

Coeur Mining, Inc.
Form DEFA14A
April 28, 2016

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION

Washington, DC 20549

SCHEDULE 14A INFORMATION

Proxy Statement Pursuant to Section 14(a) of the
Securities Exchange Act of 1934

Filed by the Registrant Filed by a Party other than the Registrant

Check the appropriate box:

Preliminary Proxy Statement

Confidential, for Use of the Commission Only (as permitted by Rule 14a-6(e)(2))

Definitive Proxy Statement

Definitive Additional Materials

Soliciting Material Pursuant to §240.14a-12

Coeur Mining, Inc.

(Name of Registrant as Specified In Its Charter)

(Name of Person(s) Filing Proxy Statement, if other than the Registrant)

Payment of Filing Fee (Check the appropriate box):

No fee required.

Fee computed on table below per Exchange Act Rules 14a-6(i)(1) and 0-11.

Title of each class of securities to which transaction applies:

(1)

Aggregate number of securities to which transaction applies:

(2)

Per unit price or other underlying value of transaction computed pursuant to Exchange Act Rule 0-11 (set forth the amount on which the filing fee is calculated and state how it was determined):

(3)

Proposed maximum aggregate value of transaction:

(4)

Total fee paid:

(5)

Fee paid previously with preliminary materials.

Check box if any part of the fee is offset as provided by Exchange Act Rule 0-11(a)(2) and identify the filing for which the offsetting fee was paid previously. Identify the previous filing by registration statement number, or the Form or Schedule and the date of its filing.

Amount Previously Paid:

(1)

Form, Schedule or Registration Statement No.:

(2)

Filing Party:

(3)

Date Filed:

(4)

Explanatory Note

Coeur Mining, Inc. (“Coeur”) is filing a copy of a slide presentation dated April 28, 2016 intended to be used in meetings with stockholders.

Cautionary Statements This presentation contains forward-looking statements within the meaning of securities legislation in the United States and Canada, including statements regarding anticipated production, costs, and free cash flow. Such forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause the actual results of Coeur Mining, Inc. (“Coeur” or the “Company”), performance or achievements to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements. Such factors include, among others, the risks and hazards inherent in the mining business (including risks inherent in developing large-scale mining projects, environmental hazards, industrial accidents, weather or geologically related conditions), changes in the market prices of gold and silver and a sustained lower price environment, the uncertainties inherent in Coeur’s production, exploratory and developmental activities, including risks relating to permitting and regulatory delays, ground conditions, grade variability, any future labor disputes or work stoppages, the uncertainties inherent in the estimation of gold and silver ore reserves, changes that could result from Coeur’s future acquisition of new mining properties or businesses, reliance on third parties to operate certain mines where Coeur owns silver production and reserves and the absence of control over mining operations in which Coeur or its subsidiaries hold royalty or streaming interests and risks related to these mining operations including results of mining and exploration activities, environmental, economic and political risks of the jurisdiction in which the mining operations are located, the loss of any third-party smelter to which Coeur markets silver and gold, the effects of environmental and other governmental regulations, the risks inherent in the ownership or operation of or investment in mining properties or businesses in foreign countries, Coeur’s ability to raise additional financing necessary to conduct its business, make payments or refinance its debt, as well as other uncertainties and risk factors set out in filings made from time to time with the United States Securities and Exchange Commission (“SEC”), and the Canadian securities regulators, including, without limitation, Coeur’s most recent reports on Forms 10-K and 10-Q. Actual results, developments and timetables could vary significantly from the estimates presented. Readers are cautioned not to put undue reliance on forward-looking statements. Coeur disclaims any intent or obligation to update publicly such forward-looking statements, whether as a result of new information, future events or otherwise. Additionally, Coeur undertakes no obligation to comment on analyses, expectations or statements made by third parties in respect of Coeur, its financial or operating results or its securities.

Non-U.S. GAAP Measures - We supplement the reporting of our financial information determined under United States generally accepted accounting principles (U.S. GAAP) with certain non-U.S. GAAP financial measures, including adjusted all-in sustaining costs and adjusted EBITDA. We believe that these adjusted measures provide meaningful information to assist management, investors and analysts in understanding our financial results and assessing our prospects for future performance. We believe these adjusted financial measures are important indicators of our recurring operations because they exclude items that may not be indicative of, or are unrelated to our core operating results, and provide a better baseline for analyzing trends in our underlying businesses. We believe adjusted all-in sustaining costs and adjusted EBITDA are important measures in assessing the Company’s overall financial performance.

Cautionary Statements (continued) Reserves, Resources and Mineralized Material Coeur is subject to the reporting requirements of the U.S. Securities Exchange Act of 1934 and applicable Canadian securities laws, and as a result we report our mineral reserves according to two different standards. Canadian reporting requirements for disclosure of mineral properties are governed by National Instrument 43-101 Standards of Disclosure for Mineral Projects (“NI 43-101”). The definitions of NI 43-101 are adopted from those given by the Canadian Institute of Mining, Metallurgy and Petroleum. U.S. reporting requirements, however, are governed by the Securities and Exchange Commission Industry Guide 7 (“Guide 7”). Both sets of reporting standards have similar goals in terms of conveying an appropriate level of confidence in the disclosures being reported, but embody different approaches and definitions. Under Guide 7, mineralization may not be classified as a “reserve” unless the determination has been made that the mineralization could be economically and legally produced or extracted at the time the reserve determination is made. In our public filings in Canada and in certain other announcements not filed with the SEC, we disclose measured, indicated and inferred resources, each as defined in NI 43-101, in addition to our mineral reserves. U.S. investors are cautioned that, while the terms “measured mineral resources,” “indicated mineral resources” and “inferred mineral resources” are recognized and required by Canadian securities laws, Guide 7 does not recognize them. The estimation of measured resources and indicated resources involve greater uncertainty as to their existence and economic feasibility than the estimation of proven and probable reserves, and therefore U.S. investors are cautioned not to assume that all or any part of measured or indicated resources will ever be converted into Guide 7 compliant reserves. The estimation of inferred resources involves far greater uncertainty as to their existence and economic viability than the estimation of other categories of resources, and therefore it cannot be assumed that all or any part of inferred resources will ever be upgraded to a higher category. Therefore, investors are cautioned not to assume that all or any part of inferred resources exist, or that they can be mined legally or economically. In this presentation, and in our other filings with the SEC, we modify our estimates made in compliance with NI 43-101 to conform to Guide 7 for reporting in the United States. In this presentation, we use the term “mineralized material” to describe mineralization in mineral deposits that do not constitute “reserves” under U.S. standards. “Mineralized material” is substantially equivalent to measured and indicated mineral resources (exclusive of reserves) as disclosed for reporting purposes in Canada, except that the SEC only permits issuers to report “mineralized material” in tonnage and average grade without reference to contained ounces. We provide disclosure of mineralized material to allow a means of comparing our projects to those of other companies in the mining industry, many of which are Canadian and report pursuant to NI 43-101, and to comply with applicable disclosure requirements. We caution you not to assume that all or any part of mineralized material will ever be converted into Guide 7 compliant reserves.

Important Additional Information In connection with the solicitation of proxies, Coeur Mining, Inc. (“Coeur” or the “Company”) filed with the Securities and Exchange Commission (the “SEC”) and mailed to stockholders a definitive proxy statement dated March 29, 2016 (the “Proxy Statement”). The Proxy Statement contains important information about Coeur and its 2016 Annual Meeting of Stockholders. Stockholders are urged to read the Proxy Statement carefully. Stockholders may obtain additional free copies of the Proxy Statement and other relevant documents filed with the SEC by Coeur through the web site maintained by the SEC at www.sec.gov. The Proxy Statement and other relevant documents may also be obtained free of charge from Coeur by contacting Investor Relations in writing at Coeur Mining, Inc., Investor Relations, 104 S. Michigan Avenue, Suite 900, Chicago, IL 60603 or by telephone at (312) 489-5800. The Proxy Statement and other SEC filings are also available at www.investors.coeur.com. The contents of the web sites referenced above are not deemed to be incorporated by reference into the Proxy Statement. Stockholders may also call our solicitors if they have questions or need assistance voting their shares, or with requests for additional copies of the proxy materials: Morrow & Co. at (203) 658-9400.

Executive Summary Coeur Mining, Inc. strongly disagrees with the negative vote recommendation of Institutional Shareholder Services, or ISS, with respect to the advisory vote on executive compensation, or “Say-on-Pay” proposal to be voted on at Coeur’s annual meeting of stockholders on May 10, 2016. In its report, ISS asserts that there is a misalignment between Company performance and the compensation of our CEO. We strongly disagree with ISS’s analysis for three reasons: Due primarily to unprecedented declines in silver and gold prices the past three years (54% and 35%, respectively), Coeur’s three-year total stockholder return or “TSR” was negative 53%. During the same three-year period, our CEO’s total realizable pay declined 43% compared to grant date pay and proxy named executive officer or “NEO” realizable pay was 44% lower than grant date pay. This reflects a high degree of alignment between TSR and executive compensation. Zero payout for performance shares granted in 2012 and 2013 (forfeiture of \$1.3 million of original target award value for CEO). Significant loss in value of restricted stock vesting in 2015, in line with stock price decline (84% loss in value for CEO). Value of 2013 \$1.8M long-term incentive plan (“LTIP”) grant to CEO declined by 97%, resulting in CEO realizing \$46,693 of value. Coeur has met or exceeded its annual performance targets the past two years, which are rigorous and are designed to support the execution of the Company’s strategy that is intended to create long-term stockholder value. The impact of the Company’s strategy and its success in achieving its annual targets is being validated in 2016. Year-to-date, Coeur’s stock has increased by over 178%, compared to the Coeur-defined and Glass Lewis-defined peer groups which have each increased 66% and the ISS-defined peer group which has increased 28%. Despite strong performance relative to its annual performance targets, the Company’s Compensation Committee exercised negative discretion given the negative TSR, which significantly lowered annual incentive payouts to NEOs. It also incorporated feedback from stockholders into plan design going forward. Company performance component of the annual incentive plan (“AIP”) was reduced from 135% of target to 110% despite strong operational performance versus internal strategic goals. Individual component of AIP was capped at 100%, half of prior level, with highest ratings at 95%. As of April 22, 2016. For the reasons set forth above and in this presentation, we believe ISS’s recommendations are based on incomplete and inaccurate analysis and we urge you to vote “FOR” the advisory vote on executive compensation.

Relevant Terms We use the following terms in this presentation and in Coeur's 2016 Proxy Statement to describe our operations and results, some of which are non-GAAP financial measures. Please see non-GAAP reconciliation tables in the appendix to this presentation.

Term Definition **AISC** All-in sustaining costs **Ag Silver AgEq** Silver equivalent. Silver equivalence assumes silver to gold ratio of 60:1 unless otherwise noted. Average realized prices used for realized costs for FY 2013, 2014, and 2015 and 1Q 2016 were \$23.94, \$18.87, \$15.46, and 15.16 for silver, respectively, and \$1,327, 1,1252, \$1,143, and \$1,178 for gold, respectively. **FCF/free cash flow** Cash flow from operating activities, excluding capital expenditures and royalty payments **Unit costs AISC/realized AgEq ounce** Coeur uses AISC (as defined by the World Gold Council) per AgEq ounce to evaluate the Company's current operating performance and life of mine performance from discovery through reclamation. We believe this measure assists investors, analysts, and other stakeholders in understanding the costs associated with producing silver and gold and assessing our operating performance and ability to generate free cash flow from operations. As previously disclosed, for purposes of the Supplemental Incentive opportunity described in this presentation, the baseline AISC per AgEq ounce was adjusted to make achievement of the goal more difficult, by measuring cost reductions off a normalized level of general and administrative expenses rather than the elevated level of actual G&A expenses in 2013 due primarily to the relocation of the Company's corporate office to Chicago, IL.

Pay-for-Performance: Responses to ISS Report ISS Comment Coeur Response NegativeCompany financialperformance As shown in the charts on slides 16 and 17, Coeur's stock price and financial performance have a strong correlation to silver prices and is highly leveraged to changes in gold and silver prices. In 2015, average realized prices for silver and gold were 18% and 9% lower, respectively, than in 2014, which contributed to negative stock price performance. In 2016 to date¹, Coeur's stock price has increased over 178%, while gold has increased 16% and silver has increased 22%, further demonstrating Coeur's leverage to changes in metals prices. Despite the challenging metals price environment in 2015, tremendous progress was made to reposition and strengthen the Company and create long-term value for stockholders. Industry leading cost reductions. Reduced unit costs² by 22% compared with 2014 and 30% compared with 2013. Cut G&A by over 40% over the past two years. 38% increase in adjusted EBITDA² compared to 2014 despite lower metals prices. Two significant high-return acquisitions completed. Discovered new, high-grade mineralization around existing operations. Strong 1Q 2016 cost performance, combined with rising metal prices, contributed to a 16% increase in quarterly adj. EBITDA² since 4Q 2015 and a 46% increase compared with the same quarter last year. Year over year increase in CEO total pay tied to multi-year CEO supplemental incentive opportunity. CEO base salary for 2016 same for third year in a row. 21% lower AIP payout than in 2014. Significant erosion in value of 2013 and 2014 LTIP grants. Increase primarily attributable to payout of Component 1 of CEO supplemental incentive opportunity tied to an 18% AISC reduction since 2013. Arrangement entered into in 2014 for continuity purposes while Coeur executes its multi-year strategy to transform the Company to higher grades, lower unit costs, higher margins and free cash flow. Award only partially achieved - component tied to TSR through 12/31/15 not satisfied. Award relates to rigorous goals integral to achievement of the multi-year strategy. As of April 22, 2016. See non-GAAP reconciliation tables in the appendix to this presentation.

Pay-for-Performance: Responses to ISS Report (cntd) ISS Comment Coeur Response Above-target annual incentive payout despite negative financial performance AIP payments tied to internal operational and financial goals that are directly aligned with multi-year strategic initiatives and value creation for stockholders:Increasing productionReducing costsIncreasing operating cash flowOperating safely and responsibly2015 Company AIP targets set above 2014 levelsStrong Company performance result of 135%In light of Coeur's TSR performance, falling metals prices and in response to stockholder outreach efforts, the Compensation Committee exercised negative discretion to reduce Company performance to 110% for NEOs and capped individual performance levels at 100%. Approximately 20% lower 2015 AIP payout to NEOs than in 2014Beginning in 2016, 100% of CEO AIP incentive tied to Company performance Increased equity grant and above-median benchmarking of long-term equity grants Target LTIP grant values remained constant in 2015; increased number of shares due to lower stock price at grant date60% of LTIP grant in the form of performance shares tied to rigorous goals (as evidenced by zero payout for 2015 and 2014 performance cycles).LTIP target awards set at or above median of peer group to encourage and reward performance that drives stockholder value and retains talent; realizable pay tied to strong Company performanceMetrics tied to long-term stockholder value creation: outperforming peers on TSR and increasing operating cash flow per share and reserves and mineralized material per shareSignificant changes made by Compensation Committee for 2016:NEO award values now targeted within a variable range2016 LTIP grant values:reduced by at least 20% to account for low stock pricesat low end of new variable range2015 fixed percentages at high end of new variable range

Multiyear CEO Compensation Aligned with Stockholder Returns Realizable pay as of 12/31/2015 43% reduction primarily attributable to zero payout of 2013 grant of performance shares, sharp decrease in value of restricted stock and all stock options being significantly “underwater” Significant Reduction in Value of 2013-2015 Realizable CEO Compensation 1. “SCT” means the Summary Compensation Table included in Coeur’s 2016 Proxy Statement.* “Cash Incentives Paid” includes \$1M one-time payout for significantly beating multi-year cost reduction goal under CEO’s supplemental incentive opportunity.

Strong Link Between Realized Pay and Stockholder Returns 97% decline in value of 2013 CEO equity grant due to: Zero payout of performance shares for the 2013-2015 period Significant decline in value of restricted stock and all stock options significantly underwater; in line with TSR (realized value of \$46,693 as of 12/31/15)

Edgar Filing: Coeur Mining, Inc. - Form DEFA14A

Status of 2013-2015 CEO LTIP Grants Significant loss in value of restricted stock and 0% of performance shares and options “in the money” as of 12/31/15, consistent with negative three-year TSR Grant Year Type of Award Value at Grant Realized or “In the Money” as of 12/31/15 Unvested or “At-Risk” as of 12/31/15 2013 Stock Options \$450,264 \$0 \$0 Restricted Stock \$449,989 \$31,129 \$15,564 Performance Shares \$1,175,545 \$0 \$93,387 2014 Stock Options \$0 \$0 \$0 Restricted Stock \$779,990 \$57,985 \$115,970 Performance Shares \$1,330,968 \$0 \$260,933 2015 Stock Options \$0 \$0 \$0 Restricted Stock \$687,433 \$0 \$306,074 Performance Shares \$1,289,404 \$0 \$459,112 Total \$6,163,593 \$89,114 \$1,251,041 Represents value based on the closing stock price on December 31, 2015 assuming performance shares are paid out at target and does not represent speculation of whether such performance shares will vest in accordance with the terms of our LTIP. Performance shares granted in 2013 were forfeited with zero payout in January 2016.

Edgar Filing: Coeur Mining, Inc. - Form DEFA14A

2015 AIP – Exercise of Negative Discretion Targets designed to drive progress toward multi-year strategic initiatives Silver equivalent production: 35.2M (35.6M achieved) Cash operating costs per silver equivalent ounce: \$13.68 (\$13.08 achieved) Operating cash flow: \$87.5M (\$113.5M achieved) Safety and environmental performance: no employee fatalities, declining LTIFR², no notices of violation (NOVs), decline in permit exceedances, etc. Metric 2015 Result (% of target) Weight Weighted Payout (% of target) AgEq

Production	110%	25%	28%	Cash Operating Cost/AgEq ounce	125%	25%	33%	Operating Cash Flow	200%	25%	50%	Safety and Environmental Performance	100%	25%	25%	Total	135%	Adjusted Total
Due to Negative Discretion of Compensation Committee					110%													

Despite strong performance against targets, the Compensation Committee elected to exercise negative discretion due to Coeur’s TSR performance, falling metals prices and the macroeconomic environment, as well as input received from stockholders Silver equivalent targets reflect a 60:1 silver to gold price ratio during the period consistent with the Company’s financial reporting. “LTIFR” means lost-time injury frequency rate.

Board Responded to Stockholder Feedback Stockholder Feedback Response Reduce AIP to account for negative TSR year Compensation Committee exercised negative discretion to reduce NEO AIP payouts; payouts approximately 20% lower than 2014 for each NEO Variable rather than fixed LTIP grants Changed LTIP grant percentages (of base salary) from fixed to variable starting in 2016 with 2016 grants at low end of variable range (down 20% from 2015 grants) Ensure strong pay-for-performance alignment NEOs compensated for achieving both (i) objectives directly tied to creation of long-term stockholder value and (ii) strong relative TSR performance Zero payout for performance shares granted in 2012 and 2013 Value of vested restricted stock sharply lower due to lower stock price Target median of peer group Base salaries generally set at or below median of peer group, with CEO salary the same for third consecutive year AIP and LTIP target awards set at or above median of peer group to encourage and reward performance that drives stockholder value and retains talent AIP and LTIP performance metrics should encourage long-term performance In 2015, strong operational performance led to achievement of annual goals intended to create long-term stockholder value LTIP metrics encourage our executive team to build a stronger Company in the long-term by rewarding NEOs for outperforming peers on TSR and increasing operating cash flow per share and reserves and mineralized material per share Proactive Changes to NEO Compensation in 2016 Reflects Engagement with Stockholders

Executive Compensation: Pay-for-Performance Philosophy Guiding Principles Objectives Drive performance against critical strategic goals designed to create long-term stockholder value Majority of executive compensation in the form of variable compensation Attract and retain highly skilled executives Performance-based; provides leverage Reward company-wide results in addition to individual performance on objectives under the executives' control Meaningful and market competitive Median salaries Annual incentive target opportunities (AIP) between the 50th and 75th percentile Long-term incentive opportunities (LTIP) between the 50th and 75th percentile Standard all employee benefits and below-market executive benefits Aligned with stockholders; "cuts both ways" Provide a significant portion of compensation in the form of equity-based awards Transparency and simplicity Clearly communicate both the targets and the incentive pay programs used to reward the achievement of these results

Leading Executive Compensation Practices What We Do What We Do Not Do Pay for performance with strong alignment of realized pay to TSR No excise tax gross-ups, tax gross-ups on perquisites or tax gross-ups applicable to change-in-control and severance payments Proactive stockholder outreach with meaningful compensation program changes made based on feedback No hedging Coeur stock Annual Incentive Plan metrics drive stockholder value, with rigorous goals tied to Board-approved budget No pledging Coeur stock Majority of equity compensation in the form of performance shares with 3-year cliff vesting tied to relative TSR and rigorous value-driving internal performance metrics (zero payout last two years) No holding Coeur stock in margin accounts Majority of compensation “at-risk” No employment contracts for NEOs other than CEO Independent compensation consultant No re-pricing of stock options or SARs without stockholder approval Modest perquisites No guaranteed bonuses for NEOs “Double trigger” equity acceleration upon a change-in-control No “single trigger” cash severance based solely upon a change-in-control of the company Stock ownership guidelines for our directors and executive officers Clawback policy Annual stockholder “say on pay” vote

Coeur's Equity is Highly Leveraged to Gold and Silver Prices As of April 18, 2016. These tables were prepared using data provided by BMO Capital Markets. Coeur has not verified the assumptions made or the accuracy of the data used to create these tables. There can be no assurance that this information is indicative of the future performance of Coeur or others or that actual results or performance in response to the changes in the price of silver or gold will be consistent with this information. Accordingly, you should not rely on this information. Coeur does not intend to update or otherwise revise this information to reflect circumstances existing since their preparation or to reflect the occurrence of unanticipated event, even in the event that any or all of the underlying assumptions are shown to be in error. Coeur Remains Highly Leveraged to Metals Prices, Particularly Gold, Given over 60% of Coeur's Revenue is Now Attributable to Gold NPV 5% - Sensitivity to 10% Increase in Gold Price NPV 5% - Sensitivity to 10% Increase in Silver Price

Industry-Leading Cost Reductions See non-GAAP reconciliation tables in the appendix to this presentation. For purposes of silver and gold equivalence, a 60:1 ratio is assumed except where noted as average realized prices. Note: Wharf excluded from 1Q 2015 costs as no sales were recorded. Companywide Adj. AISC / AgEq oz1 2015 adj. AISC per realized AgEq oz1 were \$14.32, a 22% reduction from 2014 and a 30% reduction from 20132015 adj. AISC per AgEq oz1, using a 60:1 ratio, were \$16.16, a 16% reduction from 2014 and an 18% reduction from 20131Q 2016 adj. AISC per realized AgEq oz1 were \$13.73, a 25% reduction from 2014 and a 32% reduction from 20131Q 2016 adj. AISC per realized AgEq oz1 were \$16.05, a 17% reduction from 2014 and an 18% reduction from 2013In the chart below, we show silver and gold equivalents on both an assumed 60:1 silver-gold ratio, and the ratio reflecting actual silver and gold prices for the period. The 60:1 ratio is a common industry metric, but the actual realized price ratio more accurately reflects our actual costs of production.Demonstrates strategic initiatives are taking hold and reshaping the CompanyContinuing to advance strategy in 2015 and expect it to lead to further cost reductions, production growth, and strong sustainable free cash flow at current or even lower metals prices

Edgar Filing: Coeur Mining, Inc. - Form DEFA14A

Coeur is Consistently and Aggressively Reducing Operating Costs Coeur is an Industry-Leader in Consistently Reducing Costs Note: Percentage decline or increase in primary per ounce cost metric as publicly reported by each company in their full-year 2015 financial results. % Decline 4Q 2015 vs 4Q 2014 % Decline FY 2015 vs FY 2014 % Decline FY 2015 vs FY 2013

Highlights: 2015 and 2016 to date 2015 silver and gold production increased by 11% year-over-year to 35.6M silver equivalent ounces¹, at the high-end of guidance established at the beginning of 2015 Significantly reduced 2015 unit costs² by 22%, which beat guidance established at the beginning of 2015; 1Q2016 unit costs² decreased by 14% from same quarter last year Reduced corporate G&A by 20% YOY and over 40% compared to 2013 levels Acquired two high-return assets to augment Coeur's diversified portfolio of silver and gold mines Expanded underground mining rates at the high-grade, higher-margin Guadalupe deposit at the Palmarejo complex ahead of plan Reduced gold stream obligation at Palmarejo negotiated in 2014 expected to take effect in 3Q 2016 Commenced production from Independencia in early 2016, which is expected to further grow Palmarejo's future production and cash flow Discovered new high-grade silver and gold mineralization at Palmarejo, Kensington and Rochester Strengthened and maintained balance sheet flexibility by providing sufficient liquidity to support critical investments Operated safely and responsibly, with strong overall health, safety and environmental performance For purposes of silver and gold equivalence, a 60:1 ratio is assumed except where noted as average realized prices. See non-GAAP reconciliation tables in the appendix to this presentation.

(parent company of Alaska Airlines and Horizon Air), Pioneer Natural Resources Company (oil and gas), and Tera Tech, Inc. (engineering consulting). President and Chief Executive Officer of Pacific Star Energy LLC (private energy investment firm in Alaska) from September 2000 to present, with a principal holding in Alaska Venture Capital Group LLC (private oil and gas exploration company) from December 2004 to present; Executive Vice President of ARCO's Asia Pacific oil and gas operating companies in Alaska, California, Indonesia, China and Singapore from 1998 to 2000.

Executive Leadership

Mitchell J. Krebs – President and Chief Executive Officer. During his twenty year tenure with Coeur, Mr. Krebs has led nearly \$2 billion in capital raising and debt restructuring activities and has facilitated over \$2 billion of acquisitions and divestitures. Mr. Krebs was previously Coeur’s Chief Financial Officer and held various positions in the corporate development department, including Senior Vice President of Corporate Development. Mr. Krebs is a Director of the National Mining Association, President of the Silver Institute, and is on the Board of World Business Chicago.

Peter C. Mitchell – Senior Vice President and Chief Financial Officer. Mr. Mitchell came to Coeur from Taseko Mines Limited where he served as Chief Financial Officer, leading Taseko's financial operations, including sourcing strategic capital to fund the company's strategic growth plan. Previously, Mr. Mitchell was involved in leading and managing growth in private equity portfolio companies through acquisitions, integrations and greenfield initiatives.

Frank L. Hanagarne, Jr. – Senior Vice President and Chief Operating Officer. Mr. Hanagarne was most recently Chief Operating Officer of Valcambi, SA, a precious metal refiner in Switzerland. Prior to his appointment as operations head of Valcambi in early 2011, Mr. Hanagarne was a Director of Corporate Development for Newmont Mining Corporation. Mr. Hanagarne's 17 years of service at Newmont has included positions of increasing responsibility within key areas of Newmont's operations and business functions as well as environmental, health and safety.

Casey M. Nault – Senior Vice President, General Counsel and Secretary. Mr. Nault has extensive experience as a corporate and securities lawyer, including prior in-house positions with Starbucks and Washington Mutual and law firm experience with Graham & Dunn in Seattle and Gibson, Dunn & Crutcher in Los Angeles. His experience includes securities compliance and SEC reporting, corporate governance, mergers and acquisitions, public and private securities offerings and other strategic transactions.

Humberto Rada – President, Coeur South America and of Coeur’s Bolivian subsidiary Empresa Minera Manquiri, S.A. Prior to joining Coeur in July 2008, Mr. Rada served as General Manager for Newmont Mining Corporation’s Bolivian company Inti Raymi. Mr. Rada is currently President of Bolivia’s National Mining Association and has over 23 years of experience in South American mining and finance.

Hans Rasmussen – Senior Vice President, Exploration. Mr. Rasmussen has 30 years of experience in the mining business, 16 years of which were with senior producers Newmont Mining and Kennecott/Rio Tinto; as well as serving as a consultant for senior producers such as BHP, Teck-Cominco and Quadra Mining. Since 2004, he has been an officer or served on the Board of Directors of several junior public exploration companies with gold and silver projects in Quebec, Nevada, Argentina, Chile, Colombia, Peru, and Bolivia.
