looking statements are not guarantees of future performance.

Actual results may differ materially from those included in the forward-looking statements as a result of risks and uncertainties including, but not limited to, the following: (1) adverse capital and credit market conditions may significantly affect our ability to meet liquidity needs, as well as our access to capital and cost of capital; (2) conditions in the global capital markets and the economy generally may materially and adversely affect our business and results of operations; (3) volatility or declines in the equity, bond or real estate markets could reduce our AUM and may result in investors withdrawing from the markets or decreasing their rates of investment, all of which could reduce our revenues and net income; (4) changes in interest rates or credit spreads or a sustained low interest rate environment may adversely affect our results of operations, financial condition and liquidity, and our net income can vary from period to period; (5) our investment portfolio is subject to several risks that may diminish the value of our invested assets and the investment returns credited to customers, which could reduce our sales, revenues, AUM and net income; (6) our valuation of investments and the determinations of the amount of allowances and impairments taken on our investments may include methodologies, estimations and assumptions which are subject to differing interpretations and, if changed, could materially adversely affect our results of operations or financial condition; (7) any impairments of or valuation allowances against our deferred tax assets could adversely affect our results of operations and financial condition; (8) we may face losses if our actual experience differs significantly from our pricing and reserving assumptions; (9) the pattern of amortizing our DAC asset and other actuarial balances on our universal life-type insurance contracts, participating life insurance policies and certain investment contracts may change, impacting both the level of our DAC asset and other actuarial balances and the timing of our net income; (10) changes in laws or regulations may reduce our profitability; (11) we may not be able to protect our intellectual property and may be subject to infringement claims; (12) our ability to pay stockholder dividends and meet our obligations may be constrained by the limitations on dividends Iowa insurance laws impose on Principal Life; (13) changes in accounting standards may adversely affect our reported results of operations and financial condition; (14) litigation and regulatory investigations may affect our financial strength or reduce our profitability; (15) from time to time we may become subject to tax audits, tax litigation or similar proceedings, and as a result we may owe additional taxes, interest and penalties in amounts that may be material; (16) applicable laws and our certificate of incorporation and by-laws may discourage takeovers and business combinations that some stockholders might consider in their best interests; (17) competition, including from companies that may have greater financial resources, broader arrays of products, higher ratings and stronger financial performance may impair our ability to retain existing customers, attract new customers and maintain our profitability; (18) Damage to our reputation may adversely affect our revenues and profitability; (19) a downgrade in our financial strength or credit ratings may increase policy surrenders and withdrawals, reduce new sales and terminate relationships with distributors, impact existing liabilities and increase our cost of capital, any of which could adversely affect our profitability and financial condition; (20) client terminations or withdrawals or

changes in investor preferences may lead to a reduction in revenues for our asset management and accumulation businesses; (21) guarantees within certain of our products that protect policyholders may decrease our earnings or increase the volatility of our results of operations or financial position under U.S. GAAP if our hedging or risk management strategies prove ineffective or insufficient; (22) if we are unable to attract and retain qualified employees and sales representatives and develop new distribution sources, our results of operations, financial condition and sales of our products may be adversely impacted; (23) an interruption in telecommunication, information technology, or other systems, or a failure to maintain the confidentiality, integrity, or availability of data residing on such systems, could disrupt our business, damage our reputation and adversely impact our profitability; (24) our international businesses face political, legal, operational and other risks that could reduce our profitability in those businesses; (25) we face risks arising from our participation in joint ventures; (26) we may need to fund deficiencies in our Closed Block assets; (27) a pandemic, terrorist attack, military action or other catastrophic event could adversely affect our net income; (28) our reinsurers could default on their obligations or increase their rates, which could adversely impact our net income and financial condition; (29) we face risks arising from acquisitions of businesses; (30) loss of key vendor relationships or failure of a vendor to protect

Table of Contents

information of our customers or employees could adversely affect our business or result in losses; (31) our enterprise risk management framework may not be fully effective in identifying or mitigating all of the risks to which we are exposed and (32) our financial results may be adversely impacted by global climate changes.

Overview

We provide financial products and services through the following reportable segments:

- Retirement and Income Solutions is organized into Retirement and Income Solutions Fee, which includes full service accumulation, trust services and individual variable annuities; and Retirement and Income Solutions Spread, which includes individual fixed annuities, investment only, full service payout and banking services. We offer a comprehensive portfolio of products and services for retirement savings and retirement income:
- To businesses of all sizes with a concentration on small and medium-sized businesses, we offer products and services for defined contribution plans, including 401(k) and 403(b) plans, defined benefit pension plans, nonqualified executive benefit plans, employee stock ownership plan services and pension closeout services. For more basic retirement services, we offer SIMPLE IRAs and payroll deduction plans;
- To large institutional clients, we also offer investment only products, including investment only guaranteed investment contracts (GICs); and
- To employees of businesses and other individuals, we offer the ability to accumulate savings for retirement and other purposes through mutual funds, individual annuities and bank products, along with retirement income options.
- Principal Global Investors, which includes our mutual fund business, manages assets for sophisticated investors around the world, using a multi-boutique strategy that provides diverse investment capabilities including equity, fixed income, real estate and other alternative investments. We also have experience in asset allocation, stable value management and other structured investment strategies. We focus on providing services to our other segments in addition to our retail mutual fund and third party institutional clients.
- Principal International, which offers pension accumulation products and services, mutual funds, asset management, income annuities and life insurance accumulation products through operations in Latin America (Brazil, Chile and Mexico) and Asia (China, Hong Kong Special Administrative Region, India and Southeast Asia).
- U.S. Insurance Solutions is organized into Specialty Benefits insurance, which provides group dental and vision insurance, individual and group disability insurance, critical illness, accident, group life insurance and non-medical fee-for-service claims administration; and Individual Life insurance, which provides universal life, variable universal life, indexed universal life and traditional life insurance. We focus on solutions for individuals and small-to-medium sized businesses and their employees.

- Corporate, which manages the assets representing capital that has not been allocated to any other segment. Financial results of the Corporate segment primarily reflect our financing activities (including financing costs), income on capital not allocated to other segments, inter-segment eliminations, income tax risks and certain income, expenses and other adjustments not allocated to the segments based on the nature of such items. Results of PSI, our retail broker-dealer and RIA, and our exited group medical and long-term care insurance businesses are reported in this segment.

Recent Events

RobustWealth

On July 2, 2018, we finalized the acquisition of RobustWealth, Inc., a financial technology company. The acquisition adds RobustWealth's digital capabilities to our industry knowledge, asset management experience and technology to help consumers meet their financial goals on an enhanced digital advice platform. The RobustWealth platform will retain its open architecture philosophy and RobustWealth will continue to sell its platform to outside firms as part of its growth

Table of Contents

strategy. RobustWealth will be consolidated within our Corporate segment due to its strategic benefits across the organization.

Transactions Affecting Comparability of Results of Operations

Acquisitions

INTERNOS. On April 16, 2018, we finalized the acquisition of INTERNOS, a London-based European real estate investment manager. Upon acquisition, INTERNOS became Principal Real Estate Europe Limited and operates as our dedicated European real estate private equity investment boutique, expanding our global real estate capabilities. At the time of closing, the acquisition increased our AUM by \$3.5 billion. Principal Real Estate Europe Limited is reported within the Principal Global Investors segment.

MetLife Afore, S.A. de C.V. On February 20, 2018, we finalized the acquisition of MetLife Afore, S.A. de C.V., which was MetLife, Inc.'s pension fund management business in Mexico. At the time of closing, the acquisition increased our AUM by \$3.8 billion, making us the fifth largest AFORE in Mexico in terms of AUM. The results of this acquisition are reflected in the Principal International segment.

Other

CIMB Joint Ventures. On May 25, 2018, we and the CIMB Group (CIMB) completed new ownership agreements in our joint ventures, CIMB-Principal Asset Management Berhad (CPAM) and CIMB Principal Islamic Asset Management (CPIAM). With the completion we increased our ownership stake to 60% with CIMB retaining 40% ownership and co-management of both CPAM and CPIAM. Our investment in both entities will continue to be reported using the equity method within the Principal International segment.

Tax Cuts and Jobs Act. The U.S. tax reform enacted on December 22, 2017, made broad and complex changes to the U.S. Internal Revenue Code applicable to us. The U.S. statutory tax rate was reduced from 35% to 21% effective January 1, 2018. Other provisions of the U.S. tax reform effective January 1, 2018, include, but are not limited to: 1) provisions reducing the dividends received deduction; 2) essentially eliminating U.S. federal income taxes on dividends from foreign subsidiaries; 3) retaining an element of current inclusion of certain earnings of controlled foreign corporations; 4) eliminating the corporate AMT and 5) changing how existing AMT credits will be realized. See Item 1. Financial Statements, Notes to Unaudited Consolidated Financial Statements, Note 7, Income Taxes for further details.

Other Factor Affecting Comparability of Results of Operations

Fluctuations in Foreign Currency to U.S. Dollar Exchange Rates

Fluctuations in foreign currency to U.S. dollar exchange rates for countries in which we have operations can affect reported financial results. In years when foreign currencies weaken against the U.S. dollar, translating foreign currencies into U.S. dollars results in fewer U.S. dollars to be reported. When foreign currencies strengthen, translating foreign currencies into U.S. dollars results in more U.S. dollars to be reported.

Foreign currency exchange rate fluctuations create variances in our financial statement line items. The most significant impact occurs within our Principal International segment where pre-tax operating earnings were negatively impacted \$0.7 million and positively impacted \$4.1 million for the three and six months ended June 30, 2018, respectively, as a result of fluctuations in foreign currency to U.S. dollar exchange rates. This impact was calculated by comparing (a) the difference between current year results and prior year results to (b) the difference between current year results and prior year results translated using current year exchange rates for both periods. We use this approach to calculate the impact of exchange rates on all revenue and expense line items. For a discussion of our approaches to managing foreign currency exchange rate risk, see Item 3. Quantitative and Qualitative Disclosures About Market Risk Foreign Currency Risk.

Regulatory Change

On June 9, 2017, certain provisions of the DOL fiduciary rule became applicable. The regulation broadened the definition of a fiduciary under ERISA to include persons providing personalized investment recommendations to an employee benefit plan or an IRA for a fee or other compensation. The DOL also released two new prohibited transaction class exemptions and amendments to current prohibited transaction exemptions. The DOL set July 1, 2019, as the final applicability date for the remaining provisions of the fiduciary rule, such as the Best Interest Contract Exemption.

Table of Contents

On March 15, 2018, the U.S. Court of Appeals for the Fifth Circuit in U.S. Chamber of Commerce v. DOL released an opinion invalidating the recent changes to the DOL fiduciary rule and related prohibited transaction exemptions in their entirety. AARP and three states then filed motions to intervene in the case and seek a rehearing, but the Fifth Circuit denied those motions. The DOL did not appeal the Fifth Circuit's decision and issued a Field Assistance Bulletin with a nonenforcement policy on prohibited transactions related to fiduciary investment advice. On June 21, 2018, the Fifth Circuit entered a mandate to officially vacate the fiduciary rule and related prohibited transactions, and we believe this mandate resulted in the law governing fiduciary investment advice returning to that in existence prior to June 9, 2017.

On May 9, 2018, the SEC issued three proposals. First, the SEC proposed Regulation Best Interest, which is designed to make it clear that a broker-dealer may not put its financial interest ahead of the interests of a retail customer in making recommendations. Second, the SEC proposed an interpretation to reaffirm and, in some cases, clarify the SEC's view of the fiduciary duty that investment advisers owe to their clients. Third, the SEC proposed a new standardized short-form disclosure that all broker-dealers and investment advisers would be required to provide to clients to describe the key points of the client relationship. The proposals have a 90-day comment period before the SEC will consider adoption of them.

Despite the fluid environment, our assessment of the impact to our business and future financial results indicates any costs of adjusting will not have a significant effect on our financial condition or results of operation.

Recent Accounting Changes

For recent accounting changes, see Item 1. Financial Statements, Notes to Unaudited Consolidated Financial Statements, Note 1, Nature of Operations and Significant Accounting Policies under the caption, Recent Accounting Pronouncements.

Table of Contents**Results of Operations**

Net income attributable to Principal Financial Group, Inc.	\$ 456.6	\$ 309.5	\$ 147.1	\$ 853.7	\$ 658.4	\$ 195.3

Three Months Ended June 30, 2018 Compared to Three Months Ended June 30, 2017**Net Income Attributable to Principal Financial Group, Inc.**

Net income attributable to Principal Financial Group, Inc. increased primarily due to after-tax net realized capital gains in 2018 as compared to after-tax net realized capital losses in 2017 primarily due to a \$99.5 million gain from the sale of an equity method investment in 2018 and a \$33.0 million decrease in losses on derivatives not designated as hedging instruments.

Total Revenues

Premiums decreased \$258.7 million for the Retirement and Income Solutions segment primarily due to lower sales of single premium group and individual annuities with life contingencies. The single premium group annuity product, which is typically used to fund defined benefit plan terminations, can generate large premiums from very few customers and therefore premiums tend to vary from period to period. Premiums increased \$46.2 million for the Principal International segment primarily in Latin America due to higher sales of single premium annuities with life contingencies in Chile.

Fees and other revenues increased \$24.2 million for the Principal Global Investors segment primarily due to an increase in management fees as a result of higher AUM and increased performance fees. Fees and other revenues increased for the Principal International segment primarily in Latin America due to \$11.9 million resulting from growth in the Mexican business

Table of Contents

and \$2.4 million due to the strengthening of the Latin American currencies against the U.S. dollar. Fees and other revenues increased \$11.7 million for the Retirement and Income Solutions segment primarily due to an increase in mean account values, which resulted from an increase in the daily average equity markets.

Net investment income increased in our U.S. operations primarily due to \$36.5 million attributable to higher average invested assets and cash, partially offset by a \$19.8 million decrease in variable investment income. For additional information, see Investments Investment Results Net Investment Income.

Net realized capital gains (losses) can be volatile due to other-than-temporary impairments of invested assets, mark-to-market adjustments of certain invested assets and our decision to sell invested assets. We had net realized capital gains in 2018 as compared to net realized capital losses in 2017 primarily due to a \$126.0 million gain from the sale of an equity method investment in 2018 and a \$60.1 million decrease in losses on derivatives not designated as hedging instruments. These increases in net gains were partially offset by a \$19.1 million increase in fixed maturity noncredit losses. For additional information, see Investments Investment Results.

Total Expenses

Benefits, claims and settlement expenses decreased \$217.8 million for the Retirement and Income Solutions segment primarily due to a decrease in reserves resulting from lower sales of single premium group and individual annuities with life contingencies. Benefits, claims and settlement expenses increased \$53.3 million for the Principal International segment primarily in Latin America due to higher sales of single premium annuities with life contingencies in Chile.

Operating expenses increased due to a \$26.7 million increase in staff related costs, including pension and other postretirement benefits and an \$18.1 million increase in commissions due to growth in the business. In addition, operating expenses increased due to a \$13.0 million increase in DAC amortization expense for the Retirement and Income Solutions segment primarily due to model true-ups reflecting product liability estimates and varying market performance, which were less favorable in 2018 compared to 2017.

Income Taxes

The effective income tax rate decreased to 11% for the three months ended June 30, 2018, from 14% for the three months ended June 30, 2017, primarily due to the impact of U.S. tax reform relative to changes in income before income taxes. See Item 1.

Financial Statements, Notes to Unaudited Consolidated Financial Statements, Note 7, Income Taxes for a reconciliation between the U.S. corporate income tax rate and the effective income tax rate.

Six Months Ended June 30, 2018 Compared to Six Months Ended June 30, 2017

Net Income Attributable to Principal Financial Group, Inc.

Net income attributable to Principal Financial Group, Inc. increased primarily due to after-tax net realized capital gains in 2018 as compared to after-tax net realized capital losses in 2017 primarily due to a \$99.5 million gain from the sale of an equity method investment in 2018 and a \$48.6 million decrease in losses on derivatives not designated as hedging instruments.

Total Revenues

Premiums decreased \$593.6 million for the Retirement and Income Solutions segment primarily due to lower sales of single premium group and individual annuities with life contingencies. Premiums increased \$92.1 million for the Principal International segment primarily in Latin America due to higher sales of single premium annuities with life contingencies in Chile.

Fees and other revenues increased \$46.5 million for the Principal Global Investors segment primarily due to an increase in management fees as a result of higher AUM. Fees and other revenues increased for the Principal International segment primarily in Latin America due to an increase in Mexico of \$19.0 million due to growth in the business, \$9.0 million due to the strengthening of the Latin American currencies against the U.S. dollar and \$4.8 million in Chile due to growth in the business. Fees and other revenues increased \$29.2 million for the Retirement and Income Solutions segment primarily due to an increase in mean account values, which resulted from an increase in the daily average equity markets.

Table of Contents

Net investment income increased in our U.S. operations primarily due to \$75.7 million attributable to higher average invested assets and cash, partially offset by a \$26.1 million decrease in variable investment income. For additional information, see [Investments](#) [Investment Results](#) [Net Investment Income](#).

Net realized capital gains (losses) can be volatile due to other-than-temporary impairments of invested assets, mark-to-market adjustments of certain invested assets and our decision to sell invested assets. We had net realized capital gains in 2018 as compared to net realized capital losses in 2017 primarily due to a \$126.0 million gain from the sale of an equity method investment in 2018 and an \$83.2 million decrease in losses on derivatives not designated as hedging instruments. These increases in net gains were partially offset by a \$47.9 million increase in fixed maturity noncredit losses. For additional information, see [Investments](#) [Investment Results](#).

Total Expenses

Benefits, claims and settlement expenses decreased \$526.8 million for the Retirement and Income Solutions segment primarily due to a decrease in reserves resulting from lower sales of single premium group and individual annuities with life contingencies. Benefits, claims and settlement expenses increased \$98.7 million for the Principal International segment primarily in Latin America due to higher sales of single premium annuities with life contingencies.

Operating expenses increased due to a \$38.0 million increase in staff related costs, including pension and other postretirement benefits and a \$26.7 million increase in commissions due to growth in the business. In addition, operating expenses increased due to a \$35.2 million increase in DAC amortization expense for the Retirement and Income Solutions segment primarily due to a model true-ups reflecting product liability estimates and varying market performance, which were less favorable in 2018 compared to 2017.

Income Taxes

The effective income tax rate decreased to 11% for the six months ended June 30, 2018, from 14% for the six months ended June 30, 2017, primarily due to the impact of U.S. tax reform relative to changes in income before income taxes. See [Item 1. Financial Statements, Notes to Unaudited Consolidated Financial Statements, Note 7, Income Taxes](#) for a reconciliation between the U.S. corporate income tax rate and the effective income tax rate.

Retirement and Income Solutions Segment*Retirement and Income Solutions Segment Summary Financial Data*

Net revenue is a key metric used to understand Retirement and Income Solutions earnings growth. Net revenue is defined as operating revenues less benefits, claims and settlement expenses less dividends to policyholders. Net revenue from Retirement and Income Solutions Fee is primarily fee based and is impacted by changes in the equity markets. Net revenue from Retirement and Income Solutions Spread is driven by the difference between investment income earned on the underlying general account assets and the interest rate credited to the contracts.

The following table presents the Retirement and Income Solutions net revenue for the periods indicated:

	For the three months ended June 30,			For the six months ended June 30,		
	2018	2017	Increase (decrease)	2018	2017	Increase (decrease)
	<i>(in millions)</i>					
Retirement and Income Solutions Fee	\$ 405.7	\$ 406.1	\$ (0.4)	\$ 818.6	\$ 809.6	\$ 9.0
Retirement and Income Solutions Spread	127.1	145.1	(18.0)	270.7	289.0	(18.3)
Total Retirement and Income Solutions	\$ 532.8	\$ 551.2	\$ (18.4)	\$ 1,089.3	\$ 1,098.6	\$ (9.3)

Table of Contents

The following table presents certain summary financial data relating to the Retirement and Income Solutions segment for the periods indicated:

*Three Months Ended June 30, 2018 Compared to Three Months Ended June 30, 2017***Pre-Tax Operating Earnings**

Pre-tax operating earnings decreased in our Fee business due to a \$4.6 million operating expense increase resulting from investments in the business and a \$3.0 million increase in staff related costs, including pension and other postretirement benefits. Pre-tax operating earnings decreased in our Spread business due to a \$9.9 million decrease in variable investment income and a \$5.4 million decrease due to lower mortality related reserve gains.

Net Revenue

Net revenue decreased in our Spread business primarily due to a \$9.9 million decrease in variable investment income and a \$5.4 million decrease due to lower mortality related reserve gains.

Operating Expenses

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-Q

Operating expenses increased in our Fee business due to a \$4.6 million increase resulting from investments in the business and a \$3.0 million increase in staff related costs, including pension and other postretirement benefits.

Six Months Ended June 30, 2018 Compared to Six Months Ended June 30, 2017

Pre-Tax Operating Earnings

Pre-tax operating earnings decreased in our Fee business due to an increase in operating expenses stemming from a \$9.3 million investment in the business and an \$8.4 million increase in staff related costs, including pension and other postretirement benefits. These increased expenses were partially offset by a \$9.0 million increase in net revenue related to higher fees stemming from an increase in mean account values, which resulted from an increase in the daily average equity markets. Pre-tax operating earnings decreased in our Spread business due to an \$11.7 million decrease in variable investment income.

Net Revenue

Net revenue increased \$9.0 million in our Fee business primarily related to higher fees stemming from an increase in mean account values, which resulted from an increase in the daily average equity markets. Net revenue decreased in our Spread business primarily due to an \$11.7 million decrease in variable investment income.

Operating Expenses

Operating expenses increased in our Fee business due to a \$9.3 million increase resulting from investments in the business and an \$8.4 million increase in staff related costs, including pension and other postretirement benefits.

Table of Contents**Principal Global Investors Segment***Principal Global Investors Segment Summary Financial Data*

AUM is the base by which we generate management fee revenues. Market performance and net cash flow are the two main drivers of AUM growth. Market performance reflects equity, fixed income, real estate and other alternative investment performance. Net cash flow reflects client deposits and withdrawals. The fee levels on these client deposits and withdrawals are increasingly becoming the more important factor to revenue growth and will vary widely based on business and/or product mix.

The following table presents the AUM rollforward for assets managed by Principal Global Investors for the periods indicated:

	For the three months ended June 30,		For the six months ended June 30,	
	2018	2017	2018	2017
	<i>(in billions)</i>			
AUM, beginning of period	\$ 423.8	\$ 403.0	\$ 430.9	\$ 390.5
Net cash flow	(0.6)	(3.0)	(6.8)	(3.0)
Investment performance (1)	3.7	10.3	2.5	23.0
Operations acquired (2)	3.5		3.5	
Other	(0.6)	0.1	(0.3)	(0.1)
AUM, end of period	\$ 429.8	\$ 410.4	\$ 429.8	\$ 410.4

(1) Variations in investment performance are primarily the result of fluctuations in market performance over time.

(2) Reflects assets managed by Principal Global Investors resulting from the acquisition of INTERNOS in April 2018.

The following table presents certain summary financial data relating to the Principal Global Investors segment for the periods indicated:

	For the three months ended June 30,			For the six months ended June 30,		
	2018	2017	Increase (decrease)	2018	2017	Increase (decrease)
	<i>(in millions)</i>					
Operating revenues:						
Fees and other revenues	\$ 378.4	\$ 354.2	\$ 24.2	\$ 745.4	\$ 698.9	\$ 46.5
Net investment income	1.2	1.3	(0.1)	2.7	2.5	0.2

Expenses:						
Total expenses	251.2	238.5	12.7	507.7	482.9	24.8

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-Q

Pre-tax operating earnings attributable to noncontrolling interest												
		1.4		1.6		(0.2)		3.1		3.1		
Pre-tax operating earnings	\$	127.0	\$	115.4	\$	11.6	\$	237.3	\$	215.4	\$	21.9

Three Months Ended June 30, 2018 Compared to Three Months Ended June 30, 2017

Pre-Tax Operating Earnings

Pre-tax operating earnings increased primarily due to an \$11.9 million increase in management fee revenue resulting from higher AUM as well as a \$6.5 million increase in performance fees seen largely in our real estate business. This increase was partially offset by a \$10.4 million increase in expenses supporting the business.

Six Months Ended June 30, 2018 Compared to Six Months Ended June 30, 2017

Pre-Tax Operating Earnings

Pre-tax operating earnings increased primarily due to a \$36.3 million increase in management fee revenue resulting from higher AUM and a \$3.9 million increase in performance fees seen largely in our real estate business. These increases were partially offset by a \$19.0 million increase in expenses supporting the business.

Table of Contents**Principal International Segment*****Principal International Segment Summary Financial Data***

AUM is generally a key indicator of earnings growth for the segment, as AUM is the base by which we can generate local currency profits. The Cuprum business in Chile differs in that the majority of fees are collected with each deposit by the mandatory retirement customers, based on a capped salary level, as opposed to asset levels. Net customer cash flow and market performance are the two main drivers of local currency AUM growth. Net customer cash flow reflects our ability to attract and retain client deposits. Market performance reflects the investment returns on our underlying AUM. Our financial results are also impacted by fluctuations of the foreign currency to U.S. dollar exchange rates for the countries in which we have business. AUM of our foreign subsidiaries is translated into U.S. dollar equivalents at the end of the reporting period using the spot foreign exchange rates. Revenue and expenses for our foreign subsidiaries are translated into U.S. dollar equivalents at the average foreign exchange rates for the reporting period.

The following table presents the Principal International segment AUM rollforward for the periods indicated:

	For the three months ended June 30,		For the six months ended June 30,					
	2018	2017	2018	2017				
	<i>(in billions)</i>							
AUM, beginning of period	\$	171.1	\$	147.3	\$	160.7	\$	137.1
Net cash flow		1.4		0.4		3.7		1.7
Investment performance (1)				2.4		2.2		8.2
Operations acquired (2)						3.8		
Effect of exchange rates		(16.1)		(2.3)		(13.8)		0.9
Other		(0.1)		(0.1)		(0.3)		(0.2)
AUM, end of period	\$	156.3	\$	147.7	\$	156.3	\$	147.7

(1) Variations in investment performance are primarily the result of fluctuations in market performance over time.

(2) Reflects the February 2018 acquisition of MetLife, Inc.'s pension fund management business in Mexico.

Net revenue is a key metric used to understand the earnings growth for the Principal International segment. The following table presents the net revenue of the Principal International segment for the periods indicated.

	For the three months ended June 30,	For the six months ended June 30,
	Increase	Increase

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-Q

*Three Months Ended June 30, 2018 Compared to Three Months Ended June 30, 2017***Pre-Tax Operating Earnings**

Pre-tax operating earnings increased \$8.7 million in Asia due to continued growth in the business. Pre-tax operating earnings decreased \$4.6 million in Latin America primarily due to \$4.5 million unfavorable relative market performance on our required regulatory investments in Chile relative to the year earlier period.

Net Revenue

Net revenue increased \$9.7 million in Asia due to continued growth in the business. In addition, net revenue increased \$9.0 million in Latin America primarily due to a \$10.0 million increase resulting from growth in our Mexico business.

*Six Months Ended June 30, 2018 Compared to Six Months Ended June 30, 2017***Pre-Tax Operating Earnings**

Pre-tax operating earnings decreased \$21.7 million in Latin America primarily due to \$24.0 million unfavorable relative market performance on our required regulatory investments relative to the year earlier period. Asia pre-tax operating earnings increased \$15.0 million due to continued growth in the business.

Net Revenue

Net revenue increased \$16.8 million in Asia due to continued growth in the business. In addition, net revenue increased \$7.6 million in Latin America as growth in Mexico and Chile more than offset the \$24.5 million unfavorable relative market performance on our required regulatory investments in Latin America.

U.S. Insurance Solutions Segment

U.S. Insurance Solutions Segment Summary Financial Data

Premium and fees are a key metric for growth in the U.S. Insurance Solutions segment. We receive premiums on our specialty benefits insurance products as well as our traditional life insurance products. Fees are generated from our specialty benefits fee-for-service products as well as our universal life, variable universal life and indexed universal life insurance products. We use several reinsurance programs to help manage mortality and morbidity risk. Premium and fees is reported net of reinsurance premiums.

Table of Contents

In our specialty benefits insurance business, premium and fees growth is a result of strong retention, sales and in-group growth. In our individual life insurance business, premium and fees growth is driven by strong sales with a focus on maintaining a balanced product portfolio.

The following table presents the U.S. Insurance Solutions segment premium and fees for the periods indicated:

	For the three months ended June 30,			For the six months ended June 30,		
	2018	2017	Increase (decrease)	2018	2017	Increase (decrease)
	<i>(in millions)</i>					
Premium and fees:						
Specialty benefits insurance	\$ 536.7	\$ 499.2	\$ 37.5	\$ 1,062.6	\$ 986.8	\$ 75.8
Individual life insurance	268.0	270.2	(2.2)	553.6	540.2	13.4

Operating expenses	261.7	245.4	16.3	529.3	494.8	34.5
Total expenses	894.0	866.2	27.8	1,798.9	1,736.4	62.5
Pre-tax operating earnings	\$ 109.2	\$ 104.4	\$ 4.8	\$ 217.8	\$ 190.6	\$ 27.2

Three Months Ended June 30, 2018 Compared to Three Months Ended June 30, 2017**Pre-Tax Operating Earnings**

Pre-tax operating earnings increased \$4.5 million in our individual life insurance business primarily due to favorable claims.

Operating Revenues

Premium and fees increased \$37.5 million in our specialty benefits insurance business primarily due to growth in the business.

Total Expenses

Benefits, claims and settlement expenses increased primarily due to \$22.1 million resulting from growth in the business, partially offset by \$15.8 million in favorable claim experience.

Dividends to policyholders increased primarily due to a reduction in the policyholder dividend obligation in the prior year.

Operating expenses increased \$16.1 million in our specialty benefits insurance business primarily due to growth in the business.

Table of Contents

Six Months Ended June 30, 2018 Compared to Six Months Ended June 30, 2017

Pre-Tax Operating Earnings

Pre-tax operating earnings increased \$21.7 million in our specialty benefits insurance business primarily due to favorable claims.

Operating Revenues

Premium and fees increased primarily due to growth in the business.

Total Expenses

Benefits, claims and settlement expenses increased primarily due to \$58.8 million resulting from growth in the business, partially offset by \$31.7 million in favorable claim experience.

Operating expenses increased primarily due to growth in the business.

Corporate Segment

Corporate Segment Summary Financial Data

The following table presents certain summary financial data relating to the Corporate segment for the periods indicated:

	For the three months ended June 30,			For the six months ended June 30,		
	2018	2017	Increase (decrease)	2018	2017	Increase (decrease)
	<i>(in millions)</i>					
Operating revenues:						
Total operating revenues	\$ (17.0)	\$ (19.8)	\$ 2.8	\$ (17.0)	\$ (21.3)	\$ 4.3
Expenses:						

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-Q

Total expenses	32.3	27.2	5.1	71.2	84.1	(12.9)
Pre-tax operating earnings attributable to noncontrolling interest	0.2	0.5	(0.3)	3.3	0.6	2.7
Pre-tax operating losses	\$ (49.5)	\$ (47.5)	\$ (2.0)	\$ (91.5)	\$ (106.0)	\$ 14.5

Three Months Ended June 30, 2018 Compared to Three Months Ended June 30, 2017

Pre-Tax Operating Losses

Pre-tax operating losses did not materially change between the three months ended June 30, 2018 and 2017.

Six Months Ended June 30, 2018 Compared to Six Months Ended June 30, 2017

Pre-Tax Operating Losses

Pre-tax operating losses decreased primarily due to a \$20.0 million fee paid in the first quarter of 2017 resulting from our election to discontinue an arrangement with one of our financing counterparties. This decrease was partially offset by \$3.2 million higher interest expense on corporate debt in 2018.

Table of Contents

Liquidity and Capital Resources

Liquidity and capital resources represent the overall strength of a company and its ability to generate strong cash flows, borrow funds at a competitive rate and raise new capital to meet operating and growth needs. Our legal entity structure has an impact on our ability to meet cash flow needs as an organization. Following is a simplified organizational structure.

Liquidity

Our liquidity requirements have been and will continue to be met by funds from consolidated operations as well as the issuance of commercial paper, common stock, debt or other capital securities and borrowings from credit facilities. We believe the cash flows from these sources are sufficient to satisfy the current liquidity requirements of our operations, including reasonably foreseeable contingencies.

We maintain a level of cash and securities which, combined with expected cash inflows from investments and operations, we believe to be adequate to meet anticipated short-term and long-term payment obligations. We will continue our prudent capital management practice of regularly exploring options available to us to maximize capital flexibility, including accessing the capital markets and careful attention to and management of expenses.

We perform rigorous liquidity stress testing to ensure our asset portfolio includes sufficient high quality liquid assets that could be utilized to bolster our liquidity position under increasingly stressed market conditions. These assets could be utilized as collateral for secured borrowing transactions with various third parties or by selling the securities in the open market if needed.

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-Q

We also manage liquidity risk by limiting the sales of liabilities with features such as puts or other options that can be exercised at inopportune times. For example, as of June 30, 2018, approximately \$9.3 billion, or 99%, of our institutional guaranteed investment contracts and funding agreements cannot be redeemed by contractholders prior to maturity. Our individual annuity liabilities also contain surrender charges and other provisions limiting early surrenders.

The following table summarizes the withdrawal characteristics of our domestic general account investment contracts as of June 30, 2018.

	Contractholder funds <i>(in millions)</i>	Percentage
Not subject to discretionary withdrawal	\$ 10,303.0	32.9%
Subject to discretionary withdrawal with adjustments:		
Specified surrender charges	7,742.1	24.7
Market value adjustments	7,240.2	23.1
Subject to discretionary withdrawal without adjustments	6,062.5	19.3
Total domestic investment contracts	\$ 31,347.8	100.0%

Universal life insurance and certain traditional life insurance policies are also subject to discretionary withdrawals by policyholders. However, life insurance policies tend to be less susceptible to withdrawal than our investment contracts because policyholders may be subject to a new underwriting process in order to obtain a new life insurance policy. In addition, our life insurance liabilities include surrender charges to discourage early surrenders.

Table of Contents

As of June 30, 2018 and December 31, 2017, we had short-term credit facilities with various financial institutions in an aggregate amount of \$1,037.1 million and \$952.3 million, respectively. As of June 30, 2018 and December 31, 2017, we had \$64.5 million and \$39.5 million, respectively, of outstanding borrowings, with \$26.8 million in assets pledged as support as of June 30, 2018. During the first quarter of 2017, we extended or renewed \$789.0 million of our revolving credit facilities. The facilities and their new maturity dates include a \$600.0 million 5-year facility, with PFG, PFS and Principal Life as co-borrowers that matures March 2022 and a \$200.0 million 5-year credit facility, with PFG, PFS, Principal Life and Principal Financial Services V (UK) LTD as co-borrowers, of which \$11.0 million matures March 2020 and \$189.0 million matures March 2022. The revolving credit facilities are committed and available for general corporate purposes. The \$600.0 million facility is supported by seventeen banks and the \$200.0 million facility is supported by fifteen banks through March 2020, reduced to \$189.0 million supported by fourteen banks thereafter. Most of the banks have other relationships with us. In addition to the revolving credit facilities, Principal International Chile has the capacity to access up to \$192.1 million in unsecured lines of credit offered by Chilean financial institutions and Principal Life has a \$45.0 million unsecured line of credit. Due to the financial strength and the strong relationships we have with these providers, we are comfortable we have very low risk the financial institutions would be unable or unwilling to fund these facilities.

The Holding Companies: Principal Financial Group, Inc. and Principal Financial Services, Inc. The principal sources of funds available to our parent holding company, PFG, to meet its obligations, including the payments of dividends on common stock, debt service and the repurchase of stock, are dividends from subsidiaries as well as its ability to borrow funds at competitive rates and raise capital to meet operating and growth needs. The declaration and payment of common stock dividends by us is subject to the discretion of our Board of Directors and will depend on our overall financial condition, results of operations, capital levels, cash requirements, future prospects, receipt of dividends from Principal Life (as described below), risk management considerations and other factors deemed relevant by the Board. No significant restrictions limit the payment of dividends by PFG, except those generally applicable to corporations incorporated in Delaware.

Dividends from Principal Life, our primary subsidiary, are limited by Iowa law. Under Iowa law, Principal Life may pay dividends only from the earned surplus arising from its business and must receive the prior approval of the Commissioner of Insurance of the State of Iowa (the Commissioner) to pay stockholder dividends or make any other distribution if such dividends or distributions would exceed certain statutory limitations. Iowa law gives the Commissioner discretion to disapprove requests for distributions in excess of these limitations. Extraordinary dividends include those made, together with dividends and other distributions, within the preceding twelve months that exceed the greater of (i) 10% of Principal Life's statutory policyholder surplus as of the previous year-end or (ii) the statutory net gain from operations from the previous calendar year, not to exceed earned surplus. Based on December 31, 2017, statutory results, the dividend limitation for Principal Life is approximately \$1,122.4 million in ordinary dividends in 2018 without prior regulatory approval. However, because the dividend test is based on dividends previously paid over rolling 12-month periods, if paid before a specified date during 2018, some or all of such dividends may be extraordinary and require regulatory approval.

Total stockholder dividends paid by Principal Life to its parent for the six months ended June 30, 2018, were \$350.0 million, all of which was extraordinary and approved by the Commissioner. As of June 30, 2018, we had \$1,820.4 million of cash and liquid assets held in our holding companies and other subsidiaries, which is available for corporate purposes. This includes assets in excess of targeted statutory capital ratios and immediate working capital needs.

Operations. Our primary consolidated cash flow sources are premiums from insurance products, pension and annuity deposits, asset management fee revenues, administrative services fee revenues, income from investments and proceeds from the sales or maturity of investments. Cash outflows consist primarily of payment of benefits to policyholders and beneficiaries, income and other taxes, current operating expenses, payment of dividends to policyholders, payments in connection with investments acquired, payments made to acquire subsidiaries, payments relating to policy and

contract surrenders, withdrawals, policy loans, interest payments and repayment of short-term debt and long-term debt. Our investment strategies are generally intended to provide adequate funds to pay benefits without forced sales of investments. For a discussion of our investment objectives and strategies, see Investments.

Cash Flows. Cash flow activity, as reported in our consolidated statements of cash flows, provides relevant information regarding our sources and uses of cash. The following discussion of our operating, investing and financing portions of the cash flows excludes cash flows attributable to the separate accounts.

Net cash provided by operating activities was \$1,638.2 million and \$1,829.1 million for the six months ended June 30, 2018 and 2017, respectively. Our insurance business typically generates positive cash flows from operating activities, as premiums collected from our insurance products and income received from our investments exceed acquisition costs, benefits paid, redemptions and operating expenses. These positive cash flows are then invested to support the obligations of our insurance and investment products and required capital supporting these products. Our cash flows from operating activities are affected by the timing of premiums, fees and investment income received and benefits and expenses paid. The decrease in cash

Table of Contents

provided by operating activities in 2018 compared to 2017 was primarily due to fluctuations in receivables and payables associated with the timing of settlements and a decrease in net cash flows for trading securities and equity securities with operating intent as a result of lower maturities in 2018 compared to 2017.

Net cash used in investing activities was \$2,341.5 million and \$2,504.3 million for the six months ended June 30, 2018 and 2017, respectively. The decrease in cash used in investing activities was driven by an increase in net mortgage loans sold or repaid partially offset by the acquisition of MetLife, Inc.'s pension fund management business in Mexico and the European real estate investment manager, INTERNOS, in 2018.

Net cash provided by financing activities was \$574.5 million for the six months ended June 30, 2018, compared to net cash used in financing activities of \$38.0 million for the six months ended June 30, 2017. The increase in cash provided by financing activities was the result of higher net investment contract deposits in 2018 as compared to 2017, partially offset by an increase in the acquisition of treasury stock.

Shelf Registration. Under our current shelf registration, we have the ability to issue, in unlimited amounts, unsecured senior debt securities or subordinated debt securities, junior subordinated debt, preferred stock, common stock, warrants, depositary shares, purchase contracts and purchase units of PFG. Our wholly owned subsidiary, PFS, may guarantee, fully and unconditionally or otherwise, our obligations with respect to any non-convertible securities, other than common stock, described in the shelf registration.

Short-Term Debt. The components of short-term debt were as follows:

	June 30, 2018	(in millions)	December 31, 2017
Other recourse short-term debt	\$	56.5	\$ 39.5
Repurchase agreements		8.0	
Total short-term debt	\$	64.5	\$ 39.5

The short-term credit facilities are used for general corporate purposes and borrowings outstanding can fluctuate as part of working capital management.

Long-Term Debt. As of June 30, 2018, no significant changes have occurred to long-term debt since December 31, 2017. However, on March 8, 2018, we entered into two contingent funding agreements that give us the right at any time over a ten-year or thirty-year period to issue up to \$400.0 million or \$350.0 million, respectively, of senior notes. For more information on the contingent funding agreements, see Item 1. Financial Statements, Notes to Unaudited Consolidated Financial Statements, Note 6, Long-Term Debt.

Stockholders' Equity. The following table summarizes our dividends to stockholders and repurchase of common stock.

	For the six months ended June 30, 2018	For the year ended December 31, 2017
	<i>(in millions)</i>	
Dividends to stockholders	\$ 295.8	\$ 540.0
Repurchase of common stock	396.5	220.4
Total cash returned to common stockholders	\$ 692.3	\$ 760.4

For additional stockholders' equity information, see Item 1. Financial Statements, Notes to Unaudited Consolidated Financial Statements, Note 10, Stockholders' Equity.

Table of Contents*Capitalization*

The following table summarizes our capital structure:

	June 30, 2018		December 31, 2017
		<i>(\$ in millions)</i>	
Debt:			
Short-term debt	\$ 64.5	\$	39.5
Long-term debt	3,219.9		3,178.4
Total debt	3,284.4		3,217.9
Equity excluding AOCI	12,777.2		12,683.8
Total capitalization excluding AOCI	\$ 16,061.6	\$	15,901.7
Debt to equity excluding AOCI	26%		25%
Debt to capitalization excluding AOCI	20%		20%

Contractual Obligations and Contractual Commitments

As of June 30, 2018, no significant changes to contractual obligations and contractual commitments have occurred since December 31, 2017.

Off-Balance Sheet Arrangements

Variable Interest Entities. We have relationships with various types of special purpose entities and other entities where we have a variable interest as described in Item 1. Financial Statements, Notes to Unaudited Consolidated Financial Statements, Note 2, Variable Interest Entities. We have made commitments to fund certain limited partnerships, some of which are classified as unconsolidated variable interest entities.

Guarantees and Indemnifications. As of June 30, 2018, no significant changes to guarantees and indemnifications have occurred since December 31, 2017. For guarantee and indemnification information, see Item 1. Financial Statements, Notes to Unaudited Consolidated Financial Statements, Note 9, Contingencies, Guarantees and Indemnifications under the caption, Guarantees and Indemnifications.

Financial Strength and Credit Ratings

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-Q

Our ratings are influenced by the relative ratings of our peers/competitors as well as many other factors including our operating and financial performance, capital levels, asset quality, liquidity, asset/liability management, overall portfolio mix, financial leverage (i.e., debt), risk exposures, operating leverage and other factors.

In April 2018, S&P affirmed the financial strength ratings of Principal Life and Principal National Life Insurance Company (PNLIC) at A+ . S&P upgraded PFG s senior unsecured debt rating to A- from BBB+ . The outlook remains stable for all ratings. Principal Life s enterprise risk management rating was affirmed as Strong . The rating affirmation reflects S&P s view that we have a very strong competitive position as a leader in the U.S. small to midsize 401(k) market, with strong asset management and insurance solution capabilities. The upgrade of the senior debt rating reflects growth in unregulated cash flow available to the holding company.

In February 2018, A.M. Best affirmed the financial strength ratings of Principal Life and PNLIC at A+ . The outlook remains stable for all ratings. The affirmation reflects Principal s very strong balance sheet strength as well as its favorable operating performance, favorable business profile and appropriate enterprise risk management.

In October 2017, Fitch affirmed the AA- financial strength ratings of Principal Life and PNLIC. Fitch also affirmed PFG s senior unsecured debt at A- . The outlook on all ratings remains stable . The rating reflects very strong and stable operating profitability and a very strong business profile, reflecting strong market position and significant operating scale focusing on small and midsize businesses in the retirement market.

In the fourth quarter of 2017, Moody s and Fitch changed their outlook on the U.S. life insurance sector to stable from negative . S&P continues to maintain a stable outlook as well. This outlook reflects their view that despite ongoing concerns over evolving issues that could negatively impact the U.S. life insurance sector, insurers have shown resilience by exhibiting very strong balance sheet fundamentals and good earnings and liquidity.

Table of Contents

A.M. Best continues to reflect a negative outlook reflecting its view that a negative impact on the U.S. life insurance sector could come from pressures such as the flattening yield curve, low treasury rates and evolving regulatory issues.

The following table summarizes our significant financial strength and debt ratings from the major independent rating organizations. The debt ratings shown are indicative ratings. Outstanding issuances are rated the same as indicative ratings unless otherwise noted. Actual ratings can differ from indicative ratings based on contractual terms. A rating is not a recommendation to buy, sell or hold securities. Such a rating may be subject to revision or withdrawal at any time by the assigning rating agency. Each rating should be evaluated independently of any other rating.

	A.M. Best	Fitch	S&P Global	Moody's
Principal Financial Group				
Senior Unsecured Debt (1)	a-	A-	A-	Baa2
Junior Subordinated Debt (2)	bbb+		BBB+	Baa3
Long-Term Issuer Default Rating		A		
Principal Financial Services				
Senior Unsecured Debt	a-		A-	Baa1
Long-Term Issuer Default Rating		A		
Principal Life Insurance Company				
Insurer Financial Strength	A+	AA-	A+	A1
Issuer Credit Rating	aa-			
Commercial Paper	AMB-1+		A-1+	P-1
Enterprise Risk Management Rating			Strong	
Principal National Life Insurance Company				
Insurer Financial Strength	A+	AA-	A+	A1

(1) Principal Financial Group's senior debt issuance has been rated Baa1 by Moody's.

(2) Principal Financial Group's junior subordinated debt issuance has been rated BBB by S&P Global and Baa2 by Moody's.

Fair Value Measurement

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (an exit price). The fair value hierarchy prioritizes the inputs to valuation techniques used to measure fair value into three levels. The fair value hierarchy gives the highest priority (Level 1) to unadjusted quoted prices in active markets for identical assets or liabilities and gives the lowest priority (Level 3) to unobservable inputs. The level in the fair value hierarchy within which the fair value measurement in its entirety falls is determined based on the lowest level input that is significant to the fair value measurement in its entirety considering factors specific to the asset or liability. See **Item 1. Financial Statements, Notes to Unaudited Consolidated Financial Statements, Note 11, Fair Value Measurements** for further details, including a reconciliation of changes in Level 3 fair value measurements.

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-Q

As of June 30, 2018, 41% of our net assets (liabilities) were Level 1, 55% were Level 2 and 4% were Level 3. Excluding separate account assets as of June 30, 2018, 3% of our net assets (liabilities) were Level 1, 97% were Level 2 and 0% were Level 3.

As of December 31, 2017, 41% of our net assets (liabilities) were Level 1, 56% were Level 2 and 3% were Level 3. Excluding separate account assets as of December 31, 2017, 3% of our net assets (liabilities) were Level 1, 97% were Level 2 and 0% were Level 3.

Changes in Level 3 Fair Value Measurements

Net assets (liabilities) measured at fair value on a recurring basis using significant unobservable inputs (Level 3) as of June 30, 2018, were \$8,548.7 million as compared to \$7,791.7 million as of December 31, 2017. The increase was primarily related to gains and net purchases in our separate account assets.

Net assets (liabilities) measured at fair value on a recurring basis using significant unobservable inputs (Level 3) as of June 30, 2017, were \$7,783.6 million as compared to \$7,779.6 million as of December 31, 2016. The increase was primarily related to gains in our separate account assets. These gains were offset by net sales of our separate account assets.

Table of Contents

Investments

We had total consolidated assets as of June 30, 2018, of \$252,104.0 million, of which \$82,404.8 million were invested assets. The rest of our total consolidated assets are comprised primarily of separate account assets for which we do not bear investment risk; therefore, the discussion and financial information below does not include such assets.

Overall Composition of Invested Assets

Invested assets as of June 30, 2018, were predominantly high quality and broadly diversified across asset class, individual credit, industry and geographic location. Asset allocation is determined based on cash flow and the risk/return requirements of our products. As shown in the following table, the major categories of invested assets are fixed maturities and commercial mortgage loans. The remainder is invested in other investments, equity securities, real estate and residential mortgage loans. In addition, policy loans are included in our invested assets.

Investment Results

Net Investment Income

The following table presents the yield and investment income, excluding net realized capital gains and losses, for our invested assets for the periods indicated. We calculate annualized yields using a simple average of asset classes at the beginning and end of the reporting period. The yields for available-for-sale fixed maturities are calculated using amortized cost. Prior to 2018, yields on equity securities classified as available-for-sale were calculated using cost. All other yields are calculated using carrying amounts.

Edgar Filing: PRINCIPAL FINANCIAL GROUP INC - Form 10-Q

For the three months ended June 30,						For the six months ended June 30,					
Yield	2018 Amount	Yield	2017 Amount	Yield	Increase (decrease) Amount	Yield	2018 Amount	Yield	2017 Amount	Yield	Increase (decrease) Amount
<i>(\$ in millions)</i>											

Table of Contents

Three Months Ended June 30, 2018 Compared to Three Months Ended June 30, 2017

Net investment income from fixed maturities increased primarily due to higher average invested assets in our U.S. operations.

Net investment income from other investments decreased due to a decrease in variable investment income primarily related to the sale of joint venture real estate in the second quarter of 2017.

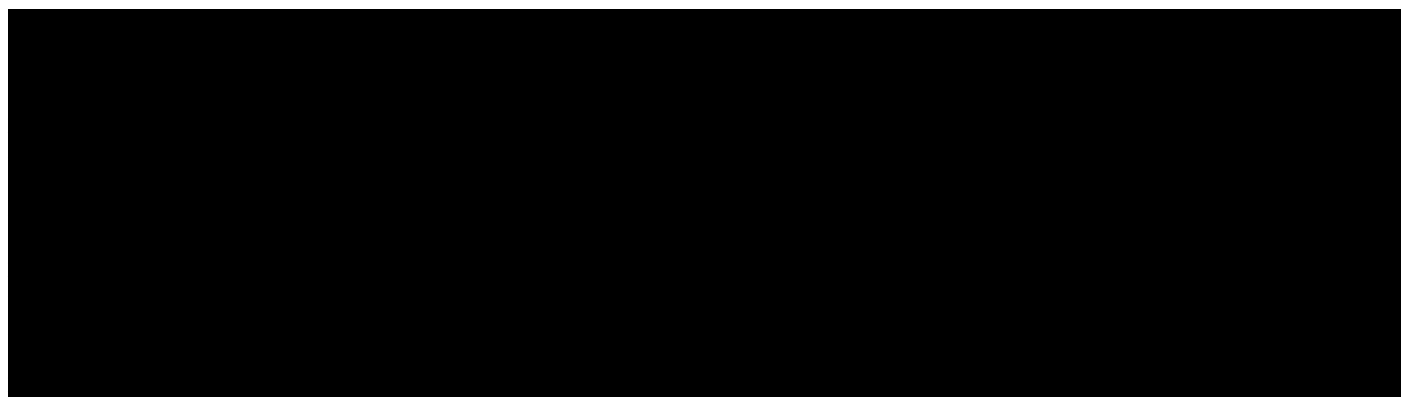

Six Months Ended June 30, 2018 Compared to Six Months Ended June 30, 2017

Net investment income from fixed maturities increased primarily due to higher average invested assets in our U.S. operations.

Net investment income from equity securities decreased primarily due to unfavorable relative market performance on our required regulatory investments in the pension funds of our Latin America business.

Net Realized Capital Gains (Losses)

The following table presents the contributors to net realized capital gains and losses for the periods indicated.

(1) Includes credit impairments as well as losses on sales of fixed maturities to reduce credit risk, net of realized credit recoveries on the sale of previously impaired securities. Credit gains on sales, excluding associated foreign

currency fluctuations that are included in derivatives and related hedge activities, were a net gain of \$0.0 million and \$0.8 million for both the three and six months ended June 30, 2018 and 2017, respectively.

(2) Includes fixed maturities, trading net losses of \$(1.0) million and \$0.0 million for the three months ended June 30, 2018 and 2017, and \$(1.4) million and \$0.0 million for the six months ended June 30, 2018 and 2017, respectively, which are a component of the GMWB embedded derivative hedging program net realized capital gains (losses) reflected in this line.

Three Months Ended June 30, 2018 Compared to Three Months Ended June 30, 2017

Net realized capital losses on fixed maturities, available-for-sale and trading noncredit increased primarily due to higher available-for-sale noncredit losses related to portfolio rebalancing during 2018.

Net realized capital losses on derivatives and related hedge activities decreased primarily due to decreased losses on the GMWB embedded derivatives, including changes in the spread reflecting our own creditworthiness, and related hedging instruments, decreased losses on interest rate swap derivatives not designated as hedging instruments due to changes in interest rates and losses during 2017 related to a terminated hedging strategy. These decreased losses were partially offset by currency derivatives that had increased losses due to changes in exchange rates.

Other gains increased primarily due to the sale of an equity method investment in 2018.

Table of Contents

Six Months Ended June 30, 2018 Compared to Six Months Ended June 30, 2017

Net realized capital losses on fixed maturities, available for sale credit impairments decreased primarily due to lower impairments on corporate and structured fixed maturities.

Net realized capital losses on fixed maturities, available-for-sale and trading noncredit increased due to higher available-for-sale noncredit losses related to portfolio rebalancing during 2018 and losses versus gains on trading securities related to changes in interest rates and credit spreads.

Net realized capital losses on derivatives and related hedge activities decreased primarily due to decreased losses on the GMWB embedded derivatives, including changes in the spread reflecting our own creditworthiness, and related hedging instruments, decreased losses on interest rate swap derivatives not designated as hedging instruments due to changes in interest rates and losses during 2017 related to a terminated hedging strategy. These decreased losses were partially offset by currency derivatives that had losses in 2018 versus gains in 2017 due to changes in exchange rates.

Other gains increased primarily due to the sale of an equity method investment in 2018. These gains were partially offset by losses in 2018 versus gains in 2017 on sponsored investment funds related primarily to mark-to-market changes.

U.S. Investment Operations

Of our invested assets, \$74,479.8 million were held by our U.S. operations as of June 30, 2018. Our U.S. invested assets are managed primarily by our Principal Global Investors segment. Our Investment Committee, appointed by our Board of Directors, is responsible for establishing investment policies and monitoring risk limits and tolerances. Our primary investment objective is to maximize after-tax returns consistent with acceptable risk parameters. We seek to protect customers' benefits by optimizing the risk/return relationship on an ongoing basis, through asset/liability matching, reducing credit risk, avoiding high levels of investments that may be redeemed by the issuer, maintaining sufficiently liquid investments and avoiding undue asset concentrations through diversification. We are exposed to two primary sources of investment risk:

- credit risk, relating to the uncertainty associated with the continued ability of an obligor to make timely payments of principal and interest and
- interest rate risk, relating to the market price and/or cash flow variability associated with changes in market yield curves.

Our ability to manage credit risk is essential to our business and our profitability. We devote considerable resources to the credit analysis of each new investment. We manage credit risk through industry, issuer and asset class diversification.

A dedicated committee, comprised of senior investment professional staff members, approves the credit rating for the fixed maturities we purchase. We have teams of security analysts, organized by industry and asset class, that analyze and monitor these investments. Investments held in the portfolio are monitored on a continuous basis with a formal review documented annually or more frequently if material events affect the issuer. The analysis includes both fundamental and technical factors. The fundamental analysis encompasses both quantitative and qualitative analysis of the issuer. The qualitative analysis includes an assessment of both accounting and management aggressiveness of the issuer. In addition, technical indicators such as stock price volatility and credit default swap levels are monitored. We regularly review our investments to determine whether we should re-rate them, employing the following criteria:

- material changes in the issuer's revenues, margins, capital structure or collateral values;
- significant management or organizational changes;
- significant changes regarding the issuer's industry;
- debt service coverage or cash flow ratios that fall below industry-specific thresholds;
- violation of financial covenants and
- other business factors that relate to the issuer.

We purchase credit default swaps to hedge certain credit exposures in our investment portfolio. We economically hedged credit exposure in our portfolio by purchasing credit default swaps with a notional amount of \$55.0 million and \$143.5 million as of June 30, 2018 and December 31, 2017, respectively. We sell credit default swaps to offer credit protection to investors when entering into synthetic replicating transactions. When selling credit protection, if there is an event of default by the referenced name, we are obligated to pay the counterparty the referenced amount of the contract and receive in return the referenced security. For further information on credit derivatives sold, see Item 1. Financial Statements, Notes to Unaudited Consolidated Financial Statements, Note 4, Derivative Financial Instruments under the caption, Credit Derivatives Sold.

Table of Contents

Our use of derivatives exposes us to counterparty risk, or the risk that the counterparty fails to perform the terms of the derivative contract. We actively manage this risk by:

- obtaining approval of all new counterparties by the Investment Committee;
- establishing exposure limits that take into account non-derivative exposure we have with the counterparty as well as derivative exposure;
- performing similar credit analysis prior to approval on each derivatives counterparty that we do when lending money on a long-term basis;
- diversifying our risk across numerous approved counterparties;
- implementing credit support annex (collateral) agreements (CSAs) for over-the-counter derivative transactions or similar agreements with a majority of our counterparties to further limit counterparty exposures, which provide for netting of exposures;
- limiting exposure to A credit or better for over-the-counter derivative counterparties without CSAs;
- conducting stress-test analysis to determine the maximum exposure created during the life of a prospective transaction;
- daily monitoring of counterparty credit ratings, exposures and associated collateral levels and
- trading mandatorily cleared contracts through centralized clearinghouses.

We manage our exposure on a net basis, whereby we net positive and negative exposures for each counterparty with agreements in place. For further information on derivative exposure, see Item 1. Financial Statements, Notes to Unaudited Consolidated Financial Statements, Note 3, Investments under the caption, Balance Sheet Offsetting.

A dedicated risk management team is responsible for centralized monitoring of the commercial mortgage loan portfolio. We apply a variety of strategies to minimize credit risk in our commercial mortgage loan portfolio. When considering new commercial mortgage loans, we review the cash flow fundamentals of the property, make a physical assessment of the underlying commercial real estate, conduct a comprehensive market analysis and compare against industry lending practices. We use a proprietary risk rating model to evaluate all new and substantially all existing loans within the portfolio. The proprietary risk model is designed to stress projected cash flows under simulated economic and market downturns. Our lending guidelines are typically 75% or less loan-to-value ratio and a debt service coverage ratio of at least 1.2 times. We analyze investments outside of these guidelines based on cash flow quality, tenancy and other factors. The following table presents loan-to-value and debt service coverage ratios for our brick and mortar commercial mortgage loans:

We also seek to manage call or prepayment risk arising from changes in interest rates. We assess and price for call or prepayment risks in all of our investments and monitor these risks in accordance with asset/liability management policies.

The amortized cost and weighted average yield, calculated using amortized cost, of non-structured fixed maturity securities that will be callable at the option of the issuer, excluding securities with a make-whole provision, were \$3,118.2 million and 3.5%, respectively, as of June 30, 2018 and \$2,869.7 million and 3.4%, respectively, as of December 31, 2017. In addition, the amortized cost and weighted average yield of residential mortgage-backed pass-through securities, residential collateralized mortgage obligations, and asset-backed securities - home equity with material prepayment risk were \$5,877.8 million and 3.2%, respectively, as of June 30, 2018 and \$5,538.6 million and 3.1%, respectively, as of December 31, 2017.

Our investment decisions and objectives are a function of the underlying risks and product profiles of each primary business operation. In addition, we diversify our product portfolio offerings to include products that contain features that will protect us against fluctuations in interest rates. Those features include adjustable crediting rates, policy surrender charges and market value adjustments on liquidations. For further information on our management of interest rate risk, see Item 3. Quantitative and Qualitative Disclosures About Market Risk Interest Rate Risk.

Overall Composition of U.S. Invested Assets

As shown in the following table, the major categories of U.S. invested assets are fixed maturities and commercial mortgage loans. The remainder is invested in other investments, real estate, residential mortgage loans and equity securities. In addition, policy loans are included in our invested assets. The following discussion analyzes the composition of U.S. invested assets, but excludes invested assets of the separate accounts.

Table of Contents

Fixed Maturities

Fixed maturities include bonds, ABS, redeemable preferred stock and certain non-redeemable preferred securities. Included in the privately placed category as of June 30, 2018 and December 31, 2017, were \$13.7 billion and \$12.7 billion, respectively, of securities subject to certain holding periods and resale restrictions pursuant to Rule 144A of the Securities Act of 1933.

Fixed maturities were diversified by category of issuer, as shown in the following table for the periods indicated.

A table is redacted with a large black box. Only a small portion of the table's structure is visible at the bottom right, showing a horizontal line and a vertical line that would define a cell.
